SERVICE!

First, Last and All the Time

THE one word "SERVICE" sums up in a nutshell my chief aim in business, for only by giving you the most satisfactory service can I hope to win your future patronage and esteem.

I mean service, not only in delivery, but in the quality of the goods I sell you.

My line for 1914 is more comprehensive than it has ever been; full of exceptional values in the most dependable brands of Shoes and Rubbers—the kind you can sell to your customers with the conviction that they'll come back to you for more.

Just glance at the well known brands listed below. If you're in a hurry to have your orders filled, mark them "RUSH," and we'll see that you get them in good time.

**James Robinson, 182-186 McGill St.

Don't waste time matching Tan Leathers

Every minute spent in your factory in matching up tan leathers digs into your profits. This "matching up" is time-honored, but it is not necessary. It is the result of inefficient or careless workmanship in the tannery, and every foot of such leather you buy entails a direct loss to you.

You can easily get rid of this matching nuisance. You can buy a tan leather that does not require matching.

This "matchless" leather comes in two colors—brown and tan, and in three shades—Bestyet, Glazed and G. M. Of course, it's a Davis Leather.

Not only is a skin of this Chrome Russia Calf even in color from head to tail, and from skirt to skirt, but every skin of every lot is even in color. The substance of the matter is, that in the Davis factory there is only one tan, and only one brown, and every skin made up in either of these shades must hit the color exactly. No skin gets by unless it is absolutely a tan or absolutely a brown—half measure won't go in the Davis factory. The most complete and efficient leather organization in America protects you in this regard as in all others.

Put that money you lose now in matching into your profits.

DAVIS LEATHER CO., LIMITED
NEWMARKET, ONTARIO

**Just
do this:**

We have sample cuttings of this leather in both colors and in all finishes. Ask us to send you a set.

“The Line of Least Resistance”

Why handle a line of Felt Footwear that entails hard work with very little profit, when the “Elmira” Line is at your service ?

The “Elmira” line of unsurpassable quality felt footwear is essentially “the line of least resistance.” There’s a well defined and ever ready demand for “Elmira” felt shoes and slippers, that makes them a profitable source of revenue to the retailer.

For over thirteen years “Elmiras” have been supreme on the market and we have been continually specializing until at the present time, our products are as near a state of perfection as exceptional manufacturing facilities, expert workmanship, and good quality materials can make them.

This specialization has also enabled us to keep down costs and you’ll find the prices set on Elmira Felt Shoes and Slippers are, in many cases, no higher than those set on much inferior brands.

All the best retailers in the Dominion, stock and sell “Elmira.” DO YOU?

Look out for the jobber’s samples for 1914.

DOCTOR'S SPECIAL

OUR "Doctor's Special" shoe has always been made up to a standard, not down to a price. Being the pioneer in its field, it has been widely imitated—which has merely enhanced its high reputation.

Its extensive and increasing use proves that it occupies the premier place among shoes for Winter wear—**with men who care.**

MAKERS OF HIGH GRADE FOOTWEAR

Why C.F.HOVEY & CO. of Boston, Mass. Made a Change of Policy

The Hovey Store a Dominant Factor in New England For Over 67 Years

Now Featuring Queen Quality Shoes in Enlarged Shoe Department

When a store like C. F. Hovey & Co., Boston, makes a change in policy, there is always careful investigation, and sound reasoning behind it. All Boston, in fact, all New England, recognize the C. F. Hovey Store as one of the institutions of that city. The fact that a piece of merchandize is sold by this store, stamps it as being of honest value.

It has been the policy of this store not to handle named shoes, or, in fact, to feature any trademarked article; yet beginning with October 1st this year, the QUEEN QUALITY Shoe is the line featured in the \$3.50 to \$5.00 prices inclusive.

Before this change was made, the management of the store and the shoe buyer made a most thorough and exhaustive study of the QUEEN QUALITY proposition.

The QUEEN QUALITY Shoe was adopted only after the value of the shoe, and of the selling method, had been thoroughly investigated. Twice the management visited the QUEEN QUALITY factory. They bought QUEEN QUALITY Shoes at retail, and had them worn by their own help. They made inquiries from consumers who had worn the shoes as to their satisfying qualities. In short, they went at the problem in a thoroughgoing New England manner.

In speaking of the change of policy, recently, Mr. Johnson, one of the junior members of the firm, said:

"We finally decided to feature the QUEEN QUALITY Shoe because of the

merit of the shoe and the power of the proposition. This store is, and has been for years, one of the dominant factors in the substantial trade of New England.

"We believe the QUEEN QUALITY Shoe will fully satisfy this trade, and, in addition, appeal to the younger generation, and, therefore, be the means of opening new accounts, and of acquainting the younger people with the service and reliability of the store.

"After investigating carefully, we believe that the QUEEN QUALITY Shoe offers all that could be expected, at the price, in the matter of quality, fit and style, and that it will also be a means of attracting and holding trade irrespective of what value there is in the name and that the advertising and reputation of the QUEEN QUALITY Shoe is therefore an additional advantage which we do not have at present."

Mr. Leighton, buyer of the Shoe Department, in speaking of the change said:

"One of the best illustrations of the wisdom of featuring the QUEEN QUALITY line is shown in the fact that we had calls for more than fifty pairs of QUEEN QUALITY Shoes the day following the announcement that we were cleaning out our own line, and before the shoes were actually stocked.

"I believe the QUEEN QUALITY Shoe will give our customers the best possible service. It is made in a factory in which not the slightest detail is overlooked, and

for style and fit is unsurpassed at the price. And, yet, I expect to realize better profits in the sale of these shoes than from unnamed goods. Because any line being confined to this store enables us to base selling work on service instead of price.

"I consider that we have an advantage over the store which sells unbranded goods, because the responsibility of a manufacturer of an unbranded line ends with his sale to the store, not, of course, in the question of mechanical defects, but with regard to the sale of the goods.

"In the case of the QUEEN QUALITY Shoe, we have the co-operation of one of the biggest manufacturers in the country. He is as vitally interested in our sales as he is in his own. In fact, his sales in Boston are limited to the business we do, and after a careful investigation I know that the co-operation of the Thomas G. Plant Company in their stock department, advertising, etc., will mean more frequent turnover of our stock than would be possible with unbranded lines."

The featuring of the QUEEN QUALITY Shoes by C. F. Hovey & Co. is another indication of the consideration which the right named shoes, and especially the QUEEN QUALITY line, are receiving from the strongest retail stores in the country.

How about your own department? Are profits satisfactory? Does the stock turn as frequently as you would like to see it? If not, write for details of the QUEEN QUALITY proposition.

WALK-OVER POPULARITY

is evidenced by the hundreds of thousands of satisfied wearers all over the earth.

They are not looking for shoe satisfaction. They have found it.

Because—

In a pair of WALK-OVERS you get just a little more style, a little better wear and plenty of comfort.

We illustrate here two popular WALK-OVER models. The "Comfort" model for Men and the "Vogue" model for Women. These, with more than 160 others, are carried in stock ready to ship the same day your order is received at our two distributing points—Campello, Massachusetts, and St. Louis, Missouri.

"VOGUE" MODEL
Stock Dept. No. 2376
GUN METAL. CLOTH TOP
Sizes 2½ to 7. Widths AA to D

"COMFORT" MODEL
Stock Dept. No. 5255
VICI KID, WITH BOX KID TOP
Sizes 5 to 11. Widths A to E

There is always plenty of business waiting for a WALK-OVER representative. If there is no WALK-OVER representative in your town, it will be to your advantage to let us explain our proposition to you in detail.

A Word to
the Wise is Sufficient

Consider this fact, Mr. Shoe Merchant! Every man and woman who buys shoes **must** buy hosiery too. Then doesn't it stand to reason that the store which sells both shoes and hosiery will make a double appeal to its customers?

There's Business Waiting for the Shoe Store Which Handles *Penmans* Hosiery

So—stock Penmans full-fashioned, seamless hosiery! It will not only please your Old Customers, but start New ones coming your way.

Penmans is made for men, women and children, in cotton, cashmere, silk and lisle—any weight and all the popular colors.

Look for the trade-mark.

From NOW until SPRING

the demand for rubbers will be big. Whether you can satisfactorily meet this demand depends upon the kind of rubbers you have in stock.

If you have Independent Brands you are assured of many good sales. From past experience people know that they can absolutely rely upon Independent Rubbers to give them a full measure of satisfaction. They'll be asking you for "Independents," and if you haven't a supply in stock you'll be losing their good custom.

Our line for 1914 embraces a wide range of attractive shapes and patterns, as well as the "old stand-bys" that have been such good sellers in the past.

Your order to any of the "Independent" selling agencies will receive prompt attention.

Do YOU want
this added
sales pull?

The Doctor's isn't just a man's shoe that you buy in competition with other men's shoes. It isn't just a shoe that you sell merely because it fits well and looks good.

There is more to the Doctor's than there is to the ordinary men's shoe. There are features—real ones, and sensible—that give it a sales pull far and above that possessed by most shoes.

The Doctor's puts into the mouths of your salespeople convincing arguments and sound selling points—and it backs up every one of them. Its features are sensible, useful and reliable, preventing wet feet, making walking a pleasure and overcoming corns and other foot troubles. Every point of advantage in the Doctor's shoe can be easily, quickly and convincingly explained to a customer. There is nothing that can't be readily understood and appreciated.

ASK YOUR JOBBER FOR FULL INFORMATION ON

The PERTH Pleases the Most Fastidious

AT some time or another you must have encountered the "hard-to-please" customer—the woman whom it seems impossible to satisfy. She probably kept you a considerable time waiting upon her, then finally left your store—without making a single purchase.

To such a woman the Perth Shoe makes a particularly potent appeal.

With the Perth in your stock you can satisfy the needs of the most fastidious customer who enters your store. There's a note of dignity and refinement about the Perth Shoe that instantly compels attention, while the prices are not nearly as high as the attractiveness of the shoe would suggest.

You should carefully examine the many new appealing patterns our salesman will show you.

Those Customers with Bunion Trouble— Do You Do Anything for Them? Why Not?

And especially when there's big profit in it, and mighty little work. Many a shoe salesman has spent valuable time stretching shoes to ease a Bunion, when he could have sold the customer a Scholl Bunion Shield and put some cash in his till. Not only that, but by satisfying the customer he would have made a favorable impression that would later sell more goods. Sell every customer with Bunion trouble

Scholl's Bunion Reducer

A pure gum rubber shield so shaped that it fits snugly over the enlarged joint, next to the skin, relieving all irritation caused by the shoe. It excludes all air and retains the natural moisture of the foot, thus arresting further growth of the Bunion enlargement by its reducing action on the tissues. Fits all feet perfectly—no shifting or bulging—no larger shoe needed. Used with success by Chiropodists and Shoe Dealers everywhere.

Retail 50c. each, \$1.00 per pair—three sizes. Nearly 100 per cent. profit. Send for sample to-day.

The Modern Shoe Store is no Longer Simply a Place to Sell Shoes

The proprietor, or at least one of the salesmen, has studied Dr. Scholl's Free Book on "Scientific Correction for Ailments of the Feet," and is the authority on Foot Trouble in his locality. Popular demand created by Scholl's wide advertising has made it a place where foot-suffering humanity can obtain relief.

Who gets all this business in your town. Do you? Why don't you? A very small investment will put you in a position to make big profits on every pair of troubled feet. Foot-Eazers and other Scholl's Arch Supports, Bunion Reducers, Bunion Rights, Bunion Springs, Absorbo Pads and other Scholl's specialties are quickly and easily fitted—you increase your prestige as a foot specialist—and make money besides. Write to-day for a Scholl catalogue and samples. It'll be worth your while.

Scholl Specialties Are Big Profit Bringers

The demand for these appliances is established and is being increased by daily advertisement in magazines, newspapers, and newspapers. Live dealers—helping by using our posters, signs, cut-outs, booklets and literature—matter—are being helped to quite a little extra money, too. Increase your income—get in a line of business that will pay you.

LET SCHOLL ADVERTISING HELP YOU

We've taken this whole page to tell you that Scholl's Foot Specialties are big profit bringers. We've told you some of the WHY. If you're interested in what we've told—you'll be more interested in the rest. And in fact, you cannot well afford to be without it. Write for our catalogue and "First Step" assortment offer.

Three Reasons Why You Should Handle RIDEAU Shoes During 1914

First, because they represent the pick of the styles that have proven splendid sellers during previous seasons, and—

Because among them are some of the very neatest styles that have appeared for Spring selling.

Because they are made in an up-to-date factory, by skilled workmen under expert supervision—in short, made with sincere shoemaking ideals in view. All this is to your advantage.

How Do You Take Stock and on What Basis of Value?

It is Generally Supposed Retail Goods are Worth the Cost Price, But This is Not Necessarily So—Do Not Deceive Yourself by False Valuations for You Cannot Mislead Others—The Purpose of Stocktaking

You will be stocktaking during the present month in an effort to find out how you stand.

You wonder what your inventory will show and whether the figures will reveal that your shelves are loaded with a lot of dead stock or your goods are all fresh and clean.

The fact that many retail stocks are offered for sale through various mediums and the knowledge that few of these ever obtain a buyer at anywhere near the inventory price, is sufficient proof that there must be something wrong either with the inventory itself or with the method of figuring it.

Inasmuch as it is now inventory period, this article should be most timely and it is hoped that many retailers will adopt some of the suggestions herein. To begin with, some retailers do not take an inventory at all. Such dealers are hopeless cases so far as establishing a retail system is concerned, and one even doubts if their business is in a healthy or even paying condition. Happily, the number who conduct their business affairs on such a loose scale is being reduced through the efforts of live credit men for wholesale and manufacturing houses. These credit men insist upon seeing an inventory and in comparing the inventory with the stock in hand before they allow extended credit.

The True Value of Goods

It is generally supposed that retail goods are worth their cost price, but this is not necessarily so. Take the present leather market and you will find that available finished leather was made from high priced hides, which could not be duplicated for much less money. The finished leather cannot be sold at a price commensurate with the cost, and, therefore, in this instance, as in the case of retail stocks, there are times when goods are not worth in the market even the cost price of manufacture. Shoes are frequently included in this category. Suppose you bought a lot of tans at \$2.00 a pair, intending to sell them at \$3.00 a pair, and on January 1 you had 50 pairs on your shelves. You might reason to yourself something after this fashion: "Well, those are pretty good styles and there is no reason why I should not sell them next summer. If I depreciate them now, my inventory won't be so strong and I guess on the whole, I'll take the chance and put them in at cost."

Now here is what actually or possibly happens: Those tans don't go as well as was expected, and the 50 pairs only, dwindle down to 41 pairs after strenuous sale prices, etc. But you have them inventoried at cost, which means that you have been deceiving yourself right along. Now what

are you going to do? In a fit of wrath, you are likely to mark them down to \$1.00 a pair, and sell out the entire lot at a loss of \$41 over the original cost to you, but they have stood right along on your inventory as being worth \$82.

This is only one item, and when it is considered that it might run up into ten or a dozen such cases during a year with a fair sized business, on this same basis, it can be seen that you would have lost \$400 or \$500 more in the year than you supposed you had. Certainly this is not fair to yourself, and if you do this repeatedly with full knowledge of what it brings you, there is no reason why you should not be classed with the man who cheats as a game of solitaire. You are only beating yourself and certainly that is poor satisfaction.

Retail Stocks Hard to Sell

One great reason why more retail stores are not sold in response to the advertising of their owners, is because the inventory belies the case. Usually, the owner does not really believe he is misrepresenting things. He is so strongly possessed with the idea that the goods on his shelves must be worth what he paid for them that he can see no other logic

The writer once knew of a firm who purchased the stock in trade and good will of a shoe store in a thriving city. Shortly after the purchase, some defects in the stock were noticed, and later, over 700 pairs of shoes were sold to the junk man at 35 cents a pair, including the shoe laces and buttons on them. On the inventory, these goods showed a depreciation of about 10 per cent. on a cost price of better than \$2.50 per pair in the average. Moreover, the good-will was a myth, as the store had not enjoyed an enviable reputation for many years. The purchaser was stuck good and proper, and, after running the place for a little over a year, he closed its doors and stood a loss of over \$5,000. Here was a case where the owner had succeeded in fooling the buyer, but it did no good, for the purchase price was paid in installments, and was based on the representations made. When these discrepancies crept in, it resulted in a law suit, and the owner lost through having misrepresented affairs.

Depreciate Your Stock Yearly

Suppose that instead of trying to catch an unwary buyer, you depreciate your accumulated stock each year. When the time comes to sell out you can say to your prospect, "I have an inventory here which shows what the stock is actually worth in the store today. I have depreciated on

all the lines which are in any way unseasonable, and these figures I am showing you are absolutely reliable and true." Don't you believe that an interested party would be impressed with this sort of talk, and don't you believe that a sale could be much more easily effected in this manner?

What Do You Think Of This?

Only last week, I held a conversation with a dealer who had tried to sell his store. His price was out of reason with the value of the business. After repeated advertising, he gave up the matter and determined to try and make it pay for himself. He gave as his reason, however, "that buyers had no money when it came to actually buying and that they did not want to pay what the stock was worth." And I happened to know that he did have a lot of odds and ends in his stock, and that he took his inventory at selling price, and then deducted 25 per cent. from this total and called it a true inventory. Now, what do you think of that?

Travelers are Keen Judges

Traveling men for various houses run up against some very funny propositions when among the trade, and oftentimes they have much to do with securing credit for their customers. Much as a salesman wants to sell goods, he will rarely take on an account which he thinks will reflect on his judgment or cause any "comebacks." It is not possible to fool many of these bright men for they recognize many goods by the labels on the boxes and can classify them immediately as belonging to such and such a year. They know how much stock you have that is old and they know also about what your goods are worth. You cannot get far ahead of them in estimating values, for the simple reason that they are among retailers all the time, and they know better than you do what a fair valuation of your stock is.

Suppose now, that you ask for credit from some jobber and offer a statement of your assets and liabilities together with an inventory of your stock as the basis for such credit. Very likely the credit man will call around some day with the district salesman, and they will look over your stock. If you have a true account of it all, you will have little difficulty in getting an extension of credit, but if it is seen that you have grossly overestimated the valuation, it is likely that you will be refused.

Do Not Beat Yourself

Let us suppose a little more, and presume that you have asked for an extension when your business is in a tight place. If the credit man says, "Yes," your business is saved, but if he says, "No," every dollar you have in the world is likely to be lost. The view of the matter that appeals to us, is: Can you afford to take such chances when the greatest gain you can possibly secure by inventorying falsely is to beat yourself in your own store. With a proper depreciation allowed for dead stock and for wear and tear on equipment, the credit man will see that you have a correct insight into the problem of retailing, and he will have far greater confidence in you and your store than he would have under any other condition. These men are dealing with profits and losses all the time, and, when they see a dealer who realizes the importance of correctness in this detail, this same man stands out in their memory distinctly, and they are more inclined to be lenient with him.

If you do not need credit, you will find that proper accounting will secure for you the first and best offering on the market.

Salesmen will be instructed to call on your first, and thus you will be put in touch with many opportunities that otherwise would go to your more progressive neighbor. Illustrative of this, I remember a case wherein one of my employers was very decided in the matter of taking inventory. I noticed that about half of the traveling men visiting us

were those who had never sold us goods, and one day in a spirit of friendliness, I asked one of them why it was that he made a certain offer to us when there were larger stores in the city to whom he might have made it. He replied that his house had considered our firm the most desirable one to sell, because we were conservative and conducted our business along business lines. This set me thinking, and I then began to see a reason why we had to take our inventories twice, instead of once, as other firms did. Each six months, we took an inventory twice, using the second list to check the first. Oftentimes we found errors of hundreds of dollars, and, frequently, there would be whole shelves of goods overlooked in the first inventory, which would appear in the second one.

What Should Depreciation Be?

Now, to get down to actual figures in this matter of depreciation, I should suggest a depreciation of 5 per cent. each six months, or 10 per cent each year on store fixtures. This, as you will see, allows for a life of ten years for the store equipment. A few good firms figure more than this. As to stock, it should never inventory at prices above what you have offered it for sale. To explain this statement, we frequently find odds and ends of stock offered for sale during bargain periods for half price, and yet these same goods are listed in the semi-annual inventory at cost. This is manifestly unfair and only makes a showing which you have to overcome at some other period in your business. By figuring all these depreciations safely, your business is at all times clean. What profit you figure on this basis is really a profit of the kind you can bank on or borrow money on.

What is it Worth Right Now

Inventory your stock of shoes and findings at what you honestly believe you could get for them in the market if you were selling them right now. Never mind what they may be worth next summer or next winter. What they would bring now is the fixture in determining the inventory price if you want your business to figure safe.

"Too Busy To Read"

Not very long ago a subscription representative of the Bulletin was told by a merchant whom he was soliciting to subscribe to the paper that he had no time to read and consequently any thing he paid for the paper would be money wasted.

This is the kind of man who is continually bewailing his fate, whose business is always on its last legs, and whose competitors, both home and foreign, grew horns and a forked tail.

Furthermore, the man with no time to read is always apparently the busiest man in ten counties, fussing around with things that ought to be done by the clerk, who is allowed to loaf at his work and idle away his time.

This man dumps into the waste basket unread trade papers and circulars that have a direct bearing on his business and that contain matter which would help him raise it out of the slough of despond into which it has fallen.

The trouble with the man who has no time to read is that he has not learned that the successful merchant so arranges his work that he will have a reasonable amount of time for reading and for planning.

There is sure trouble ahead for the man who is so taken up with the small details of his business that he cannot find out how the other fellow is doing things and profit by the new ideas that are constantly coming to the front and making money for the merchant who adapts them to the special requirements of his individual business.—Twin City Commercial Bulletin.

The Real Value of a Modern Shoe Store Front

The Most Conspicuous Successes in the Retail Field Are Those Who Have Recognized Early the Import and Possibilities of Window Advertising—How to Make a Test of the Pulling Power of Displays—The Best Style of Front

Someone has estimated that fully fifty per cent. of the business done is done on the spur of the moment, the window display being responsible for the sudden desire of the customer for the articles shown. This estimate may be high, but it is a sure thing that a great deal of the business done is done by showing the goods, reminding men that they want certain things.

Some years ago the following paragraph was printed in many papers. The writer is fond of quoting it, because of its genuine worth.

Who Sees Your Window?

"How many people pass your shop in a day? If the average is ten a minute, in the eight busiest hours of the day 4,800 people must pass your window. This number represents what in newspaper parlance is called 'daily circulation.' Now, your show-window occupies, say, one hundred square feet surface, and in it you may display attractively quite a lot of shoes, changing the display as often as you wish. In a daily paper with an actual circulation of 4,800, 100 square inches (not square feet) would cost approximately \$10 to \$20 a day, and in this space you can only put illustrations of shoes, and as a rule these but imperfectly represent the articles. Now your window space represents a surface 144 times as great as this \$10 to \$20 newspaper space, has a depth as well as a surface, and in it can be displayed the footgear at different angles, and in a wide range of styles and patterns; and, furthermore, the shoes are seen at the entrance to your shop, inside of which a salesman stands

ready to give additional information, and exercise his abilities in making a sale. This window space is yours every day and all day; it presents wonderful possibilities as an advertising medium, and it is up to you to get those possibilities out of it. If newspaper space properly used is worth what it costs (and we are firmly convinced it is) how important it is that so valuable an advertising medium as the show window should not be neglected."

The Best Advertising Medium

Every shopkeeper ought to have that in his mind all day and every day. It is as true as anything is true. The window is one of the best advertising mediums, and in a great number of cases it is the very best of all. Do you wish to try the truth of this statement? It is easily done. Take any shoe that is almost daily called for, one that you can easily keep track of, and keep a record of the sales for one week without putting any of these on display in any way. Then put in your window a display of these shoes and keep a record of the sales for the next week, and compare the difference.

Then for the next test, try another style of shoe on an entirely different last. As a further test, take some slow seller, some style of toe or leather that is seasonable but is not called for often, and compare the sales of these with a display and without. Further, keep a true record for the week following the week they were on display. Then sum up the results. The showing will be something like this: First week, with no display, sales normal; second week,

A STRIKING DISPLAY OF SHOES SHOWN IN PARIS

Shoes arranged in irregular groups and displayed in pairs make the most attractive window. Large skins of the same color as the shoes, or in contrasting colors, improve the appearance of the window and hide the fixtures. Burlaps can be used to take the place of skins. Shoes should never

be displayed above the level of the eye, and small or medium sizes make the best window. Arrest the attention of the passerby by something out of the ordinary.—Illustration from "There's Money in Your Shoe Window," issued by National Cash Register Co.

with display, sales large; third week, no display, but the display of the week before still working, sales double the first week. This will be the average result in the average shop. Does this not prove the great value of the window?

The most conspicuous successes in the mercantile field are to those who have recognized early in their careers the full value of window advertising.

The store front should be kept as modern as possible. It is not an expense to make improvements, it is a splendid investment. The front is to the store what the setting is to a valuable brilliant, what the frame is to a picture. A poor window will kill the most fetching display of the most valuable footwear.

The Vestibule Front

Of late years there have been some remarkable changes in the shape and form of the show windows and entrance doors. At one time they were merely straight across, the only difference in them being in the size. Today there are a half-hundred different styles that are radically different in details as well as principles. The one most favored is the one that will afford the greatest amount of display space.

The vestibule or receding front has many advantages. It is a convenient place for prospective customers to enter and inspect the shoes, slippers, pumps, hockey boots, etc., on display. They are away from the jostling crowd and are almost inside the shop, instead of being just about to pass it when they have taken in the whole display. There is no other window just alongside that is perhaps as alluring as the one under inspection.

Get All the Improvements

Whatever you do in modernising your store front, see that it is an improvement, that you have all the improvements that are to be had. The cost is practically the same for a poor front as for a good one. Ask the architect, "glass men," the "light men," the "fixture men," and all the others who know something about windows, and frontages, for information before you do anything. They all have valuable pointers for the man who is ready to introduce modern ideas.

There should be a permanent background in every shop window. This will serve to keep the dust off the shoes, and as a setting for the display. It should be made perfectly airtight, if the trim is to be protected from dust.

The best background is made of wooden panels and mirrors. At any time when a special trim is to be made and a temporary one can be built in the window for the occasion.

A Window in Black and White

Hanan & Son, New York, recently showed an attractive window of shoes in black and white in their up-town Broadway store. The color scheme was carried out in black and white, with seasonable pumps and evening shoes. Two pedestals were draped in grass green plush and placed in the centre of the window space about five feet apart. On each pedestal a glass shelf was arranged diagonally, the ends of the shelves meeting at an angle toward the back of the window. On the shelf at the left side six pairs of slippers were placed in the following order; a black satin pump with rhinestone buckle, a patent leather pump with rhinestone heel, a white satin pump with black fur trimming, and in the centre of the shelf a black satin Tango dancing shoe on a form with rhinestone buckles at the intersection of the black satin lacings. On the other half of the shelf the same order prevailed. On the shelf at the right side the display began with a patent leather pump, with rhinestone heel, a black satin pump with white fur trimming, and a black patent leather Tango dancing shoe, the latter with large rhinestone buckle on a form. The mates of these slippers completed the shelf. On the floor of the window several pumps of suede, satin and patent leather, all carrying rhinestone buckles, were

arranged in pairs. Several unattached buckles were placed about among the shoes.

How to Become Good Window Trimmer

A salesman in a shoe house in a Manitoba town recently wrote: "I receive the SHOE AND LEATHER JOURNAL twice a month, and find it very interesting and beneficial. Would you be kind enough to give me some advice on window trimming? Can a man, by study, become a successful trimmer? Where could I get suggestions for the above? As you are aware, Christmas is rushing on and I would like to know where it would be possible to secure some ideas which would not cause too much expenditure to make a pretty holiday trim. I notice your excellent cuts of windows from time to time."

The following reply, which is self explanatory, was sent:

"The constant study of new ideas in window trimming, which are published from time to time in the SHOE AND LEATHER JOURNAL, will enable a man to become a thoroughly successful window trimmer. In order to get closer in touch with this information, we would very strongly advise frequent trips to the larger cities where you can make acquaintances with trimmers in the largest stores, who are always very glad, indeed, to meet men from smaller places; or if you are considering the work of window trimming as a profession, the best way of doing it would be to take a course in some such school as the Economist Training School, New York, or Koester School, Chicago; or what would be nearly as good would be to secure a junior's position with some good window trimmer (names furnished) who takes a great pride in teaching the boys the fundamental principles of window trimming, and some of the best trimmers in Canada today have secured their tuition through connection with these men.

"Many avenues of information for window trimmers are open. Another important one is the Canadian Window Trimmers Association, composed of window trimmers, card writers and advertising writers. This Association holds a convention in Toronto in August of each year. At this convention prominent men give lectures and demonstrations. For instance, last year instructors were present from The Economist Training School and Koester School, and other prominent trimmers gave addresses and demonstrations on other phases of window trimming work. We would strongly advise your becoming a member of this Association. The fee is insignificant when compared to the possible benefits, the membership for one year being \$2.00, and according to the writer's estimate, it should be worth at least \$50 to any man.

"Now, in reference to holiday trims, we are sending you some issues of our paper from which you can secure timely suggestions. Santa Claus in papier mache can be secured at \$3.50 each, as centre pieces for backgrounds, and other trims. These are effective and in view of the fact that they can be used for several years, their cost is not very great. We shall be pleased to give you any further information you may desire on this interesting subject."

The following answer came to hand. "Allow me to thank you for the JOURNALS and the good advice. I found the articles very helpful and interesting. I will try and get to the larger cities some time after the holidays. Will you please give me the address of the Secretary of the Canadian Window Trimmers Association. I am also going to take a course in chiropody, and I believe there are good openings, not only for window trimmers in the shoe line, but for those who understand the anatomy of the foot as it must prove a great advantage in proper fitting and relieving those who are suffering from pedal ailments.

"It may be said here, for the benefit of others similarly interested in window decoration, that the secretary of the Canadian Association of Window Trimmers, is F. J. Maxwell, 41 Stanley Street, St. Thomas, Ont.

"We Can no Longer Retain Our Present Prices"

Declared Chairman of Tanners' Section at Annual Meeting—Must Get an Advance on Ruling Quotations More in Keeping with Cost of Hides, Bark, etc.—Prohibit Slaughter of Female Cattle—New Officers Elected

The year just closed has been an eventful one in the history of the leather industry, said J. Sinclair, of Barrie, President of the Tanners' Section of the Board of Trade, at the annual meeting held in Toronto on December 19th.

At no time were tanners called upon to study the situation more closely than in the year 1913. Statistics upon statistics have been compiled. Volumes have been written until the shrewdest and most influential tanners in America shudder at the results of their investigations into the supply of hides. Indeed, so acute is the situation, that the general public, as well as our most talented and highest financiers, have been studying the problem of supply of cattle and beef, as increasing so much the cost of our living.

Hides Beat All Records

Hides, as you are all aware, have kept on advancing until they have surpassed all previous records. It is true that there has, this year, been a general retrenching in Canadian business owing to conditions in the Northwest and monetary stringency. All Canadian tanners curtailed their production in most classes of leather fully 50 per cent., and stocks of leather, both finished and in process, are lower than they have been in many years.

Fabrics and paper have been resorted to as substitutes for leather made from hides; this can only be temporary, as past experience have shown that the use of such substances has proven unsatisfactory.

In the United States a like curtailment has been going on among all tanners with a view of at least checking the price of hides. In face of this hides kept on steadily climbing, despite the monetary stringency, until we all have stock in our vats costing a price never known to Canadian tanners heretofore.

We tanners are only individuals, and are apt to get used to the everyday talk of high prices, but at this season of the year, when through checking our stock, we are confronted with figures that are, to say the least, disquieting. We ask ourselves the cause.

Cause of the Difficulty

While I will not attempt to go into statistics, I will give you a few figures as compiled by the United States Government.

In the last three years, their population has increased by 4,854,000; cattle have decreased 12,553,000. In the Argentine only one class, Frigorificos, showed an increase of 38,826 hides in the first six months of this year. Saladeros showed a shortage of 550,000. The total exports from the Argentine also showed a shortage in dry hides of 508,060, and wet salted a shortage of 583,891 hides. This same condition prevails the world over. In the Argentine legislation was passed prohibiting the slaughter of female cattle until they reached a certain age, with the view of keeping up the supply of beef. Our government (as well as governments of other countries) has been confronted with the problem of inducing the farmers to raise more cattle, and in my opinion we are nearing the time when our government should be asked to prohibit the killing of female cattle under five or six years of age.

In the last few weeks, since the duty has been taken off

cattle entering the United States, American buyers came over and to a large extent depleted the supply of cattle in Canada and took them across the border. The effect was, cattle on the hoof brought more money on Toronto market last week than the price paid in either Chicago or Buffalo.

We tanners must face these conditions fairly and squarely if we are to remain in business. It is true we have all been making every effort to improve and equip our plants with the most up-to-date machinery, and using the most modern methods of tanning until we have, at least for the time being, reached our limit in lessening the cost of our production. In face of all this, we can no longer retain our present prices, and must get an advance on the ruling prices of to-day more in keeping with the cost of hides, bark, etc., entering into the manufacture of leather.

A prominent Irish-American hide broker of Kansas City recently wrote:—

"So beholding a world-shortage of hides, one (to say the least of it) in prophesying of cheaper leather, should be well assured that the spirit speaking in him was a truthful one. While imagination is a beautiful gift, facts are not swayed in any manner by its ravings."

Country on a Sound Basis

It is gratifying to note, after a period of slackness in all trades, the few business failures throughout Canada, which proves our country to be on a sound business basis. Undoubtedly this is due largely to the shortening of credits. We tanners should bear in mind the force of this and keep working away with the object in view of getting the whole leather trade on a strict cash basis. Had the former terms of a few years ago been in vogue, viz., four to six months credit, a different tale would have to be told.

Trade in England has been brisk, and our exports in that direction steadily increasing. According to figures submitted by the Department of Trade and Commerce, Canada is in a better position to-day, with her exports relative to her imports, than at any time in the history of the country. These, coupled with an abundant harvest, which already has to some extent shifted the cloud of depression, liquidated to a large extent the commercial debt of both merchants and manufacturers, and given the air of freedom which we all appreciate.

Brother tanners, keep your nerve, work fervently and prudently, and the reward will be yours, concluded Mr. Sinclair.

The gathering was held at the National Club, Toronto, the members being first entertained to dinner by the retiring Chairman, Mr. Sinclair. There was a large attendance and several matters of much interest to the trade were considered.

A discussion took place in reference to the inspection of hides. At present in this district the inspection is voluntary and on a green basis, while in Montreal and Quebec it is on a cured basis. The Department of Trade and Commerce has for some time been communicating with the Tanners' Section to gain their views on compulsory inspection. After some consideration it was decided that the members were in favor of the inspection for quality only and not weight, this being deemed the fairest and most satisfactory method of dealing with this problem at the present time.

Officers Elected for the Year

The following officers were elected for the coming year: Chairman, S. Morley Wickett, Toronto.

Vice-Chairman, C. G. Marlatt, Oakville.

Secretary-Treasurer, F. G. Morley, Toronto.

Executive Committee—G. P. Beal, A. O. Beardmore, W. D. Beardmore, J. C. Breithaupt, A. R. Clarke, F. G. Clarke, Hon. E. J. Davis, Chas. King, J. J. Lamb, G. C. H. Lang, Geo McQuay, J. Sinclair.

Legislation Committee—Geo. P. Beal, R. M. Beal, A. O. Beardmore, W. D. Beardmore, A. R. Clarke, C. E. Clarke,

S. MORLEY WICKETT, THE NEW CHAIRMAN

Hon. E. J. Davis, H. B. Johnston, Chas. King, S. R. Wickett.

Transportation Committee—R. M. Beal, A. O. Beardmore, W. D. Beardmore, L. J. Breithaupt, A. R. Clarke, Hon. E. J. Davis, W. S. Edwards, H. B. Johnston, Chas. King, J. J. Lamb, G. C. H. Lang, John Sinclair, S. R. Wickett.

Corrects Some Wrong Ideas

J. M. Henderson, of Henderson Bros., Port Arthur, recently wrote the following letter to the Port Arthur Chronicle. The letter explains itself:—

"Having read the article on high cost of living in your paper of December 9th, and in particular where it says that shoes can be bought in the United States for \$2.25 and \$2.50, which have to be sold here for \$6.25 and \$6.50, I wish to contradict this. You can buy shoes here in Port Arthur for \$2.25 and \$2.50 which look all right externally. They have neither the material nor the workmanship in them.

Take any of the numerous branded American lines and what are they retailed for in the United States, \$4.50, \$5.00 and \$6.00. Other shoes are sold there for the low prices mentioned but they are made to sell, not to wear or for lasting qualities. I think that a Canadian \$2.50 shoe will outwear its cousin of the same price, but it has not the trimmings.

"I will also admit that the prices are higher here than in the States, about 10 per cent. in high-class goods and 20 per cent. in other lines. Their population has something to do with this, in other words their market is unlimited, while ours is limited."

In connection with the financial statement of J. McCullough, shoe retailer, 866 College street, Toronto, it was stated in the last issue that the assets were \$12,000 and the liabilities \$6,000. This was an error as the statement presented showed the assets to be over \$20,000. A satisfactory settlement was made by Mr. McCullough who is continuing business and the claims of all persons are being paid in full.

How Shoe Repairing Pays

"I fail to see why anyone should have the slightest doubt about the repairing department not being both beneficial and profitable, and certainly a well-equipped repair department which can turn out first-class work will prove a drawing card and increase business," says a western shoe retailer.

"By increased business, I mean this: Fifteen years ago I started an exclusive shoe repair business, and a very large percentage of the public would not patronize me, giving this reason, 'We always take our repairs where we buy our shoes.' This, in itself, was convincing proof that is for the retailer's benefit and profit to run a repair department. A few years later I started a retail shoe store, and my repair business commenced to grow right away. Furthermore, I found that the shoeman can command a much better price for his work than the ordinary repairer. This may seem strange, but it's true, and the public will pay a shoe dealer considerably more for attending to their repairs than the repairer receives. Very often a store keeper will carry a much better grade of leather, and have a better class of workmen, and generally he will pay more attention to his customers' needs—these, then, are the reasons why it is that the repair department is a splendid paying proposition for the retailer.

"As to the increased cost of material, I do not believe that shoemen need take fright as yet. There is still a splendid margin of profit to be made from repair work. Very often in this respect the users of sole leather stand in their own light by buying too cheap a grade of leather. Either they will not, or do not, understand that the old rule of the best is the cheapest here applies with double force, for the better the leather, the lighter the weight, thus lessening the actual cost.

"Now for the machinery side of the question: By all means get in modern repair machinery if you possibly can, but if you cannot, continue your repair department anyway. There is still a good margin to be made, even by the old-fashioned hand method. Referring again to increased cost, I am trying to interest repairers here to form an association to establish a staple price list, and it can be done if they show any amount of spirit and determination and lay aside the petty jealousies that sometimes exist amongst business men."

Stealing Shoes from Cases

"Yes," remarked a Toronto shoe retailer, "I read with a great deal of interest your article in the last number of the SHOE AND LEATHER JOURNAL in reference to goods being stolen in transit. Not long ago I had a shipment come in from London, Ont., in a packing case of box-board. The case was ripped open and out of the thirty-five pairs in it seventeen had been extracted. It is not unusual for us to have from one to a dozen or more pairs missing and we do not allow any shipments to come to us by freight in paste-board packing cases. It may be all right to ship that way by express. When we receive goods now we merely sign to the effect that they have been received, but not examined, as examination frequently reveals that several pairs of shoes are missing. In fact, some cases have been so badly broken into that the forwarding companies send along a statement to be filled out with the bill of lading in order that we may make the claim there and then. The habit of stealing things in transit appears to be increasing rather than decreasing. It is a nuisance to everybody connected with the trade, and I am sure that all branches of it will lend their assistance and support to the transportation companies in stamping out the evil."

Making Attractive Signs for the January Shoe Sale

The Proper Materials to Use—Large Canvas Signs Attract Attention—How to Use the Shield and Panel—The Selection of Brushes—Illustrations of Brush Stroke Alphabet—Give the Lettering Most Prominence

By R. T. D. EDWARDS, with the Robert Simpson Co., Toronto

Now that the Holiday Season is over and Christmas trade is a thing of the past, necessarily there is a business reaction. Unless some stimulant is applied, business generally drops off materially. It has been the custom for many years, for some retailers to put on sales in January. This month is becoming the most popular selling month of the year to reduce odds and ends in shoes and clear the way for spring goods.

A newspaper campaign should be started and signs announcing the sales should be prepared. Large signs are very often used, stretching the full width of the store front. This attracts the attention of the public and gives the impression that something unusual is going on inside. For the purpose of aiding the merchant and the card writer in making large signs of all sorts, this article has been prepared. Large cotton signs being most generally used, the method of making these will be described.

How to Make the Signs

If the sign is only to stay up for a few days, it is not necessary to make a stretcher for it. Two slats, tacked on the ends, will hold it in place for a short time. But when a sign is to be left up for a month, it should be put on a stretcher made up as shown in Fig. 1. The sketch shows supports on each angle, but this is not necessary for small signs. The frame should be made of one by three inch strips and the corners can be made exceedingly strong by the method shown in Fig. 2. Should it be necessary to make a splice to lengthen a piece, do so after the manner shown in Fig. 3. Sign writers' cotton is made three feet wide, therefore the full width of the sign should not exceed 32 inches. That will leave sufficient room to put it on the stretcher successfully. Tack one side

on full length at first, then the opposite side, leave the ends until the last and wrinkles are less liable to appear. Since sign writers' cotton has a prepared surface, for this kind of work, it should be used, if at all possible, but if it cannot be procured, get a cotton that is well sized with starch. Avoid a surface that has lint on it. A full-fledged sign writer tacks a sign on a wall to write it, but the card writer who is used to writing on a slant surface table should place the sign at the angle which he has been accustomed to use.

Black paint should be mixed from drop black ground in Japan and thinned down with turpentine to the proper flowing consistency. All other colors can be secured in Japan. Water colors, such as are used for show card purposes, can be used successfully on cotton signs that will be used inside the store where dampness will not affect it.

Use Care in Selecting Brushes

Brushes for the work must be selected with care, as cotton signs are like show cards and must be done quick. Fig.

ABCDEFGHIJKLMN
OPQRSTUVWXYZ
abcdefghijklmnopq
rstuvwxyz3A

No. 4 illustrates the style of brush used to procure the best results for this work. These may be secured in almost any width desired. And they make a good clean letter. As on quick show cards, one stroke should be used in cotton work where possible, unless an extra wide letter is required. In that

case, an outline letter is necessary. The brush stroke alphabet, which is illustrated this month, is the most popular for cotton work. It has been made in two tone grey, so that each stroke can be easily followed. By following this, there should be no trouble in making a well formed letter. Use a soft pencil very lightly, with which to space out the signs. Do not start to letter before places for each letter have been properly spaced. Do not trust to luck to get them all in. Fill the brush well with paint and work it out on a piece of glass before applying to the cotton. Work with a free arm movement and the arm or hand should not be rested on the sign. Enough paint should be carried in the brush to complete one stroke without having to go back over it. Care should be taken to get a uniform width stroke and to have both edges clean cut. A good point to remember when lettering out any sign or show card, is to give the wording the most prominence. Anything ornamental in the way of scroll, shading, etc., should only serve to make the lettering stand out more prominently.

Besides the cotton sign, many other ideas are used in the way of signs for use in January sale decorations. The shield and panel are used very successfully, an illustration of this being shown in Fig. A.

Can Styles Be Standardized?

One noticeable tendency in the matter of styles of boots and shoes which has been brought about by the concentration of shoe manufacturing in large factories is a tendency to standardize and reduce the number of styles shown each season, says American Shoemaking.

A rule to which there are many exceptions is that the most successful shoe manufacturer is the one making the fewest number of styles, in other words, the concern that has carried the specialization of product farthest. At the successful Walton factory, as everybody knows, specialization has even gone to the extreme of making but one style of

boys' shoes and one style of women's and misses', even eliminations of many of the widths is practiced.

It is not surprising, therefore, to find many boot and shoe manufacturers back of a systematic effort to bring about a standardization in styles. The method suggested for making the idea effective is to appoint a committee from those factories supporting the movement who will meet at the beginning of each season and determine what styles will be shown during that season.

Of course, such a movement will not be popular with everybody, as much trade is gained through retailers showing novelties, and the public is, without doubt, induced to purchase many dollars worth of additional footwear through the offering of new attractive models.

As an efficiency problem the idea appeals to American Shoemaking, so far as the manufacture of men's shoes is concerned, but in the production of women's footwear, we do not believe it to be either feasible or desirable. Constantly changing styles, while involving a large primary expense for the manufacturer is the sole excuse for the existence of many factories, where the entire season's run is often due to the introduction of snappy designs different from those shown by competitors. Then, too, the ability of American manufacturers to find markets for their product abroad is, in a large measure, due to the offering of styles which change with such frequency that competition from foreign manufacturers is rendered well nigh impossible.

The standardization of styles would, we believe, eliminate a considerable percentage of the output of footwear, and for this reason we believe it is impossible to make it generally effective on women's shoes.

It cannot be gainsaid that, judging purely from the standpoint of production, that is, producing the most dollars of intrinsic value for least cost, the idea is one which deserves support. The American public, however, is not, fortunately, compelled to purchase all of its wearing apparel upon the basis of intrinsic worth, but has been and, we trust, always will be in a position to indulge in fads and fancies that appeal to the eye as well as to the pocket-book.

The Passing of the Floor Walker

In modern retailing there is a growing tendency to take a more serious view of the men who hold positions in stores. In a little store paper issued by a certain large city store, some interesting comments are made on this subject. The "clerk" or "clark" of twenty years ago has been replaced by the "sales people." In some instances the "window trimmer" has become the "display manager" and now the "floor-walker" is to leave us. It is bad enough when customers come up to you and ask if you are a "floor-walker," but it is a good deal worse when employes of the store speak to customers and say, "Wait a minute, ma'm, and I'll call a floor-walker." Now the term "floor-walker" is obsolete. In the olden days the term aptly described the duties of the person who bore it. He was generally a beautiful man with curling mustache, whose principal duty was to stroll nonchalantly around the store, greeting customers here and there. He was a floor-walker, sure enough, and that is about all. The man on the job nowadays is called in this store a Floor Superintendent. He is directly responsible for the section to which he is assigned. He represents the firm on delicate matters of adjustment of credits, he has charge of the help, he must know all about the system of the store from the time the delivery is made in the afternoon in a far distant section of the city to the way shoes are manufactured, he has a book of rules to follow himself and another bookful that he must see that the salespeople adhere to. He's a foreman, watchman and policeman, and half a hundred other things. In justice to his position please refer to him as a 'Floor Superintendent.'

Is Competition in the Retail Shoe Trade Overdone?

How Many Stores Can a Town Stand?—What is the Result Where There Are Too Many in the Trade?—Why One Dealer Succeeds Where Others Have Failed—Some Points that Should be Taken into Consideration

Are there too many shoe shops in the average Canadian town, or rather stores selling shoes? Ask any traveler and he will tell you that nearly every centre, large and small, is done to death with establishments that handle footgear in greater or less quantities.

How many shoe stores can a town stand? Is there any standard by which the trade can go, or is it a case of jump in and try to beat the other fellow out, with the result that nobody makes more than a bare living. The struggle becomes a hand-to-mouth affair and the outcome is that prices are cut and slaughter sales conducted at all seasons the year round on one pretext or another.

Now, a turnover of \$15,000 is not a very large one in the shoe business, considering the small profit margins that are being made to-day and the fact that clean-up sales and losses on odds and ends reduce the season's gross profits.

How many shoe stores can a town stand? Of course, one could answer this question quite definitely so far as the population of a town or city itself is concerned, but there must be taken into consideration the fact that there is a large number of people living in the surrounding country, and just how many of these trade in such and such centre it is difficult to say.

For instance, say there are two thousand people in a certain place. This, of course, includes men, women, boys and girls and infants. Supposing on an average they buy three pairs of shoes a year; this would make six thousand pairs of shoes which one retailer would handle annually in that burg. The average price would not be more than \$2.50, everything considered, which would mean \$15,000 turnover annually.

Now, this shows conclusively that one store could cater

A JOLLY GROUP OF TRAVELING MEN TALKING IN A SAMPLE ROOM

Here is a picture of five jolly shoe travelers who happened to meet a few days before Christmas in the sample rooms of J. Heffering in the Lumsden Building, Toronto. It was too good a chance to be lost and Mr. Heffering quietly walked out and locked the door. He returned in a few minutes with a photographer who took a flashlight picture of the group before they could make good their escape. In the picture standing are G. H. Ansley, of Toronto, representative of the Kaufman Rubber Co., and the Woelfle Shoe Co., Berlin; Mr. Heffering, who represents Tetrault Shoe Co., Regina Shoe Co., and MacFarlane Shoe Co., of Montreal. Sitting are Harvey E. Graham, of Toronto, representing the Hartt Boot and Shoe Co., Fredericton, N.B., with which firm he has been for many years, except for the past two seasons when he was with Jackson & Savage in the West; next to him is G. H. Ferguson, who

resides in Vancouver, and has been twelve years with the Hartt firm, and then comes M. L. Savage, the live wire representative of the Tetrault Shoe Manufacturing Co., and the McDermott Shoe Manufacturing Co., of Montreal, and J. A. & M. Cote, of St. Hyacinthe, Que., in the Western Provinces. Messrs. Savage and Ferguson are widely known throughout the West, and are two of the most successful and enterprising men covering that extensive territory. They were on their way east from a holiday jaunt through the Southern and Western States, having visited California, Texas, Louisiana, Mexico and other points. They saw the scene of several battles waged by the revolutionists across the Mexican border. Mr. Ferguson spent the Christmas holidays with his parents in Fredericton, while Mr. Savage is with his family in Ayer, Mass., until he starts out in March on his fall selling expedition.

to the footwear requirements of a town of two thousand and yet only do a business of \$15,000 a year. The SHOE AND LEATHER JOURNAL knows that in many places of this size there are at least three, four, five and six shops selling shoes. By this is not meant that there are five exclusive shoe stores, but very often there are a couple of exclusive shoe shops, while grocers, hardwaremen, clothiers and dry goods houses all handle shoes.

The result is that business is cut down to a very fine point and the question arises where is this competition going to end? This state of affairs does not apply to the West, so much, but more particularly to the older provinces, where communities are not growing rapidly and in many cases have settled down to a rather staid existence. The advice, which is tendered most people about starting business, is to seek out the new towns and the faster growing smaller centres. Many people have an idea that the large city offers the best opportunity to the new man with its many outlying districts springing up. It is doubtful if the big cities really offer the best openings for real money making to the beginner in the shoe business. Within ten blocks of a new section in Toronto there are eight shoe dealers.

Other Fields Look Greener

The SHOE AND LEATHER JOURNAL frequently receives inquiries from shoemen in various parts of Canada requesting an opinion as to whether such and such a town or city could stand a first-class, up-to-date shoe store. It is strange the number of inquiries that have come to hand, particularly of late. The majority of these men who have some capital are decidedly anxious to get into big centres. When it is pointed out that smaller towns are the most eligible places the reply generally is that such and such a centre is not big enough, and the inquirer wants to do business where business is done on a large scale.

It is not unusual to find a shoe dealer doing a fair trade in a country town who wants to get to the smaller cities and the chap in the smaller cities desires to get to a place of fifty or sixty thousand people. The dealer in that sized city believes he would do much better if he were located in Vancouver, Winnipeg, Montreal, Toronto, or Ottawa, and thus human restlessness craves for some other sphere of operation and believes another centre is a veritable Eldorado.

There is positively no method of fixing the exact number of shoe stores that can do a good business in a certain community, for men will rush in even when many others have failed. In one town in Western Ontario of nine thousand there are twelve places where shoes are sold, and in another town in Eastern Ontario of six thousand people ten shops handling footwear. What is the result of all this? If there are too many dealers in one locality or district competition grows dangerously keen and the consumer is granted undue privileges and the dignity and standing of the trade is impaired.

Has High Ideals But—

Of course a man starting a shoe store talks about keeping a representative stock, fitting people properly, giving good service and splendid values, extending every courtesy, keeping the best fitters, the latest styles, having efficient methods and progressive ideas and using a score of other terms which sound very nice, although he may not live up to any of them. As to how many shoe stores one place can stand, it may be pointed out that it all depends upon the character of the stores. The whole situation resolves itself into a matter largely of staff, service and stock, the class of people, the kind of shoes they wear, whether it is a cash or credit community, scale of wages paid workers, etc.

While a good location on a business street with an

average amount of competition in a prosperous community no doubt means a good deal to any retailer, whether starting a new business or taking over an old one, it is by no means the entire consideration. How often one sees a first-class store conducted on live, progressive business principles start up in the very face of the keenest competition and succeed, while another establishment, under less energetic management, yet doing business under more favorable conditions, goes to the wall.

This much may be said, that no satisfactory answer can be given as to how many shoe stores such and such a town can or will support for the simple reason that much depends upon the stores and the proprietors themselves, the amount of stock carried, the service given, the class of footwear that the people buy, and whether the majority of residents are well-to-do or have very little money to spend, the proximity to larger centres and various other considerations. In towns, often not very far apart, residents buy a much better class of shoes in the one than they do in the other.

Certain communities seem to be generally regarded as "cheap," while others have a reputation of preferring quality goods. At any rate where there is too much competition, the whole trade suffers by the action of one or two who find that as the struggle grows keener they must sell closer and grant more privileges to the consumer. This frequently means that a dealer extends credit freely, has numerous clearance or reduction sales, keeps open late at night and shouts bargains, snaps, special values, astonishing offers, etc., until these terms really cease to have any honest or convincing meaning or to exercise a charm over would-be purchasers. The result is that the very heart is eaten out of profits and everybody engaged in the shoe business suffers because, whether he admits it or not, nearly every man is more or less influenced by his neighbors.

Where there is the required number of shoe stores to furnish people good service, and amply satisfy their pedal needs, a conscientious dealer will usually practice the principle of "live and let live," but, when the number of retailers goes beyond this mark the outcome eventually is a senseless, competitive war, injurious alike to the retailer who slashes prices and to his associates. The dignity of the trade suffers and doing business in the shoe line descends to the cheap John idea instead of being a legitimate, honorable pursuit.

Do You Give Clerks Pointers?

A Montreal shoe clerk writes the SHOE AND LEATHER JOURNAL as follows: "My boss is kind and obliging enough in many ways but he never seems to want to pass on too many ideas. He appears to think if he does that some day I may be able to 'put one over on him.' I am anxious to learn all about buying and how to conduct a first-class shoe store. Some bosses have a wonderful knack of keeping some of the fine points of the game away from their clerks for fear it may cost them a few dollars extra in salary. To my mind this is why certain clerks with ambition and a desire to get on and learn do not remain longer with these firms. They are not afforded any opportunity for self improvement."

Buying for a Discount

Many times buyers are lured by a big discount offer to lay in a larger quantity of goods than are necessary. This habit has resulted in a tendency for the retailer to over-buy. Now, over-buying is the cause of many failures. In hundreds of cases a larger amount of capital would not be necessary to carry on the business had the buyer not bought more goods than he needed, just to get the quantity discount. Buy for profit, not for the discount. Let the other man carry he load.

Why My First Venture in Shoe Business Failed

Misjudged the Town and the Class of Shoes the Residents Bought—Location and Environs of Prime Importance—People Were Interested Admirers but not Purchasers—Some Advice on Amount of Capital Required to Start

By R. J. D.

"I was anxious to go into the shoe business. I had eleven years' experience in several Canadian towns and had been with a number of firms. I thought that my insight into buying, selling, fitting, stock-keeping, and cost marking etc., was as complete and well grounded as that of many dealers who were making money in the trade. Here I was with a splendid equipment earning less money than a plumber, a carpenter or plasterer.

I was getting fifteen dollars a week and the boss said that he could not see fit to raise me as business was too bad. This made me all the more anxious to try my luck in the business game. I thought that I possessed a fund of ideas and pointers which would make customers come my way, and I had little doubt that if energy, persistency and industry counted in the upbuild of business I would succeed.

"I had no bad habits, possessed a good appearance, was well educated, and yet did not think that I knew it all. I was willing to learn, and so I began to cast about for a site. After making diligent enquiries from travelers, manufacturers and wholesalers, I decided to take the leap. I had not much capital, only twelve hundred dollars all told. A large jobbing house, who knew my character, standing, and knowledge of the trade was willing to back me in my venture as soon as I found a suitable opening. I found the right place, as I thought, and, after several months' trial, I am out all my money and the stock has been returned to the wholesaler. I can see now where I made a serious mistake, and I am narrating my experience, not so much to reveal my own weaknesses as to serve as a guide for others who may be like minded regarding embarking in business.

Location Knocked Me Out

Two points I wish to emphasize are. Before starting be perfectly sure that you have selected the right town and have sized up conditions properly and accurately. I failed in doing this, being, perhaps, too anxious to settle in a fairly large centre. Then I stocked too good a grade of shoes for the general class of trade. My expenses in beginning were heavy. I paid fifty dollars a month for a store, but the situation was all right and I made no mistake there. I put in exceptionally fine windows, using flowers and other decorative materials to good advantage, and yet I made an unlucky move in choosing the town that I did for a site for my initial venture. In a few months I had to close the doors and ship the stock back to the wholesale people at a rate on the dollar which, together with my heavy expenses, ate up all my original investment. The trouble, so far as I can estimate is that I miscalculated the town, which is noted as a manufacturing centre and is located in the eastern part of the Dominion.

Had Ear Marks of Prosperity

"I would give you its name but your readers would think that I was trying to knock the place, and that it was a case of sour grapes on my part. Nothing is farther from my thoughts, and I blame only myself for lack of foresight and bad judgment. I thought because there were several big industries in the burg that it must necessarily be thriving. The papers were full of the talk of the great future ahead of R—— and land agents had bought up whole blocks which they were subdividing and putting on the market at fancy figures, talking about hundreds of houses being needed to domicile the people. I found after I had got there that, while there were numerous industries they were not rushed by any means. Most of the army of employees were on

short time. Some plants were operating with only one-third or one-half the regular staff owing to the tightness of the money market.

"To cap it all, my stock was all the better class lines which I had been used to selling in my last position, and the retail price of my shoes was from three to five dollars a pair. The people admired my window displays, attractive shoes and handsome interior, but they did not buy in any large amount. The centre was overdone with footwear establishments, and among my competitors was a "slaughter house," which bought up nothing but jobs, bankrupt stocks, odds and ends of all kinds. The manager of that shop visited all shoe factories cleaning up whatever he could from the floor. This 'junk joint' set the standard of prices for men's welts at \$2.49 and for women's welts at \$1.98, and when workers in any town are not earning big wages owing to short time, they will not launch out and purchase fine footwear.

Back Again to Salesmen's Ranks

"I have little more to say regarding myself, and am not a welcher, but have been asked the cause of my reverse

Efficient Manager of a Shoe Department

A. T. Marshall, who is manager of the footwear department of Stewarts, Limited, Renfrew, is a Haldimand county boy, being born in that section of Ontario in 1887. After attending the public and high school he began his business career at the age of sixteen, serving three years in the general store of William Brown in Caledonia. In 1907 he went to Renfrew, taking a position on the staff of Carswell & Co.,

with whom he remained for nearly five years. He left the employ of that concern to take charge of the re-organized shoe department of Stewarts, Limited. Mr. Marshall is an enthusiastic shoeman and believes in method and system. He is a shrewd buyer and a capable salesman, who makes a close study of the wants of his customers and is succeeding in building up a constantly increasing trade.

and I have given it. Now I am back in the ranks of the salesmen, a wiser and poorer individual, but yet I am not discouraged. I would not advise any young man to stay out of business because I and some others have failed. That counsel would be as short sighted and superstitious as many of the proverbs of the present day. But from my own venture I would say, be sure you are right then go ahead. Be certain that there is a good opening. Do not take the advice of one man, but several. Then visit the place in which you are thinking of locating and spend some time there learning conditions accurately and at first hand what class of shoes people wear; how much money they have to spend; whether they are spending it and whether they are well employed. Do not make the mistake that I did of starting in business when times are dull and unemployment abroad. Better wait a little longer than be sorry.

The same advice may be given the man who wants to sell his business. The proper time to dispose of it is when trade is good, and sales are at high water mark, when the revenue will stand examination and affairs generally are on the move. If you wait until there is a lull or your trade drops off than you will have a difficult time to find a buyer. Yet, strange to say, nearly all men wait until the bottom has fairly dropped out of a business before they think of selling it, and then they wonder why some person does not come along and buy them out. In plain language they hope to catch "a sucker." It is a bad time to make a change on a stagnant or falling market.

Use Your Own Capital

"Then it is as well to go into business on your own capital and not on the other fellow's. I know that many will dispute this statement and point to scores of successful merchants in every province who have made the start with only a few hundred dollars of their own. While we learn of these great successes we never hear of the countless failures. But this may be said that the chances of success are against the individual to-day who has a lean purse in his mercantile venture. The fellow who has the capital at his back can stand the storm and stress of a period of hard times as he has something to fall back upon while the one doing business from hand to mouth, and who is at the beck and call of jobbers and manufacturers can not keep his kite flying when the trade winds subside.

"I know that a good front and bluff will sometimes carry a man a long way on the road, but, when depression arrives, he has no reserve force—capital—to fall back upon and soon collapses. If not, then his backers own him body and soul, store and stock. How much capital should a man have to enter the retail shoe business on his own account? I would say fully half as much cash as the stock he intends to carry. This is if he is going to carry five thousand worth of shoes at the outset he should have two thousand five hundred dollars in ready money or good security of a negotiable character. Some will pooh-pooh this idea, but remember that the times have changed and one can succeed to-day in the shoe or any other business as easily in the past.

The Power of Ready Money

"You must keep stock moving, buy to the very best advantage, take all discounts and purchase in as large quantities as possible for the quantity buyer gets the concessions every time, particularly when factories are running only from forty to sixty per cent. capacity.

"Confine your purchases to a few, well chosen lines and do not try to give every house or traveler an order. Thus you will avoid unsaleable stuff. I might go on giving advice, but perhaps have considerable effrontery to hand out this much after my recent reverse. But experience teaches and, if we do not profit by its lessons, there must be something lacking. Yes, I may go in the shoe business again but not just now, thank you. I am as much of an

optimist as ever and only blame myself for the unhappy termination of my first venture. I will continue to be 'bossed' a little longer anyway."

Handsome New Store in West

The new store, which has been opened in Medicine Hat, Alberta, by J. B. Edington, is a very attractive one. The shop is located in the new Hull Block on Toronto Street, in the busy business section of the city. The depth of the premises is sixty feet and the width is twenty feet. The shelving is of British Columbia pine, oak stained, while the store and office furniture is of quartered oak. The show window is fifteen feet in length by four feet in depth with oak panels and mirrors. The floor coverings in the store are of cork linoleum and nice rugs. The lighting fixtures are of burnished brass, being a combination of electric and gas. The cash register is of the very latest type, being operated electrically. The basement is of the same size as the store itself, which was opened during the past month. The stock consists of a general line of men's, boys', youths', women's, and children's high class Canadian and American footwear. The enterprising proprietor is J. B. Edington, and the chief clerk and buyer is A. J. Irvine.

Greatly Interested in Athletics

J. P. O'Loughlin, who is well known to most shoemen and conducts a retail shoe store in the Imperial Theatre Block, Montreal, recently proved his popularity in other circles outside of the shoe field. He was elected president of St. Patrick's Amateur Athletic Association, of Montreal. The proof of his allround popularity was demonstrated in the fact that he was chosen by acclamation. Mr. O'Loughlin's new office is a much coveted position, the association having one of the largest memberships in Canada. Only a man whose qualities as a leader have been recognized, can

aspire to such a high goal, and the honor done Mr. O'Loughlin is a signal one, although everybody recognizes him as the right man in the right position. He has taken a great interest in the association, as well as in athletics generally, having considerable prowess in this direction himself. During the season just finished, Mr. O'Loughlin acted as coach for the Shamrock Rugby Club of Montreal, and landed his club at the top of the heap. In sports as well as business his motto is "a little better than the other fellow."

Do You Think a January Sale is Really Necessary?

A Plain Discussion of the Question—Some Contend that January Sales are Harmful to Progress of Store—Impression it Creates with Customers—How to Dispose of old Stock by Other Methods

January and sometimes part of February is devoted to a yearly sale designated throughout the trade as the "January Clearing Sale." Why this yearly disposal of stock at a much reduced figure exists is rather difficult to explain, but nevertheless, shoe dealers as well as merchants in other lines from one end of the country to the other display in January a huge sign over their entrance, and advertise in many different ways the fact of this sale.

At a first glance one is convinced that there is a justification of this procedure. One member of the trade takes a strong stand in favor of disposing of goods at reduced prices. His neighbor, a block further down the street, is, on the other hand, utterly opposed to the idea.

Now, both these men have their reasons for holding their different opinions. The January sale has its advantages as well as its disadvantages. But the majority of progressive dealers would be only too happy to see it go out of existence. They hold one themselves, because everyone else does. Before going any farther, let us state that the location of the store and the class of trade which it caters to, has an important bearing on the value of the January sale. Cases of this kind have exceptions, however, and the point of view taken here is that of the average shoe retailer.

Why They Are Held

As to why it is found advisable to hold a sale there are many reasons advanced. The large majority will say that they hold theirs as a means of clearing out old stock early in the year. This is a fairly legitimate excuse. A Montreal shoeman says: "I think I am as good a buyer as seventy per cent. of those in the trade, but in spite of careful and judicious purchasing, I am bound to have some lines left over, some stickers, slow lines or shelf-warmers. Now, I don't believe in the January sale, but I do believe in getting rid of this old stock. People expect to buy shoes at a discount this month, and as all my competitors hold a sale, I am, in justice to myself, forced to do likewise. Personally, I do not favor January sales. I am in earnest when I say that I would be prepared to make any sacrifice if I thought I was doing something which would materially help in eliminating the necessity of this special sale. As things stand now, I feel that I would merely cut my own throat in taking a decided stand. Perhaps I lack the courage, but I would prefer to be a follower rather than a leader."

Shoe Trade in General Not Favorable

The above expresses the sentiments of hundreds of those engaged in the foot-fitting profession. Many would be willing to do away with their yearly sale, but lack initiative or are on such terms with other shoe retailers in town, that such a thing as co-operation is impossible.

Another reason advanced is the necessity of boosting trade after Christmas. Business takes a slump after the holidays, and very little buying is done. Of course this affects trade in general, but the shoe business should not suffer as heavily as many other branches of trade.

There is a class of people, who always seem to be "up against it" for money. The January sale offers a chance of realizing a certain amount. This also accounts for many merchants reducing prices on all lines.

Why January Sales Do Not Pay

While opinions are divided on the subject, January sales are admitted by most, to be harmful to the shoe trade in general. In the first place, it cheapens it in the eyes of the buyer. During the past few years, shoe prices have mounted

considerably. Very often a clerk will have to explain the cause of this increase in price to half a dozen customers in the course of the day. This process is kept up for eleven months in the year. During this period, the public is being educated to pay a price which enables the retailer to make fair margins of profit. Then along comes the January sale. In September you would have explained to a patron of the store the cause of a pair of shoes which sold for \$4.00 in 1909 or 1910, being retailed in 1913 for \$5.00 or \$5.50. You have, perhaps, told him that you made ten or fifteen per cent. profit, not allowing for overhead expenses, which, when taken out, allowed you a net profit of about five or six per cent. Then you advertise in January a reduction of 20% on all lines in the store; Some merchants will make even larger reductions. Imagine the impression this has on your customer. You have told him that you make five per cent. net selling a pair of shoes at the regular price, yet now you offer him the same line at a 20% reduction. Although, like a great many others, the patron feels he should get something for nothing, he still knows you are not in business for your health. Your reputation for veracity is sure to suffer heavily.

Even though this does not happen to be the exact situation with the remainder of your clientele, they, too, gather the impression that you are making an exorbitant profit on the shoes you sell them outside of the month of January.

Where You Save Money

The purchaser or prospective buyer does not pause to consider that it would be an impossibility for you to run your business the entire year on this basis. When you come to figure it out yourself, neither can you. If you are making a net profit of five per cent. on the stock, then a reduction of 20% on all lines in January, practically means that goods sent out during that month are sold at a loss of fifteen per cent. Can you afford to do business on this basis even for one month?

Not only is this the situation, but customers are liable to get in the habit of expecting reductions on all purchases, figuring that if you can take off 20% in January, you are able to do the same in March.

An ambitious shoe retailer is anxious to make his store the most exclusive in town. He advertises, renovates, and otherwise does everything in his power to create a high class or distinctive air and to give tone to his establishment. By this we do not mean the dealer who caters only to the highest class of custom, but include every shoeman who seeks to create a demand for better grade footwear among his patrons. If he holds an annual sale, his progress is sure to receive a serious set-back.

Remedy for January Sale.

The average retailer will say, "Yes, the foregoing is correct, but how are we to dispose of left-overs?" The best answer to this question is, "See that you do not have any stickers or shelf-warmers."

To bring about this state of affairs, care is needed in buying. Many retailers seem to have a sixth-sense when purchasing a season's stock. They know to a pair almost, just how many they will sell of this kind, and how many of that. Perhaps this is a gift bestowed on certain buyers, but whether it is or not, every retailer should and is able to exercise judgment in selecting a stock. Why is it that some shoemen when taking an inventory, find that they have

(Continued on page 40)

A Popular Shoe Salesman

George A. Gadbois, who is widely known in the Eastern Townships, where he has a large number of friends, has been in the shoe line twelve years. He was born in Sherbrooke, Que., and went to St. Hyacinthe in 1892, as traveller and salesman for the E. T. Corset Co. He represented them on the road for nine years and deciding to make a change, took

a position with James Robinscn of Montreal. He represented him in the East quite a number of years and, when Jackson & Savage, of Montreal, opened up business, Mr. Gadbois joined their selling staff, remaining with them until December 1912 when he resigned owing to illness. He is now in much better health and is representing the Eastern Townships Shoe Co., of St. Hyacinthe on the North Shore and Ottawa Valley. Mr. Gadbois is a good salesman and a firm friend, possessing a genial nature and an obliging disposition.

For the Person Who Sells Goods

These rules, hammered into the mind of every employe in a large department store in the West, are worthy of adoption in every mercantile establishment:

"You must be helpful and thoughtful and agreeable, not only to customers, but to your co-workers as well.

If your ability be of the highest and rarest, but your disposition oblique, you can't stay here.

"You must be pleasant—or prepare to leave. The rules are simple and just—obey them or quit. Your associates are sure to take your measure, and if they find a dejected and dissatisfied spirit, you'll not care to linger. We believe in the cohesive power of sunshine. Let your heart smile as well as your lips. Christmas dies with the day, but the cheery must be active here during the entire twelve months.

"What is your attitude toward the patrons of this store? We hope your interest doesn't centre in inducing them to make a purchase. Don't let that be your thought.

"Every man, woman and child who comes beneath this roof is a guest. Get that fixed in your mind. In a way, your social tact is tested every time you wait on a visitor. Show goods graciously and give a sample as courteously as you'd write a check for a big sale.

"Be well bred. Politeness is an outward manifestation of blue blood; patience is proof of mental poise. We had much rather have you create a fine impression and miss a sale than the reverse.

"Be conscientious. You can only serve the store when you serve the customer. Don't think you are here to do all you can for us and for yourself. You owe the largest obligation to the people who buy here. Let them see that they can trust you completely.

"Nothing arouses our sorrow and indignation more than to discover a clerk who has two sets of personalities—one for rich and one for poor customers. The clerk who cringes and fawns to a wealthy patron and is arrogant and acid to a poor one is contemptible and disgusting.

"Our methods are staple and stable. They are not adopted lightly or carelessly. We place a cold hand on the pulse of every question and render a verdict in accordance with strict justice.

"The master thought is to do everything we can to deepen and enrich the customers' allegiance to the store. Sometimes our decisions are against them. That's because we firmly refuse to establish a precedent unless it can be shared by all. We cut off all special privileges. This is a public institution. We make no exceptions. Rules cannot be violated to meet your particular demand. This ruffles you at times, but it is the biggest and squarest and finest thing in this whole business."

SHOE BOTTOMS AND OTHER DON'TS

Don't blame the sole leather man because you can't get a white bottom on your shoes. It may be your own fault.

Don't run away with the foolish notion that white bottoms will get you more business. The shape of the toe sells 19 pairs out of 20.

Don't think that because leather buffs clean it is the best. The greatest wearing stock is often a bit cloudy and no doubt the customer will think it costs you extra to have it tanned in this way.

Don't show the shoes to the leather man when you are kicking about the bottom. He might be mean enough to point out many other defects infinitely greater than the one you complain of.

Don't goad him to the point where he is liable and perhaps justified in telling you that white bottoms on the shoes you make would look like an Easter lily in the button hole of a tramp.

Don't be continually telling him that his leather is weighted. If he does put anything in, it is only to sweeten it.

Don't expect No. 1 when you are paying for No. 2. You won't get it. The tanner, like yourself, has a family to keep.

Don't write him and say he knows nothing about selection. (This is only a boost for your enemy—the sorter.)

Don't buy from the other fellow because he sells cheaper. We would rather supply you for nothing.

Don't Mr. Editor, on any account divulge our whereabouts.

The Evolution of the Modern Shoe Establishment

Geo. G. Gales & Co. Establish New Store in Ottawa—Features of a Dozen Shoe Shops Gathered Into One—Rest Room and Free Shine Stand as Means of Advertising—Other Splendid Appointments

Purchasers of footwear want and are willing to pay for high grade service and quality goods.

The truth of this assertion is amply demonstrated by the success obtained by Geo. G. Gales & Co., Montreal and Ottawa, in their efforts to sell high class footwear and hosiery.

The latest Gales venture is the new shoe establishment recently opened by them in Ottawa:

The new store is located in the Union Bank Building, and the firm certainly have used good judgment in securing the best site and most up-to-date premises that go to make an ideal shoe shop. The place has a depth of 90 feet, and a 30-foot frontage, allows ample room for the large main window and the two side ones, all of which are handsomely arranged and supported by copper frames.

Handsome Store in Ottawa

The new establishment, which is said to be the handsomest retail store of any kind in Ottawa, is finished with an antique Tennessee marble front, and neat tile flooring bearing the firm's name.

The interior of the windows is also of white enamel with mahogany fittings and a feature of them is the number of hidden electric lamps and mirrors which are a great aid in making displays.

The store interior is fitted with white enamel fixtures relieved by highly polished mahogany trimmings and ledges. A beautifully finished mezzanine floor runs the full length of the store, and does much to add to its general attractiveness.

The width of the shop, enables its division into two departments, the men's on the right side and the women's on the left. On the mezzanine floor on one side, the

children's department is situated. Nothing has been left undone to add to the comfort of the little ones.

The show cases are of the most modern type, all glass, with mahogany bases. The large buckle case, located where it can be seen immediately on entering is a valuable addition to the remainder of the furnishings.

Free Shoe Shine Stand

A distinct feature of the establishment, as in the case of the two Montreal stores, is the white marble shoe shining stand where the boots and shoes of both men and women are polished without charge. An experienced porter is always in attendance and a special invitation has been sent to the women of Ottawa inviting them to make free use of this service. The value of this kind of advertising can be seen at a glance.

A handsome mahogany cash and parcel desk, individual chairs which are natty as well as substantial, foot-stools of special design with mirrors, all striking features, are finished in solid mahogany. The chairs, made expressly for the company, are fitted with leather seats and backs, adding to the comfort of the store's patrons.

The floors are of polished quarter oak, with heavy green carpets. Handsome Turkish rugs are laid here and there to best advantage. Uniform cartons go a long way towards giving the premises that air which most retailers try so hard to secure. Artistic electric lamps in drop effects with large moonstone domes add a pretty, pleasing finish to the whole.

Rest Room for Patrons

To make every one feel at home, a rest room has been provided, with writing desks and materials, and telephone

VIEW OF GALES' NEW STORE, SHOWING PORTION OF INTERIOR, WITH CHILDREN'S DEPARTMENT AT REAR OF STAIRS ON MEZZANINE FLOOR

INTERIOR OF GALES' NEW STORE, OTTAWA, LOOKING TOWARD FRONT DOOR, SHOWING OFFICES, PARCEL AND CASH DESK

for public use. Also, it is made clear that this room is to be used at will as a meeting place for the women shoppers. Shoe retailers are beginning to realize the value of this adjunct to the modern shoe store and the Gales Co. are alive to the importance of it.

The store has been put in charge of a competent manager of wide experience. He is C. Roy Teetzel, who has been manager of the Montreal West End store for the past five years. Mr. Teetzel has been in the retail shoe game all his life. Beginning as a boy in St. Thomas, he grew up in the business. Seeking broader fields, he went to Montreal, and was first with the house of W. H. Stuart & Co., then as manager of the shoe department of Henry Morgan & Co., and for the last five years as manager of the main store of Geo. G. Gales & Co. Understanding, as he does, all the ins and outs of the shoe business and being thoroughly imbued with up-to-date methods, the success of the new store is assured.

Do You Think January Sale Necessary?

(Continued from Page 37)

a cellar full of old stock, while another man in the same relative position has practically no left-overs. Merely, that one shows more judgment in both buying and disposing of stock. The shoe dealer who is inclined to stock rather largely in fancy or odd lines is sure to have a load of old stuff on his hands at the end of the year. A traveler will come into the store with a line that is proving all the rage. The dealer, with visions of large profits, buys heavily in this line. A week or so after delivery, and sometimes even before the shoeman receives the goods from the manufacturer, public taste will veer in another direction, and he is left with a large stock of shoes with fair prospects of disposing of three-tenths or at most half of them. This may exaggerate conditions, but it serves to illustrate the

point desired by the writer. Common sense is all that is needed in an instance of this kind as well as in others.

Concentrate on Slow Lines

When any particular line is inclined to lag, concentration on this line will be found a good remedy. The windows are of great value for disposing of slow stuff. Give the clerks instructions to push these lines, even if you have to offer some small inducement. You will find it will pay better to give a clerk ten per cent. to dispose of a line when it first begins to stick, than it will to give the customer a reduction of twenty, thirty, or forty per cent. nine months later. Use system in stock-keeping. The progressive dealer is able to tell at a glance, just how many pairs of a certain line he has in stock. If the number of any particular line is a disproportionate one, attention should be devoted towards bringing it back to normal. If a very large quantity is being carried on the shelves, make a strong window display of the line desired. If possible, offer it at a price that will attract attention, and no great trouble will be found in getting rid of it.

Different plans are used by certain shoe retailers for disposing of the old stock by other outlets than the January or special sales throughout the year. An Eastern Ontario shoeman said the other day, "I believe in taking the bull by the horns. When I find I have a quantity of old stock on my hands, I have it carted off to an auction room. In my own case, this only happens once every three or four years, and I feel that it is better to suffer a loss, rather than have the bother of a January sale, and the loss of prestige which follows a special sale. Then I charge it up to expense."

Another means which is used by some retailers, is the bargain counter all year round, on which is carried old lines and slow sellers. This, like the January sale, deteriorates from the general tone of the store. It is, however, a better means than the former of disposing of old stock.

SHOE NEWS IN PARAGRAPH

J. E. Dupre, of Montreal Box Toe Co., was in Quebec recently.

J. B. Sample is preparing to start a boot and shoe store in Carberry, Man.

J. Massey, of Murray Shoe Co., London, Ont., was in Montreal last week.

Jack Burke, of Beardmore Belting Co., Montreal, spent the holidays in Quebec.

The Moyer Shoe Co., Limited, of Winnipeg, has been sold to Buckler & Sons.

A. S. Vachon & Co. are discontinuing their boot and shoe store in Vancouver.

A shoemaking business has been started in Rosthern, Sask., by P. W. McCabe.

Arthur Hill, of St. Thomas, Ont., has opened a grocery and shoe store in Shedden, Ont.

Herman Katzeff has purchased the shoemaking business of Walter Mills in Melfort, Sask.

S. W. Vermilyea, of the Belleville Shoe Co., Belleville, was in Montreal lately on business.

Halperin & Co., dealers in shoes, dry goods, etc., Winnipeg, recently assigned to C. H. Newton.

Geo. P. Balfre, Canadian manager of the Chicago Tanning Co., Montreal, was in Quebec recently.

Leo Boire, of Ames-Holden-McCready, Limited, Montreal, has resigned his position with the company.

F. M. Stafford, of Sudbury, Ont., was in Toronto last week calling upon the members of the shoe trade.

Harry Thompson, of the Thompson Shoe Co., Montreal, spent the holidays in London with his family.

Jas. S. Lovell, of Toronto, representing Corbeil, Limited, spent a few days in Montreal during the past week.

A. R. Kaufman, of Kaufman Rubber Co., Berlin, and wife have gone to Bermuda, where they are spending a few weeks.

Ald. Hubert Ashplant, shoe retailer, of London, Ont., has just been elected a member of the new Board of Control in that city.

W. S. Louson, sales manager of Ames-Holden-McCready, Limited, Montreal, has returned from a trip to Winnipeg.

J. M. Petermann is at present on a trip to the larger Western centres in the interests of the Thompson Shoe Co., Montreal.

Fred Kibler, of Berlin, Ont., vice-president of the Ontario Shoe Retailers' Association, was in Toronto last week calling upon the trade.

Duncan McKinnon, of Cochrane, Ont., who recently bought out the stock of W. J. Quinn in that town, was in Toronto last week on business.

F. J. McCann, formerly of Ames-Holden-McCready, Limited, has been appointed manager of the shoe department of Goodwin's, Limited, Montreal.

W. S. Pettis, who represents the Thompson Shoe Co., Montreal, throughout Ontario, has returned to Montreal after a successful season.

C. L. Casselman has opened an up-to-date shoe establishment in Winchester, Ont. Mr. Casselman formerly conducted a store in Chesterville.

L. B. Hutchison, manager of the Toronto branch of The Kaufman Rubber Co., spent the Christmas holidays at his home in Pnetanguishene.

Philip Pocock, of the London Shoe Co., London, has again been elected a member of the Water Commission in that city, of which body he is Chairman. Mr. Pocock was

returned by acclamation, a tribute to the faithful work he has done for several years on behalf of the residents of the Forest City.

Walter Murray has taken a position in the shoe department of the British Canadian Co-operative Society at Sydney Mines and has entered upon his new duties.

Charles L. Griffin has succeeded R. B. McPherson as manager of the Victoria, B.C., store of the C. E. McKeen Shoe Stores Co. and has assumed his new post.

A. Weseloh & Co., of Berlin, Ont., boots and shoes and clothing, has been taken over by Weseloh, Goudie, Limited. This firm has been incorporated with a capital of \$200,000.

Easter Sunday is April 12th, 1914. Keep this date in mind when ordering your new spring goods to be shipped. Easter Sunday is three weeks later this year than it was last year.

At the annual meeting of the Ontario Travelers' Association, of London, held recently, H. P. Rennie was elected president, H. W. Lind, first vice-president; C. W. McGuire, second vice-president.

Owing to a break in the conduit Montreal was without a water supply for a week between Christmas and New Year's day. Many shoe factories were forced to close down entirely on this account.

W. M. Watt, representing Thomas Ryan & Co., wholesale shoes, Winnipeg and Regina, who spent the holidays in Toronto, returned to the West this week. Mr. Watt covers Southern Alberta in the interests of his firm.

Miss Bertha Detweiler, only daughter of D. B. Detweiler, of the G. V. Oberholtzer Co., shoe manufacturers, Berlin, were married recently in that city to Oscar Pickering Maclean, of Winnipeg, son of Robert J. Maclean, of Toronto.

W. H. Willis & Co. believe in meeting the prices of the catalogue houses, and in giving value for value with them, encouraging home buying. They also had their calendar for 1914 printed in town. It is a work of art.—Wingham Times.

A bookkeeper in a large shoe manufacturing concern placed two or three worn typewriter ribbons in a cup of water to soak a few days. These ribbons transformed the water into a deep, rich colored ink, which has been successfully used throughout the office.

During the Christmas festivities in Winnipeg one of the most generous donors of free dinners was Thomas Ryan, wholesale shoe dealer, who fed over 1,100 persons and thus helped to make the day pleasant and happy for a great many of the poor in the city.

W. H. Leckie, general manager J. Leckie & Co., Limited, boot and shoe manufacturers, Vancouver, states that the present year has proved the most prosperous in the history of the company, with sales well above the average of any preceding year.

E. A. Dagg, manager of the Calgary branch of the Ames-Holden-McCready Company, states that collections are as good as last year at this time, but the cost of collection is a little higher. He believes that in the near future, all leather goods will be higher, both in Canada and the United States.

J. T. Lawson, shoe retailer, of Regina, Sask., is spending a few weeks in Ontario on a visit. He called upon a number of friends in Toronto and has gone to Orangeville, where he formerly was engaged in the shoe line. He reports business conditions in the West as rapidly improving.

H. L. Scythes, formerly in the shoe business on Dundas street, Toronto, but who for some time has been engaged in the building trade in Edmonton, has returned to Toronto, accompanied by his bride. Mr. Scythes joined the ranks of the benedicts last month in the Capital city of Alberta.

Congratulations of many friends and the trade in general will be extended to Morley Wickett, of Wickett & Craig, Limited, who was again returned as alderman in Ward two in the Toronto municipal elections on New Year's Day. Alex.

Chisholm, shoe retailer, 1687 Dundas street, Toronto, made a good run in Ward seven. He will get there next year.

The Calgary branch of Gutta Percha and Rubber, Limited, of which W. G. Fowler is the manager, is opening a subsidiary branch in Edmonton under the management of J. R. Sutherland. A full stock of rubber footwear and mechanical goods will be carried in the new premises.

H. Ashworth, representing Hoyle, Hoyle & Co., boot and slipper manufacturers, Rawtenstall, near Manchester, England, has been visiting Montreal, Toronto and other cities with a fine range of samples. The showings in felt, leather, canvas and velvet slippers were decidedly attractive and a conspicuous feature was the nice assortment of bathing shoes.

In the Christmas window competition, conducted by the SHOE AND LEATHER JOURNAL, a large number of entries were received from all parts of Canada. In fact, the shoe retailers of many towns and cities seem to have excelled themselves this season in attractive and inviting displays, much taste, care and originality being evidenced. The results of the contest will be announced in the next issue.

WOMAN'S PATENT TANGO PUMP, CUBAN HEEL, CUT STEEL BUCKLE, RIBBON LACED—BY MINISTER, MYLES SHOE CO.

The Kawneer Manufacturing Co., Limited, has been granted a charter. The capital stock is \$100,000 and the head office is in Toronto. The objects of the company are: To manufacture and sell store fronts, mouldings, store furniture and furnishings and building materials, and to manufacture, buy, sell and deal in articles, goods, wares and merchandise made in whole or in part of copper, brass, iron or other metals.

At the annual meeting of the Commercial Travelers' Benefit Association held recently in Toronto all the former officers were re-elected by acclamation. Joseph Oliver, of Toronto, is president. S. R. Wickett, of the firm of Wickett & Craig, leather manufacturers, Toronto, and A. J. Tipping, traveler for D. D. Hawthorne & Co., wholesale shoes, Toronto, were re-elected directors, both of them having served for many years.

Do you value a customer properly? A shoeman of Berlin, who has been in business for years and knows practically all his patrons, sends out the following return card when he has noticed the prolonged absence of any one: "We have not had the pleasure of a call from you for several weeks past. Have we in any way incurred your displeasure or did the last pair of shoes that you bought from us fail to give satisfaction in wear, worth or comfort? We should

be greatly obliged for a reply on the attached postcard." In the majority of instances the sincerely worded communication elicits a response.

Ald. James Robinson, of Montreal, has decided not to be a candidate again for the city council. He was recently waited on by a large delegation of influential citizens from St. Lawrence ward, who spoke of the need of independent men at the city hall. Ald. Robinson thanked the members but asked to be allowed to retire. Whether he will be a contestant for the mayoralty of the metropolis will be decided by him in a few days.

Henry W. Russell, Toronto, has entered action at Osgoode Hall against Bedell's Furnishing Co. for an injunction restraining the defendants from exhibiting anything in their windows likely to cause people to congregate on the pavement in Yonge street near or opposite the premises of the Russell Shoe Store, 292 Yonge street, Toronto. It is alleged that the crowds interfere with access to the store and the carrying on of the business.

In the footwear department of Clinkskill's, Limited, Saskatoon, the Regal line of footwear is stocked throughout, and the store is known as the Regal Store. At the rear is a repair room. A specially designed cabinet runs along both walls, and is so constructed that two boxes, end to end, can be slid in, thus rendering all shoes in the store accessible. The fitting stools are equipped with a unique device, permitting a sliding mirror to be raised when desired, thus allowing the customer a clear view, for his approval. The entire fittings and fixtures of the store were manufactured and installed by the Walker Bin and Store Fixture Co., Limited, Berlin, Ont.

Hon. C. J. Doherty, Minister of Justice, thinks a Federal Bankruptcy Act would be a good thing for Canada, and he will lay before his colleagues the proposal of the Montreal Builders' Exchange that such an act should be put into force. This information was contained in an important letter which was received by the Exchange from the Minister recently, in reply to a resolution adopted in November indicating the hardship under the present system undergone by the manufacturer and wholesaler distributing goods over the Dominion. At present, each province has its own bankruptcy act, and a business man has to have wide acquaintance with the provisions of all the laws.

A recent despatch from Regina says: Canadian Consolidated Rubber Company will erect a \$40,000 warehouse on lots 18 and 19 in block 123, immediately north of the H. G. Smith warehouse on Broad street north. The building proposed is 100 feet wide by 143 long, half to be left one storey high for the present, but the whole building to be set on a foundation to carry one of the best warehouses in the city. The company are in the Hunter Building at present and have it leased until July, 1915, and for this reason may not have their new structure ready much before that time, although they will begin work on it before July, this year.

Early closing is again to the fore in Hamilton and is being taken up not only by shoemen, but by almost every class of trade. The Hamilton Retail Merchants' Association held a banquet recently and are now organizing on a firm basis. One retailer, writing the SHOE AND LEATHER JOURNAL says, that he hopes if the by-law is passed it will be permanent and well observed and that no loopholes will be left as was the case last summer. The Hamilton Retail Merchants' Association are considering many live questions such as bad debts, how to get after delinquents, etc. They believe that in unity is strength and, therefore, they hope to accomplish much in the way of shorter hours and better trade conditions generally.

A commission will go to New York soon to investigate how a shipment of 7,540 pounds of crude rubber from New York can become a consignment of only 7,134 pounds when

it arrives in Montreal. The commission was ordered last week by the Superior Court, in a case of the Canadian Consolidated Rubber Company against the New York Central Railway and the Hudson River Railway Company, both lines having carried the rubber part way to Montreal. The rubber was consigned to the Canadian company, which asks \$271 damages in consequence of shrinkage. The railway companies claim the shrinkage was due to natural loss of weight because of evaporation, and also to some discrepancy between the weighing scales in New York and the ones used in Montreal.

Frank J. McKenna has resigned the position of purchasing agent for Ames-Holden-McCready, Limited, Montreal, retiring on December 31st. He contemplates taking a trip to rest up, preliminary to embarking upon a venture which he has had in mind for some time. Mr. McKenna has been connected with the trade for 24 years, having been with James McCready Co., Montreal, before the merging of the two companies. He began in the office and went through all the departments, being superintendent at the time of amalgamation of the McCready and Ames-Holden concerns.

The Rice Leaders of the World Association, of which Elwood E. Rice is the founder and president, have announced that their committee have elected Thomas G. Plant Co., Boston, Mass., makers of Queen Quality, as the recognized

leaders of the world in the manufacture of women's fine shoes, which company, by invitation, become members of the association, enjoying all the privileges and benefits. The Rice Leaders of the World Association have at present a membership of thirty. To become a member there must be possessed the qualifications of honor, quality, strength and service and upon this foundation is based the emblem of the Association marking the highest business standing in name, product and policy.

The old saying that "money talks" was put into practice in a recent circular advertising campaign by a Chattanooga concern selling bookkeeping and record forms. This company's circular was a folder closed at the sides with seal stickers. The announcement on the address side of the circular was, "There is Some Real Money Inside This Circular for You." Upon tearing open the seals and opening the circular, the recipient found a crisp one-dollar bill attached to the top of it. The heading read, "We Wish to Buy Ten Minutes of Your Time. If the Attached Currency Will Pay For It, Consider Yourself Engaged." This company figured that if it could actually secure a complete hearing of its proposition by 100 out of a list of 150 of its best prospects, the amount invested in the one-dollar bills would be money well spent. The moral is—read every letter and circular carefully.

A STORE WHICH BELIEVES FIRMLY IN PERSONAL SERVICE

Ye Booterye Shoppe, which was opened at 310 Yonge street, Toronto, lately and is conducted by Ye Craftsmen, Limited, under the management of W. J. Jones, is a decidedly attractive and well laid out store. The premises are a hundred feet deep by twenty-five wide, and there are large double showcase windows at the front, with tiled receding entrance, presenting a very pleasing appearance. Inside of the main windows there are two other display windows as shown in the accompanying illustration. The single shelf carton system prevails throughout, and the fixtures which are of mahogany finish run up about nine feet. The ladies' department is at the rear and is nicely fitted up. Back of the store are the reserve stock and shipping rooms, while the offices are on a mezzanine floor. All the appointments are

thoroughly up-to-date and the comfortable oak arm-chairs and fitting stools with mirrors attached add to the inviting character of the interior, while there are mural mirrors at different points. Exceptional pains is taken to give everybody a comfortable and perfect fit and the motto of the new store is "service." The measurement of all feet is taken. The store is a credit to the retail footwear establishments and personal service is its keynote. Each purchaser is sent a card of thanks for patronage every time that he or she buys a pair of shoes, while attractive folders and other literature are regularly despatched to persons whom the management believes are worth looking after. The direct appeal is having a good effect and a fine class of trade is being done.

HAPPENINGS IN FACTORIES

A. W. Yager, manufacturer of shoeboxes, of Midland, suffered a small loss by fire recently.

The capital stock of J. A. & M. Cote, of St. Hyacinthe, Que., has been increased to \$99,000.

D. McDermott, of the McDermott Shoe Co., Maison-neuve, spent the Christmas holidays in New York.

R. Brutinell, general manager of the Slater Shoe Co., Montreal, is at present in France on a business trip.

Several new Pluma Skiving machines, model "D," have been placed in Montreal factories recently by the U. S. M. Co.

D. Park, tanner, of Ailsa Craig, Ont., has had a busy season and reports that he has a large number of pelts on hand.

E. E. Cady recently came from Haverhill, Mass., to Montreal, where he will work as Goodyear agent for the U. S. M. Co.

The United Shoe Machinery Co., Maisonneuve, state that a large demand is still being shown for their new Pyramid heel-building machine.

The Canadian Consolidated Felt Co. have declared their regular quarterly dividend of one and three-quarters per cent, on the preferred shares of the company.

The Slater Shoe Co., Montreal, report their factory as being busy. The Tetrault Shoe Co. are another Montreal concern who find trade pretty brisk.

The Canadian Consolidated Rubber Co., Montreal, have declared their regular quarterly dividend of one per cent. on their common stock and 1¾ on the preferred stock.

H. H. Lightford, manager of the Perth Shoe Co., Limited, Perth, Ont., was in Montreal last week on his way to Boston. He reports business as being as good as can be expected.

Dufresne & Locke, Maisonneuve, have closed their factory for a few days in order to take stock. With the arrival of the first of the year many other shoe manufacturers will do the same.

J. G. McKinley, recently with the Calgary Tannery, and formerly of Camrose, Alta., has returned to Camrose. Mr. McKinley has decided to conduct a hide, robe and fur business in that town.

The visitors to New England during the holiday term from the Cook-Fitzgerald factory in London filled a special car which the Michigan Central Railway had in readiness for Christmas eve.

The United States Government report of 1910 gave the production of shoes as 247,643,000 pairs. Based on the same ratio of increase shown in previous reports, this year's shoe production will be 265,000,000.

The shoe workers in Montreal complain that times are hard at present. A great number of them are only working half the week, and several are without work but expect matters will pick up after the holidays.

Ten firms in Canada who manufacture men's shoes now run strictly union stamp of the Boot and Shoe Workers' Union upon the output of their factories. Five firms who make ladies shoes also use the union stamp.

H. B. Johnston, of H. B. Johnston & Co., leather manufacturers, 137 River street, Toronto, who underwent an operation for internal affliction recently is now much better and able to be around after a rather long illness.

It is almost a record breaker to motor seventy-two miles north to a summer cottage in the middle of December, yet this is what was done recently by a family of five from Berlin, who went from that thriving town to Grand Bend on Lake Huron. The party consisted of Chas. A. Ahrens and

wife, their daughter and Fred. H. Ahrens and wife. They found a good sized lifeboat of the "Wexford" washed up on the shore.

Daniel Hannigan has accepted a position with John Ritchie & Co., Quebec. He was formerly with Jackson & Savage, Montreal. He is second vice-president of the Superintendents' and Foremen's Association, Montreal.

At a recent meeting of the directors of the Fraserville Shoe Company, Fraserville, Que., W. Adelard Potvin, of Riviere du Loup, was unanimously elected president of the company, to replace Jos. Viel, who has resigned.

Machinery is being prepared by the United Shoe Machinery Co. for equipping Clark Bros.' new shoe factory at St. Stephen, N.B. Machinery is also under way for the Alberta Shoe Manufacturing Co., Redcliffe, Alta.

E. T. Wright & Co., shoe manufacturers, St. Thomas, Ont., are offering a beautiful trophy to be played for at the big Curling Bonspiel which opens in that city this week. The new factory of the firm in St. Thomas is practically completed.

Fred. A. Lovell, Edward C. Dewyer and Fred Churchill, superintendent, quality man and foreman respectively of the cutting room of the Cook-Fitzgerald Co., Limited, London, were in Massachusetts visiting friends during the holiday season.

Ed. R. Lewis, leather dealer, 21 Scott street, Toronto, was in Boston, Salem and other New England centres recently. He reports that business in the leather line in the New England states is good and the outlook for 1914 is reassuring. Prices have a strong tendency to advance.

At a meeting of the Berlin city council recently Ald. D. B. Detweiler, of the G. V. Oberholtzer Co., was appointed Commissioner for the period of three years to represent Berlin in carrying forward further organization proceedings in connection with the Western Ontario prison farm scheme.

Pneuma Tubes, Limited, Toronto, with a share capital of one million dollars and head office in Toronto, have been granted a charter. The company are empowered to carry on in all its branches the business of manufacturers, jobbers, and wholesale and retail dealers in rubber tubes, rubber tires and rubber goods generally.

At the hearing of the United Shoe Machinery Co.'s case in the United States District Court at Boston, President Winslow, in the course of his evidence, denied that the Canadian Shoe Machinery Company had been bought by the United. He said the Canadian Company had made repeated efforts to have the United buy it out and had been refused.

H. C. Durgin, formerly of the Milton Shoe Co., Milton, and Sterling Bros., London, has been appointed superintendent of the Charles A. Ahrens factory, Berlin. He has had a long and successful experience and was for some years with the United Shoe Machinery Co. as an expert on lasting machines. Mr. Durgin has entered upon his duties and has removed to Berlin.

Charles Merner, Superintendent of the New Hamburg Felt Boot Company, of New Hamburg, Ont., met with a fatal accident. He was engaged in the works examining a loom that was close to another one in full operation. While doing so his sweater caught in the drum, and he was instantly carried up off his feet into the machinery. He lingered a few days when he died. The deceased was about forty-five years old and unmarried. He had numerous relatives in New Hamburg and his sudden death cast a gloom over the village.

The Rice-Hulbert Shoe Co., late of Cortland, N.Y., have started manufacturing in their factory in St. Catharines, Ont. The new plant is a complete one in every respect and the firm will make a full line of lumbermen's leather tops, children's sandals and cloth uppers for tennis and sporting goods. They will employ about twenty-five hands at the start and by the middle of the summer expect to have some seventy-

five persons engaged in their factory. The company have applied for incorporation papers under the name of Rice-Hulbert, Limited, and will be known by that name.

A recent despatch from Quebec says: At a meeting of the Machinists' Union in connection with the Quebec boot and shoe manufacturing industry, it was decided that the operators who quit work in the Gale Brothers and the John Ritchie Companies' factories should return to work. This means a victory for the manufacturers. Fifteen hundred members of the union were present. The machinists returned to the factories but the proprietors insisted the principle of open shop must be accepted before they could be engaged.

On January 14th, the Superintendents' and Foremen's Association, Montreal, will hold their first "get together" dinner at the Commercial Travelers' Club, when various matters relating to the association will be discussed. The association will also hold their third annual supper and ball at Stanley Hall, Montreal, on February 3rd. The entertainment will consist of moving pictures illustrating shoemaking by machinery, taken at the St. Louis Exposition. This will be the first time that these pictures will be shown in Canada.

Fire Commissioner Latulippe, after a lengthy enquiry into the fire which occurred at the premises of the Columbia Rubber Company, at 710 St. Dominique street, Montreal, expressed the opinion that it was impossible to believe that the blaze had started accidentally. At the first sitting of the enquiry firemen told of the existence of two large holes in the floor of the room where the fire started, and in view of the fact that the floor was of hard wood, the commissioner refused to believe that a dropped match or anything of that nature could have made the holes.

Canadian Oak Leather Co., Limited, of Brantford, has been granted a charter with \$100,000 capital. The company has taken over the assets of the Hamilton Oak Tanning in Woodstock. The plant in the latter city will be materially increased and more hands will be employed. The raw material used in the factory will be purchased from Thorntons, Limited, of Brantford. The officers of the new company are P. S. Thornton, president; J. H. Salter, vice-president; E. E. Thornton, secretary-treasurer; A. I. Schultz will continue as superintendent of the leather factory in Woodstock.

"The Day, Gormley Leather Co., of Boston, are now the sole selling agents in the United States of the Collis Leather Co., Limited, of Aurora, Ont., says the Shoe and Leather Reporter. "The Collis Leather Co. make a line of high-grade, colored, black and chrome calfskins, using the best Paris city skins. This concern has a new tannery which has been running about a year. The output at present is about 200 dozens per day, which will probably be increased soon. Walter Collis, who is the tanner and founder of the business, is well known as a man of wide experience and unquestionable ability. He was formerly connected with some of the largest calfskin concerns in the United States. Shoe manufacturers who have inspected this leather, report that it is on a par with any manufactured in this country."

The Reliance Shoe Co., Limited, who occupy the top flat of the Winnett & Wellinger building, at 350 Sorauren avenue, Toronto, have considerably extended their plant by leasing the basement in the same building and fitting it up for a sole stock room. Some delay was experienced in the installation of a new motor, new machinery, electric wiring, etc., but the sole stock room is now complete and up-to-date in every respect and is under the management of Bert Lomas, who for years had charge of the sole stock room of the Solid Leather Shoe Co., Preston, Ont. Mr. Lomas is a thoroughly capable man, and is a valuable acquisition to the staff of the Reliance Shoe Co. The factory is running at full time and the manager, P. E. Rivett, is

pleased with the amount of business they have received, considering the general condition of the shoe trade this season. The firm have just completed their second year's business, and find they have a strong hold on the market. Their goods can now be seen in nearly all the best stores in Ontario, and

MEN'S DONGOLA BLUCHER, TOE CAP, HEAVY BLACK FELT LINED, FELT SOLE AND HEEL—BY THE GREAT WEST FELT CO.

they attribute this success to the fact that they make nothing but boys' boots, and by giving all their attention to the one line they have been able to produce in the "Canadian Boy Shoe" the highest grade of McKay shoe, and in their "Canuck" Shoe they claim to have as good a one as can be bought at the price.

BIG TANNERY VISITED BY FIRE

Fire visited the extensive plant of the Breithaupt Leather Co. in Berlin recently, doing damage to the extent of \$45,000. The leach house, engine house and one beam house were burned completely, but through the heroic efforts of the firemen and a brick fire wall running from the foundation, clean through the building to the roof, the blaze was stopped before it reached the tan vats, dry loft and rolling house. In fact, nearly all the loss is in building and machinery and these will be replaced as quickly as possible. The Breithaupt Company say that it is their intention to build a large, new, modern beam house, with all the latest equipments, so that they will be able to turn out larger quantities of sole leather than ever. As their boilers are intact and have steam up again, the firm are able to heat the remaining parts of their plant, and, as the rollers and a large part of the machinery have been run by hydro-electric power, the Breithaupt Co. will probably be able to get on until their leach house and other buildings are replaced. In the meantime, they hope to keep the trade well supplied with what they can finish of their Eagle sole leather, along with the output of their plant at Penetanguishene, and with oak leather from the Hastings factory. The firm are grateful that their whole plant was not consumed, as the danger seemed very great at one time. The blaze was caused by an overheated friction pulley.

Louis J. Breithaupt, president of the company, which was founded in 1857, says that the courage and enterprise of the firm have not suffered by the reverse. The industry was started by the late Louis Breithaupt and has the distinction of being one of the pioneer concerns in Berlin. In 1869 and 1871 there were serious fires and the present brick structure, north of the G. T. R., was built in the latter year

and has recently been remodelled, modernized and enlarged. Since 1890 the business has been carried on as a joint stock company, Louis J. Breithaupt being the president and John C. Breithaupt secretary, both of whom are tanners, as well as practical business men. The Penetanguishene tannery was built in 1881 and 1882. There is also another tannery in Hastings, Ont., operated under the name of the Hastings Tanning Company. The company's output of sole leather is sold throughout Canada, Newfoundland, Great Britain and the United States. Cut soles and leather counters are manufactured in Berlin. This is a separate department in which a big business has been worked up.

THE LEATHER TRADE DISAPPOINTING

In the annual Financial Survey issued by the Toronto Globe, W. D. Beardmore, of Beardmore & Co., Toronto, gives the following instructive and interesting review of the hide and leather situation for 1913:—

One year ago, Chicago hides, although they were long-haired, had reached the highest prices ever known. Texas hides had reached 18 cents per pound, and native steers

W. D. BEARDMORE, TORONTO

had even sold as high as 20 cents per pound, notwithstanding that, in view of their condition, and the long hair, they were not worth intrinsically within 10 per cent. of August-September hides. The trade, realizing this, held off, and hides gradually declined, and in May the market stood at about 16½ cents for natives and 17½ cents for Texas steer hides.

Since June, until quite recently, the hide market has been a continually advancing one. Native steers in November sold as high as 19¾ cents, and Texas steers at 19 cents, the prices actually advancing in the face of considerable deterioration in quality. However, a lull came about the beginning of December, and a decline of fully one cent per pound has taken place. This, however, again does not represent the decline in the actual value of the hides, owing to long hair and bad condition. For these reasons December hides are not worth within at least 10 per cent. of short-haired summer hides, and the price, instead of being 18½ cents, should not be more than 16½ cents per pound, to make them equivalent in value to July-September hides, and if December-March hides decline one to two cents per pound below present ruling figures it would not more than represent the decline in quality.

The European market during the summer stood at record prices, but since about the beginning of November

has gradually declined. Again, however, the decline does not represent more than the decline in quality.

Frigorifico or packer hides in the Argentine have remained very much on a par with the Chicago market. The supply has shown a considerable shortage, and had it not been that tanners in the United States had curtailed very largely, even higher prices would undoubtedly have ruled.

In dry hides this year there has been a very considerable shortage, and prices have exceeded all precedents. The shortage in the supply has been greater than in the case of green salted hides, and if tanners had endeavored to purchase their full supply they would have found they were not to be had.

During November there was a reaction in prices, probably two to three cents per pound, on Buenos Aires hides, but the market was soon cleared up, and to-day there are few good season hides to be had, and a very small stock of any kind of hides.

Trade in Canada has been very disappointing. About the end of the year it had begun to slacken off from the extreme activity which had characterized 1912.

Undoubtedly in 1912 there had been a large surplus of shoes manufactured and distributed, and this year manufacturers found themselves without sufficient orders to keep them going fully, consequently the demand for leather has been slack, and the close of the year again shows dull trade.

The same remarks apply to the harness manufacture. Manufacturers had over-produced in 1912, consequently they have had to curtail most of 1913.

Trade in the United States has been on the whole better than in Canada, and there has been a great demand, particularly for sole leather. The Underwood tariff bill removed the American duty on sole leather, and many other kinds of leather, so that this has relieved the situation in this country for sole leather tanners who have moved a certain amount of their surplus, and expect to do a better trade in the United States after the end of the year.

HOLIDAY BUSINESS UP TO THE MARK

According to reports received from leading centres the shoe dealers in various parts of Canada appear to have done a very satisfactory Christmas trade in spite of adverse weather conditions and the absence of snow in many places. In several eastern points the trade exceeded in volume that of last holiday period, while in others it fell behind owing to the dullness in the rubber footwear line. The snowfall in Ontario and Quebec a couple of days before the holiday helped matters materially. Fancy and house slippers, hockey and skating boots and dress shoes had a big sale as yuletide gifts. Some merchants did remarkably clever advertising and thus induced the people to purchase useful and serviceable goods. The possibilities of the footwear houses for presents were ably set forth. For instance, here is the persuasive appeal made by one live, western retailer who did an unusually large trade: "The hunting boots that father denies himself, but always dreams of having—the hockey shoes that brother or sister never quite had the courage to ask for—the evening slippers that mother continually puts off getting—things that may seem extravagant to buy but not to give—these are the best of giving." The majority of dealers are now taking stock and preparing for their mid-winter sales. Business on the whole has not been as good in the retail shoe line as in 1912, but this was not to be expected owing to the tightness of the money market and the depression in trade generally as reflected in industrial expansion and building operations. However, things are not nearly so adverse as has been reported in certain quarters and the feeling on the whole is an optimistic one. The year 1914 is being looked forward to with interest. 1913 was not

a record one with the retail end but the turnover was on the whole very good, and very few financial reverses in the shoe line have been witnessed. Buying has been of a more conservative character and merchants have reduced stocks to controllable proportions.

THE TRADE NEWSPAPER

Few people realize the value of good trade newspapers to the whole community. It is wrong to imagine that advertisements monopolize the columns of the average Canadian trade paper. Yet the advertisements alone are worth many times the subscription price to the progressive retailer. The trade paper not only contains valuable information in regard to prices and trade conditions, but it is the apostle of good merchandizing, the breeder of live ideas which make for prosperity in the communities in which it circulates.

LIVELY BUDGET FROM QUEBEC

A. Leloup, manufacturer of mitts and gloves, recently made an assignment.

Everything in the shoe business has been rather dull during the holidays and the prospects for a rush season are not exceptionally bright.

P. Nicholas, whose store was recently destroyed by fire, made an assignment at the request of Eugene Thivierge, shoe manufacturer.

A despatch to the SHOE AND LEATHER JOURNAL from Quebec would indicate that the differences between the employes and the factory owners had reached an acute state. How long the trouble will last is a matter of conjecture. Sixteen factories in the city belonging to the Boot and Shoe Manufacturers' Association have decided that the employes must sign the regulations, a copy of which appeared in the SHOE AND LEATHER JOURNAL of November 15th. The workers were given until December 30th to sign and as they did not, it has thrown about three thousand men out of work, including cutters, lasters and machinists. Although the factories are not actually closed, the owners, it is understood, will only take back employes accordingly as each man will sign. The situation, which has been brought to a head, has been developing for several weeks and culminated because of the recent trouble in Gale Bros. and the Ritchie factories. There are only five factories not in the Manufacturers' Asso-

ciation—C. E. McKeen Co., Marier & Trudel, J. Larochelle, Rock Shoe Co., and Solid Shoe Co. The other firms are contending for the open shop system and say that employes must conform to the new rules that govern the plants. The machinists, who caused the trouble, are still hanging out for their demands in the recognition of the Union, which the sixteen factories have refused.

Tourigny & Marois, whose factory was recently gutted by fire, are removing their machines and damaged stock into their temporary premises at 344 Prince Edward street, formerly occupied by A. Pion, glazed kid tanner. The firm now have their offices located in that building. A couple of days after the fire the firm set about 100 men to work to remove every department to the new site and they expect to begin making shoes about the middle of January. Tourigny &

A. E. MAROIS, QUEBEC

Marois have bought the ground where the old factory was located, at the corner of Arago and St. Valiere streets, and will build a fine new modern shop there in the spring. Everything will be up-to-date and they will be able to produce all their line of goods on a more extended scale than ever. A. E. Marois has received scores of letters from wholesalers in all parts of Canada, expressing sympathy in their loss and assuring the firm of continued confidence and orders.

Interesting Footwear News

Leather Prices Steadily Advancing

EXTRACT FROM BRADSTREET'S:

An advance in the price list is due in the general leather market, it seems. The needs are great in every consuming country. England and the United States are bidding freely in outside markets, and with the home needs of Canada heavy at this time, the position of the trade is naturally strong. A shortage of supplies exists. Since 1911 cattle in the States other than milch cows decreased 3½ million head, or from 39,679,000 to 36,030,000. The supply of hides in the Argentine is 1,500,000 less than a year ago, and in India it is 900,000 below 1912. The uses for leather have been increasing during the past decade, and the volume of consumption has immensely increased in face of steadily dwindling supplies. The world is faced with two alternatives—either higher rates must prevail or the live stock industry be vigorously propagated.

OUR ADVICE—Buy only Solid Leather Shoes. A well selected and closely bought \$10,000 Stock of Footwear always on our shelves. None can sell cheaper.

The J.S. Roos
Shoe Co.

Sentinel Printing Co., Waterloo

AGAIN ELECTED A DIRECTOR

For the third time Chas. J. Silver, of Toronto, has been elected a director of the Toronto Board, Commercial Travellers' Association of Canada. This is a signal honor and one which shows the esteem and high regard in which Mr. Silver is held. He is widely known to the shoe trade by reason of his long connection with various manufacturing concerns.

For thirty years he has been calling upon the trade. He began his experiences with William Silver, Jr., when the latter was engaged in the shoe manufacturing business in Hamilton. Later he was with J. Whitham, of Montreal, and then for six years he traveled for the J. D. King Co. For the last nine years he has been on the selling staff of W. B. Hamilton Shoe Co., and covers a large portion of western Ontario with great success. There are few men in the commercial ranks who have more warm hearted friends than Charlie Silver.

NEW POSITION FOR MR. PARKER

A man who has sold shoes in every town of 1000 population and over in Ontario and Quebec, is S. H. Parker. He has been at the game 33 years and has just been appointed manager of the Solid Leather Shoe Co., Preston, Ont. Mr. Parker, who has entered upon his new duties, has many friends in the trade, and is well liked by all his customers. He began his

career with his brother J. C. Parker, now of St. Albans, Vermont, when the latter ran a shoe store in Montreal, as a retail branch of James Leggatt. Later he was employed in the large warehouse for a couple of years, but returned afterwards to the retail end, when his brother became proprietor of the branch business on McGill Street, which he had been conducting. S. H. Parker first traveled for the Lynn Shoe Co., of Montreal, and covered eastern Ontario. He was then with the Tetrault Shoe Mfg. Co., for about ten years, first calling upon the retail trade and afterwards supplying the wholesale. Seven years ago he joined the staff of the W. A. Marsh Co., at Quebec, as salesman and has made frequent visits to wholesalers in Quebec, Ontario and the Maritime Provinces, with whom he established a strong connection.

HAS MOVED INTO NEW HOME

The new shoe factory and warehouse of W. G. Downing, Limited, has been completed in Regina, and the firm have taken possession. A few finishing touches have to be administered, but in the meantime business is going on in the jobbing line. The manufacturing end will be started in a few weeks, when it is the intention to make several lines of staples. The new building

is 50 by 113 feet, four storeys high, built of red brick, with stone facings. The combined warehouse and factory is located at the corner of Sixth Avenue and Rose Street, Regina. The interior is well arranged and every modern convenience installed for the comfort and convenience of employes. When W. G. Downing, Limited, start manufacturing, they will be the first firm in the prairie provinces to make shoes and in pioneering the way certainly deserve every praise and encouragement for their enterprise and progressive spirit. W. G. Downing, who is at the head of the concern

has developed a splendid business in the West. His company is capitalized at \$200,000, and it is expected in his new business home that the volume of trade for his firm during 1914, will run over the half million mark.

ELECTED PRESIDENT OF ORGANIZATION

W. G. Berscht has just been elected president of the Guelph Commercial Travelers. He has always taken a warm interest in the welfare of this organization, and in the annual picnic has been a leading factor. Last year, he filled the position of vice-president. Mr. Berscht was born in the county of Waterloo and at the age of 15, went to Mildmay with his

brother, where he learned the shoe making business in its various branches. After several years' experience in the retail end, he went on the road for the L. E. Rowen Shoe Co., of Guelph, and was connected with that firm until three years ago, when he joined the selling staff of McLaren & Dallas, whom he ably represents throughout the Niagara peninsula. He is a gentleman of genial personality and untiring energy, and well liked by all with whom he comes in contact.

MR. FIRTH HONORED IN HOME TOWN

The knights of the grip living in Peterboro have recently formed an organization known as the Commercial Travelers' Association. There are some two hundred and fifty road men living in Peterboro, and a popular shoe traveler has just been elected second vice-president of the new association, in the person of J. E. Firth. Mr. Firth has resided in the

"Electric City" for the last eight years and has represented the W. B. Hamilton Shoe Co., of Toronto, for about eighteen years. He has a permanent sample room in Peterboro.

A Paying New Year's Resolve

—“I Will Sell McDermott Shoes in 1914”

The shoeman who pushed McDermott shoes during the past year will not need to be urged to make the above resolve. He knows just how well these shoes paid him, because he not only increased his gross sales, but also his *net* profits.

But for the merchant who has not yet given these *premier shoes for women* a trial, we would urge the above resolve as a big step toward the profits he is aiming at during 1914. A trial order will show why.

Davis Vegchrome Leather

Vegchrome is a winner. Put it in your samples and the leather will prove our statement.

Why is it a winner?

You may be from Missouri, so we'll tell you.

1. It has the strength, toughness, feel and appearance of properly tanned Chrome leather.

2. It is filled to give you a uniform substance, even in the belly and flank.

3. It has the softness of Elk, a property so desirable in the shoe of to-day.

4. It is not a fat-liquored stock, but is heavily stuffed with the best greases.

5. Because of No. 4 it will withstand water, which, you will agree with us, is most essential of a leather to be used in a Canadian climate.

6. It will show much better results from your cutters than the average leather, and a shoe manufacturer knows what that means.

We can supply it in Chocolate and Black.

SPHINX Shoe Cement Paste

"SPHINX" stands unique and without a rival in excellent qualities wanted by the shoe manufacturer

It is a quick, strong and clean adhesive, ready for use.

It absolutely takes the place of high-priced cements—on all kinds of linings, cloth or leather, such as vamps, side linings, stays, sock linings, etc.

It is flexible—when applied thin with a brush. Will fasten counters and toe pieces, tap soles, etc.

Best for sock linings, as they never loosen.

There is nothing made that is just as good.

22-FOOT GOODYEAR SHOE REPAIRING OUTFIT

MODEL N

THIS Outfit represents the highest development in shoe repairing machinery, and meets every demand of modern shoe repairing. It embraces all the essential processes for making new shoes from old ones, giving the maximum of equipment and efficiency in the minimum space. The Outfit has the Goodyear Stitching Machine with all its improvements, including a new style steam generator which uses gas or gasolene for generating the steam, and operates automatically, thereby insuring a uniform heat for keeping the wax in proper condition and requiring little attention from the operator. The Edge Trimming Machine has the new feature of the two shafts, being operated by a single belt, and the cutter grinder is attached directly to the main shaft. This arrangement gives better results with less power.

The Buffing and Scouring Machine has a shaft 57 inches long and carries the following equipment:

- | | |
|--|-----------------------------------|
| 2 Split Bottom Buffing Rolls | 2 Flat X-Ray Heel Scouring Wheels |
| 2 "C" Shape X-Ray Heel Scouring Wheels | 1 Heel Breast Scouring Wheel |
| 1 Pin Wheel Pad Complete | |

A powerful Blower System removes the dust resulting from the trimming, buffing and scouring operations, and is designed to overcome certain objectionable features of other blowers.

The Finishing Machine has a 78 inches shaft which has all the necessary equipment for black or russet work:

- | | |
|--|--|
| 2 Corrugated Rubber Shank Finishing Wheels | 1 Corrugated Rubber Heel Finishing Wheel |
| 1 Corrugated Rubber Bottom Finishing Roll | 2 Shank and Bottom Brushes |
| 2 Heel Brushes | 1 Stitch Cleaning Brush |
| 1 Levelling Roll | 1 Bead and Wheel |

At the end of the Outfit is the Oscillating Edge Setting Machine which is fitted with union irons and in its motions duplicates hand workmen with quicker and better results.

Each of the machines is operated independently by a friction drive pulley, so that it is necessary to use only those machines which the operator may require. This feature means a saving of power.

All the machines are firmly mounted on legs and driven by a countershaft with carefully adjusted bearings, so that the Outfit runs with very little vibration, and is in every way most efficient.

FULL INFORMATION FURNISHED PROMPTLY ON REQUEST.

Our New Ottawa Warehouse is in Full Operation

This will be welcome news to every merchant handling rubbers throughout that big district known as the Ottawa Valley region.

Dealers as far West as Pembroke and right down to the St. Lawrence will now be able to have sorting orders filled more expeditiously than ever before.

This new depot gives us splendid facilities for keeping a large stock constantly on hand. Situated as it is at 225 Queen Street, just around the corner from Bank Street, right in the centre of the commercial part of Ottawa, it is very easy of access for visiting members of the trade.

Mr. S. Sherman, who is in charge, has wide experience, and is supported by a capable staff. A complete range of both Miner and Shefford Brands will be carried in stock.

Every dealer in the Ottawa Valley should send that RUSH order to our Ottawa warehouse.

Those Customers with Bunion Trouble— Do You Do Anything for Them? Why Not?

And especially when there's big profit in it, and mighty little work. Many a shoe salesman has spent valuable time stretching shoes to ease a Bunion, when he could have sold the customer a Scholl Bunion Shield and put some cash in his till. Not only that, but by satisfying the customer he would have made a favorable impression that would later sell more goods. Sell every customer with Bunion trouble

Scholl's Bunion Reducer

A pure gum rubber shield so shaped that it fits snugly over the enlarged joint, next to the skin, relieving all irritation caused by the shoe. It excludes all air and retains the natural moisture of the foot, thus arresting further growth of the Bunion enlargement by its reducing action on the tissues. Fits all feet perfectly—no shifting or bulging—no larger shoe needed. Used with success by Chiropodists and Shoe Dealers everywhere.

Retail 50c. each, \$1.00 per pair—three sizes. Nearly 100 per cent. profit. Send for sample to-day.

The Modern Shoe Store is no Longer Simply a Place to Sell Shoes

The proprietor, or at least one of the salesmen, has studied Dr. Scholl's Free Book on "Scientific Correction for Ailments of the Feet," and is the authority on Foot Trouble in his locality. Popular demand created by Scholl's wide advertising has made it a place where foot-suffering humanity can obtain relief.

Who gets all this business in your town. Do you? Why don't you? A very small investment will put you in a position to make big profits on every pair of troubled feet. Foot-Eazers and other Scholl's Arch Supports, Bunion Reducers, Bunion Rights, Bunion Springs, Absorbo Pads and other Scholl's specialties are quickly and easily fitted—you increase your prestige as a foot specialist—and make money besides. Write to-day for a Scholl catalogue and samples. It'll be worth your while.

Scholl Specialties Are Big Profit Bringers

The demand for these appliances is established and is being increased by daily advertisements in hundreds of magazines and newspapers. Live dealers—helping by using our posters, signs, cut-outs, booklets and other free advertising matter—are being helped to quite a little extra money, too. Increase your income—get in a line of Scholl's goods.

LET SCHOLL ADVERTISING HELP YOU

We've taken this whole page to tell you that Scholl's Foot Specialties are easy sellers—make big profits and bring satisfied customers. We've told you some of the **WHY**, but not all of it. You're interested in what we've told—you'll be more interested in the rest. And you ought to have it—in fact, you cannot well afford to be without it. Write for our catalogue—right now. Ask for our catalogue and "First Step" assortment offer.

“Make Good” because they’re Made Good

IF there’s one thing upon which we pride ourselves above another, it’s attention to detail. Every piece of material, every stitch that goes into the construction of “Elmira” Felt Shoes and Slippers, is made with painstaking thoroughness that insures both serviceability and comfort to the wearer.

That’s the secret of the great reputation that “Elmiras” have built up for themselves. That’s why there’s such a consistent demand for them, and, above all, that’s why you should have a stock of them with which to meet this demand.

The “Elmira” line for 1914 embraces a wide range of all that’s latest and best in Fine Felt Footwear, and if you haven’t seen the jobber’s samples you should write direct to us for illustrations without further delay.

The Shoe that is 100% Saleable

The Classic SHOE

☞ The great beauty of handling "Classic" Shoes is, that you don't have to argue to sell them. Just say—"Lady, it's a 'Classic'!" That closes the deal. Your customer knows that she is getting full value for her money; she has bought "Classic" Shoes before or perhaps she has heard all about them from her friends, and the sale is easily negotiated.

☞ We've got a fine and comprehensive range of Ladies', Misses' and Children's shoes; the kind that will put snap into your business for 1914.

☞ Why not get a thorough knowledge of the Classic Line?

☞ See our samples and let your customers know you sell "Classic" Shoes.

Getty & Scott, Limited

"Classic" Shoes

Galt : Ontario

Survival Value

What is it? Survival Value is the lasting prestige added to all footwear by the affixing of the **Union Stamp**—it is the surviving standard because:—

- 1st It is a guarantee of honest footwear, made under the best conditions.
- 2nd It is a pledge of expert workmanship.
- 3rd It is the pass-word which opens the sales doors to Union Men everywhere.
- 4th After the other inducements have all been recited, the conclusive and finishing argument is the **UNION STAMP**.

Every shoe bearing the **Union Stamp** retains a sales value of long duration, for no shoe bears the stamp unless it has been produced under the proper conditions and represents honest value.

For mutual profits, better and bigger business, insist upon the official stamp of the **Boot and Shoe Workers' Union**—the only guarantee of Union Footwear.

A Pair of Splendid Sellers for 1914

WHY experiment with some new and practically unknown brand when there is such a pair of proven profit-makers as the "PROFESSOR" and "DOCTOR'S" SHOES? You will only be wasting your time—and money; you will never convince a customer who has actually worn these that there is anything "just as good."

Both the "PROFESSOR" and the "DOCTOR'S" have an individuality all their own. They are absolutely correct in shape, conforming easily to the natural contour of the foot. They are built as good shoes should be built—comfortable, attractive, and of great lasting quality. They will "put you in right" with your customer and make each one a live, enthusiastic, talking advertisement.

Your jobber will tell you more about them—ask him.

What the Local Dealer Does for His Community

Head of Ontario Shoe Retailers' Association Speaks of Worth of Association and What it Has Accomplished—The Advantages of Trade Organization—Clearing Away Grievances and Helping to Solve Many Difficulties

By T. H. BIGWOOD, President of the Ontario Shoe Retailers' Association

At the beginning of another year in the retail shoe business, permit me to extend greetings to the trade and wish every member a pleasant and prosperous New Year.

As president of the Ontario Shoe Retailers' Association, to which position I had the honor of being elected at the annual meeting in September last, I desire to say that I believe the Association has and is accomplishing effective and useful work notwithstanding the support and encouragement of the members has not been as

active and general as it should. This is, perhaps, due to the fact that the aims and objects of the organization are not as well understood as they might be.

Allow me to say a few words on its behalf. The Ontario Shoe Retailers' Association is not a body for the raising of prices or the creation of a combine in any sense of the word. Prices or terms of payment have never been discussed; rather it is a union of retailers to eliminate certain trade grievances and evils with which every man in the business is familiar, and to come to a better understanding on problems of mutual interest which make for the welfare and advancement of our calling. The purpose is to become better acquainted with one another and to exchange experiences and views in dealing with certain matters such as credit to customers, collection of accounts, approbation, early closing, weekly half holidays, freight rates, mail orders, delivery of goods and many other topics that I might mention.

The organization, which is a section of the Retail Merchants Association of Canada, has the influence and prestige of this great body of businessmen, provincial boards now existing in all the provinces of Canada and the membership of which has increased enormously during the past year owing to the aggressive work of the secretary, E. M. Trowern, of Toronto. Nearly every town and city has its local organization, and of the worth and the work it is unnecessary to refer at length. Measures which are both unjust and inimical to the best interests of the retail merchants of the Dominion have been successfully fought in both the provincial and federal houses of parliament, and much accomplished to raise the standard and dignity of mercantile life.

Take the retail merchants out of any city or town and what have you left. They are the back bone and mainstay of every community and, while it may be argued that it is the people who support and make possible their existence, yet, on the other hand, it is the local retailer who pays the bulk of the taxes, water rates, frontage assessments, local improvements, rents, etc., employs the young people of the place who, otherwise, would have to leave home to get their start in life and gives them that experience and insight into business which later equips them to fill larger spheres of activity and positions of emolument and responsibility or to embark in ventures on their own account.

Nearly every shoe retailer to-day owes his start to the thorough training that he received in his native town. The merchant has taken the raw material, so to speak, and developed it and yet too often I am afraid that those, who later in life have secured a large measure of this world's goods, forget what has been done for them by the management of the stores in which they were first employed.

Advantages of Home Buying

The home merchant is the best friend that any community has. He supports the churches, schools, colleges and charities, and every enterprise launched for the upbuild and progress of the city, town or village in which he makes a living. In times of depression or unemployment how often does he extend credit and enable those, who would otherwise be deprived of life's necessities, to live comfortably and happily until factories resume operations or the building and other allied trades take on their wonted activity. The community owes each merchant a debt of obligation which it often ill repays, and in periods of plenty, the persons who have been accommodated, frequently ignore the local man and send out of town for requisites which they can procure equally as well and cheap at home when quality and service are taken into consideration. Enjoying the advantages of personal inspection, prompt delivery, quick service and of returning the goods in the event of dissatisfaction, defect, or misrepresentation—are other benefits which are apt to be overlooked. The customer pays no freight or express bills, cartage or postage, and can obtain what he desires and at the very time that he most needs it. Again, I say that the average local merchant is one of the chief

factors and solid citizens than any community can possess and worthy of patronage and confidence. There may be exceptions but they are very few.

Why Not Show Friendly Spirit

I might add a great deal more along this line did time and space permit. Let us get better acquainted with one another and, at this inauguration of another year put aside petty jealousies, bickerings or suspicions and seek to work unitedly for the welfare and prosperity of the trade in which we are most concerned. As members of the association we can become well acquainted and, if we make the advance and shake hands with the other fellow and wish him well, we will discover on better and closer relations after all he is not underhanded, mean, or despicable, but that he has to strive with the same difficulties and contend with the same obstacles that we met with in every day business transactions. It is by the free exchange of opinions and experiences that we become stronger and better business men and raise the dignity, reputation and honor of our trade.

Stopped Sale of Single Pairs

What has been done by our Association since it was organized two years ago? We have, with the co-operation of the wholesalers and jobbers, put a stop to the sale of shoes by them in single pair lots, and in this I am to say that practically all houses have joined with us. On the other hand, we have obligated ourselves not to send customers to wholesale establishments with orders and have appointed a grievance committee to whom any violation on either side may be reported in confidence and full investigation will be made. This committee has had very little to do, so thoroughly has the arrangement been observed. Now, every wholesale house bears in its sample room the card, "Positively no goods sold retail." We are also stopping the practice of one wholesale house in a particular line sending any member of its staff with an order to another firm in a different line, asking that an order be honored. All this has meant much in the way of increased trade to the retail shoeman in Toronto and other cities where jobbing houses are located. Let me here express the appreciation of the Association at the manner in which that branch of the trade has done its part to assist us in this good work. There may be yet some infringements of the understanding but they are comparatively small to what they were before our Association took up this commendable work.

Where certain findings and other articles are advertised by the manufacturers to be sold to the public at an unalterably fixed figure, we have requested the producers not to do business with retailers who will not honor the agreement. Good progress is being made in this line. If anything is nationally advertised to be disposed of at a certain price to the consumer, we, as members of the Association, should do all in our power to live up to it and support the manufacturers. I am referring more especially to the sale of foot appliances, arch supports, polishes, etc.

Making Dead Beats Pay Up

Another matter of which the members of our Association are availing themselves is the excellent system of collecting accounts from slow pays and never pays, a number of which seem to live in every community. The form letters which can be obtained, are doing their work exceptionally well, and shoemen who have given them a fair trial speak of the fine results that have been obtained in inducing persons, who would not otherwise settle their bills, to do so promptly when these documents have been sent out.

In conclusion, let me point out that many other moves for the good and welfare of the trade are being made. The membership fee of our Association, which is only five dollars, is money well invested and devoted to a splendid cause.

In unity there is strength. Every great reform has been brought about by agitation and education. Isolated effort has never accomplished very much in a trade or business sense, yet to-day there are many who are perfectly willing to reap all the benefits without putting their shoulder to the wheel and giving a push.

Will You Give a Boost

Do not be a looker-on, be a toiler, and do your share, humble though it be, in achieving a higher standard of efficiency, service and usefulness. May the year 1914 be the brightest and best in our trade and in the history and expansion of the Shoe Retailers' Association. Will you do your part?

HE LIKES THE JOURNAL

Enclosed you will find cheque for one dollar in payment of my subscription for 1914. Have been thirty-five years in business here and like your paper very much. Wishing you the compliments of the season,

Yours truly,

C. HENRY DIMOCK,

Windsor, N.S.

BEST WISHES FOR GOOD YEAR

Enclosed you will find express order for subscription to "Shoe and Leather Journal." Wishing this up-to-date Journal and the editor a most happy and prosperous New Year,

J. W. THOMSON,

Buckingham, Que.

SPLENDID IN EVERY WAY

Your paper is splendid in every way. I find it right up to the market. Wishing you the season's compliments.

Sincerely yours,

ROSECRANS MURPHY,
(Julian-Kokenge Co.)

Chicago, Ill.

TELLS HIM MANY THINGS

Enclosed please find \$1.00 for the "Shoe and Leather Journal." I could not think of doing without it, as it is a very valuable help and gives me lots of information regarding what is going on in the trade.

HUGH MacKAY.

Trenton, N.S

FIND IT A VALUABLE MEDIUM

Please find enclosed one dollar for a renewal of my subscription to the "Shoe and Leather Journal." I think it is a valuable publication and I get much good advice from a perusal of its pages, which are full of live suggestions.

Yours faithfully,

JAMES MINALL.

Birtle, Man.

THE ORIGINAL TITLE HEADING IN JANUARY, 1888

Conditions and Happenings in the Trade Over a Quarter Century Ago

Looking back over a lifetime is always fascinating, even though sadness be more less mingled with gladness. The changes that have occurred in the character and per-

CHARLES KING, TORONTO, THE FIRST LEATHER MANUFACTURER TO ADVERTISE IN THE "JOURNAL"

sonnel of the shoe and leather trades since the *SHOE AND LEATHER JOURNAL* made its modest bow to its constituents in 1888 naturally recalls the words of Tom Moore—

"When I remember all
The friends so linked together,
I've seen around me fall
Like leaves in wintry weather,
I feel like one who treads alone
Some banqueted hall deserted,
Whose lights are fled, whose garlands dead,
And all but me departed."

Men who were in the forefront of the shoe trade twenty-five or thirty years ago have passed away and some

of their names are almost forgotten. Among the stalwarts of that day were such men as Ames, Boterell, Linton, Boivin, McCready, Smith, Slater, Bresse, King, Damer, Whitham, Hagar, Stephens, Orr, Hamilton, Cooper, Polley, Mullarky, whose names were household words in shoe circles, but who have passed beyond and left but a small remnant of their contemporaries behind. In leather circles the ravages of time have been perhaps less marked and many of those who were prominent at the time referred to, still maintain for the most part, their connection with the trade, although such old timers as McLean, Cassils, Gourdeau, Jacobi, Wardlaw,

THE LATE W. B. HAMILTON, TORONTO, THE FIRST SHOE MANUFACTURER TO ADVERTISE IN THE "JOURNAL"

have joined the great majority. Greater changes have occurred in leather concerns themselves than in the personnel of the trade and where business was once spread very widely over the country it has gradually centred in larger and more thoroughly equipped concerns.

Canada was in the making, so to speak, when the *SHOE*

AND LEATHER JOURNAL was born. The Canadian Pacific Railway had just been completed, the western provinces were still territories, and Calgary, Edmonton, Prince Albert, and even Brandon, were spots on the map indicating but

THE LATE JOHN STEPHENS, MONTREAL, A LIFE LONG FRIEND OF THE "JOURNAL"

feeble promise of their great future. There was no "Northern Ontario," Cobalt, Yukon, or "Peace River Country," as we know them to-day and the population of the whole of Canada did not much exceed five millions. Montreal and Toronto were considered good trade centres with only about two hundred thousand inhabitants each.

With regard to the shoe trade which was yet in its infancy, the entire product of the various factories did not reach over twenty-five million dollars in value and we imported about half a million dollars' worth, considered an enormous amount in those days, and calling for vigorous protest on the part of shoe manufacturers.

Put Money on Another Horse

A few facts and fancies culled from the first issue of the SHOE AND LEATHER JOURNAL will afford interesting reading, especially to "old timers." Of the launching of the Journal it might be said that the ceremony was attended with probably more than the usual fear and trembling and a plentiful supply of "coldwater" was not lacking at the christening. On this behalf a little personal reminiscence may be pardoned, as throwing some light on conditions at the time, as well as illustrating the discouragements in getting the enterprise under way. John McPherson & Co. had just completed their new factory on John street, Hamilton, considered then the most complete and up-to-date plant in the country. It was expected that this concern would prove perhaps the most encouraging "prospect" for advertising support and the prospectus or "dummy" was laid before its head. After carefully looking it over James A. McPherson handed it back with the suggestion that the venturesome publisher put his money on a more likely horse. Fortunately Mr. Chas. King, of King Bros., Whitby, was standing close by listening to the conversation and at this point stepped up and expressed surprise that Mr. McPherson above all others should discourage such an enterprise. He explained that he, a day or two before, had given his endorsement in the shape of a small advertisement. James A. swung over and

closed for the back cover which the firm occupied for years, some of the ads. written by the sprightly "Jimmie," as he has always been known to the trade, being not the least interesting features of the early issues of the SHOE AND LEATHER JOURNAL from a literary as well as a business standpoint. His "cold feet" propositions will be remembered by old readers with relish. Later some of these may be quoted.

Live Political Topics of Time

Commercial Union was a live political issue at the time, and it is not surprising that in the editorial columns this question should receive vigorous consideration. The following paragraph occurs in this connection: "There is no question as to the desirability of an enlargement of intercourse between the two countries (United States and Canada) but it must be of a nature that shall interfere as little as possible with the existing interests of each. It ought to be possible to arrange an interchange of natural products that will do ample justice to both; but the fact of Canada's peculiarly happy position in possessing such an unlimited variety of natural products causes our friends across the line to regard with more or less suspicion any project that promises to afford us facilities for marketing these, even when they are not in a position to procure the same articles elsewhere."

The Toronto Board of Trade held its first annual dinner just before the first number of the Journal was issued and an account of same appears in which a report is given of a speech made by Rt. Hon. Jos. Chamberlain, who had just arranged a settlement of the "Fisheries Question" on the subject of "Imperial Federation." Amongst other things Mr. Chamberlain said:

"He felt certain that the confederation of the provinces of Canada, with the remarkable advancement and development it has caused, would be a beacon to point the way to a grander federation of the various colonies of Great Britain in the near future. The great hope of Canada lay in the filling up of those vast tracts of fertile lands in the North-West with an agricultural population. This would inevitably

JOHN RITCHIE, QUEBEC, ONE OF THE ADVERTISERS WHO APPEARED IN THE FIRST EDITION OF THE "JOURNAL"

occur, and that very soon, owing to the facilities of communication recently opened up (C.P.R.)"

The "Rubber Trust" in the United States, afterwards known as the United States Rubber Co., was on the tapis and vigorous discussions anent its organization were taking place in the various trade publications. As not effecting seriously conditions in Canada this question was given merely cursory consideration.

The first shoe advertisement taken by the SHOE AND

LEATHER JOURNAL was that of W. B. Hamilton & Co., Toronto, and it is curious to note that the names of James Buik and A. W. Blachford, then directors, appear in same, together with those of W. B. and C. B. Hamilton. This concern, which is one of the oldest in the trade, was the first to appreciate and endorse as it has ever been, any "good thing" in connection with the shoe trade. The late W. B. Hamilton was foremost in every movement that had for its object the improvement and advancement of the trade. The second advertisement taken of shoes was that of Jno. McPherson & Co., Hamilton, who, by the way, were the first to use shoe cuts largely in their announcements. The first eastern shoe house to patronize the Journal was J. & T. Bell, then of Notre Dame street, Montreal. Mr. John Stephens, one of the whitest men of the shoe trade, whose untimely death by accident was announced last month in the Journal, was the first member of the eastern shoe trade with whom the writer became acquainted. Mr. Hagar and Mr. Stephens, who were then partners in J. & T. Bell, were always amongst the warmest friends of the Journal. Both have "crossed the bar."

The first leather advertisement was that of King Bros., of Whitby and Toronto, "Charlie" King being at that time one of the best known figures in the leather and shoe trades of Canada. The reputation of King's calf was untouched at that time by any other similar product.

A list of the early advertisers will be found interesting for more reasons than one and we give it herewith.

Shoe Manufacturers:—W. B. Hamilton & Co., Jno. McPherson & Co., J. & T. Bell, Geo. S. Slater, Henry Porter, Botterell & Co., Chas. A. Ahrens & Co., Wm. A. Marsh & Co., W. H. Polley & Son, H. Griffith, J. E. Woodley, Jas. McCready & Co., Booth & Langan, A. E. Turner & Co., Louis Côté & Bro., G. Boivin, G. Bresse, Cooper & Smith, Leclerc & Larochelle, Berlin Felt Boot Co., John Ritchie, Jas. Whitham & Co., R. Smardon, P. Hemond & Fils, H. E. Hamilton, I. D. Thurston, St. Pierre & Clapin, Dominion Shoe Co.,

WM. A. MARSH, QUEBEC, WHO HAS ADVERTISED IN THE "JOURNAL" SINCE ITS FOUNDATION

Canadian Shoe Co., N. Dion & Co., Brown Whiting & Co., Quebec Shoe Co., Wm. Griffith & Co., Hepburn & Co., Fogarty & Bro., Turner, Valiant & Co., Damer & Son, J. D. King & Co.

Leather Concerns:—King Bros., Louis Breithaupt & Co., Beardmore Co., D. W. Alexander, A. R. Clarke & Co., E. Frank Moseley & Co., Geo. A. Mooney & Co., Felix Gourdeau, Jos. King, H. J. Fisk & Co., John Hallam, Phillip Jacobi, Bickell & Wickett, Chas. Knees.

Last Makers:—Selway & Lendon, John C. Iredale & Co.

Rubber Footwear:—Canadian Rubber Co., Granby Rubber Co., Lycoming Rubber Co.

Machinery:—B. J. Pettener, Thos. Hocking, Goodyear Sewing Machine Association.

The rubber shoe trade was almost altogether in the hands of the Canadian Rubber Co., of Montreal, when the

A. R. CLARKE, TORONTO

C. A. AHRENS, BERLIN

WHO ADVERTISED IN THE FIRST EDITION OF THE "JOURNAL" IN 1888 AND ARE USERS OF ITS COLUMNS TO-DAY

SHOE AND LEATHER JOURNAL came on the scene, although the Granby Rubber Co. began operations a few weeks later. The executive of the Canadian Rubber Co. were Mr. Scholes, secretary; J. O. Gravel, treasurer, and J. J. McGill, general manager. The goods at the time we speak were designed on most conservative lines, such well known names as "Gypsy," "Carnival," "Croquet," "Dorothy," "Fairie," "Victoria," etc., appearing in the announcement.

The Granby Rubber Co.'s interests were at first in the hands of T. V. R. Brown and the western agency was taken over months later by Jos. Bonnicks, a former traveler for W. B. Hamilton & Co.

The Lycoming Rubber Co., of Williamsport, Pa., were the only American concern represented in Canada, James A. Young handling their interests in his usual vigorous and "picturesque" manner. Jim Young afterwards became chaplain of the Shoe and Leather Club, probably on account of his frequent "biblical" quotations.

Hally Bros., did about the only purely jobbing business in the west, handling principally rubbers for the Canadian Rubber Company. Both John and Robert Hally were well known figures in the shoe trade twenty-five years ago and both are gone the way of all flesh. Jas. Leggat, the Montreal jobber, passed away also a few years ago.

Conditions of the Trade

Spring samples were announced in the first number of the SHOE AND LEATHER JOURNAL, although issued on the fifteenth of January. At that period it was considered early enough to get out with spring goods about January 1st and with fall lines about July 1st. The firm that got its samples out on the road by December 1st was considered as stealing a march on its competitors. In fact an agreement was circulated and largely signed at the time making the first of January the earliest date for travelers starting out with the new season's goods. Terms at the time were as a general thing four months from date of shipment and often longer and it took some nerve to ask a retail concern to honor a draft at sixty days. In the account of the new Jno. McPherson & Co. factory given in the first issue the capacity of one thousand pairs a day was bravely announced. Amongst the new machines noted were Gilmour levellers and Tapley heel burnishers, and similar machines not to be found to-day in the category of modern shoe factory equipment.

Congratulations were extended to the following successful candidates for municipal honors: Mayor L. J. Breithaupt, Berlin; Ald. G. J. St. Leger, Toronto; Ald.

Building Up a Big Shoe Business on Sound Principles

Give the Public the Best Value and Service for Their Money—Keep the Interest of the Customer at Heart—Secure the Loyalty and Co-operation of Your Staff and do a Strictly Cash Trade—Factors in Success of Winnipeg Firm

Operating three large and splendidly fitted up shoe stores in Winnipeg, the Rannard Shoe Co. are a leading factor in the business life of the prairie capital. C. F. Rannard, who has been sole proprietor for a number of years, has been branching out, and a few weeks ago purchased the Nickle shoe shop at 273 Portage Avenue, which will shortly undergo alterations, bringing it to the front as one of the best appointed emporiums in the footwear line. The Rannard Shoe Co. will be incorporated, letters patent being taken out this month. The new company will have a paid-up capital of \$150,000, and the officers will be announced in the near future.

C. F. Rannard, who has been in the shoe business for a decade, has met with splendid success in his undertaking. He is particularly strong on organization and attributes a

who are adepts in the buying and selling of shoes. They have first the interest of the customer thoroughly at heart dealing squarely with the public and giving the best values.

A Jolly Social Reunion

On December 30th the employes were guests of the company at the annual banquet, which was held at the Fort Garry, the new palatial hotel of which Winnipeg has every reason to be proud. This was the tenth annual affair of its kind and the function was voted the most enjoyable ever held. Every member of the staff of the three stores was presented with a cheque from the company as a mark of appreciation of the extra energy and co-operation which the employees had shown during the course of the year. J. Waddington, sales manager of the Main street store,

NO. 1, STORE AT 536 MAIN STREET, CORNER JAMES, WINNIPEG

great deal of the expansion and development to the loyalty and co-operation of his staff. He speaks of their work and worth in the highest terms. His ability as a financier is recognized on all sides and his relations with manufacturers and wholesalers have always been of the most satisfactory character. He has ever been a staunch believer in the strictly cash system, buying for cash and selling for cash. The turn over of the firm during the past year was nearly three hundred thousand dollars. In this issue are presented exterior views of the Main Street store at the corner of James, the Portage Avenue store at the corner of Hargrave, and the newly acquired Nickle store at 273 Portage Avenue.

An interesting fact is that the Rannard Shoe Company have the only two corner shoe stores in Winnipeg, affording them a splendid opportunity of attracting the attention of the passing public for they are ardent advocates of up-to-date window displays and make full use of the excellent facilities by being at the street intersections already named. The management is composed of smart, alert business men

and M. A. Cafferky, sales manager of the Portage avenue branch, were presented with purses of gold as winners of the competition for the biggest sales during the year. Mr. Waddington's total was \$22,000 and that of Mr. Cafferky \$19,700.

C. F. Rannard, who occupied the chair, intimated that this was the last banquet at which he would appear as sole director of the concern, as arrangements had been made for turning the firm into an incorporated company. Mr. Rannard referred to the opening of the new store, the "Nickle," on Portage avenue, the third of the company's chain of stores. He stated that the Rannard Co. were now the largest exclusively retail shoe company in Canada.

A. R. Rannard, manager of the original store on Main street, briefly outlined the growth of the company, and the founding of first one and then another store on Portage avenue.

L. Farewell, of Hartt Boot and Shoe Co., Fredericton, N.B., referred to the loyalty and co-operation which existed between the company and its employees, and eulo-

NO. 2, STORE AT 330 PORTAGE AVENUE, CORNER HARGRAVE STREET, WINNIPEG

gized the cheeriness and optimism which characterized the management.

Members of the staff, including H. F. Eadie, M. A. Cafferky, and James Waddington, testified to the good feeling which had always characterized the relations between the employees and members of the firm.

The Main street store of the firm is situated at the corner of James Street, in the W. J. Christie block. This store has been running as a boot and shoe store for twenty-five years—for fifteen years by the Kilgour-Rimer Co., up to 1903, when they sold out to the partnership of Rannard & Chap-

Twenty-Two Varieties of Heels on Women's Shoes

Are You Familiar with the Different Kinds—Variation in Names Has Brought About Confusion and the Buyer Should Have Some Knowledge of the Correct Name and Shapes—The Varying Distinctions

Many differences of opinion have arisen of late as to the correct names of the new heels of the season. This variation in names has brought about a confusion that, in several cases, resulted in the cancellation of the entire order. When you consider that there are to-day some seventy-two varieties of heels for women, you get some idea of the possibilities of error. The definitions here given are vouchsafed by a number of heelmakers, as well as high-grade retail shoe merchants, and make be taken as a treatise based on authority, says the Boot and Shoe Recorder.

It is interesting to note that the newer heels—the Cuban-Louis, Kidney and Spool variety—give a broader base, in the shape of a top lift, that is considerably wider than the lift of a Cuban or of a Louis heel. These new heels rock less and are less liable to cause a woman to sprain her ankle by a sudden or insecure step.

The vogue of the new Kidney heel, Cuban-Louis heel, etc., has, in many communities, caused a rapid retirement of the old style Cuban heel. In one case a Western shoe merchant found that when he opened his stock for the season the old style Cuban heels would not move even at a low price. By telegraph he got in touch with Eastern factories and in ten days the shoes had not only been shipped East, but had gone through the heel room and had been returned to him. They were equipped with the latest Kidney heel at a cost of approximately 25 cents per pair. The sales of the season were saved to him, for he disposed of the shoes at an advance of from 50c to \$1, and profited accordingly.

An analysis of the five heels shown is given herewith, and we are indebted to P. A. Brown, of the Lynn Wood Heel Co., for these definitions, as well as for the heels from which photographs were made:

The Five Standard Heels

There are five standard styles in wooden heels, as follows:

No. 1 cut shows a true Louis heel, the most familiar style in wooden heels, and a foundation for the various styles in wooden heels of to-day. It is the correct heel for dress shoes for evening wear. It is made two inches high and higher. Its features are its slender, graceful lines in breast and back, its thin neck, its round top lift and its lip, which extends under the arch of the foot. The sole is worked over this lip, making a smooth and graceful curve. This heel has just the right pitch to support the body.

The true Louis heel goes back to Louis XV of France. It's one of the oldest styles in wood heels. The Cuban heel appeared at about the same time of the Cuban War. Possibly it came from Cuba. The French-Louis heel is so named to distinguish it from the Cuban-Louis heel.

No. 2 cut illustrates one of the first modifications of the true Louis heel, a French-Louis heel. It has a thicker neck and a broader top lift than the true Louis heel. A crescent-shape piece is cut from the top lift at the breast of the heel. It combines stability and style. Its broad tread has made it a practical style wood heel for street shoes.

No. 3 cut shows a Cuban curve heel and has a straight breast, with a concave surface, a thick neck and a top lift of the crescent shape as large as the neck. It satisfied a demand for wood heels with large top pieces.

No. 4 is the Kidney, a French military heel, and has no lip extending under the arch of the foot. Its breast is straight like that of a Cuban heel, and is concaved. It has a thick neck and broad top lift, like the French-Louis heel. It is a favorite style wood heel for street shoes of to-day. Its

top lift, as big as a silver dollar piece, provides for a safe, sure and straight tread.

No. 5 depicts a Cuban-Louis and has a Louis style lip and breast, a Cuban style neck, which is thicker than the neck of a true Louis heel, and a top lift of the same style as has the Kidney heel, but slightly smaller. It is a style that is in large demand.

The variations in the styles of wood heels are numberless. A shoe manufacturer or a shoe merchant asks that his heels be made a trifle larger, or a trifle thinner or thicker in the neck, or that the slope of the back of the heel be more sweeping, or that the lip extend a little more under the arch, or that the breast be more deeply concaved. Or he may ask to cut off the lip entirely, as is the case with a straight half Louis heel, so that he may cut down the costs of making his shoes.

Nearly Alike to the Eye

There are so many variations on the wood heels that it's only natural that there should be some confusion in naming the heels, for some of the different kinds of heels, as they are commonly spoken of, are pretty much alike to the average eye. The heel maker and the shoe designer readily see even the slight distinctions.

Sales of wood heel shoes are larger this year than ever before. The wood-heel manufacturers of the country are running overtime to provide wood heels to shoe manufacturers. One Lynn shop is running 22 hours a day. There is every prospect of an increase in the sale of wood-heel shoes and also of new modifications in styles of wood heels.

Spool heels, as they are generally known in the higher-class New York trade, is a leather concave heel approximating very nearly the shape of the ordinary spool. The heel stands usually about 11 or 12 eights. Speaking of this term as to a distinct name for heels is not generally recognized.

Origin of the Kidney Heel

The Kidney heel was probably made first by A. Garside & Sons for Lord & Taylor. This heel is also invariably made of leather and has an extremely broad top lift, shaped as a kidney. One manufacturer in particular, worked this heel out with a slight bulge at each side, which at first glance looked like a nail had been driven into the heel on each side, and thus causing the leather lifts to protrude. This feature was introduced in order to avoid teetering when walking over gratings or cobble stones.

Now this Kidney heel, which was quickly picked up by manufacturers of the cheaper grades, suggested the old Wurtemberg or Burg heel, which to-day is being used by such manufacturers as Weil and Garside. This heel has always been made of leather. Its shape is the standard Louis and the old custom men made this heel with the slit outsole.

The Breasted Louis

This heel has been known among manufacturers as the breasted-Louis. Now, however, they are making practically the same heel without the breasting, the sole being cut off at the juncture of shank and heel, and the shoe being heeled in the regular way. This same type of leather-heel making is being carried out in shapes which resemble closely the new Cuban-Louis heel. According to the best usage around New York the correct name for the wood heel which is having such a vogue is Cuban-Louis. That is, a Cuban back and a Louis breast, which is just exactly what it is in

(1) THE TRUE LOUIS HEEL, (2) FRENCH LOUIS HEEL, (3) CUBAN CURVE HEEL, (4) KIDNEY HEEL, (5) CUBAN LOUIS HEEL.

shape. The Cuban-Louis is accepted as the cross between the Louis and the box-Cuban. This same heel, however, has been described by retailers in ordering from manufacturers as a Spanish, Spanish-Louis and as a Cuban-half-Louis. Mr. Garside describes this heel as the box-Louis, but many feel that Cuban-Louis is the best term.

Alfred Kohn claims that he was the first man to produce the Cuban-Louis in its present form. He developed the idea and had Mr. Garside make the first shoes carrying these heels. He said a short time ago that if he had surrounded the Cuban-Louis with a short-term patent he would have coined quite a bit of money.

In the opinion of many shoe merchants the Spanish term is really obsolete. Occasionally a box-Cuban heel with a very slender neck and scant top piece has been described as a Spanish heel. This heel stands two inches or over.

Conditions and Happenings in the Trade Over a Quarter Century Ago

(Continued from page 27)

Healey, St. Catharines; Ald. Wm. Adams, Kingston; Councillor R. E. LeSueur, Sarnia; Councillor I. B. Webster, Dresden; Councillor Alex. Forbes, Fergus.

Announcement was made of the death of Geo. T. Slater, of Montreal, after twenty-five years' connection with the shoe trade of Canada, the business to be continued by his sons George A. and Chas. E. as Geo. T. Slater & Sons.

Amongst the business changes announced are: D. H. Gould & Son, Hamilton, selling out; Wm. Turner, jr., Hamilton, sold out to Tinling & Co.; W. H. Simpson, Clinton, sold out; Johnston & Co., Victoria, B.C., selling out; J. S. Roos, Waterloo, Ont., burned out; Wm. Poyser, Bradford, burned out; Orr, Harvey & Co., Hamilton, removed to Toronto; Jas. Moore, Acton, assigned, estate bought by Ph. Jacobi.

The Market Conditions

Buff hides at Chicago were quoted at 7½ cents and at Toronto 6¾ to 7 cents. Steers were quoted at 8 to 8¼

cents and calfskins at 9½ to 10 cents for No. 1. Slaughter sole listed at 24 cents and Spanish at 23 cents; harness at 25 cents; buff, 12 cents; splits, 16 to 17 cents; grain, 33 cents; French calf (then popular, now little heard of), \$1.05. The following paragraph reveals weather conditions similar to those of last fall as militating against trade development: "The very dry season preceding the winter has proved disastrous to retailers in most cases, who are compelled to carry over large stocks."

The raw rubber market is quoted as advancing with fine Para at 74 cents and coarse at 53 cents.

A new lasting machine patented by W. D. Hill, Lynn, Mass., is described as equal to the lasting of six hundred pairs of women's shoes a day, with the assistance of two men and a boy.

Amongst the earliest subscribers are found the names of Wm. Dangerfield, Montreal; Wm. Maw & Son, Ormiston, Que.; W. Farmer, Arnprior; Haines & Locket, Kingston; J. & T. Grant, Woodstock; C. A. McKim, Smith's Falls; J. D. Climie, Hamilton; J. Shea, Hamilton; Chas. Doney, Ottawa; L. Breithaupt & Co., Berlin; J. T. Brown, Guelph; Jas. Porteous, Galt; H. & C. Blachford, Toronto; C. Tilley, Toronto; Geo. Perry, Montreal; Ashplant & Taunton, London; G. Boivin, W. L. Tuttle, and others.

We will quote monthly from the files of 1888, giving a few comparisons of conditions and events.

The only thing unchanged in all these years of evolution in which the Journal has endeavored to keep pace with the development of the shoe and leather trades has been the price of the publication, which, although published twice a month, four times as large in size, and a hundredfold more vigorous and effective in style and quality still remains at the original subscription price of a dollar a year.

Wishing the trade from east to west not only a prosperous New Year but another quarter century of more vigorous growth than even the past.

Holiday Window Trims That Made People Buy

The Competition Aroused Great Interest and Revealed Some Exceptionally Clever and Original Work on the Part of Display Managers—The Strong Points Brought Out—Pictures that Appealed to the Passing Throgs

The result of the holiday window competition in the SHOE AND LEATHER JOURNAL attracted a large number of entries from various parts of Canada. Within the last three years during which the contest has been conducted and which has become an annual feature, the number of shoe retailers in the nine provinces sending in pictures of their special trims has been constantly growing, particularly in the smaller towns and villages, where greater attention is being devoted to making profitable and timely use of the facilities and opportunities afforded by these medium of publicity.

Much has been said upon the worth and work of window trimming and it is not necessary to elaborate this subject at the present time. In the windows in the city class the competition was so keen that the judges (all of whom are practical window trimmers, with years of experience) had considerable difficulty in making the awards, and in some cases a photograph did not do a display justice or give

any conception of its artistic merit and trade-pulling possibilities.

The SHOE AND LEATHER JOURNAL regrets that it is impossible to give every one a prize, but so close was the struggle and so worthy were some of the efforts of many decorators that a third prize has been added.

After due consideration of the various displays to attract trade and direct attention to holiday footwear lines, the awards have been made as follows in the City Class:

1. W. E. Sinclair, New Westminster, B.C.
2. T. Dussault, 281 St. Catherine St. E., Montreal.
3. Royal Shoe Store, Saskatoon, Sask.

In the City Class there were in all 29 entries as against 22 last year, and in the Town or Village Section, 15 as against 8 of last year. Generally speaking, the effect produced, the simplicity of outline, the splendid arrangement and high character of the trims were much better than ever,

THE HOLIDAY WINDOW DISPLAY OF W. E. SINCLAIR, NEW WESTMINSTER, B.C., AWARDED FIRST PRIZE

HOLIDAY WINDOW OF DUSSAULT SHOE STORE, MONTREAL, AWARDED SECOND PRIZE

showing the progress that is being made in the line of window decoration and the wide interest which is being aroused in this important branch of the trade.

In the Town Class for first prize, the awards of the judges were as follows:

First, Weiss Bros., Napanee, Ont.

Second, F. R. Foley, Bowmanville, Ont.

The prize winning town windows will be published in the February 1st edition of the SHOE AND LEATHER JOURNAL together with descriptions thereof. Some of the more attractive showings of those who did not capture awards will also be presented in early editions of this paper.

A Home Library Scene

The window of W. E. Sinclair, 711 Columbia St., New Westminster, which has been awarded first prize, was an exceptionally attractive and well arranged one. The window was dressed by Jack F. McAllister, a New Westminster boy who started in the shoe game some five years ago with Mr. Sinclair. The window was arranged to represent a home library and in the rear was built a fire place. The brick effect was made of red wall paper and white show card ink. The fire was imitated by two electric lights and

some coals. In the right hand corner of the window stood a library desk and chair and in the left hand corner an easy chair. The floor space was principally taken up by a large bear skin, the animal being shot by Mr. McAllister while on a hunting expedition last summer. On the bear hide was built a life sized Santa Claus and in front of him was a large pack filled chiefly with toys and slippers. Santa was in the act of filling the stockings, two of which, it will be noticed were already filled and suspended from the fire-place. The display consisted principally of women's and men's pumps and dress shoes. From the upper portion of the window several colored bells hung as well as festoons of evergreens, and on a white background were several initial pennants which spelled "Happy New Year." There were two very neat show cards, one in the front left hand corner and the other in the right hand corner. At various other points throughout the window colored tissue paper and holly were used with inviting effect. Mr. Sinclair reports that the Yule-ride trim was one of the most striking and compelling trade producing displays for holiday purchases that he has ever made.

The Christmas window of Thomas Dussault, 281 St. Catherine st. east, Montreal, was a splendid sample of high class work the background being particularly striking.

This was made from one half inch lumber and was covered with pale green alabastine in a rough effect, and sprinkled with green flitters, giving it a dark appearance principally at the bottom. The cone trees were made of ruscus (which is a genus of European evergreen) and appeared as if they were in a small tub, but the cone trees and tubs were flat on one side. Their appearance, however, indicated a full effect. The wreath at the top in which appear the words

frame for the show cards, while the "Merry Christmas" card balanced up the centre of the window. Artificial white and yellow chrysanthemums, along with fern leaves, made a pleasing and attractive finish for the background. Two white doves suspended from the ceiling imparted a very nice effect, although these doves do not show up in the picture. The main colors, red, green and snow white, blended very well and gave a snappy appearance to the

HOLIDAY WINDOW OF ROYAL SHOE STORE, SASKATOON, SASK., AWARDED THIRD PRIZE

"Christmas Greetings" was home made from green holly. The lettering of the card in the centre was in gold. The frames inside the window were covered with white holly vines. The large bevelled card beneath the holly wreath, was white, with a pretty winter scene in water colors. The floor of the window was covered with puffed material, and, as will be noticed, only a few shoes were displayed. The tout ensemble was very beautiful and the colors harmonized splendidly. The trim was made by O. E. Perreault and the general arrangement was simple, distinctive and impressive.

Flowers, Leaves, Holly and Doll

The window of the Royal Shoe Store, Saskatoon, Sask., of which C. D. Mitchner is the proprietor, was trimmed by D. J. M. McGeary. The display was very simple and was effective in bringing out a splendid Christmas trade. The water color drawings do not show up as well as they should, but they made a most pleasing winter background. The fringe around the edge was made from cotton wool. The painting at the top was drawn specially for the occasion and was much admired. One scene represented a frozen-up mill, with the man going to the house. The other illustrated Santa Claus and his reindeer starting off in the morning. The pedestals, floor and ledges were covered with cotton wool, all liberally sprinkled with diamond dust. The large and daintily dressed doll, holding the ribbons, drew a good deal of attention to the display and also attracted the eye of the holiday shoppers. The selection of Yule-tide footwear was carefully made and placed to balance—the exhibit of each shoe being distinct and yet there was no sense of crowding. Real holly was used to good advantage, while artificial red and white Christmas flowers were arranged on the lattice work around the window at the top and bottom. The two wreaths made a splendid

whole scene, which stood out clearly, and could easily be distinguished at a distance of many yards. There were numerous other features about the window which could be mentioned.

Keeping in Touch With Customers

In addition to a regular calendar, given out at Christmas time, Charles E. Clements, shoe dealer, of Chatham, Ontario, sends calendar post cards to a large mailing list of customers every month. For this purpose a Buster Brown post card, modeled on the familiar cartoons, is used. The January post card, recently sent out, in addition to the accompanying picture and calendar for the month, contains the following suggestive resolution:

"Resolved, that we put the axe in prices when we first make prices on our shoes. Buy your shoes from us all year, and have shoe comfort all year. We give a warm welcome and good values at our store.

"Charles E. Clements,
Chatham, Ont."

"Trunks, Shoes, Valises.

Mr. Clement has been making use of this calendar post card idea for some time. Experience indicates that these cards stand a better chance of being preserved than ordinary circulars, and serve as reminders to customers when contemplating shoe purchases. Mr. Clements reports December business for 1913 away ahead of the same month in 1912.

The Murray Shoe Co., Limited, of London, recently increased their capital stock from \$50,000 to \$100,000.

Another View of the January Clearance Sale

Why Should Cut Price Be Applied to Every Shoe in Sight—The Real Object of the Sale is to get Rid of Remnants and Stickers and not to Undermine Good Selling Lines—Do not Forget the Importance of Good Fitting

By WILLIAM EDWARD PARK

The clearance shoe sale carries with it certain dangers against which the shrewd shoe dealer will guard himself.

Prominent among these is the tendency to cut every price in sight. This is hardly necessary. A clearance sale primarily should aim to clear out remnants of the season's stock, goods which have not been sold at regular prices while in season and which before another season comes around will be out of style.

Where care is used while the season is actually in progress the quantity of left overs will be reduced to the irreducible minimum. The seasonable shoe stock should be carefully watched and persistently pushed, lagging lines should be spurred up, and every effort made by the selling staff to close out the goods at regular prices when their seasonable nature renders regular prices at all possible.

No General Cut is Necessary

The odds and ends still left over, despite diligent salesmanship, it is advisable to clear out. But, to do this, it is not necessary, nor do many of the shrewdest men in the shoe business deem it advisable, to make a general cut on the entire stock. For experience shows that as a rule, if the entire stock is reduced a given percentage, the reduction will stimulate the demand for goods which would sell readily at regular prices and will, at the same time, leave the undesirable stock upon the shelves. Staple lines, lines that are in demand practically every day, will always command the full price, and price-cutting on these is needless.

The clearance sale should devote its chief attention to the moving out of winter lines, for which there will be no further demand till another winter; or for moving out summer lines which must otherwise stay on the shelves till summer comes again. Then, too, there are bound to be odd lots which next season will be out of style, and which it will repay the merchant to put out at a little sacrifice. To offer these goods at bargain figures and at the same time to sell the seasonable and always-in-stock at regular prices is the wiser and more profitable policy.

Handle Business Tactfully

The featuring of low prices on certain odd lots is bound to attract business; but it is business which needs to be handled tactfully. The shoe dealer must never forget that the fit remains long after the price is forgotten. A woman may save fifty cents on a pair of shoes, but if they render her uncomfortable for four, five, or six months, she is apt to regard her bargain in a far different light from that in which she welcomed the saving at the very outset.

A good fit is always a business builder, and too often the shoes which were offered at special prices are in such sizes that the ordinary mortal will find them anything but a good fit. Of the left-overs, it is quite often the case that not more than 15 or 20 per cent. of them will fit the common run of buyers. To let the bargain hunter purchase a shoe that is bound to cause dissatisfaction and discomfort is not in the long run the wisest policy.

Brings Customer to Store

The bargain shoe is an opening for the good salesman. It serves to interest the customer and bring him to the store. But when it is discovered that the bargain table offers nothing in a satisfactory size, it is in order for the clerk to tactfully suggest the purchase of regular stock. The

purchaser may insist on choosing something from the bargain table; but the salesman will have at least put himself on record, as is the duty of a man whose first responsibility is satisfactory service to his customer. In a great proportion of cases, however, the suggestion will be welcomed and the customer will purchase from the regular stock at regular prices. One ill-fitting, uncomfortable shoe is lesson enough for an entire lifetime.

Building Up a Trade on Good Values

H. Phillips, 14 Don Mills Road, Toronto, who has been in that district for the past six years, has worked up an exceptionally good trade in that growing area. For twenty years he was in the employ of H. C. Wilson, King street east, Toronto, and in 1908 decided that the North-eastern section of Toronto was not well enough served by shoe shops as people at that time had to come down to Gerard street to have repairs made. Mr. Phillips foresaw the possibility of the locality and laid in a small stock of shoes at the same time. Three years later he purchased the building. He has a neat and well laid out shop which he recently increased to practically double its size, removing the repair

H. PHILLIPS' STORE, TORONTO

department to a separate building at the rear. He carries a good class of footwear and always gives good value for the money. Mr. Phillips does practically a cash trade and does not grant requests for approbation. He devotes special attention to the repair end of the business, and has a complete repair outfit with the exception of a stitcher. He gets worthwhile prices for all work and says it pays to use good sole stock. He does not think there is any money in cheap jobs or trashy material. He also does a large business in sharpening and concaving skates, and when hockey or skating boots are purchased at his store he attaches the skates free, but if shoes are not bought there he charges ten cents for the work.

W. J. Brooke, the "gentleman burglar," broke into several residences in Toronto recently and stole valuable articles. He was sentenced to two years in the Central Prison. Among those whose homes were entered was that of H. V. Tilley, 115 Kendal avenue, who is a member of the firm of Chas. Tilley & Son.

Many Shoe and Leather Men Honored by the Electors

Nearly all of Them Made Good Showing at the Polls—Some of Those who Will Serve their Respective Communities as Mayor, Reeve, or Alderman—The Voice of the People

Municipal elections have been held throughout the province of Ontario and in the list of candidates who were successful at the polls appears the names of several public-spirited men who are connected with the shoe and leather industry.

It is a pleasure to record that many men engaged in the trade have voluntarily came forward and offered their services in the interest of good civic government and clean progressive administration. It is the duty of every man to devote a portion of his spare time to the

H. ASHPANT
Elected to Board of Control, London

PHILIP POCOCK
Re-elected Water Commissioner, London

H. A. HAGEN
Re-elected as Alderman, Berlin

upbuild and welfare of the community in which he resides or does business, and it is a source of gratification to state that shoemen and leather dealers are found in the front line supporting their respective communities. Of course, all those who sought public honor were not successful, but a large number of aspirants came out on top and will be heard of during the coming year. A number of others, who have served faithfully and efficiently for some time, have retired. Among the latter might be mentioned F. Stewart Scott of Getty & Scott, Limited, Galt, who stepped aside after two years of splendid administration in the civic chair. Ald. A. W. Ault, of Ottawa, also withdrew this year after being a member of the council for several terms, serving as one of the men from the Capital ward. A. Knechtel, shoe retailer of Stratford, member of the aldermanic board in the Classic City for six years, has retired after this period of valuable service. Hubert Ashplant, for several years member of the city council of London, has taken a step higher and was returned as a member of the new board of control. His many friends will extend congratulations.

R. M. Beal, president and treasurer of the R. M. Beal Leather Co., of Lindsay, is once more at the head of that municipality for the coming year. This will make Mr. Beal's fourth year as chief magistrate of Lindsay.

In Berlin the largest number of shoe and leather men are found in the civic service. A. L. Breithaupt, president of the Berlin Trunk & Bag Co., was again returned. This time he stood third on the list in the aldermanic ticket, George Rumpel of the Berlin Felt Boot Co. being second, having eighteen more votes than Mr. Breithaupt. H. A. Hagen of the retail shoe firm of Sippel & Hagen, made a splendid run. He has served several years round the council board. J. Hessenauer, shoe retailer, was returned, and this will make his second term of office. D. B. Detweiler of G. V. Oberholtzer Co. Limited, one of the pioneers in the hydro-electric system, has been made a member of the Light Commission in Berlin.

Philip Pocock, president of the London Shoe Co., is again a member of the Water Commission, of which he has been chairman for several years.

S. Morley Wickett, of the firm of Wickett & Craig,

Toronto, was successful in Ward 2, and once more will be found doing battle for the ratepayers.

In Woodstock, Ont., W. D. Hobson, shoe dealer, was elected mayor of the city by a nice majority, and will, no doubt fill the position with credit to himself and the municipality.

J. C. Miller, of C. J. Miller & Son, tanners, Orillia, was returned as one of the town fathers in that progressive centre.

F. L. Wagner, of the Aylmer Shoe Co., came out successful as mayor of that live burg, and is receiving the congratulations of his friends.

W. J. Gibson, harness manufacturer of Gananaoque, will be chief magistrate of that pretty town during 1914.

Another shoeman who has climbed to the top in civic service is F. T. Jackson, of Clinton, who was successful at the polls in the Mayoralty campaign.

K. Montgomery, of Southampton, W. G. Hogarth, of Tilsonburg, both of whom handle footgear, were victorious on election day and henceforth each will hear the prefix of Mayor in his respective community. J. M. Wilson, of Wyoming, is another leather man who was made Reeve of that village.

C. J. Halliday, of Chesley, who conducts a well equipped general store, was a conqueror at the polls, and is now known as Mayor Halliday.

W. J. Armstrong, of Campbellford, who will be chief executive in that town for 1914, is widely known to the shoe trade.

David McBurnie, leather dealer, Hagersville, and J. F. Little, dealer in harness and leather, Milton, were elected Reeves.

Geo. W. Cowan, shoe retailer, of Chatham, Ont., who was mayor of that city some years ago, has re-entered municipal life and was elected an alderman.

E. J. Kelly, of Brockville, who is in the shoe business in that town is now Alderman Kelly.

W. J. Sisman, of the T. Sisman Shoe Co., Aurora, Ont., was again victorious at the polls as an alderman. He is one of the youngest men ever elected to office in that town.

L. J. Breithaupt, president of the Breithaupt Leather

Co., has again been chosen as president of the Board of Trade in Berlin.

C. J. Fitzgerald of the Cook-Fitzgerald Co., London, was recently appointed by the Separate School Board of that city as one of the extra representatives on the Board of Education. Under the new regulations the membership of the Board of Education has been increased to fourteen, which gives the Separate School authorities two representatives instead of one on the former body.

The New Home of Miner Rubber Co.

The Canadian footwear trade is able to boast of a large number of handsome warehouses, many of which have been erected in the past two years.

The most recent firm who decided that new quarters were essential to the well being of one of their largest if not most important branches, is the Miner Rubber Co., Limited, of Granby, Quebec, who have removed to a large, modern and up-to-date building in Toronto for the distribution of their stock in that territory. The company's business in the Toronto district has been growing steadily, outgrowing office and storage conditions. With this in view, and with an eye to the future, the present establishment was put up, nothing being neglected to make it a model of its kind.

The new warehouse, which is located at 146 Wellington St. W., Toronto, in the heart of the wholesale district, is brick with stone facing, and care has been taken to make it fireproof. The Miner Rubber Co. occupy 15,000 square feet and carry a \$150,000 stock of rubber footwear. The office, sample rooms and shipping department take up the first floor, while the second storey is taken up by loose stock and packing room. The third is given over to heavy goods entirely, and the fourth is used for light goods.

The office is finished with metal ceiling and stucco walls. The wood work is of Georgia pine. The warehouse is finished in white, presenting a clean, bright appearance. Steam is used for heating the building, and a fine telephone service has been installed. This is only one convenience of the many excellent facilities for giving quick service

either out of town or in the city. The warehouse appointments, from a service standpoint, are also of a high standard, elevators, racks and various other furnishings being of latest make.

G. C. Yearsley, the manager, is much pleased with the outlook since removing from the old location at 90 Spadina Avenue, and feels that customers of the firm will also appreciate the change, as the new quarters are convenient to all the large hotels, and not more than one or two minutes from Union Station, as well as freight and express depots.

Building Up a Big Shoe Business on Sound Principles

(Continued from page 29)

man. The premises were remodeled four years ago, and made up-to-date, both in the interior and store front windows and entrance. The show windows are 22 feet on James St. side, and have a frontage of 21 feet on Main street. The windows are beautifully lighted by forty Tungsten lamps of 60 watts each, and are usually well filled with all the varieties of footwear to interest the masses, to whom this store caters. It is noted for its railroad men's trade, being situated between the City Hall and the C.P.R. Depot, on the busiest side of Main street, this street being well known as an over crowded thoroughfare on Saturday evenings. The shop enjoys a large trade in medium priced shoes, men's shoes being stocked and sold from \$2.50 up to \$6.00, though the great majority of the business is done in men's \$4.00 and \$5.00 shoes, women's \$3.00 to \$5.00, and children's all prices, according to quality. James Waddington is the present sales manager of this store. He is a very shrewd young business man, and is favorably known to the general public. C. P. Nicholls has charge of the ladies' department, Frederick Baird the men's department, and J. Johnson the children's department, while D. P. Aird supervises the reserve stock department.

The Portage Avenue Premises

The Portage avenue store is located on the corner of Hargrave Street, just across the side street from the Eaton departmental store, and occupies the corner of the Enderton Building, known as being one of the most up-to-date structures in Winnipeg. The store has a frontage on Portage avenue of 18 feet, while show windows on Hargrave street run down 38 feet. There is another main entrance 125 feet from the corner, on Hargrave street, similar to the front in appearance, which communicates with and serves the ladies' department. This latter is practically opposite one of the main entrances of the large departmental store already mentioned.

The windows are splendidly illuminated by forty 60 watt Tungsten lamps and six 100 watt Tungsten lamps. The fixtures displaying the footwear in these windows were all made specially to order, and are in keeping with the high class trade which this establishment enjoys. In the Portage avenue store alone is carried a stock of approximately \$60,000, and it enjoys a large mail order business from customers and stores throughout the West owing to the fact that all widths of women's footwear up to AA are carried.

A large electric sign 40 feet long and three feet in height, hangs on the corner of Hargrave street, and its brilliant rays attract the attention of the immense crowds at night.

R. F. Eadie is the business manager of this store, and while he has only been engaged in the shoe business a comparatively short time, by his foresight and shrewdness he has done much to further the interests of the store. M. A. Cafferky is the sales manager, having been with the shop since its inception. He is an excellent buyer of footwear, having an extensive knowledge of popular styles and future wants of the high class trade, and it is largely through his

efforts that this house has come to the recognition of being the place where one gets absolutely up-to-date shoes. J. Webster has charge of the men's department, A. R. Davidson of the women's pumps and slippers, J. H. McGee of the ladies' high shoes, Geo. Yeager of the children's department, and Roy Linklater of the reserve stock department.

The Latest Addition to Chain

The newly acquired Nickle store is situated at 273 Portage avenue, on the north side of the avenue, half way between the T. Eaton Co.'s departmental store and the intersection of Portage Ave. and Main street, being almost directly opposite the Winnipeg post office. The front has been recently put in, and as the quarters are in close proximity to many large buildings and retail shops having a great deal of traffic past its doors at all hours of the day, the opportunity is presented of being a valuable addition to the Rannard Shoe Co. Further alterations will be made shortly, which will greatly add to the attractiveness of the place. J. C. Thompson is the sales manager, having been with Harry Stark and Geo. Nickle in this same store for several years. C. R. Graham has charge of the ladies' department, William Bowen of the men's department and W. W. Wight of the children's department. They are all good

salesmen. The Rannard chain of shops is among the most enterprising, best equipped and progressively managed of any in the country, and yet the man who is at the head of them and whose name they bear is only forty-one years old.

R. A. Weiss, who was a traveler for 41 years, died in Trenton recently. He was 73 years of age and retired from the road in 1912. For nearly 18 years he was in the retail shoe business and conducted a progressive store in Trenton, going out of that line in 1904. He leaves a wife and grown-up family. Two of the sons, E. B. and H. A., are in the shoe business in Napanee, Ont.

The merchants of Queen street west, Toronto, in all lines have signed an agreement to close their stores each night, except Saturday, at nine o'clock and a blue card has been placed in the window notifying the public to that effect and asking purchasers to patronize those stores who favor the movement. Several shoe merchants have signed and the understanding is being lived up to. At nine o'clock each business man locks his door and draws down the blinds, admitting no one after that hour.

A PLEASING TRIM DURING HOLIDAY SEASON

One of the most artistic Yule-tide windows was that installed by A. Neale, 614 Bloor west, Toronto. The sides and back of the window were beautifully paneled in red and green crepe paper with evergreen border down the sides and corners. At prominent points were displayed poinsettias. The shoes were on mission stands and on top of each stand was a holly leaf cut out of green cardboard. Each boot was decorated with a spray of holly, the price being marked in white ink on one of the green leaves. On several were fine bits of isinglass which imparted to the holly a wintry aspect. It was certainly an original and effective exhibit. The windows of the store are seven and a half feet deep,

being three feet wide at the front and five and a half at the rear, while the entrance is of a receding character. The shoes were shown diagonally so as to induce the passer-by to step inside the entrance way to witness the fine display. Mr. Neale has a nicely laid out shop which is fifty feet deep by fourteen wide. The shelving is of walnut finish and is nine feet seven inches high. The walls are covered with oatmeal green paper panelled in gold. There are some twenty chairs for customers and long green strips of carpet cover the hardwood floors. The store is one of the neatest in the residential districts of Toronto. Mr. Neale is to be congratulated on his splendid windows and progressive ideas.

Shoe and Leather Men Gather at the Festive Board

Unique Bill of Fare for the Guests—At a Private Function the Host, Mr. Lane of Montreal, Scored a Distinct Success—Good Stories Told When Congenial Souls Meet

It was a merry party that gathered together at the Commercial Travelers' Club on the evening of Saturday, January 10th, as the guests of W. A. Lane, of Montreal. About seventy-five guests were invited, a goodly number of whom responded, while those who were unable to be present owing to conflicting engagements missed a very pleasant evening with a crowd of jolly good fellows.

The first part of the evening was spent in the spacious lounging room of the club and judging from the hilarious

duce Robert Fraser's braw Scottish accent. Everybody went away feeling that a most entertaining evening has been spent, not, however, before the genial host had been presented with the good wishes of the gathering. Among those present were: Wilfred Lessard, of Tetrault Shoe Manufacturing Co.; H. C. Parker, of Parker Bros.; Paul Roy, Narcisse Gagnon, F. X. Leblanc, of Aird & Son; K. Glass, of J. Scott's Quebec office; Robert Fraser, of Beardmore & Co.; Ralph Locke, of Dufresne & Locke; E. F. Leonard, of Slater Shoe Co.; J. B.

REPRESENTATIVES OF THE TRADE ASSEMBLED AT BIDDING OF MONTREAL HOST

laughter which greeted the ear occasionally from the various groups of boys assembled in different parts of the room there were some mighty good story tellers among the bunch.

Shortly after nine o'clock the guests sat down to an elaborate meal served in the most approved style. Although one would think from the technically worded menu that the dinner had a sort of a leathery complexion, it was decidedly toothsome from first to last. If the Chrome Tannage which Mr. Lane handles is as tough as that terrapin was tender it is certainly "some" leather.

From the little hint given in the program it looks very much as if it would be vain to expect leather prices to remain at their present level very long.

After the dinner the usual amount of speech-making, story-telling and post-prandial hilarity was the order of the day, and the gathering broke up in the "wee sma' hours o' the mornin'"—this later phrase being a feeble attempt to repro-

Hurteau, of Star Shoe Co.; Messrs. Lavoie, of Parisian Shoe Co.; J. Gagnon, E. Guay, Granton, Dumphy, Brunette, Cusson, J. H. Goyer, Geo. Bray, Murray and Stuart.

Some Comments

Bob Fraser is some entertainer. He is a host in himself, and being a splendid mimic is mighty hard to beat in a gathering of this kind. He kept the boys roaring.

No one would suspect from the more or less serious demeanor of Narcisse Gagnon in everyday business life that he could tell such mirth-provoking yarns with such excellent effect. His free translations from French to English were side-splitting.

Wilfred Lessard can tell more than one laughable yarn with good effect, but it is hard to get him started. When he starts he is a winner.

Paul Roy's mirth is certainly of the contagious variety.

The "Wet Goods" were certainly all to the good. That oyster cocktail was a good curtain raiser. No one could go to sleep on the job after that introduction.

W. A. Lane, who is the popular representative of Jas. Scott, of Quebec, for Montreal and Western points, certainly deserves great credit for the way in which he initiated and carried through to completion this genuinely pleasant "get together" meeting. It is one of the first of its kind in Montreal, in that it was given by a private individual to his friends in the trade, rather than by a larger association, and it is to be hoped that now the ice is broken there will be more of these gatherings from year to year.

Chesley Boy Mayor of Home Town

C. J. Halliday, who was recently elected Mayor of Chesley is the first Chesley boy to hold that office. He has been in the general business in that town since 1900. His first job was with M. A. Halliday, and later he was with McTavish & Stinson, who succeeded Mr. Halliday and then with Halliday, & Stinson, their successors. Desiring to see something of the West, he spent two years in Vancouver. He then returned to Chesley and took up his present

business. He is only thirty-seven years of age and has built up a fine trade. Previous to his selection as mayor he served for seven or eight years in Council. He is widely esteemed and looked upon as one of the solid, progressive citizens of that town.

Leather Man in Civic Harness

Jas. M. Wilson, who was recently elected Reeve of Wyoming, Ont., has long been a leather dealer in that thriving centre and handles trunks, suit cases, etc. He arrived in that town on November 3, 1883, so that he has had over

thirty years' experience. He served on the School Board for eighteen years and was a member of the Village Council in 1910. The next two years he was Reeve, but was defeated in 1913. This year he came up smiling and succeeded in winning his former office by a majority of five in a very closely contested election. Mr. Wilson has many friends in Wyoming and district and has built up a large trade in traveling goods, harness, and other lines.

Chance for Canadian Leather Firms

J. T. Lithgow, Canadian Trade Commissioner in Holland, sends the following report to the Department of Trade and Commerce, Ottawa, on the leather trade:—

The importation of leather into Holland for the year ending 1912, entered for home consumption, was valued at \$940,000. Practically none of this came from Canada. The principal countries from whence imported were Belgium, Great Britain, Germany and the United States. The imports of leather, in common with the rest of the Netherlands trade, are increasing each year. All manufactured leather is admitted free of duty, and there is a considerable export trade done by the large importing houses in Amsterdam. This finds its way to Switzerland, Italy and other European countries, and is in addition to the quantity entered for home consumption. The principal imports are hemlock sole leather, box calf, glazed kid, and patent leather. Sole leather imported from the United States at the present time is from 32 to 36 cents per Dutch pound, equal to 1.10 Canadian pound. Box calf is also largely used as upper leather, imported principally from Germany, Belgium, France, and a small quantity from the United States. The dimensions are from 9 to 14 square feet, prices from 12c.-16c. per square foot. There is a very large market here for glazed kid, price varying from 6-60 cents. The 7-foot skins at prices from 8-10 cents per square foot are mostly in demand. A good quality can be purchased at 10 cents. The terms of sale are, with the United States, cash against documents, and 5 per cent. discount. With European countries, mostly on 30 days with from 2 to 3 per cent. discount.

SHOE NEWS IN PARAGRAPH

Gordon Kiven has opened a shoemaking shop in Kincardine, Ont.

John Shifton, shoe dealer, of Winnipeg, recently assigned to C. H. Newton.

The assets of Joseph Savard, shoe dealer, Kenogami, Que., have been sold.

Irwin & Bacon, shoe dealers, of Kamloops, B.C., have dissolved partnership.

J. H. Maitland, shoe retailer, Danforth avenue, Toronto, made an assignment last week.

Frank Bauslaugh, of John Agnew, Limited, Brantford, Ont., was in Montreal this week.

Ryan & McKenzie, Limited, leather goods dealers, Vancouver, have made an assignment.

Harry Teplinsky, shoe dealer, of Saskatoon, Sask., was in Toronto last week on business.

Phillips & Wright, shoe merchants, have discontinued their business in New Westminster, B.C.

B. Helfgott, dealer in shoes and men's furnishings, Prince Albert, Sask., was in Toronto recently.

R. R. Macaulay, treasurer of the Miner Rubber Co., Montreal, was in Toronto last week on business.

C. Cullum has purchased the shoe repair business formerly conducted by T. J. Lang, Millbrook, Ont.

Walter Mills has disposed of his shoemaking and repairing business in Melfort, Sask., to Herman Katzeff.

W. B. Maddison has leased a new store on St. George street, Moncton, N.B., and will open out in the shoe business.

Spanner & Goldstick, dealers in boots and shoes and clothing, Edson, Alta., have been succeeded by Hyman Goldstick.

Cavanagh & Scammel, who will conduct an implement business in Melfort, Sask., are arranging to stock boots and shoes.

E. J. Hill, of E. J. Hill & Co., department store, Lethbridge, Alta., was in Toronto last week calling upon the shoe trade.

Chas. H. Newton, manager shoe department of Robinson & Co.'s store, Winnipeg, was in Toronto last week on a buying expedition.

R. E. Jamieson, general sales manager of the Canadian Consolidated Rubber Co., Montreal, was in Toronto last week on business.

Practical Shoe Repair Co., 457 Yonge street, Toronto, has installed a twenty-two foot, Mode! N shoe repair outfit, complete with stitcher.

H. Dallas, of Toronto, who represents several Old Country shoe and slipper firms in Canada, leaves shortly on a business trip to England.

Will Rising, of the firm of Waterbury & Rising, wholesale shoes, St. John, N.B., has gone on an extended trip to England and the Continent.

John Fingland, who recently retired from the shoe business in Brampton and who was seriously ill for some time, is able to be around again.

W. M. Angus, manager of St. John branch Ames-Holden-McCready, Limited, spent a few days recently at the head office of his company in Montreal.

E. B. Weiss, shoe retailer, of Napanee, Ont., was in Toronto last week calling on the trade. He reports that business during the holiday period was brisk.

E. L. Williamson, of the traveling staff of Garside & White, Toronto, who has recovered from his recent attack of pneumonia, has resumed his duties on the road and is

covering Eastern Ontario as far as Kingston. L. Fingland, who took this ground temporarily, is now attending to the Niagara Peninsula for Garside & White.

Karl G. Walters, of the Montreal office of the United Shoe Machinery Co., joined the Toronto staff and has entered upon his new duties as city representative.

Donald Inrig, shoe manufacturer, of Toronto, who died without leaving a will on December 11, left an estate of \$6,352. The estate is filed for administration.

Wm. C. Myers, Western Canada representative of the Rideau Shoe Co., Montreal, who has taken up his residence in that city, spent a few days in Toronto this week.

H. A. Beatty, representing the Slater Shoe Co. in the principal towns and cities of Western Ontario, has returned to Toronto after spending several weeks in Montreal.

D. Lorne McGibbon, of Montreal, president of the the Canadiar Consolidated Rubber Co., and Ames-Holden-McCready, Limited, was in Toronto last week on business.

William Zinc, of the Zinc Shoe Co., and a resident of Brandon since 1882, died recently at Long Beach, California, where he had gone with his family for the benefit of his health.

E. E. McIntyre, of Toronto, traveler for the Brandon Shoe Co., of Brantford, Ont., who has been spending several weeks in New York and other eastern cities, has returned to Toronto.

Victor Parrott, of the Parrott Shoe Co., Regina, Sask., who also conduct successful stores in Saskatoon and Moose Jaw, was in Toronto last week on a business trip and called upon the trade.

The Peerless Rubber Co., Limited, recently organized, will erect a factory in Guelph for the making of all kinds of rubber goods. Their specialty is the reclaiming of rubber. They will employ fifty hands.

Burglars entered the shoe store of D. J. Smith, of Welland, a few days ago and stole over \$100 worth of shoes. They broke a glass in the front door and the theft was not discovered until the next morning.

Clayton Hurlbut, of the Hurlbut Co., Limited, Preston, is on a business trip to Rochester, Boston, Salem and other cities. Mr. Hurlbut, who has been president of the Preston Board of Trade for two years, is retiring from that office owing to pressure of other duties.

H. B. Johnson & Co., calfskin tanners, have sent out a very attractive calendar to the trade. Beardmore & Co., Toronto, Hurlbut Co., Limited, Preston, Louis Gauthier Co., Limited, Quebec, and many others are presenting artistic calendars to their customers and friends.

George Lamb and A. Milligan, who were charged with stealing 120 pairs of shoes and several thousand dollars worth of silverware from the Grand Trunk Railway, were sentenced respectively to twenty months and two years in the penitentiary, when they came before the court in Montreal recently.

John A. Vallary, late of the Thompson Shoe Co., Montreal, has joined the selling staff of B. F. Morley & Sons, wholesale shoes, 60 Colborne street, Toronto, and will look after Western Ontario for this firm. Mr. Vallary is one of the best known shoe travelers on the road and has covered Western Ontario for a number of years.

George and Randal Jupp, sons of J. Jupp, jr., shoe dealer, 810 Queen street east, Toronto, were badly injured on the Riverdale toboggan slides a few days ago. George Jupp had his head injured while Randal had his leg broken. Consideration for the safety of others prompted young Jupp to turn his toboggan to one side and as a result he collided with a tree.

Jackson & Savage, of Montreal, manufacturers of the Boy Scout and Scout Master Shoe, have opened a sample

room in the Miner Rubber Co. building, 146 Wellington street west, Toronto, which is in charge of N. J. Bordeau, Western Ontario representative of the firm, who will also sell Miner rubbers during the coming season. The sample room is attractively fitted with sectional showcases and other conveniences.

R. W. Allen, who for seven years has been employed with the United Shoe Machinery Co., Toronto, being city traveler for the last four, has resigned to accept the position of city and suburban representative for the firm of C. Parsons & Son, Limited, 79 Front street east, Toronto, leather and shoe findings dealers. Mr. Allen, who is well and favorably known to the trade, has entered upon his new duties.

A meeting recently took place at Bucharest of a Congress of Unappreciated Inventors. A certain number of mechanical geniuses, lacking the funds to carry out their ideas, met to discuss the means of remedying this want. The members of the congress included a chemist who knows how to produce diamonds and a shoemaker who can produce boots in which to walk comfortably on the surface of the deepest waters.

A thief, who displayed considerable ingenuity, operated at the shoe store of Alexander McDonald, 398 King street east, Hamilton, with the result that Mr. McDonald found himself shy a half dozen pairs of shoe one morning recently. The shoes belonged to customers who left them to be repaired, and McDonald will have to make good the loss. In the rear of the store a stove pipe projects out into the yard. The thief pulled out the stovepipe and then reached in an arm and pulled the shoes from a shelf.

H. E. Wettlaufer, sales manager of Charles A. Ahrens, Limited, Berlin, and past president of the Ontario Hockey Association, received a genuine surprise the other day. He was a member of the Canadian Bowlers Team which toured Great Britain last summer. A neat little package containing a handsome pair of solid gold cuff links, suitably engraved, was presented to Mr. Wettlaufer by his fellow bowlers, as a token of appreciation for the services he had rendered in assisting in the management of the trip.

Charles Bonnick, manager of the Toronto warehouse of Ames-Holden-McCready, Limited, was recently honored by the lady teachers of the Sunday School of St. Paul's Methodist Church, Toronto, who presented him with three large, beautifully bound volumes of books. Mr. Bonnick, who has served the Sunday School for twelve years, five years of which was spent as associate superintendent, resigned last month after a record of faithful and devoted service, and the presentation was in recognition of his earnest work on behalf of the school.

Salesmen for the Geo. E. Keith Company, Campbello, Mass., manufacturers of Walk-Over Shoes, have returned from their trips with a good bunch of orders, making the sales on the Fortieth Anniversary Line for spring thousands of pairs ahead of a year ago. The trade speaks in the highest terms of the Fortieth Anniversary Line of Walk-Over shoes and showed their appreciation of its completeness by the enlarged amount of orders booked. The outlook for spring business is good, especially in the southern part of the United States and throughout Canada.

George G. Gales & Co., 481 St. Catherine st. west, Montreal, have been doing some effective illustrative advertising for the benefit of those who suffer from foot ailments. The firm announced S. Mappin, the orthopedic foot specialist, of London, England, would be at their west end store for two days for the purpose of consultation. It was emphasized that his services were free and that patrons would not be obliged to purchase their shoes at Gales. The firm also went on to say that they carried a complete stock of comfort giving foot specialties and appliances which would

give relief and cure. "We do more than sell you a pair of shoes. We make your feet comfortable and happy. Come in, it will cost you nothing" was a featured paragraph in the advertisement.

The newest thing in the way of rubber footwear has been invented by a clever Montrealeur and is now being handled by the Canadian Consolidated Rubber Co. It is known as a skating overshoe which may be worn comfortably and applied very easily over any skating boot. The overshoe resembles very much an ordinary one, except that it has four buckles down the side and the rubber sole is split in the centre allowing openings for the skate. The divided bottom is caught together under the top of the skate by two small buckles similar to those used on the upper, which is made of jersey cloth and lined with flannel.

The inauguration of the parcel post system in Canada will shortly be concluded. The principal obstacle has been an agreement with the railways by way of determining the amount of subsidy they are to be paid. Their demands have trebled. The indications, however, now point to a satisfactory adjustment, and once this is done the schedule

C. G. MARLATT, OAKVILLE, ONT., WHO WAS RECENTLY ELECTED VICE CHAIRMAN OF THE TANNERS' SECTION OF THE TORONTO BOARD OF TRADE

of rates will be prepared. Correspondence to the department shows that plans are being made to use the parcel post extensively for handling, in addition to ordinary parcels, all kinds of produce, while in the West there are plans to use it to circulate books from city libraries to rural parts of the provinces.

H. Megginson, shoe dealer, of Sault Ste. Marie, Ont., has insisted that Rev. H. J. Pritchard, pastor of St. Andrew's Church, retract statements made by him on Sunday preceding the local option vote. In his sermon Mr. Pritchard inferred that a man named Kewley had refused a purchase made in his store because Megginson was "wet." Kewley also denies that the incident took place. Unless a retraction is made from the pulpit legal proceedings will be taken.

Jobbing houses are fairly busy sending out spring goods, skating boots, rubbers, felt footwear, moccasins and other lines. Of course, the retail trade is naturally a little quiet after the Christmas rush and most of the dealers are holding January clearing sales. Sorting business is only moderate. The salesmen for the various felt goods companies are now

on the road taking placing orders for next year. There has been an advance of five to seven per cent. in the price of all ranges of felt footwear owing to the high cost of wool, leather, operating expenses and other lines. The travelers who represent jobbing houses are busy taking orders for rubbers, oil tans, lumbermen's socks, felt boots, felt slippers, hockey boots and other lines for next season's trade. The recent cold snap had the effect of booming the sale of felt footgear to an appreciable extent.

The latest reports from Quebec are to the effect that W. A. Marsh, the veteran shoe manufacturer in that city, is not making any improvement. Mr. Marsh was some time ago removed from the hospital to his home, and although he has undergone two operations for an internal affliction, he is not making that progress toward recovery which his many friends in the trade would like to see.

The Urban Shoe Co. is the name of a new concern which will soon embark in the jobbing line in Toronto. The company, of which Mort. Levy will be manager, are having offices and sample rooms fitted up at No. 2 Trinity square, over the "Right Form Shoe" store. The company,

ALFRED O. BEARDMORE, TORONTO, A LEADING MEMBER OF THE TANNERS' SECTION OF THE BOARD OF TRADE

which will shortly be incorporated with a share capital of one hundred thousand dollars, will handle American shoes and also specialties such as slippers, pumps, evening footwear and other lines. The sample and salesrooms will have hardwood floors, sectional showcases, and other up-to-date conveniences.

Leather is advancing steadily in price, hides are growing scarcer and the cost of producing shoes constantly increasing in Canada, but the ten dollar per pair line is a decidedly long way off. In the United States certain shoe retailers think that figure may be reached in the not far distant future. The National Shoe Retailers' Association met last week in New York, when it was stated by several speakers that "pure shoe laws" already adopted in twenty-five States and several measures of the same nature now pending in Congress were chief causes for increasing the price of footwear. Both speakers and a majority of the two hundred delegates present denounced the legislation which would cause all shoes not made entirely of leather to be stamped "adulterated" or "substitute leather." The shoe retailers were told that if all shoes

were made of all leather 2,000,000 more hides per annum would be required in the United States alone, and with hides practically in control of the larger packing houses, it cannot be foreseen to what heights shoe prices might soar.

The factory of the Ontario Leather Co., at New Toronto, has been purchased by Clarke & Clarke, Limited, Christie street, Toronto, who now have the plant in operation and are turning out furniture leather. The output will be about one hundred dozen per day of sheep and goat skins and from fifty to sixty hands will be employed. Messrs. Clarke, who for many years have been the largest sheepskin leather manufacturers in Canada have devoted attention to the tanning of leather for furniture, but intend to go into the line much more extensively and the factory, which they have just acquired, will specialize in this branch of the business. The residents of New Toronto are much pleased to have the industry, which has been idle for some time, resume operations under the direction of such a progressive firm.

GROWING IMPORTS OF SHOES

A recent table of shoe imports into Canada prepared by F. G. Clarke, former Chairman of Tanners' Section of Board of Trade, Toronto, and compiled from official returns, sets forth that the total value of boots, shoes and slippers imported into the Dominion from the United States for the fiscal year ending March 31st, 1913, was \$3,587,491, as against \$2,463,729 for the fiscal year ending March 31st, 1912, showing an increase of almost fifty per cent. The total imports of footwear from the United States for the fiscal year ending March 31st, 1911, were \$1,779,923, and for the preceding twelve months in 1910 the amount was \$1,338,952. The imports of shoes from the United Kingdom also reveals large gains. For the fiscal year ending March 31st, 1913, the amount was \$542,848 against \$387,720 for 1912, \$316,894 for 1911 and \$182,485 for 1910.

SPRING STYLES IN BIG CITIES

George Chambers, manager of the Regal Shoe Store, Toronto, and Douglas Balfour, manager of the Regal Shoe Store, Winnipeg, have returned from a ten days' visit to Boston, New York, Philadelphia and Syracuse. They report that many of the leading shops on the other side are showing a large number of women's shoes with long vamp and narrow pointed toes, the vamps being either dull calf or patent and the quarters of cloth, fawn or brocade being the chief lines. The kidney and the French-Louis heels are much in evidence. The general opinion was that there would be no great rush on tans. The plain toe seems to be the favorite, with extremely long vamp and, for spring, many dealers are displaying colonials with cloth quarters. Spool heels about eleven or twelve eighths are on several of the offerings. In men's lines patent and dull calf bals. with receding toe are being sold freely. Some tans are moving, but not nearly as many as in other years. A few of the more advanced establishments are displaying for men a square, tapering toed shoe, wide across the ball of the foot with close trimmed edge and plain tip, and in some cases no tip at all. Black patent and dull calf vamps with tan uppers are also seen for men. An attempt is being made to popularize for warm weather wear patent leather oxfords with receding toe and either plain tip or no tip at all to accompany white half hose. How far masculine footwearers will take to the patent oxford and white socks remains to be seen. Several Canadian manufacturers of women's high-grade footgear in their spring samples, which will be ready about the first of March, are featuring the extremely long vamp with an absence of tips, while the spool, the kidney, and the French-Louis heels will be witnessed on many of the models.

HAPPENINGS IN FACTORIES

J. A. Scott, of Quebec, was in Montreal Friday and Saturday of last week.

J. H. Larochelle, of J. H. Larochelle & Fils, Quebec, was in Montreal last week.

Montreal shoe factories appear to be somewhat busier now that the holidays are over.

W. H. Miner, of Miner Rubber Co., Limited, Granby, Que., was in Montreal last week.

J. A. Adams, manager of Murray Shoe Co., London, was in Montreal for a few days recently.

D. J. McDermott, of McDermott Shoe Co., Montreal, has returned from Boston and other shoe centres.

E. D. Cox and E. L. Hurd, of the United Shoe Machinery Co., Boston, were recent visitors to Montreal.

W. F. Martin, of Kingsbury Footwear Co., Montreal, was in Boston and other large American centres last week.

J. M. S. Carroll, of Consolidated Rubber Co., Montreal, was in the large American cities recently, including New York.

La Parisienne Shoe Co., Montreal, have installed new equipment in their factory, amongst other items a fan and motor.

Ralph Locke, of Dufresne & Locke, Maisonneuve, spent the holidays in one of the Laurentian Mountain winter resorts.

The Anti-Fric Heel Co., Limited, has been incorporated, having a capital of \$50,000. The company will be located in Montreal.

Mr. Gaumont, superintendent of J. B. Blouin, Limited, Levis, Que., was in Montreal recently calling at some of the shoe factories.

The large and well equipped factory of Gourlay & Fogelberg, Berlin, will soon be completed and the company occupying their new premises.

T. Dufresne, of Dufresne & Locke, Maisonneuve, is leaving January 29th on a trip to Europe. He will be away about two months and a half.

Peter Doig, of Fisk, Limited, Montreal, spent the holidays in the Laurentians. This district is fast becoming a winter as well as summer resort.

J. W. Leslie, buyer of John McPherson Co., Hamilton, was in Montreal and Quebec last week. Mr. Duffield of the same firm accompanied Mr. Leslie.

Harold T. Heath, formerly stitching room foreman for the Ashby-Crawford Co., of Brockton and Marlboro, Mass., is now foreman with the Regal Shoe Co., Toronto.

Labor conditions in Quebec up to date remain un-changed. It is reported that quite a number of Quebec shoe operators are seeking employment in Montreal factories.

The fine residence of Willie Beardmore, of the Beardmore Co. at Acton, Ont., was burned this week. The blaze started at night in the kitchen and the house was completely destroyed.

Mr. Ballard, formerly with U. S. M. Co. of Canada, in Toronto, has taken up a position as foreman of Goodyear making department Ames-Holden-McCready, Limited, No. 2 factory, Montreal.

The Nursery Shoe Co., of St. Thomas, report business as being very good at the present time. They have recently installed additional equipment including two bottom finishing machines.

In a recent Annual of the Monetary Times it was estimated that investments of the United States in Canada represented \$636,000,000. Branch factories represented the

largest interest. There are 450 American concerns with branch factories with an estimated total investment of \$135,000,000.

Mr. Thompson has been appointed superintendent of the Milton Shoe Co., of Milton, succeeding H. C. Durgin, who was recently made superintendent of the Chas. A. Ahrens factory, Berlin.

George W. Pratt, formerly employed by the Minister-Myles Shoe Co., of Toronto, has now accepted a position as foreman of the lasting department for the E. E. Taylor Co., of Nashua, N.H.

Wm. H. Edwards, for many years with the A. C. Lawrence Leather Co., covering the trade in Canada, has accepted a position as manager of the Boston office of Traugott-Smith Co., of Detroit.

The ratepayers of St. Catharines will vote upon a by-law on January 29th to grant a site for a factory and a fixed assessment of ten thousand dollars to the Consumers' Tire and Rubber Co., Limited.

N. Rusal, who was in the employ of Clarke & Clarke, leather manufacturers, Christie street, Toronto, was found

W. J. SISMAN, AURORA, ONT. MEMBER OF THE T. SISMAN SHOE COMPANY, WHO WAS RECENTLY RE-ELECTED MEMBER OF THE TOWN COUNSEL

dead in the basement recently. An investigation showed that death was due to natural causes.

M. C. Galarneau, of M. C. Galarneau & Co., leather merchants, Montreal, passed away recently after several years of ill-health in the eighty-third year of his age. He was widely and favorably known to the shoe trade.

Charles Angers, of the Milwaukee office of the United Shoe Machinery Co., was a recent visitor at the Beverly factory. From Beverly he went to Montreal, where he visited his brothers, Paul and Albert, of the U. S. M. Co.

John F. Clark, president, and Jas. F. Clark, treasurer, of Clark Bros., Limited, St. Stephen, N.B., who will begin the manufacture of women's high-grade shoes in that town early next month, were in Montreal and Toronto on business last week.

Under the arbitration contract between the Boot and Shoe Workers' Union and the Massachusetts State Board of Conciliation and Arbitration, the latter has awarded an increase of 15 to 25 cents per day for sole leather cutters in Brockton shoe factories.

The Hamilton Brown Shoe Company, of St. Louis, locked out of its factory last week 1,500 former employes who are members of the United Shoe Workers' Union. The

lockout is a development in the war between the United Shoe Workers' Union and the Boot and Shoe Workers' Unions, which is affiliated with the American Federation of Labor. Only members of the latter were given employment when the factories opened.

The United Shoe Machinery Co. of Canada have just shipped two carloads of machinery to the Alberta Shoe Manufacturing Co., Redcliff, Alta., and also made a shipment to Clark Bros., St. Stephen, N.B., among which a large number of the later machines were included.

Fleetwood H. Ward, formerly vice-president and general manager of the Canadian Consolidated Rubber Co., of Montreal has been appointed vice-president and manager of the Herald Company, of Montreal, publishers of the Montreal Herald and the Sunday Herald and has assumed his new duties.

A. R. Clarke, of A. R. Clarke & Co., Toronto, has returned from a business trip to New York. He reports that there is a big demand for patent leather on the other side. Some of the American producers are extending their plants to meet the calls of the trade. Mr. Clarke says that the sale of patent leather in Canada is exceptionally good.

Joseph King, who has been in charge of the factory of the Regal Shoe Co., Toronto, for the past two years, has resigned and returned to Boston. His successor is Harry Iitchfield, who has for several years' been identified with the Regal Shoe Co. and has held several important positions in the service. He has entered upon his new duties.

Jasper Phillips, who last month disposed of his interests

MEETING WITH SUCCESS IN HOME TOWN

Harvey J. Graber, proprietor of the Dominion Shoe and Slipper Co., Berlin, was born in that town and has followed the shoemaking business all his life. His first position was with the Berlin Felt Boot Co., with whom he remained nine years learning the trade in all its branches. About three and a half years ago he secured premises at 53 Gateman Place, Berlin, and established the Dominion Shoe and Slipper Co.,

which business has grown rapidly. The company turns out fancy and staple lines of felt slippers for children, girls, misses and women and their product has found a ready sale. Each year business has shown a gratifying gain and the demand for the Dominion goods in the West is constantly increasing. The samples for next season are now being turned out.

in the Solid Leather Shoe Co., Preston, of which he has been manager for the past three years, contemplates starting a factory in Toronto for the making of staples for boys, girls, misses and youths. Good progress is being made in the organization of the company, which will shortly apply for a charter.

The following inquiries have been received by the Trade and Commerce Department, Ottawa, which will furnish names on application. An importing house in Rotterdam wishes quotations and is prepared to take agency for Canadian exporters of sole leather and glazed kid. A large importing firm in Amsterdam will be pleased to receive samples of Canadian sole and upper leather, with prices, etc.

The Solid Leather Shoe, of Preston, of which S. H. Parker is manager, is making several interior changes and improvements which will add to the output of the concern. The company will make women's high grade McKays and are putting in several new machines which have been supplied by the United Shoe Machinery Co. These consist of a channel cementer, breast scourer, treeing machine, finishing shaft and machines, edge setter, stitch burnisher, heel pricking machine, apex welt layer and several others.

The Anglo-Canadian Leather Co., Limited, who have warehouses in Toronto, Montreal and Quebec, and tanneries at Huntsville and Bracebridge, Ont., have issued a calendar entitled "King of the Golden West." It is a work of art and is a reproduction from an original painting of F. A. Verner. He gives a faithful picture of several buffalo roaming a typical western landscape, where the great herds were king until their extermination in the twelve years between 1872 and 1884.

A by-law has been passed in St. Jerome, Que., granting a bonus of fifty thousand dollars and certain exemption from taxes to the Cimon Shoe Manufacturing Co., of Montreal, who will remove to that town. A new factory, well equipped and modern in every respect, will be erected, which will be operated by electricity. The company agree to pay out in wages five hundred thousand dollars during the next ten years. The by-law was carried by a very large majority, only 19 ratepayers being opposed to the measure, while 231 voted in its favor.

The Amherst Boot and Shoe Co., Amherst, N.S., had a very successful year and the sales of 1913 equalled those of 1912, being somewhat over a million dollars, which was very gratifying considering the past year has been what is called an off one, so far as Western Canada is concerned. The factory was operated steadily throughout 1913. Several new machines were added and over 250 employes found constant employment. A very large part of the company's output finds a ready market in Western Canada. Prospects for the coming year are reported bright.

The lasting and the sole stock departments of the new Hewetson shoe factory in Brampton, Ont., began operations last week and this week work started in the bottoming and also in the cutting room. The fitting room will be running in a few days. The fitting room in part of the premises of the company on Teraulay street, Toronto, for which the lease does not expire for a few months yet, will also be operated. The new factory in Brampton is admirably lighted and exceptionally well appointed.

The United Shoe Machinery Company attacked the testimony offered by the Government in the dissolution proceedings at Boston, now pending against the company in the United States District Court. Denials of the charge made by Irving A. Hadley, a needle manufacturer, of Lynn, Mass., that certain concerns refused to buy supplies from him on account of the leases of the United Company, were made by three superintendents of the Brockton companies mentioned by Mr. Hadley. They testified that they had purchased supplies from Hadley until he went out of business and denied

that they had ever told him they could not patronize him on account of the leases they held from the United Company.

Z. Beruke, business agent of the Boot and Shoe Workers' Union, of Montreal, who was recently in Quebec, says that the co-operative spirit among the union men who are on strike is strong, and that some of them are planning to start a boot and shoe factory of their own. He says that the Co-operative Bakery, run by the Boot and Shoe Workers' Union is a distinct success, and all the men calculate that there would be no trouble in equipping a shoe factory, for the machinery could be obtained on the Royalty plan, and some of the workers in favor of the movement have a few thousand dollars to invest.

The employes of the Muskoka Leather Co., at Bracebridge, Ont., which industry is operated by Beardmore & Co., Toronto, has an enjoyable time Christmas, showing the good feeling existing between the men and their officers. Each workman received a gift from the company. P. A. Smith, the general manager, was presented by the employes with an appreciative address and two handsome upholstered chairs. Alexander McDonald, who is at the head of the rolling department was honored by these under him who gave him a handsome electric reading lamp. Henry Devitt was presented by the men in his department with a silver tea service.

A despatch from Calgary says that city has received a cheeky letter from a large manufacturer of shoes and says: "Apparently there are some eastern manufacturers who have not learned of the legislation passed in the provinces of Alberta, Saskatchewan and Manitoba putting an end to bonusing manufacturers. 'Your offer to provide power, light, water and factory site at approximately cost prices does not interest us. These can be obtained in the east, and if you are looking for an industry in the way of a manufacturing concern, you will have to go a good deal better than that. Personally, we would not think \$50,000 an exorbitant price for any manufacturer to ask you to locate in Calgary, and personally we would not accept it. Let us suggest that if you wish a shoe factory in your town you will have to dig deep,'" says the eastern firm.

STAFF HELD JOLLY RE-UNION

The annual meeting and convention of salesmen of the W. B. Hamilton Shoe Co., Toronto, was held on January 2nd and 3rd, when reports for the past year were presented and the work for the coming year outlined. The annual banquet held at the National Club was an enjoyable and most successful function, at which the executive heads, travelers and factory foremen were all present. W. A. Hamilton, president of the company, ably presided and during the evening lively speeches, songs and recitations were given. Those on whom the Chairman kept his eye were Chester B. Hamilton, superintendent; W. T. Purvis, warehouse manager; George A. Secombe, office manager; R. B. Hornibrook, accountant; E. McConachy, sample room salesman; W. J. Coulson, cutting room foreman; I. Whitton, sole leather foreman; A. E. Hatt, bottoming room foreman, and the following members of the traveling staff: W. A. Griffiths, Barrie; B. A. Trites, Sackville, N.B.; Richard Roach, St. John, N.B.; George B. Campion, Brockville; L. S. McKindsey, Hamilton; J. E. Firth, Peterborough; George Nicholson,

QUEBEC SHOE FACTORIES STILL IDLE

There are only five factories working in Quebec and they do not belong to the Shoe Manufacturers' Association. These firms are Marier & Trudel, Limited, J. H. Laroche & Fils, C. E. McKeen Co., Rock Shoe Co., and E. Tremblay. At the start Marier & Trudel were stopped for four days owing to a break in the main shaft of their factory but now everything is progressing satisfactorily. The average wages lost to the shoe workers since the strike started on December 31st is about \$50,000 a week and between three and four thousand people are idle. The dry goods merchants, grocers and other lines of trade are suffering considerable loss owing to the labor trouble. There is no prospect of settlement, as the manufacturers declare they will not take the men back unless they sign the rules and regulations which were drawn up some weeks ago. This the workers declare they will not do. It is reported that if an adjustment of the difficulty is not reached within a reasonable time that the Quebec Provincial Government will take a hand in the matter. The Government authorities will investigate the trouble to see what can be done to straighten out matters.

A number of men went recently to the factory run by Duchaine and Perkins and asked if they could come back to work. They were told that they could do so if they signed the rules, and when the rules were given to them to sign, they refused to comply and left the factory. The manufacturers do not expect to re-open their shops until spring unless the factory hands submit. The rules of the manufacturers call for open shop and non-unionism.

The condition of William A. Marsh, the veteran shoe manufacturer, is, according to latest reports, not showing any improvement.

J. Alm Richard, brother of Messrs. Arthur and Wilbrod Richard, leather and manufacturers' agents, Quebec, passed away on the 7th inst.

The official bilan was deposited in the Prothonotary's office by the "Indian Lorette Glove Works," liabilities \$8,053.14. Assets, \$7,384.20. The principal creditors of Quebec are Bank of Montreal, \$5,088.70; Quebec Glove Leather Manufacturing Co., \$572.30; Singer Sewing Machine Co., \$113.45; Henry Ross, Lorette, \$1,000.00. The meeting of creditors will take place the 17th inst.

SHOEMAN RE-ENTERS PUBLIC LIFE

Among the aldermen-elect of Chatham, Ontario, for 1914 is Geo. W. Cowan, one of the leading shoe merchants of the Maple City. Mr. Cowan is returning to municipal life after a number of years retirement, largely as a result of the persistent urging of his fellow citizens. Though he did not canvass he secured a vote of 1,025, running fifth in a strong field. Mr. Cowan has already seen considerable service, having been for a number of years an alderman of Chatham, and having served one year, 1905, as mayor. He has been active, also, in the membership of the Chatham Board of Trade. Mr. Cowan has one of the finest and best appointed shoe houses in Western Ontario. He has been in business for himself since 1887 and secured his first job in a shoe store in Chatham in 1880.

stores this year was the long laced boot for men. One store told us their sales of this article had been very large and the only way they could account for it was through the fact that there is so much outdoor work going on in connection with the terminals. The cold weather, too, has made an active inquiry for hockey boots, felt slippers, and rubbers, but the absence of snow is being felt in the overshoe trade. Very few of these have been sold, as yet. Advices have been received by the Halifax retail trade of another advance in shoes ranging from 3c. to 5c. per pair—the same to take effect early in the New Year. As showing the cause for further advances, a repair man remarked the other day that whereas three years ago he was paying from 25c. to 28c. per lb. for sole leather, he was now paying 40c. to 41c.

WHERE THINGS ARE NEVER VERY BAD

According to the Maritime Merchant, the shoe trade in the Eastern Provinces has been good during the past year. R. T. Hayes of J. M. Humphrey & Co., St. John, reports sales were well up to last year and credits and collections generally in a very satisfactory shape. Waterbury & Rising, of the same city, say that sales during 1913 were bigger than in 1912, but that the greatest growth had been in the first half of the year.

A. E. Massie, of the Canadian Consolidated Rubber Co., St. John, reports that the company's business in the eastern provinces has been equal to the previous year notwithstanding that weather conditions had not been so favorable for rubber trade.

C. S. Sutherland, of the Amherst Boot & Shoe Co., Amherst, N.S., says that if all parts of Canada had been as good as that of the Maritime Provinces, it would have been a record year.

Halifax shoe stores had a good Christmas trade, although it was late in getting started. Business in some cases went ahead of last year and would have gone away ahead if the weather had been more propitious. The Merchant says:—"One of the very large factors in the sales among Halifax

DESIRABILITY OF WOOD HEELS

Some manufacturers of women's fancy slippers, who use both leather and wood heels, say that the latter are more desirable from the standpoint of the factory.

It is said the cost of leather and wood heels is approximately the same, except for extreme heights of the wood heel. The cloth or leather to be used on the wood heel is cut at the same time as the upper. The heel is covered and the leather toplift fastened in place before it is affixed to the shoe or the slipper. It is nailed on from the inside and makes a clean job from start to finish.

The leather heel is nailed to the shoe from the outside, after which it must be trimmed, blocked and burnished. These processes are responsible for more or less dirt and dust, some of which gets on the shoe and must be carefully removed. The question of heel wear does not come into consideration, as the footgear on which wood heels are used is not expected to have hard usage. It is sold exclusively for evening wear, dancing or promenading on smooth walks. Under such conditions a wood heel will last longer than any other part of the shoe.

STYLE TENDENCIES FOR SPRING

Considering the country as a whole, and measuring the demand by the volume of sales, says a New York report, it is apparent Colonials with turned soles and with half Louis Cuban heel will lead in the selling. In certain sections or

Cash prices paid for pickled splits and heads in all weights and qualities. Write us your offering. Wright & Wright, Inc., 109 Lincoln St., Boston, Mass.

an extent that manufacturers of shoes are unable to get their orders for this leather filled by the tanners.

SOMETHING MORE THAN THREE BILLIARD BALLS

Fred. Jackson, who was recently elected Mayor of the progressive town of Clinton, Ont., has been in the shoe business there for a number of years and has worked up a fine trade. He was a member of the council for 1912 and was chairman of the finance committee in that year. In

1913 he was defeated at the polls but came back a winner this month in a race for the civic chair. The accompanying group shows three influential citizens of Clinton who recently waited upon the county council regarding a publicity campaign. They not only laid the bald facts of the need of such an expenditure before the county fathers, but they also presented a few bald heads. The gentleman on the left is Tom Jackson, the one in the centre is John Ransford and the smiling chap to the right is Mayor Jackson of Clinton.

99. Duplicate of 35, made in Urus Calf, a soft Oiled Leather. Good in the water and very tough.

Wearing Quality Counts Most

In any place where the strain on shoes is great there you'll find Williams shoes standing up honestly. Every portion of them is leather, and every stitch is exact, and true and honest. There is no shoddy material or shirked workmanship in a Williams Shoe. It is an honest, solid leather, work-a-day shoe which is making a big hit with people who require value with a capital V.

See the Williams man who is in your locality. Ask him to show you all the good, strong features that made the Williams shoe such a selling success. He can show you that you need it in your stock.

SPHINX
Shoe Cement Paste

"SPHINX" stands unique and without a rival in excellent qualities wanted by the shoe manufacturer.

It is a quick, strong and clean adhesive, ready for use.

It absolutely takes the place of high-priced cements—on all kinds of linings, cloth or leather, such as vamps, side linings, stays, sock linings, etc.

It is flexible—when applied thin with a brush. Will fasten counters and toe pieces, tap soles, etc.

Best for sock linings, as they never loosen.

There is nothing made that is just as good.

22-FOOT GOODYEAR SHOE REPAIRING OUTFIT

MODEL N

THIS Outfit represents the highest development in shoe repairing machinery, and meets every demand of modern shoe repairing. It embraces all the essential processes for making new shoes from old ones, giving the maximum of equipment and efficiency in the minimum space. The Outfit has the Goodyear Stitching Machine with all its improvements, including a new style steam generator which uses gas or gasolene for generating the steam, and operates automatically, thereby insuring a uniform heat for keeping the wax in proper condition and requiring little attention from the operator. The Edge Trimming Machine has the new feature of the two shafts, being operated by a single belt, and the cutter grinder is attached directly to the main shaft. This arrangement gives better results with less power.

The Buffing and Scouring Machine has a shaft 57 inches long and carries the following equipment:

- | | |
|--|-----------------------------------|
| 2 Split Bottom Buffing Rolls | 2 Flat X-Ray Heel Scouring Wheels |
| 2 "C" Shape X-Ray Heel Scouring Wheels | 1 Heel Breast Scouring Wheel |
| 1 Pin Wheel Pad Complete | |

A powerful Blower System removes the dust resulting from the trimming, buffing and scouring operations, and is designed to overcome certain objectionable features of other blowers.

The Finishing Machine has a 78 inches shaft which has all the necessary equipment for black or russet work:

- | | |
|--|--|
| 2 Corrugated Rubber Shank Finishing Wheels | 1 Corrugated Rubber Heel Finishing Wheel |
| 1 Corrugated Rubber Bottom Finishing Roll | 2 Shank and Bottom Brushes |
| 2 Heel Brushes | 1 Stitch Cleaning Brush |
| 1 Levelling Roll | 1 Bead and Wheel |

At the end of the Outfit is the Oscillating Edge Setting Machine which is fitted with union irons and in its motions duplicates hand workmen with quicker and better results.

Each of the machines is operated independently by a friction drive pulley, so that it is necessary to use only those machines which the operator may require. This feature means a saving of power.

All the machines are firmly mounted on legs and driven by a countershaft with carefully adjusted bearings, so that the Outfit runs with very little vibration, and is in every way most efficient.

Kimmel

FELT FOOTWEAR

THERE are many **good** reasons why you should stock and sell Kimmel Felts, but the **best** of all is because your customers want them.

Kimmel Felts have been the leaders in Style, Fit and Value for many years. Careful attention to details, high-grade workmanship and materials have made Kimmel Felts so nationally popular.

When Placing Your Felt Order for Fall 1914

See that you specify **Kimmel** Felts, and you'll have no difficulty in making quick, satisfying sales.

The 1914 range includes a wide assortment of neat and perfect fitting shoes for men and women. All the latest designs and colors are embodied in Kimmel Felt Slippers, while the shoes are made on modern lasts in all-felt and felt and leather.

and Wholesale Dealers in Fine and Staple
Footwear of all Kinds in Canada

JOHN F. CLARK, PRESIDENT

JAMES F. CLARK, TREASURER

Important Announcement to the Wholesale Shoe Trade

CLARK BROS., Limited, of St. Stephen, N.B., beg to announce the opening of their new Canadian shoe factory which is now in full operation.

Possibly never before has a shoe factory been started with so many thoroughly practical men at its head—men who have learned the shoe business from “A” to “Z” in the hard school of experience in the leading centres of the United States.

The new plant is equipped with the most up-to-date machinery and every provision has been made for a large output of ladies’ high-grade McKay shoes.

In these shoes are embodied the latest American and Canadian styles and ideals on snappy lasts with fine fitting and wearing qualities. The line as a whole presents as fine an assortment of saleable shoes as has ever been manufactured in the Dominion.

We’d be glad of the opportunity of showing you samples.

CLARK BROS., LIMITED

ST. STEPHEN, N.B.

Owing to our large sales and the introduction of new machinery, we are enabled to place before the trade a new proposition in regard to

SHOE POLISHES

Our travelers are now on the road and will be pleased to discuss this proposition with you—or drop us a postal for information.

The Dr. A. Reed Cushion Sole Shoe

A cross-section view showing in detail WHY it is comfortable

Some cushion sole shoes are clumsy affairs at best.

But the Dr. A. REED CUSHION SHOE combines quiet elegance with absolutely the best cushion sole on the market to-day. It is a double-barreled proposition.

We've shown hundreds of dealers the way to larger profits. Are you one of them?

There's Money in Hosiery for the wise Shoeman

Glance over your sales records for the last year! Now total them up and ask yourself this question:

How many of my customers could I have sold Pen-Angle Hosiery to last year without half trying?

Suppose you had sold one-third of your customers and pocketed a nice margin of profit. Your *extra net profit* would have paid the rent and perhaps the wages of a clerk or two. And *all this* with hardly any extra work or cost. Why not oblige your customers by stocking Pen-Angle—the popular, Full-Fashioned Hosiery for Men, Women and Children.

Your lady customers want Pen-Angle Hosiery to match their shoes in shade and color. Your gentlemen customers want Pen-Angle for this and other reasons at your store. Oblige them by keeping a good working stock of Pen-Angle always on hand. If you've never stocked Hosiery before, write to us for full particulars.

COMPANY
LIMITED
THREE RIVERS
QUEBEC

¶ All the essential qualities of a shoe for Fall selling are embodied in the Doctors Shoe.

¶ Sturdy yet dressy; comfortable but not clumsy, and thoroughly waterproof; the Doctors Shoe is particularly suitable for Fall wear.

¶ The waterproof quality of the Doctors Shoe is not an empty theory. Both the soles and the uppers are waterproofed by a special process, and to prevent the slightest feeling of dampness, there is a sole of thermal asbestos between the outer and the inner soles.

¶ The Doctors is truly an ideal Fall shoe.

¶ You should have a good assortment in your Fall stock. Your jobber sells them.

Brand on the
Felt Footwear
You Buy

We are now offering to the trade, through independent jobbers, a line of Cold-Proof Felt Footwear that, for all-round excellence is superior to any other line of Felt Footwear in Canada.

We make our own felt from the raw material with machinery invented and designed by our own experts and this enables us to excel in fit, style, finish and wearing qualities.

These are the features that have created such a wide-spread demand for Great West Felt Co., Limited, Felt Footwear, and it will pay you to see that the felt footwear you buy bears the above stamp of quality.

Independent jobbers are now showing our Fall Felt Samples.

ELMIRA, - ONTARIO

"NOT IN ANY TRUST"

Quick-Selling Lines for Quiet Times

No. 338—Patent Dull Calf Collar, 1 Strap

You must arouse the interest of your women customers if you would get their money at a time when there is so much talk of "tight money" and "hard times" in the air.

To a certain extent, this is a mental condition. It must be combatted by an appeal to the desire strong enough to overrule the tendency to caution in spending money.

Five Button Oxford, fancy foxing, short effect, high toe, 12/8 Cuban heel (in gunmetal and tan calf, also nubuck in different colors.)

The three Kingsbury lines shown herewith will create this desire. Send your order to-day and watch it work out.

Kingsbury Footwear Co., Limited

Specialists in Ladies' Footwear
Montreal

"DUCHESS"

No. 401 - - In Cabretta
No. 391 - - In Patent
In Dongola

Feature our FLEX-WELT Shoes. No one can resist the appeal to the reason that it presents. For comfort plus appearance it is in a class by itself.

This shows the "why" of Flex-Welt comfort. The shoe bends in the RIGHT place.

SERVICE!

Your wife sometimes forgets to order one or two items from the grocer when shopping in the morning, and, just before dinner, she finds out that there's no bread, or no butter, in the house. What does she do? Why, she goes to the telephone, and calls up the grocer, and says: "Mr. Sunlight, I've run out of bread. Would you mind sending me a couple of loaves at once. I need them for dinner."

And what does Mr. Sunlight say? He says: "I'll send them right around." And, regardless of the fact that he only makes a cent or two profit out of the order, he drops whatever else he's doing, wraps up the bread, and sends it around, or takes it to your house himself.

And your wife says to herself: "Sunlight's all right! He can have my trade as long as I'm living in this town."

Sunlight's strong point is *SERVICE*. He doesn't say to your wife: "Can't you send some one for the bread? My wagon's in the stable, and all the clerks have gone home, and I haven't anybody to take it around."

No,—Sunlight "delivers the goods."

Now, our strong point is "SERVICE," and we, too, "deliver the goods."

In a few weeks you'll be asked for your 1914 placing order for rubbers. In deciding to whom to give this order, remember that a placing order is about the easiest thing handled by a manufacturer of rubbers. He has plenty of time to fill it in, just as the grocer has plenty of time to fill your wife's morning order. But will he be *able* to, and will he be *willing* to, fill your "rush" order for "bread and butter," when you need certain styles and sizes in a hurry next fall and winter? *Can* he, and *will* he, take care of you in an emergency, when delay in the delivery of your sorting order means the loss of some of your customers, and brings discredit to your store?

We *can*, and we *will* take care of you in your emergency. Remember this, when handing out your 1914 placing order.

Canadian Consolidated Rubber Co., Limited
Montreal

28 Branches Throughout Canada

Those Customers with Bunion Trouble— Do You Do Anything for Them? Why Not?

And especially when there's big profit in it, and mighty little work. Many a shoe salesman has spent valuable time stretching shoes to ease a Bunion, when he could have sold the customer a Scholl Bunion Shield and put some cash in his till. Not only that, but by satisfying the customer he would have made a favorable impression that would later sell more goods. Sell every customer with Bunion trouble

Scholl's Bunion Reducer

A pure gum rubber shield so shaped that it fits snugly over the enlarged joint, next to the skin, relieving all irritation caused by the shoe. It excludes all air and retains the natural moisture of the foot, thus arresting further growth of the Bunion enlargement by its reducing action on the tissues. Fits all feet perfectly—no shifting or bulging—no larger shoe needed. Used with success by Chiropractors and Shoe Dealers everywhere.

Retail 50c. each, \$1.00 per pair—three sizes. Nearly 100 per cent. profit. Send for sample to-day.

The Modern Shoe Store is no Longer Simply a Place to Sell Shoes

The proprietor, or at least one of the salesmen, has studied Dr. Scholl's Free Book on "Scientific Correction for Ailments of the Feet," and is the authority on Foot Trouble in his locality. Popular demand created by Scholl's wide advertising has made it a place where foot-suffering humanity can obtain relief.

Who gets all this business in your town. Do you? Why don't you? A very small investment will put you in a position to make big profits on every pair of troubled feet. Foot-Eazers and other Scholl's Arch Supports, Bunion Reducers, Bunion Rights, Bunion Springs, Absorbo Pads and other Scholl's specialties are quickly and easily fitted—you increase your prestige as a foot specialist—and make money besides. Write to-day for a Scholl catalogue and samples. It'll be worth your while.

Scholl Specialties Are Big Profit Bringers

The demand for these appliances is established and is being increased by daily advertisements in hundreds of magazines and newspapers. Live dealers—helping by using our posters, signs, cut-outs, booklets and other free advertising matter—are being helped to quite a little extra money, too. Increase your income—get in a line of Scholl's goods.

LET SCHOLL ADVERTISING HELP YOU

We've taken this whole page to tell you that Scholl's Foot Specialties are easy sellers—make big profits and bring satisfied customers. We've told you some of the **WHY**, but not all of it. You're interested in what we've told—you'll be more interested in the rest. And you ought to have it—in fact, you cannot well afford to be without it. Write for our catalogue—right now. Ask for our catalogue and "First Step" assortment offer.

GOOD FELT FOOTWEAR AND

THE MARK THAT SELLS IT

THERE are various brands of Felt Shoes that *look* very much alike when new and it's the *service* the shoes give that really distinguishes one "make" from another.

There are many brands of Felt Shoes that *look* like "Elmiras" but there the comparison ends. Exceptional felt and shoe manufacturing facilities, combined with a *concentrated* experience extending over many years, enable us to put a "wearing quality" in Elmira Felt Shoes and Slippers that is absolutely incomparable.

"Elmira" on Felt Footwear means a guarantee of perfect satisfaction to the customer and an insurance of steady sales and profit to the dealer.

It will pay you to look for the Elmira trade mark on your 1914 stock of Felt Footwear.

ELMIRAS ARE SOLD BY ALL RELIABLE
SHOE JOBBERS

Tangible Value

That's what you get when you buy "Independent" Rubbers. There's no airy theory connected with them. No "shoddy" or inferior material enters into their construction and no matter what brand you order—"Kant Krack," "Dainty Mode," "Royal" or "Bull Dog," you are assured the very best value your money can secure.

And when you see these brands being sold by the leading jobbers in the Dominion, isn't it about time you inquired into their merits.

A postal will bring you information.

No Fast Color

Get this fact firmly fixed in your mind. It may be the means of saving you considerable annoyance and inconvenience; for, if you will insist that the diamond trade mark shall appear on the surface of the eyelets in the shoes you order, you will be entirely free from any complaints regarding "Brassy" eyelets. Fast Color Eyelets are the only kind that cannot wear "Brassy." They enhance the good appearance of shoes more than any other accessory used in their manufacture; and, made as they are, with celluloid tops of solid color, they do not grow old but retain their bright, new appearance long after the shoes are worn out.

The diamond trademark is a sure cure for all eyelet troubles. Only the genuine Fast Color Eyelets have it.

Rideau Sales Steadily Increase

The great popularity of the new lasts plus the proven sterling worth of the older styles have placed the Rideau line in a pre-eminent position among the Canadian shoe trade.

In the midst of the recent general stagnation in sales, Rideau shoes have sold as steadily as usual, proving that their genuine worth more than offsets any caution in buying due to hard times.

Let our salesman explain them to you more fully.

What Canada is Buying from Other Countries

The Imports in Footwear, Sole Stock and Certain Other Imported Lines Larger Than for Some Years Past—United Kingdom is Sharing in the Heavy Purchases Which Dominion is Making—Figures That Tell Their Own Tale as to What Lines Canadian Producers Are Holding Their Own and in Those They Are Not

Statistics are always interesting as they furnish an index of the expansion or decrease in national, as well as individual undertakings. Canadian import trade has been growing rapidly of late and the following report of purchases of leather, shoes, harness, etc., from other countries needs but little comment as the figures explain themselves.

The SHOE AND LEATHER JOURNAL is indebted to F. G. Clarke of the firm of Clarke & Clarke, Toronto, and former chairman of the Tanners' Section of the Toronto Board of Trade, for the attached table, covering the last four years.

It will be seen that with very few exceptions, the imports in leather of all kinds, tanned and dressed as well as boots and shoes, are advancing steadily. In some instances the reports for the fiscal year ending March 31, 1913, show an increase from 25 to 50%. The most notable declines is in dressed calf, goat and sheep leathers as well as in enameled leathers, harness and saddlery. It will be observed that the

heaviest increases in imports are in boots, shoes and slippers, both from the United States and the United Kingdom.

The total imports of footwear from the United States for the fiscal year for March 31, 1913, was \$3,587,491, as against \$2,463,729 for the previous fiscal year, showing a gain of practically 50%. In sole leather there has also been a large increase in imports both from the United Kingdom and the United States. There is also an advance of 50% in the imports from the United States of calf, goat, or sheep skins tanned. The growing figures in glove leather, tanned or dressed, upper leather and chamois skins and other lines will also be seen by reference to the following table which has been compiled from official sources and is, therefore, reliable.

The letters "U.K." stand for United Kingdom, and "U.S." for United States, and the third abbreviation is for "Other Countries." It would be advisable to cut out this table for future reference.

Some Examples of Ingratitude in the Shoe Trade

The Way Certain Persons Make Use of Others and When They Have Secured All They Can, Renounce Those Who Have Done Them Favors—Thanklessness Seen in Many Departments of Mercantile Life

Gratitude has been described as a lively sense of favors to come but a rapidly vanishing feeling after the favors have been extended.

Every traveler knows this, so does every shoe retailer, jobber and manufacturer. Special favors will be extended or certain concessions granted and the recipient is very thankful at the time, but as soon as he rounds the corner, financially, too often he is inclined to forget all that has been done for him. But it takes all kinds to make the world.

A leading Canadian jobber, speaking of persons kicking down the ladder by which they had climbed, said, "Fortunately, we have ceased to worry much about this thing now as we get enough business to not bother over the slights and rebukes which we receive. Some years ago, and this case is only one in many, an eastern retailer failed in business. His credit was gone but the fellow had brains, experience and ability, and, after the crash, was anxious to continue in the game. He got about five hundred dollars together, and came to see what we could do for him. He wanted a stock of two or three thousand dollars to start again. Of course, if he had no money we would not have given him any credit for we would have all to risk and he nothing; but when a good man has some capital and is willing to make the venture, we think that he will strive harder to score a success, for he is anxious to protect his own.

How He Threw Them Down

"Well, things went on until the dealer owed us something like ten thousand dollars, but at certain times he would reduce it to six and seven thousand. Then, as his business grew and his credit became better, travelers from other houses, principally in the manufacturing line, began to call on him, but mind, they had let him severely alone when they thought he would never get on. Just to induce him to purchase, they quoted a little lower price on certain lines on which they specialized than we were able to do. The dealer paid these houses up promptly and took advantage of the discounts to keep his credit good. He began buying less and less from us.

"Finally, he ceased to give us any orders and told us that we had been charging him too much. We pointed out to him that, in order to secure the goods a few cents cheaper direct from the makers, he had to buy in case lots, order the merchandise weeks and even months ahead, and that he could not sort up on them the same as he could with us, and, as a consequence, had more odds and ends at the close of each season, which had to be cleared out at a big reduction, and offset any advantage he might have in buying a few cents less per pair. We emphasized that, in dealing with us for years as he had been, he was able to buy six, ten, or fifteen pairs, had the benefit of having them shipped at once, could assort on them at any time desired, took less risk, and could get along with less stock. Surely these concessions were worth something, but he could not or would not see it in that light, even after we had carried him for years. He used us until he was independent of us, and then he had no further concern for our establishment. We took all the chance, sold him the goods at the same rate as we had others, and might have lost thousands of dollars. But this was of no avail as soon as things began coming his way," concluded the jobber.

Took Credit—Paid Others Cash

Now for the retailer's side of his woes. A Hamilton shoe merchant said, "Yes, we have many glaring cases of thanklessness. I will give you just one instance. A custo-

mer, whom I shall call Kennedy, had been dealing with me for some time. He was a moulder by trade, and had a wife and family of five children. One day he was severely burned about the arms and breast with molten metal and had to lay off work for some weeks. In the meantime the children were getting out of footwear. The family, who had little or no money laid by, secured credit from me and ran up a bill of sixty three dollars for shoes. The father finally got well and went to work again.

"We noticed that none of the members had been in for several weeks and wondered what was the reason. One afternoon I called around to the house and questioned the wife. She said that they were not patronizing me any more, that they were going to R—'s for their shoes as they considered he gave them better value. Now this dealer happened to be a particularly good friend of mine, although a competitor in business. I dropped into his shop and asked about the Kennedy family. He told me they had paid cash for all their goods and had never asked for credit. I tried for weeks to get that bill, and even put it in the hands of a collector. From that day to this, not a Kennedy has entered my door, and I have never been able to secure a dollar of the money, although the father is working every day at a fair wage. They had used me as much as they could and this single act, along with some others, I might name, drove me into doing a cash business. I determined never to be caught again, and I now have shut down on any credit, for I have had been bitten too often. People would come to me for credit, when they had no money, but when they had the cash they would go somewhere else."

Now He is a Friend No Longer

"Yes," declared a traveler," we all are up against the same thing. A friend of mine, who had no experience in the shoe business, but had accumulated several hundred dollars capital, was anxious to know if I could put him next to a good thing. Now, in my territory, which I had studied closely, I happened to be wise regarding a fine opening for a high-class shoe store. There was not a live dealer in F—, and the best people were sending out of the place to the city for their footwear, evening shoes and dress shoes particularly. I told Brown, for that name will answer, for he certainly did me up brown, of the chance, and he was keen to make a start. I went down with him to the town. We secured a fine, well laid out store at a moderate rental, and then we came back to the factory. I picked out the lines that I was sure would sell, and made favorable arrangements with the house for the payment. Then, for his women's and children's goods we went to other firms, for we make only men's.

"It happened to be in June. I was through with my fall selling trip, and took particular pains to see that Brown was rightly launched. I wrote his opening announcements for the papers, dressed his windows, and stayed with him for several days, helping him arrange his stock and installing the best system that I knew, for I had been in the retail line myself in the early nineties. Well sir, things came the way of Brown much better than he had expected. He engaged a couple of capable clerks, and was on the job every day. He gave good value for the money, and thanked me warmly for seeing off to such a fine start, promising to never forget what I had done for him. The next season or two he gave me nice orders and then he began to grow lukewarm. I noticed that other lines of men's shoes were on the shelves. Now, I did not expect to "hog" his trade and made no complaint. Each season his order for my stuff grew perceptibly less and to-day I get the go-by. That's Gratitude with a big G."

Windows Which Put the People in a Purchasing Mood

Various Clever Conceptions to Capture the Eye—Accessories Which Were Used with Good Effect—How Different Trimmers Worked with Patience, Skill and Foresight—What the Strong Points Were in Each Presentation

The holiday window of Weiss Bros., Napanee, which has been awarded first prize in the SHOE AND LEATHER JOURNAL in the Town Competition, was designed by E. B. Weiss, and represented the new model of a fireplace. The flooring was of hardwood, while in front of the fireplace it was of tile. The mantle was made of wood, covered with crimp paper which represented brick. On each side of the hearth were silk curtains. The fire effect was produced by three gas logs, which were lit at night. Around was a brass finished guard, while at the side hung two stockings, from the top of which protruded a slipper. This interesting

that town, and has been deemed worthy of second prize by the judges. This window attracted such widespread interest early in December, when heavy goods, lumbermen's rubbers, etc., were shown, that extra efforts were put forth to remodel it for Christmas. A miniature slab shanty, with roof covered with batting and sprinkled with diamond dust, to represent snow, was the main feature; the latch string hung on the outside of the weather-beaten door, over which was seen the old time horse shoe, "for luck," with a spray of holly. A nigger boy "with wheels in his head" that kept his eyes turning, stood near the chimney—the card read

THE HOLIDAY WINDOW OF WEISS BROS., NAPANEE, ONT. AWARDED FIRST PRIZE IN TOWN CLASS

trim was much admired, and to quote, or rather misquote, Goldsmith, the poet, "They who came to look, remained to buy," might be said of the spectators who viewed this striking window display. Mr. Weiss believes in changing his window every week, and reports a good business record for the past year. Over a thousand Christmas cards were sent out by mail to the customers of the firm. Weiss Bros. make a specialty of high grade shoes and slippers, and they carry a large stock of hockey boots, hockey being the favorite sport of E. B. Weiss during the winter months, while, to encourage the boys in their efforts to keep hockey a good clean sport, he is donating a special silver cup, which was exhibited in the window.

Nigger Boy Watching for Santa

The Christmas holiday window of Fred. R. Foley, of Bowmanville, was one of the most fetching displays ever seen in

"Watching for Santa Claus." A large slab, ten feet long and ten inches wide, extended across the back of the window. On this were placed the club bags and suit cases. Beneath the slab was a fine Christmas scene (one of Denison's special crepe paper designs) which, however, did not show up in the photo. The background beneath the scene was of rough bark. The floor was spread with coarse sawdust, while a big, black bear rug occupied the centre. In the corner near the entrance was an old stump, upon which was seated an owl, through a knot hole peeped another owl, while two grey squirrels and a wild duck appeared at the base. A fine deer's head in the corner of the store was visible through the back window. In the opposite corner was a snow bank, upon which were placed moccasins of all sizes, around the old Indian head that F. J. Weston & Sons made famous. The shoes, slippers and hockey boots were displayed on rough blocks, slabs and shoe stands. A few small,

neat and catchy Christmas cards, which did not obstruct the view in any way, were placed suitably, and a sprig of holly was set in each shoe.

The reflection of small lights across the street, which were noticed too late, somewhat marred the effect of the picture. Mr. Foley states that they were very proud of their front and received a great many compliments. The ladies' window was even more pleasing to the eye than the rustic window described above, and was exceptionally pretty, though it perhaps, did not show as much character and originality as the other.

Specializing in Many Lines

The Burns Co. Limited, Oshawa, in their Christmas display, made use of just a sufficient amount of flowers and bells to give a holiday effect, without detracting the attention of the onlookers from the goods. For the floor of the windows white cheese cloth was used, puffed in with a border of flowers along the front of the window. Each line of goods was shown in a class by themselves. All kinds of men's slippers were displayed, with a card which read: "Useful Christmas Gifts sure to please the men." In this section, boys' boots were also shown. In No. 2, on the lattice work at back of window, were seen children's leggings, rubber boots, overshoes, hockey boots, a pair of skates, a pair of boy scout's high boots and infants' white and black rubbers. On the shelf were placed rubbers in such a manner as to show the strong points of the heavy soles and heels for boys and children, also a couple of specials in boots for men, at \$2.50 and \$2.98. In the front part of this window were all kinds of children's slippers, set in pairs, with card, telling size and price, while back of these were shown all kinds of children's shoes, set in groups, at low prices. No. 3 showed all kinds of shoes for women for house wear, and on the bottom and on the lattice work on top, was a display of fifty cent slippers. No. 4 was left for children's higher priced shoes and infants' soft shoes, with a divider between them and the women's, where were seen some \$2.50 specials, behind which were placed some moderate priced shoes.

Section No. 5 had two displays at the back of the window. One was an exhibit of all the new styles for evening wear, including fancy buckles for slippers—the other display consisted of women's tans in all the latest shapes. The bottom part of the window was left for Empress shoes exclusively, all kinds being shown. As suggestions for a useful and acceptable Christmas gift, along the front of the window were the makers' boxes, wrapped up, with Christmas tag on each, all ready to be presented. Along the front, a couple of pairs of satin evening shoes were also set. A white doily was placed under each shoe on the stand to bring it out clearly in relief. A card in the corner of the window read:—"For mother, sister, or wife—what more useful gift than a pair of these nice shoes?" In No. 6, the whole window was devoted to men's working boots and heavy rubbers, with felts and socks for winter wear. All kinds of high lace boots and rubbers were displayed, as well as overshoes, moccasins, waterproof dressings and all kinds of felt and cork insoles. In No. 7 window were displayed men's Hartt shoes and men's lower priced fine shoes, while, in the centre of the window, separated by two dividers, were hockey boots of all kinds, automobile skates, with an electric automobile skate flasher in the back. Throughout the windows were several small tags, with Christmas greetings, attached to the shoes.

In sections Nos. 1, 2 and 3, cards were used on all the small groups, which read, "Useful Christmas Gifts—sure to please." Then the price was marked, beneath which were the words, "A Merry Christmas and a Happy New Year—The Burns Co. Ltd." These cards were also used in a smaller size in the window showing men's working boots, where suit cases and club bags were likewise displayed. All the

show cards were written by Harry J. Fox, with the Burns Co. Limited, who is also responsible for the clever arrangement of the remarkably varied assortment of choice gift suggestions. Before entering the employ of the Burns Co., last spring, he was with the J. J. Haines Shoe House at Napanee, for over five years. Mr. Fox considers no window is complete without show cards, and believes they are one of its strong points. The Burns Co. of Oshawa have eighty feet frontage, and the photographer found it necessary to get back quite a distance, in order to secure all of the windows, and for this reason, the photo is not as clear as one which could be obtained of a smaller window from the edge of the walk. These Yuletide windows proved to be excellent sellers, as the goods were arranged in such a way that a customer, by glancing around carefully, could make his selection before entering the store. Although such a variety of goods was on display, the windows were not overcrowded, many of the shoes being surrounded by plenty of space, which afforded the spectator an excellent chance to obtain a good view.

Doll, Toboggan and Evergreens

The ladies' window in the Christmas display of the C. E. McKeen Shoe Store, Victoria, B.C., was on the right, and had an extensive showing of ladies' slippers in felt, boudoir and moccasins, with a variety of colored satin evening shoes. The bottom of this window was covered with pure white cotton batting, sprinkled with mica to represent snow. Holly, with bright red berries, was placed between the shoes. In the centres was a toboggan, five feet in height, surmounted by a sleigh, decorated with red and green angelica, bells and red ribbon. On the sleigh was seated a large doll, dressed in white, with white sweater and red toque. On each side of the toboggan were three Christmas trees, ranging from one to four feet in height, with cotton batting on the branches to represent snow. Two wreaths made of pine leaves and cones, trimmed with holly, hung from the centre. A magnificent effect was created by lighting the windows with 18, sixty candle power lamps in green and white. In the centre of the men's window stood a large Christmas tree, 7 feet in height, with snow covered branches, cotton batting being used for this. From the branches hung eight Angela bells, and beneath the tree were four red, sixty candle power lamps, which gave a wonderfully brilliant effect. The plate glass stands were covered with drooping cotton batting which appeared like icicles, and the mirror at the back was decorated in like manner. Fine bunches of holly were placed between the stands and the shoes, and the window showed an excellent display of men's slippers, pumps and boots. The store itself was also very prettily decorated. A roping of five hundred feet of cedar was draped from the centre of the store to the top of the fixtures, the centre being decorated with six large angela bells, 18 inches in diameter, and four dozen of the smaller size, ranging from three to eight inches in diameter. Twelve large palms placed on the fixtures, completed a perfect scheme of decoration. The photos of this beautiful display also failed, like many others, to do justice to the windows depicted, and in looking at the pictures, which will be used later, in order to appreciate what they represent, one should carry in the mind, the description given of the beautiful colored lights and other details. The residents of Victoria, who had the advantage of viewing these handsome Yuletide decorations, fully appreciated the artistic taste shown, and the successful results of the efforts of Chas. L. Griffin, manager of the C. E. McKeen Shoe Store, and their favorable comments were to the effect that the windows were a credit to the company and the manager.

Santa Sat on Rubber Box

One of the fine windows in the Christmas display of the Abernethy Shoe Co., of Kingston, Ont., was devoted to

THE HOLIDAY WINDOWS OF F. R. FOLEY, BOWMANVILLE, AWARDED SECOND PRIZE

women's and children's slippers, ladies' traveling goods and accessories, such as shoe buckles, fancy button hooks, shoe horns, etc., while the other window had a showing of men's, boys' and little boys' shoes, hockey boots and slippers, as well as traveling goods. The pillar in the corner of each window was covered with evergreen and had shelves, about eighteen inches above each other, covered with white cotton batting, the floor was also covered with batting. Frames, covered with white cheese cloth and batting, were made for all mirrors, and over each centre mirror was a "Merry Christmas" sign, in purple letters on gold cardboard. All glass stands were covered with batting and tied with red baby ribbon. Real evergreen covered the edges of all frames, and silver tinsel was used to form cross bars over the mirrors, on which were hung infants' bright red slippers (in the women's window) and small red bells in the men's. In each window was a rubber box covered with batting and tied with red baby ribbon, and on each box stood a Santa Claus, while in the centre of both windows hung a card, referring to holiday gifts. On taking the photograph, the card in one window was removed, as it caused too much reflection, and a large dark card, with buckles, was substituted. The little windows, which were independent of the others, were white and trimmed

to correspond with the larger ones. They were lighted by themselves with green shades. One large window was lighted with red lights, while the other had green. The beautiful effect created by these lights caused people to stop and admire, and made a wonderful impression.

A Cross, a Star and a Crescent

An original Christmas window trim was shown by F. Sutherland, boot and shoe merchant, of St. Thomas, and was designed entirely by P. C. Smiley, who is employed in the store. On account of the dark colors and position of the lights in the windows, the photos were not very clear and did not show up the display to advantage. From the ceiling of each window, two bars, covered with red and green crepe paper (and having a small twig of cedar hung from each end), were suspended, while from the centre hung a small red Christmas bell. The centres of the floors were dark red, with an eight-inch border of light green crepe paper, and the lights were covered alternately with green and red crepe paper. Each window was supplied with a cross, a star, and a crescent, or half moon, set on pivots, so that, by turning them round, any article attached could be easily removed, without disturbing the rest. These were constructed of wood and covered with green canvas,

THE SPLENDID YULE-TIDE DISPLAY MADE BY BURNS SHOE HOUSE, OSHAWA

on which cedar twigs were sewn, while the edges were bound with an inch wide strip of dark red crepe paper. Here and there poinsettias were placed to lighten up the green background. The cross was $4\frac{1}{2}$ feet high, and 4 inches wide, and at arms, 28 inches from one end to the other. The star had five points and was four inches in diameter from the tip of one point to the other. The crescent was five feet in diameter and eight inches at the widest point. In the ladies' window, the cross showed infants' white and red booties, slipper soles, and dancing pumps. The star was decorated with dress boots of the very latest design, blue boudoir slippers and Rhinestone buckles. The crescent had infants' booties in all colors, children's slippers and ladies' blue dancing pumps. On the floor were seen slippers in various shades and cuts, ladies' pocket books, slipper soles, baby doll pumps and shoes of the latest design, set on a stand. At the left hand corner was a lady's tan folding club bag and traveling set, and different lines of slippers and shoes. At the back of the window and top of shelf were several lines of club bags and suit cases, opened, from which hung children's colored gaiters. The cross (in the gentlemen's window) showed men's grey spats, chocolate Romeos and slipper soles. The star, different styles of men's slippers, shoe arches, cushion heels, polish brushes and laces. The half moon held men's dancing pumps, tags for trunks and club bags and slippers. On the floor were shown the latest styles in men's slippers and shoes, hockey shoes, club bags and traveling sets. Suit cases, club bags, gaiters, leggings and moccasins filled up the rear of the window and the shelf. Both windows showed the same colors and materials, and the entire cost of the decorations was \$4.25. The original windows have been thus minutely described as the photo did justice neither to the layout nor coloring. To arrange two windows with such a variety of articles must have required a large amount of patience and not a little skill.

An Old Shoe of Years Ago

Highly polished mirrors occupied the whole of each window in the Christmas display of James McClinton, Jr., of Goderich, Ont. The lattice work and the designing in the rear were made of lathe, planed and painted white, which was dressed neatly but not gorgeously, with red and blue ribbons and small Christmas bells. From the top of the lattice work to the top of the window glass were extended several evenly coiled, or rather twisted, paper ribbons. There was a uniformity and proper succession of colors, namely, green, blue, red and white. On the lattice work were placed the special Christmas slippers and dancing pumps, the latter being given prominence in the centre, as a series of dances and other social functions were to be held in the town very shortly. The bottom of the window was loosely covered with cheese-cloth, beneath which was a white surface of cotton. In the gentlemen's window, special prominence was given to a walrus club bag and a few hockey shoes. But the most interesting object in this window was an old shoe worn about the year 1885. It was very large, coarse, and would weigh probably five pounds, on account of a heavy iron sole and heel. Placed at an angle with this was the latest gun metal shoe. This seemed to make a hit, and as a result, many inquired concerning the old shoe, and naturally attention was drawn to the other shoe by comparison. The shoes were placed on polished nickle stands, while a few pairs of foot-easers and boxes of corn pads added a little variety.

In the ladies' window, some attention was paid to winter slippers of felt, cotton and silk material. Here were displayed two each of suit cases and ladies' club bags. The background frame was of a different model, but the coloring was of a similar uniformity. Illustrations of the foregoing windows will be published in a later number of the

Got a Good Price on a Live Line

"The greatest hardship in the retailing of women's shoes to-day, is how to clean up low shoes, for it is a well known fact that the spring, or low shoe, season causes more worry to the average retailer than all other seasons of the year combined," said a sales manager recently. "It is true that a greater margin of profit can be made on low than high shoes, but the season being so short and the styles so varied, it seems quite impossible to make a general clean-up such as most merchants do in their boot season.

"The merchant of to-day is wiser far than he was a few years back, and there is no such thing as a small town merchant any more. By that I mean that the merchant in the small town is just as much alive to what is new as the big merchant in the larger city, for he is constantly reading about the new things, and is forced to buy them whether he wills or not, for there are a sufficient number of "live-wire" young girls in small towns who do most of their shopping in the near-by cities, and it is while on one of these shopping excursions that they purchase a pair of the latest things in footwear.

"And since they are very liable to be led, as far as dress is concerned, in the little town in which they live, they create a demand for the new styles in shoes, and so the small town merchant is compelled to place them in his stock.

"Most merchants are awakening to the fact that they must get more profit for their merchandise, and if they are fortunate in having the right thing at the right time, and have nerve enough to ask not only a legitimate profit but will add another fifty cents a pair margin to a particularly new style, they will have no trouble in securing the additional profit asked; for, it matters not how good the material that has been used in the shoe, they must first attract the customer's eye before they can extract her money, and a style that is pleasing and is having the call will bring any price asked within reason."

Use More Space in Dull Times

The convention of the National Shoe Retailers' Association, held recently in New York City, sounded a high note in regard to the necessity of live retailers using space in the newspapers.

William Laird, of Pittsburg, who has had a successful business career of more than thirty years, said, in part, that "Advertising gives your customers confidence in you and increases your confidence in yourself. It is profitable investment in every season, and to lessen your advertising space in 'dull times' is ill advised and often costly." He spoke on "how to make the shoeman more successful," and declared that the most successful and largest retailers today were liberal patrons of printers' ink.

In discussing "Customers' Complaints and Their Treatment," Harry Hahn, of Washington, asserted that nine out of ten of the complaints which shoe merchants receive arise from the fact that customers have purchased shoes that are too short for them, and breaks have occurred in the leather. Most of these complaints, he added, come from women, who buy shoes much too small for them.

A. C. McGowin, of Philadelphia, who is manager of the shoe department in the Wanamaker stores, told of the operation of the system of commissions to salesmen in those establishments.

"We have used the commission plan five years and I indorse it heartily," he said. "In general, my practice is to give a commission of five per cent. on kidskin shoes, four per cent. on calfskin and three per cent. on patent leathers. Salesmanship consists in selling to the customer what he should have, not necessarily what he wants. When the salesman knows one article is better than another he should try to convince him of it.

What Will Be the Future of the Small Dealer?

He Is Incorporating Method With His Business, Showing the Customer Real Service and Getting After New Trade His Outlook and Prospects Are Bright—Coming to His Own

By E. ST. ELMO LEWIS

Ever been to the movies? Do you remember one picture where you way off in the distance you could see a tiny moving speck? Nearer and nearer it came; it continued to grow larger and larger; now you could make it out, it's man on a horse, he is rushing toward the camera; he grows bigger until he reins up in front of you, full size.

That's just like the small dealer to-day. We see him now through the convex glass, he looks small and harmless, incapable, but take it from me, twenty-five years hence—maybe before—the small dealer will come into his own. He will be the king pin of the business world. He will be a business specialist.

There is a growing sentiment in favor of the specialty shop. The big manufacturer recognizes, or at least he will recognize, small retailers as his barometer of stability. And is not the small dealer truly the one who keeps the manufacturers' machinery turning? Does not the output of the factory vary directly with the business of the retailer?

We are going to come back to the small dealer who is a specialist in his line, who is an expert in things relating to his business. He will be well posted in advertising, window trimming, in store arrangement, in stock keeping, cost keeping, in order system, etc. The small dealer hasn't had the chance. I believe he wants the chance to better his conditions. The present advantage of the department store is that in our present state of civilization in business we have just reached the point where a comparatively few people have the advantage of capital and relatively efficient systems of bookkeeping, cost keeping, selling experience, etc.

The department store is managed by a man who is trained in modern methods, and so the business grows and attains great proportions.

Walk Side by Side with Big Fellow

But, what's going to happen when some of this same valuable information has sifted through so that all the little business men have good systems, have proper training in their particular line? That little man will walk side by side with the big fellow.

"Why?" You may ask.

Because the big store is fundamentally inefficient in this: that the actual selling for which the store exists is done by authority relayed and relayed from the general manager down to Fluffy Ruffles, the \$5.00 a week sales girl, to such an extent that these sales people who come in contact with the customer lack the proper interest in the business. They are not proficient. They are not expert. They do not, they cannot reflect the personal pride, the personal instinct that the proprietor takes in his business.

The Unit as Factor in Business

Business is going to be transacted in more equal units. Everything is favorable toward such a condition. The manufacturer wants it. He hasn't said it in so many words, but here:—would not the manufacturer be better off with 40,000 retailers doing business with him, than 4,000, even if the 40,000 took no more goods than the 4,000? He would, because if his list is limited to the 4,000, his customers have a monopoly of purchasing power through which the manufacturer must take the price that is offered. On the other hand with 40,000 retailers on his books, the manufacturer has an opportunity to regulate his price by his consumer demand.

Stand on two feet Mr. Small Dealer! Throw out your

chest. Without you the wheels of business would cease to turn. Close your eyes and ears to the hullabaloo your cut-price competitor on Main Street is making. His sun is setting, yours has yet to rise. Incorporate method into your business. Show your customer real service. Get after new trade. This is an era of progress. How much have you made?

The future for the small dealer is so bright, it is dazzling. Will he take advantage of the many opportunities offered to him to change his position from the lower to the upper level?

I wonder if he will!

New Manager for Victoria Store

Charles L. Griffin, who was recently appointed manager of the Victoria Shoe Store of the C. E. McKeen Shoe Stores Company, first started in the shoe trade in 1896. He was born and brought up in Glastonbury, Somerset, England, one of the pre-historic towns in that land. Mr. Griffin's

first position was with Messrs. Edgehill & Son, where he remained for three years, receiving a thorough training, after which he took charge of the footwear department in a departmental store in Weinborne, Dorset. In 1902 he opened the most up-to-date shoe store for A. E. Jones, in the city of Newport, and three years later, took charge of one of J. Bishop & Sons' stores in Southampton. Hearing so much about Canada, Mr. Griffin decided to try his luck in the Dominion, and arrived in Winnipeg seven years ago. His first situation was with the Hudson Bay Company, managing their shoe department in Edmonton, but owing to ill health, he came to Victoria in 1911, being with David Spencer & Co., for two years. He has been with the C. E. McKeen Shoe Stores Company about eight months and a few weeks ago, was appointed manager of a new branch, which was opened in Victoria, this shop being one of the finest, best laid out, and admirably appointed in the west.

Practical Pointers on Good Show Card Writing

First Lessons for Beginners—Practically No Expense Need Be Incurred—Practice! Practice! Practice! This Alone in Show Card Writing Makes Perfect—Card Writing May Be Learned in the Smallest Store

By R. T. D. EDWARDS, with the Robert Simpson Co., Toronto

Did you ever stop to think how much you have advanced within the past year? How much have you really learned, so that you will be financially better in the future? If you have not thought this matter over, it is time you did, before you get to the age where it is hard to learn. Many clerks are content to go along in the same rut, and not think any further than the present, when they should be doing something to raise themselves higher up in the business world. Many hours are spent in idleness or pleasure seeking, which could be profitably spent in educating oneself with the object of bettering one's position. With the number of night schools and correspondence schools, one has plenty of opportunity of study, and still keep up the regular work. But necessarily, this means an outlay of money, and one of limited means very often cannot afford even the easy terms offered by them.

Card writing may be learned and made use of in the smallest of stores. If you can make a fairly respectable card, you are going to be the man who has a preference, when the time comes for the staff to be cut down, or if you are looking for a position, card writing ability will aid in securing it.

Beginning this month, there will be a series of articles on the first stages of card writing. Simplicity is the main object, so that even one to whom card writing is totally unfamiliar, may learn to write a respectable card within a year's time, if he will start with the determination to master the work. The cost of these lessons is almost nothing, for there is really no need of a lot of unnecessary tools for the beginner who works in a small store. Cards with endless scroll work and an unnecessary amount of coloring are the kind to avoid. The majority of beginners have a tendency to make fancy cards the first thing, but as time goes on, the mistake in this is seen, and then there is a return to the desire for a less gaudy class of work. So to save months or years

pen work, can be secured at the stationers'. For cardboard, use a good lithograph blank. This may be secured from the same place as the ink, in sheets, 22 by 28 inches. These cut up economically by cutting a sheet in half; then in quarters, eights, and so on. The work table should be placed in a good day light. Use a table with back about four inches

higher than the front and place it so that the light comes in from the left side. This will keep the shadow of your right hand off your work.

The figures and accessories demonstrated this month are made by the best method possible for beginners. The tool mainly used is a good heavy writing pen, with an ink retainer attached. This pen must be of good pliable steel, but it must go back into its place after every stroke. The reason that outlining with the pen is taught to the beginner is that it is the tool he has been used to at school, at business, or at home, while a brush is entirely foreign to him. First of all, one must get used to the following of the figure before there is need to worry about the manipulation of a brush. The figures are given at first and if these are mastered in a month, as much has been done as could be expected. The alphabet will follow in plenty of time. Perfect figures first and then it will be easy to make ordinary price cards.

Ask your employer to allow you to do all the store work and it will be found by so doing, one will get along twice as fast as if work were practised only in spare moments. Begin practice with the lines and curves shown in Fig. 4. Each one of these represents a certain part of a figure and the more they are made, the easier it will be to form the figures themselves. Draw each stroke in the direction the arrows are pointing and always work from left to right. This will prevent any smudge of the work already done. Figure No. 3 shows the formation of many accessories used in ordinary card writing. Hold the pen the same as an ordinary pencil, and work with an arm motion. Continual use of the fingers in making the stroke without the arm movement will cause them to become cramped. Never use ruler or compass in forming the figures, as this will only serve as a set back. It must not be expected that a perfect figure will be formed the first time. It will take a long time to become proficient enough to form a good figure perfectly. But always bear in mind that practice is nine-tenths of the battle. Figure No. 5 shows a few ordinary plain price cards, with this pen outline used, filled in afterwards with an ordinary camel hair brush. The card illustrated in this column gives ideas which can be used by more advanced writers.

of experience, it is best to benefit by the experiences of those who made the same mistake (like the writer) and start in by being prepared to make a simple letter show card.

To begin practice, the only tools necessary are a few good pen points—the stub is the best—one brush for filling in purposes, and a good ruler about two feet long. Other tools can be added as the work goes on. A good black show card paint for brush work and a good carbon black ink for

A Modern Shoe House Embodying Many New Ideas

How Chatham Merchant Has Both Pleasing and Practical Arrangements—Single Shelf System, Indirect Lighting, Basement for Heavy Traveling Goods and Office in Touch With Every Department of the Store

A year ago the shoe store of Geo. W. Cowan, Chatham, Ont., who has been in the retail footwear business since 1887, was destroyed by fire. Today, Mr. Cowan is doing business on the same site in one of the finest and most superbly appointed retail establishments in Canada. Some months ago in the *SHOE AND LEATHER JOURNAL* an extended reference was made to the palatial new home of this widely known Chatham dealer.

In this issue is presented illustrations of the magnificent front of his establishment and also the interior. The front (which was taken with a Christmas shoe display), is 13 feet in depth from the storm front to the entrance door. The window base is of white marble, the windows being of Kawneer construction. The window flooring is of white tile and the flooring of the entrance approach is of terrazzo work, with the name "Cowan's" inlaid. The woodwork throughout the store is of mahogany and the windows are fitted with plate glass shelves, while the back is of plate glass, thus affording a clear light into the shop. The window on the ladies' side had cerise silk velvet drapes, with yellow and white chrysanthemums, American beauty roses, and poinsettias. New goods in the way of ladies' stylish shoes and dainty Christmas slippers, along with other seasonable lines, were displayed, while skins in white, tan and other colors were exhibited. The men's window was also equally attractive. On the upper shelf of each window there was arrayed a splendid assortment of traveling goods, such as club bags, suit cases, grips, etc.. Mr. Cowan has always specialized in a strong traveling goods department. It will be noticed that the space on top of the ledge on either side of the store

is used to admirable advantage in displaying all kinds of sojourning requisites.

The interior view, looking toward the back of the store, reveals what a really handsome, well-balanced and cleverly-designed place it is. The single shelf cartoon system prevails throughout, the fittings being of mahogany, with a mahogany beam and panel ceiling. Each carton is white, with a uniform monogram label. There are four wall cases in the store—two on each side, which are brilliantly illuminated with electric lights. The lighting fixtures are of the indirect type, being in series and form one of the many pleasing features. At the front of the store is an artistic plate glass show case, with mirror at the back, which was made especially to fill the place it occupies. The floors are of hardwood and the heating arrangements are of steam. The basement is also devoted to the selling of rubbers and some heavy lines of footwear. Here, trunks are also kept and handled to good advantage.

Mr. Cowan conducts an exclusive repair department, and finds that it pays him well. His private office is at the rear of the store and is nicely furnished and connected with electric buttons to every department. The chairs, desks and counters, all harmonize with the mahogany fittings of the store proper, and no detail has been neglected to give balance and effect to every part of the establishment. Mr. Cowan's new business home is characterized by taste, good judgment and simple, practical ideas throughout. He is a public spirited and progressive business man, who believes in taking an active part in the affairs of the "Maple City." For four years he was a member of the city council, and in 1905,

THE NEAT AND WELL DESIGNED INTERIOR OF THE COWAN SHOE STORE, CHATHAM, ONT.

THE ARTISTIC AND IMPOSING FRONT OF THE COWAN SHOE STORE, CHATHAM, ONT.

served as mayor. He has again returned to the civic arena, being, as mentioned in the last edition of the *SHOE AND LEATHER JOURNAL*, chosen as an alderman, and in the board of trade and other civic bodies, he has also evinced a lively concern. He has certainly done his share to add to the imposing character of the business places of Chatham, by erecting one of the most inviting and well equipped shoe stores to be found anywhere.

Examine Yourself, Mr. Retailer

What do you know about your own store? Do you come pretty near knowing the "ifs" and "whys" of every cent—coming and going? How about your expense account? Is there a leak there? Was there an overcharge on that last bunch of cases? Were they routed the cheapest way? Were the cases checked off—or just taken for granted? asks Frank N. Terhune in the *Boot and Shoe Recorder*.

Did the goods come in O. K.? Have you a stock book to enter them in? Do you have these new goods tagged off or just put into stock any old way? Have you the right men looking after their respective stocks? Perhaps the individual in the men's department has a special knack with the children's department.

Do you have your inside fixtures polished and cleaned up as well as those in your windows? Do your chairs glisten the same way?

Who speaks to your customer first when she enters the door? The errand boy, the new, inexperienced salesman, or are you or your head man right on the job?

Is your customer made to feel that she is in the right store? Did you assign the right salesman to wait upon her? Has she bought more than one pair of shoes—the pair she intended to buy, or did your salesman show her that it was absolutely necessary nowadays to have at least two pairs? Perhaps she intended to buy a pair of rubbers, but has forgotten them—did she get them?

Do you know who she was—her address? Did she like the way the new salesman pestered her to death with findings?

Have you any reason to think that she will come again? What makes you think she will? Do you think she was really pleased when she went out? Did you make a note to send her your new catalogue showing a marked page illustrating that new last she inquired about?

Did you notice her glancing at your windows as she departed? Why not? Are your lights in such a position that your windows are full of shadows?

Does every shoe stand out, show its beauty in contrast to its neighbors? Are your displays changed every week? Do you trim your windows in time with national or local holidays and events? Is your name lettered on the windows, or do your customers nearly break their necks trying to make out who runs the place?

What are your profits, or are you on "the make?" Do you figure your cost of doing business allowing for every possible expense?

Do you then take this cost of doing business and add to it what you consider a safe and sane profit, and mark your merchandise accordingly? Or do you just meekly put in the price you think you might get and let these goods remain on your shelves?

Does your competitor do this, or does he have the better looking store, the best class of trade, the most business, and the biggest bank account?

Are you satisfied?

Success Involves Sacrifice

Every retail shoe salesman possessing the right kind of ambition wishes some day to be the owner of a nice, prosperous shoe store. And yet so many of us simply drift—we're going to make a start in the right direction some day, but we don't wish to make that start until tomorrow. Success in any form, true success, is brought about by sacrifices, sacrifices of time, pleasure and money. And the easy path is so pleasant, so enticing, that the desire for more responsible things never crystallizes into anything more tangible than superficial plans. So, why wouldn't it be a good plan for all of us who have thought about this to make a decision today, right now.

The new plant of the Sovereign Mitt, Glove and Robe Company at Delhi, Ont., to replace the one destroyed by fire last April, is now completed. The new plant is 100 x 33 feet, three stories high and is double the size of the old one. The company have been operating in temporary quarters since the fire.

How He Nearly Lost His First Job

Because he did not get spot cash for a leather order which he once took from the late Timothy Eaton, of Toronto, founder of the great departmental store, Fred Jackson, a successful shoe retailer in Clinton, who was recently

elected Mayor of that town, nearly lost the first job he ever held. That was a good many years ago, but the incident is recalled to-day by Mr. Jackson with a good deal of interest. It happened in this way. After starting at the shoe bench with his father, who began custom making in 1854 in that town, Fred came to Toronto in 1877 to secure employment. He got it with J. H. McLean & Co., at 32 Yonge street, on the third floor of Daniel McLean's leather warehouse, which business was a development of the latter's interest in the failure of John Evans' shoe factory. After three days' instruction from Bob Ferguson, his predecessor, the subject of this reference was left in charge of the stock and sample room, a green boy at the time. After becoming familiar with the stock and routine of work, there were times when he did not have enough to do. He used to go down to the leather floor and assist Charlie Waldron (now with Beal Bros.), and after a time he thought he would try his hand in "drumming up" some outside trade. He put up a couple of cases of samples, started out and secured a number of orders, among them being one from the late Timothy Eaton. When he turned in his records D. McLean gave him a severe reprimand for not getting the cash with the Eaton order. He, however, accepted it, but warned the budding traveler that he must get the money on the spot for any further business from Mr. Eaton.

About a year later Fred Jackson went with Richard Smardon, at 45 Yonge street, under the late John Hally, to better his wages. The late A. Leslie was city salesman and Charlie Cooper covered Western Ontario. After the failure of the firm Mr. Jackson took a position with W. Damer & Son to look after city trade, while W. Damer, sr., was busy with some seamless patterns with which he thought he was going to revolutionize the shoe manufacturing business. During the time that he was with this house Mr. Jackson was sent on a sorting expedition one cold day in December, just a few days before Christmas. He did not meet with any great success and, if it had not been for the kindness of John Agnew, of Brantford, and the late Mr. Roos, of

Galt, would have had a sorry report to present but, as it was, he nicely paid expenses on the trip. His next employment was with Kirkendall, Jones & Co., of Omaha, Neb., and Columbus, Ohio. Mr. Jackson's wife died in 1895, leaving him with a three-year-old son and he gave up his position and returned to Clinton to raise his boy. He entered into partnership with W. Jackson under the style of Jackson & Jackson and, after three years, started his present business in December, 1899. A few years ago he bought out Taylor & Sons in Clinton and has worked up a fine business in the retail shoe line. He gained his first municipal experience as a member of the Clinton council in 1912, being chairman of the finance committee. The next year he was defeated but he came back a winner in 1914 as Mayor and will doubtless handle the reins of office to the entire satisfaction of the people who have given him their confidence.

Knows All About Birds and Shoes

After serving four years in the city council and being chairman of several important committees, the friends of W. D. Hobson, shoe retailer, of Woodstock, Ont., thought it was about time he took a step higher in the civic service and so they nominated him for Mayor with the result that he was successful at the polls by a good majority. A genial and likable citizen, independent in his views, Mayor Hobson will doubtless fill his new position with credit to himself and honor to Woodstock. He was born in Hamilton, but at an early age removed to Oxford county, going to school part of the time and getting acquainted with the birds, fields and flowers and doing odd chores around the farm. He afterwards went to Stratford, but becoming possessed of wanderlust, he traveled over a great deal of North America studying human nature, mining problems and acquiring a rare experience. The result is that he can relate many interesting anecdotes and is known over Western Ontario as a great lover of plant and bird life. He has made a hobby of ornithology and has frequently lectured on this subject before church and lodge organizations. Nineteen

years ago he embarked in the shoe business in Woodstock, where he has remained ever since, with occasional trips into the surrounding country in his automobile. He has met with a goodly measure of success in the shoe line and one of his first acts after election was to notify his aged mother in Stratford by telephone that he had been made Mayor.

JOHN F. CLARK, PRESIDENT

JAMES F. CLARK, TREASURER

New Shoe Factory Starts Operations in St. Stephen, N.B.

The progressive border town of St. Stephen, N.B., which is at the head of navigation on the St. Croix River, and is one of the prettiest communities in the Maritime Provinces, will shortly boast of a shoe factory in full operation. Clark Bros., Limited, are the men behind the enterprise. The members of this firm are former residents of St. Stephen, who have had many years practical experience in leading centres of the United States, and are now returning to their native town to engage in business. A new factory, 152 feet long by 50 wide, three storeys high, well lighted and well built, with every modern convenience and facility, has been erected by the municipality of St. Stephen and leased to Clark Bros. for a term of years, the firm paying the town seven per cent. interest on the cost of the splendidly equipped structure. Women's high-grade McKay shoes will be the specialty of the firm, and the ultimate output, it is expected, will be over 1,000 pairs per day. Of course, this number will not be reached for a while, but as all the members are thoroughly practical and have exceptional insight into the business, there is little doubt about the future of the undertaking. John F. Clark is president of the company, James F. Clark, his brother, is treasurer; W. E. Clark, is vice president, and H. W. Smith, of St. Stephen, is secretary. The United Shoe Machinery Co. is installing the latest apparatus in the building, which is steam heated. The equipment will be electrically driven and it is expected that actual shoemaking operations will begin about February 1st. The company contemplate making exclusively for the jobbing trade, and during the past few days Messrs. John F. and James F. Clark have visited Quebec, Montreal, Toronto and other cities on business, where they have been warmly received by the most prominent wholesalers. All the brothers have a wide connection with the shoe trade in every branch and bring to bear upon their new proposition a record of success gained in Calais, Maine and Worcester, Mass., in the Rice & Hutchins factories at Marlboro, Mass.; the W. L. Douglas Shoe Co., at Brockton; the Chas. A. Eaton Co., Brockton; Common-

wealth Shoe & Leather Co., at Whitman, Mass., and Gardiner, Me. John F. Clark then went south, equipping and starting the men's high grade welt factory for the Craddock-Terry Co., at Lynchburg, Va., later becoming general superintendent of the various plants of the enterprising concern. James F. Clark was superintendent of the factory making women's high grade welts and McKays. Both brothers have held other important positions, such as foremen in various departments, including welts and McKays, in the factories already spoken of. They remained in Lynchburg several years and are highly spoken of by the Craddock-Ferry Co.

From the pulling of the tacks to placing the finished shoe in the carton, the Messrs. Clark are, as already stated, conversant with every part of the procedure. They will give each department of the factory their closest supervision, and believe that there will be a wide market for and appreciation of their lines of goods. John F. Clark will have personal supervision of the plant, while the sales end will be looked after by James F. Clark. All three brothers are upright, earnest, hard-working citizens, and should make a splendid success of their enterprise, as they have come back home fully impressed with the splendid progress and industrial expansion of Canada during the last few years.

HELPFUL AND INTERESTING

Kindly find enclosed the sum of one dollar for Shoe and Leather Journal. Have found in perusing the Journal that it contains some very interesting and helpful items and I would not hesitate to recommend it to any one interested in the shoe business.

Yours truly,
Kingston, Ont. W. H. MACK, Jr.

A Leather Man of Public Spirit

Going through the chair a second time is what Louis J. Breithaupt, President of the Berlin Board of Trade, is doing at the present time. He was one of the founders of that influential body and its first vice-president. The next year he was made president, holding office at that time for several years. In 1913 he was again made chief presiding officer, and at the annual election recently was continued at the head of the board for another term, being the unanimous choice. All his life Mr. Breithaupt has been an enthusiastic resident of Berlin and in his annual address to the Board took occasion to emphasize some facts of interest. Among other things he pointed out that there had been no failures in that city among its business men and one hundred and thirty factories, among which are now thirteen footwear factories, including eight leather, two felt and three rubber, twenty large furniture factories, several tanneries, button concerns, shirt and collar industries and others too numerous to mention. Three new industries were secured during the past year and there were no strikes or lockouts, which is a splendid industrial record. Mr. Breithaupt predicted that the population would, by the end of 1914, reach twenty thousand, which is a marked growth. The large leather industry, at the head of which is Mr. Breithaupt, was founded in 1857 by his father the late Louis Breithaupt, who died in 1880, after which the business was carried on for ten years by the subject of this sketch, his brother W. H. Breithaupt and their mother, as executors and executrix of the Breithaupt estate. In 1890 the present joint stock concern was formed, being composed of members of the family only, with L. J. Breithaupt as president and his brother, J. C. Breithaupt, as secretary. The founder of the business owned and operated but one plant in Berlin which, since his death, has been twice enlarged and, when rebuilt after the recent fire, will be further enlarged in both accommodation and capacity to meet the demand for Eagle Brand sole stock. The company has also a cut sole factory in Berlin, for turning out cut soles counters, etc. The Penetang plant was built twenty-one years ago, with an

original capacity of one hundred sides, but it has been increased from time to time, until the capacity is now eight hundred sides. The product of the Hastings Tanning Co., at Hastings, Ont., which is a subsidiary company, is sold through the Breithaupt Company. The output there is

now chiefly oak sole leather in sides, backs and bends, while union oak harness leather is also produced in considerable quantities. It may be mentioned L. J. Breithaupt served several years as alderman in Berlin, was mayor of the city many years ago and was one of the very first subscribers of the SHOE AND LEATHER JOURNAL.

It Is Now Alderman Kelly

Edward J. Kelly, of Brockville, Ont., was recently elected a member of the city council of that place. He made his advent in the municipal arena by contesting the North

Ward for that honor against three strong men and his popularity was shown by the ratepayers returning him at the head of the poll, defeating his nearest opponent by 73 votes. The campaign proved to be one of the most strenuous Brockville has passed through in many years, due in a large measure to the Local Option fight. Mr. Kelly was persuaded only at the last minute by his friends to enter the contest. He prosecuted a whirlwind campaign and came out with flying colors.

The new alderman is one of the Island City's most respected and successful young merchants—Brockville boy bred and born, who has gained a top place through pluck and enterprise, backed by much natural ability. In short, he is a self-made man and his large and flourishing boot and shoe store in the centre of Brockville's main thoroughfare is a tribute to his business ability. Since boyhood Mr. Kelly has been identified with the retail trade. Twenty-five years ago, when a lad of thirteen, he became parcel boy in the store of the late George McLean. After three years he joined the staff of Mowat & Johnston, remaining with that firm for two years. Then Mr. Kelly took the position of salesman for D. W. Downey, with whom he remained for sixteen years, the last seven of which he was buyer for the shoe department. In August of 1909 Ald. Kelly decided to branch out for himself, and from the moment the doors were thrown open to the public the patronage has steadily increased.

His business training will stand him well in the larger sphere of municipal usefulness and he is counted upon to more than make good. At the inaugural meeting of the council he was given a place on several committees—the board of works and the chairmanship of the police committee.

Montreal Association Holds "Get-Together" Dinner

Function of the Superintendents and Foremen was Very Pleasant—Bringing the Members in Contact in a Social Way—Series of Entertainments Planned for Coming Year—A Jolly Smoker.

Everyone knows, when he accepts an invitation to any entertainment being put on by the Montreal branch, superintendents' and foremen's association, that he is sure of an enjoyable time. President Leonard presided.

Those who attended the annual "get-together" dinner of the shoemen, which was held at the Commercial Travelers' headquarters in the

Read Building, Montreal, on January 14, found that this occasion was no exception to the rule, as it proved a "get-together" affair in every way.

It might be said at the beginning, that although the dinner was expected to be a success, in point of numbers, the attendance was the source of a pleasant "shock" to both members and the executive committee, nearly ninety guests taking advantage of what they felt was a chance of spending a pleasant time.

Eight-thirty was the hour given for the start, and by that time, most of the Association members were on hand, and ready to "wade in." After a short preliminary meeting dinner was served, and for the next half hour or so, it was a question with the club waiters as to whether they had ever before come across a crowd with such an unlimited faculty for the "stowing away" of eatables. After dinner, speaking was not indulged in outside of a few words of welcome from E. F. Leonard, president of the association, who introduced F. W. Knowlton, of the United Shoe Machinery Company of Canada.

Mr. Knowlton said he simply wished to thank the club officers for their kindness in inviting him to be present and said that it was with regret he must leave immediately after dinner on account of a later engagement. Mr. Knowlton resumed by saying that he was delighted at the large attendance as well as the truly "get-together" spirit which was

being displayed by those present. "The executive of this association," he said, "have, I believe, made arrangements for several entertainments of various kinds to be held throughout the year. I was very glad to hear of this, as I think it will serve to bring members into more frequent communication with each other in a social way, and it is to the welfare of the superintendents and foremen to see that they became mutually friendly, ensuring co-operation as well as opportunities of exchanging views and opinions."

A smoker was held after dinner, during which the assembly was entertained in various ways. Arthur Ware of the Ware Co., gave an exhibition of card handling that kept the boys guessing. His paste board manipulating was really very good, and much appreciated. Billy Armstrong, of the M. A. A., had his "pets" on hand and clever exhibitions were given of wrestling and boxing. Musical turns were also provided by different members. One of the big hits of the evening was the Chinese song along with appropriate music, rendered by Messrs. Richie and Richards, U. S. M. Co. Goodyear agents. This brought down the house, although no one, outside of the two singers themselves, joined in the chorus.

Col. Whitley, of F. Whitley & Co., Montreal, who addressed the assemblage, before breaking up, referred in high terms to the association. He also commented on the future of the shoe industry in Canada, which he believed was a very promising one. At present it is in its infancy, but already had acquired a high standing and could be expected to advance by leaps and bounds. Col. Whitley as one would infer by his title, is a military man, having taken an active part in the Boer war. He referred to the part played in this war by Canadians, in a manner that captured the interest of his audience. His speech was received with much applause, and, he terminated it by expressing his personal friendship for the superintendents and foremen's association. If he

GATHERING OF THE SUPERINTENDENTS AND FOREMEN AT DINNER IN MONTREAL ON JANUARY 14

It Is Now Mayor Wagner

Among the shoemen elected to a high office during the recent municipal campaign was F. L. Wagner, of Aylmer, Ont., who won a signal victory at the polls, defeating his opponent by 154 majority. Mr. Wagner has lived all his life in Aylmer and vicinity and was engaged in the retail business for fourteen years previous to becoming identified with the Aylmer Shoe Co., of which he is secretary-treasurer.

He is devoting all his attention to the interests of the company which manufacture men's welt shoes exclusively and have built up an excellent trade.

Favors Corrugated Packing Cases

In reference to the habit of stealing shoes from cases in transit, since attention has been directed to this matter in the *SHOE AND LEATHER JOURNAL* considerable interest has been caused among the trade. In a recent issue of the *SHOE AND LEATHER JOURNAL* one retailer stated that he would not allow any goods to come to him by freight in corrugated packing cases. He intimated that it might be all right to ship shoes by express in this way, but not by freight. This has aroused the concern of an eastern manufacturer. In regard to corrugated packing cases which are now manufactured and used so generally, this firm say: "As manufacturers we have been using these boxes for over a year now and in that time have received complaint from only two different parties. One of these, we think, was justified and in the other we feel confident that the goods were shipped and were received all right, but that a pair happened to be mislaid after opening. Our experience with corrugated receptacles tells quite a different story from when we were using wooden boxes altogether. We then were continually having complaints and requests for allowance on shortages in shoes. Another thing in favor of the corrugated box is that it is dustproof, and the goods will open up clean and not covered with grime or dirt. Especially is this true in the summer time, when there is such a tremendous amount of dust flying and created by the cars. We consider that packing in corrugated boxes at the present time possesses many advantages and is the safest way in which to ship shoes. Of course if you take very large quantities, it is impossible to pack them

in this manner, but in dozen or two dozen lots, it is perfectly safe to put them in such containers. It is impossible for corrugated boxes to be opened on the railways without showing evidence of being tampered with and if they receive anything like half decent treatment by the transportation companies, they will arrive in good condition. With careless handling, no matter how strong a box is, it will be broken. We have given you our experience in this matter and would like to hear from others through the columns of the *SHOE AND LEATHER JOURNAL*."

Getting Ready For Rubber Selling

The price list for rubber footwear for the coming year has been issued in the United States, and on the whole, shows a decrease of between six and seven per cent. on last year's quotation. The rubber selling season in Canada starts on March 1st next, and it is probable there will be a slight reduction in the quotations at present existing. Just what the decrease will be it is impossible as yet, to state. While prices of raw rubber have been low, the manufacturers point out that the cost of cottons and other materials have been high and that operating and selling expenses are annually on the increase. While some benefit may be reaped by them at one end of the business, there are counterbalancing considerations which tend to keep up prices pretty near to the present schedule. It is not anticipated that any new features will be introduced in the selling this year, and the outlook is very good.

Doubled His Business Last Year

The Sicilia Shoe Store, 1053 St. James Street, Montreal, of which C. Sofio is the proprietor, had a most successful year, the volume of business being practically double that done during 1912. Mr. Sofio put in an attractive Christmas window to which he devotes special attention. The bottom was covered with white cotton sprinkled over with diamond dust. Crepe paper was suspended from the corners of the windows and also from the middle. There was a white curtain in the background covered with gold thread and a real slide curtain, which extended half ways as shown in the accompanying cut. In each window a nice variety of shoes was displayed on suitable stands, along with Christ-

mas greeting cards, and also a pleasing calendar issued by the firm. Mr. Sofio, who is a regular reader of the *SHOE AND LEATHER JOURNAL*, says that he receives valuable pointers from its pages, many of which he has put to practical and profitable use.

Well Balanced Holiday Display Where Everything in the Window is on Level With the Eye

The Brockton Shoe Co., 440 St. Catherine street west, Montreal, made two very catchy as well as artistic Christmas displays, one of which is shown here. The outstanding feature of this display is its perfectly balanced appearance. Every thing in the window has been placed with an eye toward this end. A fairly large showing of footwear was made, but the trimmer did not make the usual mistake which many window dressers do, of overcrowding his show space.

The display was made under the supervision of T. R. Trudeau, manager of the store. Cotton batting and crystal were used to secure a winter effect. This combination also acted as a covering and added to the wintry appearance. A large square pillar draped with cotton batting which in its turn was partially covered with foliage, was placed in the background. A smaller one was also set in one end of the window. Holly, evergreen and other foliage appropriate to the season, were liberally used throughout the showing. Three large Christmas bells were hung immediately to the left over the large centre pillar. Gold and silver cords stretched from the bells to the front of the display made a very creditable appearance. The shelf arrangement also helped in making the window a seller.

Stock was displayed artistically. A price tag was carried on each shoe. The Brockton Shoe Co. handle only a four dollar shoe. In this instance, they took advantage

of an opportunity of impressing the fact of their shoe being that figure—"no more—no less." A neat well finished show card was placed well to the fore of the display, "wishing you the compliments of the season."

THE ETERNALLY BUSY MAN

All of us have seen the eternally busy man who gets nowhere. He is just like a horse on a treadmill—he never moves a bit. The trouble with that kind of a man is that just about ninety per cent. of his efforts go into waste motions. He is always on the road but never arrives.

Ask that man to do something and he is too busy to do it at present, but will attend to it as soon as he gets the chance—and he never gets the chance.

That kind of a man is letting his work drive him instead of driving his work. The thing for him to do is to forget his busy-ness, figure out what it is he really wants to accomplish; then do that thing as quietly as possible. And lo! the eternally busy man won't be half so busy and will accomplish actually more.

—Everitt R. Roeder.

Buying Reliable Goods and Giving People Full Value

One of the most prosperous merchants of the Prairie Province of Alberta is Jacob Miller, of Stony Plain, who has been in business for ten years, seven years with two of his brothers and the last three alone. They started in with the small capital of seven hundred and fifty dollars in a farming settlement and were very successful. In 1906, when the Grand Trunk Pacific was built through Stony Plain, the town started to grow and the firm shifted its location to the fine store in which business is done at the present time. Mr. Miller carries a general line of merchandise of about thirty thousand dollars and his hobby is shoes and clothing, of which he practically has the whole trade of the town. Mr. Miller's main store is 26 x 60 feet, two storeys high, and he uses both flats. His shoe space is 12 x 24 and his men's furnishings 8 x 60 feet. Mr. Miller was brought up on the farm and had never worked in a store. He started without any experience but a friend in Edmonton, who had a fine insight into general trade matters, used to help him out in purchases. Mr. Miller has always made it a practice to engage the most experienced clerks that he could get hold of and in this way has been materially aided. He says that he is now getting so that he knows a good deal himself about the various lines that he handles. He attributes his success in mercantile life, not only to the fact that he has had efficient help, but his aim has always been to sell good articles in every line, made by reliable houses. This plan, he says, is a fine trade holder and builder up of business. Mr. Miller carries boots and shoes, groceries, men's

furnishings and dry goods and his establishment is in every way a credit to the town of Stony Plain, which is growing nicely.

Be Student in Selling Art

When you approach your customers, how do you go about it? Have you a pleasant smile for each one, a sleeveful of arguments, and a ready reply to each objection?

If you haven't you should have. That's just what you need. You'll find the game much easier if you have.

Next time you have a few spare moments, pick out a certain line of shoes, go over the sizes and get them fixed in your mind. Take one shoe, pick out all the good features, and enthuse over them, then pick out the weak points, if any, and think up some selling arguments to offset them or make these objectionable features selling points.

To your next customer show this line, and use the points of your study. You'll be surprised how easy it is to make the sale. After you try this on all the lines in stock, the boss can't help but notice your increased sales, and will be patting you on the back and setting the rest of the boys to watching your methods.

Just a little effort on your part in this way will increase your efficiency, and incidentally your salary. Turn your idle moments to ones of study—be a student of the game—then some day you'll find yourself in the boss' shoes or in those of one of his competitors.

The Elementary Principles of Retail Shoe Advertising

The First of a Series of Practical Talks Showing How the Footwear Retailer Can Advertise Successfully—The Use of the Various Types, Borders, and Rules Carefully Explained—How to Maintain Proper Balance and Preserve Harmony When Advertising

By R. K. BROWN

"Why should I advertise?"

"How can I advertise successfully?"

These are questions often asked by shoe retailers. The first may be answered by the statement that if the merchant does not consider it worth while to take the public into his confidence about his shoe stock and the service he can offer, he will generally receive in return just the indifference he displays towards the public.

As for the second question, it is the object of a series of monthly articles which will appear in *THE SHOE AND LEATHER JOURNAL* this year—of which this is the first—to point out

R. M. BEAL, RE-ELECTED MAYOR OF LINDSAY FOR THE FOURTH TIME AT RECENT MUNICIPAL ELECTIONS

as clearly as the limitations of space will allow, some of the main principles which underlie all successful advertising, and which, if followed carefully and persistently by the retailer will result in increased business and prestige.

All experienced advertising men, and many retailers as well, are aware that one of the important principles by which to be guided in advertising is that of proper display. While, of course, good display is not to be compared in importance with strong selling talks and bright, interesting copy, the fact remains that if the principles governing this feature of the subject are neglected, the probability is that an ad., especially if small in size, no matter how forcefully written, will be passed over hurriedly, because it does not stand out from the surrounding matter in such a way as to hold the attention until the arguments in the body of the ad. can appeal to the reason. Good display is, of course, just that contrast between the light and dark portions of an ad., or, comparatively speaking, that contrast between the ad. itself and surrounding advertising and news matter, which will cause it to at once force itself upon the reader's attention.

Every footwear retailer whether unfamiliar with the subject or not, knows that in ordinary advertising two colors

are dealt with, black and white. To secure the contrast previously spoken of as necessary to good display, these two colors should be concentrated as much as possible, not jumbled together. The heading at the top and firm-name and address at the foot constitute the heavy black portions of the ad., the white spaces the white portion, while the body matter appears a lighter black as contrasted with these two other colors. The space between the headlines—if more than one—and between the display lines at the foot, should always be less than the space between these and the body matter of the ad.

In nearly all retail ads it is much better to use a border, which serves the same purpose as the frame on a picture. A border unifies an ad., isolates it from the surrounding matter, and, if properly chosen, makes it more attractive. The size of the border will depend largely upon the size of the ad in question. For instance, in the case of a four or six inch single column ad., a six point plain rule border is quite sufficient, while for a ten inch three-column ad a ten or a twelve point border may be necessary. An illustration of the relative sizes of these borders is here given:

If a fancy border is used, it can be twice the width of a plain rule border without detracting from the "balance," or, in other words, without destroying the proportion of the various display elements. Thus, with a six inch single column ad a twelve point fancy border could be used with good results. This must be left largely to the individual judgment, as no rules applicable to every case can be laid down. However, there are two general rules which it is well to observe, but which apply more particularly to small ads. First, with any ad containing an illustration, it is generally better to use a plain rule border, second, a border, in a very small ad, especially, should seldom be run round an illustration, as it detracts from the effectiveness of the latter. Finally, it is usually best to use round-cornered borders, as the square variety will always be in the majority, and the round corners help that contrast which is the object of all good display.

The Proper Use of White Space

Another very important factor in good display is the proper use of white space. Many advertisers imagine that they are not getting value for their advertising appropriation unless all space used is covered with printer's ink. This is the worst kind of a delusion, and is responsible for a great deal of ineffective retail advertising. The value of white space in making an ad more readable lies in its liberal use in margins, in space between the display lines at top and bottom and the body matter, and between the lines of body matter itself. Whether the latter should be set solid or leaded (by setting type solid is meant getting the lines as closely together as possible; by setting it leaded, the use of more or less white space between the lines) must be left largely to the individual judgment. Body matter is very frequently set two point leaded, that is, with two points more space between the lines than when set solid. If plenty of white space is used around the body matter it is well, as a rule, to set the latter solid, or at most, two-point leaded, as too much leading of body matter will weaken the general effect, and prevent proper contrast between the body matter and the rest of the

ad. It is also likely to give the reader the impression that the advertiser has not much to say about his goods or his service.

The Type That Should Be Used

It is also well to remember that the type used in the body matter should be very much smaller than that used in the display lines. If there is much body matter, breaking it up into occasional paragraphs, as well as inserting smaller display lines wherever advisable, will help to make the ad more readable. Care should be taken, however, in this latter particular, as too much display is like too much credit, "to use it is to lose it." The legibility of the body matter is also increased if the type is set in fairly narrow measure, as it is very wearying to the eye to be forced to travel over too extended lines of small type.

Specimen Brass Rules

Below will be found examples of the styles and sizes of brass rule borders, which can be most often used by the retailer in shoe display advertising matter.

| |
|----------------------|
| HAIR LINE |
| ONE POINT |
| TWO POINT |
| THREE POINT |
| FOUR POINT |
| SIX POINT |
| EIGHT POINT |
| TEN POINT |
| TWELVE POINT |
| EIGHTEEN POINT |
| TWO POINT PARALLEL |
| THREE POINT PARALLEL |
| FOUR POINT PARALLEL |
| SIX POINT PARALLEL |

When asking for rules to be used in any of your copy be sure that the rule will not dominate the advertisement. While they are used for the purpose of attracting attention as well as separating the advertisement from the "hoi polloi," you must always bear in mind that it is really your talk to which you wish to attract attention and not the fame around it.

When using an eighteen, twelve, ten or even eight point border the best results in display are obtained by leaving a good margin of white space between the reading matter and the rule. This practically does away with the use of the heavier rules in anything less than two or three column announcements about eight to ten inches deep. In fact, it would not be found well to use twelve or eighteen point in anything but a half page advertisement. The same applies to six point parallel and rules of such weight.

The heading, whether made up of one or more lines, should not be set so large as to be glaring, as this cheapens the ad, nor so small as to lose its force. It is usually better to set the firm name and address at the foot of the ad, and in smaller type than is used in the heading. The same style of type, or a similar one, should be used for all the display lines wherever possible, as a diversity of type gives a lack of strength and attractiveness to the ad as a whole. In this particular, much retail advertising is woefully lacking. As a rule the price should be displayed.

The reader will then be able to tell from any ad, at a glance, if the foregoing principles have been followed in its composition, the article or its nature, from the heading, its price and where to get it. Any secondary display lines used in the body matter of the ad may be used to show where a new idea is to be introduced.

Use Capital Letters Sparingly

One more thing is recommended, and that is the sparing use of capital letters. When matter is set entirely in capi-

A. L. BREITHAUPT, RE-ELECTED ALDERMAN IN BERLIN AT THE RECENT MUNICIPAL ELECTIONS

tals it is harder to read than when set in capitals and smaller (lower case) letters. When this plan is followed, capitals may then be used effectively for placing emphasis on any particular word owing to their contrast with surrounding lower case letters. They are also useful when it is desirable to place the firm name and address on the same line, the former being placed in capitals, and the latter in capitals and lower case, thus affording the proper contrast between them.

This article is not intended as an exhaustive treatise on this particular subject, but merely to touch on some of the details connected therewith, so that the shoeman who may not be familiar with the science of advertising may be aided in the criticism of his own advertising display. Whenever the printer has proven his ability to display advertisements effectively, it will be more satisfactory to leave this portion of the work to him, but in any case, the merchant should know what good display consists, so that he will be able to improve any weak points in this particular phase of his own advertising. The next article in this series will deal with the subject of laying out advertisements for the printer.

STRAY SHOTS FROM "SOLOMON."

J.H.B.

The things that stay longest with us are those that smart and sting, and if we only know how to use them they may be of more use to us than honied words and soft experiences. You may learn a great

WISDOM ON TAP

deal about wisdom from others, but after all it is the "bumps" that count and the knocks in life that teach. Some of the greatest misfortunes that come to people are good fathers and kind friends. It takes a storm or two to bring out the qualities of a ship. "The rod and reproof give wisdom," is true in the other relations of life as well as in the home. It is a pity we can't take life's lessons in sunshiny nooks from books of pleasant experience, but most of us have found out that the sad confession, "I have played the fool" presages any real progress or achievement. People expect to find wisdom on tap these days in magazines and correspondence schools, and figure they can exchange nuggets of gold for copper cents. A hod carrier can learn a lot by reading about loads and movements, but his weary back and legs will teach him the art of getting the mortar to the right spot when it is wanted.

Plenty makes dainty. A horse will turn up his nose at good hay if you keep oats and chop under his nose all the time. A lot of this talk about the high cost of living, leads

back to the fact that people are not content to live on what they and their fathers once were glad to eat. Poached eggs on toast for breakfast, with eggs at five cents each are bound to tell in cost against fried potatoes and corn beet hash that was once considered a fairly good start for the day. People that got along well on pork spare ribs at four cents a pound are now grumbling at the quality of sirloin steak at thirty cents and wondering why they have trouble making ends meet. People these days are gaping at their neighbors plates instead of their own and figuring their household expenses not in their income but in what their particular set live on. "Better is a little with the fear of the Lord, than great treasure and trouble therewith." It doesn't make much difference what you have so long as you are satisfied and pay your way. Most of the trouble and failure in family as well as business life may be traced to the fact that expenditure is just a little more than income.

Don't put all your stock in your window. There are some people whose goodness is all in their faces and their religion in their nice manners. Have you the goods? That

SHOW WINDOWS

is the great question. Not what kind of a show window do you put up. At the same time lots of people make the other mistake of putting into their windows shop-worn, back-number, dust covered lines that send people across the way when they want the right stuff. There are people who actually seem to believe that goodness is somehow associated with boorishness, lugubriousness, or crawling sycophancy. There is nothing more attractive than goodness and if it is really inside a man it will show itself. It is like the smallpox, it has to come out: if it goes in on you it will kill you. Beware, though, of the "showy" man as you would the showy store. Fine shoes often cover bad corns; gay colors often hide a dirty petticoat. A man who talks much is apt to have little inside

his head. There is an ancient saw which runs like this: Drink nothing without seeing it, don't go to law if you have anything to lose, don't wade into water where you can't see bottom, don't buy a pig in a sack.

The most senseless and hurtful thing in the world is envy. It eats its way into our very vitals and spoils us for anything worth while. As an old writer quaintly puts it,

"A little wood will heat my oven. Why should I murmur because the woods are not mine?" The trouble with us is that we not only desire wood enough

for the season's needs but we want to corner the supply and sell enough to our neighbors to put aside a goodly sum in the bank. There are some people who spend more than half of their time figuring the amount of money their neighbors are making and how they do it and go to bed worrying because they have not managed to keep up with the race for gold. He is a wise man and a happy one who can look upon his neighbor's prosperity with gladness and who, when he has done his best himself is content with the reward that comes to him for an honest effort. "A sound heart is the life of the flesh; but envy the rottenness of the bones."

Some seem to imagine scolding is a habit peculiar to women. There are men naggers as much in need of the ducking stool and bridle as any woman in the seventeenth century. There are men in business

with the ratcatcher's instinct who think it part of their duty to pounce on their clerks, harass their creditors and nag their neighbors until they are known from Dan to Beersheba as confirmed scolds. And as one dog will usually start a whole neighborhood howling, so these men promote the evil habit of faultfinding until those under and about them develop the unpleasant and unfruitful trait. Get out of the habit of saying "don't." Cultivate a pleasant voice and cut out the rasp. Iron out the furrows in your forehead and you will be a better, richer and more useful man. It is an easy thing to become a scold: it is not so easy to shake the habit. Just try it, if you don't believe this.

Some people seem always to have too much to do but in most cases it is because they don't do the right thing at the right time. The world is full of mixers and muddlers.

It also has its share of those who try to side step work. These are the knaves who are such loud exponents of the doctrine that the world owes every

man a living. The best raw material the devil has in this world is the dawdler. There is less hope of him than the downright wicked who may turn from his evil ways. You might as well expect honey from a lemon or maple syrup from a hickory tree as any good from these "dolce far niente" idlers who are like Smith's mongrel which was so tired with doing nothing that he had to lean against the fence to bark. "Drowsiness shall clothe a man with rags." The man who will not work in this age, unless he has had a rich fool for a father, will have slim eating, and like the prodigal son, will soon come to his shirt and then to himself. When you find yourself dawdling, go and get some friend to give you a good swift toe under the coat-tail to get you warmed up.

The Latest News in the Shoe Store and Factory From All Over Canada

The Family Shoe Co. has started business in Winnipeg.

A. L. Dupont, of Dupont & Frere, Montreal, was in Toronto recently.

Robert Halliday has started a shoemaking business in Tofield, Alta.

The Winnipeg Tanning Co., Limited, Winnipeg, has been burned out.

John Green, shoe retailer, of Kingston, Ont., made an assignment recently.

M. Nudelman has opened a new shoe store at 317 Queen street west, Toronto.

G. J. Gauthier, shoe dealer, Metapedia, Que., recently made an assignment.

Bishop and Younghutt have started a shoemaking business in Vermillion, Alta.

Percival & Graveline, shoe manufacturers, Montreal, have recently registered.

Mr. Anderson, of the Amherst Central Shoe Co., Regina, was in Montreal recently.

Hermas Pelletier, shoe retailer, of Montreal, recently assigned to Alex. Desmarteau.

John Wilson is commencing a boot and shoe and clothing business in Edmonton.

D. J. McDermott, of the McDermott Shoe Co., Maisonneuve, was in Toronto last week.

J. McDodds, of Blyth, Ont., has opened up a shoe department in connection with his grocery.

W. E. Woelfle, of the Woelfle Shoe Company, Berlin, was in Toronto last week on business.

W. S. Wood, of W. S. Wood & Co., of St. Catharines, was in Toronto last week on business.

A. Nodwell, of Hillsburg, Ont., has sold his business to Charles Hall, who has taken possession.

Geo. A. Slater, of Geo. A. Slater, Limited, Montreal, spent a few days in New York recently.

J. A. McLaren, of McLaren & Dallas, Toronto, is in Montreal and Quebec on a business visit.

Lott & Hansman, shoe dealers, 816 College street, Toronto, have been succeeded by E. D. Lott.

E. C. Scarrow, shoe dealer, of Owen Sound, spent a few days in Toronto last week on business.

Dufresne & Locke, Maisonneuve, have recently had several new machines installed in their plant.

D. McDermott, of the McDermott Shoe Co., Montreal, was in Toronto recently calling upon the trade.

A small fire took place recently in the shoe repair shop of James Paul, Agnes street, New Wsetminster.

N. Tetrault, of the Tetrault Shoe Manufacturing Co., Montreal, was in Toronto last week on business.

W. G. Parsons, of C. Parsons & Son, Limited, wholesale leather, Toronto, is in England on a business trip.

Clarence F. Smith, of Ames-Holden-McCready, Limited, Montreal, has returned from a trip to Boston.

A. J. Oke, of C. N. Oke & Son, shoe dealers, St. Catharines, Ont., was in Toronto last week on business.

L. A. Mooar, general sales manager of the Regal Shoe Co., Boston, spent a few days in Toronto last week.

Wm. Morley, of B. F. Morley & Sons, wholesale shoes, Toronto, was in Boston recently on a business trip.

Mr. Larson, of W. A. Moyer's upstairs store, Winnipeg, is spending some time in the West with his parents.

The annual convention of the Ontario Harnessmakers' Association will be held in Berlin on February 17th

and 18th. About 200 delegates are expected. Geo. C. H. Lang, Berlin, is chairman of the local committee.

J. E. Pare, sales manager for Dufresne & Locke, Montreal, was in Toronto last week calling upon the trade.

R. J. Kidd, manager for R. Neill, shoe retailer, Peterborough, was in Toronto on business last week.

The stock of the estate of Z. Zaslavsky, boots and shoes, Winnipeg, has been sold to J. Rosenthal & Co.

W. J. Herbert, dealer in dry goods and shoes, Sault Ste. Marie, Ont., has assigned to Osler Wade, Toronto.

Harry Thompson, of the Thompson Shoe Co., Montreal, was in Boston and other American shoe centres recently.

A meeting of the creditors of F. S. Hardman, shoe retailer, Queen street east, Toronto, was held last week.

Mr. Holborn, of the Great West Felt Company, Elmira, Ont., was recently elected reeve of that enterprising village.

B. Walter Hunter, of Newmarket, Ont., was elected deputy-reeve of that town at the recent municipal elections.

John Kilgour, of the Kilgour, Rimer & Co., wholesale shoes, Winnipeg, was in Toronto this week on business.

C. P. Sheridan, of Sheridan Bros., makers of women's footwear, Haverhill, Mass., was in Toronto last week on business.

W. F. Martin, general sales manager for the Kingsbury Footwear Co., Montreal, spent a couple of days in Toronto last week.

E. J. P. Smith, of Toronto, has been appointed sales manager for Ontario for the O. B. Shoe Co., of Drummondville, Que.

Charles Robson, of the Robson Leather Co., Oshawa, Ont., leaves next week for Florida, where he will spend a few weeks.

The Independent Box Toe Co., Montreal, are installing in their plant a kiln, three horse-power boiler and truck carriage system.

Thomas Beaudry, late of the shoe department of Bryson, Graham & Co., Ottawa, is opening a new shoe store in Ottawa East.

Geo. P. Balfre, Canadian manager of the Chicago Tanning Co., Montreal, was in Chicago recently at his firm's headquarters.

R. Hard, shoe buyer, of C. W. Sherwood Co., Limited, Regina, Sask., was in Montreal and other eastern shoe centres recently.

Joseph Beaulieu & Co., shoe manufacturers, Quebec, recently suffered a loss by fire. The damage was fully covered by insurance.

The Canadian Last Block Company, Limited, Montreal, has been incorporated under a Federal charter, with a capital of \$500,000.

J. Tulley, general superintendent of the Whitman and Milford factories of the Regal Shoe Co., was in Toronto last week on business.

Percy Williams, buyer of the shoe department for the T. E. Vaustone Co., Yorkton, Sask., spent a few days in Toronto, recently.

The stock of E. A. Shee, dealer in hides and leather, Quebec, was recently damaged by fire. The loss is covered by insurance.

Harvey E. Graham, who has been spending some time at Fredericton, where several representatives of the Hartt Boot and Shoe Co. have been meeting, has returned to

Toronto. Mr. Graham, who contracted a severe cold which confined him to the house for several days, is now able to be around.

Mr. Jandorf, of Jandorf, Oxberry & Co., makers of leggings and children's barefoot sandals, New York, was in Toronto last week on business.

Mr. Prior, of Prior Bros., Portage la Prairie, was a visitor in Toronto a few days ago and called upon several members of the trade.

Percy Horsman, who is in charge of the shoe department at Clinkskills, Limited, Saskatoon, spent a few days in Toronto last month.

Bert Abernethy, of the Abernethy shoe store, Kingston, was in Toronto last week. He accompanied the Frontenac hockey team to the city.

Frank Locke, of the T. Eaton shoe department, Winnipeg, was in Toronto and other eastern centres during the past few days on business.

A. L. Johnston, manager of the Winnipeg branch, of Ames-Holden-McCready, Limited, was in Toronto and Montreal last week on business.

G. C. Yearsley, manager of the Toronto branch of the Kaufman Rubber Co., Toronto, has been spending several days in Montreal on business.

A. O. Beardmore, of the Beardmore Co., Toronto, left last week on a business trip to the Old Country and will be away for a couple of months.

Geo. J. Scott, representing P. Jacobi, shoe store supplies, Toronto, left last week on a three months' business trip through the Western Provinces.

John Hand, son of Alfred Hand, of the Ames-Holden-McCready Co., Toronto, who has been seriously ill with fever, is rapidly recovering.

Mr. McKenna, representing the E. E. Taylor Co., shoe manufacturers, of Brockton, Mass., was in Toronto recently calling upon the wholesale trade.

Mr. Bent, who was with the Moyer Shoe, Limited, Winnipeg, is now in charge of the ladies' department of the New York Shoe House in Winnipeg.

The Ideal Shoe Co., of Elmira, Ont., have installed several new machines for McKay work and will make misses' and children's, boys' and youths' shoes.

W. Mitchell, of Kincardine, who conducts a general store in that town and has a fine shoe section, was elected Mayor in the recent municipal elections.

J. J. Ambrose, who for some time past has acted as publicity manager of Geo. G. Gales & Co., Montreal, has taken a position with Maurice Wolff, Montreal.

William Ewens, shoe dealer, of Owen Sound, has moved into a new stand just across the street from his former place of business, which will give him more room.

Frank Mercer, sales manager of the Relindo Shoe Co., Toronto, who has been spending several weeks in New York, Boston and Cuba, has returned to Toronto.

W. S. Pettes, of the Thompson Shoe Co., has returned to Montreal after visiting the large western centres. Mr. Pettes was also in Boston for a few days last week.

E. L. Emerson, of the Boston Last Co., Boston, was in Richmond, Que., the Canadian headquarters of the firm, recently. Mr. Emerson also visited Montreal.

W. J. Detweiler, shoe retailer, of Sault Ste. Marie, was in Toronto and Berlin a few days ago on business, and called upon many members of the trade.

G. L. Hodgson, who has been in the shoe business in Walkerton for some years is removing to Mount Dennis, near Toronto, where he will continue business.

The Stedman Shoe Co., of Winnipeg, are making great changes in the Portage avenue store and when finished it will be one of the finest shoe houses in Canada. They will

be the first in that city to have the balcony arranged. The front will be up to the minute in every respect.

John Sinclair, of the Barrie Tanning Co., Barrie, and retiring chairman of the Tanners' Section of the Board of Trade, was in Toronto last week for a few days.

J. E. Pare, of Dufresne & Locke, Montreal, has returned from a trip to Toronto, Hamilton and London. He reports prospects of a good shoe season in that territory.

M. L. Ballard, formerly with the U. S. M. Co. of Canada, in Toronto, has taken a position in the bottoming department Ames-Holden-McCready, Limited, Montreal.

Fire broke out in the shoe repair shop of J. J. Curtis, Eagle Place, Brantford, recently. The shop was badly damaged, but the remainder of the building was saved.

The Ideal Shoe Store, 801 St. Lawrence Blvd., Montreal, have become insolvent. Assets will be sold by public auction February 3rd at Marcotte Bros., 69 St. James street.

Charles E. Fice, of Toronto, Ont., representative of J. & T. Bell, Limited, Montreal, who has been spending the past few weeks in the Old Country; is expected home this week.

Harry Dallas, jr., has joined his father, H. Dallas, who represents several Old Country footwear firms in Canada, and is in charge of the sample rooms at 23 Scott street, Toronto.

Fred C. Young, formerly a Rochester shoe manufacturer and more recently with the Buffalo Leather Co., has gone to Redcliff, Alberta, to direct the outfitting and starting of a shoe factory.

James Lowther, of Toronto, representative of the Hart Boot and Shoe Co., Fredericton, Ont., recently joined the ranks of the benedicts and is receiving the congratulations of his friends.

J. Orr, of the Yale Shoe Store, Winnipeg, will leave for the East in a short time. He will visit all the shoe centres of Canada and will spend some time in New York and Brooklyn and other cities.

W. Brown, who has had charge of the men's department in the Ryan, Devlin shoe store, Winnipeg, for the past four years, has gone to Calgary, where he has taken a position with J. B. Douglas.

J. A. Clarke, who has been representing the firm of Blachford, Davies & Co., Toronto, in Hamilton for the past year has had his territory extended and is now covering the Lake Huron district.

The Robson Leather Co., of Oshawa, is plaintiff in an action entered at Osgoode Hall against the Williams Shoe Co., of Brampton, to recover \$2,425.58 alleged due on cheques, notes, etc.

Alexander Brandon, of the Brandon Shoe Co., Brantford, spent a few days recently in Boston, New York, and other centres, picking up a number of pointers on fall and winter styles.

It is learned that Fred Marsh, of the W. A. Marsh Co., Quebec, has been appointed sales manager of the firm succeeding S. H. Parker, who is now manager of the Solid Leather Shoe Co., Preston.

A new rolling house is nearing completion at the Beardmore tannery in Acton, while among other improvements is a new railway switch and trestle enabling supplies to be unloaded with great convenience.

The fire which visited Murrays Limited, shoe merchants, Calgary, was confined to the basement. The loss was about \$3,000. The flames broke out next door and ate their way into the Murray establishment.

The book debts and the rights on land and building situated on the north side of St. Joseph street, Quebec, belonging to the Canadian General and Shoe Machinery Co., Limited, of Levis, was recently sold by tender, under the

winding-up auction sales Act, by the liquidator, R. Ernest Lefavre, of Quebec.

Montreal shoe manufacturers report business during the past fortnight as being steady. A few state that they are pretty busy. The large majority are now preparing new samples for the coming season.

Ames-Holden-McCready's factory site on Inspector street, Montreal, is said to be a possible purchase by the C. N. R. Offers for the property it is understood have been renewed by the railroad officials.

The shoe workers strike which has been going on for nearly four months in St. John's, Newfoundland, has been amicably settled. The demands of the strikers were agreed to except in one instance.

A number of Canadians have received invitations to attend the sixth annual dinner of the Shoe Travelers' Association of Chicago, which will be held at the Congress Hotel on Thursday evening, February 8th.

Fire broke out in the shoe store of W. A. MacLeod & Co., Kenora, Ont., starting from the passageway under the stairs from an unknown cause. The stock was badly damaged. The loss was practically covered by insurance.

R. H. Robinson, of Blyth, Ont., has opened a shoe department in connection with his harness business and has bought the stock of shoes from G. M. Chambers, who has retired. Mr. Robinson also carries a fine line of bags, etc.

A ball and social is being held by the Superintendent and Foremen's Association, Montreal, on February 13th. This is an annual affair and will be held in the Stanley Hall as usual. Several novel entertainment features are promised.

Frank L. Packard's story, "The Miracle Man," will be dramatized and produced by Geo. M. Cohan early in the spring. Frank L. Packard is a Montreal boy and a son of L. H. Packard, of L. H. Packard & Co., Limited, of that city.

Clarke & Clarke, leather manufacturers, Toronto, have sent to the trade an interesting souvenir in the shape of a

leather bound diary on the cover of which is the slogan, "Lest we forget 1914." The book is very useful and convenient.

The shoe store of J. Jupp & Son, 810 Queen street east, Toronto, was entered recently by burglars who effected an entrance through the transom of the door. They secured about ten dollars from the cash register but nothing else was missing.

Nathaniel Fowles, who passed away recently at his home in Toronto, at the age of 73 years, was a well known and respected shoe merchant, who retired from business a few years ago. He had resided in Toronto since 1870.

Karl G. Walters, who for the past three years has been in the sales and road service department of the United Shoe Machinery Co., Montreal, has joined the staff of the Toronto office of the company and entered upon his duties as city salesman.

The Adams Shoe Co., Toronto, who are going direct to the retail trade, have just completed some fine snappy samples in misses', children's and boy's McKays and turns which show high-class workmanship and are much admired by the trade.

The James Linton Co.'s, Montreal, office and factory staffs, played an interesting hockey game Saturday last, which was won by the office team in overtime play, when they shot in two goals. Both teams are open for challenges from other shoe factories.

The Boot and Shoe Workers' Union is making steady progress. Among the firms who have recently decided to use the union stamp are: The Adams Shoe Co., Toronto; The Murray Shoe Co., London, and the Weyland Shoe Co., of Montreal.

Owing to a change from day to piecework, men in Underhill's shoe factory, in Barrie, went on strike. The importation of an American foreman is also said to have something to do with the dissatisfaction among the operators.

New Plant for Leather Tops

L. R. Hulbert & Co., Limited, have started operations in St. Catharines in their well equipped new factory. The factory itself is of brick, 50 x 100 in dimensions, two storeys in height. It is splendidly lighted, excellently ventilated and well heated—in fact, modern in every respect. The goods manufactured are lumbermen's leather tops, tennis shoe tops, and barefoot sandals. Of these the latter are the only ones made entirely on the premises. The company will deal largely with the rubber manufactures of Dominion and U. S. Rubbers will be shipped in case lots, and the leather tops fitted on. When in full running order from forty to fifty hands will be employed.

On the lower floor is located the cutting room. This is fitted up with the latest machinery and modern appliances for cutting the leather into the desired shapes and sizes; after which it goes upstairs, eyeletted and attached to the rubbers. Upstairs is the machinery for making the tops. To make a leather shoe top complete requires about twenty-five distinct operations. Electricity is the motive power that runs the machines. The lighting arrangements behind the machines upstairs is unique. Behind the long bench on which are the machines is a conduit of electric wire, and from these is a flexible arm attached to a lamp, which can be bent in any position desired by the operator. The leather tops are made in lengths running from seven to

eighteen inches in height for men's, youths' and boys' rubbers. L. R. Hulbert & Co., Limited, incorporated with a capitalization of \$40,000, has the following directors: L. R. Hulbert, president and treasurer; H. R. Rice, secretary and general manager; Edward Alley, president of the, Second National Bank, Cortland, N.Y., Henry Dickenson, attorney, Cortland; Dr. W. H. Merritt, mayor of St. Catharines. The superintendent is W. N. Hyder.

For the past four years the Rice-Hulbert Co. operated a factory in Cortland, N.Y., and while it has been a great success, the directors saw better prospects ahead of them in Canada. There is a very large demand in the Dominion by the rubber factories for these leather tops.

The employes that quit were engaged in the bottoming, last-ing, finishing and stock rooms. The trouble is now over.

The Yale Shoe Store, Winnipeg, will be entirely changed in the near future. A juvenile department will be established in the basement and the fixtures run up to the ceiling on the main floor. A cashier will be on the main floor and an entire alteration of system arranged.

The by-law to grant a three acre site and a fixed assessment to the Consumers Tire and Rubber Co. to locate a factory in St. Catharines was defeated by the ratepayers on January 28th, the small majority of thirty-three in favor of the measure being insufficient.

C. A. Culbert, who conducts a men's furnishing and shoe store in South Porcupine, Ont., was elected a councillor at the late municipal elections and his many friends are congratulating him on his success. He has recently opened a branch store in Timmons, Ont.

J. H. Pearce, of Montreal, General Superintendent of the Canadian Consolidated Rubber Co., I. W. Keuhner, superintendent of the Maple Leaf factory, Port Dalhousie, and P. Y. Smiley, superintendent of the Merchants' Rubber Co., Berlin, were in Toronto recently on business.

The United Rubber Manufacturing and Reclaiming Co., of Brantford, recently organized, has purchased a site of three and a half acres on Curtis street. R. G. Wooten, general manager, has announced that a factory, 70 x 250 feet, will be erected in the spring.

J. L. Studholme, of Victoria, B.C., who is the Western Canada representative of the Anglo-Canadian Leather Co., of Toronto, Wood Bros., St. Catharines, and the McQuay Tanning Co., of Owen Sound, has returned to the West after spending a few weeks in various points in Ontario.

The stock of the Orillia Shoe Co., of Orillia, Ont., who recently assigned to James P. Langley, of Toronto, was sold by auction by Suckling & Co., on January 28th. The stock of boots, shoes and rubbers consisted of \$5,904, polishes and findings \$83, furniture and fixtures \$632.

The McQuay Tanning Company, of Owen Sound, manufacturers of harness leather, will double the capacity of their plant and plans and specifications have already been drawn up for a large extension. Owen Sound has consented to grant the company a loan of five thousand dollars.

The returns for the year 1913 show that the total shoe failures in Canada were 45 as against 74 of the previous year, a decrease of 29. The total liabilities in 1913 were \$200,681 and in 1912 \$589,952. During the past quarter, however, the number of shoe insolvencies was 11 as against 6 for the corresponding three months in 1912.

John Nichols, veteran shoemaker, who for many years conducted a repair and custom shop on Yonge street, above Carlton street, Toronto, passed away last week at the advanced age of eighty years. He had a great many friends in the trade, and leaves a son and a daughter. He was a life-long member of Laurel Lodge, No. 110, I.O.O.F.

Z. Lesperance, representative for Eastern Canada of the Boot and Shoe Workers' Union, says that the four thousand men in the trade in Montreal do not work more than an average of seven hours a day, and some of them only five or six, and that the workmen are passing through a rather dull winter owing to the slackness in the shoe manufacture.

A meeting of the creditors of the Dominion Leather Goods Co., 79 Peter street, Toronto, who assigned on January 14th, to F. R. C. Clarkson, was held on January 29th. Ed. Lewis and William Edwards were appointed inspectors and tenders will be received for the stock, either en bloc or separately, up to February 5th. The assets of the company are placed at \$6,372 and the liabilities at \$8,842.

Sorting orders continue fair with the jobbing trade and spring goods are being shipped out in large quantities. The

recent snowstorms and thaws have given considerable activity to the rubber footwear trade but the demand for heavy rubber goods has so far been rather slack. Business in the footwear line is expected to pick up materially during the next couple of months as stocks are reported rather low at different points.

The Hartt Boot and Shoe Co., of Fredericton, N.B., recently shipped two carloads of shoes to the West—one to Winnipeg and the other to Vancouver. It is also interesting to note that business is so good with this firm that several more carloads of shoes are going to western points during the coming season, and another will be despatched within a few days. This speaks very highly of the popularity, style and splendid satisfaction given by the Hartt shoes.

The Williams Shoe Co., of Brampton, who have been established for many years, have gone into liquidation and at a preliminary meeting held last week W. J. Heaven, of the Anglo-Canadian Leather Co., Toronto, was appointed temporary liquidator. It is understood that the assets of the company are about \$165,000 and the liabilities \$120,000. A meeting of the creditors will be held on February 9th and it is expected that an arrangement will be made whereby the industry will resume operations.

The retail shoe dealers of London have joined the movement for early closing, and a petition is now being circulated among them for signature. The petition calls for the closing of stores at 7 o'clock every evening during the week and the abolition of the Wednesday half holiday. Several reasons are given for the action, among which reference is made to the Humane Society's work and the Lord's Day Alliance. A large number of the shoe dealers are in favor of the shortening of the hours and the petition is being largely signed.

It is not always the offering of a lower price that attracts trade. In fact, continually harping on price reductions, "slaughter sales," "carnivals of bargains" and the like, tend to cheapen a store and sometimes drive away the better class of trade, whereas only the least desirable custom is attracted. Efficient retailing is identified with good store service, clever, attractive, energetic, legitimate and persistent appeals for trade, backing up good merchandise and good values to ensure the goodwill of the public. Accomplish that and success is assured.

The Unique Shoe Co., Limited, of Toronto, has been organized and are applying for a charter. The capital stock will be forty thousand dollars and the president and managing director will be Jasper W. Phillips, late of the Solid Leather Shoe Company, Preston, Ont. The company have secured suitable manufacturing premises at 12 West Market street, Toronto, where they have two well lighted floors and about 5,500 square feet of space. The initial capacity will be two hundred pairs a day of misses' and children's, lads' and youths' standard screw and McKay lines. The output will be marketed through jobbers and already a large number of orders have been received. The company expect to begin manufacturing about March 1st.

Some of the shoe merchants of upper Yonge street, Toronto, are starting an agitation to have the stores which keep open until ten o'clock at night close earlier, and nine o'clock may be agreed upon in the near future. The early closing movement appears to be gaining ground. The agreement arrived at last month by several merchants of Queen street west, Toronto, to lock their doors every night except Saturday at nine is working well and all appear to be satisfied with the arrangement. It is probable that a petition may be circulated in the near future to have all shoe shops in Toronto shut down at eight o'clock in the evening and, if a sufficient number fall in with the idea, the petition will be

presented to the city council and that body asked to pass a by-law in the interest of early closing.

The Cook-Fitzgerald Co., Limited, of London, find their present plant at Richmond and Bathurst streets in that city too small for their rapidly increasing business and they have leased for a number of years from the Grand Trunk Railway the property formerly owned and occupied by the Southam Printing Company. This building, which is immediately across the way from the present factory, will be known as Factory No. 2. The demand for Astoria and Liberty shoes has been insistent, even during the dull period through which Canada has just passed and if the trade comes along for the next few years in the same ratio as in the past few seasons, a new modern factory will be built on land which has already been secured. The capacity of the combined plants will be about 2,000 pairs daily.

The leather industry of Canada, according to the census of 1911, comprises 113 establishments for the manufacture of leather, with a capital investment of two and a quarter million dollars, and employing about 4,000 workers. The business, although not of the first magnitude, has a certain importance owing to the fact that Canada has gained a reputation in the boot and shoe world for the manufacture of sole leather. In the year 1911 over 7,000,000 skins were worked up into leather, having a market value of almost \$20,000,000, and of this amount goods to the value of \$2,000,000 only were exported. In comparison with this it is interesting to note that over \$5,300,000 worth of goods were imported, chiefly manufactured articles, boot uppers, and various fancy dressed leathers.

The monthly conference of the superintendents of the Canadian Consolidated Rubber Co. was held on January 17th at the Maple Leaf plant, Port Dalhousie, and was well attended. One interesting feature of the visit was the manner in which the company is now stamping all cartons containing rubbers, which does away with the printing of the label and gumming it on. The new method, which saves time, labor and money is working out admirably. After the carton is made in the box factory it is taken to the printing department where, from orders given, the illustration of the shoe, name of the last, size and style of toe are printed on the end of the box. When a change of size or toe is desired the alteration is soon made by means of separate plates. This system has been installed in all the plants of the Canadian Consolidated Rubber Co.

A meeting of the directors of the Ames-Holden-Mc-Cready Company was held last week in Montreal, at which business conditions were thoroughly discussed. A. L. Johnston, of Winnipeg, vice-president of the company, attended and reported that business in the West was improving, and that the outlook was good. Clarence F. Smith, vice-president and general manager, said that the annual report for the year ending April 30th next will show that dividends have been easily earned. Business conditions generally are fairly good, and promise much better in the near future. This is particularly true of the Maritime Provinces and the West. It is an interesting sidelight on the business situation that the collections of the company for the past four months have been better than for the corresponding period of the year earlier.

The Edmonton Leather and Shoe Co., Limited, has received a standing order for all the leather a large concern in Michigan can use. The American company is paying the same price for leather f.o.b. Edmonton as they pay for other leather f.o.b. at their own city, which means that they pay the regular price plus the freight from Edmonton. It is said they do this because the leather made in Edmonton is of a much better quality, on account of a secret process invented by A. C. Todd, manager of the Edmonton Leather and Shoe Company's tannery, and formerly of Meaford, Ont. This is

the only leather that is waterproof, it is claimed. Several of the largest shoe dealers in Canada are buying large quantities of "shoe pack." The company has about 30 shareholders and its factory and tannery is at Manchester, just outside of Edmonton. It has been decided to pay a dividend of eight per cent. out of last year's profits and to install new machinery to double the actual production.

Fire gutted a four-storey brick building at 88 and 90 Teraulay street, Toronto, recently and did damage to the extent of \$55,000. The blaze started on the third floor, which is occupied by J. W. Hewetson Shoe Co., who have, however, removed the majority of their machines to their new factory in Brampton. It is thought that the fire was caused by the explosion of a tin of benzine dropped by a workman. As soon as the benzine was dropped, the interior,

A. KNECHTEL, STRATFORD, A LEADING SHOE RETAILER WHO HAS RETIRED FROM CITY COUNCIL AFTER SIX YEARS SERVICE

being made of wood, was soon a mass of flames and the girls and other employes of the fitting room were immediately thrown into a panic. The loss of the Hewetson firm will be about \$10,000. Several other concerns occupying other floors in the same building also suffered loss. J. W. Hewetson made an attempt to extinguish the flames when his attention was first directed to them and was severely burned about the hands and face. He was taken to the hospital for treatment, but was soon afterwards removed to his home and is able to be around.

PARCELS POST STARTS THIS MONTH

On February 10th the long-promised parcels post system will be inaugurated in Canada, according to the announcement made by the Postmaster-General recently. The service was promised for January first, but was held up by the inability of the department to make a satisfactory arrangement with the railways to carry the service. The railways demanded a total of six millions. It is understood that an agreement was finally reached whereby the railways will be paid three millions a year for carrying all the mails, including those by parcels post.

The rates so far announced deal only with the "local

zone." The territory around every post office within a 20-mile radius will constitute a local zone, within which local rates will prevail. These local zones will overrun provincial boundaries wherever the post office is located within 20 miles of such boundaries.

The local zone rate is expected to be of considerable benefit to merchants in small centres, who will thus have the advantage of posting at a lower rate than that paid by the large stores of the big cities beyond the 20-mile zone. The local zone rates will be:—

| | Cents. |
|---------------------|--------|
| One pound | 5 |
| Two pounds | 6 |
| Three pounds | 7 |
| Four pounds | 8 |
| Five pounds | 10 |
| Six pounds | 12 |
| Seven pounds | 14 |
| Eight pounds | 16 |
| Nine pounds | 18 |
| Ten pounds | 20 |
| Eleven pounds | 22 |

Eleven pounds is the weight limit under the new system. It will be noted that after four pounds the rate increases by two cents per pound. For the first three months of the parcels post the department will accept parcels up to a six-pound weight only. This is to provide against a rush of business at the outset before the facilities for handling the parcels post have been fairly tested.

In connection with the regulations regarding the system there will be full instructions for farmers and others regarding the methods of sending farm produce, such as butter, eggs, vegetables, and fruit.

The parcels post rates will be, of course, very materially lower than the prevailing express rates on parcels of corresponding size.

A LIVE WIRE IN THE WEST

Walter L. Joyner, who is one of the most progressive merchants in Western Canada, is English by birth, but Cana-

dian in his ideas and inspirations. About twenty years ago he arrived in Canada and located in Ottawa, where he was

engaged with A. A. Fournier, Limited, of which concern he later became vice-president and manager. A few years ago he decided to try the West, and after looking about came to the conclusion that Moose Jaw offered a decidedly favorable centre for future operations. He bought out the departmental store business of M. J. MacLeod Co. and since then has made many improvements and extensions to the establishment. Among them he opened up a splendid shoe department, where various leading makes are handled, as well as traveling requisites. Mr. Joyner states that he attributes his success in business to the loyal support and co-operation given him by his staff.

QUEBEC SHOE STRIKE STILL UNSETTLED

There is nothing particularly new in the Quebec shoe trouble. A few shops have worked a couple of weeks, but it was only in the fitting departments, wherein the plants were behind in that branch of the business. The factories are always open to those who want to work, providing the workers will sign the rules and regulations made by the members of the Manufacturers' Association. The men say they find two of these provisions opposed to the constitution of their union. One is that the employer or his representative shall have the exclusive right of engaging, discharging or suspending an employe, and the other is that the employer or his representative shall be the sole judge of the competence and ability of an employe to do his specified work. If there is no settlement effected soon there will be some shops which will throw open their doors to every member outside of the local unions. From time to time reports have been circulated that the trouble was about to be amicably settled, but so far nothing definite has been accomplished.

On January 16th fire broke out in the factory of Jos. Beaulieu & Co., situated on Colomb street. There was considerable damage done to the machinery, while the other portions of the building suffered from smoke and water. The work of repairing is now proceeding rapidly and in a couple of weeks, the shop will be running as previously. The loss was about \$15,000, which was partly covered by insurance. For next year, it is understood, the firm will make imitation Goodyear welts.

The brick building located at 461 and 463 St. Valier street was practically destroyed by fire on January 18th which originated on the top flat, occupied as a dwelling. The flames worked their way downward to the second and also to the ground floor, which was leased as a leather warehouse by Edgar A. Shee, Quebec representative of the Robson Leather Co., Oshawa, Ont. The damage done to the leather, of which there was some \$12,000 worth on hand, will amount to about \$8,000. A great part of the stock was patent leather, and the heat and water, along with the debris, soon ruined it. The office fixtures, which were very attractive, were also damaged to the extent of \$1,200. A. E. Marois has just purchased the building, and as it is a total wreck, he will be obliged to tear it down and rebuild. This makes the third serious fire which has occurred within seven weeks in the shoe and leather industry in Quebec. The first one was the destruction of the plant of Tourigny & Marois, who, however, are at work again, manufacturing in their new premises on Prince Edward street, in the building formerly occupied by A. Pion, glazed kid tanner.

W. A. Marsh, of the W. A. Marsh Co., Quebec, who has been ill for some months, is now showing much evidence of improvement. The doctors say that he is out of danger and as he is able to move around in his residence, his many friends in the trade hope to soon see him about again after his long indisposition.

Misleading the Public on "Cost" of Six Dollar Shoes

There has lately appeared in the press a long article on the cost of the leather in a six dollar shoe made in Canada and certain figures are given which are erroneous in many respects and calculated to mislead the public. The heading in a number of papers was "Leather costs \$1.73 but shoe brings \$6.00. To the ordinary lay mind this would seem as if the manufacturer and retailer on this class of shoe cleaned up between them exactly the difference—\$4.27. The whole production is such a concoction of false and unjust statements that it is scarcely worth giving the matter serious attention.

The contributor says: "Shoes have gone up one dollar per pair," which is not the case, as the increase on even the better grades of footwear has not been more than forty or fifty cents at the outside wholesale figure during the past three years.

"And," continues the writer, "the higher grade of top leather sells from thirty-two to thirty-five cents per square foot to the factory. A year ago it sold from thirty to thirty-two cents per square foot. The makers allow roughly three and one-half feet of upper leather per pair of shoes. This brings the cost of the upper leather to \$1.23 to the factory. Soles cost from 45 to 50 cents, this also being an increase of ten per cent. over the prevailing price of a year ago. The total is \$1.73 per pair for the actual leather. The wearer pays from five to six dollars a pair for this amount of leather once it is shaped into shoes."

If the average maker of high-grade Goodyear welts for men and women could get off to-day with \$1.73 as the cost of the leather he would consider himself remarkably fortunate. One wonders where the disbursements for counters, box toes, heels, top lifts, insoles, facings, etc., come in. The counters in a pair of shoes that retail at six dollars cost the manufacturer nine cents, the box toes add another five cents, the insoles from sixteen to twenty cents, the heels ten cents, top lifts, six cents, which runs the expense on each pair up fifty cents more, making the foregoing outlay (accepting the newspaper figures of \$1.73 as correct) \$2.23 for the leather. If a slip sole is included the cost is fully fifteen cents more.

Then what about linings, eyelets, hooks, heel socks, nails, cement, cork fillers, pull straps, inside backstay, top stay, facings and a dozen other items which all involve a considerable expenditure, not to speak of the cost of labor in making that six dollar shoe, which may run anywhere from fifty-five to eighty-five cents, according to what the factory figures in actual making expenses and the capacity and equipment of the plant. Then there are the selling expenses of from five to seven per cent., according to the territory covered, the administration expenses, which include office and supervisory help, light, power, heat, insurance, taxes, rent, waste, depreciation in plant, returns, advertising, freight, repairs, lasts, patterns, royalties, cartons, labels, etc., all of which make it cost the manufacturer to produce a shoe that retails at six dollars to-day anywhere from three dollars and fifty cents up to over four dollars, providing he uses good solid material throughout. His net profit on the shoe then will not average more than five per cent. at the most.

When any medium attempts to tell specifically what it costs to produce a shoe for which the wearer pays six dollars, it is entering upon a most difficult and intricate task, for the reason that no two factories figure cost exactly on the same basis. Certain makers charge some things to one account and some to the other, but in the end their entire outlay per pair is not very widely apart, so that it is almost impossible to say exactly what sum each five or six dollar

shoe entails in the numerous processes from the calfskin to the finished product. Certain makers compute the cost in sixty pair lots and others in twelve pair lots. Some figure the cost of the superintendent and foremen in each department into the actual labor expenditure, while others merely reckon on the basis of piecework and charge supervision expenses to administration account. A few firms figure in the labor cost the expense of selling the shoe, the advertising of it, etc. Some factories take the total of the overhead expenses and estimate that it costs twenty-two to thirty-five per cent. to start covering all items, outside of making and materials. No two plants have practically the same system.

A chartered accountant told the SHOE AND LEATHER JOURNAL the other day that he had audited books from one end of Canada to the other and in no industry had he found the basis of computing cost of production exactly alike. There is no doubt that shoes are going up in price for reasons that have been pointed out time and again in the SHOE AND LEATHER JOURNAL—the scarcity of hides and consequent shortage and advancing figure for leather and fabrics, the rising scale of wages, and the augmented cost of doing business generally, but to publish broadcast a half truth about the price of a shoe in the making, as the article in question had done, serves no good or useful purpose.

Why is the shoe manufacture singled out and made to appear as the chief sinner in the high charges for raiment? What about the clothing manufacturer, the hat manufacturer, the underwear manufacturer, the shirt manufacturer, and others? All these items of apparel have on quality goods gone up quite as much or more than shoes and not with the same justification in many instances, yet the footwear manufacturer and the retailer are represented as if they are either robbing the public or feeding fat at its expense. The "pure shoe" legislation passed in many States of the Union is an example of the harassing of the shoemaker. Proportionate to capital invested, the shoe manufacturer and the shoe retailer in Canada to-day are making less money than the average producer or distributor in any other line, but from reading the frequent deceptive references in the daily press, the ordinary reader would be led to the conclusion that these men were in some get-rich-quick scheme or had discovered a short and easily negotiated route to wealth.

THERE'S NOTHING LIKE LEATHER

"There's nothing like leather." There's a reason. Leather is a product of nature. Take a piece of leather and observe the way the fibres are knit together. It is Nature's work. It is so wonderful that man cannot hope to reproduce it. He cannot even re-create it. Let him boil a piece of hide. It will turn to gelatine. No power known to man can turn that gelatine back into leather. Let him shred it. No machine can re-weave the fibres into their former wonderful fabric. Let him take all the chemicals which go to make up a piece of leather, and mix them in all the ways that he can imagine, and he cannot make a single inch of leather. Synthetic leather seems farther away than the synthetic diamond.—Hide and Leather.

HE HAS A WELL-EQUIPPED INSIGHT

Born and brought up in the shoe business might aptly describe the career of W. A. Graveley, who is well and widely known to all shoe men in Eastern Ontario. His father was at one time a shoe merchant, therefore, the subject of this sketch was connected with the trade nearly all his life. Fourteen years ago he took a position with his brother, J. A. Graveley, of Valleyfield, Que., with whom he remained some four years. He then came to Ottawa and entered the service of the T. Lindsay Co., Limited, with whom he was several years, being head salesman in the ladies' department.

His next situation was with A. A. Fournier, Limited, as manager of their shoe department. Two years ago Mr. Graveley went to Smith's Falls, to take over the Smith's Falls Shoe Company's business, which was recently sold, and on returning to Ottawa in October last, he again took charge of the shoe department of A. A. Fournier, Limited. Mr. Graveley was born in Glengarry County, and is a son of the late Charles L. Graveley, of Cornwall. His mother was a descendent of one of the United Empire Loyalists family. He resides at 283 Arlington Ave., Ottawa, and says that he has always found the SHOE AND LEATHER JOURNAL very helpful and instructive to him in the many years that he has been identified with the trade.

THE COST OF FOOTGEAR

R. S. H. in a letter to the Toronto papers on "Shoes and Their Cost," says: A New York despatch says that because of the "pure shoe" bill shoes will soon cost ten dollars a pair. I am a tanner and currier by trade. I worked at it for fifteen years and handled 2,100,000 pieces of leather in that time, so I know something about leather. Twenty years ago wages were from \$2 a day to \$6 and the working day nine hours. Now wages are \$1.35 a day to \$3, aside from splitters and belt-knife men, and it costs only half of what it did to get out this leather twenty years ago. The process is much quicker. Machines do the work now where it used to be done by hand. Why, then, should we pay \$10 for a pair of shoes? Twenty years ago \$10 would buy the finest hand sewed made to order shoes in the world. I bought a pair of shoes two weeks ago for \$2.50, and I am satisfied that they are pure leather."

USING MORE LEATHER LOUIS HEELS

Makers of women's shoes now are using many "leather Louis" heels in place of real Louis heels of wood. These "leather Louis" heels are made of leatherboard, with a base, as well as a top lift, of real sole leather. On the base of some heels there are two layers of real sole leather. These base lifts extend beyond the breast of the heel and under the shank of the shoe, making the lip of the heel. They are glued to the shank, and are sometimes nailed. The operation must be neatly done, to make the joint smooth. The heels may be made in one or two decks. They are nailed to the shoes on the nailing machine in the usual fashion, except that the plates of the machines are re-set, in order that the nails will be driven into the heel, not through its sides. The lifts should be of good leatherboard, and firmly made, so that they will not check. The heel nail should be straight, and driven directly into the centre of the heel, where there is no chance for it to stick out when the heels are cut down to make a slim neck or concave breast. The supply of these "leather Louis" heels is abundant, and they are low in price compared with prices of true Louis

heels of wood. They look like real Louis heels, but close inspection shows that they are not quite such fine and aristocratic heels as are the real Louis heels.—American Shoemaking.

THE CITY AND THE SHOE FACTORY

A writer in the St. Thomas Journal says: "Is it true that the council is not anxious that the Wright Shoe Company should vacate its present quarters for the new building on Talbot street? A revenue would be lost to the city and an empty block be left on the hands of the municipality. This condition was forecasted a couple of years ago, when the city went into the real estate business. As a pertinent question, why is the new building not made ready for the shoe company? And if it can be placed in readiness for occupation, why is the company delaying its removal to more commodious and convenient quarters? I see a committee of the council has been named to complete the new factory. No report has ever reached the city what their predeceasing committee had done towards finishing the building. Will the people be called upon for more money, to give an after final touch to the building? The citizens are interested in the outcome of an investment that is unique in municipal housekeeping."

A. R. C. BRAND HARD TO BEAT

Undoubtedly the best game played on the open air rinks this season was witnessed on Withrow Park, Toronto, when A. R. Clarke & Co. beat Mathewson's by a score of 2-1. Over 2,000 spectators were on hand and the excitement was intense. Clarke's scored the only goal up to half time, when Mathewson's evened up early in the second half, Clarke's netting the winning goal five minutes before the finish. J. Spanton, P. McIlwain and A. George starred for the winners.

HOW LONG WILL MEN HOLD OUT?

For more than five weeks past the boot and shoe factories of Quebec, whose proprietors are members of the Shoe Manufacturers' Association have kept their doors closed to their employes, says a recent despatch.

As was stated when the trouble started, the bosses presented their workmen with a slate of factory regulations, stating that any man who wished to remain in the employ

of the factory for which he had been working until that time, must sign them, and that otherwise the doors of the factories would be closed to the men, until they did see fit to sign. It was explained that if any man wished to sign the rules he was always welcome to do so, and that the employers would endeavor to find employment for all such men as were willing to sign the factory rules. Up to the present time, none of the men have signed.

There have been frequent rumors that the matter would be settled by the Unions in another way, and that it would not be necessary for the men to sign the rules, which they claim would be too binding on them, and mean that their Unions would no longer be recognized.

From the way things have turned out so far, it does not seem likely that settlement will be made on any other terms than those contained in the ultimatum which the bosses presented to their employes. The bosses have decreed that the Unions and rules of the Unions must be made subject to the rules of the factories in which the men are employed, and that they, the proprietors, will run their own factories, in the way that they deem best for the trade, and the service of the public.

The rules certainly do mean that the Unions will have no further hand in the running of the factories, and, as up to November 1st, 1913, the Unions had been in the habit of running the men in the factories after their own liking the proposition of the manufacturers, embodied in the new factory regulations, is a strange one to the Unions.

In the meantime there are millions of dollars' worth of stock and machines standing idle in the factories. The boot and shoe trade, the most important industry of the city of Quebec, is at a standstill, and there are no signs of a settlement between the employers and the employed, and these latter and their families are suffering from want of money.

Association Holds "Get-Together" Dinner

(Continued from Page 44)

himself, or his firm could at any time be of service, he would be happy to have the committee command him.

The annual "At Home" of the club is scheduled for February 13, and a good time is promised. Moving pictures will be used to show how shoes are made demonstrating the operation from start to finish. These were taken at the St. Louis Exposition, and have been kindly loaned for the occasion by the U. S. M. Co. of Canada.

Everybody being in a good humor, the dinner and smoker was naturally a success.

The guests of the evening were Messrs. Knowlton, Algeo, Whitley, and DeLancey.

"I thought there were no Chinamen in the Association," observed one member who could not stretch his neck enough to see who was rendering the "Chinese Grand Opera."

Much credit is due the committee, Messrs. Leonard, Giroux, and Algeo.

The "smokes" were plentiful and so were the fellows to smoke 'em.

Among those present at the interesting entertainment were: P. C. Price, P. E. Lloyd, W. A. King, F. B. Bowser, A. Mathews, H. Perras, Fred. Whitley, C. A. Duclos, G. A. Fortier, H. Dartois, F. H. DeLancey, T. O. Gadbois, H. E. Palmer, T. S. Maddock, J. W. Heurteau, Jas. F. Crozier, J. Lindsay, L. G. Selwood, S. C. Jones, M. McAuliff, E. D. Goodra, H. J. Guerin, F. C. Smith, D. J. McDermott, T. B. Dermody, G. R. Sloane, B. Labrecque, Ernest A. Whitley, Henry R. Whitley, H. Mitcham, D. Brownrigg, B. C. W. McLean, A. Blanchard, H. G. Cobb, C. G. Higginson, Al. Gaylor, Alf. Richards, P. Whitehead, P. Greanes, L. Garvin, E. W. C. Neville, H. Hill, Louis Mercier, T. D. Kinsella, J. C. Richard, Alex. Beaupre, H. Phillips, Henry Duvernay.

22-FOOT GOODYEAR SHOE REPAIRING OUTFIT

MODEL N

THIS Outfit represents the highest development in shoe repairing machinery, and meets every demand of modern shoe repairing. It embraces all the essential processes for making new shoes from old ones, giving the maximum of equipment and efficiency in the minimum space. The Outfit has the Goodyear Stitching Machine with all its improvements, including a new style steam generator which uses gas or gasolene for generating the steam, and operates automatically, thereby insuring a uniform heat for keeping the wax in proper condition and requiring little attention from the operator. The Edge Trimming Machine has the new feature of the two shafts, being operated by a single belt, and the cutter grinder is attached directly to the main shaft. This arrangement gives better results with less power.

The Buffing and Scouring Machine has a shaft 57 inches long and carries the following equipment :

- | | |
|--|-----------------------------------|
| 2 Split Bottom Buffing Rolls | 2 Flat X-Ray Heel Scouring Wheels |
| 2 "C" Shape X-Ray Heel Scouring Wheels | 1 Heel Breast Scouring Wheel |
| 1 Pin Wheel Pad Complete | |

A powerful Blower System removes the dust resulting from the trimming, buffing and scouring operations, and is designed to overcome certain objectionable features of other blowers.

The Finishing Machine has a 78 inches shaft which has all the necessary equipment for black or russet work :

- | | |
|--|--|
| 2 Corrugated Rubber Shank Finishing Wheels | 1 Corrugated Rubber Heel Finishing Wheel |
| 1 Corrugated Rubber Bottom Finishing Roll | 2 Shank and Bottom Brushes |
| 2 Heel Brushes | 1 Stitch Cleaning Brush |
| 1 Levelling Roll | 1 Bead and Wheel |

At the end of the Outfit is the Oscillating Edge Setting Machine which is fitted with union irons and in its motions duplicates hand workmen with quicker and better results.

Each of the machines is operated independently by a friction drive pulley, so that it is necessary to use only those machines which the operator may require. This feature means a saving of power.

All the machines are firmly mounted on legs and driven by a countershaft with carefully adjusted bearings, so that the Outfit runs with very little vibration, and is in every way most efficient.

FULL INFORMATION FURNISHED PROMPTLY ON REQUEST.

UNITED SHOE MACHINERY COMPANY OF CANADA

MONTREAL - - QUE.

122 Adelaide Street West, TORONTO

492 St. Valier Street, QUEBEC

Our Toronto Business has INCREASED

to such an extent that we were recently compelled to remove to much larger premises. Our new Toronto Warehouse is located at 146 Wellington St. West, and is a model establishment in every way.

The exceptional facilities for handling our goods and additional storage space will enable us to more adequately cope with the ever-increasing demand for

MINER and SHEFFORD RUBBERS

in the Toronto district.

Dealers handling our lines in this district should send their orders to our new Toronto Warehouse for rapid shipment.

Dust Off Your Shelves for Union Made Shoes

If you haven't been handling UNION STAMP FOOTWEAR, Mr. Retailer, it's high time you turned over a new leaf in your ledger, dusted off your shelves, and installed a live line of UNION STAMP SHOES.

Understand they cost no more than non-union shoes.

And at the same price, consider how much better they are for your business.

They insure you the trade of the Union man and his family. Moreover the official seal of the Boot and Shoe Workers' Union stands for honest footwear made under the best conditions by expert workmen.

There are no delays by strikes or lockouts in the Union shoe factory.

But recollect there is only ONE UNION STAMP, and that is the stamp of the Boot and Shoe Workers' Union.

Bolster up your profits, increase your patronage, share in the value of Union Stamp advertising by handling only UNION STAMP SHOES.

Write for our list showing what manufacturers make UNION STAMP SHOES.

FOOT AILMENTS

Instantly Relieved and Permanently Corrected

SCHOLL'S system of fitting enables the Boot Dealer to fit Scholl's Specialties absolutely accurate, avoiding all discomforts and dissatisfaction. Backed up by a forcible campaign of educational advertising, Scholl's FOOT-EAZERS find a ready sale, and give the dealer unusually large profits. SCHOLL'S advanced methods and co-operative "helps" afford the dealer an opportunity of increasing his sales and prestige.

Patented Self adjusting feature
Friction of Foot Eazer top plate is on under spring

SCHOLL'S FOOT-EAZERS

Made with two Springs of special milled German Silver, with oak-tanned leather top piece, gently raise the arch or instep. Light and comfortable, worn in any boot unnoticed. Retail price, \$2.00 per pair.

SCHOLL'S KORREKTO

A moderate priced Arch Support, with a broad supporting plate of German Silver; no metal under the heel. Retail price, \$1.50 per pair.

SCHOLL'S ABSORBO CORN PADS

Made of pure antiseptic rubber, for the instant relief of painful corns and callouses. Held in position with strips of adhesive tape, supplied free in each box. Made in eight sizes as under: A, B and C, for corns on top of toes, retail price, 15c. each; D, E, for tender joints, 20c.; F, G, 25c. each, and H, 35c. each, for callouses on the soles, 35c. each.

SCHOLL'S BUNION REDUCER

Made of Pure Para Gum Rubber; fits close to the bunion, keeps the pressure of the boot from the affected joint, shuts out all air, retains the moisture, thus arresting the growth. Made in small, medium and large sizes, for right and left feet. Retail price, 50c. each.

SCHOLL'S ANTI-BUNION SPRING

Acts as a lever to draw the great toe back to its normal position; especially recommended as an appliance for night wear. Made in small, medium, and large sizes, for right and left feet. Retail price, \$1.50 each.

FIXO CORN PLASTER

A medical treatment for corns, no matter how old, how hard, or how painful and troublesome: does not blister or irritate; absolutely removes the corn in 48 hours. Put up in packets containing three full-sized treatments. Retail price, 10c. per packet.

Write for free Booklet "Scientific Correction for Ailments of the Feet."

SERVICE!

Your wife sometimes forgets to order one or two items from the grocer when shopping in the morning, and, just before dinner, she finds out that there's no bread, or no butter, in the house. What does she do? Why, she goes to the telephone, and calls up the grocer, and says: "Mr. Sunlight, I've run out of bread. Would you mind sending me a couple of loaves at once. I need them for dinner."

And what does Mr. Sunlight say? He says: "I'll send them right around." And, regardless of the fact that he only makes a cent or two profit out of the order, he drops whatever else he's doing, wraps up the bread, and sends it around, or takes it to your house himself.

And your wife says to herself: "Sunlight's all right! He can have my trade as long as I'm living in this town."

Sunlight's strong point is *SERVICE*. He doesn't say to your wife: "Can't you send some one for the bread? My wagon's in the stable, and all the clerks have gone home, and I haven't anybody to take it around."

No,—Sunlight "delivers the goods."

Now, our strong point is "SERVICE," and we, too, "deliver the goods."

In a week or two you'll be asked for your 1914 placing order for rubbers. In deciding to whom to give this order, remember that a placing order is about the easiest thing handled by a manufacturer of rubbers. He has plenty of time to fill it in, just as the grocer has plenty of time to fill your wife's morning order. But will he be *able* to, and will he be *willing* to, fill your "rush" order for "bread and butter," when you need certain styles and sizes in a hurry next fall and winter? *Can* he, and *will* he, take care of you in an emergency, when delay in the delivery of your sorting order means the loss of some of your customers, and brings discredit to your store?

We *can*, and we *will* take care of you in your emergency. Remember this, when handing out your 1914 placing order.

"It's a Classic!"

Do you realize the full potency of what this little miss means by saying; "It's a Classic!"

If you don't, you've never handled the "Classic" line and you're the man we are particularly anxious to speak to.

The "Classic" shoe is a shoe that has won a pre-eminence among shoes of recognized high quality. It's a shoe that looks well; wears well; and feels well, giving the maximum of solid comfort, and satisfaction to the wearer.

Get a good assortment in stock—there's a wide and attractive range to choose

from, for ladies, misses and children—and the next time a customer asks for a good shoe, recommend and sell her the "Classic."

Don't forget to make a display of them in your windows—there are many people now passing your store whom the "Classic" will bring inside.

Be Prepared for Bigger Rubber Sales Next Fall

New Season opens March 2nd

This will be the time to place orders for your Fall requirements and when ordering be sure you make no mistake and specify those reliable quick-selling brands:

“Kant Krack,” “Dainty Mode,” “Royal” and “Bull Dog.”

You'll have good reason to be satisfied with the choice of your rubber stock if you specify these brands. They're stylish without being freakish; comfortable but not clumsy; thoroughly reliable in every phase of the making—just the kind of rubber footwear that will make a customer glad to do business with you.

Shoe Factory for Sale

THE WILLIAMS SHOE CO., LIMITED

BRAMPTON :: ONTARIO

Owing to lack of working capital, the above company finds itself in financial difficulties, and the undersigned has been instructed to take steps for the sale of the business as a going concern.

One of the largest and best equipped Stapl McKay and Goodyear Shoe Factories in Ontario.

Present output about \$500,000 per annum.

Capacity about 1,500 pairs a day.

Factory adjoins both Grand Trunk and Canadian Pacific Railways.

Unsurpassed shipping facilities.

Within 20 miles of Toronto.

Splendid train service.

Site.—About one acre of land. Factory 150 x 50, addition of 85 x 50, stock room 100 x 40, 3 floors throughout.

No labor troubles. Many employees have been with the company 5, 10, and 15 years, some longer.

Here is an opportunity to step right into a completely equipped modern shoe factory and make money from the first day.

The company has about \$90,000 worth of Spring orders, with more ground not yet covered.

For quick sale.

For further particulars apply to:

¶ All the essential qualities of a shoe for Fall selling are embodied in the Doctors Shoe.

¶ Sturdy yet dressy, comfortable but not clumsy, and thoroughly waterproof; the Doctors Shoe is particularly suitable for Fall wear.

¶ The waterproof quality of the Doctors Shoe is not an empty theory. Both the soles and the uppers are waterproofed by a special process, and to prevent the slightest feeling of dampness, there is a sole of thermal asbestos between the outer and inner soles.

¶ The Doctors is truly an ideal Fall shoe.

¶ You should have a good assortment in your Fall stock. Your jobber sells them.

AMES-HOLDEN- McCREADY LIMITED

Our Policy

Satisfaction in the wear of our shoes, and profitable selling lines for the Retailer.

Our regular customers know what we can do, we ask others to give us a trial order.

It stands to reason that shoe manufacturers who *specialize* turn out better goods because they do so.

We have three large factories. In No. 1 Factory we make nothing but Men's, Boy's and Youths' fine goods. In No. 2 Factory we make nothing but Ladies', Misses' and Childs' fine goods and in No. 3 Factory all staple lines.

The Brains in these factories are concentrated in the *special* lines they are making.

OUR SHOES have the SNAP, STYLE, FINISH and INDIVIDUALITY that the public are looking for.

**THE MARK THAT STANDS FOR THE VERY
BEST IN FINE FELT FOOTWEAR**

WHEN you buy a stock of "Elmira" Felt Shoes and Slippers, you are NOT making an experiment—you are NOT taking a hazardous risk—you ARE making an investment that will bring you swift, satisfactory returns.

For over 13 years "Elmiras" have been recognized leaders. Every piece of material, every seam in Elmira quality, is made with an expert's knowledge and a thorough insight into the people's requirements.

And "Elmira" shoes and slippers are made up to a standard, not down to a price. We do NOT mean to say that "Elmiras" are highly priced—far from it. Our prices are far and away below what the good quality of our products would warrant.

We want you to send for our illustrated catalogue and there to get a line on the wide range of SHOES and SLIPPERS for 1914. Only by seeing the "Elmira" Trade Mark on the goods you buy, can you hope to win the maximum profits and prestige.

A Boot Lace that Will Outwear the Boot

is a very strong statement, but quite true when said of

Brough's New Heavy ORIENT LACE C57 Gents' in 4/4 and 5/4 lengths C56 Ladies' in 5/4 and 6/4 lengths

Boxed single pairs in attractive sealed cartons, TO RETAIL AT 10 CENTS THE PAIR, gives a fine profit for the dealer. Sells on sight, it's so attractive and just new.

This shows a single pair carton sealed at each end by small Union Jack

Showing box of 72 pair cartons, one gross laces.

THE ORIENT LACE is a soft, silk finish, cotton lace. Fast color, well Tagged and very sightly. Guaranteed perfect in every respect. This is the Best lace we can make and we are proud of it. No one else can make quite as good. The tags never pull off. The lace always stays tied, even when new, because of the soft, supple finish. This is a very strong selling point.

This makes a nice line for shoe store men for use now in Special Sales.

It is so profitable you can give salespeople extra inducements to push them, and make a welcome addition to your profits.

Will Parcel Post System Aid Rural Shoe Retailer?

He Has the Benefit of Local Twenty Mile Zone System and Possesses Advantage of Posting at a Lower Rate Than That Paid By Large City Stores Outside This Radius—How He Should Avail Himself of This Concession and Keep Out Goods of the Mail Order Houses

With the inauguration of the Parcel Post system in Canada, the question is asked, what effect it will have upon the retail merchants as compared with the departmental stores?

Will the rural retailer suffer by this modern adjunct to the post office department, which has been in operation in the United States with great success for a year and a half, and is now being launched into Canada. So far as can be learned, few, if any of the smaller merchants across the border have lost business owing to its introduction, and, in fact, many of the live ones have taken advantage of it to extend their trade in the surrounding country. Like the rural mail delivery, rural telephones, and other conveniences of modern life, it was a step that was bound to come sooner or later.

They View the Matter Calmly

The rates, method of operation, etc., have been published in the daily and weekly papers, so that it is not necessary to go into lengthy details in this respect. There is no good of trying to scale a mountain before one reaches its base, or shouting before one is injured, and so far as the views of many retailers in the country are concerned, with whom the SHOE AND LEATHER JOURNAL has communicated, they appear to view the new arrangement with a great deal of satisfaction. It will be remembered that, while Parcel Post has at last arrived, there was an agitation over it—long and persistent. A potent influence against the venture was the opposition of the retail merchants who had visions of being swamped by the departmental stores. Further opposition was offered by the express and railway companies, whose revenues might be affected by the competition.

A Handy Reference Schedule

Six pounds is the limit during the first three months, until the system gets fairly under way. The zone system, which is of particular interest to shoe merchants includes, as is well known, any post office within twenty miles of the place of mailing and the rates are:

5 cents for the first pound; 6 cents for the second pound; 7 cents for the third pound; 8 cents for the fourth pound; 10 cents for the fifth pound; 12 cents for the sixth pound.

It may be pointed out that as soon as a parcel goes out-

side of the twenty mile zone, the rates are double in many cases.

The latest schedule is as follows:

| | 1 lb. | 2 lb. | 3 lb. | 4 lb. | 5 lb. | 6 lb. |
|--|-------|-------|-------|-------|-------|-------|
| Any post office within 20 miles, including place of mailing..... | 5 | 6 | 7 | 8 | 10 | 12 |
| Any post office beyond 20 miles, but within the Province of Ontario..... | 10 | 14 | 18 | 22 | 26 | 30 |
| Any post office in Quebec or Manitoba..... | 10 | 16 | 22 | 28 | 34 | 40 |
| Any post office in Saskatchewan or Maritime Provinces..... | 12 | 20 | 28 | 36 | 44 | 52 |
| Any post office in Alberta... | 12 | 24 | 34 | 44 | 54 | 64 |
| Any post office in British Columbia..... | 12 | 24 | 36 | 48 | 60 | 72 |

The maximum charge on any parcel shall not exceed 1 cent an ounce.

Keep in Touch With Local Trade

It might be mentioned that the twenty mile zone extends into an adjacent province, where the town is located on the boundary line. It would appear as if the twenty mile area is where the local shoe merchant or general store keeper is going to reap his great benefit. Generally speaking, the trade of a country retailer does not extend beyond the twenty mile radius and he has a decided advantage in the matter of rates over a departmental store, which seeks to scatter its goods over the whole province. When articles are sent outside of the local zone, the figures for one pound parcels is 10 cents; two pounds, 14 cents; three pounds, 18 cents, etc., until six pounds will cost 30 cents, which is more than double the rate inside the twenty mile zone. It would, therefore, seem that if the local merchant properly makes known the facilities of his store through judicious advertising, keeps his stock well selected, his premises clean and his windows nicely decorated, he has little to fear in regard to the encroachments of the larger mercantile concerns. He has as already stated, a decided advantage in the matter of rates, and should realize the fullest and best possibilities of

Parcels Post in the matter of giving service and delivery. By the new regulations of the Parcel Post system, the local dealer has this means of holding his own against the encroachments of mail order houses and it would seem that the post office department, in providing low rates for a twenty mile radius, has equipped the rural retailer with a means of fighting the larger enemies, the departmental store and the mail order organizations. By means of the local zone system, the merchant in even the smallest town or out-of-way village, can reach the back concessions and rear townships under very favorable postal advantages, where these people might otherwise send their money to the larger cities. Of course, the twenty mile zone is not so decided an advantage that the average town or village business man can rest on his oars. He must be wide-awake and avail himself to the last cent of protection that the twenty mile radius affords him.

The Question of Radial Railways

Out of the Parcel Post system, another question has arisen, and that is in the matter of Hydro radial railways. This question has been actively taken up by the Journal of St. Mary's, Ontario, and other progressive papers published in enterprising towns. It is the general experience that where the radial railway serves several towns, all benefit, as a general rule. The fear that the larger centres secure the patronage of the citizens of all smaller places, by reason of frequent electric communication, is largely imaginary. Radial railways which connect up villages, hamlets and other near-by points, bring the interests of the district closely together and establish free and easy communication. More radial lines should prove a decided convenience to the merchant in availing himself of the facilities of the Parcel Post.

Speaking of the dual advantage, an exchange ably sums up the situation as follows:

"The problem of radial connection with radial sections becomes of double importance with the advent of Parcel Post. The merchant located in a town where radial connections are good, will be in a good position to send out goods to customers in a few hours' time. Farmers who hitherto have been compelled to do all their shopping on their occasional visits to town or by mail, entailing long delays, will be able to enjoy the privilege of sending in orders to town at any time and getting delivery in a few hours. Are they likely to purchase their supplies thereafter in any other way? The merchant who has the advantage of radial connections and who advertises, should find the Parcel Post measure with its local zone, a lever for the increasing of his business. As the need for radial roads is so directly bound up with commercial expansion, retail merchants should take an active part in their encouragement. A feature also which must not be lost sight of is the fact that, so far as Ontario is concerned, the development of the Hydro-Electric supply is solving the power problem. With the unlimited possibilities of Niagara power, the province should soon be honey-combed with electric lines, bringing increased comfort to farmers and increased business to the merchant. With Parcel Post here, no time should be lost in taking up the question of Hydro-Radials."

A Comparison of Rates

For the first three months until Parcel Post is established and working smoothly, no parcels over six pounds in weight will be carried, and after that period any packet up to eleven pounds may be despatched through the mails and the charges in the local zone system will be seen to be considerably cheaper than express rates. Here is a comparison:

| | Parcels Post | Express |
|------------------------------|--------------|---------|
| 1-lb. parcel, 20 miles..... | 5c | 25c |
| 2-lb. parcel, 20 miles..... | 6c | 25c |
| 3-lb. parcel, 20 miles..... | 7c | 25c. |
| 4-lb. parcel, 20 miles..... | 8c | 25c |
| 9 lb. parcel, 20 miles..... | 18c | 30c |
| 11 lb. parcel, 20 miles..... | 22c | 30c |

For places immediately outside the 20-mile radius, the express companies would be on more equal terms for parcels beyond 4-lb. weights. Outside the local zone, for instance, the postal rate on a 10-pound parcel is to be 46 cents. The express rate for a similar parcel is 30 cents. The 46 cents will, however, take a parcel from Toronto to Port Arthur, while the express companies would charge 75 cents for the same service.

In isolated rural communities, miles away from an express office, the Parcel Post will be found more advantageous. Instead of having to drive perhaps ten or fifteen miles to get an express package, merchants can have goods delivered at their doors by the mail carriers.

To places outside Ontario, the following comparison will prove interesting:—In the zone which includes Quebec and Manitoba the Parcel Post rates are:—1 lb., 10c.; 2 lbs., 16c.; 3 lbs., 22c.; 4 lbs., 28c.; 5 lbs., 34c.; 6 lbs., 40c.; 7 lbs., 46c.; 8 lbs., 52c.; 9 lbs., 58c.; 10 lbs., 64c.; 11 lbs., 70c.

Express rates to representative points in these provinces are:—Montreal, 6-lb. parcel, 40c.; Quebec, 6-lb. parcel, 55c.; Winnipeg, 6-lb. parcel, 90c.

The SHOE AND LEATHER JOURNAL would like to hear from representatives of the shoe trade in various parts of Canada, how they view the parcel post system and rates, and what effect, if any, its introduction is having on conditions in their respective communities.

Well Equipped Factory Will Be Sold

As will be noticed on another page of the SHOE AND LEATHER JOURNAL, the business of the old-established Williams Shoe Co., of Brampton, Ont., is being offered for sale by the provisional liquidator. It appears that this company, which was organized over twenty years ago, with an authorized capital of \$50,000 and paid-up capital of \$31,500, has, on this limited amount, found it growing more difficult to finance. Finally, it was found impossible to continue without additional funds being raised. This, coupled with the recent money stringency, has brought about a reverse, and at a meeting of the creditors, held a few days ago, to devise some ways and means, it was decided that it would be in the best interests of all to have the concern started on a new basis.

The meeting was of a very friendly character, and it was agreed that everything should be done to facilitate, if possible, the continuance of the business. The total amount done during last year was about \$500,000 and the goods of the company, which embrace a general line in men's, women's and children's Goodyear, McKay and Standard screw, were sold from coast to coast. The statement presented shows that the liabilities are about \$150,000 and the assets are practically the same amount. By those in a position to know, it is felt that this is a splendid opportunity for a manufacturer to step in and conduct a well-established and widely-known factory, which has on hand some \$90,000 in orders for spring delivery. The staff, selling organization and plant are all in good shape. The capacity of the factory is 1,500 pairs a day, and about 150 skilled hands are employed, many of whom have been with the concern for years. This has been one of the leading industries of Brampton and the town authorities are very desirous of seeing it continued. The factory is well located, with excellent shipping facilities, is modern and well laid out in every respect. The creditors are desirous of doing everything in their power to carry on the business, and the fact that half a million dollars has been done annually on a paid-up capital of a little over \$30,000 demonstrates the possibilities under reorganized and aggressive management.

Get After the Boot Repairing Trade If You Want It

Do Not Be Afraid to Call for and Deliver Parcels, Work Up Telephone Calls, Send Around Catchy Cards, and Make Your Shop Known—The Progressive Methods of Toronto Man Which Are Full of Live Pointers

To build up a live expanding repair trade it is necessary to get out among the people and tell them about your establishment, facilities and prices. When business methods and a thorough oversight are brought to bear upon the well equipped boot repair shop, there is no reason why they should not be equally as successful as in any other line of trade.

One of the most flourishing stands of this kind is that of Richard Stephens, 1088 Bathurst Street, Toronto. He calls his place "The Boot Repair Works," and he has certainly brought to bear upon it some unique methods of building up and retaining trade. He decided that the best way to get increased patronage was to go after it, and six months ago engaged a man to cover the North Western portion of the city. This has been thoroughly done for several months.

Special Phone List

Here is one of Mr. Stephens' catchy cards, on the reverse side of which is his list of prices.

In the first week this representative called at every house for many blocks around, left his card and stated that all work would be called for and delivered. This meant also that the goods would be delivered on time and not several hours late, as is the case with many repair men, which destroys the confidence in the repairer and exhausts the patience of the patron. Mr. Stephens who is vice-president of the Reliance Shoe Co., Toronto, of which P. E. Rivett is president, is a former city traveler for the Reliance Shoe Co. For several months he has been devoting his entire attention to the Boot repair works and sometime ago bought out Mr. Rivett's interest in the latter business. He has a twenty-foot repair outfit with stitcher and keeps four hands constantly employed, while in the busy seasons, five men are engaged. Most satisfactory results have been brought about by wide-awake alert methods and practically three quarters, if not more of the orders attended to by this firm come in by tele-

phone. Mr. Stephens uses the following tag which is very neat and comprehensive.

Price

809

Address

A cross is put opposite the item which requires attention, and after the work is all done, the bottom of the numbered tag at the first perforated line is detached. This, as will be seen, bears the name and address of the customer, together with the price of the job. This slip is retained by Mr. Stephens and the upper portion of the tag is attached to the parcel. The boy on delivering the job detaches the last portion of the tag indicated by a second perforated line, and brings the small slip back. The customer retains the balance. This is the check on the boy as the slips must correspond in number and amount with those kept in the shop.

Thus everything works very satisfactorily and the price really appears on the tag three times—on the slip retained by the proprietor, on the slip retained by the boy, and on the portion of the tag left with the customer. Each night Mr. Stephens takes the various slips that he has in his possession and classifies them according to streets. He has a card index system containing the names and street addresses of each of his customers. By going over each day's coupons and comparing them with the cards in the index file, he knows exactly how many new customers have come in in the course of a day. He also puts a small dot over each name indicating how many jobs have been received from that person or family. In answer to telephone calls a boy goes out on a bicycle every morning, collects all the shoes at the various houses, and in the afternoon all the jobs go out. Practically all work is promised within twenty-four hours.

The canvasser who goes around calling on the various houses carries a large suit case with him and makes regular

visits to scores of customers each week. He returns to the shop at noon and at night and often brings back several pairs of shoes with him.

It may be asked what excuse a canvasser would have for calling at houses every week, and if such a solicitor would not be making a kind of nuisance of himself. This problem was solved by Mr. Stephens who conceived the idea of getting up a neat card on one side of which were his prices and on the

THE SHOP HAS AN ATTRACTIVE FRONT

other side recipes for cakes, puddings, pies, etc. Just one recipe was put on the card each week and they were numbered one, two, three, four, five, etc. Mr. Stephens pointed out that these recipes were all tried and tested and were used by the best French and English Chefs. The cards also stated that his man would call each week for repairs and give the householder a new recipe.

This aroused considerable interest and many people got to looking for the cards each week, and in case they did not get them telephoned the proprietor. Thus Mr. Stephens has kept his name constantly before a large number of clients. The advantages of his system are that he gets out the work promptly, that all jobs are turned into cash within twenty-four hours, that there is no confusion around the shop, practically every piece of work being called for and delivered. The greatest proportion of the business is by telephone, as already pointed out, and Mr. Stephens, by his card index system, has a list of his customers, their street addresses and their telephone numbers. This is an invaluable possession considering

THE INTERIOR OF R. STEPHEN'S BOOT REPAIR WORKS, TORONTO

that in case he should move away he still has a permanent, tangible connection with his patrons. He intends next month to start sending out a monthly art calendar to each of his customers. This calendar will cover the month only, and about five hundred will circulate.

The accompanying pictures are good illustrations of the

front of his shop and the workroom. Standing to the rear are Richard Stephens, proprietor, and Harry Hunt, the foreman. At the left is Fred Martin and at the right P. Judd and Arthur Gunter. Mr. Stephens is well satisfied with the expenditure that he has gone to for recipe cards, special tags, special representative, etc., and says they have paid him well.

The Prices Charged

Here is the schedule of printed prices, which will be raised this spring.

January Shipments Beat All Records

A recent edition of the Galt Reporter says: "We called at the Getty & Scott shoe factory this morning and were informed that they had experienced the biggest month's shipment in its history, the amount exceeding \$124,000 for the thirty days in January. The factory is running full time, with full capacity, and also working three nights a week until 9 o'clock. When asked how they accounted for this large volume of business under present conditions, the scribe was told that the firm attributed their success to the fact that "Classic Shoes" are in a class by themselves and will compete with the best article made on the American continent, and no doubt the dealers appreciate this fact. The shoes are artistically designed, scientifically constructed, and in the hands of progressive shoemakers. About a year ago the factory was completely reorganized and the machinery re-arranged according to the latest and most scientific ideas in shoe factory operation. This was done to reduce production costs and to provide for an increase in business, which the members of the firm confidently expected would follow. Subsequent events have more than justified the changes made, as, during the last eighteen months, their business has shown an increase in production of sixty per cent., a remarkable record under present conditions in Canada. This factory gives employment to more than four hundred operatives and has one of the largest pay rolls of any shoe factory in Canada."

Over Two Hundred Patents as Leather Substitutes

Majority Have Never Proved a Commercial Success—Cotton Fabrics Coated with Certain Compounds and Afterwards Calendered and Embossed are Used for Many Purposes

In spite of the higher quotations for leather, its quality is decreasing considerably, says J. M. Kessler, in *Fibre and Fabric*. To overcome these difficulties artificial products have been proposed as substitutes for leather for many years. More than two hundred patents have been taken out for this purpose here and abroad, the majority of which either have never passed beyond the experimental stage or have not met with commercial success.

The only manufactured leather that will meet the requirements of the upholstery, bookbinding, novelty, wall paper and similar leather trades as to price, appearance,

uniformity and durability is that which consists of cotton fabrics coated with pyroxilyn compounds and afterwards calendered and embossed in any desired grain or design. The fabrics may be sheetings, sateens, moleskins, drills, ducks, etc., either bleached or dyed to match the coating and sized if necessary.

Alexander Parkes, an English chemist, in the early fifties of the last century, was one of the first to introduce pyroxilyn in connection with oil and resins for impregnating cloth to make it waterproof and pliable. Although the present process of manufacturing artificial leather rests on these old

AN UP-TOWN STORE THAT IS VERY NEAT AND ATTRACTIVE

One of the handsomest shoe stores in Toronto is what is known as the upper Yonge street shop of the Royal Shoe Company, which was opened about eighteen months ago, and is doing a flourishing trade in that splendid business section near the intersection of Bloor street. The store proper is forty feet deep and fourteen wide and there is a large reserve stock room at the rear. The ceiling is twelve feet high and is covered with metal of an attractive pattern. The single shelf system prevails throughout and the cartons are of uniform size with a universal label of pleasing design. The entrance is tiled and the display windows are about nine feet deep with oak panelings and mirrors which serve to set forth the special trims effectively. The door is of oak with

bevel plate glass and also the interior⁷ woodwork, including the individual fitting chairs. At the front is an artistic show case for displaying findings and evening slippers in which a large trade is done. A system of bicycle ladders enables the stock to be reached easily. The cash register and manager's desk are at the rear. C. J. Simpson, who is seen standing on the left, is the manager, and, previous to coming to Toronto, he was for several years in charge of the shoe department of the Hudson's Bay Company at Calgary. He began his career in the footwear line in his home city of Brantford. On the right is seen J. H. Coughlin, his assistant, who comes from Stayner, Ontario. A shoe shine stand is conducted on the premises.

patents it took almost forty years to overcome all the difficulties in producing a flexible, non-adhesive, waterproof coating, which at the same time had the necessary toughness with extreme pliability and plasticity to replace real leather in many instances.

One of the largest customers of artificial leather both for upholstery and tops is the automobile industry. Most of the well known automobile firms which manufacture hundreds of the low-priced popular cars a day have adopted it exclusively. All the other lines of furniture upholstery are using it extensively. Multi-colored effects with dull finish in artificial antique, also called Spanish and mission leather, find ready and steadily increasing markets. Pocket-books, handbags, leather novelties in the cheaper grades are made entirely from the cheaper substitute.

It is especially well fitted for the production of staple leather goods on a large scale, due to its ability to be manufactured relatively cheaply in any modern coloring and graining effect and in unlimited quantity and a uniform thickness throughout. Another great advantage is that it can be sewed much more easily with a machine than real leather of equal thickness. An order for over two hundred thousand pieces of military accoutrements, placed by the French army in the early part of this year, impartially proves that the new product stands the most critical tests and highest demands.

Trunk and suitcase manufacturers are consuming great quantities of this substitute for real leather because of its waterproof properties. For the same reason it is used for sweatbands in hats and caps, for doll bodies, toys, book-binding and wall paper. Most of the government and municipal libraries and public reading-rooms have adopted it as the best existing binding material, especially for hard usage of circulating books and heavy volumes like cyclopedias, atlases, etc. The writer knows of one particular public library where the original binding of over sixteen thousand volumes has been changed to that of artificial leather during the last year.

Whereas in the heretofore mentioned applications of the new product the imitation only of the different grains of real leather is shown, there is a much wider field open for original designs and artistic displays in wallpaper made from it. Railroads throughout Europe are decorated with these newer coverings in simple and multi-colored effects. In this country the use of artificial leather is limited to the upholstery of smoking cars. Several governments have introduced it as wall decoration in living compartments on battleships and in armories. For hospitals and for the household in kitchens and bathrooms, it is especially valuable.

No other wall covering is more sanitary and permanent than this because it is damp proof and can be cleaned easily with soap and water whenever desired. Grease, smoke and atmospheric influences do not affect it in the least. It can be made completely unflammable and so decreases risk in case of fire. The shoe industry consumes the largest amount of real leather and here the artificial leather plays a very important part also. It is used for linings and to make cheap slippers, leggings and gaiters. There are many other ways in which artificial leather may be employed owing to the excellent qualities which give its adaptability a wide scope.

A New Machine for Soling Shoes

There has lately been demonstrated at the warehouse of C. Parsons & Son, 79, Front street east, Toronto, a most important invention for shoemakers and repair shops. It is known as the Gritzner Hand Soling Sewing Machine and is manufactured by the Gritzner Machine Co., Limited, of Durlach, Germany. This device has been the object of

much interest among the repair men and shoe retailers. The apparatus is exceedingly simple and a pair of shoes can be soled by any one in less than five minutes. The Gritzner Hand Sewing Machine is operated on the principle of the sewing machine, only that the motion is produced with the

THE DEVICE FOR SEWING ON SOLES

aid of a handle bar, as compared to other machines driven by a fly wheel. One result is that the operator becomes immediately aware of any hitches occurring during the sewing. It makes a lockstitch and sews with the upper and lower thread. The welt cannot be damaged while sewing because the feeder moves in the channelling. The machine sews the narrowest welts close to the uppers without pushing aside or stopping the needle. It is capable of fine adjustments and occupies very little room. The stitchmaking is the same as with any lockstitch machine—the machine sews with upper and lower thread. To keep the upper thread moist and slippery, it is dipped into a solution of gum tragacanth. For the lower thread, pitch thread is used, which, with the aid of a special Spiritus heating apparatus, can be warmed up, thus making the pitch liquid. By this process the same durability of the seam is obtained as if sewn by hand. The length of the stitch is adjustable up to 6 mm. The needle has a cutting point similar to an awl, and diagonally to the feeding line it produces an oblong hole forming a pearlike stitch and keeping the leather from being sewn off when making short stitches.

The accompanying cut shows the inventor, Mr. Beer, who is a shoemaker by trade, operating the machine in the factory at Durlach, Germany. Karl Goldschmidt and J. Seelig, selling agents for the machine were in Montreal and Toronto and other cities recently.

A. Chadwick, who sold out his shoe business on Gerrard street east, Toronto, some time ago, is going into the shoe repair business and will open a shop on Gerrard street near East Toronto.

Your Very Best Investment Is a Bright Trade Paper

The Man Who Wants to Know What to do to Get More Trade, What to do to Increase His Income and What, When and How to Buy Must be a Reader of Trade Journals—The Clearing House for Ideas

By FRANK FARRINGTON

There isn't anything about making money that gives us a frown. Fond as we may be of baseball, pool or auction pinochle, we like making money better.

They say it takes money to make money, and it's true. If we don't have any money we have to borrow it. Getting into business without capital is like getting into society without clothes. It can't be done.

Have you ten dollars in the bank or in the cash register?

If you haven't, go out and borrow it, because I have something I want you to use that ten for. No, don't send it to me. I've got ten of my own.

You can invest ten dollars right now where it will bring you ten tens, a hundred tens, perhaps more before the year is over.

How many trade papers are you taking? Are you taking ten dollars' worth a year? Are you paying ten dollars a year in subscriptions to trade journals and business magazines? If you are that's all I have to say to you, because you have made your investment and you will get the returns—unless you don't read those publications.

But if you are spending any less than ten dollars a year for trade and business literature you are saving money at a great expense. Every business man *needs* half a dozen trade publications or more. He needs the ideas they contain. His own ideas run out. He puts a mistaken value on his own ability if he doesn't take pains to find out what other people know.

A Dollar Well Invested

Every dollar invested in trade journals that you *will read* is a dollar invested where it will bring you bigger returns than a hundred invested in goods.

Wouldn't you willingly give ten dollars for an idea that would enable you to increase your income, the receipts of your business or your salary a net hundred dollars? Well, if you knew where you could spend ten to that effect, wild horses couldn't hold you back from making the expenditure.

If you have not been spending ten dollars a year for business literature it is for the reason that you do not believe it will pay you as I say it will.

Perhaps you argue that you do take a number of trade papers and that they don't bring you any money. Either you don't read those papers or else you are mistaken. If you read any trade papers regularly, I don't care what it is or whether it is directly applicable to your individual business, it will bring you money, business, success—far more than ten dollars' worth.

A trade paper is not like medicine. The man who reasons that if a dose of medicine is good a whole bottle full will be better is going to poison himself. The man who reasons that if one trade paper is good more will be better is going to put rubber into his heels, enthusiasm into his brain and gimp into his backbone.

The trade paper, the technical publication applied to your business, will put life into it in spite of you unless you throw it in the waste basket without reading it.

A Really Dangerous Habit

And if you don't want to see your business take a jump, don't let any of the people employed around your place get at the trade papers. The employe who gets the habit of reading such literature is sure to want to start something.

Keep the papers of that sort away from the boys, or in a short time you will find they are learning the business faster than you are.

The advertisements alone in one good trade paper are worth a good deal more than ten dollars a year if you study them. The trade press of the country has developed tremendously in class and in independence in the last few years. There are no better informed men connected with your business than those whose opinions and experiences and advice you find in the trade papers connected with it.

The man who wants to know what to do to get more trade, what to do to increase his income, where and what and when to buy for use or for sale in his business, must have the trade papers, or else he will find it utterly impossible to keep up with his competitors.

Why Competitor Forges Ahead

If your competition is getting the better of you, if your business is falling back actually or comparatively, make up your mind that competition is making use of the trade journals. Even if you are not spending ten dollars a year for trade literature and using it, the other fellow is, and *he will get your business.*

If you spend ten dollars this year for trade papers to read—not to fill waste baskets with—and at the end of the year claim you have been unable to get any dividends on the investment, I want to have a talk with you. I have seen many men try the trade journal method of finding out, and I never knew one to fall down. If you can read any trade paper honestly for a year and not make it worth ten dollars to you there must be a kink in your intellect somewhere.

If you won't spend ten dollars, spend five, but when you make that cut in your appropriation remember you can't get ten dollars' worth of good by spending only five dollars, and the second five will pay you better dividends than the first five.

A Shoeman of Wide Insight

A. L. Wright, who has accepted the position as head salesman with the Smith's Falls branch of J. J. Haines Shoe Houses, has had a thorough experience in the retail shoe trade with which he has been connected for the past fifteen years. He was for a number of years with Morris & Co., of Glace Bay, and with Robert Neill, of Peterboro. He has also had considerable experience in Montreal and other centres. Mr. Wright is an expert window trimmer and card man and has devoted much attention not only to the buying and selling end of the shoe trade, but is also an expert on publicity. As a display manager he has few equals and sketches of his work have appeared from time to time in the *SHOE AND LEATHER JOURNAL*. The holiday windows of the head store of J. J. Haines, which is located in Belleville, were dressed by Mr. Wright and were very favorably commented upon by a large number of people. He is a diligent student of everything pertaining to the shoe trade and style problems and has many friends who wish him every success in his new position.

He Started With Less Than \$100

Identified with Winnipeg from its earliest days—away back in 1874—and starting in the shoe business in a small, narrow shop with less than one hundred dollars capital, the career of Thomas Ryan, to-day head of the big wholesale house which bears his name, reads more like a tale in fiction than an accomplished result. Yet this gentleman whose name is almost a household word in footwear circles in the West, has proven himself to have larger interests than his business. He has always found time to engage in works of charity, and last Christmas Day provided a splendid dinner for over a thousand poor citizens of the Prairie Capital. Outside of his closest personal friends no one really knows the extent of the good works done by Thomas Ryan, and one might spend hours with him, yet he would make no mention of his philanthropic efforts. Aggressive and alert in business, he has a warm heart and, if the truth were known, many young men who have in the years gone by come as strangers to Winnipeg, owe their first start in Western Canada to the man who directs the affairs in the big, seven-storey wholesale shoe house on Princess street. Mr. Ryan may well be called one of the merchant princes of the West. For several years he served the citizens of Winnipeg in the capacity of alderman and later as mayor.

A Canadian from the ground up, he arrived in Winnipeg from Perth, Ont., just forty years ago, when the now flourishing capital city of Manitoba was little more than a mere hamlet. He looked around for a shoe shop and find-

ing one in a cramped, badly lighted frame building on the east side of Main street, just a couple of doors north of James street he started in to cobble shoes. But he had pluck and determination to make good, and just seven years later he owned one of the finest and most prosperous retail shoe establishments in Western Canada, if not in the Dominion. This earned for him the title of "Shoe King." Like other men, he had his trials and troubles, financial and otherwise, and in the years of depression which followed the collapse of the memorable Winnipeg boom, he had a keen struggle to keep his head above water. By the exercise of the strictest economy and using all the business ability which he possessed, he managed to weather the storm. Out of the small repair and custom shop grew the live retail business and from the latter emerged the wholesale house of Thomas Ryan & Co., Limited. The expansion has been steady and constant, and to-day the establishment enjoys a trade which compares favorably with any in the Dominion. The presi-

dent is Thomas Ryan, vice-president, George Ryan, secretary-treasurer, T. D'Arcy McGee and T. M. Ryan is a director.

A firm believer of the old adage "that there is plenty of room at the top," Mr. Ryan has always shown an ambition when he took hold of a matter that it should be worked out successfully, and his splendid mercantile career amply proves that close attention to business, combined with thrift and making full use of one's ability will succeed in the West or any other portion of Canada.

The Woman and Her Shoes

Walking up Yonge street the other day I thought I saw an out-of-town friend a few paces ahead of me, and hurried to catch her. When almost within reach of her modish sleeve I hesitated for fear I might be mistaken, says a woman writer in a Toronto paper.

"I know she has a set of furs like that, and her hair is just the color of Ann's," I thought, but something kept me from touching that neat green sleeve.

"She's just the right height, and her clothes are so smart and individual—just like Ann's," I tried to persuade myself, but the hesitation remained.

"Her shoes," I thought, suddenly, "that will settle the matter." So my eyes traveled down the slight, upright figure from the lovely hat to the hem of the perfectly-hanging skirt—and underneath this last they spied a pair of unpolished, unsightly run-down heels! It certainly wasn't Ann, and I slipped back into the crowd disappointed.

Then I began to think about that girl who could have everything else so nice and be so dreadfully "run down at the heels." She reminded me of another girl behind whom I had walked and remarked to my companion:

"What a very smart-looking girl!"

"Ye-es," he said, slowly; "but look at her heels."

Seldom, if ever, before have shoes received so much attention from all classes of women as they do at the present time. Once it was looked upon as being only within the means of the rich to have a large collection of shoes. It may even be recalled that there was a time when the majority of women had but two pairs of shoes, one for "every day" and the other pair for Sundays and other dressy occasions. To-day wage-earners and society women alike have a variety. A young woman stenographer was heard to remark recently: "This is the eighth pair of shoes I have bought this season," and although she may have been an exception, one would judge from those seen on the street that shoes claim a large percentage of the wage-earners' income.

The care given to the shoes is of more consequence than many imagine and one may save several dollars through a year with but slight exertion. If the shoes are low, a shoe-horn is almost indispensable when putting the shoes on the feet to prevent tearing or ripping of the back seam. A shoe tree is an absolute necessity to insert immediately after removing from the feet while the shoes are warm, to prevent the shoes from creasing and becoming misshapen. Shoes that receive even this slight amount of care will repay one by retaining their new appearance much longer than if no attention is paid to them.

When laying patent leather shoes away for a time it is well to oil them to prevent cracking, and in laying white shoes for even a few hours it will be found that if they are thoroughly brushed and then a little French chalk or even cornstarch is rubbed over them it will save much cleaning. This will postpone for some time the first cleansing, after which the shoes seldom look so well. The shoes, of course, must be thoroughly brushed before wearing.

TENTH ANNUAL DINNER TENDERED AN EFFICIENT SALES STAFF

The tenth annual dinner of the staff of the Rannard Shoe Co., of Winnipeg, which was held recently at the new Fort Garry Hotel, was an event that will be recalled with pleasure for many a day by the twenty-six members who gathered around the festive board. The accompanying illustration affords a glimpse of the bright, alert salesmen who helped to make the turnover of the firm during the year 1913 reach the very gratifying sum of nearly three hundred thousand dollars.

The boys from the store at 330 Portage avenue sat around the end of the table nearest the camera and those from 536 Main street are seen at the far end. The employes of the 273 Portage avenue shop, known as the Nickle store staff, were located on the right, while the heads of the firm partook of the many good things provided at their post on the left side of the table. Every member of the staff of the three establishments was presented with a cheque by the company in appreciation of the energy and co-operation which they had shown during the year. Prizes were donated for the highest sales and efficiency. J. Webster, who has charge of the men's department at 330 Portage avenue store and C. P. Nicholls, who is head of the ladies' department in the Main street establishment, were the respective winners. James Waddington, of the Main street store and George Yeager, of the Portage avenue shop, won the awards given for all-round, reliable work and constant attendance.

The Rannard Shoe Co. have named their stores as follows:—No. 1, 536 Main street, corner of James; No. 2, 330 Portage avenue, corner of Hargrave, and No. 3, 273 Portage avenue, formerly the Nickle boot shop, which was acquired a few months ago. C. F. Rannard, head of the firm, occupied the chair at the banquet and made a capable and genial presiding officer, the proceedings passing off amid much enthusiasm.

May We Discount for Early Placing

The rubber footwear selling season will start on March 2nd and the various companies are making preparations to send out their representatives to secure placing orders.

The recent cold weather has had the effect of causing retailers to get rid of a large portion of their stock, which moved very slowly before the holidays, owing to the warm weather. Just what changes will be made in prices this season it is impossible to foretell, as the manufacturers are now engaged in preparing lists. While the price of crude rubber is lower than a year ago, still the cost of all kinds of fabrics is high. It is rumored that while there may be a slight revision in quotations some of the companies, if not all, will revert to the former order of things and allow an extra five per cent. discount for early placing, providing retailers give their orders during March and April, which are the two big selling months. It will be remembered that up to a couple of years ago this plan was followed, but of late it has been discontinued.

Showing Seven New Lasts

J. T. Tebbutt, of the Tebbutt Shoe and Leather Co., Limited, Three Rivers, Que., was in Toronto last week showing a fine range of samples. Mr. Tebbutt reports an active business during the past year and says that the volume of trade was larger than during the previous twelve months. The firm is showing several new lasts, mostly on semi-recede toe and the wide stub toe. The Professor Gold Cross and the Doctor's Antiseptic Cock-of-the-North are still leading favorites with the trade, being made in gun metal, patent and tan. One feature of the Doctor's Antiseptic shoe is that it is waterproof and double-stitched, while the "Professor" is distinguished for its cushioned effect and comfortable fit, being on orthopedic lasts. The firm also makes a nice line in Standard screw and McKay for men, boys and youths, the principal leathers being box calf, tan calf and box kip. The Cadet shoe for boys is also well represented this season and is a decided leader. Mr. Tebbutt was showing several hockey bals, with steel toe protectors. He now holds three United States patents and six Canadian patents on outstanding features in shoemaking, among them being the steel toe for hockey boots which

are made in calf, English kip and box kip. The year 1913 was also the heaviest that the Tebbutt Shoe and Leather Co., Limited, have had in the production of hockey boots.

Veteran in Shoe Trade Expires

McVilvie Durell, of Toronto, who died on February 10th, was widely known to the shoe trade. He was 75 years old and for several years he was manager of the J. D. King Shoe Company, Toronto, and later was proprietor of the Durell Shoe Pattern Company of 12 Lombard street, Toronto, which he sold out a few years ago to A. Stuckey. Mr. Durell was born in South Paris, Maine, on April 1st, 1838, and was educated in Norway. He engaged in the shoe business in Albany for twenty-five years, after which he came to Toronto. He met his wife, who survives, when he was a patient in Albany Homeopathic Hospital, where Mrs. Durell, then Miss Wainwright, was a nurse. Mr. Durell was a member of Bond street Congregational Church.

Higher Leather Prices in Sight

There is some indication of a further rise in the price of leather in Canada. The large exports of cattle to the United States is one of the principal factors for higher prices as this year many more hides will be lost to the Dominion, says a recent despatch from Montreal. Another reason seems to be in the decrease of imports of foreign hides. The last official government figures show that there was a falling off of 10,680,163 pounds, or about 32 per cent., for November, 1913, as compared with the same month of the preceding year. In November, 1912, the importations were 33,041,870 pounds, and in November, 1913, 22,361,717 pounds. The decrease in imports for the eleven months ending November 30th was 75,757,023 pounds, the totals being 275,196,790 pounds for 1912 and 199,439,767 pounds in 1913. During the first three weeks of January this year there was a falling off in the slaughter of cattle throughout the West of fully fifteen per cent., from the same period in 1913. All this, with an increasing population and consequent larger demand, which must be supplied, tends toward still further advances.

Changes in Style of Heels

A pair of white dress slippers, made in Lynn for a bride of 50 years ago, had about as much heel to them as a pair of stockings has. There were no counters nor heel lifts. Some of the old time Lynn shoemakers can remember that when heels came into style years ago enterprising shoemakers fitted up heeling shops and put heels on shoes on contract, just as stitching room contractors stitch shoes on contract to-day, says the Lynn Item.

Little by little the heel of women's shoes has been improved until it has become to-day a very important part of the shoe. The counter, though concealed, is very important. It must fit right, particularly in pumps, to hold the shoe to the foot. The extension counter, a comparatively recent development in counter styles, is intended to make pumps fit neatly under the arch of the foot, and over the ankle. A counter must be of good, substantial material, one that will not easily turn over, also one which the edge will not curl, and tear holes in stockings.

Heels of 72 varieties now are put on shoes in Lynn shops, and there are more to come. The shape of the heel, as well as the fit of the heel, has become very important. So has the method of attaching the heels, for a woman on scabby heels is like a woman walking on stilts. The fit

of a heel is a comparatively new topic in shoe fitting. Though the heel is outside the shoe, yet it must fit the foot. It must be properly placed and pitched, so that one will walk naturally on it.

Heels of shoes have certainly changed much since the days that a pair of white dress slippers for a bride were made in Lynn 50 years ago.

Rubber Manager Goes Wrong

James Wilkinson, who has been acting manager of the Canadian Consolidated Rubber Company's warehouse in Regina, Sask., was charged recently in court with the misappropriation of several hundred dollars of the funds of the company. Fred. C. Young, the Winnipeg manager of the company stated that he was responsible for the Regina office of his company, and that Wilkinson has been sent up there as manager. He stated that Wilkinson was expected to make all collections, deposit money with a local bank, and make daily reports to the Winnipeg office, and for a while after the Regina office was opened all went well. He said that on account of an apparent laxity on the part of Wilkinson, he paid a visit to Regina last November, when he found that there were a number of receipted bills in the office but no cash in the bank to account for them. At that time, however, he had given Wilkinson a chance on account of his wife and family, but matters had not improved. He had visited the Regina office again last month, but had been unable to locate Wilkinson and had found that there was no money in the bank. Wilkinson, who pleaded guilty, was sent to gaol for four months.

Canadian Day at Leather Fair

Final plans and arrangements are being perfected for the Seventh National Shoe and Leather Market Fair to be held in Boston during the week of July 8th to 15th, 1914, and there will be a special Canadian Day for visitors and representatives from the Dominion. The management are much pleased with the progress that has been made to date and indications at the present time are that the coming Fair will be the most successful ever held. Hundreds of concerns have applied for space at the Fair, but there still remain a few very good spaces.

During the same week, the New England Shoe and Leather Association will hold the National Shoe and Leather Week, which was such a success in 1911 and 1912. A large attendance is expected. Shoe retailers who visit Boston during that week will be welcomed, and should find a visit at the fair both interesting and instructive.

Special days at the Fair include: Shoe Retailers' Day, Canadian Day, New England Day, Great Britain Day, Superintendents' and Foremen's Day, etc.

Explosion Started Bad Fire

With a noise that could be heard for blocks, the whole front of the Silvershine Shoe Company's premises at 263 King street west, Toronto, was blown out recently and damage to the extent of \$1,500 was done. Tins of shoe polish were hurled in all directions. Fire had broken out among the chemicals used for the manufacture of the polish, and the smoke was so dense that it caused the windows to be blown out. Once the air got in the building the flames started up and gutted the whole place. The building belongs to the C.P.R., and was to have been pulled down shortly.

More About Cost of Shoes

A recent letter from "Business" which appeared in the press is along the same line as the article on "Misleading the Public on the Cost of Six Dollars Shoes," which was printed in the last issue of the SHOE AND LEATHER JOURNAL. Nevertheless it is worth producing:—

"Many of your readers will misunderstand the article in your paper of January 7th, headed: 'Leather cost \$1.73, but shoe brings \$6.' This heading will give many the impression that there is a profit of \$4.27 somewhere between the manufacturer and consumer. It is admitted that the intention to give this impression was undoubtedly far from your mind. In the first place, anyone familiar with the cost of manufacturing high-grade shoes will recognize the truth in the statement that material alone amounts to at least fifty per cent. more than \$1.73. As a matter of fact, it will be nearer \$2.75. This is the cost involved by the manufacturer in simply bringing his materials together. On top of all this is interest, charges on the investment of his plant, labor, wages and salaries, depreciation and selling expenses.

"The price at which \$6 shoes are sold at wholesale leaves the manufacturer considerably less of a profit than is earned in any other staple industry, such as iron, cotton, or even the handling of raw leather. It is illuminating to learn that the wholesale price of \$6 shoes has not been advanced sufficiently in the last three years to cover the bare increase in the cost of leather. The manufacturers' profit is even less than it was two or three years ago.

"The labor cost amounts to approximately \$1 per pair. Add to this manufacturing, overhead, selling expense, interest and depreciation, and freight to the dealer, and the shoe that this article indicates as costing only \$1.73 already represents an investment considerably more than twice this amount. And this shoe is still in the packing-case at the dealers' freight station.

"Now let us look at the retailer. He must maintain a nice store—he must light it—he must pay his business taxes and clerk hire—he must arrange for delivery of shoes to his purchasers. All these things cost money, and as fairly and squarely a portion of the cost of \$6 shoes as is the leather itself. The mere cost of handling the shoe at retail will add very close to another dollar.

"The margin in shoes is not \$4.27 on the selling price

of \$6. You will have to look elsewhere for the easy money and the fat profits. The Canadian public to-day gets a bigger \$6 worth when he buys shoes than when he expends \$6 almost any other way."

Was the Arctic Invented in Canada?

Joel C. Page, styled the "Grand Old Man of the Traveling Shoe Salesmen," who was in the footwear business for 60 years, writes the "Shoeman" as follows:

"A matter of interest in the early days was a change in the Arctic overshoe style of that period. Thos. C. Wales was agent for a rubber company that made a rubber overshoe with a cloth top, that laced up the front—a clumsy affair, red wool lined. Old timers will remember this overshoe. The common overshoe of the time was a calfskin, with hair on. I sold this sort. A friend of mine in Montreal sent me a pair of overshoes, practically a fac-simile of the present day, cut and style, good looking, easily adjusted and buckled. I went to Montreal, bought 25 cases, 24 pairs to the case. I went to Boston, putting a pair of the new-fangled overshoes in my carpet bag. I saw John H. Rogers and showed them to him. He was much pleased and asked me to send him a case. When he got the case he showed a pair to Mr. Wales, who bought them, took them to his factory and copied the pattern and the idea. This was the first Arctic overshoe about as we know them to-day, and I was the first to bring these into America. This was about 1857. This style has remained, with improvements, of course, in general use ever since."

In this connection it may be remarked that the "Shoeman" recently received a letter from one of its old subscribers, who says:

"The article of Mr. Joel Page in your last issue interested me so much that I am writing you in order to probe the matter still more, if possible. In January, 1883, Lord Lorne (now the Duke of Argyle), who was then Governor-General of Canada, paid a visit to Richmond. While there, I waited on him personally and sold him a pair of Arctics. He told me that an army officer in the Canadian service claimed to be the inventor. So, putting two and two together, it looks as if Canada is the birthplace of the overshoe or Arctic, whichever term you like to call it. Can the matter be probed so as to establish the fact of the real inventor?"

COMMODIOUS NEW SHOE FACTORY OF THE J. W. HEWETSON CO. ERECTED IN BRAMPTON, ONT., WHICH RECENTLY STARTED OPERATIONS

FROM AN ISSUE OF TWENTY-SIX YEARS AGO

"Leather is made by a new process on a large scale in Glasgow and reported to be of excellent quality, also produced at a less cost than the ordinary tanning process. The hides, after being prepared in the usual manner, are placed in a pot containing a weak solution of potassium

treat, dissolved; A. G. McCready, Brockville, deceased; Moore & McGarvin, Acton, succeeded by J. E. McGarvin & Co.; Geo. T. Slater, succeeded by Geo. T. Slater & Sons.

"The latest candidate for journalistic honors is the CANADIAN SHOE AND LEATHER JOURNAL, of Toronto, the 'sole' organ of the trade in the Dominion. It is a "neat fit" typographically, "toes the mark" in the shape of news and promises to "last."—Kingston Whig.

"A few days ago while the employes of Shaw Bros. & Cassels, Montreal, were away at dinner the third floor of the establishment collapsed under the weight of leather—a

H. P. Blachford, President of H. & C. Blachford, Limited, Toronto, who have been in the retail shoe business for fifty years—a splendid record.

dichromate, alum and sodium chloride, and are afterwards transferred to others pits containing stronger liquors. After removal from the pits the hides are immersed in a solution of barium chloride, in order to neutralize the action of any dichromate potassium that may be remaining in the hide; they are then passed through clean water and dried."

"At the present time much talk and many bitter invectives are being indulged in as the result of recent collapses in banking circles. It is to be deplored that so many bank suspensions should follow each other so closely."

John Barron, Toronto, retiring from business; Buehaupt & Lavfer, Berlin, dissolved; Beaudry & Co., Mon-

C. E. Blachford, of the firm of H. & C. Blachford, Limited, Toronto, who was among the earliest subscribers of the JOURNAL in 1888 and reads every issue.

reflection on the present state of trade, which results in large stocks of leather."

"Tolls are still collected on some of the wagon roads in Canada."

"The thirteenth annual meeting of the Canadian Manu-

facturers' Association was held on Monday, February 6th. According to the secretary's report the output of Canadian factories was estimated at about \$650,000,000 for the previous year. The following officers were elected: President, W. H. Storey, Acton; 1st vice-president, Saml. May, Toronto; 2nd vice-president, R. B. Rosamond, Almonte; treasurer, Geo. Booth, Toronto; secretary, Frederick Nicholls, Toronto."

"Mr. C. C. VanNorman, the well known traveler for Cooper & Smith, has severed his connection with that firm and become a partner in Orr, Harvey & Co., of Toronto, late of Hamilton, Ont.

"Ph. Jacobi, Toronto, having purchased the tannery recently run by James Moore, Acton, Ont., is enlarging it previous to commencing the manufacture of cordovan on a large scale.

"Henry Porter & Co., whose premises on Visitation

Louis Cote, retired shoe manufacturer, St. Hyacinthe, whose younger brothers now conduct the business of J. A. & M. Cote. Mr. Cote says: "I am glad the old timers are not being forgotten by the JOURNAL."

street, Montreal, were recently completely destroyed by fire, have been running for some time as to the tannery and belting factory. The boot and shoe factory has also been completed and they are now fully prepared to fill all orders for fine boots, shoes and slippers." (Mr. Henry Porter, who died somewhat later, was succeeded by Thompson & Savage and this concern, as well as Porter & Co., have for years been out of existence. Both will be remembered as old advertisers of the Journal.)

"Like Banquo's ghost, the alleged rubber trust will not down, as evidenced by the following despatch given currency in the daily papers of February 7th: The formation of the great proposed rubber trust is now a question of only a few days. The committee appointed to settle the difficulties between Christopher Meyer and the others with regard to the New Jersey manufactories has effected a compromise and will propose a plan of organization at a meeting to be held within two or three days. By this plan all manufacturers of rubber goods who wish to join the trust will pool

their own stock and turn it over to the central company in exchange for certified shares of the trust in proportionate value. Those concerns which can manufacture rubber goods at the lowest rates will be continued in operation, while the

S. R. Wickett, of Wickett & Craig, the veteran leather manufacturer, Toronto, who advertised in the first issue and is as active to-day as ever.

other will shut down. These different factories kept in operation will make different grades of goods, with the result of making more goods with less labor and at a much smaller cost. Instead of eight and nine per cent. profit, as

John A. McPherson, Hamilton, who was the first shoe manufacturer to use the back cover of the JOURNAL and the first to make use of shoe cuts.

at present, the firms interested will then be able to realize on 15 per cent. profit annually. The formation of this trust will have three great results. The profits for the producers will become higher and several thousand workmen will be thrown out of employment without any other resources to fall back upon. The combine involves a working capital of \$50,000,000 and an annual trade of \$100,000,000." (The

above will afford food for thought to those familiar with the history of the U. S. Rubber Co.—first as to the promised profits, which never materialized; and as to the centralizing of the industry, in view of the fact that there are more and larger rubber factories to-day outside the trust than in it.)

"A wail is reported from an English manufacturer who says: "The boot trade is passing through one of the most important periods of its history. Competition is keener than ever and houses that have a large capital to play with seem to make a point of turning out thousands of pounds for the sake of seeing how many dozens they can turn out per week rather than the idea of making a profit."

"There is an over-production of black leather, prices are low and stocks are accumulating. Manufacturers are slow to take advantage of low prices on both upper and sole. Spanish sole is quoted 19 to 23 cents; No. 1 slaughter, 23

S. N. Sterling, managing director of Sterling Bros., London, who have been in the jobbing and shoe manufacturing line for many years. Everybody knows "Sam" Sterling.

cents; medium upper, 33 cents; pebble, 10 cents; splits, 13 to 16 cents. Buffalo hides are quoted at Chicago 7 to 7½ cents; South America hides 17½ cents.

"We do not hesitate to strongly urge all our Canadian shoe dealers to adopt at their earliest convenience a specialty shoe and to seek control of it for their town. The shoe stocks of the United States are being revolutionized at the present time, and the revolution is being caused by the crying need of the hour is less lines to manufacture, fewer lines to retail and less stock to carry."—From article on "Specialty Shoes," by Charles Doney, of Ottawa, written for the *SHOE AND LEATHER JOURNAL*, February 1888. (Mr. Doney, who died two or three years later, was a well known Ottawa retailer who contributed regularly to the *SHOE AND LEATHER JOURNAL* as well as to a number of American publications on shoe trade topics.

James Acton

A Profitable Nuisance

"Shoe repairing is a d—blamed nuisance," grumbled the manager, adding up his profits for the month. Let's see—9 per cent. of \$50 is—is—\$4.50. Humph! Don't pay to bother.

The manager was a bright young man, striving earnestly to "make good." He was given all sorts of latitude and opportunity to work out distinctive ideas of his own for the betterment of the business as a whole, but some how or other the petty, trivial affairs seemed to occupy his time far more than the big reforms he had planned. Just now the time consumed in figuring repairing accounts amounted to several hours.

With only a few minutes until lunch time, the manager picked up a copy of his trade paper and scanned the contents with a practiced eye. By luck, or otherwise, he was attracted to a brief article bearing the caption, "Repairing for Pleasure and Profit." He read it hurriedly. Then again with more care. It related, in brief conversational form, the manner in which a skeptical retailer gained success through the installation of a repairing department. Intensely interested because of its connection with his own problem, the young fellow perused the article for the third time.

"By jove!" he exclaimed, "it might pay. But there are repair departments and repair departments. Should I open one, it must be of the right kind. Modern methods is the watchword in this game."

So he came to watch for his trade paper each week and read eagerly everything relating to shoe repair departments. And as the time passed, original plans formulated themselves in his active brain and mixed with the basic principles as expounded in the journal of his choice.

When these plans had matured to a point of real value, the manager opened a repair department. It's value was immediately noticeable. Not only did it keep customers in closer and friendlier contact with the store, but it likewise yielded a material profit worth boasting about. Many business building plans were worked in conjunction with the extra department, and always were glowing profits born to blush with pride upon their fond originator.

As business grew so did the manager likewise. The owner was compelled to notice his useful capabilities. Daily were more responsibilities placed upon him and daily did he meet them with the aid of brains and his trade paper. To-day he is president of the company; all through the realization of how profitable some nuisances really are.—The Shoe Retailer.

Rubber Company Extends Operations

H. R. Hamilton, who has been assistant manager of the Montreal branch of Gutta Percha and Rubber, Limited, for some years, has been appointed manager and has entered upon his new duties. He succeeds W. H. Galt, who has been general sales manager of the company for some months. The company have recently opened a new branch in Regina as well as one in Edmonton. The annual meeting of Gutta Percha and Rubber, Limited, was held in Toronto last week and satisfactory reports were presented for the past year. S. T. Warren was re-elected president, Trumbull Warren, treasurer, C. N. Candee, vice-president and general manager, R. H. Greene, secretary and manager of the shoe department. W. G. Fowler, of Calgary, A. G. McKenney, Vancouver, H. D. Mewhirter, Winnipeg, as well as the Montreal representatives of the company were in attendance.

Shoeman Has Good Civic Record

Among the shoemen who were returned to municipal office by the electors last month was J. Hessenauer, of Berlin. This makes his second year in the city council, and that his course during 1913 was active and progressive is attested by the large vote which he polled. He began his experience in the shoe business in 1879, when he pounded sole shoe leather and used an awl and wax thread. His first position was with W. H. Snyder, who conducts a general store in Mildmay, where he took charge of the shoe department. Later on he acquired the stock and continued to do a thriving business in that village, which is located in Bruce county. In 1902 Mr. Hessenauer removed to Berlin, after being in business in Walkerton and Port Elgin, and took a position with the Berlin and Merchants' Rubber Companies. Ten years ago, he bought out the Market Shoe Store, then owned by E. W. Becker, and in the last decade he has built up the business to five times the volume that it was when he acquired it. A few years ago, he took his son, Wm. F. Hessenauer, into partnership with him and the business of John Hessenauer & Son is well known to-day throughout Waterloo county, the firm carrying a very large and representative stock.

The Value of Circular Advertising

A writer in System has a very interesting article which is explained as "A Waste Basket Inquest," held over the third-class mail sent out by fifteen manufacturers.

If this investigation was carefully and honestly made,

the conclusion is that a very small percentage of the circulars and catalogues sent out to large houses ever reach the person for whom they were intended.

For instance, in a large department store, the mail is first sorted into departments and again looked over by an understudy for the buyer in this particular department. The writer says that only about five per cent. of this mail matter reaches the head of the department. The investigation among general stores indicated that merchants give the most attention to firms offering to send their merchandise on approval.

This whole investigation strengthens our belief in the trade paper as a medium for reaching the actual buyer in factories or stores. A publication built on merit, paid for by the buyer himself, who has the publication addressed to himself personally at the factory or at his home, is much more certain of being read than the ordinary circular or third class mail.

This has been the experience of the large advertisers in all lines. Unless you can get up something out of the ordinary which will attract attention, it is much more profitable to spend your money in trade papers of recognized merit.

Repairing Bent Down Counters

An "all leather" counter can sometimes be made to conform again to the shape of the heel of the foot after it has become bent down by using slightly dampened, hammered, and placed over a form to dry thoroughly. Combination counters rarely stand for treatment with hot water, and cold water produces only indifferent results, so that little can be done aside from hammering the counter and moulding it to the proper form by manipulation.

A SHOE STORE THAT IS DECIDEDLY ATTRACTIVE

The front of the Neill Shoe Store, Guelph, is one of the handsomest in Western Ontario. The base is of marble, while the glass is held in position with ventilated metal sash. The floor is of quarter-cut oak, while the background is of Circassian walnut with bevelled glass. The entrance is beautifully tiled and the doors of quarter-cut oak are set with heavy bevelled glass. There is a two hundred candle power light used in the entrance and in each window are

four lights of one hundred candle power each, so that the store front is brilliantly illuminated. Inside are more lights of one hundred candle power each. The premises are one hundred feet deep by twenty-four wide. The layout is particularly attractive and uniform cartons add to the inviting character of the establishment. There is a cash carrier system and all other conveniences. H. E. Cosford is the energetic manager.

Three Fine Buildings Completed

The Canadian Consolidated Rubber Co., of Montreal, have recently completed warehouses in Calgary, Edmonton and North Bay.

As the volume of business increased year by year, the company became more impressed by the lack of facilities for handling the sorting trade in a satisfactory manner, and

THE NEW CALGARY WAREHOUSE

decided to relieve this handicap by establishing distributing points in all the leading centres.

With the completion of the last three named, the firm now have a chain of branches extending from coast to coast. They also recognized the importance of North Bay as an important distributing centre in the heart of New Ontario. For this reason a modern fireproof building with all conveniences was erected in that progressive centre.

The new Calgary warehouse, which measures 75 feet by 109 feet, consists of five storeys and basement. The

THE NEW EDMONTON WAREHOUSE

front is of red pressed brick, with trimmings of Calgary sandstone. All stairways, elevator shafts and vaults are fireproof and the building is equipped with fireproof doors.

The Edmonton warehouse is also built along the same lines as the Calgary building. As in the instance of the former, care has been taken with the latter to make it proof

against fire. The office is on the first floor as well as the shipping department, while the remainder of the building is taken up by loose stock, packing room, sample rooms, and storage. Elevators are conveniently located. In both Calgary and Edmonton the warehouses are located within a few minutes of railway depots and express offices.

The firm is lucky in having been able to obtain live, energetic managers for the new branches. J. H. Jamieson, a brother of R. E. Jamieson, general sales manager of the company, has charge of the North Bay office, while C. H. Himburg directs the affairs of the Consolidated Rubber Co. in Edmonton and A. C. McGiverin in Calgary.

The Upward Price of Leather

E. D. Arnaud, Canadian Trade Commissioner at Bristol, England, in reviewing the leather business for the past year, writes the Department of Trade and Commerce, Ottawa, as follows: "During 1913 the position of the leather trade has been one of great difficulty to tanners and boot manufacturers on account of the rapid and unprece-

THE NEW NORTH BAY WAREHOUSE

ded advances in hides of all descriptions and the consequent rise in leather, although the finished article has never reached quotations adequate to the advances of the raw material. At the end of 1912 it was generally held that hides and leather, having reached 'record' prices, could not advance, but this view has proved erroneous, and 1913 has seen hides at figures never previously attained, while leather has not followed the upper movement to anything like the same extent. The advances in hide prices have been caused by a world shortage of cattle and the various uses to which leather is now applied."

The Relindo Shoe Co., Toronto, have removed their offices and sample rooms from the sixth floor at 126 Wellington street west, Toronto, to 130 Wellington street west, where they have nicely fitted quarters on the third floor, which are more convenient to the manufacturing plant, all the departments now being in the one building. R. F. Walker, Montreal, has been appointed sales manager for the company in that city, Quebec and the Maritime Provinces and has opened a sample room at 85 Bleury street. J. S. King was in Montreal last week making the necessary arrangements.

Inexpensive Background and How It May Be Built

By CHARLES S. EDGAR

A shoe merchant in a small Western Ontario city recently put in new backgrounds in his two show-windows. Before undertaking the job he had hesitated because of the expense. Talking the matter over with a friend one day, the friend suggested that instead of using expensive lumber, he could get a good effect by using wall-board. This was done, with the result shown in Figure 1.

A frame was made of dressed lumber one inch thick. A drawing of the frame is shown in Figure 2, which is clear enough for anyone to follow. The side end pieces marked B were two inches wide and one inch thick, the cross piece marked A was six inches wide by one inch thick. This cross piece was made wide so as to support the shelf shown in Figure 1. The corner braces were cut from waste, so as to keep the cost down as much as possible, and were not cut to any given size. The slanting braces also marked B were two inches wide. It is not necessary to give any further dimensions, as you would have to go by the size of the window to be boarded in.

When the frame was completed it was covered with wall-board. The panelled effect was secured by cutting openings in the wall-board, and glueing slightly larger pieces to the back of them. The painted scene was done on a piece of wall-board and lightly glued to the back of an opening as was done with the other panels. This was not fastened very strongly in place, as it is the merchant's intention to change the scene every season, so that it will always be in keeping with the season of the year, and also with the goods on display. After the wall-board was in place the shelf was made and put up. This shelf was made of inch lumber, eight inches wide, and a moulding was nailed around the edges to finish it off. This completed the background, which was then given two coats of white enamel and allowed to become thoroughly dry before any goods were put in the windows.

From the description and drawings given here anyone should be able to build a similar background. It is possible that this background could have been improved on, still

frame with wall-board, but the side which faces the interior of the store need not be panelled. It would also be necessary to build a ceiling for the window to keep the dust out.

FIGURE ONE

This could be done with wall-board at a very slight additional cost, as all that it would be necessary to add to the frame, would be the strip at the top, as shown by the dotted lines in Figure 2, to act as a support for the ceiling.

Overlooking An Opportunity

It may appear like getting back to the kindergarten days of the retail shoe business to advocate shoe repairing in retail shoe stores, yet the fact remains that this feature of the shoe business has been responsible for much of its success, measured from the standpoint of dollars and cents.

There are many readers of the *SHOE JOURNAL* who own well equipped to repair shoes, and who conduct the business on a profitable basis. But there are others who have allowed the business to be coralled by the specialty-quick-repairman without making any effort to stop him.

There is a profit in repairing shoes. If there wasn't the country wouldn't have been dotted with the while-you-wait-repair-shops. There is perhaps a larger margin of profit to the specialty repairers than would come to the repair department operated in connection with a retail shoe store, but to the latter there is also the unquestioned advantage of the department as a means of drawing people into the store to buy new shoes. Anything legitimate that will draw people into your store is worth something and the shoe repair department means just one more way of "getting them coming."

The argument has been occasionally advanced by retailers that the "free lunch fiends," or in other words, customers who expect minor repairs without paying for them, eat up all of the profits.

This isn't so. Those people who come back for some little job of free repairing are not, and shouldn't be considered "free lunch fiends." The shoe dealer ought to class them as friends. They come back to help him make good, and he ought to be delighted to have the opportunity, for those same people if they hadn't come back would very

FIGURE TWO

when you consider that it was the object of the merchant to build a background at as little expense as possible, and still have one that would be in keeping with the other up-to-date windows in the city, you will admit that he succeeded.

To use this idea in a window that has not a permanent background it would be necessary to cover both sides of the

likely have nursed their grouch and gone elsewhere the next time they wanted new shoes.

Let us consider other advantages. First, of course, (that is the usual way), is the opportunity of getting more profit. Then there is the repair department as a drawing card. There are probably other advantages, but those mentioned are quite sufficient.

Whenever the repair department is absolutely impossible, retailers are frequently enabled to make arrangements to have some shoe repairer handle their work and pay them a commission. The proposition is of too great importance to be overlooked.

How Shoe Repair Man Succeeds

By using the best of leather, executing first-class jobs, having the work ready when promised, and getting cash for all repairs, B. W. Brown, of Belleville, Ont., has made a decided success of the business. He started to learn his

trade sixteen years ago in Liverpool, Eng., and after serving five years opened a store in the seaport city, which he conducted for two years. He then thought he would like to learn something first hand of the good things that Canada offered to everyone who is willing to work and do the right thing. He landed in Belleville in August, 1907, and started to work for the Gorman Shoe House as shoe repairer. About a year and a half ago he bought out the repair department and removed it a few doors around the corner, where his customers followed him, and to-day at 6 Bridge street west, he conducts a live, busy shop. Mr. Brown has three men who are constantly employed by him and are all seen in the accompanying picture.

The Final Style of a Shoe

The thickness of the insole has much to do with the final style of the shoe. Take the same pair of lasts and use different weights of insoles and you will be surprised at the great difference in the final results. The same is true to some extent of other findings entering into the making of the shoes. Workmanship has also much to do with the final results. Take the same style of lasts, send them to foreign countries, or even from the Eastern States to the Western States, and you will see a great difference in the appearance of the finished shoes. Strange to say, but the best, most skilled workmen are in factories making cheap shoes, for it is workmanship that sells cheap shoes.—American Shoemaking.

Cheap Shoes That Will Hold Shape

When shoes are made to be sold at a low price, or when they are classed as cheap shoes, there is generally more or less veneering done on the bottoms. Veneering is a thing

not understood by many outside of sole leather departments, but the one great reason why this operation is performed is to make the bottom look heavier, says Shoe Topics. There are many light soled shoes made largely in women's shoes that would not be at all satisfactory if it were not for the veneer used. The soles are too light and soft and if they were run through the shop, as McKay soles, they would never get to the treeing room and be classed as satisfactory shoes. The effect of veneering such soles is to stiffen them and hold them together so that they will not have the appearance of a cheap shoe.

On real cheap shoes it might be said that the stock fitters have to make the soles, so to speak. They have to do more work on soles of this kind than on any others. Fifteen and twenty years ago there were no such soles run in women's shoes as outsoles, for in that time manufacturers did not think of using that kind of bottom stock in shoes except in very rare cases.

The kind of veneer a sole needs depends entirely on the sole itself. If it is a poor sole it will take a heavy veneer, for if a light veneer is put on it will not make the sole quite so stiff. If the shank is skived out, which is generally done, it makes the forepart look much heavier and often gives a single sole the appearance of a half double in a McKay shoe. However, there are not many single soles in low cost bottoms. A single sole put into a shoe, and with no veneer, must be strong enough to hold itself.

Popular Shoe Man Bereaved

The many friends of John Orr, of the Yale Shoe Store, Winnipeg, sympathize with him in the death of his stepfather, Hugh Lilburn, who passed away recently at the age of fifty-two years. Mr. Lilburn had many friends in Toronto, where he was on the police force for nearly twenty years. Owing to ill-health he went to Winnipeg some years ago, but improving very little he took several trips to Ireland which resulted in some benefit. In November last he left again for the Emerald Isle and attended an open air meet-

ing addressed by Sir Edward Carson against Home Rule. The doctors say that the excitement was too much for him and hurried him away. His people cabled for Mrs. Lilburn, but he died before she arrived. The accompanying picture shows Mr. Lilburn, his wife, who is the mother of Mr. Orr, and Mr. Orr's oldest child. The picture was taken at Mr. Orr's home just a few days before Mr. Lilburn left for Ireland.

How to Arrange Shoe Stock on the Shelves

Different Systems for the Various Stores—Necessary that Size and Width be Placed on Every Label—Have Every Line of Goods Arranged in Same Manner Throughout the Shop

By A. E. EDGAR

The arrangement of the stock on his shelves means a great deal to the merchant. A proper arrangement will save time, a very valuable thing in business, it will prevent loss of sales, something even more valuable, and it will save the firm from losing prestige among its customers.

If a clerk, or merchant cannot readily find the goods that are in stock the customer goes away dissatisfied with the store and with a very poor opinion of the management. Perhaps every merchant and every clerk can recall instances where they have gone from one part of the shelving to another in a vain hunt for a pair of shoes that they were sure were in stock, but which they could not find. This can be obviated by a proper system of placing the goods on the shelves.

The size of the store, the class of trade catered to and the kind of stock carried will have a bearing on the system that should be adopted. In a classy store where only a few

topmost shelves contain the surplus stock, which should be arranged just as systematically as the "selling stock." In this arrangement the lowest carton at the right will be a 2½A, or the smallest size carried. If the line starts with 2, then that size will be first. After all the stock sizes of the narrowest and smallest size are placed side and side, not above each other, the next width is placed alongside of these and so on.

The second carton from the ledge will be the next size, and as illustrated will be size 3. The narrowest width is placed to the right and the widest to the left, always. In this arrangement of the stock any man can go to the shelves and find a size, providing it is there.

It will be noticed that on the third shelf above the ledge that there are two rows marked "open row." These rows are given over to all stickers and odds and ends, all lines to be closed out, and in some stores are marked with a P. M. as an inducement for the clerk to remember to sell them first.

This arrangement of the stock has been found to work very well in some stores. It is an ideal system for any store

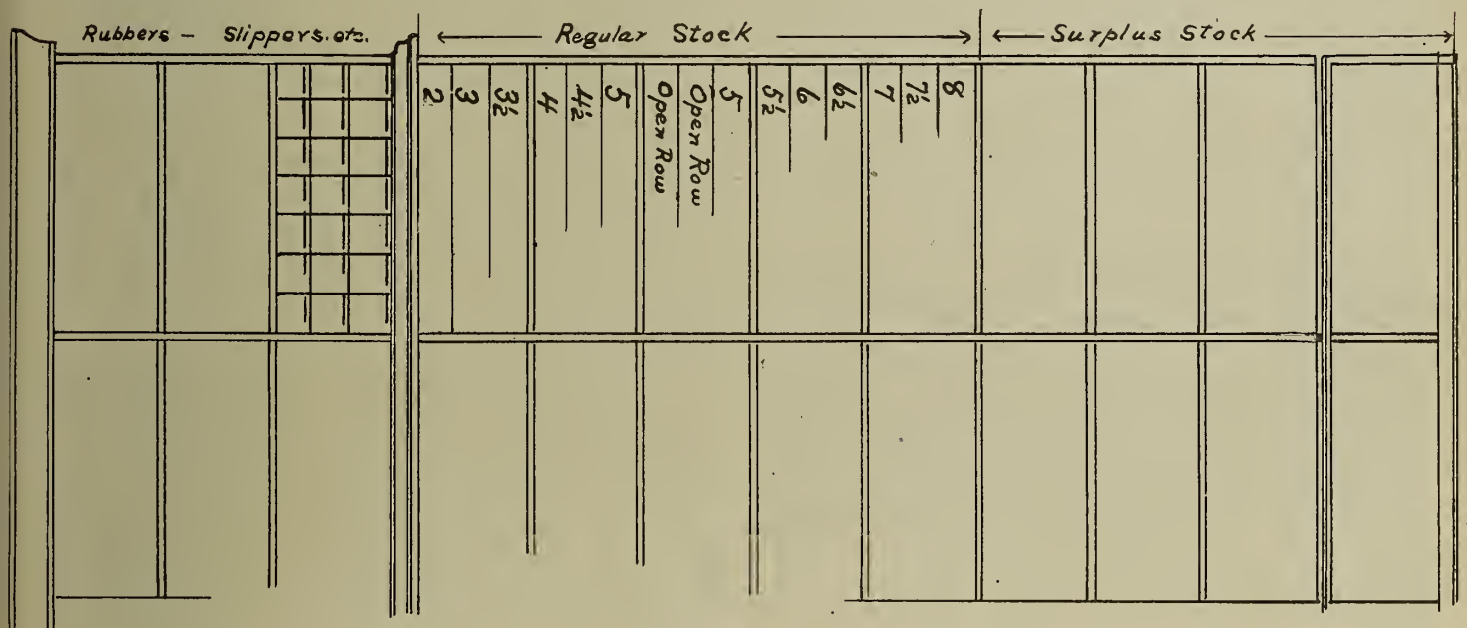

FIG. 1

lines and grades are carried the manner of placing the stock on the shelves must differ from the store that is crowded for room and which carries everything from a dress slipper to a plough shoe.

In Fig. 1 we illustrate a style of shelving that is common in many shoe stores that carry all grades of shoes. The variety is so large that it is necessary to run the shelving to the ceiling and use ladders to reach the topmost rows.

This shelving lends itself to almost any arrangement of the stock. As illustrated, it is arranged for the running of sizes across the shelves and placing the reserve stock above a certain line, or shelf. Let us consider this arrangement first of all.

The shelves below the ledge, three in number, each holding three cartons, are used for rubbers in their season, for slippers and pumps in the summer. The five shelves immediately above the ledge are filled with regular stock. The four

that has not too many lines or too many odds and ends. It helps to get rid of the odds and ends if followed closely.

The stock is divided into certain classes. Women's will be divided into lace and blucher, as one class, and into button as another. Low cuts are treated as a third class. These classes are again divided into sub-classes. The lace and blucher class will be divided into "kid," "dull," "patent," "tan," "fabric," etc., according to the foibles of the day. The other classes are similarly sub-divided. The sub-classes are again divided into prices if there is sufficient stock to warrant that.

As a usual thing the best grade of shoe is kept to the front, and is placed first on the shelving, nearest the front of the store. This is followed by the next grade, and so on until the class is exhausted, when the next class is started with the same arrangement.

It is not a hard thing to follow the arrangement of Fig.

1 when the reserve is kept above a certain shelf. In this case it is not necessary to have more than one pair of a size and width of any line on the selling shelves, although there may be occasion to have more to keep the shelves filled up. If, for instance, there are no 5C of a certain line it will leave an empty space not to have that size represented, so if there are more of size 5B, or size 5D, an extra pair of either of these is placed on the shelf until such time as there are others to take its place.

FIG. 2

Where Top Shelf Can Be Reached

In Fig. 2 there is shown a style of shelving becoming more common where there is space to permit of it. The shelving is built just high enough to reach the topmost box comfortably. This must not be over 80 inches high, or a short clerk will have to carry around a stool to reach the top shelf. If it is necessary to have the shelving a little higher the base may be made to extend a few inches to serve as a step for the salesman to stand upon.

FIG. 3

In Fig. 3 is shown an arrangement of stock that has proven very satisfactory to many merchants who have tried it. This is an arrangement that is best for the overstocked dealer, and he is in the majority. Any merchant who is crowded for room in any way will find this arrangement of the stock a good one as it is an easy matter to follow the stock until the proper item is reached.

In this arrangement the best grade of each class starts the section, and as before the smallest size and width is placed at the extreme left of the lowest shelf. But note this—the next size is placed above this and so on. This is called the "up and down" method of placing the stock. The arrow-heads indicate the direction in which the sizes run.

The great drawback to this method is in the labor that is necessary when a new line of goods are received. This can be lessened to some extent by having a shelf or two at

the top of the fixture for a reserve, or semi-reserve stock, in which are placed all new lines received. Then when the weekly rearrangement is made these lines are put into stock.

This up and down method is easily followed by "extra clerks" who may come in during the busy season, or on Saturdays. After we have all the best grade of the class in the fixture we start with the next grade and place them on the shelves in the same manner. The "extras" can easily find a shoe of any price and size by following along the sizing of the shoes until he comes to the right number. It might be said, in further explanation, that all \$5.00 shoes of a class are first placed, then the next grade, which is usually \$4.50, then the next which is usually \$4.00, and so on.

Is the Description Explicit?

It is one thing to place the cartons on the shelves so that the sizes may easily be found, but it is quite another thing to have the description on the carton so simple and so explicit that any one can tell what is inside of the carton. In a small stock, consisting of a few lines the stock number may be made to tell all that is necessary, but in a varied stock consisting of nearly every line of shoes worn the description must be used to aid the memory of the clerk.

It is absolutely necessary that the size and width be placed on the label. The price should also appear. The necessity for a short description of some kind is present in most stores. This description may be merely an abbreviated reference to the leather, style of toe, and of any peculiar characteristic of the shoe. The following descriptions are complete and are easily read by almost any shoeman. "Kid But Turn Pat Tip Mil." "D Cf Bal M S Rec Toe Cub." "Pat Blu Nob."

Some stores have adopted a series of sample numbers that will describe the leather, manner of making, price, whether men's, women's, child's, etc., style of toe, kind of tip, etc. This is a good enough system in a small store or when the clerk sells only in one department, but in a large store where the lines are many, and the clerk sells all over the store, the descriptive label is best.

Do Not Forget Mate Number

Every carton should be marked with the mate number of the shoes, and each shoe should be marked accordingly. If this method of marking is carried out there will be no mismates and the stock can be put back on the shelves by a boy who knows nothing whatever about the goods or arrangement at all. To make it possible for him to do this all that is necessary is to take the shoe needed from the carton and placing the cover on the bottom put it back on the shelf in its proper place, but extending about three or four inches beyond the others. A boy can mate them according to the mate numbers then.

Each merchant will have to decide for himself which system will suit his business best. He is wise to try out the different systems, but when one is adopted it is unwise to continue experimenting, or to have more than one plan of arrangement in the establishment. Have every line of goods arranged in the same manner, throughout the whole store.

A correspondent from Lower Rose Bay, N.S., says: "I live in a sparsely settled district and do only a small amount of business but I find the education that I receive from the SHOE AND LEATHER JOURNAL has paid me dozens of times the subscription price. Your articles on selling prices of goods and computing the margin of profit are to the point. I am more than pleased with the paper and would not be without it as long as I am doing business. It keeps me posted on the changes in styles and what is selling in the trade."

AMONG THE SHOE MEN.

J. B. Semple, of Carberry, Man., has started a new shoe store.

O. Brunet, of Eagle Shoe Co., Montreal, was in Boston recently.

The Guarantee Shoe Co., of Montreal, was recently registered.

D. Pfaff & Son have opened a shoe repair shop in Zurich, Ont.

The shoe store of J. W. Davis, of Duncan, B.C., has been closed.

Geo. G. Gales, of Geo. G. Gales & Co., Montreal, was in Ottawa last week.

E. Tremblay, shoe manufacturer, Quebec, was in Montreal last week.

Brisset & Yungblut have commenced a shoe business in Vermilion, Alta.

J. E. Dupre, of Montreal Box Toe Co., Montreal, was in Quebec recently.

Mr. De Latinville, jobber, of St. Hyacinthe, Que., was in Montreal recently.

James Heffering, of Toronto, spent the past week in Montreal on business.

The stock of Ferdinand Ludwig, shoe dealer, Montreal, was sold by the bailiff.

H. D. Wing, of the Kaufman Rubber Co., spent a few days in Toronto last week.

The assets of Hermas Pelletier, shoe merchant, Montreal, were sold recently.

Ed. R. Lewis, dealer in leather, Toronto, was in Montreal last week on business.

Philip Pocock, president of the London Shoe Co., London, was in Toronto recently.

Mr. Woods, of Rousmaniere & Williams, Boston, was in Montreal and Quebec last week.

Nap. Tetrault, of Tetrault Shoe Manufacturing Co., Montreal, was in Boston recently.

F. H. Meinzer, of the Miner Rubber Co., Montreal, spent a few days in Toronto last week.

The Rena Footwear Co., Montreal, have installed several new machines in their stitching room.

Chas. Campbell, Canadian manager of the Boston Last Co., Richmond, was in Montreal recently.

The Electric Shoe Repair Co., of Saskatoon, have disposed of their business to F. A. Robinson.

Peter Chouinard, of J. I. Chouinard, Montreal, was in Toronto, Hamilton and London last week.

The Wayland Shoe Co., Montreal, have installed considerable new machinery in their factory.

H. C. Parker, of Dominion Supply Co., Montreal, was in Toronto and other Ontario cities recently.

T. E. Vanstone, of the T. E. Vanstone Co., Yorkton, Sask., was in Toronto last week on business.

S. J. Ray, dealer in shoes and harness, Gainsborough, Sask., has been succeeded by F. H. Reynolds.

H. D. De Villers Sale Co., wholesale and retail dealers in boots and shoes, Montreal, has been registered.

The annual provincial convention for Ontario of the Retail Merchants' Association of Canada will be held in Toronto on Wednesday and Thursday, February 25th and

26th. A large number of delegates are expected, including a liberal representation of shoe dealers.

H. H. Lightford, manager of the Perth Shoe Co., Perth, Ont., was in Toronto last week for a few days.

J. A. Adams, of the Murray Shoe Co., London, was in Montreal last week for a few days on business.

H. R. Emery, of Blachford, Davies & Co., Toronto, spent a few days last week in Ottawa on business.

R. F. Foote, manager of the Independent Rubber Co., Merritton, was in Toronto last week on business.

E. Lepine, manager of O.B. Shoe Co., Drummondville, was in Montreal the latter part of the past week.

The National Repair Shops have opened a shoe repairing establishment at 1207 Bloor street west, Toronto.

Mayers & Davidson, of Calgary, dealers in boots and shoes, clothing, etc., recently suffered from a fire loss.

The stock of Samuel Wagner, boot and shoe merchant, Montreal, was damaged by fire, but it was fully insured.

Oliver Lord, of the Rena Footwear Co., Montreal, was in St. John's and St. Hyacinthe last week for a few days.

E. P. Mullarkey, superintendent of the William A. Marsh Co., was in Montreal on a business trip last week.

G. A. Keiffer, of Keiffer Bros., Montreal, manufacturers of boot and shoe machinery, passed away last week.

Roland Johnston, merchant, of Port Hope, Ont., has opened a shoe department and laid in a well selected stock.

E. O. Weston, of F. J. Weston & Sons, Toronto, has returned from a trip to Montreal and Quebec on business.

The Murray Shoe Co., of London, Ont., will shortly open a ware house in Montreal where stock will be carried.

John T. Tebbutt, of Tebbutt Shoe and Leather Co., Three Rivers, was in Montreal for a couple of days recently.

F. A. Labelle has been appointed curator in the estate of Z. Raymond, shoes, dry goods, etc., St. Cecile de Masham, Que.

Hugh White, of Garside & White, Toronto, has returned from a business trip to Montreal, Quebec and Boston.

The partnership in the Grey Pattern Co., Montreal, has been dissolved. L. C. Jones is continuing the business under the same style.

Hector Dery has taken a position with Gagnon & Lachapelle, Montreal. He was formerly with other Montreal factories.

J. A. McLaren, of McLaren & Dallas, Toronto, has returned after spending a few days in Montreal, Quebec and Boston.

Frank Mercer, sales manager of the Relindo Shoe Company, Toronto, spent a few days last week in New York and other cities.

Miss Reynolds, daughter of G. E. Reynolds, shoe retailer, Sterling, Ont., spent a few days last week in Toronto on business.

The stock of J. T. Maitland, Danforth avenue, Toronto, who recently made an assignment, was sold last week by Suckling & Co.

Dr. Robert Ashton, late of New York, who has had fifteen years experience as a chiropodist, is now attached to the Owl Shoe Store, Toronto, of which Ed. Cook is pro-

prietor. He has well fitted up parlors in connection with the store.

The stock of Louis Weintraub, shoe dealer, Montreal, has been sold.

J. F. Clarke, of Clarke & Co., Watrous, Sask., was in Toronto last week calling on the trade.

I. B. Baird, clothier, of Fort George, B.C., has added a line of shoes and has been appointed the Regal agent in that town.

S. C. Cronk, of S. C. Cronk & Co., 126 Wellington street west, Toronto, is spending a few days in Montreal and Quebec on business.

Mr. Dufresne, sr., of Dufresne & Locke, Montreal, sailed last week for the Old Country, where he will spend the next three months.

The stock of the Ideal Shoe Store, Montreal, was sold by auction on February 11th on instructions from Michaud and Desrosiers, curators.

J. H. Porter, manager of the shoe department of the Robert Simpson Co., Toronto, is on a business visit to Montreal, Quebec and Boston.

Alex. Chisholm and J. Jupp, jr., shoe retailers, Toronto, are spending a few days in Boston, Lynn, Brockton and other Eastern shoe centres.

W. G. Bridgeo, representing the Allen, Foster & Willet Co., shoe manufacturers, Lynn, Mass., was in Toronto last week calling on the trade.

A. R. Kaufman, of the Kaufman Rubber Co., Berlin, and wife, who have been spending some time in the Bermuda Islands, have returned home.

J. C. Budreo, shoe retailer, 1344 Queen street west, Toronto, has returned from a business trip to Syracuse, Rochester and other centres.

W. F. Smith, Northern Ontario representative of Ames-Holden-McCready, Limited, Toronto, spent a few days in Montreal recently on business.

Leo Phillips, who has been in charge of the shoe repair work at Logan & Young's store, Beaverton, Ont., has taken over this branch of the business.

F. D. Lott, shoe retailer, 816 College street, Toronto, intends removing to Weston in the near future, where he has leased an up-to-date shoe store.

Fire broke out in the basement of the shoe store of David Mendelsohn, 423 St. Lawrence Boulevard, Montreal, and considerable damage was done to the stock in the cellar.

J. S. Ashworth, of Toronto, Canadian manager for Sir H. W. Trickett, Limited, Waterfoot, Eng., has gone on a business trip to Winnipeg and other western points.

Frank McKenna, formerly associated with the Ames-Holden-McCready Co., of Montreal, Que., has gone into the shoe and leather findings business in Montreal.

The Ames-Holden-McCready, Limited and J. & T. Bell hockey teams met last week and treated their friends to a spectacular exhibition which resulted in a 1-1 tie.

W. J. Mitchell, of London, Ont., who represents the Milton Shoe Co., Milton, and the Aylmer Shoe Co., Aylmer, was in Toronto for a few days last week on business.

Lamontagne, Limited, manufacturers of leather goods, St. Catherine street east, Montreal, suffered some damage to their store by water, but were insured.

T. Eatough, son of O. Eatough, managing director of the Sir H. W. Trickett, Limited, Waterfoot, Eng., who has been spending some months in Toronto, sailed home last week.

Frank H. Baiden, shoe dealer, of Calgary, who had been in business in that city for a number of years, passed away last week. Many friends will regret to learn of his death.

Mr. McNamara, who has been covering the Maritime

Provinces for Jackson & Savage, Montreal, will, it is understood, represent them in Western Canada during the coming season.

As will be noticed in the advertising columns of the SHOE AND LEATHER JOURNAL, pictures of two cars, loaded with Hartt shoes are seen, just as they are leaving the factory on their way to the west, one car being destined for Winnipeg and the other for Vancouver. The bills of lading are also seen in this interesting announcement. The Hartt Boot and Shoe Co. do a very large trade in all the important centres in the West and intend shipping several more carloads of shoes to the Prairie Provinces during the coming season.

T. H. Bigwood, of Toronto, president of the Ontario Retail Shoe Association, has been elected second vice-president of the Toronto branch of the Retail Merchants' Association.

Harry Litchfield, office manager of the Regal Shoe Co., Toronto, who has been spending a few days in Whitman, Mass., has returned to Toronto accompanied by his wife and family.

F. O. Mumford, the Halifax manager of the Amherst Boot and Shoe Co., recently completed a trip to the South Shore, principally in the interests of the Bull's Eye rubber boot for fishermen.

The Great Northern Tannery, of Edmonton, is preparing to double its capacity. Since the commencement of the business eighteen months ago the company has met with a remarkable success.

The Solid Leather Shoe Co., of Preston, will complete its run on heavy work in about three weeks and the new machinery being installed the plant will henceforth specialize on women's McKays.

The A. A. Durkee Co., shoe manufacturers, Truro, N.S., report that orders for spring are ahead of last year and that the business of the company for 1913 was thirty per cent. ahead of that in 1912.

The contract for supplying the boots to the Ottawa city firemen was awarded to the shoe department of the Two Macs Co., Ottawa. Ninety pairs will be required and the price is \$5.50 per pair.

Daniel Hannigan, formerly foreman with Jackson & Savage, Montreal, Que., who some time ago took a position with John Ritchie & Co., Quebec, was a visitor in the Boston markets recently.

I. B. Brooks, shoe and men's wear dealer, of Melita, Man., and wife, who have been on a visit to New York, Rochester and other cities, spent a few days in Toronto last week on their way home.

The stock of the Orillia Shoe Co., Orillia, who made an assignment a few weeks ago, was sold at 62 cents on the dollar to A. J. Clapp, of Toronto, who has since disposed of it in various consignments.

H. Dallas, of Toronto, sailed last week from New York on a trip to England, where he will be absent a couple of months on business with many Old Country shoe and slipper firms which he represents in Canada.

E. T. Weaver, formerly employed as making room foreman for the Relindo Shoe Co., of Toronto, has taken a position as foreman of the Turn Department for the Millett, Woodbury Co., Beverly, Mass.

W. J. Heaven, Toronto, as provisional liquidator of the Williams Shoe Co., of Brampton, has entered action at Osgoode Hall against the Elkman Shoe and Supply Co., of the same place, to recover \$4,241.32, alleged due for goods sold and delivered.

W. H. Miner, vice-president and managing director of the Miner Rubber Co., Limited, of Granby, Que., was in Toronto last week for a few days. Mr. Miner was recently

re-elected councillor of Granby, being returned by acclamation.

John Stewart, who has for a number of years been associated with the Watson Shoe stores, Victoria, B.C., has bought out the entire stock of Watson's Douglas street store and with his brother, William Stewart, has taken possession.

Chas. T. Cahill, advertising manager of United Shoe Machinery Co., Boston, was in Montreal last week in charge of the motion pictures of shoe manufacturing which were shown at the Superintendents' and Foremen's Association on February 13th.

John McAuliffe, who died recently, was a well known shoe retailer, being for many years in business in Parkhill before removing to Toronto in 1898. Mr. McAuliffe was born in Port Credit and leaves three sons and one daughter, all living in Toronto.

J. E. Deslauriers, who was formerly with the Thompson Shoe Co., Montreal, is now a member of the traveling staff of the Montreal division of the Canadian Consolidated Rubber Co. and has proved himself a valuable acquisition to the sales department.

To manufacture and deal in leather and cloth goods there has been organized and incorporated in St. Catharines the L. R. Hulbert Company with a capital of \$40,000. The provisional directors are Louis R. Hulbert, Howard R. Rice and Harry A. Dickenson.

O. J. Killam, of Truro, N.S.; E. E. Code, Ottawa; Chester McLure, Charlottetown; L. B. Hutchison, Toronto; S. G. Amero, London; W. S. Woods, of St. Catharines, Ont., and others, were in Berlin this week attending a conference of the representatives of the Kaufman Rubber Co. The session lasted several days and selling plans for

the coming year were discussed. These conferences, which are conducted at regular intervals, are always profitable and instructive.

C. Hurlbut, of the Hurlbut Co., Preston, was in Winnipeg and other Western cities last week on business. The company are turning out an exceptionally fine line of welts for children which they are now making up to ten and a half in size in all leathers.

R. B. McPherson, formerly with the C. E. McKeen Shoe Stores Co., Victoria, has taken a position with R. E. White in his newly opened shoe store at 625 Yates street. This is one of the finest establishments in the West and is located at an important traffic point.

Stubbs Bros., shoe retailers, Bloor street west, have sold their business to Bert Sproul, formerly with the McCall Shoe Co., Toronto, who will take possession on March 1st. It is understood that Stubbs Bros. will open an up-to-date repair shop in another part of Toronto.

Fred Trickett, who is a half brother of the late Sir H. W. Trickett, and was for some time associated with J. S. Ashworth, Toronto, Canadian manager of the firm, was married recently at Waterfoot, Eng., to Miss Dearden. Many Canadian friends will extend congratulations.

The many friends of Warren T. Fegan, shoe retailer, 88 Queen street west, Toronto, will sympathize with him in the loss of his only son, Robert A., whose death occurred on February 7th. The deceased was a bright, well liked boy in his seventeenth year, who had been ill for a long time.

An order winding up the Williams Shoe Company, Limited, of Brampton, has been granted by Chief Justice Falconbridge, with the consent of the company and on the petition of the following creditors: Wickett & Craig, Limited, \$1,019; Anglo-Canadian Leather Co., \$13,237; Davis

MANY IMPROVEMENTS MADE TO TANNERY

Extensive improvements have recently been made to the tannery of the Beardmore Co. at Acton and the accompanying sketch shows the new coal trestle lately erected. This is part of a new system of switches completed by Beardmore & Co. a short time ago. The coal can be unloaded from this trestle directly into the boiler room, which is a

great convenience and saves much handling. The same procedure is followed with various other supplies such as hides. The track is laid directly over the beam house and hides are unloaded from the cars into the beam house. A new rolling department and other improvements have lately been completed.

Leather Co., Limited, \$1,590; A. Davis & Son, Limited, \$20,042; Breithaupt Leather Co., Limited, \$22,000.

Frank Power, who formerly represented the Rideau Shoe Co., of Montreal, has been appointed by the Rena Footwear Co. to replace the late John Stephens. Mr. Power, who also conducts a retail store in Montreal, will cover the larger Ontario centres for the Rena Footwear Co.

The assets of the Dominion Leather Goods Co., Toronto, who recently made an assignment, have been sold to Winnett & Wellinger, Limited, 350 Sorauren avenue, Toronto, at forty cents on the dollar. The latter company have taken the raw material, some of the stock, the machinery and a portion of the other equipment.

J. D. McCrimmon, who has carried on a successful shoe business on Downie street, Stratford, Ont, for the past fifteen years, has moved his stock to 97 Ontario street. His new premises are undergoing extensive repairs, new hardwood fittings and floors being installed, which will make the place up-to-date in every particular.

Options on Ames-Holden-McCready shares are being sought by H. S. Ross, K.C., of Ross & Angers, on behalf of a client who is understood to be acting in the interests of an American boot and shoe manufacturer desiring Canadian affiliations. In some cases it is said cash inducements were offered to secure these.

North Riverdale business men, Toronto, will endeavor to have early closing put into effect in the immediate future. Legislation of some sort will be asked to enable the majority to close their stores at 10 o'clock on Saturday nights at the latest, although some would go further and close at 8 o'clock every day.

The Zink Shoe Company, Limited has been incorporated for the purpose of a wholesale and retail dealing in shoes and leather goods. The company, which is capitalized at \$60,000, has its headquarters at Brandon. Following are the incorporators: Peter McKinnon, Alfred Bruce Knowlton, Donald McKinnon, Elizabeth Knowlton.

The stock of F. S. Hardman, 1124 Queen street east, Toronto, who recently made an assignment, was sold last week to J. Gould, of Port Hope, at sixty cents on the dollar. The assets were \$1,546 and the liabilities \$1,924. Mr. Hardman's store has been leased by Allan Simpson, 419 Parliament street, who will occupy the premises for a few months in addition to running his regular store.

Chas. E. Fice, Ontario representative of J. & T. Bell, Limited, Montreal, who has returned to Toronto from a two months' trip abroad, was one of those who attended the funeral service of Lord Strathcona on January 26th at Westminster Abbey. Mr. Fice said that a wonderful gathering was present at the last solemn rites. The obsequies were the most impressive that could be imagined.

A provincial charter has been granted to the Unique Shoe Co., of Toronto. The capital stock is \$40,000 and the company will start manufacturing at No. 12 West Market street a full line of misses' and children's, lads' and youths' McKay and standard screw. The incorporators of the company are Jasper W. Phillips, Marshall B. Young, Charles Tilley, Wm. Pollard and Herbert V. Tilley, all of Toronto.

Chas. E. Slater, for thirty-five years in the shoe business in Montreal, and former organizer and president of the Slater Shoe Co., of that city, has a general sales agency at 60 South street, Boston, says the Shoe and Leather Reporter. He is distributing American-made shoes in Canada and other foreign countries, and English and foreign shoes in the American market. He is connected with the R. P. Hazzard Co., of Boston; Dunn & McCarthy, of Albany, N.Y., and M. B. Malbon & Co.

Rev. Jas. C. Walker, pastor of the Methodist Church, Leamington, Ont., died suddenly in that town on February

10th from the effects of acute indigestion. He was born at Kingston, and moved to Woodstock with his father. Later he went to Toronto, where he engaged in the boot and shoe business. From there he went to Wesley College, Winnipeg, to study, and entered the ministry in 1887. He leaves two sons at Winnipeg, and his wife, two daughters and one son at home.

It was stated in the Street to-day, says a Montreal despatch, that Mr. D. Lorne McGibbon, president of Ames-Holden-McCready, Limited, who was approached by American interests which aimed to secure an interest in the Canadian boot and shoe manufacturing trade, had declined an offer of around 30 per share for a good sized block of common somewhere between 10,000 and 12,000 shares. It is stated, however, that these people still seem to be in earnest, and, besides having bought some stock in the open market, are still treating privately for more.

The jobbing trade report sorting orders are only fair but shipments of spring goods are constantly being sent out. Collections are reported to be improving somewhat, but still there might be considerable improvement, particularly from certain western centres where the extreme cold weather of late has proved a deterrent to business. The majority of shoe factories are fairly well employed, although not rushed to capacity. Fall samples are well under way and are expected to be ready early in March in the majority of the plants.

W. G. Congdon, vice-president of the Edmonton Leather and Shoe Co., and W. J. Webster, of the Edmonton Woolen Mills, both situated in the newly annexed district on the south, appeared before the Edmonton council to urge extension of water and power. The offers were to have the city do the work, for which the company will pay. Mr. Congdon pointed out that not only would the city serve industries, but the work, if done now, would provide employment for a number of men. The matter was referred to the public works committee.

George H. Taylor, of Hamilton, for the past seven years representative of the Williams Shoe Co., Brampton, in the Maritime Provinces, has been appointed salesman in Ontario for the Kingsbury Footwear Co., and will enter upon his new duties next month. Mr. Taylor has had a splendid insight into the shoe business, is widely and favorably known to the trade and many friends will wish him every success in his new sphere of activity. It is understood that Mr. Taylor will shortly remove from Hamilton to Toronto.

The Sippel Shoe Store, Berlin, Ont., couldn't fit a customer who went into their store recently to buy a pair of rubbers, so they sent him to the factory of the Merchants' Rubber Co., says the February edition of Foot-Prints. The customer was Albert Pritschau, a stranger in Berlin, and easily the tallest man ever seen there. He stands 6 feet 8½ inches in his stocking feet, and wears No. 17 shoes. He is a native of Germany and was, at one time, one of the Kaiser's stalwarts in the army. He was soon easily fitted with a pair of large rubbers. They measure 14½ inches from heel to toe, and 5½ inches across the ball of the foot.

One hundred and three Canadian motor-car owners celebrated their birthday anniversary on February 14th. Each of the February 14th brigade who own motor-cars in Canada is blessing his or her parents for their foresight and thoughtfulness in having made St. Valentine their patron saint, as all who have acknowledged their allegiance to him have received with compliments of the Canadian Consolidated Rubber Co., Limited, a "Nobby Tread" tire. Among the winners the shoe retailers were represented by W. J. Leduc, of the firm of Leduc & Bordeleau, 591 St. Catherine street east, Montreal, who owns several fine cars.

Previous to starting in business in Montreal six years ago Mr. Leduc sold shoes in Grand Mere, Que.

The Panther Rubber Company are busily engaged in making preparations to commence operations in Sherbrooke. A car load of machinery, ready for fixing, was delivered last week to their factory. The workmen have got the foundations in for the heavy machinery and are now putting in the foundations for the lighter machines. The steam boiler is running night and day for heating purposes and it is expected the plant will start up in two months. Benj. L. Moore is the superintendent and the company will manufacture rubber heels and soles. Between thirty and forty hands will be employed at first and it is expected this number will reach one hundred.

National Cash Register sales agents and salesmen from all points west of the Great Lakes were a few days ago in Winnipeg attending the convention of the sales organization. Every National Cash Register agency in the three Prairie Provinces was represented, and, in addition, J. H. Patterson, president of the company, with a number of the officials from the head office at Dayton, Ohio, and J. C. Laird, Toronto, the Canadian manager, were in the city for the convention. The proceedings of the convention opened with a series of meetings for the purpose of discussing business matters of interest to the salesmen. President Patterson delivered a lecture on the history of the business and of the work being done for the improvement of the position and health of the employes in the factory.

J. Affleck, owner of the Yale Shoe Store, 321 Portage avenue, Winnipeg, will make extensive alterations and improvements to his place of business. The necessity for more room has been apparent for some time, and although the present depression in business conditions generally has been felt, the business for the year just ended has shown a great increase over that of previous years. To allow for the

natural growth of his business Mr. Affleck has decided to entirely remodel the interior of his store. The plans as shown will allow for an increase of 1,000 square feet of floor space, in addition to 1,800 square feet of shelving to be erected. Entire new seating arrangements, and new fixtures are being built, and when completed this will make one of the finest shoe stores in Canada. Mr. Affleck is optimistic regarding the prospects for the shoe business of the coming year.

SHOE MANUFACTURERS ELECT OFFICERS

A meeting of the Ontario Shoe Manufacturers' Association was held on Feb. 4th in the board room of the Canadian Manufacturers' Association, Toronto. There was a good attendance and many matters of importance were discussed. The association was organized a couple of years ago and has made steady progress. Officers were elected for the ensuing year. A. Brandon, of the Brandon Shoe Co., Brantford, was re-elected president; J. A. Walker, of the Walker-Parker Co., Toronto, vice-president; secretary, G. M. Murray (secretary of the Canadian Manufacturers' Association). Executive—J. S. King, Relindo Shoe Co., Toronto; N. B. Detwiler, G. V. Oberholtzer Co., Berlin; J. A. McPherson, John McPherson Co., Hamilton; F. S. Scott, Getty & Scott, Galt, and C. B. Hamilton, W. B. Hamilton Shoe Co., Toronto.

George A. Slater, of George A. Slater, Limited, Montreal, who happened to be in Toronto, was present and addressed the gathering on various matters, principally on the desirability of having a National Association of Shoe Manufacturers of Canada instead of the various provincial and city associations. He spoke of the important questions that might be taken up as a united body, such as the standardization of cartons, freight rates, cartage,

DOING A SPLENDID BUSINESS IN HIS NATIVE TOWN

That it is possible to achieve a large measure of success in one's home town is demonstrated by the business career of H. R. Scott, shoe retailer, of Seaforth, Ont., who conducts a well managed store in that place. Mr. Scott was born and educated in Seaforth and has been in the shoe business there for five years. For some time he was in partnership with T. Richardson and later bought him out.

Mr. Scott's father was a doctor who practised his profession in Seaforth for forty-three years, so that the son is well and favorably known all over Huron county. He has built up a good trade on leading Canadian makes of shoes. Mr. Scott has long been a reader of the SHOE AND LEATHER JOURNAL and says that during his career he has gained many useful pointers from its pages.

shipments and other matters of mutual interest. It is understood that the question of forming a national body is now under consideration and that, at an early date, a meeting may be called for the purpose when a permanent secretary

A. BRANDON, PRESIDENT OF THE ASSOCIATION

would be elected and offices opened. The majority of those present expressed themselves in hearty sympathy with the suggestion.

QUEBEC TANNERY VISITED BY FIRE

The tannery of Edgar Clement, situated on Arago street, Quebec, was badly gutted by a fire which broke out in the premises recently and for a time it was feared that the blaze would spread and a more serious conflagration occur, as the tannery is surrounded by wooden buildings. However, the firemen by exceptionally good work, succeeded in confining the fire to the building in which it originated. With the thermometer registering twenty degrees below zero, the fire fighters had an extremely hard time of it and suffered considerably from the cold, but hampered as they were by this, they did excellent work. Mr. Clement's loss is in the vicinity of \$35,000, and the insurance on building and stock amounts to \$26,000. He states that he intends to immediately rebuild and will erect a modern and up-to-date structure.

REBOUND IN INDUSTRIAL ACTIVITY

In a message recently sent to the various "Invictus" agents throughout the Dominion George A. Slater, president of George A. Slater, Limited, Montreal, reviewing the present business situation and outlook says in part: "We have passed through a stage of an economic crisis during the last few months, and I feel that we in Canada, have every reason to be proud, not only of the manner in which we maintained our financial equilibrium throughout the critical period, but also the even keel on which we have launched the good ship "Business," into the big sea of 1914 cooperation. As a producer, it strikes me most forcibly

that conditions amongst the shoe dealers, at any rate, have remained very stable. Of course, it is most readily understood that shoes represent a commodity rather than a luxury, and thus form an article of trade not easily affected by superficial conditions. At the same time, I feel confident that you, as a distributor, as well as ourselves as producers, in our particular line of business, must feel the rebound to industrial activity, which is bound to occur during the next few months. It stands to reason that the slight depression which has existed will be followed by renewed confidence. We are a nation of spenders, and with better prospects we always anticipate by buying more freely. This applies to the worker even more than to the capitalist, and 'tis from the worker we must expect the increased business which will build up your profits as well as ours."

HOW SMITH WAS ABLE TO COME BACK

A retail merchant in a small but flourishing town was doing a credit business. He was a hard worker—often boasted of having lifted eight or ten cases of shoes in succession from the ground to the wagon. He plugged away day by day. The one thought foremost in his mind was:

"I'll work hard for three more years and then sell out and retire from active service."

He figured on making enough money in three more years of hard work to buy himself a small place in the country where he and his wife could enjoy the fruits of his labor.

Business was fine; that is, he sold lots of goods. His clerks were always busy. Delivery wagons were continually on the go.

But, strange to say, his bank account did not increase in proportion to the amount of business he was doing.

When three years was up, Smith had not made his "few thousand" on which he expected to retire. He is still working the same ten hours a day, and still only "hoping" he didn't know why he wasn't "rich," for everything continued to look rosy and prosperous.

But I happen to know a few things about Smith's busi-

N. B. Detwiler, president of the G. V. Oberholtzer Co., Berlin, who has retired from the city council after two years' service, has been appointed a member of the Board of Health.

ness which, I believe, clears up the "mystery," as he was pleased to call it.

The first reason is: He never kept an account and complete record of his business.

He never knew how he stood on the books. He knew he was selling goods but to what amount or at what percentage of profit he never knew.

If a customer came to Smith and asked for a statement, Smith would have to tell him "in a day or two." Result, "in a day or two" the customer had spent the money. The customer was displeased, a bad thing for Smith; or pleased, which was worse for Smith.

Second: Smith trusted everybody. He never asked for reference. As long as he sold the goods, he never worried.

Third: Half the goods that went out of Smith's store were never charged. When that happened, he lost the profit he should have made on the sale, the time invested in buying; the time invested in selling; the cost of labor in handling the goods; the cost of keeping them on the shelves; and several other losses, including the big loss which such carelessness will cause in other work.

Smith needed to use his mind more and his muscles less. A daily record of his sales would have helped materially.

But Smith has "come back." He is doing business on a business basis.

Any time a customer wants a statement of her account now she knows she can get it in five minutes. Smith has a mechanical device now for getting out his statements, and his customers get statements whether they ask for them or not—neat ones, accurate ones, statements that collect the bills.

He has re-organized his sales force. His three old clerks have been replaced by two new ones who know how to sell goods, who are paid enough so that every penny taken over the counter goes into Smith's cash drawer.

He has systematized his delivery service so that instead of three wagons on the go, he has only two, but they deliver more goods and give the customer better service.

He no longer stocks up with unsalable goods because they look like bargains. He buys as he needs, and because he needs it, not because its a bargain.

Every article that leaves the store is accounted for, he's sure of that now because his system takes care of it.

At the end of every day Smith knows just where he stands. He knows just how much each clerk has taken in. He knows how much money he has to his credit. Smith has applied scientific method to his business.

The way Smith is doing business now, he is going to make a "few thousand," though he has quit talking about retiring, because he doesn't have to work like a dray-horse and he doesn't want an easier job.

Smith says "Business, when it's run right is a pleasure. Who would want to retire? I've just been born."

NEWS BRIEFS FROM QUEBEC CITY

The business places of Theodore Godbout and T. D. Debuc were badly damaged recently by fire and smoke.

Jos. Beaulieu and Cie, whose shoe factory was visited by a severe fire a few weeks ago, are again in operation.

The members of the Quebec Builders' Exchange held their annual banquet recently at the Victoria Hotel, which function was presided over by C. E. Morrisette, president of the Exchange.

A building permit has been issued to Messrs. Tourigny & Marois to rebuild their shop which was burned some time ago. The new factory will be thoroughly up-to-date in every particular and will cost about sixty thousand dollars.

Telesphore Rochette, who was badly injured a few

weeks ago, when he was struck by a locomotive, died on February 3rd. The deceased, who resided in St. Malo, was the son of the late Telesphore Rochette, of Jobin & Rochette, shoe manufacturers.

Among those in town during the past few days were L. S. Odell, of Fisk., Limited, Montreal, E. P. Crochiers, and J. A. Lefebvre, of L. H. Packard, Limited, Montreal; C. P. Graz, Cincinnati; Thos. Kelly, Utica, N.Y.; E. E. Kennedy, Utica, N.Y.; A. R. Clarke, of A. R. Clarke & Co., Toronto; C. E. McKeen, Vancouver; C. V. Rice, Boston.

Among the wholesale shoe visitors from Toronto who were here during the past week were J. A. McLaren, F. J. Weston and Hugh White. They were looking to place orders but were not able to make conclusive arrangements as manufacturers cannot guarantee when they will be able to give deliveries on account of the strike which has just been settled after many weeks.

ANOTHER SHOEMAN JOINS BENEDICTS

W. J. Thurston, shoe retailer, of Guelph, Ont., who has been in business in that city for the past eight years, is receiving the congratulations of his friends on joining the ranks of the benedicts. He was married last month to Miss Vera Barber, a former member of the teaching staff of the ladies' college at Regina, at the home of her mother in Guelph.

Rev. G. W. Barker, pastor of the Dublin street Methodist church, performing the ceremony. Mr. Thurston and bride spent a few days in New York and other eastern cities on their wedding tour. They were given a lively send-off by their friends in the Royal city. Seeking to elude the usual ceremony attendant on such a departure Mr. and Mrs. Thurston were driven out to Guelph Junction to take the train. The guests got word of the sudden move on their part and, engaging a large motor van, hastened to the junction and arrived before the train that was to bear the happy couple away. They liberally peppered the pair with confetti and other missiles and managed to send word to Hamilton where a taxicab that was awaiting their coming was also decorated with quaint mottoes. Even on his honeymoon Mr. Thurston could not escape from his calling in the footwear trade for the conveyance was elaborately ornamented with shoes of every description, which outrivalled in variety the collection on any of his bargain tables.

NEW SHOE FIRM INCORPORATED

The Hardie, Redmond Co., Limited, of Toronto, has been formed with a capital of \$40,000 to carry on the business of wholesale shoe dealers. The members of the new company are D. G. Hardie, James M. Redmond and others, and their place of business is at 189 Church street. The company succeeds Hardie & Moore and will conduct a general selling business in footwear.

CLARKE'S TEAM AGAIN TO FRONT

The hockey team of A. R. Clarke & Co., Toronto, and a large crowd of supporters journeyed to Georgetown on February 14th and decisively trimmed the Georgetown Wanderers by 7 to 3. The game was extremely fast and clean, but few penalties being handed out. Clarkes led at half time 2 to 1. The second half opened fast and Clarkes cinched the game by fast combination, scoring three goals

in rapid succession. The game ended 7 to 3 for Clarkes. The line-up was : Goal, J. Ross; point, D. Campbell; cover, P. Mellwain; rover, N. Thompson; centre, W. Brown; left, E. Randall; right, A. George; referee, Clive Sachs. The Wanderers are making a trip to Toronto for a return game in the near future.

HOW A YOUNG MAN SHOULD SAVE

James B. Forgan, president of the First National Bank, of Chicago, in the latest issue of the World's Work, makes the following suggestion as to how a young man should begin to save:

"What a young man should do with the first \$1,000 he saves out of his earnings must depend on his individual circumstances. If he is in business for himself the prob-

CONDENSED ADVERTISEMENTS

Two cents a word. Minimum charge for an advertisement 50 cents. Cash must accompany all orders.

WANTED—Shoe traveler with good connection in the Eastern Provinces to carry one of the most favorably known Ontario medium line of shoes on commission. Would go nicely with a line of fine shoes. Address, "Manufacturer," SHOE AND LEATHER JOURNAL, Toronto, Ont.

WANTED AT ONCE for Prairie Provinces or Ontario a good line of men's, women's or children's shoes on a commission or salary basis. Apply Box 65, SHOE AND LEATHER JOURNAL, Toronto, Ont.

FOR SALE—Old established shoe business in a Western Ontario town; established twenty-five years. Good repairing business in connection. Owner retiring. Apply Box 66, SHOE AND LEATHER JOURNAL, Toronto, Ont.

INVESTMENT WANTED—Successful shoe manufacturer: would take partnership or management in good shoe manufacturing or jobbing business. Confidential, Box 68, SHOE AND LEATHER JOURNAL, Toronto.

WILL BE OPEN on February 20th to take up a new line of shoes: commission preferred; must be up-to-date goods, either men's or women's. Have a clean record, long experience and good connection with the best Ontario dealers. Replies strictly confidential. Box 22, SHOE AND LEATHER JOURNAL, Toronto.

A WELL KNOWN AMERICAN MANUFACTURER who is planning to open a Canadian branch in Toronto about October will offer up to \$20,000 of stock for Canadian subscription. This is all the stock obtainable; a live office man or salesman can be placed. Box 171, SHOE AND LEATHER JOURNAL, Toronto, Ont.

WANTED—A fairly reliable man to handle a high-grade line of women's shoes in Montreal and district. Would entertain commission proposition in conjunction with a line of men's fine shoes. Applicant must have extensive experience in locality. Apply Relindo Shoe Co., Limited, Toronto, Ont.

PICKLED SPLITS WANTED

Cash prices paid for pickled splits and heads in all weights and qualities. Write us your offering. Wright & Wright, Inc., 109 Lincoln St., Boston, Mass.

abilities are that the best thing he can do with it is to leave it in his business to increase his working capital.

"If he holds a salaried position, is earning more than sufficient to support him, and is free to use his surplus income as a basis on which to build up his own fortune, the following is a good method to adopt:

"1. Invest his \$1,000 in a first-class bond or similar security.

"2. At the beginning of the year make a careful estimate of what he will require for his personal expenses and thus ascertain how much of his salary he will be able to save during the year.

"3. Borrow the amount he thus estimates he can save during the year, using the \$1,000 security he already owns as collateral, and invest the amount thus borrowed in another good bond or security.

"4. Arrange to repay the amount borrowed in equal monthly installments during the year, having these installments come due on pay day, and make the payments of them the first disbursement of his monthly salary.

"This method ensures the enforced accumulation of the savings and necessitates the adjustment of his personal expenses to the amount he has left after his savings have been provided for. By carrying out his programme at the end of the year he will own the bond or security fully paid

QUEBEC STRIKE IS NOW OVER

The strike in the shoe trade in Quebec, which started the end of November last, has come to an end, and the men returned to work this week. There have been a number of meetings between the manufacturers and representatives of the unions, and a final agreement was reached on February 14th. Both parties made concessions before the dispute was settled. This will be good news to the trade throughout Canada.

HOW WOULD YOU LIKE A PAIR?

Here is the latest creation in new spring styles—if you are a diver. These shoes were made by the John Palmer Co., Limited, of Fredericton, N.B., for Foundations, Limited, who have been doing some work under water at that city. A representative of the company came to the John Palmer factory one evening about five o'clock and wanted a pair of shoes made by seven o'clock the following morning.

A couple of employes came back, drafted patterns, cut and fit the uppers and made the shoes complete from the Skowhegan waterproof oil-tanned leather which the John Palmer Co. use. The sole of the boots is made of lead, the toe-cap is of cast brass and is fastened to the sole by a series of screws. The latter supplies were furnished by the Foundations Co. The diver reports that the boots turned out from leather are the best he has ever seen, which reflects much credit on the makers and the expedition with which the order was carried out.

SPHINX
Shoe Cement Paste

"SPHINX" stands unique and without a rival in excellent qualities wanted by the shoe manufacturer

It is a quick, strong and clean adhesive, ready for use.

It absolutely takes the place of high-priced cements—on all kinds of linings, cloth or leather, such as vamps, side linings, stays, sock linings, etc.

It is flexible—when applied thin with a brush. Will fasten counters and toe pieces, tap soles, etc.

Best for sock linings, as they never loosen.

There is nothing made that is just as good.

22-FOOT GOODYEAR SHOE REPAIRING OUTFIT

MODEL N

THIS Outfit represents the highest development in shoe repairing machinery, and meets every demand of modern shoe repairing. It embraces all the essential processes for making new shoes from old ones, giving the maximum of equipment and efficiency in the minimum space. The Outfit has the Goodyear Stitching Machine with all its improvements, including a new style steam generator which uses gas or gasoline for generating the steam, and operates automatically, thereby insuring a uniform heat for keeping the wax in proper condition and requiring little attention from the operator. The Edge Trimming Machine has the new feature of the two shafts, being operated by a single belt, and the cutter grinder is attached directly to the main shaft. This arrangement gives better results with less power.

The Buffing and Scouring Machine has a shaft 57 inches long and carries the following equipment:

- | | |
|--|-----------------------------------|
| 2 Split Bottom Buffing Rolls | 2 Flat X-Ray Heel Scouring Wheels |
| 2 "C" Shape X-Ray Heel Scouring Wheels | 1 Heel Breast Scouring Wheel |
| 1 Pin Wheel Pad Complete | |

A powerful Blower System removes the dust resulting from the trimming, buffing and scouring operations, and is designed to overcome certain objectionable features of other blowers.

The Finishing Machine has a 78 inches shaft which has all the necessary equipment for black or russet work:

- | | |
|--|--|
| 2 Corrugated Rubber Shank Finishing Wheels | 1 Corrugated Rubber Heel Finishing Wheel |
| 1 Corrugated Rubber Bottom Finishing Roll | 2 Shank and Bottom Brushes |
| 2 Heel Brushes | 1 Stitch Cleaning Brush |
| 1 Levelling Roll | 1 Bead and Wheel |

At the end of the Outfit is the Oscillating Edge Setting Machine which is fitted with union irons and in its motions duplicates hand workmen with quicker and better results.

Each of the machines is operated independently by a friction drive pulley, so that it is necessary to use only those machines which the operator may require. This feature means a saving of power.

All the machines are firmly mounted on legs and driven by a countershaft with carefully adjusted bearings, so that the Outfit runs with very little vibration, and is in every way most efficient.

Our
1914 "LEADER"
Welt Shoe at \$4.00
will be a Grand Seller

LEADER Welts at \$4.00 make the best proposition on the market for the retailers' fall trade. Because the price is reasonable do not think that this is a **cheap shoe**. It is splendidly made from the very best of materials under expert supervision, and the only reason we can sell it at this exceedingly low figure is because we buy immense quantities of raw materials at favorable prices, and because we sell such a large number of LEADER Welts.

For fall, 1914, we are putting in several new styles which will considerably increase the value of this line to the retailer. If you handle this line there is a good profit in it for you and any amount of "come-back" business. Price backed by quality counts.

Our travelers will be on their way to you in March. Be sure you see the complete "LEADER" Welt Line before placing your order.

It's easy to sell hose —after selling shoes

The psychological moment to sell hosiery to women and men alike is immediately after they purchase shoes. The wise shoeman has proven this to his own satisfaction again and again. Take your pencil and figure out what hosiery sales would have meant to you in actual cash last year:

Your *extra net profit* would have paid the rent and perhaps the wages of a clerk or two. And *all this* with hardly any extra work or cost. Why not oblige your customers by stocking **PENMANS**—the popular, full-fashioned hosiery for men, women and children?

PENMANS LIMITED - - - Paris, Canada

Hosiery can be purchased through our agents:

Where Clark Shoes are Made

Illustrated above is a plant that has been recently built for Clark Bros., Limited, of St. Stephen, N.B. —a new firm manufacturing an entirely new line of ladies' fine shoes.

This plant is 152 feet long by 50 feet wide and has a productive capacity of 1,000 pairs of shoes per day.

A concentrated shoe manufacturing experience, extending over many years, in the leading centres of the United States, is back of every pair of shoes produced in this factory.

The Clark line includes a very comprehensive range of high grade women's shoes in the most perfect fitting and attractive lasts **which are made exclusively for the jobbing trade.**

YOUR ENQUIRIES ARE SOLICITED.

“The Brand that Filled a Long ‘Felt’ Want”

Only by fully studying the requirements of your customers can you hope to make a success of your business. You *must* have *what* they want, *when* they want it, or you will inevitably lose their custom.

People of great discrimination and judgment, the people who actually *wear* “Elmira” Shoes and Slippers, want them for good, specific reasons. They know that “Elmira” quality is unsurpassable; they know that “Elmiras” not only *look* well but they *wear* well, and *feel* well—they know that absolute and lasting satisfaction is guaranteed with every pair of “Elmira” shoes or slippers they buy.

Wouldn't it pay YOU to handle such a line?

Make your selections from our illustrated catalogue—there's a wide variety of patterns for you to choose from; or, see the samples the jobber will show you.

Manufactured by the Elmira Felt Co., Limited

BERLIN - - ONTARIO

WE WANT YOUR PLACING ORDER

To properly satisfy your customers' needs you require rubbers that will give you Style, Fit and Honest Wearing Results. **TRY LIFE-BUOYS!**

THE QUESTION IS

What Brand of Rubber Footwear will it pay you best to handle for 1914?

DOES IT PAY

you to handle a brand that only gives average satisfaction in Fit and Wearing Quality?

THE ULTIMATE NET PROFIT

at the end of the season depends on a big sale of the best Rubber Footwear on the market, and this profit will undoubtedly be yours if you stock the LIFE-BUOY line of Superior Quality Footwear.

Do justice to yourself this season—buy Life-Buoy Rubbers, the only brand that has withstood the test of the past strenuous season. You will have the most modern rubber footwear factory in Canada behind you.

EXTREMELY POPULAR FOR GENERAL WEAR

Men's WOODBINE—Medium Heel, Hump Toe, full on outside.

Men's WINDSOR—Large Heel, Hump Toe, straighter and not quite so wide across ball as the Woodbine. Sizes 5 to 11.

Wait for our salesman—you have nothing to lose thereby.

FOR FINE SHOES

Men's AUTO—An entirely new shape introduced by us for the coming season. Medium to large low heel, receding toe, for fine goods. Sizes 5 to 11.

Scholl's Foot-Eazer

A practical, scientific appliance that instantly and permanently relieves tired, aching feet, weak ankles and other troubles caused by structural weaknesses of the feet. It is anatomically designed, and the self-adjusting, double-sliding spring feature supports the arch in nature-like, easy manner—gives a natural elasticity and springiness to the step—correctly relieves the foot muscles of all strain, and gives absolute rest to the muscles and nerves. It is adjustable to all feet and can be worn in any shoe unnoticeably or changed from one pair to another instantly.

Retail price, \$2.00 a pair

Up-to-date Shoe Dealers carry them.

"LEADER" BRAND McKAYS FOR 1914

There is a splendid opportunity right in your town for a good strong line of McKay shoes for men, boys, youths, and little gents. There are a great many people to whom a good McKay shoe appeals rather than a Welt because of the saving in price. LEADER BRAND McKAY SHOES are better made and look better than many Welt made shoes.

This line for Fall, 1914, includes a lot of snappy styles that are sure to take the eye of discriminating buyers who want the most value for their money.

If you stock this line for men, boys, youths, and little gents, you have a bread and butter range which will in time prove to be the backbone of your business.

Watch for the traveler handling "LEADER" McKays. He will see you in March.

Long Receding Toe Will Lead in Fall Footwear

Brocade and Cloth Quarters, Spool Heel and Colonials Are Favorites in Women's Line—More Bals. Darker Shades of Tan, Custom Effect and Invisible Eyelets for Men—"Duck Bill" Toes Not Likely to be Heavy Sellers—A Review of Fashion's Fickle Trend

What are the new things for fall? What are the alterations in styles? What are the leading shapes and what leathers will be most popular? What will be the best sellers and what will the public buy? These are the important questions that every shoe retailer in both city and town, metropolis and hamlet, in Canada at the present time is asking, and if the SHOE AND LEATHER JOURNAL could answer all these queries in a satisfactory and accurate manner its reputation as a prophet and an infallible authority would be established forever.

March the first is supposed to be the date on which all shoe manufacturers have their fall samples ready and in some instances travelers start out with a full representative range at the beginning of the month. The majority,

in style. If there are any radical changes, new ideas, new leather effects, new builds of heels and new shapes in toes, these are likely to manifest themselves in spring and summer

WOMAN'S PATENT LEATHER, LONG RECEDING PLAIN TOE, BLACK CRAVENETTE TOP, KIDNEY HEEL—BY RELINDO SHOE CO.

PATENT LEATHER TANGO, LONG VAMP, CUBAN-LOUIS HEEL, RHINESTONE ORNAMENT, SILK RIBBON LACE

however, do not get away, except those going to the far West, until the middle of the month or the beginning of April. The fall season is not the great period for alterations

offerings, rather than in fall or winter productions. Fall footwear is supposed to be a little heavier than that which is in vogue for spring and summer. In a number of factories that make along standard and conservative lines or turn out goods exclusively for jobbers few, if any, changes are made at all, with the exception of inserting a slip sole or using a double sole or viscolizing the bottoms and making use of storm and winter calf and other wet-proof leathers. Of course there is always a certain number of changes each season, although they may not be very pronounced. The question is what are they?

Speaking of the higher class trade and shoes that generally retail in the five and six dollar realm, it may be

observed that the following, according to the opinions of leading manufacturers, will be seen to a large extent:—More laces, some with whole quarter effect, invisible eyelets, running all the way up to the top facing; low long heels; broad shank; long receding toe; plain tips; hand-pegged heels; mahogany brown or tan in new shades in leather; new dumb bell pull straps; cloth tops; custom effect, etc.

In the medium priced trade—The medium high toe or a semi-recede, as it is more popularly known, is likely to have the greatest call.

Of course, there are some men of middle age, and beyond it, who are never swayed by the fashion at all. They adopt a sane, sensible, conservative last and stick to it through all seasons. In the young men's trade and the trade of those who buy many shoes for the sake of keeping up with the passing procession, the foregoing points are likely to be observed by these persons in the selection of their fall and winter footwear. There is one hopeful sign, however, and that is comparatively few freaks are seen, particularly in men's shoes. Cloth tops are likely to meet with a large measure of appreciation, especially where the vamps are patent leather. There is nothing that can replace the shiny material for dress occasions, patent side leather and patent colt being in constant demand. Tans may be worn next fall to a certain extent by men, but the style prophets say that the shade will be darker than usual by taking on more of a cherry or mahogany hue.

Some "Duck Bills" Are Seen

An attempt is being made by some manufacturers in Canada to introduce French styles as seen in the wide, semi-square, retreating toe, popularly known in certain sections of the trade as the "duck bill" effect. Whether this will call forth any generous evidence of approval it is difficult to say. One manufacturer of men's shoes said that we would soon be taking our lessons in any new shapes and designs from the French, who generally go to extremes. One is the long-pointed, razor like effect and the other is the round, square-cornered "duck bill" shape. With the introduction

of the latter there will likely be a tendency to shorten the vamps to some extent. It is generally conceded now that on both men's and women's shoes vamps have been elongated as much as possible, or as one authority puts it, they have been stretched to the limit and when the pendulum of fashion swings very far in one direction it is apt to sway back and go to an extreme in another direction. This will possibly be noticed more on women's shoes than in men's; there is a closely interwoven relationship and inter-dependence between the two.

The forgoing really points out any new effects that have been presented in men's shoes. It is believed that gun-metal will still be the leading leather for everyday wear, although box calf, dongola, kangaroo and tan Russia calf will have a certain measure of patronage.

Cloth Tops Are Popular

One leading manufacturer of men's shoes writes that, from information which he has gathered in the east, fabric tops for men are going to sell strongly and that the demand for patent leather and the nut brown Russia calf will be exceptionally heavy, while requests for the lighter shades of tan calf will not be as pronounced as they have been for the past two or three seasons. I believe the custom effect, or as some call it, the English effect, is continually gaining ground, although the high toe has died hard, particularly with the young men who love something saucy, jaunty and distinctive. Nevertheless I think it has given its last kick. For the big city trade, the narrow custom recede toes are having the call and have now caught on in all towns of the Western Provinces, which do not take as readily to new conceits as certain centres in the east. For the small town trade, the medium high toe, both for men and women will prevail.

Another shoe manufacturer, in discussing the style problem, said that the tendency just now is for manufacturers to stick to their old lasts, and I think it would be good policy on your part to advise the merchants that the styles they are getting from the manufacturers to-day are all first-

Six Questions Asked by a Leading Western Shoeman

Answered by A. E. EDGAR, Merchant and Author of "How to Advertise a Retail Store" and Other Business Literature

I.—How Do You Measure the Width of the Foot on the Measure?

There are a number of foot measures which provide for the taking of the measure of the width of the foot, and these are more or less satisfactory. These patented devices are not used as much as they ought to be in our shoe stores, especially in our Canadian shoe stores. They are indis-

and taking in the appearance of it, whether it is unduly spread out at any point, especially at the ball where the weight of the body comes when walking and standing, he can tell fairly well whether the wearer should have the same width or one wider. It will be found that it will be seldom necessary to give a wider width to a patron who has had any care at all in a previous fitting.

pensible in the high-class stores, where fit is of more consideration than either quality or price.

In the stores selling popular priced shoes it will be found that there is not a range of widths from which the clerk can make his fitting. He has a number of lines all about the same price, perhaps slightly different in style, stock, last and cut. From these he has to make his fittings. He is a thorough salesman who does the best he can with the goods he has at hand. In the popular store he must depend for a great many of his opportunities of giving a "near-fit" upon the variations from the "standard" sizes of the various makes. And as a rule there is quite a range of fittings in these.

The width of the shoe that should be worn with comfort depends more upon the sole of the foot than upon the measurements of the ball of the foot. To the experienced shoeman the old shoe will give the best guide to the proper width to show. By ascertaining the width of the old shoe

We give in Figs. I and II. the standard measurements of men's and women's lasts. These may be cut out and pasted on a card and a reference made to them when occasion arises in measuring customers' feet.

We also reproduce a foot measuring chart that has been successfully used by many shoe stores in Canada and the United States. (Fig. III.) This chart can be utilized in many ways besides finding the proper size of the foot. It can be used as a self-measuring device in a mail order business. It can be employed as a means of securing re-orders on well fitted shoes, and to facilitate the refitting of those who cannot call at the store.

II.—What Allowance Do You Make Over a Foot for Size of Shoe?

When the measuring stick is used, and the exact size of the foot is found, it is customary to allow two sizes more

than what the foot draws. This was always done in making custom goods some years ago. In Fig. IV. is shown a measuring chart that is used by a specialty manufacturer in the United States. This provides only for taking the length measure of the foot and gives the exact size that should be sold, no allowances being necessary. But this does not give the width measure, leaving that to the discretion and wisdom of the shoe salesman. By a reference to the linear measurement at the right of the shoe sizes a comparison of these can be made. The inch measure also shows the size stocking, or hose, that should be sold for each size of shoe. Hose sizes are merely so many inches from heel to toe, being made in half-inch sizes only.

best for the class of shoe; that the line is made in such a number of fittings as will allow of a proper fit for the foot; that the price is reasonable, perhaps lower than some others; that the manufacturers have a reputation that insures perfect workmanship and all round satisfaction, etc.

In Mr. Edgar's book, "How to Advertise a Retail Store," pages 82 to 88, inclusive, are devoted to the "Talking Points of a Shoe," and a thorough analysis of the subject is given, over ninety points being brought out.

IV.—Ideas as to the Best Method of Putting in Stock on the Fixtures or Shelves Where There are a Lot of Different Lines Carried.

FIGURE TWO

III.—Give Principal Parts in Describing a Shoe in Selling and the Best Points to Bring Out?

In analyzing any article the salesmen should consider the following points:

1. What the article is.
2. What it is used for.
3. Why it should be used.
4. Who uses, or who can use it.
5. The prices, in comparison with other prices.
6. Where and how the article is made.
7. What it is made of.
8. Its advantages over similar articles.

These points may then be subdivided into many other points. No doubt the correspondent would find it to his advantage to be able to point out that the style of the last is new, sensible and comfortable on the foot, etc., that the leathers are well tanned, are fashionable and suitable for the wear intended; that the linings and trimmings are of the

This was dealt with in the SHOE AND LEATHER JOURNAL of February 16th in a very complete manner.

V.—What Would You Consider a Nice Label as to Shade When Using Your Own Label?

This is a very broad question and can be answered in a broad way only. In the first place the shades, or tints in the label must be selected to go with the stain of the fixtures and furniture. This is of prime importance, as a mistake in this matter will throw out the harmony of the whole store.

Then there is the question of light to be considered. Where the light is good the choice may be larger; where there is poor lighting a tint must be chosen to reflect a great deal of light. White reflects 70 per cent. of light, pale orange nearly 55 per cent., pale green about 46½ per cent., and pale yellow 40 per cent.

If the fixtures are finished in mahogany the tints of the labels may be green, red, pink, yellow, orange or grey, these

WALK-OVER FOOT MEASURING SYSTEM

The numbers and lines on this Chart indicate the length and width of lasts in Walk-Over Shoes for Men and Women. By following instructions we are enabled to fit your feet as correctly as if the shoes were made to your individual measure. This system is part of our high grade service. It will save you time and annoyance in having your shoes fitted. With this record we can promptly and accurately fill Mail Orders.

colors harmonizing or contrasting with the reddish finish of the fixtures.

If oak finish the tints may be blue, orange, brown, green or grey.

If greenish grey finish the tints chosen should be either green, grayish red, pale pink, violet, slate or grey.

In fitting up a new store the shoe dealer should consult an architect as to the best colors to use. He can advise him as to the best tints and colors to finish his fixtures and furniture, his walls, and to select for his labels.

It may be stated that white labels will always harmonize with any finish. Also that it is often very hard, sometimes

nothing looks worse than the checker-board appearance of the cartons on a shoe store's shelves.

VI.—What do You Consider the Best Method to Follow in Putting a Description of the Shoe on the Carton—By Number or Not, and How do You arrange Matters Regarding Stock Numbers? That is, When Using Your Own Numbers and Not Those of the Factory?

This is really a question that should be answered by every merchant for himself, or at least that part of it relating to whether the description of the shoe should be written on the carton label or not. It is the writer's personal opinion that the stock can be found much more quickly when this is done in some way. Where the clerk has to memorize stock numbers it will be found that some clerks will run their sales on certain numbers, while others will perhaps sell other lines more freely. If this is enquired into it will be found that this is the result of a memory retaining one number uppermost in the mind. This should not discourage the use of a merchant's own numbers, as there is a good use for these besides indicating the class of shoe in a carton to the clerk. In Fig. V. is shown a label used by a department store.

In one store where only numbers are used they place a card in a convenient place, near the goods in each section, with the descriptions of the shoes of the different numbers, so that the clerks can consult it when necessary.

Where there are many extra salesmen used at busy times it is better to place a brief description along with the stock numbers.

Note the instructions on the label in Fig. V. These are explicit and indicate what this firm thinks necessary to place on the label.

We are unable to answer part of this question owing to its ambiguity. We refer to that part of the question worded as follows: "And how do you arrange matters regarding stock numbers, that is, when using your own numbers and not those of the factory?" If this refers to how they can

impossible, to secure tints at different times that are exactly alike. If a tint is selected for a label it will be well to have several years' supply printed at one time so as to insure having the same tint during the time that tint is in use. Buying at different dates is sure to result in off shades, and

be used on the label. Fig. V. explains this. The tag pasted on the label, and shown to the right of Fig. V., shows on the second line where the store's own number is placed. Note that there is a place for "match number," "store's own number," "size and width" (in plain figures, which is not always desirable), "cost" and "retail" prices. The descrip-

Getting On Well in the West

An Ontario boy who is making good in the West is H. Oscar Wettlaufer, who is manager of the children's and girls' department in the shoe store of H. D. Rae, 106 Cordova street west, Vancouver, with which house he has been four years. He was born and brought up in the town of Walkerton, Ont., and first learned the printing trade in the office of the Bruce Herald. After working at the art preservative for a number of years his eyesight became weak and he found that he must engage in another occupation. Mr. Wettlaufer went West and, after spending some time

tion of the shoe is briefly shown stamped on the label at the right hand side, and below the place for the firm name.

* * *

(The SHOE AND LEATHER JOURNAL is always glad to answer questions for retailers, no matter what they might be.—Editor.)

DO YOU GET THIS?

We once knew a man who agreed with his boss in every thing he said or did. The boss asked this man one day, if he did not think it would be a good thing to fire him. He agreed.

on a farm, secured a position in the shoe department of Whyte & Co., Moosomin, Sask. Later he went to the Coast to enter the service of Mr. Rae. In the East he took a lively interest in all kinds of sports, particularly hockey, lacrosse and skating and earned more than a local reputation as a speed skater. He was also a member of the 32nd Battalion Band at Walkerton. He is a brother of H. E. Wettlaufer, sales manager of Charles A. Ahrens, Limited, Berlin, who is the retiring president of the Ontario Hockey Association.

Just One Little Pointer

The law of averages applies to the art of card-writing as it does to any profession. Some men will make it a success with little work, while others will find it necessary to work harder. One of the prime essentials of the publicity man is a knowledge of proper English. Any man who uses "ain't" is not an advertiser and should be ostracized from the profession.

Don't be afraid to tell the truth. It is part of your honor.

* * *

Don't be afraid to risk. The great successes are born of chance.

* * *

Don't be afraid of imitators. Originality always bears a trade-mark.

How do you Defend your One Price Policy?

Tom Sheppard who has been a frequent visitor at your store in the past comes in and asks to see a strong, serviceable shoe for general work on the farm. You show him several staples in pegged, loose nailed and Standard Screw, various prices. Finally he selects one which sells regularly the year round at three dollars.

On being told the price he hesitates and offers you two dollars and seventy-five cents, saying that no other shoe suits and fits him as well as this one which was a Standard screw, tan grain blucher, whole quarter, double sole, with plain toe and brass eyelets.

Now, in the past you have rather prided yourself that your store is strictly one price with no favors shown. You put a fair profit on your shoes, but always get the marked price—which is in plain figures.

Still Mr. Sheppard has been a good customer and will likely remain so if handled properly.

Would you depart from your regular practice and cut the price, and if so, how are you justified in so doing.

If you would not "throw off the quarter," what would you say to Mr. Sheppard to thoroughly convince him that you were right in your attitude and thus hold him as a customer of your store.

For the best answers the SHOE AND LEATHER JOURNAL will award cash prizes of \$3, \$2, and \$1. Competition closes March 20. Send in your answers as soon as possible. The results will be announced in the April 1st. issue.

Get Down to the Definite Facts in Selling Shoes

Every Clerk in Your Store Is a Link in the Chain That Holds Your Business—Do Not Try to Stampede Patrons Into a Decision—Lack of Method and Supervision in Many Establishments

Some expenses are economical expenses. A concrete fact may also be reinforced. Everyone has his troubles, so keep yours to yourself. Arguments that may land one customer won't always go with another.

It is not always the ability that counts so much as the sticktoitiveness. Many men are deterred from doing their best through the belief that another can do it better. The stronger personal hold you can get upon the customer of the store, the more money you will be worth to your employer. Every clerk in a store is a link in the chain that holds that store's business. A chain is no stronger than its weakest link. You know how you feel when you go into a store and no one pays any attention to you. You think a long time before you go there again. If you discover that customers don't like to have you wait on them, make up your mind that the days of your stay in that place are numbered.

Don't talk generalities about the shoes you are describing to a customer. Get right down to the definite facts and specify and make plain every small point. "It's easy enough to be cheerful when life flows along like a song," and after all it's not hard to be cheerful habitually if you take pains to get into the way of it. Get the habit.

Study some branch of store work on the side. Learn to make sign cards, to write advertising, to display goods, to handle correspondence. It's a busy man who hasn't time to learn something.

Finishing the Shoe Sale

There is a courtesy in finishing a sale to make the customer remember that the store desires his further patronage. The shoes being satisfactory you replace them in the carton and wait for the customer's money—not rushing this operation, for it sometimes is hard for the customer to part with what he has so dearly earned. Make out your cash slip and present the box, money and slip to the cashier, if all the clerical duties are done by that person, or call off the number, length, width and price, also the extra incidentals, such as shoe paste, polish, lasts or silk laces. Be positive that the shoes are not mis-mates. Then tie up the bundle—sometimes men desire a small parcel, and if so discard the box. It pays sometimes to insert a shoe-horn, extra laces and store catalogue, if you have one. Be sure to count the change before and after the cashier verifies your sales.

In the closing of the transaction do not do it hastily. Give the customer the parting that you would give a guest, and especially a guest that has transacted his business with you. Hand him his bundle if he is to carry it himself, or take his address if he is to have it sent. Preferably the sending method should be used, because it gives you an addition to your mailing list and the expense is slight if the customer lives within walking distance. The same measure of kindness and courtesy with which you began your transaction should be used in its close. See the customer to the door, if possible, and bid him good-day with a "Call again, sir," at any rate make the final businesslike and in such a manner that the customer will be pleased with the attention that you give him. It's the best salesman who can take a personal interest in the customer from start to finish.

Give Customer Time to Consider

It doesn't do to hurry a customer. There are many people who tax the patience of clerks by their slow, hesitating ways, but the salesman who makes the best record has

got to learn to put up with all kinds of people. It is especially provoking when other customers are being kept waiting, but a pleasant "I'll be with you in a minute" will generally hold them and perhaps act as a stimulus to the backward buyer. Few people, however, like to be hurried, especially women. The decision they are being called in to make may mean more to them than you know. The utmost patience, therefore, must be exercised. Sometimes it is possible to explain the points of some shoes being looked at, and then while the customer is thinking it over take another in hand for a few minutes. A good clerk needs to be quick of action as well as a strong and convincing talker.

Capacity, Not Genius, Needed

Most of our salesmen are remarkable for their ability to hustle, and what is rather more to the point for their willingness to exercise such ability. We have occasion to congratulate a good many of them on the result they are getting—on the increase, week after week, in their orders.

It was said of one man by an admiring competitor that he must be a wizard to get the amount of business he had secured under certain adverse conditions that he had to meet. But he is not a bit of a wizard. He hasn't any supernatural powers, merely the strength of mind to "keep hard at it" all the time, to put in an honest day's work every day in the week. He is not a conjurer, but merely a persevering, persistent worker, with grit and determination. Anyone else on the force could do as well if he applied himself to the task with the same resolute purpose.

Too many men accept defeat because they think they lack some special qualification, some mark of genius which really is not needed at all. It is not genius which they are in need of, but the bourgeois, commonplace, everyday capacity to buckle down to work. This capacity could be cultivated if they put their minds to the task, and they would find it immensely more worth while than the "spark of genius" which they credit to other men, complaining because they themselves were not endowed with it.

Have Well Planned System

One of the chief stumbling blocks to successful salesmanship is lack of method. In all departments of business the value of method is universally acknowledged. The manager, the clerk, the bookkeeper—all must work on systematic, methodical lines or their labor is a dead failure. The salesmen must have method if they want to get, not only fair results, but the results that could be expected from their efforts. Regular hours for working, well-thought out and well-planned lines of talk on the merits of the goods and a system for keeping in touch with every customer and a finger on the pulse of his trade are necessary.

The Hardie, Redmond Co., Limited, of Toronto, has been granted a charter. The capital stock is \$40,000 and the incorporators are David G. Hardie, Jas. M. Redmond, C. F. Vanhorn, Harold Rowlatt and F. A. A. Campbell, all of Toronto. The company is empowered to buy, sell and deal in all kinds of rubbers and shoes as manufacturers and jobbers, to manufacture, purchase and deal in leather, and to make and deal in shoe counters, cartons, wood cases, shoe dressings and other parts and findings connected with the manufacture of footwear.

Do You Give Your Clerks Chance To Do Something

How Cooperation Will Increase Your Trade and Enable You to Get a Firmer Grasp of the Larger and Important Affairs of Your Shoe Business—Dividing Up the Store Into Departments

There is so much emphasis placed upon the mastery of details in present day merchandizing that the average retailer tries to carry on his own shoulders the whole burden of his business unaided and frequently finds in the end that he cannot stand the strain. The shoeman who tries to be here, there and everywhere, who tries to carry around with him all the store and salesmanship problems that crop up, customers' complaints and other data, all at once and the same time, will soon find that he is on the swift road to shattered health and ultimately, financial ruin.

The head of a large departmental store, cannot expect to make a success of his business, entirely unaided. What does he do? He goes out and secures efficient help. He surrounds himself with men of ambition, men who have ideas of their own. These assistants, he places in charge of the different departments, giving each of them a measure of responsibility. In this way, and by this means alone, is he assured of the profitable operation of his business, and by this plan only, is he able to operate his establishment on such a gigantic basis as many of the large departmental stores of today are being conducted.

And why are such men doing this large business? Simply because they are not harassed with small details that could just as well be settled by a junior. These men unload many of their minor problems on the shoulders of a department head. By so doing, they are enabled to devote their time towards building up the firm's patronage, and putting its affairs on a still more sound footing.

Your position certainly is not that of the head of a very large departmental establishment which makes as much

profit in a day as your own store does in a year, but relatively you are placed in the same position as the directing head of the larger business.

"Too Busy For Anything"

How common is the cry heard in a shoe store, "Oh, I am too busy today, drop in some other time and I will look at your goods." Very often, when this is said, a traveler with a line that would suit your trade far more than the styles you are at present carrying, is being turned away. As a result, the progress of the store is retarded by your being too busy, probably with some more or less important detail of your business.

The above incident is used merely as an example, to bring out a point which leads to a solution of the "too busy" state in which many shoemen are placed. This solution is cooperation between employer and employee. For the ultimate success of your business, you must have cooperation between yourself and the store's help. How are you to secure that cooperation on the part of every member of the staff? Many a man is up against this problem today, and is not handling it successfully simply because he takes all the initiative himself, and neither looks for nor rewards enterprise or suggestions on the part of the staff. As a result, the clerks lose interest, and the employer himself finds his burdens increasing all the while.

Have Understanding With Clerks

"Never do yourself, what someone else can do equally well." This is the motto of many successful men, and in

EFFECTIVE USE OF POSTER SHOWING SHOE PARTS

The poster in this window shows the different parts necessary to make the complete shoe. The show card calls attention to the selected materials. Most manufacturers will gladly furnish this sort of exhibit. Treatment of leather, qualities and weights required for the different parts of the

shoe, with photographs of the factory, would add to the display and serve to increase the public confidence in both the store and the product.—Illustration from "There's Money in Your Show Window," issued by National Cash Register Co., of Dayton, Ohio.

fact, is invariably the rule. The principle is sound and is applicable to the shoe retailer, no matter whether his business be large or small.

Now, if these remarks apply to your business, you owe it to your own best interests to have a thorough understanding with your clerks in order to secure better co-operation. If, in the past you have treated the efforts of your clerks with indifference, and so, caused them to lose concern, do something now, to revive that interest.

Pick out a clerk who shows initiative, ability and loyalty. Place this clerk in charge of a certain department or section of the store. Make him absolutely responsible for results in that section. Give him your confidence as far as you think it advisable, and, at any rate, prove to him that you believe he is equal to the responsibility placed upon him. If he is of the right type, he will rise to the occasion in a manner that will astonish you. Of course, you should be reasonably certain, when making such a move, that you are working with sound material, with a clerk who has some "get-up" in him. Encourage him to come to you with his more important problems, but also teach him to rely on his own knowledge. Above all things, don't make him feel that you are making a test, that you have your eyes on him from one end of the day to the other, with expectations every minute of his making a blunder. Why? If he feels that this state of affairs exists, he will be very much handicapped and is sure to take the view, that you are merely giving him an opportunity of showing what he can't do, rather than a chance to show what he can accomplish.

Dividing Up the Work

Divide the store into the number of departments you consider advisable, and put certain clerks in charge of each. There need not necessarily be a separate clerk for five or six different departments, but, if you have two clerks, give them each three different branches to look after. Even if you only have one permanent or steady assistant, divide up the work with him. Treat him more as you would a partner, and see the difference in the quality of service you will secure. As a result of splitting up the work, you will have another or others brains cooperating with your own in pushing your business. You may find it a wise move to offer a percentage or bonus on all sales above a certain figure. This will serve to increase interest as the progress of a certain department intimately concerns a clerk. He knows that it is his own special department, and that he is accountable for the success of it. He is also aware that every extra dollar taken in means added money in his own pocket. Moreover, aside from this, he has in a sense, the same personal interest in the business as the proprietor.

If you care to carry the bonus idea still further and create an added interest you can give a certain "purse" yearly to the department showing the largest net increase during the twelve months.

Value of Your Time

Having thus rid yourself of the old-fashioned idea that "if you want a thing done well, do it yourself," you will now be free to exercise a much broader oversight of the business, than you were able to do under the old order of things. Keeping in touch with your managers or "department heads" will naturally take a lot of your time, but you are not harassed as you formerly were with little unimportant items on which you wasted so much time. You are now able to consider the installation of a modern system of checking stock, and keeping track of it. This you were unable to do in the days before you learnt to credit your clerks with a fair amount of brains. Perhaps you have been thinking for a long time of enlarging your establishment. You are now able to take immediate steps towards doing so. This too, you formerly "did not have time to consider. You will also be able to note any trouble or weaknesses instantly, and if

your windows are not being properly dressed, you will not be so busy ferreting out some delivery trouble, that you will have no time to devote to a discussion with your window trimmer of ways and means of improvement. If sales in a certain department show a falling off, you will now be free to pay special attention to this branch. You will also be enabled to try out and perfect sales plans, leaving the details to your head clerk.

Buying is one of the most important branches of the business. The cause of many failures is poor buying. With more spare time, you are enabled to look after this branch as it should be attended to. You are not now forced to buy from the first traveler who happens along.

You will also be able to devote much more time to advertising your business, which is the best way to increase it. There are many shoemen who, if they left customers to good salesmen, and devoted more time in their private office, thinking out plans of advertising and better methods of using their publicity appropriation, would be operating much larger establishments than they are at present.

To sum up the whole thing in a nutshell, you are now going ahead and increasing your business, where you formerly were stationary. It is an old saying that it is impossible to remain stationary, that we must either go forward or backward. Don't you consider the new order of things much better than the ancient, fussy way of conducting a shoe store? Why, is it not worth while alone, for the load you have had lifted off your shoulders, the lessening of the strain on your nerves?

Finally, you are in business to serve your customers, and they are looking for the store which gives the best service in town. Cooperation between clerk and employer, means that you are able to give this class of service, and when you do this, you can consider yourself on the high road to success.

Why He Got No Returns

Smith wrote an ad.—'tis years ago—
And yet it's still in print;
Its "pulling power" has faded so,
The ink has lost its tint.

But still poor Smith awaits results
From that now ancient ad.,
And still he'll wait until his pulse
Doth cease; 'tis very sad.

His business suffered, as it's wont,
When laxity's employed,
Together with old-fashioned "don't"
And reason all devoid.

If he had changed his ad. perforce
With others to compete,
His business now'd be on that course
Where all progressives meet.

—C. R.

Some Good Philosophy

Start the day with a smile.
Don't let little things worry you.
Nor big things either.
Hard work brings results.
Teamwork pays.
Don't be a bear except to hug every prospect for a sale.
The whale for work gets the lion's share of business.
Don't be a grump.
Insist that every customer be fully satisfied.
In case of doubt, put on your thinking cap.

AN OLD ESTABLISHED ST. CATHARINES SHOE HOUSE

Historic Shoe House to Make Extensive Improvements

One of the oldest and most widely known shoe firms in Western Ontario is that of Dillon & Moore, St. Catharines, who have been in business in that town about thirty-five years. The store has a handsome front and one particularly noticeable feature is the large boot suspended from the doorway. The show windows are decidedly attractive and the firm make liberal use of

them with the result that the best effects are obtained.

"We are strongly of the opinion that the season of 1914 will be an exceptionally good one for St. Catharines, inasmuch as prospects are bright owing to the increased population that is coming in with the contractors of the new \$55,000,000 Welland ship canal. St. Catharines is quite well equipped in the matter of shoe stores, there being thirteen doing business here now," declared Mr. Dillon, who has been sole proprietor of the business since the death of his partner, Mr. Moore, several years ago. The firm have been severely cramped for room for some time past and in a few weeks contemplate making extensive changes. The premises will be deepened by about forty-five feet, which will give them a floor space of 105 feet in length by 25 in width. When these alterations are executed Dillon & Moore will have one of the finest shoe stores in Ontario, a fitting climax

to the long and successful record of a house that has dealt exclusively in footgear in the Niagara district for thirty-five years. One feature of the firm is that they carry a certain amount of novelty footwear and out-of-the-ordinary effects. This is done in order to keep the trade in St. Catharines, as, if a certain class of young people was not able to obtain the very latest in their own city, they would be tempted to take the trolley and go over to Niagara Falls or Buffalo.

Leading Canadian and American lines are stocked, among them being J. & T. Bell, Smardon, Vassar, Art, Dorothy Dodd, Burts, Leachs, Ultras, Harney and Helming-McKenzie for women, while the men's comprise, Hartt, Astorias, Regal, Nettleton and Barry.

Dillon & Moore have long been enthusiastic advertisers and use every means in their power to make more widely known the resources of their establishment and the quality of their goods. Special attention is also devoted to findings, fancy slippers, pumps, children's goods and other lines, while a first-class traveling goods department is conducted. In repairs all work is sent out. A careful watch is kept of the stock at all times and slow selling lines are gotten rid of by the bargain table route and by special sales. James Dillon, who is a live shoeman, is pleasant, earnest and energetic and has been in the trade all his life, his father having at one time conducted a shoe store in the Garden City. Mr. Dillon has had experience in Toronto, Hamilton and London.

Spring Opening Window Will Attract the Trade

Some Valuable Advice and Instructions By a Window-Dressing Expert—Result of Overcrowding and Under-Stocking a Display—A Background That You Can Make Yourself Without Expense

By J. J. AMBROSE, Montreal

There are times and conditions which preclude necessity for a high degree of beauty in displays. Sale times, for example, when we make an appeal with reduced prices,

beauty in a lesser degree than "in season" will answer. In fact, absence of the usual degree will often serve to attract those who form the habit, consciously or otherwise, of looking for it in a certain place. If passers-by see less beauty than usual they will wonder at the change, and their curiosity to learn the cause of it will lead them to investigate. And, if upon investigation they find goods priced at less than they appear to be worth, little else is necessary to hold their interest. The same end, then, will be accomplished but with different means than formerly. At such times more than at any other, I think, we should concern ourselves with "how much is enough."

But even then, this alone should not receive as much attention as "how much can we show and show right"—in a way that will make every shoe appear worth what we claim it formerly sold at. We must keep in mind the fact, that no matter how low the price, footwear will not make a very strong appeal if it is so shown that it does not look fit to wear.

We must not throw a lot of shoes into the window because we've cut the price, nor can we stack a lot of merchandise in a window and expect anyone to see half of it. The aim should be to show as much as possible, without making desirable merchandise look like so much stock being offered at reduced prices because it is worth no more than is asked for it. If you make the garments look like peaches rather than lemons in sale periods, you will find out how much is enough for "sale time" just as you will find out how much is enough when your aim is to make a beautiful display at other times.

As for there being any reason for one store using more or less merchandise than another in displays, I can only say I have yet to find it, or anyone who has found a good reason. I do not believe that because a store is located in a so-called aristocratic shopping district, the windows should be so sparsely trimmed as to make it appear that the store is short of goods. Neither do I think that because the store caters to "the masses" it is wise to so fill a display space as to have no room for some degree of beauty. Nor can I figure out why the man with the dinner pail should be expected to distinguish forms and colors, in a confusing jumble of both, more readily than the man with the bull dog and cane.

At this season, whether you cater to the "classes," or "masses," you will find a "spring opening" window of the

proper kind a paying investment. Here I am giving a plan for a handsome background that will cost you next to nothing, and one that appeals to any class of custom.

To make up pad table, use two pieces of board measuring 7-8 in. thick, 6 in. wide and 4 ft. long, this to be used for front of top. For side use same thickness and width, 2½ ft. length. The top then has to measure 2¾ x 4 ft. long.

Now, for the bottom, measure same thickness, with 6 ft. length for front and 3½ ft. long for sides by 6 in. wide. Same thickness should also be used for inside pieces. Use four parts measuring 1 ft. wide x 2½ ft. long and four parts measuring 6 in. wide x 2½ ft. long, four measuring 6¼ in. wide x 1 7-8 ft. long.

For the background first get your uprights, which measure, one as 5 ft. x 4 in. wide; one as 5½ ft. x 4 in. wide; one as 6 ft. x 4 in. wide; one as 6½ ft. x 4 in. wide; and place together as cut shows, then paint same in a white coat and use natural asparagus or smilax green. Follow these instructions and you will complete a background that will make a fine setting for a spring opening display.

New Handy Finishing Machine

One of the handiest devices in the line of a finishing machine equipped with the necessary wheels and brushes is seen in the accompanying illustration. This device is

suitable for the small shop, requiring very little space and the brushes and wheels can be changed according to requirements. It is contended that the "Trio" treadle finish-

ing machine possesses several advantages, among them being the limited space required, three short axles instead of a single long one, the wheels and brushes being within an imaginary circle enabling the operator to remain in one place instead of moving around, and the fact that a small treadle only is required, which, acting directly on the fly wheel, calls for much less exertion on the part of the operator. The axles are ballbearing, ensuring light and easy running and the treadle is balanced by a counter which permits a boy keeping the machine going, if necessary, without getting in the way of the operator. The machine is handled by Charles Parsons & Son, 79 Front street east, Toronto.

A Citizen of Public Spirit

A man of public spirit is W. J. Gibson, manufacturer of harness and other leather goods such as gloves, mittens, etc. He has served in the town council, as a member of the board of education and at the last municipal election was honored by the ratepayers in being chosen as mayor of

Gananoque, winning by 441 majority. Mr. Gibson is a man of genial, courteous manner and is well informed on all questions of the day. He is of Scotch descent, his grandfather being the later Dr. William Gibson, of Glasgow, Scotland. Mr. Gibson's father was born in the land o' cakes and educated there for the profession of the law. He came to Canada in 1833 and entered into partnership with his brother, the late Dr. J. B. Gibson, of Cowansville, Que., and did a large real estate business in Shefford county, where the subject of this sketch was born in 1857.

The first venture of W. J. Gibson on his own account was in the tanning business at Adamsville, Brome county, where, in addition to making leather, he manufactured belt laces, shoelaces, etc. Later he added a general store, which he managed successfully. In 1887, when selling his goods on the road, Mr. Gibson came to Gananoque and so well pleased was he with the location of the town and its advantages that he decided to remain there and accordingly began to manufacture belt leather, laces, etc. Afterwards he purchased a stock of general goods from A. Mutchmore and conducted the west end store for four years, at the same time continuing his tannery. Later he sold off his stock and closed the store. He bought the old tannery property on Tanner street, Gananoque, which he rebuilt and enlarged. In company with W. R. Acton, he added to his busi-

ness the manufacture of harness. The partnership continued for one year when they separated and each partner has since conducted a separate business. Mr. Gibson employs about sixty hands, sells to the wholesale trade only, and his business has been expanding from year to year. In his new position as mayor of the pretty town on the banks of the St. Lawrence he will doubtless make a record for he is a man of fine business ability and genuine moral worth.

Turnover Is What Tells

In order to make money in the shoe business, it is necessary for the retailer to turn his stocks over often. If he is doing a business of \$50,000 a year, he should not have in the house more than \$15,000 worth of goods at any one time—in other words, he should turn his stocks at least three times a year. Obviously, the man who succeeds in doing this has a much better chance to come out ahead than the dealer who has large and unwieldy stocks, and who considers himself fortunate if he can move them out twice a year.

Other things being equal, a man with \$5,000 capital, doing a business of \$15,000 a year, will make more money than his competitor with twice the money invested, doing \$20,000 a year, for the larger store, with its heavy overhead expenses, interest charges, etc., will find in the end a dangerously narrow margin.

It follows that to carry larger stocks than are necessary is to make a mistake. Of course it is impossible to carry stocks of ideal size; that is, just enough to answer the demands of the public along every direction, and no more. It is beyond human powers to anticipate the demand exactly, and therefore stocks are of necessity out of line with the trade at certain points. The question then presents itself as to how to have the goods that the public wants without loading up on a lot of stuff that it doesn't want.

Black Heels on Colored Shoes

Black heels on russets look well, and as the heel is the most important part of the shoes, it is well to have a distinct heel finish, so the heel will come out prominently. The black heel is quickly noticed on such shoes, and although men's shoes only have been made that way, the idea seems as good when applied to women's shoes. The black heel is easier to finish, and should be seen quite extensively, even when seen in combination with a white upper the effect is good.

He Takes Up a New Line

Frank Power, who has recently been appointed salesman for the Rena Footwear Co., Montreal, taking the place of the late John Stephens, who covered the province of Ontario, is widely known to the trade both as a traveler and as a shoe retailer. Mr. Power conducts a successful retail store in the Canadian metropolis, and at certain seasons takes a trip on the road. For a number of years he represented the Rideau Shoe Co., of Montreal. Mr. Power has been engaged in every branch of the trade except actual manufacturing and the wholesale end. He has many friends who will wish him every success in his new connection.

The Way to Lay Out an Attractive Spring Shoe Ad.

The Purpose of and How to Make a Layout—Calculating the Amount of Matter Necessary to Fill Given Space—A Useful Table for Finding the Number of Words Necessary

By R. K. BROWNE

Ability to make a good layout of an ad means much to you as an advertiser. You may have a thorough understanding of display principles as discussed in the last issue of the *SHOE AND LEATHER JOURNAL*, but unless you can give practical expression to these ideas when laying out your advertising, the latter will lose selling force. Practice will enable you to become fairly proficient at this work.

These are two in number, it gives a rough picture of the ad as it will appear when set up in print. You can thus decide whether the arrangement violates any of the rules of proper display, and if so, make the necessary change before the ad is set up, which saves time, money and trouble. Again, the layout gives the printer a good idea of the effect you desire to produce. This saves guess work on his part and disappointment to you. Only an experienced ad writer knows how much dissatisfaction often occurs if definite instructions are not given to the printer. The average compositor has many advertisers to serve, and has neither time nor inclination to give much thought to the arrangement of advertising copy; again, only a small proportion of printers have correct ideas as to what constitutes effective display. If you are dealing with one who has proven his ability in this particular, arbitrary directions are not necessary. When you explain to him the effect you wish to produce, he can be trusted to approximate it closely. You can often save yourself much time and effort by sending along with your copy any clipped ad that is arranged in the style you like. Mark the clipping "Follow this style," and the printer will match it as nearly as he can.

How To Make the Layout

It is not usually necessary in practical work to letter in the display lines as carefully as in the layout reproduced here. As long as you get the general effect and the proper arrangement of the component parts of the copy, that will suffice. Occasionally a careful layout will be of advantage to you. Individual judgment must decide such questions.

In any layout, no matter how hurriedly prepared, you should indicate the size of the ad. In the case of this layout a memorandum, "6 inches, double column," would be placed alongside the layout. If you have not contracted for a fixed space each insertion, you may possibly save time and effort by allowing the printer a little liberty as to the depth of the ad. Give directions such as, "set in 6 or 8 inches, double column," or "set in depth necessary." You will then not have to make so accurate calculations as to the amount of copy needed.

However, it is open to question whether this is the best method to adopt. The average ad writer usually determines the amount of space he desires to use before hand. When this is done only a certain amount of matter can be written, and the effort expended in keeping it within that limit invariably results in the discarding of irrelevant words or phrases and in stronger, more pulling copy. The boiling down process is as useful in ad-writing as in the maple sugar camp. Only the best remains, and space is used more economically.

Always Use a Border

To use a border is an almost invariable rule. In department store ads the space used is so large that the border can often be dispensed with, but it will weaken your adver-

tising to do so. If you use a plain rule border, draw it round the layout as far as desirable—the whole way, if necessary. In a layout the size of the one here, this is a short operation with a ruler and pencil. One with heavy lead can be used for filling in the border. If the ad occupies a large amount of space, fill in enough of the border to enable you to judge whether it is suitable for the size of the ad, and for the effect you wish to produce. By so doing, you may find that you had intended to use a twelve point border, whereas a six point one is quite sufficient. Always remember that the border should not distract attention from the copy, but rather should be just strong enough to bring the latter to the border should not distract attention from the copy, but not attempt to fill it in all round, as this is time wasted. An inch or two of one or more corners will give a fairly accurate idea.

Dealing With Display Lines

Next, show the depth of the space to be occupied by the display lines. In the accompanying layout thirty-six and forty-eight point type is used, the first pair of dotted lines

being thirty-six points apart, the second pair forty-eight. Leave a little space between display lines, and between display lines and body type. Owing to the fact that the face of the type is not so long as the body, the display letters themselves are not quite as high as the directions call for. This should be remembered when planning display lines, and due allowance made. You should also decide on the width of the longest display line. In this connection, it is always advisable to have a type-book handy. In many of the larger newspaper offices, these are supplied free to advertisers. The smaller offices seldom do this, but your printer can procure one for you from one of the various type foundries, which will enable you to calculate the number of letters of any size or style of type that can be set up in a display line of given length. He should be glad to do this,

as it will save guesswork on the part of his staff, if your layout is accurate in these details.

Is Style of Type Suitable?

Letter in all display lines, lightly at first, and then more heavily if you think the effect is satisfactory. This may be done roughly, but get the letters as near the exact height as possible, and about the "strength" of type you desire to use. Trying to approximate the style of type more closely than this will only be loss of time, as it is a slow process; moreover, it is seldom necessary in ordinary practical work. Just here, however, a word of caution is advisable. Be sure that the printer has on hand any particular style of type you may wish to use, and, if so, that it is suitable, considering the nature of your copy. As before stated, if the printer shows judgment in typographical matters, it will often be well to let him select the style of type most suitable, even though you yourself determine the length and depth of the display lines. "Use the nearest face you have," or something of that nature on the layout will allow him a little exercise of judgment, and he will produce the best effect he can with his resources.

Space of Body Type

Show the space to be occupied by the body type. In the case of small ads, the best plan is to run light pencil lines across the space required—as in the accompanying layout. It is impractical to try to draw as many lines as there will be lines of type when set up, but you can line the space roughly so that it will give a good idea of whether the display effect of the body-type is proportionate to that of the ad as a whole. Make these lines the exact width of the space, which should be an even number of picas wide, as few printers have leads in half-pica lengths. In large ads, it is better to run a light dotted line around the space. If a plain line be used, it may be taken for a light rule and set up that way. A double arrow, as shown here.

may be inserted to make the width of the space unmistakable. It will be noted that in the layout reproduced here, the size of the body type to be used is specified. This should be done in every case, in order to calculate copy necessary, and because, while a line of display type can easily be changed, if desirable, changing the size of the body type means that practically the whole ad must be reset. This is an expensive and wearisome business, and should be avoided whenever possible. You should also state whether the copy is to be set leaded or solid, i.e., with a little space between the lines of type, or as closely as possible—as this will also affect the amount of copy to be written.

A Handy Reference Table

Next, calculate the amount of body matter that will be required to fill the space allotted for that purpose. Perhaps the method which you will find most serviceable is to find the area of the space in square inches. The following table can then be used to find the approximate number of words required to fill the given space. Nothing less than six point type is mentioned, as smaller sizes are very seldom used by the retailer:

Words to square inch
(approximate)

| | |
|-------------------------------------|----|
| 6 point, set solid | 47 |
| 6 point, set leaded, 2 point | 34 |
| 8 point, set solid | 32 |
| 8 point, set leaded, 2 point | 23 |
| 10 point, set solid | 21 |
| 10 point, set leaded, 2 point | 16 |
| 12 point, set solid | 14 |

| | |
|-------------------------------------|----|
| 12 point, set leaded, 2 point | 11 |
| 14 point, set solid | 11 |
| 14 point, set leaded, 2 point | 7 |
| 18 point, set solid | 7 |
| 18 point, set leaded, 2 point | 5 |

Calculations can be made in picas if you wish to avoid fractions. A pica is one-sixth of an inch, and is the accepted unit of measurement with the printer. Multiply the depth by the width in the same way, then divide the result by the number of picas in a square inch, viz., 6. This will give the number of square inches.

In ads where the body space is very irregular in shape, it can be divided into a number of squares or rectangles and the above method used in each case. In triangular space, multiply the width by the depth as if it were square, and divide the result by two. Circles are sometimes used by advertisers for novelty in display. To calculate the amount of copy required to fill a circular area, multiply the diameter of the space by itself and divide by 7854. In doing this of course make the allowance for the necessary margin and any display lines used. To be on the safe side it is always well to provide a little extra copy, with instructions as to where it should be inserted, if the copy furnished is not enough to fill the allotted space; also to advise the printer where to omit matter if the space is overrun.

Paste in Illustration Proofs

When an illustration is used, paste in a proof of the cut on the exact space it is to occupy. In case the proof is not to hand, do as in the layout shown—draw a rough outline, and mark "cut" in the space. If several cuts are to be used, be sure that the proof of each goes in the right place on the ad, or if you have no proofs, number each space and place numbers on the back of the cuts to correspond.

Never try to write the copy in the space left for it on the layout. It is often done, but it is not a good plan. The writing is usually so small that the compositor cannot be blamed if he makes mistakes. You are only inviting trouble by this method. If the ad is small, you can often write the copy underneath the layout. In large ads divided into sections use separate sheets. Number the sections on the layout, then give the copy sheet corresponding numbers. This obviates mistakes. Also remember that in writing the copy, the display lines must be inserted on the copy sheets as well as the body matter. The layout is simply a guide for the printer as to the style in which you wish the ad set up, but it is never to be considered as copy. This applies to subheads and prices as well as head line, name and address.

What the Strike Cost

Speaking of the loss entailed by the recent strike in Quebec, a local paper says: "The loss in wages and auxiliary issues during the seven weeks the factories were closed entailed a sacrifice of nearly \$800,000. The loss in wages alone is conservatively computed at \$350,000, not including the closing up of box factories connected with the industry, and the curtailment of the output in the tanneries that forced a number of men into idleness. Added to this is the consumption of leather in the manufacture of boots and shoes, together with the loss of orders, and output of the various factories, etc. There is also to be considered the depression caused in the grocery, meat and dry goods trade of St. Roch and St. Sauveur, that is computed to reach a large value in these various lines of business. In fact, the tie-up had the effect of causing a depression in every branch of business in St. Roch and the amicable settlement reached by the union operators and the manufacturers will be hailed with great rejoicing by the trade of Quebec."

You Must Have the Volume of Business to Succeed

In Order to Get This You Should be Alert—Too Few Dealers Give Sufficient Time to Figuring What It Really Costs Them to do Business—Organize, Systemize, Individualize and Popularize

The first idea upon the subject of "how to make shoe merchants more successful" was how to make a few merchants more successful in five minutes. The first thought that came to my mind was, I would recommend him to join this association and attend this meeting and meet these members and have an ample exchange of ideas and then go home and brighten up his store windows, said Wm. M. Laird, of Pittsburg, Pa., before the National Shoe Retailers' Association.

Organize, systematize, individualize and popularize his store is all that he possibly could do. After concentrating his energy and his efforts and his capital he must show liberality and honesty in his policy to his employes, his customers and his manufacturers.

He must advertise in the best newspapers. I say double your advertising space for larger results wanted right away, and then keep it up continuously.

After spending more money in advertising, spend some more money in dressing the inside, the upkeep to your store.

After that I would recommend as items for your further progress and more successful business, the doing of a great deal of advertising. Advertising is your best salesman. It gives your clerks and sales people confidence. It gives your customers confidence, and gives you confidence to go further. Don't let up, continue all these things, keep it up, and you will find more work to do; to occupy time and advance you, you certainly will improve and be more successful each year if you follow this. Take summer vacations and winter vacations. Travel all that you possibly can afford to other cities and places and see what other people are doing.

Success Lies in Volume

You must have volume of business to succeed, and you cannot have volume of business without all these liberal ideas that good free advertising and up-to-date establishments bring and that go with such an establishment. So don't forget that it costs you over 25 per cent. to do business, and don't forget that your net profit will average you, when everything is counted, less than five per cent. per annum on your sales.

Average down your fixed charges, and pay grave attention and you will find that rents and running charges will be cut down, and that can be brought about by advertising and volume of business.

The expenses of a large retail store are divided into four or five large items, such as rent, help, advertising, incidentals such as insurance and a thousand and one things, and any one of these will cost more than 5 per cent. in any going, successful business, and the depreciation and cut price sales and other things that follow a large business will average less at the end of the year than 5 per cent. on a general average. That is, if you actually count interest on your capital and bring your cost into the business.

Shoe Profits Are Small

I think that a great many merchants do not give enough time to figuring the great many things that it is costing them to do business, and I do think that the profits in the retail boot and shoe business are smaller on the average than almost any other line of business that you could speak of, unless it was the salt and sugar in a grocery store. I would advise the shoe merchant to make a serious study of his business, and in so doing in finding any dead articles, mark them off, and study all of the things that I have spoken about

and every one of them I think he can find a little here and a little there which would add much to his success to carry him forward. You want to keep your stock fresh. You want to turn it at least three times a year. You want to be open for new stock right along every season that comes along. People want new goods most generally, and they don't want this dead stuff.

You want to buy from good manufacturers. You do not want too many manufacturers' lines in your store. You boil it down to a clean, comfortable number of lines, then I think you can figure your successful business better each inventory day, and not have poor stockage.

The Way Ideas Lead Them

You take two men and start them out as salesmen, and then start them into business, and they both have been brought up on the same line and under the same man, and

From Driver to Store Manager

A. V. Wright, manager of the shoe branch of Walter L. Joyner's Department Store, Moose Jaw, Sask., began his connection with the trade about nine years ago. To climb from being a driver of a delivery wagon belonging to a shoe retailer to the position of manager and buyer for a shoe department in one of the large Western stores in this short

time is, in the vernacular of the day, "going some." Mr. Wright secured his first position with the McRobbie Shoe Co., of St. John, and was afterwards with Percy J. Steele, of the same city. Desiring to see the West, he landed in Winnipeg nearly four years ago and first took a situation with the Regal Shoe Store. Mr. Wright, who was born in Cheltenham, Eng., is an enthusiastic shoeman and has put the shoe department of Walter L. Joyner on a paying basis. It is thirteen years since he reached Canada and in that time Mr. Wright has managed to get on splendidly. He is an alert and optimistic westerner.

following the same ideas, and when they are separated and start out each on his own line of work operating from their shoe experience, they diverge very much, very much indeed, in a few years. As time goes along, they are doing business entirely different from each other. The one is going the way his ideas have led him, and the other is going the way his ideas have led him.

I have often thought about that, and I think we all do a little different in many ways, but still, after all, the shoe business is pretty much alike, but I have tried to boil down these points of value to merchants in my short statement.

Shoe Factory Gutted by Fire

A large part of the boot and shoe factory of the "O. B. Shoe Company" was destroyed by fire on February 24th. The loss is estimated at \$120,000, with insurance of only

\$72,000. Although the loss to Drummondville will be considerable, there are hopes that the company will immediately rebuild and so provide work for the employes, the pay roll being \$1,200 a week.

The factory which had been in operation for about fifteen years is one hundred feet long, thirty-five wide and four stories high. The output is about four hundred pairs per day of men's Goodyear welts and one hundred and twenty-five hands were employed. The president of the company is O. Brouillard, M.P., and the general manager is C. E. LePine. It is understood that the company is making arrangements to restore the burned portion and will soon be on the way to turn out goods as formerly.

An Ideal State of Affairs

It will be good news to traveling salesmen as well as many others to learn that Hon. T. O. Davis, of Prince Albert, has introduced in the Senate a bill to make it a criminal offence for anyone to give or receive a tip in Canada. The bill will be by way of amendment to the criminal code. By his plan, Senator Davis says, the restaurant keepers, hotels and the railway companies will themselves be compelled to pay fair wages to their waiters and porters, instead of relying on the tips from the public to pay the shot.

Early Closing Movement Growing

The early closing movement is making progress in many centres in Canada and among the latest cities to fall in line has been St. Catharines, where a by-law was passed by the city council a few weeks ago requiring all boot and shoe shops in that city to close every night at seven o'clock sharp, except on Saturday nights and evenings preceding a public holiday and five days before Christmas Day. The

by-law provides that the shoe stores shall lock their doors at ten o'clock on Saturday night. Any person convicted of a breach of the provisions of the by-law is liable to a fine not exceeding fifty dollars for each offence. Over three-quarters of the merchants signed the petition and it is understood that the new arrangement is working out very satisfactorily. There are thirteen shoe shops in St. Kitts.

Harness Men Had Fine Time

The most successful convention ever held by the Ontario Harnessmakers' Association was concluded in Berlin on February 19th by a big banquet in the Masonic Hall. Chairman G. C. H. Lang, of the local committee, presided. During the day the visitors were shown through several of Berlin's large industries, including the tanneries of the Breithaupt and Lang companies.

President Nix and Secretary Dyas were the recipients of a fine pipe each as a token of appreciation. The following officers were chosen: President, C. H. Nix, Hamilton; vice-president, W. G. Wooten, Toronto; treasurer, James Smith, Toronto; secretary, V. M. Dyas, Toronto. Executive Committee—J. P. Moat, Toronto; Joseph Pender, Toronto; W. H. Murray, Hamilton; Robert Mitchell, Hamilton, and Joe Fehrenbach, Louis Sattler, Berlin; C. Ottman, H. Bush, Hamilton, were added consulting officers to the committee.

Will Branch Out For Himself

W. J. Baggs, who has represented the Anglo-Canadian Leather Co., Toronto, in Ontario and in border cities of the United States for several years, has severed his connection with the company. Mr. Baggs, who is a Toronto boy, was born and educated in the Queen City and his first connection with the leather industry was back in 1903-1904, when he was city representative for the Beardmore Belting Co. When the firm of Smith, Baggs & Heaven was formed in 1905 he joined that organization, his uncle being one of the partners. They were selling agents for the Anglo-Canadian Leather Co. products, as well as other lines, and Mr. Baggs was their first traveler, covering Canada from Montreal to Vancouver. When the Anglo-Canadian Leather Company acquired the business of the firm in 1909 Mr. Baggs continued, covering Ontario and several cities across the line, as far west as Chicago. While not definitely decided regarding his future movements, it is understood that he will repre-

sent several American houses now doing business with shoe factories in Canada. Mr. Baggs will continue to reside in Toronto. He has a large number of friends in the trade who will wish him every success.

Early Days of Rubber Footwear

To the Editor of the SHOE AND LEATHER JOURNAL:

Sir.—I was quite interested in your article in February 16th issue under the heading, "Was the Arctic invented in Canada?" The letter in the "Shoeman," by Joel C. Page, is certainly from "The grand old man of the traveling shoe salesmen." I met him frequently in the early nineties, when I was traveling through the Southern States and sometimes in Boston, and he was considered one of the old ones then, twenty years ago.

But it is something about "The Arctic" and the time that it was first manufactured that I wish to speak, and I will endeavor to give you from memory some data which may be of assistance to you in discovering the inventor of this very comfortable piece of winter footwear. Everyone knows, or should know, that the Canadian Rubber Co., of Montreal, were the pioneer manufacturers in this line, but I cannot recall the year that they commenced manufacturing it. I can tell you what the leading lines were in felt overshoes which they made from 1870 to 1885 and later. The largest sellers of all in men's was called in the price list, "Felt buckle plain," which was really a black felt Arctic without lining. Next came "Men's Arctic red wool lined, one buckle," and next on the list was a "Felt buckle snow excluder, red wool lined," which was really only an Arctic with a gusset in the sides which folded in and kept the snow out.

If my memory serves me rightly, the American manufacturers of rubber footwear, did not make any of these lines in the early seventies, and I have always been under the impression that these "Arctic Overshoes" were originated in Canada. Mr. McGill, formerly of the Canadian Rubber Co., now residing in Montreal, will undoubtedly be able to give some valuable information on this topic. I also think that the women's button overshoe, made of black felt with sectional button fly, bound with galloon and overlap quarters, originated with the Canadian Rubber Co. It was a trifle higher than an ordinary woman's button boot, and was certainly a very comfortable, moderate priced article of winter footwear for women. But the real gentlemen's overshoe of the seventies, was a black buck skin moccasin embroidered on the vamp with some kind of colored fibre, or porcupine quills, with a rubber sole and golosh, the same as the "Arctic." These would last for several seasons, and were frequently returned to the Canadian Rubber Co. to be resoled. I have no doubt that some of the old timers in Montreal and vicinity still have this overshoe made to order, and I never knew it to be manufactured any where except in Canada.

Trusting that the above will be of interest to your readers, and throw some light on the "Arctic" question.

Sincerely yours,

P. M. Goff.

329 Jarvis street, Toronto.

Rubber Selling Season Starts

The rubber selling season for the coming year has started and this week representatives from the various companies making rubber footwear started out on an aggressive campaign. An effort is being made to induce early placing by giving a five per cent. discount on all orders booked during March and April. It will be remembered that only a couple of years ago, nearly all companies granted a concession but it has of late been abandoned and goods sold at a net price.

The past winter season has not been an exceptionally active one in the rubber footwear line and some merchants

report that they still have considerable stock on hand. The demand for light goods in various parts of Canada has been very fair, but owing to the absence of snow and stormy weather until after Christmas, even this branch of the trade has been delayed, while in heavy lines some retailers report there has been a very slow turnover. However, the companies hope to persuade buyers they will benefit by early placing as all the factories value orders of that kind. It enables them to know exactly where they are at, to make calculations correctly and in the matter of buying supplies of raw rubber, fabrics, leather, etc., to gauge the situation more accurately. March and April have for some years been selected as the great selling months for rubber footwear. It is understood that in addition to the reduction of five per cent. for early placing given by the Independent companies there is a decrease of from one to two per cent. on the average from last years' figures, so that rubber shoes in 1914 will, on the whole, be cheaper by about six per cent. on the lighter lines and seven per cent. on the heavier goods.

In the West, from Port Arthur to the Coast, owing to the heavier cost of doing business, extra freight rates, etc., quotations will be from two to two and a half per cent. higher than in the East. The usual features will be continued in this year's campaign, such as the prepayment of freight, cartoning of brands and the customary discounts for large volume.

In reference to the foregoing observations it may be said this is the line along which the Independent companies will operate during the coming season. So far as the Canadian Consolidated Rubber Co. are concerned it is stated that they will sell on a net price basis. The features which this company introduced some three years ago, such as the prepayment of freight, guaranteed prices, cartoning of all brands, etc., will be continued. Just how the prices of the Consolidated Company will compare with those of a year ago it is not possible to state, as no lists are available before the selling season which just opened this week. While the selling features of the various concerns may differ somewhat it is not likely that in net quotations there will be any great difference, except on a few lines.

Since the foregoing was placed in type it is understood that some revision in prices has taken place and that the Independent companies are offering a ten per cent. discount during March and April for early placing. The Canadian Consolidated Rubber Co. are selling at net prices. Their lists which were issued early this week show a substantial reduction from last year's quotations.

Taking Advantage of Parcel Post

The J. J. Haines Shoe Houses who have stores in Smith's Falls, Belleville, Napanee and Trenton, have announced in all the local papers of these places that by the new parcel post system which was referred to at considerable length in the last edition of the SHOE AND LEATHER JOURNAL, they are giving free delivery of shoes within the twenty-mile local zone. This means that customers residing anywhere within that radius can obtain footwear just as cheap as if bought at any of their stores. This certainly is a mark of enterprise on the part of the Haines Shoe Houses, the first of which was established in Belleville by J. J. Haines, the present head of the company, in 1864, just fifty years ago.

Canadian Day at Boston Leather Fair

July 8th to 15th, 1914, should be a big week in Boston, in fact, the biggest week the shoe and leather trade has ever seen. The Seventh National Shoe and Leather Fair

will be held in Mechanics' Building at this time. During the same week the International Shoe and Leather Week organized by the New England Shoe and Leather Association and a score of affiliated associations will be observed in Boston. The Boston Chamber of Commerce has taken an active interest in this big trade week and plans are under way to bring the greatest number of shoe and leather men to Boston that have ever visited the city before. It is said that the Lynn Chamber of Commerce is also interested and that a special Lynn Day will be observed during the week. The special day for Canadians will be a leading feature of the big show. These events will centre at the Shoe and Leather Fair, Mechanics' Building. The National Shoe Retailers' Association has agreed to hold a big "Get-together" meeting at the Fair and the Leather and Findings Association, which will be in convention in New York the first week in July, will also send many members to Boston during the Shoe and Leather Fair Week.

Long Receding Toe Will Lead

(Continued from Page 36)

class. If they would keep these standing over for a few seasons they would be able to get their shelves clear of surplus stock at the end of the season. This would be of mutual benefit to both the retailer and the manufacturer. The manufacturer is always willing to retain his old styles and use them, but the merchant seems to be always looking

PATENT LEATHER COLONIAL, SPOOL HEEL,
LONG POINTED TOE, CUT STEEL
ORNAMENT ON SIDE

and asking for something new. If one of our travelers should happen to call on a retailer and tell him that he had absolutely nothing new, that dealer would not be interested at all, would not even consent to view the samples and would wait for some other representative to come along who had offerings that would arouse his interest or curiosity. So you see that when the retail man blames the producer for the rapid alterations in style, the latter is not at fault, and the producer himself is contributory to the cause of which he complains, or, as they say in law, accessory to the fact.

"I am satisfied," continued the speaker, "that the merchants would retain their customers much better if they kept the same styles. A patron gets fitted with a shoe that is in every way satisfactory and comes again, looking for the same shoe, but, alas, he finds it gone—a new last in its place. The dealer has new styles in that do not fit and the customer is therefore dissatisfied."

Women's footwear always presents a more pleasing subject on which to discourse, for it allows of more variations by reason of the fact that costumes have often to be matched and owing to miladi being less severe in the treatment and wear on her shoes, fabric effects can be produced on more generous lines.

Some leading things seen in women's shoes during the coming season, which are being presented to the Canadian trade, are:—Extremely long vamps and sharp pointed, receding toes; absence of tips; whole cloth quarters in black, blue

PATENT LEATHER TANGO SLIPPER, LOUIS HEEL, LONG POINTED
VAMP, SILK RIBBON LACE, CUT STEEL TRIM-
MINGS—BY SMARDON SHOE CO.

and other fabrics, among which are brocades in attractive weaves; patent leather coming very strong; button shoe as popular as ever; close trimmed edges; lighter soles; round shanks; the spool and kidney heel in both wood and leather, while on many of the very light lines, such as turns, slippers, pumps, colonials, etc., the real Louis heel will be seen.

Whether many Tango pumps will be manufactured in Canada is a question, although some of the manufacturers are showing them in their fall lines, but this is perhaps more to add variety and charm to the collection than with any real idea that there will be any strong demand for this fascinating and dainty type of footwear outside of the very large cities. One manufacturer strongly advises the merchants to buy their own attachments and ribbons and attach them to the pumps for customers, which will impart all the desired effect and good results, without laying the retailer under any heavy outlay.

There is no doubt that patent leather is a greater favorite than ever in women's shoes and all the leading firms are going strong in this respect. Quarters of whole cloth and cloth tops are being largely shown. These effects along with

PATENT LEATHER COLONIAL, FANCY BROCADED
QUARTERS, CUT STEEL BUCKLE,
SPOOL HEEL

the fancy heels, most of which have a solid, substantial top lift, are the really new things. The patent vamp and brocade top make a very pleasing combination. A vamp of this kind possesses just enough leather and its shiny surface

sets off the fabric used to the best advantage. Where tips are used this season they are generally about $2\frac{1}{2}$ inches in length, but are plain stitched, while others have the small edge punching only. There is a prediction that now, very

MAHOGANY TAN BAL., LONG RECEDING TOE, HAND PEGGED HEEL, BLIND EYELETS, WIDE STITCH AROUND THROAT AND AT BACK—BY COOK-FITZGERALD CO.

soon, the other extreme will be reached and that tips of a very elaborate character will appear, but they certainly will not make their appearance this fall.

The spool heel, or the half Louis, which is a leather concave, approximating very nearly the shape of the ordinary spool, and stands from $12/8$ up to $14/8$ and $15/8$ in height is likely to be a leader. There is no doubt that the many artistic heels, from the Cuban curve heel to the French Louis heel, add very much to the inviting character and dainty appearance of women's footgear for fall. In low cuts, Colonials are the most popular, while, of course, there will be a demand for pumps.

Colonial Have Ornaments on Side

There is no doubt, however, that Colonials will have the greatest call. In these some new conceits are seen, such as the placing of a buckle to the side and having certain fancy inlays of white kid and white calf, thus giving a

HEAVY GUN METAL, WHOLE QUARTER BAL., VISCOLIZED SOLE, MODERATE RECEDE TOE, SLIGHTLY FLANGED HEEL—BY COOK-FITZGERALD CO.

only in black and white combination. Cut steel is still a reigning favorite for ornaments and corded silk bows, beaded effects, pompons, gold and silver buckles, rhinestones and fancy decorations are to be seen on the forepart of the shoes. In some cases the producers of women's shoes are going to offer a round, square cornered toe and very short vamp,

which is of course the reaction from the long drawn out pointed toe effect. It is, however, believed that the sale of the "duck bill" toe will not be exceptionally active.

In the medium price footwear line there is likely to be a good demand for the moderate or the semi-receding toe.

Tops are cut about the same height as last year and are generally straight, while in button shoes the 14 to 16 button have the call. Manufacturers are turning out about the same proportion of button shoes for women as last year and retailers declare there is no diminution in the demand, while foot fitters in other sections of the country say that the lace bal for women is coming back at considerable speed.

Buttons Still the Go

"It all depends," said one manufacturer, "on the calls of the trade you cater to whether you can sell lace boots or not. Each dealer will have to study closely the tendency of the times and the trend of trade in his locality and figure this all out for himself." An attempt has been made to introduce the short French last which also is termed the Stage last, and modifications of the same, but such a move has not gone very far on this side of the line.

One thing may be pointed out and that is tan shoes are practically a dead issue so far as the demand in women's footgear is concerned. However, few manufacturers are attempting to push them to any great extent. Patent leather will likely be the first in demand, gun-metal next, with kid a close third. Low cut suedes of various colors will in all

EVENING SLIPPER OF COLORED SUEDE, PATENT LEATHER TOP, FLARING TONGUE, THREE BUTTONS, CUBAN-LOUIS HEEL

probability be viewed with appreciation, Colonials with fancy quarters and collars being seen.

The question of price for next season is still a matter of much importance. One thing may be said, there is no possibility of lowering prices and some doubt as to stationary prices, and a feeling that certain lines are likely to advance. It is generally conceded that the quality of the shoe cannot be lowered if it is to retain its standing. The call is to-day for good or better shoes, said one leading producer. The only way out of that, in view of the growing scarcity of hides and the constantly augmenting prices of leather is to raise the price of shoes, although this may not be done to any great extent just at present, yet it need not surprise any one if another increase of three to five per cent. went into effect before many moons have passed.

In subsequent editions of the SHOE AND LEATHER JOURNAL interesting and instructive style talks will be presented and the various phases gone into more definitely. In this number an introductory review of the situation so far as it is likely to affect Canadian trade has been presented in order that the retailer may know what is being done by manufacturers to present something novel, handsome, snappy or effective in their respective lines.

What the Last Makers Say

It is also interesting to note what last manufacturers have to say. They sense changes afar off and surely keep in touch with the situation as closely as any medium possibly can.

John Pell & Son, Inc., Newark, N.J., say: "We find for small town trade a demand for high toes in both men's and women's. For big city trade the tendency is for narrow, custom, recede toes. In the better grades of shoes there is a call for French effects in both men's and women's. In some cases the manufacturers of women's shoes are going to a high heel, square toe, Stage, and in others a long drawn out French toe effect. We do not believe that the sale of these square toes is going to be a big proposition. Would say that the bulk of the sales in both men's and women's shoes would be along the more moderate recede custom effects."

The Mawhinney Last Co., of Brockton, Mass., write: "In regard to the styles for the fall of 1914 we find that there is some feeling of uncertainty, but believe that medium high toes with from one inch to one and one-quarter inch heel will occupy the prominent place in the line of lasts used. There is also considerable interest felt in the city type of last, with a low receding toe, which you are doubtless familiar with. We have also made quite a number of samples of a style which is sometimes described as the "duck bill," which also has a low receding toe, with square corners. We do not expect this will be a heavy seller, but believe it will be used to some extent. There is also some

WOMAN'S PATENT, LONG VAMP, PLAIN TOE, CLOTH
QUARTERS, CUBAN-LOUIS HEEL—BY
SLATER SHOE CO.

interest manifested in the short French last, which is also termed the "Stage" last, and modifications of the same."

The Woodward & Wright Last Co., of Campello, Mass., declare "flat lasts of custom and receding types are beginning to be recognized by the country trade, while the city trade sales are much stronger on these styles than last season. A broad toe, flat last with moderate recede is a coming feature. High toes, however, will not entirely down. In most sections away from the big cities, high toes made over old lasts, with high heels and narrow shanks are still selling freely. Nevertheless toes are gradually dropping, shanks are getting wider with straight outside effect and heels are accordingly lower. These tendencies are unmistakable, but not revolutionary. To make all of these concessions and still produce something startling, is the problem now confronting last modellers in general."

"In some cities and in the country districts of the West, short vamps on high toes are still in demand. There seems to be an urgent demand for the retention of this style, undoubtedly because it makes the feet look small. Foreparts in women's shoes in general are being lengthened out, in some cases very conspicuously, the higher grade being extended to a size and a size and a quarter, the latter carrying

narrow toes, and some of which have straight line receding toe, the latter being particularly attractive and exclusive. Little change in height of heel is noted, but the kidney shape Louis heel is gaining favor. On Oxfords and

MEN'S PATENT BLUCHER, MODERATE RECEDING
TOE, CIRCULAR FOXING, 1 1/8 HEEL—BY
BRANDON SHOE CO.

bals, both men's and women's, the sale of rubber sole footwear shows a marked increase, and these lines tend to become staples among progressive shoe dealers."

A number of Canadian shoe manufacturers are making rubber sole shoes of various kinds in both men's and women's, believing that this fall, there will be a large demand for this class of footwear. Other producers are showing some very fancy plaid tops in women's and men's creations. A man's pump is made with a leather sole which is chrome tanned, flexible and guaranteed not to slip. It does away with the three rubber plugs or insets which were formerly seen on the bottom of the Tango for men.

In women's there are a few manufacturers showing Tango pumps and even Tango shoes of various pretty patterns and neat designs. It is felt, however, that the majority of dealers in the country will buy the attachments or trimmings and put them on the ordinary pump. These sets come in very pleasing designs, many of them studded with

MEN'S PATENT LEATHER, RECEDING TOE, WITH SCOTCH PLAID TOP AND
PATENT LEATHER COLLAR, BEADED AND STITCHED TIP,
LOW FLAT HEEL—BY SLATER SHOE CO.

rhinestones and the outfit can be purchased from 40c. up to as high a figure as a customer or dealer may care to go.

Another new thing is the dark mahogany nubuck which several firms are showing. There are other concepts to be seen in both leather and patterns, but it is doubtful if they will have any large measure of acceptance.

Takes Position on the Road

Geo. R. Inksater has been added to the selling staff of the Kaufman Rubber Co. and is covering the territory south of Berlin and between Brantford and Windsor. He is assisting S. G. Amero, the energetic manager of the London branch warehouse of the Kaufman Co. Mr. Inksater was

practically brought up in the shoe business at the Inksater Shoe Store, which was started by his grandfather over half a century ago, and later, taken over by his father, with whom Geo. R. Inksater has been for the past ten years, excepting a short time which he spent in the West in the service of Thos. Ryan & Co. Mr. Inksater is a young man of genial manners and kindly disposition and his experience in the retail business and his knowledge of the territory which he has to cover, will no doubt be of considerable value to him as a salesman.

Form National Shoe Association

A meeting of the Ontario Shoe Manufacturers' Association was held at the Board of Trade rooms, Toronto, on February 25th, at which there was a large attendance. President A. Brandon, of Brantford, was in the chair, and it is understood that several important matters were taken up. One of the live topics of interest is the enlargement of the scope and work of the association by the formation of a national body as mentioned in a recent edition of the SHOE AND LEATHER JOURNAL. There are now several associations and in case it should be necessary to interview the government on any matter or to take a stand on any question, it is felt that the members would exercise more influence and command more respect as a united body than if acting under present conditions. It is likely a meeting will be held in Montreal at an early date to make further arrangements, looking to a national association which will have a permanent secretary.

Newsy Briefs From Quebec

Alfred Dupere, of Dupere and Garant, was in Montreal last week on business.

Louis Ernould, foreman of the sole leather room of the Wm. A. Marsh Co., was elected alderman for seat No. 2,

St. Sauveur ward, and will ably represent the laboring interests of this division. He is a very active and progressive young man.

Luciene Borne, is now making chrome side leather in addition to the glazed kid.

John Ritchie, of the John Ritchie Co., Limited, was on a business trip to Boston last week.

Albert Charron, of Contrecoeur, shoe manufacturer, was in Ottawa last week on a business trip.

Louis Guay, of Jcs. Guay & Fils, patent and chrome leather tanners, was in Montreal last week renewing contracts with several shoe manufacturers.

Ludger Duchaine, shoe manufacturer, who was confined to his room for a few days last week with an attack of la grippe, is now able to be around again.

Ernest Caron, formerly manager of the Canadian Shoe Machinery Mfg. Co., died last week at the age of forty-eight years, after a few days' illness. He was well known throughout the United States and Canada.

Now that the shoe factories are running everything seems to have changed for the best. The men appear satisfied with the new rules and the manufacturers are rushing their new samples for the coming season.

A Capable Warehouse Manager

The manager of the fine new warehouse of the Canadian Consolidated Rubber Co., which was recently opened in Calgary, is A. C. McGiverin, who is well and widely known in the Western Provinces. Mr. McGiverin is an old Galt boy and was first employed by the Canadian Pacific Railway in the local freight department in that town. He was transferred to Winnipeg in 1903. Mr. McGiverin has been in the employ of the Canadian Consolidated Rubber Co. since April 1907. He covered Central and Northern Mani-

toba for them until the spring 1910, when he was transferred to Regina, with Saskatchewan as his ground. On the company opening a branch at that point he was appointed manager remaining there till June, 1912, when he was transferred to Calgary. Mr. McGiverin is an energetic and hard working manager, a good friend and a genial companion.

AMONG THE SHOE MEN.

D. Pfaff & Son have opened a new shoe store in Dashwood, Ont.

Smith, White & Co., shoe repairers, of Saskatoon, Sask., have sold out.

L. A. Bouchard, of Montreal, shoe dealer, passed away last week.

Mr. Miller, of the Karn Shoe Co., London, was in Montreal recently.

F. Tank, shoe dealer, of Millbank, Ont., has sold out to A. Hoffmeyer.

The Diamond Shoe Store, Winnipeg, has sold out to Hendron Bros.

Jas. Maitland, shoe dealer, of Toronto, has assigned to F. C. Clarkon.

J. B. Russell, shoe dealer of St. John, N.B., has assigned to G. E. Logan.

H. Robillard, shoe dealer of Montreal, has assigned to A. Desmarteau.

J. Henderson & Co., dealers in hides, Winnipeg, recently suffered a fire loss.

R. B. Griffith, of R. B. Griffith & Co., Hamilton, was in Montreal recently.

Geo. Pike, of the Boston Blacking Co., Boston, was in Montreal last week.

W. J. Crawford, of Ripley, Ont., was in Toronto recently calling on the trade.

Sky Bros., of South Porcupine, Ont., spent a few days in Toronto last week.

The Security Rubber and Supply Co., Limited, Winnipeg, has been incorporated.

R. K. Helyar, shoe dealer, Kemptville, Ont., has been succeeded by E. Wiltse.

L. J. Dupre, of Independent Box Toe Co., Montreal, was in Toronto recently.

J. A. Stewart, shoe retailer, Exeter, Ont., spent a few days in Toronto last week.

J. E. Desilets & Co., dealers in boots and shoes, Three Rivers, Que., have registered.

C. C. Begg, of Collingwood, Ont., was a caller on the Toronto shoe trade last week.

Allen Meyers, of the Meyers Shoe Co., Montreal, was in Toronto last week on business.

W. A. McEwen, Thessalon, Ont., was in Toronto recently calling upon the trade.

J. Stevenson, shoe retailer of Sault Ste. Marie, was in Toronto last week on business.

Mr. Stone, of Stone, Tinlow Co., of Boston, Mass., was in Toronto last week on business.

A. T. Hill has resigned from Ames-Holden-McCready, Limited, No. 1 factory, Montreal.

J. A. Adams, of the Murray Shoe Co., London, was in Toronto recently calling on the trade.

The Slater Shoe Co., Montreal, have added a line of boys' shoes to their samples this season.

Leslie F. Morrice, shoe retailer of Madoc, Ont., was in Toronto last week calling upon the trade.

H. H. Lightford, manager of the Perth Shoe Company, Perth, Ont., was a recent visitor to Boston.

John Kylie, shoe retailer, of Peterboro, has made extensive improvements to his store. The premises have been

considerably enlarged and the establishment presents a very neat and attractive appearance.

J. B. Kilgour, of Kilgour, Rimer & Co., was in Toronto this week for several days on business.

Louis Mercier has been appointed foreman of the sole cutting department, Slater Shoe Co., Montreal.

Samuel Powell, shoemaker, of Guelph, died at the General Hospital in that city recently, aged 82 years.

A meeting of the creditors of the Elkman Shoe and Supply Co., Brampton, was held on March 3rd.

Julian Sale, jr., of the Julian Sale Leather Goods Co., Toronto, was in New York last week on business.

H. H. Spalding, of the O. B. Shoe Co., Drummondville, has resigned and is returning to the United States.

H. Megginson, shoe retailer, of Sault Ste. Marie, Ont., spent a few days in Toronto last week on business.

Ames-Holden-McCready, Limited, hockey team defeated J. & T. Bell, Montreal, recently by a score of 4 to 1.

Duchaine & Perkins, Quebec, are arranging to install pulling over and lasting machines on their staple lines.

George Day, of the shoe department of W. H. Scroggie, Limited, Montreal, was in Toronto recently on business.

C. E. Smith, shoe retailer, of Peterboro, Ont., was in Toronto calling upon the trade during the past few days.

Horace Hill, formerly of Brockton, has taken charge of the sole leather stock room, Slater Shoe Co., Montreal.

J. S. Ferns, secretary-treasurer of the Cook-Fitzgerald Company, London, was in Toronto for a few days recently.

W. F. McNeill, manager of the Nugget Polish Co., Toronto, spent a few weeks in Montreal recently on business.

Adolph Lecours, formerly of Daoust, Lalonde & Co., Montreal, has taken a partnership with Gagnon, Lachapelle Co., Montreal.

W. F. Martin, sales manager of the Kingsbury Footwear Co., Montreal, was in Toronto last week calling upon the trade.

The annual convention of the managers of the Ames-Holden-McCready Co. will be held in Montreal from March 9th to 14th.

A. R. Trudeau, managing director of the Brockton Shoe Co., Toronto, who has been ill for some time, is able to be around again.

C. A. Davies, of Blachford, Davies & Co., Limited, Toronto, spent a few days in Montreal and Quebec during the past two weeks.

W. A. Hamilton, of the W. B. Hamilton Shoe Co., Toronto, has returned from a business trip to Boston and other eastern shoe centres.

G. L. Hodgson, late of Walkerton, Ont., has moved his shoe stock to Mount Denis, near Toronto, where he has opened up for business.

Clarence F. Smith, vice-president and general manager of Ames-Holden-McCready, Limited, Montreal, was in Boston recently on business.

Clayton Hurlbut, of the Hurlbut Co., Preston, Ont., has returned from a successful business trip to Winnipeg, Calgary and other cities.

Frank Boyden, of the Ames-Holden-McCready Co., St. Hyacinthe, and Leslie Dowker, of Dowker, McIntosh & Co., entertained some friends at noon-day luncheon in Montreal

last week. Those present were F. J. Boyden, Leslie Dowker, A. R. Moulton, of Levisseur & Conway, Boston; Frank McKenna, of Montreal; A. Shaw, Robert Fraser, of Beardmore & Co.; Wm. Davidson, of Marlatt & Armstrong, and W. D. Bennett, of Boston.

B. W. S. Martin, sales manager for the John Ritchie Co., Que., spent several days in Toronto last week calling upon the wholesale trade.

Michael Pingree has been appointed foreman of the Slater Shoe Co., Montreal, treeing room to replace Harry Noonan, who has resigned.

"Footprints," the house organ of the Canadian Consolidated Rubber Co., appears this month in the shape of a 1914 rubber footwear catalogue.

Mr. Campbell, of the Boston Last Co., Richmond, Que., who has been spending some time in the West was in Toronto this week on his way home.

J. J. Connor, western representative of McLaren & Dallas, Toronto, leaves this week on an extended business trip through the Prairie Provinces.

T. F. Maley, shoe retailer, of Smith's Falls, Ont., recently made an assignment to M. McLeod Tew, of Hamilton. The assets are about \$18,000.

J. McMurdie, manager of the shoe department of James Ramsey, Limited, Edmonton, was in Toronto and other cities during the past week on a buying trip.

A despatch from Lynn, Mass., says that the shoe manufacturers in that city are importing both sole and upper leather from Canada as well as Europe.

W. J. Honeyford, shoe retailer of Collingwood, Ont., has moved into a fine new store a few doors north of his old stand, which is splendidly fitted up.

Mr. Perron, who covered Quebec province for Ls. Germain, Montreal, last season, will represent the Rena Footwear Co. this year in the same territory.

Oscar H. Vogt, manager of the Great West Felt Co., Elmira, Ont., has returned from a successful business trip to Winnipeg and other points in the West.

A fire broke out in the leather factory of Wickett & Craig, Toronto, on February 22nd but was extinguished before any large amount of damage was done.

Kieffer Bros., manufacturers of shoe machinery, Montreal, have dissolved partnership. G. A. Kieffer, one of the members of the firm, recently passed away.

L. M. Stock, Western Canada representative of Walker, Parker & Co., Toronto, leaves this week on an extended trip to the Coast with a smart range of fall samples.

D. McIntosh, shoe retailer, of Arthur, Ont., who had been forty years in business in that town, passed away recently and possessed a long and honorable record.

Joseph F. Crowley has accepted a position as foreman of the lasting department of the Perth Shoe Co., Perth, Ont. Mr. Crowley has been with Bohr Bros. Co., South Boston.

Henry Dorson, foreman of the stitching room of the Relindo Shoe Company, Toronto, who has been spending a few days in Boston, has returned to Toronto with his family.

H. R. Rice, general manager of L. R. Hulbert & Co., St. Catharines, Ont., was in Toronto last week. He states that the plant of the company is now running in fine shape.

Robbers entered the shoe store of R. C. Boyes, Mission City, B.C., recently and stole several pairs of shoes. They entered by the front door and left no clue as to their identity.

C. B. Pratt, shoe dealer, 137 Sparks street, Ottawa, intends moving into a fine new shoe store about April 1st. It will be a one price shop for men, specializing in five dollar lines.

Alfred Butlin, sole representative for Canada of Maden and Ireland, slipper and shoe manufacturers, Bacup, Eng-

land, was in Toronto calling upon the wholesale trade last week.

W. G. Parsons, of C. Parsons & Son, leather and findings dealers, Toronto, who has been spending some time in England and on the Continent on business, has returned home.

The Ames-Holden-McCready Co. have declared the regular quarterly dividend of one and three-quarters per cent. on the preferred stock of the company for the past quarter.

The Maritime Knitting Co. have been incorporated to carry on a general knitting as well as boot, shoe, moccasin and larrigan business. The offices of the company will be in Montreal.

The Market Shoe Store, under the management of P. Heffernan, has been opened at 45 Downie street, Stratford, Ont. A full and complete line of shoes as well as traveling goods is carried.

C. A. Campbell, formerly representing the Williams Shoe Co. in the West, is now connected with the Watson & Brown Co., looking after the firm's interests in Edmonton, where he resides.

The Shoe Mart at 107 Yonge street, Toronto, has been closed owing to the lease expiring and the stock has been taken over by A. Levy of the Right Form Shoe Store, 260 Yonge street.

The partnership of C. Brager & Sons, dealers in clothing and shoes, St. John, N.B., has been dissolved. The business will be continued in St. John by L. A. Brager, and in Halifax by J. N. Brager.

J. Stevenson, shoe retailer, is president of the Retail Merchants' Association branch at Sault Ste. Marie and Steelton, and W. Climie, dealer in shoes and men's wear, of the same place, is treasurer.

Frank Mercer, late of the Relindo Shoe Co., Toronto, has taken a position with the Brandon Shoe Co., of Brantford, Ont., and left last week for the Western provinces with a full line of fall samples.

John A. Buller, an employe of the Robt. Taylor Shoe Co., Halifax, was injured recently by stepping on a door which opens automatically as the elevator passes up. He had his leg caught in the door.

P. J. Hogan, general outside man of the United Shoe Machinery Co., of Canada, is at present in Redcliff, Alta., installing a complete equipment of men's Goodyear welt machinery in the new factory there.

J. S. Ashworth, of Toronto, Canadian manager for Sir H. W. Trickett, Limited, Waterfoot, England, has returned from a business trip to Winnipeg. He reports that the outlook for trade is improving rapidly.

Sydney Vermilyea, of the Belleville Shoe Co., Belleville, Ont., is very ill. He has been suffering for some time with an affection of the liver and many friends trust that he will regain his former good health.

The Granby Rubber Co., Granby, Que., have issued their 1914 rubber footwear catalogue. It is very well illustrated, containing 100 pages on heavy coated paper. The cover is of a very striking although neat design.

E. E. Cady, late of the Montreal office, but formerly connected with the Haverhill branch of the United Shoe Machinery Co., has joined the Goodyear department of the United Shoe Machinery Co., of Toronto.

L. F. Jackson and George J. Cowling, of the Relindo Shoe Co., Toronto, left this week for the Western Provinces with a fine range of fall samples. Mr. Jackson will cover from Regina to the coast, and Mr. Cowling from Sudbury to Regina.

E. A. Dagg, who for several years has been manager of the warehouse of Ames-Holden-McCready, Limited,

at Calgary, has been appointed to a responsible position in the service of the Alberta Government. He will assume his new duties on May 1st on which date he will be leaving the position which he has ably filled.

The Lindsay Shoe Repair Company has opened for business in Lindsay. Messrs. Hughes & Cartwright, who have had a long, practical experience in the shoe business, are the proprietors, and they have a well fitted up shop.

The U. S. M. Co. of Canada recently sent one of their Goodyear experts to Toronto to cover that field. The company state they are very busy at the present time handling the large demand for Goodyear shoe repair outfits.

Gibson & Ross, shoe dealers, of Woodstock, N.B., who are among the most enterprising business men in the East, intend putting in a new and modern front this spring which will greatly add to the appearance of their place of business.

Ernest Caron, the man who fought the United Shoe Machinery Company in the courts, died in the Beauport hospital, Quebec, recently, after an illness of five weeks. He was a brother of L. A. Caron, accountant, of Montreal.

James Dunn, who for some years was with A. W. Ault Co., wholesale shoes, Ottawa, has opened a new shoe store at 1097 Wellington street west, Ottawa. Mr. Dunn has many friends in the Capital who will wish him every success in his new enterprise.

G. M. Sharrock, who has been employed for some years in various Montreal factories, is now on the selling staff of the U. S. M. Co. of Canada, Montreal. He is specializing

particularly on finishing departments, in which he has a long, practical experience.

W. H. Budreo, of Toronto, for seven years on the traveling staff of Blachford, Davies & Co., Toronto, has been appointed Eastern Ontario representative of the Regina Shoe Co. and the Columbus Rubber Co., Montreal, and enters upon his new duties this month.

The Ontario Harness Makers' Association recently held a successful two days' convention in Berlin, Ont. President C. H. Nix, of Hamilton, presided and the visitors were given a warm civic welcome. The business proceedings closed with a most enjoyable banquet.

W. C. Bartlett, shoe retailer, 113 Roncesvalles avenue, Toronto, whose establishment was recently sold, will remove this month to the corner of Bloor street west and Lansdowne avenue. He contemplates installing a repair department in connection with his new premises.

The Saskatchewan Branch of the Retail Merchants of Canada, Inc., will hold their annual convention in Moose Jaw on March 23rd, 24th and 25th. Reports will be submitted showing highly encouraging results of the work which has been going on for several months.

The Retail Merchants Association of Ontario held a very successful convention in Toronto on February 26th and 27th. The following officers were elected: B. W. Zieman, Preston, president; A. M. Patterson, Brockville, 1st vice-president; R. D. Cameron, Lucknow, 2nd vice-president; F. C. Higgins, Toronto, treasurer, and E. M. Trowern, Toronto.

PROGRESSIVE WESTERN SHOE FIRM IS NOW INCORPORATED

The Rannard Shoe Company, Limited, of Winnipeg, has been granted a charter. The capital stock of the new organization is \$150,000 of which \$114,000 is fully paid up. The charter was obtained on February 2nd and the company is now fully organized with Charles F. Rannard as president

of prosperity. C. F. Rannard will do the buying for the firm and also look after the business affairs of one of the stores, while Mr. Eadie has been appointed business manager of No. 2 store. C. F. Rannard left this week on a business trip to Chicago, Cincinnati, New York, Rochester, Boston,

CHAS. F. RANNARD, PRESIDENT

A. B. RANNARD, VICE PRESIDENT

R. F. EADIE, SECRETARY-TREASURER

and managing director, Andrew B. Rannard as vice-president, and Richard F. Eadie as secretary-treasurer. The company, which owns and operates three large and up-to-date retail stores in the Prairie Capital, has a strong organization of capable business men to carry on the enterprises of the concern which have been built up to a high degree

Quebec, Montreal, Toronto, Berlin, Galt and other centres, on a buying expedition. He will look over styles for the coming season and closely study the systems and methods connected with the leading retail shops in the big cities with a view to picking up all possible pointers that can be incorporated in the Rannard string of stores.

secretary. The executive will be composed of the foregoing officers and A. Weseloh, Berlin.

Fred and Howard Blachford, of the Blachford Shoe Store, Yonge street, Toronto, have been spending a couple of weeks in Montreal, Boston, New York and other shoe centres, picking up the latest pointers in styles and securing information on what is being offered for the coming season.

C. Parsons & Son, Toronto, have been appointed selling agents for the Dominion of Canada for the Gritzner Hand Soling Sewing Machine, which is manufactured in Durlach, Germany. About twenty of these wonderful machines have been sold in Toronto to the shoe trade within the past month.

There has been an advance in the price of tennis and sporting shoes of about two cents per pair on all goods that sell under one dollar, and about five cents per pair on all lines where the wholesale price is over the dollar mark. It is expected that these figures will hold firm for some time.

A pretty wedding took place recently in Toronto when Miss Adelaide Louise Lovell was married to C. E. Palmer, B.A. Sc. Mr. and Mrs. Palmer will reside in Toronto, the bride being a daughter of J. S. Lovell, the widely known shoe traveler for Corbeil's, Limited, Montreal, and the Kaufman Rubber Co., Berlin.

T. W. Hart, of the Nugget Polish Co., Toronto, has returned from an extended business trip to Winnipeg, Edmonton, Calgary and other points in the interest of the company. H. W. Parsons has also returned from a visit to all the principal cities in the Maritime Provinces and reports "Nugget" business as good.

Percy Horsman, who is one of the proprietors of Clinkskills, Limited, Saskatoon, recently spent a few days in Toronto and other eastern points. Clinkskills, Limited, have one of the best equipped and most attractively laid out shoe departments in the West, which is in charge of A. M. Reid, formerly of the Royal Shoe Store.

J. C. Broddy, of Toronto, a traveler for W. H. Storey & Sons, Limited, glove manufacturers, Acton, Ont., was badly bruised when a C. N. R. train was derailed near Virden, Man. A spread rail caused the wreck and the rail broke and pierced the bottom of a first-class coach, coming right up within a foot of where Broddy was seated.

Arthur Congdon has taken charge of the business of the Wm. A. Marsh Co., Western Limited, Winnipeg. Mr. Congdon was for many years in the wholesale shoe line in Winnipeg and was later manager for the Ames-Holden-McCready Co. in that city. He removed afterwards to Montreal as vice-president, but returned to Winnipeg some time ago.

W. D. Bennett, who is vice-president of the National Shoe and Leather Market Fair, which will be held in Boston from July 8th to 15th next, was in Montreal, Quebec and other eastern points recently in the interests of the Fair, which promises to be bigger and more representative this year than ever. Canadian Day will be observed on Saturday, July 11th, and it should be a hummer.

Mr. Goodwin, of the Goodwin Shoe Company, who has been operating two shoe stores within a block of each other in Vancouver for the past two years, has merged the two establishments and has been conducting a clearing sale of the large stock at 45 Hastings street east, which are the premises that he is giving up. The shop, which he will retain, is less than a block up the street.

The annual convention of the managers of the United Shoe Dealers was held in Toronto from February 9th to 13th, when there were present James Flett, of Owen Sound; H. D. Wing, of Parry Sound; M. H. Sisson, of Lindsay; Wm. McDowell, of North Bay; B. D. Menzies, of Sudbury; McVilvie Wark, of Port Arthur, and J. W. Foy, of Toronto. Successful reports were presented from this chain of stores

for the past year and while in the city the members did considerable buying and sorting.

The Western Tire and Rubber Co. have decided to invest \$175,000 this year in buildings and equipment for a rubber tire factory which will be erected in Regina. A gift of 350 feet of property in the warehouse section of the city and a three years' option on additional adjoining 75 feet at the purchase price of \$3,000 was required to induce the company to go ahead with construction work.

The combined shoe manufacturing industry of Brockton, Mass., has agreed to employ arbitration rather than strike or lockout in the settlement of labor disputes. Practically every one of Brockton's 13,000 or more union shoe workers and over thirty manufacturing concerns, many of which are among the largest in the world, now stand obligated to employ peaceful means of adjusting labor disputes.

A Vermont shoe dealer received the following order from a French-Canadian farmer: "Monsieur—please sen' de shoe for ma familiee. She is Marie 16 year, Pierre 15 year, Jacques 14 year, Louise 13 year, Batesse 12 year, Henri 11 year, Toinette 10 year, Alma 9 year, Louis 8 year, Valerie 4 year, Jeanne 3 year, Josephine 2 year, Natalie and Jack 1 year—dey twin—de baby she go barefoot. How moch?"

Ye Craftsman's Shoppe, Limited, has been granted a charter with a capital of \$50,000 and head office in Toronto. The company is empowered to take over as a going concern from A. R. Trudeau, the shoe business carried on by him at 310 Yonge street, Toronto, under the style of "Ye Booterie." The company is also authorized to conduct the business of boot and shoe makers and to deal in boots, shoes, rubbers and findings, etc.

Fire for the second time in two months broke out in the premises at 186 Adelaide street west, Toronto, a few days ago in the upper portion of the structure used by Colby & Sons as trade rulers and printers, doing damage to the extent of ten thousand dollars. The lower floor is occupied by P. B. Wallace & Son, leather and findings dealers, and their stock was damaged by water to the extent of several thousand dollars.

Delegate Snowden, of Montgomery county, has introduced in the House of Delegates, Maryland, a bill to prohibit the wearing by girls and women of high-heeled shoes and slit skirts, and of dancing such "immoral dances as the turkey trot, the bunny hug, the tango or the loop the loop." The bill prescribes that money collected from fines for violating its provisions shall be used to "educate girls how to dress decently."

Jos. Patterson, of St. Mary's, Ont., who has been in the shoe business in that town for a number of years, returned recently from a business trip to Milwaukee, where he secured the agency of the A. H. Weinbrenner Co., who make men's, boys' and youths' welts, Standard screw and hunting boots. Mr. Patterson is urging upon the company to establish a branch factory in Canada and placed before them the advantages of St. Marys as a desirable location.

E. W. C. Honen, who has been manager of the sole leather department for the Slater Shoe Co., Montreal, has resigned and taken a position as superintendent with the Jas. Muir Co., of Maisonneuve. Mr. Honen has a wide practical knowledge of shoemaking in all its branches and some years ago was superintendent of the Lowell Shoe Co., of Lowell, Mass. Mr. Honen's successor at the Slater Shoe Co. is Louis Mercier, formerly of Lowell and Chelsea, Mass.

Pursuant to a Winding Up Order issued by the Supreme Court of Ontario, the creditors of the Dunford Elk Shoes, Limited, Stratford, Ont., are requested to send in their claims, the amounts, and the particulars thereof, not later than March 10th to the London and Western Trusts Co., London, Ont., provisional liquidators. Judge Barron, Local

Master, at Stratford, will on March 10th hear the report of the provisional liquidator, upon the claims of the creditors.

A fire starting recently in Calgary in the basement of the Cadogan block destroyed nearly the whole of the stock of the Foster Shoe Store, amounting to between \$45,000 and \$50,000. Damage to the extent of about \$1,500 was also done to the building. The loss was only partially covered by insurance. The fire brigade responded promptly, but despite every effort made it took more than two hours to extinguish the flames.

A most successful assembly was held in the town hall, Galt, recently under the auspices of the Mutual Benefit Society of Getty & Scott, Limited. Fralick's orchestra supplied the music and about 150 employes were in attendance. A splendid time was spent and among those present were the members of the firm and the traveling representatives. Alf. Haire and Geo. F. Hennessey, of the United Shoe Machinery Co., Toronto, were also in attendance.

The Ontario Tire and Rubber Co., Limited, has been incorporated with a share capital of \$150,000 and headquarters in Welland, Ont. The incorporators are Thos. J. Costello, Robert Cocper, Joseph R. McCollum, George C. Brown and B. J. McCormick, all of Welland. The company is empowered to carry on business as rubber producers, merchants and manufacturers and dealers in rubber goods, and to manufacture, buy, sell and deal in goods, wares and merchandise made in whole or in part of rubber.

A certain agreement held by Mason T. Golder, who was suing the Crown Hat Co., Toronto, for \$635 commission, was so battered up that it was almost undecipherable. The messed condition of the document was caused by its sojourn in Golder's shoe to keep his heel from becoming sore on a hunting trip. He had never thought that the document might be required, but was happy that he had even kept it in the unusual pocket, for he was given judgment by Judge Winchester in Toronto for the commission.

There must be big money in selling shoe laces. When taken to a police station in Toronto for drunkenness, A. Barber, who claims he sells shoe laces on the streets, had \$94.43 in his pockets. The money consisted of \$50 in one and two dollar bills, a twenty-five cent bill, six fifty-cent coins, fifty-one twenty-five cent pieces, two hundred and twenty-five ten cent pieces, forty-three five cent pieces and seventy-four coppers. He also had a bank book which showed \$75 in the Royal Bank to his credit.

The North British Rubber Co., Limited, Toronto, E. L. Kingsley, manager, have appointed their selling agencies for the coming rubber footwear season. In the West the lines will be handled by the Scottish Wholesale Specialty Co., of Winnipeg; in Quebec and the Maritime Provinces by Roy & Darveau, Enrg, Que.; in Montreal and surrounding country by the Montreal branch of the North British Rubber Co., and in Ontario by the T. Long & Brother, Limited, of Collingwood, and by salesmen direct from the Toronto branch.

About 4,000 attended the public reception attendant on the formal opening of the Dominion Tire Company's million dollar plant recently in Berlin. The processes by which raw Brazilian rubber is converted into a finished tire were explained. There are 300 hands employed, working overtime, and the present output of 150 tires a day will be increased to 500. The whole year's output has already been sold. The company is using 500 horse power of Hydro-electric energy, and the Canadian Consolidated Rubber Co., of Montreal, are selling agents for Dominion tires.

The Unique Shoe Co., Limited, who recently obtained a charter, have begun the manufacture of youths', children's and misses' shoes at 12 West Market street, Toronto, in McKay sewn and Standard screw. The company, of which

J. W. Phillips is manager, have well lighted premises and all machines are driven by a ten horse power motor. It was only on January 19th that it was decided to organize a company and so rapid has been the progress of installing the plant that in less than a month five hundred pairs were going through the fitting room. The other departments have since been put in operation and the output will be about two hundred pairs a day. Charles Tilley & Son, of Toronto, will handle the lines for Ontario.

GIVES BOOTEES TO ALL NEW BABES

Tom Stedman, Limited, of Winnipeg, have adopted a new departure in advertising that will appeal to those interested in the latest "doings" among the "live ones" in the retail shoe business. The scheme, while being somewhat costly to work in towns and cities where the population is large and the birth rate consequently high, can, however, be followed economically in places of smaller size where the newly born babes come in less considerable numbers. In Winnipeg the birth rate averages 600 a month and is rapidly

increasing with the growing population of that progressive city. Tom Stedman is the first in Canada in the retail shoe business to inaugurate this new scheme.

At certain periods the names of the parents of all the newly born infants are secured from the city register. To the parents are sent, securely mailed, a pair of pretty first size bootees, together with a neat greeting card which reads:

OUR GREETING

Expressing the sincere hope that "Little Baby's Tootsies" will soon be big enough to toddle along to the newest, biggest and greatest

POPULAR PRICED SHOE STORE
in Western Canada, where square dealing,
honesty and good service are paramount.

The Stedman Shoe Co.,
Somerset Building,
296 Portage avenue, Winnipeg.

The object of the gift is plainly apparent and is calculated upon largely as an advertising medium more than from a purely philanthropic point of view. This is one of "Tom's" latest features in a publicity propaganda in connection with his brand new store, which is one of the biggest, brightest and best equipped for good service in Western Canada.

OVER A MILLION DOLLAR BUSINESS

The annual general meeting of the shareholders of the Amherst Boot and Shoe Co., Limited, was held recently in Amherst, and the reports showed a year of progress, the sales, the largest in the history of the company, being over one million dollars. When the fact is considered that the

C. S. SUTHERLAND, AMHERST, N.S.

year 1913 was a most strenuous one for all manufacturing businesses, both in Canada and the United States, the statement presented was highly gratifying to the shareholders.

After all charges had been paid and the usual dividends declared, there remained to be added to surplus the sum of \$26,773, thus bringing the surplus in the business up to over \$150,000—all accumulated during the last seven years under the present management. The directors have always followed the safe policy of not paying out all their earnings in dividends, thus keeping their reserves in a strong position.

The President, Percy C. Black, in his address expressed great confidence in the stability of the company and the prospects for the future. Optimistic speeches were also made by the General Manager, C. S. Sutherland, T. Sherman Rogers; A. C. Paddock, vice-president of the Regina branch; Fred. O. Mumford, of the Halifax branch, and others.

The following directors were elected: Percy C. Black, president; T. N. Campbell, vice-president; C. S. Sutherland, general manager; T. Sherman Rogers, K.C., and E. N. Rhodes, M.P.

At a subsequent meeting of the Amherst Central Shoe Co., Limited, the following directors were elected: C. S. Sutherland, president; A. C. Paddock, vice-president; Geo. H. Anderson, manager; Percy C. Black, T. N. Campbell, T. Sherman Rogers, K.C., and E. N. Rhodes, M.P.

CONNECTED WITH ANOTHER CONCERN

In the last issue of the SHOE AND LEATHER JOURNAL it was stated "that James Wilkinson, who has been acting manager of a rubber company's branch in Regina, was charged in court with a misappropriation of several hundred dollars in funds. He pleaded guilty and was sentenced to four months in jail." It is understood on the best authority that the accused was never connected with the Consolidated Rubber Company in any capacity, as was erroneously stated,

but was identified with another rubber concern doing business in the Western Provinces.

ADDITIONAL NEWS JOTTINGS

A local syndicate, headed by John McMurchy who operates the woollen mills and electric light station at Huttonville, has made an offer for the Williams Shoe Co. plant and assets at Brampton. The factory has been closed down for some time and the citizens are anxious to see the industry resume operations. W. J. Heaven, provisional liquidator, stated this week that two offers had been received for the factory but that neither one had been accepted.

An order winding up the Dunford Elk Shoe, Limited, of Stratford, on the petition of the C. S. Hyman Co., creditors, for \$2,361.63, was made at Osgoode Hall, Toronto, last week by Mr. Justice Middleton. The London and Western Trusts were appointed interim liquidators with a reference to the local master at Stratford. The company was incorporated on April 1st, 1912, and operated till November, 1913, and in that time ran behind \$13,931.09 in its profit and loss account. The nominal assets are placed at \$38,283.44 and the liabilities, exclusive of stock, are \$39,092.36. The stock subscribed amounted to \$17,500.

W. G. Welch, of Boston, who represented W. H. Wiley & Son, manufacturers of wool soles, over-gaiters, etc., Hartford, Conn., and was a widely known caller on the Canadian findings trade, died very suddenly in Toronto on February 14th. He was staying at the residence of his sister and was taken with a chill which confined him to his room for a few days. At the end of the week he was able to be out but, shortly after his return to the house, he dropped dead.

Calgary has a new shoe store which is known as the "Walkover." It has been opened by Glass Bros., who sold out the business at the old stand, 120 Eighth avenue west, some months ago to Murrays, Limited, and have entered business again at 222 Eighth avenue west. The proprietors are Herbert G. H. Glass and J. H. Glass, and while the establishment is not owned by the Walkover Shoe people, this line of footwear will be featured by Glass Bros.

SUBJECT.....

WINNIPEG, MAN.

February 3rd, 1914

The T. Sisman Shoe Co., Limited
Aurora, Ont.

Dear Sirs:-

We take this opportunity of saying that the goods we have received from you this season excels anything you have ever done before. They have opened up completely to our satisfaction, and the general get-up and solid character of the lines have been really excellent. While you turn out goods as we have described you can always count on us as a customer.

Yours very truly,

AURORA :: ONTARIO

SHOE STAFF HAD ENJOYABLE PARTY

The employes of the Yale Shoe Store, Winnipeg, and several friends held a most enjoyable gathering recently. A large hall was engaged for the occasion and a fine musical programme was rendered. D. Pollock was chairman and made a happy presiding officer. In company with his wife, he rendered a very acceptable duet. A capable orchestra furnished music and about forty couples were in attendance on the floor. Among those present were Mr. and Mrs. J. Atleck, Mr. and Mrs. Hamilton, Mr. and Mrs. Reeves, Mr. and Mrs. Orr, Mr. and Mrs. Caron, Mr. and Mrs. Pollock and daughters, Mr. and Mrs. Joseph Owens, Mr. and Mrs. W. R. Goodey, Mr. W. Berryhill. The occasion will not soon be forgotten.

NEW SHOE FACTORY COMPLETED

E. T. Wright & Co., shoe manufacturers, St. Thomas, Ont., will move into their spacious new factory next month. The building, which was erected by the city for the firm, is an admirable one in every respect and was recently inspected

by the members of the building committee of the city council and E. E. Donovan, Canadian manager of E. T. Wright & Co. The structure is most complete in every detail, being of regulation mill construction, and equipped with double stairways, sprinkler fire hydrants and fire doors. The lighting, heating and ventilation are perfect on each of the five

floors, and every accommodation furnished for the employes. Each of the four floors are splendidly lighted with a multitude of windows and will be well heated in the winter by an adequate heating system. The floors all slope toward a drain at one end so that in case of fire all the water coming from the automatic sprinklers will run toward this outlet, instead of going through to the floors beneath. The sprinkler system also includes an alarm system, and the moment a plug breaks, or is fused by fire, an alarm is sounded automatically both outside and inside the building. The office is finished in the most up-to-date manner and presents a very pleasing appearance. Throughout the whole building appears to be of the very best workmanship and the "Just Wright" shoe will certainly have a fine home. The accompanying cut affords some idea of the spacious and handsome nature of the new structure.

LIVE MANAGER OF NEW WAREHOUSE

The manager of the new warehouse of the Canadian Consolidated Rubber Co., which was recently completed in Edmonton, replacing the one that was burned down about a year ago, is C. H. Himburg. Although a young man, he has rapidly come to the front in the footwear line. Born in Bridgeport, Ont., he was educated in the Bridgeport public school and the Berlin high school. His first position was with S. R. Ernst & Co., of Berlin, with whom he remained for eleven years. He then joined the staff of the Kaufman Rubber Co., representing them in Western and Northern Ontario, while he also discharged the duties for some time as cost accountant. One year ago he became identified with the Canadian Consolidated Rubber Co., being connected with the Winnipeg office until July last, when he was transferred to Edmonton to take charge of the branch in the thriving capital city of Alberta. With the commodious and splendidly appointed new home that the Canadian Consolidated Rubber Co. have in Edmonton, which makes the twenty-eighth branch of their business, there is no doubt but their interests will be well looked after by Mr. Himburg.

Exhibition Spaces Now Open

Shoe manufacturers, tanners, manufacturers of shoe and leather machinery, materials and supplies, who wish to meet and show their products to the largest gathering of buyers ever assembled under one roof can do so by taking space in the Fair.

Price for space ranges from \$137.50 to \$336.00, according to size and location. This includes all necessary furniture such as signs, desks, tables, chairs, floor covering, etc. The exhibitor furnishes only the goods to be shown and salesman in charge. Further details furnished on application.

There will be a SPECIAL CANADIAN AND GREAT BRITAIN DAY at the Fair.

Those who wish exhibition space should apply at once to secure good location. Write to

RUBBERS

A Rubber for Any
Size or Shape of Shoe

The opening of the Fall, 1914, placing season, finds us in a position to show you an unusually attractive line of samples—products of the Independent Rubber Co., Limited, of Merritton, Ont. To the great majority of the retail shoe merchants of the Dominion, "Kant Krack," "Dainty Mode," "Royal" and "Bull Dog" are names synonymous with all that's best in rubber footwear.

Rubbers bearing these brands are flawless in quality and manufacture, irreproachable in style—thoroughly reliable in every way.

The styles for Fall, 1914, are made on lasts used in making 1914 shoes. Retailers can stock these brands, with the absolute assurance of being able to satisfactorily meet the demands of every customer who comes to his store for rubbers next Fall.

McLAREN & DALLAS

Wholesale Distributors of Boots, Shoes and Rubbers

Dainty Mode

RUBBERS

Every Rubber
Guaranteed to
Give Good Service

No inferior materials find their way into these brands. In every phase of the making these rubbers are manufactured with a *painstaking thoroughness of detail* that insures perfect service.

The snug, easy fit of Independent rubbers, on any shape of shoe, will be eminently satisfactory to your customers. The fit is so exact all over; no looseness—just an even, perfect fit everywhere.

3131 Model—Men's Light Storm Over, net lined. Also made for Boys. Lasts—Defender, Brunswick, Varsity, Hi-Toe.

Not a Better Made

3135 Derby—Men's Light Clog, self acting, net lined. Lasts—Varsity, Brunswick.

A Great Fitter

3125 Harvard—Men's Jersey Alaska, self acting, fleece lined. Lasts—Defender, Brunswick, Varsity, Connaught.

Extremely Comfortable

6133 Pearl—Women's Light Croquet, rolled edge, net lined. Last—Vogue.

Snug Fitting—Long Wearing

SERVICE

Our salesmen are now showing samples of Independent Rubbers. All four brands—"Kant Krack," "Dainty Mode," "Royal" and "Bull Dog" are well represented, and give you a comprehensive idea of our 1914 line.

One of our salesmen will be in to see you shortly. A thorough inspection of his samples will convince you that Independent rubbers should be liberally represented in your Fall stock.

We strongly urge you to give these goods the earnest consideration they merit. *Your orders will be filled within the specified time.*

If there's one thing we pride ourselves upon above another, it's our SERVICE. Our shipping facilities enable us to promise you PROMPT DELIVERY.

SPHINX

Shoe Cement Paste

"SPHINX" stands unique and without a rival in excellent qualities wanted by the shoe manufacturer

It is a quick, strong and clean adhesive, ready for use.

It absolutely takes the place of high-priced cements—on all kinds of linings, cloth or leather, such as vamps, side linings, stays, sock linings, etc.

It is flexible—when applied thin with a brush. Will fasten counters and toe pieces, tap soles, etc.

Best for sock linings, as they never loosen.

There is nothing made that is just as good.

22-FOOT GOODYEAR SHOE REPAIRING OUTFIT

MODEL N

THIS Outfit represents the highest development in shoe repairing machinery, and meets every demand of modern shoe repairing. It embraces all the essential processes for making new shoes from old ones, giving the maximum of equipment and efficiency in the minimum space. The Outfit has the Goodyear Stitching Machine with all its improvements, including a new style steam generator which uses gas or gasoline for generating the steam, and operates automatically, thereby insuring a uniform heat for keeping the wax in proper condition and requiring little attention from the operator. The Edge Trimming Machine has the new feature of the two shafts, being operated by a single belt, and the cutter grinder is attached directly to the main shaft. This arrangement gives better results with less power.

The Buffing and Scouring Machine has a shaft 57 inches long and carries the following equipment:

- | | |
|--|-----------------------------------|
| 2 Split Bottom Buffing Rolls | 2 Flat X-Ray Heel Scouring Wheels |
| 2 "C" Shape X-Ray Heel Scouring Wheels | 1 Heel Breast Scouring Wheel |
| 1 Pin Wheel Pad Complete | |

A powerful Blower System removes the dust resulting from the trimming, buffing and scouring operations, and is designed to overcome certain objectionable features of other blowers.

The Finishing Machine has a 78 inches shaft which has all the necessary equipment for black or russet work:

- | | |
|--|--|
| 2 Corrugated Rubber Shank Finishing Wheels | 1 Corrugated Rubber Heel Finishing Wheel |
| 1 Corrugated Rubber Bottom Finishing Roll | 2 Shank and Bottom Brushes |
| 2 Heel Brushes | 1 Stitch Cleaning Brush |
| 1 Levelling Roll | 1 Bead and Wheel |

At the end of the Outfit is the Oscillating Edge Setting Machine which is fitted with union irons and in its motions duplicates hand workmen with quicker and better results.

Each of the machines is operated independently by a friction drive pulley, so that it is necessary to use only those machines which the operator may require. This feature means a saving of power.

All the machines are firmly mounted on legs and driven by a countershaft with carefully adjusted bearings, so that the Outfit runs with very little vibration, and is in every way most efficient.

Survival Value

What is it? Survival Value is the lasting prestige added to all footwear by the affixing of the **Union Stamp**—it is the surviving standard because:—

- 1st It is a guarantee of honest footwear, made under the best conditions.
- 2nd It is a pledge of expert workmanship.
- 3rd It is the pass-word which opens the sales doors to Union Men everywhere.
- 4th After the other inducements have all been recited, the conclusive and finishing argument is the **UNION STAMP**.

Every shoe bearing the **Union Stamp** retains a sales value of long duration, for no shoe bears the stamp unless it has been produced under the proper conditions and represents honest value.

For mutual profits, better and bigger business, insist upon the official stamp of the **Boot and Shoe Workers' Union**—the only guarantee of Union Footwear.

100 Years of Uniform Success

J. & T. Bell shoe of to-day is not the result of any "flash in the pan," but it is the culmination of a century of observant and painstaking effort on the part of skilled workmen under expert supervision.

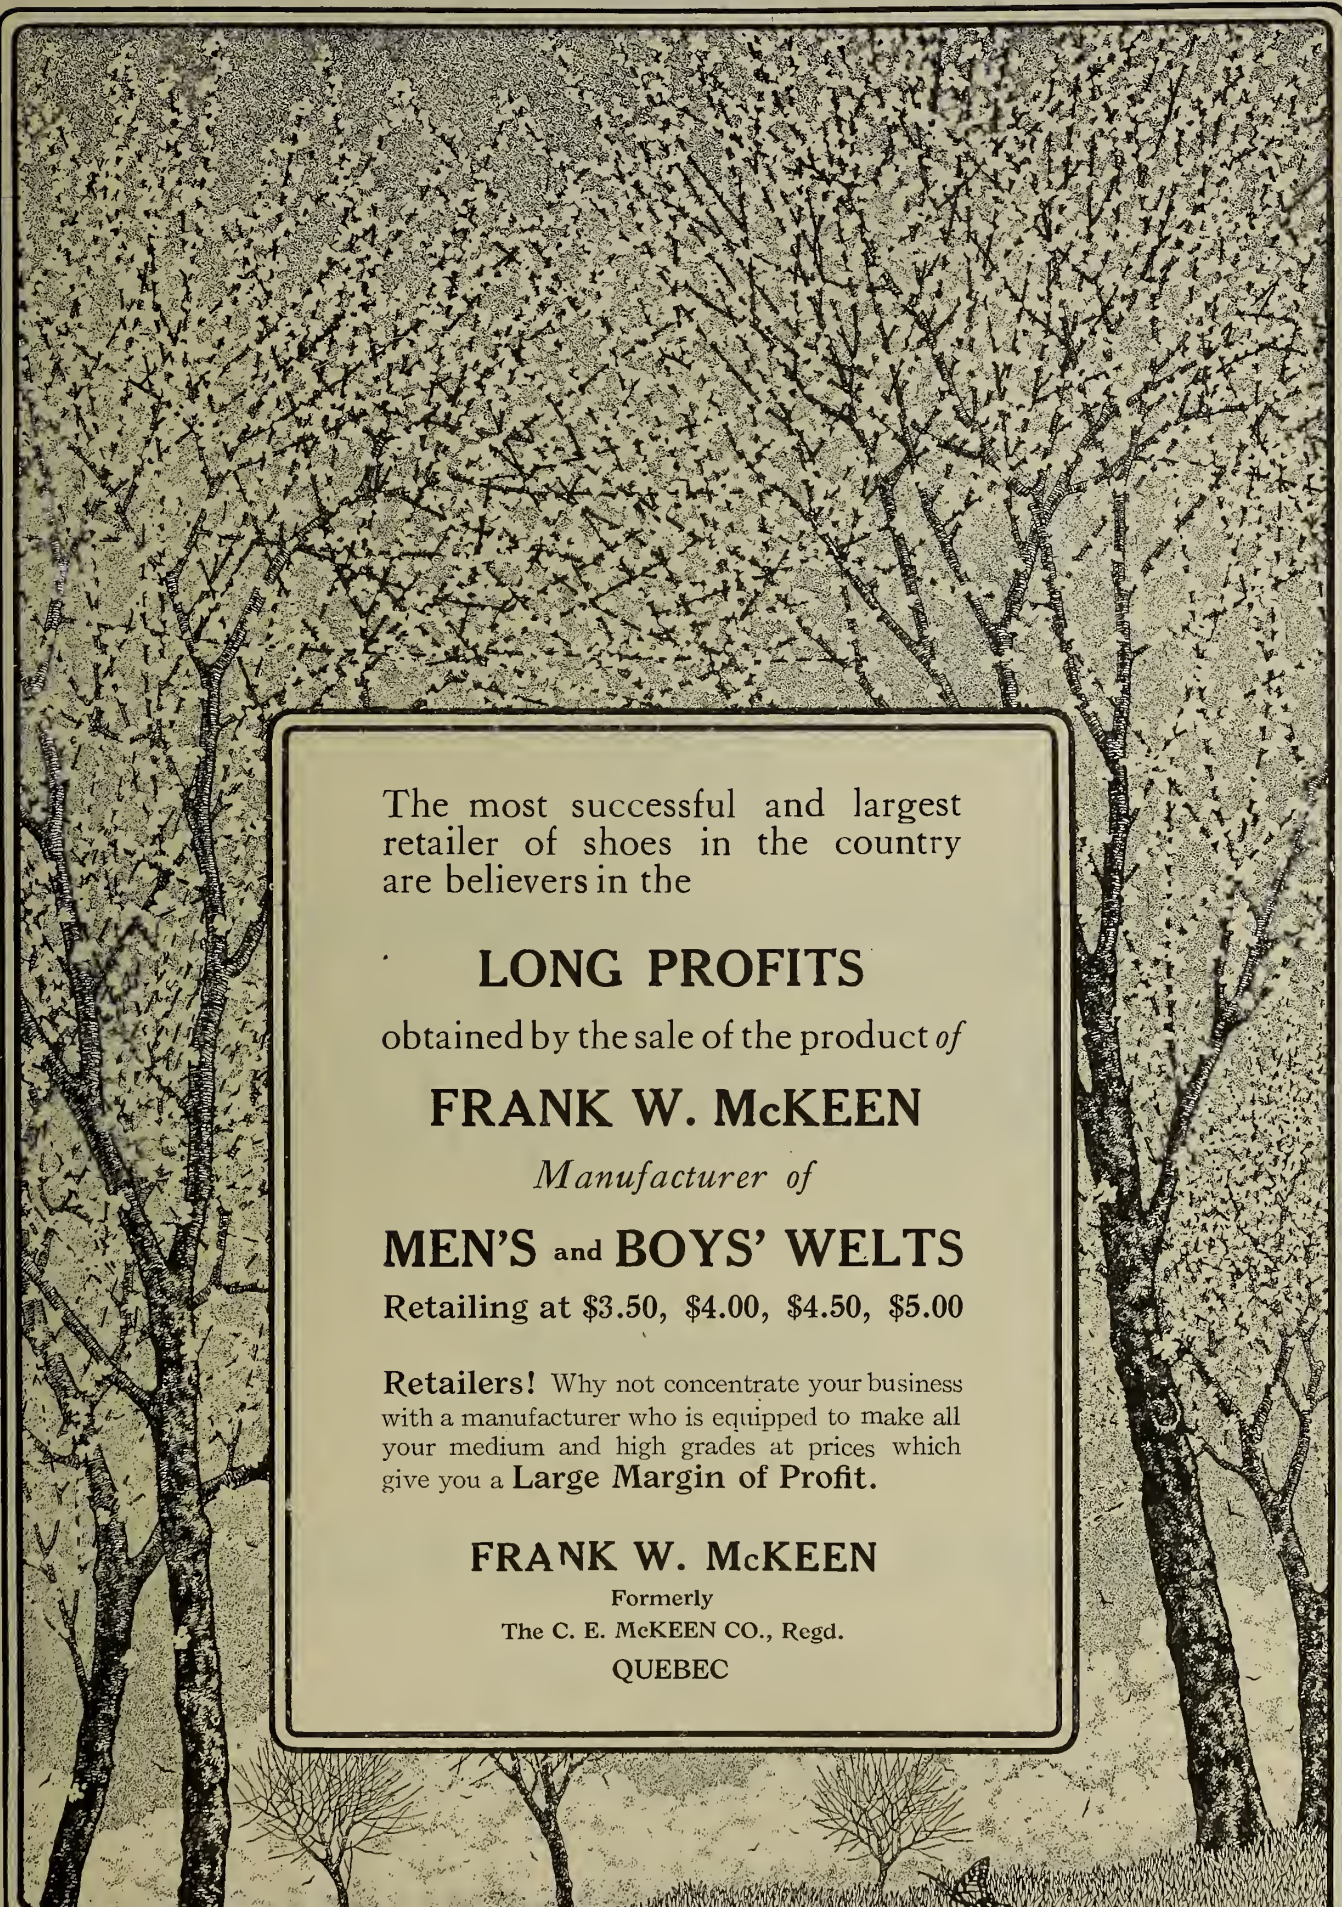

This explains why the name BELL is synonymous with QUALITY everywhere in Canada. It is a leader in style, appearance and real worth. It is pre-eminently the shoe for the exacting buyer who knows values.

We can best express our present and future policy by the ensuing quotation:—

"Made Up to a Standard, Not Down to a Price"

Don't Listen to the "Just-as-good" Argument!

¶ When a salesman calls on you and tells you that the brand of Felt Footwear he's carrying is "just-as-good" as the Elmira Line, DON'T listen to him! He's trying to deceive you!

*"ELMIRA" FELT SHOES AND SLIPPERS
HAVE BEEN THE LEADERS FOR 13 YEARS*

¶ The high standard for quality that makes "Elmira" famous has always been upheld. The same high grade materials, the same expert workmanship, the same good manufacturing facilities that have won an enviable reputation for "Elmira" Felt Footwear, will enable us to maintain that reputation.

¶ Only those dealers who have sold "Elmira" can fully appreciate what this means. To YOU who have not yet handled our line, we would say: "Start right NOW—you'll never know how much profits you have lost until you get a stock and begin to sell them.

¶ Our 1914 line of Felt Shoes and Slippers will be the most comprehensive ever shown. There will be many new and desirable lines that merit your prompt investigation. See the jobber's samples.

Seen Tricketts' Samples for Fall 1914?

Jobbers are now on the road, with a complete assortment of the celebrated TRICKETTS' Slippers.

We cannot too strongly urge you to make your selections *early*. By doing so, you will anticipate the needs of your customers, who have already been educated to the many fine qualities embodied in TRICKETTS' Slippers.

There's a most comprehensive assortment for you to choose from, including the newest and most attractive styles in Felts, Velvets, Poplins, Arctic Cloths; Satins and Leathers, etc.

Ask your jobber to show you TRICKETTS' samples. You'll lose many good sales next

fall if you don't, to say nothing of the resulting profits.

When you sell TRICKETTS' slippers you are not handling an experimental line. You are handling a line that has already proven its superiority, and for which there is always an assured demand.

It will pay you to remember this when placing your orders.

Staple Lines for Fall Selling

We have not made the "Yamaska Brand" famous by following blindly after every whim of the last maker but by having as our goal the building up of a reputation for *medium priced shoes* for the *average wearer* that is second to none in Canada.

Ultra-modern styles are all right for the few, but remember, that the sale of an everyday "bread-and-butter line" of *superior merit* to the multitude is what brings you the great bulk of your profits.

Such a line is that covered by the "Yamaska Brand."

Watch for the "Yamaska" traveler.

Reorganized, Rejuvenated, Rehabilitated

Mr. S. Mullett, formerly associated with this Company, has been successful in reorganizing this business and more than double the capital of the old Company has been subscribed, and is being paid up in full, thereby putting this Company in a very strong financial position.

Under the capable management of Mr. Mullett, one of Ontario's most successful business men, the future of this industry is assured.

The factory is running again and Spring orders on hand will be filled and shipped as promptly as possible, the plant running night and day in its endeavor to catch up with back orders.

The Reorganized Company bespeaks the hearty co-operation of the trade.

Buy RIGHT Now and Insure Big RUBBER Sales Next Fall

The strongest proof of the popularity of Independent Rubbers is the ever-increasing demand for them. Each year a larger number of merchants are handling them in order to adequately meet the demands of their customers.

But the biggest increases are coming from those dealers who have previously handled them—sure proof that Independent Rubbers are more than upholding their good reputation for quality.

Let this reputation be of service to you. Let it make big sales for you next Fall.

JAMES ROBINSON

182-186 McGill Street - MONTREAL

Dainty Mode

Your Customers will be Demanding INDEPENDENT RUBBERS Next Fall

and if you haven't got them in stock you are going to lose some mighty good sales. Your customers won't be put off with any other brands. They *know* that no other brands so nearly approach their ideal of perfection in rubbers as *Independents*.

"KANT-KRACK," "DAINTY MODE," "ROYAL" and "BULL DOG" brands are going to win many new customers next Fall. It will pay you to get a good selection in stock to meet this increased demand.

Have you seen my salesman's samples?

“DEFIANCE”

—The Dressy Waterproof Shoe For Particular Men

There are many water-proof and damp-proof (so called) shoes on the market, but most of them are far from watertight. Some that fairly well deserve the name are clumsy and repellent in appearance.

Our new “Defiance” shoe is the first combination of real waterproof qualities with a dressy attractive appearance, dressy enough for any parlor.

It is a calf shoe of very fine grain and exceptionally neat stitching. Has heavy soles, with a special process waterproof welting (note cut) and new waterproof bottom making (both stitching and soling.)

It has a half-bellows special whole piece tongue, of same leather as upper—not ooze Split. Lined with chocolate dongola.

The new mahogany shade of this shoe is sure to make a big hit. Has to be seen to be appreciated.

A solid leather (in every part) shoe with waterproof welting, insoling, uppers, outsoles, absolutely waterproof.

Sold by all the Leading Jobbers of Canada

Tetrault "DEFIANCE" (Reg'd) Hunting Boot

The only waterproof hunting and fishing boot in existence to-day.

Note some exclusive points:—

- 1.—The new bellows tongue pattern without pockets. Absolutely smooth from top to bottom. Same quality stock as upper. No place for water to lodge.
- 2.—Full Length Slip Sole—Made from Chrome Elk, ensuring wet-proof sole and lightness as well.
- 3.—Raw Hide Waterproof Welting—Comes between the ordinary welting and the upper. No water can enter this usually vulnerable point.

There are other exclusive points that cannot be shown in the cut.

Discovered At Last!

“Defiance”

(Reg'd)

A really waterproof hunting and fishing boot

We have experimented for over one year with *actual wearing trials in the woods*—in water, slush and trying conditions, especially to see if a boot could be made defying the water and dampness. We have made 72 wearing trials, always to find some trouble either with the upper stock with water coming through at the welting or at the tongue, or else to find that the seams or the Blucher corners would take water. With our 73rd trial we had the satisfaction of overcoming *all* obstacles, and the “DEFIANCE” watertight hunting boot described here is the result.

DESIGN It is designed to fit comfortably. The new bellows tongue pattern is extremely smooth from top to Blucher vamp. (No pockets near Blucher vamp as on other boots, absorbing the water). Tongue is made from same quality of stock as upper. It must be so to turn water.

UPPER Made from “Defiance” mahogany color—the *latest shade* or black “Defiance.” This leather is tanned with a new process, making it absolutely water and damp-proof.

FITTING OF UPPER This boot is fitted in such a way that the seams resist the water. These seams are very smooth enabling the most tender foot to wear them with ease.

SOLE LEATHER The out soles are viscolized and cut from the best oak leather. No soles less than 11 gauge are put in these boots—thereby insuring wearing qualities. Heels are made with one piece lifts and heavy solid leather counters.

SLIP SOLE This full length slip sole is made from Chrome Elk, which is waterproof and is used in order to make this boot so remarkably light in weight—a very essential feature for a hunting boot.

NEWRAW HIDE WATERPROOF WELTING We have a new waterproof Raw Hide welt in between the ordinary sole leather welting and the upper, which stops any water from entering between soles and uppers.

BOTTOM-ING Special process of our own is introduced in the bottoming which demands a lot of hand work and a great number of necessary small details (which we encountered in our trials) and must be carefully looked after to make this the only ALL LEATHER BOOT that positively DEFIES THE WATER.

—Hence the name “DEFIANCE.”

Fall Styles for 1914

HOW MANY CUSTOMERS
CAME BACK THIS SEASON?

“THE PROFIT”

says the trolley company, “is in the straps,” “the profit,” says the shoe dealer, “is in the customers who come back.”

It costs, so the merchants say, an average of \$5.00 to get each customer into the store and make the first sale.

Yet what has the unbranded shoe dealer sold, which insures the return of these expensively made customers.

Can't every competitor offer the same shoes he sells? The same terms? The same deliveries?

The “Brandon” and “Monarch” dealer holds his customers.

“STRAND”

Some More New Features in Snappy Fall Styles

The Shoes That Will Find Favor With Canadian Men and Women—A Review of Samples Being Offered in Men's, Women's and Children's Goods—Heels Are Again a Little Lower—Long, Narrow Toes Will Be Popular With Women—Medium High Toe Will Remain a Big Seller in Men's Footwear

"There will be no radical style changes this season." So spoke a leading eastern shoe manufacturer the other day, and his statement expresses in a few words the whole situation for the coming season.

Unless some new idea is conceived that will materially improve the appearance of shoes, dealers do not want to see startling changes in the goods they have to sell. Manufacturers and last makers have come to realize this more and

style seasons at all, but they must realize that competition is the cause of it, and were it not for competition, wearers of footgear would not have the large selection from which to pick and choose as they have today. Neither would the shoe trade in general, have attained the degree of advancement that it has.

So the result is that one last maker is striving to "put one over" on his competitor, the shoe manufacturer is doing his utmost to turn out a more distinctive article than any of his fellow makers, and finally, the retailer himself, seeks lines which will, for appearance and quality, outshine those shown by his competitors.

But to return to facts and figures concerning the new styles, for the approaching season, some very neat lines are being shown by Canadian shoe makers.

Popular Leathers

Tans seem to have fallen off in women's lines, but in men's are still popular, particularly in the darker shades

MEN'S TAN BAL., RUBBER HEEL AND SOLE, MEDIUM RECEDE TOE, BLIND EYELETS—BY THE HARTT BOOT AND SHOE CO.

more as time goes on, with the result that sane, sensible styles now prevail in footwear, and any changes that are made, usually take place during the spring season, hence Fall goods do not variate to any great extent, and the shoe dealer who orders for the coming season, pretty much the same lines as have been proving popular the last few months, can rely on a continuance of demand for these lines.

Nevertheless, certain changes are bound to occur, and every progressive manufacturer is showing new lasts, which, although not differing to any degree from last year, still have their own special points or features. What would happen to the makers who did not offer something new each season?

Certain shoe retailers are sometimes inclined to ponder over the reasons of there being any necessity of having any

MEN'S TAN BUTTON, LONG RECEDE TOE, FAIRLY HIGH HEEL—BY THE HARTT BOOT AND SHOE CO.

Patent will be a strong seller again, in fact, even better than ever before. To a great extent this leather is replacing tans. Gunmetal, the old reliable, will, of course, be strong again.

Velour calf and vici kid, as well as the other leathers, will be distributed about the same as they were last fall season.

Cloth Tops Strong Sellers

Cloth top shoes are predicted to be in strong demand, and a larger number than ever will sell during the 1914 season. A patent leather with plain cloth top is taking,

WOMAN'S COTHURNE, DUCK BILL TOE, LOUIS HEEL
EMBOSSED FABRIC, RIBBON LACED

particularly with the young men's trade and a large sale of this type is expected. The general trend being shown is for a medium toe, with neat lines. Practically all the call for square blunt toes in men's footwear seems to have died within the last year, and the demand has grown for a medium recede toe. The extreme receding lines seen in samples a year or so ago are also observed a good deal this season. Some manufacturers are seeking to boost the sale of tans, but buyers are buying only moderately favoring the darker shades. An inclination is being shown towards lower heels in men's footwear, and to a pronounced degree in many lines. A heavy demand is being shown again this season for water-proofs and heavy goods. Many manufacturers are showing shoes with quartered tips, and some samples are also being displayed with cloth tops having patent leather collars which present a very neat appearance.

Although the light color tans, as we have stated, will not sell any too strongly, at the present time many of the large shoemen think there will be a considerable call for the darker shade tan, something along mahogany colored lines.

Dull Russias will prove a good selling line for women according to the predictions of certain manufacturers. In fact, all styles in women's footwear are inclined to be unadorned, being effective and graceful in their simplicity and neat unembellished lines. A few plain, simple, orthodox shoe is what a number of the factories in Canada are showing. Buttons, high-cut in patent colt and other leathers, with cravenette tops will form a very saleable assortment, but the lace shoe has by no means been discarded, and will be worn by women who claim that they can never get the fit and comfort from a button shoe that they can obtain from a lace one. The buttons used are for the most part very plain and are more numerous of course than when larger and

more dashing metal ones are used. About fifteen buttons to a shoe will still be the prevailing mode. Cuban heels still remain in vogue, and some of the lighter lines being displayed carry the real Louis heel. As regards vamps, no great changes will be noticed. Some factories say they will be a little longer, while others are showing samples on which the arch is, if anything, a little bit shorter than usual, so it is safe to say that the length of them will be practically the same this year as last. The toes, however, as in some of the men's lines, are becoming longer and narrower, and the "duck bill" effect referred to in our last issue, can be seen on many lines. The "duck bill" effect is about the most radical change of the new season, and while they may prove popular, it is more than likely that the call for them will be limited. The fairly long, round toe will be the strong seller again, as it is sensible as well as graceful, and nobody can deny its distinctiveness. Square toes are shown to a certain degree in women's footwear, and will sell pretty much the same as last season. The height of heels has been reducing for the past two years, and this season they are again slated for a reduction. There are, however, many lines carrying the high heel. This type seems to be dear to the feminine heart, especially to that of the short girl, and as a result, there is always a strong call for the shoe with a rather high heel. From a style standpoint, though, they undoubtedly become smaller each season. There seems to be a call for a lighter fall shoe for women, and manufacturers have responded with some lines that are exceptionally light, many single sole samples among them, and even the weights of these soles are less.

Children's Styles Are Natty

As is the case with their elders, children's footwear will not show any great changes, with the exception of the nature shaped shoe, which it is predicted will be very popular this year. Greater attention is being bestowed on the work, lasts, and styles of boys' shoes as well as youths. The advancement made in materials, appearance and build is so marked in all these lines to what was on the market a few seasons ago, that the contrast is both striking and startling. In children's lines, a staple assortment is being shown for the fall season. In babies' and infants' vari-colored shoes are

WOMAN'S BLACK SUEDE BUTTON, MEDIUM PLAIN TOE, CUBAN
TOE—BY JOHN MCPHERSON CO.

again shown strongly, and their popularity is certain to continue. Many button and some lace shoes are shown. In children's, gunmetal in button and lace, as well as patents, will have a very ready demand. These are shown in natural

(Continued on page 53)

Some Problems of the Country Shoe Dealer

How Mail Order Houses Take Away Trade—City and Large Town Stores Also Hurt Country Shoeman—Taking Steps to Remedy this Evil and Retaining His Trade

"My greatest trouble lies in my not being able to limit customers' shoe purchases to the town in general, not to my store in particular. I can fight competition of my own kind easily enough, but when it comes to bucking up against the large town store and city mail order houses, I have to confess that I am up against a stone wall."

So spoke an Eastern Townships shoe dealer to the *SHOE AND LEATHER JOURNAL* when questioned as to what he thought to be his worst problem.

His views are exactly the same as every other country and small town dealer, in not only shoes, but in other branches of the retail business as well.

And it is a very serious problem for the country merchant. The younger generation, unless they remain farmers like their fathers and grandfathers, drift citywards in search of their life work. Moreover, many villages do not possess any manufacturing industries, which complicates the situation still more. There are a dozen different phases to the problem. The average village today is a very short distance by rail or radial lines from some large city or town. The cheap fare, excellent accommodation, and the desire to take a short holiday, attracts many people to the city to spend a day or two, and incidentally, as they really know, a good many dollars that should really go to the home retailer. The very people who are shouting most for a better town, better roads and other such praiseworthy aspirations, you will very frequently find are the worst offenders when buying wearing apparel. They want a brisker and more up-to-the-times town, but when it comes to purchasing a pair of shoes, will turn up their noses at the idea of patronizing the village shoe stores, make an excursion to a larger centre, and in the end, just as often as not, get less for their money in style and quality than they wanted from the home retailers.

The large city mail order house also figures largely in taking away money from the residents in smaller centres.

Don't Take Too Gloomy View

But, after all, is it not quite possible that some country shoe merchants overestimate these difficulties. In the shoe trade, as in every other calling, there is the individual who can never see anything but dark ruin ahead. He magnifies a mole hill and makes a mountain out of it. Needless to say, this chap belongs to the class that come and go, but never stay for any length of time, the class that figure in the daily printed reports of the commercial agencies. Happily, we still have the optimist to show us the way, and the average Canadian shoeman is not of the type that sits quietly back, and permits possible trade to get away from him.

Although the problem in discussion is a live one, and an evil that is growing worse all the time, it is by no means a new one, and has to a large extent been successfully overcome by many shoemen, who took an inventory, as it were, and then used a little generalship.

There is no doubt that the mail order houses have some great advantages that are denied the smaller retailers. But they have great and more than compensating disadvantages that give the smaller retailers the whip hand if they are live enough to rise to the occasion.

One Important Advantage

The shoe merchant who cannot score by emphasizing the superior quality of the service he can render, as compared with the mail order house, is a back number. The very nature of the article he sells is a point on which he can put up his most convincing argument. It is all very well for the housewife to send to a large mail order house an order for

ATTRACTIVE AND WELL LAID OUT INTERIOR OF THE FOSTER SHOE CO'S. STORE IN MEDICINE HAT, ALTA.

dress goods, furniture or some other such article. If the house has any reputation at all for service, she may perhaps get more for her money than she would from the local dealer. But when buying shoes to give a proper fit, more information than the size is required to give the right kind of service, and this can be given only by letting the salesman judge for himself, just what style, size and width best suits the shape of the customer's foot. When a person with an abnormally high or low instep, with corns or bunions, or any other foot ills undertakes to use a mail order shoe, the result is, nine times out of ten, not only annoying, but also expensive. Therefore, here is where the local shoeman should shine. When starting on a campaign to win out against the mail order as well as the large centre store, his first move should be to give each customer the very best fit possible. He must take the stand that no trouble is too great for him if it is to result to the benefit of his patrons. An intimate personal service once rendered will be only the commencement of a series of such services, not only for the satisfied customer, but the friends also. Of course, diplomacy is needed in doing this, but that is a quality that every shoeman should have, and it is taken for granted here that he does possess his share of it.

The Price of Your Shoes

This is one of the problems the country merchant is continually up against, and one which very often affects his trade to a considerable extent. Is it better to sell more cheaply, bending efforts to a large turnover, or to devote more energy to making larger profits on each pair sold. If you are trying to hold trade in your own store, and fight out-of-town competition, ask yourself this question. The former method involves much more labor and selling expense, but in the end, particularly when you are making an effort to have people buy locally, it is the best method. Selling at a lower profit and having a larger turnover will prove more beneficial than would be the result of the easier method. A reputation for quality at a reasonable price is the best asset any retailer can have, and is very productive of business. Moreover, you are fighting the mail order houses with their own weapons, and thus hitting them in a weak spot.

Store Equipment

Have you ever stopped to figure out just why it is that people go by your store and put off buying shoes until they get a chance to run over to some neighboring city? Are you sure your store cannot make the same appeal to them that the other one does? Right here is the cause of the failure of many people to buy from the local stores. They may have been alright years ago, but people today do not wish to shop in old broken-down establishments. Before they can hope for much success many country shoe dealers will have to spend some money installing uniform cartons, a neat show case or two, and giving the shop a thorough renovating and painting. You may consider your present location unfit for a modern shoe establishment, but have you ever considered what a good cleaning would do towards improving the interior. A modern window or store front will do wonders with your trade, if your present one has an old fashioned appearance.

Letting Customers Know

The large shoe stores and mail order houses sell their goods solely by putting them prominently before prospective purchasers in an attractive manner. The local retailer has in every single inhabitant of the town and surrounding country a possible buyer of his footwear. It sounds odd to hear a shoeman talking of the inroads a certain mail order house or some other competitor is making on his trade, when, at the time, one can pick up a copy of the local newspaper, and see a large advertisement announcing the superiority of so-and-so's shoe, and the advantages of ordering through the

mail, while this local shoe dealer is not represented in the paper once in a year's time.

Space is cheap, comparatively speaking, and should be used effectively and constantly. The ad of the local dealer should outpoint that of the outside. To do this attractive copy must be used. Imagination is necessary, but surely the man who lives next door to his customers is in a much better position to appeal to their special interests than is the writer of the mail order concern's advertisements, even though he be a high salaried expert. Advertising must be constant to be effective. One insertion a month will not do. People are buying shoes every day, not the last week of the month, and can be reached only by constant publicity.

Circulars Are Valuable

City people are sometimes overloaded with circulars, but in the country, a good, strong, appealing letter does a great deal of good. Mail in the small town and country district is scarce, and people have more time to read a letter than have their city cousins. Good sensible sales talks will bring results every time. Letters at different periods during the year are found by many country shoemen to be trade pullers. These letters are sometimes accompanied by booklets giving a list of prices and illustrations of stock carried by the store. Considerable space in these booklets can also be devoted to emphasizing the square deal problem, service and quality.

Intelligent Buying

Above all things, the local shoeman must have the goods to back up his assertions, and must have the right quantity in each different line. Otherwise his efforts have been utterly useless. To carry the right kind and the proper quantity of each line, careful buying is necessary.

To be a good buyer a man must be thoroughly posted on present styles, possible changes, and the needs and desires of his probable customers. He must be able to steer a course between tying up too much capital and not having a proper assortment from which to choose—and this is not an easy matter. It is safe to say that there is little necessity for the country shoeman to spend much capital on extreme styles. He has not the same chance to rid himself of them if they don't go well, as has the city dealer. If he is the right kind of salesman he can nearly always suit a customer by showing a more normal style if the quality is up to the mark. On the other hand it is a mistake to take it for granted that his customers care little about style and are all for wear. The country or town buyer has changed greatly in recent years, and is now buying stylish although not freakish shoes. Wear is not as important now as it was formerly, although it still maintains its supremacy for working boots. At any rate, it is much better to buy less than probable needs, making up the deficiency with sorting orders as required, rather than stock up too heavily. This both saves capital and spends it where it is most required. By good buying you will always have a distinctive stock, and by a careful regard and study of the custom to which you cater, your service, advertising, selling, appearance of store, along with your own personality, worked for all it is worth, will forge a combination that offers a solid front to the encroachments of the mail order house, and will educate probable customers to buy where they get best values, which is at your own establishment.

Because they affiliated themselves with the International Leather Workers' Union, W. J. Gibson, president of the Gananoque Harness Works, called the employes together recently and told them they could not come to work on Monday unless they seceded from the union. This they refused to do. On Monday morning the same ultimatum was given to the employes of the Acton Harness Works and not a man went to the bench.

Do You Keep Your Customers' Accounts Straight?

The Way Leading Business Man Lost Profitable Patron Through an Error Which Could Have Been Avoided by a Simple Cash Received System—An Apology to Mrs. Bucklein that Came Too Late

Mrs. Bucklein came into my store one morning expressly to see me. She passed her favorite clerk with a simple nod. This was so unusual for her that I looked hard to see what was the matter. Then I saw clearly something had gone wrong. She sallied right down to my desk. She had a grievance; she was sore about our service; I thought she had blood in her eye.

Now, Mrs. Bucklein was one of my good customers. Her monthly bills often ran up to a good amount. She was easy-going, never questioned my prices; but for one thing, she always wanted the best of everything. Quite natural, I thought, since she paid the bills. And the checks came promptly after the first of the month. So, you see, I was somewhat set back to note she was dissatisfied with us.

"Look here, Mr. S——," she began, "what do you mean by this?" She pulled from her handbag an unreceipted bill. "This account has been paid; I know I paid you a long time

ago. It was paid before I went away. I don't like this at all."

You may well believe I *did* look into it, and quickly too; I had visions of a loophole in my office methods, something loose in handling "cash received." And I had thought my bookkeeping absolutely watertight, and had prided myself on having up-to-date methods of doing everything.

When I found the ledger account showed the account unpaid, I was indeed anxious. Search as far as we might there was nothing to show that a check or money had come to pay it. My bookkeeper was positive that payment had not been made.

She pointed out that the cash account had been in balance right along. Had such an account as this been received and not credited, the difference would have shown up and it would have been searched out at once.

I was thoroughly convinced we had not had payment,

AN ARTISTIC AND EFFECTIVE WINDOW DISPLAY OF GEO. G. GALES & CO., MONTREAL.

and that my good customer was mistaken in her belief that we had.

How to handle the situation was a puzzler at first. In telling my customer that her account did not show a credit for the amount, I asked her to look up the receipt. "This is to enable us," I said, "to tell who received the check or money, and to know who is responsible for the mistake."

Could Not Find the Receipt

She replied that she had been unable to find the receipt, but thought that, in the confusion of getting ready to go away, she had mislaid it. "If I had paid it in the usual way by bank check I could easily produce the cancelled voucher, but the fact is I paid this amount with money, with currency, I had drawn from the bank that day. You see, I drew more money than I needed, as I found, and as I didn't want to carry so much with me in traveling, I used some of it to pay your account."

"Do you remember, Mrs. Bucklein," I asked, "to whom you paid the money?" "That I cannot say," she replied, "As I remember it I stayed outside in my limousine, and sent in my maid to make the payment. Although I have nothing to show for having done this, since I have taken the trouble to come in and explain the matter, I think you ought to receipt the statement which you have sent me by mistake."

This was bringing that matter to a quick decision, and for a minute I didn't know what to do. But I pulled myself together in time to say that I would like a day or two to look up our records more fully, and find, if possible, where the trouble lay.

Mrs. Bucklein didn't like this at all. She said she regarded the matter as settled and wanted a receipt in full for the account. Not getting she went out, in spite of my most earnest solicitations, feeling sore at the store.

Some Would Have Stood Loss

Some storekeepers would have receipted the bill and stood the loss of sixty-five dollars, in order to retain the goodwill and trade of a good customer. But wisely or foolishly I did not. I was convinced my methods were proof against mistakes.

But I didn't know then all I should have known.

Six months later in cleaning out the back of the cash drawer, I found a large envelope bearing my name. There was something crispy in it. I tore it open and pulled out new, clean bills—sixty-five dollars and the original bill of Mrs. Bucklein's. How it ever got there is a mystery.

On examining the envelope I discovered her name written with pencil across one corner. The handwriting seemed familiar. I studied it and found that it had been put there by a clerk who had left my employ months before.

An hour later I handed Mrs. Bucklein a receipt for her account with humble apologies. I hoped the breach might be healed. But I never got back her trade and never will.

This incident set me thinking about defects in my office methods. Loss of trade and loss of profits will set almost any business man to thinking, when he discovers the loss.

Locking Stable Door Too Late

That is just the trouble. The need of better methods is seldom brought home until he has had a loss of some kind. And he doesn't see the loss until after such an incident as this.

I talked the whole matter over with a friend, who was an expert at accounts. He asked me how I made original entries for cash received. I told him by turning to my cash book and making the entry then and there.

"That's all right," he said, "for a small business. But do you know that this method is followed out in your office?"

LIKES THE SEMI-MONTHLY ISSUE

"I think your paper is right up-to-date. When you changed three years ago from a monthly into a semi-monthly you took a decided step forward and one that all live shoe men appreciate. We get all the style and other news fresh and bright. Your articles are also full of general interest and valuable suggestions to the retailer. Your store and window illustrations are certainly very attractive and representative of all parts of the Dominion."

Sincerely yours,

J. T. LAWSON.

Regina, Sask

MONEY WELL INVESTED

"As manager of Stewarts, Limited, boot and shoe department, I have been a reader of your Journal for some time, and always look forward to getting it twice a month. For a shoe man, it is money well invested, as one gets many valuable pointers."

A. T. MARSHALL.

Renfrew, Ont

Do you know that your bookkeeper doesn't sometimes forget?"

I replied that I was not absolutely sure of this. Then he told me what I needed. He told me I should have a simple, yet well-ordered system of receipt vouchers and summaries, such as are used by many large houses; and he showed me why. It was all so simple and easy to understand that I adopted it at once.

By requiring a receipt to be made for every item of cash received in payment of accounts, whether the original bill or statement comes back with it or not, I know the original entry is properly made? "I will draw you up a convenient form," he said, "to be made in duplicate by manifold. You will simplify the work and make it easier by having both slips put in together in pads ready for use. The duplicate should be printed in buff or yellow paper, to quickly distinguish it from the receipt on white paper, which goes to the customer."

The receipt form I use is 5 by 6 inches in size, and, as you will see, gives full particulars of settlement. It shows the date of invoice, description, the total of cash received, allowances and returns, and total credit. It bears a consecutive number and, of course, the customers' name and address.

Having sent or delivered the receipt the duplicate is filed in the cash drawer. This slip then becomes a credit ticket, and is handled exactly as your deposit ticket is handled by the bank. You know banks do not make cash book entries of deposits or checks. They simply post the deposit tickets and checks direct to the customer's accounts. They prove the correctness of this work by making summaries and comparing them with the teller's lists. This saves double work.

Now, I handle the cash received slips in the same way. I sort the day's slips in order of the consecutive numbers and list them.

The numbers of the slips are also listed and the items for each of the four columns added. The totals are placed at the bottom and posted direct to the controlling accounts as debits. Each slip is then posted to its proper account as a credit. This is all there is to it.—By A. St. Elmo Lewis, of Burroughs Adding Machine Co.

A Splendid Money-Making Line for the Shoe Dealer

Have You Ever Thought of Installing a Traveling Goods Department?—If You Have One, is it Paying?—
Its Value in the Shoe Store—Initial Stock Required—Displaying Goods

You are in the shoe business for the money you will make out of it.

It is needless to impart to you this information, as you are no doubt aware of it yourself. However, the remark is made because it naturally leads up to the question—are you employing your capital to best advantage?

Traveling goods as a side line will result to your profit if handled properly, and given a little careful attention once in a while. There are many shoe retailers throughout Canada, however, who have never given the idea of having a traveling goods department a thought, or if they have, never considered it sufficiently important to investigate to any extent or to push it. This applies not only to the man who has never tried to sell trunks, bags, and suit cases, but also includes those dealers who purchase three or four bags, a trunk or two, and stow them away in the rear of the shop where they will not be seen from one end of the year to the other, and then tell their friends that the traveling goods department is "a frost as a side line," and a shoeman had much better concentrate on shoes alone.

We believe in the principle of specialization. As a rule the more one concentrates one's energy, the more fruitful are the results. But, like every thing else, specialization can be carried too far, and the most progressive shoemen have come to realize this.

The merchant who is having the greater success is he who awakens to the trade winning possibilities of what are usually considered side issues in the shoe store. Any article in keeping with the general conception of your store that will bring a greater number of people inside your door more often, is one that you should have on sale. Trunks and bags are not usually well displayed, nor are leather novelties. You may be very sure that three out of every six of your present customers buy a trunk, a suit case, or a bag sometime during the year—and mayhap more than once. If these customers have their attention properly drawn to these lines every time they enter your store, they will want to purchase more frequently—and when they want to buy, they will think of your shop. Further, you will admit that, if you, a shoe merchant, have made friends through the sale of a bag, a shoe sale in the near future is likely to be the result. In that way, both the main issue and the side line work hand in hand for your greater success.

Prospects in Your Town

Before you go any further, size up the situation in your own town. What prominence is given to trunks, bags, and so on by the other stores? How are they displayed? What lines are sold and to whom are they sold? If the aver-

age shoeman does this, he certainly will not find any reason why he should not be doing a regular trade in traveling goods.

Goods Profit Margin

An additional inducement lies in a consideration of the profits to be made from this department. Traveling goods are sold by Canadian manufacturers with an average discount of about 33 1-3%, with, of course, the additional discount for early settlement of bills. Figure out the first opportunity you have, the running expenses of the traveling goods department. When worked in conjunction with the shoe end of the business, the expense is practically nil, as you have really no more overhead expense than is incurred through the shoe department. You are employing otherwise empty corners of the store profitably. Your salary sheet grows no more, and your lighting and rent bills remain the same with the department as they would without it. You are tying up very little capital. Suppose you invest \$100 as a start off, what of it? Could you invest it more profitably, or in fact, as profitably in shoes? Moreover, as was said at the beginning of this

article, it draws prospective shoe customers into the store and induces them to make a double purchase.

Initial Stock Required

A good start can be made by the average dealer with a dozen or fifteen different style trunks, ranging from \$2 to \$5 wholesale. Stock up with one, or at most with two sizes in each style, in accordance with whatever space you have at your disposal. The same policy should be followed in selecting club bags, suit cases, ladies' hand bags, etc. You will find that a little brain work, along with the aid of a reliable salesman from one

SELECTED ENGLISH COWHIDE CLUB BAG, TAN COLOR, GERMAN FRAME

of the traveling goods manufacturers will enable you to install a first-class initial stock at anything from \$75 up to \$150. Of course, you will not be able to stock \$20.00 bags, but there is no need of doing so. The average purchaser does not require anything so elaborate as a \$20 or \$25 unfitted bag or suit case. There are sales of this type to be made very often during the year, and it is a good idea to have a real good sample of each article, that is trunk, bag, and suit case on hand. This, however, is looking ahead a little, and it is best to carry only a fairly medium-class line of goods at the start. Although you will receive demands now and again for high class stock, the purchaser is generally looking for a cheap serviceable article, and is willing to pay about \$10 as an average price. The locality in which a business is being conducted, and the trade being handled naturally affects the average price of all these articles.

This is the principal factor to be considered, after decid-

ing to boost the department, as the success of it depends largely upon what degree of prominence is given to it at the beginning. To familiarize on the minds of patrons and prospective customers, the existence of such a department, trunks, bags and suit cases must be conspicuously placed, and even at the risk of overcrowding, a strong initial display should be made. Why, the very fact of a little overcrowding for a few days is a strong lever by which to attract attention. By merely placing them on top of shelving and wall fixtures, you will, we grant, attract the attention of some people, but this is not what you are after. You are out to catch the attention of every single prospective buyer.

However, to select a permanent location or show place is bound to necessitate some thinking and a little natural genius for display. Your trunks you can perhaps use as a dividing line between the men's department and the women's, if the former and latter each occupy one side of the store. Think again, and figure out how you could best use that empty space between the ceiling of the office and the store ceiling.

Suit cases, hand bags, and other leather goods can be kept on spare shelves, preferably with glass fronts or in any spare corner fitted up for the purpose, provided it is dry and clean. All shoe stores, although having many mutual features, are unlike, and therefore, every shoeman will have his own problems to meet in this particular, but a little forethought will enable him to solve these satisfactorily. For surplus stock, you can probably use some part of the cellar or whatever storage room you are accustomed to employ. One great advantage of carrying and selling traveling goods is the possibility of ordering and receiving goods in a very few days. You can, to be exact, make many catalogue sales, that is let a customer pick out his choice from the manufacturer's catalogue, telegraph the order, and receive at the store, your order within a week or less. This is a distinct advantage, and it is not exaggerating to say that it is being done daily by hundreds of shoemen.

There are many sides to the conducting of a traveling goods department, such as advertising it, different petty problems connected with it, and so on, which space does not permit us to discuss in this issue, but which will be mentioned again in our next edition of the SHOE AND LEATHER JOURNAL.

Scarcity of supply in walrus, sea lion and other novelty leathers used in the manufacture of bags and cases promises to be relieved during this year if the catch of Japanese hunters is as large as conditions indicate. The increasing popularity of walrus and seal for bags and cases has created a demand for such leathers beyond the ability of tanners to supply, and a leading western firm say they cannot get sufficient skins just at present.

Comparatively few real walrus skins are used in this trade, those of the young animals being the only kind tanned for the purpose. Most of the walrus leather seen in traveling goods is made from the larger skins of seals. Walrus leather is chiefly used for buffing purposes.

According to a report of Consul-General Thomas Sammons at Yokohama, a Norwegian steamer which outfitted at Seattle in the spring of 1913 put

in at Yokohama in the autumn after two months of walrus hunting in the Bering Sea. The catch amounted to about 900, some of the bull walruses weighing fully a ton.

The returns from oil, ivory, and walrus hides are expected to make the venture highly profitable. It is reported that an unlimited number of walruses were seen, but that it proved difficult with the devices available to capture them. It is now proposed to send the vessel on another expedition in

1914 with better equipment.

An effort may also be made to locate the island or cove where it is reported the skeletons of many walruses may be found. The value of the ivory to be secured from the alleged walrus graveyard is thought to warrant a careful search.

The Japanese anticipate a considerable trade in the skins of sea lions captured along the shores of the Kurile Islands. Samples of the skins already secured are on exhibition at the commercial museum in Tokio. The Department of Agriculture and Commerce

obtained 135 sea-lion skins in 1912 and had them tanned at the Marine Products School and elsewhere. The skins turned out to be soft, strong and waterproof suitable for making shoes, hand bags and trunks. They are also extremely cheap, and the supply is said to be almost inexhaustible.

A Shoe Store That Possesses Latest Equipment

Thoroughly modern in all its appointments and with an attractive and artistic interior, the shoe store of the C. E. McKeen Co., which was opened on Yates Street, Victoria, some months ago, is doing a splendid business under the management of Chas. L. Griffin. The store is 107 feet deep and the shelving is of the single carton system, a tasty uniform label prevailing throughout. Each shoe is distinguished by a number and the stock arrangement is complete in every respect. The floor is nicely carpeted while here and there palms are placed on top of the shelving. An attractive line of findings is displayed in two handsome cabinets which have sliding glass doors. These are located at the end of the shelving and right at the front of the shop.

The firm believe in neatness, order and arrangement, and are noted for the particularly attractive windows which are installed. On any special occasion or in honor of any demonstration the C. E. McKeen Co., are sure to put in a display or picture which will attract attention. The one shown in this sketch was placed in position during the water carnival last summer. The windows are brilliantly illuminated and possess large mirrors with solid mahogany woodwork. The men's and boys' department, and ladies' and children's department are decidedly smart and tasty in arrangement. In the latter branch there are lounging chairs, writing tables and artistic mirrors, while a flood of light is admitted through the skylights. The store is also brilliantly lighted by electricity with twenty 60 watt candle power lights and several candle power lamps in

THE HANDSOME STORE FRONT OF C. E. MCKEEN CO., 747 YATES ST., VICTORIA, B.C.

frosted globes. The new store of C. E. McKeen Co. is certainly a credit to the shoe shops of the Capital city of British Columbia, and is both practical and magnificent in fittings and design.

What Is Meant By "Service"

It is said that every man has a hobby, and the hobby of the writer has always been and is "Store Service." It makes no difference how much merchandise a man buys, no matter how tempting the assortment he offers his patrons, no matter what advantageous circumstances govern his management of the store, he will not get ahead unless his service is tuned up to high efficiency.

Now, just what does service mean? It is a big, broad, comprehensive word, comprising only two syllables. It is often misused and ill-used just as is the word efficiency, or the word quality, or some of the other terms which have been bandied back and forth in the controversy accompany-

ing the discussion of modern business. But, analyzed, service consists in that which makes it attractive for the public to buy, and buy under the most advantageous circumstances. The store where service is emphasized to a proper degree will be filled with clerks who are correct in their attire; prompt and attentive to every wish of the customer; the spirit of harmony will prevail, and unity will characterize all of the activities of the establishment, from the placing of advertisements in the newspapers to the delivery of goods at the patron's residence.

Here are just a few examples of what service is not, and all of them are facts: A certain woman who is fortunate enough to possess four boys and a wealthy husband, is a large buyer of shoes in the junior department of a great

mid-western shoe store. Recently she purchased shoes for her boys to the amount of \$22 and was assured that the goods would be delivered to her suburban home, on the city car line, the next day. Four days later they were received, and then only upon a strenuous second request. The result is the store has now lost the custom of this woman, and that of her four boys, who otherwise, in a few years, would be buying the highest priced shoes in the store.

A friend recently went into a tailor shop to leave his measure for a new suit of clothes. The young man who endeavored to help him choose a cloth was deeply engrossed in a cigar, and paid more attention to it than he did to the prospective customer. The result is that this store made one suit less during the season than it otherwise would have done. No prediction as to loss of future business.

A woman entered a shoe store and was being fitted for a pair of shoes, when the clerk was called to the telephone. He returned and a few minutes later was called away again. This time he was gone three or four minutes, and when he returned, the only business that occupied his attention was putting shoes back on the shelf. The customer had fled.

An Aggressive Quebec Firm

The senior member of the enterprising firm of Dupere & Garant, 610 Rue St. Valier, Quebec, is Alf. Dupere. He is well liked and well thought of by the trade in both the province and city of Quebec, where he has had dealings for a number of years. Mr. Dupere was born in Levis, April 20, 1870, and received his education at Levis College. He served as apprentice with a shoemaker and worked several years in a factory. In the year 1894 he became manager of the shoe and rubber department of the Campbell Shoe Co., where he served five years. His next position was with the W. A. Marsh Co. Among other posts that he has filled was manager of the rubber depart-

ALF. DUPERE

ment of Jobin & Rochette, and salesman for Fiske, Limited. He has been in business now for three years and has developed a very large and profitable trade, representing, as he does, several leather, cotton thread, dressing and findings establishments. Mr. Dupere has for some years been the correspondent of the SHOE AND LEATHER JOURNAL from Quebec, and keeps the readers of this paper fully advised of what is transpiring in that thriving shoe centre.

Alf. Garant, who is junior partner in the firm of Dupere & Garant, Quebec, is a native of the Ancient Capital, where

he was born in 1881. He took a commercial course and then spent some time in New England as a shoe cutter, working in Haverhill and Brockton. He later took charge of the cutting room for Goulet & Garant, which position he filled for some time. He was next in the service of the Louis Gauthier Co., as assistant foreman, and about two years ago formed a partnership with Mr. Dupere. The partnership

ALF. GARANT

has been mutually beneficial and has resulted in building up a fine business. The firm import supplies from England and various European countries as well as United States, being jobbers and importers of upper leathers of all kinds, sole leather, rubber cement, leather laces, cork insoles, etc.

A Like Retort

A dapper young shoe clerk fitted a number nine over a farmer's yarn sock. "When you get these on," he smilingly remarked, "you can sing, 'How Firm a Foundation.'" The farmer answered not a word until the number nines were on his feet and his old shoes in a neatly wrapped package under his arm, says the Philadelphia Ledger. As he reached the door he smilingly said, "And you can sing, 'A Charge to Keep I Have.'" "

"Tango" Bootee the Latest

The "tango bootee" has now made its appearance. It was first shown recently in Chicago, where it was ordered of a retailer of high-grade, custom footwear. The unique feature of the boot is that it laces up the back, starting at the counter, says the Shoe Retailer. It is a three piece, light welt, plain vamp shoe made of kid. It has a seam in the front, is finished at the top with a collar of cloth of gold with a row of rhinestones at the upper edge and further adorned with a buckle in the usual position on the vamp. The buckle is novel in shape, made of leather with a row of rhinestones set around the edge; next two rows of black beads and then another row of rhinestones, leaving the centre plain. The heel is 1 5-8 inch Cuban-Spanish, covered, the boot eight inches high, and a shoe spoon is required to put the boot on, but the feat of lacing it up the back is quite difficult. The effect is pretty, but if the style should become popular the merchants will have to install new fixtures of some sort to facilitate the lacing-up process. Who can suggest the proper device?

The Circular *vs.* the Trade Press

¶ "I had not made a personal investigation of the retail situation for a year or two," said an agency solicitor and service man, "and I thought I would go out and get a line on it as a help to preparing a trade circular.

¶ "And what do you think I found? Why, some of the retailers I saw were getting fifty and sixty circulars a day! The worst was in the grocery line, but the shoe line was almost as bad. Read them? What a chance! Nine-tenths of them went to the floor and were swept up unopened.

¶ "I have had some experience as to the waste of dealer literature before, but the condition to-day surpasses anything I have ever seen. It has grown much worse in a single year. There is no doubt about it, the dealers are being frightfully over-circularized."

¶ If that is so, and of course it is, what becomes of the specious claim of "exclusive attention" made for the trade circular or prospectus? What sort of impression does the retailer get of national advertising when he sees, daily, this enormous waste of advertising effort, and compares the inflated claims of many advertisers with respect to consumer advertising with their failure to get a hearing from him, the very first milestone on the way?

¶ Multiply this waste of trade circulars by their cost, both in postage and printing, and then draw a direct comparison with the same message when put through the columns of the trade press, the standardized medium for reaching the dealer. Of course, the efficiency of the trade papers in different industries varies; but as a rule there is at least one first-class medium in each field.

¶ There are several good reasons, aside from cost, why the trade circular should not be thoughtlessly used, and why advertisements to the trade should be made preferentially in the trade press. One of the reasons is that the trade press represents an organized attention and medium of publicity, comparable to a clearing-house or public market. At a certain stage in the development of an industry or business, it comes almost automatically into existence to economize the effort and cost of doing business previously being done in an unorganized way. So far from having its publicity-power weakened by the increase in its advertising pages by the apparent increase in competition between advertisers, the very reverse is true. Because with the growth of size goes the growth of income or means of improvement, and with improvement, prestige and power. From either the retailer's, or the advertiser's point of view, this condition is ideal in that it fixes the time, the place, and, as far as possible, the character of the advertising appeal. It makes an appointment with a high percentage of the paper's readers, and if it has a real message to deliver, keeps it.

¶ Dollar for dollar, effort for effort, idea for idea, the opportunities for cashing in are much greater in the trade press than in the trade circular. Some advertisers talk of putting more ideas and more power into their trade circulars to lift them out of the ruck and give them a better chance at the retailer's attention. Why not put the same time and effort into the trade-paper copy?—Printers' Ink.

A Good Start in Repair Line

After being in the employ of the Great West Saddlery Co. of Edmonton, for over two years, George E. Girling, who has had an extensive experience in shoe repairing in the Old Country, has gone into business in his own behalf and has leased premises at 332 Kirkness street, Norwood, Edmonton. He feels that

a large opportunity for future success lies in the trade which he followed so long before he came to the Dominion. He has installed the latest machinery and hopes to get his share of the boot repair jobs from the seventy thousand people of the Capital city of Alberta. Mr. Girling carries with him in his new venture the best wishes of his late employers and the only reason of his branching out for himself is that he believes there is more money to be made by him in his own trade.

His motto is "Good Service, Good Leather, and Good Workmanship," and "the Best is the Cheapest in the End." Mr. Girling has issued some decidedly attractive and catchy literature and says that his hours of business will be from eight o'clock to six thirty and on Saturdays from eight a.m. to nine p.m., and he adds rather pointedly, "When your shoes are promised at six o'clock they will be done at six o'clock."

His schedule of prices is:

| | |
|---|--------|
| Gent's Shoes Soled and Heeled, Nailed or Sewn..... | \$1.25 |
| Gent's Shoes Soled and Heeled, Handsewn..... | 1.50 |
| Gent's Shoes, Heeled only..... | .40 |
| Gent's Shoes, Soled only, Nailed or Sewn..... | .85 |
| Gent's Shoes, Soled only, Handsewn..... | 1.10 |
| Ladies' Shoes, Soled and Heeled, Nailed or Sewn.... | 1.00 |
| Ladies' Shoes, Soled and Heeled, Handsewn..... | 1.15 |
| Ladies' Shoes, Heeled only..... | .25 |
| Ladies' Shoes, Soled only, Nailed or Sewn..... | .75 |
| Ladies' Shoes, Soled only, Handsewn..... | .90 |
| Gent's Rubber Heels..... | .50 |
| Ladies' Rubber Heels..... | .40 |
| Machine Patches..... | .15 |
| Invisible Patches..... | .25 |

The following is a copy of circular which he sent out to the residents in his locality a few days before he opened his doors. It is well worth reading by the shoe repair man as the talk is honest and straight to the point.

For some time you have been looking for a man who would repair your shoes efficiently and turn them out equal to new ones; who would get them done to time as promised (not a day after); who would give you the very best of workmanship; who would charge you a fair price in return for real good service rendered. My many years experience in the shoe business I place at your disposal and respectfully solicit a share of your patronage; a trial will prove you have found the man that will give your repairs the attention and interest you are entitled to. Did you know shoes repaired with iron rivets rust in the leather and ruin and shorten the life of your shoes? It is my intention to lengthen and preserve the life of your shoes by using brass rivets; shoes repaired with iron rivets usually bear soling once, whereas with brass rivets and careful workmanship they will bear three or four soles. This means a great saving in your shoe bill, especially where there is a family.

The leather used will be well seasoned to give the best results, and will last longer

than the usual custom of using it direct from the tanneries.

The sewn work will be done by hand or machine, whichever is desired. Satisfaction guaranteed either way.

Trusting to be favored with a trial.

Yours for Good Service,
GEO. E. GIRLING.

With One Old and One New Shoe

It pays a merchant to live up to his advertising in both letter and spirit. Doubtful tactics, sharp practices and sly subterfuges never yield any rewards.

Tell the truth and stick to it, no matter what it costs. It gives the best returns in the end. This sound principle has been laid down so many times that re-iteration seems useless and purposeless. Yet there are still some so-called "clever" things pulled off in certain establishments. The latest instance coming to light appears to have been in a shoe store in the west.

At the regular meeting of the Calgary advertising club, held a few days ago, Mr. Rankin, the chairman, related the following that a certain boot and shoe retailer in that city advertised that for eight hours on a certain day he would sell to the public any pair of boots or shoes in his establishment at half-price, and a certain citizen went there to purchase. He had been accustomed to buying his shoes at this store and though he had recently purchased a pair he thought as he could get a regular \$6.50 shoe for \$3.25, it would be worth his while to order an extra pair. He went into the merchant's and upon it being known the class of shoe he wanted, the clerk asked him for the newspaper coupon. As he did not have it, he was told that he was not eligible to purchase and so he went away and getting the coupon came back after luncheon. He was trying on the pair of shoes he wanted and had one on, laced up, and was about to put on the other, when the clerk told him that the class of shoes were not to be sold like the others at half price.

The citizen asked the clerk if the advertisement did not state that every shoe in the store would be sold at half rates, to which the clerk replied. "Well, of course, you know that we cannot let this kind of shoe go at that price," or something to that effect. The citizen then laid down \$3.25 on the counter and taking up his second old shoe which was lying beside him, he left the store with one new shoe and one old shoe on, but did not get the second shoe, as the clerk pulled it out of his reach.

This man subsequently went to the Ad club and asked their assistance. They were met with several excuses, one of which was that the eight hours' time limit had expired, another that the purchaser was abusive, etc. I asked the citizen to call upon me, and after hearing the full resume of the facts, the club's solicitor took the matter up, with the result that the merchant advised that if the citizen would call at his store the second shoe would be forthcoming.

When They Both Pull Apart

Who is it that makes a success of a certain line of shoes on the road? Is it the traveler or the manufacturer? "This has always been a debatable question," declared a shoeman the other day. "Sometimes a traveler goes out, has a good connection, builds up a line, establishes agencies for it, makes suggestions to the house which they adopt and in the end he imagines that he is "it," so to speak. He forgets that the factory has gone a long way to follow his pointers, accept his ideas and back him up in every conceivable manner. This fellow is apt to get a swelled head and if he does not look out will soon be riding for a fall. On the other hand there is such a thing as the factory flying a little too high in its own ap-

preciation of itself. Many a manufacturer thinks that he is turning out such a high class, stylish, well-made and elegant product that the goods will almost sell themselves and that a traveler is a mere order taker. He imagines that the name of the factory and the simple mention of such and such a shoe will cast a spell over the retailer and make him rush to a sample room in order to give his order before others get in ahead of him. There must be co-operation between the manufacturer and the traveler. When either one begins to think he is it, or that his service or connection is indispensable then it is time for a head with such an inflated conception to be punctured. No man is really necessary to any institution and no institution is going to be demolished owing to the removal of one lone individual. It is, therefore, important that both the manufacturer and the traveler should be able to see beyond their own orbit and recognize the law of interdependence. One of the best things in this world is perspective ability, to see things from the other chap's viewpoint occasionally. There are faults on both sides and sympathy and mutual assistance as well as mutual concessions will go a long way towards carrying a firm or its representatives over the rough stoney path of everyday trials and difficulties."

Very Useful Premium Plan

A leading Eastern shoe dealer is offering choice china dishes as premiums on purchases amounting to \$5, \$8, \$10, etc. He says in his advertisements that it is not necessary to purchase this sum all at once, but that checks may be saved. Then when added together and they bring the amount desired, the premium may be chosen. The premium plan is very simple and several illustrations are given on neatly printed literature which is sent out to a careful mailing list. A copy of the artistic announcement is also put in each parcel or carton. The proprietor writing the SHOE AND LEATHER JOURNAL says scores of his customers have been delighted with the decorative table pieces that they have secured. "Any woman prizes something nice for the table or the buffet, and I believe that I have hit upon a gift scheme both useful and ornamental. I allow all cash register tickets to count in the total sum and, of course, the larger the aggregate, the better is the premium," he adds.

Profit Sharing Plan Works Well

The annual dinner in connection with the Rossendale Shoe and Slipper Trade Managers and Foremen's Association was held in Victoria Hall, Waterfoot, England, on February 6. The event passed off very pleasantly, there being ten delegates present as representative of kindred associations in various parts of the country. The meeting was presided over by J. T. Lord, a director of Sir H. W. Trickett, Limited, and among the speakers was Oliver Eatough, who delivered a very instructive address in response to the toast of "the trade of Rossendale." He spoke of the progress that had been made during the past 25 years and added the development of the local slipper trade had been phenomenal. Today the productions from the various factories in the valley found a ready market in almost every country under the sun. Mr. Eatough went on to emphasize that if it had been possible for such a record to be accomplished in the life time of many of those present, what ought they not to expect in the coming 25 years? He urged upon the foremen and managers, as well as the manufacturers, to encourage the young people in the factories to take advantage of the training which they may receive in the technical school. He also thought that employes should improve their minds by keeping up-to-date and reading trade papers and other literature, as the responsibilities were increasing day by day, so that it was essential that they should keep abreast of the times. He

spoke of the advantage of seeking perfection as nearly as possible in their work, and in conclusion said that during the past three years, the directors of Sir H. W. Trickett, Limited, had made an experiment in the direction of profit sharing by giving a few of the principal foremen an interest in the profits and the experience had proved that in doing this, they had not only helped them but they had also helped themselves, as the interest thus created was more than made up for any profits that the firm had paid out to their various foremen. At the beginning of this year, the firm decided to further extend their profit-sharing to the rest of the foremen and under-foremen, and they looked forward to 1914 as being equal if not better than previous years. He mentioned this matter in order to throw out the suggestion that the closer the manufacturers and the foremen, as well as the work people, could get together, the greater their success would be. He trusted that the future of the industry might make in the days-to come, greater strides than had been made in the past.

A Veteran in Eastern Trade

One of the veterans of the shoe trade in the eastern provinces is Richard Roach, who resides at St. John, N.B. He has been identified with the business in various capacities for about 40 years. Few men are held in higher esteem or greater respect. In his native town of Sussex, some forty years ago, the business men and others, established a steam tannery and shoe factory. Mr. Roach was among the number and for several years the industry did quite a large, but not a paying trade. Then Mr. Roach went to Montreal and

brought the Jas. Whitman & Co.'s goods to the Maritime provinces and for eighteen years succeeded in doing a splendid business with that line. Since then, he has been with the W. B. Hamilton Shoe Co., whom he has represented for the past sixteen years. He began with this Toronto house when the late W. B. Hamilton was president. He has since continued with it under the progressive direction of W. A. Hamilton. The accompanying picture is a snapshot of Mr. Roach, as he was leaving his house with his overcoat and hat on. It was taken by his daughter.

Death Ends Honored Career

Many friends in the shoe trade from one end of Canada to the other, have learned with regret of the death of L. H. Packard, head of the firm of L. H. Packard & Co., Limited, Montreal. He began life as a cobbler, later branching out

into the manufacturing line and developed one of the largest businesses of its kind. He was a man of wide influence, strict integrity and high ideals, and throughout his career, maintained a clean and progressive record. Mr. Packard was one who would scorn to do a mean trick or an underhand act. His life was an open book and his course one in every way worthy of emulation. For some time he had not been very well and had lately been confined to the General Hospital, where an operation was necessitated. This proved to much for his weakened condition and the end came on March 6th.

The firm of L. H. Packard & Co. have long been headquarters for shoe laces, window and store fixtures, shoe polishes, infants' soft soles, etc., and the business will be continued the same as formerly. Edward Packard, brother of the late L. H. Packard, has been elected to the office of president of the firm, with whom he has been since his boyhood days. He has always been identified with L. H. Packard in the management of affairs, so that affairs will be conducted as usual. There are no other changes on the staff or in the officials.

The career of L. H. Packard reads much more like a romance in some respects than a recital of actual deeds. He was 74 years of age, and was born in Stoughton, Mass. Whenever he put his hand to the plow, there was no turning back for he was a man possessed of great energy and constancy of purpose.

Having completed his education he engaged in business with his father, but just before the Civil War broke out he went south, where he took up the lumber business. He made his way back north as the embers of that awful conflict were dying out. After a few years in Boston, where he engaged in the shoe-finding business, he came to Montreal. This was in 1874. He came on a visit, but decided to stay. He met Miss Mary Frances Joslin, the daughter of a constructing engineer then working on the Lachine Canal, whom he married. The small shoe-finding business which he started on

St. John street grew steadily. Larger premises were taken on McGill street, and a few years ago the business was re-organized and the company located in the Packard Building on St. Antoine street.

After the death of his first wife, Mr. Packard married Mary Lester, the adopted daughter of Geo. P. King, of St. Louis, Mo., who, together with three sons, survives him. The eldest of the three, Mr. Frank L. Packard, is a son by Mr. Packard's first wife. He is well known as a writer of short stories, two novels of more pretentious length also having come from his pen in the course of the last year. Mr. Mortimer L. Packard is in the Packard business, as is his younger brother, Karl G. Mr. Edward Packard, a brother, who is also in the Packard concern, and Miss Mary Packard, a sister, of Stoughton, Mass., are the only surviving relatives apart from the immediate family.

As a member of the Board of Trade and one of the executive of the Canadian Manufacturers' Association, the late L. H. Packard was well known in the business district as one who shaped his conduct through the week exactly after the ideal which he followed on the Sabbath. A man of strong convictions, to which he adhered with stern conscientiousness born of his Puritan ancestry, Mr. Packard was not the man to lose sight of the fundamentals in the observance of the incidentals of dogma.

Apart from an active business life, Mr. Packard found time to engage in much charitable and religious work. Up till the time of his death he was hon. treasurer of the Y.M. C.A., an office which he held for years, while the First Baptist Church in his death will lose one who has been a consistent and powerful supporter for forty years, and the Sunday School loses a superintendent who for over thirty years guided that important branch of the church work. It may be well said of him that he rests from his labors and his works do follow him.

Prohibit Slaughter of Calves

A bill has been introduced in the lower House at Washington by Congressman Fred Britten, of Chicago, to prohibit the killing of and interstate shipment of any calf under the age of two years. According to the Congressman, the emergency is great and the American public is face to face with a condition of meat famine that is not merely producing prohibitive prices, but which threatens a lack of meat at almost any price. He asserts that the number of calves slaughtered in the last ten years has increased 100 per cent., and that statistics for 1911 show that 8,000,000 calves were killed in that year. If these 8,000,000 calves had been allowed to live for two years or more, he adds, they might have been turned into more than 11,000,000 pounds of beef, estimating that each grown steer would produce about 1,400 pounds. Again calling figures to the aid of his contention, Congressman Britten says.—“In the last six years there has been a decline of more than 30 per cent. in the number of beef cattle in this country, while the population and consequent demand for beef has largely increased. Argentina and other South American countries are now shipping large quantities of beef into the United States. They have plenty of cattle for sale, for the killing of calves is prohibited there by law. There were 51,000,000 head of beef cattle in this country at the beginning of 1907, while at the beginning of the present year there were but 36,000,000. It is easy to see the effect the enormous slaughter of calves has upon the beef industry of the United States.”

John Ritchie, of the John Ritchie Co., Quebec, and wife, who have been spending a few weeks in Atlantic City and New York, have returned home.

How to Install a Nice Easter Shoe Window

Simple Easter Window Which is Quiet and Effective

To make the egg secure about two boards of smooth white lumber about $\frac{1}{2}$ inch thick and 14 inches wide. Lay these on a table or on the floor and draw the shape of a large egg on these. When this is done cut out with small saw, fasten together at the back with too small strips of wood. When this is completed, cover the egg shape with white felt, and with a black crayon draw the head of the rabbit and show the effect of the broken egg. This you will find will be easy. It would be better to sketch the whole thing with an ordinary pencil first.

Get a board the length of the window and about 9 inches wide, and cover with Royal purple felt. Draw the small

doves on white felt and cut them out and paste them on the strip of purple felt across the window; also fasten the egg on this cross piece. Fasten Easter lilies around the egg as in the sketch; also group some in the corners.

Cover the floor of the window with white crepe paper, or if you wish to spend a little more on the window, use nice white felt. A small show card should be used and not too many shoes displayed.

* * *

Spring Display for City Dealer Suitable to Use Anytime

First of all try your skill at painting a canvas representing an open country scene to be placed at the back of the window. This can be easily done with fixed colors and the trimmer does not require to be an artist to do so either. This will give him a good chance to see that it does not.

When this is completed make the pillars and fence out of soft wood. Compo board would be very nice to make the pillars, as it is light and holds together well. If lumber is used it should be about 5-8 of an inch thick.

When the boards for the pillars are cut put them together; then cut the lumber for the fence. This should be solid. The small piece of lattice work should be made of small strips about an inch wide and $\frac{1}{2}$ inch thick. When the pillars are made, and the pieces for the fence already cut, cover the pillars with the palest shade of green felt that you can find. Cover also each piece for the fence smoothly, and when this is done put the fence together. The right hand pillar should have a small piece on which could be hung a small paper mache flower basket, which should be filled with artificial spring flowers.

The chain for the gate should be gilded and suspended

loosely from a hook on each pillar. The small section of lattice work should be painted a pale buff color.

The floor of the window should be covered with pale buff or pale fawn felt. Just enough shoes should be used to make the whole thing attractive. Overcrowding a display of this kind would absolutely spoil it.

A neat show card in color and style to go with the display should be used.

Artificial spring flowers should also be used on the fence and pillars.

* * *

An Effective Idea for a Horse Show Window

Make the pillars at each end out of soft wood and cover with white felt.

The large horse shoe in the centre should be made of wire and covered with tissue paper in the color used by the local horse show. Each city usually has its own colors. If this horse shoe cannot be made of wire, cut some out of lumber and cover with felt.

Whips and stirrups can be borrowed from a harness dealer in your town. They are usually willing to do this if

a small card bearing their name appears in the window.

The pedestal or halter for the horse show should be made of wood and covered with felt, tissue paper, or crepe paper in colors suitable for the show.

The two small horse shoes on the box at the bottom of

each pillar should be real horse shoes and gilded. A few more could be used on the floor of the windows. You will find that a blacksmith will be willing to lend these, as the gilt will not injure them. The bottom of the window should be covered with felt of suitable color or crepe paper. The show card should be placed in the centre of the horse shoe and should have something to say about the styles of the Horse Show. Artificial flowers suitable for the season should be used on the pillars and around the frame of the window.

Arctic Not Made First in Canada

The question of who invented the Arctic overshoe is one that is still unsettled. The SHOE AND LEATHER JOURNAL has interviewed a number of representatives of the early days of the rubber footwear trade in Canada but is unable to establish the statement made by a recent correspondent in the "Shoeman" that the Arctic overshoe was first made in Canada and that it was the invention of a British officer. J. O. Gravel, formerly of the Canadian Rubber Co., Montreal, says that the Arctic was not invented in Canada, but that the felt boot was first made in this country. He stated that the Arctic was manufactured first in the United States but he could not tell by what firm. But the term "felt boot," he said he meant the felt overshoe. Both products were made long before 1883 which is the date that Lord Lorne, then Governor General of Canada, is alleged to have bought a pair in Richmond, Que., while there on a visit. Mr. Gravel further pointed out that the felt overshoe was very welcome in Canada in the early days on account of the long, steady cold climate, but was useless in many parts of the United States owing to the mild, slushy weather—hence the Arctic which had rubber lining to keep out the water was invented, but the Dominion had no share in originating the latter so far as Mr. Gravel and others connected with the trade for many years can ascertain.

Canadians Will Exhibit at Fair

W. D. Bennett, of Boston, vice-president of the Jacobsen Publishing Co., is manager of the American Shoe and Leather Fair and has been visiting Quebec, Montreal, Toronto and other Canadian cities during the past ten days. Mr. Bennett is extending a general invitation to the Canadian trade to visit the big Shoe and Leather Fair in Boston which will be held in the Mechanics Building for one week, July 8th to 15th. There will be a special Canadian Day. The Shoe and Leather Journal will have space at the Fair as usual and invites guests from Canada and Great Britain to visit their space, which is No. 38, headquarters. Owing to the changes in the American tariff there will no doubt be a large attendance from Canada this year. There will be a gathering of shoe factory superintendents and foremen at the Fair and a get-together meeting of the National Shoe Retailers' Association. The National Leather and Findings Association which will hold a convention in New York the first week in July will also visit the Fair in large numbers. The big Fair in Boston offers Canadian tanners a splendid opportunity to meet American buyers and show their products. Arrangements for a special Canadian section are already under way and it is safe to say that those who exhibit their products will do justice to Canadian trade.

Can This Be Childless Town

A retailer in Minnesota has a novel scheme:

"He has wired his store lights to a push button switch located at the entrance of his store and placed underneath the switch a sign which reads: "Push this button and see

our store." Passersby in the evening are attracted to the show window, and, observing the odd sign, comply with its request, when the entire establishment is brilliantly illuminated. All this happens, of course, after the store has been closed at night. The switch is of a type that releases as soon as the pressure is removed from the button, and consequently only a small amount of current is consumed. Persons who have seen the result of the contrivance have mentioned it to their friends and brought them to witness the scene. The amount of oral advertising received has been very extensive."

This is surely a cheap and practical way to make talk about a store. The only drawback is that it can, of course, only be worked in localities where there are no children, such as this town in Minnesota evidently is, says an exchange.

Elected Alderman in Quebec

V. Garant, formerly the firm of Goulet & Garant, now Gagnon & Garant, was elected alderman by acclamation for Jauques Cartier Ward, No. 1 seat. He will ably represent the interests of the manufacturers in general. After twenty years in shoe manufacturing Mr. Garant retired to start a new industry in the name of Gagnon & Garant, which is growing very rapidly. Last year they won the gold medal at the Exposition in Quebec. Their specialty is making syrups for which there is a great demand in the province. They expect this year to make about five thousand barrels.

Mr. Garant is the father of Alfred Garant, of Dupere & Garant. He was born in St. Marie, Beauce County, sixty-one years ago. He spent five years in St. Paul, Minn., as a bookkeeper, then came to Quebec and took charge of the office of J. B. Laliberti, fur dealer, for eighteen years.

Big hats, high-heeled shoes and tight-laced corsets—in fact, all the latest Parisian styles—were worn by the women of Crete four thousand years ago. Diaphanous dresses were just as popular as they are to-day. Hairdressing got much attention and there were curls and ringlets galore. Gilbert H. Grosvenor, director of the National Geographic Society, has just received this startling information in a letter from the Rev. James Baikie, who has been exploiting the island of Crete, in the Aegean Sea, ceded to Greece by Turkey at the conclusion of the recent Balkan war.

What They Want to See Enforced

Among the most important resolutions passed by the National Boot and Shoe Manufacturers' Association held recently in New York, which are of interest to the trade in Canada are the following:—

That it is the sentiment of the National Boot and Shoe Manufacturers' Association that all leathers sold by the foot be measured in fractions of one-eighth and that no leather be trimmed after the same has been measured.

That the National Boot and Shoe Manufacturers' Association, in convention assembled, approves the object and purpose of H. R. Bill 11,016, introduced in Congress by Hon. A. S. Kreider, to prohibit fraud upon the public by making or disseminating false statements or assertions concerning any merchandise, commodities, securities or service, and providing penalties for the violation thereof.

That this association adopt standard (outside measurements) for cartons, as follows:

| | Length | Width | Depth |
|------------------|--------|-------|-------|
| Men's | 12¾ | 6½ | 4⅛ |
| Boys' | 11¾ | 6 | 3¾ |
| Youths' | 10½ | 5¼ | 3½ |
| Women's | 11½ | 5¼ | 3½ |
| Misses' | 10½ | 4¾ | 3⅛ |
| Children's | 8¾ | 4½ | 2¾ |

Edge Setting on Repaired Shoes

The edges on repaired shoes have much to do with the appearance of them. It used to be customary to half-sole a shoe, and after putting a little blacking on the edge and then rubbing with a hot iron, let them go out. This plan had much to do with keeping some people from having their shoes resoled. We all have heard people say: "It is always possible to tell a re-soled shoe, even if it is on the foot." Whenever I hear that remark I think there should be added: "If they were not repaired right." To repair a pair of shoes right the edge should be re-set as near like a new pair as possible. Of course, this cannot be done unless the charges are sufficient. To see a repair shop advertise "soles to heel sewed for 75 cents" always impresses me that such a shop will not help to popularize shoe repairing. If, however, the price is sufficient to cover having it done right and a person is given his money's worth, it does not show repaired work while on the feet.

There are machines made now for repair shops so that the new sole can be edge-trimmed and edge-set properly. There are mighty few towns where there is not electricity to be had to run such machines. The lack of power, however, is not an excuse for not finishing edges. It can be done by hand if necessary.

It used to be the custom that only the poorer people had shoes resoled. They were taken to the corner cobbler. Now many good dressers have new soles put on. They, however, take them to the up-to-date repair man. He may not use any better material and still he gets more money for the work. The secret is that he finishes the edge and thereby leaves this sign off the shoes: "THESE ARE RE-SOLED SHOES.—The Shoe Repairer.

Getting New Repair Customers

It has been suggested that a system successfully tried out in other lines be applied to the shoe repairing trade. The plan would work out as follows:

When the repairer gives the customer a tag for his shoes, let him give a tag divided by perforations into about four tickets having the same number and the repairer's name,

address and statement that on presentation of the ticket the repairer will give the person presenting it a discount of perhaps ten per cent.

These tickets are to be given by the customer to his friends, enabling them to secure a great reduction on their repair work and securing a new customer for the repairer. The man who gives away the tickets will for his trouble receive credit at the repairer's as each ticket is presented that will secure him a ten per cent. reduction on his own repair work. So the plan will work for the mutual benefit of all. The coupons also offer an opportunity for the repairer to advertise, as he can print his name and business on the back of each. Such coupons can be secured of any large tag or paper concern.

Giving Pay Envelopes to Firms

The Tom Stedman Shoe Co., of Winnipeg, is always launching some bright advertising scheme. In the last issue of the SHOE AND LEATHER JOURNAL there was mentioned a plan whereby the parents of each child born in Winnipeg were sent a pair of first size bootees, together with a neat greeting card. Now Mr. Stedman is sending out a note to all the manufacturers and large wholesale houses in Winnipeg which reads as follows:

Dear Sir:

How would you like us to send you along some pay envelopes similar to the one enclosed, for use in paying your employees on pay day? All employers of labor nowadays find them useful and effective in stimulating order and system in payment of their employees.

The men like it too. Just let us send you the number that will carry you along for a while. Merely jot down on this letter the average number of employees and the estimated quantity needed and mail us to-day. Act now and we will be glad to let you have them.

Then appears a blank for the average number of employees and the number of envelopes needed.

The envelope which is the shape of an ordinary pay envelope, has on it the following reading matter:

No..... \$.....
Name.....

Our shoes were made by the Men who put the "wear" in footwear. There's almost double service in our Working Men's Shoes, \$1.50, \$2, \$2.50, \$3, \$3.50.

Wears best. Costs least. For the whole Family.

THE STEDMAN SHOE CO.
Big Popular Price Shoe Store

New Location 296 Portage Ave. Winnipeg
Somerset Block

A Valuable Book for the Trade

The eleventh edition of the American Shoemaking Directory of shoe manufacturers, for 1914, has been issued by Rogers & Atwood Publishing Co., 683 Atlantic avenue, Boston, Mass. This little "red book," which contains 232 pages, and easily fits the vest pocket, is very neatly gotten up and contains a complete list of the shoe manufacturers in Canada and the United States, the location, lines of shoes made, average daily output, names of superintendents, buyers and others. It is a very convenient and reliable reference.

FROM AN ISSUE OF TWENTY-SIX YEARS AGO

Trade Activities in the Eighties

R. Simpson, dry goods merchant, Toronto, is adding a boot and shoe department to his establishment. The new store fronting on Queen Street, and connecting with the Yonge Street Store, will be devoted to this purpose. (Mr. Simpson died some years ago, and was succeeded by the Robert Simpson Co. Limited, whose shoe department to-day, is many times larger than the little affair commenced in 1888).

"Domenico Michieli, Doge of Venice, took Jerusalem from the Saracens in 1124 A.D. Finding himself short of money he ordered a large number of pieces of leather to be stamped with the pommel of his sword on which his name and coat of arms were engraved, adding the number of gold coins each was intended to represent. The money lenders advanced funds on these and they were afterwards fully redeemed at Venice."

At a meeting of shoemakers held in Berlin, Germany, a resolution was passed declaring that India rubber shoes are absolutely injurious to health. (They saw the ghost coming).

* * *

There is a pretty style of Oxford shoes for women's wear that is suitable for use in the home at this season. The shoes are low cut, made of goat or fine calf, laced up in front. The tongue made of goring, is attached to the shoe at each side, and the lacing is of elastic so that the shoe can be donned or doffed without lacing. This style in patent leather is fashionable for dress occasions. (Who made it?).

The Canadian Rubber Company of Montreal, have applied for authority to increase their capital stock from \$1,000,000 to \$2,000,000. At the annual meeting the following were elected directors: Andrew Allen, James Benning, W. Withall, H. McClennan, H. M. Allen, H. A. Allen, H. Prevost, Francis Scholes and J. B. Learmont. Mr. Andrew Allen was elected president, Mr. Jas. Benning, vice-president, Mr. J. O. Gravel, secretary-treasurer, and Mr. J. J. McGill, manager. (It is interesting to note the number of the above names that will not today be found connected with the footwear rubber trade in Canada. Mr. J. J. McGill is practically the only one).

* * *

Felix Gourdeau of Quebec, is in Ottawa interviewing the government in reference to the duty on raw goatskins, which has recently been increased five per cent. (Mr. Gourdeau was a well known figure in the leather and shoe trades of Quebec twenty to thirty years ago).

* * *

J. S. Langlois, recently engaged in the retail trade in Quebec, is entering into partnership with his cousin who has until now held the position of foreman of the heeling department at J. H. Botterell & Co.

* * *

Geo. H. Rogers & Co. have sold out the balance of their stock of dry goods at their store in the corner of Main and

McWilliam Streets, Winnipeg, to J. E. McCrossan & Co. Rogers & Co. will give more attention in future to their boot and shoe business.

* * *

It was in March, 1888, in that the writer made his first acquaintance with the Ancient Capital, Quebec, and its galaxy of "shoe makers." John Ritchie and his pipe were the same inseparables as today and it is little wonder that the warm welcome given by this large hearted and level headed Nestor of the shoe trade to the SHOE AND LEATHER JOURNAL, made for Quebec a warm spot in the affections of its youthful editor.

Wm. A. Marsh had but recently severed his connection with W. H. Polley, and both had set up establishments of their own on opposite sides of St. Valier Street. Marsh still tells with a twinkle in his eye of his partner's reasons for dissolving and at the time Polley made no bones of saying he was "tired making money for a bookkeeper." Mr. Polley was the practical man in the concern of Marsh and Polley. Mr. Marsh having graduated from the retail trade.

Cote Abraham in Quebec will always awaken interesting memories. It was down this celebrated hill that the writer wandered on the first misty morning of his sojourn in the rock girt city. Mustering his best French he addressed a laborer who was working on the icy road with a "pick," asking him the way to St. Valier Street. Taking a short clay pipe from his mouth the "native" said in the broadest Hibernian accent, "Av yez turrrn to the roight at the fut ov the hill, yez will be on St. Vallyer Street," and went on with his job. Later in the day the hill was traversed upwards in company with Mr. Marsh, in his jaunty little sleigh.

One of the very first and most lasting acquaintances made in Quebec at this time was that of the late J. H. Botterell, who had just returned from a trip to Mediterranean ports, and more particularly Northern Africa. He was rather amused at the attempt to start a shoe trade paper in Canada, and had doubts as to the support it would get. He was a broad intelligent man, however, who appreciated the venture-ness of such a proposition and gave his kindly endorsement. Henry Griffith was called upon just before the noon hour, and the whistle went as the genial Harry was relating one of his notable jokes. He suddenly rushed out into the street and in a second was in the midst of as pretty a "scrap" as one could wish to see, knocking men to the right and left. When he returned all out of breath, he explained that some men had been attempting to get two boys to fight on the street and he was so incensed that he couldn't keep his hands off the blackguards. At any rate he knocked the louts right and left and the whole crowd ran like a flock of sheep. Harry Griffith dropped out of the shoe trade some years ago, going out west and has since passed to the beyond.

Time would fail to tell of the kindness shown by many others of the trade at this time. We have already referred to many of the old names that will ever be associated with shoe making in Quebec, and may have occasion to refer to these later.

James Acton

New Features in Snappy Fall Styles

(Continued from Page 36)

shapes, with slip soles for fall and winter wear. Low heels continue popular, and some lines boast of almost nothing in the way of a heel. Manufacturers of boys' shoes realize the necessity of a strong durable shoe, and many of them think they have lines this season that will resist the most

strenuous wear. Button shoes have caught on with the juniors and quite a demand is being displayed for them in footwear for growing boys and girls.

Gunmetal calf with cloth tops, it is expected, will prove popular this season with girls and misses. Practically the same call is being made now for this type, as is seen in women's

MEN'S MAHOGANY TAN BAL., LONG RECEDING TOE, LOW HEEL, FLAT TREAD—BY EAGLE SHOE CO.

goods. Cloth and fabric tops are becoming more and more in vogue among misses and girls, some styles being shown with tops of whipcord, buck, etc. Tops to match a suit are also very popular for misses and girls, and will be among the big sellers during the coming season.

Finer grade leathers will experience a large call, and many lines are being shown in white and fawn colored nubuck.

After fully summing up the 1914 fall styles, one must confess that very much the same lines as last year will re-

WOMAN'S PATENT OXFORD, BLIND EYELETS, MODERATE RECEDING TOE—BY WALKER-PARKER CO.

ceive the call. Unlike the summer season, retailers and buyers do not look for any startling changes, but rather expect the more noticeable effects to be brought out in the spring showings, when manufacturers exhaust all their ingenuity, and new shapes of lasts, with as many patterns as can be produced for discriminating purchasers are offered. During the past few seasons this has become more and more noticeable, until today, shoe styles have become almost standardized, particularly fall and winter goods.

The Rebhun Last Co., Cincinnati, Ohio, in regard to styles for the coming fall season say: "the tendency is strong for the medium wide stage toe, also a demand for the French toe, both to carry 16/8 to 18/8 inch heels. The recede toes are going to be shown in all heights of heels from 11/8 to 16/8."

One last maker says: "Most people give too much thought to the width of the toes of their shoes, and too little to the length. Let the toes be long and the width will take care of itself. A chief cause of trouble with feet to-day is

that people get their shoes so short that the toes are cramped in length. They do not have room to move back and forth as they should when a person walks. Let the shoes be even an inch longer than the foot, and they'll fit comfortably, and they may be narrow, without harming the foot."

Men's Styles Are Defined

The style outlook as forecasted by the Woodard & Wright Last Co., of Campbello, Mass., is interesting. They say fall style tendencies in men's footwear are now quite clearly defined, which cannot be truthfully said of women's styles. Taking the men's outlook first, a little review at this time is not unwise.

The style possibilities of high toes were by no means exhausted when this particular type began to wane. The high toe, unlike the old needle toe, had not run its race and died a natural death. Its untimely departure was due principally to acute exaggeration. Instead of developing further and newer ideas within a well established field, that still offered abundant opportunities, designers, in their anxiety

The so-called French toes, square ended and with size and a quarter to two size extension, will probably make only a limited impression, manufacturers having adopted them sparingly as a sort of necessary evil and retailers are not enthusing wildly over them.

We have a very pleasing modification of this type with square toe effect, but with corners rounded, straight in draft, with rather high side ridges, which gracefully fall away and disappear. This style carried an inch heel and has a little spring.

Fuller and Rounder Toes

The long, pronounced, receding toe always featured in the limited field of highest grades, is losing caste and toes fuller at the end and rounding over at the top are pace-making in the ultra class. A distinctly new type which we have produced exclusively for fall, is a thick toe with no suggestion of hills, valleys or ridges, but with graceful lines, a suggestion of swing and medium in width for a 9-8 heel. This toe, while plain, is appealing in its absolute newness and grace. Little

WOMAN'S PATENT LEATHER BUTTON, BROCADED QUARTERS, MEDIUM LONG RECEDING TOE, SPOOL HEEL—BY KINGSBURY CO.

to produce sensational rather than enduring results, defected themselves, and high toes became mountainous and unsightly. From a last maker's standpoint there is a grain of consolation in the well grounded possibility that designers will return eventually to the high toe field and with the liberal use of conservatism and refinement, develop a new line of thoroughly artistic, attractive and practical toes.

Too Radical a Departure

With the recent decline of high toes came lower heels and wider shanks. Some last makers, more foolhardy than discreet, jeopardized their reputation by enthusiastically exploiting too radical departures. The transition from an extremely high toe, narrow shank, one and one half inch heel to a flat custom toe, wide square shank and inch heel, was far too great to negotiate by a single step.

Permanent style changes in footwear—unlike some other wearing apparel—must be pronounced enough to be conspicuous, yet not too radical to be practical. Styles for the time being at least have been crystalized but not entirely revolutionized. As the old high toe was the biggest seller (except in the very limited highest grades) so today is the modified high toe, carrying 9-8 or 10-8 heel, with not too wide a shank, the leading feature.

activity is noted in the orthopedic or freak lines, these types remaining about as they were a season ago.

Combination lasts, that is, those with combination measurements, are gaining favor every day and wise manufacturers are keeping their ears to the ground regarding same.

The over-whelming increase in rubber soled oxfords is spreading to rubber soled high shoes, and wearers are demanding stylish toes in this line, rather than the old fashioned extra wide, too flat outing lasts here-to-fore acceptable.

In the Latin American countries the new "Insurrecto" a striking combination of native measurements and Brockton style is meeting with gratifying results.

The Variance in Women's Toes

To forecast women's styles with any degree of accuracy is indeed a most perplexing problem. Authorities and experts are distinctly at variance in their opinion.

Short foreparts with medium high, rounded toes are still selling freely in the West and South and apparently will go for several seasons.

In the North and East long drawn out foreparts have in many instances been over-done in extension. Longer foreparts with narrowed toes and extension of a size or size and one quarter are firmly established and admit of many really

beautiful designs. It is a strictly feminine type and when toes are not too narrow is thoroughly practical.

Owing to the un-diminishing Tango craze, square toes are more conspicuous in women's than men's lines. One of the extreme models is three-quarters of a size under and carries three and one half heel.

The Leather Situation

The leather market continues firm with moderate business. There is a tendency toward higher prices, and thrifty buyers are getting supplies as they can, before they will be called on to pay more.

Sole leathers are strong, and as hides are commanding good prices, advances may be expected at any time. All tannages are held at high prices.

The same tendency to advance is seen in upper stock, and as the supply on hand in tanners' and dealers' stocks is not large, any increase in demand for leather may send prices up.

A marked shortage of calf leather exists and shoe manu-

facturers find it difficult to get the necessary supplies in desirable quality, and as they need. The demand for Russia finish is steady, and manufacturers of women's boots have been increasing their purchases.

Patent leather, both chrome tanned sides and patent colt, is in steady demand, going to the manufacturers of women's goods. There is also a steady demand for the men's trade.

Rough leather continues firm in price, with a steady demand for the better grades. Other grades and rough splits are as rapidly absorbed for various uses.

Big Season For Turns

Turns will be popular next season in women's shoes and a number of leading firms are showing this variety of footwear in 8, 9, 10 and 11 gauge soles. Some of the samples seen are exceptionally attractive and evidence very skilled shoemaking. Among the most popular colors for men are the nut brown and mahogany tans, which are expected to take very well for fall. Bals are particularly strong and

WOMAN'S PATENT BUTTON, TURN, SHEPHERD'S PLAID, SILK LINED, RECEDING TOE, KIDNEY HEEL—BY GETTY & SCOTT

blind eyelets seem to meet with a large measure of favor, for, many men's shoes have no hooks on them whatever. In women's lines patent is by all means the leading leather and has never become quite as strong as this season. In combination with brocade and various fabrics it makes a very pleasing offering.

Button boots are still the reigning favorites, many of them having the new heels, such as the kidney, Cuban-Louis, spool and other up-to-date pedestals. A number of buttons are cut a little higher than last season, but contain fewer buttons,—some of the highest class offerings having only ten or eleven buttons. Satin calf is a new leather seen in a number of shoes for women, while on men's shoes, particularly dancing shoes, the new Juniper sole leather is witnessed. It is flexible and guaranteed not to slip.

What Leading Firms Say

The Hartt Boot and Shoe Co., of Fredericton, N.B., are right to the forefront as usual in splendid offerings. They have added for fall three new lasts—two men's and one boys', and they believe that the line of samples which they are showing for fall, 1914, to be the strongest layout that they have ever produced. The Hartt Co. think the demand in tans particularly will run strong to darker shades of leather in some sections of Canada than has been the case for the last season or two, whereas they believe in other sections the demand for tans will still be for the same light shades that have prevailed during the past one or two seasons. Patent and black leathers the firm think will sell stronger than they have during the past season.

Smardon Shoes for fall, 1914, samples of which are now being shown, are a most complete array of modern footwear for women. Added to their already extensive list of lasts are several new ones, which are decidedly correct. In the new lasts shown the tendency is towards the longer and narrower toes with recede. There are many very new and attractive styles being displayed in cloth and vesting effects which are very pleasing. The Smardon Shoe Co. of Montreal are also offering an extensive line of evening slippers from the ordinary one strap slipper to the most modern creation for dress occasions.

The John Ritchie Co., Quebec, say that at the present time patents and gun metals are by far the largest sellers, with cloth tops in good demand. The city trade is going more in for the recede toe, but the middle high toe is selling well in the country districts. Tans as far as the women's are concerned seem to be falling off entirely, though the firm think that the new shades in Mahogany and Nut Brown will probably have a fair sale.

The Brandon Shoe Co. of Brantford, have added several new lasts, some of the receding toe type, and others of the moderate recede which have proved so popular. Speaking of style tendencies the firm say that they believe fabric tops for men are going to sell strongly and that the demand for patent leather and the nut brown Russia calf will be exceptionally heavy, while requests for the lighter shades of tan calf will not be as pronounced as they have been for the past two or three seasons. They believe the custom effect, or as some call it, the English effect, is continually gaining ground, although the high toe has died hard, particularly with the young men who love something distinctive."

The Solid Leather Shoe Co. of Preston, report that they are putting in six new lasts and intend to make nothing but women's McKays of which they consider they have a good strong line. Medium high toes are good sellers and the firm are selling some medium receding toes with not too short a vamp.

Gourlay & Fogelberg, Limited, of Berlin, Ont., expect to be in their factory and running full blast by the end of next week. Their new shop is well laid out, admirably lighted and will enable the firm to greatly increase their capacity. They believe that the coming season will show a decided im-

provement over business of last year. They manufacture women's high grade McKays and think that tan shoes and those of light colors are going to predominate during the coming season.

A Few of the Latest Ideas

The Hurlbut Co. Limited, of Preston, say that at the present time for spring and fall they are featuring strongly the new right and left so-cosy last. They are glad to say that they have been selling a large quantity of shoes on this last, which they consider the best. In the soft soles the standard shades are prevailing. In the Hurlbut welt cushion insole shoe the firm have been selling a great many white nu-buck, blucher and strap. The dominating lines in the staples are patent, with dull tops, gun metal, and tan.

Minister, Myles Shoe Co., Toronto, are showing some decidedly new things for fall, having put in a number of new lasts for both men and women. In men's, the golf cut Bal appears to be popular and the custom last is seen on a number of the offerings. One particularly pleasing last has a long vamp, drop toe, with square corner effect, something after the "duck bill" variety. It is a particularly good fitter and is one of the newest of the season. Some nice bals are seen in mahogany, tan and nut brown calf. A number of rubber soled lines are shown in both men's and women's. Both long and short vamp receding toes are displayed in women's, some with cravenette tops and others with whole quarters of cloth and brocade. A new satin calf shoe with a medium recede toe is expected to be a popular seller. Other lines have Scotch plaid and shepherd's tops. A fine range of turns is seen and many of the offerings carry Cuban and spool heels. A man's patent leather pump, with "Juniper" sole, is one of the newest things. A five hole patent leather Tango, with Louis wood heel, is also another of the new creations for fall, which this firm are offering.

A Representative Offering

The Eagle Shoe Co., Montreal, have their usual number of new lasts and among their samples this season, some very attractive shoes and styles are shown. In leathers they expect to have a strong call for gun metal, black willows, patent colt and an especially strong call for dark tan Russia. They have put in five new lasts in the men's lines and three in women's, among which are included their No. 12, a medium high toe shoe, No. 59 a long recede toe, and No. 10 a modified freak. They have taken good orders already from local merchants for all of these lines and expect them to go well during the coming season. A noticeable feature of the Eagle lines this year is that a great many of them carry lower heels than last season, their Cuban heels being made 11-8 in place of 12-8, and in some cases 14-8. The low square heels will also be 1-8 lower. Many heavy "wet proof" shoes will be shown including one made with a full rubber interslip with English Blizzard uppers and will be as waterproof as a shoe can possibly be made. Medium high toes they expect will be their strong line again this year, and in women's, the long round toe will prevail. Some very neat cloth tops are being shown, but they state that they do not go in for fancy fabrics, as their trade demands only quiet sensible colors. Several samples are shown carrying the "duck bill" effect, but it is not expected that any great demand will be evinced for this type. The English custom shoe or London toe as it is better known, is one of the best looking lines the Eagle Shoe Co. carry, and they expect the same large demand for it as it had during 1913. The Eagle Shoe staff of travelers will start out on their fall tour about the 1st of April.

The Rena Footwear Co., Montreal, have added several new lines to their fall samples, and are showing a number of new McKay lasts. One line which they expect to sell

(Continued on page 66)

Good Card Writer Can Command a Splendid Position

The Outlining With a Pen is Easiest for a Beginner—Young Men Waste Enough Time to Learn Card Writing Two or Three Times Over—Practice in Odd Moments Will be Well Rewarded—Master Each Detail Thoroughly

By R. T. D. EDWARDS, with The Robert Simpson Company, Limited, Toronto

Have you ever had a chance to take a position which was a great deal better than that which you already had, and because of the lack of proper training had to refuse it.

Many times within the last few years the writer has had young window trimmers and clerks come to him asking to be taught card writing in a hurry, since a better position awaited them if they only could write show cards. They are willing to pay well if they could be taught in a hurry. They had wasted enough time to learn card writing two and three times over, but all at once they realized what it meant to them to be able to write a show card, but when it was explained to them that it takes months of faithful practice to become proficient enough to write even the plainest price cards properly, they would get "cold feet" as it were, and

The alphabets are self-explanatory. The arrows indicate the direction in which to draw the pen to make the strokes. Where there is a mark across a curved line it indicates the

— Upper and Lower Case Pen Outline Alphabets —

fall back into the same old rut. Chance after chance would come to them but would find them as before, and consequently many good positions would be lost.

One or two cases have come to notice where a person has, with a considerable degree of success, bluffed at card writing. Necessarily, it requires a great deal of nerve on the part of the individual and also a great deal of oversight on the part of his employer. But it would not be advisable for any one to adopt this method, because most people have a fairly good idea of what constitutes a good show card. The method taught in these columns is the most simple and inexpensive possible. Practically all that is required of any one is good hard practice and the use of a reasonable amount of gray matter.

Outlining Easiest for Beginners

As stated last month, the outlining with the pen is the easiest for a beginner. It gets one accustomed to the formation of the letters and figures without the worry of having to master the manipulation of a brush. Another good point in connection with pen outlining is that all alphabets can be made successfully by this method. The upper and lower case alphabets illustrated this month go well with the numerals that were illustrated last month. The two should be used on the same card where wording and price are used. This type is excellent for all round use. It can be used on a small, neat card, or it can be used on a large card which is intended to be seen from a long distance.

beginning and ending of the stroke. Watch these two things carefully if you wish to get along quickly. Use the steel pen mentioned last month or a No. 2½ Soenneken pen nib is also good for this work. The use of a brass ink retainer will be an aid with this pen. Care should be taken to keep the pen nibs clean, if the best results are desired.

Could Utilize Spare Moments

There are many employers who, if they saw their employes were really anxious to take up card writing, would let them utilize spare moments for practice work, especially when they realize how beneficial the work of such employes will be to them when they can make a presentable card. The one idea to bear in mind is that after instructions have been read, they should be practised. Too much practice cannot be indulged in, that is, if it is being done in the

right way. The best plan is to start with the letter "A" and not to quit until it has been mastered and then go on to the next letter, so that when a card is attempted there is a perfect confidence that any letter can be made that the wording might demand without having to refer to a chart. The best practice one can have is to do the cards for the store. There is something about it that makes one put forth his best efforts, perhaps because of the fact that they will be staring at the writer at all times and faults will be very much in evidence. Use cheap coated cardboard to practice on. Rule light guide lines about two inches apart. Sketch the outline properly in pencil before starting with pen work, and practice long, clean strokes, not lifting the pen until the stroke is completed.

The footwear cards which are here illustrated show a conventional drawing of a tree that is popular for use in Easter decorations. The card is of light brown and the lettering is a modified Roman shade with white.

Rubber Orders Coming in Nicely

The various rubber companies are now in the thick of the rubber selling season and report that business is coming in very well. All the Independent companies and the Consolidated state that placing trade is fully up to last year, while sorting has been very good during the past month. The Independent companies are offering a discount of 10 per cent. for early placing while the Consolidated Co. are selling their lines at net prices. All firms are pushing hard for business and expect that the orders placed for rubber footwear this year will be fully equal to those of previous seasons. While trade in leather shoes has been rather dull and factories have not been at all rushed, owing to the heavy snow and wet weather during the past winter season, the sale of rubber footgear has been pretty fair, taking it as a whole. Retailers who, a few weeks ago, declared they would never give another placing order in rubbers, find that their stocks have been lowered more than they expected and when travelers have called, these dealers have been in quite an amiable frame of mind and realize the benefits of early placing, not only as a protection to themselves, but in order to secure the delivery of their goods when wanted.

Trend of Styles in Big Cities

Messrs. Harold and Fred Blachford of the Blachford Shoe Store, Yonge Street, returned last week from an extended business trip to New York, Boston, Baltimore, Philadelphia, Washington, Rochester, Buffalo, Montreal, Ottawa, and other cities where they visited all the leading shoe establishments and many factories in search of style pointers and the chief offerings during the coming season. They report that there is no distinct outstanding feature in either men's or women's shoes at the present time. There seems a tendency, however, that in the cities the coming season will be a black and white one, and there are some predictions that tans will again come into favor with women. Many shoes with long pointed toes, no tips, cloth and brocade quarters are seen. A number of them have the spool and kidney heel. There is also witnessed several combinations of leathers including fawn and patent in women's and tan and patent in men's. A number of lace overgaiters are seen. These are being worn over cloth tops and also black shoes giving a pleasing black and white effect. It would appear as if the tendency on the part of many exclusive stores is to show shoes of shorter vamp, the extreme now having been reached in long vamps. In men's shoes in the high class trade the custom last with low receding toe, wide shank, blind eyelets and flat tread with slight swing is leading. The general

opinion among the larger dealers is that there has not been a period in a long time when so few really new or distinctive effects in men's and women's footgear has been displayed and the present styles and combinations seem rather transitory. White silk stockings are shown in a large number of stores and are worn with patent Oxfords and Colonials. White footwear still possesses a large measure of popularity but not to the same extent as when the "white wave" swept the country a few seasons ago.

Newsy Jottings From Quebec

Delphis Despatis has taken charge of the cutting room department of the Rock Shoe Co.

C. E. McKeen, of the C. E. McKeen Co., who was in Quebec for three weeks, has left for Vancouver.

J. C. Leclere, formerly manager of J. H. Larochelle & Fils has a position as superintendent of O. Goulet's shoe factory.

J. H. Larochelle & Fils have decided to go out of the manufacture of shoes and continue the jobbing business only. They have sold their machinery to J. E. Samson.

The retailers say that they have had a poor season on rubbers and that the cause has been the weather. They also attribute the decline to the fact that rubber soled shoes are being more worn.

Manufacturers are completing their samples for next season and expect to have them all ready in a couple of weeks. Many visitors of the jobbing trade have been here during the past few days.

The Poirier Shoe Co. has assigned. The assets are \$2,150, and the liabilities over double this amount. The company made canvas shoes and also a general line of McKays and Standard Screw.

Some excitement was caused in the factory of O. Goulet, on March 10th, when a gas tank in the packing room, on the first floor exploded from some unknown cause, shattering several glass and wooden partitions and setting fire to the interior of the building. The blaze was extinguished by the fire department before any great damage was done. Seated in the office at the time of the explosion were Mr. Goulet and his son, and a visitor from Toronto. They were thrown from their chairs receiving a severe shock, but were not injured, although they would not care to go through a like experience.

J. E. Samson having disposed of his interest in the Rock Shoe Co., has bought the machinery of J. H. Larochelle & Fils and will continue the business under the name of J. E. Samson, Reg. J. A. Cloutier, raw hide and leather merchant, is in partnership with him. They will manufacture men's, boys', youths', women's, misses' and children's McKay and Standard Screw. They are now working on their samples and expect to have them ready this week, and intend to sell to the jobbing trade only. The lines will be of the latest and newest styles. They will be located until May 1st in J. H. Larochelle & Fils building and after that date they will be at 467 St. Valiere street.

New Factory Has Started

James T. Clark, sales manager of Clark Bros., shoe manufacturers, St. Stephen, N.B., is in Toronto with a fine range of women's high-grade McKays, which he is showing to the jobbing trade. A number of snappy, catchy lasts are seen and the workmanship, finish and style of the samples bespeak a bright future for the new factory in St. Stephen, which is now in full operation. Mr. Clark has had a successful trip throughout the Maritime Provinces and is on his way to Winnipeg on business.

Nineteen-Fourteen is J. & T. Bell Centennial Year

One Hundred Years Under the Same Firm Name—A Unique Record—Short Sketch of Firm's History—Old Time Shoemaking Contrasted With Present Style

Few firms in any line of business can look backward over 100 years of successful business experience, fewer still when said business has been conducted continuously under

H. E. MOLES, MANAGING DIRECTOR

the same firm name. Such, however, is the splendid record of J. & T. Bell, Limited, Montreal.

It is a far cry from 1814 to 1914, but just as far a cry from the little squat factory down on old Notre Dame street, in which Joshua and Thomas Bell, the founders of the business, began manufacturing in a small way, to the big and modernly equipped factory on Inspector street, illustrated here, where this firm carries on business to-day. As will also be shown by other illustrations herewith, there is just as big a difference between the product of 1814 and of 1914.

Shoemaking in the Old Days

Right down in what was then the heart of old Montreal, close to where St. Lawrence Boulevard begins to-day, was the first Bell factory—a small affair indeed judged by present standards, but a good sized undertaking for those days. The two brothers, Joshua and Thomas Bell, manufactured women's turned prunella cloth buskins almost exclusively. At the death of Thomas Bell the business passed into the hands of Samuel Bell, another brother, by whom in time it was sold to the latter's nephew, the late John T. Hagar and John Stephens. The partnership between these two was dissolved after a year or two, John T. Hagar continuing the business as sole proprietor.

During this stretch of years, however, the business had been moved to the present stand on Inspector street and housed in a fine new building. At the death of John T. Hagar, in 1909, the business was formed into a joint stock company with H. E. Moles, who had been connected with the business for many years as vice-president and managing director, under whose direction the business continues to-day.

This gives a brief sketch of the development of this business up till recent years. While the recital may sound prosaic enough to the reader it takes only a little imagina-

tion to perceive what a world of individual and united effort on the part of everyone concerned was necessary to put this firm in the proud position it occupies to-day as practically the oldest, as well as one of the best known shoe firms anywhere in Canada. To be able to look back over a hundred years of steady growth and constant expansion of trade without interruption, is an unique record.

To-day the officers of the company are as follows: Dr. C. B. Keenan, president, representing the Hagar Estate in-

ONE OF THE FIRM'S FALL OFFERINGS

terests; H. E. Moles, vice-president and managing director; A. A. Bradley, secretary-treasurer; John Laughton, sales manager; F. N. DeLancey, superintendent.

During the past three years there has been a very material increase in the firm's business, and seven representatives, all of whom are men of standing and experience in the trade, look after the firm's interests throughout Canada. Three of these, Louis Godbolt, F. M. Hoffman and J. Lamonte handle the business from Port Arthur west. Mr. Godbolt is especially well known, having been connected with the firm for 25 years and having grown up, one might

say, with the various cities throughout the West, in which he has so long been the representative of the house.

In eastern Canada C. E. Fice handles all Western Ontario business. Irwin T. Frederick covers Eastern Ontario, Roy C. Fraser the Maritime Provinces and Quebec. All of these are well known salesmen in the trade. W. G. R. Roger is city salesman for Montreal.

J. & T. Bell, Limited, make to-day high-grade welts

and turns for both men and women. Equally well known, however, are the specialties which they have the sole right to manufacture in Canada; specialties which now represent

a large proportion of the operations of the company, having become so well and favorably known to the trade. These specialties are the Dr. A. Reed Cushion Sole Shoe for men women, the Cushionet Turn Shoe for women, and the Doctor's Special Waterproof shoe. All that long experience, close observation and careful manufacturing can accomplish go into these shoes and they undoubtedly deserve their ever increasing popularity.

Examples of Present Day Shoeing

The two cuts accompanying will give a good idea of the character and quality of the shoes turned out by J. & T. Bell, Limited, to-day. Truly there is a vast gulf between the ultra modern style and appearance of this footwear and the antique specimens of shoemaking also illustrated herewith (which we presume were fashionable enough in their day.)

Congratulations and good wishes generally are being extended to the firm on this their centennial year by the

shoe trade, both retail and wholesale, and manufacturing with which they have been connected for so long and in the development of which they have played a very important part.

Williams' Factory Starts Up Again

The Williams Shoe Company, of Brampton, which has been closed down for the past few weeks, is again in full operation. The company has been re-organized and rejuvenated, and the assets, building and plant have been taken over by several local capitalists, the price paid being \$57,500. More than double the amount of paid-up capital of the old company has been subscribed and is fully paid up. It is understood that the sum raised is \$75,000 and the claims of the creditors having been satisfied, the new company starts without any liabilities and with a substantial surplus in the bank to carry on operations. S. Mullett, of Orillia, who was a member of the Williams Shoe Co., some years ago, will be the general manager. He is a thorough business man with years of success and experience, and among the other stockholders are Messrs. John McMurchy, Birss, Brundle, Pickering, Shields, Hammond, Johnson, McCallum, Dawson, and others. G. L. Williams will also be associated with the new company. It is understood that the firm has some \$90,000 worth of orders on hand to fill, and about 150 hands will be employed. It is confidently expected that the Williams Shoe Co., under new management, will enjoy a very busy and prosperous season. The name of the company will remain as formerly, and the new stockholders are enthusiastic over its future.

Some Catchy Men's Styles

The Cook-Fitzgerald Co., Limited, of London, are showing a most complete range of samples in three grades of welts for men for the coming trade. The products of this well known firm are characterized by the snap and ginger which has always been a feature of Astoria and Liberty shoes. Many new lasts and patterns are shown in the old established brands, while the Tecumseh shoe, which will be made in the No. 2 factory, is a worthy running mate for the samples of their No. 1 establishment. It is not so many years since the Cook-Fitzgerald Company used but half of their present No. 1 factory, but in the past two years they have made remarkable progress and are to-day turning out as many fine shoes for men exclusively as any factory in Canada. Their samples show a wide range of lasts—eight new ones having been installed for this trade, while all the novelties in leathers, fabrics and shoemaking are featured.

Among the leathers used in the line are Creese & Cook's new mahogany tan, a most popular shade this year wherever well dressed men are seen, Pfister & Vogel's Lotus and A. C. Lawrence's Tan Gun Metal. In Canadian leathers Davis shows prominently, while samples from Beardmore and other representative tanners are also displayed. Many cloth topped models are featured. A big line of patents with Black English corkscrew and mohair tops are most attractive. Several tans are included in this line, the darker shades predominating. Some of these are equipped with Lawrence's Juniper soles, which are remarkable for their flexible and non-slipping qualities. Another shoe for the city trade that was noticed was one with a Lindenoid heavy single chrome sole, whose wonderful wearing and non-slipping features have been demonstrated. There are felt lined shoes with cushioned or felt innersoles and one with a wool lining, felt innersole and doubler with a chrome outer sole—the acme of solid comfort and a certain cure for cold feet. All the patterns used by the Cook-Fitzgerald Co., Limited, are drafted by the best pattern maker in Massachusetts. A distinctive feature shown in their English bal model is a square throat that has beautiful lines and carries with it a square cornered top. The latest thing in a pump last from Newark, the home of pumps, is offered. This calls for a special pattern which guarantees a snug ankle fit.

AMONG THE SHOE MEN.

J. T. Brown, maker of shoes, Vancouver, has assigned. Fred Busch has commenced a shoe making business in Medicine Hat.

Charles Sterling, of Sterling Bros., London, was in Montreal recently.

Aird & Son, Montreal, have installed some new machinery in their plant.

E. C. Nevison, of Red Deer, Alta., dealer in leather, was recently married at Innisfail, Sask., to Miss Olive H. Hayward. They will reside in Red Deer.

E. W. McTear, of Toronto, left this week for an extended trip through the Maritime Provinces in the interest of P. Jacobi, shoe store supplies, Toronto.

A. L. Baldwin, Goodyear agent of the U. S. M. Co. of Canada, is at present making a trip through to the Pacific Coast, looking after outfits already installed.

Farquhar McRae, dealer in groceries and shoes, Beaverton, Ont., who was a widely known and highly respected resident of that town, passed away recently.

Frank Power, formerly of the Rideau Shoe Co., Montreal, will represent La Parisienne Shoe Co., Maisonneuve, in Eastern Ontario during the coming season.

The U. S. M. Co. of Canada have recently installed a number of new Goodyear stitchers, model "M." Where used, results have been exceedingly satisfactory.

John C. Nugent, sales manager of the Menihan Co., shoe manufacturers, of Rochester, spent a few days in Toronto last week, showing a fine range of samples.

E. B. Weiss, of Napanee, Ont., is covering the ground between Belleville and Montreal in the interests of the Miner Rubber Co. and is meeting with good success.

The stock of Hart Bros., Woodnorth, Man., consisting of shoes, dry goods, and groceries, was sold lately by C. H. Newton, of Winnipeg, who was the official assignee.

Another small fire occurred at Wickett & Craig's leather factory in Toronto recently, when flames did a couple of thousand dollars damage to the roof of the beam house.

Fred Hull will cover Toronto and Western Ontario in the interests of La Parisienne Shoe Co., of Maisonneuve. He was formerly with the Rideau Shoe Co., Montreal.

Ames-Holden-McCready, Limited, Montreal, have declared a quarterly dividend of one and three-quarters per cent upon the preferred capital stock of the company.

The McCall Shoe Co. have opened a new store on the west side of Yonge street, near Carlton. This makes five stores in Toronto, which are now operated by this company.

Jas. Donohue, representing Helming-McKenzie, Cincinnati, manufacturers of fine women's welts and turns, was in Toronto last week, showing a splendid range of fall samples.

W. E. Short and R. Percival, who represent the Kingsbury Footwear Co., Montreal, throughout the Western Provinces, left Montreal Saturday night with fall samples.

Walter Powell, who conducts two shoe stores on Dundas street, Toronto, intends remodelling his western store and will put in an up-to-date front as well as renovate the interior.

C. Keen, lately in charge of the finishing room of the Relindo Shoe Co., Toronto, has gone to Galt, where he has taken an important position with the Galt Shoe Manufacturing Co.

The shoe store of Edward G. Bridgman, 691 Yonge street, Toronto, was damaged by fire on March 8th, when flames broke out owing to the explosion of a coal stove. Live coals were scattered about the place. The damage to

the building was slight, but that to the shoe stock was about two thousand dollars.

Samuel Koffman, shoe retailer, Dundas street, Toronto, intends retiring from the business and removing in the near future to a fine farm of 250 acres which he has purchased in Bolton township.

W. C. Meyers, western Canada representative of the Rideau Shoe Co., Montreal, who has been confined to the hospital in that city from an attack of pneumonia, is very much improved.

Eight thousand five hundred beef hides were purchased at the Edmonton plant last week by W. J. Donley, traveler for M. R. Allen, Sons & Co., of Kenosha, Wis. The firm uses 2,000 hides a day.

Charles L. Owens, of the Royal Shoe Co., Toronto, has returned from an extended visit to New York, Boston, Philadelphia and other cities inspecting styles and special offerings for the coming season.

The Overland Department Store has opened in Redcliffe, Alta., with three departments—groceries, dry goods and boots and shoes. D. McAllister is the proprietor and Alex. Clachrie the manager.

J. D. Anderson, formerly employed in the Vernilyea Shoe House, Belleville, Ont., now engaged in the clothing business in Banff, was able to save his stock but lost his store in a recent fire in that town.

Harry Thompson, of the Thompson Shoe Co., Montreal, was in Toronto last week. The company will in future handle women's lines exclusively, both high grade and medium class in welts and McKays.

The New Westminster, B.C., Retail Merchants' Association put themselves on record as favoring a statutory weekly half-holiday and the closing of all stores at 6 p.m., except on days preceding holidays.

Lieut. W. A. Moore, of Beardmore & Co., Toronto, has been pursuing a special course at Stanley Barracks, Toronto, qualifying for a captaincy in the 9th Mississauga Horse. He will shortly be gazetted a captain.

Extensive alterations are now being made to the Yale Shoe Store in Winnipeg which, when completed, will give J. Affleck, the proprietor, one of the handsomest and brightest footwear establishments in Canada.

The assets of the Elkman Shoe and Supply Company, of Brampton, are being offered for sale by the provisional liquidator, W. J. Heaven, of the Anglo Canadian Leather Co., of Toronto. The assets are about \$8,000.

Roger Owen, late of the Brandon Shoe Co., Brantford, Ont., has gone to Redcliffe, Alta., where he has been appointed foreman of the making room in the new Alberta Shoe Manufacturing Co. factory.

Geo. J. Cowling will cover Ontario along with Frank Rousseau, for the Relindo Shoe Co., of Toronto, during the coming season, while L. F. Jackson will look after the interests of the firm in the Western Provinces.

Fire broke out in the shoe store of William Crothall, New Toronto, a few days ago, and completely wiped out the frame premises. The damage to the building and stock was about \$2,500 and is only partially covered by insurance.

Wm. Perrault, recently with the Slater Shoe Co., Montreal, has started a Goodyear repair plant in Sherbrooke under very favorable conditions. This gentleman is widely known and popular among the Montreal shoe operatives.

Thomas Hague died this week at Kew Beach, Toronto, at an advanced age. He was born in England but came to Canada when a young man and for forty years was in the shoe business at Waterford, Ont., retiring several years ago.

The Murray Shoe Co., of London, which was recently reorganized, has elected the following officers: G. H. Murray, president; J. A. Adams, vice-president and general

manager; A. M. Jarvie, K. D. Murray and R. J. Johnson, directors. G. A. Blachford has retired and J. F. Kerrigan has resigned as general manager. The firm has opened an office in Montreal at 214 Lemoine street.

Considerable stock of the Canadian Consolidated Rubber Company, 317-321 Bank street, Ottawa, was damaged through a frozen radiator bursting recently. Several inches of water covered the floors of the sample rooms and basement.

W. A. Marsh, of the W. A. Marsh Co., shoe manufacturers, Quebec, is progressing favorably and is now able to be wheeled around the house in a chair. It is expected that, with the advent of warm weather, he will be able to be out again.

Harry Borbridge, shoe retailer, of St. Thomas, has purchased the Temple Shoe Store in Brantford and taken possession of this large and well equipped establishment. Mr. Borbridge's brother will be in charge of the business for the present.

The Hurlbut, Co., of Preston, are making alterations to their factory, acquiring more room by which the capacity of the plant will be greatly increased. The firm report an active demand for their children's welts, which they make up to size 10½.

The U. S. M. Co. have, during the last month equipped Goodyear shoe repairing shops in St. John's, Que., Sherbrooke, Westmount, Montreal and Richmond. They state that a large demand is being made for Goodyear shoe repairing outfits.

The effect of the Underwood tariff in drawing Canadian cattle to the United States is shown in a return tabled recently. In the four months, October to January, 162,491 head were exported, as against 20,101 in the corresponding period of last year.

Lyon Shoes, Limited, of Montreal, have been granted a federal charter with a capital of \$50,000. The company are empowered to carry on a general shoe business, both wholesale and retail, and to manufacture and deal in all kinds of footwear, findings, traveling goods, etc.

The residence of Charles Tilley, 82 Roxborough street, Toronto, was recently entered by burglars. The police, who were notified by Fred Blachford, captured the two intruders in the cellar. Mr. Tilley has been spending the winter months in California and his house was unoccupied.

N. S. Steeves, of Moncton, will represent the Minister, Myles Shoe Co., of Toronto, in the Maritime Provinces this season, taking the place of Tom J. Gallagher, of Shediac, N.B., the eastern representative of the firm for the past three years, who has had to retire owing to ill health.

Frank Morgan, manager of the Edmonton branch of the Ames-Holden-McCready Co., Limited, was in Toronto this week on his way home from the conference of managers in Montreal. A. L. Johnson, of the Winnipeg branch, also spent a day or two in Toronto while returning to the West.

At the last meeting of the Joint Council of the Boot and Shoe Workers' Union, in Montreal, resolutions were passed unanimously endorsing the candidature of Zotique Lesperance, business agent of the local union, for alderman in Longue Pointe Ward. Joseph Ainey was also endorsed for controller.

Fleury & Co., shoe dealers of Norwood, Ont., finding their old stand too small for their growing trade, and their window space too limited, have rented the large store between Richardson's general store and J. L. Squire's flour and feed store. They have moved into their new and spacious quarters.

The B & Y shoe store, of Vermilyea, Alta., have installed a buffing machine in their repair department. The

firm contemplate further improvements and one of the members stated that it will only be a short time before a calf-skin will come in the back door and go out the front in the shape of dainty women's shoes.

A charter has been granted to the Firestone Tire and Rubber Company of Canada, Limited (Winnipeg), dealers in all kinds of rubber, rubber tires, rubber goods, gasoline, mineral oil, etc. The capital stock is \$5,000. The incorporators are: Arthur O. Myers, J. H. N. Kennedy, Edgar H. Matheson, Philip C. Locke and Frederick R. Sproule.

The O. B. Shoe Co., Drummondville, are getting ready to start on their run of men's and women's welts and say they expect very shortly to have everything adjusted, so as to resume operations after the recent fire, which came at a particularly unfortunate time, as they had all their new lasts in and everything ready to begin a very busy season.

C. A. McKimm, of Smith's Falls, Ont., for several years traveling for the Regina Shoe Co., covering Eastern Ontario, has been appointed representative for the Aylmer Shoe Co., of Aylmer, Ont., makers of men's welts, and the Nursery Shoe Co., of St. Thomas, Ont., makers of misses' and children's turns and McKays. Mr. McKimm has had large experience both in the retail and on the road. He is

A SALESMAN WHO HAS MADE GOOD

George H. Taylor, who has been recently appointed Ontario representative of the Kingsbury Footwear Co., expects to start out on his new duties early next month. Mr. Taylor who was born in Stratford, Ont., has had an extended experience in the shoe selling game and is well liked for his sterling character and upright business ideals. After residing in St. Thomas he went West and worked in several

towns for five years in the retail line. Returning East he accepted a position with the Merchants' Rubber Co., of Berlin, covering central Ontario. He was also in Montreal and Toronto branches. Seven years ago he joined the traveling staff of the Williams Shoe Co., of Brampton, and opened up Quebec and the Maritime Provinces for them, meeting with splendid success. For the last three years he also handled the Brandon Shoe Co.'s line, along with the Williams. A few weeks ago he resigned from these two firms to go with the Kingsbury Footwear Co. Mr. Taylor is at present living in Hamilton, but will remove to Toronto in the near future.

looked upon as an up-to-date shoe man, has a good connection on this ground, and is popular with the trade, who will wish him every success in his new connection.

Ames-Holden-McCready, Limited, held their annual conference in Montreal last week, when managers of every branch were present. Spring styles were discussed and routine business was thoroughly gone into. The business

R. BOULTON, Boot Store,
23rd, Cor. Wall Street, Saskatoon, Canada.

proceedings lasted five days, several sessions being held. All the factories were visited.

Harry McKellar, of Berlin, sales manager for the Consolidated Felt Companies, was in Montreal and Toronto last week on business.

G. W. Warriner, shoe retailer, 1243 Bloor street west, Toronto, has widened his store by several feet and put in a double front, which is of a very attractive character. The windows are of the latest type and the entrance is imposing. Several interior changes have been effected which make Mr. Warriner's place of business one of the neatest in that section of the city.

The tannery of the Anglo-Canadian Leather Co., in Huntsville is now turning out about fifteen hundred sides per day. The Huntsville Forester says that C. O. Shaw, general manager, has found that the action of the Wilson administration in removing the duty on sole leather has opened a wider market and much of the output is now going to Chicago and St. Louis.

L. J. Iles, who for the past five years has represented Blachford, Davies & Co., in Eastern Ontario, has been appointed special representative of the Woelfle Shoe Co. of Berlin, and Chas. A. Ahrens, Limited, of Berlin, covering the territory east of Toronto. W. G. Hardie and A. A. Echol are making rubber selling trips for Blachford, Davies & Co. in Eastern Ontario.

A disastrous fire broke out last week in the boiler room of Geo. A. Rudd & Co., harness manufacturers, 787 King St., Toronto, completely gutting the structure. The building and contents were insured for \$40,000, and the loss amounts to considerably more than this sum. A year ago the Rudd Co.'s factory was badly burned. Several persons are thrown out of employment by the disaster.

L. O. Breithaupt, of the Breithaupt Leather Co., Berlin, has returned from a trip to Montreal where he was introducing their new lines of Trent Valley oak sole leather, including stock for welts, fine McKays, turns and Goodyear insoling. He is well pleased with the outlook for the new lines which the firm have added to their old reliable lines of Eagle Union Oak and Penetang.

The C. E. McKeen Co., Reg., of Quebec, was recently dissolved and the business is now being carried on by Frank W. McKeen, one of the former members of the firm. The firm will continue making their usual brands and will specialize on men's shoes at from \$4 to \$6, and on boys' from \$3.50 to \$4. Frank W. McKeen's many friends wish him every success in his new venture.

Fawn and gray and brocaded tops, with patent leather vamps are being shown by many of the leading stores in women's shoes. Some of most popular colors are taupe, pearl gray and white for topping. In men's, a pair of patent leather shoes with white broadcloth tops is among the latest creations. Fawn and gray uppers are also having a fair measure of appreciation in men's shoes.

The McQuay Tanning Co., of Owen Sound, have withdrawn their petition to the town for a loan of \$25,000 and have decided to make an extension to their plant without assistance in any form. An addition will be built this summer and another next year, and these two will be as spacious as the one originally contemplated. The plant is devoted exclusively to the manufacture of high-grade harness leather.

Arthur R. Thompson, of St. John's, son of C. R. Thompson, manager of the Newfoundland Boot and Shoe Co., has established a tannery in Harbor Grace, Newfoundland. Mr. Thompson lately severed his connection with the Sudbury Waterproof Seal and Leather Co., of St. John's, of which he has been manager for the past five years, to go into the manufacture of leather on his own behalf. He intends to confine his operations to the chrome process of tanning.

very strongly this season is their woman's dull calf blucher with medium high toe, Cuban heel, and perforated foxing. Another neat looking last is their men's gun metal blucher carrying a medium high toe, plain quarters, with a low heel and narrow shank. This shoe presents a fine appearance and is designed to suit the medium class trade. A woman's patent leather with fairly high heel, medium high rather round toe and grey cravenette upper, is also shown by them and looked upon as one of their best lines. The Rena Footwear Co. is a young concern, but turns out as neat a shoe as many of the larger factories, and lines that are their equal in every way. Mr. Frank Power has been engaged by them to cover the larger Ontario centres, and his many friends in that territory will be glad to know that he is taking hold of a line well worthy of his acknowledged selling ability.

Several New Lasts Added

Although the Rideau Shoe Company's factory in Montreal was destroyed by a disastrous fire last summer, this firm got speedily to work and sent out their travelers with the lines to supply their customers. The trade was supplied all over the country to a large extent, although, some of their customers on account of the lateness of the travelers were missed. For the fall season, 1914, the Rideau Company say they will be better prepared to take care of their trade than ever before, with a large number of their old popular lasts and numerous new lasts. They feel their range will show to greater advantage than before. Receding toes for city trade in all leathers have been added to their men's lines, also heavy lines of storm leathers, with leather linings and double viscolized soles have been added for the Western requirements. To the women's lines have been added a full line of turns with kidney heels and other heels of the latest designs. Patent leather and gun metal with cravenette and brocaded quarters are being shown for the fastidious trade. Lines of boys' shoes, machine sewed and welt shoes are another new departure. To make this line complete they have added several men's turn slippers and pumps. Travelers are starting out immediately, ready to supply any and all requirements in footwear.

Medium High Toe to Front

Dupont & Frere, Maisonneuve, are showing some new lasts for the fall season which they feel, ought to take with their customers. They feel that the medium high toe is going to be the strong seller again this year and, therefore, their samples run for the most part along these lines. During the past year they have increased their capacity and are now in a much better position to cater to the demands of their trade. One of their new lines is a medium high toe, carrying a narrow shank, and rather low heel. Gun metal calf they state will have chief call with their patrons, and some lines are being made in dark Russia tan.

The Eureka Shoe Company, Papineau avenue, Montreal, are a new firm which started about six months ago. This company have installed a line of samples that they feel will take with the fall trade. They are showing a women's last with long narrow toe and Cuban heel made in both button

and blucher, that ought to be a strong seller. Patent leather they say will go strong this season, but do not expect much demand for women's tans.

The Relindo Shoe Co., Toronto, are displaying a large number of patent shoes, with plain receding toes, fabric quarters and tops, and spool and kidney heels, while a few have the real Louis heel. Some nice offerings are seen in black suede and others have fawn and grey silk tops. This makes a very pleasing combination. The majority of the samples, however, have the Cuban heel and a number of shoes have rubber soles and heels, while a few of this kind have spring heels, with blind eyelets. A Tango boot made entirely of patent leather with white eyelets and fancy inset of white kid on the outside quarter is something of a novelty, and adds variety to this interesting line. Ninety per cent of the showings are buttons. The low custom effect for women is seen in several walking and outing shoes. Most of the button shoes have fewer buttons than last season.

The Slater Shoe Company, Montreal, for fall have added a number of new lines of shoes, and are featuring women's shoes to a greater extent than ever before. Many new lasts have been added a complete line of turns with spool heels, kidney heels, and Cuban-Louis heels, fancy colored kid tops, shoes with whole quarters of cravenette and brocaded cloths, with patent and gun metal circular vamps, are being shown in large numbers. New lines of boys' shoes, which they say will supply a long felt want in the Canadian trade, have been added. These shoes are machine made, patent, gun metal and tan, to retail for \$3.00 and \$3.50. Boys' welt shoes to retail at \$3.50 and \$4.00. In the Slater men's line, receding toes with broad shanks and low heels in mahogany Russia, nut brown Russia, gun metal, and patent, with plain beaded stitched tips are being featured. Many cloth tops in button are shown in all leathers. A special shoe in the Slater line is sample number 12, brown winter calf with a hand sewed inverted welt, and viscolized soles. This line is being featured as an absolutely waterproof shoe.

Some Attractive Productions

La Parisienne Shoe Co., Montreal, who manufacture women's high-grade shoes only, feel that they have for Fall 1914 a line of samples that are representative in every way and among which are to be found several new lasts. One new last being shown by them is a woman's 22-button, all cravenette, fleece lined shoe with rubber sole and heel. The toe is a medium recede one and the shoe carries a 16/8 Cuban heel (with rubber). This shoe they say will be a sure winner as it is designed to sell wholesale at about \$5, and although it is a good solid, warm shoe, it cannot be called heavy by any one, no matter how imaginative he may be. The above described shoe is also turned out with 13 and 18 buttons. Another last being shown is a woman's patent 13-button shoe, turned out in both cravenette and leather tops. It has a mock welt, 11 gauge sole and a 16/8 heel, medium high round toe and short vamp, with a medium width shank. This last is built along unusual lines and is sure to be a trade winner. As regards what leathers will be popular in women's shoes this season, the firm state that in their opinion the large call will be for patent leather. After this the same call as usual will be made for the duller brands in dark leathers. Cravenette tops they say will go

ONTARIO

strong and it is very probable that the chief demand will be for plain goods of this type rather than for the more fancy cloths and brocades. Tans of every description in women's shoes will be, practically speaking, dead for some time to come. Several new travelers have been engaged for the coming season, among them Frank Power, who will cover Eastern Ontario, and Fred Hull, formerly with the Rideau Shoe Co., Maisonneuve, who will look after the interests of the firm in Toronto city and Western Ontario.

The Kingsbury Footwear Co. have some very attractive lines for fall, and are showing a number of women's button, with brocade and cloth tops, and also with full fabric quarters. Patent is the leading leather with gun metal as a close second. The spool heel is very popular and is seen on a large number of the offerings. The fairly long receding toe seems to have the call in the majority of the samples. Colonials are strongly to the front, with a variety of ornaments, some of which are placed well on the side. Several have brocade quarters. The line embraces the usual representative collection of conservative patterns and medium high toes.

Chas. A. Ahrens, Limited, Berlin, has added a full range of white elk to the line for next season and they feel that they will have a well deserved run. They have also put in a new woman's last with a medium high toe and full fitting qualities. It comes in "E" width. Ed. Wettlaufer, sales manager of the company, left last week on an extended business trip to Alberta and British Columbia. He will go as far as the Coast. D. H. Musselman also left for the West and will sell the Ahrens shoe in Winnipeg, northern Manitoba and Saskatchewan. J. Lembke is doing the "Soo" and Northern Ontario for the firm.

The manufacturer of a staple line of shoes says, they have introduced a large number of high cut storm calf boots which they think are going to take very well, principally to take the place of Elk which they declare is a most unsatisfactory stock for both tanner and shoe manufacturer. The storm calf is very easily cleaned, and practically waterproof. Boys' and youths' box kip lines are also being introduced quite freely, but it is expected when business opens up in earnest there will still be the usual demand for tan grain, pebble and gun metals, while Western trade will possibly call for some of the cheaper lines in split, etc.

The Eureka Rubber Co., Limited, of Toronto, has been granted a charter. The share capital is \$40,000, and the incorporators are John L. Reid, T. Metcalfe, Percy S. Greaves, Ed. Gillis and A. McMullen. The company is empowered to manufacture rubber nipples, finger cots, baby comforts, gloves, water bottles, syringes, tires of all descriptions, boots, rubber sundries and rubber accessories of all kinds.

**NO DIAMOND
TRADE MARK
NO FAST COLOR**

**NO DIAMOND  TRADE MARK
No Fast Color**

Get this fact firmly fixed in your mind. It may be the means of saving you considerable annoyance and inconvenience; for, if you will insist that the diamond trade mark shall appear on the surface of the eyelets in the shoes you order, you will be entirely free from any complaints regarding "Brassy" eyelets. Fast Color Eyelets are the only kind that cannot wear "Brassy." They enhance the good appearance of shoes more than any other accessory used in their manufacture; and, made as they are, with celluloid tops of solid color, they do not grow old but retain their bright, new appearance long after the shoes are worn out.

The diamond trademark is a sure cure for all eyelet troubles. Only the genuine Fast Color Eyelets have it.

Scholl's Foot-Eazer

A practical, scientific appliance that instantly and permanently relieves tired, aching feet, weak ankles and other troubles caused by structural weaknesses of the feet. It is anatomically designed, and the self-adjusting, double-sliding spring feature supports the arch in nature-like, easy manner—gives a natural elasticity and springiness to the step—correctly relieves the foot muscles of all strain, and gives absolute rest to the muscles and nerves. It is adjustable to all feet and can be worn in any shoe unnoticeably or changed from one pair to another instantly.

Retail price, \$2.00 a pair

22-FOOT GOODYEAR SHOE REPAIRING OUTFIT

MODEL N

THIS Outfit represents the highest development in shoe repairing machinery, and meets every demand of modern shoe repairing. It embraces all the essential processes for making new shoes from old ones, giving the maximum of equipment and efficiency in the minimum space. The Outfit has the Goodyear Stitching Machine with all its improvements, including a new style steam generator which uses gas or gasolene for generating the steam, and operates automatically, thereby insuring a uniform heat for keeping the wax in proper condition and requiring little attention from the operator. The Edge Trimming Machine has the new feature of the two shafts, being operated by a single belt, and the cutter grinder is attached directly to the main shaft. This arrangement gives better results with less power.

The Buffing and Scouring Machine has a shaft 57 inches long and carries the following equipment:

- | | |
|--|-----------------------------------|
| 2 Split Bottom Buffing Rolls | 2 Flat X-Ray Heel Scouring Wheels |
| 2 "C" Shape X-Ray Heel Scouring Wheels | 1 Heel Breast Scouring Wheel |
| 1 Pin Wheel Pad Complete | |

A powerful Blower System removes the dust resulting from the trimming, buffing and scouring operations, and is designed to overcome certain objectionable features of other blowers.

The Finishing Machine has a 78 inches shaft which has all the necessary equipment for black or russet work:

- | | |
|--|--|
| 2 Corrugated Rubber Shank Finishing Wheels | 1 Corrugated Rubber Heel Finishing Wheel |
| 1 Corrugated Rubber Bottom Finishing Roll | 2 Shank and Bottom Brushes |
| 2 Heel Brushes | 1 Stitch Cleaning Brush |
| 1 Levelling Roll | 1 Bead and Wheel |

At the end of the Outfit is the Oscillating Edge Setting Machine which is fitted with union irons and in its motions duplicates hand workmen with quicker and better results.

Each of the machines is operated independently by a friction drive pulley, so that it is necessary to use only those machines which the operator may require. This feature means a saving of power.

All the machines are firmly mounted on legs and driven by a countershaft with carefully adjusted bearings, so that the Outfit runs with very little vibration, and is in every way most efficient.

SMARDON SHOES

It is an ever increasing pleasure to make high-grade merchandise year after year.

There is extreme satisfaction in finding that the wearer and dealer alike appreciate merchandise of distinctive quality.

There is no line that can lend a better tone to a shoe stock nor give greater satisfaction to your trade.

Smardon Shoes are an accepted standard of shoe value because they embody the highest possible standard of manufacturing integrity.

Fall 1914 Styles now being shown.

Hosiery and Your Cash Register

REFLECT on the relationship for a moment! Ordinary hose has never been known to boost sales—no matter what the margin of profit. On the other hand, *Penmans full-fashioned Hosiery pleases customers—it is a consistent and persistent* trade builder. Once your customers know that they can buy this *vastly better* hosiery at your store you can depend on your cash register being kept busier. *Penmans Hosiery* will bring the select trade to your store. The rest is up to you.

Penmans Hosiery

"CANADA'S BEST SHOEMAKERS"

Fredericton, N.B.

SHOES

TWO years ago when we first offered the shoe trade a well-made stylish Women's Goodyear Welt in all leathers at \$2.75 that would stand the wear test—there were skeptics.

To-day the shoe trade recognize that we have the best Women's Welt values on the market and the most profitable to the dealer.

Specialization :—A united effort to do one thing and do it better—each department buys but one grade of stock—buys it big—each operator does but one thing—does it well—entire factory system planned for least loss of time and useless motion—a saving everywhere. That is why we can now offer the shoe trade our new line

The Virginia Shoe

for women, knowing it to be the best value on the market at **\$2.75.**

A Trio of Branded Tradewinners
to Boost Your Fall Trade

"TANGO"

"STAG"

"STRAND"

Brandon, Monarch or Dr. Brandon Patent Cushion Shoes enables you to get the most for your money in shoemaking. By making all shoes to order, branded with our trade mark, we can give you just the shoes suitable to your trade when you want them most. By carrying no goods in stock, we eliminate losses and can give our customers better values.

Shoes ordered by mail, or rush orders, go through our factories in **21 days**. We guarantee no delay. You can thus get the latest lasts and patterns and absolutely fresh goods. By adopting this method you are enabled to meet and

defeat competition and to get better shoes for your outlay. Other retailers are realizing the value of our merchandising methods and profiting thereby. Why not you? It will pay you to get in touch with us and have our salesman call, or we will send you samples by express.

Our travelers are now in the territories with our up-to-date Fall line. As we cannot see you all early in the season, kindly wait for our representative before placing your order. Thanking you very cordially for past favors,

We are, yours very truly,

Removal Notice

Finding our present factory altogether inadequate for the increasing demand for the MACFARLANE Shoe, we are at present moving into our new plant at 61 De Normanville Street.

Under the new conditions we expect to greatly increase our output and to be enabled to carry a much larger stock of staples; and at the same time to make better shoes than ever before.

Our salesmen are now out for Fall with a full range of Macfarlane Shoes.

MONTREAL

“LEADER” Brand McKays for Medium Purses

LEADER McKays for Men, Boys, Youths and Little Gents will undoubtedly touch a responsive chord in your community whether it be a big city or a small village. As good shoemaking as possible at a given price means a great deal more to many people than more expensive materials and workmanship at a higher price.

For this reason LEADER Brand McKay Shoes will certainly suit both the young and older men in your town whose means are limited and who have to consult their purse always before they buy.

The styles in this line are right up-to-date and the workmanship is excellent. The materials are better than in many shoes sold at considerably higher prices.

This is a fine “bread and butter” line for your business—and a line that will show an excellent volume of net profits in a season.

Our representative is now on his way to you with a full line of LEADER McKays.

Be sure you see the line complete.

EXCELS IN EVERY WAY

Scholl's Foot-Eazer

A practical, scientific appliance that instantly and permanently relieves tired, aching feet, weak ankles and other troubles caused by structural weaknesses of the feet. It is anatomically designed, and the self-adjusting, double-sliding spring feature supports the arch in nature-like, easy manner—gives a natural elasticity and springiness to the step—correctly relieves the foot muscles of all strain, and gives absolute rest to the muscles and nerves. It is adjustable to all feet and can be worn in any shoe unnoticeably or changed from one pair to another instantly.

Retail price, \$2.00 a pair

Consider Carefully Our "LEADER" \$4.00 Welt as a Selling Proposition

IF you analyze our LEADER \$4.00 Welt as a selling proposition you will see at once the special advantages it has for your particular trade, no matter where you may be situated.

There is an ever-increasing demand to-day for a thoroughly good shoe at a reasonable price. Such a good shoe is the 1914 LEADER Welt. By selling this shoe at \$4.00 you increase the number of your possible customers by many per cent., because no matter how good a shoe may be, there are many people to whom \$4.00 is the limit of spending power.

But the LEADER \$4.00 Welt is not a cheap shoe. It is a splendidly made shoe, correct in every particular. It is only our great buying power coupled with the enormous number of these shoes sold that enables us to give you a shoe that will sell at this figure and yet allow you a good profit, MANY TIMES REPEATED, because of the repeat business you get.

Don't order until you see our representative.
Also ask him to show you our BENCH-
MADE Welt at \$5.00 and over.

Patent Leather and Fabrics are Having Biggest Call

Cloth Toppings Are Very Popular and Curved Heels of All Kinds—In Men's Simplicity, Ease and Comfort are the Leading Principles—The French Effects in Women's and Men's Not Likely to Prove Factor in Fall Trade—Some Analyses of Patterns and Toes

The Fall selling season is now well on its way, and for some time travelers have been out displaying all the new things in men's and women's footgear, of which readers have been told a great deal in previous issues of the SHOE AND LEATHER JOURNAL. While orders for Fall are not as heavy as a year ago, still a very fair volume of business is being done and the new styles are pleasing, attractive and sensible.

The perplexing question of many dealers has been "What shall I buy," and as each season passes buyers are proceeding along more definite and well defined lines. The good buyer does not scatter, but rather concentrates his energies and purchases within a certain range. Of course individual buyers have to take into consideration local conditions and the class of trade to which they cater. To tell shoemen exactly what they should and should not buy would savor of supererogation. There is an old saying that "each heart knoweth its own sorrow most," and to paraphrase this, "each dealer or head of the department should know most what is required by his trade," or rather what his customers are likely to demand.

There are certain outstanding features, however, which have been emphasized in previous numbers and will bear repetition. One is that in women's patent leather in

WOMAN'S PATENT BUTTON
PLAIN RECEDING TOE, BLACK
CRAVENETTE TOP, CUBAN
HEEL—BY GETTY & SCOTT

colt, kid and side stock is leading. Nearly all the dressy shoes are made up in this way. Whole quartered button boots with a circular vamp and toppings of gold brocade, vesting cloth, black brocade, gold and silver cloth, two-tone blacks, worsteds, cravenettes, are being largely featured. Turn shoes are also having a very wide call. This year buyers are more particular than ever on the appearance and finish of the shoe. Fancy foxing is seen on a number of models, particularly where whole quarters are not the rage. Many manufacturers are showing button shoes with small circular heel foxings and others with the over-gaiter effect, although buttoning on regular lines. Most of the models carry Cuban-Louis heels, either leather or wood. The spool heel and the kidney heel are also witnessed on many styles.

Still More Varieties in Heels

There are some twenty-five or thirty heels or variations, but all might be brought under the one term—"crooked." Heel novelties, according to some authorities, are just on the verge of development, and while most of the pedestals have sensible, broad top lifts, still many treaky effects are seen. The latest thing in heels is known as the "heart and semi-heart" heels, one of these being in the form of a full

WOMAN'S PATENT BUTTON
LONG RECEDING TOE, STITCHED
TIP, TARTAN TOP, KIDNEY
HEEL—BY GETTY & SCOTT

heart. Whether these styles will add materially to the attractiveness of the shoes is doubtful. There are always

WOMAN'S HIGH CUT CLOTH BOOT, TWENTY-TWO BUTTONS, CUBAN HEEL, RUBBER SOLE AND HEEL—BY LA PARISIENNE SHOE

a certain number of people in the largest centres of population who are ever on the lookout for eccentric effects and they will certainly find it in these shapes. Of course the designing, breasting and shaping of heels is now a work of art and science and how far extremes may be carried it is difficult to tell. Tan shoes are practically dead in women's lines, and so are lace shoes, except for outing, athletic purposes or other special uses.

It would appear as if combinations of colors are desired by many women and thus we have white and black, fawn and black, gray and black and other attractive contrasts in fabrics. Some manufacturers are showing all patent kid woman's button, an all genuine buck button, an entire satin and various others of the same materials throughout. A few manufacturers predict that kid shoes will sell better than ever, both glazed and dull.

Pointed Recede Toe Leads

The pointed receding toe with three and three and a half inch vamp is certainly the favorite so far as the sale of high-class goods is concerned. It is interesting in this connection to learn the views of other publications as to what will likely have the call during the coming autumn.

"Suede-finished leathers promise to have a greatly increased demand. Many of the new patterns by high-grade manufacturers and those from Paris capable of American adaptation show quarters, panels and inserts of colored ooze, usually in combination with patent leather," says the *Dry Goods Economist*.

"The demand for shoes suitable for dancing will undoubtedly stimulate the use of suede-finished calf leathers, since this material makes a comfortable, handsome and durable shoe, appropriate for evening wear and equally suitable for semi-dress and afternoon dancing. Increase in demand for suede leathers in the European markets is reported—mostly for the darker shades, such as taupe and mahogany. The American samples in evidence have a leaning toward the lighter tones, such as light and dark fawn, this prob-

ably as a sequence of the prominence of this shade in hosiery. Similar combinations will be popular in boots also."

"Button boot patterns are all revolving around the whole quarter type, with a tendency to a little fancy work in the form of odd niches in the lines in the patterns. Narrow, plain toes and longer vamps naturally form the basis of construction in these styles. Medium round toes and medium vamps are still looked upon favorably in some sections, particularly the West, but the more stylish lasts giving a longer effect are growing in favor."

Under the heading "Will the French last go?" the *Boot and Shoe Recorder* says:—

"The French last with square toe, short shank and high, slender heel is fundamentally wrong. The various style advisers say NO, for primarily a woman will not wear an extremely long, square toe last.

"If anything, there is a turn in the demand for elongated styles. There are so many excellent women's lasts that the French (or old Philadelphia toe) is unnecessary to complete a merchant's working stock.

"In walking shoes, rubber soles and heels will continue. Rubber mixtures are noted, namely, cork and rubber, leather and rubber, fibre and rubber, in black, tan, white and mahogany shades. The rubber inserts in dancing shoes have been greatly elaborated.

"The fashion of brocade boots or boots with whole quarters is partly responsible for the continued use of wood heels covered with the same material as the quarter.

"A fair sprinkling of bronze boots and cloth to match is an indication of the trend towards colors. There isn't a prettier leather made, but there are disadvantages which appear after several wearings.

The Leading Leathers

"Patent leather is overwhelmingly the favorite. Next come dull calf and the finer grades of glazed and dull kid. A big kid year is everywhere predicted. The finer grades of dull kid finished in flat-black make decided harmonies with cloth topping. The fine, single thread stitching in white tends to intensify the trimness of dark leathers. The proportion of tan is small. Two samples out of one hundred

WOMAN'S PATENT BUTTON, MAT KID TOP, CUBAN HEEL, MODERATE RECEDE TOE—BY LA PARISIENNE SHOE

and twenty is not unusual in the higher grades. There is a fighting chance for the better shades of mahogany and nut tan.

More Novelties Seen

"The advance season will be a big one on striking shoe patterns. Foreparts that extend back to the heel in almost a straight line, U-shaped throats and foxings, and gaiter

(Continued on page 55)

THE ARTISTIC AND INVITING INTERIOR OF E. BLONDEAU'S SHOE STORE IN QUEBEC

High Class Store Fittings Increase Your Patronage

So Says a Quebec Retailer—Other Reasons Why High Grade Fittings Pay—A Shoe Store That Can Safely Be Called a Model One—Does Not Carry Any Surplus Stock

"I believe that every shoe retailer should endeavor to install the very best of store fixtures in his establishment," says Mr. E. Blondeau, who conducts a retail shoe establishment at 45 St. John Street, Quebec. Resuming, Mr. Blondeau added, "Many retailers think the best fittings are too expensive. They are, if you consider only the price you are paying for them. But they certainly are not when one considers the extra profits that are reaped by the store through having them, and these profits do amount to a very large increase. I know by experience. Not only for the foregoing reason are they worth while, but for the order and neatness which can be kept so much more easily with the right kind of store fixtures, will shoemen find it a paying venture. Don't you think it is better to buy A1 fixtures now, and at the end of seven or eight years find that they still retain the same high class appearance as when installed, rather than put in second class fittings which at the end of a very few years are only fit to use as kindling wood."

Mr. Blondeau's remarks are well backed by the appearance of his store. It is a pleasure to spend a half hour in looking it over, as every single item of the store furnishings harmonizes with the remaining pieces. The establishment which is about 15 x 35 feet, carries men's, women's and children's shoes, the Slater Shoe Co. lines being principally handled. As can be seen from the photo, the stock is ranged on the two side walls as well as on the rear wall, the men's lines on one side, women's on the other and children's goods at the end. The furnishings are entirely of fumed oak, presenting a fine appearance. The chairs of this wood, with leather seats and backs, run down each side of the store. The shelves extend about half-way up to the

ceiling, which is a high one, and are kept well stocked all the time. When a pair is sold, the box is turned up-side down, and at the end of the day, or in the early morning, these are again filled or replaced. Handsome axminster rugs also run the full length of the establishment. These rugs are of a special design and attract much attention. Very pretty art glass windows at the rear also add much to the general attractiveness. This feature is just one of the many which go to make the Blondeau store such an attractive one, and one which makes customers go out of their way to visit. Findings are displayed in a new model show case at the front of the store. Recently, a line of shoe and pump buckles was put in, and the proprietor states that already an increasing demand is evidenced for this latest addition to his stock.

The store is exceptionally well lighted, not only by the large front window, but also by means of four large gas power lamps hung at various intervals throughout the establishment.

Mr. Blondeau believes in advertising and often varies from the usual methods employed by most shoemen. A free shoe shine stand is located immediately inside the entrance, which results in much added patronage. Such pains have been taken to make friends of the store understand that the shoe shine stand is for their benefit, that now, most of them use it, as well as other prospective customers who are being added every day to the list of permanent patrons.

Hardly any stock is kept outside that part of the store shown in the accompanying photo, due principally to lack of space. This difficulty, however, Mr. Blondeau has overcome by utilizing the space over the wall fixtures. When

a new season's shipment is received it is neatly laid out, and gradually placed on the shelves.

Mr. Blondeau, who is yet a young man, is also a military man, although he has been in the shoe business nearly all his life. He first started after leaving school, to clerk in a Quebec store, leaving this later in favor of a military life. He was stationed in the St. Louis Barracks at Quebec for five years. Several years ago he purchased the establishment which he now conducts, and since that time has met with much success, due principally to his up-to-date methods, honest dealing, and fair treatment of customers.

Stopping "Squeak" in Shoes

A remedy for squeaky shoes is given in the following communication which was sent to a contemporary:—

"Squeaky shoes are an abomination, but they may be easily cured. The remedy I apply was given me years ago by an old German cobbler and it has never failed. Everybody ought to know and use it.

"Take a fairly rough new brick, the newer the better, and rub the soles vigorously from the toes downward, never upward, being careful not to abrade the polished edges. With some sharp instrument, a knife will do, make many transverse and crosswise cuts, not too deep, on the soles. Put water into an old wash boiler to the depth of a little less than the thickness of the soles and set the shoes in it, gently to avoid splashing, and let them stand overnight. In the morning rub the soles energetically twenty minutes with a woollen rag dipped in a mixture made of one part sweet oil, one part asafetida and one part gasoline. Then take the shoes down cellar and throw them into the furnace."

Are You Ready for Easter Trade?

Have you everything in readiness for the Easter trade? Remember that the festival falls on April 12th this year, which is much later than in 1913 and the weather should be fairly well settled. There are supposed to be two harvest seasons for the shoe retailer during the year, one being the Yuletide period and the other the Eastertide occasion. The alert shoeman is the one who is ready for the trade that is sure to come to him, who has his windows well dressed, his stock in good shape, all his Spring goods and novelties in position and who has done some effective advertising, giving illustrations of new Spring styles and telling the people what he has to offer along these lines.

A few Easter lilies and potted plants will greatly brighten the interior of many an establishment and give the premises an inviting and holiday appearance. Women want shoes to match their Easter gown and men are on the lookout for Spring modes. It is he who sees ahead and plans to capture his share of the footwear patronage who is going to benefit to a large extent and not be complaining of the dull Spring season.

The SHOE AND LEATHER JOURNAL has presented in late issues illustrations of neat holiday windows and the enterprising bootwear merchant should do something special in using flowers, foliage, white, mauve and purple ribbon, Easter eggs, bunnies, and a dozen other accessories suggested to proclaim that he is looking for the trade. The Eastertide is the time to push the sale of novelties and all the latest ideas or patterns in footwear. Be sure you get a good profit on them, much more than on your regular lines, and put all the energy possible into disposing of the latest creations. A good plan is to talk styles and leave such terms as bargain, snap, and other seductive ideas of cheapness in the background. The better class of trade is not looking for

Easter reductions but for something that is neat, artistic, well fitting and catchy. Get ready for the Easter trade, don't crowd your windows with too many shoes and ginger up your sales staff.

Breezy Notes From Winnipeg

Hendren Bros., practical shoemen, have bought out the Diamond Shoe Co. and are doing a splendid business.

George H. Ferguson, of the Hartt Boot and Shoe Co., Fredericton, passed through the city last week. He represents this firm from Calgary to the Coast.

The Harvard Shoe Shop is the name of a new store recently opened on Portage avenue, in the Clarendon Hotel block, just a few doors from the Yale Shoe Store.

John Affleck, proprietor of the Yale Shoe Store, is wearing a broad smile these days, as well he might, as he will have a very neat shop and one of the largest in Canada.

George Locke, manager of the Douglas Shoe Store, Calgary, was in Winnipeg recently on his way to Boston, New York, Montreal and Toronto on a buying trip. He is much improved after his recent attack of rheumatism.

The upstairs shoe stores in Winnipeg are developing a nice trade these days. W. A. Moyer, who conducts a cut-rate store upstairs, reports business as good and the New York Shoe House, which specializes on \$3.50 and \$4.50 lines exclusively, is making fine progress.

George Nickel, former partner of John Affleck in the Yale Shoe Store, and recently proprietor of the Nickel Boot Shop, in Winnipeg, which was acquired some time ago by the Rannard Shoe Co., is in business again. He has opened a fine store in Los Angeles, Cal., where his two sons are associated with him.

The T. Eaton Co. have removed their men's shoe department downstairs to the main floor, which is a decided improvement. The ladies' department has been moved to the centre of the second floor. Mr. Caldwell, who is the manager of this department, is showing some very fine lines for Spring and Easter wear, while in the men's range are to be seen some first-rate models.

A. Congdon, formerly general sales manager of Ames-Holden-McCready, Limited, of Montreal, is now in charge of the Wm. A. Marsh Co. Western, Limited, Winnipeg. For the past few days there has been a rumor that an amalgamation may take place between the Wm. A. Marsh Co. Western, Limited, and the H. G. Middleton Co., in which it is stated Mr. Congdon holds certain interest.

WANTS MORE OF THEM

We read the "Shoe and Leather Journal" regularly and like the talks on salesmanship and also stock-taking. Give us more of them.

BLACKENEY BROS.

Petitcodiac, N.B.

LIKES THE STYLE POINTERS

We would not be without the "Shoe and Leather Journal." We are always interested in the cost of doing business and in the different lines that the makers are turning out. We would like to see more manufacturers showing their styles through the Journal, which is right up-to-date in style information and news.

Sincerely yours,
Moncton, N.B.

BOURGEOIS & CO.

Progressive Eastern Shoe House

A Store that Believes in "Doing Things"—Manager Studies Local Problems and Works Advantages—Not Troubled With Approbation.

The city of Three Rivers boasts of an exceptionally fine business and shopping district. This is principally due to the progressiveness of its business men, who practically rebuilt the town after the disastrous fire of 1908, which demolished the whole central part of the city.

One of the most attractive business establishments is the shoe store of A. Corbeil, of which Guillaume Courtois is manager.

The store is a very attractive one, and is exceptionally well fixed for the stocking of surplus goods. Show cases are

attract the young, sell well, and the wage earners who get in their pay envelopes double and triple what they did a few years ago, demand something distinctive, something nobby. They have the money to spend and we have to offer them a wide selection from which to choose."

"No, we are not bothered very much by the approbation evil," resumed Mr. Courtois, when asked that question. "Years ago, it was quite common for us to lose several pairs of shoes weekly through this annoying method prevailing, but that day has passed. We saw the harm it was doing us, so took steps to eliminate the practice. Of course, we have a few customers to whom we send out shoes on approval, but they were more or less friends of the store, folk on whom we know we can depend for safe return of surplus stock sent them. Why, it was the custom here at one time for a woman to come into the store and have four or five pairs sent to the house. She would then go to another store and have perhaps as many more sent from that establishment, lines rang-

THE INTERIOR OF A. CORBEIL'S STORE AT THREE RIVERS, QUE.

used at different points in the shop and give an added air of distinction. A feature of the store is the well equipped shipping room located at the rear.

Mr. Courtois, the manager, is an exceptionally bright young man. He has had over seventeen years' experience in the shoe line, and during that time has mastered all its details. He was educated at Three Rivers, and also attended the Montreal Business College. For twelve years he was in the employ of L. Dassylva, up to the time of the fire. For the last five years he has been manager of the Corbeil store. He is full of up-to-date ideas, and speaking of shoe conditions in general, he said, "Yes, this is a factory town, and nearly every young man and woman finds employment in some of our numerous establishments, but they all buy good footwear—in fact, much better than they did a few years ago. I do not consider there are too many styles at the present day—at least, not for here. Snappy, trappy shoes that

ing from two or three dollars up to five and six. She evidently wanted to gratify a whim or caprice, but would probably wind up by taking a cheap pair. Now, when such a customer enters to-day, and has three or four dollars in her purse, and we show her a five dollar pair, she very soon tells us that she does not desire anything so expensive. She purchases what she wants or what her means will permit, much valuable time is saved, and goods are not all mussed up by frequent handling."

Believe in Advertising

Mr. Courtois believes in the timely use of printer's ink. The store's talks to customers and prospective purchasers generally consist of advice on styles and what is readily selling. A range of prices is quoted. At times neat circulars are sent out to customers. Calendars are distributed yearly, but nothing cheap is given. The policy of the store is that

if you honor patrons with a souvenir it should be one well worth preserving. The City of Three Rivers some time ago issued a souvenir book describing the town, its advantages and its history. Mr. Courtois used this as a means of advertising by securing a large number of these and printing the firm's name on the front cover, the wording of which

Goods Company, Toronto, for the year ended December 31st, 1913, shows net earnings of \$306.88, an increase of \$47,486 over 1912. The balance available for dividends on the common stock, after payment of bond interest, preferred dividends, and other charges, was \$176,831. This balance is equal to 25.3 per cent on the \$700,000 common stock, as

THE FRONT OF A. CORBIEL'S STORE, THREE RIVERS, QUE,

was—"With the Compliments of A. Corbeil, 32 Desforges Street, Three Rivers." By this means the store secured a lot of advertising, particularly on account of a couple of photos of the shop which were included in the book.

Newsy Items of Interest

On the ground that some misunderstanding had arisen between Regina and Gutta Percha and Rubber, Ltd., Toronto, the latter have been granted an extension of 12 months to complete the building requirements of their agreement with the city. The company will be allowed until September, 1915, to complete a building to the value of \$30,000 on the Broad street property, Regina, which they are purchasing from the city, with the proviso that the company complete the construction of the basement to ground level during the present year.

No fewer than 188 of their employees have been with the North British Rubber Company, Limited, Castle Mills, Edinburgh, for over twenty-five years (aggregating 6,322 years). Included in this number are nine people with over fifty years' continuous service (aggregating 535 years), and forty-three with over forty years' service (aggregating 1,919 years). In a photograph is grouped a number of those who have over forty years' service. Two women have each been with the firm fifty-seven years, and one man has served fifty-six years, one fifty-three, two fifty-two, two fifty-one, and one fifty years.

The annual report of the Dunlop Tire and Rubber

compared with 20.3 per cent earned in 1912. After payment of dividends on the common stock, a balance of \$106,831 was carried forward, making a total profit and loss surplus of \$624,194.

One of the biggest sales that Calgary has ever known was held by E. M. Foster, whose store was visited by fire a few days ago. It is described as the greatest day's business of any shoe store in Western Canada. Five thousand five hundred pairs were sold in a single day, furnishing footwear for every sixteen persons in Calgary. Mr. Foster says that his entire stock of 15,000 pairs was disposed of in a few days. Shortly after ten o'clock on the morning on which the sale was advertised to begin, the struggle commenced. It was necessary for Mr. Foster to get a carpenter to rig a sort of turn-stile at the front door, so that the jam would not be too much for the policeman to handle.

W. G. Parsons, of C. Parsons & Son, Toronto, who has returned from an extended business trip to England and the Continent, reports that shoe factories in the Old Country are rather quiet at the present time, but that leather industries are active, and are shipping considerable of their product to United States markets. Since the Wilson tariff removed the duty on practically all kinds of leather the United States is looked upon by both British and German tanners with a considerable measure of favor. Several representatives of shoe factories and leather firms in the United States have been paying a visit abroad to ascertain what they can secure and also to purchase several special brands of leathers.

New Sole Leather that is Rendered Free of Pores

Process Recently Discovered in Germany That May Revolutionize Bottom Stock—Cost is Said To Be Little Higher Than the Best Bark Tanned Leather—The Product is Known as Ankydat—Its Durability and Service

A new process for tanning hides and skins has recently come to the front in Germany, and may be of some interest to the Canadian tanning industry, and to shoe manufacturers. It is claimed that the leather, Ankydat leather as it is called, obtained by the process, is rendered free of pores with the result that its resistance and wearing qualities under every conceivable condition of use and of exposure are very greatly increased, says C. F. Just, Canadian Trade Commissioner of Hamburg, Germany, in a recent report to the Department of Trade and Commerce, Ottawa.

The ordinary methods of tanning prepare hides in such a manner that the perishable properties are enabled to resist all atmospheric influences without materially changing or injuring the effectiveness of the leather. Bark-tanned leather, for example, will, when exposed to air, withstand its influences for practically an unlimited time, but when placed under the water the leather gradually loses the tanning preparation because the latter is dissolved in water before the leather is impregnated. Thus, when such leather is used as sole leather the longer it is worn the less resistance it offers to dampness and water. This is especially true of leather tanned by the so-called quick modern tanning process. By the chrome tanning process the attempt of applying the tanning stuff to the hide so that water will not dissolve

it, has been successful, but if the leather be used as sole leather, it is soon found that the hide has absorbed only a small quantity of chrome, and that the product is very porous and freely admits water inside.

Characteristics of Process

The feature of the process in connection with the Ankydat leather is that a substance has been introduced into the leather which is incapable of being dissolved, and, further, that by the aid of a diffusion process the pores of the leather are so filled up that one can speak of a leather as absolutely without pores. It is claimed that the result is unattainable with all other known methods of tanning.

When once through the process Ankydat leather is water tight, it does not dry out, and it does not change its weight, it cannot become mouldy, and will not, when used as sole leather, cause slipping. It is claimed also that owing to the complete impregnation, the particularly porous parts of hides and skins, from the head, neck and flanks, can be just as successfully treated and rendered just as serviceable as the hides from the other parts, and therein lies the financial advantage of treating several kinds of hides. The principal features of this tanning process are stated to be the use of asphalt and residue of petroleum. In consequence of the

THE REAL VALUE OF POSTER AND BACKGROUND

The real value of this window is the simple, easy-to-make poster. This poster would have been just as effective if it had been done on wrapping paper with crayon or charcoal. The background was in the form of a four-panel screen, covered with grass cloth. An adjustable background

is an advantage, because it affords an opportunity for changing the depth and shape of the window and thus helps the trimmer in many ways.—Illustration from "There's Money in Your Show Window," issued by National Cash Register Co.

low prices of these articles the cost of this leather is said to be not higher than the best bark-tanned sole leather, and experiments conducted over a long period have demonstrated the durability of Ankydat leather to be double that of any other.

Ankydat Felt and Its Uses

Samples of Ankydat leather and also of felt, which has been treated by the same process, have been forwarded to the Department.

In connection with the treated felt, it may be mentioned that the material is found to be of special value as a filling for the hollow of horses' hoofs for snowy weather, whereby the balling of the snow is prevented.

It is also possible to even replace the shoe by using felt, provided it is cut large enough, or with another construction of shoe, a felt plate covering the whole hoof could be used.

The principal advantage of this felt lies in the fact that the horse cannot slip, and thereby renders travel on payment or asphalt much safer, and the smallest stone will not glide on the felt, but imbeds itself in the felt, and in this manner a rough surface is developed, which gives the horse a sure footing on snow or iced surfaces.

The treated felt can also be used as a substitute for rubber for insulating electrical machines. The treated leather is also placed between the rails on the permanent way of railways.

The Shoe Trade Down East

What the Average Citizen Spends in Footwear and Value of the Stocks Carried in the Maritime Provinces.

The estimated population of this consular district is over 200,000, and every person is a consumer of boots and shoes. The well-to-do adults in the district purchase footwear to the amount of \$15 each annually; the workingmen in mines and industrial plants, as well as each of the adults in their families, buy from \$3.50 to \$6.50 worth; farm laborers and school children require \$4 worth each; fishermen about \$8 worth, and the remainder of the inhabitants, including small children, \$1 worth each, making the per capita annual expenditure, at a conservative estimate, something over \$3. On this basis there is spent in this district \$600,000 annually for boots and shoes, says Charles M. Freeman, United States Consul at Sydney, N.S.

Value of the Stocks Handled

The term boots and shoes, as used in this report, covers leather, rubber, canvas and cloth boots and shoes, slippers, overshoes, rubber boots, goloshes and all the accessories which are, or could be, included in foot covering or adornment. In the district there are six retail houses selling the complete line, stores handling nothing but boots and shoes and carrying an average stock of \$12,000; three department stores, whose line is fairly complete, carry \$10,000 worth each; 25 clothing stores, handling quite a complete line of men's and boys' footwear, carry an average stock of \$1,500 each; the general stores throughout the district probably have in stock \$75,000 worth of boots and shoes, making a grand total for the district of over \$210,000. These estimates have been submitted to a leading dealer of this city who pronounced them conservative; this stock is turned over three times each year. The figures given are those covering the retail trade.

Notwithstanding the figures given do not represent the actual wholesale values, manufacturers dispose of large quantities of goods in Cape Breton, and it is of interest to note what part of this trade is in the hands of American firms. In the calendar year 1911 there were imported from the United States to Sydney, N.S., boots and shoes valued at \$4,940, and in 1912 the customs figures showed an increase of \$2,745, or a total of \$7,685. While this would indicate a

healthy growth, the share of the United States in the total trade is very small.

Has Firm Grip on Trade

The Canadian manufacturer has a firm grip on this market, for except the few coming from the United States, no boots and shoes other than those of domestic make are sold here. It is believed, however, that if the district were worked by American houses as they work similar territory in their own country, fairly good results would follow. It may be said that, with a customs duty of 30 per cent. on leather shoes and of 25 per cent. on rubber shoes, to which must be added the freight, the American manufacturer is excluded at the very start, but the retail prices of Sydney give the aggressive hustler for business something to consider in this relation. The freight probably is no more from the United States into this district than the freight to points in the United States where boots and shoes are now sold and delivered, and boots and shoes are sold in Sydney, grade for grade, 25 per cent. higher than in American cities.

For the best grades sold the buyer pays from \$5 to \$7 per pair, while the same grade of shoes can be purchased in the United States at \$3.50 to \$5. The very best grades as sold in American retail stores can not be had in this district unless specially ordered. The workingman pays from \$3 to \$4 for his shoes and secures values which compare, approximately, with shoes sold in the United States at \$2 to \$3; in fact, a much better shoe can be purchased in the United States for \$3 than in Sydney for \$4.

Classes of Trade

Miners' shoes, handled almost exclusively by stores connected with mining corporations, sell for \$2; large quantities of this class of goods are sold. They are of split leather, having heavy soles, studded with iron or steel, and specially adapted to the work in the coal mines, and it is doubtful if American manufacturers could do anything with this line of trade. Rubber boots of the poorest grade retail at \$3 a pair; the rubber boots that constitute the bulk of trade sell for \$4.50 to \$5.25; storm rubber boots, having a buckle at leg top, sell at \$5.50, \$6 and \$6.50, while hip boots of rubber bring as high as \$8.50. Low over rubbers retail at 85 cents to \$1.25 for ladies' and at \$1 to \$1.50 for men's. All other goods in the boot and shoe line are sold at proportionate prices.

Getting Good Price

These facts give the American manufacturer a general idea of the boot and shoe business of the district, and they would seem to indicate that the Canadian manufacturer is getting a much better price for his goods than the manufacturer of the same lines in the United States, or that the retailers' percentage of profits is abnormal.

With the annual sale of boots and shoes amounting to over \$600,000, with the district's proximity to the United States, especially to the numerous factories in New England, and with the total American imports amounting to less than \$8,000, including mail orders, it would seem that this growing market, which is well worth cultivating, has been neglected. Two American manufacturers who recently made connections in this city are advertising in a small way, and it is natural to suppose that the importations of American footwear will show an increase. The retailers of the district buy large quantities from the factories in Halifax and the Maritime Provinces, and better grades from factories in upper Canada.

"German chemists have perfected a method of making leather without the use of bark at all, with a solution principally of iron. It is claimed that leather can be made in much less time with a material saving of the cost, but the leather is brittle."

What is Observed in Shoes Along Fifth Avenue

The Receding Toe With Large Flat Heel for Men—Colored Tops With Patent Vamps Also Seen—In Women's Lines Whole Quarter Fabrics of Pretty Pattern, Cuban-Louis Heel and Long Plain Vamps Are in the Lead—The Popularity of Shiny Leathers

The current shoe styles as seen along Fifth Avenue and Broadway, New York, are most interesting, writes A. A. Daoust, in an instructive review on the trend of footwear fashions, to the *SHOE AND LEATHER JOURNAL*.

The Foot Fashions for Males

In men's styles, changes are not very noticeable, although there is a tendency for a few more blucher styles than have been shown in the last two seasons, particularly in Oxfords.

The receding toe with large flat heel seems as popular as ever, while the length of the vamp doesn't seem to have

changed very much. Most styles shown are straight lace with invisible eyelets, particularly in the highest class shoes.

A few buttoned styles with drab cloth and buff color tops are shown with pearl buttons, or some with bone buttons to match. These are made on receding toe lasts, and flat heels.

Quite a number of buttoned styles with black cloth tops are observed. Some of these are made with either patent or calf, small piping along the front. These are also made on receding toe lasts. The regular English walking last, with broad shank is shown in high class shoes.

There is a strong tendency to revive the old popularity in men's tan shoes, although the colors shown are more of a

DOES NOT THIS WINDOW MAKE YOU WANT TO TRAVEL ?

Leather goods windows are usually uninteresting, because they fail to tell a story. The floor of this window was unpainted boards. The muslin stretcher used as a background was painted to represent bricks, and a railroad notice was tacked on the wall to suggest a railway platform. This

type of window not only sells goods, but proves to the public that the merchant is progressive and up-to-date and has some foresight in planning displays.—Illustration from "There's Money in Your Show Window," issued by National Cash Register Co.

soft tan. Very pale chocolate would well describe these new tints.

Colored tops in buttoned shoes with patent vamps are shown to some extent, particularly in grey. Men's Oxfords seem to be all as plain as they could possibly be, and, of course, most of them being on receding toe lasts, make them seem plainer.

In women's shoes, quite a variety is beheld. Buttoned boots of course, are worn most exclusively. Colored tops are very popular. Most of these are made with just the forepart of the shoe in patent leather with entire cloth quarters, some in drab, but most of them in black and white, flowered designs. Ninety-five per cent of these styles are made with Cuban-Louis heels with a good solid base and not very high.

Most of these shoes are made without toe caps, and have long vamps and receding toes, making a very snappy boot. One thing also noticeable is a little patent back strap, which some of them have.

A very pretty style which is seen at present is a gun metal cloth top, plain toe, long vamp, made with just the front of the shoe in gun metal leather, and the rest all cloth. These are also made with Cuban-Louis heels.

A few colored buckskin buttoned boots are seen with Cuban-Louis heels. Some patent and calfskin styles are observed with Cuban-Louis pedestals of solid leather. Ordinary Cuban heels are only seen in heavy styles of footwear, but very few are witnessed in good quality shoes.

Low Cuts Have Long Vamps

In low shoes it would be better to say just pumps as nearly everything seen is a pump. These are nearly all made on long vamps, particularly in high-class shoes. Patent leathers don't seem quite as popular in low cuts as they were, and there is a strong showing in gunmetal calfskin styles and also light shiny calfskin. Most are made with Cuban-Louis heels, and 90% are Colonials, with medium size tongue. These are trimmed with rhinestone buckles, some with sterling silver buckles and others with gun metal ornaments.

Quite a few offerings are observed with just the vamp in patent leather or calfskin, and sides and back of fawn suede, grey suede or black suede. The heels on these are Cuban-Louis heels, covered with leather to match the vamps in most cases. Several styles have the buckles lined in suede to match the quarters of the shoe.

Heavy Turned Soles Popular

Some attractive long vamp light pumps are seen, made with heavy turned soles with square edges. These come in patent leathers, and gun metal and have Cuban-Louis heels, and, of course, most of them are Colonials, some made with an elastic band under the buckle to make it hold better. But few plain pumps are seen. They are made plain, with medium vamps and silk bow, and leather Cuban heel.

In Oxfords, the vamps are quite long and these are made just as plain as possible, with medium high Cuban heels. A few are witnessed with invisible eyelets. Some styles are also shown with all leather Cuban-Louis heels. As a whole, the footwear fashions for spring are pleasing, and at the same time sensible.

Leading Things in Paris

The gaiter walking shoe, buttoning altogether at the side, is a leading style in Paris. The shoe in check cloth and patent leather, and a brown leather tie, trimmed with tan, are popular. Cothurne, or Tango slippers, as they are called, are trimmed with embroidery in many cases. Black cothurnes are beaded with jet. The gaiter top is a pretty shoe, but must be made to order. Satin evening slippers are trimmed with lace. Plain satin evening slippers in white or colors are trimmed with bows. In walking shoes, a leather strip at the front protects the shoe against the narrow skirt. The laced shoe is used for walking in Paris and is shown

in cloth and patent leather. The cloth upper is either black, brown, beige, tan or gray. A shoe trunk is used for innumerable pairs of shoes, riding boots, dancing slippers, etc., together with the brushes, polishes and cleaning preparations that make up the foot wardrobe of the well dressed woman. Fancy buckles show dragon fly or butterfly designs, head of an owl with gleaming eyes, a lace bow design in steel, square fancy buckles, etc.

He is Always on the Job

One of the best known shoe travelers in the Maritime Provinces is B. A. Trites, who is a native of New Brunswick. He lives in Sackville, and for the past four years has represented W. B. Hamilton Shoe Co., of Toronto, in Nova Scotia and Prince Edward Island. His first exper-

ience in the shoe game was traveling for G. Bresse of Quebec. His next position was with James Leggett, Montreal. He was also with Cochrane & Cassils, of Montreal, and, before taking up his present connection, he served fourteen years with L. Higgins & Co., of Moncton, N.B. Mr. Trites is a successful salesman and diligent worker, and has many friends in the East upon whom he has been calling for very many years.

The Repairer Knows

The best shoe today is the welt shoe and shoe repairers should encourage people to buy that kind of a shoe, says the Shoe Repairer. The repairers should let people know what manufacturer uses the best material. The repairers know more about this than anyone else in the trade. The manufacturer who makes an honest solid leather shoe should be known to the public. Never tell who makes poor wearing shoes, but do tell who makes the best wearing ones. Repairers could help customers in that manner, and it would be appreciated by a great number. The writer has been often asked by different parties, "Who makes the best men's shoe selling at \$3.50 or \$5?" The writer does not believe that one man could answer that question as well as the average shoe repairer, or the man who rips up old shoes in a large shop. The men are more interested in the question of quality than women, and it is to the men that the repairers should tell what they find between the soles and whether the heel is pancake or solid leather. It is a duty you owe your customers.

A Bitter "Cut Price" War Between Two Shoemen

One Succeeded in Running the Other Out in a Long Continued Struggle, but Finally Had to Give Up Himself—The People Grew Disgusted With the Tactics Employed and Both Dealers are Now in "Has Been" Class

The townspeople said that Jones' store was a good one to trade in and they backed up their word by spending much of their footwear money in his store.

Jones had started in a modest way with a short line of jobbers' shoes and he was gradually building up his business to the point where he was able to discount his bills and carry some little surplus stock as well. It had been a pleasant three years in which he had done this, in spite of the trials and tribulations of a new store in a new town. The town was growing also, and like many new towns, the stores and buildings took on mushroom growth in a single day or a night.

When Opposition Came

Jones was a good buyer and had a good business head on him. He had his little store, his home and his horse and buggy all in his own name. He had also been able to send a boy and girl away for two years' schooling at a good school and things might generally be accounted as prosperous. In spite of this prosperity, Jones kept right on in his path, without trying to turn things upside down or right side up.

He had certain well defined ideas which had pleased his trade and he stuck to them. There was nothing arbitrary about him and he was shrewd enough to change his tactics if he found anything amiss.

But all this was before Smith came to town. On the 6th of May Jones woke up one morning and saw a new sign on a store window in one of the new blocks.

"Smith the shoeman will conduct a high-class shoe store in this building on or about May 10th."

The audacity of the thing completely unnerved the man and when he arrived at the store he was a fever heat. "What room is there for two of us," he cried aloud to himself. "I am the man who should have the shoe business of this town, because I was here first and because I am giving satisfactory service." And in that fashion he talked to himself and to his friends, and even to his customers, until he actually began to believe that he did have a sort of divine right to the shoe trade of his town. But all this talk did not amaze the new storekeeper in the least.

Amid a Blare of Trumpets

He went right ahead and put in a fancy store front, and all the latest fixtures and at the appointed time his stock was in place and the store was opened. There had been a blare of trumpets and a shower of flowers for the public on this great day, and poor Jones sneaked right up to the new store after closing time to see the effect of new ideas. And when he had spent a full fifteen minutes gazing at all the new ideas and stock and had seen many of his customers wearing souvenirs of the opening, he came back to his own store with the one resolve in his mind. He was going to fight this usurper to the bitter end. But he was a crafty man, this Jones, so he waited until several weeks had passed and then he offered one of Smith's clerks a nice increase in salary and took him into his store. It was not long before he found where and what shoes Smith bought and sold, and no sooner did he learn this than he secured some of them and cut the price below the cost figures.

Loud and Sensational Advertising

Sensational advertisements in the weekly papers announced this warfare and the townspeople saw such adver-

tising as the local papers had never contracted before. Jones was worked up to the limit and the new man, who was inexperienced in this kind of competition, made up his mind that he was not to be forced either out or away from this trade. And so they sallied back and forth, each gaining an empty victory now and then and the public taking more interest in seeing what new stunt each would perform than they did in the merits of the bargains offered.

Both dealers were so busy with the details of the campaign that they never stopped for a moment to find out how their business was getting on and they never noticed that the sales, which had increased in number, necessitating increased sales force, had shown a very low percentage of profit and many times an actual loss over the cost. And yet the thing went on until it seemed as though everything in the store would be marked down to the bottom price.

Bank Yanked Him Up

Finally Jones was brought to a slight realization of his condition by the bank failing to renew his note. For a moment this had a similar effect to that of a pitcher of ice cold water thrown on one, but he rallied quickly and listened to the calm words of the bank president: "You are doing wrong, Jones, to try and cut each other's throat in that fashion. Live and let live should be your motto and I advise you to let this price war drop now. Put back your staple prices on your goods and let the other fellow win out or lose on the merits of the case." But the arguments were useless and Jones guaranteed his note with a mortgage on his home. And then he returned to fight again more bitterly than ever.

The new man started to keeping open evenings and Jones followed on, but remaining open at least an hour longer than the other fellow, no matter what the hour happened to be. He grew wan and pinched looking and it was plain to see that the game was telling on him. Once again the banker friend remonstrated with him, but to no purpose. Jones claimed that he could not retire now without ordeal for him. He preferred absolute ruin, and so he went back to it again. Customers began to complain of the service, as the efforts had been mainly to sell goods. The goods were cheapened and many inferior brands were substituted, so that the trade began to go to the city for their buying.

The New Man Failed

Trade fell off to such an alarming degree that he was unable to meet the note and his house went. Then the children were taken from their school. And then the crash came. The new man had failed. Jones had triumphed and he announced it in large type with all the strength of his remaining capital. But the announcement had a hollow ring. The trade had long since ceased to be interested in Jones and his competitor. They had transferred their affection and their trade and the local stores might as well all be dead so far as they were concerned.

Again and again did Jones try to get his footing among them, but no amount of persuasion or advertising could bring back the trade. The old clerks returned, but even they had lost their confidence and their cunning. It was a discouraging six months and the balance sheet showed a loss instead of the comfortable profit as in the old days. It took weeks and weeks to dispose of much of the trash he had bought to retail at frightfully low prices and the com-

plaints and comebacks were never so frequent as now. He had lowered his standard and had lost his prestige.

Work of a Lifetime Lost

Of course the end came more speedily than was expected. The bank foreclosed and the business failed. Jones gathered up the few remaining dollars he had and departed, but he was broken in spirit. The work of a lifetime had been lost.

Smith rallied, profited by the experience and started up again in a neighboring town, but the trade soon connected his store with the former tragedy and he had no peace of mind. His trade fell off again and he too gave up the game and started in with another house as a clerk. And if you mention price-cutting to him to-day he will smile sadly and say: "Well, it may be one way of doing business, but it can never be called competition."

Rubber Company's Big Profits

In the face of declining prices for crude and manufactured rubber, as well as depressing business conditions, the United States Rubber Company reports net profits of \$7,140,125 for the nine months ended December 31 last. These compare with \$7,338,595 for the fiscal year ended March 31, 1913.

Perhaps the most gratifying statement from the investor's viewpoint is the declaration by Samuel Colt, president, that the company is considering the issuance of semi-annual, as well as quarterly, reports in the future.

After allowing for all dividends, the company reports surplus of \$1,811,268, but, as Mr. Colt says, \$764,656 of this was earned in the first three months by some of the subsidiaries reporting for a whole year, so that the actual surplus for the nine months for all companies was \$1,046,611.

President Colt says:—

"Considering the sharp reduction in the prices of tires, the absence of snow during November and December, a general declining market for both crude rubber and manufactured goods, and business conditions through the country—this statement of earnings may be considered gratifying."

He adds that the outlook is promising and says the company is in a strong financial position, cash on hand being approximately \$10,000,000.

Staff Gathering of Historic Firm

The annual staff gathering of the firm and employes of Waterbury & Rising, Limited, held at Bond's restaurant, St. John, N.B., recently, was a grand success in every way. About sixty covers were arranged and from 7 o'clock when the president, E. L. Rising, as chairman of the gathering rapped for order to some hours later, the time passed right merrily. It is said of John Wanamaker, the great merchant prince of Philadelphia, that he was filled with pride on looking into the faces of his many employes. Similar thoughts must have passed through the mind of Mr. Rising at the annual banquet this year, an institution with the firm which dates back more than a quarter of a century, for present were some who had been in attendance for many long years.

C. H. Smythe, manager of the Union street branch, occupied the vice-chair. Now a member of the firm, Mr. Smythe was once only errand boy. That was thirty-six years ago when the business was first organized; he has been with the house ever since and is now branch manager and member of the company. For thirteen years the firm has been making presentations to employes of twenty-five years standing, and to date five such presentations have taken place.

After a most tempting menu had been done hearty justice, there was a round of post-prandial numbers. The toast to "the King" was honored in music and with the singing of the national anthem. J. C. Fetherstone, in a pleasing speech, proposed the health of the president and

E. L. RISING, ST. JOHN, N.B.

general manager which was enthusiastically received. Mr. Rising in reply expressed his pleasure in being present and complimented the staff upon the interest they had at all times manifested in the rebuilding of the business, making special reference to the senior members. He paid a tribute of praise to the Knights of the Grip on the road for the firm, and closed with some words of good advice to the juniors.

An entertaining programme was given in which those taking part in addition to the orchestra present, were E. C. Girven, A. F. Stilwell, Ronald Edwards, and Miss Gladys Fowler, solos; Miss Jean Walsh and Master Willie O'Connor readings, and Joseph O'Brien, step-dance. Dancing was enjoyed after the musical numbers and about midnight the gathering dispersed with three rousing cheers for the firm of W. & R. Limited.

Bottom Finishing of Repaired Shoes

Some shoe repairers will apply a waxed bottom and cover up imperfections in the leather. These imperfections are not hindrances to the actual wear of the leather, but would impress on the wearer that he was not getting full value for his money. The idea today is to repair shoes to look as if they were manufactured and the finish on the bottom of a repaired shoe is a modern requisite. It does not add to the wearing qualities of the shoe, but people are better satisfied when the work is well finished and there is nothing truer in shoe repairing. Try to get the work out as much like brand new as possible, stamp your name on the lining at the top of the shoe in large type and red ink and never stamp it on the bottom. It pays to do this, as many can attest to the fact in large centres where there is much competition in shoe repairing. The bottom of a repaired shoe should be clear and the grain should show under the finish. The black bottom has seen its day and should never be seen on good sole leather.

STRAY SHOTS FROM "SOLOMON."

J. H. B.

You can tell by the way a man straddles a horse whether he is a broncho buster or a tenderfoot. There are those "to the manor born" and those who can't hide the "sow's ear" by any manner of trapping they put on it. There are women with "Lady" to their names that can't get rid of the wash-tub and men that are addressed as Sir Knight who can't seem to keep the "pick" off their escutcheon. A rich man occupied the chair at a meeting the other day which developed a little warmth of discussion. He was cornered by a member in regard to a statement he had made, and he not only showed his teeth, but what was back of them by an expression that a bar-room loafer might have been proud of. As a gentleman present remarked, what was in had to come out. It was a case of "grapes and thistles." "I have seen servants upon horses and princes walking as servants upon the earth." There are princes of the blood royal wearing fustian and jack-a-napes who can't conceal their dog nature by fine clothes and court manners. Of all the sights that make angels weep the most pitiable is the fool who thinks people will mistake impudence for brains and polish for good breeding.

Go to the ant, but go also to the beaver; go to the "busy bee," but don't despise the sharp-nosed fox that profits oft by the knowledge that the little winged worker ever gathers more than she needs for her winter store. Genius has been called "an infinite capacity for hard work," but there are some hard workers that no one would accuse of possessing genius. Plugging is a good thing, but if some pluggers would use their heads more and their hands less, they would reverse things and have harder heads and softer hands, with possibly a great deal more to show for both those useful members. There are men who work away seven days in the week and fifty-two weeks in the year and never seem to get anywhere. They never stop to ask themselves whether they have got the hang of things and how it is that their neighbor who puts in only five-and-a-half days a week, and takes a month's holidays in summer, manages to come out ahead of them in the end. This keeping of the nose on the grindstone is poor policy. "The labor of the foolish wearieth every one of them, because he knoweth not how to go to the city." Have you learned to get away from you task and get its right perspective?

Are you working with poor tools? Do you take time at the grindstone or saw-vise? There are days wasted in hard and profitless toil that might be bright and profitable if the tools were touched up on the oilstone or the saws pointed with a file. How can you expect to get a good day's work out of your staff if you have a poor equipment or are following back number methods? "If the iron be blunt and he do not whet the edge, then must he be put to more strength." Are you using a "dull axe" in your advertising? Are you using the "buck-saw" in your store when you need a fine "cross-cut" or a "rip"? Are you using "screw-drivers" for "chisels"? There are days when "efficiency" is on everybody's lips. Are you neglecting the commonest, common-sense principles and giving yourself double work as well as inviting brain fag

by doing things in ways that are ten or twenty years behind the times? There are men doing "chores" around the shops that could make all the difference between loss and gain on their balance sheets by sitting down and figuring where to cut out useless labor and expense in their daily operations.

The worst of the fool is that he never lets people wait to find him out. It is easier for a westerner to hide his light under a bushel than for a fool to keep his counsel. "When he that is a fool walketh by the way his wisdom faileth him and he saith to everyone that he is a fool." Give him rope and he will use the first lamp-post he comes to. Stick in a pin or pump a little hot air into him and poof! pop! up he goes. All of us need to have the lesson hammered into us of keeping our mouths shut. We talk too much. If we could only keep back half of what we tell people, they would be better off and we would be more thought of. Two men, one of them a doctor, were airing their views at the rear end of a street car the other day. After they got off one passenger remarked to another as to the professional man, who is quite a figure, by the way, in social and political circles—"do you know that b—y fool?"

If you horn into a quarrel you may expect either to get gored or roped. If you butt into a private game you can't complain if you get the chalk knocked off your cue. There are people who are everlastingly in hot water because they can't keep their fingers out of the neighbors' pots. "Whoso breaketh a hedge a serpent shall bite him." Mind your own business and you will not have so much trouble with your neighbors. Stick to the straight paths and your reputation will not be a football for gossip. There are some people who would sooner break hedges and jump fences than walk the straight and narrow way and they are forever whining about people being against them. If you have become a business "dodger" it isn't any wonder you get the wrong side of the jug from your neighbor and are called "foxy" by travelers. There are men who would give their right eye to get back what this fence jumping has cost them.

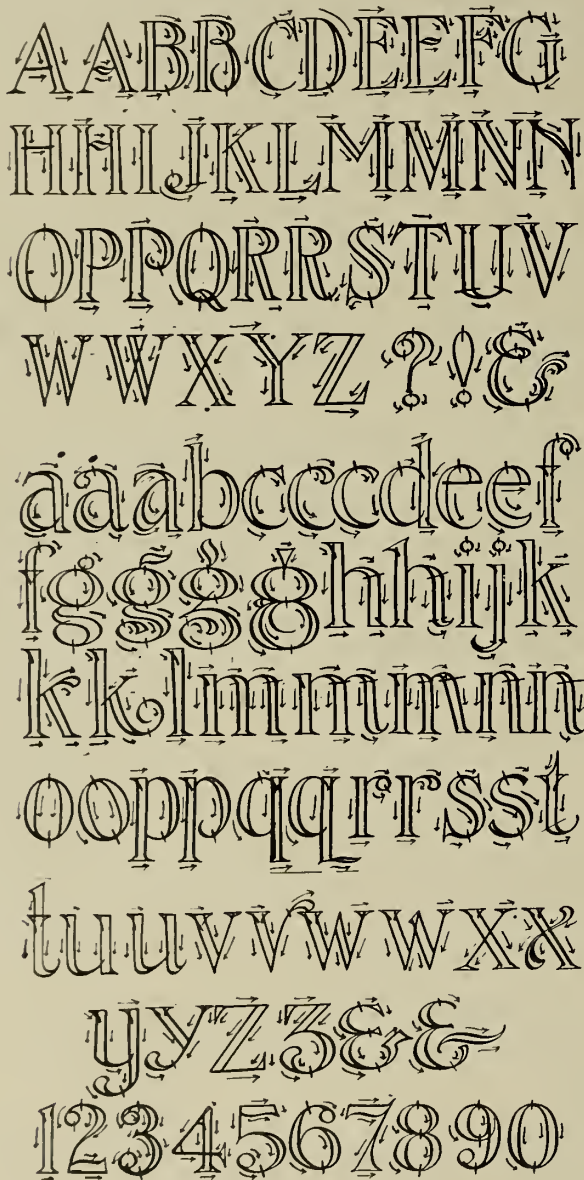

Popularity at church socials or political shindigs is not always a good asset. A glib tongue and a castiron stomach do not often go with a first-class commercial rating. There are lots of men who can get up behind a banquet table and tell how a business or community should be run who have not made much of a fist of their own affairs, and would no doubt make a sorry pickle of the country's business if they had a chance at the helm. If the "Empire to Which We Belong" depended on the flap-doodle and flag-waving of post-prandial orators who work themselves into hysterics over the "British drum-beat" or "The Peerless King," we might soon be sawing wood for the Kaiser or doing chores for Uncle Sam. Have your fun, but "keep your eye on the fight." "A heart is made for laughter, and wine maketh merry, but money answereth all things." The love of it may be the root of all evil, but money itself is the power behind the gun in business.

Majority of Stores Want Uniformity in Card Writing

Card Writer Can Be Successful if He Can Make Three Alphabets—Lesson in the More Refined Roman Lettering—This is Graceful and Adapted to Small Cards Particularly—Class of Pen to Be Used for the Work

By R. T. D. EDWARDS, with the Robert Simpson Co., Limited, Toronto

An article on card writing came to the notice of the writer a few days ago in which it was stated that one could not take a position as card writer unless he had half a dozen alphabets that he could write quickly. That may be true

in cases where the writer is working where he has hundreds of customers to please, but in a small store, the card writer can be just as successful if he has three alphabets which he can make without referring to his chart. The majority of stores want uniformity and not such a mixture of types.

There are three distinct classes of lettering—the large heavy face type, the more graceful Roman lettering, used for both large and small cards, and the very small pen lettering. If a man can say he is master of these three and has a fair degree of speed, he need not be afraid to say that he is a card writer and able to hold down any job.

Roman Lettering Adaptable to Any Ticket

Last month a heavy face type was illustrated for use on cards which were to be read at a distance, but this month

the more refined Roman lettering will be taken up. This type can be used on almost any class of ticket, but it is advisable to confine its use to small cards or a good class of window ticket. It will be noticed by the chart, that a few of the letters have been repeated in order to show how a few little variations may be used to break the monotony of the card and get away from the appearance of printed type. This alphabet is made in the same manner as the one of last month. A blunt pointed pen is used, either with or without an ink retainer for doing the outline. A Soennecken pen, No. 2½, with a brass inkretainer pulled over, is fine for this class of work. A pen nib with a small half egg shape retainer underneath it, is also used—the point of this pen being very flexible and springing back into place after every stroke. It is a very rare occurrence to have one of these nibs break. This one is also good for lettering on mat board.

Start at the Beginning

A bigger lesson than usual has been given this month, and it will take considerable time spent in practice during the coming weeks to master it, without the use of a chart. It will mean that every moment that can possibly be spared must be utilized. It would be advisable to start at the lower case alphabet first, as it is the one that is used most. Start with the "a" and conquer it thoroughly before going on to "b." The arrows indicate the direction in which to make the strokes. When you start to make a stroke, do not lift the pen until it is completed. By following this rule, the letters may be formed in a clear cut manner, which is impossible if short choppy strokes are taken. Always carry enough ink in the pen to complete a stroke. Then, again, don't have so much that it will be overloaded and cause a blot at the beginning. The spurs of the letters should be made when the ink is running low in the pen. This should be observed so as to get a sharp point on the spur, which cannot be secured when a pen is full. The carbon ink, which is used for pen work, has a tendency to clog the pen. This necessitates

| | | |
|---------------------|---------------|-------------------------------|
| Special Values | New Design | To Clear \$1 ⁰⁰ |
| Reduced to \$349 | \$1250 | |

cleaning out every little while in order to get the best results, and in order to work quickly. Clean the pen very often and a decided increase in speed will be noticed. Old ink should be strained occasionally to eradicate any hard particles.

Figure No. 1 shows a collection of plain price cards, with Roman lettering and figures in use. The collection of six small cards shows some dainty ideas which may be used for spring display. Some of this lettering was done by the

outline method on white and fancy mat boards. Floral cut out designs have been used on some of the cards.

Practice is Price of Success

It may be thought by some that practice has been too much emphasized in former articles, but anyone who has

brought himself up to a high standard in this work knows that it is only by this means that such a standard may be obtained. The very best articles may be read, but the results lie with the persons themselves and therefore when the need of practice is urged, a little reflection will show that this is the most important thing in the making of a successful card writer.

Origin of Standard of Widths

Some years ago shoe manufacturers decided it was better to have definite widths in shoes, rather than use the old doubtful terms of "slim, medium and full." One of the first men to adopt this method was John C. Haskell, who was born in Philadelphia, in 1815.

The restless Yankee spirit sent him roaming where he could work at his trade, and he worked in Haverhill and Philadelphia, later returning to Lynn. He worked for a short time for a man in Boston, who made shoes to order, copying French styles principally, and saw where he could improve upon his methods, and concluded to engage in business for himself.

With a capital of 25 cents in cash and \$50 worth of stock Mr. Haskell finally went to Boston and began making shoes. He had no difficulty in securing customers, for he made well-fitting shoes from the start, and secured a ready sale for them. In those days the average wages of shoemakers were \$6 a week, and if he had a wife she bound the shoes and earned

enough to clothe herself and the children. Wages were very low until the Civil War, but it was also cheaper to live at that time.

Mr. Haskell was struck with the variations in the widths of shoes. He found that while some numbered them, there was no rule to which the shoes had to conform, and the width marked on the shoes was not any sign that it would be the same size as that of another manufacturer's shoe marked the same. He also found that there was no standard rule of the relative dimensions of the last at the ball and instep, and, after experimenting a while, he formulated his rule of "Quarter inch between widths and half an inch between ball and instep." At first he numbered widths 1, 2 and 3, but some other manufacturers used the letters of the alphabet, and later this rule was adopted as the United States standard, which, with slight variations, is used today.—Lynn Item.

Repairers Should Get More

People generally marvel as well as complain about the high cost of shoes, while there are those who frequently go so far in their objection as to declare that the dealers are reaping an additional profit in the form of a monopoly hold-up price, says an exchange.

Such is by no means the case. The fact is that for several years leather has steadily increased in price so that it is only natural that shoes would become more expensive. Of course, on the other hand again, most people are in a better position financially than they were in the days when shoes sold for one to three dollars less than they do now, so in reality they do not feel the so-called pinch of more costly shoes.

Though shoes have advanced in price, it is strange to notice that prices for repairing shoes have remained the same. How the shoe repair men can stand it seems very strange. They, like the shoe manufacturer, must pay a higher price for leather, office expenses, workmen, machinery, and supplies than was charged several years ago—yet their prices have remained practically the same. Judging from the facts bearing on this situation one would almost suppose that some day there will be an advance for shoe repairing, the same as for manufactured shoes. Surely it is only just and fair that the charge for this class of work should keep pace with the rising tide of increase in cost of supplies, like all other commodities in the same line.

He Knows Where He Is At

"The secret of success in all shoe retailing is in keeping stock so well assorted that you have no dead ends on your shelves," remarked a leading Western Ontario shoe retailer the other day. "Now, I have never had a sale so called, in years, although I have bargain tables which serve as an outlet. I believe that I am able to keep my stock as well assorted as I do, by means of the splendid system which I adopted some years ago. I have here a stock of several thousand dollars, and I will guarantee that in going over it you will not find more than \$100 of junk, in fact, I don't know that I have that much. I have a few tan rubbers, but that is about all in the line of discards, except, of course, some extreme sizes. There is no business that you can go into today whereby you can pile up old stock and load your shelves down quicker than in the shoe game if you are not careful and circumspect. That is the reason so many fellows go down and under. They have too much ballast, whereas what they need is more sales or turnover to keep things on the move. Overbuying is one of the worst features or perhaps, I should say, faults, that the average dealer can fall into."

Canadian Day at the Boston Fair

Managers of the big Shoe and Leather Fair to be held in Boston next July have made arrangements for a special Canadian Day. There will also be a special Canadian section at the Fair, where visitors from Canada can make themselves at home and meet their friends, the booth of the Canadian SHOE AND LEATHER JOURNAL being Canadian headquarters. A large attendance is expected from Canada, also from England. The management reports that the Fair this year will be the largest and best attended of any they have ever held. The Fair is under the management of R. C. Jacobsen, president of the Jacobsen Publishing Company, who has been holding successful shoe and leather exhibitions in the States for years, and the coming Fair is the seventh held under his management. W. D. Bennett, vice-president and New England manager, is well known, not only in the shoe and leather trade of the States, but also in Canada and in England. The Shoe and Leather Fair will be the centre of many important meetings and trade gatherings with visitors from all parts of the United States, Canada, and many from abroad. The management reports that exhibition spaces are being taken rapidly, and under such and able experienced management, the Seventh Shoe and Leather Fair should prove an unqualified success.

Fifteen Years With One Firm

Fred. O. Mumford, manager of the Halifax branch of the Amherst Boot and Shoe Co., is a native of Amherst, N.S. He started with the shoe company in that town some fifteen years ago and says that, being fond of the business and his associations being both pleasant and encouraging, he has never had occasion to start in any other line. After serving five years in the Amherst plant he was transferred to Halifax to assist in the management at that end. During the past four years he has had the whole responsibility, and

being a shareholder in the company, has naturally been very keen regarding its welfare. Mr. Mumford is personally acquainted with 99 per cent. of the trade in Nova Scotia and his business relations with the various members have always been of the most agreeable character. He thinks Halifax is one of the finest cities on the continent in which to reside. Mr. Mumford says that although he is thirty-

three years of age he feels like a lad of twenty. He has been married six years and has one son.

Traveler in His Sample Room

J. E. Firth, who, for the past eighteen years has represented the W. B. Hamilton Shoe Co., of Toronto, in Eastern Ontario, maintains a centrally located sample room in Peterboro. It is in the building of Hopwoods, Limited, wholesale dry goods, being on the ground floor at 364 Water St. The site is convenient to the retail trade, leading hotels and railway depots. Mr. Firth's sample room is large and commodious being artistically decorated and fitted with display stands to suit the lines carried. It is well lighted and steam

heated and in front is a handsome gold sign advertising the firm and their lines. Mr. Firth is personally one of the best known knights of the roads in Eastern Ontario and in January last was elected vice-president of the Peterboro Commercial Travelers' Association. He takes an enthusiastic interest in everything pertaining to the welfare of the traveling men in Eastern Ontario.

Using Celluloid Box Toes

The use of celluloid box toes is a new idea in Lynn shoe factories. The toes are cut from sheets of celluloid, especially prepared for the shoe trade. They are softened in an ether compound, and are quickly moulded to the toe of the shoe. It is said that celluloid counters will soon be used. The celluloid does not take the place of much leather, because very little leather has been put into box toes of women's shoes in recent years, says a recent despatch.

New Offer Made for the Stock

A fresh offer has been made for a block of Ames-Holden-McCready stock, according to a circular issued by Ross & Anger, Montreal. It is as follows: For some time past our clients have been endeavoring to secure a considerable amount of Ames-Holden common stock for one of the largest manufacturing concerns in the United States. The president of your company refused to put a price of \$33 per share on his holdings of 12,000 shares, and we are now asking him if he will sell 3,000 shares at \$28 per share and 3,000 at \$30. That is, if the shareholders will agree to sell an equal number of shares on the same basis. The advantages to be gained by the American concern taking such an interest in your company should be the greatest value to the company. The shareholders are asked to give an option on at least one-quarter of their holdings at \$28, and one-quarter at \$30, good until the date of the next annual meeting of the company, which takes place around the end of June.

"Tom" Sheppard Had to Pay \$3 For His Shoes

Not a Single Establishment from One End of Canada to the Other Would Cut the Price—The Policy of Using All Customers Alike and Guaranteeing the Shoes to Give Satisfaction or Money Refunded Seems to Be the Key-Note of Shoe Retailing To-day—The Reason Dealers Would Not "Throw Off that Quarter."

THE PROBLEM

Tom Sheppard, who has been a frequent visitor at your store in the past, comes in and asks to see a strong, serviceable shoe for general work on the farm. You show him several staples in pegged, loose nailed and Standard screw, various prices. Finally, he selects one which sells regularly the year round at three dollars.

On being told the price he hesitates and offers you two dollars and seventy-five cents, saying that no other shoe suits and fits him as well as this one which was a Standard screw, tan grain blucher, whole quarter, double sole, with plain toe, and brass eyelets.

Now, in the past you have rather prided yourself that your store is strictly one price with no favors shown. You put a fair profit on your shoes, but always get the marked price—which is in plain figures.

Still, Mr. Sheppard has been a good customer and will likely remain so if handled properly.

Would you depart from your regular practice and cut the price, and if so, how are you justified in so doing.

If you would not "throw off the quarter," what would you say to Mr. Sheppard to thoroughly convince him that you were right in your attitude and thus hold him as a customer of your store?

In dealing with Mr. Sheppard I would at once decide not to part with the shoes for \$2.75.

Personally speaking, I pay special attention to such customers or those known as tough or hard to please. I am always trying to improve my salesmanship and these are the class that test one. I can safely say that it is surprising what a clerk can do if he or she will only make it a point never to lose his temper and enter as much as possible into the customer's position. Any clerk that does not give his whole attention to such people underestimates the art of salesmanship, and it is necessary for a clerk to be shrewd and know something of a customer before he approaches him or her.

I find it impossible to begin my attack on Mr. Sheppard without first mentioning the above.

I would, in a quiet, polite way, tell Tom Sheppard that I could not throw off that quarter; that it would be very unbusinesslike, and that if we could sell that particular shoe for \$2.75 we would do so; that we catered to such and such a trade (explaining the difference between a small town store and some stores in large cities), and expected to see them back again for their next pair of shoes.

I would tell him that we had so far refrained from doing business on the overcharge plan, and that we had no intention of beginning such a system.

I would explain the harm it would do to our trade, at the same time laying emphasis on the integrity of our store.

I would take advantage of the fact of him wanting that particular make of a shoe by again pointing out its superiority compared with the others, the better leather in the uppers, the double sole, and especially the fact of it being a Standard screw, which nearly always eliminates any uneasiness from the inside.

I would make sure he was listening and that he knew what I was talking about.

Throughout I would be cautious and business like, but never offensive, and one particular point of my talk would be to speak according to his movements, but never showing any signs of defeat.

Of course Mr. Sheppard would by this time determine my further conversation.

If he still hesitated and the fact that his attitude vouched for little reason, I would throw out a few hints concerning the price of farm products such as butter, eggs, potatoes, onions, compared with a year or so ago, which ought to bring him to his senses.

Perhaps this is all the space I am allowed, but if he was willing to argue, and I had the time, I would stay with him all day. I am sure he would not point out to me why I should sell him the shoes for \$2.75, but I would have a great many points in reply.

However, if he decided not to take the pair and walked toward the door I would not stop to put the shoes back on the shelf, but be at the door as quick as he was and open it for him with a smile, and if the occasion allowed it, leave him with a grip of the hand.
—JOHN DAY, with M. B. Young, 924 Bloor St. West, Toronto.

* * *

FIT AND WEAR WITH THE PRICE

No, Mr. Sheppard, I cannot sell this shoe for \$2.75. We have one price only to every one of our customers.

You can buy this shoe as cheap as any person, and no one can buy it cheaper than you can yourself. In this way every person is used perfectly right. We show no favors to any one. All of our shoes are marked in plain figures so that any customer can tell how much any pair will cost him. It would not be fair to you, Mr. Sheppard, for me to sell this shoe to someone else for \$2.75 and charge you \$3.00 for identically the same thing.

None of our shoes are marked high enough to cut the price. This shoe at \$3.00 is certainly better buying than you will often get elsewhere at a cut price.

The shoe fits you well. In buying a cheaper shoe, you cannot get as good a fit as you will find they are not lasted as closely. Fit is one of the most prominent features in satisfactory footwear.

You will notice, too, Mr. Sheppard, that this shoe is made with a whole quarter which means less stitching,

THE PRIZE WINNERS

- 1.—JOHN DAY (with M. B. Young) Bloor St., Toronto.
- 2.—F. J. LESLIE (with Allan-Cumming Co., Ltd.) Moose Jaw, Sask.
- 3.—W. A. COCHRANE (with L. Higgins & Co.) New Glasgow, N.S.

subsequently less repairs, as the life of a work boot is what counts to-day.

Also, look at the bottom of the shoe. It is a double sole and put together with Standard screws. Now, take any of those other shoes, nailed or pegged, and you will find they are never so serviceable as the Standard screw. The ordinary nail will rust with the wet and in dry weather wooden pegs very frequently dry out, thus letting the sole pull off.

As far as comfort goes, you will certainly find this shoe will be perfectly satisfactory. Being made without a toe-cap, there is no heavy seam to bind your toes.

Now, three dollars may seem a little expensive to you at present, but there is one thing sure, Mr. Sheppard, you will be well satisfied with the service you get from this shoe. I fell quite sure that you will never begrudge your paying three dollars for this quality.—F. J. LESLIE, with Allan-Cumming Co. Limited, Moose Jaw, Sask.

* * *

CONVINCE HIM OF REAL VALUE

As regards selling Mr. Sheppard these shoes, I would like to give my way and method of dealing with him in this particular case. It is just what I should have to do if he came into the store in which I am employed in, as this firm runs a strictly one price system to all.

Now, Mr. Sheppard no doubt is one of these men that, as a rule, is quite firm in his decision as to what he prefers to pay for his shoes, especially so in this particular case. Of course, there is always some little opportunity for the clerks to suggest something, and perhaps help to change his mind just enough to agree with him in his way of thinking. If I am thus far successful, why the rest of it ought not to be a very difficult proposition to deal with.

Now, in order to do justice to Mr. Sheppard, as well as ourselves, I would have to convince Mr. Sheppard that he is getting the best possible value at that particular price; also, that he is not only getting a splendid pair of serviceable shoes for his work, but an honest and fair purchase for his money. As Mr. Sheppard knows me from past dealings and has always found me to be upright and honest in my business transactions with him, either in the store or outside business hours, he agrees with me and I have succeeded in making my sale. He takes the shoes, but perhaps as he is leaving the store he makes this little remark, that "if these shoes don't wear good and stand the test I will bring them back to you." I say to him, "All right, Mr. Sheppard, bring them in and we will make everything satisfactory to you, as that is our business, to please our patrons." Then he leaves me with a happy good day.

Now, it is not long afterwards that he comes back again, not to complain about the shoes, but to buy another pair for a friend of his. He wants the same shoe for he says "that they were the best thing he ever had for that purpose." And he adds, "that he now thinks that I was quite right in what I said about them." He states that he doesn't mind paying an extra quarter, so in this way you gain his confidence. He is still a faithful customer and one of your best advertisements.—W. A. COCHRANE, with L. Higgins & Co., New Glasgow, N.S.

* * *

BY CUTTING STORE WOULD LOSE HIS RESPECT

I would not give the desired cut of twenty-five cents, as asked by Mr. Sheppard, but would endeavor to reason with him, somewhat along this line.

Mr. Sheppard, we have greatly appreciated your trade in the past, and assure you that if it were at all possible, or straight-forward to do so, we would allow you the price cut you ask, but our goods are marked low, for a strictly one price policy, to which we must adhere, otherwise we

would lose your business opinion of us. We can honestly guarantee these shoes to be chrome tanned kip, strongly reinforced wherever the wear comes, Standard screw, solid leather insoles, counters and full-soles, with not a particle of shoddy in their make-up. They are dandies, fitted so perfectly and nailed so smoothly that they will never hurt your feet, and they are worth every cent we ask you. We are so assured of this, that if you will try them, and they do not prove satisfactory as you expect, we stand willing to make any allowance you think yourself is fair.

By reasoning thus with Mr. Sheppard, I am positive that I could convince him of their good qualities, and at the same time would not have to deviate from our "one price" rule, and make him a fast friend and customer.

If we give him the desired cut, we would lose his respect, but by holding to our principle, he will think all the more of us. It will probably strengthen his business association with us, and will also probably lead to his recommending us to his friends, as a store that stands by its policy, and guaranteeing value at the same time.

If he does not buy don't get sore, but let him leave with a smile. He is almost certain to come back for his next pair. I think this way of handling the case would be a most acceptable one.—WILL HAIGHT, with the G. R. Christie Co., Aylmer, Ont.

* * *

MAKE THE TALKING POINTS TELL

I would refuse to cut the price to Mr. Tom Sheppard. I would pick up the shoe and get Mr. Sheppard's close attention to it. Then would point out the qualities that make the price it is.

The upper of this shoe is a tan grain stock of first class selection. It will be pliable and will withstand the wear given it by combat with the soil and water. The way this shoe is put together, will also prove the most serviceable style and puts it in a class by itself. A whole quarter, plain toe blucher boot, can only be made from the choicest of skins, as such large pieces are necessary in cutting, that only the selected hides are large enough. Then, again, note the absence of seams, thus adding strength and durability and the necessity of the best class of shoemaking. These brass eyelets also add to the strength and appearance of the shoe.

Now note the sole and the durable appearance of this double sole of Standard screw construction. Thus extra strength and wear are obtained by this process as nails are so put in as to prevent them working in or out, as the machine turns them in the leather to act as a clinch, so to speak. The double thickness of the sole through to the heel gives the shoe strength that is not possible in a single soled shoe. Thus the combination of these two points warrants the price to be greater than the others shown you.

I am sorry, Mr. Sheppard, I cannot afford to sell you this shoe any less than three dollars. The cut asked is small but I cannot afford to do so. All these points in this boot command the price. You feel it is the shoe for you, then as an investment it will pay you to buy it. Our store policy is very simple and cannot be departed from. The marked price in every case is strictly "one price policy," and means a fair profit very carefully worked out, and to cut the price means my profit gone, thus my livelihood. Then, sooner or later, I must close my doors. True, the twenty-five cents will not do it, but the principle will, as the next customer is just as much entitled to the same cut.

Mr. Sheppard, you have always been a good customer of mine and have had satisfaction or you would not now be buying a pair of my boots and that without any complaints regarding former purchases.—D. J. M. McGEARY, with C. D. Mitchner, Saskatoon, Sask.

Patent Leather and Fabrics, Biggest Call

(Continued from Page 38)

effects, and a multitude of quarters will be everywhere noted. With great activity in cloth toppings, novelties reign supreme. A slit skirt shoe of regular height, buttoned to the ankle bone on the outside, and cut in a V to the top is lined with pink satin, and makes a decided novelty.

Ornamentation on Slippers

"In slippers and party shoes ornamentation will continue. Dress fashions show that trimmings, festoons, tassels, pendants, ornament the costumes, and these are bound to influence the shoe."

Speaking of autumn styles the Dayton Last Works, of Dayton, Ohio, say: "In the women's lines the narrow recede toe, carrying about three inch vamp and two inch heel, seems to be meeting with most favor in the cities. There are a few manufacturers who are showing a medium wide, square toe, so called French, but these are made with a short vamp, with 14 to 16/8 heel. At this writing it is problematical as to how strong they are going. With the rank and file the

fort in this toe than in the low recede toe, and with men it seems to be the nature of the beast to want comfortable footwear.

Boys' styles follow the men's as a rule, with the exception that there are very few selling in the recede toe, as they are still following the men's in round, medium wide toe features.

Button Boots for Dress

"The sale of button boots shows some increase," says one leading manufacturer. "One reason for this lies in the fact that most men buy the button pattern for a dress shoe. When these shoes become a little soiled in appearance they are used for every day street wear and a new pair purchased for dress purposes. This applies to the average man as, of course, the really stylish dresser who wears evening clothes and the correct footwear that goes with them keeps on hand suitable footwear for all occasions.

"The increasing demand for cloth and suede tops in boots is also favorable to making the button style more popular. The dancing fad has materially increased the sales of men's pumps, many being provided with the Juniper

MEN'S GUN METAL BLUCHER, FINGER FOXED, MILITARY HEEL—BY JOHN McPHERSON CO.

WOMAN'S PATENT LEATHER, WHOLE QUARTERS, MOHAIR CLOTH, KIDNEY HEEL BY AMES-HOLDEN-McCREADY

MEN'S VELOURS CALF BLUCHER, WHOLE QUARTERS, MODERATE RECEDE TOE BY AMES-HOLDEN-McCREADY

medium wide and medium high toe is still in vogue. Misses' and children's shoes are following along the line of last season, which has been in the medium wide foot form foreparts. Misses' shoes, in recede toe, have been shown by a few manufacturers, but do not sell."

Some Characteristics in Men's

Speaking of men's styles, it may be pointed out that comfort, appearance, ease and simplicity are much in evidence and while some extremes are shown, the general trend is for custom effects, bals being the favorite with the best dressers.

The SHOE AND LEATHER JOURNAL has pointed out that the long drop toe would prove the strongest sellers in the highest class trade. Many persons, however, feel that in men's footwear the medium recede toe will go the best in some centres. There are a number of manufacturers showing the so-called modified French toe, in the men's line, which is not as long drawn out in the forepart as French shoes are usually made, but has the square effect at the end of the toe. The popular sellers in the men's line will be the medium high, medium wide toe, as there is, of course, more com-

sole leather. Shiny leather is also gaining favor, although gunmetal and dark shades of tan calf are in good demand."

"The modified recede without the acute drop at the toe will be the strongest last of the season the country over. From being a strong city style it will be the features of the country trade," says the Boot and Shoe Recorder in a consideration of men's styles.

"The medium high toe with the one-inch heel ranks second. This style predominates in the medium price lines. Almost total obliteration of the acute high toe. The swing last with almost a straight inner line comes into the men's shoe field to some extent. The newest French recede toe, duck-shaped contour of sole, will find its only interest in men's high-grade shoes.

Some of Leading Styles

"The bal predominates in city lasts in simple effects with invisible eyelets and small round laces. The new Raglan blucher with wide opening at the throat presages a popular approval. The simple bal, blind eyelet up to the two top hooks, is in line with the slim trouser styles predicted. The full vamp without cap or stitching is evident

in tan models. Button effects diminishing on account of recede toe lasts. The only salvation of the French toe is in its sale to extreme dressers who wish to be different. The elongation and the sharp drop at the tip necessitate long fitting. If the fitting is made from end of heel to ball it will

WOMAN'S PATENT BUTTON, MODERATE RECEDE TOE, CRAVENETTE QUARTERS, CUBAN HEEL—BY PERTH SHOE CO.

not be uncomfortable, but size taken according to stick will be unsatisfactory.

Marked Change in Heels

"Heels will be lower and broader to give that flat appearance. The extreme low and the extreme high are not used. The block, wedge and flange heel are general with right and left cuts, concave breasted or square. Wood peg top lifts noted on high grade shoes are simply a novelty feature. All lines show a breadth of shank that indicates good fitting. The straight tread effect with its longer vamp makes a substantial shank necessary. Edges on all shoes will be closer than ever before.

In Tips and Tops

"Simplicity rules. The stitched tip is popular and perforations are waning—two rows of stitching across and two rows with space lead. The corded tip in the West and quite a number of the small prick perforations are seen. The round-cornered top supersedes the sharp edge. The pull strap is eliminated, giving way to the leather cleat, wedge and roll. Wing tips, perforations and saw tooth edges return in heavier grade footwear. With many styles carrying full rubber heel and sole in tan, black and mahogany shades, the fall outlook is good except for the influence of a strong rubber sole in summer that might diminish the fall demand. Shoes fitted with rubber heels represent a decidedly new feature.

"A spat effect as a State Street style is a striking feature with a dark fabric top, patent vamp, long, narrow forepart, without tip, on recede toe last. Cloth tops, black, are noted on patents, gun metals and kids. There are no extras in the good shoes, for neatness is to be desired. The very small corset eyelet with its midget cord lace is a new feature. One or two hooks at the top are the latest variations. Blind eyelets to the top lead.

"Principally dull finish black in calfskin, light sides and some boarded stocks. These will run a strong seventy per cent., patents second, with variety in toppings even to the

extent of Russia and mahogany and buck leathers. The new mahogany and the new nut tan in colored shoes. Kid returns quite strongly in men's dress footwear."

Several Striking Features

Getty & Scott, of Galt, are right to the front again this season with a splendid representation in all lines, which have snap, style, finish and grace. In misses' lines they are showing a button with patent vamp, plain toe, shepherd's plaid top and low heel. This same shoe is also seen with a tartan top in children's and infants' sizes. Another shoe of interest is an infant's extension sole button made with extension heel and forepart with wide, flat bottom. Another strong feature is a child's turn button with heavy edge and rubber spring heel. The little gents' skuffer shoe is arousing much interest. It is made with extension sole, 14 gauge edge, extension heel seat, outside one-ply heel, and comes in black and tan elk. In youths' and little gents' there are shown some new and practical lasts and a strong feature about the line is the fact that the firm use ten gauge soles and provide a good, meaty shoe with lots of solidity. In the misses' McKays a storm leg button, in all leathers, is seen with nine and ten gauge outsole. It reveals a decided improvement in construction and appearance over last season.

Among the special offerings in misses' McKays is a patent leather blucher with cloth top and full round toe. The firm report a good business in children's lines in Good-year welts and also in shoes for youths' and little gents', with heavy double soles for Fall wear. Among the artistic things seen in women's welts were a patent button with mauve suede top, recede toe with tip, Louis-Cuban heel and an all black suede button with long recede toe and kidney heel. Other choice offerings were a patent leather button with tartan top, fancy silk top band, long recede toe, with Louis-Cuban heel; a women's patent button with green calf top and green silk lining, kidney heel, close trim; patent

BOY'S BLACK GRAIN, EIGHT INCH HIGH CUT, TWO STRAPS, AND BUCKLES—BY SLATER SHOE CO.

button with black suede top, short recede plain toe, kidney heel and close trim. More captivating models were a woman's patent button with white calf top, long recede plain toe, Louis-Cuban heel, and a woman's patent button

with circular vamp, plain recede toe, Louis-Cuban heel with whole quarters of black brocade. To mention other creations would convey but little idea of their daintiness and attractiveness. One striking shoe is a women's tan elk golf made with full quarters, imitation perforation foxing, double viscolized sole, rugby back strap, and low military heel. There is also a growing girl's patent button, black cloth top, low heel and heavy edge. Other samples serve to make the line one of the most comprehensive and right-up-to-the-minute in all light and airy styles, with a pleasing variety in heels and impressive leather and cloth combinations. The Getty & Scott range was displayed in Toronto with double sets of samples for three weeks, being in charge of Wm. Chamberlain, sales manager, and S. J. Anderson.

Some Catchy New Lasts

Among the new lasts of the Cook-Fitzgerald Co., of London, are the Yale, the last word in an English model, having that broad tread and receding toe that so many favor. The Yale will be a distinctive hit and is a worthy companion of last season's popular models—the Hyde Park, Swagger, Pastime and Harvard. The Newton in No. 1 and the Tremont in No. 2 factories are also English, but not to such a pronounced degree as the Yale. People of conservative tastes will find them satisfying and beautiful. The fitting qualities are there beyond a doubt. There is one model in the Cook-Fitzgerald line that is bound to make a lot of talk, even if it does not set the world ablaze as a seller. This is the Parisian, a French last of the most pronounced duck-bill type. It is shown on a mahogany tan and is a work of art. They are wearing such shoes in the fashionable centres of Europe and the United States and some persons will wear them in Canada undoubtedly. They are odd looking and different and that is what some men want nowadays. The Merchant is another new last that will make friends. It is a conservative low-toed style that should run for a decade, being much like the Blarney, with the slight raise at the toe eliminated. The Harvest and Reaper are medium toes that will appeal to the man who is not in favor of the English models, nor yet of the high toes, but wants something smart just the same. The old favorites, such as the Hyde Park, Swagger, Pastime, Ginger, Roundup, University, Buster, Stampede, Broadway, Blarney, Wheat, Broker and other models which have made the company's

GUN METAL PUMP, CORDED SILK BOW—BY
E. T. WRIGHT & CO.

name familiar wherever shoes are sold, are all represented. In a word it is a remarkable display of fine shoes for men and one reflecting credit on the abilities of the London firm. One model which shows splendid shoemaking is a wing tip

on the Tremont, with perforations on vamp and quarter. It is one of Superintendent Fred Lovell's own design. The style is a full wing on the outside and a three-quarter wing on the inside, making it a unique and handsome shoe.

Featuring Fabric Lines

The J. & K. line of shoes which were exhibited in Toronto this year by S. Rosecrans Murphy, of Chicago, who

MEN'S WHOLE QUARTER, DULL CALF BLUCHER, ROUND
FULL TOE—BY BRANDON SHOE CO.

covers the Dominion for this firm, revealed that cloth and fabric tops are going to be very popular for the coming season. Numerous quarters are plain or brocaded in different colors, as well as in fawn and taupe. Long pointed toes and crooked heels, as they are known, are the leading features this year. The Spanish and spool are the most popular pedestals. Seventy-five per cent. of the showing is in patent leather—the others being in dull leathers, fabrics and kids. The length of vamp runs from 3 to 4½ inches, the latter being decidedly extreme. Shoes are cut about 7 inches high, with 15 buttons. The fabric models were certainly attractive, with black, fawn and gray leading, on shapely lasts. The firm are advising dealers to strongly feature fabrics during the coming season. The demand for beaded edge turns is also pronounced. The Alamo pump is a small tongue effect, with a jet ornament, set with a tiny diamond, and made in bronze imported French kid. Marlowe pumps, with pearl buttons and cut steel ornaments on the side, are decidedly attractive. A Colonial seamless boot was another of the new things seen, while Parisian effects were observed on a number of models. The Olga pump, with a patent forepart and dull kid back, with white kid lining and gashed effect, was decidedly pleasing. The "V" foxing and "V" tips, or diamond effect, as it is called, were witnessed on many of the splendid samples. The whole line is right up to the minute in correct styles and pleasing patterns.

What Leading Houses Present

L. B. Shafer, of Moore, Shafer Co., Brockport, N.Y., was in Toronto, London, Montreal and other cities during the past two weeks, showing a fine line of fall samples. The long, pointed receding plain toe was much in evidence, carrying the wood and leather Spanish heels. A large number of the samples were of patent, many with fabric and cloth quarters of pleasing pattern. The showing was a strong one—the circular vamp leading—the number of buttons being 12 to 15. Several artistic brocades, velvets and

silks were seen in the quarters. Another feature of the splendid display was a large number of turns and the majority of the offerings carried light soles and were very neat and graceful. One particularly choice sample was a matt kid button boot, full foxed, with Spanish heel. A black buckskin button shoe with a spool heel was decidedly

MEN'S DULL CALF BLUCHER, ROUND FULL TOE, 11-8 HEEL—BY EAGLE SHOE CO.

attractive, as well as some showings of the over-gaiter effect, the quarters being of gray or fawn, with a narrow strip extending to the shank, giving the shoe the exact appearance of being enclosed in an over-gaiter. The moulded shank, close edge, brocade and whole cloth quarters, long pointed receding toe, and spool and Spanish heel are distinct features of the Ultra shoe, which is the name of the high-grade welts turned out by this enterprising company. The medium class line is known as the Brockport, and the McKays as the Moore-Shafer. Colonials were also shown in a number of pleasing styles with long, receding forepart, Spanish heel, with celluloid buckles and other imposing ornaments.

"The Eden" is decidedly snappy. The heels are both spool and kidney, and the Colonials have light weight welt and turn soles. Mr. Shafer reports a strong demand for his line, which is the most comprehensive that the firm has ever turned out.

A Representative Fall Range

Ames-Holden-McCready, Limited, of Montreal state they are showing one of the snappiest lines in ladies' welts, turns and McKays they have ever placed before the public: strictly up to the minute in lasts and styles. Some very pretty effects are created by the combination of fabric blending harmoniously with the leathers.

They have among their lines of ladies' welts a mahogany brown calf button with a plaid cloth top, which is a very effective combination. Also tan calf and gun metal calf buttons with whole quarters of cloth, which are very snappy and graceful in appearance. A large variety of kidney and spool heels are shown on these lines. While the heels are made of leather they have a strong resemblance to Louis XIV. wood heel, which is so much in vogue to-day. In their ladies' turns they are showing various lines of pumps with colonial trimmings. One of their lines, which they call the "Oasis" pump, has a small tongue which forms part of the quarter, the same shape as the steel ornament which covers it. This ornament does not rest on the vamp at all and looks exceedingly pretty and neat. Another neat effect is their "Cleopatra" pump, which has a steel ornament or button on the side and a combination of matt calf and patent colt, giving the appearance of a circular strap lying

over the tongue, fastened on the side by the steel ornament. Their "Princess Pat" slippers in gunmetal and patent are very attractive. They are showing varieties of one and two button slippers. This slipper has the appearance of a regular seamless slipper with an overlap tongue, which buttons on both sides of the quarter, the tongue being cut out in conventional design to give the appearance of a six strap slipper with a small steel ornament on each strap. They have also added to their turn lines heavy soled turns or "mock welts" in cloth top buttons, and plain toes in various leathers.

On their ladies' McKay lines they are showing a very extensive range in cloth tops in medium length vamps and narrow recede toes, which are very natty and give tone to the value of medium priced shoes.

Another fine offering is a velour calf blucher, whole quarter, slip sole, on the Ritz last. This is one of a new range they are putting out for the first time to meet the retailers demand for a medium price calf shoe. The range is a very complete one, comprising all the newest lasts and patterns, and is shown in gun metal and velour calf, tan calf, patent and vici. This range is entirely distinct from the regular high-grade line, which is being toned up, and which is fully equal to any high-grade boot produced.

Besides this the company have changed over and increased their popular line of side leather welts, and the new samples show this range on all the newest lasts and patterns, and altogether their proposition to the retail trade in men's welts is most exceptional. The improvement in the women's line is noticeable, the line on both lasts and leather being complete.

Some Fine Winter Lines

The Tetrault Shoe Manufacturing Co., of Montreal, have a comprehensive and well assorted range of men's welts on receding and semi-receding toe lasts. Patent, gun metal, mahogany, tan, nut brown, Russia, and other shades of leather are shown. One shoe on a new English last with triple-stitched plain tip and medium low slugged heel is very attractive. Others have blind eyelets and full round toe. The extreme wing tip is seen on a bal with perforations around the vamp and tip. A new last with a square round

"DEFIANCE" CALF WATER PROOF SHOE, HALF BELLOWS TONGUE, CHOCOLATE LINED, RAW HIDE WELTING, DOUBLE SOLE—BY TETRAULT SHOE CO.

toe and short vamp is also displayed, as well as a straight last with a slightly raised toe. Many samples have full double soles and are lined with chocolate kid, English calf and nakin. In storm and willow calf several up-to-date shoes are seen. Among the special creations are a curler's shoe with solid rubber heel and sole, and felt slip-sole, while

the lining is of felt, and also a rubber soled blucher with cleats on the top to prevent slipping. In patents there is a strong representation with cloth and dull calf tops, in both plain toe and self tip. Some of the tops are in black serge, gray and other materials. A tan calf oxford, with rubber sole and rubber spring heel, is shown. One striking model is an absolutely waterproof shoe made in "Defiance" calf with rawhide welt, medium high toe, chocolate lined, with half bellows tongue, double viscolized sole and slugged heel. This shoe will not only shed water but will not leak when water is poured on the inside and left standing for hours. The "Defiance" hunting boot is equipped with new bellows tongue, without pockets, double row of stitching, rawhide waterproof welting and full length slip sole, made from chrome elk, ensuring a wet proof sole and lightness as well. It is a decided favorite. The splendid line is being shown in Ontario and Toronto by James Heffering.

Specializing in Women's Welts

The Perth Shoe Co., of Perth, who are specializing in women's Goodyear welts, have added a number of new lasts and are showing a particularly fine range in all leathers. Patent is leading, with dull calf and vici-kid liberally shown. Moderate recede and pointed recede toes are shown, many of the offerings having cloth and fabric tops and whole quarters. Plain and tip foreparts are in evidence and the best sole and upper stock is used in all the lines. The firm are featuring their welts at two seventy-five to the retail trade and are making only the one price shoe. The company are entering upon a direct selling campaign of an extensive character and will have representatives covering all parts of the Dominion. Under the direction of H. H. Lightford, the Perth factory is busy and devoting all its energies to women's welts, which will be sold at the one fixed figure already named. They report that the demand for their exclusive women's welts is very encouraging.

Nice Things for Little Ones

The Macfarlane Shoe Co., Limited, Montreal, who cater principally to the children's and misses' trade, are showing an offering for the 1914 Fall season that they think has been unequalled by them heretofore for style, finish and high class. They have installed several new lasts, among them being a misses' patent fox button shoe, black serge top, imitation tip, heavy extension edge, turn sole, and very low heel. This shoe presents a very finished appearance and is sure to be a trade winner. Another sample seen is an infant's patent whole box*button, dull calf top, plain toe, spring

GIRL'S PATENT LEATHER
BUTTON, CRAVENETTE TOP,
CIRCULAR FOXING

YOUTH'S GUN METAL
BLUCHER, WIDE FULL TOE,
PLAIN QUARTERS

heel on a very broad nature last. Although catering to the children's trade, this company also handle women's shoes to a considerable extent. A natty sample of this type being shown is a woman's fine vici kid, whole fox button, heavy square edge turn, with a recede toe carrying a 12/8 heel. Speaking on style tendencies a prominent member of the

firm said that cloth tops and patent leathers would have a very strong call next Fall. This applies to children's lines as well as to the grown-ups. The variety of colors in children's shoes will still remain. Heels will run about the same as last year, although a slightly higher heel will sell in growing girls' and misses' footwear. A very strong and growing

MISSSES' KID BUTTON, MODERATE RECEDE TOE,
CUBAN HEEL. BY MACFARLANE SHOE CO.

tendency is being evidenced for the broad toe nature last in lines for young children as well as for youths and boys. Many lasts are being shown by the Macfarlane Co. in this style toe as well as a full range of children's, misses' and growing girls' slip soles in dongola and gunmetal. They are also showing a full assortment of growing girls' pumps and strap slippers with low heels, suitable for evening wear. They have found, during the past year or two, an increasing demand for a growing girl's last which carries with it all the grace of a woman's shoe, and yet retains the solidity and ease necessary to a growing girl's last. This question has been studied by them, and several lasts are seen in their samples, which will surely satisfy this demand.

Walker, Parker & Co., Toronto, have added to their usual inviting collection for Fall a number of new lasts. They are featuring patent leather button with cloth and brocade tops and whole quarters, with kidney and Cuban-Louis heels. Some are made with plain stitched tips and plain foreparts, principally on the long pointed recede and moderate recede toe. Edges are close trim and shanks light and the line embraces all that can be desired. A number of three-hole, Tango effect, low shoes are shown as well as some lace shoes for walking purposes, on English lasts with low, broad heels, wide shanks and recede foreparts, which are splendid fitters. Tops on button shoes are cut about the same height as last season and the range reveals style, finish, snap and comfort.

The W. B. Hamilton Shoe Co., Toronto, are showing for Fall and Winter a number of choice offerings in all the latest patterns on medium recede toes, a number having cloth tops with plain toes. Patent is the leading leather. In men's the company are displaying the moderate recede toe in both blucher and bals. A twelve-inch leg boot of chrome elk, with brass eyelets, double waterproof sole, bellows tongue, leather lined, is a splendid offering. The same is also made with a twelve-inch leg, double stitched sole, with full middle sole, and is also seen in blucher cut of ordinary height. The fifteen-inch leg style and the white elk blucher are new and are taking well with the trade. Many of the Fall offerings are leather lined and have waterproof soles.

(Continued on page 69)

An Advance in Patent Leather Will Go Into Effect

Increased Price Will Mean That Public Will Have to Pay for Shiny Shoes—Decrease in Slaughter of Russian Colts and Practical Cornering of Market is the Cause—More Side Leather Will Now be Used

This is the year when patent leather is leading all others in demand, particularly in women's shoes. Canadian manufacturers are using more patent side and patent colt than they have for many months, but there is always "a fly in the ointment," or "a thorn in the flesh."

The outcome is that, after September 1st next, an expected advance in the best quality of Russian colt skins will be 5 to 10 cents per square foot, making top quotations either 45 or 50 cents. Shoe manufacturers, who have been using the highest grade during recent years, will now have to pay this figure for the best, instead of 35 to 40, as formerly. This will mean a difference of at least 15 to 20 cents on each pair of shoes, where the choicest colt skins are used. Where patent side leather is employed, the extra cost will be from 5 to 10 cents a pair, as after September 1st next, there will also be an advance on patent side leather.

A leading Canadian tanner of shiny leathers, when asked about the matter this week said: "Yes, we are protecting our customers, so far as the regular supply is concerned, until September 1st next, after which they have been notified that there will be a considerable increase in patent colt and also in patent side stock. This will mean that some manufacturers will have to pay more for side leather than they formerly paid for good quality colt stock. You know there has not been an advance in patent colt leather for some years, whereas calfskins of all kinds have been steadily ascending in price."

There is no doubt that patent colt stock gives better satisfaction in the higher grade shoes than patent side leather. It is of better fibre and texture, stronger and more durable in every way. For this reason, it is preferred to patent side leather by the makers of the top notch standard in shoes.

Why Quotations are Ascending

Asked as to the cause of the advance, the speaker said the market in Russia had been practically cornered, and there had also been a falling off in the number of colts killed. The result of the decrease in slaughter and of the wholesale corraling of skins had been a startling advance in prices. There has been such a scarcity of patent colt skins that Americans, since the recent removal of the duty on leather, have been invading the Canadian market. A large American firm lately wanted to contract to take 100 dozen finished colt skins a week from a Canadian patent leather tannery, and this American firm paid exactly the same price for the skins as any Canadian shoe manufacturer. The plant went bravely ahead and filled the order for about four weeks, but when the leather manufacturer attempted to enter the market for a fresh supply of skins at the figure that he had formerly paid, he found—to use a colloquial expression—that he was "up against it" and "up against it" hard, for skins could not be obtained.

This explains why it has been found necessary to raise the price of patent leather, particularly colt stock. The Canadian shoe dealer and the Canadian consumer might as well make up his mind, that since there has been a particularly large demand for patent leather, especially in women's shoes, the price for this class of footwear is going to go up very materially, or else cheaper stock must be used. In any event, patent, whether of side stock or colt stock, is scheduled for a sharp increase in quotation.

This is the situation as it at present exists in Canada,

and the facts have been frankly presented, in order that buyers may understand the present and prospective conditions of affairs.

Present quotations on domestic extremes for February and March take off are higher than ever before and the supply is very scarce. When the good season hides come along in August, September and October, considerable advance is expected.

News Happenings from Quebec City

Albert Racine, tanner, no longer walks to his residence in Charlesbourg. He has bought a sixty horse-power motor car.

Shoe factories are not very busy at present. Several jobbers were in the city last week placing orders for their samples.

The Edgar Clement building, which was burned a month ago, is practically completed and the firm expect to start tanning again in a few days.

Ant. Sylvain, shoe repairer, of St. Olivier street, who conducts the largest business in upper town, will build a three-storey building. He will use the first floor for his shop.

Phileas Lagace, formerly foreman in the fitting room of the Louis Gauthier Co., has rented the building of A. A. Cantin and will open a new shoe factory this month. He will specialize in McKay shoes.

Among the visitors in the city during the past few days were G. Bonner, of the Bonner Leather Co., Montreal; H. C. Parker, of Parker, Limited, Montreal; L. S. Odell, of Fisk, Limited, Montreal; S. Pettigrew, Montreal; T. W. Milzener, of Cotton Threads, Limited, Montreal, and G. Lemieux, of Kieffer Bros., Montreal.

The shoe factory of J. B. Blouin, Limited, will be removed from Levis to Sherbrooke, Que. The industry employs about one hundred and fifty persons and the removal will be a distinct loss to Levis. Speaking of the proposed departure of the company a local paper says: "It is not so many years ago that the J. D. King & Son Company, one of the largest boot and shoe manufacturers of Toronto, purchased an insolvent boot and shoe factory at Levis, and opened up under most favorable auspices. It was successfully run for several years, under the management of Mr. George Perry, who was so popularly known in Quebec as well as Levis. The factory gave employment to several hundred hands, and was a great boon to the manufacturing interests of the city across the river. Some friction arose between the company and the city council, and the firm closed up the factory. To-day, the Levisites, or the adjoining municipality, will have to face another similar loss, in the removal of the J. B. Blouin boot and shoe factory, employing in the vicinity of one hundred and fifty hands, to Sherbrooke. It is not known whether there is any friction between the municipality in question and the company, but the Sherbrooke council have made such a splendid offer to the company that it is going to pay them to remove their industry to the capital of the Eastern Townships. Not only is the city granting the company a bonus amounting to \$15,000 in cash, but an enterprising real estate company of Sherbrooke has offered not only a free site for the factory, but a bonus of \$5,000 in cash as well. It is expected that the Blouin factory will be removed within the coming year, which will be another large loss to the residents of the south shore."

AMONG THE SHOE MEN.

Harper Bros., shoe retailers, King street E., Hamilton, have sold out.

Granger & Trahan, dealers in shoes, have registered in St. John's, Que.

The Classic Shoe Store, 816 College street, Toronto, has removed to Weston.

Charles Donnelly, shoe retailer, St. Catharines, has assigned to R. Tew.

Laurier & Dosogne, shoe retailers, of Montreal, have dissolved partnership.

Jas. Heffering, of Toronto, spent the past week in Montreal on business.

F. A. LeClair Shoe Co., manufacturers, St. John's, Que., have registered.

M. Saxe, shoe dealer and grocer, of Acton, Ont., has moved into a new store.

Jos. Maranda, shoe dealer, of St. Joseph de Beauce, Que., has made an assignment.

L. G. Forte & Co., wholesale and retail shoes, Montreal, have recently registered.

R. T. Hayes, of J. M. Humphrey & Co., St. John, N.B., was in Montreal recently.

The American Shoe Store is selling to American Shoe Stores, Limited, Edmonton,

C. W. J. Upham, dealer in leather and hides, Sussex, N.B., passed away recently.

The assets of the Dunford Elk Shoe Co., of Stratford, Ont., will be sold on April 9th.

S. Goldberg has opened a new shoe store at 69½ Queenston street, St. Catharines, Ont.

W. V. Ecclestone, of the T. Eaton Co., Toronto, was in Montreal and Quebec recently.

Mr. Tabrum, of Price, Jones, Limited, Calgary, was on a buying trip to Montreal last week.

M. C. Galarneau & Co., wholesale leather dealers, Montreal have recently registered.

Mark Henry has bought out the shoe repairing business of Mr. Campbell, of Sombra, Ont.

L. Higgins, of L. Higgins & Co., Moncton, N.B., was in Montreal on a buying trip last week.

The Lyon Shoe Co. are opening a retail shoe store at 429 St. Catherine street west, Montreal.

J. A. McLaren, of McLaren & Dallas, Toronto, was in Montreal during the latter part of March.

B. Helfgott, shoe retailer, of Prince Albert, Sask., was in Toronto recently calling upon the trade.

The Sample Shoe Store, 142 St. Catherine street east, Montreal, is a new store recently opened.

Mr. Taylor, of the Robt. Taylor Co., Halifax, called on Montreal and Quebec manufacturers recently.

Wilson & Brown, shoe dealers, North Vancouver, have dissolved partnership. Fred Brown continues.

J. J. Poole has bought out J. M. Courtney, of Tottenham, Ont., who is now located at Many Berries, Alta.

G. Graham, of Graham Bros., Kenora, Ont., was in Toronto a few days ago calling upon the shoe trade.

Word was received in Montreal recently of the death of William Frederick Wall in Chicago. Mr. Wall was born in Montreal, and left there in 1893 for Chicago, where he

resided until he died. He was the son of Captain Robert Wall and manager of the Canadian Rubber Company.

J. B. Kilgour, of the Kilgour, Rimer Co., Winnipeg, has been visiting the larger eastern centres recently.

L. Levey, manager of M. L. Kalker & Co., shoe dealers, St. Catharines, was in Toronto this week on business.

W. G. Damer, of F. J. Weston & Sons, Toronto, leaves this week on his semi-annual business trip to the Coast.

Stewart Ritchie, late of the John Ritchie Co., Quebec, has gone on an extended trip to Rio de Janeiro, Brazil.

F. L. Wagner, manager of the Aylmer Shoe Co., Aylmer, Ont., was in Toronto last week on his way to Ottawa.

E. L. Rising, of Waterbury & Rising, St. John, N.B., was on a buying trip to Montreal and Toronto last week.

J. T. Parker, of Walker, Parker & Co., Toronto, has returned after spending a pleasant holiday at Atlantic City.

A meeting of the creditors of Romanoff Bros., dealers in shoes and furnishings, Calgary, was held on March 24th.

The shoe repairing shop of E. Hyde, Broadway, Vancouver, was recently broken into but nothing of value was taken.

W. A. Clarke, late of Box Grove, Ont., has opened a new store on Queen street east, Toronto, near Balmy Beach.

Howard M. Brown, who has for several years occupied an important position in the Relindo Shoe Co., Toronto, has resigned.

C. S. Sutherland, of the Amherst Boot and Shoe Co., Amherst, N.S., was in Quebec and Montreal during the past two weeks.

F. X. R. Lanthier, of the Kingsbury Footwear Co., of Montreal, and Mrs. Lanthier, spent a few days recently at Atlantic City.

Jos. Bazinet, formerly of Hawkesbury, has returned to that town, and has gone into shoe repairing and shoe-making line.

The U. S. M. Co. of Canada are installing additional pulling and lasting machines in the factory of Duchaine & Perkins, Quebec.

Mr. Robitall has been appointed foreman of the lasting department of Ames-Holden-McCready, Limited, No. 1 factory, Montreal.

R. E. Jamieson, general sales manager of the Canadian Consolidated Rubber Co., of Montreal, was in Toronto last week on business.

James Dillon, of Dillon & Moore, shoe retailers, St. Catharines, Ont., was in Rochester and other cities recently on a business trip.

Andrew Wills, of the Boot and Shoe Workers, Hamilton, has gone to Scotland for a trip, where he will revisit the scenes of his youth.

C. B. Pratt, who has been in the retail shoe business for some years in Ottawa, has opened a fine new store on Sparks street, near Bank street.

James Rapson has purchased the shoe and grocery stock of T. W. Scott, Blyth, Ont., Mr. Scott remaining for a time to assist in the business.

N. P. Merrill, representing Bliss & Perry Co., Newburyport, Mass., was in Toronto last week. He received the

gratifying announcement from home that he was the father of a nine pound boy.

W. S. Piper was given the contract by the Fort William city council for supplying rubber boots to the firemen, the price being \$4 per pair.

John McCrudden, well known in Montreal shoe circles, has been appointed foreman of the making room of the Slater Shoe Co., Montreal.

Tilley & Wilson, dealers in boots and men's furnishings, of Brooks, Alta., had a meeting of their creditors, when an extension was granted them.

The Western Shoe Distributing Co., Winnipeg, will represent the Thompson Shoe Co., Montreal, west of Winnipeg during the coming season.

S. C. Cronk, 126 Wellington street west, Toronto, spent the past week in Montreal on business, showing a fine range of hockey shoes for next season.

John H. Dunbar, Western Canada representative of Corbeil's Limited, Montreal, has left on his Fall selling trip throughout the Prairie Provinces.

J. S. Groh, representing Krippendorf, Dittman Co., Cincinnati, Ohio., was in Toronto last week with a fine range of women's and misses' welts and turns.

Eli Goldin, shoe manufacturer, Queen street west, Toronto, has installed a C. H. M. lasting machine, Royal perforator, model B, and other machines.

Mr. Geddes, of the Hudson Bay Co., Winnipeg, was a visitor in the East during the past two weeks, and spent some time in Montreal and Toronto.

A. W. Dubois, representing Chas. K. Fox, Inc., Haverhill, Mass., manufacturer of Fox Footery, was in Toronto recently, showing a fine line of samples.

Geo. P. Balfre, Montreal, Canadian manager of the Chicago Tanning Co., was in Toronto recently on his way to the head office of his firm in Chicago.

Charles E. Fice, of Toronto, representing J. & T. Bell, Limited, spent a few days in Montreal recently and is now covering Ontario in the interest of his firm.

The United Shoe Machinery Co., of Canada have sent two men to St. Stephen, N.B., to set up an entire equipment in the new factory of Clark Bros.

J. G. McDiarmid, Western Canada representative of the Cook-Fitzgerald Co., London, Ont., is now covering the Prairie Provinces in the interests of his firm.

J. Silvester, late of Toronto, has opened a shoe repairing shop at 13 St. Mary's street, St. Thomas, Ont. He has had many years' experience in the making of shoes.

Mrs. P. Shea, who conducts a shoe store on Muskoka street, Gravenhurst, has recently improved and decorated the interior, giving it a very neat appearance.

Daniel Carr, of Boston, who has been several years with the Regal Shoe Co., will cover the Maritime Provinces, Quebec and Montreal for the company this season.

Honeyford & Vernon, Limited, shoe dealers, of Collingwood, Ont., have been incorporated with a capital of \$40,000. The firm recently moved into a new store.

The United Shoe Machinery Co. of Canada state that the new type buffing machine which they have installed in several eastern factories is meeting with great success.

Ed. Lynch, Western Canada representative of the Minister-Myles Shoe Co., Toronto, left last week for the Prairie Provinces with a fine range of Fall and Winter samples.

Harry Thompson, of the Thompson Shoe Co., Montreal, was in Boston last week concerning new styles. He reports conditions there as being about in the same state as Canada.

Mr. Gahan, formerly foreman of the making room, Slater Shoe Co., Montreal, has accepted a position to act in the same capacity in the factory of Getty & Scott, Galt, Ont.

Clarence F. Smith, general manager of the Ames-

Holden-McCready Co., Limited, of Montreal, and Mrs. Smith, have returned after spending a few days in Atlantic City.

Yeotes Bros., of Peterboro, Ont., who conduct large shoe shine parlors in Montreal, Collingwood, Lindsay and Peterboro, have opened a branch at 20 Queen street east, Toronto.

The U. S. M. Co. of Canada state that a large demand is being made for Goodyear shoe repair outfits, in both East and West. An average of about four a week are being installed.

Harry Johnson, formerly employed by the Perth Shoe Co., of Perth, Ont., has accepted a position as foreman of the making department of the Victoria Shoe Co., East Boston, Mass.

The death took place on March 18th of David-Keay McLaren, president of D. K. McLaren (Limited), manufacturers of leathers, belting and mill supplies, Montreal, at the age of 79.

S. Pritchett, jr., representing Smaltz, Goodwin Co., Philadelphia, was in Toronto and other Ontario cities recently, showing a very fine line of women's welts for the coming season.

L. S. McKindsey, W. H. Jardine and H. W. Roberts, Western Canada representatives of W. B. Hamilton Shoe Co., Toronto, left recently to cover their territories in the Prairie Provinces.

Tom Stedman, of the Stedman Shoe Co., who have recently moved into a new shoe store in Winnipeg, was in Toronto, Brampton and other places in Ontario recently on a business trip.

M. W. Crosby, who represents the Utz & Dunn Co., Rochester, N.Y., was in Toronto and other Ontario cities last week, showing a fine range of fall samples for women, misses and children.

H. K. Hayward and J. Canning, late of Getty & Scott, Limited, Galt, will start a complete shoe repair works in Toronto and have purchased a 22-foot U. S. M. Model N outfit, with a stitcher.

Kells & Co. have recently opened a new shoe store at 285 Bank street, Ottawa. Previous to going into business for himself Mr. Kells was manager of Bruce, Stuart & Co.'s shoe store, Ottawa.

Ed. R. Lewis, leather dealer, Toronto, has returned from a business trip to New York and Boston. He reports that leather stocks are very low and that an advance in prices in several lines is expected.

Mr. Fleet, formerly foreman of Ames-Holden-McCready, Limited, No. 1 factory pulling and lasting department, has been appointed foreman of the same department of the Perth Shoe Co., Perth.

J. L. Studholme, representing the Anglo-Canadian Leather Co., of Toronto, Wood Bros. of St. Catharines, and other firms, has returned to Victoria after a successful trip throughout the Prairie Provinces.

The Hurlbut Co., of Preston, Ont., recently entertained their employes to the annual sleigh-ride. There were eighty persons in the six sleighs provided. After the drive an enjoyable dinner was partaken of.

The Canadian Consolidated Rubber Co., Limited, have declared their regular quarterly dividend of one and three-quarters per cent. on the preferred shares and one per cent. on the common shares of the company.

Geo. E. Boulter, who represents the Thompson Shoe Co., Montreal, in Toronto, will continue to do so this season. Mr. Boulter now has two representatives in Toronto and reports business as improving daily.

The Kamloops Harness Co., Kamloops, B.C., of which J. G. Hutchings is manager, has taken over the business of

the Kamloops Saddlery Co., and is making a specialty of the traveling goods and leather departments.

C. A. Davies, of Blachford, Davies & Co., and Mrs. Davies, who have been spending a few days in New York, Boston and Atlantic City, have returned to Toronto.

Fire recently damaged the Commerce block at Amherst, N.S., on the fourth floor, and among the occupants of the building who sustained loss by smoke and water, was the Amherst Boot and Shoe Co.'s retail store.

This is known as "Invictus week" among the stores and selling agencies of George A. Slater, Limited, Montreal, and special window trims will be made and prizes given for the best displays made in each of the provinces.

Fire, which broke out recently in saddlery and shoemaking department of the Lebret Industrial School at Balcarres, Sask., did a great deal of damage but was fortunately confined to the outbuildings of the institution.

F. W. Wilson, of the shoe department of Chapples, Limited, Fort William, Ont., was in Toronto and other eastern cities recently on a two weeks' buying trip. While in Toronto he made special arrangements with the Regal Shoe

Co. to manufacture a special shoe for his firm, which will be sold exclusively in the Fort William store.

G. R. Brunet, organizer for the American Federation of Labor, was in Montreal recently and organized some forty trunk and bag makers into a labor union. A local union will be inaugurated shortly and a charter applied for.

In a fire which occurred at Liverpool, N.S., on March 28th, four stores were destroyed and the loss was forty thousand dollars. Among the sufferers was N. H. Cunningham, shoe retailer, whose stock was completely wiped out.

The Snedcor & Hathaway Co., of Tillsonburg, are now employing 50 hands in the manufacture of the heavier grades of shoes and expect in the near future to increase the force to 100. The factory is very busy at the present time.

The Beardmore Co. have had a number of brilliant hydro lights installed in the yards of their tanneries at Acton, Ont., and have also wired the houses of their workmen on the Crescent as well as having the street itself lighted.

A by-law will shortly be submitted to the residents of Sherbrooke, Que., for the establishment of a boot and shoe

The Macfarlane Shoe Co., Limited, of Montreal, the well known manufacturers of children's high-grade footwear, are at present busily engaged in moving into their splendid new factory at 61 de Normanville street, Montreal, where they will have a greatly increased capacity over their present plant. This moving is being done a department at a time, so as to put the actual running operations of the factory to as little inconvenience as possible. The new factory is one of the most modern in Canada. It was originally built by the A. P. Cimon Co., who in turn sold it to Macfarlane Shoe Co. This factory is a four-storey brick and concrete structure of mill construction throughout, with hardwood floors and all latest improvements and in dimensions is 145 x 150. Special attention has been paid to the heating system, which is derived from two large boilers in a separate building, used only for this purpose. This is a very important and highly useful feature found in very few shoe manufacturing plants

Electric power is used with individual motors in each

department, doing away with the large belts and openings through the floors, such as are found in most factories where steam power is used. The very latest machinery has been installed and the factory has been arranged so that every operation, from the cutting of the leather to the shipping of the finished shoe, is practically continuous, one process dove-tailing accurately into another with the least possible loss of time and energy.

The factory is built on a lot 150 x 250 feet with a street on every side, thus ensuring perfect light for all time and affording plenty of room for expansion, which is bound to come in the not too distant future, large though this edifice is, because this company's business has been growing by gigantic strides for years.

The Macfarlane shoe has the reputation of being one of the high-class children's lines of Canada and it is the firm's intention not only to turn out more shoes, but to increase the quality, if that is possible.

factory in that city. Negotiations have been going on with the city council for some time and fine progress has been made.

F. A. Leclair has opened a new shoe repairing establishment in St. John's, Que., with a complete repair outfit. He announces that orders by telephone will be promptly attended to and all business conducted on a strictly cash basis.

The annual meeting of Canadian Consolidated Rubber Co. has been called for April 7th in Montreal. The annual meeting of the Canadian Consolidated Felt Co. will be held the same day. D. Lorne McGibbon is president of both companies.

In order to be in a position to speedily attend to their customers' wants, Waterbury & Rising, Limited, of St. John have enlarged their shoe repairing department, installing new and modern machinery and adding to their staff of shoemakers.

George Williams, of D. D. Hawthorne & Co., Toronto, who is confined in the General Hospital, Toronto, where he underwent an operation for an abscess, is making good progress toward recovery, but will not be able to resume his duties for some time yet.

W. Thwaites, formerly employed by Rosenwasser Bros., New York, city, is now with J. Albert & Sons, Brooklyn, N.Y., as production man. Previous to this Mr. Thwaites was employed by the Slater Shoe Co. and Ames-Holden-McCready, of Montreal.

Geo. Hale, the octogenarian representative of the Lounsbury & Soule Co., Stamford, Conn., makers of women's, misses' and children's welts and turns, was in Toronto recently on business. Mr. Hale is possibly the oldest shoe traveler visiting Canada to-day.

E. P. Hamilton, formerly of Toronto, who is now the manager of the Milton Shoe Co., of Milton, was in Toronto last week. Mr. Hamilton says business is very good and that Milton is bound to be heard of more frequently in the future as a shoe manufacturing centre.

E. A. Dagg, manager Ames-Holden-McCready Co., Limited, Calgary, is resigning his position with the company. He has been appointed an official assignee by the Alberta Government for Calgary and district and will enter upon his new duties about June 1st.

Wm. C. Meyers, of the Rideau Shoe Co., Montreal, has been confined to the Western Hospital in Montreal with a severe attack of pneumonia. His many friends will be glad to learn that he is now pulling through all right and will soon be able to get around.

The by-law to grant assistance to the Consumers' Rubber Co., which was defeated in St. Catharines some time ago, will again be submitted to the people, a request to that effect having been made by several hundred citizens. It is felt that the measure will carry this time.

M. B. Young, shoe retailer, Bloor street west, Toronto, intends starting a new shoe store at the corner of Dufferin street and Bloor street, which premises are now being overhauled preparatory to putting in a stock. This will make the third store conducted by Mr. Young in Toronto.

A federal charter has been granted to the Williams Shoe Limited, Brampton. The capital stock is \$200,000 and the incorporators are J. McMurchy, C. M. McCollom, T. Thaurburn, W. W. Woods, W. C. Pickering, J. Birss and J. H. Brundell, of Brampton, and S. L. Mullett, of Orillia.

The Alberta Shoe Manufacturing Co. has commenced operations in Redcliff, Alta. The company has a modern plant and occupies a two-storey building which is well lighted, admirably planned and splendidly ventilated. About fifty hands will be employed at the start. The shoes of the new company will be nationally advertised and will be sold

throughout the Dominion. The company will make 250 pairs of men's high-grade shoes a day. The investment in plant and building represents about \$80,000.

J. E. Samson, formerly of the Rock Shoe Co., Quebec, who recently bought out the manufacturing part of the business of J. H. Larochelle and Fils, Quebec, was in Toronto last week for several days showing a range of samples in men's and women's McKays, on which he will specialize.

F. W. Hills, a widely known shoe traveler, passed away in Montreal last month, after an illness of several weeks, at the age of 63. He was with James Robinson, Montreal, for nearly twenty years, and latterly with Jackson & Savage, Montreal. He was born in Lachute, where his father was a tanner.

Louis A. Bouchard, who was engaged in the shoe trade in Montreal, died recently in that city. He was a former leading merchant of Waterloo, Que., where he served in various public capacities, being a former mayor of the town. He was 72 years old. The remains were interred at Waterloo.

C. J. Angers and G. M. Deschenes, who have carried on business at Morinville, Alta., as dealers in boots and shoes, clothing, men's furnishings and dry goods, have dissolved partnership. The latter is now the sole owner of the business, which he will carry on under the name of G. M. Deschenes.

William P. Francis, superintendent of the Emerson Shoe Co.'s factory at Rockland, Mass., has resigned from this concern and gone to Quebec to take charge of the shoe factory of John Ritchie Co., Limited. Before going with the Emerson Shoe Co. he was with Whitman & Keith Co. and later with W. R. Packard Co.

James Young, of Toronto, who has been spending some time in Bermuda Islands and Atlantic City, where he visited James Robinson, of Montreal, has returned home. Mr. Robinson, who has been several weeks in New York and Atlantic City is reported to be very much better and will soon return to Montreal.

Harry Leckie, late of the Milton Shoe Co., Milton, Ont., has joined the selling staff of Getty & Scott, Limited, Galt, and is covering the smaller towns in Manitoba and Alberta. H. Gibbins is looking after the larger centres in these provinces, while the territory from Calgary to the coast is being supervised by W. G. Fallen.

At the annual meeting of the A. A. Durkee Shoe Co. held recently in Truro, N.S., very satisfactory reports were presented for the past year showing a gratifying increase in business. The following directors were elected: A. A. Durkee, George W. Stewart, George E. M. Lewis, F. A. Doane, T. S. Pattillo, H. C. C. Yuill and John D. Ross.

Daniel Toomey, foreman for the past ten years in the fitting department of the Hartt Boot and Shoe Co., Fredericton, N.B., who has resigned his position and is leaving for his former home in Brockton, Mass., was presented with a handsome travelling bag and an appreciative address by the fitting department, the address being read by C. J. Miller.

Mr. Thompson, who has been one of the foremen in the Getty & Scott factory at Galt and left recently for another field of labor, was presented by the members of the cutting room with a traveling bag and by the employes of the trimming and skiving department with a dressing case, both gifts being accompanied by suitable addresses.

At the annual meeting of the Shoe Workers' Union, No. 444, held in Hamilton recently, the election of officers for the ensuing year resulted as follows: W. Hurford, president; E. Vann, vice-president and collector; A. Johnston, financial secretary; F. Wills, recording secretary; V. Thompson, treasurer; A. H. Hewitt, sentinel. The newly elected officers were installed by W. Hamilton, and at the con-

clusion of the business a smoking concert and free drawing took place.

W. B. Chubb, of the W. B. Chubb Co., dealers in pickled sheepskins, Boston, was in Toronto last week on business.

G. A. Blachford, late sales manager of the Murray Shoe Co., London, was in Toronto last week on business. It is rumored that he may start a shoe factory in Toronto in the near future for the manufacture of women's fine Goodyear welts.

The Fall and Winter samples of Frank W. McKeen, Quebec, showing a nice range in men's, women's and children's Goodyear welts and McKays are complete and are the finest ever turned out by that firm. A number of attractive lasts are shown. The firm is now represented in Toronto and Ontario by Clarence S. Acton, who has entered upon his new duties.

The A. R. Clarke hockey team have closed a most successful season, having won eleven games out of twelve. The team was successful in again capturing the championship of the Riverdale Manufacturers' League for the challenge cup donated by the Hon. A. E. Kemp, which they also landed last year. The team also won the finals in the Aurora tournament.

Norman L. McDonald, who has been prominent in securing several new industries for Edmonton, notably the Edmonton Shoe and Leather Co., is now on a tour to points in Ontario and the United States in an endeavor to secure more factories for Edmonton. He will interview several leather and shoe concerns with whom correspondence has been conducted.

THE SHOE AND LEATHER JOURNAL has received a copy of that excellent book, "The Shoeman's Guide," which is a reliable directory of the producing side of the boot and shoe trade of Great Britain and Ireland. It is issued by the Halford Publishing Co., Limited, 26 Corridor Chambers, Market Place, Leicester, Eng., and the retail price in Canada is one dollar.

The shoemen of Brantford are presenting a petition to the city council asking that an early closing by-law be passed under which all shoe stores will close every night at seven o'clock, except on Saturdays and on nights preceding public holidays. It is understood that the petition has received the signatures of practically all the footwear retailers in Brantford and Eagle Place.

J. C. North, a prominent shoe dealer of Picton, Ont., died very suddenly on March 26th from heart failure. He leaves a wife, a daughter and a son, Charles, associated with his father in business. Mr. North was a highly esteemed citizen of Picton, being a school trustee for ten years, a prominent Mason for over a quarter of a century and an enthusiastic horticulturist.

W. J. Baggs, 638 Shaw street, Toronto, has been appointed the selling agent in Ontario for Eugene Guay, of Montreal, maker of Guay leather counters and for the Independent Box Toe Co., of Montreal, makers of high-grade box toes and heels of all kinds. Mr. Baggs has also been appointed representative in Ontario and Eastern Canada for Wood Bros., lace leathers.

At a meeting of the Boot and Shoe Workers' Union, No. 458, held recently in Fredericton, N.B., the following officers were elected:—President, Edward Langille; vice-president, John Donahoe; financial secretary, F. W. Rowan; recording secretary, F. B. Dibbs; executive—W. E. Perley (chairman), P. A. Gerow (secretary), J. McCutcheon, B. Burden, L. Carten, J. Currie, F. Stillwell and F. B. Dibbs.

J. Robson Lamy, one of the best known citizens and business men of Amherst, N.S., passed away recently after a few weeks' illness, at the age of seventy-four years. He

was identified with nearly all the leading industries of the town, being for many years president of the Amherst Boot and Shoe Co., in which he was one of the original and leading stockholders. He was also president of the Atlantic Lumber Co.

M. B. Young, shoe retailer, 924 Bloor street west, Toronto, has installed a new front with tiled entrance. There

BRANCHING OUT FOR HIMSELF

The firm of Walter Williams & Co., manufacturers' agents, Montreal and Toronto, dissolved partnership on March 31st and E. W. McMartin, junior partner for the past eight years, who has had complete charge of the smallwares department work, has started a separate business in his own name, with premises in the Read Building, 45 St. Alexander street, Montreal, and 20 Wellington street west, Toronto. Mr. McMartin has been appointed sales agent for Brough, Nicholson & Hall, Limited, Leek, England, for all their fine boot and shoe laces so well known to the trade, and smallwares of various kinds, including the Champion Spun Silk so largely used by making up trades generally and shoe manufacturers. T. B. Bethell & Co., Coventry, England, have also appointed him their Canadian sales agent. This firm make the famous Spider Web Brand of Elastic boot webs as well as elastic glove webs. These goods are well known to every user of goring or shoe elastic. Mr. McMartin will also sell all the various lines of webs, bindings and galloons, etc., heretofore handled by

Walter Williams & Co. It is felt that his prospects are bright with such agencies backed by his 24 years of active successful salesmanship which has built up a splendid connection for him in all corners of the Dominion. Mr. McMartin began life in the village of St. Andrews East, Argenteuil county, Quebec, and assumed active commercial duties at the age of 12 years, by acting in his aged father's place as agent for the Ottawa River Navigation Co., being responsible for entire village freight inwards and outwards, shipment of produce, etc. As a boy he was proud of having been told by officers that his place was the best kept.

Mr. McMartin started business life in Montreal when fifteen years old, after a course in the Montreal Business College, entering the employ of George D. Ross & Co., manufacturers' agents, where he received a fine business training, staying there eleven years. When he left he was in charge of their smallwares department. He then joined Walter Williams & Co., and after five years as employee became junior member of the firm and has remained such for eight years.

are two single oak doors and between is a semi-circular show case window. The windows on either side of the entrance are triangular in shape with rounded corners. The new front of Mr. Young's store is as attractive and imposing in appearance as any one could possibly desire. The change has already resulted in greatly increased business.

Fred. R. Foley, who has been a shoe retailer in that town for the past thirteen years, has just been elected one of the councilors of Bowmanville. This is a tribute to Mr. Foley, who is an alert business man and an enthusiastic resident of Bowmanville. He was also recently elected first vice-president of the Retail Merchants' Association of that town, and he has just concluded an anniversary sale which was a whirlwind. Last Saturday was the biggest day he ever had in the history of the store.

A new button fastener which has been placed on the market prevents the buttons tearing out, especially in fabric top shoes. Both hand and foot machines are sold. The button is clinched with a wire which catches around the shank and on the inside is a flat metal disc about one-quarter of an inch in diameter which somewhat resembles the head of a brass paper fastener. It is impossible for the button to become separated or pull out. The sale of the new fastener is reported as satisfactory.

J. T. Stenson Sons, shoe dealers, of Peterborough, Ont., have inaugurated as a permanent part of their store an orthopedic department for the relief and cure of all foot troubles. The firm are extensively advertising the new department and recently G. Greenwood, foot specialist, spent several days at the store. The firm are handling the entire line of foot specialties and appliances made by the Scholl Manufacturing Co., Limited, of Toronto, Chicago, New York and London, and a very satisfactory business is being developed.

Through the timely discovery by a policeman of a fire which broke out in the Roberts & VanLane shoe store on Colborne street, Brantford, recently, and the quick response of the brigade a serious conflagration was averted. Had the discovery been made five minutes later the whole interior of the premises would have been gutted. The blaze started in the stock room at the rear. The flames were confined to the

one room and the stock in the main portion of the store was unharmed. The damage amounted to about five hundred dollars in the stock department.

The new factory of the Just Wright Shoe Co., of St. Thomas, Ont., which was built by the city, was recently inspected by Mayor Johnston and the architect. It appears that the Fire Underwriters' Association have condemned the metal covering on the fire doors and the glass windows at the south side of the building. The doors will be recovered and wired glass installed to conform to the requirements. The work on the roof has been finished making the structure entirely fireproof. The Just Wright Company, of which E. E. Donovan is manager, will move into their new home in the course of a few weeks.

Cobourg may have a new felt factory. A proposition has been made to the town council by Messrs Charles and Dick to start such an industry and the promoters ask for a loan for ten years of ten thousand dollars without interest. They agree to have a paid-up capital of \$90,000, to use the Cobourg Woolen Mills building and to employ on an average fifty hands the first year and one hundred hands the second, third, fourth and fifth years and an average of two hundred hands for the remaining five years. The company will give the town a mortgage on their plant as a pledge of good faith. A by-law will shortly be submitted to the ratepayers for approval.

A. C. Kitchener, the genial Canadian representative of the Palatine Heel branch of the Leyland and Birmingham Rubber Co., with factories at Preston and London, England, recently moved his offices and warerooms from St. Antoine street to 169 Fulford street, Montreal. This will give considerable additional necessary warehouse space as well as provide more satisfactory office conditions. Mr. Kitchener, who is well known throughout Ontario especially, formerly had offices at 239 Victoria street, Toronto, and has made a great many friends among the shoe trade both retailers and jobbers. He reports business conditions as gradually returning to normal with a much brighter outlook for the coming summer and fall months.

A large number of retailers are expected in Toronto within the next few days to take advantage of the special

SUBJECT..... WINNIPEG, MAN.

February 3rd, 1914

The T. Sisman Shoe Co., Limited
Aurora, Ont.

Dear Sirs:-

We take this opportunity of saying that the goods we have received from you this season excels anything you have ever done before. They have opened up completely to our satisfaction, and the general get-up and solid character of the lines have been really excellent. While you turn out goods as we have described you can always count on us as a customer.

Yours very truly,

TS/SP

sale which is being conducted by Blachford, Davies & Co. It started on the first of the month and the firm are making the unique offer of paying the railway fare for all those who avail themselves of this opportunity, within ten days. This offer applies to a radius of 150 miles from Toronto, and an allowance will be made for any points of greater distance. Mr. Davies, who has recently returned from the eastern markets, announces special purchases amounting to \$35,000.

C. Eugene Lepine, general manager of the O. B. Shoe Co., Drummondville, has resigned. M. H. Labrecque, foreman of the cutting room, has also tendered his resignation. Mr. Lepine was formerly with the Kingsbury Footwear Co. Both these men have returned to Montreal and are now open for positions.

A fire which broke out in the plant of the Bonner Leather Co., West Notre Dame street, Montreal, March 29th, did damage to the extent of about \$15,000. As the outbreak occurred on Sunday afternoon, no one was at work in the tannery. The fire originated in a room used as a repair shop on the second floor, and when the firemen arrived, flames were shooting from the upper floor of the tannery and it looked as if the building was doomed. Good work on the part of the fire fighters, however, quenched the blaze in about half an hour, and the chief damage sustained was through water and heat which affected the large leather stock stored. All orders are being promptly filled.

SLATER SHOE COMPANY ABSORBED

The firm of Dufresne & Locke, Montreal, are taking over the interests and plant of Slater Shoe Co., of that city. Negotiations have been in progress for some time and a meeting of the interested parties was being held as the *SHOE AND LEATHER JOURNAL* went to press.

Dufresne & Locke, whose factory is in Maisonneuve, are one of the most progressive shoe firms in Montreal. Both Mr. Dufresne and Mr. Locke are considered leading manufacturers in Eastern Canada. Some months ago they took over the factory erected for Kirvan-Doig, Limited, and which adjoined their premises. Up to the present they have been manufacturing chiefly for the jobbing trade.

Slater Shoe Co., whose factory is on Latour street, Montreal, was taken over by the Corporation Agencies a considerable time ago and a complete re-organization took place. E. F. Leonard was made superintendent of the plant. Slater Shoe interests took over the business of the Rideau Shoe Co. after the owners of the latter business had suffered a bad fire loss and had decided themselves to get out of the shoe manufacturing line. It has been persistently stated that Slater Shoe Co. intended to move to Drummondville, Que., where a bonus arrangement has been offered them by the council and where they are expected to erect a very large factory.

DO SHOES COME IN UNDER VALUE?

The annual meeting of the Boot and Shoe Section, Canadian Manufacturers' Association, was held in Montreal March 9th. The meeting was well attended and considerable discussion arose on various topics of interest to the shoe manufacturer.

A question which was brought up, and one that affects every Canadian shoeman, was that of regulating the "dumping" into Canada of American footwear. It appears quite apparent that a very large quantity of these goods come into the Dominion yearly at an under-valuation, that is to say, a shipment being sent in by an American manufacturer of \$2.50 shoes, and invoice included valuing the shoes at \$2.00 only. The members of the association felt that the

government appraiser was not, and could not be expected to be competent to judge as to the just value of a pair of shoes, as it would require a shoe expert to do so. The suggestion was made that the government be asked to appoint such a man, who would act for the general good and protection of home manufacturers.

Different other methods of coping with this perplexing problem were discussed, and it was decided that the matter be settled one way or the other as early as possible.

Another question brought before the members was the advisability of shoe manufacturers throughout the entire Dominion getting together, the Quebec and Ontario manufacturers joining with those of the other provinces in forming a national body to deal with trade customs and questions generally, such as the returning of stock, size of cartons, credit question, and others that could be much better handled through the enlargement of the scope and work of the association.

It is very probable that a general convention of Canadian shoe manufacturers will be called for the end of April.

The board of officers of last year was re-elected for the ensuing year, comprising—Chairman, Geo. A. Slater; vice-chairman, Nap. Tetrault; executive committee, Ralph Locke, Walter Sardon and Raoul Lanthier.

CLASSIFIED ADVERTISEMENTS

2 cents a word first insertion—1 cent a word subsequent insertion. No advertisement less than 50 cents per insertion accepted. Please remit cash with order.

GOOD CHANCE FOR LIVE SHOEMAN—To take over woman's department in busy down-town Toronto store. Thoroughly modern stock; \$5,000 capital will handle. Rare opportunity. Apply Box 76, *SHOE AND LEATHER JOURNAL*, 1229 Queen street west, Toronto.

WANTED by a prominent German firm, making good and middle class shoe and boot laces, as well as loopings and topbands, an agent with good connection in boot and shoemaking centres. Sale on commission. Address with full particulars, Box 69, *SHOE AND LEATHER JOURNAL*, Toronto.

PATENT LEATHERS AND FABRICS, BIGGEST CALL

(Continued from Page 59)

Frank W. McKeen, Quebec, successor to C. E. McKeen Co., states that several new lasts have been put in by the company for the coming Fall season which are still better than those the company have been showing in past seasons. One of the lasts is a men's black, dull calf, medium recede toe and fairly low heel. This shoe presents a very natty appearance and ought to be a good seller, as a very large demand is expected for this type of last. It is the opinion of Mr. McKeen that for Fall nineteen fourteen the large call will be for receding toes in men's lines, with the vamps long and the heels low. It is also thought that patent leather will change places with tan and that there will be a lot of shiny leather cut, and a lot less colored leather. Brocaded vesting will be used considerably especially in women's.

The Thompson Shoe Co., Limited, Montreal, have several new lasts this season which they think should take with their customers. They recently discontinued handling men's shoes of all kinds, and are now only selling women's shoes exclusively, with the exception of misses', children's and infants' white canvas goods, of which they make a specialty, carrying a particularly large stock of this type of shoe. Their sales on white canvas goods last year, they state, were larger than ever before. For the coming Fall season they are showing many attractive lines in women's colonials with kidney and spool heels. One line they expect to go strong this season is their No. 533 women's patent colt butterfly pump with fancy ornament, spool heel and turn sole. Two other samples shown by them which will take are their No. 532 women's patent tango pump, turn sole and Cuban heel, and No. 534 women's patent vamp colonial, black silk quarter turn sole and spool celluloid heel.

Amongst their liness are also noticed some women's very natty patent button shoes, with cravenette and brocaded tops and quarters. The traveling staff of the company will be going out shortly and will be the same as last season, except that the Western Canada Distributing Co., of Winnipeg, will represent them west of Winnipeg. The Thompson Shoe Co. state they are now the largest jobbers in Canada handling women's shoes exclusively.

Valentine & Martin are showing some exceptionally fine offerings in sporting and hunting boots in Pearl storm

calf, black storm calf, chocolate, tan and veg-chrome. All these shoes have full double soles, viscolized, with two rows of stitching and full bellows tongue. One special feature is that they are absolutely smooth inside, there being no counter lining to irritate the foot, and no back seams to rip. Several of the shoes have double vamp and are equipped with two straps and buckles. The firm are right to the front.

In the Matter of The Dunford Elk Shoes, Limited

Under the direction of his Honor Judge Barron, there will be sold by public auction on the premises of the above company, in the City of Stratford, on Thursday, the ninth day of April, 1914, at the hour of 2 o'clock in the afternoon, the assets of the above company in liquidation, follows:—

| | |
|--|-------------|
| Real estate, buildings, etc. | \$10,634.94 |
| Stock in trade, chattels, etc., as follows:— | |
| Manufactured shoes | \$2,598.00 |
| Travelers' samples of same | 712.40 |
| Leather | 1,445.19 |
| Shoe findings and merchandise | 1,895.06 |
| Thread | 678.00 |
| Leather soles, heels, etc. | 3,510.11 |
| Factory furniture and fittings | 436.93 |
| Lasts and patterns | 2,413.99 |
| 38 machines, belting, pulleys, etc. | 5,524.96 |
| Office furniture and supplies | 434.51 |
| | \$19,649.15 |

\$30,284.09

The whole will be offered en bloc, subject to reserve bid.

TERMS OF SALE:—20 per cent. down at the time of sale, 20 per cent. more on delivery within ten days, and the balance in three, six and nine months, approved and endorsed paper, with interest at 7 per cent. per annum.

If satisfactory bid is not obtained for the assets en bloc, the same will then be put up in two separate parcels—the land and buildings in one parcel, and each of the items of stock and chattels separately. Terms—the same as above.

Full particulars of conditions of sale can be obtained on application to

BILT
FOR
BOYS

Now that you have taken stock and summed up the past season's business, and have proved the value of the boys' boots you have handled and the results—good and bad—they have given you, you will naturally plan, this coming season, to stock the best lines and to drop those that have given you trouble and were hard to move, and in this connection let us suggest that you make the "CANADIAN BOY" shoe your leading line. Good fitting, good looking, solid and durable, you will find it a most profitable investment.

Our Fall Samples are coming. THINK IT OVER

The Reliance Shoe Company, Limited

BLACHFORD, DAVIES & CO., Limited

Announce to the Retail Shoe Trade of Canada

Having made SPECIAL PURCHASES amounting to

\$35,000, (Thirty-five Thousand Dollars)

they are prepared to put the same on sale starting

Thursday, April 2nd, 1914

These goods were bought at a specially low price from various manufacturers in the east and are all this season's new goods, some being cancelled orders on account of late deliveries resulting from the strike, others Floor goods accumulated during the recent trade depression.

It is our intention to turn these goods over immediately and we are prepared to offer the Shoe Trade extraordinary low prices on this purchase. To any merchant who avails himself of this opportunity within ten days from commencement of sale **we will allow return railroad fare within a radius of 150 miles from Toronto** and suitable allowance to any points of greater distance for the privilege of showing intending purchasers what we have to offer.

Ask Your Jobber's Salesman to Show You Fall Samples of the "Doctors" Shoe

Your chances of doing big business next Fall, depends upon the judgment you use in the selection of your Fall stock.

The average man doesn't want a shoe that is absurdly freakish. Neither does he want one that is clumsy and unattractive.

What he *does* want is a shoe that *looks* well, *wears* well and *feels* well.

No shoe on the market combines these features so attractively as the "Doctors" Shoe.

Both soles and uppers are most thoroughly waterproofed. The "Doctors" is the shoe that goes through water, slush and snow and fully protects the foot from these elements.

A dandy seller for the Fall.

SEVENTH NATIONAL
Shoe and Leather Market-Fair

Mechanics Building, Boston, Mass.
 ONE WEEK, JULY 8-15, 1914

Come to Boston

and take part in the
 observance of

CANADIAN DAY

at the Fair

Come to Boston

and see the finest collection of shoes,
 leather and supplies, that has
 ever been gathered together
 under one roof.

Superintendents' and Foremen's Day

Saturday, July 11th, will see the largest gathering of shoe factory superintendents and foremen that has ever been held. There will be an International Convention and special attractions for these men.

Spend this week in Boston

No matter what you plan otherwise, be sure and attend this great gathering of shoe and leather men in Boston. You will meet hundreds of men engaged in a similar business as yourself and the interchange of ideas is sure to result beneficially to you.

Come down and see the latest methods and machines for shoe and leather manufacture.

Boston is a hospitable city and especially so when filled with shoe men. Low round trip rates on rail and steamship lines.

SEVENTH NATIONAL Shoe and Leather Market-Fair

Mechanics Building, Boston, Mass.

ONE WEEK, JULY 8-15, 1914

The Seventh National Shoe and Leather Market-Fair is to be an even greater success than any previous shoe and leather exposition, and will be held on the same dates chosen by the New England Shoe and Leather Association for their International Shoe and Leather Week.

Well Located Spaces \$125 to \$288
WITH ALL NECESSARY EQUIPMENT

The equipment varies somewhat with the character of the exhibit, but all equipments are the same for similar classes of exhibits.

There is no other really necessary expense

Exhibitors are furnished with all the necessary equipment to conduct their exhibit in a satisfactory and successful manner. Sign, lights, show cases or display racks, desk, chairs, table, decorations, floor covering, locker, janitor service and night watchman are all provided by the management.

Shoe Manufacturers

may obtain spaces all equipped as above and ready for their exhibit, for \$125, \$180 and \$288. Diagrams showing available spaces now ready.

Findings and Supplies

Good spaces for the exhibition of findings and shoe factory supplies of all sorts may be had for \$125 to \$180, including all necessary equipment of space.

Tanners' and Machinery

spaces may be had with or without power and to suit the varied needs of the exhibitor at prices from \$125 to \$344. This price includes standard equipment as above.

"KINGSBURY" "America's Beauty"

J. D. CAMPBELL
(Maritime Provinces)

Here are the men who will carry the most complete range of samples of the above lines of shoes for Fall that has ever left our factory.

Four of these men have been so long identified with KINGSBURY and AMERICA'S BEAUTY brands that they need no introduction to the trade. Mr. Taylor is also well-known personally in the field he will cover.

J. A. MALBOEUF
(City of Montreal)

There's a reason for the doubling of our factory space and facilities in the last year.

Did you ever stop to figure out what this means to you as a dealer?

GEO. H. TAYLOR
(Province of Ontario)

The New Member of Our Selling Family

Two things it must mean: First—a tremendous and ever-increasing demand for KINGSBURY and AMERICA'S BEAUTY brands—a guarantee against "shelf-warmers."

Second—An assurance of prompt delivery and more expert shoemaking than ever.

A. J. PINN SONNAULT
(Province of Quebec)

Watch for our representative in your territory. He has a line of samples that is sure to increase your Fall business, if you order. Give him full opportunity to show you how and why.

W. E. SHORT
(Manitoba, Alberta, Saskatchewan, British Columbia)

ORIENT SHOE LACES

THIS is the only line of shoe laces made of which it may be truthfully claimed that they will outwear the boots they lace up. The Orient is a soft, silk finish cotton lace.

Good to look at and good to wear

It is so well tagged that we guarantee the tags will never pull off. And here's one of the strongest selling points that any lace can have—the Orient always stays tied, even when new. The reason is its soft, strong, supple finish.

Both Black and Tan Always in Stock

Mail us your order. They sell at 10 cents a pair, yielding you a handsome profit while giving absolute assurance of perfect satisfaction to every customer.

This shows a single pair carton sealed at each end by small Union Jack

22-FOOT GOODYEAR SHOE REPAIRING OUTFIT

MODEL N

THIS Outfit represents the highest development in shoe repairing machinery, and meets every demand of modern shoe repairing. It embraces all the essential processes for making new shoes from old ones, giving the maximum of equipment and efficiency in the minimum space. The Outfit has the Goodyear Stitching Machine with all its improvements, including a new style steam generator which uses gas or gasoline for generating the steam, and operates automatically, thereby insuring a uniform heat for keeping the wax in proper condition and requiring little attention from the operator. The Edge Trimming Machine has the new feature of the two shafts, being operated by a single belt, and the cutter grinder is attached directly to the main shaft. This arrangement gives better results with less power.

The Buffing and Scouring Machine has a shaft 57 inches long and carries the following equipment:

- | | |
|--|-----------------------------------|
| 2 Split Bottom Buffing Rolls | 2 Flat X-Ray Heel Scouring Wheels |
| 2 "C" Shape X-Ray Heel Scouring Wheels | 1 Heel Breast Scouring Wheel |
| 1 Pin Wheel Pad Complete | |

A powerful Blower System removes the dust resulting from the trimming, buffing and scouring operations, and is designed to overcome certain objectionable features of other blowers.

The Finishing Machine has a 78 inches shaft which has all the necessary equipment for black or russet work:

- | | |
|--|--|
| 2 Corrugated Rubber Shank Finishing Wheels | 1 Corrugated Rubber Heel Finishing Wheel |
| 1 Corrugated Rubber Bottom Finishing Roll | 2 Shank and Bottom Brushes |
| 2 Heel Brushes | 1 Stitch Cleaning Brush |
| 1 Levelling Roll | 1 Bead and Wheel |

At the end of the Outfit is the Oscillating Edge Setting Machine which is fitted with union irons and in its motions duplicates hand workmen with quicker and better results.

Each of the machines is operated independently by a friction drive pulley, so that it is necessary to use only those machines which the operator may require. This feature means a saving of power.

All the machines are firmly mounted on legs and driven by a countershaft with carefully adjusted bearings, so that the Outfit runs with very little vibration, and is in every way most efficient.

The Acme of Merchandizing Value— The “DOCTORS” Shoe

VALUE, as represented by “Doctors” Shoe, is the best that money can buy. It is sturdily built, yet its peculiar style gives such a pleasing effect, that it satisfies the tastes of the most immaculate dresser.

It is thoroughly waterproof, and the man who exacts hard wear out of his shoes, cannot fail to be pleased at the excellent service it gives.

It is an ideal shoe for Fall Selling. Its reputation as a speedy seller and sure profit-getter, will stand you in good stead next Fall.

If your jobber’s salesman hasn’t called on you yet—wait for him. He’ll show you how it would be to your advantage to sell the “Doctors” Shoe.

Survival Value

What is it? Survival Value is the lasting prestige added to all footwear by the affixing of the **Union Stamp**—it is the surviving standard because:—

- 1st It is a guarantee of honest footwear, made under the best conditions.
- 2nd It is a pledge of expert workmanship.
- 3rd It is the pass-word which opens the sales doors to Union Men everywhere.
- 4th After the other inducements have all been recited, the conclusive and finishing argument is the **UNION STAMP**.

Every shoe bearing the **Union Stamp** retains a sales value of long duration, for no shoe bears the stamp unless it has been produced under the proper conditions and represents honest value.

For mutual profits, better and bigger business, insist upon the official stamp of the **Boot and Shoe Workers' Union**—the only guarantee of Union Footwear.

**NO DIAMOND
TRADE MARK
NO FAST COLOR**

**NO DIAMOND  TRADE MARK
No Fast Color**

Get this fact firmly fixed in your mind. It may be the means of saving you considerable annoyance and inconvenience; for, if you will insist that the diamond trade mark shall appear on the surface of the eyelets in the shoes you order, you will be entirely free from any complaints regarding "Brassy" eyelets. Fast Color Eyelets are the only kind that cannot wear "Brassy." They enhance the good appearance of shoes more than any other accessory used in their manufacture; and, made as they are, with celluloid tops of solid color, they do not grow old but retain their bright, new appearance long after the shoes are worn out.

The diamond trademark is a sure cure for all eyelet troubles. Only the genuine Fast Color Eyelets have it.

More Gossip on Tendencies in Fall Shoe Styles

Patent Leather Has Taken a Big Lead—French Effects Are Not Strongly Favored—The Modified Recede Toe Still Reigns in West—How Various Mediums View the Style Situation in General—An Analysis of Purchases

With this edition of the SHOE AND LEATHER JOURNAL the fourth and final Fall styles number is presented. In this and the three preceding issues much special information regarding the trend of footwear fashions for the coming Autumn has been furnished. The SHOE AND LEATHER JOURNAL was the first paper in America to tell what would be the leading offerings in Fall samples. This data was first given to the trade on March 2nd, whereas no other medium reached any of the factories, wholesalers or retailers in the Dominion until several days later. In the three special numbers over twenty pages of reading matter, relating to styles, were supplied and some forty-five illustrations of men's, women's and children's shoes representative of leading Canadian styles. Practically all the illustrations were made from drawings from original shoes by the art department of the SHOE AND LEATHER JOURNAL and high character and artistic ability were revealed in every line, curve, joint and stitch of the styles that were pictured.

The SHOE AND LEATHER JOURNAL has received many

expressions of appreciation from members of the trade from one end of Canada to the other with respect to the correctness of the information given and the interesting and comprehensive reports in reference to new toes, heels, leathers, lasts, trimmings, etc., that were furnished in detail. A Calgary shoe firm writing to this paper says: "Your publica-

tion reached us in ample time so that we knew exactly just what the travelers would present and in a measure were prepared to place our orders for certain styles. We cannot tell you how much the early data presented has helped us out. We find that you covered the ground thoroughly and you are certainly to be congratulated on the enterprise and progressive spirit displayed."

Regarding business, now that the Easter season is over,

WOMAN'S MAHOGANY NUBUCK, MEDIUM RECEDE TOE, CUBAN HEEL—THE MCDERMOTT SHOE CO.

GUN METAL BAL. RAW HIGH WELT, MEDIUM RECEDE TOE, SLIP SOLE, BLIND EYELETS—TETRAULT SHOE MFG. CO.

it is expected that trade will pick up generally and that the volume on regular lines will show a very gratifying advance over the previous three months of the year. Retailers who have been hanging back in the matter of placing orders for Fall footwear should not delay action any longer. It is pretty well known now what will be the leading sellers for next Fall and every buyer should take the time to intelligently and properly complete his purchases. Nothing is to be gained by holding aloof, and besides it places the manufacturer in an unfair position in that he is not able to turn out orders promptly and cannot give belated bookings that attention and supervision which all shipments should receive.

It is generally conceded that the styles this fall are not only decidedly attractive, snappy and artistic, but the freak

expressions of appreciation from members of the trade from one end of Canada to the other with respect to the correctness of the information given and the interesting and comprehensive reports in reference to new toes, heels, leathers, lasts, trimmings, etc., that were furnished in detail. A Calgary shoe firm writing to this paper says: "Your publica-

element has largely been eliminated. The spirit of conservatism plays a large part in the representative ranges of every leading establishment, and the style situation seems to be working into the hands of the retailer. He should take full advantage of the situation. An exchange points out that there is very little excuse for the dealer carrying other than reliable styles and the sort of shoes that will eventually make it possible for him to do away with a necessity for expensive and often ruinous cut price sales.

Popular Materials and Patterns

In the percentage of distribution in women's Fall goods The Shoeman makes the following interesting forecast, showing that patent leather has the call, the proportion being greater than all other leathers combined. Here is the table: Materials—Patent, 56 per cent.; black calf, 29 per cent.; tan calf, 4 per cent.; black kid, 9 per cent.; all others, 2 per cent. Patterns—Lace, 7 per cent.; whole quarter blucher, 3 per cent.; foxed blucher, 3 per cent.; button, eighty-seven per cent.

In men's shoes the probabilities are more clearly defined than in women's. As we have heretofore pointed out, the tendency is still strong toward the recede toes with low heels, the so-called custom effect. This extends down into the medium grades. The medium high round toe is undoubtedly still a very considerable factor, but the tendency is as above noted. Shoes with broad shank basis are prevalent more than ever.

The weight of soles in men's shoes has a tendency to become lighter, the single sole being a strong favorite.

The narrow square toe last is being shown extensively and will have some call as a feature proposition, but not in large volume.

Rubber sole styles for Fall will be shown a bit more than a year ago, although this feature is not being pushed as we believe it might be for Autumn selling.

Cloth tops in the better grades will see quite a bit of action for next Fall's selling.

The unperforated tip is not likely to prove a big seller, but will be bought in some small degree.

The Leading Modes in Women's

In women's footwear popular toe shapes are the narrow and medium recede, with here and there a round toe effect.

In the middle West and far West, according to The Shoeman's analysis, the medium round toe will still have a good call. The tendency in styles, which have been exemplified in the long recede, fairly narrow toes, is already showing some signs of a change and there are indications of the revival of the stage last, and while an attempt is being made to introduce the short vamp, square effect French last. Patent leather and fabrics are certainly leading, with whole quarters in vestings of various shades and weaves. The popular length of vamp is from three to three and a half inches, while on the stage last the average is from two and a half to two and three-quarter inches. It is the general belief that the medium high toe or the full round one is gradually disappearing, but in the moderate price trade and at certain centres in the West there is still a strong demand for this type of toe.

Light and Dainty Effects

As has been frequently noticed in these columns, soles are lighter in weight and a larger proportion of turns is seen this year than ever. This has had the effect of causing many welt shoes being finished on finer, lighter and airier lines. The variety in heels this year is one of the most pronounced characteristics in women's footgear. The Louis, kidney, and concave heel, both in leather and wood are being presented on nearly all the offerings. The average height is from one and a half to two and an eighth inches. Plain toes are still popular, and where tips are used they are generally unadorned and stitched with double and triple rows of stitching. Tops are cut about seven inches high and the number of buttons vary from eleven to fifteen, being generally of the plain, ordinary character, freak buttons having been eliminated. Among low cuts are seen strap effects and colonial designs, circular and seamless pump, with fabrics in a number of pleasing and popular combinations.

French Toes vs. the Long Vamp

"Lasts are not in great variety, save as to the continued demand in certain parts of the West for fairly stubby effects, favored according to location all the way from the high toe to the modified knob," says the Shoe Retailer. "But city trade has taken kindly to the long drawn out

(Continued on page 49)

How Often Should Shoe Clerk Change His Position?

Numerous Shifts Do Not Predispose An Employer in Favor of An Applicant—The Man With a Clean, Progressive Record and Steadfast Qualities Stands the Best Chance—Varied Experience is so Much Capital

By GEORGE W. BROCK

Does it pay a young man to change his position? How frequently should he make a shift? Is it best to remain with one firm for many years or to engage with several, thus rounding out and enlarging experience and insight and obtaining different viewpoints?

It is generally conceded that until a man is 22 or 23 years of age, it does not particularly tally against him to have already had three or four positions—in fact, many earnest young fellows resign, going from one shoe store to another, in order to find out the various ways of handling problems and to obtain fresh ideas on stockkeeping, window decora-

tion, store arrangement, clearing sales, proper fitting, efficient salesmanship and other matters. They make good use of the added experience and insight regarding it as so much capital, and are thus better qualified to take a step higher when the door of opportunity opens. It is well to be prepared so that when promotion comes one is ready for it. It was Abraham Lincoln who said, "I will study and get ready, and maybe my chance will come," and it did.

On the other hand, there are many men today in the shoe and leather business who change jobs almost as frequently as the weather during the month of April. If asked why

THEY ARE AN ALERT AND AGGRESSIVE LOOKING LOT

This group of "Classic" gentlemen will be readily recognized by most members of the shoe trade from one end of Canada to the other. The picture was taken recently before "the boys" set out on their Fall selling trip, with the finest and most attractive line of samples ever turned out by the company. In the assembly are the executive officers and traveling salesmen of Getty & Scott, Limited, of Galt, Ont.

In the upper row (standing) from left to right are Percy Waugh, who covers Western Ontario; Robert Haw-

ley, Eastern Ontario and Montreal; Stuart Anderson, Northern Ontario; W. A. Kearney, Quebec and the Maritime Provinces, and W. G. Fallen, Pacific Coast.

In the lower row from left to right are H. H. Gibbins, whose territory is Manitoba and Saskatchewan; C. H. Holmes, superintendent; F. S. Scott, president; Wm. Chamberlain, secretary-treasurer, and H. Lecky, who looks after Saskatchewan and Alberta. The salesmen have all got off to a good start and are sending in nice orders.

they have done so, they can scarcely give a good reason, and the pretext they put forth is that the change was not their fault, but was due solely to the deficiencies of the boss. Of course, there may be several valid reasons why a man may have been in a number of positions, even against his own will. A firm may have failed, gone out of business, closed up a department, sold out, or something of that character. But often, the move is brought about by a man being inefficient or shiftless, through his stepping aside because the boss has refused to give him more money or he has left the job just because he got in a tiff, was reprovved, could not pull with his associates, or fancied that everything and everybody were against him. Most of these conditions often arise in the imagination of the clerk and the fault has largely been with him and not with the boss. There is no doubt that to have changed positions too often, to have worked for too many firms, is a black mark against an applicant, rather than a notch in his favor. It looks as if such a one were here today and away tomorrow, and the natural supposition is that if he floats into one place and out again, he will float into another. The current of habit and disposition is strong and hard to stem. Stability and firmness count for a great deal. They, at least, establish the fact that a man has staying power and common sense. Perhaps he may not be as brilliant, have such genius, or be as spectacular as some other chap, but the toiler will get there in the end, by persistency, consistency and endurance.

Progressing Step by Step

"Yes," remarked a leading western shoeman, the other day, "When I get an application for a job from a fellow of, say, 30, who has had six or seven situations, some of which have been good ones, and he is asking for a minor position, I naturally conclude that there is something wrong. The chap I like to get hold of is one who has been in a certain position a long time—held it—and then been taken another step, and been advanced again. I know that such a salesman is one worth while—that he is made of the right stuff, and can be relied upon under all conditions. Then, when responsibility such as purchasing, managing or taking charge of some department is forced upon him, he has confidence in himself and you know by his record that he will make good. His work and worth are realizable assets. The same applies to a shoe traveler who has been with too many firms. The fault is not always with the goods, the territory covered, or with the house, it is just as apt to be with himself. Of course, now and then, a salesman strikes a tough proposition, dishonest product, a mean, under-hand boss, or an unreliable and despicable house, but on the whole, employers are just as courteous, efficient, progressive, and ambitious as the ordinary salesman. When a clerk talks about bosses not being appreciative or being short-sighted, cross-grained and mean, there are possibly just as many frailties with the clerk who shirks his work, is trifling and indifferent, and whose chief concern seems to be how he can pull through the day and how quickly the weekly pay envelope will come around."

Make Your Personality Felt

It has been said that "the rolling stone gathers no moss." There is a large measure of truth in this, but if "a stone" never rolled, it would be apt to become so covered with moss or, in other words, lack of initiation, originality and ideals, that it would lose its identity. Individuality, personality, shrewdness and capacity are only developed in the hard school of every day experience, and a few changes, especially at the inception of one's career, do not do any one harm. They tend to stir and develop all the latent qualities a man possesses, but, after a reasonable apprenticeship has been served, one is doubtful of the sticktoitiveness and serious purpose of an employe who has been associated with so many firms and held down a variety of jobs.

There may be exceptional cases, but on the law of aver-

age, or the great generality of experience and deduction, the man who holds what he has and seeks to acquire something better—not in a greedy, or grasping way, but in a sphere of greater scope, higher usefulness, wider insight and brighter prospects, is the one who is going to command the shoe situation in the future, the trade of the town in which he is located, or the confidence of the employer whom he serves. In a word, before changing be sure you are right and if convinced then go ahead. Use your brains, judgment and discriminating faculties and do not be carried away by a reckless spirit, a jealous disposition or a fever of unrest. Too much sail and not enough ballast has wrecked many a human barque on the great ocean of life.

Honored in His Home Town

Fred. R. Foley, proprietor of the Parlor Shoe Store, Bowmanville, Ont., is now a "town father," having been recently elected a member of the council by acclamation. He takes the seat vacated by Mr. Barber, who has been appointed assessment commissioner. Mr. Foley, who is a progressive and energetic business man, was also recently chosen as first vice-president of the Retail Merchants' Association of Bowmanville, who held a successful banquet a few days ago at which E. M. Trowern, of Toronto, Dominion Secretary, and others, gave stirring addresses. Mr. Foley has been thirteen years in the shoe business in Bowmanville and during the past week conducted a live anniversary sale. He is a firm believer in the efficacy of printers' ink. In his announcement he made the following candid, straightforward assertion: "Every year at the end of March we plan a large stock clearing sale. To gain your attention we are not going to resort to exaggerated statements or to offer any of the time worn excuses that are made for announcing sales. We are not sacrificing our entire stock at a tremendous loss, nor are we selling our goods away below cost. But we have gone through our stock and have marked down at clearing-out prices a lot of odds and ends and remnants of lines that we are not re-ordering.

Speaking of his recent election as a councillor, the Bowmanville Statesman says: "Mr. Foley is one of Bowmanville's

most successful business men and should make a live-wire councillor. We hope more of the younger business men will follow the worthy example set by him in accepting public office."

MEN'S SECTION OF NEW STEDMAN STORE IN WINNIPEG LOOKING TOWARD WOMEN'S DEPARTMENT AT THE REAR

Business Getting Plans of Live Western Shoe House

The Spacious New Home of Stedman Shoe Co.—How Firm Minimizes Complaints of Customers—Publicity Methods That Capture Trade—The Wholesale End and Interior Features of Up-to-Date Establishment

A pair of pretty first size bootees for each baby born in Winnipeg and sent with the compliments of the firm.

Supplying neat envelopes for all factories for use in paying their employes on pay days.

All box labels printed in different shades of paper—white, for blucher; mauve, for button; salmon, for tans; gray, for oxfords, pumps, etc.

All male clerks wearing a special store jacket supplied by the firm, thus ensuring attractiveness and uniformity of dress.

A special department kept for repairs which are collected and sent home if desired.

Wrapping done by special wrapping clerk who attends to five separate wickets. Each clerk has his own special wicket and previous to taking a parcel to the wrapper, his first duty is to get his bills checked and make change at the cashier's desk.

Seating accommodation for over 360 persons, including about 150 seats for the little ones in the children's and boys' department. The men's department seats 110 and the women's 108.

Special notice sent out with different kinds of shoes. One notice is put in cartons containing patents, suedes, fabrics, etc., on which some advice is printed regarding the proper care of patent leather, telling how all shoes of the materials named should be treated with care, and stating that the customer is imposing on the retailer if he asks him to replace

patent leather shoes, suede or velvet, that have not been used right.

Another notice refers to shoes of very cheap manufacture, stating that the firm want to act right with their customers and give them the fullest value for every penny, but that it is unreasonable to hold them responsible for anything further than fair wear and tear in the cheaper grades of footwear, as the house sell these shoes for what they are.

The foregoing pointers, or methods are adopted by the Tom Stedman Shoe Co., Winnipeg, who have recently moved into their handsome new store, 296 Portage Ave., in the Somerset Building. The former place of business was at 719-721 Main St. That Tom Stedman, who is the man at the head of this aggressive shoe house possesses initiative and originality, has long been evidenced by references in the SHOE AND LEATHER JOURNAL and by the numerous patrons of his store. The new establishment, of which several illustrations are presented, is most complete and admirably arranged. The total floor space is about 4000 square feet, and the fittings are of enamelled white and gold around the store, while the mezzanine floor or balcony is done in cypress wood. The shelving is of the double carton size to a 16 foot ceiling and the interior is lighted with a brilliant Cincinnati indirect system, while the window fixtures are nickle plate, being supplied by the Curtis Ledger Fixture Co. of Chicago. Over the store is a handsome electric sign, which shines conspicuously at night.

On entering the premises the first department is the

men's and at the rear is the women's, both of which are spacious and well stocked with all kinds of footwear. The children's department is at the back.

Mr. Stedman keeps a staff of 18 men and women clerks and carries a large stock of traveling goods which lines are prominently displayed at various angles in the store. The Stedman Shoe Company hold the exclusive agency of many Canadian, American and English lines, and conduct both a retail and wholesale business, the latter being known as the Western Shoe Distributing Co., of which Tom Stedman is president, Mills C. Simpson, vice-president, and Bernard Stedman, secretary-treasurer.

Represents Eastern Firms

Tom Stedman is the western director of the newly organized Williams Shoe. Limited, of Brampton, and also has control of the western territory for the products of the Thompson Shoe Co., Montreal, the Aylmer Shoe Co. of Aylmer and the Cook-Fitzgerald Co., of London, for portions of Manitoba and Saskatchewan. A staff of travelers is kept continually on the ground, traveling from Fort William to the Pacific coast.

Coming from a family of shoemakers, Mr. Stedman was born in Liverpool in 1867, and worked in his father's shoe store until he attained his majority. He then took a position as chief salesman with the Wm. Reynolds Shoe Co., in a leading Liverpool store, and later, assumed the management of the place. Ambitious and energetic, it was not long before he bought the business. He branched out and soon had a chain of twelve stores in the Liverpool district. The exactions on his time, strength, and health became severe, and, owing to a physical breakdown, he decided to try the Canadian climate. About twelve years ago he left England, and coming with his wife and family, landed in Winnipeg. A side

EXTERIOR OF NEW STORE ON PORTAGE AVE.

light into the active disposition of the man is brought out in the fact that on the second day after his arrival in the Prairie capital, he started in the shoe game again by purchasing the H. J. Middleton business on Alexander Avenue. Two years later, he procured a bigger store on Logan Avenue and a couple of years after that, he acquired the Guest & Cox business on Main street from the hands of the trustees. Mr. Stedman is decidedly fond of hunting and fishing, being a

member of several clubs, and that he is regarded as a citizen of worth and responsibility is evidenced by the fact that he was selected as a member of the provincial Board of License Commissioners of Manitoba.

Mills C. Simpson, who is vice-president of the Stedman Shoe Co., and also of the Western Shoe Distributing Co., was born in Brandon, Man., where he was educated and his first job was with the Adams Shoe Co. in that city. After

CHILDREN'S DEPARTMENT LOOKING TOWARD WRAPPING DESK

spending ten years with them, his services were rewarded by an interest in the business which he sold out five years ago in order to join Mr. Stedman. Mr. Simpson is also an enthusiastic lover of sports, and is very fond of fishing and cycling.

Nearly every shoeman has experienced much annoyance and unpleasantness at times owing to the nerve and effrontery of some people returning shoes and asking for new pairs after they have received the full worth and wear for their money. Of course, some complaints are justified, and are readily met by the retailer, but in many instances, patrons seek to impose upon the dealer, and it seems to afford them a lot of gratification to scold and grumble.

The Notices Serve Good Purpose

Now, perhaps, it would be all right for a shoeman to hand out a new pair if he could get redress from the manufacturer, but as this is impossible, he must exercise a certain amount of backbone. The best way to check these complaints is to forestall them, or in other words, to meet them before they come to a climax. With this object in view, the Stedman Shoe Co., have had two notices printed, which are as follows:

NO SHOE-FIRM IN CANADA CAN BE MORE HONEST WITH THEIR CUSTOMERS THAN US

We try to do the right thing to everyone and to give the fullest value for every penny spent with us.

In shoes of cheaper grades a cheaper class of material must necessarily be used, and we cannot accept any responsibility whatever for unfair treatment in shoes coming under this class.

IT IS UNREASONABLE to expect us to be responsible for anything further than fair wear and tear in cheaper grades of shoes. We sell them FOR WHAT THEY ARE, and the customer in buying them must understand that we have no redress whatever from the manufacturers should the shoes prove faulty.

No. 1—This refers to shoes of cheap manufacture.

THESE SHOES MUST BE TREATED WITH CARE

Patent Leathers should be warmed before being put on. On very cold days new PATENT SHOES had best not be worn. We cannot guarantee them against peeling or surface cracking.

ALL PATENT LEATHER is merely a Japan Coating and is highly sensitive to abuse or cold. **JUST STOP TO THINK OF THIS.**

IT WILL BE STRANGE INDEED if patent shoes **DO NOT CRACK** if they are left in a cold room and are put on without warming.

SUEDES, VELVET AND FABRIC SHOES are not guaranteed, and we cannot be responsible for broken-button pieces where rough treatment has been displayed.

YOU ARE IMPOSING on your retailer if you ask him to replace cracked patent leather shoes or suede or velvet shoes that have not been used right. He has no redress from the manufacturer—just as the manufacturer has no redress from the leatherman.

No. 2—This refers to patent, velvet and fabric shoes.

Since the Company have inserted the leaflets in cartons they report that they have not had half the little faulty complaints which they used to have, and are doing a bigger retail business than ever. In the above notice, referring to patent, velvet and fabric shoes, the SHOE AND LEATHER JOURNAL is of the opinion that, while the spirit and intention are all right, it would have been just as well if the following clause had been eliminated. "You are imposing on your retailer if you ask him to replace cracked patent leather shoes or suede or velvet shoes that have not been used right. He has no redress from the manufacturer just as the manufacturer has no redress from the leather man." The other references are sufficiently explicit and instructive without the latter being added, as it jars a little on the customer. Of course, you have to give some people a jolt or a mighty big shove before they

MESSRS. STEDMAN AND SIMPSON AT WORK IN OFFICE

will take a tumble. The majority are not so dense but that they can see a point without it being driven home too hard. However, no great harm is done, and it may make some people "sit up."

The Tom Stedman Shoe Co. is certainly independent and aggressive, and has put many plans and methods into execution that have brought it to the very forefront of western shoe houses.

Importance of Length in Fitting Shoes

The Short Shoe Loses Its Shape Much More Quickly Than One of Proper Length—Where Ball of Foot Should Rest—Tell the Truth in Matter of Size.

The measuring of length is the most important part of the fitting of shoes.

The inside length of a shoe, measured from the inside of the counter to the inside of the box toe, should be not less than $1\frac{1}{2}$ sizes up to 3 sizes longer than the actual length of the foot, measured from the extreme part of the heel to the end of the longest toe. To get this last measurement, the foot should rest in its normal position with some weight thrown upon it, so as to give it the natural elongated position.

The additional length of the shoe over the actual length of the foot varies according to the shape of the foot. Long, slim, bony feet require greater additional length than do short, thick-set, fleshy feet.

The motto that we, as shoe retailers, should give our customers is: "Buy your shoes long enough and they will wear longer." This is positively true. A shoe that is fitted the proper length will give much more comfort and greater wearing satisfaction than a shoe that is too scant in length.

A short shoe causes ingrowing nails, pinched and cramped-up toes, large joints, bunions, and fallen arches, chiefly due to the fact that the foot has not sufficient room to extend to its natural position. In walking, the foot is held in such a cramped position that the muscles and tendons cannot be developed and grow strong through the exercise of the natural functions. Their weakening leads to fallen arches and other foot troubles.

The short shoe loses its shape much more quickly than one of the proper length. Due to the crowded condition of the toes, the boxes are thrown out of shape; the lining is worn through at the toes; and, in many cases, the vamps become cracked.

The ball of the foot should rest in the portion of the shoe near the junction of the shank and the forepart. It is wrong to have it resting back in the shank, and equally wrong to have it near the cap. A short shoe does not allow the vamp to cross in the proper place and often causes the box and cap to become wrinkled. If a shoe is fitted the proper length, and some of the other measurements are incorrect, less harm will come from it than from a reversal of these conditions.

Many customers are inclined to favor a certain size shoe and are very much opposed, therefore, to having shoes of the proper length. This is noticeable among women, particularly, who prefer to say that they wear a Number 4 rather than wear and admit that they wear a Number 5, which would really fit their feet.

It is not necessary to raise the question of size to the customers; fit them right and if they ask the size, tell them the whole truth. If they then insist upon buying shoes that are not the right size for their feet, inform them that they are wearing the smaller size at their own risk. To fit a customer wrong because the dealer happens to be overstocked upon a certain size is mighty poor policy, and far from a business building asset.

Instruct your clerks to give proper attention to this matter of length, and you will have the satisfaction of knowing that your customers are fitted right, and that they are, therefore, bound to be satisfied with your store.—W. W. Wilson in "Push."

On the Road

"Yes, it takes all kinds of people to make a world. The man who can read most closely the peculiarities of human nature is the one who gets on the best. If you would make a success of salesmanship," declared an old shoe traveler of thirty-one years' experience, the other day, "you must just know your goods and then yourself—be master of both—and under no circumstances lose your temper, become ruffled or give an angry or sarcastic retort for which you may be sorry later.

"It is well to listen to the story of the other fellow, provided he is not a gas-bag or a wind-jabber. You can always get closer to him, particularly if you do not know him very well, by letting him do the 'spouting,' if he is at all inclined to talk. This is, of course, in the introductory stages of business relations—but when you start to sell goods, it is for you to do the talking. Make each point tell and drive home the truths as effectively as possible, without being too boastful or domineering. There is nothing that will make a man resent you and your business quicker than by telling him that he must sell your line in order to be considered up-to-date, and that if he does not handle your brand of shoes, he is an old fogey, a 'has-been,' or a 'never-was.'

"You possibly do not state this in plain terms, but you intimate such, and thus you rub the fellow the wrong way. No matter how old-fashioned the retailers' ideas may be, how out of date his stock and how unprogressive his methods, he does not like to be told so by certain men. He will stand it from some, who know him pretty well and understand exactly how to put the case, but for a new-comer to hand out anything like this is fatal on the spot, so far as securing an order is concerned. We have to adopt all sorts of ruses in order to keep on the good side of men. Business secured through pure friendship is never worth very much. It does not last—it is quality, value and service alone that count. Whenever I hear an old friend of mine say:—

"Well, Tom, I would like to give you an order for old time's sake or because I appreciate you and your personal qualities very highly." I say:—

"For gracious sake, old man, cut that kind of guff out—I do not want you to buy shoes from me on the score of personal friendship or high regard, unless you get full value, genuine worth and sound quality behind the product."

Dodging the Issue Diplomatically

"They say that there is a decrease in cattle, while there is an increase in population—hence the scarcity of leather and high prices of shoes, but if you are out on the road a while, you will come to the conclusion that there is a great deal of 'tommy rot' talked. Oh yes, we have to be very diplomatic in handling men, especially in times of depression and stringency when they get into rather low water financially. I remember on one of my trips west last year, when certain dealers were behind in their accounts, I had to

call on them, but I took blamed good care that they did not buy until they had reduced their indebtedness to the firm. The rules I adopted were something like this. Of course these customers knew perfectly well when I would be along and I dared not pass them by or sell other dealers who were perfectly good in the town. Those in less favorable circumstances might hear of it and think that we were showing favoritism. So I would walk into the store and say:—

"Well, Johnson, old boy, how goes it?"

"Naturally he would reply:

"'Oh well, things have been rather dull this year.'

I would say:

"'Is that so? That is too bad.'

"He would then start to explain that he had a heavy stock, much too heavy to carry with profit to himself, and I would remark, after giving a casual glance around:

"'Yes, you are pretty well loaded up here, particularly as you say trade is none too brisk,' and I would grow confidential and continue:

"'Well, I do not want to load you up with any more stuff this time. I tell you what I will do. I will be around this way again in a few months and you can give me an order for a big bill the next trip.'

"Of course all this had to be done tactfully, but in every case it worked out like a charm and Johnson, who may have been on the verge of bankruptcy, retained a good opinion of our firm and did not for one moment think that we entertained any doubts as to his financial standing or ability to pay. You see discretion often comes to your rescue if you will study the situation closely.

Taught Him to Keep Appointments

"I will give you one other instance of how I brought a certain fellow in eastern Ontario to time. We had been selling him shoes for years and he belonged to that class of individuals who are always making appointments with travellers and constantly violating the same. In fact, he was never known to keep his word when he had promised to be at my sample room at such and such an hour. Well, this fellow got behind too much in his account and was owing us over \$6,000. We had been drawing on him from time to time and he was paying in dribs and drabs, but not fast enough to suit Jack Marsden, our credit man. So Marsden came to me and told me the circumstances before I started out on my fall selling trip. He asked me to be very careful and see that Judson did not buy too freely. In fact, Marsden said if he did not take anything it would please the firm better, "For I am a little fearful about his account," he added, "but do not wish to offend him."

"I told Marsden that would be all right, but that I would call on Judson and while he might report me to the house for the course I was going to adopt, still, if the firm stood behind me, I would carry out my program. I knew Judson's habits, nature, and mode of life to a nicety. I

went to a hotel and unpacked my samples and called around to see Judson.

"Oh, yes," he said, "Mr. Norton, my head salesman, Mr. Ponson of the women's department and myself will be over to see you this afternoon at 1.30. We want some women's pumps, some tan buttons and some patent leathers with cravenette tops and a few box kip and box calf for boys. I will have a good order for you."

"All right, Mr. Judson," I said, "you will be there sure?"

"Yes sir, you can depend upon me."

"Accordingly I made other appointments with the shoe men of the town, so as to be busy all day, but I left 1.30 to 2.30 free, in case Judson might come over. Did he appear? Not a bit of it. I waited a whole hour and no word, either by phone or otherwise. At nine-thirty o'clock that evening I called at his store and said:

"You did not come around this afternoon, Mr. Judson."

"Well no," he remarked, "but I tell you, Mr. K—, we will be over to your sample room at ten o'clock to-morrow morning, sure."

"That will do you no good," I replied.

"Why?" he asked in surprise

"Why," I said, "I am leaving town to-morrow morning at 8.15 o'clock and am all through here."

"What! Do you mean to tell me that you are not going to let me look at your samples?" he exclaimed, in rising accents.

Time of Traveler is Valuable

"Yes," I said, "you made an appointment this afternoon and did not keep it. I am through here and am going. My time is valuable and I cannot afford to remain any longer."

"Did I not tell you that I wanted to buy several lines of footwear from your firm?"

"Yes, but you failed to keep your appointment."

"The upshot of the matter was I adhered to my determination to leave and Judson indignantly said he would report me to the house for lack of courtesy and consideration to an old customer. This was just as I expected and sure enough, this retailer despatched a hot communication to the president of our company, accusing me of all sorts of things. He did not, however, get much satisfaction out of the reply, which went on to explain that the time of the firm's travelers was just as valuable as that of the retailer, and that he should have kept the appointment or sent word to the effect that it was not convenient to do so and made a new arrangement.

"That was the last we heard of the matter until my trip some months later, when I again visited the town and by this time, Judson had improved his financial standing and reduced his amount of indebtedness to the firm, and we were anxious to secure his order. Accordingly, I went to call upon him and asked if he wanted to see my samples. He received me very pleasantly, and told me that he would be over at 2.30 in the afternoon, to look at some snappy new lasts and fascinating patterns that I had, and I knew that he would keep his appointment this time. Promptly at the hour mentioned, he turned up.

He Got a New View Point

"After giving me an order for \$2,300 worth of stuff, and everything was filled in, including the pairs and sizes, he turned to me as we were enjoying a parting cigar and said: 'Say Tom, you taught me a splendid lesson some months ago. I never realized that a traveler's time was just as valuable as my own. I always went on the principle that he could wait—that it was part of his trade to suit my convenience, since I was the buyer and he the seller. Now I see things in a different light. You certainly impressed me with a new view point by the rude jolt you gave me last March. It did me good and I began to examine myself

a little bit and found it was I who was at fault. It was pleasing and inspiring the manner your firm upheld you. They must think a great deal of you to stand at your back the way they did.'

"And it may be added in conclusion that Judson, from that day to this, has always kept his appointments to the minute, or else sent word that it would not be convenient for him to come around."

The Correct Shoe To Wear

The social and outing season makes it imperative that the customers be accurately informed.

The H. M. & R. Shoe Store of Toledo in a little booklet entitled, "Evening Footwear, featuring the correct pumps and slippers for the new dances," says:

"There is nothing so essential in evening footwear as correctness, and this is the detail we insist upon in dress shoes. If you are in doubt as to the proper shoe for any occasion, please feel free to ask the advice of any of our salespeople. They are correctly informed and there is no charge for the advice."

CORRECT SHOE CHART FOR WOMEN

Daylight

FORMAL Wedding, formal call, matinee, reception, luncheon.
Boots, or low-cuts to harmonize costume. All leather; cloth or suede tops. Dull or patent. Patent leather slippers; suede kid or colored slippers.

INFORMAL Shopping, business, walking, automobiling, recreation.
Colored or black, calf or kid boots; moderate heels and toes. Button or lace. Heavy shoes, colored or black, rubber sole. Moderate heel and toe. Individual tastes.

Evening

FORMAL Wedding, reception, ball, formal dinner, theatre, concert.
Reception slippers to match gown. Leather or fabric. Patent slippers or pumps.

INFORMAL Home dinner, informal dinner, club affairs.
Shoes or slippers, conforming to costume. Cloth tops with dull or patent vamps.

CORRECT SHOE CHART FOR MEN

Daylight

FORMAL Wedding, formal call, matinee, reception, luncheon, church or other formal functions.
Patent leather, button or ball. Dull or cloth top, cap toes. Moderate shapes.

INFORMAL Street, office, walking, automobiling, driving, recreation.
Calfskin, dull or tan, high shoe. Button or lace. Also heavy high shoe, rubber soled.

Evening

FORMAL Wedding, ball, reception, formal dinner, theatre.
High boot, patent leather, button, cloth top, plain toes. Patent pumps.

INFORMAL Home dinner, stag dinner or club affairs.
High boot, dull leather. Lace or button. Dull leather pumps.

How Geneva Met Her "Fate" Buying Pair of Shoes

Geneva Schuyler was counting her money. There was a little stock of nickels, another stack of dimes, and as many large pieces as she could hold in the palm of her hand, with a single old rag of a bill that looked fit for nothing save the fire. She sat on the edge of her bed and counted and sighed and counted again. For she was trying to manipulate the money so that it would cover the price of a pair of shoes and a concert ticket at the same time.

"Four dollars and 7 cents exactly," she said aloud. "Not another penny. And three lunches and car fare perhaps to come out of that." She gathered up the money and dropped it into her purse. "I've got to choose," Geneva said to the picture of St. Francis, which obligingly hid a goodly portion of the muddy wall paper. She had selected it for the beauty of the dreamy, dark, young face. Now she thought that somewhere, and not so long ago, she had seen somebody who resembled her picture. It was useless to try and remember, so she dismissed the effort and shifted her gaze to her own small feet. "Four dollars and 7 cents isn't money enough for three days' food and a pair of shoes and a concert ticket all at the same time. Well, I can put off getting my ticket until noon, and by that time I ought to tell better whether or not that shoe is going to hold out."

She Walks Because She is Hard Up

The hands of her nickel alarm clock were traveling quickly. It was time to start for the store. Geneva rose, put on her coat and the new hat she had trimmed herself, took a last look at her young self in the crinkly glass and set forth with apparent buoyancy.

She walked to the store. It was only a mile and Geneva had no idea of saving shoe leather at the expense of car fare. Her way led past the theatre and she paused to look at the handbills which announced that night's piano recital. Memories of a career that had beckoned and deceived brought the tears to her eyes. Once she had hoped—and believed—her name would be drawing crowds to vast music halls. She had been bred for music; the piano had been her earliest plaything. It was her parents' ambition that she should play, and they had grown poor in trying to make a genius of her. She had been well enough content until she had seen what a real genius could do. And then she perceived, sickeningly, that she lacked that mysterious something which is born in one and may not be bought at any price or acquired by years of effort. She went up to the city and got a job in a departmental store.

There her quickness of brain and lightness of touch won for her. And she was now earning \$10 a week and keeping all her illusions intact. It was hard work and lonely work, and the pay often seemed inadequate, but she was at least not merely standing still. Her ambition was to climb to the position of buyer, which would give her a salary that did not need to be stretched out in order to make it cover all the places it should, and also opportunities to travel. Then she could do more than send \$2 a week home, though the \$2 was very acceptable. And even as she faced the name of the great pianist with an unsobbed sob in her throat, and eyes blurring a little, she felt that she had somehow done right in giving up what she could never hope to do well.

"You going?"

The little rush behind her, the hand on her shoulder,

made her turn. One of her store companions had come upon her.

"Oh, I don't know, Bessie, I haven't got my ticket yet."

"Well, you better. The seats are selling like everything. Joe said he got ours." The girl chattered on gayly, keeping step with Geneva as they went on toward the store.

There was a bargain sale going on in the rug department, and consequently shoppers came flocking to look at other things than rugs. Geneva's counter was too attractive to be passed and she got her share of the trade. It was noon before she realized it, and she realized she wanted her luncheon even if it was only going to be sandwiches and tea. Besides, there was her ticket. It came to her that all morning she had been unconsciously deciding that point. It was to be the ticket. The shoes would have to wait. She could risk a cracked shoe better than bear this passionate hunger for harmony which was growing in her.

When she got into the street she found it was raining. She had no umbrella and she scurried toward the opera house under the shelter of the awnings. Afar off she espied a thin streamlet of folk advancing upon the box office. She made one last rush and then it must have happened. She felt her shoe loosen, and looking, she saw that it had split from side to side.

For that kind of disaster there is no remedy save one—new footgear. It must be shoes instead of a ticket after all! To show such a foot was a disgrace. Geneva was glad the street was almost empty as she walked out of the opera house back toward the store.

Her Old Shoes Bother Her

She ascended the stairs to the shoe department and every step of the way that wretched crack gaped wider. It was the first time in her life that she had not wanted new shoes when she could have them. She could not lift her eyes as she asked to see some shoes of good durable leather, size 3½, high, buttoned. The salesman produced a pair, and she sat down to try them on. He pulled off the wrecked shoe and put the new one on. It fitted to perfection. After all, Geneva reckoned that she did love new shoes. She smiled and her sight cleared. And then she saw that the man who was kneeling at her feet and very calmly buttoning her shoe was not an ordinary clerk, but the head salesman and buyer for the shoe department. And his face bore marked resemblance to that of the St. Francis picture on her wall.

Geneva gave an ever so little gasp. And the salesman looked up.

"All right?" he inquired.

"Yes. I'll take them."

She stood up in her new shoes. He wrapped up the old ones. Geneva began to count out her money. She was laying down the last dime when Fanny Clarke of the next counter to hers came in to get a pair of sandals.

"Why, Geneva Schuyler!" she cried. "Why didn't you get your ticket? I was just buying mine at the box office when I saw you coming in. Then you turned around and went out. And here you are buying shoes. Of all the queer things! There's scarcely a good seat left. And I thought you were crazy over music."

"I am," Geneva replied, "but I've heard Mme. Corzeze. It was when I was at the New York Conservatory——"

She paused, for St. Francis was looking at her attentively. Fanny Clarke had moved away.

"New York Conservatory!" he exclaimed. "Why, I was there myself! What did you study?"

"Piano."

"And yet you are here——" His tone finished the question.

"Oh, don't you understand?" Geneva said, "They thought I was a genius at home, and I wasn't even talented. I never had any chance at all, and as soon as I knew it I gave up and started in doing something that would at least earn money."

Mutual Confidences

St. Francis smiled. "I had the same experience," he said. "I started out to be a great violinist, but when I found there was more than technique to playing I gave up and went to selling shoes. It pays better and it is not so heartbreaking."

"Not nearly so heartbreaking," agreed Geneva.

"By the way, I wish you'd go with me to-night to hear

Correze. I have two tickets—one for my married sister, but she's not well enough to go. I think two musical people, if they were together, ought to get a good deal out of such a recital."

Geneva glowed. "Oh, thank you, I'd love to go with you," she said frankly. "You see, I haven't heard any real music or talked with a musicy person since I've been in the city."

After all, Geneva concluded, things turned out very happily. She was glad, too, that she had on new shoes. The music was wonderful; there was a big crowd, and Geneva, in her best dress, with some flowers which St. Francis had sent her, had the time of her life. Even if it had to end right there, she argued, it was worth it all just to set one's feet in new shoes for a moment on such a pinnacle of bliss.

But it did not end there. Though Geneva never realized her ambition of becoming a buyer herself, she married a buyer, which, perhaps, amounted to very much the same thing in the long run. Is she happy in her new home by the lake? Well you should ask her.

A METHOD THAT DISPLAYS GOODS AND SAVES TIME

A rather unusual method of displaying footwear is shown in the accompanying cut of the shoe establishment of A. J. Nadeau, 41 St. Joseph St., Quebec. The method used by Mr. Nadeau is brought about by pulling a carton a third of the way out of the shelf. One of the shoes contained in the box is then placed on the top of it. This not only serves to display goods, but is also the means of saving much valuable time, especially on a Saturday evening when the store is taxed to its utmost. Customers are much more able to choose, without the bother of having to pull out, open and close, and push back the carton half a dozen times before the right line is found.

Mr. Nadeau has worked his way up in the shoe business from a small beginning until now he has one of the finest stores in the ancient capital, and caters to a very large

general trade. He is a firm believer in advertising and always keeps his windows as up-to-the-minute as possible.

His store is a spacious, airy, and well lighted establishment, and all the most modern methods of conducting a retail shop are used in it. The floor is carpeted throughout, the furnishings and fixtures are all of high class material. A show case is placed in the foreground at the entrance, to display special lines.

Mr. Nadeau can be seen at the right hand side in the photo, while his assistant and head clerk, Mr. J. M. Gobeil, is seen at the left. Mr. Gobeil, who has spent many years in the shoe trade, both retail and wholesale, in both Canada and the United States, is thoroughly versed in his business, and is an able lieutenant to Mr. Nadeau, who reports having done a good Easter trade.

Stand Up for the Firm Which Gives You a Living

It is Poor Policy and Base Ingratitude to Knock the House You are Identified With—How a Dead-Sure, Blustering Merchant Was Brought to Time by a Loyal Representative—An Incident With a Moral

"You are sharpers, and I don't want any more of your goods."

"What's that?"

"I say you are dirty tricksters and I want nothing more to do with you."

"How do you make that out, sir?"

"Well, I have been buying your shoes for some time now, and you have been charging me two prices."

"Pardon me, but we gave you value for them, as I can show you if you can come to my sample room."

"I will do no such thing. I tell you that I want nothing more to do with you," declared James P. Deeks, shoe retailer, of G——, to Richard L. Carley, shoe traveler.

Make Good Your Insinuation

"You have made an assertion, sir," declared the latter, "a nasty insinuation, and you have either got to give me a chance to disprove your charges or else you have to prove them yourself."

"I will do no such thing," replied Deeks.

"Well, you will," retorted Carley, "or I will make it mighty hot for you. You cannot make an unfounded charge against my house like that. I know who I am working for and they are square men through and through. I am not going to have them knocked in this reckless fashion."

Thus the strife continued—Deeks declaring vehemently that he would not go over to the sample room and Carley insisting upon it. Finally the drummer said:

"You come over to the sample room and I will prove every statement I have made that you have got better value from our house than anywhere else."

"Well, I cannot come this afternoon," replied Deeks; "this is a half-holiday, and I am going out of town."

"Very well," declared the traveler, "I will wait until to-morrow morning, and you can come over then."

"Perhaps so," was the equivocal ejaculation of the retailer, and thus matters were allowed to stand until the next morning.

On the following day, about 9.30 o'clock, Carley strolled into the store.

"Hello," said Deeks, "you here yet?"

"Of course I am," rejoined the salesman. "I told you I was going to remain here until you came over to the sample room. I do not care whether you buy or not, but you have to come across. I want you to bring along that men's buff bal. of which you were speaking, and on which you say we swindled you."

Went Over to Sample Room

Deeming "discretion the better part of valor," and seeing Carley was thoroughly in earnest, Deeks went to the sample room.

"Now," said the traveler, "you claim that we have been overcharging you five cents a pair on this particular shoe; that you are getting one exactly like it from a house in the East for that much less money, and therefore we have been 'doing you.'"

"Yes," said Deeks, "that is what you have been up to all right; you look guilty."

"Well, you have one of the shoes there which you bought from Mainer & Co., and here is one of ours. Now you are so positive about everything," continued Carley, "perhaps you can tell me where the difference is between those two shoes that would cause us to charge you five cents per pair

more than the other firm. Since you are so ready to find fault with us you should be equally willing to acknowledge the good points of Mainer & Co.'s goods over ours."

Of course Deeks did not want to let on that he knew nothing about shoes, their construction, material, or the cost thereof. He eyed each sample carefully, looked at it inside and out, bottom and top and finally said that the only difference he could see was that Mainer's boot, which he bought at five cents a pair less, had a beaded edge down the front.

"Tut! Tut!" replied Carley. "That would not make half a cent's difference a pair either one way or the other."

At last Deeks had to frankly admit that he could see no difference whatever, and that so far as he could observe, the boot of Mainer & Co. was equally as good as that of Empton Bros., whom Carley represented, yet he was getting it for five cents a pair cheaper. When Deeks owned up that he could observe no distinction whatever, it was then Carley's turn to sail in.

"Did you ever have any complaint from our shoes?"

"No," drawled Deeks.

Are Solid Through and Through

"Well, let me tell you that you will have from Mainer & Co.'s there, six cases of which you bought last month. Our shoes are solid through and through—the slip sole is of genuine leather, while that in Mainer & Co.'s is nothing but paste board, leather board, fibre, or whatever name you like to call it. Just wait until some of your customers get the soles thoroughly wet and you will have all kinds of complaints. That alone will show you that our prices are not too high for a solid leather slip sole, which costs anywhere from ten to fifteen cents per pair, and yet we are asking you only five cents more per pair for the same shoe. Now, which firm gives you better value, sir, Empton Bros. or Mainer & Co.?"

Still Deeks was not overly convinced and did not place an order with Carley. He gracefully backed down and said perhaps he had been mistaken, but at any rate he was going to give the men's buff bals, Standard screw, that he had bought from Mainer & Co. at \$1.75 a pair a thorough trial, continued Carley, who was relating the story to a number of friends the other day:

"I was content to wait, being fully confident of the outcome. It was several months after when I again called on my friend Deeks. I walked into his store and said:—'Good morning, sir. I represent Empton Bros., and no doubt you will remember me.' He smiled in a kind of a sickly way and told me yes, that he had been looking for me. I asked him how those shoes he had got from Mainer & Co. had come out and he told me that he had all sorts of complaints, that as soon as the soles were wet, the slip would project over the outsole and the material could be pulled away in strips like rotten rubber or a burned blanket. They had given no wear whatever and he had declined to have anything more to do with Mainer & Co."

"'You were right,' he added, 'I was unjust in my reflections on your firm and too hasty in jumping at conclusions. Your firm has certainly given me full value. I am certainly sorry for any aspersions that I may have cast upon it.'"

"To-day Deeks and I do business and he is one of the

warmest friends that I have on the road. I have never had a word with him since, and the moral is this, that if your house and its goods are attacked and you have implicit confidence in them, do not let the assailant get away with any hot air. Demonstrate to him that you are right and that he is wrong, or else he is right and you are wrong. If in error honestly acknowledge it. There is no good of crawling when you feel that your proposition is all right. Stand up for your goods every time and if you do not represent a firm whose lines you can uphold, my advice is that you had better get in some other game than the shoe game or with a reputable house," declared Carley.

"Yes," remarked Tom Duffy, a fellow traveler who was standing alongside, "I agree with all that you say. Of course you must recognize that some men are only joshing you and others are deadly in earnest, but when you read your customer thoroughly, you can find out just exactly where he stands. There are as many different varieties and temperaments among shoe retailers as there are among any other class of individuals. The thing is—know your man. Some fellows can argue and not get hot. They are earnest but pleasant about it and when you go away, they have every respect and confidence in you. Other fellows lose their heads entirely and hold their grudge against you forever—at any rate, they never treat you the same. I like a fellow who can get in a good-natured, spirited argument or discussion without indulging in any mean, nasty or dirty reflections, who, if he is beaten or finds that he is worsted, is manly enough to acknowledge it."

Most Strain Lengthwise in Shoes

A shoe may be strained lengthwise much easier and to a greater extent than sidewise. This means the seams of upper and soles. The thread will break on account of this lengthwise strain caused by the bending back and forth of the foot in the act of walking. The flexible bottom is therefore not so liable to break apart as the rigid bottom. The swing of the last bottom helps to do away with the strain on the seams while the shoes are on the wearer's feet. The McKay shoe is bent right after sewing on of sole to get flexibility and at the same time overcome the quick breaking of the stitching thread holding the outsole to insole. The flexibility of the thread itself has not much to do with the breaking of the seam. Rubber has been used on thread in place of wax, but the results were not as would be expected, and the thread gave away just as quickly with a wax thread once cold. The outsole seam rips at the shank part on account of the lengthwise strain, causing the sole to work shorter than the welt and thus force the thread to break away.

What is the remedy to at least partly do away with this longitudinal strain? The answer is found in properly lasting the upper lengthwise. If the fitting is firm at the heel and all the seams brought toward the toe and set where they belong to the forepart of the last, we will to a great extent overcome the severe strain lengthwise. As above stated, the shank part is strained at the outsole seam, while the ball part is strained at the insole, but when the upper is set correctly from heel to toe the whole upper is strained evenly, and no part of the seam is strained more than any other part of that same.—Shoe Topics.

Fire Visits Leather Factory

Fire broke out recently in the calfskin tannery of H. B. Johnston & Co., 137 River street, Toronto. The flames started in the north-west section of the building on the

second floor on Saturday afternoon, April 4th, after the plant had closed down at noon for the day and there was no one in the factory at the time. The damage was confined principally to the second floor, where a large number of hides were stored. The flames reached the third flat by means of a stairway, but the good work of the fire department confined the loss to the second floor, where a portion of the equipment was installed. The damage to the building and stock was about ten thousand dollars.

He Will Cover His Old Ground

Twenty-two years of shoe experience, and the only real genuine "Gideon," so far as name, at any rate, is concerned, in an association of over eight thousand members, is Gideon Knetchel, who has rejoined the selling staff of the newly organized Williams Shoe, Limited, Brampton, after spending a couple of years in the West. He will cover his old ground—the southern portion of Western Ontario. Mr. Knetchel is acquainted with all the different stages of the footwear business and has had practical experience in the art of shoemaking, having served some five years in various departments of the factory. His duties were the inspection of all the shoes as they were going through which gave him a know-

ledge of the fine points so beneficial to any traveler. During the past two years Mr. Knetchel has been covering the Western Provinces taking in part of Saskatchewan, Alberta, and British Columbia, and handling the same line through Western agencies. Since the Williams Shoe, Limited, have been incorporated and have purchased the building, stock and plant of the Williams Shoe Co., a new arrangement has been made for the selling of their output in the West. Satisfactory inducements were offered Mr. Knetchel to remain in the East and join the newly organized company of which he is a shareholder. Though greatly taken up with the West, and enjoying life there, he looks forward to an exceptionally bright future with the Williams Shoe. Mr. Knetchel has also a thorough knowledge of the retail end of the game, having been for ten years a member of the firm of Knetchel Bros., Stratford, where his brother Aaron, still carries on one of the largest businesses in Western Ontario. Laverne Knetchel, who took a position recently as book keeper with W. G. Downing Limited, Regina, is a son of Gideon Knetchel, and, previous to his removal to the West, was accountant in the Union Bank, Brampton.

Good Shoe Stock Keeping is the Essential Thing

It is a Better Policy to Serve What You Have Rightly Than to Carry a Volume of Shoes With Few Sizes in Any of the Lines—How One Retailer Secures Competent Help—A Store of Expert Fitters.

When I left the small town in Nova Scotia, where I was born and raised, to go to a western city to make my fortune, I felt that I was very well fortified to stand a long fight to make good the right way and in the right place. The man who taught me what I knew about shoes up to that time was a city man who migrated to the country for the health of his children and himself. He said the pace was too fast, and that he could live as well in the country on less money and be more contented.

He was a rather complex individual to me, as he was a hard worker and smart. As a matter of fact, his shrewdness in the shoe business was really surprising for a person whose ambitions were satisfied so easily.

He told me that I could make good, but he warned me that to make good I would always have to be in condition for a hard fight.

"Shoe selling takes a man with brains and speed," he said. "You have to hustle every minute of the selling time. And after you have been in for ten years, you will either be a big man with a large income or a 'shoe dog.' That the name given to men who do not make good in a big way, and are plodders who work for the living the business gives them. And there are many of these men who have had the ambition worked out of them."

Could Not Pick the Job

There were many other 'tips' this friend of mine offered. Chief among these was this injunction about getting employment:

"Don't take the first thing you run into. Pick your job."

But I didn't pick my job. I tried to, but couldn't land it. Later on, I found this was a good thing for me, as the house I picked as the live one failed because it did business on the basis that many of meaner sort of houses employed in a Western city during a boom period. The house put a price on the shoe in code, and split the extra money with the salesman who overcharged.

The job I got was with one of the older houses which did a fine, conservative business.

They put me on stock, and they were very particular about this feature. I cleaned boxes and smoothed out shoes. Also I sized up. The second day of my employment rather an astonishing thing happened. It discouraged me horribly.

My employer was serving a friend. The salesman who was doing the fitting had gone after the size in a style he was sure would fit. At the time he was on top a ladder looking over the stock.

"Get a size 8A," the employer called up.

"We are out of it," the salesman replied.

"We cannot be, as I put in a big order for them. Look a zin."

The salesman looked, but could not find it.

"Whose stock is this?" asked my employer.

Of course, it was mine, and I was requested to look up the reserve stock and see if we were really out of them. We had the shoe, three pairs of them.

The Boss gave a me fine lecture, and I decided to go to the bottom of the thing and see how I had made the mistake. I made up my mind never to let this happen again. I found that this line had not been sized up by me, and I had relied upon some one else to do this for me. After that I checked up all the sheets and was absolutely sure that if a mistake was made in my stock I would make it.

I am telling all this to show why I was always a sticker for good shoe stock-keeping. All the preparation is worth-

less if the sizes are in reserve rather than in stock where they can be handled.

Was Ready When Chance Came

Six years after I had been employed the man who controlled the business decided upon an easier life. The work was too grinding, and they were going to give the "boys" in the store a chance to buy in. I was offered the opportunity and accepted. I got in for ten per cent., and I had to borrow most of that. After I was in I picked up stock from some of the boys who were pressed or who just wanted their money. After a while I controlled the business and was the chief owner.

The stock-keeping idea still was a hobby with me, and I made this a study so that selling would be easier for them. Again I felt that sales were more often lost for lack of sizes than for any other reason. So I kept up sizes always and reduced the number of styles to hold down the stock to reasonable proportions.

Every morning the boys would go through their stock. I had a printed slip on which they marked the shoes in stock. This slip was sent to the reserve stock, where I had a special man employed to pick out the sizes. These were sent upstairs, and if we were out of a given size we would again check up and send the sheet downstairs for a second looking over. This absolutely insured the shoes being in stock unless the sizes were out.

How to Tell Big Sellers

Before the carton could be turned around as an indication that the size was sold out, an O.K. was necessary by me. This was for the purpose of calling it to my attention and also allowing me to talk over the shoe with the man handling the stock. He could tell me if it was a big seller by the size-ups. And often, this resulted in my sending a wire to hurry up shipments at the factory. It was a very good check and allowed me to talk styles over with the men and outline selling policies with them. Being on their mettle all the time on the stock-keeping, they did better work.

All of this counted most on a busy afternoon. The men being together when we went over the "out" sizes in the morning, they knew pretty well what shoes to keep away from. So they could dig right into the good sizes and fit customers with perfect ease. And what a reputation we got through this! When persons could not be fitted in any other store in town, they sent them to us. Then we fitted their feet perfectly and sent them out happy.

Fit any Reasonable Foot

Finally this prestige spread all over the city, and we settled down to be a store of expert shoe fitters. I bought shoes with the fitting features as the first consideration, and while they had to be modern in style I did not try to follow the extremes as is the case today. So I worked out on the fitting until I felt sure that we could fit every reasonable foot. And from the start I insisted upon good salesmen. They had to be expert fitters and fast. A man that could not sell several hundred dollars' worth of shoes weekly was no good.

Sizes, to me, always looked like the big thing in shoe selling. It speeded up the salesmen, and made them more valuable to the store. While I paid much higher salaries than any other house, my selling expense was always less than 7 per cent. And this is a great deal less than any of the other houses.

I still hold fast to this policy and have a steady following. The people around me talk about the trouble they have with

their salesmen, and how hard it is to get good men; also how customers are getting harder every day. I think it is the merchant who is to blame. He does not give his men the goods with which to work, and then expects the men to do fast and good work. It is impossible.

Good shoe stock-keeping is the essential thing about a big shoe success. To me, it always seemed a better policy to serve what you have, rightly, than to try to carry a volume of shoes with few sizes in the lines.

Through the mistake and its correction I made at the outset of my shoe career, I believe that I owe my real success in the shoe business. Keeping up sizes was my policy at the start and is now. I feel that if merchants would give it the attention it deserves, they would not have to worry about sudden shoe style developments and old stock. Service is what the consumer wants. And he gets one hundred cents' worth of it for every dollar he spends in my store.

New Sales Manager Appointed

G. H. Ansley, who has been in the shoe selling game for the past twenty-two years, has been appointed sales manager of the Perth Shoe Co., Perth, makers of women's welts, in which line they are specializing in all leathers at the fixed price of \$2.75 per pair, and are meeting with splendid encouragement. Mr. Ansley has had an interesting career. He was born in Chicago, but has resided in Canada for the past twenty-seven years. He first started selling shoes in the Maritime Provinces for a shoe company of St. Hyacinthe, Que. Afterwards he went with George A. Slater, Montreal, and then with J. D. King Co., Toronto, as special salesman for the Nursery shoe made by them and which line he originated. Then he was with the Slater Shoe Co., Montreal, for seven years, covering the Maritime Provinces and later Ontario. "Bert's" next position was sales manager for the Nursery Shoe Co., of St. Thomas, and for the past few seasons he has represented the Kaufman Rubber Co., of Berlin, and the Woelfle Shoe Co., of the same city. He is a genial, enthusiastic salesman who knows shoes and in his new position as manager of sales for the Perth Shoe Co. will doubtless be very successful. He will have several capable men under him and the Perth shoe will be sold direct to the retail trade from one end of Canada to the other. Mr. Ansley will remove from Toronto to Perth in the near future.

The Confidence of Your Trade

"The most successful shoe merchant," says a retail man, "is he who has studied human nature most and is willing to treat his customers as he would have them treat him. Don't try to impose on him with a misfit, for every time his foot pains thereafter he will remember that it was you who sold him that pair of shoes.

"Develop the confidence of your trade. Fully 60 per cent. of the goods I am selling are chosen directly from my show window displays. People are attracted to a model displayed there and immediately come in to buy it. They do this because they have confidence in me and know that I will not sell them undesirable stock.

"I aim to oblige my trade in all of the small ways possible. They appreciate such little courtesies and will remember you when in need of shoes again. With every shoe purchase I give either a pair of laces or a button-hook, according to the style of the shoes sold. I do not, however, give away findings as some dealers do. Findings are mer-

chandisable, and there is as big a market for them as there is for shoes if only the merchant will develop it.

"When selling a pair of shoes it is my policy to make that the opportunity to explain the use of various findings. Sales almost always result. I have also found it profitable to carry a side line of hosiery."

Back Again at the Old Stand

An important business change took place in Chatham, Ont., recently, when the Turrill & Dell shoe store passed into the possession of H. Gray Hodges, who will in future conduct the place under his own name. Mr. Hodges has for many years been well known and popular in local business circles. He learned the shoe business in a Chatham store, and later became a partner in the firm of Turrill & Hodges. Subsequently he conducted the store for five years alone. In the spring of 1912 he disposed of the business to the firm of Turrill & Dell, and left for the Western Provinces. Last Fall he returned to assume the management of the business for Mrs. Turrill. In all, he has had nearly fourteen years' active and successful experience in the shoe game and is closely in touch with Chatham conditions and the local trade. With the change the Turrill firm, for many years prominent in connection with the shoe business in Chatham, passes out of existence. Mr. Hodges will, however, retain the services of Messrs. Side and Low, valued members of the firm's staff.

Has Entered Upon New Duties

W. Harold Budreo, who is now covering Eastern Ontario for the Regina Shoe Co., of Montreal, has been several years on the road and is a popular young salesman. Mr. Budreo, who is a brother of J. C. Budreo, shoe retailer, 1344 Queen street west, Toronto, was born in Alliston, Ont., and moved with his parents to Ottawa, where he attended school and took an active interest in all sports, being a hockey enthusiast. He began his shoe career by entering the service of Blachford, Davies Co., Toronto, and after being in the warehouse some time, was given a position on the road, covering northwestern Ontario for seven years for that firm. Mr. Budreo has now entered upon his duties and is meeting with very gratifying success in his new position. He resides in Toronto at 47 Springhurst avenue.

Opens Attractive New Store

C. B. Pratt has opened a Tally-Ho shoe store in Ottawa. The shoe is sold at five dollars everywhere and is made on twelve different lasts with seventeen sizes to each last and five widths in each size. Speaking of the location of Mr. Pratt's new business home an Ottawa paper says: "This new store—the middle one of the three in the new block belonging to Mr. N. D. Porter—which has just been completed, adjacent to the Dominion Bank at the corner of Bank and Sparks, is especially remarkable. Its situation—on Ottawa's busiest corner—could not be bettered. Its show front is cleverly designed to give a prominent and imposing display. Its interior, with its high ceiling, great depth, and tiled floors provides an attractive, spacious and convenient temple dedicated to the service of the god, St. Crispin. The fortunes of the Tally-Ho shoe will be guided by Ottawa's well known shoe merchant.—C. B. Pratt.

How a Shoe Merchant May Become More Successful

The Retailer Should Know The Minute Details of His Business, Especially in Figuring His Selling Cost and Has Percentage of Profit—Nothing Will Get a Man Out of a Rut Like Association With His Fellows

To undertake to tell in five minutes how the shoe merchant may become more successful, when most shoe merchants have spent a lifetime trying to think of some way to do that very thing, is a task that really never should have been assigned to a man from Massachusetts, said R. S. Healey, of Worcester, Mass., before the recent meeting of the National Association of Retailers. For right here in New York on Broadway near 25th street, is a man who has the best receipt I have ever heard of for making a shoe dealer more successful, and the treatment is so simple that I do not think it would take him five minutes to give it. It is so easy to take and understand that the wonder to me is more shoe retailers have not been anxious to adopt it.

This receipt is composed principally of simple ingredients know as better profits, and while there are other things a retail shoe dealer must do to be successful, or more successful, I think it is strongly evident that he must get more profit, so what I have to submit might really be boiled down to the two words—MORE PROFITS.

Of course, before the chance to make better profits is possible, customers must be brought to the store, and the more that are brought, the more profits are possible. Not only progressive, but aggressive advertising is the first thought that should come to every retailer's mind when reaching out for business. Few stores grow to any size without publicity, and those that do reach even a moderate volume of business would have arrived there much sooner had printer's ink been used judiciously.

The shoe store windows never, or hardly ever, receive the care and attention they deserve. To many retailers it seems almost a task and waste of time to change or dress a window, failing to realize that while they neglect their own store windows, the first thing they themselves are attracted to in the larger cities when they visit them, are the beautifully kept and brightly lighted windows of the wide-awake, money-making merchants who have learned to know the value in dollars and cents of the attractive window, which costs comparatively little to maintain, and certainly much less than newspaper space.

I once heard it said that "the edge of the razor was in the lather." I believe that much of the success of a shoe store lies in the window.

Important as is good publicity and attractive windows, the salesmen who greet and serve our customers are far and away of more importance than either, simply for the fact that the good one can keep a customer coming to even an ordinary store, while a poor one will drive trade away from any store, no matter how fine, faster than the best of advertisers or the most expert window dressers can receive them. The moral of this is, pay the competent salesmen well; don't have the other at any price, they cost too much.

After we have succeeded through good advertising and well kept windows in attracting people to our store, and have secured satisfactory sales-people to serve them, we must be able to give our customers

as near what they come for as possible. When customers come for shoes, give them shoes rather than excuses. This means that careful and systematic stock-keeping is necessary, and by stock-keeping is meant also stock buying. In these days of "millinery shoes" the shoe retailer is confronted with a double problem; one is to ignore the novelty shoes and be known as a "has been," and the other is to buy them, and "wish he hadn't."

Bright is the mind that can do just the right thing, but I believe the man who has the courage to buy the new things and watch them closely will be more successful than the man who is afraid to handle them, for the simple reason that people want new things in shoes just as much as they want them in dress goods or millinery, and the man who can furnish them is the man who will get the business.

To be more successful the shoe merchant should also know the most minute details of his business, especially in figuring his selling cost and his percentage of profit. Until a man takes the time and trouble to know absolutely the relation to each other of these two most important factors of his business, he never can tell where the trouble is. It is hard for the physician to treat a patient until the trouble is located; then it is simply a matter of skill and good treatment to effect a cure.

I believe the shoe business is considered about as sick a thing as there is in the mercantile family, but whether that is the fault of the business, or the treatment that has been, and is being given it, is a question. I claim it is not fair to saddle upon the shoe business, as a business, any fault that rightly can be traced to the man who owns or controls it. Whose fault is it that the shoe retailer buying a shoe for \$2.25 sees fit to sell it for \$3.00, while his neighbor, the haberdasher, next door, under practically the same conditions, gets \$3.50 or \$4.00 for a hat that costs him no more?

Let these two men exchange places and in a short time it would be the hat store that needed the quinine and whisky. How much besides style is there in your wife's hat, which the milliner asks you to pay from \$10.00 to \$20.00 for? Probably about \$3.00 worth of material in the \$10.00 one, and \$5.00 or \$6.00 in the \$20.00 one. Is that a good reason for the shoe retailer to sell the milliner's wife a pair of novelty shoes that cost \$4.00 for \$6.00, and yet is not that exactly what most shoe retailers are doing? Whose fault is that? You surely can't place the blame on the business.

In my judgment what we need to-day is a first-class revivalist, for shoe dealers only, to preach the gospel of better prices. Every other line of retail business seems to have awakened to the fact that it is absolutely necessary to get a sufficient margin of profit to cover expenses and leave a satisfactory balance as profit on capital and labor employed, and they are getting it. The right kind of action is what we retailers want. Nothing else will help us. The man who knows, and the man who reads in his trade paper that he ought to get more profit on his shoes,

CUSTOMER: "Have you nothing larger?"

EXASPERATED SHOPMAN: "No madam unless you care to try on the box."

and goes dreaming about it, planning to get it sometime, will not do. It is the doer that will make good. It is the man who, when selecting his lines for the season, buys the best he can in whatever grade he selects, and when they come into his store has the courage and business sense to put a liberal and satisfactory profit on them, who treats all millinery shoes, and all fancy shoes known as "novelties," as a hazardous risk, that must carry a milliner's profit.

Aside from the question of reduced cost of doing business and increased profits for the better success of the shoe retailer, is the addition of other lines to his business, several of which have been found to fit in, in a very satisfactory way.

Take hosiery, for instance, there is no more logical place for it than in a shoe store, and there is hardly anything easier to install. The man who can find the room for a hosiery department in his store, should at least look into the question, and I might almost say, from personal experience, that if he hasn't the room in the store he occupies, he should find one that will give him room, as it can be made a valuable adjunct to any good retail shoe store.

Another line which has been known to fit in well with shoes is leather goods, traveling bags and trunks. This is particularly true in places where the conditions seem to be right, that is, in places where the business is not overdone. These two lines require less detail than shoes and the leather goods will show a better percentage of profit. It is only a short step, also, from good leather in shoes to good leather in traveling goods, so that the shoe retailer, who has obtained a reputation for selling good shoes, would find he had something of an introduction to people in need of traveling goods.

The shoe merchant to be more successful should join the National Shoe Retailers' Association, and not only join it, but should come and rub elbows and exchange ideas and problems with other members. Nothing will get a man out of a rut any quicker than to know something about how the other fellow is doing things; and the experience and success of the big man in the trade, as it is brought out at the conventions of the National Association cannot fail of being of great interest and value to any retailer, who wants to make the most out of his work.

But what probably more than anything else will make the shoe retailer more successful, will be a determination to study the conditions of his business more thoroughly, discover the leaks and weak places in it, and, having discovered them, set strongly and systematically about closing the leaks and strengthening the structure at its weakest points. But neither five minutes nor five years telling the shoe retailer how to be more successful will accomplish that end. Not until he realizes that, although he has a business that has many trials and perplexities, he also has one that will respond to good treatment just as quickly as any other, and just so sure as he gives his business that better treatment just so sure will he be more successful.

Made Allowance on Old Shoes

A Montreal shoeman hit upon a rather novel scheme recently to boom trade during the dull season. He took a ten dollar bill and secured 1,000 new coppers. These he placed in one corner of the window in front of several decidedly attractive shoes. There was a large sign which read "Money talks. Your old shoes are good for 25 cents in exchange for any new pair in this store during the next ten days." As the footgear in the window was all marked in plain figures, this unique advertising scheme pulled a good many purchasers, who were glad to get 25 cents for their old worn-outs. The proprietor reports that a rushing business was done for several days.

IT IS INTERESTING

Please find enclosed money order for one dollar, subscription to "Shoe and Leather Journal" for one year. Thanking you for many interesting news items and pointers in your Journal,

Yours truly,

Chesley, Ont.,

J. B. CRUICKSHANK.

A READER FOR MANY YEARS

I have read every issue of the "Shoe and Leather Journal" for the last fifteen years with pleasure and I wish you every success that the paper merits.

C. H. HIMBURG.

Edmonton, Alta.

EACH EDITION IS GOOD

Enclosed find one dollar to cover my subscription to the SHOE AND LEATHER JOURNAL for the coming year. Your paper is a welcome caller and each edition has some new features which are very helpful and interesting in conducting a retail shoe business. Wishing you every success, I remain,

Yours sincerely,

Deseronto, Ont.,

N. D. CARTER.

IT IS ALWAYS WELCOME

Enclosed please find one dollar for renewal subscription for the "Shoe and Leather Journal." It is a welcome visitor twice a month, and I would not like to be without it.

Sincerely yours,

Petrolia, Ont.

J. A. TAYLOR.

HE LIKES ITS APPEARANCE

Enclosed you will find money order for \$1.00 for subscription to "Shoe and Leather Journal." I saw a copy of your Journal recently and was very much struck with it.

G. W. MEREDITH.

Quyon, Que.

LIKES ITS PROMPT DELIVERY

Enclosed please find one dollar (\$1.00) for which continue sending me the "Shoe and Leather Journal." I am very well pleased with your Journal and I appreciate it very much in my business. It gives me all the latest news in the trade and your semi-monthly edition is much appreciated.

Hoping you will continue sending it as promptly as in the past, I remain,

Yours truly,

Walkerville, Ont.

R. DUGAI.

MANY USEFUL POINTERS

"The Shoe and Leather Journal" is a good paper. It affords the shoe buyer a lot of useful hints.

Canadian Consolidated Earned 9% on Common Stock

Several Changes on Board at Annual Meeting—Volume of Business Not as Heavy as in 1912 Owing to Weather Conditions—Surplus Carried Forward Greater Than That of Previous Year—Favorable Outlook

"The volume of business was not as great as in 1912, largely due to unfavorable weather conditions for the sale of rubber and felt footwear during the latter part of the year. Sales of automobile tires during the year were made sufficient only to maintain a safe connection with tire dealers, pending the completion of your new tire factory. While your Direc-

D. LORNE MCGIBBON, PRESIDENT OF THE COMPANY

tors early in the year foresaw and made preparations for the possible contraction of purchases, due to prudence of many retail dealers (prompted by an admitted need of reduction in their stock of merchandise) the actual falling off was not noticeable until well on towards the end of the year." said President D. Lorne McGibbon, in his report at the annual meeting of the Canadian Consolidated Rubber Co. in Montreal.

"Each year's experience confirms your Directors' judgment, as announced to you in 1911, that the plan of distributing your product direct to the retail trade best serves the manufacturer, retail dealer and consumer.

"Articles manufactured of rubber, being perishable in their nature, in addition to the changes of style and use now so often required, should be as economically stocked as is consistent with good service. Further, in a sparsely settled country of large area, capital should not be tied up unnecessarily, which happens when several stocks of the same manufacture are carried at any centre. Your Company now has twenty-eight distributing branches located all through Canada, and has on its books over fourteen thousand (14,000) active retail accounts. With this connection some of the varied products of your mills find distinct seasonable demand throughout the year, thus continually employing your capital, your officers and your entire staff.

"Each one of your employes is actively bent upon serving the buying public to the best advantage, as your interest is, in the opinion of your Board, dependent on the measure of perfect, ready, and cheerful service rendered.

"The plant of your Dominion Tire Company, Limited, was completed in December, 1913, and, since January 1st, has been in operation with a daily increasing output fully warranted by the existing demand. This plant and equipment for the manufacture of rubber tires is unsurpassed in America.

"Your other properties have been maintained in first-class operating condition. All expenditures for repairs and replacements have been charged to cost of operating."

The Financial Review

The combined statements of the consolidated and constituent companies on December 31st, 1913, was as follows:

| Assets | |
|---|-----------------|
| Property and Plants..... | \$5,273,929.54 |
| Inventories, Manufactured Goods and Materials..... | \$3,055,613.21 |

| Surplus, Beginning of Period..... | \$2,129,639.23 |
| Surplus, December 31st, 1913..... | \$2,129,639.23 |

In spite of a falling off of about fifteen per cent, in net sales, the profits were practically the same as in 1912.

The net surplus carried forward out of the year's profits was \$139,742; the corresponding net surplus in 1912 was \$131,001. Earnings shown on the \$2,804,120 common stock were at the rate of approximately 9 per cent. against a dividend of 4 per cent.

Net sales for the year were \$6,788,859 as compared with what was stated in the previous report to have been approximately \$8,000,000.

New Men on the Board

The old board of directors was re-elected, with the exceptions of W. R. Allan and Shirley Ogilvie. The new members of the board are Walter Binmore, treasurer of the company, and R. E. Jamieson, general sales manager, both of whom have had long and practical experience in the manufacture and sale of rubber goods in Canada. Messrs. Binmore and Jamieson, both being in daily contact with the problems which confront the company, should strengthen the directorate in this respect.

An additional director, to make the total of fifteen, was elected in the person of R. B. Price, of New York.

At the meeting of the board of directors, which followed the meeting of the shareholders, T. H. Rieder, who has been vice-president of the company for some time past, was appointed vice-president and general manager, in active charge of the operations of the company.

Felt Profits were Lower

At the annual meeting of the Canadian Consolidated Felt Co. held in Montreal, The Canadian Consolidated Felt Co., Limited, reported to the shareholders meeting a net operating profit of \$100,983, a decrease before deduction of head office expenses of \$12,246. After deduction of head office expenses, bond interest and preferred dividends a balance remained of \$37,024, as compared with \$49,159 the previous year. Provisions for repairs, etc., took \$13,686, against \$23,715 the previous year, and the net amount re-

WALTER BINMORE, WHO WAS ELECTED A MEMBER OF THE BOARD

maining to be carried to surplus was, therefore, substantially the same as a year ago, \$23,337, against \$23,715 in 1912.

The directors report that the volume of sales was \$735,390, but no figures are available as to the corresponding volume of business the previous year.

The directors say in part: "All your properties have been well maintained and the full cost charged to operations.

"The sale of felt footwear is largely dependent upon early severe winter weather, particularly in our western provinces, and when unfavorable weather is accompanied by other unsettling conditions as in 1913, the result is a business year that cannot fairly be compared with other years. Your directors find that there is a constantly increasing market in Canada

R. E. JAMIESON, ONE OF THE NEWLY ELECTED DIRECTORS

for finer grades of light felt footwear, as well as plush and satin slippers for house and evening wear, lines that are not dependent for their sale on severity of the Canadian winter. To meet this growing demand, your directors have planned a re-arrangement whereby one of the plants will manufacture the finer grades of footwear mentioned above and not heretofore made by us. Equipment will also be added at once to one of your felt mills for the manufacture of other felts than for your own needs in the shoe plants, such as harness, hat and lining felts.

Rocking Chair for the Manager

The annual banquet of the Frontenac Hockey Club was held recently in Kingston. The manager of the team is James T. Sutherland, director of the Cook-Fitzgerald Co., Limited, who is as well and widely known in hockey circles as he is in the footwear realm. The Kingston papers describe him as the "Father of Hockey in Eastern Ontario." As an evidence of the esteem in which both the senior and junior members of the Frontenacs are held, several players were presented by the citizens through Mayor Shaw with rings, watches and lockets. The Mayor complimented them upon the fine sportsman-like manner in which they had contested all their games, and assured the club that the City of Kingston was proud of them. After the gifts to the players George B. McKay, president of the Frontenac Hockey Club stated that as presentations were in order, a few of the followers of the team could not allow the opportunity to pass without showing their appreciation in some manner of Mr. Sutherland. He there upon asked that gentleman to accept a handsome rocking chair, adding that he hoped in the far distant future, when Mr. Sutherland would be too old to get down to the rink and see the Frontenacs perform, he would be able to sit in the chair and think of the old times when he was manager of "the boys." Mr. Sutherland gratefully acknowledged the honor conferred upon him. On behalf of the team he then presented Regiopolis College with a handsome silver shield to convey the feelings of the club toward an institution which has donated largely to the Frontenac Hockey Team.

STRAY SHOTS FROM "SOLOMON."

It is a question of men rather than methods, nine times out of ten. Paganini with a wooden shoe and a couple of strings could do what others with a Stradivarius or a Cremona could not accomplish. And yet it is wonderful what some men can do by keeping everlastingly at it. Some of us are so pig-headed that if we can't do things in our own way we will not do them at all. Look around you and see, with all your energy, whether you are not wasting time by tying yourself up to your own ideas. "In the morning sow thy seed, and in the evening withhold not thy hand, for thou knowest not whether this or that shall prosper or whether both shall be alike good." Keep everlastingly at it, but take a look around and see if anyone is getting more to the acre by getting out at five o'clock in the morning with his seed bag than by working after supper. Perhaps if you closed that shop of yours and went out for a little fresh air or recreation in the evening you would accomplish more, even if you had to get up an hour earlier to work on your books or advertising copy.

A little nonsense now and then may be relished by the best of men but a flippant word or a shady story may spoil a reputation that it has taken years to build. A wiser man than Solomon said: "Not that which goeth into a man defileth him but that which cometh out." Don't try to be witty or entertaining at the expense of your good name. Better be thought a dry chip than a rotten limb. "Dead flies" cause the ointment of the apothecary to send forth a stinking savour; so doth a little folly him that is in reputation for wisdom and honor." There is nothing so disappointing as to find chaff where you have usually found wheat or weakness where you expected strength. It is the little things in life that count after all. A man is no bigger than his weakness and weakness is the unpardonable sin of life. Many a man who has loomed big in social, business and political affairs has found a little thing like a woman's petticoat trip him up and send him headlong to oblivion.

Keep your head. The fellow who jumps up and goes off "half-cocked" never gets anywhere. The man who answers a man of this sort in the same spirit is as big a fool as he is. Great battles are won by coolness more than courage. The bravest man is the one who knows how to be patient under fire. It takes more of the real stuff to sit still and take the assaults of half-baked foes than to "up and at them" with bayonet and butt. "If the spirit of the ruler rise up against thee leave not thy place, for yielding pacifieth great offences." Stay with the game. Don't go out and bang the door because the odds seem against you. The man who knows how to back away and wait his chance to outflank the enemy has learned one of the greatest lessons in the art of war. You have seen some people on whom the battering ram and grapeshot have had no effect. Try a funnel or a hypodermic if you want to get

under their skin. Sometimes the way to get ahead is to back down.

A good deal of the success of life is of the "hit or miss" kind, and so may it also be said of failure. Have you got an "aim" or are you just popping away hoping to get somewhere near the target by sheer good luck? Are you cutting out a road to success or are you following the mob along beaten paths in which you hope to pick up enough to keep things going tolerably well? There are people who jog along from day to day and from year to year content as the habitant is to take what "Le Bon Dieu" sends him. Business to-day is not the game of chance it once was or as it appears still evidently to a good many. It is both a science and a game with all the incentives that both aspects give it. The man who goes into it blindfolded invites disaster. "He that observeth the wind shall not sow, and he that regardeth the clouds shall not reap." Can you discern the "signs of the times" in your business? Have you given as much thought to the principles of merchandizing as you have to the commonest physical conditions about you. Do you know your neighborhood and its possibilities.

Don't put all your money into your stock and all your brains into your store. Give your bigger self room to swing itself. Many a man commits suicide who does not put a razor to his neck or a pistol to his head. Some of the dearest men on earth are those who are found every day at business and Sundays in the church. "Cast thy bread upon the waters for thou shalt find it after many days. Give a portion to seven and also to eight for thou knowest not what evil shall be upon the earth." Get out of yourself. Do a little more than serve yourself or even those you must legally support. Put a little money, or better still a little brains or heart into some of the enterprises that go to make the world better. You will get it back a hundredfold in broader views, enlarged sympathies and greater wholesomeness of life. The man who lets business get hold of him will turn a mummy in a year. You are pretty well dried up now; make a break before the undertaker gets you.

Noise is the refuge of error and the argument of fools. When you have a good cause don't howl. The man who rages and roars may think he is getting there, but the "still small voice" does its work in the end. Enthusiasm is a good thing in its place, but its place is behind and not in the band wagon. "The words of a wise man are heard in quiet more than the cry of him that ruleth among fools." There is always a "saving remnant" to listen to the fellow who knows what he is talking about, after the hot-air artists and four-flushers get through with their fireworks. Don't be carried away by noise. Tom-toms have their place in Africa and war dances in the cannibal islands, but in civilized lands people's ears and eyes are tuned to softer and saner scenes. When you are tempted to fight with your voice, don't. Give the froth a chance to subside and then drop a little common sense into the pot.

More Gossip on Fall Shoe Styles

(Continued from Page 30)

forepart and it is freely predicted that this will be the best selling style for the city trade the coming Fall. This style of last carries a low, recede toe, quite narrow at the end. The vamp length differs and is all the way from three to four inches.

"But, after this style is well established in the city and larger town trade, along with the Parisian dance ideas comes a new toe—the Paris, with a square effect. This type of toe was illustrated in the Retailer several months ago. While at first this toe was not seriously considered by retail shoe dealers, it now looks as if it is up to the retail trade to decide its fate, as the manufacturers are really putting it in the fall samples. Here, therefore, is a really serious problem: Will the short vamp, stage effect broad toe Paris last sell alongside of the long drawn out vamp? Or will one go and the other fall? You, Mr. Retailer, are going to be shown both lasts, and doubtless you will be advised by more than one shoe salesman to buy—both. It no doubt is true that the Paris last, either long or short, for you will see it both ways, has points in its favor. It is new. It is perhaps "the latest thing." But will it displace the long vamp now winning so much favor, and will it sell side by side with the established style? It is in the samples, something is going to be done with it—by you.

"That patent leather will continue to lead in popular favor there is not the slightest room for doubt. The growing importance of patent leather has continued unabated since its return two seasons ago; and for dress wear it has displaced all other leathers. In boots, patents are most conspicuous in vamps with whole cloth or brocaded quarters. In fact, there is no style on the market at the present time so popular as this shoe with a leather Louis heel and plain toe. In a turn, the wood Louis heel is preferred, in fact, few turns are made with leather Louis heels, this style being used principally to combine with light welts.

"So great is the demand for patent that other leathers

do not seem to have a "look in" in the fall samples. But for sake of variety there is a sprinkling of calf, kid, red, bronze, white and other leathers. Mat kid has taken quite a prominent place in the samples and this leather looks very pleasing made over a turn last. It carries out the idea of lightness and may prove popular if the leather stands up in the shoe. Dull calf is shown in less liberality and there is much speculation as to what place it will take, although it is stronger in the sample lines than kid, suede or other

MEN'S PATENT BUTTON, BLACK SERGE TOP, LOW HEEL,
TWO ROWS STITCHING ON TIP, DROP TOE
—TETRAULT SHOE MFG. CO.

leathers or finishes. For street wear gun metal shoes will probably have their usual good sale and a dealer would be unwise to buy all patents or let himself be led into paths of danger by any sort of craze. Bronze seems to have had a revival and the larger dealers have been handling bronze slippers and colonials this winter with success. Fabrics are strong. Some boots have all fabric uppers, although the combination of patent with vesting brocades and other cloths will be the more popular. Some plain gray and tan cloth

Here are three unique and typical American styles which are illustrative of some decidedly new things that are being presented to the trade. The one on the left is a gaiter boot with narrow recede toe, patent vamp, square throat and fawn colored brocade top, with buttons to match, made by Ziegler Bros, Philadelphia. The shoe in the centre is a 12-button welt made on the new French last, with square

toe effect and square throat, with full quarters of fawn color serge and kidney heel, made by J. Albert & Co., Brooklyn. The one on the right is a decided novelty and is known as the Cube boot. It has a patent vamp, gold cloth top, cube tip and narrow toe last, Cuban-Louis heel, shown by Chas W. Strohbeck, Inc., Brooklyn. The styles are likely to sell well only in the large cities.

quarters and tops will be seen, while, on the other extreme, handsome imported gold cloths and gold and silver brocades make the samples glitter with their beauty.

"Although constant efforts are being made to popularize lace boots, the button boot still reigns almost supreme. While fewer buttons are seen on the boots, the best styles call for 10 to 12 buttons, and the popular priced boots carry 14 to 15 buttons."

The Regal Shoe Co., Toronto, are showing an exceptionally fine range for Fall. They have installed four new lasts, three of the receding toe type and one of the full, round toe. All the new shades in mahogany tan, nut brown,

GUN METAL PUMP, CORDED SILK BOW, CUBAN HEEL—BY WALKER, PARKER & CO.

storm calf, willow calf and other lines are witnessed. Among the special offerings are a vici-kid, whole quarter blucher, full double waterproof sole, chocolate lined, on the new Clog last. Raglan cut bluchers in all leathers, plain toe bals and bluchers, and others with double corded tips, are much in evidence. A Walpole welt blucher, in winter calf, with one-half bellows tongue, double viscolized sole, is a winner. Blind eyelets are observed on a number of the fine samples, while in dress shoes patents of all kinds are displayed, some with cloth tops and nine buttons, with recede toes, extra large heels and wide shanks. For Winter wear in the western camps the firm are showing a moose head blucher with full double viscolized sole. Many of the shoes are leather lined and they come in all leathers. The number of bals and bluchers are the largest ever turned out by the

WOMAN'S PATENT SLIPPER WITH WHITE KID INSET, SQUARE TOE, LOUIS HEEL

company and reveal skilled workmanship and splendid finish in all points.

The Adams Shoe Co., of Toronto, are putting out an exceptionally choice range in children's, misses', youths' and little gents', going direct to the trade. These goods are both turn and McKays and are made on foot form lasts and in the latest leathers, patents, gunmetals and tans predominating. In the infants' and children's lines are seen black, brown and gray suede; blue, red, chocolate and other colors in kid, as well as several hues in calf. Many of the patents have colored tops, the combinations being very pleasing. In the larger sizes, buttons predominate and the shoes are solid throughout. Several Napoleon buttons, in kid, calf and other leathers, with patent and self cuffs on nature shaped

lasts, are particularly pleasing. Mr. Tolton, their western representative, left for the Prairie Provinces recently.

The John McPherson Co., of Hamilton, are showing a splendid range in women's welts and McKays on the short recede and pointed toes, with and without tips, with brocade and cloth toppings and quarters. A choice offering is a patent leather button with brocaded top and kidney heel. Another of shiny leather on a New York last has cloth quarters, and another possesses a pointed vamp and pointed tip, which is a really novel effect and carries a Cuban heel. A patent leather bal with brocaded top and tango tie attachments, silk ribbon lace, is a rather unusual mode. Another shoe is somewhat unique, being a mahogany tan button, with tartan top and Cuban heel, while the same effect is seen with a patent vamp. The real tango, with a spool heel and small steel ornament is very pleasing, as well as a kid pump, with steel ornament on the side. In men's, several new lasts have been installed, including Yale, Justice and a new English last, mostly all having the receding toe, yet some carry a full wide toe. Some offerings are a patent leather button with gray suede top, patent with cloth top and plain toe, etc. Mahogany tans in both blucher and bal and various other creations in calf leather, some with blind eyelets, plain stitched tips, low heels and wide shanks are seen; the whole embracing a splendid assortment.

W. E. Gerrish, who represents P. J. Harney & Co., of Lynn, Mass., was in Montreal, Toronto, London and other cities during the past two weeks, and is now touring Western Canada in the interests of that firm. Mr. Gerrish is showing a particularly fine line this year in women's welts, with long, receding toes, both plain and tip, and a variety of heels such as Louis, half Louis, kidney and spool. Several of the samples, known as the Tango, had inserted in the sole twelve small rubber blocks in parallel rows, to prevent slipping. This feature is patented by the P. J. Harney Co. Quarters in bronze, satins, velvets, fawns, grays and other pleasing combinations were observed, with circular vamp of patent leather, gunmetal and kid. The overgaiter effect, with a pleasing combination of fawn and black, was striking. The New French last, with very short forepart and square toe, with rounded corners, was witnessed in patent, gunmetal and kid. The graceful outline and finish of the P. J. Harney Co.'s range of offerings this year are much admired, and Mr. Gerrish reports a fine business.

Norman P. Merrill, representing Bliss & Perry Co., Newburyport, Mass., was showing some decidedly natty and artistic offerings in the slipper line in Ontario towns during the past few weeks, in pumps, Colonials and strap slippers. Quarters of tinsel cloth and brocade were well to the front, while several pleasing specimens were seen in bronze kid, satins of every color, patents, dull kid and other lines. Heels ranged from 10/8 to 2½ inches, the Cuban Louis and the real Louis predominating. The trimmings evidenced a wide variety, cameo ornaments placed on the side being particularly noticeable. Strap slippers and slippers with Tango effects were displayed with ornaments of rhinestones and beaded bows, while a few had rosettes. Other low cuts had beaded trimmings in jet and steel.

Richard Weston, of the Weston Shoe Co., Campbellford, spent a few days in Toronto this week. The firm put in a number of new lasts during last season and their Fall samples are more representative in character than ever. A large number of patent leather boots with cravenette tops, some on recede and others on the semi-recede toes, are being shown. There are also some fine offerings in gunmetal and kid. In the misses' and children's line, nature shaped lasts are being displayed and all leathers are represented, the leading being patent, box calf and pony colt. The firm are now turning out over 600 pairs a day.

Sixty-Two Years of Wedded Life

John Hellyar, the veteran shoe merchant of Bowmanville, Ont., will, on April 22nd, celebrate the sixty-second anniversary of his wedding. Mr. and Mrs. Hellyar are still in good health and reside at "Gladstone Villa." They were married at the Bible Christian Parsonage, Cobourg, on April 22nd, 1852. They made their first home in Cobourg for a couple of years, and afterwards removed to Tyrone, where they lived for twenty-nine years. Since 1883 they have been respected and honored residents of Bowmanville. Numerous friends in the trade will extend congratulations and trust that the venerable couple may enjoy many years more of happiness and prosperity. Both Mr. and Mrs. Hellyar are natives of St. Eval, Cornwall, England. When Mr. Hellyar was only five years of age his father died so that he was early left to make his own way in the world. As a youth he was apprenticed to Mrs. Hellyar's father and with him, learned the shoemaking trade with which he has been identified all his life. Mrs. Hellyar was Miss Catharine Brenton and as a child played with her future husband. The result was that they became closely acquainted, and the intimacy ripened into affection, and on April 11th, 1850, when the Brenton family sailed for Canada, Mr. Hellyar accompanied them to the "New Land." He was married just two years later.

Starting New Shoe Factory in Toronto

As announced in the last issue of the SHOE AND LEATHER JOURNAL, George A. Blachford, intends establishing a new shoe factory in Toronto for the making of women's flexible Goodyear welts, in which line the industry will specialize. Negotiations are now being completed for a site, and an equipment will be installed capable of turning out three hundred and fifty pairs daily. The name of the enterprise will be The Blachford Shoe Co., Limited, which will be incorporated with a capital of \$40,000.

George A. Blachford will look after the manufacturing and executive ends, while Charles A. Blachford will super-

GEO. A. BLACHFORD

vised the selling and styles departments. It is proposed to produce a trademarked shoe to retail at the popular price of \$4.00, and it is expected that the new factory will be in operation within a month, samples already being under way.

Widely known to the Canadian trade as an expert shoe-

man, having for the past four years been general superintendent and salesmanager of the Murray Shoe Co., Limited, London, G. A. Blachford is a Toronto boy, and a son of H. P. Blachford. His first experience in the shoe line was with Faunce & Spinney of Lynn, Mass, makers of misses' and

CHAS. A. BLACHFORD

children's fine welts and turns. He was associated with them for eight years in the order and stock departments and general work of the factory, gaining a thorough experience. He was later with the Minister Myles Shoe Co., Toronto, for four years covering the Maritime Provinces and was then appointed salesmanager of the Murray Shoe Co., and afterwards general superintendent.

Chas. A. Blachford, who will be associated with him in the new factory, has been for seven years with Blachford, Davies & Co., wholesale shoes, Toronto, and during the past three years has looked after the city trade personally. He has a large number of friends in the footwear realm, and as a salesman is energetic and successful. The Blachford Shoe Co., which will sell to the trade direct, starts under the most favorable auspices.

Messrs. G. A. and C. A. Blachford are cousins and their entrance into the shoe manufacturing line marks the third generation of the name associated with the shoe line in Canada. The Blachford family have built up an historic and enviable record.

Rubber Footwear Will Advance

The placing season for rubber footwear selling is nearly completed and all the Companies report orders as being satisfactory. The inducements held out for early buying have resulted in the majority of dealers giving their orders now instead of delaying matters until a later period. It is expected that a revision of prices will take place at the end of the month and that present quotations will be considerably increased. It is likely that the 10% discount which the independent companies have given for early placing will be withdrawn and that the net price list of the Consolidated Rubber Co., will also be advanced. All the concerns this year made a particularly strong effort to get as large a placing business as possible during the months of March and April, and any shoe retailer who has not taken advantage of the special offers will likely have to pay more for his stock of rubber footwear. Last year an increase went into effect

considerably earlier than May 1st, but the companies have been holding aloof until the latter date, during the present season, to give every dealer a chance to avail himself of the low prices, which have been prevailing.

He Likes the Road Life

A man who likes the road and is acquainted with the shoe game in all its branches, from the bench up, is C. A. McKimm, who has recently been appointed eastern Ontario representative for the Aylmer Shoe Co., of Aylmer, and the Nursery Shoe Co., of St. Thomas. Mr. McKimm, whose name is well known in shoe circles, was in the boot business in Smith's Falls for twenty years, as well as running a store in Brockville for ten years of that time. These were

two of the largest shops in eastern Ontario. Several years ago, Mr. McKimm was the first retailer to put on a Spring Shoe Opening, following out much the same lines as the millinery stores. He had a full orchestra in attendance, the walls and windows were decorated with flowers and nicely printed invitations were sent to customers, requesting them to call and inspect the new spring styles from 3 to 9 p.m. Mr. McKimm has many friends in eastern Ontario, is pleasant in manner and likes the shoe game. He was for several years representative of the Regina Shoe Company, of Montreal in the East.

How Findings Pay the Rent

It is hard to believe in these times that any dealer could remain in the dark, for any length of time, as to the advantages in selling findings, still there are men in the shoe business to-day who are in the dark when it comes to their findings department. In selling findings a dealer makes more actual profit, on the money invested, than in any other department in his store, says the Shoe Retailer.

Some might doubt the statement that a well conducted findings department will pay all the rent, and, in many cases, pay the salary of a salesman, but it is nevertheless a fact that this would be the result of concentrated effort on the part of everyone in the store to push findings.

The following list of articles, which are staple in any findings stock, shows the profits that can be made and it is a very easy thing to turn a findings stock as many as six times a year:

Profit Possibilities on Staple Findings

| | Cost | Selling Price | Profit |
|---------------------------|---------|---------------|---------------|
| Arch supports | \$1.00 | \$2.00 | 100 per cent. |
| Bunion Protectors | .30 | .50 | 67 per cent. |
| Ladies' Rubber Heels..... | Average | | 100 per cent. |
| Men's Rubber Heels..... | Average | | 100 per cent. |
| Shoe Trees..... | .50 | .75 | 50 per cent. |
| Dressings | Average | | 100 per cent. |
| Insoles (cork) | .05 | .10 | 100 per cent. |
| Footpowder | Average | | 100 per cent. |
| Shoe Laces | .03 | .05 | 66 per cent. |
| Stocking protectors | .15 | .25 | 66 per cent. |
| Ice Creepers | .12½ | .25 | 100 per cent. |
| Corn Cures | .06½ | .10 | 54 per cent. |
| Overgaiters | Average | | 66 per cent. |

Average 82 per cent.

This list, of course, is not complete, but gives some of the real staple sellings in findings. Many of the fancier articles, such as buckles and poms-poms, show as high as 200 per cent. profit, but, unlike the goods tabulated they are somewhat of a gamble.

As an example, take a store in a small city, where clerk hire is not high, where the population is about 12,000, in a well regulated findings department in any store the monthly profits on the thirteen articles listed above should be about \$67.35, figuring on the basis of profit herewith set forth.

Don't Be Profit Shy on Shoes

The SHOE AND LEATHER JOURNAL has a booklet sent out to retailers by a wholesale firm, in which they set forth that the dealer can make 40 per cent. profit on one of their lines. According to the selling talk given, the dealer buys a quantity of this line at \$5.00 and sells it at \$7.00, making \$2.00 on the transaction. This is figured out as giving the dealer 40 per cent.

Figuring on the cost price, this is, of course, 40 per cent., but if we figure it on the selling price—the basis on which every merchant figures his expenses—we find it is only \$2.00 made on a sale of \$7.00, or 28 4-7 per cent. For argument's sake, we will say that a dealer's expenses are 22 per cent.—of course, on selling price, because they are always figured that way. He would imagine, according to this booklet, that this line would net him 18 per cent., while in truth it would only net him some 6 4-7 per cent.—which it must be admitted is considerable of a difference.

Many dealers are being fooled, and are fooling themselves by the incorrect figuring of profits. They don't seem to recognize the difference between profit on cost price and profit on selling price. Let us suppose, for example, that a dealer's expenses figured out at 18 per cent. He might think that if he got an average profit of 20½ per cent. on the cost price of goods that he would be making money. That is just where he would be fooling himself, and fooling himself badly, for 20½ per cent. on cost price would only mean 17 per cent. on selling price. If his expenses figured out at 18 per cent. he would be losing 1 per cent. on all business done, instead of making a profit as he supposed. Surely, there is much need of examining thoroughly into this question of profit. There are not a few retailers who think they are making a profit on certain lines when they are not, and they will soon find it out.

Very frequently, travelers in putting before retailers, the profit to be made on the line they sell, figure their percentage of profit on the cost price, and not on the selling price. Such a traveler will tell the dealer that the line will pay him a profit of 25 per cent.—but that is on the cost, and only means 20 per cent. on selling price. In the same way, 33 1-3 per cent. quoted on cost only means 25 per cent. on selling price—38.9 per cent. on cost only means 28 per cent. on selling price—and so on.

Says the Report is a Joke

Editor Shoe and Leather Journal:

Sir.—We notice in your edition of April first, a copy of a report sent by U. S. Consul Freeman to his government purporting to cover prices of leather and rubber footwear in the Sydney district. A portion of this report was published in a local paper but was so at variance with the facts that it was looked upon by the local trade as the regular consular joke. We are consequently somewhat surprised to find this report in the JOURNAL, as we feel certain that a little investigation would have placed it in the waste basket rather than in your columns.

Mr. Freeman may be a leather expert, but if so, his experience is hard to detect. We imagine that the slick, shoddy American boot appeals more to his eye than the strong honest Canadian working boot, to his experience. Our working people will not use the \$2.00 American paper and leather boot that he quotes so feelingly. The boot they use is a solid leather containing scarcely a single feature of the American Art Creation.

Shoes at \$4.00, \$5.00, \$6.00 and \$7.00 compare very favorably with the same priced goods sold either in Boston, New York or Philadelphia. In fact, the Canadian last at \$5.00 and \$6.00 contains probably a greater amount of honest workmanship than any American boot of equal price.

Any one at all acquainted with the Rubber trade during the past few years is aware that the Consul's report is the worst rubbish. Canadian prices for several seasons were lower than American. Today, popular priced first quality Ladies' Rubbers in Sydney are 85c., not \$1.25; Men's, \$1.00 to \$1.25, not \$1.50. Long hip boots, \$6.50, not \$8.50.

Yours truly,

CROWELLS LIMITED.

Sydney, C. B., April 7, 1915.

Reorganizing Slater Shoe Co.

At a meeting of the creditors of the Slater Shoe Co., Limited, held in Montreal on April 6, there was a large attendance. It was decided that a committee of three, composed of Messrs. Feates of The Brockton Rand Co., Brockton, Mass., Fisk; of Fisk Limited, and Stuart, of Anglo-Canadian Leather Co., be appointed a special committee to examine the statement shown by the company in explaining their position to their creditors.

This committee reported later in favor of accepting the offer of Messrs. Locke, Gauthier, Dufresne and others, to take over the assets of the present Slater Shoe Co., to re-finance it and put it on a sound basis upon the understanding that each and every creditor having claims against the company signify his willingness to accept 80 cents on the dollar. Such acceptance must be handed in in writing on or before April 20. If all the creditors accept this exceedingly liberal offer each and every claim filed will be paid for at this rate in cash on May 1. The committee were very strongly opposed to any of the creditors forcing the concern into bankruptcy as this would involve long drawn out liquidation proceedings with the prospect of the creditors realizing very

much less than they will now receive on the present tentative offer and that only after a long wait of from one to two years on account of the peculiar circumstances involved. The general feeling is that if skilled shoemen like Messrs. Locke, Dufresne, Gauthier, and their associates reorganize the company, it will be reorganized on a very sound basis and with ample financial backing to enable it to win success from the start. These men, of course, would be on the board of directors, and would have the say in controlling the policy of the company. It must be pointed out that this, of course, is purely a tentative bid conditional upon the acceptance by the creditors of their bid of 80 cents on the dollar. It is fully expected that this offer will be accepted before the time limit expires.

Easter Trade Was Very Fair

Reports from various points in the Dominion, show that a very good Easter trade was done although in a large number of centres the volume of business was not up to last year. Although the festival was observed nearly a month later than 1913, weather conditions were not at all favorable, and the general quiet tone of the trade generally did not result in any particularly large sales. The one bright spot of the holiday period is that most dealers report a remarkably good Saturday previous to Easter Sunday. With the advent of warmer weather, it is expected that Spring styles will move more rapidly, and the retail shoe trade in general reveal augmented activity. Practically all Spring goods have been shipped and the majority of dealers have their stocks in good shape. A number of merchants are already advertising oxfords, sporting shoes, pumps, and other classes of light footwear, which are in constant requisition at this time of the year. The feeling seems to be that trade will considerably improve in the next few weeks.

Salesman Who Loves a Good Horse

Wm. S. Wood, is a man of many parts. He is head of the firm of W. S. Wood & Co., shoe dealers, and for several

years has represented the Kaufman Rubber Co. in Western Ontario. The accompanying illustration was taken in front of his residence in St. Catharines one morning last Winter, just when he was preparing for a drive. Mr. Wood dearly loves a good horse, a dog and outdoor life. He is noted for sending out unique advance cards before calling on the trade and has made a great many friends in Western Ontario. He is an ardent curler, a good shot with the gun, and a first-class salesman.

AMONG THE SHOE MEN.

G. J. Trudeau, Montreal, was in Boston recently.

M. Boyer, dealer in shoes, Montreal, has registered.

O. M. Melanson, Shediac, N.B., was in Montreal last week.

H. W. Algeo, of U. S. M. Co. of Canada, was in Boston recently.

R. E. White, shoe dealer, of Kamloops, B.C., is going out of business.

J. L. A. Lemieu, of Kieffer Bros., Montreal, was in Quebec recently.

Fred Bush, shoemaker, of Macleod, Alta., suffered a total loss by fire.

Lambert & Bilodeau, dealers in shoes, Montreal, have recently registered.

W. J. Thurston, of Guelph, was in Toronto this week calling upon the trade.

Harry Thompson, of the Thompson Shoe Co., Montreal, was in Toronto lately.

Mr. Larochelle, jr., of J. H. Larochelle & Fils, Quebec, was in Montreal recently.

Poitras & Poitras, shoe dealers, Victoriaville, Que., have dissolved partnership.

The Dominion Last Remodelling Co., of Montreal, recently registered in that city.

W. Bruce Maddison has opened a shoe store on St. George street, Moncton, N.B.

A. Meyers, of the Meyers Shoe Co., Montreal, was in Toronto last week on business.

The Waldorf Shoe Store has been opened at 762 St. Catherine street east, Montreal.

J. B. Edington, boots and shoes, of Macleod, Alta., has advertised a change in ownership.

H. B. Johnston, leather manufacturer, Toronto, was in Boston recently on a business trip.

Bert Abernethy, of the Abernethy Shoe Co., Kingston, was in Toronto this week on a visit.

A. E. Medcalf, of the Nursery Shoe Co., St. Thomas, was a business visitor to Toronto lately.

Herbert Bee, formerly cutting room foreman at the Relindo Shoe Co., Toronto, has resigned.

D. McDermott, of the McDermott Shoe Co., Montreal, was in New York for the Easter holidays.

J. F. Cairns, of Saskatoon, Sask., was a recent visitor to New York and other eastern cities on business.

Mr. Williams, of Ames-Holden-McCready, Limited, Montreal, is spending a few days in St. John, N.B.

F. S. Davey, dealer in shoes and groceries, Wroxeter, Ont., was in Toronto recently calling upon the trade.

O. Bernier, shoe retailer, has removed from 62 Notre Dame street east, Montreal, to 95 Notre Dame street.

The assets of Chas. Donnelly, shoe retailer, of St. Catharines, will be sold by Suckling & Co., Toronto.

W. A. Kearney, of Getty & Scott, Limited, is calling upon the Nova Scotia trade in the interest of his firm.

R. H. Henderson, secretary-treasurer of Geo. A. Slater, Limited, Montreal, spent the Easter holidays in Toronto.

I. W. Johnston, of Galt, is covering the Maritime Provinces in the interest of the Cook-Fitzgerald Co., London.

Thirst Stevan, a Swede, hanged himself by a bootlace to a fence in one of the back streets of Lachine recently.

He bore in his pocket a railway and steamship ticket from Winnipeg to Liverpool. Do not use laces in this way.

John V. Hatch, superintendent of Gale Bros. & Co., Quebec, spent a few days in Toronto during the past week.

Mr. Rouillard, assistant manager of Rena Footwear Co., Montreal, recently resigned his position with the company.

It is stated that during the coming summer, the plant of the Granby Rubber Co., at Granby, will be considerably enlarged.

A. F. Kierstead is calling on the trade in Nova Scotia and New Brunswick in the interest of the Hartt Boot and Shoe Co.

The "Public Benefit Shoe Co." is the name of a new Montreal shoe store recently opened at 210 St. Lawrence Boulevard.

Kermode's shoe store, of Nanaimo, B.C., has moved into larger and more up-to-date quarters in the new Grand Hotel Block.

A. R. Trudeau, manager of the Brockton Shoe Co., Toronto, who has been ill for several weeks, is able to be around again.

Several pieces of machinery have been installed by U.S.M. Co. of Canada in the factory of the James Muir Co., Maisonneuve.

Charles Fogelberg, of Gourlay & Fogelberg, Limited, Berlin, is spending a few days in Boston and other Eastern centres on business.

F. W. Knowlton, of Montreal, general manager of the United Shoe Machinery Co., of Canada, was in Toronto last week for several days.

Mr. Honan, formerly foreman of the Slater Shoe Co., Montreal, has been appointed superintendent of the Jas. Muir Co., Maisonneuve.

Robt. McAllister, who covers Western Canada for Geo. A. Slater, Limited, was in Toronto last week showing a fine range of fall samples.

Frank Power and Fred Hull, who represent La Parisienne Shoe Co., Montreal, in Ontario, have left for their respective territories.

W. F. Martin, of the Kingsbury Footwear Co., Montreal, has been in Boston, Haverhill, and other American shoe centers the last few days.

C. S. Corson, sales manager of the Regal Shoe Co., Toronto, leaves in a few days for the Western Provinces on his semi-annual business trip.

Robert Wilson, representing Walker, Whitman Co., Campello, Mass., was in Toronto and other cities last week showing a fine range of samples.

Trumbell Warren, president of the Gutta Percha and Rubber, Limited, Toronto, is spending several weeks in Great Britain and the Continent.

H. R. List, sales manager of the Louis Gauthier Co., Quebec, was in Toronto this week on business and called upon a large number in the trade.

The ratepayers of Brampton will shortly vote on four money by-laws, one being exemption of taxes for a term of years to the Williams Shoe, Limited.

J. T. Tebbutt, of the Tebbutt Shoe and Leather Co., Three Rivers, Que., was in Montreal, Toronto and Ham-

ilton this week on business. He reports that his company is busy and the demand for the Doctor's Antiseptic and the Professor Gold Cross Shoe is good.

Alex. Chisholm, shoe retailer, 1687 Dundas street, and W. T. Fegan, 88 Queen street west, Toronto, are spending a few days in New York and other eastern cities.

D. Lorne McGibbon, president of the Canadian Consolidated Rubber Co., and the Consolidated Felt Co., who has been ill for some time is rapidly improving.

John Sears, salesman in Nova Scotia for "Amherst" shoes, reports good sales. He has been with the Amherst Co. for a number of years and resides in Antigonish.

Building operations have been started on the new addition to the United Shoe Machinery Co.'s plant in Maisonneuve, and the first two floors are already completed.

Messrs. Hayward & Canning, late of Galt, have started a complete shoe repairing plant at the corner of Dundas and Keele streets, West Toronto, and are doing a fine trade.

Russell Bros. have moved into their new store in Fort William. It is 75 feet deep by 25 feet wide and is one of the newest and most attractive footwear houses in the country.

W. C. Bartlett has removed his store from 113 Roncesvalles avenue to 1287 Bloor street west, near the corner of Lansdowne avenue, Toronto, where he has well equipped premises.

Entrance was recently made to the wholesale shoe house of R. B. Griffith & Co., 60 Gore street, Hamilton, by the back door being pried open and several pairs of shoes were stolen.

Allan's shoe store, Carleton Place, has installed a new and modern front and the appearance of the premises is greatly improved. The shop is now one of the handsomest in the town.

A building permit has been issued to Bachrack Bros. for the reconstruction of their store at 234 Yonge street, Toronto. About ten thousand dollars will be expended in improvements.

The assets of the Elkman Shoe and Supply Co., of Brampton, who made an assignment sometime ago, have been sold to the J. W. Hewetson Co., of that town, for fifteen hundred dollars.

Several Montreal retailers suffered damage during the heavy windstorm of Sunday, April 12th, among them "Tom" Dussault, St. Catherine street east, whose large plate glass window was shattered.

W. J. Elliott and wife, of Coldwater, Ont., were in Toronto for several days recently. Mr. Elliott is one of the most successful merchants in that village and handles a splendid line of footwear.

W. H. Schulze, sub. manager of the Moenus Machine Co., Frankfurt-a-Main, Germany, has been visiting the leading American and Canadian centres. He spent a couple of days in Montreal last week.

Will J. Baggs, 678 Shaw street, Toronto, has been appointed Canadian representative for the J. G. Curtis Leather Co., Ludlow, Pa., manufacturers of flexible inner-soles, Goodyear, Gem and McKay.

Charles E. Slater has been awarded a large contract by the Militia Department, Ottawa, for supplying the permanent force with shoes known as the "Army Shoe," which is a special blucher gotten out by Mr. Slater for military purposes.

Now is the time to boom the sale of spring findings. Several city retailers are featuring this line of goods in all their spring window displays. The sales of polishes and dressings of all kinds should be looked after constantly, as the profits are very satisfactory.

The capital stock of the Cook-Fitzgerald Co., of London, shoe manufacturers, has been increased from fifty

thousand dollars to two hundred and fifty thousand dollars by the creation of two thousand shares of new stock of one hundred dollars each.

Geo. H. Taylor, who will represent the Kingsbury Footwear Co., Montreal, in Ontario this season, left for that territory last week. J. D. Campbell, Maritime Provinces, and A. J. Pinsonnault, Quebec Province, have also started on their Fall trips.

The employes of W. J. Gibson's factory and the Gananoque Harness Works, Gananoque, Ont., who were locked out six weeks ago on account of their becoming affiliated with the American Harness Makers' Union, have returned to work, the trouble having been settled.

F. A. Lovell, superintendent of the Cook-Fitzgerald Co.'s plants, London, has returned from a visit to Brockton, Mass., and vicinity. John V. Flanigan, vice-president of the company, spent the Easter Holidays with his family in Boston and New York.

Messrs. Sharp & Hastings, who are connected with the Western Tire and Rubber Co., have been spending some days in Regina, where a big factory will be erected and within two years employ 500 men. The company will make tires, belting, mechanical rubber goods and hose.

John Brotherton, shoe retailer, 550 Yonge street, will shortly start the erection of a handsome new brick store at 578 and 580 Yonge street. The structure will be three storeys high and in dimensions 98 x 26 feet. Mr. Brotherton expects to occupy his new business by September 1st.

W. E. Bryan, general president of the International Union of Leather Workers on harness, and G. R. Brunet, organizer for the American Federation of Labor, were in Montreal recently conducting an active campaign for the formation of a union of the members of the trade.

S. Brunton, late of New York, has been appointed manager of the upper store of the Royal Shoe Co., at 772 Yonge street, Toronto, succeeding C. J. Simpson, who has gone to Hamilton. Mr. Brunton has had wide experience in the shoe trade in Scotland, the United States and Canada.

J. Frank has opened a shoe repairing department at 386 Somerset street, Ottawa, under the name of the Boston Electric Shoe Repairing Co. Mr. Frank, who has had twelve years experience in this line of work, has installed two of the latest Fleming Electric Repairing machines.

The leather workers on horse goods have organized a local union in Montreal. W. E. Bryan, of Kansas City, general president of the International United Brotherhood of Leather Workers on Horse Goods and others, were successful in organizing the union. A charter will be applied for.

F. J. Fitzgerald, who has been with the Cook-Fitzgerald Co., Limited, London, for a number of years in both the office and factory, is now covering Northern Ontario and the towns in Alberta outside of Calgary, Edmonton and Medicine Hat, for the company. He is a son of president C. J. Fitzgerald and is meeting with good success on the road.

Arthur L. Wilson, son of Robert Wilson, Hamilton's oldest shoe retailer, was married at Warren point, Ireland, on April 29th. Mr. Wilson and bride are spending their honeymoon in England, France, Germany and Holland, and expect to return to Canada about the middle of May. Numerous friends will extend their congratulations and wish them every happiness and prosperity.

Berlin is to have another felt shoe factory. It will be started by Oscar Rumpel, late superintendent of the Berlin Felt Boot Co. Mr. Rumpel has leased a large portion of the Williams, Greene & Rome building on South Queen street, Berlin, and will install the latest equipment. His brother, Walter G. Rumpel, has completed a factory build-

ing on Victoria street for the manufacture of felt. Oscar Rumpel will obtain his felt supply from this plant and it is expected that in a short time the new industry for the production of felt shoes will be in operation. J. Maddocks, of New York, has been appointed superintendent of the Con-

solidated Co.'s local plants in Berlin, succeeding Oscar Rumpel.

A fresh furnace fire in basement of Walker's shoe store, 140 James street north, Hamilton, caused passing citizens who observed smoke coming from the chimney down over the roof to think the building was on fire. An alarm was turned in but the services of the department were not required.

The new front which W. Powell, shoe dealer, Dundas street, Toronto, has installed in the building owned by him is one of the most attractive and artistic of any in the province. Mr. Powell, who conducts two stores on Dundas street, is a live and aggressive retailer and is doing a splendid business.

Charles F. Hayes, who has been superintendent of the Barrie plant of Underhill's, Limited, has resigned. He has had many years experience in fine shoemaking, having held responsible positions in both Canada and the United States. Mr. Hayes, who is residing at 610 Jarvis street, Toronto, is at present open for an engagement.

Charles Moore, who has been foreman of the bottoming department in the Galt Shoe Mfg. Co., of Galt, Ont., left recently for Rochester, N.Y. Previous to his departure he was presented by the staff of the bottoming room with a handsome suit case, accompanied by an appreciatively worded address.

The Owl Shoe Store, 123 Yonge street, Toronto, of which Ed. Cook is the energetic proprietor, has opened a branch at 382 Yonge street, in order to meet the growing trade in that section of the city. The branch is under the direction of James Haslam, formerly of the head store, and is doing nicely.

W. C. Schimmin, manager of the women's shoe department of Rutledge & Jackson's departmental store, Fort William, Ont., recently pointed the ranks of the benedicts and his friends are extending congratulations. Mr. and Mrs. Schimmin returned a few days ago from spending their wedding trip in the East.

Wm. Howarth, who operates successful shoe stores at 952 Gerrard street east and 176 Main street, East Toronto, has opened a third store on Yonge street, Eglinton. Since starting in business about three years ago, Mr. Howarth has met with a large measure of success. He also conducts a repair shop on Greenwood avenue.

A charter has been granted to Honeyford & Vernon, Limited, of Collingwood, Ont. The capital stock is forty thousand dollars and the company is empowered to carry on a retail boot and shoe business. Among the incorporators are W. J. Honeyford, merchant, W. E. Vernon, commercial traveler, and W. B. Vernon, salesman.

Mrs. North, widow of Jas. C. North, shoe retailer, Picton, Ont., who died very suddenly on March 26th, passed away on April 5th, just ten days after her husband. Mrs. North had been an invalid for some years. Charles North, who succeeds his father in the shoe business in Picton, and Mrs. J. F. Rowland, of Brussels, are the surviving children.

Chas. E. Slater, whose well known shoe, the Tally-Ho, is being handled by several shoe stores in Canada, spent a few days in Toronto this week. Ye Booterye, 310 Yonge street, Toronto, which is featuring this make of shoe, had out a Tally-Ho for several days, which paraded the streets of Toronto and proved to be an excellent publicity medium.

On May 5, 6 and 7, in Paget Hall, Calgary, the retail merchants of Alberta will hold their annual convention. There are now over 80 branches of the association in the province, and these will all be represented by one or more delegates, so the convention should be largely attended and be of unusual interest. The basement of Paget Hall has been engaged as well as the upper hall for the use of this

RECOGNIZE HIS WORK AND WORTH

T. H. Rieder, who has been vice-president of the Canadian Consolidated Rubber Co., for some time, was honored at the recent annual meeting by being appointed vice-president and general manager. He will have active charge of all operations of the Company. Mr. Rieder is a Waterloo county boy, having been born in New Hamburg, and although only 38 years of age, yet he occupies today one of the most responsible and influential positions of any young man in Canada. Like many another successful captain of industry he began as a stenographer, his first position being with the Berlin Gas Company, where he typed letters part of the day and read meters the rest of the time. Later on he took a position in the office of the Breithaupt leather factory in Berlin, where he got a good, thorough acquaintance with routine work and accounting. Mr. Rieder's first connection with the rubber footwear game began just fifteen years ago this month, when he was appointed bookkeeper of the Berlin Rubber Co., which was then organized. He was given a small financial interest in the concern. Four years later the was successful in organizing a new company, known as the Merchants' Rubber Co., which has ever since been under his supervision and direction. In 1907 the Merchants and Berlin office were absorbed by the Canadian Consolidated Rubber

Co. Limited, and Mr. Rieder whose fitness, worth and general qualifications had long been recognized, was given the management of the shoe division of the factories of the Consolidated Co. Later on, he was elected a director, and today he is one of the directing geniuses and live wire forces behind a great and aggressive organization. An exchange pays him the following well deserved tribute. "Since Mr. Rieder assumed the General Managership of the Canadian Consolidated Rubber Company, Limited, about three years ago, extensive and beneficial changes in the personnel and policies of the Company have taken place, and there is not a member of the organization who cannot say that he has been personally benefited mentally, morally and in efficiency, by coming in contact with the generalship and ability which he radiates."

convention, and the lower hall will be used for exhibits of various products which will be installed by the wholesalers and jobbers.

A fire which destroyed the Cole Block on Second avenue, Saskatoon, doing \$200,000 damages, resulted in a serious loss to C. S. Pace, shoe dealer. He had a stock of about \$13,000, which was practically wiped out. The loss is covered partly by an insurance of \$9,000. Mr. Pace has many friends in the trade who will sympathize with him in his misfortune.

B. Ringler, formerly employed with Messrs. Barker & Patten, at Medicine Hat, has purchased the shoe business on King street, North Battleford, Sask., formerly conducted by C. W. Nolan, and known as the Royal Shoe Store. Mr. Ringler has had nine years' experience in this line of business. He is also contemplating some alterations to the interior of the store.

The following officers have been elected for the ensuing year for the Boot and Shoe Workers' Union, local No. 266, Montreal—President, O. Cote; vice-president, N. Poirier; recording secretary, L. Thibault; secretary-treasurer, C. McKercher; sergeant-at-arms, B. Lalumiere. The delegates to the Montreal Trades and Labor Council are Messrs. L. Thibault, C. Cote, B. Branche and N. Lalumiere.

H. A. Beatty is now associated with the A B C Distributors, with headquarters at 310 Yonge street, Toronto, who are the selling agents for several American shoe lines, including the American and other makes. Geo. E. Owens is representing the firm in Western Canada and M. A. Franklin in Northern Ontario, while Mr. Beatty will look after several Ontario cities and A. S. Many will sell in Quebec for the American British-Canadian Distributors.

John Ritchie, of the John Ritchie Co., Quebec, accompanied by Wm. T. Francis, the new superintendent of the company, was in Toronto this week meeting the trade. Mr. Francis, who is a former superintendent of the Emerson Shoe Co., at Rockland, Mass., has taken complete charge of the Ritchie factory and comes highly endorsed by many of the leading footwear manufacturers of the United States.

H. Dallas, who has been spending the past eight weeks in England, has returned to Toronto. Mr. Dallas, who represents several Old Country shoe and slipper firms in Canada, has secured some new agencies and expects samples in a few days. Business in the shoe line in the mother country, so far as export trade is concerned, is reported to be in a satisfactory shape, but so far as domestic business is concerned, conditions are only fair.

Fred. G. Thompson, dealer in shoes and harness, Woodford, Ont., died very suddenly on April 10th, in the fiftieth year of his age. Two days previously he had been in Owen Sound and had taken dinner with E. A. Edmonds, who represents Garside & White, Toronto, in Northern Ontario. Mr. Thompson stated that he never felt better in his life, but it seems on returning he was taken with a chill, and in a few hours dropped dead in his home.

Melville Durell, of the Durell Shoe Pattern Co., Toronto, who retired from business a couple of years ago, died in February and a few days ago his widow, Margaret J. Durell, ended her life at her home, 52 St. George street, Toronto. Melancholia resulting from the death of her husband and mother is reported to have been the cause. She wrote a note to several friends before shooting herself through the heart. No valid reason is assigned for her action, other than that she was lonesome and despondent, as she was well off.

It is reported that M. A. Packard Co., manufacturers of men's welts, Brockton, Mass., have secured a site in Maisonneuve, Que., just north of the James Muir Co.'s factory, and that they will start building in July. It is

understood that the new factory is to be in operation for next Spring's run. Representatives of the firm spent some days recently in Montreal looking over the situation, and it is said that they were favorably impressed.

The Preston B. Keith Co., Brockton, Mass., turned out a shoe recently which contained no leather. It is an oxford, with the upper part of brown waterproof army duck and a tongue of the same material. The innersole is felt and the toe lining is of tan duck. The quarter lining is of imitation leather. The shoe has a rubber welt, also a sole and heel of rubber. The counter is horn fibre. The toe box is of felt, and the heel seat is nailless. Some shoe that!

John Huxley, sometimes called "Professor" after his great scientific namesake Sir John Huxley, is one of the best known and popular shoe travelers in Ontario, and has for many years represented the W. B. Hamilton Shoe Co., Limited. It is said he has decided to enter the contest for Second Vice-President of the C. T. A., on next year's Board, and if he is as successful in capturing votes as he is in securing orders for boots and shoes, he will not enter the contest on a bootless errand.

The Cook-Fitzgerald Co. have completed the installations in their new factory, known as Number Two and have commenced the making of shoes in that place, which

HAS ENTERED ON NEW DUITES

W. G. Borland has been appointed by Jackson & Savage, Montreal, to succeed the late F. W. Hills, in covering the territory including Ottawa Valley, and part of Quebec Province. Mr. Borland has just returned from his first trip

through that territory in the interests of his firm, and says that he feels he could not be given a better lot of shoemen to call upon, if he were to have his selection of any district in Canada.

Mr. Borland, who is a live young man, has been in the shoe business several years. He acted as purchasing agent for the United Shoe Machinery Co. of Canada, Montreal, for over three years, and has been with his present employers, Jackson & Savage for a period, of over four years, during which time he has acquainted himself very thoroughly with the line of goods which he has to sell. He is well known to the Eastern Townships shoemen, as he has, up to the time of his present appointment been covering that territory for a considerable period.

is modern in every particular. The firm have been exceptionally fortunate, in obtaining such a fine site so convenient to their present factory. This means the same careful supervision which has characterized the output of factory Number One, making Astoria and Liberty shoes so well and favorably known throughout Canada.

Central Leather, for the year ending December, 1913, earned 5.17 per cent. on common. A dividend at the rate of two per cent. was declared in December. Prospects are favorable for continuation, with chances of the stock being put on a 4 per cent. basis in time. The company has spent

ENTERS UPON HIS NINETIETH YEAR

Many of the older members of the shoe trade will no doubt recognize the picture of James Cooper, who is now residing in Boston, England.

Mr. Cooper is a native of Gainsborough, Lincolnshire, England, where he was born in 1825. Not satisfied with home prospects, he, in 1847, emigrated to Canada. His worldly possessions were only sufficient to meet his immediate wants, but he was endowed with a wonderful amount of energy, courage, and perseverance, and these traits of character, added to his knowledge of the shoemaking business, laid the foundation of his success as one of the foremost business men of Canada.

After working for a short time in Quebec, Mr. Cooper removed to Toronto, where he soon became recognized as one of the leading boot and shoe manufacturers. The business of the firm of Messrs. Cooper & Smith, under which he opera-

ted from 1872, was the most extensive in Canada. In addition to the large quantity of goods manufactured in Toronto, the firm were heavy manufacturers in Montreal and Quebec, and also imported extensively from the United States. They did a large business with merchants in all parts of the Dominion and also the West Indies and Australia.

During his entire business career Mr. Cooper held the esteem and confidence of his business associates and fellow citizens, and enjoyed extreme popularity among the working classes. In 1872, the presiding officers of the fifteen trades' unions of the city presented him with a beautifully illuminated address, "expressive of the deep sense of respect they felt for one who has the interests and welfare of their class at heart." On April 3rd he entered his 90th year. He is perhaps the oldest member of the Toronto Board of Trade.

considerable money making the plant one of the most up-to-date in the country. This was paid for out of earnings, and they have also paid off over \$1,000,000 bonds. This will, no doubt, increase earning capacity. Outlook for the business for this year is reported good.

The Public Benefit Shoe Co. have opened a new shoe store in Montreal at 210 St. Lawrence Boulevard, between LaGauchetiere and Dorchester streets. The company announce that they are backed by ample capital and are able to secure job lots and manufacturers' stocks when chance offers them at sacrifice prices. They have buyers on the road whose sole work is to look out for these shoe chances in both Canada and the United States, and every purchase made by their buyers must come up to a certain standard of quality or they will not take it.

Mrs. Jackson, wife of John Jackson, died recently at Clinton, Ont., in her seventy-sixth year. Mr. Jackson was for years in the shoe business in Clinton, which is now conducted by his son, Fred Jackson, who is Mayor of that town. The many friends of the latter will sympathize with him in the loss of a kind and loving parent and also owing to the fact that he suffered a second bereavement a few days previous in the loss of a brother, Rev. H. Jackson, who died in Harper Hospital, Detroit. Pneumonia was the cause of death of both Mrs. Jackson and her son.

The enormous increase in meat exports from Canada to the United States following the enactment of the Underwood tariff and the continued growth of this business, are reflected in the action of P. Burns & Co., of Calgary, the largest packers and exporters in Western Canada, in taking out supplementary letters patent increasing the company's capital from \$3,000,000 to \$10,000,000. Sir William Mackenzie and Sir Donald Mann, president and vice-president, respectively, of the Canadian Northern Railway, are said to be heavily interested in the company.

A recent despatch from Boston, Mass., says, "The shoe industry, which is usually about the last to feel the effects of depression, is apparently entering a period of recession. Manufacturers as a rule are running very slack. This is partly due to unseasonable weather, but more largely to quiet conditions in other lines of business. This reaction is not confined to New England, but extends to the big western shoe centre, St. Louis. It is understood that seven of the Roberts, Johnson & Rand factories are idle and that business is slow with other big concerns in that city.

S. L. Lawther, who for the past six years has represented Marlatt & Armstrong, Limited, of Oakville, in the Maritime Provinces and Ontario, has taken a position with the Anglo-Canadian Leather Co., Toronto, as salesman for the Lower Provinces and Ontario and has entered upon his duties. He leaves for the East this week accompanied by W. J. Heaven, manager of the Toronto branch. Mr. Lawther, who is widely known to the trade, will make his headquarters in Toronto. He is a brother of James Lawther, Western Ontario representative of the Hartt Boot and Shoe Co., of Fredericton, N.B.

The United Shoe Machinery Co. will have a large exhibit at the next annual Canadian National Exhibition, Toronto, occupying a central space for manufacturing purposes in the Process building. The company will supply the Goodyear machines and the operators will be from the factory of the Minister, Myles Shoe Co., Toronto. Only patent leather shoes will be made during the fair and the output will be about one hundred pairs per day. Some will have cloth tops. A. R. Clarke & Co., Toronto, will have a display of patent leather next to the U. S. M. Co.'s space, and will show the stock in its various processes of manufacture from the raw skin to the finished article.

The football season has begun in earnest and games are

being played in various towns and cities in Canada. Football shoes seem to be in good demand. Messrs. Garside & White, of Toronto, who have received a large importation from England of "The Scrum" are showing this famous football boot in black, tan and pearl chrome and white canvas, with tan leather trimmings. The shoe has a solid leather, unbreakable box toe, especially designed for effective use. Each shoe is also equipped with kicking cleat, ankle pads and six studs on the sole which prevent slipping. The shoes are unlined and some are in the well known McGregor pattern. When it comes to turning out football boots, English manufacturers seem to have captured the trade.

C. F. Rannard, of the Rannard Shoe Company, who has returned from his annual trip to eastern cities, where he was inspecting the latest fashions in footwear, in an interview with a Winnipeg paper said, "the features of the new creations will be, for ladies' plain toes with Louis heels and toppings of brocade cloth. The general tendency seems to be that English styles will hold the favor of the public." Mr. Rannard was away for one month and visited New York, Boston, Philadelphia, Montreal, Toronto and other cities. Speaking on the labor conditions in these centres, he said there was no great activity in business of any kind. The policy of retrenchment which had been adopted in Winnipeg and the West in general, was not foreign to the Dominion. The eastern states had also felt the strain of general uncertainty and business constriction. There seemed to be a spirit of optimism, however, he continued, that with the opening up of Spring, business generally would pick up. Winnipeg, he added, seemed to have stood the strain better than many of the cities he had visited during his trip."

Andrew Wilson & Co., cigar manufacturers, 43 Yonge street, have bought the building at 10 Front street west, Toronto, occupied by the wholesale shoe house of F. J. Weston & Son and other firms. The Weston Co. will have to seek new premises in a few months, as the Wilson Co. will not only occupy the entire building, but are also erecting an addition to the west side, excavation for which is now in progress. Several old and burnt shoes, relics of the big fire of ten years ago, have been dug up, as the former Weston warehouse was on the site where the extension is being erected. It was just ten years ago on April 19th that the conflagration visited Toronto, which swept the commercial and wholesale district along the water front and among the shoe firms whose warehouses were completely wiped out were Ames-Holden-McCready Co., Limited; Garside & White, McLaren & Dallas, F. J. Weston & Sons, D. D. Hawthorne & Co., Geo. E. Boulter & Co., Gutta Percha Rubber Co., Tough Sole Shoe Co. All these firms are still in business in other quarters in Toronto to-day, with the exception of the last named firm.

The many friends of W. G. Berscht, of the traveling staff of McLaren & Dallas, Toronto, will sympathize with him in the death of his wife, which took place recently in Guelph, where she had resided for the past eight years. She had been ill for many months and passed away in St. Joseph's Hospital. Mrs. Berscht was born in Brussels, Ont., and eleven years ago was married. Besides her husband, she leaves two children, a little girl aged eight and one son aged two years. The deceased was an earnest worker in St. George's Church, Guelph, and the funeral was largely attended, many floral tributes being received, among them being a pillow from the Guelph Commercial Travelers and a spray from McLaren & Dallas, Toronto. Commercial travelers acted as pall-bearers. Mr. Berscht is a former vice-chairman of the Guelph Commercial Travelers' Association.

The current big uplift in retail shoe store management includes the better training of the sales force, so that each man (or woman) may be more useful to the store, and himself as well. The man who "knows shoes," from tip to top-facing, has an asset which is worth cash to him, and upon which he will be able to realize at some time. Perhaps not right away; perhaps not in the place where he is now; but as he learns he grows in value.

In the last issue it was stated that there had been a rumor for some days in Winnipeg, to the effect that an amalgamation might take place between the Wm. A. Marsh Co., Western, Limited, and the H. G. Middleton Co., We are informed on the most reliable authority that no such a step has ever been contemplated by either company, and each is at a loss to understand how such a misleading and incorrect report should have been circulated. The SHOE AND LEATHER JOURNAL is glad to give publicity to the fact, that there is no truth in the reported merger.

OTTAWA'S OLDEST SHOE DEALER EXPIRES

The man who gave Jim Robinson, the widely known wholesale shoe merchant, of Montreal, his first order when he started out on the road, passed away last week. He was S. J. Teskey, of Ottawa, and Mr. Robinson was at that time representing Breese & Co., of Quebec City. After a career of forty-five years in the shoe trade in the Capital City Mr. Teskey has joined the silent majority at the age of 72 years. He was born in Berlin, Germany, and came to Canada fifty years ago. He first settled in Almonte, where he worked

at shoemaking and forty-five years ago removed to Ottawa, opening a shop at his present stand, 286-288 Dalhousie street. He put in a small stock of footwear and from this modest beginning worked up a fine general trade and gained the confidence of many customers. To do business for forty-five years continually in the same store is a record that few men in the shoe or any other trade ever achieve. Mr. Teskey had been in failing health for the past year, but was able to be at the shop up to ten days before his death. He was the oldest shoeman in Ottawa and leaves a widow, one son and two daughters. The latter are Mrs. Maloney and Miss T. Teskey, who will continue the business of their father. They are well qualified to do so understanding all the details.

PICKLED SPLITS WANTED

Cash prices paid for pickled splits and heads in all weights and qualities. Write us your offering. Wright & Wright, Inc., 109 Lincoln St., Boston, Mass.

NEWSY BRIEFS FROM QUEBEC

L. Graycaidie, of the Yankee Mfg. Co., of New York, was in the city last week on business.

M. G. Guimond, of the Louis Gauthier Co.'s staff, who was ill for several weeks, has returned to work.

Mr. and Mrs. Ludger Duchaine were in Boston, Lynn, Brockton and other centres recently on a visit.

P. Daigle, shoe dealer, of Crown street, has made an extension to his store. He will have a repairing shop in the rear.

Jos. Tanguay, manager of the Rock Shoe Co., has been appointed representative of the labor interests on the committee, composed of aldermen and citizens in connection with the Quebec Fair.

Retailers report a large demand for women's cloth top shoes, particularly with fabrics to match Spring gowns. Collections are reported better and the Easter trade on the whole was fairly satisfactory.

J. E. Samson has returned from a business trip to Toronto, Hamilton and Winnipeg, where he received a large number of orders from the jobbing trade who found his samples up-to-date. He started last week with five new cutters, to fill the orders before moving into his new shop.

Several fine Easter displays were made by retail shoemen during the past week, the exhibits being attractive, well laid out and attention compelling. Among the finest trim was that made by L. F. Falardeau, who showed some particularly choice ranges of Spring styles. O. N. Shink, of St. Sauveur, was once more to the front with a choice array of shoes and flowers.

There is a great demand for hides but the quantity is very limited. All the skins in the surrounding country are sent to the United States. Tanners have been obliged to raise prices from one-half to one cent per foot on many lines. Goat skins are in strong demand, especially the cheap grade, but the quantity is limited and tanners do not care about undertaking any large contracts. Dull chrome sheep has a larger requisition than in previous years and some manufacturers are using it to replace the goat skin in the cheaper lines of shoes.

HE LIKES TO KEEP TAB ON "THE BOYS"

It is not often that a shoe traveler leaves the road to engage in farming, but H. J. McDiarmid of Fillmore, Sask., has done so and does not regret the change. He is still going to be connected with the shoe game, although indirectly, by raising hide producing stock "in an endeavor" as he humorously puts it, "to reduce the price of leather goods." Mr. McDiarmid was seven years on the selling force of the Ames-Holden-McCready Co., Limited, abandoning sample trunks and order pads some months ago. He is devoting special attention to wheat growing.

Writing to the SHOE AND LEATHER JOURNAL he says, "I am enclosing you my subscription for another year. Although not now engaged in the shoe and leather trade, I still greatly enjoy reading your valuable paper. The many personal and business items and paragraphs concerning old friends and acquaintances of the road make almost as good

reading as a letter from "the boys," and, besides, I get the information much more regularly. I hope long to have the privilege of keeping posted on trade matters through the columns of your valuable publication. By getting your paper twice a month the news is fresh and right up-to-date. To my mind the biggest improvement you ever effected in the Journal was when you made the change three or four years ago from a monthly to a twice a month edition. I hope, in the near future you will bring the JOURNAL out weekly."

SUGGESTIONS FROM CUSTOMERS

The Regina Trading Co., Regina, Sask., solicit customers to make suggestions to the managers as to how their service may be bettered or the efficiency of the organization increased. A suggestion box has been placed on the main floor for this purpose. In a recent ad they drew customers' attention to this feature. It had a marked value in getting the goodwill of customers, and inspiring greater confidence in the store. Here is what the company said:

"Being ever on the lookout for suggestions and ideas which will better our service and increase the efficiency of our organization, we have placed a suggestion box in the centre of the store on the ground floor, on the door beside our time clock. We will be pleased to have our patrons and friends drop in any suggestions which they think will better our service or efficiency. And these will receive our prompt consideration. You as a purchaser will no doubt notice lots of little things which we overlook and which should be remedied. Let us have your ideas and views. We thank you."

SPHINX

Shoe Cement Paste

"SPHINX" stands unique and without a rival in excellent qualities wanted by the shoe manufacturer.

It is a quick, strong and clean adhesive, ready for use.

It absolutely takes the place of high-priced cements—on all kinds of linings, cloth or leather, such as vamps, side linings, stays, sock linings, etc.

It is flexible—when applied thin with a brush. Will fasten counters and toe pieces, tap soles, etc.

Best for sock linings, as they never loosen.

There is nothing made that is just as good.

The Showall Window Fitting Co'y
67 William Street, Brantford

22-FOOT GOODYEAR SHOE REPAIRING OUTFIT

MODEL N

THIS Outfit represents the highest development in shoe repairing machinery, and meets every demand of modern shoe repairing. It embraces all the essential processes for making new shoes from old ones, giving the maximum of equipment and efficiency in the minimum space. The Outfit has the Goodyear Stitching Machine with all its improvements, including a new style steam generator which uses gas or gasoline for generating the steam, and operates automatically, thereby insuring a uniform heat for keeping the wax in proper condition and requiring little attention from the operator. The Edge Trimming Machine has the new feature of the two shafts, being operated by a single belt, and the cutter grinder is attached directly to the main shaft. This arrangement gives better results with less power.

The Buffing and Scouring Machine has a shaft 57 inches long and carries the following equipment:

- | | |
|--|-----------------------------------|
| 2 Split Bottom Buffing Rolls | 2 Flat X-Ray Heel Scouring Wheels |
| 2 "C" Shape X-Ray Heel Scouring Wheels | 1 Heel Breast Scouring Wheel |
| 1 Pin Wheel Pad Complete | |

A powerful Blower System removes the dust resulting from the trimming, buffing and scouring operations, and is designed to overcome certain objectionable features of other blowers.

The Finishing Machine has a 78 inches shaft which has all the necessary equipment for black or russet work:

- | | |
|--|--|
| 2 Corrugated Rubber Shank Finishing Wheels | 1 Corrugated Rubber Heel Finishing Wheel |
| 1 Corrugated Rubber Bottom Finishing Roll | 2 Shank and Bottom Brushes |
| 2 Heel Brushes | 1 Stitch Cleaning Brush |
| 1 Levelling Roll | 1 Bead and Wheel |

At the end of the Outfit is the Oscillating Edge Setting Machine which is fitted with union irons and in its motions duplicates hand workmen with quicker and better results.

Each of the machines is operated independently by a friction drive pulley, so that it is necessary to use only those machines which the operator may require. This feature means a saving of power.

All the machines are firmly mounted on legs and driven by a countershaft with carefully adjusted bearings, so that the Outfit runs with very little vibration, and is in every way most efficient.

Selling Miner Rubbers is Merely Meeting a Demand

YOU don't have to argue or coerce, in order to sell a customer "Miner" and "Shefford" brands of rubbers.

From the Atlantic to the Pacific they have achieved a popularity won on merit alone. Customers make it a point to ask for these well-known brands—and insist on getting them.

Undoubtedly this is the "line of least resistance" in the rubber footwear field.

If you haven't seen our Fall samples yet, wait for the "Miner" man—You will be well repaid.

A Sturdy Well-Fitting Wear-Resisting Shoe

THERE'S no need for you to hesitate in the selection of your Fall stock of heavy men's shoes. The "Williams" line is big enough and good enough to look after your requirements. Expert workmanship, good quality materials and A SOUND KNOWLEDGE OF WHAT THE AVERAGE MAN WANTS TO PAY for a good, honest shoe, enables us to thoroughly satisfy the Dealer and the Wearer.

Williams Shoes are so Well-Known

so thoroughly appreciated by the men who actually wear them, that you'll never convince them that there are any shoes "just as good."

Better specify Williams Shoes on your Fall placing order and follow "the line of least resistance."

DO IT NOW!

Two Handsome Fall Styles
in Suede Shoes for women---
the kind that attract dis-
criminating buyers

Here is one of the outstanding features in all BELL shoes.
They always attract buyers who demand the best.

They also strongly attract that class of buyers who ordin-
arily are content to purchase a cheaper shoe but who can
not resist the quality appeal in every BELL shoe.

The two styles illustrated above are but two of a very
strong line of men's and women's shoes for Fall—a line
every dealer should carry.

Our salesmen will be pleased to show
you our complete range.

Why the Monarch, Brandon and Dr. Brandon are Such Fast Sellers

Q There is always a best in everything, and in the making of footwear for men, our constant endeavor is to get it into product. This has been true for the seven years we have been in business, and we feel that Brandon and Monarch Shoes are as near to perfection as an article of human manufacture can be brought. We want you to see and know these shoes themselves. In arriving at the price of our shoes we have fought the danger of sacrificing satisfaction to make an attractive bargain. We have kept the same balance between looks and strength. The result is well-made, well-fitting, good-looking shoes, that backed by our judgment every day justify the very reasonable price asked. When you buy these shoes you buy the reputation they have earned, the reputation that makes their sales an easy proposition for the dealer.

Seen our Fall Samples yet? A Postal will bring a Brandon Salesman or Samples by Express. Write

RUBBERS

You Know the Kind of Service an Automobile Tire Gives---

How great are its wear resisting qualities—that's the kind of service embodied in the three famous brands of boots and lumbermen's—"Kant Krack," "Royal" and "Bull Dog."

By a Special New Process

these higher grade rubbers are vulcanized under pressure the same as an automobile tire. The component parts are thus brought together into one solid mass, thereby preventing porosity or blisters.

This new phase of manufacture, further demonstrates the marked superiority of these deservedly popular brands. That they cost no more than inferior makes, is but one of the many inducements for you to include them in your Fall rubber orders.

Ask your jobber's salesman to show you samples.

ALL LIVE DEALERS HAVE THEM. WHY NOT YOU?

REPEAT ORDERS TELL THE TALE

It does not always take a brilliant salesman to sell a mediocre shoe to the dealer the first time—but such a sale only causes future trouble and loss of business.

When one sale is the basis of many more, it is a sure sign that the goods are right—and this is at the bottom of McDermott success. Women's shoes are our specialty, and we are receiving many repeat orders from satisfied customers every day. This speaks for itself. Have you seen our traveler yet?

See our samples before you order.

MONTREAL

Davis Vegchrome Leather

Retailers, Attention!

Davis Vegchrome Leather

Mr. Retailer, have you the Vegchrome Shoe on your shelves. If you haven't you ought to have, and if you have we venture to say you will soon require more.

Our Reasons are these:

Vegchrome Leather is particularly adapted to Farms, Mines and Woods use.

It is not effected by Barnyard Ammonia as straight chrome leather. The tannage is very soft, giving an Elk like feel.

Vegchrome is heavily stuffed with the best greases and therefore resists water splendidly

The boot made of this leather remains soft under all conditions.

It is the toughest of leathers and wears like iron.

We make it in colors and black.

Ask your jobber for the Vegchrome shoe or write us for information.

How about Your Heavy Shoe Stock

?

The requirements of the average man undoubtedly deserves your special attention.

On your ability to satisfactorily serve him depends your success in business.

The average man not only exacts hard wear out of his shoes, but he demands comfort—and he knows the price he should pay for these qualities.

Service, Comfort & Reasonable Price

are the factors that have played such a big part in the great popularity achieved by YAMASKA BRAND Shoes.

To include these shoes in your Fall stock is literally paving the way for a bigger and more profitable shoe business.

THE  SHOE

Always in Demand

There's always a well-defined demand for VALENTINE & MARTIN SHOES. Every day, the year 'round, the demand is steady and affords the retailer a constant, reliable source of profit.

Have you tried our new URUS CALF SHOES. Dealers who sell them are enthusiastic about them.

Valentine & Martin
WATERLOO, ONT.

Kingsbury-made Shoes are Trade Stimulants

When trade seems poor and the public is apparently loath to part with its ready cash is just the time that the appeal to the prospective buyer must be of the stongest possible kind.

Such an appeal is made by **Kingsbury and America's Beauty** Shoes. They attract strongly, not only because of of style and quality, but also because of the reasonable price at which they are sold. Every dealer gets a good profit many times repeated.

Keeping the Shoe Trade At Home in Your Own Town

How Local Retailers Should Forget Any Petty Jealousies and Work Together for the Good of All—Present the Advantages of Personal Selection, Proper Fitting, Square Dealing and Ready Convenience—Be Loyal to Your Own Community and Inspire this Feeling in Others

As long as the sun shines and water runs there will be some people in every community who will persist in buying their shoes out of the town in which they reside. If you remonstrate with them they will tell you that their money is their own, that they earned the coin and they can do as they dash well please with it.

Every centre will always have a certain number of cranks, or so called "independents," and they rather pride themselves on their free attitude; some of them evidently thinking it is a special brand of distinction.

They glory in the fact that they buy their footwear, underwear, hats, ties, or suits, out of town, proclaiming that they can secure the very latest styles and an infinitely wider selection than at home where the stores are pokey, the goods behind the times and prices higher than in the larger centres.

On the face of it this all sounds very fine and such a wholesale condemnation of men and goods in a local town runs smoothly off the tongue. But back of it all is a meanness, a narrowness and a spirit of downright selfishness that reflects no credit on the buyer abroad.

Why Not Be Consistent

See here, "Mr. or Mrs. Purchaser-away-from-Home" if the village or town in which you live and no doubt earn your living, is so slow and unenterprising, if merchants and goods and people are so far at the rear of the procession and out of date, if existence there is dreary and monotonous and you are really dying the slow death, which you would lead your friends to suppose, why do you not leave the place?

Yes, get out. The world is large, transportation is cheap and traveling easy. Go to some ideal spot or what you think is ideal, but for mercy sake, until you make a shift, keep your mouth closed. The mass of humanity detests the individual who "knocks" the firm for which he works, the community in which he resides, or the people with whom he associates. There is nothing smart or clever about it, and the effect is like a boomerang in the end.

Be Loyal and Generous Minded

Possess local pride, acquire public spirit, cast off petty jealousies and become an optimist. This applies to the local retailer as well as the purchaser. It may be said right here that the home merchant is often to blame for the

trade in his line going out of town. He will not use any paint on his store front. His stock frequently looks like the assortment of a junk dealer owing to the slovenly way in which it is kept. He will not change his window displays or spend a few dollars in badly needed shop fixtures. He makes no effort to introduce his new goods or arrange them in attractive form. He will not advertise the fresh styles because he gravely informs you that "advertising costs money." So does every thing worth while in this world. The people have no magic way of learning of the resources and facilities of a store unless you tell them.

Having Nothing to Do with Him

Then a merchant is often his own worst enemy. He will have nothing to do with the other fellow up the street or around the corner, forgetting that a little co-operation goes a long way. Small prejudices and petty jealousies should be forgotten. Even if the retailers in a town cannot get together—or will not—the power of one lone loyal patriotic dealer is great. He can do much individually to stem the tide toward the cities.

A prosperous merchant in Birmingham some time ago had a card printed which read:

"Don't knock Birmingham if you stay here. If you feel like knocking the city don't stay.

"There are 18 trains north and east each day.

"There are 16 trains south and west each day.

"Mileage is cheapest—it's up to you."

That fellow had the proper spirit at any rate.

If all merchants had this same spirit there would be many more good little places to trade, many more good little places on the map where a merchant could settle down contentedly and make money. If the people of some of these places are disloyal to the home town in buying they have the merchants to thank for starting the thing. The merchants are very often the worst offenders of the whole town. It usually starts by one merchant buying some little thing away from home which causes a feeling in some other that he should do the same thing. The following suppositious case will illustrate this.

Setting a Bad Example

Jones, the local jeweler, goes to the city for stock, sees a pair of mahogany tan shoes with long vamp, receding toe, blind eyelets and flange heel in a window that he thinks

he would like, and purchases them. He is so well pleased with these that he decides to fit himself out and make some of his local confreres a little jealous. Jones is just a little vain about what he wears and has been under the impression that his local town could not supply him with what he ought to have. He ends up by buying the shoes, a suit, and an overcoat, a hat, shirts, ties, and a host of other things. He takes these home and arrays himself proudly and is the admired of the town.

One admires his shoes. "I had to get these in the city. Brown, the local shoeman is all right, a good fellow, and all that, but he does not keep the right class of goods for me. I am so hard to fit, you know." The trouble with Jones is in the head and not in his feet.

Then some one admires his hat. Yes, Jones lets out the fact that old Green does not keep anything good enough for him to wear. And so it goes, from day to day this one merchant is educating the public of his town to trade away from home. He thinks he is getting even with Brown and Green because they sent away from home last Christmas for a bracelet watch and silverware to a wholesale house in the East.

Brown has received a catalogue from the wholesale house by mistake. However, he found certain articles therein that he thought he would like to have and decided to purchase them. He showed the catalogue to Green and he picked out several little things he wanted. Then Green's sister had a whack at it, and before Brown came to his senses there had been seven families at the catalogue, all picking out something. Here we have Brown making customers for a mail order house, getting his own customers into the habit of sending away from home for their goods.

Other merchants of the town secure goods through their friends, the commercial travelers, and think they are cute and that they are getting ahead of their fellow merchants. Oh! This greed for something for nothing! It is responsible for the ruin of many a merchant, and his own greed was as bad as any one's.

All this results in loss—great loss to the town. These merchants are so selfish that they do not care if the whole town buys the other fellow's goods out of town, as long as they feel that their own goods will be purchased at home. But they do not know human nature. They do not know the power of habit. They do not know how strongly imitative the human animal is. They do not know anything about the psychology of business, or they would not start a movement that will eventually reach themselves with its harmful consequences.

Personal Selection and Service

Do not be afraid to tell the people in your local paper, by folder, by catalogue or poster that by trading at home they have the advantage of personal selection, proper fitting, prompt service and square dealing. Tell them that you stand back of the shoes or suit that you sell and don't fail to say "money returned in case of dissatisfaction or if the goods are not as represented." Refund the cash cheerfully—not grudgingly—and do not resort to every device known to see if the customer will not accept something else. This is a short sighted policy and gets you nothing in the end. Perhaps you may keep the three or four or five dollars in your till but the customer who has expected you to refund the money willingly and pleasantly keeps away from your store in the future.

Which would you rather have, the twenty-five or thirty per cent. immediate profit on that one single transaction or the good will and continued patronage of that customer which is a permanent asset.

Speaking along the line of keeping the trade at home a well informed writer says:

"There are a great many of the smaller towns that are peculiarly situated that a great deal of the business that

they should have turned into different channels—is going to the large city or town, by mail, or otherwise. This is not to be wondered at when one considers all the circumstances. In the first place the people of these smaller places have been given the impression by the mail order advertisements and by communion among themselves, that the merchant at home does not give them the latest styles nor the lowest prices.

"There is no doubt but the small store merchant has a great deal to answer for in not offering a more up-to-date showing. But it must not be forgotten that he is handicapped a great deal in this matter by the smallness of his output. He can dispose of only so much merchandise and more than that will over-stock him. But if the matter of price is looked into it will be found that value for value, the local merchant sells at as low prices as his huge competitor.

Keep the Dollars at Home

"These doubts of the local dealer's ability to serve them as well as the large stores will always remain, but they can be modified to a great extent, and overcome almost entirely if attacked in the right manner.

"There is no reason why the local merchants should not secure the bulk of the business of the home town. It can be done by fostering a feeling of loyalty for the home town. Let every dealer in the place do his share, 'hoop-er-up,' and the old town will wake up with such a jolt that the people will forget, for the time at least, that there is a mail order house in the country.

"It is a pitiful thing to see a local board of trade, or chamber of commerce, or retail merchants' association trying to put a little life into a dead town—one that has died because there has been a lack of loyalty on the part of the residents. Every dollar that goes out of town stays out. None of it ever comes back again. Every dollar that is spent in the home town circulates and leaves a profit in every hand that holds it for the time being."

The Ideal Shoe Salesman

We hear a great deal these days about the ideal shoe salesman. What characteristics he should possess and the things he should know and do. One authority has attempted to classify salesmen according to the types most commonly found to-day as follows:

The Over-enthusiastic Salesman.—Liable to tell all he knows.

The Blustering Salesman.—All noise; has the appearance of a bluffer.

The Silent Salesman.—Displays fear.

The Combative Salesman.—Argues his point even though he knows that he is wrong.

The Persistent Salesman.—Tires himself out; not "there" at the psychological moment.

The Ideal Salesman.—New ideas always get an audience.

The Reliable Salesman.—Inspires confidence.

The "No Backing" Salesman.—One who promises something that his house cannot deliver.

The Price Reducer Salesman.—The Buyer never knows when he is at the bottom.

The Knocker Salesman.—The best advertiser for his competitor.

The Dissipated Salesman.—Lacking in alertness and ambition.

Analyze yourself and just see to what class you belong, and then point yourself in the direction of the "Ideal Shoe Salesman." You can do it if you try.

Fire broke out recently on the second and third floors of the shoe store of Adelstein Bros., 36-58 St. Catherine street west, Montreal. Slight damage was done to the stock, for the most part by water.

Appreciating Relative Importance of the Customer

This is Where the Small Retailer Has An Opportunity Over the Department Store and Mail Order House—Buyers Will Now Pay More for Personal Service Than They Ever Paid in the World's History—The Little but Efficient Store

It seems to me that the attitude of the customer towards the retailer is quite as important to the manufacturer as to the retailer, for is it not a fact that the manufacturer can prosper only in proportion as the retailer prospers, and has it not come to be realized as a fundamental of retail philosophy that the retailer can prosper only in proportion as the customers prosper; I mean, the customer who saves time, temper and money by being a customer of the retailer? This is not a new thought, but it is a good idea occasionally to refurbish our old ideals and to drink again at the spring of ancient wisdom.

Therefore, I shall want to tell in a personal, yet offhand and friendly way, of the customer's attitude and of the things

he sees and hears from his side and your side of the counter.

A very good friend of mine is the head of a manufacturing concern in New York, which handles a specialty that has been selling at a fixed price among the retail jewelers, department stores, etc., of the world. Quite recently he has been very soberly reflecting upon the conditions in the retail business. In a recent letter to me he so completely covers the case and voices a growing sentiment in favor of the specialty shop which is distinguishing the trade in America, that I venture to quote it:

"The situation is that the manufacturer has to look our for and protect the little dealer in so far as giving him a square deal goes. We are not paternalists. We do not intend to

CLARKE'S CHAMPIONS AGAIN CAPTURE CHALLENGE CUP

The A. R. Clarke & Co., Limited, hockey team, of Toronto, again won the championship of the Riverdale Manufacturers' League and retained possession of the Hon. A. E. Kemp Challenge Cup for another year. The boys played great hockey during the past season winning eleven straight games and losing but one. This was to Kodaks, who drew with Cleveland Athletic Club's team during this winter.

Griffith B. Clarke, president of the club, certainly has a star aggregation of players. He intends next year to visit various shoe and leather centres and arrange games with any teams connected with the different firms.

The following are the members as seen in the group:— Front row, left to right, H. A. Sailer, treasurer; E. Randall, rover and captain; Griffith B. Clarke, president; J. Ross, goal; H. H. Diggon, secretary.

Back row:—A. George, right wing; N. Nicholson, left defence; J. Spanton, right defence; Alf. Collins, vice-president and manager; P. McIlwain, centre; B. Willshaw, trainer; A. Cramer, left wing.

The 'Riverdale Manufacturers' Hockey League again presented prizes to the manager and the players of the team. The prizes consisted this year of solid gold signet rings suitably engraved. Three cheers for the leather men!

support the dealer that does not earn his own living, but we must join with him in seeing that he is not snuffed out by the unrighteous abuse of power by the big man.

"I cannot in this letter give you any comprehensive statement of my views, but I am sure that you have done as much thinking as I have on this subject and no doubt understand it at least as well.

Trend Away From Big Stores

"I venture the prediction, however, that when we have real democracy in the country that there will be a trend away from the big department store. It is an unnatural out-growth of our artificial conditions. We are going to come back to the smaller dealer who is a specialist in his line, who is an expert on things pertaining to his business; he selects from the great market the things particularly suited to the people in his locality. He will be an expert in window trimming, in advertising, in store arrangement, in accounting methods, in stock keeping, cost keeping, order systems, etc. The present advantage of the department store is that in our present state of civilization in business we have just reached the point where a few people have the great advantage of capital and relatively efficient systems of bookkeeping, cost keeping, selling expenses, etc.

The department store is managed by a better business man today, and so it grows and attains great proportions. In 50 years from now, when the same information has sifted through so that all the little business men have good systems, have good training in their particular lines, they will surpass the big store, because the big store is fundamentally inefficient in this, that the actual selling for which the store exists is done by authority delegated and redelegated from the top down to the \$5.00 a week sales girl, to such an extent that these sales people who come in contact with the public are not interested in the business, they are not proficient, they are not expert and they lack the personal instinct and the pride that the proprietor takes and when to his natural self-interest is added the expert training to come, we will have a far more democratic condition and business will be transacted in more equal units. Of course, ability is always going to count and some will prosper above others, but we will not have the vastly disproportionate condition that we see now where by possessing capital and a little bit of organization some stores grow into immense proportions."

Will you note carefully what is emphasized—it is the human note, the personality of business.

Giving Right Kind of Service

I want to reinforce something my friend says, by testimony from Mr. Wattlely, Vice-President of the United Cigar Stores Company, which is along the same line. He was asked whether the large chain stores, the department stores, etc., were not driving the small retail man out of business. Take heart, my friend of the retail specialty shop, you are going to stay in business just as long as you have any right to be in business. You are going to stay in business just as long as you can give the kind of service to the people that the people will pay for. You are not going to stay in business if you are going to try to meet the competition of the big store on the big store's price basis, the big store's lack of personality basis. The buyers will now pay more for personal service than they ever paid in the world's history. Mr. Wattlely says something that will bring joy to the heart of the small retailer:

"The failure, ordinarily, of the small and often the very largest retail ventures, to appreciate the value of organization and the relative importance of the customer, is largely due to the lack of efficiency."

Customers Time and Temper

The lack of the "appreciation of the relative importance of the customer"—did you get that? How many times do you think about the customer as a human being as well as a

ledger-account, of his wishes, fads, needs, heart and mind qualities? How many hundred times do you hear "prices," "bargains," "quick turn-overs," "great chance to get something cheap," talked in your store conference to one thought given to the customer's time and temper?

Let's keep our feet close to Mother Earth. How many times a year do you send trained investigators into your demand territories to make researches among your customers, to the times you send a buyer scouring the world to find things to sell?

You tell me that you "know what your customers want by what they buy." You only know what they want in your store by what they get. Right there is the great fallacy. The retailer is studying the past as the only guide to the future. What should he have done? is a question he cannot answer.

Study Trade of Store

The business that flowed through the store yesterday will never flow through it again. The mill does not turn with the water that is past. I say that the time is here when merchants will have to be trade prophets instead of historians. They will study the trade outside the store that they don't get, the trade they don't understand, that they don't give service to, that they don't advertise to—that is the trade which is to make you big tomorrow. That which you have, you have because you are what you are. That which you have not is because you are not what you might be.

The Points of Advantage

Mr. Wattlely further said: "The capable, efficient retail dealer has a most decided advantage in every respect, except, perhaps, in purchasing power, over a large chain of retail stores. The average of efficiency in a chain of stores must always be lower than that of a single store operated by a capable, live man (please notice that 'capable' and the 'live' particularly), for the reason that the brains and force of the large organization man can't, possibly be in each and every store personally; his labors are disputed, his plans must be put into effect by other hands, and there is a loss of efficiency. The individual retailer is present in body. His hand executes what his brain conceives. It is a frequent source of complaint that a large chain of stores drives the small men out of business. This is true only to the extent that an efficient man will always do better than an inefficient. A large, but inefficient chain of stores cannot drive out of business a small but efficient store.

"In other words, success depends neither on bigness nor littleness, but on efficiency and the advantage is always with the individual rather than with the chain retailer."

Nail that above your desk tomorrow—E. St. Elmo Lewis, of the Burroughs Adding Machine Co.

The Making of Shoe Paste

In writing to the SHOE AND LEATHER JOURNAL a shoe repairer in Nelson, B.C., says, "I would like to know how to make size to take down the roughness in uppers of boots. Calfskin gets very rough sometimes and the usual kind of paste is not of much use."

In connection with this inquiry an old-time member of the trade says that he has never found anything to surpass good paste when properly used. "Of course," he adds, "it depends upon how it is made. It is very simple to make. Use rye flour and hot water and a little bluestone added. Make into a stiff paste and allow to dry nicely, and finish with one or two coats of Miller's dressing. If your correspondent is not a successful paste maker (hardly any two men make it alike) he had better purchase ready made paste. Personally I would not be bothered making paste myself unless I needed a very large quantity."

Branch Store Should Be in Position of a Buyer

And Purchase From Headquarters What is Required for Its Business—Otherwise There Will Be Large Surplus of Unsaleable Sizes and Lines—Checking Goods Before They Are Placed in Stock—Timely Pointers

Supposing a shoe firm has two or more branches, the main store supplying practically all the goods. The main store does not have a regular stockkeeper. When a shipment of goods comes in at the main store an assortment of sizes are sent to the branches. Should the branches return surplus sizes? asks a correspondent.

In answering this question the *SHOE AND LEATHER JOURNAL* would say that it is impossible in the shoe business for one store to say what sizes, or even to say what lines will sell in another store, even if it is a branch store. Unless the branch is placed in the position of a buyer, and can buy what is required for its business, there will soon be a large surplus of unsaleable sizes and lines. The branch, on the other hand, should keep the main store notified of its wants. It should ask for the sizes required and it should also keep the main store notified of any lines or sizes it is likely to be supplied with but which it does not require.

The correspondent further says: "We sometimes find there is a shortage in the amount of goods supplied us from the main store. The proprietor himself will put up an order and when it is found there is a shortage, he cannot understand it. There is no one in particular who puts up the goods for the branch store, anyone who is not busy being pressed into the service. While putting up an order he is often interrupted and has to serve a customer, and during that time one of the other clerks comes along and finding what he wants in those laid out, helps himself, making the shortage. What can a branch manager do about it?"

It is hard to answer a question of this kind. The answer is, do the best you can under the circumstances. But the merchant should be made to understand that the branch manager must not be held responsible for shortage unless goods are doubly checked, once before leaving the main store, and again when they reach the branch store. As our

AN ENERGETIC WESTERN SALES STAFF

One of the live warehouses of the Canadian Consolidated Rubber Co. is located in Regina, Sask. The manager is E. Y. Jones, formerly of Bowmanville, Ont. He was at one time associated with the Durham Rubber Co. in that town, and, on going West, joined the Winnipeg sales staff of the Canadian Consolidated Rubber Co. three years ago, and the following year was made manager of the Regina branch. Mr. Jones possesses an alert and aggressive disposition, has the happy faculty of making friends and inspiring confidence in those with whom he comes in daily contact.

His associates in Regina office are R. A. Hammond, H. A. Finlayson and W. G. Ashdown. Mr. Hammond is an enthusiastic athlete and can play hockey or baseball or run a long distance race with equal ease and facility. He covers Eastern and Southern Saskatchewan and, previous to going to Regina, was connected with the Winnipeg branch of the Consolidated Rubber Co. Mr. Finlayson, who joined the Regina staff last year, travels in southwestern Saskatchewan and is meeting with success. He was formerly engaged in the retail shoe line in Glencoe, Ont. Mr. Ashdown looks after the trade northwest of Regina. He joined the Canadian Consolidated Rubber Co. about eight months ago and previous to that was employed with Gutta Percha & Rubber, Limited.

The Regina branch reports very good business during the past few months and with the reviving prosperity of the West, a much larger turnover is looked forward to during the coming season. Here is a quartette of young men who are making good in the West and believe in the fine opportunities that it affords for the youth who is willing to work and takes an interest in his calling and the goods that he sells. They have the welfare and prosperity of the company thoroughly at heart and as a staff believe in "a long pull, a strong pull, and a pull together." A splendid slogan for any institution.

correspondent works in a branch store in the same city as the main store, the only thing for the manager to do is to insist upon someone coming from the main store and checking the goods before they are placed in stock. A better way would be for the merchant to appoint some one who can be held individually responsible for the shipments, to look after all branch orders and avoid shortages.

No Thoroughfare, No Outside Phone

"Should a shop be a thoroughfare for a house that has a front and back door of its own?"

It should not. The making of a thoroughfare of a store is very annoying to the workers there. This should be stopped at once.

"Should a clerk leave a customer in the store alone and go outside to telephone to the main store?"

He should not. If he did he might be held responsible for any goods stolen during his absence. If there is no phone in the store, the business should be made to wait.

"If by sending my customers to the main store when I am out of lines or do not carry lines would I be sending my trade away?" asks the writer.

The answer to this question is that the trade belongs to the store—that is, the whole store, main store and branches. It should be one in this sense. If the branches are run as branches it will be the policy to send as many customers to the main store as possible, and all sales made in this way should be credited to the branch sending the customer.

"Should a branch manager be held responsible for all credits granted?"

The branch manager should be held responsible, if he grants credit upon his own responsibility. If the business is to be conducted on a credit basis he should not be held responsible, but he should be very careful in granting credit to his customers.

"Should a branch manager have an opportunity to take up a matter with the proprietor at once or have to wait until the next day?"

THE SHOE AND LEATHER JOURNAL presumes the writer refers to customers' complaints as they are practically the only pressing items of a business that could not be laid over. A branch manager should be given power to make the necessary concessions to keep the customer for the store. If he is given this power he can then wait for the daily conference.

The Dealer's Opportunity

For the first time in this generation, the style situation seems to be playing into the hands of the dealer and working to his advantage. For the first time in a generation the dealer can "play the game" safely. This is a rare opportunity. It arises because the style trend is conservative. Lasts, patterns, materials, all are conservative, in the final analysis. There is to-day very little excuse for the dealer carrying other than staple styles, and the sort of shoes that will eventually make it possible for him to do away with the necessity for expensive and often ruinous "cut price" sales.

If dealers in footwear could place their orders, stock their stores and transact their business with the assurance that the shoes thus bought would not deteriorate in "style value" to a point below the line of profitable business, the retail shoe trade of this country would be a far more attractive proposition and afford the prosperous condition and reward of financial success that ought to result, from the very nature of the business.

The opportunity is here as never before for dealers to take a big step toward the realization of the ideal above referred to.

Once they achieve that status of affairs, we hope they will have the individual sense and united power to stick to that line of action forever.—The Shoeman.

Who is Responsible for Fabrics

High heel colonials for women have the call to-day in the Eastern United States and larger cities throughout America. This vogue is as varied in material, design and decorative trimmings as is possible for the whole creating minds and hands of footwear producers to conceive and put upon the market. One part of this condition is most conspicuous and that is the tendency to substitute cloths of various kinds in the uppers for leather wherever possible. I have seen hundreds of samples in this season's lines that have fabric quarters and fabric covered wood heels, leaving only a short circular vamp and heel lining of leather. Now who is responsible for this decided departure? Does it come from the determination of fastidious women to have what they want or imagine they want, or is it because the shoe manufacturers of this country had to resort to something different from leather to be able to earn an honest profit? At any rate the cloths in their various designs are comfortable and neat on the foot, then if you will add service to these virtues in footwear everybody is pleased, I suppose.—Oran McCormick in Modern Shoemaking.

Pioneer in Western Shoe Selling

A. L. Johnson, manager of the Winnipeg branch of Ames-Holden-McCready Limited, is one of the pioneers in the footwear line in Western Canada. He was born in New York city, but at an early age removed to Montreal, where he was educated. Thirty-two years ago he landed in Winnipeg when the now flourishing Prairie Capital was little more than a hamlet. Mr. Johnson has watched with much interest the rapid progress of the West and is imbued with a measure of the spirit of go-ahead-itivity.

and optimism of that great section of Canada. Twenty-seven years ago he became connected with the Ames-Holden Co., and was the first shoe traveler to ever visit Edmonton, going there before any railway was in operation. For twelve years he covered Manitoba, Saskatchewan and Alberta. On retiring from the road Mr. Johnson was promoted as manager of the Winnipeg branch of the Ames-Holden Co., and on the amalgamation of that concern and the James McCready Co. in 1911 he was continued in the position as manager, which post he fills with zeal and efficiency.

A Person and a Personality

SENECA, a great Roman writer and philosopher, once said, "We complain that life is too short, yet we live each day as if it were a thousand years."

The life of the average individual is principally occupied in rendering excuses, making explanations, and in listening to idle gossip.

The average man makes but little of his chances, which assertion is proved by the fact that a few men in one day of eight hours often accomplish more than many men in a lifetime of seventy years.

Life is simply a matter of concentration. You are what you set out to be. The things you read today and the things you think today are the things you become tomorrow. You are a composite of the things you say, the books you read, the thoughts you think, the company you keep and the things you aspire to become.

If you would simply devote thirty minutes of each day to the study of some splendid idea, to the improvement of your mind, in obtaining a more accurate knowledge of your business, in studying the thoughts of some great man who has left the world better because of his having lived, in search of the secret of the success of great business men, you would in ten years' time evolve into a giant of intellectual strength with power to follow any plan or idea to final and positive success.

Time knows no prejudices, makes no promises, keeps no records and asks no questions. You are here for a purpose and each moment you spend foolishly or frivolously is lost for all time—simply thrown into the wastebasket of indifference. You come into this world from an eternity of which you know but little, watch the hour hand on the face of time for a little while and return to that eternity from which you have come.

Unless you know the value of each moment as an investment, each day that passes is only a stumbling block that sends you blundering on into the indifference, helplessness and decline of old age.

Then the question is—what are you going to do with each hour and what are you going to do with life? Are you going to drift through its wealth and beauty, satisfied with your inefficiency, incompetency, idleness and ignorance? Are you going to leave untouched the treasures of the world in which you live? Are you going to betray yourself and your chances?

Do you believe in your work, in loyalty to your employer, in devotion to your business? Do you believe in honest service, in honest thought, in the divinity of the thing you do or the thing you sell? Do you intend to be an individual or a nonentity? As a man it is absolutely and entirely up to you. Are you going to get busy and when do you expect to begin?

He Pins His Faith in the East

A shoe man, who knows the Maritime provinces like a book, having traveled over that ground for twenty years, is A. E. Massie, of St. John, N.B., who is District Manager for New Brunswick, Nova Scotia, Prince Edward Island, and Newfoundland for the Canadian Consolidated Rubber Co. Under his direct supervision and carrying the various products of the company he has sub-branches at Halifax, Charlottetown, Sydney, Yarmouth, Pictou, and Moncton.

Speaking of business conditions Mr. Massie says that the East is destined, at a very early date, to become one of the banner sections of the Dominion, both in manufacturing and agricultural development, and that the Consolidated Rubber Co. have secured at least their fair share of the business offering in that territory.

Mr. Massie was born in Aberdeen, Scotland, and came with his parents to Canada when quite young. After looking over the Maritime provinces the family settled in Fredericton, N.B. As a youth he began his business career when he owned and operated the retail store known as "The Stone Boot." After a year or two he sold out to J. D. McKay, who still conducts the business. His next move was into the traveling ranks, and his first position was with L. Higgins and Co. of Moncton, whom he represented for three years. Then he went with Ames-Holden Co. with whom he remained for a very long time. Next he joined the staff of the James McCreedy Co., Limited, Montreal, along with the Merchants Rubber Co. of Berlin. He continued in that capacity until the amalgamation of the rubber companies a few years ago when he was appointed to his present position. Mr. Massie is a gentleman of pleasant address, sound business principles and good judgment and from one end of the Maritime provinces to the other is well thought of and well spoken of.

The Philosophy of the Price Ticket

Tickets encourage the timid shopper. The fear of the shopper is real; it is a factor in merchandising. Scores of prospective customers shun unmarked lines because they dread to turn down an expensive item after they have troubled the clerk with a question.

Price tickets solve this problem by their inability to display either scorn or annoyance.

Tickets oil the bearings of your mercantile machine, making sales easy and profits large.

The use of price tickets whittles down expense. Plain prices dispense with needless bickering and inquiries. They cut selling effort in two. They take the place of an extra clerk.

Plain prices build confidence in your customers. A clearly stated price is logically an honest one. Concealed costs suggest distrust of values.

Price tickets relieve trade congestion. They answer questions for busy clerks. Plain prices talk values as glibly as the smoothest tongued salesman, but draw no salary for the service performed.

You wish for cheaper and more efficient help and overlook an employe who will outwork, outlast and outsell all others, and demand no wages for the service.

Look over your stock; count the price tickets.

Every unticketed counter is a wall-flower that must forfeit the attention lavished on its plainly marked companions.

Every unticketed item has its brakes set. It moves as slowly as a wheel-locked dray.

Every unticketed line puts sand in the bearings of your organization and doubles friction in your selling system.

All unticketed goods conceal a hole where profits trickle away.

An increase in the number of tickets usually swells the number of sales. The keen observer can measure a store's pulse without seeing more than the number of price tickets, and often the difference between mediocrity and success is a mere matter of plainly priced lines.

Sizing Up Necessary to Healthy Business

It is a significant fact that those stores which have some systematic method of sizing up their stocks at regular intervals have the least trouble and confusion at rush periods, when each minute is valuable for the sales that may be made right then. How often have we witnessed customers forced to wait until "sizes" could be obtained from the stock room, the cellar or the local jobbing house. Such occasions are not rare and are often the cause of many lost sales and lost valuable patronage.

The writer remembers having seen a customer waiting over an hour for a pair of common house juliets, size 5F, while a boy was despatched to the local jobber to obtain same. And the wonder of it was, that after all that trouble, the dealer only had foresight enough to order a single pair, which was immediately sold to the customer and he was thus even then out of that size. How simple it would have been for this dealer to have ordered two pairs and thus reduced the cost of obtaining these by one-half. Then, when the next customer came in, he would have had shoes for her without any delay.

Frequent sizing up calls attention to stock details which may be overlooked otherwise. It also has the advantage of keeping the mind of the proprietor close in touch with these same details. Slow movers are at least kept moving and fast sellers are watched so that the stock is not overloaded. A single sizing up order improperly placed will work considerable harm and oftentimes is very difficult to retract. Keep your stock healthy by this method and in keeping the stock healthy you will make the business as a whole reflect this healthy condition.

Among the traveling men who were in Vancouver recently showing Fall samples were: W. E. Short, of the Kingsbury Footwear Co., Montreal; Geo. H. Ferguson, of Hartt Boot and Shoe Co., Fredericton, N.B.; M. L. Savage, of the Tetrault Shoe Manufacturing Co., Montreal; H. E. Wettlaufer, of the C. A. Ahrens, Limited, Berlin; Mr. McDonald, of the McDermott Shoe Co., Montreal, and others.

Pen Lettering is Necessary to the Good Card Writer

Small and Large Cards May Be Made with the Round Lettering Pen—Advisable to Use Cheap Thin Cardboard for Practice—Write the Alphabets Many Times Before Attempting to Make a Card

By R. T. D. EDWARDS, with The Robert Simpson Co., Toronto

If you wish to become a modern show cardwriter, it is absolutely imperative that you learn how to letter with the round writing pen. This pen has been in use for some years for show card lettering and is being used more and more every day for this purpose. It is one of the most useful tools a cardwriter can learn to handle. Outline or pen stroke lettering can be done with it, but the latter use is the more popular.

These pens come in twelve different sizes and vary in width from a hair line up to an eighth of an inch. They were invented and first used by a German for the system of round writing, but later have become invaluable to the cardwriter for executing a small modernized Roman letter. They are used for lettering all sizes of price and small tickets and also for doing the small lettering on cards as large as a full sheet.

For beginners they are much easier than the brush to learn to operate, the reason for this being that they are more like the ordinary pen that you have been used to, with the exception of the broader point. They are tempered just right for this work and need no burning as some cardwriters advocate. A small brass ink retainer, which is made by the people who make the pen, should be slipped over the nib. This serves to regulate the flow of the ink. If only the bare point is used the ink will run off too quickly and cause a blot. The ink for this work is the same as was advised last month for the outline work, namely, a good black carbon ink. This ink when left exposed to the air for some time will gather sediment. This necessitates it being strained through a cheese cloth from time to time.

The pen point will also become clogged in time. Remove the ink retainer and wash both it and the point thoroughly.

Use Cardboard for Practice Work

To do any form of cardwriting you must have the proper kind of surface on which to practice. Some schools

Errors that any beginner is liable to make while learning pen lettering

Roman, adjusted so as to suit the strokes made by the round writing pen nib. In most cases two different styles of letters are shown. Many other variations can be just as effective. If you never have used these pens before you

will find them a little strange at first. The edge of the pen is used to make the narrow stroke, while the heavy stroke is made with the full width of the pen. You will often find some difficulty in drawing the pen in the direction desired. If this continues it is advisable to practice parallel lines with both the edge and the full width of the pen.

Always remember not to press heavily on the pen. The less pressure you place on it the less tiresome the work will become and the result will be better. If you wish to obtain a wider stroke than the pen you are working with makes, don't try to press it into a heavier stroke, you are liable to break a nib and spoil the card, use a wider point.

It is advisable to practice the alphabets many times before attempting to make a card.

Have every letter formation at your finger tips, then there is no delay in looking up charts or no guess work when a card is to be made. You will find some difficulty in making the spurs. These are made by manipulating the corner of the pen.

The collection of small tickets illustrated are the simplest possible. These can be used on any class of goods. Do the ruling with a small size pen point. The collection of cards gives a fair idea what this pen can be made to do.

The accompanying card shows an excellent idea for a shoe ticket. The card is of imitation leather, lettered with a No. 3 pen with white ink. Lettering with white ink is more difficult than with black. The ink must be kept at just the proper thickness. This you will have to work out for yourself. It is somewhat thinner than that used for brush work. Use the pen without the retainer.

In order that you should avoid some of the errors made frequently by beginners, it is advisable to study carefully diagram on opposite page.

These are a few that have been noticed from time to time and should be watched.

Don't neglect to practice former lessons just because you have perfected them. They are much easier to forget than they are to learn.

advise paper for this work, but this, no matter how flat you try to make it lay on the desk, will bulge and wrinkle, thus making your strokes uncertain. It is advisable to get a cheap, thin cardboard. It may be a little more expensive than the paper, but it will give much better results. Take note of the chart of alphabets. They are modernized

Watch Your 'Q' Plus 'Q' Plus 'M' To Achieve Success

Quality, Quantity, and Mode Equal Service and Service is What You Are in Business For and What the People Desire—Business Building is the Art of Securing Permanent and Profitable Patrons—How It Can Be Done

Business building is the art of securing permanent and profitable customers.

A house is known not alone by the customers it keeps but also by what it gets.

There is a big difference between the storekeeper and the merchant. All men are storekeepers, but apparently few are merchants.

The wagging tongue of a satisfied customer is the best advertisement in the world.

When you are in trouble and want to find a fellow to blame for it take a look in the looking glass.

The money you make is the pay you get for the service you render. He who renders little service gets little pay.

One of the best advertisements in the world is the boosting of the men who work for you, and one of the worst is the knocking by these same people.

Salesmanship is a most potent element in the making of permanent and profitable patrons.

Loyalty and love are queer things, but on the

law of averages and in the long run, I believe that although there may be exceptions, the more you give the more you get.

Co-operation is one of the first of God's laws and the way to build a retail business is to bring conditions of that business into harmony with natural laws.

Everybody is a salesman, even the man who digs a ditch for you is selling his services.

There are four ways of getting money, one is to steal. The second is to beg it, the third is to marry or inherit it, and the fourth and best way of all is to earn it and earn it honestly.

The man who cuts the throat and spills the life blood of profit is not a merchant. He is only a storekeeper.

Advertising is the fire under the boiler of business. The man who advertises a little and says it don't pay reminds me of the fellow who lit a match, put it under a tin can of water and then said, "Fire will not heat water."

"The science of building a retail business" was ably dealt with by A. F. Sheldon, of the Sheldon School of Salesmanship, Chicago, at the annual banquet held recently in connection with the 15th convention of the Ontario Provincial Board of Retail Merchants' Association, in the Temple Building, Toronto.

Mr. Sheldon is a man of imposing appearance and has a striking and effective way of presenting certain truths, which stimulate thought and drive home convictions. His address was referred to as one of the most impressive and eloquent to which the merchants have listened in a long time. Terse, epigrammatic and at times humorous, Mr. Sheldon held his hearers with a remarkable grasp. At the outset, he made it clear that he had never been in the retail business and never expected to be, but that did not prevent him, after years of observation and study, from presenting certain well known truths to those who were not blinded by that deadening thing called prejudice, which, was the greatest hindrance to progress.

The way to build a retail business was to bring conditions of that business into harmony with natural laws or the laws of nature. In the well-known world outside there were certain natural laws, such as gravitation, which had to be obeyed, and in the construction of any great business, whether manufacturer, wholesale or retail, the truly great reflected certain basic natural principles, and the way to build permanently was to make business reflect these natural laws.

There was natural law in the business world, as well as in the world outside. There was also common law, and if we brought our actions in harmony with common law, we enjoyed the fullest measure of liberty and prosperity, and the same principles are applicable in the business world. Natural law in the business world was a rule of action or conduct, prescribed, not as was common law, by the highest authority of the state, but by the highest authority, the Maker and Creator of the universe. The observance of universal basic natural laws in business reflects success.

"What is business building?" asked the speaker. "Business building," he said, "is the art of securing permanent and profitable patrons. If you get enough permanent and profitable patrons, you have built a successful business, and success in life completely hinges on the application of that power, within the individual, to make permanent and profitable customers. Everybody sells something—every person is a salesman—the bookkeeper is selling his services to you, the boss; the drain digger sells his services to the farmer. It is necessary to observe Q plus Q, which means quality plus quantity. Even the sale of service is influenced in the long run and the price governed by Q plus Q, and when employees recognize this, they will not be ruining their sight looking for more pay or doing spiteful work in order to get even with the boss. There is a big difference between the storekeeper and the merchant, all men are storekeepers, but apparently few are merchants. Keep your eye on that concept "profitable," for, I tell you, when a man cuts the throat and spills the life blood of profit, he is not a merchant—he is a storekeeper and there is as much difference between a merchant and a storekeeper, as there is between an order taker and a salesman.

Many a man thinks because he buys an article for 25 cents and sells it at 50 cents, he is making 25 cents, when perhaps his overhead expenses are eating up that extra 25 cents. I once went into a furniture store and found a man selling a dresser for \$15, which cost him \$10.50. I asked him if he thought that was sufficient profit, and he said "yes, it was a big profit."

I asked him how much he had to pay for rent. He said: "I do not pay anything."

"Well," I said, "what proportion of your expenses do you charge up in rent?" He answered, "None whatever."

I asked him "Why?" and he said "Why, I own the building."

"Well," I replied, "if you were going out of business tomorrow, and turned over this building to some one else,

do you not think it should bring you in an income?" He then began to see matters in a new light and on investigation, we found out that the interest on his investment in the building, his staff of salesmen, his lighting, heating, insurance, taxes, etc., all proved that he was losing 30 cents on that dresser. And I tell you, gentlemen, after he found out the true state of affairs, he also felt like 30 cents.

Going Down in the Struggle

95% of the men who set sail today on the sea of retail merchandising are destined to go down on the rock of failure—not necessarily bankruptcy, but lingering on from year to year, making less money, in many instances, than the traveling man who calls upon them, and finding their patronage gradually drifting away. The trouble is they cannot tell where they are in the matter of profits, and unless you have system and order, and know where you are at, there is trouble ahead. Things do not happen in this world. They are the natural outcome of cause and effect and there must be order, accuracy and harmony in the shop, and if a store does not possess these, it is violating nature's law, of which I spoke at the commencement. Why, gentlemen, the other day I went into a store in your city to buy a pair of rubbers. Of all the higgeldy-piggledy storekeepers "and confusion worse confounded!" You should have seen that man trying to search that stock to find me a pair. He was so embarrassed himself that I went with him in helping the search. Here was a fellow that did not know where he was at. This man lacked order, system and arrangement.

A house is known, not alone by the customers it keeps, but also by what it gets. Permanency of patronage is what counts. There is an old Roman saying "Caveat Emptor," which spirit seems to be too prevalent, even in the present day. We are not warned to be on our guard against the doctor, the lawyer, or the dentist, but when it comes to this sordid thing called "business," we are told to "beware," or the other fellow is going to get the best of us. The more modern interpretation in trade is, to reverse this motto and let the seller beware. If you want permanent paying patrons, let the seller beware, for remember, you cannot do business very long with your enemies, neither can you go for any length of time getting the best of your friends. The square deal pays every time.

Three Things Are Essential

To have permanent patrons you must give three things: first, quality always; second, the right quantity; and the third, the mode of conducting your business. Thus we have Q plus Q plus M equals service, which means quality plus quantity plus your mode of doing business. In retail life, in wholesale circles, or manufacturing success hinges on making a permanent and profitable business. Some have quality right, but the quantity is wrong; with others, the quantity is right, but the quality is off—perhaps the product is tainted a little, and then there are other instances where both quality and quantity are right but the mode is wrong. Perhaps delivery is slow—or the wrong bills are sent out. The store is kept slovenly, stock badly arranged, help discourteous in a word, the mode of such a man is off, and dissatisfaction takes the place of satisfaction. And the thing don't stop there.

I am a great believer in advertising, but I want to tell you, the wagging tongue of a satisfied patron is the best advertisement in the world. I also want to add that I am of the opinion that the wagging tongue of a dissatisfied patron does much more damage than the wagging tongue of a satisfied patron does good. Let me tell you, you must obey natural laws in the business world. When you are in trouble and want to find the fellow to blame for it—take a look in the looking glass.

As society is organized today you must have money, and there are only four ways of getting it. One is, to steal

it, which is dangerous; one is to beg it, which is debasing; you can marry or inherit it, which is uncertain, and the fourth way is to earn it, which is the best of all, but let me tell you, you are not in business primarily, to make money.

You are in business to give service, and if you do not give service, you have no right to be there. The money you make is the pay you get for the service you render. He who renders little service, generally gets little pay, he who gives big service, generally gets his reward proportionately. Look out for improvement of Q plus Q plus M, if you wish to make more profits and more pay. I do not altogether believe in what Emerson says, which is in effect that "If a man makes a better mouse trap than his neighbor, the world will make a beaten path to his door." My experience is they will not tear down the tall timbers, to use a slang expression, unless you make known to the world the qualities of that mouse trap. If you desire to make permanent and profitable patrons, you cannot "hide your light under a bushel." Advertising is the fire under the boiler of business. The man who advertises a little and says that it don't pay, reminds me of the fellow who lit a match, put it under a tin can of water and then said, fire will not heat water. But remember, use judgment in your advertising for too much fire will melt the kettle. In all matters you must obey one of God's natural laws, which is judgment.

When Your Staff Boosts

There are many ways of advertising in the world. One of the best advertisements to-day is to have the boosting of the men who work for you and one of the worst is knocking by these same people. You know that 95% of the people of this earth are employed by the other 5%, and that your responsibility to those under you does not end with the handing out of the weekly pay envelope. If you want one of the best advertisements—be humanitarian with your people. You also must learn the law, that to get, you must give. Loyalty and love are queer things, but on the law of averages and in the long run, I believe, although there may be exceptions, the more you give the more you have. I know there are exceptions to the rule and some are not appreciative. The more you do for them, the more is expected of you, but I am speaking of the grand, great law of average. The best principle ever enunciated was laid down by the Man of Galilee, which was: "Do unto others, as you would that they should do unto you." And I want to tell you that I am a firm advocate of the Golden Rule.

Salesmanship is one of the most potent elements in the making of permanent and profitable patrons—yet it is strange how many retail people make use of the negative instead of the positive, in the matter of suggestion. Call attention to the good value in what you have to sell—any other points. None of us, you know, can be flattered, but we can all stand a little just praise.

Many Peas in One Pod

Salesmanship is several peas in a pod—it is the power of persuading plenty of people to pleasurable purchase your products with profit. Some of you may be afflicted with satisfaction, know-it-all-itiveness—I am it, etc. Remember, this is a dangerous attitude. You must either go forward or backward. Personality is not hot air. The old idea was that a glib talker is a good salesman, but some men today talk a man into a thing and talk it out of him again. They are like certain railways running into Chicago, lack terminal facilities. "I believe," said Mr. Sheldon in conclusion, "you can make this organization greater by co-operation, that is the spirit of the day. In the degree in which men fail to co-operate, to that degree are they insane. Co-operation is one of the first of God's laws; it works in harmony with nature and if you, as an Association, want to elevate the business of the retail merchants you must work together in the spirit of unity, harmony and good-will."

Veteran Officer of the Company

Thirty-three years as secretary-treasurer of one company is a remarkably good record, and to witness the volume of business develop from \$100,000 a year to over \$1,000,000

is certainly an unusual experience. Yet this is what T. N. Campbell, vice-president and secretary-treasurer of the Amherst Boot & Shoe Co. Limited, of Amherst, N.S., has witnessed.

Mr. Campbell was born in Great Village, Colchester County, N.S., in 1852. He served for two years as book-keeper for A. Robb & Sons in 1878 and then for a couple of years was with Douglas & Co., hardware dealers, Amherst, from which position he entered the service of the Amherst Boot & Shoe Co. At that time the business of the company was not one-tenth of what it is to-day, the capital being less than \$40,000. Mr. Campbell has found it a great pleasure to be associated all these years with an organization whose advancement has been steady. The company was incorporated in 1867, and in a few years will celebrate its golden jubilee.

At the annual meeting of the company which was held recently and at which Mr. Campbell presented the financial affairs before the shareholders for the thirty-third time, it was shown that the sales during 1913 were considerably over the million dollar mark. This is certainly a record of which the shareholders may be proud. Percy C. Black is president of the company and C. S. Sutherland manager.

"Sunshine and Shoe Findings"

By GEORGE E. GIRLING

Spring is here. While writing this article the sun is pouring down his warm rays, which is a reminder to every dealer in shoe findings that there is a bright outlook ahead and he must prepare to meet seasonable demands.

How is your stock of findings? How many customers have you turned down already this Spring because of an inadequate stock? Large numbers of people in your locality have left off their winter attire and are now wearing lighter shoes, and are depending upon you to supply the articles needed to renovate their footwear, which, in some cases has been laid aside during the Winter months. It may be a pair of tan silk ties of the best quality which is called for.

Can you meet this demand, or do you consider such a line too elaborate to always have in stock? Remember the sunshine is the friend and booster of every findings dealer. It shows up the shabby laces, the shoes that need a little more attention in the way of cleaning. Everybody likes to look spick and span when the sun shines, and this is your golden opportunity to push the findings end of your business. Be prepared for it.

Have you an assortment of bows in stock? This is an item neglected by many shoe dealers, but if you wish to please your lady patrons, see that you put a new pair of bows on that pair of pumps you have to repair. She will be delighted, more especially if you put them on without being asked to do so. This is good service shown in a practical way, and will be appreciated.

Remind your customers that a pair of shoe trees will do wonders to a pair of misshaped shoes and will lengthen their life to the detriment of your shoe sales. Your unselfish interest for your customers' welfare will be rewarded by many recommendations to your store, which otherwise you would not have had. There is money in shoe trees if you push their sales. Look up your line of button hooks, stock some children's shoe laces, 18 inches. This is a line carried by few shoemen. Mothers find it very inconvenient to be obliged to use a 36-inch lace for their children's shoes. They are not only untidy in appearance, but very uncomfortable for the little ones. If you are out of these, or have never stocked them, get a few; they are not big sellers, but those who need them will appreciate your efforts to study the comforts of the youngsters.

Entering Upon New Duties

E. A. Dagg, who on June 1st will enter upon his new duties as one of the official assignees for the province of Alberta, is well and widely known in shoe circles. Mr. Dagg intends handling estates and other financial business and is opening an office at 326A 8th avenue west, Calgary. Owing to his wide experience in the mercantile line, he is thoroughly fitted for the position of assignee and handling of

estates in general. He was employed by the Ames-Holden-McCready Co. for eleven years, previous to the amalgamation with the Jas. McCready Co. Six years of the time he traveled through Manitoba and Saskatchewan and upon the

firm opening the branch in Calgary, he was appointed manager and remained until the amalgamation in 1911. He was then engaged by Ames-Holden-McCreedy, Limited, to continue in the same post. Mr. Dagg has always taken an active interest in the affairs of Calgary, being a member of the Board of Trade for seven years and during 1912, filling the office of president of that body. In severing his connection with the shoe trade he carries with him the very best wishes of a host of friends. Mr. Dagg is a capable business man, possesses an energetic disposition and has a splendid grasp of affairs.

An Efficient District Manager

J. K. Lindsay, district manager of the Toronto Division of the Canadian Consolidated Rubber Co. is one of the most widely known men in the trade. Mr. Lindsay was elevated to his present post some two years ago on the promotion of R. E. Jamieson to the position of general sales manager. For two years previous he had been the accountant and office manager of the Toronto division. He has had a rather interesting career. Educated in the Old Country, he served as a banker for some years in Ireland and then yielding to a spirit of restlessness decided to travel, which

he did extensively, sailing both the Atlantic and Pacific Oceans. At the end of five years, after wanderlust had been gratified, he settled down once more to the more prosaic occupation of banking and entered the service of the Canadian Bank of Commerce. Later he was financial manager of a large Montreal shoe firm, where he made his bow to the footwear trade. After a number of years' experience in that city he came to Toronto to take the position as secretary-treasurer of J. D. King Co., which was then the largest manufacturing firm in the Dominion. In 1889 Mr. Lindsay resigned in order to form a jobbing partnership in rubber and leather shoes which was conducted for a number of years. Mr. Lindsay is quiet, earnest and thoughtful by nature and a splendid accountant who has a comprehensive grasp of the rubber trade.

Twenty-One Years in Shoemaking Line

Oscar Dufresne of the firm of Dufresne & Locke, shoe manufacturers of Maisonneuve, Que., has had an interesting and progressive career. Starting as an office boy in Caver-

hill, Hughes & Co., in 1889, he rose rapidly and in 1891, went with the firm of Bourgouin & Duchesneau as cashier. He launched into the shoe manufacturing business, which he has followed for many years, in company with Ralph Locke with great success, making men's, women's, misses' and children's McKays, men's welts, women's turns and also slippers and sandals. The output of the firm is a very large one. Mr. Dufresne was an alderman for many years

in Maisonneuve, serving as Chairman of Finance. He was born in Point de Lac, Que., October 17th, 1875, being the son of Thos. Dufresne and the grand son of Augustin Rivard Dufresne, a member of the first House of Lower Canada which sat in Quebec. Mr. Dufresne has been in the shoe manufacturing line twenty-one years.

Have Installed New Fixtures

The W. W. Cooper Co. of Swift Current, Sask., have recently remodelled their store by erecting a large addition and installing new fixtures. This enterprising firm of the Baby City of the West have completed alterations which place their premises in the front rank of up-to-date retail establishments. To the rear of their place they have built an addition, the second floor of which is occupied by the general office, Mr. Cooper's private office, and a stock and cloak room, also orchestra balcony. The second floor of the main store is occupied by the furniture, crockery, millinery and ready-to-wear departments. The ready-to-wear department is equipped with wardrobe cases and silent salesmen, the millinery department with handsome mahogany finish glass show cases, as well as other fittings; the color scheme in the last two departments being mahogany, which gives a touch of distinction to these departments. On the main floor is included the grocery department, dry goods, men's furnishing, boots and shoes, harness, hardware, etc. In the dry goods and gent's furnishing branches the new oak counters and silent salesmen give a smart appearance. With regard to the show cases, the firm show by the number they have installed that they place no small confidence in the silent salesmen show case as a trade puller. They have also installed a new cable cash system operated by electric motor, which conveys all the cash to the general offices. Any readers who are interested in store planning, if they are in Swift Current, should not miss going through this progressive establishment.

From the Fyles of 1888

Foreign Trade in Shoes

A detailed statement of the imports and exports of leather and shoes for 1887, gives the following totals: Total imports of sole and belting leathers, \$313,865; total imports upper leather, \$282,534; all other leathers, \$265,177; total, \$861,576. Imports of boots and shoes, \$242,985, other manufactures of leather, \$109,180; total, \$352,165. Exports of leather, \$440,616; boots and shoes, \$61,952. These figures afford an interesting comparison with those quoted a month or two ago for 1913.

Plush Slippers

In a trade note reference is made to a line of plush and other gents' slippers carried by Geo. T. Slater & Sons, ranging from 75c. to \$2.25 in price. Geo. E. and Chas. A. Slater, who succeeded to their father's business afterwards "split," Chas. A. establishing the Slater Shoe Co. and Geo. E. forming his present concern. Both dropped the slipper business.

New Advertisers

Amongst the new names appearing in the April JOURNAL, are: J. H. Botterell & Co., Wm. Griffith & Co., Hamilton, Damer & Son (Toronto), Brown, Whiting & Co. (Berlin), Albert E. Turner & Co. (formerly Pinkerton & Turner, Montreal), St. Pierre & Clapin, N. Dion & Co., Canadian Shoe Co. (Quebec), C. N. Vroom (St. Stephen, N.B.),

all of which have since disappeared below the business horizon.

News Notes

R. H. Greene, late of John McPherson & Co., Hamilton, will open a wholesale boot and shoe warehouse in the building recently purchased by the W. E. Sanford Mfg. Co. The style will be R. H. Greene & Co., (later the firm became Greene, McLaren & Co., afterwards McLaren & Dallas.) Mr. R. H. Greene is now sales manager of the shoe department of the Gutta Percha and Rubber Mfg. Co.

A Montreal tannery employe testified recently before the Labor Commission that his employer, to save water, compelled him to wash hides in the river. He slipped and fell in, and the boss "docked" him for the time he spent in the river and getting dry.

Mr. John Hoffmann has entered into partnership with Grosch Bros., of Stratford, to carry on a boot and shoe business. The firm of Grosch Bros. and Hoffmann will doubtless do a roaring business in the classic city.

Mr. Robt. P. Anderson has gone on the road for Wm. Griffith & Co., Hamilton, Ont., taking the Niagara and W. G. & B. Ry. district formerly covered by C. A. Davies. (Mr. Davies went to W. B. Hamilton Son & Co., and was afterwards followed by Wm. Griffith himself. Mr. Davies is now a partner in Blachford, Davies & Co., Limited).

W. H. Polley & Son, formerly of Marsh & Polley, are making 60 to 65 cases a week filling spring orders, the goods are all of the finer grades, particular attention being paid to fine ladies' French kid work.

Mr. J. H. Botterell is at present in Algiers, the business being under the management of Mr. George Payne in his absence.

On page 18 of this issue is found the quaint skit "Man and his shoes," which has been going the rounds ever since and which we republished last fall. "How much a man is like old shoes."

A Bonanza

About eight years ago J. Cassils of the firm of Shaw Bros. & Cassils, wholesale leather merchants, Montreal, (Continued on page 45)

R. H. GREENE, SECRETARY AND MANAGER OF THE SHOE DEPARTMENT OF GUTTA PERCHA & RUBBER LIMITED, TORONTO, WHO EMBARKED IN THE WHOLESALE BUSINESS IN HAMILTON IN 1888, AFTER LEAVING THE EMPLOY OF JOHN MCPHERSON CO. HE WAS LATER IN THE JOBBING LINE IN TORONTO.

W. A. GRIFFITHS, WHO HAS BEEN CONNECTED WITH THE W. B. HAMILTON SHOE CO., FOR THE LAST FORTY YEARS AND HAS BEEN TRAVELLING FOR THEM FOR THE PAST THIRTY-SEVEN. HIS HOME IS IN BARRIE AND HE COVERS ALL THE SURROUNDING DISTRICT FOR MANY MILES.

CHAS. A. DAVIES, OF THE WHOLESALE SHOE FIRM OF BLACHFORD, DAVIES & CO., WHO JOINED THE STAFF OF W. B. HAMILTON SHOE CO., IN 1888. MR. DAVIES LEFT THE ROAD IN 1905 TO EMBARK IN THE WHOLESALE BUSINESS IN WHICH HE HAS BEEN SIGNALLY SUCCESSFUL.

Fabrics Have a Legitimate Usage in Making of Shoes

The Dealer Ought to Get Right on the Economic Necessity for Substitution of Vestings for Leather—Shoe Industry Up Against Real Limitation—Leather Substitutes Must Be Employed, Declares Leading Authority

There is a sense in which the old affirmation to the effect that nothing can take the place of leather is strictly true. For tensile strength, for resistance of attrition, for excluding moisture, for promoting foot comfort and foot protection under hard wear conditions, it is true now, as it always has been and always will be, that leather is easily par excellent. With all his resourcefulness, man has not been able to surpass, or even parallel, nature's handiwork. In the primal qualities of strength, longevity and adaptability, leather is king, says C. McKay in the Michigan Tradesman.

But all this is not tantamount to saying that other materials cannot be successfully used in the production of shoes. Many fabrics have been used in the construction of shoes—and successfully used; quite a showing of fabrics now appears in numbers that bid fair to make good; and wise prognosticators of forthcoming events are confident that materials other than leather are going to be used more and more in the production of shoes. And in so far from presenting another occasion for dolorous demonstrations on the part of calamity chasers, there is nothing in prospect especially to be regretted, either from the dealers' or the consumers' point of view. Indeed, when we get to the crux of the economic situation, the use of substitutes for leather is a saving matter.

A Condition Rather than a Theory

Leading spirits in the boot and shoe industry and allied trades are driven to the expedient of substituting for leather. They are confronted by a condition rather than moved by a theory. The truth is leather is used nowadays far more extensively than ever before in the history of the world. This is a leather age; and new demands upon the visible supply of leather are developing almost over night. Consider the hundreds of thousands of whole skins—and the very choicest available—consumed annually by the automobile industry. Think of the enormous quantities of the very best skins cut up each year for belting. Think of the mountains of leather used up each year by the manufacturers of trunks, traveling bags, hard bags, etc. There are a thousand and one articles, commodities, devices and novelties—made up, in part at least—of leather. So extensive and important have these lines become in recent years that now we have large retail leather goods stores in all of our larger towns and cities. People think so highly of leather—because of its artistic possibilities and its wearing qualities—they never have enough of it. Therefore, the constant incentive to use it more and more in the arts and industries.

The Decreasing Hide Supply

Over against this constantly increasing call for leather the big economic fact remains that the supply of hides has not increased in proportion to the demand. Removing the tariff gave some relief, to be sure; but nothing like the relief anticipated by the popular mind. Those who anticipated a big slump in the prices of leather, incident to our tariff revision, overlooked the fact that all other nations are finding new uses for leather as well as ourselves. Leather goods are quite as popular abroad as they are here—in some lines even more so.

When you have an increasing demand for a commodity, the supply of which doesn't increase pari passu with the demand; when this increased demand is based upon and grows out of new uses for the commodity sought—one thing is certain: the trend of prices is bound to be upwards. Those who know the history of the leather market during

the last half dozen years can readily understand the philosophy of the situation.

Now, if we are to have, in the years to come, shoes made (for the most part) of leather, two things are inescapable; first, we must worry along with fewer shoes per capita; and secondly, we must pay more money for such shoes as we are able to procure. The other alternative is to use substitutes for leather in the production of shoes, wherever such substitution is possible. And that is the reason fabrics of one kind and another have been, and are being used. And by the same token, that is the reason they are going to be used even more extensively in coming years.

And this is not an evil in any sense of the word. The highest priced so-called custom shoe, of the most exclusive pattern, isn't all leather shoe and never was. Cloth toppings were used way back yonder in days when the leather market was gutted and prices were decidedly off. And nobody raised a hue and cry over "adulteration" and "swindling substitution." In spite of the admitted excellence of leather, fabrics have a legitimate usage. And it is really remarkable how durable and satisfactory some of these marvellous latter-day fabrics really are.

How Velvets Made Good

A few years ago when velvet was being introduced into women's lines, many of our conservatives anticipated all manner of trouble. "It will never do!" they exclaimed.

Mr. Cooper Returns to Hamilton

Ed. A. Cooper, who for some time has been buyer and manager of the shoe department of the Hudson Bay Co. at Calgary, recently bought the retail business of Harper Bros., King St. E., Hamilton. Mr. Cooper has had a number of years' experience in the footwear game, being on the

road for a considerable length of time. He was in business in Hamilton a few years ago when he sold out to take charge of the shoe department of the "Right House." Mr. Cooper is a careful buyer, a capable salesman and a close student of styles. Many friends will wish him every success in his new connection.

"There'll be the dickens to pay!" But velvet did do. The better grade velvet shoes made good. I have had many women tell me they simply couldn't wear out their old velvet shoes. They had worn them, and worn them until they were positively ashamed to wear them any longer—but they still weren't worn out. I have inspected many pairs of old velvet shoes in which the soles had worn through and the heels had round off—but the upper stock was as fresh and good as the day it was cut. Cloth tops have assuredly passed the wear test; it only remains for the trade to give them the prestige to which they are entitled on the ground of style, fitness and desirability.

The substitution of materials other than leather in the production of shoes is a good thing. It doesn't mean that we are going to have shoes any less desirable either from the standpoint of wear or that of style. The manufacturers have already demonstrated their ability to make up fabrics into nifty and attractive topplings. And we are not by any means to suppose that they have exhausted themselves along this line. For one, I am inclined to think that there are many more beautiful and desirable things in prospect than "doth now appear."

Up Against Real Limitation

When a given industry faces a stubborn, clean-cut limitation, it governs itself accordingly; and usually it manifests admirable resourcefulness in working within its new limits. And there's no doubt about it—the shoe industry of this, and all other countries, is up against a real limitation. Leather substitutes must be used. We cannot decrease our per capita allowance of shoes. In fact we haven't anything like reached the limit of our per capita capacity. All of our authorities on shoe matters are strongly of the opinion that the people are going to demand more and better shoes. Possibly the average price will advance somewhat—the trend of prices in everything is upwards—but, in the matter of footwear, there is necessarily a limit, just as there are limits in everything else. When the limit is reached, other materials must be used.

Get Ready for It

One or two practical points emerge from this discussion. In the first place, the dealer himself ought to get right on this economic necessity for the substitution of fabrics for leather in the production of shoes. If he is prejudiced, let himself get disannexed from his prejudice as speedily as possible. Information has a marvelous way of dispelling prejudice. Therefore, let him be correctly informed. Let him know that this matter of substitution is not the dark and evil thing that dispensers of misinformation allege. And then, for another thing, let him do his duty in educating the public in the matter of fabrics. Sooner or later—and from present indications it won't be so very late, either—the public has got to absorb a whole lot of solid information upon this whole subject; and the sooner the process of absorption is started, the better it will be for everybody interested.

Esteemed Shoeman Expires

Many friends in the trade have learned with regret the news of the death of Major Sidney W. Vermilyea, of Belleville, Ont., who passed away on April 6th, after a long illness from liver trouble. He was 53 years of age and was known almost as widely in military circles as in the shoe trade. He was quartermaster of the 15th Regiment, Belleville, and a noted marksman, having won many valuable prizes in target shooting. Major Vermilyea was a member of the firm of A. W. Vermilyea & Son, shoe retailers, and also head of the wholesale branch of the business conducted under the name of the Belleville Shoe Company. "Sid," as

he was popularly known, was of a quiet, earnest, even tempered disposition. Born in Thurlow, Ont., after leaving the public school he took a course in a business college in Belleville. His first position was with John McKeown, the veteran shoeman of that city. After serving an apprenticeship in company with

A. W. VERMILYEA,
BELLEVILLE

THE LATE S. W. VERMILYEA,
BELLEVILLE

his brother, C. H. Vermilyea and his father, A. W. Vermilyea, the deceased opened a retail establishment. The first year they cleared a nice sum, which was equally divided. C. H. Vermilyea then withdrew and embarked in the clothing and men's furnishings line, while the shoe business has been conducted for thirty-three years by A. W. Vermilyea & Son. The former has of late not been actively engaged in it but is frequently at the store and on busy days still takes a hand in the selling game. Major Vermilyea thoroughly understood the buying, handling and selling of shoes. He had numerous friends in the trade and during his long illness many inquiries were made regarding his progress. At a comparatively early age his business career is closed, but he leaves a record of honesty and straightforwardness in the mercantile world, and he built up a business both in the wholesale and retail line that stands out prominently as one of the most pronounced successes in Central Ontario.

That Blamed Old Rubber Bill

How often, oh how often

Do I think with trembling still,
But e'en time my fear can't soften
For that blamed old rubber bill.

There were rubbers in the cellar,
On the shelf, each spot to fill,
Making me a worried feller,
Did that blamed old rubber bill.

Long before the Winter started
Hundred cases from Jack & Jill,
And with a thousand "plunks" I parted,
For that blamed old rubber bill.

Shipped me early as a favor,
Me to risk and store at will,
No rubbers selling (fool of flavor)
Still that blamed old rubber bill.

December first how I remember
Ransacking my beloved till,
On the first of each December
For that blamed old rubber bill.

Only one regret does linger,
One my heart with shame to fill,
That I used the shoeman's money
Paying up my rubber bill.

—James Menihan Borland.

Building Up a Nice Repair Trade

F. A. Robinson, who recently embarked in the shoe repair business in Saskatoon, Sask., is widely known in the footwear trade in both Eastern and Western Canada. He was in business for several years in Lindsay, Ont., and since going to the West has had responsible posts, being manager of the shoe department for Curry Bros., Saskatoon, who later disposed of their business to F. R. Macmillan & Co, with whom the subject of this reference held a similar position. About two years ago Mr. Robinson was appointed manager of the shoe house of Wyatt & Little. After being identified with the retail end for over a score of years, in January last, he took over the shoe repairing business carried on by Smith & White, and says, if he might measure matters by health, happiness and earnings he is well satisfied with the change. On April 1st Mr. Robinson branched out further and acquired the repair business at 804 Broadway, Saskatoon, carried on by W. A. Rice, formerly of Toronto. The latter built up a nice steady trade but desired to dispose of his outfit in order to go to California where his family reside. Mr. Robinson has placed Albert White formerly of Smith & White (whom he bought out in January) in charge of the shop at 804 Broadway, and a splendid business is being done. The plant taken over from Smith & White includes a complete, Goodyear repairing outfit, 22 feet shaft, while that secured from Mr. Rice has a bottom finishing equipment complete supplied by the Progressive Shoe Machinery Co., and there is also skate grinding attachment. On the Goodyear stitcher they stitch all soles for both shops and do a good deal of work in stitching for other shoe makers. They have a boy who runs messages and delivers jobs to the retailers for whom they do repairing and also brings the stitching from the Broadway store and returns it, thus enabling Mr. White to do an amount of work quite impossible for any one man in the ordinary way.

"Get Them Done Right"

An enterprising Toronto shoe repairer who has a complete Goodyear equipment, has issued a neat, round-cornered card with the above caption. After giving his name, address, etc., he has on the reverse side the following poem, entitled "Sole Doctor."

It's the Soles of the people I keep in view
 For I am the doctor of Boot and Shoe;
 And I serve the living and not the dead,
 With the best of leather, wax, nails and thread,
 I can sew on a sole, or nail it fast,
 And do a good job and make it last,
 There is nothing snide about what I can do—
 Doubt not my statement for work proves it true.
 I can give you a lift too in this life—
 Not only you but your family and wife.
 A great many patients come to my door,
 Worn out and run down, besides feeling sore;
 Though I don't use poultice, plaster or pill,
 I cure all sick shoes, no matter how ill.

Your Sole Tells Your Character

A Winnipeg shoe repairer has sent the SHOE AND LEATHER JOURNAL his business card on which appears the new science for shoe repairing. Here is the way soles are worn out and how to interpret the character of the wearer therefrom:

1. Wearing out sole and heel by an even pressure, an energetic and well-balanced character, "a sane mind in a

healthy body"; the sole of a good business man, of a reliable employe, a good husband, a good father, a faithful husband, or of an excellent mother.

2. Worn on the external side, an original and imaginative mind; prompt to make resolutions, tendency to unexpected prejudices, which sometimes attain their end by unexpected channels, and the shortest. In strategy a man like Hannibal, Alcibiades in politics, Ulysses in mythology.

3. Worn on inner edge, sign of bow-legs: the wearer of this shoe is debilitated physically, but a vigorous thinker, more careful of his thoughts than of those about him. He dreams while walking. He is the astronomer who falls into a well.

4. An oval hole in the shoe. This has the shape of the big toe, from the constant pressure of that toe; a resolute disposition; arrives at clean and clear decisions: sure of his

conclusions and aims. The intellectual athletes which are sculptured by the rude hand of Rodin have this foot, which grips the earth and bites into it.

5. Worn back of heel and ball of foot, docile character, a mind open to all influences: accepting suggestions from anyone: follows the simple life: smiles at fate: goes his way without harming anyone.

6. Worn toe and external side of heel, a dreamer or a skeptic; an industrious trifler who unravels life as he can in the light of fancy and little effort; as we say, "he was born tired," but he is curious nevertheless. A type of flirt and happy idler.

From the Fyles of 1888

(Continued from Page 42)

bought an old fashioned safe from a second hand dealer. At the time of the purchase one of the small drawers of the safe was locked. The dealer said it was locked when he got it two years previously, and as the person who sold it to him said it was empty, and he had lost the key, he gave it no more attention, and it was sold as it stood. It was moved into Cassils' store, and they never bothered about the key. This week Cassils, bought a new safe, and when transferring the books from the old one, out of curiosity more than anything else, the blocked drawer was forced open, and, carefully wrapped in jewellers' wadding, was found a tray containing a diamond necklace, bracelets, and a large number of unset stones. The safe had belonged to an absconding jeweller.

Pointed toes in rubbers will be ordered this season, and nearly all the rubber mills will start in with new lasts on all the styles. Extension edges are a novelty and are particularly suitable for morning and extra heavy wear.

J. H. Walker, Toronto manager of the Canadian Rubber Company, announces their list of new specialties in this issue. (Mr. Walker, familiarly known to the trade as "Johnnie," is now with the Dominion Bell Co. of Hamilton, but the shoe trade has still its "Johnnie" Walker).

James Acton

More About "Tom" Sheppard and His \$3 Shoes

EXPLAIN WHAT ONE PRICE POLICY DOES

In regard to Tom Sheppard I think I would "stick to my policy" of one price, but in so doing would be very careful to have no doubt in Sheppard's mind that I was giving him a square deal. Explain to him your one price policy, and give him to understand that by keeping faith with your customers you had built up the large business you now enjoy.

Through doing this large amount of business, you were in a position to buy and sell at a much lower price than your competitors, and that the quality of the boot was of the very best, absolutely solid, and would stand up and give him good wear besides being comfortable.

Then I would appeal to him as man to man (in a nice way) telling him that every person that came into your store paid the same marked price that you were asking him; and that it would not be fair to you or them to break away from your rule. Tell him he would still get the square deal that had brought him back to you and I do not think you would leave any doubt in Sheppard's mind that you were right and he would pay you your price and go away satisfied.—ALEXANDER V. WRIGHT, with Walter L. Joyner, Moose Jaw, Sask.

* * *

THE GOLDEN RULE AND SQUARE PRINCIPLE

If I had prided my store in the past on being strictly a one priced establishment with no favors shown, I would certainly adhere to that standard and keep up the good name of the store, by making Tom Sheppard pay the three dollars instead of \$2.75 which he offered me for the shoes. I would do it in a way that would convince Mr. Sheppard that I was a man of principle. I would say, "Now, Mr. Sheppard, it would only be a pleasure for me to give you the shoes that fit and that you like best at \$2.75 instead of \$3.00, but I do not feel that it would be honest business to make a cut to you and to give other customers no reduction.

"Look here, Mr. Sheppard, suppose I sold your next door neighbor, Mr. Smith, those shoes for \$2.75 and charged you \$3.00, would it be a just thing to do, or on the other hand charge Mr. Smith \$3.00 and give them to you for \$2.75. What would you think of me and the way we did business. My method is to sell goods to all customers for just what they are marked in plain figures, and at a fair profit. We want to make a success in the business life and by doing unto others as we would have them do unto us." Thus, I think in this way Mr. Sheppard will very willingly give me three dollars for the shoes, that he a short time ago wanted to buy at \$2.75. Most men in this world like to do business with a man or his store that is strictly on the square, and I am sure that Mr. Sheppard would pay the price, and remain a permanent customer.—FRANK HALBERT, Shelburne, Ont.

* * *

IT IS HUMAN NATURE TO TELL

I am and have always been in favor of one price, and believe that that price should be in plain figures. It is a protection to both the customer and the public. Now, Mr. Sheppard would ask me to throw off 25c on a three dollar shoe, I would ask this question. "Would it be fair to me to charge you, Mr. Sheppard, more or less than any other customer, when the price is right there marked in plain figures?"

If Mr. Sheppard pays three dollars for a shoe and his son should come along and get the same boot for \$2.75, he would think that we had a rather funny way of doing business. Once you cut a price to any man it is human nature for him to think that he is a little bit more clever or shrewd than someone else, and naturally possessing a good opinion of his alleged business ability he goes and tells someone else about it. He wants them to know what a bargain he got,—a regular \$3.00 shoe for \$2.75. Naturally he would always look for that cut, whereas if you had not slashed the price in the first place this man would never look for any special concession. If you are doing a one price business and everything is marked in plain figures and you have a sale on and cut the price, it is understood that you do so in order to clear out a certain line, but this is not saying that all your shoes are all on sale, as you are disposing of others at the price marked. I believe, that if you ask any man if he thinks it would be right for a store to charge him 25c or 50c less than the marked price on regular lines and then make some relative pay so much for the same shoe, he would emphatically say no. I think, after putting this question straight to Mr. Sheppard he would think a little more of you and your establishment and would promptly pay you the price.—J. MCGILLIVARY, with The Two Barkers, Limited, Amherst, N.S.

* * *

HONEST VALUES AND NO MISREPRESENTATIONS

In order to convince Mr. Sheppard that the reason why we could not cut the price of the \$3.00 shoe we would use the following arguments:

In the first place we bought these shoes at a price which we considered good buying. We put our ordinary legitimate profit on them. Now in view of the fact that leather is continually on the upward tendency (with very little sign of a change) in buying this shoe again the advance will probably prevent us from selling it at \$3.00 in the future.

We have also been propagating an advertising campaign lately. The principal fact we have been trying to impress being that our goods are sold at one price to every one and which we consider the only fair way of doing business. It would be against one of the strong principles of this store to cut the price to Mr. Sheppard, and we are sure that his fair judgment will tell him that this is the only way that we can get and keep the confidence of our patrons. Twenty-five cents is a very small matter, but business principles are worth thousands.

We believe that failures to-day in this or any other line of business are due to the fact that the merchant does not carry out what he advertises. He must be a man of his word and keep the confidence of his customers, and it is absolutely necessary for the clerk to have perfect confidence in the goods he is selling. This, with tact and a good manner of presenting the articles, will also inspire the confidence required in the customer, and it will do more than anything else to keep him coming regularly.

We think a line of argument of this kind will convince Mr. Sheppard what we say is correct and it will also settle in his mind that he can always trust us to give him good value for his money.

Honest values and no misrepresentation are our mottoes.—JESSIE CUMMING, with H. L. Harrison, Fergus, Ont.

FAIR TREATMENT ON BOTH SIDES

When a customer comes into our shop, and states about what kind of a boot he desires to purchase, I show him what I have. After sufficient fitting, and thought as to what suits him best, the price seems to be the next consideration. I tell him the price is \$3.00 and Mr. Sheppard offers me \$2.75. I would politely say that \$3.00 is the best I can do on that boot, and if he desires a boot at \$2.75 I would be only too pleased to show him some line of goods at his price. Then, if he still wants his first choice of boots, I would say I am sorry, but we want to treat you fair, and we wish you to treat us the same.

Our prices are reasonable and the same to every body, and then if he still continues to want a discount, and says if you do not make them such and such a price, I will not take them, I would politely refer him to the \$2.75 line again. Then, if not suited, I would stand firm by the goods. I would rather lose the first sale with such a customer than give way. This is the stand I would take with such a customer.

If a person sees the article they want, they will have it at its price. Then, again, a customer will come in and want a boot for heavy work. He gets the price on grain leather boots and the price on split leather, and perhaps it is 75c and \$1.00 difference. I very often make the sale, not on quality alone, but on the prices that prevail in the store. Perhaps I have not made my views very clear on this subject to you.—R. E. MCPHEE, with Tuttle's Shoe Store, Dartmouth, N.S.

* * *

APPEAL TO HIS PERSONAL JUDGMENT

The firm with which I am employed have for the past several years done business on a strictly one price basis. This, however, has not always been the case. Years ago, when the business was much smaller, Tom Sheppard quite frequently was able to get the desired quarter knocked off on the strength of being a big customer, or some other equally good excuse. When memory reminds him of this, he sometimes finds it hard to let that quarter slip without at least making an effort to save it.

Probably another reason why we have to deal with Tom Sheppard so often is due to the fact that our back door opens on the Market Square. It is, therefore, not necessary for one to draw on my imagination, but merely to recall one of the many times I have had to tell Mr. Sanders that we have "only one price," and to explain that if it were possible for me to cut the price he would really not feel satisfied, for he would not know whether he had the best price then or not, or whether his neighbor had secured them a quarter less, and think how angry it would make you, Mr. Sheppard if you found that out to be the case.

Then just think how many customers I would have to serve if I could sell a quarter cheaper than the other six clerks.

We do not consider that would be giving our customers, who put their confidence in us, a square deal. When you come here you expect to get good value for your money, and you give it. We buy our goods very carefully, in most cases direct from the manufacturer, and as we always pay cash we are able to secure rock bottom prices. Then, when it comes time to mark the selling figure, we are very careful. Don't you think yourself that this is the best and fairest method.

The appeal to his personal judgment will generally prompt him to say: "Yes, I suppose it is. You can do those up for me."

I might say that if Mr. Sheppard were a city man the last paragraph would be sufficient explanation, as his call would probably be made between office, or working hours, and he, therefore, places a higher value on "time" than does

the farmer whose time is all his own. —G. S. WARNER, with Baker & Co., 63 Rideau St., Ottawa.

* * *

WOULD THROW IN PAIR OF SOCKS

In the first place, after showing Mr. Sheppard the various kinds and styles in shoes, and getting him settled down to one pair, and as he has been a good customer of the store, and with his possibility of going away from the store without buying, and knowing the policy of the store to be one price, and much rather than lose his valuable trade, I would say to Mr. Sheppard after he has positively refused to pay more, I would say, "Just a minute, sir, here is a pair of socks, which I will put in with the shoes, as a special favor to you, well worth 25c. and therefore it will save me breaking the price on those shoes." Thanking you for the privilege taken.—A. F. DALE, Mortlach, Sask.

* * *

VERACITY ALWAYS RATHER THAN FAVORITISM

Whether the quarter should be thrown off, I would say, that although Mr. Sheppard has been a good customer in the past, as still I have always prided myself on my one-price policy, and have established a reputation for same, I would not depart from my regular practice and cut the price. One has to consider the majority not the minority, and if a dealer has his reputation for veracity at stake, this fact must not be overlooked to curry favor of one customer. Once a dealer gets the reputation of not living up to his statements he is bound to lose trade and his advertisements will be looked upon with suspicion. Honesty is the best policy and this applies in the present instance, it, to my way of thinking, being dishonest for him to cut the price for one customer and not for others when he has a one-price policy.

Furthermore, I see no reason why by not throwing off the quarter, I should lose Mr. Sheppard's trade. The shoe is the kind he wants and suits him in every particular except the price. As he is willing to pay \$2.75 it would be a very easy matter to persuade him to pay the full marked price, \$3.00. I would explain to him that I have adopted a one-price policy, and while I deeply value his past patronage, I cannot, even in his case, depart from my regular practice, for by so doing, I would not be acting on principle. Mr. Sheppard being a liberal-minded man would of course be led to see the fairness of my point of view, and make the desired purchase at marked price. Thus, I will have maintained my reputation as abiding by my statements, and Mr. Sheppard will have secured the shoes that suit him and come away from my store with a higher appreciation of my honesty.—MARGARET F. McDUGALL, with H. J. McDougall, Main street, Antigonish, N.S.

* * *

PLAINLY MARKED PRICES TELL

I am prompted to answer your query, "How do you defend One-Price policy?" by actual experiences along this line and so I can vouch for the efficacy of such a system.

Mr. Sheppard, we appreciate your patronage, have always done so, and we want to sell you this pair of shoes. I think that you will agree with us that if we should accept \$2.75 from you for this pair, that we have no right to ask another man more than \$2.75, which is, under present conditions of the shoe and leather industry, too small a price.

The fact that we have a plainly marked price system should be a guarantee to you that you are getting your money's worth, for if it was not so and was marked in characters thus allowing a sliding scale of price, you would have just reason for questioning every first quotation we made to you, and others the same. You would feel that we were

willing and expected to "dicker" each sale to suit the moment.

Mr. Sheppard, consider it a moment, aren't we correct? Yes, thank you.

Will there be anything else? Better take along a can of viscol oil, a superior waterproofing that will protect your shoes against this moist penetrating snow water so universally prevalent at present and thereby add a double protection to your health—25c straight—it lasts well. Two cans? Very well. Thank you, that will be \$3.50 altogether. Good bye, Mr. Sheppard. Glad to see you any time.—FRED W. HORN, manager of Fort William Shoe Store for E. R. Gavin.

* * *

NOT RIGHT TO MAKE EXCEPTION

When Mr. Sheppard, being an old time customer of this store, made his selection of a work shoe, price \$3.00 and offered \$2.75 for it, I would say, You are an old customer of the store and know our one price policy to all. The shoe is priced as low as we can make it and do justice to ourselves. We have sold several dozen pair of this shoe and it has given universal satisfaction.

We have not sold a pair of them for less than \$3.00. We would not consider it a right policy to make an exception in any case. You know our guarantee is behind this pair of shoes. If they from any cause do not give you satisfactory wear, we are quite willing to make the matter right with you. I would consider Mr. Sheppard would take the shoes without the 25c reduction asked for.—LOTTIE NASH, with J. A. Taylor's shoe store, Petrolea, Ont.

* * *

MOTTO IS "SQUARE DEAL TO ALL"

In dealing with Mr. Sheppard I would try and convince him I was right in attitude by stating to him as follows:

Mr. Sheppard, I know these shoes were bought right and \$3.00 is a fair price to you for them. You have been a good customer of mine for some time and I have always appreciated your liberal patronage and in return I have always tried to sell you good wearing goods.

Now, I would like very much to accommodate you by selling these shoes for \$2.75, but I cannot see my way clear to do so. When I started in business here 15 years ago my motto was then and is to-day a square deal to all.

This tan shoe is a line that sells regularly with me the year round, and up to the present time I have sold a great many pairs, receiving in every instance \$3.00 per pair for them. Now it certainly would not be fair for me to charge all others \$3.00 and sell you the same shoe for \$2.75.

For instance, you would come in to me and purchase a pair of shoes like these and I would charge you three dollars. A few days later your neighbor, John Smith, would come in and offer me \$2.75 for the same shoe and rather than let him go out, I would take the money and let him have the shoes. A week later you and Smith, while exchanging words, would notice you had shoes on of the same kind.

You ask Smith where he got the shoes and he would say at Love's. You inquire what he paid and he says \$2.75. Knowing that I charged you \$3.00 for yours you would likely feel a trifle sore at me, and possibly I would lose your trade through the deal, so you can readily see it works both ways.

But you say to me I will never say anything about the price to anyone. That part of it is all right, but what about me when another customer comes in and offers me \$2.75 same as you?

If I am honest and truthful I cannot say to him as I have said to you, that I have never once cut the price of these shoes. Now, I think, Mr. Sheppard, you want to be fair and I hope you think of me as I do of you. What I

will do is this. I will guarantee the price \$3.00 to you and if you find you can purchase the same shoe or one as good for less than \$3.00 come in to me and I will refund you the difference between my price and the other fellow's, or if the shoes are not soiled I will refund you the purchase price, \$3.00.

This proposition, I think, will appeal to you as a fair one and in your future purchases at my store you will have confidence in me that I am not charging you more than your neighbors or any one else.—FRED W. LOVE, Aylmer, Ont.

* * *

MONEY BACK IF NO WEAR

I would convince Mr. Sheppard that the twenty-five cents difference which he is paying now will bring him double at the end.

In justifying this, I would guarantee him that if the shoes didn't give him good reasonable wear and satisfaction I would refund him the money. Of course we know Tom Sheppard a little as he is a frequent visitor in our store and he would not complain unless it would be correct. We know we are giving him a good shoe for the money, so I think he would be satisfied and take the shoes.—B. SCHWART, 727 Queen street east, Toronto.

* * *

NO FISH OF ONE AND FLESH OF ANOTHER

I would explain to Mr. Sheppard that we have one price for every person, and can not cut the figure under any consideration. I know from experience that ninety-nine times out of a hundred he will take the shoes because we run our business that way. We have several every day wanting us to cut. We explain to them we put on a reasonable living margin and cannot afford to cut prices. We point out that it would not be reasonable or fair to let one have a \$3.00 shoe for \$2.75 and to charge the next customer \$3.00 because he wouldn't ask a cut.

I say one price, and if he won't reason with you let him go out.—C. M. WALLACE, of Wallace Bros. Shoe Store, Guelph, Ont.

* * *

A PROTECTION FOR BOTH PARTIES

In defending my one price policy to Tom Sheppard, after he has made his choice of a three dollar pair of boots I would say:—

Mr. Sheppard, you have picked on one of our boots that we can recommend for your use. It is a standard screw, tan grained, whole quarter, double sole, and a boot that will give you good value for every cent you invest in it. It is not the money you put into a pair of boots that determines their value, but the wear you get out of them.

Now, regarding our one price to all. These boots are marked to give us only a fair margin of profit. If your neighbor bought a pair for \$2.75 and you paid \$3.00, when you saw you had the same boots and compared prices, you would naturally think you had been "done" to the extent of twenty-five cents, which is not a large amount, but you would feel, naturally enough, that it should be yours.

Now, Mr. Sheppard, we want to give you protection as well as protect ourselves. Our one price policy and the same service to all, we believe, is the best for our customers as well as ourselves. Our goods are marked in plain figures and in this way you get protection. You want the best price that is going without having to do any bantering about it, and with us you get it. You are a business man and like doing business on business principles. We appreciate your account and always try to do the best we can for you.

With the result that Mr. Sheppard buys the boots, pays \$3.00 and goes away feeling we are his best friend in the shoe trade.—A. T. MARSHALL, Renfrew, Ont.

AN ARTISTIC WINDOW THAT CAPTURED THE TRADE

Among the progressive footwear establishments in Ontario, which put in an attractive Easter window, was the Neill Shoe Store in Lindsay, which has an exceptionally attractive front, about 22 feet wide. The exhibit of ladies' Easter footwear, as shown in the east show window, was decidedly effective. The entrance is in the centre of the store, with a 12 foot approach at the street, converging to a door which is four feet wide. The show windows are each five feet wide at the front, and seven feet at the sides. The design of the display was simple, but effective. The color scheme was white, purple and green. The panels in the background were all white lumber, covered with white

canton flannel and the lattice work was created of strips of white crepe paper, over green backing. A glass shelf was placed on a pedestal in the centre of the window and draped with purple sateen. This gave a suggestion of Eastertide, while the artificial flower decorations added a Springlike touch to the pleasing picture. Appropriate window cards called attention to the new styles in Spring footwear. The window was trimmed by Coleman Blewett and attracted considerable attention. W. J. Carlisle, the energetic manager of the Neil Shoe Store in Lindsay reports having done a very satisfactory Easter trade and looks forward to a good Summer business.

Many Orders for "The Gritzner"

That the Gritzner hand soling sewing machine is meeting with ready favor among shoe retailers and shoe repair men is evidenced by the fact that C. Parsons & Son, Limited, Toronto, report a very gratifying number of sales. Orders for this machine, which enables the repairer to sole a pair of boots in five minutes, have been placed with the following persons: W. A. McLeod & Co., Kenora, Ont.; W. J. Trott, Leamington; W. C. Bartlett, 1287 Bloor street west, Toronto; Tom Brake, 562 Yonge street, Toronto; B. W. Brown, Belleville, Ont.; A. Winter, Campbellford, Ont.; J. D. Narrie, Marmora, Ont.; J. A. Schnurr, Mildmay, Ont.; W. Robertson, Palmerston, Ont.; R. W. Croskery, Perth, Ont.; S. W. Stanzel, Carleton Place, Ont.; J. C. Ferguson, Renfrew, Ont.; C. J. Penestone, Bracebridge, Ont.; L. M. Switzer, Sutton, Ont.; J. C. Starr, Cobalt, Ont.; J. Volinski, Cobalt, Ont.; E. E. Reid, Pefferlaw, Ont.; St. Hyacinthe Soft Sole Shoe Co., St. Hyacinthe, Que.; R. Neil, Peterboro, Ont.; J. L. Thompson, Port Hope, Ont.; Chas. Scott, Port Hope, Ont.; Ben Westlake, Cobourg, Ont.; J. Carey, Peterboro, Ont.; M. W. Collins, Whitby, Ont.; W. F. Finlay, Cookstown, Ont.; S. Hayes, Beeton, Ont.; J. R. Brown, Collingwood, Ont.; W. R. Hall, Davidson, Sask.; C. J.

Christenson, Huntsville, Ont.; D. Hawkins, Petrolia, Ont.; J. Corrigan, Bradford, Ont.; J. A. Carey, Orillia, Ont.; J. Good, Orillia, Ont.; Toronto Shoe Repairing Factory, 761 Yonge street, Toronto; S. J. Halbert, Markdale, Ont.; J. A. Matchett, Owen Sound, Ont.; J. Blum, Owen Sound, Ont.; John Hughes, Lindsay, Ont.; J. H. Jacques & Son, Quebec, Que.; C. Brown, Barrie, Ont.; Jno. Phillips, Bracebridge, Ont.; Cooper & Swartz, St. Thomas, Ont.; Hubert Ashplant, London, Ont.; W. H. Davis, 134 Dundas street, Toronto; E. Gadsby, 566 Queen street west, Toronto; Jno. Jeffries, Strathroy, Ont.; J. E. Schmidt, Guelph, Ont.; C. Wiltshire, 447 Ossington avenue, Toronto; J. Wade, Ingersoll, Ont.; Alf. Harpon, London, Ont.; Wm. Rowe, London, Ont.; J. Hessenauer & Son, Berlin, Ont.; J. Shoemaker, Berlin, Ont.; J. T. Stenson & Sons, Peterboro, Ont.; Adams Bros., Winnipeg; J. G. Newman, 505 Parliament street, Toronto; T. Mason, 640 Pape avenue, Toronto; J. H. Thompson, 45 Hallam street, Toronto; Irvine Shoe Store, West Toronto; A. E. Alexander, Hamilton; A. Mason, 104 Geary avenue, Toronto; Ed. Bell, 1212 Dufferin street, Toronto; Brodie Bros., 229 Dundas street, Toronto; A. Blain, Coaticooke, Que.; A. Chadwick, 1588½ Danforth avenue, Toronto; W. R. Murray, Woodstock; W. P. Hourigan, Guelph; W. Baldwin, 1169 Dundas street, Toronto; G. Parrott, 1647

Dundas street, Toronto; Peel Shoe and Legging Co., Whitby; Parliament Shoe Rep., 462 Parliament street, Toronto; G. Swartz, 735 Pape avenue, Toronto; I. Belisle, Rock Island, Que.; E. Metivier, Sherbrooke, Que.; F. R. Knapton, Kelowna, B.C.; Jas. Wood, St. John, N.B.; Wilson Bros., Farnham, Que.; J. Hurley, Fredericton, N.B., and others.

Veteran Shoe Dealer Will Lose Home

John Hellyar, the veteran shoe retailer of Bowmanville, who last week celebrated the sixty-second anniversary of his wedding, has just received notice that his home, "Gladstone Villa," which he has occupied for so long, will be torn down to make room for the railway terminal of the C.P.R. in Bowmanville. After occupying their comfortable dwelling for so many years Mr. and Mrs. Hellyar feel very sorry to be forced to vacate. Mr. Hellyar is eighty-four years of age and his wife eighty-five, and notwithstanding their advanced years are enjoying good health. Mr. Hellyar

goes down to business twice a day, but does not take a very active part. One remarkable feature is that out of a party of seventeen which left England at the same time all are dead excepting this venerable couple. Mrs. Hellyar had six brothers and no sisters, while Mr. Hellyar had six sisters and no brothers. Mrs. Hellyar's family all came to Canada, while Mr. Hellyar's all remained in England, and the esteemed pair, who last week celebrated the sixty-second anniversary of their wedding, are the only survivors of their families.

Shoe Merchant Disappears

No trace has yet been secured of Malcolm P. Johnson, shoe merchant, of St. Thomas, Ont., who has been missing for several days. His partner, Mr. McCormick, and other friends are leaving no stone unturned in an effort to find some trace of Mr. Johnson, but so far have not had any definite information. Dr. Bruce, who operated on Mr. Johnson, expressed the opinion that the shoeman had simply lost his memory temporarily and would turn up all right again.

Mr. Johnson is described as a man 43 years of age, but looks older, weighs 190 pounds, is 5 feet 10 or 11 inches in height, has light complexion, light colored but not gray hair, gray eyes, has rather coarse features, and his face is lined with deep wrinkles. He has a scar on his right temple, where he was operated on for fracture of the skull; his hands are very large and show signs of hard work at one time, and his ears are exceptionally small for a man of his size. When he left his boarding house he was wearing a dark brown coat and vest, gray pants, with black stripe, black fedora hat, black shoes and gray soft shirt and collar of same material. He carried a gold watch with hunting case and heavy gold chain, with links connected by heavy

The Change in Rubber Selling

J. H. Walker, general manager of the Dominion Belting Co., Hamilton, who was Toronto manager of the Canadian Rubber Co. for twelve years—from 1885 to 1897, writing to the SHOE AND LEATHER JOURNAL, says reminiscently:

"The mode of doing the rubber shoe business has been changed since I was with them. Then we did it exclusively through the wholesale jobbing trade, and could not increase our sales in that line beyond what the jobbers chose to buy. In mechanical rubber goods we did branch out, and as a result our business in those lines increased 200 per cent. during my regime. The wholesale jobbers in rubber shoes in the old days had to do the business on a small margin, and assume all risks, so that you can understand they did not enthuse over the prospects."

Newsy Notes From Quebec

Lud Duchaine has returned from a trip through the shoe centres of the United States.

O. Goulet, shoe manufacturer, whose sample room and office were badly shattered by an explosion of a gas tank some time ago, has completely restored his premises.

J. E. Leclerc, formerly with J. H. Larochelle & Fils, is now manager for Mr. Goulet and they are putting out new and stylish lines of shoes.

Art. Duchaine, of Duchaine & Perkins, shoe manufacturers, who was operated upon last week for appendicitis, is rapidly recovering.

Ed. La Forte, shoe retailer, has removed to his new place of business on St. Valiere street, and has one of the nicest stores in that part of the city.

A banquet was held by L'assemble Papineau, of which assembly Jos. Tanguay, manager of the Rock Shoe Co., is the president. Among those who assisted in the proceedings were: His worship the mayor, M. Brunet, of the Rock Shoe Co.; Uld. Deslaurier, tanner; Fidel Blouin, of J. A. Scott; Med Tremblay, shoe manufacturer; Wm. Desbiens, assistant manager of the Wm. A. Marsh Co.; W. Laflamme, foreman of the fitting room of the Wm. A. Marsh Co.; Honore Picard and Alf. Magnan, foremen of Tourigny & Marois; N. Descombes, foreman of Eug. Thivierge; Jos. Ouellet, Ed. Desy and V. Noel.

AMONG THE SHOE MEN.

Roy Wilson is retiring from the shoe business in Perth. The Satisfaction Shoe Store has recently registered in Montreal.

Boyer & Freres, shoe dealers, Montreal, have dissolved partnership.

A local union has been formed by the trunk and bag makers in Montreal.

Geo. H. Wyatt is starting a shoe store and men's furnishings in McBride, B.C.

P. J. Hogan, U.S.M. Co. special agent, Montreal, is in Toronto for a few days.

Nap. Rivet, superintendent of Dufresne & Locke, Montreal, was in Boston recently.

Harry Thompson, of the Thompson Shoe Co., Montreal, was in Boston recently.

R. E. White, shoe dealer, of Victoria and Kamloops, has sold his Victoria business.

J. E. Dupre, of the Montreal Box Toe Co., Maison-neuve, was in Quebec recently.

H. E. Munday, shoe dealer, of Victoria, was in Vancouver recently on a business trip.

R. Watson, shoe retailer, of Victoria, was a recent visitor to Vancouver on business.

J. A. Lecker, dealer in shoes and men's furnishings, Taber, had a meeting of creditors.

J. Young, of Young & Manton, shoe dealers, Victoria, was a recent visitor to Vancouver.

C. A. Davies, of Blachford, Davies & Co., Toronto, spent a few days in Ottawa this week.

J. Reagh, shoe dealer, of Ladner, B.C., was a recent visitor to Vancouver on a buying trip.

H. H. Lightford, manager of the Perth Shoe Co., Perth, was in Toronto this week on business.

Wm. Perrault, of Montreal, has established the Sherbrooke Shoe Repairing Shop in Sherbrooke.

F. Colosino and brother have opened a new shoe repairing shop at 64 Secord street, in Port Arthur.

S. H. Parker, manager of the Solid Leather Shoe Co., Preston, has removed his family to that town.

C. E. McKeen, of Vancouver, has returned from a trip through Manitoba, Alberta and Saskatchewan.

N. Tetrault, of the Tetrault Shoe Manufacturing Co., Montreal, was in Toronto recently on business.

Wm. McDonald, shoe dealer, of Victoria, recently moved into his new store on Government street.

Walter Barrow, formerly of St. Louis, has accepted a position with Getty & Scott, Limited, of Galt.

Chas. Campbell, Canadian manager of the Boston Last Co., Richmond, Que., was in Montreal last week.

J. W. Bridgett, formerly of Meaford, has bought out the Pioneer Shoe Co., Broadview avenue, Toronto.

Ken. Murray, of the Murray Shoe Co., London, was a recent visitor to the Montreal branch of his firm.

C. F. Hayes, formerly superintendent of Underhill's Limited, Barrie, Ont., was in Montreal last week.

A. L. Baldwin, who is covering the West for the United Shoe Machinery Co. of Canada, is spending a few days at

Redcliff, Alta., where he is instructing operators in the factory of the Alberta Shoe Manufacturing Co.

Mr. Albee has been appointed foreman of cutting room, Ames-Holden-McCready, Limited, Montreal.

R. E. White, shoe dealer, Victoria, has sold his two stores in that city to Burriss Bros., of Kamloops, B.C.

Mr. McFarlane, of A. McKillop & Co., Calgary, was in Toronto and Montreal recently on a buying trip.

Mr. Tabrum, of the Pryce-Jones, Limited, Calgary, has returned from an extended business trip through the east.

J. O. Worby has opened up his last factory at Bishop's Crossing, Que., with a large quantity of lumber on hand.

H. R. Rice, secretary and general manager L. R. Hulbert Co., St. Catharines, was in Toronto this week on business.

The Klassy Boot Shop was recently opened at the corner of St. Catherine and St. Urbain street, Montreal.

R. R. Macaulay, Montreal, secretary-treasurer of the Miner Rubber Co., was in Toronto last week on business.

Gale Bros., Quebec, have had a complete equipment of heeling department machinery added to their present outfit.

A. Berube, of the U.S.M. Co., is at present in St. Stephen, N.B., instructing operators in Clark Bros.' factory.

C. W. Nolan, who has been conducting a shoe business in North Battleford, Sask., has been succeeded by B. Ringler.

W. A. Clark, who is a practical shoemaker, has opened an attractive new store at 2392 Queen street east, Toronto.

Jos. Daoust, of Daoust, Lalonde & Co., Montreal, was recently on a trip to large American and Canadian shoe centres.

R. H. Avey, who has been employed in the Neill Shoe Store, Brantford, for a couple of years, has removed to Toronto.

Vachon & Co., shoe dealers, Granville street, Vancouver, are closing up their store and retiring from business.

The Public Benefit Shoe Co., and the Klassy Boot Shop are among those who have registered recently in Montreal.

H. E. Moles, managing director J. & T. Bell, Limited, Montreal, has returned from a holiday trip to South Carolina.

P. Degrosbois, of Dufresne & Locke, Montreal, has taken over the accounting department of the new Slater Shoe Co.

The W. E. Woelfle Shoe Co., of Berlin, have recently installed several machines in connection with the Rex pulling over system.

Frank S. Cronk, late of St. John, N.B., has joined the staff of S. C. Cronk & Co., shoe jobbers, Wellington street west, Toronto.

Duchaine & Perkins, Quebec, have recently installed pulling over and lasting machinery in their factory, through the U. S. M. Co.

John Doherty, late foreman of the Solid Leather Shoe Co., Preston, Ont., has resigned and returned to his home in Rochester.

The Brandon Shoe Co., of Brandon, Man., with a capital stock of \$100,000 has been granted a provincial charter and its incorporation is announced. The Brandon

men behind the new company are S. F. Lloyd, H. Wood, C. Hall, D. Forbes and G. Forbes.

J. E. Pare, of Dufresne & Locke, Montreal, spent several days in Boston and other American centres, looking over new styles.

The McRae Mercantile Co., of Revelstoke, B.C., have opened up an exclusive shoe store in that city, known as the Royal Shoe Store.

Shoe conditions in general at the present time indicate that manufacturers in Quebec are somewhat busier than those in Montreal.

E. L. Emerson, of the Boston Last Co., Boston, was in Richmond, Que., the Canadian office of his firm, and Montreal recently.

John A. Walker, of Walker, Parker & Co., Toronto, is spending a few days in Boston, Lynn, Haverhill and other eastern shoe centres.

Cornett Bros., shoe dealers, of Vancouver, have opened a new store on Hastings street. J. Cornett was with Jas. Rae for several years.

Snedicor & Hathaway Co., Limited, of Tillsonburg, have installed a C. H. M. lasting and other machines and are rushed with orders.

Eudor Fournier of the Plessisville Shoe and Leather Co., Plessisville, Que., was in Toronto this week, calling upon the jobbing trade.

Jas. Johnston, formerly shoe retailer of Kingston, who was widely known among the trade in eastern Ontario, passed away this week.

The wholesale shoe firm of Phaneuf, LaRose & Co., Montreal, has dissolved partnership. A. Desmarteau has been appointed liquidator.

The Regina Shoe Co., Montreal, recently installed a new type, model "K" turn sewing machine and also a new type turn channeling machine.

W. S. Louison, general sales manager of Ames-Holden-McCready Co., Limited, Montreal, spent a few days in Toronto last week on business.

M. B. Young has opened a new retail shoe store at the corner of Bloor west and Dufferin streets, Toronto. It is known as the Economy Shoe Store.

Scotland imports large quantities of leather annually, and buyers are anxious to receive quotations from Canadian firms in a position to export oak bends.

J. J. Dupre, of the United Shoe Machinery Co. of Canada road service, is starting new machinery in the factory of Clark Bros., St. Stephen, N.B.

The Ideal Shoe Co., of Elmira, Ont., have recently put in a Lightning heeling and other machines and are turning out some nice lines in children's footwear.

A. J. Healey, manager of the Quebec branch of the Canadian Consolidated Rubber Co., Limited, has been elected a member of the Quebec board of trade.

Clarence F. Smith, vice-president and general manager of Ames-Holden-McCready Co., Montreal, has returned after spending a few weeks at Atlantic City.

E. Birdsall has disposed of his shoe and grocery business in Cayuga, Ont., to F. W. Wigg. Mr. Birdsall will likely go into a new business block this summer.

The stock of James V. Russell, shoe merchant, 677 Main street, St. John, N.B., who made an assignment some time ago to G. Earle Logan, has been sold by tender.

J. A. Adams, manager of the Murray Shoe Co., London, and Walter Stevens, superintendent of the company, spent a few days in Toronto last week on business.

The Canadian Consolidated Felt Company has absorbed the Dominion Shoe and Slipper Company in Berlin, the purchase of the plant being ratified at the annual meeting. The directors appointed were: A. J. Kimmel, T. H. Rieder,

V. E. Mitchell, H. D. McKellar, A. C. Kimmel, L. A. Pequegnat, A. W. Young. Four plants will be under control of the new board.

E. R. Gavin, shoe retailer, of Fort William, has announced that he will give a five dollar pair of shoes to the most popular player in the local football league this season.

Mr. Phaneuf, of Phaneuf & Loiselle, Upton, Que., was in Montreal this week arranging to add a number of late model machines to the present equipment of his factory.

D. Lorne McGibbon, president of the Canadian Consolidated Rubber Co., Montreal, is spending a few days at his country home in St. Agathe, after his recent illness.

Arthur Echold has been appointed city traveler for Blachford, Davies & Co., Toronto, succeeding Chas. A. Blachford, who has gone into the shoe manufacturing line.

A sale was held on May 2nd at 122 Adelaide street west, Toronto, when the machines for heel building formerly used by Jackson & Dowdall were disposed of by auction.

W. R. Murray, shoe repairer, Woodstock, Ont., has installed a Gritzner sole stitching machine. Mr. Murray is well pleased with the outfit and is doing a large repair business.

Alfred Winn, late with B. F. Morley & Son, Toronto, has taken a position with the Star Shoe Co., Montreal, and is now covering the territory east of Toronto in the interest of that firm.

The U.S.M. Co. of Canada have recently taken an order for a complete equipment of machinery for the manufacture of Goodyear welts from the Blachford Shoe Manufacturing Co., Toronto.

K. D. Gahan, for many years connected with the J. & T. Bell Co., Montreal, is now with the Getty & Scott Co., Limited, of Galt, Ont., where he has charge of the bottoming room in this factory.

W. C. Meyers, Western Canada representative of the Rideau Shoe Co., who has completely recovered from his recent illness, left last week for the Prairie Provinces after spending a few days in Toronto.

A manufacturer of children's shoes who is now operating on a small scale in another Ontario city, will, it is understood, locate in Peterboro, if he should be successful in securing sufficient stockholders' capital.

The Parrott Shoe Co., who have shoe stores in Regina, Saskatoon and Moose Jaw, are building up a steady trade in all these centres and are talking of starting a shoe factory in Factoria, which is a suburb of Saskatoon.

W. G. Coburn, late of the Dunford Elk Shoe Co., Stratford, has joined the traveling staff of Blachford, Davies & Co., and is now looking after eastern Ontario, while W. G. Hardie has been appointed sample room salesman.

H. W. McGee, formerly of the Hartt Boot and Shoe Co., Limited, Fredericton, N.B., has been engaged to represent the Murray Shoe Co., of London, in the Maritime Provinces. His headquarters are in Halifax, where he has opened an office.

Gourlay & Fogelberg, Limited, of Berlin, have moved into their new and well equipped shoe factory, where they are turning out women's high-grade McKays. The factory is three storeys high with basement and possesses every modern convenience.

Early closing is gaining ground and among the latest cities to fall in line is Stratford, where merchants, including the shoe retailers, will be required to close their shops at seven o'clock every night, except Saturday and days immediately preceding public holidays.

Hilton R. Eaton, formerly in the shoe department with Perry & Alport, Orillia, and latterly with the Eaton Shoe Co., Port Arthur, who has been spending some time in

Vancouver and other western cities, was in Toronto for a few days last week on business.

W. J. Heaven, Toronto, manager of the Anglo-Canadian Leather Co., has returned from a two weeks' successful business trip through the Maritime Provinces, in company with S. L. Lawther, who has been appointed salesman for the lower provinces and Ontario.

T. H. Lane, foreman of cutting room, Ames-Holden-McCready, Limited, Montreal, has been appointed superintendent of No. 3 factory at St. Hyacinthe to replace F. J. Boyden, who has taken the position of general manager with the Slater Shoe Co., Montreal.

Several changes have been made in the Relindo Shoe Co.'s factory, Toronto, and motors have been erected throughout the building. These will take the place of steam for motive power and as the installations are about completed, operations will be resumed this week.

Ed. R. Lewis, leather dealer, Toronto, has been appointed Ontario representative for Duclos & Payan, of St. Hyacinthe, Que., and will handle their lines of sole leather. Mr. Lewis, who recently spent a few days in Montreal, has also added to his other lines splits and Ajar goat, made by H. S. and M. W. Snyder, Boston.

Bert Daville, representing Charles Parsons & Son, Limited, 79 Front street east, Toronto, leaves in a few days on an extended business trip through Western Canada. He will go as far as the Coast. Mr. Daville has been covering the Prairie Provinces for the past seventeen years.

A very attractive Horse Show window was recently installed by John Merner, shoe retailer, Bloor St. W., Toronto. A pleasing background of gold and purple paper was put in and two large cardboard horse shoes were suspended, one in each window, while the other settings were equally appropriate.

John McDougald, commissioner of customs, and J. U. Vincent, of the Department of Inland Revenue, Ottawa, members of the commission appointed by the Federal Government to inquire into the causes of the increased cost of living, were in Quebec recently.

August Stanke, who, for the past 28 years, has been superintendent of the Berlin Felt Boot Co., has severed his connection with that concern and taken a position with Oscar Rumpel. Mr. Rumpel and Mr. Stanke were in Montreal recently purchasing machinery for the new felt factory which is being established in Berlin.

F. M. (Pete) Cowan, who is now representing the Sherwood Shoe Co., of Rochester, N.Y., and recently returned from an extended trip to Western Canada, is spending some time in Ontario. The company manufacture women's high grade McKays and the fall samples of the firm are certainly up-to-date in style, lasts and patterns.

A. Beaudoin, of Sherbrooke, Que., was charged with having stolen eighteen pairs of shoes from Louis Auger, shoe retailer, of that city. It appears that the latter has been making repairs to his building and Beaudoin had been working with him for a while and was familiar with the premises. The defendant was committed for trial at the next court.

Mr. Reid, assistant manager of the Seamless Rubber Co., Toronto, and Mr. Metcalfe, who is a foreman in the Dunlop Rubber Co., Toronto, are establishing a rubber manufacturing industry in Cayuga, Ont. The machinery is now being installed and it is expected operations will start shortly. Messrs. Reid and Metcalfe, who are both practical men, will take up their residence in Cayuga.

Miss Violet MacMillan, the dainty Orpheum "Cinderella," recently elected Johnson's shoe store, Vancouver, to be the custodian of her little 12½ child's size Cinderella slipper, and all Vancouver ladies were invited to wear it.

Two box seats in the theatre were presented to every lady who succeeded in getting the slipper on her foot, but the local number of "Cinderellas" was very few.

A well known merchant and citizen of Hamilton passed away recently in the person of Patrick Arland. Mr. Arland had been in the boot and shoe business in Hamilton for the past 35 years, and during that time has made numerous friends. For a number of years he acted as school trustee on the Separate School Board, and always took a lively interest in public affairs. He was 60 years of age.

The London Shoe Co., of London, have issued their annual catalogue to the trade. It is nicely printed on coated paper and is splendidly illustrated. A group picture of the staff is given as well as a colored map showing the leading points to which shipments are made by the company while the facilities of the mail order department are pointed out. The 1914 catalogue is more complete and attractive than ever.

An interesting and attractive window was recently installed in the John Agnew shoe store, Brantford, consisting of various foot appliances made by the Scholl Manufacturing Co. G. W. C. Greenwood, of Toronto, foot specialist, spent a few days recently at the Agnew store and gave expert advice on overcoming pedal troubles. The result was

NOW OCCUPYING THEIR NEW FACTORY

E. T. Wright & Co., of St. Thomas, have moved into their splendid new factory, where they have space for turning out a thousand pairs daily. E. E. Donovan, manager of the Canadian branch of the company, reports that everything is working smoothly and manufacturing conditions in their new home are unsurpassed. The Canadian branch of E. T. Wright & Co. was established in October, 1912,

E. E. DONOVAN, ST. THOMAS, ONT.

and the firm have been doing a fine business. Fred Wright, late of the company's factory at Rockland, Mass., has charge of the bottoming and finishing room. The new Fall samples represent a choice range in men's Goodyear welts on classy lasts and the workmanship and finish are much admired. A description of the new factory, which was built by the city of St. Thomas, has already appeared in the SHOE AND LEATHER JOURNAL.

that a very large business was done in arch supports, bunion protectors, toe-rites, foot powder, etc.

George Arthur Bickell, manager of the Toronto branch of the Barrie Tanning Co., 61 Front street east, is receiving the congratulations of his many friends in the trade on his recent marriage. He was wedded on April 8th to Miss Margaret Hall, daughter of John Hall, 21 Garnock avenue, Toronto, the ceremony being performed by Rev. J. C. Wilson. Mr. Bickell and bride, who spent a couple of weeks in the eastern cities have returned to Toronto.

Among the shoe representatives who spent a few days in Toronto last week showing fine ranges of attractive Fall samples were Frank Slater of the Eagle Shoe Manufacturing Co., Montreal; J. P. Buchanan, of the Smardon Shoe Co., Montreal; Frank Power, of the Rena Shoe Co., and other companies; Fred Hull, representing the La Parisienne Shoe Co., Montreal; J. G. Settle, of the Murray Shoe Co., London, and Charles E. Fice, of J. & T. Bell, Limited, Montreal.

Alfred W. Donovan, of E. T. Wright & Co., of Rockland, Mass., has been appointed by Governor Walsh as chairman of the Board of Labor and Industries, for a five-year term. Mr. Donovan is president of the Wright Company, having held that office for the past five years. He is a prominent Republican and has been mentioned as a candidate for lieutenant-governor. His appointment by Gov. Walsh, who is a Democrat, is on account of his ability. Mr. Donovan

is a brother of E. E. Donovan, head of the E. T. Wright & Co.'s Canadian plant in St. Thomas, Ont.

Western Tire and Rubber Co. will start the construction of a new factory in Regina in a few weeks. The structure will cost about \$175,000. W. D. Wilson, of Winnipeg, is president of the company, and J. O. Sharp, secretary and treasurer. The company is capitalized at \$1,000,000 and a large block of the stock has been subscribed in Regina. The factory will be 300 feet long by 70 wide, two storeys high, with basement. It is expected the plant will be in operation by April 1st next and the capacity will be 300 tires a day, including tubes. The company will also make motorcycle tires, belting, hose and all kinds of rubber mechanical goods.

Owing to the backward season, Spring trade has not opened up in the shoe line in many parts of Canada as it otherwise would have. Jobbers report that sorting business during the past month has been very fair and in some cases, has exceeded the volume of last year. This is easily accounted for owing to the fact that many dealers have allowed their stocks to run very low. In fact a leading jobber remarked this week that never since he was in business had he known retailers to permit various lines to decrease to such an extent as they have during the past few months, which is accounted for largely owing to the quietness of the trade and the tightness of the money market.

In writing to the SHOE AND LEATHER JOURNAL a shoe retailer in Saskatoon says that he believes that place is "knocked" from Winnipeg east more than any other spot on the map and adds, "Yet after having been here through the financial stringency in 1907 and 1908 and again in 1912 and 1913, I am fully persuaded that Saskatoon stands hard times better than any other place I have heard of. Real estate, while considered to be somewhat of a dead issue here, has only suffered where it should suffer. By this I mean outside divisions and wild-cat propositions. Good inside property, while not moving very freely now, has not suffered in market value. There is no good property being given away or sold for taxes.

Probably the largest pair of shoes ever turned out by a factory in Canada was produced by Chas. A. Ahrens, Limited, Berlin. The size was 18, which is two inches longer than the largest size boot that the factory is equipped to make in the regular way. Heavy dongola was used for the uppers and heavyweight oak leather for the bottom. The shoes were balmoral in style, with full foxed vamp and McKay sewn. They were for C. G. Pritschan, who is employed by a real estate firm in Berlin. The shoes were turned out under the personal direction of H. C. Durgin, superintendent. Mr. Pritschan reports that the pair fit him perfectly, in fact, so well pleased is he with them, that he has given the firm a repeat order.

SLATER SHOE COMPANY RE-ORGANIZED

Fred. V. Boyden, formerly superintendent of the Ames-Holden-McCready, Limited, No. 3 factory at St. Hyacinthe, Que., who has been appointed general manager of the re-organized Slater Shoe Co., Montreal, took up his duties May 1st in his new capacity. Mr. Boyden was appointed after it had been definitely decided that the creditors of the old Slater Shoe Company would accept a settlement of eighty cents on the dollar for their accounts. On their doing so, full plans were concluded toward a re-organization. P. Degrosbois, formerly accountant with Dufresne & Locke, Maissonneuve, will in future act in a similar capacity with the new company. The office staff has been re-organized, but the factory staff will remain as it is, E. F. Leonard acting in conjunction with Mr. Boyden, and the different foremen continuing as at present. "It is the chief aim of

ENJOYING LIFE IN ATLANTIC CITY

Theodore King, son of Charles King and a member of the King Bros. Co., whose tannery is located at Whitby, was married recently in Toronto to Miss Adele Strauss. Mr. King and bride, who visited Atlantic City, Washington and New York on their wedding trip, have returned to Toronto to reside. Numerous friends will extend their congratulations and wish them much happiness and prosperity.

the new Slater Shoe Company," said one of the directors, "to improve the quality of our footwear and we will make every possible effort to do so from now on. New samples have been turned out, and our travelers are all on the road with them, feeling that they have a line of shoes that will justify their confidence in the quality contained in them."

The company is represented in the various territories by the following: W. C. Meyers, British Columbia; R. Smith, Alberta; Harry Adams, Saskatchewan and Manitoba; Jas. Grant and W. Grosskurth, Ontario; N. A. Piche and H. R. Smith, Quebec Province; Jos. Laurin, Montreal City, and E. G. McColough in the Maritime Provinces.

The directorate of the company is as follows L. E. Gauthier, president; Ralph Locke, vice-president; directors—C. H. Cahan, Oscar Dufresne, and L. P. DeLongchamps.

HIS STORE WIPED OUT BY FIRE

In the recent fire which visited Saskatoon, among those who suffered a severe loss was C. S. Pace, shoe retailer, whose store was completely gutted. His loss was over \$15,000, which included stock and fixtures, and to cover this there was only an insurance of about \$9,000. Just before the fire he received a large consignment of Spring goods which were also eaten up by the flames.

Mr. Pace had been in business in Saskatoon just a little over a year and things were going along well with him, considering the rather quiet condition of business in the West at the present time. He had one of the best laid out retail footwear establishments in Western Canada, but this is a thing of the past and Mr. Pace feels that he must start the game at the foot again so far as his own store is concerned. Previous to going to the West he was manager of the large retail store of L. Higgins & Co., of Moncton, N.B., starting to learn the trade in Halifax. He is a thoroughly experienced shoeman. He has had a wide experience in buying and selling and has many friends in the trade.

NEWSY HAPPENINGS FROM WINNIPEG

Geo. Ryan, of the Thos. Ryan & Co., Limited, Winnipeg, is now in charge of the Regina branch of the firm. Mr. Stevenson, who was manager of the Regina branch for three years, has gone into business for himself in Winnipeg, in company with Thomas Spence. They represent several lines, and many friends will wish them every success.

Hendren Bros. have made a complete change in the windows of the Diamond Shoe Store, at the corner of Portage avenue and Sherbrooke street, and report business as very good.

Bert Arbuckle has made alterations to the Royal Shoe Store and reports business as very fair. He was manager of the Moyer Shoe Co., Limited, for three years and in February bought out the Royal Shoe Store.

C. de Forest Smith, representing Hanan & Son, Brooklyn, N.Y., was in Winnipeg recently, the guest of John Affleck, of the Yale Shoe Store.

Chas. E. Slater, who is booming the sale of Tally-Ho shoes, was in Winnipeg during the past few days on business.

Rosecrans Murphy, representing Julian & Kokege Co., Cincinnati, was in Winnipeg recently and, in honor of his birthday, gave a dinner to the staff of the Yale Shoe Store, at the Fort Garry Hotel. The function was held in one of the private dining rooms and was a success in every way, many bright speeches being made. Mr. Murphy, who has

a fine tenor voice, is as much at home as a host as he is as a shoe salesman. He reports splendid business for the J. & K. line.

There is a great demand in Winnipeg for ladies' high cut shoes in dull leather, with short recede toe and moderately high heels, and combination tops of colors, gray and white, and also quarters to match the gown worn. There is a fair requisition for patent leather pumps. Men are calling for plain and patent leather shoes, mostly on straight lasts, with recede toes.

CANADIANS GOING TO BOSTON FAIR

"We are assured this year of the largest attendance from the shoe and leather trade of Canada that we ever had at any previous Fair and far more than ever visited Boston in the past," writes W. D. Bennett, New England manager of the Shoe and Leather Fair, which will be held in Boston from July 8th to 15th. Special Canadian Day will be on July 13th. The management of the Fair will distribute at least three thousand admission tickets to the Canadian trade among shoe retailers, shoe manufacturers, tanners and other branches of the industry. Mr. Bennett says they have had application for exhibition space from Canada and Great Britain and have a special section of nine spaces for this trade. There will be a reception room in the middle of this section where visitors from Canada and Great Britain can register, giving their names and hotel addresses. In the 1911 Fair they had a good attendance from Canada, and a still larger attendance in 1912, one exhibitor registering several hundred visitors from the Province of Quebec, Province of Ontario and as far west as Calgary, Alta.

NEW SHOE FACTORY STARTS IN THE WEST

The new factory of the Alberta Shoe Manufacturing Co. at Redcliff, which is seven miles west of Medicine Hat, is now in full operation and turning out about three hundred pairs of men's welts per day. F. C. Young is at the head of the firm and Roger Owen, late of Brantford, occu-

pies the position of foreman of the making room. The building, which is of solid brick, is 150 feet long by 40 wide and the accompanying cut gives a very fair idea of the appearance of the premises. The lean-to at the left is the power house, where a seventy-five horse power engine is installed. Natural gas is used both for heating and motive power. The first floor is given over entirely to the making department and on the second floor are the cutting, fitting and packing rooms and the offices of the company. The Alberta Shoe Manufacturing Co. has a complete system of Goodyear machines which were installed by P. J. Hogan, of the United Shoe Machinery Co., who has returned after spending several weeks in the West and is at present staying a few days in Toronto. Redcliff is one of the busiest manufacturing towns of the west and, in addition to the shoe factory, has three brick plants, two glass factories, rolling mills, bolt works, automobile industry, ornamental iron works and other plants.

RUBBER SHOES GO UP IN PRICE

The placing order season for rubber footwear has passed and a new price list goes into effect on Monday. During the past two months the Independent Companies have been allowing a discount of ten per cent. for placing business, while the Canadian Consolidated Rubber Co. has been selling at special net prices. It is understood that all the lists have been revised and that not only has the early placing discount been eliminated, but prices have advanced about 7 per cent. on the average. On the whole the rubber placing business has been very satisfactory during the past two months, although there has been some price slashing. The retailers who have not taken advantage of the special inducements will have to pay the new figure for this class of footwear after May 4th.

NEW OFFERINGS ARE MUCH ADMIRER

The Fall samples of the Murray Shoe Co., London, are right up to the minute in snap and style. One of the leading lasts is the Premier, which, with receding toe, low square heel, brook shank, and flat tread is popular. Several of the samples are made with double stitched tips, and come with both blind eyelets and hooks. The new London toe is also a feature, this being a little narrower than the regular, staple London toe. The shoe is made in bals in all leathers and is taking decidedly well. The Army last, which is suitable for patrol work, is an extra wide fitting shoe, which comes in box calf, with heavy viscolized soles. One of the most welcome and appreciated lasts is the Bond Street, with a medium recede toe, made up in all leathers. A plain drop toe button boot, patent, with cravenette top, is taking well with the trade. Other offerings are in dark brown winter calf, and black calf, with slip and double soles, suitable for Fall wear.

In the women's line the Cleo Shoe Co. are featuring buttons, with tops and whole quarters in cravenette, fancy brocades and striped lustre, carrying kidney and Cuban heels. Patents represent the largest proportion in leathers and the new Tuxedo and semi-recede plain toe are decidedly fetching. The company are making a line in gunmetal and patents on up-to-date lasts to profitably retail at a medium price. A heavy walking blucher, with viscolized sole, is a snappy offering for Fall use.

SHOEMEN TAKE ACTIVE PART IN WORK

The annual session of the Dominion Board of the Retail Merchants' Association was held on Toronto on April 28th and 29th. There was a representative attendance from the various parts of the Dominion. Since the last annual meeting three western provinces have come into the organization, which is making splendid progress. The Retail Grocers' Association of Ontario have decided to affiliate with the Retail Merchants' Association, while the hardware dealers are also thinking of casting in their lot with that body. Many shoemen are prominent members of the association. Geo. A. Maybec, of Moose Jaw, is the new president of the Saskatchewan Association, being elected only a few days progress. J. G. Watson, of Montreal, who was also in attendance, is both a past Dominion and also provincial president for Quebec. T. H. Bigwood, of Toronto, is president, not only of the Toronto Retail Merchants' Association, but also of the Ontario section. The visiting members were entertained to a banquet recently by the Toronto branch. J. C. VanCamp, president of the Toronto branch, presided and interesting and stirring addresses were delivered by Geo. A. Maybec, Moose Jaw, J. A. Bucknall, Calgary, secretary of the Alberta Retail Merchants' Association, where branches are now located in 102 towns; B. W. Ziemann, Preston, president of the Ontario and Dominion Boards;

J. G. Watson, past president, Montreal; J. A. Beaudry, provincial secretary, Montreal; John Caslor, treasurer of Retail Hardware Dealers' Association, Toronto; Eric C. Jamieson and Gordon McLaren, Hamilton; R. D. Cameron, Lucknow, Ont.; F. C. Higgins, Toronto; E. M. Trowern, secretary of the provincial board, Toronto, and others.

WANT RUBBER SHOE DATINGS CHANGED

During the past few days there has been circulated in Toronto a petition which has been widely signed, asking that action be taken to change the date for the payment of rubber footwear from November 10th to January 10th. A meeting of the Toronto boot and shoe section of the Retail Merchants' Association was held recently. Considerable discussion took place in regard to present datings for the payment of rubbers. It was considered that by having to meet rubber accounts on November 10th, it compelled a great many retailers to carry large quantities of goods on the shelves for a considerable time before they were sold. In order to secure a general expression of feeling from the trade on the subject, it was decided to circulate a petition among the shoemen and find out to what extent they were in favor of the proposed change. During the past few days the petition has been largely signed in Toronto and will now be sent out to all merchants in Ontario who are members of the Retail Merchants' Association.

"The reason we are circulating this petition," said an officer of the association, "is that the Winter seasons each year appear to be growing later and in many cases, we do not sell any rubbers until after Xmas. I will guarantee that retailers this year, before December 25th, did not get rid of a dozen pairs and it was well on into January before a normal amount of trade had been done. We get these goods in during July, August and September from the factories. We have to store them, pay insurance, assume the fire risk and everything else and they are collecting dust and dirt. We are asked to pay for them early in November, that is if we wish to get a two per cent. discount for cash, before we have sold one tithe of our stock. We certainly think that we should not carry these goods so long and be asked to settle so soon. We have found this sentiment prevailing among the trade in Toronto and intend putting up a strong case to the manufacturers, as soon as we hear from dealers in various parts of Ontario."

The manufacturers, on the other hand, do not view the proposition in the same light as the retailers. They say that they have to contract for supplies months and months ahead and have to begin manufacturing the goods for next season early in the year. All payments for rubber, cottons, cement, fabrics, etc., as well as labor have to be made months in advance of delivery of the shoes and they consider that when payment is not asked until November they are extending to the trade the greatest measure of consideration.

"In fact," said the president of one of the largest companies, "if this petition is granted, it means that we would have to charge higher prices for rubber footwear. The terms, as you know, are two per cent. ten days, one per cent. thirty and net sixty. Now would you be surprised to learn that there are not so many shoe dealers after all who take advantage of the cash discount, and this means they have at present until the 10th of January to pay for their rubbers. If the extension is granted and the datings made January 1st, it means January 10th. Now this is altogether too late in the year to get any money. In any trade, November and December business is generally good, and money circulates freely. But after the Christmas holidays, it is impossible to dig up the dollars. The result is that if the rubber footwear companies extended the dat-

ings until January, why everybody in every other line would be paid, except the rubber man. You know half of the rubber footwear is sold in general stores and provided Mr. Merchant could take until January 10th to get his two per cent. discount, it would mean that the wholesale grocer, the wholesale dry goods house, the wholesale hardware man, etc., would all be paid, and the rubber firms could sit down and wait. This is certainly not fair or just, and we think that the retail dealers throughout the city and country have nothing to complain of in the treatment they have been

fine footgear to meet the most exacting demands of the trade, and believe there is a splendid opportunity in Ontario for such a factory. Their Fall models, of which only a limited number have been made, owing to the lateness in the season, are certainly right up to the minute in snap, workmanship and fine appearance. The two leading Fall lasts are the Patrician, a modern semi-high toe with receding effect and the Grecian, which is a plain toe, very neat and dressy. The Blachford Shoe Mfg. Co., who will have a wide and representative range of Spring samples, report

GEO. A. SLATER, WHO WAS RECENTLY RE-ELECTED PRESIDENT OF THE MONTREAL BOOT & SHOE SECTION OF THE CANADIAN MANUFACTURERS' ASSOCIATION.

N. TETRAULT, VICE PRESIDENT OF THE MONTREAL BOOT & SHOE SECTION, WHO WAS RE-ELECTED AT THE ANNUAL MEETING.

granted and the datings they are given by the rubber houses."

The petition for the change in dating for cash from November 10th to January 10th will likely be presented to the rubber manufacturers some time during the present month.

NEW SHOE FACTORY SECURES LOCATION

The Fall samples of the Blachford Shoe Manufacturing Co., Toronto, are now completed and salesmen are on the road showing a fine line of flexible Goodyear welts for women. The new company have secured the upper portion of the large building at 92-94 Sherbourne street, Toronto, to which an extension is being erected and expect to begin the manufacture of shoes by the 1st of June. The location is in every way desirable. There is an abundance of light on all sides, the sanitary arrangements are first-class, and a passenger elevator service will be provided for the employees. Application has been made to Ottawa for certain trade-marked names by which the brands of the Blachford Shoe Manufacturing Co. will be known. A charter has been applied for and it is expected will be obtained shortly. George A. Blachford and Chas. A. Blachford, who are the leading members of the company, feel that too many American women's shoes have been imported into Canada of late years. They will concentrate on stylish, up-to-date

that orders are already to hand for Fall and that the outlook is most encouraging.

THE BOSS AND THE SHOE CLERK

Trying to run a modern shoe store without capable clerks is like trying to run an automobile without a motor. Radium is one of the few things rarer than good clerks. It is worth a little more, too. However, a good clerk—or salesman—commands high wages at all times and in all climes, says the J. & K. Shoe News.

The first thing a merchant must do when he starts in business is to engage a good clerk or two. One of the last things he must do is to hold on to them. But let him take especial care in selecting them. Remember this, Mr. Merchant, the fact that one man "runs" to red neckties and another to purple clothes doesn't have a great deal to do with the pay envelope, except that a neat, plain dresser is to be preferred to a gaudy one.

There is also a premium this season on salesmen who are upstanding and open-faced. But this item is of more interest to jewelers.

Get clerks that have had shoe experience, if possible, for they will be worth more to you than other salesmen who have had no experience selling shoes. If possible, get clerks with a wide acquaintance, for they can control their

WANTED—Experienced bottom finishing and treeing room foreman. Alberta Shoe Manufacturing Co., Redcliff, Alta.

CANADIAN OPENING WANTED

by an
EXPERIENCED SALES EXECUTIVE

The advertiser is in touch with a sales executive of long and successful experience, who would entertain a Canadian proposition after July 1, 1914. Good habits and the best of recommendations. Address—

I. WENDELL GAMMONS, care of The Shoe Retailer,
166 ESSEX ST., BOSTON, MASS.

PICKLED SPLITS WANTED

Cash prices paid for pickled splits and heads in all weights and qualities. Write us your offering. Wright & Wright, Inc., 109 Lincoln St., Boston, Mass.

personal following, which means business for you and this helps a great deal.

The clerk should learn the stock and learn it well. He should be polite, painstaking, courteous. He should always be willing to go out of his way to favor a customer, particularly when by so doing he paves the way for selling an extra pair of shoes or two. He should work hard and earn his wages. He should respect his boss, but not quail before him. He should display as much interest and enthusiasm as if the store belonged to him.

And if he follows this advice, it may—or at least he may be invited to become a partner.

HAVE A LOOK AT YOUR FINDINGS

Have you a nice assortment of dressings? Gunmetal, suede, white cleaner, black and tan polishes. Can you supply your customer with arch supports, heel treads, bunion protectors? You should also carry a nice assortment of in-soles. There is no necessity to carry a large stock, but have the assortment. Herein lies the secret of success and good service. Meet the demands of your patrons as nearly as possible, and don't forget the sunshine should be a constant reminder to keep up your stock of findings, for as the sun shows up the dust on your shoe boxes and shelves so does it reveal the dirt and untidiness of your customers' footwear.

On the Strength of its Saleability The "Everyday" Shoe should be Included in Your Stock

Every day in the year, year in and year out, there's a steady demand for the "Everyday" Shoe.

It has become so deservedly popular among men, boys and youths, that selling it is simply meeting a demand.

VETERAN SHOEMAN CALLED BY DEATH

The death occurred recently in Antigonish, N.S., of H. J. McDougall, who had been actively identified with the shoe trade for over 50 years. He had been in poor health for some time past and on April 3rd contracted the grippe. Apparently he was recovering, when heart failure set in, and the end came rather suddenly. In him the town of Antigonish has lost a link in its line of citizenship that will be hard to fill. He was a man of sterling character, who always had a sympathetic word and a helping hand for his neighbor. In the shoe business he was successful and was held in the highest esteem by a wide clientele. Mr. Mc-

Dougall was born in Georgeville, Antigonish county, and at the age of 18 came to Antigonish, where he learned the art of St. Crispin. He then went to Boston, where he worked at the bench for five years. This was during the period of the Civil War. While there he married a lady from his native county, and both having a desire to return to Nova Scotia, they moved back to Antigonish, where Mr. McDougall continued in the custom trade on his own account for 26 years. Some 21 years ago he went into the retail line and built up a nice business. He was an old friend of the SHOE AND LEATHER JOURNAL and could recall many interesting reminiscences of the early days of the trade.

PLEASURE TO READ IT

Enclosed please find one dollar postal note (\$1.00) for the Shoe & Leather Journal for another year. I take pleasure in reading it.

Yours truly,

SPHINX Shoe Cement Paste
 "SPHINX" stands unique and without a rival in excellent qualities wanted by the shoe manufacturer.
 It is a quick, strong and clean adhesive, ready for use.
 It absolutely takes the place of high-priced cements—on all kinds of linings, cloth or leather, such as vamps, side linings, stays, sock linings, etc.
 It is flexible—when applied thin with a brush. Will fasten counters and toe pieces, tap soles, etc.
 Best for sock linings, as they never loosen.
 There is nothing made that is just as good.

22-FOOT GOODYEAR SHOE REPAIRING OUTFIT

MODEL N

THIS Outfit represents the highest development in shoe repairing machinery, and meets every demand of modern shoe repairing. It embraces all the essential processes for making new shoes from old ones, giving the maximum of equipment and efficiency in the minimum space. The Outfit has the Goodyear Stitching Machine with all its improvements, including a new style steam generator which uses gas or gasoline for generating the steam, and operates automatically, thereby insuring a uniform heat for keeping the wax in proper condition and requiring little attention from the operator. The Edge Trimming Machine has the new feature of the two shafts, being operated by a single belt, and the cutter grinder is attached directly to the main shaft. This arrangement gives better results with less power.

The Buffing and Scouring Machine has a shaft 57 inches long and carries the following equipment:

- | | |
|--|-----------------------------------|
| 2 Split Bottom Buffing Rolls | 2 Flat X-Ray Heel Scouring Wheels |
| 2 "C" Shape X-Ray Heel Scouring Wheels | 1 Heel Breast Scouring Wheel |
| 1 Pin Wheel Pad Complete | |

A powerful Blower System removes the dust resulting from the trimming, buffing and scouring operations, and is designed to overcome certain objectionable features of other blowers.

The Finishing Machine has a 78 inches shaft which has all the necessary equipment for black or russet work:

- | | |
|--|--|
| 2 Corrugated Rubber Shank Finishing Wheels | 1 Corrugated Rubber Heel Finishing Wheel |
| 1 Corrugated Rubber Bottom Finishing Roll | 2 Shank and Bottom Brushes |
| 2 Heel Brushes | 1 Stitch Cleaning Brush |
| 1 Levelling Roll | 1 Bead and Wheel |

At the end of the Outfit is the Oscillating Edge Setting Machine which is fitted with union irons and in its motions duplicates hand workmen with quicker and better results.

Each of the machines is operated independently by a friction drive pulley, so that it is necessary to use only those machines which the operator may require. This feature means a saving of power.

All the machines are firmly mounted on legs and driven by a countershaft with carefully adjusted bearings, so that the Outfit runs with very little vibration, and is in every way most efficient.

When Times Are Quiet and Money is Tight BOOST Business

By Featuring

“LEADER” Brand McKays for
Men, Boys, Youths and
Little Gents

To arouse the interest of the average buyer at a time when money is tight and the business outlook dreary, shoes that will command immediate interest have to be shown the prospective purchaser.

He demands not only good quality but good quality at a reasonable price, that fits in with the state of his pocket book.

Such a line is “LEADER” Brand McKays for Men, Boys, Youths and Little Gents. While up-to-date in style and excellent in workmanship they are within the price of all and they leave a good profit to the retailer.

Do not overlook this line when ordering

Survival Value

What is it? Survival Value is the lasting prestige added to all footwear by the affixing of the **Union Stamp**—it is the surviving standard because:—

- 1st It is a guarantee of honest footwear, made under the best conditions.
- 2nd It is a pledge of expert workmanship.
- 3rd It is the pass-word which opens the sales doors to Union Men everywhere.
- 4th After the other inducements have all been recited, the conclusive and finishing argument is the **UNION STAMP**.

Every shoe bearing the **Union Stamp** retains a sales value of long duration, for no shoe bears the stamp unless it has been produced under the proper conditions and represents honest value.

For mutual profits, better and bigger business, insist upon the official stamp of the **Boot and Shoe Workers' Union**—the only guarantee of Union Footwear.

Our IN-STOCK DEPARTMENT

is At Your Service

Send us your sorting orders.

Do not let your stock run too low. It is bad business for you, because an unsatisfied customer is very frequently a *lost* customer.

You can avoid this difficulty by ordering frequently from our IN-STOCK Department. It saves you from buying too much at once, and it eliminates shopworn goods. In this department, we have a very complete range of styles and sizes, and we pride ourselves on the promptness with which we can handle all orders.

A trial will convince you. Send us a list of your wants today.

It is My Business
to Know where the
“Good Buys” are

And because I *do* know where to locate the best values in Boots, Shoes and Rubbers, I have “made good” with a host of Canadian shoe retailers.

My list for Fall 1914 is a remarkably attractive one from the dealers' viewpoint. It includes all the best known Canadian brands in all the respective lines, and offers you a wide assortment from which to make your Fall selections.

I strongly recommend you to see my salesmen's samples. If he hasn't called upon you yet, wait for him. The various lines he has to show you are well worth waiting for.

The gathering of the clans

“On to Toronto!”

YOU have doubtless noted with gratification the great movement for honesty and square dealing which is revolutionizing American and Canadian business methods. Our goods, our salesmanship and our advertising are being cleansed and vitalized by the spirit of truth and sincerity.

As a result we see a growing public confidence in manufactured products and their advertising—a confidence which, if preserved and fostered, will decrease our costs, increase our profits, and become a business asset of incalculable value.

Foremost in the fight which has brought about this revolution stand the Associated Advertising Clubs of America, whose emblem is shown above. If you are a business man, interested in the manufacture, distribution, or selling of commodities of any nature, you should attend the Tenth Annual Convention of the A. A. C. of A. at

TORONTO

June 21-25, 1914

At this convention you will hear the inspiring story of the manner in which these tremendous reforms are being effected. More than this, you will hear the problems of distribution, merchandising, salesmanship and advertising discussed by able and successful business men, in a series of open meetings.

These meetings will cover the questions of chief interest to the 10,000 business men comprising the 140 clubs of the A. A. C. of A.—*your own* problems included.

EDWARD MOTT WOOLLEY the famous writer on business topics, has written a booklet entitled “*The Story of Toronto.*” This booklet describes in a forceful, intensely interesting manner, the wonderful work the A. A. C. of A. are doing for clean advertising and square business methods, and the significance and importance of the Toronto Convention. This booklet will be sent free to all business men asking for it on their business stationery—together with detailed facts as to the convention programme and rates for accommodation.

THE "Classic" Shoe

In some of the New
Desirable Fall Styles

THESE are brand new models, distinctively original and pleasing; shoes with an individuality and intrinsic worth that compel sales.

We are not seeking to make a demand for these new styles—the demand is already there. WE HAVE SIMPLY ANTICIPATED THE NEEDS OF YOUR CUSTOMERS.

With these new models at our command, the "Classic" reputation as leaders in style, fit and wearability, will be even more forcibly demonstrated than heretofore.

Would you like a "Classic" salesman to call? A postal will bring one with a complete range of samples.

REPEAT ORDERS TELL THE TALE

It does not always take a brilliant salesman to sell a mediocre shoe to the dealer the first time—but such a sale only causes future trouble and loss of business.

When one sale is the basis of many more, it is a sure sign that the goods are right—and this is at the bottom of McDermott success. Women's shoes are our specialty, and we are receiving many repeat orders from satisfied customers every day. This speaks for itself. Have you seen our traveler yet?

See our samples before you order.

NO DIAMOND  TRADE MARK
No Fast Color

Get this fact firmly fixed in your mind. It may be the means of saving you considerable annoyance and inconvenience; for, if you will insist that the diamond trade mark shall appear on the surface of the eyelets in the shoes you order, you will be entirely free from any complaints regarding "Brassy" eyelets. Fast Color Eyelets are the only kind that cannot wear "Brassy." They enhance the good appearance of shoes more than any other accessory used in their manufacture; and, made as they are, with celluloid tops of solid color, they do not grow old but retain their bright, new appearance long after the shoes are worn out.

The diamond trademark is a sure cure for all eyelet troubles. Only the genuine Fast Color Eyelets have it.

How It Pays the Retailer to Handle Sporting Shoes

Now Is the Best Season to Open a Department of This Kind—More Dealers Every Year Realize Possibilities—Cost Is Very Little and Not Much Space Is Required—An Initial Order and the Lines Embraced

"Sporting shoes are one of our best paying lines, both in Winter as well as in the warmer months of the year."

This statement was made by an Eastern Canada retailer who conducts a sporting and athletic goods store, in reply to a query by the writer as to whether or not it paid him to handle footwear in his establishment.

Now, Mr. Shoeman, pause and consider for a moment the reason why sporting footwear results in large profits to the athletic goods man. Here is the real reason. Everyone spends a certain period each year in the rural districts and summer resorts. Whether this period happens to be only a few days or three or four months, depends entirely on circumstances, but nevertheless, we all make it our business to see that we get a few days of enjoyment annually, generally during the hot season. Now at the very first stage, before going on a holiday, one decides on a certain outfit which is considered necessary to comfortable enjoyment, such as appropriate headgear, summer clothing, and lastly, perhaps the most important item for an outing, a pair of comfortable lacrosse, tennis, or running shoes. The heavier shoes worn in the city are about as pleasant to wear in the country as a stiff collar, and also give about the same degree of comfort. These two last named articles are looked upon as only necessary at home, are left there, and during the interval soft collars and rubber footwear hold sway.

Where Shoemen Should Come In

Here is where the shoeman should come in for the profits, instead of the sporting goods dealer, as is so often the case. These men, as explained early in this article, enjoy a large call for the different types of sporting footwear, not alone during the summer months, but also in that period between October and May. Every day during the next few months, hundreds of dollars will be taken in through such sales, by tradesmen to whom this patronage does not legitimately belong, from a business standpoint.

However, these dealers have not been having entirely their own way during the past few years. Many Canadian shoemen have awakened to the possibilities of the sporting department. These shoemen have stocked complete departments of this kind and are now reaping the harvest which a wise investment is always sure to bring. Shoemen have come to realize more and more in recent years the necessity of profitable sidelines, and have been installing them gradually until at the present time the side issues in

many stores have proven almost as profitable as the more standard lines. Rental, wages, store lighting and other like items of expense all go towards reducing yearly or monthly profits. It is such sidelines as sporting shoes and trunks and bags that more than provide for the large expense drains, and leave clear profits in their trail.

Some Profit Returning Lines

There are many different lines of sporting shoes which it will pay you to stock. Among the foremost of these, come lacrosse, baseball, tennis and running shoes, hockey and heavy hunting boots. These few lines alone offer almost unlimited opportunities for the wide-awake retailer who decides to incorporate them in his sporting goods department, and if this branch is properly conducted, given a fair amount of attention, and advertised, it simply has to turn out a success. This has been ascertained by the writer who has canvassed different shoe retailers on the subject, and they all take the same view, most of them speaking from experience.

You will, however, encounter the chronic "knocker" who talks in a pessimistic strain simply as a matter of principle. This, you generally find is the man who opens a shoe store on a small scale and continues all his life to conduct his business on the same small scale. Why? Because he has not enough initiative to branch out and spend a few extra dollars. He prefers to remain "penny wise and pound foolish" as the old proverb says. It is his live competitor on the next corner block, always on the lookout for some method that will permit him to expand, who introduces new profit sources into the shoe store, and this is the type of dealer who is causing people to turn to the shoe store when they want to purchase a trunk or bag, and to also patronize the same source when sporting footwear and outing shoes are required rather than turn towards the athletic outfitting man.

Opening Sporting Shoe Department

Needless to say, we do not, nor do you yourself consider that you are of this type. If you were, you wouldn't be reading this article, as the chronic knocker never has any use for a trade paper, thinking he knows the shoe game himself from A to Z, and therefore never need read the organ of his trade. But let us get back to the practical end of the question. A great many shoemen hesitate, merely because they are a little nervous about investing

what is to them a large quantity of money in installing a sporting goods department. They are nervous about it and advance various reasons why they should not install a sporting goods branch in their store.

Many will argue that too much capital is required to purchase a stock with which to make a first-class showing,

HOW AVERAGE PRICES RANGE

Here are the principal lines of sporting shoes and their approximate net prices:

| | Men | Boys | Yths. | Wos. | Mis. | Child | Infts. |
|---------------------|------|------|-------|------|------|-------|--------|
| Speeder Bal..... | 1.20 | 1.10 | | | | | |

| Holiday Oxford.... | .60 | .50 | .40 | .50 | .40 | .36 | .34 |
| Wader Oxford..... | .25 | .22 | .20 | .22 | .20 | .17 | .15 |
| Skipper Bal..... | | | | | | .45 | .40 |
| Skipper Oxford.... | | | | | | .38 | .36 |

which they are anxious to do. Others say that they can make better uses of their room and have no intention of devoting any of their valuable space to an experiment. Still other shoemen are playing a game of watch and wait. They prefer to let their fellow shoemen do the missionary work on these new departments about which they hear so much, rather than take a chance themselves. They would rather wait until the sporting goods department becomes a regular institution in the Canadian shoe store. These and many other arguments are put up. This is only natural. Did you every start anything, that you weren't taking some chance? Why, when you first enter the shoe business, you are running the risk of failure through inexperience, lack of capital, hard times to come and so on. As regards capital, it is a reasonable outlay. A little study of the tables provided here will convince you of this fact, as athletic and summer outing shoes cost you only about one-fifth the price or less, of the standard lines of heavier shoes, and people can be persuaded to purchase several pairs of the lighter goods very often, when they are in the store buying a pair of \$5.00 shoes, especially in the summer time. Now, as to the space taken up by the sporting goods department, this cannot be called a real excuse, as a man who puts up an argument of this kind to you, is away behind the times. You are in business to make money, and if you are unable to give yourself proper scope, then you are pretty sure of failure, or if not that, you will never go any higher than you are now. A man giving an excuse of this sort, is pretty much like the man who decides to cut down his window space, or use it as a store room for goods. In these days, every wide awake retailer is perfectly well aware of the necessity of proper window facilities. He knows that to cut down his

present display space would be committing suicide as far as the welfare of his business is concerned. This same principle applies to the "lack of space" holler. If you have no room for a line of goods that has a steady and growing demand, a line that allows you a good profit, and a line that your competitor is handling to great advantage, then, what is the use of being in business at all. Sporting goods are of much lighter quality and cheaper material than the ordinary, everyday footwear, and as a result sell cheaper; a good profit is allowed, in many cases much more than on some of your regular lines. A good deal less space is taken up in this department than one would imagine. If you open up on a modest scale, one or two sections will give you plenty of room with some to spare. If you go into the matter on a more elaborate scale, you could set aside a certain part of the store, part or whole of the back section, for instance. The above spaces will allow for stocking of full supplies of the different lines of goods. By going slowly at first, every dealer can judge for himself, just about how to distribute his different varieties of sporting shoes, and what space they require, as some of them naturally, have a larger demand than others. Then, there are a lot of accessories for this department that can be stocked in with your findings department. Therefore, summing up, after a little thought, the strength of these two principal arguments against installing a department of this kind in your establishment, are you not convinced that it would pay you to

A SAMPLE SPORTING GOODS ORDER

A Hamilton dealer, who made quite a success of his sporting goods department which he opened only last Summer, gave the following as his initial order, which he said worked out very well. Of course this comprises a pretty full stock, and you can judge for yourself, whether it would be advisable to stock about the same as this retailer did, or work along more moderate lines.

go ahead and take a chance with the odds hardly as much, and certainly no more against you than they are in the different branches which you now conduct?

Another potent reason which should act with you in favor of a sporting goods department, is the very much

(Continued on page 32)

A Spacious Entrance With Long Receding Windows

How West Toronto Shoe Man Carried Out Something Simple, Practical, and Profitable in the Way of a Striking New Front—Plenty of Space For All Comers to See Big Displays—Store One of the Deepest in Canada

Money spent in a shoe store front is regarded by the average dealer as well invested. Do you realize that the way to a purchase is often paved with the eye. In other words, what we see we frequently believe we want or need, and acting on the impulse, purchase.

Realizing this trait, in human nature, enterprising proprietors seek to place before people as large a variety of footwear as possible, and to afford them every facility for inspection and close observation, without obligation to buy.

Walter Powell, Dundas street west, Toronto, has, in his western store, known as the Sample Shoe Store, installed as simple, practical and effective exterior design as can be found anywhere. There is nothing very elaborate or costly, or ornate about it, everything being plain and conservative. As a means, however, of displaying goods and affording facilities for viewing the varied styles in shoes, this front is perhaps unsurpassed. To begin with, the Sample Shoe Store at 1694 Dundas street, is 25 feet 3 inches wide, and an immense space has been left for the public. The women's window is on the left and the men's on the right, and yet a dozen women can examine the toggery in the women's window and as many men do the same in the men's window, and there is no sense of crowding. The utmost freedom can be felt, as the persons interested in the different windows are so many feet apart they do not gaze at one another or feel embarrassed. Neither are the remarks of the men overhead by the women, or the observations of the women overhead by the men.

Details of Spacious Front

The entrance is 13 feet wide and converges to a four-foot quarter-cut oak door, 16 feet from the street. The front of

each window is 3 feet 6 inches across and the side is 13 feet deep. Then there is an angle and another smaller show window about 3 feet wide by 5½ feet deep, just at the door. The windows extend back 3 feet beyond the door. There are no mirrors at all in the windows. Above the large plate glass are Luxfer Prisms, 18 inches deep. The floor of the entrance is of oak and so are the bottoms of each of the windows. The base of the exterior is of wood and painted a dark green, the side walls are panelled and enamelled white, and above them is a 2½ foot border of oatmeal paper, with a pretty floral design. The ceiling of the windows is panelled and enamelled white, while the ceiling of the spacious entrance way is natural wood, stained in oak. There are doors at the back of each window, so that the trimmer may easily enter. Mr. Powell designed the entire front himself, and the work was carried out by a local contractor. The huge plate glass is held together by copper standards.

The store is 132 feet deep. Mr. Powell intends in the near future to add 50 feet more to the shop, as he owns the building. He will instal new shelving throughout and fit up a second storey for handling traveling goods, in which he will specialize.

Why He Installed It

"Yes," said Mr. Powell, "I think I have as good a store front for selling shoes as is possessed by any merchant. I do not say this boastfully, and while the front is not flashy or too imposing, it serves the purpose for which I installed it, namely to display goods in an effective manner and to catch the eye of the public. One can stand across the street and get a glimpse of what is exhibited in the windows. I have

THE SPACIOUS AND PRACTICAL FRONT OF AN ENTERPRISING WEST TORONTO SHOEMAN

been asked why I do not install a show case in the centre of the entrance. I may do this at certain times, but I do not wish to break the line of vision nor the freedom with which persons may walk across from one window to the other and examine the footwear showings. This front has already paid me handsomely and has resulted in a large increase of trade. If I did not think it would have done so. I would not probably have installed it. Certainly I have not been disappointed."

Mr. Powell has been in the shoe business in West Toron-

Shoe Dealer Honored by Electors

To many friends through the Maritime Provinces and in other parts of Canada, it will be of interest to know that James V. Russell, foremost shoe dealer of St. John, N.B., was last week elected to a civic commissionership in that city. This means his retirement at least temporarily from active business life, for the position calls for him to devote his time to it for four years, at a salary of \$3,000 a year. Mr. Russell, while in business, formerly had considerable

J. V. RUSSELL

experience as alderman under the old civic system of administration in St. John, and is regarded as being very capable for the new office.

It is thought likely that he will be assigned to the post of commissioner of public works. His vote polled in the elections was splendid, and the cause for huge satisfaction to himself and his numerous friends for it showed the confidence reposed in him by the electorate and his popular standing in the community. He was second on the successful ticket, which means his remaining at the council board for four years.

Mr. Russell has been in business in North End for a great many years, and has conducted in addition to his first store, another one in Main street, and another branch in Brussels street. Waterbury & Rising have taken over his original store in Main street, which they will conduct as a branch, while his other one in the same street was taken over some time ago by George W. and Joseph Gray, who for many years had been in his employ.

Much is expected of him in his new position in public life. He has been a prominent merchant of the city, has been a member of the board of School Trustees, has been active in board of trade circles, and has always taken a keen interest in anything pertaining to the welfare of St. John.

to for 27 years, being in partnership with his father, the late Thos. Powell, until nine years ago, when the firm name was changed to Walter Powell. Mr. Powell, Sr., passed away about two years ago. Mr. Powell conducts the Slater Shoe Store at 1682 Dundas street, and as already stated, the Sample Shoe Store. Eventually he intends merging the two places into one, and will devote his attention entirely to the Sample Shoe Store, which he will then conduct under his own name. Mr. Powell has some novel selling methods, and keeps an alert and courteous staff of clerks, who receive strict instructions to treat everyone courteously and kindly, no matter what the dress, color, or nationality of the individual may be.

Known as the Slipper King of Toronto, it is said Mr. Powell sells more slippers than possibly any other shoeman. About four weeks before Christmas, knowing that slippers are a favorite gift, he puts up light iron rods around three sides of his store several feet out from the fixtures and on these, by means of snap hooks, depend slippers of all kinds, canvas, leather, felt, velvet, brocade, kid, corduroy, etc. These slippers are sectionalized, so to speak, in that the sevens of all kinds are together, the eights of all kinds, the nines of all kinds, and the prices are marked on each kind, so that one needing size seven, say, can inspect the various lines that are offered at 75c, \$1.00, \$1.25, \$1.50, \$2.00, \$2.50, etc. Mr. Powell has facilities for displaying in his store at 1682, some 1300 pairs and in the Sample Shoe Store no less than 3300 pairs. After the holiday rush, the rods are removed. Mr. Powell knows that the slipper trade is worth going after and the interior of his store presents an inviting spectacle each Yuletide season and yet the impressive display does not in any way interfere with the selling of other lines of goods.

Man vs. Woman Buying Shoes

Which would you rather wait on, a man or a woman? Put this question to the average shoe clerk and if he is not a ladies' attendant or a favorite with the fair sex, he will tell you that he would rather wait upon a man every time, and for this reason. A man generally buys when he wants to, knows what he wants and as soon as he sees what he likes, if the price suits and the shoes fit, he hands over the cash and gets out. Possibly the whole transaction does not last five or more than ten minutes. Of course, there are some "Willies" and "Cissies" even among the male sex, who want to "la de da" around a shoe store for a long time and pretend that they have an exceptionally hard foot to fit, that they cannot secure a perfect style or they desire to impress the dealer that their patronage is just a little above that of the ordinary wight. However, these are the exception.

With women it is different. "Too often," said a London shoe man, "they come in to shop rather than to purchase. I will give you an example. A lady entered this morning—wanted a pair of pumps. I showed her a nice line of patent leather colonials, with celluloid buckle and Cuban-Louis heel. The price was \$3.50. She tried on the shoe and it fitted her perfectly. In fact, she said she liked it, but she wished to see something else. Now, if that had been a man he would have been satisfied, completed the transaction and walked out. Not so this lady. She wanted to see something in suede, in velvet; in black satin, in gunmetal, in colored kid, and then she asked all about the ornaments, from the corded silk bow, right through to cut steel, rhinestones, jet, metal and everything else. I suppose that woman tried on a dozen pairs of low cuts and finally wound up by saying she guessed she would take the patent leather, which I had shown her at first, "as she did not see anything that she liked better." Now this is human nature and a part of woman and I suppose always will be. No sir, we like to wait upon men best, particularly in times of rush." It took me just forty five minutes to sell that woman that pair of pumps on which the gross profit was one dollar".

Putting in Memorial Day and Natal Day Windows

Sketch No. 1—For the City Dealer—How to Make Use of Same for the 24th of May

Cut the centre fixture out of thin lumber and cover with white felt. The small ornaments at each corner at the top should be cut out of purple felt and pasted on, the small strips at each side of the centre fixture which should be covered with black felt. These two side pieces should just be nailed on the centre fixture, so that the color of felt can be changed any time. The letters "Memorial Day" should be cut out of black felt and just pinned on so that they can be taken off without making any impression on the felt. The small pattern effect at each side of the frame should also be cut out of purple felt and stuck on. A large picture of Queen Victoria can be borrowed from a local art dealer and place to hold in the centre of the fixture. First of all the trimmer should get the picture so as to know what size to make the opening in the fixture. Large Union Jacks should be stretched across each side of the window, and, if possible, the trimmer should try to secure an artificial wreath or two and place same at the bottom of the fixture.

For Dominion Day

To make use of this same background on July 1st, known as Dominion Day, which is the Natal day of Canada, the trimmer should remove the black letters for Memorial Day and secure a vacation picture showing an outing of some kind or some summer scene. This can also be borrowed. Use the two Union Jacks in a little different way. For instance, they should be draped in each corner to make the trim different. Bright Summer flowers should be used for the Dominion window and no flowers at all for the Memorial window. The floor of the window in each case, should be covered with white felt.

The small strips at each side of the main fixture should be recovered with pale green felt for Dominion Day window.

Shoes to be displayed for the Memorial Day window should be nice street and dress shoes, and for the July 1st window, outing shoes of every description.

Sketch No. 2—For Memorial Day—An Inexpensive Idea for a Small Dealer

Secure first of all a picture of Queen Victoria, which can be borrowed from an art dealer. After you have the size of

your picture, make your fixture according to the size of your window and making the centre so fit your picture in. Union Jacks should be used as in the sketch, and the four small, round wreaths can be borrowed from a local undertaker. Cover the whole of the fixture which should be made of thin lumber with white felt. Make a small square piece of wood to put in the centre of the bunch of flags and cover with purple felt. Make a monogram of V.R. out of cardboard and gilt, and paste on this panel. Purple and black ribbons should hang from the flags. The floor should be covered with

white felt or white crepe paper, or if the trimmer can get a Union Jack, the same would look very well on the bottom of the window. The figures 1837 and 1901 should be cut out of black felt and pinned on with small pins so that they can be removed without showing on the felt.

For Dominion Day

Remove the figures 1837 and 1901, also the panel with V.R. in the centre, also remove the picture of the Queen. Try to get some Summer scene, or outing picture, and place it in the centre. Instead of displaying street and dress shoes as in a Memorial window, show all kinds of cool Summer outing shoes, such as rubber soled ones, etc. If you can borrow two large Union Jacks to fit the side of your window stretch this across the sides as in sketch No. 1 to make this entirely different from your Memorial window. Don't crowd your window.

Handicaps of Shoe Manufacturers

There are two great handicaps under which the shoe manufacturer must labor. One is the fact that the styles are constantly changing, and the other is that the shoe demand runs in waves; at certain times in the year the factories cannot run fast enough to supply the buyers, and at the other times there is not enough demand to keep them going. He is afraid to stock up in the slack season for fear that the style may take a radical turn and leave him with a lot of unsalable goods on his hands. The changes in shoe styles are far greater than the ordinary man realizes. He thinks of the shoe as a staple article, and that it is made the same year after year. On the contrary there are as many styles in shoes as there are in gowns, and every few months there is some change in form—a new way of fixing the laces, a new kind of tip, a new heel or something of the kind—so that often a last-year shoe looks as awkward and as much out of style as a last-year hat.

Should Retailers Pay for Shoes Before Any Are Sold

Representative Dealers Declare Changing Seasons Render It Imperative That Cash Datings On Both Rubber and Leather Footgear Should Be Later—Why Some Shoeman Hang Back in the Matter of Spring and Fall Orders

The changing seasons may result in changing business arrangements so far as the terms and payment on rubber and leather footwear are concerned. Retailers feel that owing to winter coming later each year and practically not setting in before the 1st of January, that some changes should be made in reference to the payment for rubber shoes.

As mentioned in the last edition of the *SHOE AND LEATHER JOURNAL*, a petition is being circulated among the dealers in Toronto and Ontario, under the auspices of the Retail Merchants' Association, asking that the rubber companies date their cash payments for goods from November 10 each year to January 10, so that merchants may at least have a portion of their stock sold before they are asked to pay the manufacturers.

There Should Be Mutual Concessions

"It is just this way," remarked a leading Toronto retailer this week, "the company comes along and asks us for a placing order in March and April, and in order to secure as much business as possible the independent concerns give a discount of ten per cent., while Consolidated gives special net prices. They point out that as the factories order their supplies of rubber, cotton, cement, etc., in large quantities very early in the season, they are able to keep down the cost of production and give the goods much closer supervision when orders are given early. In other words it enables the producers to know where they are at. Now these goods generally come along in July, August or September, and we are asked to pay for them by November 10, being given two per cent., or one per cent. thirty, or net sixty days.

"Now, I defy any man in Toronto, Hamilton, St. Catharines, London, Woodstock, or other cities in Western Ontario to say that he sold more than half a dozen pairs of rubbers before December 15. In fact, owing to the mild dry weather which prevailed, rubber footwear did not move at all until late in December or early in January, yet the retailer is asked to pay for this stock two months ahead of time if he wishes to secure advantage of the discount. At the same time his stock has possibly been in hand anywhere from three to four months and on this the shoeman has to pay insurance, provide storage space and run all other kinds of risks, yet he has given the manufacturer the advantage of a placing order. I think it would be only meeting retailers half way if they made the cash datings on all shipments January 10 instead of November 10. The merchant would then be in a more amicable frame, financially and otherwise, to meet the bills when they are presented. It seems to me very unreasonable to expect us to give orders so far ahead and then be made to pay for the goods before we have a chance to sell them. It is well known as I have said before, that the rubber selling season, with rare exceptions, does not start in Toronto and other Western cities until the latter part of December."

What About Leather Shoe Datings?

Speaking of payments on leather shoes, another leading retailer told the *SHOE AND LEATHER JOURNAL*, that he thought if a change was not made regarding the settlement for these goods shoemen would not give large Spring and Fall orders. "For instance," he added, "We are asked to order our Fall goods during the months of March and April and Spring goods during August and September. In the case of Spring goods where orders are given four or five months ahead of delivery and for Fall goods three to four months, the datings are, with some exceptions, for Spring goods 1st of April and for Fall goods, 1st of October. Now, why should a man be asked to pay for his Spring stuff before he has a chance to

sell one quarter or even one eighth of them. I would suggest that manufacturers should date payment for their high cuts April 1, and for oxfords, pumps, etc., May 1st or June 1st.

A Storehouse for the Maker

"You know yourself, shipments are often made to us months ahead because the manufacturer wants the floor room in his factory premises. If he can only force the goods on the retailer long before they are required, the latter bears the risk and affords all the accommodation. Now we are doing the manufacturer in many instances a favor by accepting these goods weeks before they are required. In fact, I know one retailer who received his Spring lines this year the first week in January. The selling season which should begin earlier has, owing to the lateness of spring weather, just got nicely started, and it is now the middle of May.

"Last year we were selling light weight turn shoes up to the 1st of November. It was so dry under foot and warm overhead. To make a long story short, the seasons seem to be shifting. Spring goods are sold much later and so are Fall goods, and I therefore, contend under these conditions, a reasonable degree of latitude should prevail. Datings should be made later in every case in order to accommodate the retailer. It is pretty hard to ask a man of limited means to pay for ranges out of which he has not already sold half a dozen pairs. He should at least be afforded an opportunity of disposing of a moiety of his stock.

A Hint to the Manufacturers

"If manufacturers meet the dealer along the lines I have set forth, I do not think there would be so much complaint about retailers holding back in the matter of giving Spring and Fall orders. You know shoe factories have been rather quiet and one of the grievances has been that the retailer is each year showing less and less disposition to order early but relies more on the in-stock departments, and in sorting from whatever sources he can. I would like to hear from some other shoemen along this line, I am pretty sure that the majority of them will agree with me that it is time for cash datings to be changed a month later on both fall and spring goods. It would be a great accommodation and comport more with the tendencies of the seasons during the last few years."

A Boomer of His Home City

One of the most widely known residents of Berlin is Harry D. McKellar, who is prominently identified with a number of leading industries. Prominent among them are the Canadian Consolidated Felt Co., of which he is sales manager; The Berlin Felt Boot Co., of which he is vice-president; McKellar Bedding Co., of Fort William and Berlin Shoe Manufacturing Co. He is president and general manager of both of the last named concerns. Mr. McKellar possesses a lively cheerful disposition and is always proclaiming the advantages of Berlin as a commercial and industrial centre. It was in 1909 that he organized the McKellar Shoe Co., which make a specialty of men's working shoes and a fine line of McKays. The daily output is about four hundred pairs and some seventy-five people are employed. The organization is composed of Mr. McKellar, Chas. Greb and Ed. C. Greb. A recent edition of a Berlin paper refers to Mr. McKellar as "Berlin's Foremost Publicity Man."

How Many Trunks Will You Sell This Summer?

Push Travelling Goods Sales Now—It Is Up to Yourself As to How Many You Will Dispose of—Advertising Leather Goods—Feature Windows of This Type—How to Best Make Your Department Known

The summer holidays will soon be with us, and it behooves the wide-awake shoe retailer to commence a publicity campaign in behalf of his traveling goods department, that will put this branch of his business on a truly profitable basis, instead of its being merely a "sideline" regarded more as a liability than an asset.

Now is the season for him to put forth every effort to move his stock of trunks and leather goods. The travelling movement is just beginning, and during the next few months many thousands of trunks, suit cases, and the like, will be distributed throughout the country. The mail order houses, will no doubt, do a large percentage of this business, chiefly due to the retailers not pushing these goods energetically and effectively.

Use Your Opportunities

Now, trunks will not sell themselves. If the shoeman does not sell a trunk except when he is asked for one, his business in this direction will be very limited indeed. And yet, that is just the attention the average shoeman gives to his trunk and bag department.

No opportunity of interesting your regular and transient customers should be lost. Have the goods displayed in some prominent position in the store. Many shoemen place a dozen or more trunks in a row in the centre of the shop. In this way, shoe buyers cannot overlook them. Natty show cards should be used, giving in a few words, a general description of the goods, or aiming at arousing the desire for the stock displayed.

Utilize Findings Case

For those shoe dealers who stock quite an assortment of leather goods, such as ladies' hand bags, pocket books and various other lines of like character along with trunks, bags and suit cases, a neat show case, similar to that used for displaying findings will answer very well. Very winning displays can be made in such a show case, and if placed on one side of the entrance, just inside the door, it will prove a great magnet for women shoppers, for what woman ever shows lack of interest in such things? A neat companion case in the same position on the other side of the store and containing the finer class of shoe findings, such as buckles, bows, the more expensive laces, and so forth, will prove an additional drawing card to every woman customer. She will seldom get by these two showcases, and the true salesman will generally interest her in a purchase.

Traveling Goods Window Displays

It is also a good policy to keep one of your windows, to which you should invariably devote some special attention,

constantly occupied with attractive traveling displays. There is little use in placing a trunk or two, a few suit cases, and some smaller articles in a window without any plan of demonstrating them. This is one of the chief reasons why the traveling goods department in many shoe stores is only a mediocre profit maker, or very often an investment that ties up many dollars and yields no return. Absolutely no window attention is given to the sideline, although there are few lines that lend themselves to more favorable treatment, and as a result it suffers. Instead of piling trunks one on

another for a background and crowding the intervening space with a motley array of suit cases, hand bags and smaller leather articles, good display schemes should be thought out, showing some of these articles put to various uses. Get a central idea, and make the remaining part of the display subservient to this idea. For instance, a packing scene can be shown, with an open trunk and various articles of apparel ready for placing therein.

Useful Display Idea

A striking display of this type was recently made by a ~~Montreal~~ departmental store, having as a central unit

a medium sized sectional trunk opened up. From the top section peeped forth a Panama hat, two or three negligee shirts, and ties to match. The lower sections were drawn out showing therein a neatly folded suit or two and various other articles of wearing apparel. All around the trunk, on chairs and on the floor, were clothes waiting to be packed away. Nothing could have shown more effectually the capacity and efficiency of this class of trunks. Moreover, it impressed itself upon the minds of those who viewed it, and proved a strong money puller for the store in question, drawing in many extra dollars that would otherwise have gone elsewhere if they had been spent at all.

Again, try and feature something novel in traveling goods. There is always something new coming out, such as added conveniences on bags, special feature locks or interior divisions that are out of the ordinary, and unusual. During the summer months, such trunks, bags and suitcases as lend themselves readily to convenience while traveling, should be pushed. These are legion, and full descriptions can be secured from the various manufacturers, who are always ready to do all in their power to forward the interests of the retailer.

A first-class display idea for a traveling goods window was shown in the *SHOE AND LEATHER JOURNAL* of April 1st, and many shoe men would, no doubt, profit by putting it to practical use.

Circulars and mailing cards will also be found of great aid in booming sales in your trunk department. They

ENGLISH COWHIDE CLUB BAG, TAN COLOR.

IT IS OF GREAT HELP

I have always found your paper very interesting and received lots of valuable pointers from it. It is a Journal that every shoeman should read. I am not in the shoe business now, but if ever I go back into it, I want no better assistant than the SHOE AND LEATHER JOURNAL.

J. E. DUNCAN.

Halifax, N. S.

WELL WORTH THE MONEY

Herewith enclosed you will please find a money order amounting to \$1.00 for one year of my subscription. Your Journal is well worth the money.

Yours very truly,

(Signed) C. SOFIO.

Sicilia Shoe Store, Montreal.

should be crisp, newsy and descriptive of the articles advertised, but need not necessarily be as brief as your newspaper ad. Such matter should be relieved by appropriate cuts, showing the article or articles advertised, in use. This always makes the general appeal stronger.

An Eastern shoeman, to boost his trunk department last Summer, sent out a neat card, bearing his name and address and also a letterhead of like nature, telling of the existence of his traveling goods department and the service he was prepared to offer, stipulating also that each person presenting one of the marked cards would receive a discount of 10 per cent. on any article in the department. There

FIBRE TRUNK, TOP TRAYS, AND STRAPS ALL AROUND.

letters were mailed to every possible customer in the town and surrounding country, and made the department a success from that time on, merely through the use of a bright idea. Many other plans can be worked out, by giving your

individuality a little scope. If the trunk department is taken hold of in the spirit outlined above, failure is impossible.

Finally, if you sell trunks and bags, don't "hide your light under a bushel," and before you look for success, see

COWHIDE SUIT CASE, STITCHED LEATHER CORNERS.

that the sign on your windows and over the door makes mention of your traveling goods department.

Selling Goods vs. Filling Orders

Upon entering the employment of this establishment, we would have you realize that there are two distinct reasons for your employment—selling goods at a profit and in making profit for saving needless waste, says a leading Western firm in a "Book of Rules" which it hands to each clerk on entering the service.

We would also impress upon you the importance of your position to the establishment. When you realize the vast sums of money expended for building, fixtures, merchandise and advertising, all for the purpose of getting the customer to purchase goods, then you will realize what would happen if the goods were not sold at a profit, so we hope that you will appreciate that the sales person is one of the most important activities of the establishment; so far as the public is concerned, you are the individual representative of the concern and we trust that you will endeavor to be an able representative.

If you would be a successful sales person, it is necessary that you realize the difference between selling goods and filling orders. The person who only sells what the customer asks for when entering the establishment is only filling an order, but if you should succeed in selling more than they ask for or by making suggestions, can increase the sales of the store, then you not only help the store, but, of course, increase your own sales and are worth while to the establishment. In order to do this, we would suggest that you get a thorough knowledge of the line which you are going to sell. This will give you confidence in yourself and retain the confidence of the prospective purchaser by displaying the knowledge of the merchandise.

The policy of this house is one price to all and no misrepresentations. Satisfying the customers to the fullest extent is one of our hobbies. We trust that you will do this, realizing that if we retain the good will of the customer that they will return to our establishment for future purchases and you can readily see how the establishment and yourself will profit thereby.

Endeavor to be as accurate as possible, for most cost money, and as far as you are concerned let this be a store where promises are kept and any errors cheerfully corrected.

Last, but not least, remember that Emerson says "Life is not so short but that there is always time enough for courtesy." Put yourself in the customer's place and consider how you would like to be treated, and you will make very few mistakes in the treatment of customers.

The Importance of the Retailer in Business Life

Knowing the Character and Standing of Your Customers Essential to Success—Method Used By the Association to Make Delinquent Debtors Pay—The Union of Interests and What Can Be Done

"The business of selling goods at retail can never be dispensed with. It is the most important channel through which all merchandise and all produce must flow to reach the consumer with convenience and with the least expense.

"The capital employed in the retail trade of Canada outnumbers in amount the value of all the agricultural industries with the authorized capital of the chartered banks combined. We occupy and own more expensive premises, we pay more insurance, more rent, more taxes, more freight, more cartage, engage more help, own more horses, spend more money and give more credit than all the agricultural and other commercial classes combined," says a recent Bulletin of the Retail Merchants' Association of Canada, the annual meeting of the Dominion Board being held a few days ago in Toronto.

We are less understood and more abused than all the other classes, because we have been "hiding our light under the bushel," and the other classes have been demanding justice and equity. We are now beginning to realize our position and our importance in the community.

To protect ourselves, our families and our future business conditions, we must all line up under one strong, powerful and properly organized Association.

As units we are helpless, but as an organized body we become a mighty power.

Must Be Always on Guard

As the population increases, more care and wisdom must be exercised in the giving of credit, and this is what our Credit Reporting Department is for. The Manufacturing and Wholesale Associations have a properly equipped department in order to keep themselves posted as to how we as Retailers pay our accounts, and how much and to whom we owe, and there is no reason why we should not know, through our Credit Reporting Department, how those customers who owe us pay their accounts. This knowledge will strengthen our position, and make our credit all the stronger with those from whom we buy, and save us hundreds of dollars during the year, or, in other words, "To be forewarned is to be forearmed."

Some Trade Problems

Among the many other Trade difficulties that Retail Merchants have to contend with, as a class, and which our Association is constantly endeavoring to overcome, is that of collecting overdue accounts. This question, perhaps more than any other, has given all classes of Retail Merchants considerable thought and anxiety. A few contend that Retail Merchants should sell strictly for cash, and that no credit whatever should be given. It is not our intention to enter into any discussion of this proposal in this Bulletin, as we must deal with business conditions as they are, and as we find them—not as some say they should be. Everyone must admit that good credit is the foundation stone upon which all trade and commerce is built, and if this is true, the giving and receiving of credit should receive our careful consideration.

When discussing the value of credit, the late Mr. J. P. Morgan said: "Commercial credits are based on the possession of money, or property, or character; the first thing is character. A man I do not trust could not get money from me on all the bonds in Christendom. Character is the fundamental basis of business."

Know Character of Your Customer

The first essential, then, in giving credit, is to know the character of your customer. Not so much as to what they

are worth, but as to how they pay. To give credit purely on the strength of material assets, is looking too much to the strength and ability of the law to collect; but by basing credit on character first, and material assets lasts, you contemplate payment on honour first and law last.

The question arises then, "How do we know the character of those who ask us for credit?" The answer is, "Ascertain how they have been paying others with whom they have dealt." To do this, and to protect ourselves from those who move from place to place in this rapidly growing country, we must go far beyond mere local enquiry, and beyond those who deal with any single line of trade. Our credit reporting department, we believe, has solved the problem, for the retail merchant, as it gathers information from all classes of Retail Merchants, and is Dominion wide.

How Plan is Operated

In each Province of the Dominion we have Provincial Officers, with properly equipped offices and a capable staff. From these offices we send to every member, as many Collecting Letter Forms as they require, and they send them out to their slow pay or delinquent debtors. These letters are in no way offensive, or abusive; but they give every debtor due notice that if they do not settle their accounts after a stated date, their names will be sent in to the Secretary of the Association, who sends out another Letter to the debtor, stating that if they do not settle their account with our member within a stated time, their names will be entered on the Delinquent Debtors' List, and a copy of this Debtors' List will be placed in the hands of every Member of our Association, and open for inspection by all retail merchants throughout Canada, who are members of "The Retail Merchants' Association of Canada." These names are gathered and tabulated by the Secretary of each Province, and then they are compiled by the Secretary of the Dominion Board, and in this manner they become known throughout every Province.

Collecting Companies Have Failed

Every retail merchant who has been in business for any length of time, must know of the innumerable schemes that have been promoted with the object of attempting to prevent people who make a habit of living on the merchants, from securing credit. Various companies have been promoted and operated, having in view the rating of all the householders and tenants in a community; but these companies have failed to solve the problem, as they overlook the chief asset—character—and they base their calculations largely on an uncertain guess as to what the said persons may be worth. This system has proven to be of no value, as it is impossible to secure correct information, and it would be too expensive if they could.

Bed Rock of Actual Fact

Other collecting agencies, with high-sounding titles and unblushing pretences as to the extent of their operations—which in many cases are very little known outside of themselves and a very few persons; but who claim to have world-wide correspondence—have induced many merchants to give them their accounts, and to pay them large fees besides; and many who have done so, have found out their mistake, after it was too late. Our plan is based upon the bed-rock of actual fact, gathered from the retail merchants themselves, and the names of the Delinquent Debtors appear in our Delinquent Debtors' Book because they should be there, and every live, up-to-date Merchant should know them.

Make Your Newspaper Ads. Say Something Definite

A Good Heading is Necessary to Focus the Attention of the Reader—The Importance of "Reason Why" Copy—It Costs No More Than the General Stereotyped Style of Announcement and Brings Results—Part that Price Plays

By the term advertisement in this article is meant the newspaper advertisement, as distinguished from catalogues, booklets, folders, circulars, posters, street car cards, and other forms of advertising.

Shoe retailers, as a rule, go stronger upon newspaper advertising to draw trade than upon any other form of publicity, although at certain seasons they use folders, circulars, and even posters. Therefore, the discussion of newspaper copy is much more pertinent at present, although some of the other methods mentioned will be considered later.

Copy is the backbone of an advertisement. This is as true in advertising footgear as anything else. Display is very important in that it serves to attract attention to an ad. Good illustrations of the prevailing styles of spring shoes are valuable, because they show in a vivid way some of

All copy falls naturally into six divisions, the heading, the sub-headings, the body matter, the price, the exhortation to the reader—which might be considered part of the body matter—and the firm name and address. Although every ad. does not contain all the above divisions, the most of them appear.

A good heading attracts attention and arouses interest. That is its main object. To do so, it should consist either of the name of the shoe for sale, some selling point of this line—perhaps both name and selling point—or a suggestion of the need of the brand of boot handled and the superior points in the style, wear, leather, workmanship, comfort, or fitting qualities that it possesses.

Shoe Illustrations a Great Help

The illustration of a shoe is timely and helpful. The dealer has many splendid opportunities for re-inforcing his advertising by snappy illustrations secured from the manufacturers or the SHOE AND LEATHER JOURNAL.

Many stock cuts can be obtained at reasonable prices and they brighten up an ad. wonderfully. In such cases, a good heading will greatly strengthen the point made clear by the shoe cuts.

If price is a strong selling point, as sometimes happens when the dealer is putting out a bargain, it is well to feature it in the heading. Of course, in advertising anything for which a demand must be created, it is as well to use a heading with this end in view rather than the name of a commodity.

Make all headings as short and concise as possible. A wordy sentence at the head of an ad. will kill interest more quickly than anything else. It matters little whether the heading takes an assertive, interrogative or command form, so long as it is not uncouth.

Never use blarney headings, i. e., headings such as "Stop! Look! Listen!" "We announce!" "We have the best!" "We are the leaders!" "Why not?" and many others of that nature. They are as common as black berries in August, but the retailer who avoids them will find his ad. much more effective. They will kill any incipient interest aroused by a well displayed ad.

The value of sub-heading consists in making an ad. more readable. They break up solid masses of type into smaller divisions, and thus give the mind a better opportunity to absorb the argument. They are also very useful in showing where a new idea is to be introduced. When used, they should be chosen as far as possible, so that they can be read in connection with the main heading, as this gives the reader a short synopsis of the whole ad.

This is a very important part of the retailers' ad. and should rarely be left out. Most buyers have limited incomes, and therefore have to consult prices a great deal. In the case of special bargains always display the price, preferably in the heading, but otherwise just over the firm name and address. Never set it in ordinary body type, for the reasons given above. It is too important. On the other hand, it should be displayed in smaller type than that used for the heading and firm name. This rule is often broken. Don't do it.

Do this at the close of the body matter. This is the logical place, as all the other parts of the ad. have brought interest and desire to a head. Different forms of exhortation are used, such as "Buy to-day," "Sizes are limited." Always make the exhortations as brief and pithy as possible, yet not in stereotyped form. Do not use those overworked expressions seen so often.

**"EMPRESS"
SHOES
For Women**

Stock for Spring, 1914, Now Complete

The question of comfort has been given careful thought and study by the makers of Empress Shoes, and in every style shown absolute foot-ease is assured.

This fact, coupled with the knowledge that "Empress" Shoe Styles express the newest English and American style ideas, should have influence with women particular about their footwear.

Prices Reasonable, \$3.00 to \$5.00

Sole London Agency.

THE ADVERTISEMENT ON THE LEFT IS ATTRACTIVELY SET UP AND GOOD USE IS MADE OF THE SHOE CUT. THE OTHER AD. ON THE RIGHT SHOWS MUCH LESS GOOD TASTE AND EFFECTIVENESS AND HOW NECESSARY IT IS TO EMPLOY A CUT.

the selling points of the lines advertised. Good headings are very necessary to focus the attention of the reader on something definite. If, however, the copy itself is poor, the whole ad. structure fails of its purpose, because the function of copy is to change the attention secured by the display to active interest, to create a desire for the shoes advertised, to convince the reader that he should buy that style, and that he should take steps to procure a pair at once.

The Two Classes of Copy

All copy may be broadly divided into two classes—suggestive copy, or copy that places briefly before the public some idea, name or trade mark of a certain shoe, and salesmanship or "reason why" copy, which, as its name indicates, is intended primarily to make sales, rather than to merely familiarize the public with some article with a view to making sales. If you take three or four inches of newspaper space daily with this style of ad., "Smith can shoe your whole family," you will undoubtedly win some customers, by force of repetition, but you will not be using space most intelligently. No man who merely uses the standing card style of ad. ever does. Salesmanship or "reason why" copy is the only effective kind and therefore the only kind to use. It costs no more, and brings immediate results.

New Superintendent Appointed

C. A. Maddox is the new general superintendent of the Canadian Consolidated Felt Co., who recently entered upon his new duties in Berlin. He has had a long and thorough experience and for fourteen years was the head and front of the

famous Daniel Green plant at Dolgeville, N.Y., which factory is recognized throughout the continent as originators of fine felt footwear specialties. It is the intention of Mr. Maddox to add to the present range of the Canadian Consolidated Felt Co. the choice grades of felts and fabrics which have been manufactured across the border and also a complete line of lower priced Comfys and Juliets which are now imported into Canada. Mr. Maddox is an important addition to the Berlin manufacturers' colony and during his short residence in the city has made many friends. Mr. A. J. Kimmel is the vice-president and general manager of the Canadian Consolidated Rubber Co., Berlin.

Will Appoint Organizing Secretaries

At the close of the special meeting of the "Dominion Board," of "The Retail Merchants' Association of Canada," the Executive Officers of the "Ontario Provincial Board" held a meeting, to receive the report from the Finance Committee which was appointed at the last Ontario Provincial Convention, and to take action upon its recommendations.

The report from the Finance Committee—which consists of Messrs. J. A. McCrea, Chairman, Guelph; J. C. Van Camp, and T. Bartrem, of Toronto, was received and adopted, and the Secretary was requested to have the same printed and sent to the officers of the various Branches throughout the Province.

They took immediate action on the proposal to divide Ontario into Districts and appoint an Organizing Field Secretary in each district, who will keep in constant touch with all the merchants in each district, and thus overcome a difficulty which the Association has had to encounter for some time. This was that as soon as an Organization was formed, it was left without anyone whose duty it was to see that the work taken up by the Local Association was continued. These Organizers will be engaged on salary, and paid out of the general fund of the Ontario Provincial Board.

All officers were present, viz.: B. W. Ziemann, President, Preston, Ont.; A. M. Patterson, 1st Vice-President, Brockville, Ont.; R. D. Cameron, 2nd Vice-President, Lucknow,

Ont.; F. C. Higgins, Treasurer, Toronto, Ont.; E. M. Trowern, Secretary, 21 Richmond St. W., Toronto. The officers will meet each month so that great progress should be noted in the work of the Association by the end of the year.

At the close of the meeting the officers and executive committee of the Ontario Retail Grocers' Association waited upon the Board and announced that they had decided to unite with them and become members of the "Grocers' Section" of the Association.

A Special Committee was appointed to complete arrangements whereby the officers elected at the last Convention of the Ontario Retail Grocers' Association would become the Officers of the "Grocers' Section" for the Province, for the coming year.

A Wide-Awake "Islander"

One of the best known business men in Charlottetown, P.E.I., is Chester McLure, who has represented the Kaufman Rubber Co. on the Island ever since their product was first made. Mr. McLure is manager of their branch at Charlottetown, which is run under the name of the Charlottetown Rubber Co., and reports that he had a very successful season in rubbers. He is also president of the Charlottetown Selling Agencies, Limited, who do a commission business handling goods direct from the factories. The subject of this reference is also interested in a couple of retail stores and is very much concerned in the wonderful silver black fox industry, being actively associated with the following companies: President of the Fur Farmers' Bureau and Exchange Limited; President of the Sterling Silver Black Fox Co., Limited; manager and secretary of the Royalty Silver Black Fox Co., Limited; director of the Rosemont Consolidated Silver Black Fox Co., Limited, and a director of Fur Producers, Limited.

Born at North Rustico, P.E.I., in 1876, Mr. McLure started clerking in a general store, but after working for a short time, took a course in the Prince of Wales College, graduating with a teacher's certificate. He taught school for

a few years and then went into commercial life. For six years, he had charge of the Men's Outfitters store, but later made a change to a wholesale trade, catering to the merchants of P.E.I. Mr. McLure is a gentleman of quiet manner, pleasing address and sound judgment.

The Retailer and Sporting Shoes

(Continued from Page 22)

added drawing power which your store would possess in the way of attracting the younger trade of the town. This is no light advantage for any dealer to have. If he has what the young folks are after, they will patronize his place every time, where they would otherwise be as liable as not to purchase at some other shoe store, or at the athletic outfitter's. Dress a window every little while, frequently in the more appropriate seasons, and see the young folks, and for that matter, the older heads too, stop and examine them closely. These days, everyone is thinking of hot weather comforts, and a bright, well dressed display of outing goods will strike the chord in them, which you are trying to reach, just the same as luscious appearing pie on a window sill appeals to a passing tramp. They will not only sell themselves, but will aid as feeders to regular sales.

Dress reasonable windows of this nature. When the holiday season is beginning, think out a scheme for a display of holiday footwear. Showcards will enable you to explain the merits of the showing. Talk along the lines of desirability of comfort during hot weather, seasonable footwear, fresh appearance which a pair of white canvas shoes lend on a summer day, and other such readers which, backed up by a good display, cannot help but sell your stock.

Don't Understock the Department

This is a point which you must consider seriously. Tables are given which will help you to a considerable degree, but you must be your own judge as to what lines you will sell best. Many dealers will find that one line will have a strong call in their neighborhood, such as lacrosse or running shoes, whereas, only half that call will be made for tennis shoes. A shoeman in some other neighborhood will find conditions reversed, and his chief call will be for a tennis shoe or some other article of footgear, whereas a small call only will be felt for lacrosse or running shoes. Then, in your own district the big call may be for children's goods. So, you will be able to judge from past experience, what types will sell more strongly than others at your stand. But, what ever you decide, be careful that you do not understock your department, for, if you do, you might as well give it up as a bad job right away, and be finished with it. It is bound to be just as harmful to your best interests as lack of proper variety would be in the more standard lines which you sell to your regular patrons.

Letting the People Know

Advertise, not only through your window display space, but also through every other means in your power. Use the interior of the store as a source of advertising. Most shoe stores nowadays have a couple of silent salesmen showcases placed near the entrance, and these will be found invaluable in advertising any lines which a proprietor may desire to feature. They are very often one of his main assets when any new line is being given special attention. In a Montreal store, a whole showcase is given over to the display of sporting shoes alone. This makes a very fine display, and it attracts the eye instantly on entering. If one of these cases is not convenient, exhibits can be made at other points throughout the store. Be sure, however, that you make your display seasonable. A showing of skating boots and skates is not conducive to more profits, when made in June. Neither is a display of canvas outing shoes likely to increase your turnover, when made in December. When the warm weather prevails, make warm weather displays, and when the frost king arrives, do your best to make an attractive showing of Winter goods.

Many shoemen complain of the annual hold-ups against which they are helpless, in the shape of donations for Sunday School and church picnics and outings. With your sporting

goods department well stocked, you can turn these outings to your own advantage by advertising strongly before they take place. When solicited, you can offer prizes in the shape of tennis or running shoes. Make a window display, and point out your shoes as a necessity with the picknickers if they are anxious to enjoy themselves. The prizes you are given can be shown also in a prominent place in the window. By following up this idea, you can make the picnic period a time that you will look forward to, instead of dreading it, and looking on it as a "hold-up" proposition.

Above all, don't tackle the new venture in a half hearted fashion. If you do, you are certain to fail. Rather go at it tooth and nail. Let people know that you are out with something new that is to their advantage. A large white cheesecloth or canvas sign over the front of your establishment, announcing your new department and the value you are prepared to give, will not do any harm. Make your displays more than barely presentable. At the start, you can decorate appropriately that section of the store given over to sporting goods. Tell your customers of your new venture. If you are doing something for their convenience, they will surely be interested. Use your brains to advantage, and work everything you can to your advantage. Needless to mention the newspapers and circular advertising, if you have something to tell your patrons, these are the best methods you have of informing them. Nothing will help you as much as an attractive booklet dealing with sporting goods alone, particularly at the holiday season, and now, during the hot months.

Learn Why He Does Not Buy

Mr. Hugh Chalmers, who is a very good example of salesmanship, condenses thus some good sound counsel to those who undertake to sell and want to sell and must sell, yet somehow come up against an obstacle which they are not quite able to overcome or even to understand, says an exchange.

"If a man does not buy from you, make every effort to learn his real reason for not buying. A lot of people who ought to be buyers will not sign the order and will give you a lot of so-called reasons. They will say they can't afford it; they don't need it; they want to look around. These are only excuses; they are not reasons. Try to find out the real reason why a man won't buy, and then you can approach him along that line, and in nine cases out of ten you will be able to sell him.

"I have often been asked which is the better way to sell goods—on a salary or on a commission. I don't think that it makes much difference. After all, men are paid their salaries in proportion to the amount of goods they sell, so in the final analysis they are all working on a commission basis.

"It has been my experience that successful salesmanship is nine-tenths man and one-tenth territory. After all, territories are pretty much alike. A real salesman will sell his goods wherever the people speak the same language that he does. I have known of certain territories in which one man had been a flat failure and in which another man was a big success. If you have the right goods and are the right man you can sell your goods anywhere that people can understand you.

"Never leave business to look for business. We have all of us been out in the woods and we know that the grass always looks greenest just beyond. Yet when you get to the green spot it is no better and perhaps not as good as the place you have left. The same thing applies to salesmanship. Business is just as good where you are as it is in the next town. You have to go after business anywhere, so go after it where you are and don't leave until you have gotten all of the business."

Finds an Attractive Store Front Excellent Investment

How a Shoe Worker Started in the Repair Line, Developed Business, Added Equipment, Enlarged His Shop, and Branched Out as a Retailer—Latest Move in New Exterior to Premises Has Brought Good Returns

Four years ago this month George Warriner started a small shoe repair shop at 1243 Bloor street west, Toronto. A short time after he added a twelve foot polishing and finishing outfit supplied by the United Shoe Machinery Co., and a little over a year later put in a stitching machine. Matters ran along for another year with his trade constantly growing, and in August, 1912, he added a stock of men's shoes. This was soon followed by a few lines for women, which have since been greatly increased. During the past few weeks Mr. Warriner has had erected at the rear of his shop an extension to which the repair branch has been removed, and last month he completed an attractive new front and added several feet to the floor area of his premises. The accompanying illustration affords a good idea of the attractive character and appearance of the exterior.

The old front contained a single window and the new one has double display windows with receding entrance. The width is eighteen feet all told and each window is three feet wide at the sidewalk, while the side panes of plate glass are

seven and half feet. The entrance is nine feet wide and converges to an oak door three feet wide. The plate glass so held in position by brass standards. The base of the exterior is solid quarter cut oak and the flooring in the windows is for the same material. The ceiling is paneled in oak, while the sides are fitted with mirrors with panels of beaver board above. At the back are paneled oak doors surmounted by glass. Each window is of the show case type, being about six feet in height, and lighted by seven, forty candle power Tungsten lights. The material and labor on the front cost about four hundred dollars, and, as a result of the pleasing change, Mr. Warriner reports a big increase in trade demonstrating that new and up-to-date fronts are a good investment for any retailer. Mr. Warriner's shop is forty feet deep and is nicely arranged. He carries the best lines and gives full value. Connected with the shoe trade for seventeen years he spent several years in the lasting rooms of the J. D. King Co., and the W. B. Hamilton Shoe Co., Toronto, the Weston Shoe Co., Campbellford, and the Walker-Parker Co,

A PLEASING AND ATTRACTIVE FRONT OF A BLOOR ST. SHOE DEALER AND REPAIR MAN, TORONTO

Toronto, with whom he remained nine years. By sending out personal letters to the people in the Northwestern section of Toronto, having work ready when promised, and making known the fact that he would call for and deliver all jobs, he got off to a good start. He grades his prices on the quality of stock used in bottoming work and by talking quality repairs has developed a paying trade. During the busy season he employs three men in his repair department, and since putting in a stock of shoes finds that the repair end has in no way suffered. He believes that one branch of the trade attracts the other and that they work well together, each, as it were, assisting the other. Given a right location, and backed up by good work and splendid service, the progress of Mr. Warriner shows what can be accomplished in the retail and repair line within four short years. There are many such opportunities in Canadian towns to-day.

Company Had Splendid Year

Despite the financial depression, the directors of the R. B. Johnston Co., shoe manufacturers of Port Coquitlam, B.C., have declared a stock dividend for the fiscal year ending March 31 of 11½ per cent. and while this surplus is not to be paid in cash, the share holders will be given extra stock for the amount of the increase. General satisfaction is expressed by the Port officials at the splendid showing made by the company in the first year of its existence, especially in view of the fact that the capital involved is practically all locally subscribed. Shares in the concern are now held at \$1.25. John F. Foster, Secy.-Treas., states that the increase in the business during the past three months is almost 25 per cent.

R. B. JOHNSTON, PORT COQUITLAM, B.C.

and with good connections established on the Grand Trunk lines east from Prince Rupert, and through the Fort George country, he is confident that a further increase will be noted shortly. Through the Boundary country and also in the Crow's Nest through the Kootenays, the boot with the big "J" brand is becoming more and more favorably known and this year the company are contracting for about 1000 pairs of boots with the Provincial authorities for consignment to the Mental Hospitals at Essondale and New Westminster. The company specialize in the manufacture of loggers' and miners' boots, and additional machinery will soon be installed. R. B. Johnston is President and manager of the company and the board of directors are Mayor J. R. McKenzie, R. Martin, R. C. Galer, J. Rowland, D. Nicks and J. F. Foster,

Shoeman Who "Came Back"

One of the progressive shoe retailers in the province of Quebec is Fred J. Argall. He has been in his present business in Three Rivers for over nine years, and has built up

INTERIOR OF THE ARGALL STORE, THREE RIVERS

a large and profitable trade. About three years after he started, a disastrous fire visited the city and swept away many business premises. Mr. Argall was a sufferer to the extent of several thousand dollars, losing his entire capital. Four days after the conflagration he, Phoenix-like, was doing business and selling new goods. Herein is afforded an indication of the enterprise and go-ahead spirit of the man. He never allows the grass to grow under his feet. For seventeen months he did business in a little rough, one-storey structure. Meanwhile he was having a splendid new store built for him, and it possesses one of the most attractive fronts of any similar establishment in the province. The display windows are modern and artistic in every respect. Mr. Argall believes in effective publicity, not only in the matter of window trims, but in inviting premises as well. His new shoe house is sixty feet in length and twenty-two in width, and three storeys high with basement. Over the front is a large boot fitted with fifty electric flashlights. This brilliant sign overhanging the sidewalk attracts attention on all sides.

Mr. Argall is a firm believer in Canadian made goods, and handles them exclusively, for both the feet and hands, as he deals in gloves, mitts, etc., as well as covering for the feet. "I find that I can satisfy every demand with well made and stylish Canadian products, and I do not need to go across the border to obtain what I want. I also run a good repair shop and find the same very profitable, both in itself and as a trade puller," he added.

"You ask me how I get rid of odds and ends and whether I ever hold bargain sales. I may say that I have never had a reduction or clearance sale, as I can always get rid of the out-of-date lines. I have a very mixed trade, and have to carry ranges to suit all classes of people—the city folk, the country cousin, the bushwacker and the river driver. I find that it pays to be frank and courteous to all. I make no distinction whatever. By sizing up a customer and using a little discretion one can always get rid of old styles. I do not believe in duplicity or any two-handed tactics. When I am showing a shoe that is out of style, I, of course, do not take particular pains to emphasize this feature of it, but, if I am asked if this is a little behind the times, I say "yes," and tell the customer frankly that we are selling it at a reduced cost for this very reason. I find that it pays to be open and above board. One should be honest, not only in the matter of handling reliable goods, but in every statement made regarding the wares that he disposes of. I advertise quite freely and find that it pays. I never try to mislead a customer in any way, and to these facts I attribute any measure of success with which I have met."

AMONG THE SHOE MEN.

J. Klippert has started a shoemaking business in Prussia, Sask.

The Union Shoe Co., Winnipeg, has sold out to F. Wolch.

Graban & Ridler have opened a shoe store in Portage la Prairie.

J. Fisher, boot repairer, has commenced business in Loughheed, Alta.

H. G. Middleton, of Winnipeg, was in Montreal and Quebec this week.

C. J. Clapp, shoe dealer, of Picton, Ont., has sold out to Spurgeon & Co.

The Western Tire and Vulcanizing Co. has begun business in Edmonton.

P. J. Hogan, U. S. M. Co. of Canada, spent a few days in Quebec recently.

C. C. Begg, Collinwood, was in Toronto this week calling upon the trade.

Everybody's Shoe Store, in Brampton, Ont., was damaged by fire recently.

Reg. Smardon, of the Smardon Shoe Co., Montreal, was in Toronto last week.

J. Hamilton, shoe repairer, 563 Logan avenue, Toronto, has sold out to P. Pycroft.

C. Adelman, formerly of Sault Ste. Marie, has started a new shoe store in Thorold.

The Metropolitan Shoe Co., dealers in wholesale shoes, Montreal, have recently registered.

The Parliament Shoe Repair, 462 Parliament street, Toronto, has sold out to J. L. Weir.

J. M. Stobo, shoe manufacturer, of Quebec, spent a few days in Toronto last week on business.

James Ramsay, of James Ramsay & Co., Edmonton, is visiting the larger Eastern shoe centres.

Jas. F. Clark, of Clark Bros., St. Stephen, N.B., was a visitor to Montreal during the past week.

W. G. Damer, of F. J. Weston & Sons, Toronto, is covering Western Canada on his usual Fall selling trip.

E. J. Coldwell, of Lynn Last Co., Lynn, Mass., was in Toronto last week calling upon shoe manufacturers.

S. D. Wilson, buyer of the Hudson Bay Co., Vancouver branch, was in Montreal, Quebec and Toronto recently.

Pringle, Stark & Co., of Huntingdon, Que., have recently moved into their handsome and well equipped new block.

A. H. Randall has removed his repair shop from Malone's to the rear of the Parott Shoe Store in Moose Jaw.

C. A. Davies, of Blachford, Davies & Co., Toronto, was ill for several days with the grip, but is able to be around again.

J. S. King, of the Relindo Shoe Co., Toronto, was a recent visitor to Boston and other Eastern shoe centres on business.

C. A. Trayers, of Ames-Holden-McCready, Limited, foreman heeling room, No. 2 factory, is spending a few days in Boston.

Geo. Ryan, vice-president, and Geo. Barrett, buyer, of Thos. Ryan & Co., Winnipeg, were in Montreal and Toronto last week.

The corporate name of the Winn Company, Limited, of Perth, Ont., has been changed under the provisions of the

Ontario Companies' Act to the Perth Shoe Company, Limited.

The capital stock of the Edmonton Leather and Shoe Co., Limited, Edmonton South, has been increased to \$150,000.

The U. S. M. Co., Montreal, have installed a Goodyear shoe repair outfit in the establishment of M. Grandchamps, Joliette, Que.

A winding-up order has been granted in the case of the United Co-operative Stores, Limited, of Montreal, who handled shoes.

A. Meyers, of the Meyers Shoe Co., Montreal, was in Toronto this week on his return from a business trip to Winnipeg.

The United Shoe Machinery Co. are placing extensively in Quebec district, pulling-over, lasting and heeling machinery.

John Hellyar, the veteran shoe retailer, of Bowmanville, Ont., has retired from the shoe business, having sold out to Fred Knox.

A winding-up order has been applied for in the Kreutziger Co., Limited, of Palmerston, manufacturers of trunks and leather goods.

D. Lorne McGibbon, of Montreal, who has recovered from seven weeks illness with scarlet fever was in Toronto last week on business.

Hon. E. J. Davis, of the Davis Leather Co., Newmarket, Ont., has returned from a business trip to Boston and other eastern leather centres.

E. P. Mullarky, superintendent of the Wm. A. Marsh Co., of Quebec, was in Toronto this week on his way to Boston and other centres.

O. Vanier, foreman of finishing room, Ames-Holden-McCready, Limited, No. 2 factory, Montreal, has resigned and returned to Haverhill.

Geo. P. Balfre, Canadian manager of the Chicago Tanning Co., Montreal, called in Toronto this week on his way to the head office in Chicago.

H. H. Lightford, general manager of the Perth Shoe Co., Perth, Ont., spent a couple of days in Montreal last week on his return from Boston.

The premises of the Sommerman Shoe Co., 182 St. Catherine street west, Montreal, was broken into recently and several pairs of shoes stolen.

Fred. Smaile, at present with Malone's Shoe Store, is leaving Moose Jaw for Brandon to take charge of Nation & Shewen's new shoe department.

The work of installing the machinery in the factory of the Cimon Shoe Co., at St. Jerome, Que., has commenced and is being proceeded with rapidly.

No trace has yet been found of M. P. Johnston, shoe dealer, of St. Thomas, who disappeared about five weeks ago and who has temporarily lost his memory.

J. K. Rose, of Toronto, who represents Rice & Hutchins, Inc., has returned from a two months' business trip through the Maritime Provinces. He reports trade as very fair.

Alex. Chisholm, shoe retailer, West Toronto, who is a former President of the City Boot and Shoe Section of the Retail Merchants' Association, has purchased a farm at Myrtle, Ont., which is about thirty miles east of Toronto.

Mr. Chisholm will spend the summer months there, traveling back and forth to business.

Joseph King, of King Bros. Co., Whitby, and wife have gone on a holiday trip to Detroit, Chicago, Indianapolis, Winnipeg and other centres.

Arthur Billeliffe, general representative of F. W. Whiteher & Co., Boston, is visiting the larger Canadian centres in the interests of his concern.

H. J. Cote, foreman of lasting department, Ames-Holden-McCready, Limited, No. 2 factory, Montreal, has resigned. He has gone home to Boston.

O. E. Perrault has accepted a position as window dresser with Geo. G. Gales & Co., Montreal. He was formerly with Thomas Dussault, Montreal.

B. D. Menzies, of the United Shoe Dealers, Sudbury, and H. D. Wing, of the United Shoe Dealers, Parry Sound, were in Toronto last week on business.

G. Quesnel, formerly window dresser of the old Fogarty Shoe Store, Montreal, was recently appointed publicity manager of the Lyon Shoe Store, Montreal.

Harry Dorson, for some time past stitching room foreman of the Relindo Shoe Co., Toronto, has taken a position with the MacPherson Shoe Co., of Hamilton, Ont.

The place of J. W. McConnell, who retired from the Ames-Holden-McCready Board, Montreal, some time ago, is being taken by Senator Nathaniel Curry, of Amherst, N.S.

H. L. Geene, of Ottawa, Eastern Ontario representative of Garside & White, Toronto, with which firm he has been nineteen years, spent the past week in Toronto on business.

G. J. Scott, Western representative of P. Jacobi, shoe store supplies, 5 Wellington street east, Toronto, has returned from an extended business trip throughout the Canadian West.

A permit has been issued for a new Hudson's Bay company departmental store in Vancouver. The cost of the structure will be in the neighborhood of half a million dollars.

The Relindo Shoe Co., Toronto, has started upon the Fall run and all machines in the factory are now operated by electricity, several motors having been installed throughout the plant.

Samuel G. Amero, manager of the London, Ont., branch of the Kaufman Rubber Co., was in Toronto this week. He reports having had a very satisfactory season in rubber footwear orders.

J. S. Ashworth, of Toronto, Canadian manager for Sir H. W. Trickett, Limited, Waterfoot, England, accompanied by his wife and child, is spending a few weeks in the Old Country.

E. J. Smith, who some years ago was on the traveling staff of Beal Bros., Toronto, has taken a position with that firm and is now covering Ontario north of the main line of the Grand Trunk.

The partnership in the Apex Shoe Co., Dolly Vardon Shoe Co. and Foot-Rite Shoe Co., Montreal, according to Dun's report, has been dissolved, and R. Locke is continuing the business under the same style.

The Granby Rubber Co. have closed down their works in Granby, Que., and the question of enlarging the plant will be decided at an early date. It is said that Berlin is making a big bid to get the factory.

Shoe conditions in Montreal and Quebec remain quiet, although several manufacturers state they are doing considerable sorting. Some also say that things have brightened up a bit during the last couple of weeks.

E. F. Leonard, who has been superintendent of the Slater Shoe Co., Montreal, for the past three years and is the President of the Superintendents' and Foremen's Association, Montreal, is leaving his present position early next

month. He will likely spend the summer at his home in Allerton, Mass. He is a brother of D. A. Leonard, manager of the Slater Boot Shop, Toronto.

William McLean, leather dealer and harnessmaker, one of the pioneer merchants of Palmerston, died after a recent illness that affected his heart. He was alderman on several occasions. A wife and four sons survive.

H. W. Roberts, one of the Western Canada representatives of the W. B. Hamilton Shoe Co., Toronto, was taken ill on his Western trip with pneumonia and is now at Filmore, Sask. He is getting along favorably.

The Public Benefit Shoe Co., 210 St. Lawrence Boulevard, Montreal, have purchased the entire stock of the Cut-Rate American Shoe Co., 289 Notre Dame street west, Montreal, and removed it to the store of the former.

Lieut. W. A. Moore, of Beardmore & Co., Toronto, who is connected with the 9th Mississauga Hourse, was recently gazetted as Captain. His many friends both in leather and military circles are extending congratulations.

W. P. Francis has taken over the active management of the John Ritchie Co., Quebec, factory. Mr. Francis is a man of wide experience in the shoe business and was formerly with the Emerson Shoe Co., Brockton, Mass.

Geo. Williams, of D. D. Hawthorne & Co., Toronto, who has been in the General Hospital for some time, has been removed to his home at 147 Gore Vale avenue, Toronto. Mr. Williams is making rapid progress toward recovery.

C. B. Thomas, representing Woodard & Wright, last manufacturers, Campello, Mass., was in Toronto and other centres during the past week, calling upon shoe manufacturers with several new lasts for next Spring's trade.

The shoe store at 11 Market street, Hamilton, conducted by the late P. Arland, will be continued under the management of Mrs. Arland, who will, at the end of the month, remove to stock to a new shop at 11 McNab street north.

Mr. D. Lorne McGibbon and three other directors of Goodwins, Limited, Montreal, having retired, Mr. J. W. McConnell is now president of the company, he and his associates owning the greater portion of the stock.

J. S. Ritchie, formerly superintendent of John Ritchie Co., Limited, Quebec, was in Boston recently. Mr. Ritchie is planning to sail from New York for Brazil, where he is to enter the shoe manufacturing business, it is rumored.

Waterbury & Rising, Limited, have purchased the James V. Russell building on Main street, St. John, N.B., and have commenced a great sale in which the bankrupt stock of Daniel Monahan, bought last winter, is also being cleared out.

Messrs. Berube and Dupre, of the U. S. M. Co., have returned to Montreal after setting up complete equipment for the manufacture of women's high-grade McKays in the Clark factory, St. Stephen, N. B. They report the outlook there as very bright.

A. L. Baldwin, who has nearly completed his Western trip for the U. S. M. Co. of Canada, reports conditions as exceedingly dull, although he has recently placed complete Goodyear shoe repair outfits in Winnipeg, Saskatoon, Vancouver and Victoria.

A. B. Begg & Co., of Parry Sound, Ont., shoe dealers, have removed to Thorold, where they have opened up a fine store and are doing an encouraging trade. Kenny & Co. have taken the store in Parry Sound which has been vacated by Begg & Co.

Jobbers report that the shoe trade, particularly in the sorting line, was very good during the month of April and in some instances returns were ahead of the corresponding month last year. The representatives of various jobbing houses are now out with Fall samples. During the early portion of May business was regarded as rather quiet in the

sorting lines owing to the unseasonable weather and backward season. Warmer days would prove a great incentive to all lines of Spring and Summer goods.

M. C. Boulette, of Brockton, Mass., has opened a factory in the Dando Block, Ainslie street, Galt, for the purpose of manufacturing shoe uppers. He reports that he has already received a large contract from Getty & Scott, Limited, for several hundred pairs a day.

Charles H. North, shoe retailer, of Picton, son of J. C. North, who died a few weeks ago, was married on April 29th to Miss Eva Fralick, daughter of A. J. Fralick, of that town. The ceremony was performed by Rev. W. H. Elmsley, pastor of the First Methodist Church.

Following the example of Regina and Moose Jaw, the retail merchants of Prince Albert are supporting a motion that the City Council be asked to submit a bylaw to the electors providing that the clocks of the city from the end of May to the end of October be put forward one hour.

A movement is on foot among the clerks in all branches of business in Edmonton to establish a rule during the Summer months whereby all business places will close their doors at six o'clock every Saturday instead of having the half holiday on Wednesday as heretofore has been the custom.

J. A. Walker, of the Walker-Parker Co., who spent several days in Boston, Lynn, Haverhill and other cities has returned to Toronto. He reports that the manufacturers of women's shoes in these centres are not rushed with business, and the majority of the factories are only operating part time.

A new industry which has been secured for Regina is the Western Tire and Rubber Goods Co. Within the next two months a factory will be erected, the proposed cost of which is \$175,000. A company has been capitalized at \$1,000,000 and several local men are interested. The factory will employ from 300 to 500 hands.

On the occasion of the recent visit of the Duke of Connaught and Princess Patricia to Chatham, Ont., thousands joined in the welcome. Mayor McCorvie and Ald. Geo. W. Cowan rode in the first car of honor with the distinguished guests. Mr. Cowan, who is a former mayor of Chatham, is one of Ontario's leading shoe retailers.

Christie Grant Co., Limited, is the name of a new mail order house that has been recently organized. It is officered and manned very largely by ex-employees of the T. Eaton Co., Limited, and substantially backed by some of the most prominent financial men of Winnipeg.

Chester McLure, of the Charlottetown Rubber Co., Charlottetown, P.E.I., O. J. Killam, of Truro, N.S., who is

the representative in the Maritime Provinces for the Kaufman Rubber Co., and Charles Major, who is in charge of the Fredericton branch of the same company, under Mr. Killam, were in Toronto this week on business and also paid a visit to the factory in Berlin.

It is proposed to organize and establish a Great Northern shoe factory at North Edmonton for the manufacturing of shoes of various kinds. The supply of raw material is plentiful and right at hand. The Great Northern Tannery can make the leather from the hides of the animals killed at the packing plants of the Swift Canadian and P. Burns Co., within sight of the tannery.

At the recent Horse Show in Toronto Lieut. K. D. Marlatt won the Governor-General's cup in the military class for the best performance over the jumps. Lieut. Marlatt is a son of C. G. Marlatt, Oakville, vice-chairman Tanners' Section of the Toronto Board of Trade. This is the first time that the Governor-General's cup has been won by the representative of any corps outside of Ottawa.

Fire broke out in the third storey of the Sadler-Haworth Leather Belting Company, Montreal, a few days ago and completely gutted the top floor of the three-storey brick building before it was extinguished. There was an hour of stiff fighting, amid dense smoke, and at times it seemed as if the entire structure was doomed. The stock, for the building is used chiefly as a warehouse, was practically ruined.

The petition, which is being circulated under the direction of the Retail Merchants' Association, Toronto, asking that the date for cash payment of rubbers be extended from November 10th to January 10th, is being largely signed and will be presented to the rubber companies in a few days. T. H. Bigwood, president of the boot and shoe section, stated this week that he anticipated a favorable reply from the companies.

A big touring car crashed into a small bridge over the ditch at the side of Yonge street, by the North Toronto police station, one day recently, and landed in the ditch a total wreck. The car was owned and driven by Griffith B. Clarke, of A. R. Clarke & Co., leather manufacturers, Toronto, who, with two companions, escaped injury. The front wheels were torn from the car, the front axle broken, and the engine badly damaged.

Bachrack Bros., who recently vacated their store at the corner of Albert and Yonge streets, Toronto, will soon occupy their new premises at 234 Yonge street. There will be three floors and the basement which will be used for a bargain department, there being numerous tables. The

THREE OF THE NEW FALL OFFERINGS OF THE BLACHFORD SHOE MFG. CO., TORONTO, SHOWING LATEST CREATIONS ON THE "PATRICIAN" AND "GRECIAN" LASTS, WITH FABRIC TOPS AND BROCADE QUARTERS, WITH CUBAN AND CUBAN-LOUIS HEELS

SOME NEW THINGS IN SUMMER FOOT TOGGERY

Here are three original styles in shoes. The one on the left is an outdoor shoe made of white nubuck leather, with black suede calf outside trimmings, including tip, foxing, outside lace stay and instep saddle strap, shown by the Watson Shoe Co., of Lynn.

The centre illustration is a tinkle novelty pump, patent circular vamp, long forepart, narrow recede toe last, gray brocade quarter with wood heel covered to match, upright

ornament of rhinestone with small bell suspended from centre of ornament. Shown by Hazen B. Goodrich, of Haverhill.

The shoe on the right is a woman's white buck tennis, with perforated vamp, tip, ball strap and lace stay, white sole leather and new wedge heel. It is displayed by a leading New York retail firm. Each season brings forth many novelties in the shoe arena.

main floor will be devoted to men's and women's shoes selling from \$3.50 to \$12, while the first floor up will be given over to the misses' and children's department. The fittings will be very neat and attractive and the opera chairs for the accommodation of customers will be comfortable and nicely arranged.

L. W. Hanson, of Cincinnati, Ohio, who has been fourteen years with the United Shoe Machinery Co., has been appointed manager of the Toronto office of the company and entered upon his new work last week. Alfred Haire, who has been manager for the past seven years, has been given other duties and will still be connected with the Toronto office. Additions to the staff have also been made, in both the mechanical and clerical branches.

The death took place recently in Berlin, Ont., of Mr. Edward Roos, after an illness of three weeks, suffering from gangrene poisoning. Two weeks ago his right leg was amputated at the knee. The deceased was in his sixty-seventh year, and was a native of Preston. He had been engaged in the felt manufacturing business for many years in South Bend, Indiana, and moved to Berlin five years ago. He is survived by his wife, one son and four daughters.

A. Brandon, of Brandon Shoe Co., Brantford, reports that Fall orders are keeping pace with those of this time last year and prospects look bright for the balance of season. He believes retailers should sort up well and keep their shelves well filled as leather is still advancing and hides are scarce and high in price. The Brandon Shoe Co. have just finished stock-taking and started fully on their Fall run. Last year's business was the largest in the history of the firm.

A special edition was recently issued by the Berlin News-Record in which the various industries of that enterprising city were referred to at considerable length. Among the illustrations appeared cuts of A. J. Kimmel, of the Canadian Consolidated Felt; Harry D. McKellar, of the McKellar Shoe Co.; N. B. Detwiler, of the G. V. Oberholtzer Co.; Chas. A. Ahrens, of Chas. A. Ahrens, Limited; Geo. Rumpel, and many others prominently identified with the shoe and leather industry. Appreciative references were made

to the McKellar Shoe Co., the Ahrens Shoe Factory, Berlin Trunk and Bag Co., J. Hessenauer & Sons' shoe store, and other industrial and mercantile establishments. The edition was certainly a credit to the publishers and ably reflected the energy and progressiveness of Berlin.

Clarke & Clarke, leather manufacturers, have removed their Toronto warehouse from 52 Bay street to larger and more convenient premises at number 63 Bay street. In their new warehouse the company will carry a full range of colored and black sheepskins and skivers for all trades using these leathers, as well as many other kinds for the upholstering, traveling goods, bookbinding and other requirements. Clarke & Clarke have recently added a large amount of new equipment to their plant.

Caught in the middle of the G.T.R. bridge, George Staton, an employe of the Weston Shoe Company, Campbellford, was hurled to his death in the Trent River a few days ago by being struck by a freight train. Mr. Staton who had only recently gone to Campbellford from Toronto, was walking over the track from the factory to his boarding house to save a few minutes' time. He had got well on the bridge when the train rushed along and struck him before it could stop, throwing him into the river.

A correspondent of the London Times writes: "It is somewhat curious that there is still a widespread belief in the danger of the production of plantation rubber outstripping the consumers' demands. There seems to be in reality no such danger, at least until the present planted area has been largely increased and the increased area brought into bearing. And as no large increase in planting is at present taking place, or likely to take place for a long time to come, this question is practically shelved for the next ten years."

The intake of raw material at the Great Northern Tannery includes hides from the nearby packing plants, tallow from the local plants, lime from the lime kilns of Alberta, salt from the East (sometimes yet perhaps from the undeveloped north country), and chrome from the United States. A carload of chrome is used in tanning about 3,000 hides. The output of the Great Northern Tannery at Edmonton is partially used by the Great Northern Harness Co. The

balance is shipped to harnessmakers, shoemakers, and other users of leather in Alberta, British Columbia, Saskatchewan, Manitoba and even as far as Toronto and Chicago.

Beardmore & Co., leather manufacturers, Toronto, have taken space in the Mechanics' Building and will make a fine exhibit of sole leather at the big seventh National Shoe and Leather Market Fair in Boston from July 8th to 15th. The special Canadian Day will be observed on Monday, July 13th, and it is expected that the number of visitors from Canada will be very large. Special arrangements are being made for their entertainment. The Market Fair this year promises to be the greatest attraction and success ever held in its line.

A.R. Kaufman, manager of the Kaufman Rubber Co., Berlin, and Mrs. Kaufman, sailed from Boston last week on a trip to Europe. After landing at Naples they intend visiting most of the European countries, and also England, Scotland and Ireland, returning home about the end of July. While the trip is partly one of pleasure, Mr. Kaufman intends to see some of the larger European houses from whom the firm buy supplies, and thus his visit will be one of benefit to the company as well as of pleasure to Mrs. Kaufman and himself.

Newspaper advertising was endorsed by the Retail Shoe Dealers' Association at a meeting held in Philadelphia, Pa., recently. The speakers concurred in the idea that advertising in a reputable paper gives dignity to their trade. This, they thought, was an important factor and should be encouraged at all costs. They cited instances of businesses all over the country that had largely been built up by advertising incessantly. It is, they agreed, the sure rock of modern commercialism, for the greatest business houses in the country have adopted this method of trade improvement all over the land.

Carl Freudenberg and his son Victor, of Weinheim, Germany, were in Toronto last week on business with the Canadian representatives of the firm, C. Parsons & Son. This was the first visit of the great German tanner to Toronto. While here he was driven about the city by C. Parsons, sr., who is now in the eighty-sixth year of his age, being the oldest leather merchant in Canada. Mr. Freudenberg was greatly taken up with his visit to Canada and carries back with him to his immense industry a very favorable impression of the Dominion.

F. Blouin, corner Colomb and Nelson streets, Quebec, has resumed the manufacture of counters and will in future specialize in the raw hide fibre goods. It is intended to turn out a counter of the highest quality, and to give a guarantee that every pair will outwear the shoe. One of his chief motives, Mr. Blouin states, in resuming counter manufacturing, is to keep that trade in Canada. At the present time some of this business goes to American houses, when it could be much more easily secured by Canadian firms who can offer many advantages unobtainable when counters are purchased from across the border.

W. J. Heaven, Toronto, manager of the Anglo-Canadian Leather Co., has returned from an extended trip through the Maritime Provinces, going as far as Halifax. Business down East is rather quiet at present and many representatives of Western firms, owing to the good times which prevailed in the Maritime Provinces last season, have sent their representatives down there looking for orders. The result is that the merchants have been inundated with travelers. Mr. Heaven closed a large contract with the Amherst Boot and Shoe Co., of Amherst, for a supply of sole leather.

One of the most brutal murders ever committed in Quebec City was that on May 10th, when Miss Marie Blanche Dubois, age nineteen, was beaten to death with a

shoemaker's maul in the rear of the shoe store conducted by her and her brother. At about ten o'clock in the morning the bell at the private entrance was rung. Miss Dubois answered the summons and coming upstairs told her mother that there was a man who wished to change a pair of shoes. The young woman took the key to open a door from the private entrance to the store. As she did not return in half an hour her mother called for her. There was no reply and, on descending, the mother opened the door leading to the repair shop in the rear and found her daughter lying in a pool of blood. The left side of Miss Dubois' head behind the ear had been crushed in.

William Harris, founder of the Harris Abattoir Co., and one of the leading men identified with the live stock industry in Canada, died on May 11th in his 67th year, after an illness of several months. Prior to coming to Canada he learned his trade as a butcher in London, Eng., and shortly after arriving in Toronto he started a butcher's supply business. Some years later he engaged in the handling of live and dressed hogs and other live stock. Sixteen years ago he erected on Strachan avenue an up-to-date abattoir. This was operated by the company, which organization was known as the Harris Abattoir Co., Limited. The

A Shoemaker 104 Years Old

Joseph Mantell, of Toronto, who celebrated his 104th birthday this week by digging in his garden, is hale and hearty. He left London, Eng., in a sailing vessel seventy-seven years ago for Toronto and is a shoemaker by trade, retiring when he was 96. He is proud of the fact that he made a pair of boots for Sir Francis Bond Head, Lieutenant-Governor of Upper Canada, a trifle over 76 years ago. "Yes," he said, "I could have made a lot of money in real estate in those days. I was offered the block upon which

Eaton's now stands for \$30, and I could have got lots of land further out for nothing. However, I am not the only one who made mistakes in this respect," said Mr. Mantell, who is to-day a marvelous example of sturdy old age. Each day he cultivates his garden and grows his flowers and vegetables absolutely unaided. He reads the newspapers diligently, and has never used glasses.

firm recently established a large new plant in West Toronto. Mr. Harris was also a partner in the firm of W. Harris & Co., and a director of the William Davies Co. He was interested in farming and raised large quantities of live stock. A man who was honorable and upright to the core, he had a kindly disposition and possessed splendid business ability. He leaves a wife and family of nine children.

The contract has been let to the Lyall Mitchell Co. for a handsome new warehouse for the Ames-Holden-McCready company in Winnipeg, Man. It will cost \$100,000. The ground area of the building will be 99 x 132 feet, and it will be located at the southeast corner of Adelaide and McDermot avenues, in the Prairie Capital. The building will be erected of brick and stone, six storeys in height, and will be of mill construction. It will be equipped throughout with a sprinkler system.

The German Society in connection with the Shoe and Leather Fair is sending out at the present time a prospectus concerning the German Shoe and Leather Fair to be held in Leipzig, August 30th to September 2nd, 1914, which, as is known, is being arranged by the council of the town of Leipzig, and is in connection with the world renowned Leipzig Fall Sample Fair and Autumn Leather Fair. In former years the enterprise attained great success and many visitors were in attendance. The prospectus contains much useful information regarding the Fair, which, while advancing the interests of the inland trade particularly, serves also the demands of the export trade. The business office of the Germany Society in connection with the Shoe and Leather Fair is at 13-17 Senefelder street, Leipzig, Germany. It is expected by 1915 that great developments will be made, when the fine large rooms of the municipal exhibition hall will be at the disposal of the organizers of the exhibition.

SALE OF RUBBER SOLED SHOES

The lower price of crude rubber and the increased price of sole leather has apparently had a tendency to increase the use of rubber soles and heels by shoe manufacturers. A steadily increasing number of concerns are manufacturing these products, and added expenditure for advertising is also educating the public to ask for shoes made with them. Rubber soled shoes with leather insoles make ideal footwear for comfort, and with improved methods of manufacturing and lower costs of raw material, rubber soles and heels are now produced of a quality that gives reasonable service for the price.

A NEW HEEL FINISH

"A new heel finish for heels has made its appearance. It is called Louis Heel Finish by the manufacturer. Heels finished with it have the appearance of a celluloid covered wood heel. This finish is applied and the heel finished in the usual manner. The result is a heel of remarkable gloss and finish. Checked heels, scratches and other similar troubles are entirely obviated by this method," says an exchange. "The finish, when applied, is almost indestructible. Ordinary dents and scratches are impossible. This material is also waterproof. It will make absolutely no difference whether the heel is in temper or not when finished. It is made in various colors to match the color of forepart edges and uppers. The cost is about the same per case of shoes as the wax finish. With the new method of making Louis heels with the regular combination heel of leather and pulp, and using this finish, a heel can be put on cheap and medium priced shoes that rivals the wood heel in both beauty and wear, at a cost far below that of the wood heel. Several shoe manufacturers are using this finish with splendid results."

NEWSY NOTES FROM QUEBEC

J. Davis has taken charge of the fitting room in the John Ritchie Co.

The Rock Shoe Co. and Lachance & Tanguay are taking stock at present.

Jos. Chouinard, accountant for J. B. Drolet, Limited, has bought a fifteen horse power gasoline launch, which he will take to Lac Sargeant, where he spends the Summer months. The launch is one of the fastest that will be seen on the lake.

L. Letellier, sales manager of the F. F. Dalley Co., Hamilton, was in the city last week calling upon the trade.

E. A. Slee, Quebec representative of the Robson Leather Co., of Oshawa, has removed his sample room to number 61 St. Valiere street.

J. A. Steel, foreman of the cutting room of the Wm. A. Marsh Co., Limited, has resigned to take charge of the cutting room in the Solid Leather Shoe Co., at Preston.

Among those in town last week were: A. C. Parker, of Parker's Limited, Montreal, and G. W. Milzener, of Cotton Threads, Limited, Montreal.

W. A. Marsh, of the W. A. Marsh Co., Limited, who has been ill during the Winter, is rapidly recovering and was able to pay a visit to the factory last week. He was given a cordial reception by his employes as his presence was a complete surprise after such a long absence. Mr. Marsh has purchased a fine automobile and intends enjoying himself during the Summer.

NEW SOLE CHANNELING MACHINE

Practical, useful and simple is the sole channeling machine, "Bodo," which is being handled by C. Parsons & Son, 79 Front street east, Toronto. This machine is small and takes up very little space. Among the advantages which it possesses is that it cuts and opens the channel in one operation, and also that it channels the sole on or off the boot.

It is also instantly adjustable to channel any depth and takes any width of welt. The rotary gear action ensures smooth running and ease in rounding the toe. The machine can be fixed strongly to any table and has a screw to adjust the knife and is operated by a handle. Each machine is guaranteed to do excellent work and is taking splendidly with the trade.

HOW TO STIMULATE THE SHOE TRADE

What are the present trade conditions in New York City and other cities? Everyone asks how business is and it seems that everyone answers "rotten," writes A. A. Daoust.

But, after all, is business as bad as merchants make out it is. I think that, in a great many cases, people give this reply to derive sympathy or something else. I have found that after questioning some they will inform you that business is as good as last year at this time or a little better, but they declare that they should be doing a great deal more

WOMAN'S PATENT LEATHER, PLAIN RECEDING TOE, CLOTH UPPER, CUBAN-LOUIS HEEL. CARRIED IN STOCK BY D. D. HAWTHORNE & CO.

than they are. Quite true, it is only progressive to feel that you should be doing more than you are, but any dealer who is doing nearly as well as he was last year is fortunate. If most merchants did not lose their nerve so easily and begin to feel that nothing can be done to improve business, no doubt matters would be better, but simply because things are not just as they should be they fall asleep, just when it is more important than ever to do everything possible to stimulate trade. Everyone will admit that things are upset and conditions bad, but they can be altered and it is only by persevering that the state of affairs will improve.

These hard struggling times will accomplish a whole lot of good in spite of any harm they are doing. Everybody is a little spoiled by too much progress. The results generally are that when one is too successful he is usually careless in buying, advertising and managing. The consequences are very often that when a reverse comes he usually finds out his mistakes and eventually it teaches him a lesson.

Things are bad and have been bad, but the dealer is bound to see them improving very soon, and he is in good shape. He has been cleaning out his stock for the last year, he has cut down his running expenses as much as possible, and he has found out in lots of cases that he was spending too much money to run his business. He has probably also found out that although he was doing a whole lot of advertising it was not of the proper kind.

Hardships are not such a bad thing once in a while. They teach everyone something and a man should never feel so big that strenuous times cannot teach him anything, because we must all learn.

What is deplorable is how hard some are taking it. Some are so down in the mouth that they imagine that the end has come. They simply are waiting and doing nothing whatever to put a little ginger in business.

Things are bound to become good again, as it will be found that stocks are low. Merchants have been so careful in buying, they will have to buy more goods or close down. Something new must be had to brighten things up, and consequently the more footwear bought the more factories there

will be running, and money will start circulating as in the past.

One reason why business has been worse than it should have been is on account of the extreme weather which we have had. Weather such as prevailed in February and March was never known to improve any business.

So cheer up, Mr. Dealer, for you are not going to close up. Do a little thinking, advertise carefully, study your ads, make a thorough inspection of your stock—clean out anything you do not want; sell it at a sacrifice. It is better to do that than to keep the footwear. Realize your money; you can use it just now. There was never a better time to try to get cash, but do not fall asleep.

Study your windows; put forth special efforts to make them draw the people. Do your utmost. You have got to if you want to win, but whatever you do don't snooze. Good times are coming back. If your stock is nice and clean just imagine your shelves full of new things and business the same as formerly. It is bound to come. People will wear shoes. If they have been trying to make the old ones do, it will soon be time for all the old ones to be cast aside.

Styles as well as the times just now are very conservative, therefore you should not be stuck with your stock. Cheer up! The world is not upside down.

APPOINTED DISTRICT MANAGER

Hugo Wellein, of Winnipeg, has been promoted from the position of office manager for Canadian Consolidated Rubber Co. to that of district manager. He is well fitted both by experience and ability to successfully carry out his new duties, being a splendid executive head and having a practical knowledge of rubber footwear in all its branches. Mr. Wellein was born in Bridgeport, Ont., thirty-one years ago. At an early age he went with the Berlin Rubber Co. as errand boy. It was not long before he was at the books learning accounting and financing. In 1904 he

joined T. H. Rieder in the formation of the Merchants Rubber Co., being in charge of the office. Four years later he was appointed secretary-treasurer of the company, which position he held until 1910, when he was promoted to the general sales department of the head office of the Canadian Consolidated Rubber Co. in Montreal. A little over a year ago Mr. Wellein was made office manager of the Winnipeg division. His recent elevation to the post of district manager has been well and faithfully earned.

THE DIVERSITY IN HEEL STYLES

At no time, in the memory of the oldest shoemaker has there been such a diversity in heels. Among the many styles being shown this year are the Cuban Louis, spool, Quaker, kidney, half-Louis and the Cupid or heart heel, so-called, on account of its shape.

The invention of a machine for giving the Louis heel effect on the breast has made it possible to use the ordinary combination heel in the making of these various new styles.

This has been a great boon to the manufacturer of cheap and medium priced shoes as it makes it possible to put these new style heels on his shoes with but a small advance in the selling price.

The importance of style in footwear was never greater than it is at the present moment. The story of the lady

INTERIOR OF THE ATTRACTIVE INVICTUS BOOT SHOP,
146 PEEL ST., MONTREAL

who wanted the latest style hat, and was asked by the salesman to wait five minutes, as the style was going to change, will soon be appearing in the joke books about heels.

There have appeared over ten new styles of heels since the first of the year that the writer knows of, and possibly there may be several more this month.

LEATHER SITUATION AND OUTLOOK

Trading in the large leather centres of the East continues more or less spotty, and there is a lack of snap to business. The larger manufacturers of shoes appear to be fairly busy, but smaller ones are still complaining to some extent. However, it is gratifying to note that during the past week some of the trade have had a little better demand for their goods, and it is hoped the improvement will continue, says American Shoemaking.

Factories are not carrying any surplus stocks of leather on hand and are, therefore, steadily in the market for small lots, but, as a rule, no large quantities are being taken. These small sales total up to a fair aggregate from week to week and are ample to keep supplies of leather at a low ebb.

Desirable weights and grades are generally wanted and bring firm rates and there is no speculation in any end of the business. Quotations are all holding up strongly.

Scholl's Foot-Eazer

A practical, scientific appliance that instantly and permanently relieves tired, aching feet, weak ankles and other troubles caused by structural weaknesses of the feet. It is anatomically designed, and the self-adjusting, double-sliding spring feature supports the arch in nature-like, easy manner—gives a natural elasticity and springiness to the step—correctly relieves the foot muscles of all strain, and gives absolute rest to the muscles and nerves. It is adjustable to all feet and can be worn in any shoe unnoticeably or changed from one pair to another instantly

Retail price, \$2.00 a pair

SCHOLL'S BUNION REDUCER

Gives immediate relief for bunions or enlarged joints. Fits closely to the skin—excludes air—retains moisture and reduces the bunion by absorption. Scholl's Bunion Reducer is a shield made of the finest, purest rubber, very light, flexible and non-irritating to the most sensitive feet. Fits all feet perfectly—will not shift or bulge and does not require a larger shoe. Carried in three sizes, rights and lefts.

Retail Price 50c each, \$1.00 Per Pair.

Kant Krack Dainty Mode

RUBBERS

You Know the Kind of Service an Automobile Tire Gives---

How great are its wear resisting qualities—that's the kind of service embodied in the three famous brands of boots and lumbermen's—"Kant Krack," "Royal" and "Bull Dog."

By a Special New Process

these higher grade rubbers are vulcanized under pressure the same as an automobile tire. The component parts are thus brought together into one solid mass, thereby preventing porosity or blisters.

This new phase of manufacture, further demonstrates the marked superiority of these deservedly popular brands. That they cost no more than inferior makes, is but one of the many inducements for you to include them in your Fall rubber orders.

Ask your jobber's salesman to show you samples.

Shoe Cement Paste

"SPHINX" stands unique and without a rival in excellent qualities wanted by the shoe manufacturer

It is a quick, strong and clean adhesive, ready for use.

It absolutely takes the place of high-priced cements—on all kinds of linings, cloth or leather, such as vamps, side linings, stays, sock linings, etc.

It is flexible—when applied thin with a brush. Will fasten counters and toe pieces, tap soles, etc.

Best for sock linings, as they never loosen.

There is nothing made that is just as good.

"Altera" Embossing Machine

built by the

MOENUS MACHINE COMPANY, Frankfurt a.M., Germany

Another testimonial that
speaks volumes.

Newark, N.J., July 21st, 1913

MOENUS MACHINE COMPANY,
Frankfurt, a.M., Germany

Gentlemen,—

I am in receipt of your recent communication in reference to my large and small Altera Embossing Machines, and in reply wish to say, that the work they are turning out is exceeding my expectations, and I do not believe there is another machine in the market that can compete with them, and I can cheerfully recommend them to any one intending to do fine work.

Yours very truly,

(Signed) CHAS. NIEDER,

225-233 Emmett Street, Newark, N.J.

22-FOOT GOODYEAR SHOE REPAIRING OUTFIT

MODEL N

THIS Outfit represents the highest development in shoe repairing machinery, and meets every demand of modern shoe repairing. It embraces all the essential processes for making new shoes from old ones, giving the maximum of equipment and efficiency in the minimum space. The Outfit has the Goodyear Stitching Machine with all its improvements, including a new style steam generator which uses gas or gasolene for generating the steam, and operates automatically, thereby insuring a uniform heat for keeping the wax in proper condition and requiring little attention from the operator. The Edge Trimming Machine has the new feature of the two shafts, being operated by a single belt, and the cutter grinder is attached directly to the main shaft. This arrangement gives better results with less power.

The Buffing and Scouring Machine has a shaft 57 inches long and carries the following equipment:

- | | |
|--|-----------------------------------|
| 2 Split Bottom Buffing Rolls | 2 Flat X-Ray Heel Scouring Wheels |
| 2 "C" Shape X-Ray Heel Scouring Wheels | 1 Heel Breast Scouring Wheel |
| 1 Pin Wheel Pad Complete | |

A powerful Blower System removes the dust resulting from the trimming, buffing and scouring operations, and is designed to overcome certain objectionable features of other blowers.

The Finishing Machine has a 78 inches shaft which has all the necessary equipment for black or russet work:

- | | |
|--|--|
| 2 Corrugated Rubber Shank Finishing Wheels | 1 Corrugated Rubber Heel Finishing Wheel |
| 1 Corrugated Rubber Bottom Finishing Roll | 2 Shank and Bottom Brushes |
| 2 Heel Brushes | 1 Stitch Cleaning Brush |
| 1 Levelling Roll | 1 Bead and Wheel |

At the end of the Outfit is the Oscillating Edge Setting Machine which is fitted with union irons and in its motions duplicates hand workmen with quicker and better results.

Each of the machines is operated independently by a friction drive pulley, so that it is necessary to use only those machines which the operator may require. This feature means a saving of power.

All the machines are firmly mounted on legs and driven by a countershaft with carefully adjusted bearings, so that the Outfit runs with very little vibration, and is in every way most efficient.

FULL INFORMATION FURNISHED PROMPTLY ON REQUEST.

PROFITABLE because POPULAR

The dealer with an eye to future business, cannot afford to overlook the claims of the Doctors and the Professor shoes for a prominent place in his Fall Stock.

On past performances alone these lines merit recognition. The consistent high quality in conjunction with the remarkably low prices, have made them exceedingly popular with the average man.

And the average man is a customer whom it is both pleasant and profitable to serve.

Are these lines included in YOUR Fall Stock?

MONARCH, BRANDON and Dr. BRANDON SHOES

Famous Shoes for Men

What is Profit?

$$\frac{\text{Value}}{\text{Number of Lines}} + \text{Turnover} = \text{PROFIT}$$

The above brands give the maximum profit

Because They are the greatest values on the market. They are made in a factory where nothing but men's shoes are made. We couldn't offer you such exceptionally high values at the prices, if we didn't concentrate our efforts on this one line.

Because The "Monarch," "Brandon" and "Dr. Brandon" are made in a wide variety of attractive, sensible models. They cover the men's field so well that the requirements of this particular branch of your trade can be well catered for.

Because OUR 21 DAY SERVICE enables you to turn over your stock quickly and often.

Prove the profitableness of the "Monarch," "Brandon" and "Dr. Brandon" shoes by ordering a few sizes for stock.

Davis Vegchrome Leather

Retailers, Attention!

Davis Vegchrome Leather

Mr. Retailer, have you the Vegchrome Shoe on your shelves. If you haven't you ought to have, and if you have we venture to say you will soon require more.

Our Reasons are these:

Vegchrome Leather is particularly adapted to Farms, Mines and Woods use.

It is not effected by Barnyard Ammonia as straight chrome leather. The tannage is very soft, giving an Elk like feel.

Vegchrome is heavily stuffed with the best greases and therefore resists water splendidly

The boot made of this leather remains soft under all conditions.

It is the toughest of leathers and wears like iron.

We make it in colors and black.

Ask your jobber for the Vegchrome shoe or write us for information.

The "Doctors" Brings You the Trade of Particular Men

Every retailer with an eye to future business realizes the absolute necessity of taking care of the particular man's requirements. He knows that his business is well worth having.

The Doctors Antiseptic Shoe is made particularly for men of this type. It is a stylish, sensible shoe—one that can be worn in any kind of weather. Its antiseptic lining and middle sole of thermal asbestos keeps the foot at its natural temperature and does not hold the odors caused by perspiration. It is also perfectly waterproof.

For a bigger and more profitable shoe business, try an assortment.

How Leading Town Dealer Gets After Rural Trade

Makes Practical Use of the Parcel-Post System—Special Inducements to Customers Beyond Ten Mile Radius and Within Twenty Mile Zone—Guarantees Satisfaction or Refund Money—Program Plan Well Carried Out

Editor, SHOE AND LEATHER JOURNAL:

Dear Sir,—When the "Parcel Post" system was inaugurated it struck me that while the country shoe dealer might lose a little more through the "department stores" than formerly, that this would be more than made up for by the advantage the local dealer has in the 20 mile limit. With that object in view and also with the idea of increasing my parcel post business, I got out two circulars, copies of which I enclose.

I was careful to send these not less than 10 miles from the town in which I live and from that to the 20 mile limit. My object in doing this was not to conflict with my local trade which would extend probably about 10 miles at the outside. The two months as stated in the circulars will, as you will notice, be up on June 1st.

You may publish these if you desire, omitting name of firm. Point out the weak spots and give your opinion as to what amount of mail order business I should consider satisfactory through these circulars in the time stated.

We sent out 1,000 copies and also enclosed self addressed envelope and order blank.

Yours truly, BLANK & Co.

Personal Letter Sent

Here is a copy of the circular:

Dear Sir or Madam,

We wish to bring to your attention a new condition that has arisen since the introduction of the "Parcel Post System," namely, that we are now in a position to deliver to any post office within twenty miles — free of all delivery charges to you any kind of shoes that you may desire at exactly the same price as quoted in city catalogues.

In fact we are making a special sale especially for our Mail Order Customers for the months of April and May only, which will enable you to procure the very latest and most up-to-date footwear at prices far below their regular value.

We are sending you with this a list of these special lines on any one of which there is a saving of at least \$1.00 per pair.

Remember this—if the shoes we send you do not fit, or are not the kind you desire

return them to us with instructions and we will do precisely as you wish—either exchange for proper size or return your money.

Also remember, we keep the same kinds that are advertised in catalogues and deliver any kind to your nearest post office free of all delivery charges.

Just cut out from any city catalogue the kind you want and send it along with your remittance, not forgetting to state size and, if possible, give the numbers on the lining of the shoe you are wearing. Mail it to us and we will do the rest.

Yours very truly,
Blanktown, Ont. BLANK & Co.

The Special Offerings

The copy of the leaflet is as follows:

Special Bargains for our Mail Order Customers for the months of April and May only, and on conditions that your post office is not over twenty miles from Blankville.

For Women

Fine Patent Leather Buttoned or Laced Boots, made on the very newest last, stub toes, all sizes 2½ to 7. Regular \$3.75; delivered to you free for \$2.75 per pair.

The Popular Gun Metal Buttoned or Laced Boots, newest shapes, all sizes, 2½ to 7. Regular \$4.00 for \$3.00 per pair.

The \$3.50 line of Gun Metal Buttoned or Laced Boots for \$2.75.

A beautiful Patent Buttoned Boot, with dark grey silk tops (the latest in the very best shoes for women), regular \$4.75 for \$3.75 per pair.

Patent Buttoned Boot for Women, with black serge top and plain slant toe, regular \$4.50 for \$3.50 per pair.

For Men

Patent Leather Buttoned and Laced Boots for Men, on the very newest and latest lasts, the regular \$5.00 shoe for \$3.85 per pair in all

sizes, 5½ to 10, delivered to you, as are all the lines on this circular free of all delivery charges.

Gun Metal Buttoned and Laced Boots for men, in the very latest shapes, the regular \$5.00 line for \$3.85 per pair.

The new English Shape with Slant Toes and low heels in the \$5.50 grade, either buttoned or laced and in patent leather or gun metal, for \$4.25 per pair.

For Every-Day Farm Wear or in fact for any heavy out-door work, we are offering our genuine Canadian Calf Boot, with heavy pegged soles and fully equal to the hand-made shoe, in all sizes 6 to 11, for \$2.50 per pair.
BLANK & CO. BLANKTOWN

Should Have Used Some Cuts

The writer asks for an opinion on the weak spots in his plan. He also requests the views of this paper regarding what amount of mail order business should be satisfactory by means of these circulars in the time stated. One thousand circulars were sent out, together with self addressed envelope and order blank.

The chief fault with the circular or leaflet lies in the fact that there are no illustrations of the shoes offered. A few good cuts opposite each special line would have done a great deal to attract attention and arrest the interest of readers. It is very difficult, indeed, to describe a shoe, particularly its forepart and heel, without furnishing a pictorial reference.

Another thing, that might be pointed out is that, while the cost might be a little more, it would be preferable to have presented these special offerings in the get-up of a neat little booklet of four, eight or twelve pages. However, perhaps, this venture was more in the nature of an experiment and the dealer can be guided in the future by the results.

Not to Be Measured Exactly

Regarding what return should be obtained in the Parcel Post System, the writer is of the opinion that if five per cent. of those who were "circularized" replied, the result would be eminently satisfactory. Even if the shoeman only gets ten customers, from the radius of between ten and twenty miles from home, it would pay him handsomely for they would do much to advertise his business and if satisfaction was given through the parcel post there would likely be repeat orders. Publicity of any kind is a very desirable attribute. It cannot always be measured by concrete results or dollars and cents. The benefit derived from it is often an unknown quantity in the way of good will, favorable mention and the thought of Mr. Blank that comes to mind when the subject of shoes arises either through the necessity of a new pair or a discussion in general.

Advantages of Local Zones

The SHOE AND LEATHER JOURNAL regrets that more retailers in the various towns in Ontario have not taken advantage of the local zone system (twenty miles including the place of mailing), for the rates in this radius are exceptionally low. In fact they are more than doubled when parcels go outside the twenty mile radius. Herein is where the home dealer secures the benefit over the mail order house or departmental store, as was pointed out to readers in these columns some time ago. This discrimination in postage was evidently made to favor and foster the local merchant. Now, as is well known, the rates for sending parcels to any post office within twenty miles, even when the twenty-mile area extends into an adjacent province, is—one pound, five cents; two pounds, six cents; three pounds, seven cents; four pounds, eight cents; five pounds,

ten cents, or in other words two cents for each pound up to and including eleven pounds.

Now the ordinary pair of fine shoes for men which Mr. Blank offers to sell at \$3.85 and \$4.25 per pair would not weigh more than fifteen to seventeen ounces a shoe, or four pounds would easily cover weight of shoes, paper, etc. The postage would be just eight cents. Oxfords would not weigh more than three pounds per pair, and the postage on them would be six cents. Women's shoes, which have been exceptionally priced for the mail order customers, would not weigh more than from nine to eleven ounces or less than two pounds to the pair. The postage on this would be just six cents.

The Postage is Very Light

In connection with mail order trade it is likely that in the great majority of instances orders would be from women as they are the buyers of the household. Summing up, the SHOE AND LEATHER JOURNAL would venture, taking everything into consideration—men's, women's and children's shoes—that the average outlay for postage would not be more than six cents. Even although the profit on the mail order business may not be quite as large as on the shoes disposed of direct in the shop, still there is an infinite amount of satisfaction in knowing that you are doing the business in your locality and getting the people within twenty miles to buy shoes from you instead of sending their money out of town. Herein is where the average dealer has a splendid opportunity to fight the big stores in the large cities. The bright, alert shoeman may see many opportunities for developing a mail order trade if he will only get a little out of the ordinary rut and set forth on the original lines of Mr. Blank of Blanktown.

One feature especially emphasized and which should carry weight is the mention that if the shoes do not fit or are not the kind the person desires, to return them with instructions. The firm will then do precisely as the sender wishes, either exchange for proper size or return the money. Nothing could be fairer to the purchaser than this, and the shoe retailer, who is willing to meet the patron in this spirit demonstrates that he has confidence in his goods and in his ability to adequately meet the varied wants of those whom he would serve.

Beating Other Fellow To It

Another point worth mentioning is that Mr. Blank offers to duplicate the values of any mail order houses or selections made from city catalogues. This certainly removes some of the glamor of "distant fields looking green," and will make the recipient of the notice think twice before sending many miles away to obtain footgear when his or her wants may be as easily and quickly satisfied nearer home. In the May 1st issue of the SHOE AND LEATHER JOURNAL appeared an article on "Keeping the Shoe Trade at Home." This journal knows of no better means than that taken by catering to all persons within an area of twenty miles and using the parcel post system, bright illustrative advertising, and booklets backed up by reliable, well made goods and a service that will suit and satisfy.

A by-law will shortly be submitted to the ratepayers of Sherbrooke in connection with the J. H. Hamilton Shoe Co. Negotiations with Mr. Hamilton, who resides in Levis, have been in progress for some time. Under the provisions of the by-law the company will erect a building to cost not less than \$20,000 and will be required to pay annually \$40,000 in wages for ten years. The company will be furnished with power at three-quarters of a cent per kilowatt hour, and will have exemption from municipal taxes for ten years. A bonus of \$15,000 is to be given the J. H. Hamilton Shoe Co., which will be secured by a first mortgage. It is thought that the by-law will be carried.

Imposing Exterior of Historic Shoe Establishment

Excellent Facilities Afforded for Display—How the Plans Were Carried Out—Business Has Been Established for Over Half a Century—A Family of Footwear Experts

One of the handsomest and most elaborate shoe store fronts in Canada is that of J. P. Cook Co., Limited, of London. Some conception of its beauty and artistic lines may be gleaned from the accompanying cut. There is no woodwork exposed to the weather in the whole exterior, nothing except glass, copper and tile. The front cost \$3,500.

The centre or island showcase is 10 feet 6 inches wide by 4 feet deep and the passageway or entrance on each side is 3 feet 6 inches in width. The show windows on the right and left are 3 feet wide at the street and extend back a distance of 13 feet. They form a right angle and lead to double acting doors 4 feet wide. The windows at the entrance doors are also 3 feet 6 inches wide. The width of the store front is 25 feet. The floor of the vestibule is of small white, one inch hexagonal tile with sage green border around the walls. The floor of the show windows is 2 x 2 inch matt finish, turtle green tile. At the backs of the windows all around the walls are mirrors in mahogany panels and the rear doors are also of mahogany. At the front are "Hester" copper sills for glass in the front all around and for the upright glass joints. The windows are 6 feet 6 inches high and run from one foot above the sidewalk to the ceiling of the vestibule. The one foot base at the bottom of the windows and the two walls up the front and across the top of the prism glass are all done in 6 x 6 inch dull matt finish, turtle green tile with white plaster joints.

It will be noticed that a particularly striking display of Spring footwear is made in every window along with appropriate show cards calling attention to the various lines. There is also a lattice work in the centre show case adorned with flowers and blossoms of various kinds. The display on the whole is a neat one and reflects credit upon the firm.

Fifty Years in Shoe Line

The Cook Shoe Store in London is a historic institution, Philip Cook, sr., having begun the retail shoe business in the Forest City just fifty years ago last February. In the half century of its career the firm made five removals, each time to larger and more commodious premises. In 1899 the present spacious quarters located at 167 Dundas street and 398 Richmond street, were secured. Mr. Cook had three

sons all actively interested in the footwear trade who served their apprenticeship in the store. In 1886 the style of the firm was changed to J. P. Cook, and some years later the organization was incorporated under the name of J. P. Cook Co., Limited. J. P. Cook, one of the sons, who subsequently started the factory of the Cook-Fitzgerald Co., died in August, 1911, and Ed. Cook, another son, for the past three years has been conducting the Owl Shoe Store, Toronto. The retail business of the J. P. Cook Co., London, is ably

PHILIP COOK, SR., LONDON

looked after by another son, Philip Cook. Philip Cook, sr., nominally retired from the retail line in 1886, but has never lost interest in the shoe business and to-day, in his eighty-third year, is as active and vigorous as many men about half his age. He is an uncle of Philip, Stephen and Joseph Pocock, of the London Shoe Co., and taught them the rudiments of shoemaking. One of his daughters married C. J. Fitzgerald, of the Cook-Fitzgerald Co.

The interior of the Cook store is one of the most inviting in Western Ontario. The single shelf system prevails throughout and the cartons are of uniform size. On the pay roll is a staff of about twenty people and in 1897 the Cook store inaugurated the entire cash system, which has been found to work out admirably.

YALE SHOE STORE

Believes in the Repair and Also Juvenile Department

Extensive Alterations Completed to Yale Shoe Store, Winnipeg—The Way John Affleck Won Out in Spite of What Friends Predicted—The Advantage of a Mezzanine Floor—The Reasons of Success

Extensive alterations have just been completed to the Yale Shoe Store at 321 Portage avenue, Winnipeg, of which John Affleck is the energetic proprietor. The necessity for more room had been felt for some time. Although business has been quiet in the West, the volume of the trade done by this widely known and progressively managed store in 1913 showed a gratifying increase over that of 1912. The interior of the premises was remodelled and one thousand square feet of additional shelving erected.

The seating arrangements were changed and new fixtures installed throughout, making the Yale one of the most attractive and splendidly fitted up footwear homes in the Canadian West. The store is nineteen feet wide by one hundred and thirty-six feet deep and the single carton system of shelving prevails throughout. A balcony has been erected and above the mezzanine floor surplus goods only are kept. All sizes and widths, from the very narrowest to the widest, are taken care of in the shelving below the balcony and every carton is within reach of the clerks.

The display window in the front is a "V" shape and about eight feet deep. Another innovation is a nicely fitted up juvenile department, 13 x 40 feet. When Mr. Affleck decided to open a department for the children and put it in the basement, it was just a venture on his part. The result of the first month has been so satisfactory that he is more than pleased with the convenience. The idea of segregating the little folks from the men's and women's branches has proved a good one and Mr. Affleck would advise every shoe dealer to follow out this idea whenever practicable.

The whole surplus stock of the Yale Shoe Store is now

in charge of a salesman on the floor instead of a junior member of the staff as formerly, when reserve goods were kept in the basement. Mr. Affleck believes that by having a balcony and moving the reserve stock above the mezzanine floor a change has been wrought which is worth many times the cost of the extra shelving and in addition has added much to the appearance of the store.

A large and capable staff is kept, the members of which are seen in the group portrait on another page. It may be explained that Mr. Harness, who holds the position of cashier and parcel clerk, looks after the deliveries. Mr. Pollock is the accountant and attends to all the private work of the store, the business done being almost entirely a cash one.

One feature of the Yale Shoe Store is the splendid repair department. This is given particular attention. A Champion No. 20 stitcher and finishing outfit has been installed and a quick, reliable service is given. W. R. Goodey is the manager of the repair branch. Many customers drop in and remain until their shoes are half-soled or rubber heels put on and in numerous instances the job has been completed within eighteen minutes. The repair branch has always been a remunerative one and from the standpoint of profit and service the management of the Yale Shoe Store considers this a favorable adjunct.

He Began on the Farm

Mr. Affleck, who has now one of the finest footwear enterprises in the West, was born in Harrow, Essex County, Ont., in 1878. He lived on a farm during the first few

THE NEW AND IMPROVED INTERIOR OF THE YALE SHOE STORE, WINNIPEG

THE BASEMENT OF THE YALE SHOE STORE, WINNIPEG, DEVOTED TO CHILDREN'S FOOTWEAR

years of his life and after graduating from a business college in Chatham he went West. After working as a hired man at Portage Plains for about a year, he secured employment in Brown's, Limited, Portage la Prairie, as a general handy lad. He naturally gravitated to the shoe department, and later he took a position with James Rae, of Vancouver, B.C. While residing in that city he joined the ranks of the beneficiaries. His next move was to Winnipeg, where he went on the road with the Ames-Holden Co., Limited. In June, 1907, he formed a partnership with George Nickle. Two years

ment used for surplus stock, The changes which have just been carried out mark the second alteration and enlargement within seven years.

What Kind Friends Told Him

When Mr. Affleck first started business on Portage avenue, just seven years ago this month, he began in a small way. He recalls many words of advice from candid friends in regard to making the business a success, as the stand at 321 Portage avenue was regarded as too far removed from the retail district. Mr. Affleck's judgment, however, proved unerring and his store is now in the very heart of the busy buying section and the trade done is among the largest and most profitable of any in footwear in the Dominion, the stock carried being around the \$50,000 mark.

Mr. Affleck has a summer home at Sturgeon Creek, a few miles out of the city, and is fond of gardening, chicken raising and other pastimes. Mr. Affleck's big business has been built up by handling reliable goods, giving splendid service, knowing shoe values and keeping up-to-date both in stock and merchandising methods. His many friends will congratulate him on his handsome and completely altered business home.

INTERIOR OF THE YALE SHOE STORE BEFORE THE ALTERATIONS

ago he acquired the interest of Mr. Nickle and has since conducted the business himself. The second year after the new firm started the premises were enlarged and the base-

The electors of Cobourg carried the felt factory by-law by a huge majority, only twenty-six voting against. The total vote cast was 641. The by-law provides for a conditional loan of \$10,000 in aid of a company, promoted by George W. Charles, of Montreal, to carry on a felt industry. The company will take over the plant and machinery of the Cobourg Matting and Carpet Company, and will manufacture felt and other textile fabrics, felt shoes, slippers, etc.

How Shoe Merchant Should Look After His Banking

Some Timely Advice on Opening Accounts—Proper Filling in of Checks, Monthly Balances, Making Deposits, etc.—Several Financial Pointers That Are Well Worth Consideration—Financing of a Business

Modern business depends largely for its success upon modern banking methods. Banks are absolutely necessary to modern business enterprise. They provide not only a place for the safe keeping of money and securities, but they make the payment of bills, both local and foreign, much more convenient to the merchant than if currency instead of checks were necessary to make such payments.

There are two phases of banking that are a great convenience to the merchant. First, it affords him a safe place for the deposit of his cash receipts, which becomes a fund from which the bank will pay on demand all checks, notes and drafts, when properly presented. Second, it affords him an opportunity to borrow cash for carrying on his business when his own capital is tied up by large stocks and accounts receivable, or when it is inadequate.

Opening An Account Quite Simple

Opening a bank account is the simplest thing in the world. All that is necessary upon the merchant's side is to have cash to deposit. When a request is made by the merchant to the bank for permission to open an account the banker asks him for his signature, so as to be able to identify it in connection with the account. He is given a bank book which is his receipt for the money deposited. This book should be presented at the time deposits are made so that the receipt may be entered therein. He is also given a pad of deposit slips upon which he enters the details of each deposit. His bank account is balanced every month and it is customary for the books to be handed in at that time to be balanced to agree with the bank's books. It has become a custom with some banks to merely send a statement to each depositor at the end of each month instead of balancing the pass books. The depositor will be instructed in these matters when he opens up his account.

He will have placed in his hands a check book. This is merely a number of blank check forms bound together, generally with a stub attached for keeping track of the checks drawn. When the merchant desires to pay an account he takes his check book and draws (writes) a check for the amount. This check is an order on the bank, where he has funds on deposit, to pay the amount written on the check to the person presenting it, when all is properly handled and the presentation is in correct form.

How to Draw a Check

The drawing of a check is a simple matter, but it is one of the most important the merchant is called upon to perform in connection with his bank account. The printed form is used for convenience, as any order, no matter upon what it is written, or how, will be honored by the bank if it is satisfied everything is in order. These forms indicate certain parts that have to be filled out by the merchant drawing the check. These missing parts are: First, the date. This is not absolutely necessary on a check, and unlike a note, a check drawn on a Sunday is valid. A check dated ahead will not be honored until that date.

Second, name of the person to whom the money is to be paid. There are two forms of checks, one payable to the order of the person to whom it is given and one made payable to a certain person, or "Bearer." It is preferable to make all checks payable to order as then the person to whom it is given must indorse it before it will be paid by the bank. This is a check on the fraudulent changing of the amounts of the check. The person presenting it to the bank must be identified before it is paid, while in case of a check drawn to

bearer, the bank will cash it on demand, and unless the amount is unusually large, without identification.

Care Necessary in Filling in Amount

The third space left blank in the form is for the amount. Here extreme caution should be exercised in making out the amount. The figures should correspond with the written amount. If there is any difference the bank will recognize the amount written in in words. In writing in the amount in words begin at the extreme left of the space, write the amount out in full, do not abbreviate. If there is any space remaining after the amount has been written in, draw a couple of lines through it so that no one can add any words to those you have written there. In filling in the figures use care to have them compact and not sprawled out, so that it is an easy matter to insert other figures between those you have written, or before or after them.

These precautions are necessary to prevent evilly inclined persons from "raising" the amount to a larger one than the original check called for. For instance: If the check is made out for five dollars and there is left room before the five, there is nothing to prevent someone writing in the words, "One hundred and" making the check read for "One hundred and five dollars" instead of for "Five." If, on the other hand there is left room at the end of the amount, the word "Hundred" could easily be written there, making the check read for "Five hundred dollars" instead of for "five." If this should occur the merchant will be the loser, but if the check is raised through no neglect of the merchant the bank will have to lose the amount of the increase.

If a check is to be made out for less than One Dollar the fractional amount is written in in cents, as, "Sixty-nine cents," and the "dollars" printed on the check erased by drawing the pen through it a couple of times.

Check Protectors of More or Less Value

There are a number of devices on the market for preventing the raising of checks, all of more or less value. When we consider that the expert can take out the written words with acid and write what he pleases in the space we must be thankful that more checks are not raised than there are. A check protector that perforates the paper does not seem to be any great preventative as the expert fills up the holes with paper pulp and punches others for the larger amount. The best preventative, and the greatest protection the merchant can have is to make the check out carefully and observe the rules laid down above. Make the check out with a coarse pen and use plenty of ink, and allow it to dry without blotting so that plenty of ink will penetrate the paper.

When a merchant receives a check he may deposit it as cash. Before it will be accepted for deposit the bank will insist upon it being indorsed. In indorsing checks observe the following points: First, write across the back, not lengthwise. Second, write the name about one inch from the top, which is the left hand end of the face of the check. Third, write the name as it is written on the check, and if it is not written there as it is usually written, the usual signature should be written directly below that. Fourth, if you wish the check to be payable to some particular person, write the words, "Pay to the order of (name),"

The Withdrawal of Money

If you wish to draw money from your deposit make a check payable to "Cash" and present it in the usual way.

If you make it out to "Cash" or "Order" and indorse it, anyone else may cash it if it is properly presented.

Payment on a check may be stopped any time before it is presented to the bank for payment. All that is necessary is to notify the bank not to pay the check when it is presented. Give full particulars so that the check may be identified by the bank.

If a check received by a merchant is deposited, and is returned by the bank stamped "No funds," the check should be carefully preserved as an evidence of the debt.

The bank officials are always ready to give full particulars as to its functions, and to assist the merchant in solving his financial difficulties. Make your banker your confidant.

Pushing Findings Sales in West

The manager of the shoe and leather findings department of the Winnipeg branch of Adams Bros.' Harness Manufacturing Co., is George Wheeler. He has been a

GEO. WHEELER, MANAGER FINDINGS DEPT.

resident of the Prairie Capital about three years. Previous to that he was for a long time with C. Tilley & Son, Toronto. He has built up a very large and profitable business

FINDINGS DEPARTMENT OF ADAMS BROS., WINNIPEG

in the findings line in Winnipeg, due to the careful study of customers' wants and keeping a full, up-to-date stock.

The accompanying illustration shows Mr. Wheeler at

his desk and his staff, with samples of the lines that are carried. The bulk of the stock is carried in a portion of the basement which is one hundred feet deep and fourteen feet high. A packer and shipper are on duty in the stock-room all the time and orders from any part of Winnipeg are delivered within one hour after being sent in. Mr. Wheeler has a fine auto which enables him to get around and make calls on all the city buyers at least once a week. He has a traveler who also makes regular trips. Mr. Wheeler leaves in a few weeks for the Old Country and Europe and will be away about four months. He will spend some time in London, Belgium, France and other countries, on a combined pleasure and business outing. Mr. Wheeler is a genial and obliging young man, thoroughly earnest and aggressive in his work. He is fond of athletics, being an able exponent of tennis, baseball and other games.

Shoe Salesman Must Be Cheerful

It does not do for a traveler to become down-hearted, for in that case he is of little use, either to himself or the house. If it is the disposition of a man to get blue or dull at times because trade is slack and his sales are falling off, he should by all means embark in some other line of business than selling on the road. "One of the best salesmen I ever knew," remarked a leading shoe manufacturer this week, "has never been able to command nearly the salary or the position that he should because of one or two faults. When he has had a good week he comes into the house and he is overflowing with optimism and buoyancy. He is apt to say that 'we have them all beaten, everything is coming our way, we are the people and are making our competitors look like selling platers.' Perhaps this will go on for a couple of weeks and then when luck has been against him, his face is long, his manner doleful and his general air one that would comport with the environs of a city morgue or family cemetery. He strives to find fault with the goods, says that we are not making the right kind, that our finish is imperfect, our lasts out of date and we will have to revise the whole nature of our output and our factory system if we want to secure any large orders. To show you how absurd the latter cry is, I have merely to tell you that this change is all brought about within a couple of weeks. There certainly can be no serious shortcoming in the factory or the goods in that brief period, for he has the same samples. We will cheer this fellow up a bit and the next week he has fairly good luck. He then is brighter and livelier, but the next week he falls down again and once more paints a distressing picture. To see such a man controlled by so many moods—well he cannot be at his best. I want to tell you that in order to realize the greatest efficiency in selling a man nowadays must be of cheerful disposition and in a pleasant frame of mind at all times and under all circumstances. A fellow that gets in the dumps is not of very much use to the concern which he represents, particularly during a time of stagnation or depression like the shoe business is passing through at present."

John W. Huxley, one of the Western Ontario representatives of W. B. Hamilton Shoe Co., Toronto, who said recently that he intended being a candidate for the vice-presidency of the Commercial Travelers' Association, has received a large number of letters congratulating him on the stand that he has taken and promising him hearty support. It is understood, owing to the interesting announcement that he made, that Mr. Huxley is in receipt of about eighty or ninety complimentary letters, extending cordial well wishes to him in his campaign.

STRAY SHOTS FROM "SOLOMON."

Convictions may be the result of a bad liver or a thick head. There are plenty of people whose convictions are not worth powder to blow them over a cow shed. Be sure you are not one of the class who are "open to conviction," but
