OVER HALF A CENTURY **EATON'S** HAS BEEN RENOWNED FOR
GOOD VALUES AND FAIR DEALING

VALUE-GIVING AND SERVICE, backed by our Guarantee of "Goods Satisfactory or Money Refunded," are to-day the underlying principles of EATON'S business, just as surely as they were when the Store first started.

Year in and year out, the average of values offered in the EATON Catalogue, and the satisfaction that closes every purchase, have proved conclusively to the Canadian public that it certainly does pay to buy from EATON'S, whether at the Store in person or by mail.

And now that the Catalogue is in your hands, do not idly turn the pages over, but look into the values it offers, look into the broad selections there are, and realize that EATON'S Catalogue is truly important to you, whether you buy only your own personal needs or purchase all that is required by a family and a home.

WATCH FOR THE EATONIA LABEL THROUGHOUT THE BOOK

*It is a Symbol
of EATON'S
Value
Standard*

*Make it Your
Guide to
Practical
Economy*

Speaking generally, our experience has been that articles of good medium quality are most satisfactory to the greatest number of people.

At times the very best quality will be required. Sometimes the cheaper grades will do—but the majority of thrifty folk for most of their purchases prefer the intermediate qualities that are reliable, yet not high-priced.

The EATONIA label marks for you many lines of merchandise in this very satisfactory quality, each one priced to give you value that is hard to equal.

All through this Catalogue you will find the EATONIA Trade Mark. And wherever it appears, there you are certain of finding really reliable quality and remarkably good value.

Table of Sizes for Hosiery for Infants and Children
It is of the greatest importance that Children's feet should not be cramped. Stockings that are a trifle short draw the toes crooked and hurt the natural growth of the feet. It is much better to have a hose for a growing child allowing plenty of freedom of movement. Make sure of the sizes. See the chart on page 177.

Any negatives which produce a good clear print will also make a good enlargement, providing the size ordered is not too large. Generally speaking, a 2 1/4 x 3 1/4 negative will make a satisfactory 5 x 7 enlargement, while a 2 1/4 x 4 1/4 negative produces a good 5 x 8 1/2 enlargement and larger negatives make proportionately larger enlargements. We make enlargements in two different finishes, Black and White and Sepia Brown. When ordering be sure to order by catalogue number. Enlargements from Snapshot Prints when you have no negatives are 50c extra. Be sure to include return postage.

75-798. Enlargements from Vest Pocket Negatives on Postcards. Each, including return postage... **15c**

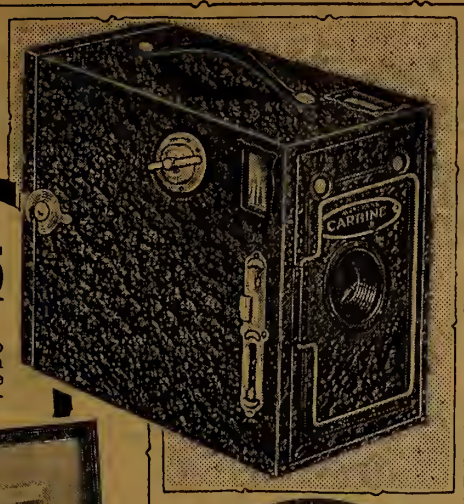

An Enlargement looks well in a neat frame. You will find such frames listed above, but please remember when selecting the size to allow for the mount, or when ordering ask for a frame to fit the enlargement and enclose enough money. We will then select the correct size for you.

SEPARATORS

"Vega" Cream Separators

The "Vega" Separator may be had in so many sizes that you can select one to meet your requirements exactly. In operation it is close-skimming and easy-running, and it is built to give lasting satisfaction. The moderate outlay required is an additional point in favor of these deservedly popular separators. Note the following details of construction that explain why they do their work so well:

Supply Tank.—The Anti-splash supply tank is a single piece of sheet steel, triple plated with tin; no seams or corners—easy to keep clean.

Skimming Bowl.—The driving spindle extends more than half way up the pressed steel bowl. The discs are interchangeable, and there are no small passages or holes, making a very sanitary bowl.

Bowl Spindle.—Is made of the finest Swedish steel with a removable point. The point revolves on a glass-hardened steel ball, eliminating friction.

Neck Bearing.—The "Vega" neck bearing is flexible, consisting of a simple hushing surrounded by a coil brass spring, with a sectional ring on the outside. The neck bearing takes up the vibration and makes the bowl self-balancing.

Gears.—Straight and spiral gears are used, made of bronze and steel. Entirely enclosed.

**A High Quality Range, Built to Give
Many Years of Dependable Service**

In addition to its all-round cooking and baking ability all the good qualities of neatness, compactness and beauty of appearance are possessed by this Steel Range—"The Commodore." Add to these the many conveniences that have been provided to make your kitchen work easier, and you have a stove that ranks high in the list of the best Canadian Ranges.

In size, design, trimmings, quality of materials and workmanship, it is all that could be desired, and a glance at the details of construction will convince you that it has every good feature of Ranges of much higher price.

Its low price is one of its most attractive features, and the wonder is that such an excellent range as the "Commodore" can be manufactured to sell at such a moderate figure.

The roomy **Warming Closet** has nickel-plated drop door and back fence, white enameled back with nickel-plated pipe damper and brackets.

The **Main Top** (which measures 45 ins. by 24 ins., including reservoir) is made of high-grade cast-iron, highly polished and needing no black lead. It is fitted with 6 lids, one of which is of the 3-ring sectional type, for using small-cooking utensils.

The **Oven** measures 20 x 20 x 13 ins., is a guaranteed baker, and is fitted with spring-controlled white enameled door into which is set a reliable oven thermometer.

The **Reservoir** is made of sheet copper, tinned inside; it holds 5 gallons and has white enamel front.

The **Fire Box**, when fitted for wood, takes 22-inch stick, and for coal burning has cast-iron linings and duplex grates. Accurate-fitting dampers give full and quick control. Pouch feed is a handy feature, allowing fuel to be added without disturbing cooking utensils on main top.

To give the "Commodore" a bright, cheerful appearance, the following additional parts are all heavily nickel-plated: Oven Door Frame and Hinge, Front Legs and Leg Base, Ash Pit Door, Feed Door and Reservoir Brackets.

CROWN HURON

THE "CROWN HURON" is a sturdy cast-iron range burning hard coal—a range with a splendid reputation as a cooker and baker, due to its improved two-flue construction. This assures evenly-distributed heat when baking which makes the "Crown Huron" very economical on fuel as well. THE "OLD HONESTY"

A Modern Stove for the Modern Housewife

THE "OLD HONESTY" is an up-to-date Steel Range that burns wood, soft coal or hard coal, consuming whatever fuel is used to the last ounce, and utilizing the full heat value obtained. It is sturdily and scientifically made, modern in all its details, and strikingly handsome in appearance. The large evenly-heated oven and capacious firebox, the heat-conserving, easily-regulated flues and drafts and its economy on fuel, lighten kitchen drudgery and do away with guesswork in cooking.

In addition, its polished surfaces and neat, durable nickel-work not only create a pleasing effect, but also are easily kept bright, clean and sanitary, requiring only an occasional wiping with a damp cloth.

These facts together with the constructional details stated below, attest the reasons for the marked popularity of this splendid range.

Oven is a splendid baker, and measures 20½ x 20½ x 15 ins.; fitted with two sliding oven racks, it will hold twelve 10-inch pie-plates; strongly braced oven door works easily, giving full access, and when down forming a handy basting shelf. Oven door fitted with thermometer.

Body is of heavy-gauge polished and oiled blue steel sheets, closely riveted with double air space between oven and main bottom, flues being thoroughly lined with asbestos millboard. Smoke flue is of cast-iron. Four substantial slip-on legs permit of cleaning beneath range. Two front legs are nickel-plated, as is front section of steel band around bottom. Range measures 60 ins. to top of warm-

ing closet. Main top over all measures 56 x 27 ins.

Top.—Polished cooking surface measures 42 x 27 ins., is 33 ins. from floor, and has six strong 9-inch interchangeable covers, one of reducing ring pattern. Top is in three sections, rigidly braced.

Firebox has heavy cast-iron linings. Front section of cast-iron lining has brick insert.

Boiling Section, an exclusive feature of this range, is operated by shaker, by which entire front top may be raised for boiling.

Warming Closet is roomy and convenient; fitted with drop pattern glass doors, forming handy shelves when open. In centre section is a reliable clock.

Reservoir holds about 11 Imperial gallons, and is made of planished copper encased in steel. Being alongside firebox, the water is kept at a high temperature.

"RED HOT" FURNACES

PIPELESS

98⁷⁵ With One Central Register

Shipped From Foundry

"RED HOT" Pipeless Furnaces are simple to install and operate, and because of their direct delivery of heat are very economical on fuel. If your home is compactly built and of moderate size, a "Red Hot" Pipeless is your logical choice. There is no heat wasted, the warm air pouring out of the one large register directly above your furnace circulates to every part of the house, keeping all rooms comfortably and evenly warmed. Your basement will always be cool enough for vegetables, and for every shovelful of coal you put into this furnace you will get big returns in heat.

The "Red Hot" Pipeless Furnace is of the same good construction as the "Red Hot" Furnace to the right, the difference being in the method of heat delivery. It is sold complete with casing and large floor register ready to install.

The installation of the "Red Hot" Pipeless Furnace is very simple, as there are no pipes above ground floor, central register being placed directly above furnace. Cold air is drawn from floor above, through the specially constructed register box, into base of furnace below heating zone. Cold air entering furnace cannot chill rising warm air because a heavy dividing lining of galvanized iron, asbestos and tin separates them. This assures splendid circulation of air, and a hot, even-burning fire. The "Red Hot" is built for burning hard coal only and is very economical on fuel. Damper in radiator on side of door nearest smoke collar gives a quick, short route for smoke when putting on fuel.

WARM AIR

60⁰⁰ with Casing **50⁷⁵** without Casing

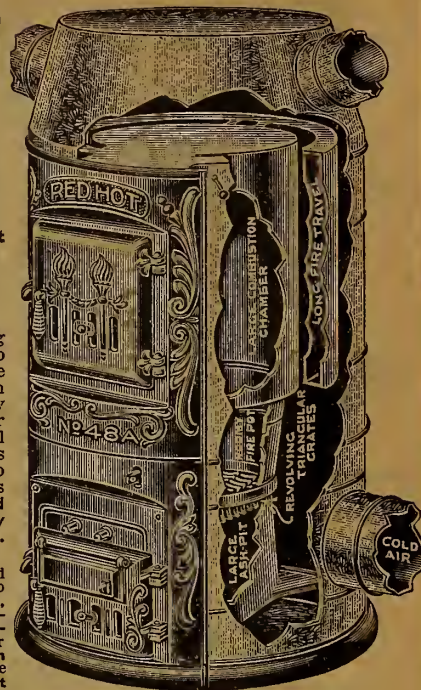

Shipped From Foundry

THE "RED HOT" is a hard-coal-burning furnace of simple, sturdy build, made to give you years of dependable service. One in your home assures you uniform warmth and comfort on the coldest days, with only one fire to attend to, and that in the cellar or basement, close to the fuel—no heavy coal or wood to carry about the house, no ashes mussing up your clean rugs and carpets, no taking down and putting up of stove-pipes every six months. It will give you better and more satisfactory heating results in every way, and all this with no greater cost in fuel.

Grates—Triangle rotary type, may be removed and replaced without tearing down furnace. **Firepot**—In two sections, avoiding cracking by expansion and contraction, and in case of repairs saving half the expense. **Radiator**—Compels smoke and gases to travel completely around furnace before escaping; baffle plate or smokepipe collar distributes heat full depth of radiator. **Combustion Chamber**—Has separate wall from radiator, making three steel surfaces in all throwing heat into casing. **Direct Draft**—Damper placed in radiator on side of door nearest smoke collar gives quick, short route for smoke when putting on coal. **Dust Flue**—Dust damper and flue take dust caused by dumping fire into smoke outlet.

Smoke Collar—Interchangeable, easily put on either side of furnace. **Drilling**—If you wish furnace drilled to connect to boiler add 1.00 to price, and state "Drilled" when ordering.

Size Required—If house is two-storey, multiply length of house in feet by width in feet, and multiply this total by 18. If house is three-storey, multiply by 27. The result is about the capacity of house in cubic feet. To assure plenty of heat for extreme weather allow 20 per cent. reserve for every ten degrees that your weather drops below zero.

Installing—We do not install furnaces outside Toronto, and recommend that you procure hot-air pipes and smoke-pipes locally.

Make hot-air pipes run as direct as possible giving advantage in size to long runs. Never put a hot-air pipe in an outside wall. Take cold air from coldest part of house to bottom of furnace casing as direct as possible. Cold-air pipe should be large enough to carry an amount of air equal to combined capacity of hot-air pipes. All hot-air pipes must continue to rise from furnace to registers.

When the fire is first lighted, the front sections containing the draft and dampers are put in place till the fire "burns up" and the gas is carried off. You will be surprised to see how quickly this is accomplished. Then the front sections are removed and you have a bright, cheerful, warm fireplace or grate.

We recommend the use of hard coal in this heater, but it will also burn soft coal, coke or wood. The frame, top, bottom and front are of cast iron. The back is of steel, lined with firebrick. A tip grate or firebasket is provided; movable section under urn at top for kettle or other utensil; front legs, foot rail and ornaments on front are nickel-plated. 42 ins. high to top of urn and 28 ins. wide. Shipped from Foundry. Price..... **16.00**

A Very Efficient Heater in Laundry or Kitchen

15-399 Considering its size and its low price this is one of the most useful and valuable little heaters we know of. You can boil a boiler full of clothes with it in a surprisingly short time; it will cook a meal, or it will heat a room piping hot with very little fuel.

It is just 20 inches high, so that you have no stooping or high lifting; the grate is the draw-centre style and the pouch feed allows fuel to be placed on the fire without disturbing utensils or boiler when these are being used on top. The two cooking holes are 9 size. Firepot is corrugated and is 1 1/4 ins. in diameter. Shipped from Foundry. Price. **8.00**

Stoves advertised in this Catalogue are shipped to our customers direct from the Foundry. When ordering, please allow sufficient time for shipment to reach you.

"The Hickory"

Burns any Wood Fuel and Throws Tremendous Heat

The "Hickory Air-Tight" is a plain Heater, oval in shape, that will, as the heading says, throw out a tremendous heat, and you can use any kind of fuel in it except coal or coke. It has a hot blast, down-draft device that makes it very economical on fuel, makes the fire easily controlled, and gives a more even distribution of heat.

By means of the hot blast down-draft, the cold air in the room is brought to the bottom of the stove; coming in contact with the hot outer jacket, it is heated as it rises and is discharged from the top into the room. Thus a "Hickory" will heat a larger space with less fuel than most other air-tight heaters of the same size. In fact, we guarantee that the "Hickory" will be found the equal, as a distributor of heat, of any direct draft, sheet-steel, air-tight stove using wood as a fuel.

Body is made of steel sheets securely joined to the heavy cast-iron top and base.

Firepot is steel lined, is securely attached to body of stove and is built to withstand the great heat developed in it.

Removable Top is of large size and permits the burning of large chunks or sticks of wood that could not be used for fuel in heaters of different type.

Dampers are of screw pattern, handsomely nicked and ground to an air-tight fit.

Nickled Work is handsome and durable. It comprises the ornamental urn which swings to uncover the large removable top lid, also screw dampers and two foot rails.

The inside measurements are 23 1/2 ins. long; 17 ins. wide; height to top of urn 43 ins.

The tightly-finished, smooth-jointed body is of rolled steel, cast-iron lined to prevent burning out.

Ashpit is large and deep, and ashpit door is fitted with slide register draft. Nickel-plated foot rails are attached to each side of body at base, and a handsome ornamental urn surmounts the top. Shipped from foundry.

The "Monarch" Hot Blast

Burning slabs, knots or any kind of burnable waste, as well as coal, hard or soft, the "Monarch" Hot Blast makes a splendid general-purpose heater. When burning wood, it operates as an ordinary stove. When coal is used, the iron hot blast pipe, feeding a current of heated air up through the body of the fire, causes full combustion of smoke and soot, and ensures a hot, clean, even fire.

The stove is of sheet steel, lined with thick firebrick, and is mounted on substantial cast-iron base and legs. Doors are accurately fitted, so that fire is easily controlled; dampers are of screw pattern, ground to an air-tight fit; grate is of draw centre type; swinging top permits of adding fuel from above when desired, and has 8-inch lid under urn.

The nickleed foot-rails, top rim and ornamental urn, and the simply embossed design of the cast-iron portions, give this splendid moderately-priced stove a good appearance in keeping with its proven ability as a reliable and satisfactory heater.

ORDERING BY MAIL IS QUITE EASY

All We Require Are a Few Simple Measurements

Bust Measure
Take measurement over shirtwaist or dress. Pass tape measure around the body over the fullest part of the bust, well up under the arms. Do not draw too tightly. Do not allow tape measure to slip down in back. Make no allowance whatever. We provide for all necessary allowances in the making for inner or outer garments.
If, for example, your actual bust measure is 38 inches, taken over your dress or blouse, then 38 is your correct size, whether you are ordering underwear, a blouse, a dress, or an outer coat.

Waist Measure
Pass tape around smallest part of waist over your skirt.

Front Length
Measure from TOP of waistband straight down the front.

Length Down Back for Dresses

Have someone take your measurements for you

For any style in women's and misses' dresses, give length from the base of neck to the edge of the hem, as shown to right. Wherever it is possible skirts are finished with 3-inch basted hem, which permits of easy adjustment to desired length.

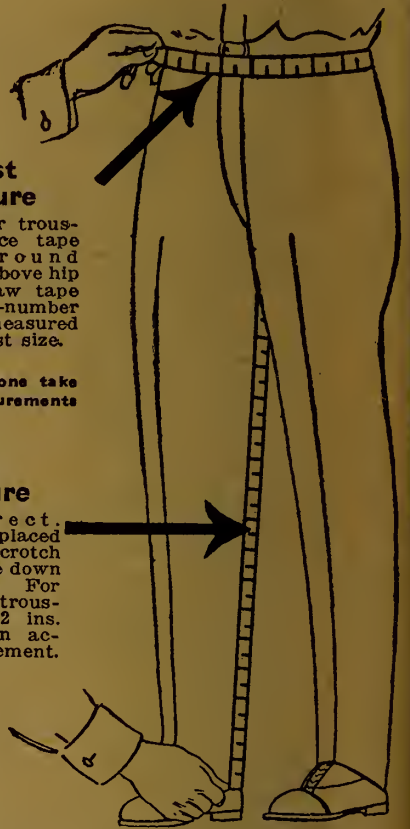

For Hats and Caps

Compare the number of inches your head measures with the scale printed on page 203. Have someone take measurement for you. Order size shown in scale.

Chest Measure

Take this measurement over vest. Stand naturally, do not expand. Place tape well up under arms and over shoulder blades in back.

Waist Measure

Take over trousers. Place tape measure around waist just above hip bones. Draw tape fairly tight—number of inches measured is your waist size.

Have someone take these measurements for you.

Leg Measure

Stand erect. Have tape placed close up to crotch and continue down leg to heel. For cuff-bottom trousers, order 2 ins. shorter than actual measurement.

WHEN ORDERING WOMEN'S CLOTHING

In the description of every garment in this book we state the size or sizes we require to correctly fill your order. Above we show how your measurements should be taken for sizes of all Garments. Have someone take these measurements for you, because when you try to measure yourself you are bending and turning the body, which makes it difficult to obtain correct measurements. Use the tape measure—use it every time you order. Don't depend on your last measurements.

GIRLS' DRESSES

Our dresses for girls are cut to standard measurements as follows:

Ages: 6, 8, 10, 12, 13, 14
Lengths: 26, 29, 32, 36, 39, 42

GIRLS' COATS

Girls' coats are cut to standard measurements as follows:

Ages: 6, 7, 8, 9, 10, 12, 13, 14
Lengths: 28, 30, 33, 34, 36, 39, 41, 42

It may be that your girl is large or small for her age; if so give the larger or smaller size that will fit.

BOYS' CLOTHING MEASUREMENTS

All our Boys' Clothing is made in full-fitting sizes, and in nearly every case the age of your boy is all that is necessary for you to state. If in doubt of a regular size fitting, send chest and waist measurement, also state weight, height and age. Chest measurement should be taken over shirt only. Have tape well up under arms and over shoulder blades at back. Waist measurement should be taken around waist just above hip bones. For your information actual measurements are listed below.

MEN'S CLOTHING

Do not try to take your own measurements. Have someone take measurements for you!

Suits—Chest, waist and leg length.

Overcoats, Raincoats and Slickers—Give chest measurement when ordering Overcoats or such outer garments. Do not make allowance for Suit worn beneath, because this is done in making the garment, so that the person who wears a size 38 in a Suit also wears size 38 in an Overcoat.

Overalls—Give waist and leg length. Smocks—Chest measurement. Combinations—Chest and leg measurement.

Trousers—Waist and leg length. Breeches—Waist measurement.

GIVE AGE, WEIGHT AND HEIGHT AS WELL AS SIZE!

Sweaters—Give chest measurement over waistcoat.

Underwear—For combinations and undershirts give chest measurement. For drawers give waist measurement.

Pyjamas—Give chest measurement.

**A Coat That Will Delight
You in Every Way**

84-631 So very good-looking is this Misses' Coat that if you were asked to guess its price you would probably name a much larger amount than this extremely modest sum. It is developed of soft, pleasingly-finished All-Wool Mohair Teddy Cloth, which has a woven overcheck, and bears a close resemblance to Zibeline. The fashionable Mandel (sheared European Lamb) in harmonizing color, faces the swagger new-style collar on this comfort-giving model, which is fully interlined with flannelette to give extra warmth, and nicely lined throughout with Shadow Stripe Sateen. Note the novel button and fabric trimming on sides and set-in sleeves that have turn-back cuffs and windshields. Pockets are conveniently located on this Misses' splendid Coat that will give every satisfaction. Price..... **16.95**

58-638 The surprisingly low price of this Woman's seasonable Dress shows that it pays to watch for the offerings on the Order Forms. Indeed, we assure you that here is a rare opportunity to save money in securing a Fall and Winter dress that you can rely on wearing well. The material is All-Wool Armure Crepe, a popular fabric that has an attractive pebbly weave. Inset full-length front panel is trimmed with fibre silk floss that forms the effective checked design illustrated. Has two inset pockets, neat all-round belt, braid piping on the neck, and long set-in sleeves. This warm dress that domes on shoulder is carefully made, and you will agree **3.95** that it is remarkable value. Price.....

EATON'S
TEAS

A 1-lb. Package Made, Weighed and Labeled Every 3 Seconds

On the floor above the tea packing machine, men are busy blending the tea in the big circular mixer, run by power.

After the tea is blended, it pours down the hopper into the twin scales which can be seen just above the machine.

These scales automatically and accurately weigh a pound of tea every three seconds.

Meanwhile, the tea machine, from the rolls of paper which enter it at the rear, has made double packages and brought them along a rack which passes under the scales.

At the right moment, by electric control, a pound of tea falls down the chute from the scales and drops into the empty package beneath.

Package after package is filled with unerring precision and passed under the tamper which press and pack the tea down in the package.

Then the top end of the package is folded over and finally the label put on.

Each operation, from blending to labeling is performed by machinery, thus doing the work of many hands, saving many hours and helping to keep the price of EATON'S Teas at the lowest possible figure.

Our Stock of Groceries is Very Large and Complete

If it were possible, we would list all the articles that are kept in stock by the Grocery Department.

But this Catalogue is not large enough for such a lengthy list, so the most important articles only are put in.

Keep this in mind when you need groceries. An article you want may not be shown in the catalogue, yet in all probability it is in stock and can be sent to you at once.

If you require something not listed, simply state what it is, allow enough money, and we will do everything in our power to fill your needs correctly.

For general baking purposes, Aunt Dinah Molasses seem to be a pronounced favorite. Its good quality and flavor, coupled with its very reasonable price, are, no doubt, the reasons why so many people order it again and again.

The syrup is dark in color and will impart a distinct flavor to cookies, gingerbread, etc. It does very nicely too, for candy making, sugaring popcorn and so on.

If you use Aunt Dinah Molasses often, the largest tin is the most economical to buy.

There's no speculation when one orders Bee Hive Corn Syrup. Its goodness is known all over the Dominion and its comparatively low price enables every home to enjoy its deliciously sweet flavor all the year round.

Bee Hive Brand is a blend of 9 parts corn syrup and 1 part cane syrup. It is thick and light amber in color with a mellow flavor. Can be used as it comes from the can or thinned when required for pancakes, etc., or given a maple-like flavor by the addition of "Mapleins" listed on page 6.

The "RESEARCH"

IN OUR RESEARCH LABORATORIES experts test the textiles, drugs, paints and other Catalogue commodities.

These tests safeguard our interests, for before our buyers decide on goods for the Catalogue they can be sure the merchandise comes up to specifications.

These tests safeguard your interests, for they assure you that the Catalogue merchandise is as represented in the illustrations and descriptions. For instance, before we state that a garment is All-Wool we must have a Research report saying it is All-Wool. If the Research report says a fabric is wool and cotton, we call it wool and cotton.

Also from time to time trained inspectors on the Research staff examine the goods being sent out to you to make sure that they are like the original samples. Thus you see that both for you and for us, the Research Department plays a part in ensuring you the satisfaction you expect in dealing with EATON'S.

The "D.A." PLAN

THE DEPOSIT ACCOUNT PLAN, or "D.A.," is especially convenient for Mail Order customers. Simply drop your order, with instructions to charge your "D.A.," into Rural Route box and parcel will be delivered as paid.

To open a Deposit Account, send a remittance of money to the "D.A." Office. You will be furnished with a "D.A." number by return mail. Then mail your order, instructing us to "Charge D.A. No." (giving your number). For your convenience as a reference, a statement of all purchases is mailed at the end of each month, showing balance to your credit. You may make deposits at any time or withdraw cash when you desire. Interest is allowed on your daily credit balance.
