IBSS

***BORN IN
SWITZERLAND.***

***BUILT TO
PERFORM.***

COMPANY HISTORY

iXS is part of the internationally operating hostettler group. What began in Wolhusen, Canton of Lucerne, in 1906 as a Swiss family business with a simple bike and motorcycle workshop has developed into a versatile company with 12 innovative subsidiary companies and more than 500 employees today.

The foundation for the present business form was laid with the formation of hostettler ag in 1957. A decisive step in the more than 100-year-old company's history was the acquisition of the general import rights for YAMAHA motorcycles in 1968. hostettler autotechnik ag was founded only four years later.

intercycle, the company operating in the bicycle sector, followed in 1979, iXS MOTORCYCLE FASHION, the brand of motorcycle apparel, in 1979, and hostettler motoren ag in 1987.

With hostettler gmbh founded in Germany in 1991, our Group directed its attention decisively toward Europe; the company cosmosport founded in 1998 embodies flexibility and openness in new trend sport markets. The launching of the brands iXS SPORTS DIVISION in 2001 and iXS TECHNICAL DIVISION in 2008 created other important foundations for a successful future.

As you can see, everything really revolves around the wheel in our business: motorcycles, bicycles, automobiles and everything that goes with them.

You can obtain additional information at www.hostettler.com

FUNCTION & THERMAL WEAR

iXS Compression Wear

Created using the very latest technology, iXS Compression Wear has been specially developed for true sports motorcyclists. Advanced tailoring technology and compression zones of varying strengths ensure optimal muscle support. Improved circulation heightens the wearer's concentration and improves his or her performance. The product prevents cramp and pulled muscles and noticeably shortens muscle regeneration time. It relieves strain on muscles in longer periods of extreme exertion and ensures they do not tire so quickly. The highly elastic flatlock seams are gentle against the skin and do not rub, ensuring optimal comfort and unrestricted movement.

NERVUS

iXS Function Wear

The benefits of clothing protection films such as GORE-TEX® or soltoTEX® offer the best results if worn in combination with micro fibre under garments. Such garments ensure optimal perspiration removal and are ideal for use on backpacking trips, when motor/push bike riding and during Nordic walking and related activities. Thanks to the Dryran® microfibre material and a specially developed knitting formula, underwear by iXS boasts a maximal perspiration transportation capability of 4l/m²/h. Bodily perspiration (sweat) is absorbed within seconds and then dries, leaving the skin feeling completely dry. Dryarn® is a hygienic, comfortable, ecological and naturally „bacteriostatic“ fibre that prevents body odor. iXS underwear ensures bodily well being in every weather.

ADONIS

Men's Function iXS long-sleeved shirt made of Dryarn® microfibre material

PRODUCT FEATURES

- + Offers the utmost comfort
- + No pressure points caused by distracting seams as a result of the advanced seamless technology
- + Extremely lightweight material due to the bi-component 3D-knit construction
- + Function zones are responsible for an efficient climate management by controlling the temperature and moisture conditions

- + Highly breathable
- + Hydrophilic finish quickly absorbs perspiration
- + Keeps the skin dry and comfortable cool

iXS Therm Wear

Underwear, which offers perfect insulation, is extremely important with severe temperature fluctuations and for trips in cold weather! iXS thermal clothing has a special 3 layer structure with outstanding cold insulation and optimum moisture transport. The layer next to the skin transports water vapour (sweat) away from the skin. The insulating middle layer protects against the cold, preventing the body from cooling down and transports the moisture further to the outer layer, which gathers the water vapour and quickly dries it. Therm iXS thermal underwear is the perfect complement to modern motorcycle clothing with membranes such as GORE-TEX®, soltoTEX® etc.

MARTON

Men's Therm iXS long-sleeved shirt made of single jersey

PRODUCT FEATURES

- + Backside brushed
- + Hydrophil finish
- + High elasticity

MATERIAL

Shell: 90% polyester, 10% elastane

black X33005-003 XS-3XL

MATERIAL

Shell: 90% polyester, 10% elastane

black X33008-003 W: DS-D2XL

THE GORE® WINDSTOPPER® MEMBRANE

The GORE® WINDSTOPPER® membrane is an ultra thin protective layer which is laminated onto a light textile and so provides absolute wind tightness. It consists of the many-sided polymer PTFE (Polytetrafluorethylene), which is stretched to receive a porous structure. The micro pores are 900 times bigger than the water vapour molecules, so that sweat can escape unimpededly. Thanks to this unique membrane technology all GORE® WINDSTOPPER® products are absolutely wind tight with an unchanged breathability and with no added weight to the original textile.

KENAI EVO

Functional jacket made of GORE® WINDSTOPPER® and elastic Coolon®

PRODUCT FEATURES

- + Completely wind-resistant and breathable in the chest, kidney, arm and back areas
- + Outstanding moisture wicking
- + Fast drying
- + Keeps the skin dry and warm

MATERIAL

WINDSTOPPER®: 100% polyester
Shell: 92% polyamide, 8% elastane
Fleece: 100% polyester

WINDSTOPPER® polytetrafluorethylene laminated

black X33507-003 XS-3XL

SITKA EVO

Functional pants made of GORE® WINDSTOPPER® and elastic Coolon®

PRODUCT FEATURES

- + Completely wind-resistant and breathable in the knee and seat area
- + Outstanding moisture wicking
- + Fast drying
- + Keeps the skin dry and warm

MATERIAL

WINDSTOPPER®: 100% polyester
Shell: 92% polyamide, 8% elastane
Fleece: 100% polyester

WINDSTOPPER® polytetrafluorethylene laminated

black X33508-003 XS-3XL

ALMERIA EVO

Light glove made of GORE® WINDSTOPPER® material

PRODUCT FEATURES

- + Windproof
- + Breathable
- + Fleece interior

MATERIAL

WINDSTOPPER®: 100% polyester
Shell: 92% polyamide, 8% elastane
Fleece: 100% polyester

WINDSTOPPER® polytetrafluorethylene laminated

Introduction of

mcFit[®] technology

In traditional membranes, the outer material, the membrane and the lining are loose layers that are only sewn together with connecting pieces at the fingertips. As a result, the individual layers can slip, which makes putting them on and taking them off difficult. The grip is also hampered by the spaces between the individual layers. In addition, the membrane can be damaged by the needle during sewing, which can result in permeability. With the new mcFit[®] technology, the individual layers are bonded together in the area of the fingertips using a special adhesive directly and without spaces between them. This prevents slipping of the individual layers and provides the glove with an excellent grip feeling.

TS-X

Sport glove made of goatskin leather

PRODUCT FEATURES

- + mcTex[®] membrane with mcFit[®] Technology for an improved grip
- + Light tricot textile inner lining
- + Ergonomically shaped fingers
- + Double layer of leather and carbon mouldings on the fingers
- + Superfabric[®] reinforcement on the little finger
- + Leather stretch inserts on fingers and back of the hand
- + Break-proof moulding made of carbon and PVC mix over knuckle
- + Double layer of Clarino on palm and thumb span
- + PU moulding and double layer of leather on ball of the hand

- + Wrist stretch adjustable with Velcro

PROTECTORS & ACCESSORIES

CENTER BACK

Back protector with a special NBR core (Nitrile Butadiene Rubber) offering excellent impact absorption

PRODUCT FEATURES

- + The material stands out because of its elasticity, cold and heat resistance
- + Great DVR values (compression set) deformation
- + Structure on body side 3D mesh, core structure consists of a sandwich construction consisting of one layer of polyethylene, a honeycomb and a NBR insert
- + The outer fabric is made of an abrasion resistant polyester
- + Adjustable shoulder straps
- + Waist belts with separate volume adjusters
- + Anatomically perfectly adapted and barely noticeable
- + Residual force to EN1621-2 is at 8,3 kN (limit Level 2: 9 kN)

black-silver-red X99581-392 S-L

CLEAVER JACKET

Light weight, high ventilated and race approved upper body armour

PRODUCT FEATURES

- + Multifunctional due to its multiple way wearing solution
- + Jacket, back and chest guard as well as rip cage, elbow and shoulder guards can be worn separately
- + HexMatter™ - aerated, ergonomically formed and shock absorbent light weight honeycomb construction
- + Armadillo™ - flexible and shock absorbent polypropylene back shells
- + Protection shells made of shock absorbent polypropylene at chest, shoulder and elbow areas
- + NockOut™ - shock absorbent soft padding at upper arm, elbow, rip cage and chest area as well as at all important and vital zones
- + Height and length adjustable waist belt
- + Multifunctional and adjustable carrier straps
- + +/-1700 g
- + EN1621-1 & EN1621-2 (Level 1)

PINLOCK PIN2

Pinlock® antifog visor system

PRODUCT FEATURES

- + Pinlock® fog resistant visor inserts ensure you have a clear view whatever the weather conditions
- + Pinlock® is created out of a moist absorbing plastic and the silicone seal on the pinlock creates an air tight double visor
- + It is easy to fit - placed between two adjustable pins

dark-grey Z4000-PIN2-DG
clear Z4000-PIN2-K

PINLOCK PIN1

Pinlock® antifog visor system

PRODUCT FEATURES

- + Pinlock® fog resistant visor inserts ensure you have a clear view whatever the weather conditions
- + Pinlock® is created out of a moist absorbing plastic and the silicone seal on the pinlock creates an air tight double visor
- + It is easy to fit - placed between two adjustable pins

clear Z4223-PIN-K

FOG CITY UNIVERSAL

Universal fog resistant adhesive visor lens

PRODUCT FEATURES

- + Adheres to the inside of most motorcycle helmet
- + Very easy and quick installation
- + The patented anti-fog coating reduces the formation of fog under normal temperature-humidity conditions

clear X97000-FOG-K

BREATH GUARD OFFROAD

Breath deflector

PRODUCT FEATURES

- + Universal for motocross helmets

MATERIAL

60% polyamide, 40% polyester

black Z4000-MAS-00

PINLOCK PROTECTION AUDITIVE

Hearing protection

PRODUCT FEATURES

- + Storage box with key and card holder
- + Re-usable
- + Silicon-free
- + Hearing protection in two sizes including one pair of filters
- + Sophisticated precision filter
- + Can be used with a communications system

IXS-SHOOTING *MAKING OF*

HOW TO KNOW YOUR SIZE

WAIST:

With women, take the measurement of the narrowest part of the waist, with men, measurement from slightly below the navel.

CHEST:

Measure the widest part of the chest, directly beneath the arms and across the shoulder blades.

HIP:

With women, take the measurement of the widest part of the hips, measurement from below the waist.
