# Future of Shoe Manufacturer

**It Would Appear as if an Era of Unprecedented Prosperity is Dawning in the Dominion to Those Who are Prepared and Wide Awake Enough to Secure the Share of Profitable Trade that Awaits Them—An Appreciation of Conditions as They Are To-day and What the Close of the War Will in All Likelihood Witness in Footwear**

**T**HE average annual importation of boots and shoes into Canada previous to the war was very little short of five million dollars. While this importation may not have been wholly avoided by the manufacture in Canada of similar lines, there is no question of doubt to students of the situation that a volume of output greatly increased by a larger population or by an export trade would largely operate towards the elimination of this importation.

The manufacture of shoes in a large number of varieties was made possible in the United States not only through their greater population but also by virtue of their large export trade, and the Canadian retailer, owing to the necessity of paying out thirty-seven and one-half per cent. of the value of his purchases before seeing the goods, would undoubtedly confine his purchases to the domestic article were the Canadian manufacturer in a position to supply his demand for similar lines.

## **The Requirements for Military Purposes**

While it is true that the Canadian factories have found a not inconsiderable decrease in the demand for men's shoes, it is also a fact that this decrease has been offset in a still greater degree by the needs of the government for military purposes, and a resumption in the manufacture of these lines at the close of the war and the return to civil duty of the men now at the front can consequently be expected.

Following the Balkan war, the unsettled condition obtaining in Western Canada through the collapse of the real estate boom, and slightly similar conditions in the eastern section of the country, the outbreak of the present hostilities, the almost total cessation of immigration, coupled with the return to the United Kingdom and foreign countries of a large portion of our population and the difficulty of borrowing money abroad, created such financial restriction and shortening of credits to the general trade as made absolutely necessary a diminution in the volume of production.

## **Stocks All Over Are Now Low**

The levying of an additional tax of seven and one-half per cent. tended largely to lessen the importation of footwear and the financial conditions prevalent in the country, through their restrictions of credit, forced the average shoe dealer to liquidate his stocks, with a result that the stocks of shoes through the country were never as low.

The embargo on hides in the belligerent countries and the almost total impossibility of securing

transportation from neutral countries other than the United States has so lessened the supply of calf, kid and sheep skins that the prices of these have risen from thirty to forty per cent. The effect of this shortage has increased the demand for leather made of domestic and American hides and greatly enhanced the value of leather of all kinds.

This increase in the price of leather has made necessary a similar increase of prices for shoes from twenty to thirty per cent., and to the manufacturer it means that this volume of output has been increased just his amount without any corresponding advance in the cost of producing the same other than in the material required. In other words, it means that he has added twenty per cent. to the volume of his output without the outlay of one cent on his plant, general supervision or overhead operating costs.

Great Britain, France, Russia and Italy are absolutely depleted of stocks of boots and shoes, as the entire output of the factories in these countries have been required by the governments for military purposes.

In Canada to-day a stock of footwear is found that averages fully fifty per cent. below the average standard quantity of goods usually carried, and it is safe to say that the operation at fullest capacity of our Canadian factories would require at least three years to replace the depletion and provide for the constant every day demands of the trade.

## **What Aggressive Firms Expect**

It is a generally credited fact that the close of the war will witness a trade entente between the allied countries; and when it is considered that the stocks in these countries are practically nil, it would seem that Canada, producing footwear equal in quality and workmanship to that made across the border, will greatly enjoy through these favored treaties, an immense share in the replacing of these depleted stocks. Reports from the eastern section of the country advise that one of the most important shoe manufacturing concerns in the United States is now perfecting plans whereby it will enter the Canadian field.

Looked at from all viewpoints it would appear logical to assume that an era of unprecedented prosperity is dawning for the Canadian manufacturer, if he is wideawake and prepared to secure by expansion the share of profitable trade that awaits him. This trade is already available and will continue in a still greater measure at home and abroad.

# SHOE MANUFACTURERS' SUPPLIES

In Montreal, as well as Quebec, stocks are carried for the convenience of the trade, who can have their requirements promptly filled at all times for all supplies, including:—

## SHOE COTTONS

# With the Shoe Manufacturers

Pithy Note and Comment on Shoe Matters—What the Makers of Shoes Are Saying and Doing—Shoe Facts and Fancies

**T**HERE has been considerable change in shoemaking systems during the past 20 or 30 years, but there has been no such change in the making of shoes as there has been in the making of leather. During the past twenty and more years the whole process of tanning has been revolutionized, so to speak.

The great change has been from a bark to a chrome tannage, and notwithstanding that the latter has all but supplanted the former there are some few people who do not see how the new system has been an improvement. The latter are the older men of the trade, as a rule, and these naturally point to the old time wax calf as an example of the great value of bark tannage. Wax kip is often mentioned, too, when the superior qualities of bark are spoken of.

Now wax calf and kip were very good uppers in their time, but it is safe to say that the calf of thirty years ago had nothing on the present day product so far as wear is concerned. The best calf uppers of to-day will give the very utmost satisfaction in wear, as all who have tested these uppers are most ready to admit. The calf vamp in the ordinary shoe to-day does not dry up and crack very readily, and the proof of this is seen in many different ways. In the matter of patched vamps one cannot fail to notice that these are very scarce now. There are few such vamps in wear compared to other days.

As a general statement it can be said that the present system is superior to that of a generation ago. But while most tanners will agree to this there are many among them who realize that the use of bark may be best for certain purposes. No one can say that chrome is best for all leather as it all depends upon what the leather is to be used for. In some instances bark would beat the chrome process, a fact that many leather men are always willing to admit.

Where stretch is not wanted in a leather it is a good idea to use the bark process. There is little or no stretch to stock tanned by bark, hence it would be preferred for certain purposes. Take a belt, for instance, and stretching is a feature that nobody wants, hence it is tanned so that it is as firm as possible. The same may be said of a shoe stay and bark would be best for this, too. But the softness is not there that always comes with the chrome tanned skin.

The main idea in tanning a skin is to make it tough and give it a good finish and feel. It must have more or less oil in it, too, so that it sheds water as much as possible. Chrome helps out a lot in the latter feature and to a far greater extent than bark. Take the average system of bark tanning and it leaves the leather dry to a great extent. It is dry in its nature, as it eats up the grease where chrome does not. The latter leaves more grease and oil in the skin and this means that it gives the leather a softer "feel."

Being a softer tannage, and leaving the natural qualities of the hide or skin in the finished leather, there is less risk of water washing the tannage out in wear. Water will wash the tannage out of bark leather far more easily than out of chrome. Take white leather, for instance, and it would never give the satisfaction that it does give only for the fact that it is chrome tanned. The latter is the superior method for white leather of any kind.

There is a general idea that it takes much longer to tan by the bark process, but, at the present time, one system can be made about as quick as the other if desired. With the present system of making leather no time is lost no matter what the process is, and the rapid methods now in use will

allow bark leather to go through as quick as any. A lot of bark extract is being used at the present time, and this means quick tannage, in most leather establishments where it is used.

The length of time taken to-day, in the making of leather, all depends upon what that leather is to be used for. Never before has it been possible to take a hide, with the hair on, and make it into finished leather in such a short space of time. Never before has the system been down so fine that the quality of leather was so much of a factor. Take stock that is intended to be cut into button flies, for instance, and it goes through very rapidly. On the other hand, if it is glazed kid that is being made it receives far more attention and takes more time. Glazed kid is one of the finest leathers in the tannery.

## Mr. Weber Joins Silent Majority

The death took place in Berlin on May 7th of A. D. Weber, general manager of the Canadian Consolidated Felt Co., who had been critically ill for some weeks. Mr. Weber was a native of Waterloo township and in his forty-third year. He is survived by his wife and many friends will extend their

THE LATE A. D. WEBER, BERLIN, ONT.

sympathy. He was a man of qualities of head, hand and heart which made him well liked on all sides and his passing at an early age marks the sudden termination of a career which had been characterized by energy, progressiveness and initiative. He entered the employ of the Berlin Rubber Manufacturing Co. as a shoemaker in 1901, and later, was transferred to the shipping department, after which he took a position on the road. At the organization of the Merchants' Rubber Co., he joined that concern, and when the Canadian Consolidated Rubber Company was launched, he was made assistant manager of the Merchants' mill. His next post was manager of the shoe department of the Toronto branch, from which he was promoted to the head office in Montreal, where he had complete charge of stock, and

devoted his attention to the weeding out of the commercially unfit. His duties included the manipulation of the merchandise, so that there should be no undue accumulation of inactive stocks at any one point and that goods travelled by the shortest route between factory and consumer. A few months ago he was advanced to the general managership of the Canadian Consolidated Felt Co. at Berlin, which position he held at the time of his death.

**Did He Get His Raise?**

The first week in January a clerk in shoe factory office approached his boss for a raise. The boss listened to the many reasons why the clerk should get his raise. When the clerk finished the boss said: "Sit down and we'll figure this thing out.

"First we'll put down the number of days in a year	365 days	
"Let's see. You sleep 8 hours a day or 1-3 of the time—we'll deduct that.....	122	"
That leaves.....	243	"
"Now you have 8 hours a day to yourself in addition to your 8 hours sleep, which makes another.....	122	"
That brings it to.....	121	"
"Then you are off duty 52 Sundays during the year, take that off.....	52	"
We now have.....	69	"
"Deduct your two weeks holidays.....	14	"
It's down to.....	55	"
"How about the legal holidays, New Year's, Christmas, etc., there are.....	12	"
That gives us.....	43	"
"Yes, and then you get off half a day Saturdays, making.....	26	"
That leaves.....	17	"
"And your lunch time makes another.....	16	"
"You work — — ? ? Get out of here—you only work one day a year.....	1	"

**Employees Hold Joyous Celebration**

The employes of the R. G. Long Company, manufacturers of gloves, mitts and moccasins, and their friends, spent a very pleasant time recently when a complimentary dance and house-warming was tendered by the company at their new factory, King street west, Toronto. The chair was occupied by R. G. Long, and during the early part of the evening a splendid concert was given by the employes of the firm and their relatives. Short addresses were delivered by Mayor Church and ex-Controller James Simpson. Refreshments were served during the evening, and dancing was indulged in until the early hours of the morning.

**The Little Touches Make the Shoe**

"I do not think that Canadian shoe manufacturers give enough consideration to the finish of their shoes, and, mind you, I push their goods every and any time I get a chance," remarked a leading Toronto shoeman who is a close student of styles and smooth, expert shoemaking. "There is a certain detail and daintiness of finish and treatment which American manufacturers impart to their lines that is absent on several Canadian models. Perhaps the shoe is a medium high toe; perhaps it is an English last, a broad round toe or narrow recede one, yet too many manufacturers finish their shoes in the one style. The stitching is the same, the fudging alike and the wheel effects identical and the edge trimming and soles about the same. Now, there should

be more attention given to these little points. I cannot explain in print just exactly what is meant, but here are two shoes, both on the same last and of the same upper and sole stock—the one made four months ago, and the other just a fortnight ago. I took this matter up with the factory manager and asked him to give more specialized and detailed attention to having closer trim and lighter finish effects on the edge than he had been doing. Now there was no change in patterns, but in the two samples I am showing you, why the veriest amateur in style would pick out the one with the lighter wheel effect, the closer stitching and the neater trimmed edge. It has a grace of outline and dignity of appearance that the other does not possess. I do not believe that the extra time taken to give attention to these little "touches," as we call them, would cost ten cents on each pair, yet in comparison, we can get from fifty cents to one dollar more for the graceful, airy and artistic boot than we can for the other, which lacks that little something which makes the difference. In the pair made four months ago we would say that shoemaking is a trade—in the other production you would exclaim that it is an art."

**Price Question Being Eliminated**

Shoe manufacturers are in many cases so interested in getting supplies that the question of price does not seem to enter into consideration. It is, indeed, a seller's market, and anyone with merchandise ready for delivery can practically name his own price. This is surely a startling change from the situation a year ago.

We understand that a number of leather and supply firms have dispensed with the services of some of their younger salesmen because of the present situation. They,

naturally, do not require any great salesmanship to dispose of their merchandise, and, therefore, looking at the matter from a purely financial standpoint, believe that they are saving money by dropping the late comers. Of course, this is a rule that is seldom carried out with regard to old salesmen who have been with the company for a long time, and whom they feel in duty bound to keep. Just how long this condition will continue it is hard to say, but a good many authorities in the trade consider that the crest of the wave has been reached and that soon we will be going the other

way. There are some indications in shoe factories, especially those making men's work and not having army orders, that business is slacking up a bit.—American Shoemaking.

#### Want Embargo Placed on Hides

It is understood that a movement is on foot among several leading Canadian tanners and shoe manufacturers to have an embargo placed on Canadian hides and that a deputation will shortly go to Ottawa to interview Sir George E. Foster, Minister of Trade and Commerce. Producers and users of leather have been interested in this movement for a long time and it is now felt that the moment for concerted action has come. American buyers have been paying extreme prices for hides in Canada and they have taken so many from the Dominion that this has had a serious effect not only upon the matter of supplies but has been a contributing factor in the extreme prices at which side leather has been quoted by Canadian tanners.

#### Pays Tribute to the New Mayor

W. Searle, of St. John, N.B., has just celebrated the thirty-third year of his arrival in that city, where he is widely known in shoe circles and where another shoeman has just been elected Mayor. In a letter to this paper he pays a tribute to Mayor R. T. Hayes, who is the president and manager of J. M. Humphrey & Co., shoe manufacturers and wholesale distributors. Mr. Searle says: "He is one of the leading men of our city and some few years ago was elected a representative of one of the wards for several terms. He filled the position with honor to himself and entire satisfaction of the people. He was chairman of the board of finances and also a member of the Board of Trade. I have known Mr. Hayes for the last thirty years, having dealings with his firm, and I have found them upright in all their relations. Mr. Hayes has always taken a deep interest not only in his own business but in municipal affairs, doing all in his power

to advance the welfare of the city and his recent election to the civic chair evidences the esteem in which he is held as a member of the community. A man of sterling worth, the citizens may look with confidence to conscientious service and progressive administration under his guidance and may he long live to enjoy the distinction, well deserved in every way, that has been conferred upon him by the ratepayers."

#### Why Not Trade School in Shoe Line?

Why should not a technical educational course be opened in Canada to train and equip workers for the shoe and leather factories? Skilled training for printers, carpenters, architects, plumbers, machinists and many other trades is provided and for years trade schools have been advocated by conscientious writers as a solution to the problem of bringing new and young men into the different trades, especially those lines that find the need of skilled help.

"What an assistance it could be made for us," writes a leading firm to the SHOE AND LEATHER JOURNAL. "We, of course, are more interested in the tanning trade and have just made a contribution for a scholarship to the Toronto Technical School.

"These contributions of the manufacturers will be earmarked and in the case of our contribution, the scholarship will be awarded for chemical research.

"I understand in the Toronto Technical School carpentering, plumbing, machine building and auto construction are successfully taught. If so, why could not the manufacture of shoes also be taught? The lack of skilled help in the shoe factories to-day is being most acutely felt; of course, this is, to a large extent, due to the thousands of men who are enlisting, but, at the same time, there is no reason why a start could not be made with the younger generation and have them learn the manufacture of shoes in a scientific way in these technical or trade schools. Some discussion in your paper from the manufacturers would be welcome."

# Leather Trade Jottings

Items of Interest to Leather Producers and Users—What is Being Talked About in Leather Circles at Home and Abroad

**L**EATHER might at one time be dubbed "a drug on the market" but you will not find a shoe manufacturer in Canada to-day who will "scoot" out the back door when he sees a leather man coming. It is the leather man who is doing the dodging just now. . . Said a prominent leather producer the other day: "I dread going down to the office these days and I feel like jumping out the window when I hear the telephone ring. Manufacturers who, a few months ago, thought nothing of keeping us on the tenter-hooks are chasing us up now on imaginary orders. It is astonishing the persistency with which they will now get after us to 'complete a contract' that has no basis except in their imagination and their embarrassing shortage of supplies. No man on earth can tell where this thing is going to end. It is not speculation. Anybody can see if the war keeps up there is not going to be enough leather to go around. That is the situation in a nutshell. The only trouble is that in some lines there is not enough on hand and in process to meet requirements as it is."

## Hides and Skins

Hides keep creeping up in price. Steer hides are selling in Chicago for 24 cents with country buffs at 20 cents and calfskins at 35 cents. In spite of the fact that most of the selections are undesirable just now the skins are picked up as soon as they come in. South American hides not only maintain their strong position but give every evidence of added enhancement. So far there has not been any serious interference with shipments, although the shipping facilities have been more or less hampered and limited by the war.

Users of light skins have been the most seriously affected, as supplies from European countries have been practically cut off, and those from the far east have been considerably interfered with by restrictions and embargoes upon their export. Most of the light leather tanners in Canada could double or treble their output to-day if they could but get the raw stock. This and the scarcity of dyeing materials constitute a serious handicap to the industry at a time when the demand for the finished product is unprecedented.

## An American Conference

On May 8th a meeting was held at the Chamber of Commerce, Philadelphia, of the officers of the National Shoe Retailers' Association to consider the desirability of calling a conference of the shoe and leather trades to discuss the present crisis in leather and shoes and to formulate a precautionary policy or line of action calculated to avert the disaster to the trade caused by a possible leather famine. The conference will be held in Philadelphia and a dele-

gate sent to Washington to place before the government the attitude of the gathering on these matters. Retailers are beginning to feel alarmed at the outlook.

## American Market Conditions

Shoe manufacturers are daily picking up what leather they can at current prices. The shortage is principally in calfskin, although side leather is also scarce. Kid is soaring, as witness the fact that some special colored lines brought as high as 65c. and it is said that as much as 70c. was paid for a special line. Calfskin is selling from 50c. to 55c. a foot in colors with black at 30c. to 45c. Prices are changing daily. Shoe manufacturers are following absolutely the policy of selling on prevailing prices of leather and are announcing definitely that prices are subject to change without notice. They are filling orders only as they procure the stock.

## Technical Education

From time to time the tanners' section of the Board of Trade has discussed at its meetings the question of technical education and has expressed its views on the desirability of having due prominence given to research and practical work along the lines of the modern tannery industry. So far little practical encouragement has been given to the project beyond endorsement. We understand, however, that a prominent leather concern has offered a scholarship for chemical research work which will shortly be announced. This is putting the endorsement in the proper shape.

## Russian Leather Industry

The Russian-American Journal of Commerce publishes the following from Moscow, Russia: "The Russian Society of Leather manufacturers issued an account of its activity for the first three-quarters of the last year. This account shows that the principal efforts of the Society were directed in securing the necessary quantity of tanning materials for the leather manufacturers in the various localities of the Empire. For this purpose the leather manufacturers appropriated 4,458,000 roubles and the government gave for the same purpose 2,000,000 roubles. In all the society purchased 15,409 tons of tanning materials, but only one-third of this quantity was delivered to manufacturers. At the present time this society has 203 members."

The following is from Kieff: "Strict regulations with severe penalties for their violation are promulgated in regard to the leather industry. Farmers are compelled to register the number of hides on hand with the local authorities. Any transaction in leather without the special permission of the governor are strictly forbidden."

## NEW HOCKEY BOOT AND ANKLE SUPPORT

Archibald Kincaid, shoe maker and shoe retailer of Madoc, Ont., has been granted a patent on a combined hockey boot and ankle support. Mr. Kincaid states that the object of the invention which he intends to sell, is to provide means for holding the support firmly in place within the boot so as to prevent the support from wrinkling when worn with the boot, rendering the latter uncomfortable. It consists essentially of a hockey boot having a slot in one flap of the upper, an ankle support secured in the boot, reinforcing strips attached to the flap of the ankle support extending across the instep, a slot in one strip on the opposite side of the boot to the aforesaid slot, a strap extending from the opposite reinforcing strip through the slot of the ankle

No. 1 is a hockey boot provided with a slot, 2 in the upper thereof. 3 is an ankle support suitably secured within the hockey boot, the free ends or flaps, 4 and 5 of which are provided with reinforcing extension strips, 6 and 7 designed to extend over the instep of the foot. The strip 6 is provided with a slot 8, and the strip 7 with a strap 9 extending therefrom in bifurcated form. 10 is a securing buckle secured to the outside of the boot.

When fastening the ankle support in place when the shoe is on the foot of the wearer the strap 9 is first passed through the slot 8 and is then folded back upon itself, the edges of the ankle support being drawn together tight over the front of the foot. The free end of the strap is then passed through the slot 2 formed in the upper and is then secured by the buckle 10 in position.

It will be readily understood by passing a strap through the slot 8 that the edge 4 of the ankle support is held firmly in place, the reinforcing strip also serving as a stiffening to prevent the wrinkling or puckering up of the ankle support within the boot when on the foot of the wearer.

Mr. Kincaid says that hockey boots have been constructed with ankle supports therein, one side of the ankle support of which is provided with a strap extending through a slot in the boot upper. This construction, he adds, leaves one side or edge of the ankle support perfectly free within the boot. This portion of the ankle support would from constant wear become creased and puckered between the foot of the wearer and the boot and thereby render the boot very uncomfortable. The inner end of the strap being bifurcated distributes the strain equally across the front of the foot thereby giving a more even support to the ankle.

## WHITE IS A POPULAR LINE FOR SUMMER

"Yes, sir," said a well-known authority who has given considerable study to the subject of sporting shoes, "this should be a great year for this line of goods owing to the high and constantly increasing cost of leather. They are now made up so handsomely that they not only look well, but give great satisfaction in the matter of wear and comfort. The average shoeman in Canada does a business of probably fifteen thousand dollars a year and if he can do this volume on a five thousand dollar stock, he is proceeding along right lines and is not overbuying. What proportion should he spend in sporting footwear, you ask? Well, I should say that his placing business, which is usually done in the fall selling season, should be about \$100 in women's lines, \$100 in men's, \$125 in boys' and youths' and \$75 in misses' and children's. This would give him a very nice and quite a complete range. Of course, tennis foot togery comes in black, blue, tan and white, but owing to the scarcity of dyes it is safest just now to purchase white goods. As this is a white period stocks in this color should have a large call. It is a good season to avoid colors as the vegetable and acid dyes now employed are not nearly as lasting as the aniline and logwood colors which were accessible before the war.

One leading firm which makes both rubber and tennis shoes has sent out a notice to its customers to the effect that Germany has for many years been the main source of supply for all dyestuffs, and since the close of that market all manufacturers have experienced great difficulty in getting their usual requirements. Some dyes it is as yet impossible to obtain elsewhere, although this is a condition which may not prevail for any great length of time.

The notice adds:—"Meanwhile we have been doing the best we could but so far have been unable to obtain a satisfactory black dye to continue the black linings used in our various grades of cotton lined goods. Naturally it is of first importance that the dye used more particularly on light lines, should be fast and we, therefore, propose making some changes in the color."

support and back through the slot of the upper flap, and a securing buckle attached to the outside of the boot by which the free end of the strap is secured to the boot. The accompanying illustration affords a good idea of the new type of boot.

Fig. 1 is a perspective view of a hockey boot constructed in accordance with the invention showing the parts in the secured position.

Fig. 2 is a similar view to Fig. 1 showing the parts in the open position.

Fig. 3 is a fragmentary plan section through a hockey boot and ankle support showing the means for securing the ankle support in place.

In the drawings like letters of reference indicate corresponding parts in each figure.

## EPICUREAN FEAST ON LIVE LOBSTERS

S. G. AMERO, LONDON

"One of those events in life which relieve business of its monotony, throw kindred souls together and give men a new lease of existence, occurred on Friday evening last," says the St. Mary's, Ont., Journal. "A group of our business men, who are at the same time ardent curlers, at a recent Bonspiel, where they managed to bring home the 'cut-glass ware,' met a noted connoisseur of 'live lobster.'

This gentleman takes no back seat for any chef be he from Boston or San Francisco. He not only treated our curlers to a feast at that time but promised at some future date when touring through Western Ontario, to repeat the dose.

"Accordingly much interest and enthusiasm prevailed when Bob received a wire that the noted chef with many live lobsters from Baltimore would arrive. The lobsters were exhibited in Bob's store window that the envious might gaze upon them, and that no doubts might arise as to their liveness.

"At eight o'clock sharp the enthusiasts met at one of their homes where in the dainty kitchen, the cooking of our friend Teddy, of 'Billy's Bungalow' fame, was put completely in the shade.

"The feast was fine, the spirits of those enjoying it most effervescent and a glorious time was spent. After the banquet, speeches and songs were indulged in. One of the most enthusiastic of the 'silk stockings' who had recently been in London delivering one of his addresses, was prevailed upon to give an outline of it for the benefit of those present, and all agreed that it was no wonder so much of this individual's time was occupied in addressing large audiences.

"Of course, the wives and lady friends of these curlers and live-lobster fiends were curious, but all were barred from attendance. Rumor has it that several young ladies were extremely desirous of meeting the renowned chef, and Bob arranged that some should. Whether it was the capacity for cooking or not that interested the ladies, we are not sure, but one thing was proven that night beyond question, that he can cook 'live lobster' to perfection."

The visiting chef referred to, who prepared such a royal feast, and is such an expert manipulator in all culinary matters, is S. G. Amero, manager of the London, Ont., branch of the Kaufman Rubber Co., and the "Bob" who is mentioned as being one of the prime movers, and the principal guests at the St. Mary's feast, is R. M. Northgrave, shoe merchant. It may be interesting to state that the start of this conviviality and camaraderie took place in London, Ontario, last winter, when Mr. Northgrave and a few friends, were there on a curling trip, and Mr. Amero had a supper served in the warehouse for them, doing the cooking himself. He promised to give them a live lobster feed some day, and, faithful to his pledge, carried out the program in the "Stone Town" a few nights ago. Naturally the event caused some commotion, which has been well depicted and ably presented in the foregoing newspaper clipping.

## PLAY THE NOVELTY SHOE GAME

The milliner takes a hat shape and materials valued at a few dollars and makes a hat—known at this stage as a creation. The value of the hat has increased several times, according to the skill and taste of the designer. For this reason the millinery business (or art) has been more profitable than the shoe business. The shoeman has lately learnt that he too may play the millinery game, in fact at the present time he is almost forced to do so.

The shoeman in years past has set a certain margin as a legitimate profit and has tacked that on, over and above the actual cost of the shoes when delivered to him in the

store and this accounts for the narrow margins that the shoe trade has grown accustomed to.

The shoe man to-day who shows the newest creations is playing nothing more nor less than a millinery game in his shoe department and he should treat this department as such. He should get a big, wide margin of profit that will allow him to clear out odds and ends and broken sizes at the end of the selling season, or at the close of a thirty day run of any one particular style.

None of the popularity that has been accorded footwear recently means that millinery has lost its charm. It simply means that the shoe is playing a more important part in the costume of women to-day than ever before. This, of course, is accounted for by the extreme shortness of the skirt which accentuates the appearance of the foot and ankle and unless these are encased in dainty footwear, they serve to mar rather than enhance the appearance of the balance of the costume.

If the shoeman will, only come to a realization of his possibilities, he will not allow any trivial conditions to kill the novelty shoe. Instead of novelty footwear being a drag on the market, it is a blessing to the shoe man who will play them. Of course, to play the novelty shoe game and make a good profit out of it means a lot of study and extremely close attention to the demands of the trade.

To prove that the novelty footwear business is not confined to large cities, one only needs to take a trip to any live town that has some good, bright merchants. It is surprising to note the number of novelty shoes that are being worn by the women and girls in the smaller towns. As to whether or not these shoes are purchased in the city, the local shoe men alone can answer.

## ENEMY LEATHER CONDITIONS

The German trade papers are whistling to keep up their courage. They point to the cutting off from England of such supplies as German box calf and similar lines which is seriously hampering English shoe manufacturers they say. They claim that the shortage in hides and tanning materials is similarly handicapping English tanneries. On the other hand one has only to read reports of the requisitioning by the German and Austrian governments of supplies of sole and upper leather to realize how closely pressed they must be for materials to supply army footwear. Notwithstanding the fixing of prices by the authorities one can gather from the brand of some of the articles the dissatisfaction on both sides. Military people complain that they cannot get enough of the right quality of sole or upper and leather manufacturers claim that they cannot get enough stock for the regular trade. As stated in a former report the leather is put through hurriedly and is not fully tanned. Sole leather hides from outside have been cut off by the blockade and here is where the greatest pinch lies. In a recent speech in the Reichstag Herr Simon said: "Compared with peace times, the German nation paid 866 million marks too much for leather. Only one year ago the German Government decided to fix maximum prices for leather, which are 200 to 300 per cent above the prices paid in times of peace. The hide trade must deliver hides to the authorities, which causes an extra expense of one mark to one mark and a-half on a pair of soles. Energetic measures must be taken, in order that the situation for the workman does not get worse than it is to-day."

# MAKING SUCCESS OF BRANCH SHOE REPAIR SHOPS

How Saskatoon Man Has Developed Business and Made Good Use of Progressive Ideas—Neat Work, Prompt Performance and Good Materials Pay—Carries Stock of Men's Shoes and Believes in Frequency of Turn-over—Prices Must Go Up

F. A. Robinson, who conducts three branch shoe repair shops in Saskatoon, Sask., believes in extension of operations, and is making a success in the line, in which he has been busily engaged for nearly three years. Mr. Robinson is an old Ontario boy, and is well-known in Lindsay, Toronto, and other eastern centres. In 1906 he went to Saskatoon, where, for some years, he was engaged as manager and buyer in the footwear section of two large departmental stores.

It may be stated that, as a boy, he learned the art of St. Crispin with Wm. J. Finlay, of Cookstown, Ont., who has been in that line for forty-five years, and has referred to Mr. Robinson as one of his most distinguished "graduates." When Mr. Robinson saw a capital opportunity for going into the repair business in Saskatoon, he took advantage of it. His health had given out through too close confinement and indoor work, and he spent a year in the lumbering business. Feeling thoroughly invigorated, he thought he would make use of his early experience on the bench, and bought out a shoe repair business at 257 Second avenue S., carried on by Smith & White, and since then, he adds: "If one may measure matters up by health, happiness and earnings, I am well satisfied with my present position." Three months after starting he branched out further and acquired the business at 804 Broadway, carried on by W. A. Rice, formerly of Toronto. The latter had built up a nice steady trade, but desired to dispose of his outfit, in order to go to California, where his family resides.

The next move made by Mr. Robinson was in opening a shop at 801 Twentieth street. He now conducts all three establishments under the name of the Goodyear Shoe Repairers, and has worked up a large connection, having a 22-foot model "N" outfit, with stitcher at his main store, and complete bottom finishing shafts at his other places of business. Mr. Robinson is at the main shop himself, where all soles are stitched on for the branch shops, and considerable stitching done for other shoemakers. He has a youth to run messages, and also deliver jobs to the stores, for the Goodyear Shoe Repairers do work for several retail establishments.

In the winter time additional revenue results by grinding and concaving skates, each shop having a skate grinding machine. Mr. Robinson has recently installed a stock of men's shoes at two of his places of business. Such a line works in very well with the repair trade, and gives a closer connection and more intimate touch with a large number of patrons.

## Have Work Done When Promised

Mr. Robinson believes in the branch system of shoe repairs, in doing good work and having it completed when promised. By his strong, active system of chain stores he serves a much wider territory than he otherwise could, and as profit is made on quantity output, or largeness of turn-over, it naturally follows that three establishments, under a central management, can attain a volume that one store alone cannot expect to secure.

The proprietor believes in aggressive advertising methods, and the accompanying cut is an appropriate

one, showing what can be done to impress the public with the neat character of the work. It is a very fitting emblem for a repair shop. Mr. Robinson gets out among the trade at least once a year and visits the leading repair establishments in other cities. "I always pick up a number of pointers and suggestions, which repay me for my trips," he adds, "and I cannot speak too highly of the courtesy and kindness of the shoe repairing fraternity as a whole. I have never been given the 'cold shoulder' at any place, and have obtained many time and labor-saving hints from discussion and observations with my fellow workers in other places.

## Make a Profit on Your Work

"I cut all my own stock, buying several sides of leather at once. With reference to the recent rather sharp jump in sole stock, and more particularly in tap soles, it seems to me that unless the shoe repair man gets a corresponding increase in prices, he is going to come out at the small end of the proposition by December next. There is no good in doing work for the sake of keeping yourself active, and then losing money. Unless each job yields a profit I do not see much sense in taking it. I have never found that any per-

A BRIGHT ADVERTISING TRADE MARK

manent trade was built upon cheap work. You may think that you have pleased a customer, but when he finds that the stock is inferior, and the workmanship faulty the chances are that you never hear from him again, or in a way that does not add to your reputation as a repairer, and your peace of mind as a citizen."

## Keep Small Stock A-moving

Touching upon the shoe selling end of the business Mr. Robinson says:

"I notice that some members of the trade are carrying a stock of shoes, but some are, to my mind, too heavily loaded up. I called upon one man recently who must have had a stock of five thousand dollars, consisting principally of men's shoes, and I do not think the business that he was doing warranted him carrying over a thousand dollars' worth. He was obtaining these shoes from a distant point when he could just as well have patronized a local factory and secured what he wanted from its in-stock department. It may sound 'western,' but I really believe that on a stock of a few hundred dollars, I am doing as much business in the men's line as he is. We have one pair of a size and order by express, as required, to fill up the gaps. If a certain style does not take well, we have only a few pairs of it on hand, and can push them out quickly and not lose very much money on slow moving stuff. I think a much smaller stock, sorted up often and selling at a smaller margin of profit is preferable. We dispose of our goods pretty close, it is true, but we turn our lines over quickly."

# GETTING THE FAMILY TRADE AND HOLDING IT

**How Leading Boot Repair Man First Got After Business by House to House Canvas, Leaving Attractive Cards, Having Reliable Mailing List and Effective Delivery Service—Telephone Calls and Their Relation to Shoe Repairs—Doing Good Work.**

"Yes," declared Richard Stephens, of the Boot Repair Works, 1088 Bathurst street, Toronto, "I believe in gathering in all the work in one's neighborhood. Here, my trade is largely a family trade. It is one on which we can depend, as much as the grocer or the butcher does on his regular lines of customers. I believe that in the case of a suburban or residential dealer, it is necessary to get out among the people and tell them about your establishment, facilities and prices. Then, when thorough oversight and good business methods are brought to bear upon a well-equipped boot repair shop, there is no reason why it should not be as successful as any other line of trade."

Mr. Stephens started in business at 1088 Bathurst street some three years ago and decided that the best way to get business was not to sit down and wait for it to come in, but to get out and hustle. He knew that there were thousands of people in the north-west portion of the city wearing shoes, and the proper way to induce them to patronize his shop was to bring to the knowledge of such residents the facilities which he possessed. He first issued a large number of neat cards on one side of which was a list of his prices, his address and telephone number, with the statement that all work was

cheerfully called for and promptly delivered, and soliciting a trial order. On the other side was a special telephone list for the doctor, dentist, druggist, dressmaker, milliner, butcher, grocer, etc. It was a handy and convenient card, such as one would keep.

Mr. Stephens first engaged a man to call at every house for many blocks. He left this card and said he would be around in a few days to call for any work that might be ready. One of the first undertakings of Mr. Stephens was to obtain a good mailing list which consists of a card index system, containing the names and street addresses of his customers, although he secured his first list from the telephone directory. He went over each day's coupons and compared them with the cards in the index file and knew exactly how many new customers had arrived in the course of the day. Another method was used for getting after all the work in the neighborhood. Each week an attractive card was printed, giving recipes for cakes, pies, etc. Only one card was issued each week. It was also stated that a man would call for repairs and give the housewife a new recipe next week. This aroused considerable interest and many people got looking for the cards, and in case they did not receive them regularly, telephoned the proprietor. This system is not followed now, but the method worked well for the first year until Mr. Stephens got well established.

Mr. Stephens states that nearly all the work at his store

VARIOUS FORMS OF TAGS USED BY LEADING SHOE REPAIRERS

# And you will say the same

Here's a reproduction of a post-card from one of the most progressive repair shops in Toronto. It speaks for itself. On our files are many similar testimonials from repair men in various parts of Canada, who use large quantities of "Acton Oak" sole leather, with complete satisfaction to themselves and their customers.

Dec. 6 1915

TO  
BEARDMORE & CO., TORONTO

I have tested a sample lot of your "Acton Oak Sole Leather" and find *it very good indeed for sewn work of any description. Nothing could be better.*

Yours truly,

*Canada Shoe Repair*  
*107 Bleecker St*  
Name *B D Dowding*  
City or Town *Toronto*

# ACTON OAK SOLE LEATHER

always works clean and mellow, producing a beautiful bottom finish. It is free from foreign substances so often used to gain weight. Our oak tannage makes the hide fibre solid, tough, strong, water-resisting and flexible.

Our "Acton Oak" is the Super-Superior Sole Leather for machine or hand Shoe Repair Shops

Tanned in vats, not wheels—the method that insures honest, mature leather; tanned from clean fleshed hides—that gives you all the leather.

You need not hesitate to use it—every pair of shoes you sole will be an advertisement for the high quality of stock you use, and your business will benefit accordingly

is called for and delivered and a very large proportion of the business comes in by telephone. Another scheme adopted by him some time ago was a monthly art calendar to each customer, about 500 being circulated. By maintaining an intimate touch with his customers, seeing that good service is given them and sending them literature at different times, the proprietor maintains a close working connection with his clients. He finds that if one member of a family is satisfied, it is generally the passport to more business from that household. Such families often make favorable mention of the work done for them to their neighbors and thus, by word of mouth, satisfied customers, etc., does the reputation of a boot repair man spread and he maintains a standing and prestige that always assures him of plenty of work and a busy shop at practically all seasons of the year.

#### The Part Played by Telephone

Mr. Stephens reports that practically all his business is by telephone. It took time and patience to establish this connection but all the efforts have been worth while. Recently he sent out a card emphasizing this feature of his service. It read: "The usefulness of the telephone was never better exemplified than in the relation to our shoe repairing. Most of our business is done over the telephone. Our customers find it most convenient to call up and give their instructions and we do the rest. We send for the boots and return them to you on your own specified time. What could be simpler? May we not add your name to our list and you will find the results most pleasing. We invite a trial order, especially if you are particular about your repairs."

Always receptive to new ideas, Mr. Stephens soon got in touch with the producers of Neolin when put on the market. He has made a specialty of putting on soles of this material, which is rapidly coming to the front as a substitute for sole leather. He does not believe that the shoe repairer should make a slave of himself by incessant labor and his place of business is now closed every night at eight o'clock, whereas he formerly kept open until nine and after. He finds that he does just as much business by shutting up early, and during May, June, July, August and September he gives himself and his staff a weekly half holiday. He has a well selected mailing list and here is a copy of a neatly printed circular in letter form which he sent out to the trade. It is well worded and appeals to the better class.

#### What Good Shoes Mean to All

Dear Sir or Madam:

In the year 1870 France lost Alsace and Lorraine partially because their soldiers were poorly shod—so we are told by historians—for no army is better than its boots.

The military authorities of the world have all profited by that costly lesson to France.

We civilians, too, stand to lose very materially in the battle of life if our footwear is defective—leaking shoes, depleted vitality, cold, pneumonia, consumption—lose! Yes, even life itself is often sacrificed for the want of a pair of soles properly put on.

We have built up a large boot repairing business by giving more for the money than can be obtained elsewhere.

Our plant is second-to-none in Canada, which enables us to turn out work expeditiously.

We very appropriately call our system the "Like Nu Way," for we can make your shoes both look like new and wear like new.

A strong feature with our method is that we run the soles clean through from toe to heel. This makes the shoes absolutely waterproof, prevents the breaking down of the arches, and eliminates any possibility of shoes squeaking. This is re-soleing and

far superior to putting on a patch of sole leather, commonly known as "half soles."

Should you prefer rubber soles and heels, as many do, and thus prevent slipping, we can please you. Remember, we call for and deliver your work. Delivery made, if desired, within a few hours.

We invite a trial order, especially if you are particular about your footwear. We guarantee to satisfy you. A 'phone call or post card will bring us.

#### Raised Prices Ten Per Cent

Recently prices, owing to the advance in leather, thread, nails, cement and other supplies have been increased about ten per cent. on both nailed and sewn work, but no objection has been made by customers who recognize that the figures for practically all necessities in life have been raised through conditions brought about by the war and over which the repair man, like others, has no control.

#### BETTER PRICES FOR SHOE REPAIRS

The Ottawa Shoemakers' Association has been formed and starts under most promising conditions. The men in the repair trade in the Capital City feel that they have not been getting a fair figure for the work that they do, in view of the constant increases in the price of leather and other requirements, and consequently the prices have been advanced about 15 per cent. The election of committees will take place at the next meeting. Practically all the members of the trade are included in the membership. The organizer is E. A. Schryburt, 641 Somerset street, who is also acting secretary-treasurer of the organization. The new price list which prevails is as follows:—

#### VACUUM CLEANER IN THE SHOP

A Western shoe repairer writes the SHOE AND LEATHER JOURNAL that every man, who has a power machine, has a fan or blower for drawing in the dust and scourgings, and so has quite a powerful vacuum cleaner at his disposal, if he only thought so. The proper way is to put a connection in the pipe with the tube coming out far enough for a one inch or one and a quarter inch hose. Then put a damper or shut off in the pipe so as to close off any leakage of suction and at an expense of \$1.00 or less the repairer has a good vacuum cleaner. The cost of the hose is extra, of course.

# The Shoe Repair Man

**T**HE Leather and Balata Shoe Repair Co., of which H. J. Eady is the proprietor, have removed from Richmond St. to 31 Yonge St. Arcade, Toronto, where spacious and well-lighted premises have been acquired. Mr. Eady is an ardent believer in the trade-producing qualities of printer's ink, and in advertising prices and service. Owing to the scarcity of help he has been working under disadvantages for some time past, the same as other members of the repair trade, but business on the whole has kept up very well. He uses the large windows at his disposal for showing the different kinds of finished work, half sole, full sole, three-ply Balata sole, which is waterproof, and always keeps the foot dry and comfortable. Not only are samples of the different kinds of work shown, but prices are given. Mr. Eady also has a very well-stocked department of shoe findings. In a busy down-town shop, where trade comes from practically all parts of the city, it is impossible to call for and deliver parcels, as it means ten cents additional to each job. In the past calls have been come in for work and the job probably did not amount to more than 25 cents. The result was that the cost for collection and delivery ate up all the profit, and a great deal more besides. People now generally leave their parcels and call for them at a stated time.

"The main thing is to have them ready, and use good stock, charge a fair figure and let no slovenly, badly-finished work go out of the place," declared Mr. Eady. The name and address of each customer is always taken. On the tags which are numbered consecutively appear dotted lines and space for the name and address of the customer, whole soles sewn, half sole sewn, half sole nailed, turn sole sewn, patches, rips, heels (rubber, leather or new), the date when wanted, and the price. No slip is given out to the customer at all and finished jobs are kept in compartments, under initials A, B, C, D, etc., and no confusion results. Mr. Eady does not believe in giving a check or a stub to the customer. When calling, if he gives the name and address, these are generally sufficient details for identifying the work.

## The Scarcity of Leather

Some shoe repairers have apparently felt that the scarcity of leather was making things very hard for them. Many of them have been trying to maintain their old prices, and in order to do so have bought cheaper stock. This is the greatest mistake they can make, because they are depreciating the repair business every time they give a customer poor wearing stock.

To illustrate this, on a pair of \$4.00 shoes, if a man wears these shoes four months and wears the soles through, then he has them resoled and heeled at a cost of \$2.00, using high-grade stock, and they wear six months longer after the repair job, the man's shoe cost is one dollar a month on the new shoes and something like forty-two cents a month on the repair job.

Obviously, this man made money by having his shoes repaired. But turn the matter around the other way. Assume that the repairer used cheap stock at \$1.50, and the shoes after they were resoled only wore a month. Then the man's shoe cost was one dollar a month on the new shoes and \$1.50 on the repaired shoes. In this case the man lost money by having his shoes repaired.

My point is that the repairers should turn the scarcity

of leather to their own advantage by using better leather in their repair work. The quality of their leather will be all the more conspicuous by reason of the scarcity of leather compelling the shoe manufacturers to use poorer selections in their soles.

The shortage of leather encourages economy in its use, and should be made to encourage a larger volume of shoe repairing business. All that is necessary is for the shoe repairers themselves to wake up to their own opportunities of enlarging their business by using better materials and better workmanship at whatever prices may be necessary to give them the profit to which they are entitled.

## Leave the Edge Full

Every time a shoe repairer trims the edge of the repaired shoe more than the smallest possible amount he is reducing his chances of another repair job on the same shoes.

I have noticed some repairers who seem to be in the habit of treating each shoe as if they never expected to see it again, and never wanted to. In the first place, they sew in just as far as they can, and then trim a lot off the edge, very often trimming into the old stitches. They try to slick up these rough places by filling the holes up with heel-ball or black wax, and then they wonder why they are waiting for work so much of the time.

What is the use of putting a full-sized sole on a shoe and then wasting it by trimming it down and trimming the old welt along with it? Why not give the wearer the benefit of the full wearing surface of the sole, and at the same time preserve to the last possibility the original shape of the shoe? If there is a second repair chance on this pair of shoes, it will be preserved in this way. Leave the sole full and give the wearer the full wearing surface of the sole.—**The Shoe Repairer.**

## The Importance of Finish

The finish of your repair work is just as important as any other part of it. The old-fashioned method of leaving the bottoms sanded white without any finish at all, is an advertisement that the shoes have been repaired, but it is not an advertisement for the repairer.

Many people would have shoes repaired, that do not now do so, if they could have them done so well that the fact that they had been repaired would not be conspicuous.

Some people are proud and like to have the appearance of prosperity. They live beyond their means, perhaps, and they do not care to advertise to their friends that when the first soles of their shoes wear through that they have the shoes repaired; especially are they not inclined to do this if the work that comes from the repair shop is of such a nature as to make it conspicuous that the shoes have been repaired, and in a bungling manner at that, so that the repaired boot looks to the owner and his friends like the proverbial sore toe.

Not only should the heel and forepart edges be finished up true to original shape and the original appearance of the shoe preserved so far as edge shape and finish is concerned, but the bottom should be finished also, so that when the shoes are returned to the wearer they have a finished appearance and do not stand as an advertisement that the wearer is in straitened circumstances and has to have his shoes repaired by cheap and bungling workmen.

*W. J. Eady*

# AMONG THE SHOE MEN.

Oscar Clement, representing Max Clement, Quebec, was a recent visitor to Montreal.

The Kingsbury Footwear Co., Montreal, recently withdrew all prices.

Stewart Smith, of Beamish & Smith, North Bay, spent a few days in Toronto recently on business.

The ratepayers of Elmira, Ont., voted upon a by-law last week to grant a loan of six thousand dollars to the Ideal Shoe Co. Limited, of which W. E. Metz is president and F. Nolinsky general manager and superintendent.

H. V. Gale, of Gale Bros., Quebec, was in Montreal last week on a business trip.

J. W. Brown, of Stirling, Ont., after doing business for thirty-one years in the 'one stand, has, owing to ill health, sold out to J. T. Cook & Son, who will continue in the same premises.

George A. Kent, shoe retailer, of Truro, N.S., died recently after a long illness due to a general breakdown. He was 74 years old and leaves a wife, one daughter and two sons. He was many years ago in the shoe line in Halifax. Mr. Kent was a leading Odd Fellow, in which order he had held many high positions.

A. E. Marois, of Tourigny & Marois, shoe manufacturers, Quebec, was in Montreal recently on business.

J. E. Samson, shoe manufacturer, Quebec, spent a few days in Montreal recently.

M. A. Shafer, president of the Moore-Shafer Shoe Manufacturing Co., Brockport, N.Y., is recovering from a serious illness, following an injury to one of his feet. In alighting from a train, on his return from a trip to Florida

recently, he turned his ankle. An X-ray examination revealed a split bone. Other complications set in and for a time it was feared he could not recover, but latest reports say he is out of danger.

D. D. Hawthorne, wholesale shoes, Toronto, was in Montreal and Quebec recently on business.

A. A. Strang, of Strang Bros., Winnipeg, manufacturers of shoe polish and dressing, is on an extended business trip throughout the western provinces.

John F. Clark, of Clark Bros., shoe manufacturers, St. Stephen, N.B., was in Montreal and Boston last week on business.

The Kingsbury Footwear Co., of Montreal, are installing additional machinery and will soon start making women's welts.

Ralph Locke, of Dufresne & Locke, shoe manufacturers, Maisonneuve, Que., has returned from a business trip to Boston and other New England points.

Shoe buttons advanced again May 1st. Buttons, sizes 3½ to 4, quoted some of them at 24c, are now quoted at 40c a great gross. Sand paper is very firm and likely to advance again owing to the scarcity of materials. Felt box toes are also likely to go higher because of the wool situation.

Parker, Irwin, Ltd., Montreal, have installed cutting and moulding machinery for their Carbicon goods, enabling them to supply this line for heel scouring work at considerably reduced prices.

A. C. Kimmel, of the Cobourg Felt Co., has sold his residence on Arthur Street, Elmira, Ont., to O. H. Vogt, manager of the Great West Felt Co., Elmira.

## TWO BRIGHT YOUNG LADIES WHO KNOW SHOES AND TRAVELERS

The SHOE AND LEATHER JOURNAL has the pleasure of presenting in this issue interesting snapshots of the two successful lady competitors in "guessing the travelers" contest, which was recently conducted and aroused wide concern among the trade.

The one on the left is Miss Mary Wood, who has been for some years with W. R. Baird, 433 Colborne street, Brantford. Miss Wood is an obliging and energetic sales lady who has made many friends with the public. She is

enthusiastic over her work and takes particular pains in the matter of fitting.

Miss Nina Reynolds, who captured second award, is seen on the right. She is a sales lady in the store of her father, Geo. E. Reynolds, Stirling, Ont. "I was quite surprised," she says, "to receive the second prize." Miss Reynolds evinces much interest in the shoe game, and adds that she always enjoys reading the SHOE AND LEATHER JOURNAL, and looks forward to its regular appearance.

William Parker, who has been employed by the Parker Shoe Co., of Preston, Ont., has donned the King's uniform and was presented by his fellow employes with an appreciative address accompanied by a wrist watch.

Knechtel & Co. have installed a new window front in the shoe store now occupied by them on Downie Street, Stratford, Ont. The improvement is so marked that many people stop to admire it. The double deck floors and the mirror arrangement allow for the displaying of shoes to the very best advantage.

The Perth Shoe Co. of Perth are particularly busy at present. Their different departments are running to capacity on goods for immediate delivery. Recent visitors to the factory have commented favorably on the many improvements which have been inaugurated under the direction of Mr. G. H. Ansley, which are reflected in the shoes being turned out at present. Superintendent M. J. Sheehy has just returned from a buying trip to United States where he has been securing materials and picking up ideas for new samples. One of the latest lines introduced for fall by Manager Ansley is a woman's sport last, a natty looking shoe that will appeal to wearers for walking or for any sport requiring a good shoe that is not too heavy. It will be made with both heavy and light soles, as well as rubber and Neolin.

Fred O. Porter, formerly with the Brown Shoe Co., St. Louis, and until recently foreman for the making and finishing rooms with Scott-Chamberlain, Limited, London, Ont., has taken a position as salesman with the Lionne Co., of Boston, with which concern he was connected some years ago.

K. D. Gahan, who for some time past has been in charge of the finishing room of No. 1 factory of Ames-Holden-McCready, Limited, Montreal, has been given charge of the making room in the same factory.

B. W. S. Martin, general sales manager of the John Ritchie Co., Quebec, was in Toronto last week on business.

W. R. Billings, formerly with J. J. Haines, Belleville, and latterly with the Smardon Shoe Co., Montreal, has taken a position with the Regal Shoe Co., Toronto and will call upon the trade in several of the smaller cities and towns in the Western Provinces. He leaves for the West this week, with a fine range of fall samples.

Griffith B. Clarke, of A. R. Clarke & Co., Toronto, and A. E. King, of the Dunlop Tire and Rubber Co., Toronto, have been nominated for membership on the Board of Directors by the Ontario Division of the Canadian Credit Men's Association. At the annual meeting held in Toronto last week the Association strongly endorsed the universal adoption of the daylight savings bill throughout the Dominion and urged commercial and financial houses to give the same their unequalled support.

It is predicted that the sport or walking shoe for women with a low, flat heel about an inch in height, will have a big sale for fall. These are now being shown in several of the large American cities on comfortable lasts, with tips and with six to seven inch leg. They come in tan, white buck, grey buck, black and other colors, with fancy perforations, and saddle straps across the vamp of tan, black, green and other colors as well as combinations. It is also predicted that two tone effects will be popular for fall. In high-cut kid models all shades of gray, white, ivory and champagne are having a big call.

Edward F. Keene has been appointed superintendent of the Regal Shoe Co., Toronto, and has entered upon his new duties. He has held many important positions and was for some years in the leather business at Whitman, Mass. Later he was general manager for the Fisk Shoe Co., at Hollbrook, Mass., and for the last few years has been in charge of the shoe factory of Sears, Roebuck Co., at Randolph, Mass. He is thoroughly experienced in the manufacturing and financial ends and will look after these departments while C. S. Corson will continue as general sales manager of

the company, which position he has filled ever since they started manufacturing in Toronto five years ago.

A special meeting of the shareholders of the Standard Tire and Rubber Co. was held recently in Guelph. The object was to consider the sale of the plant to an American concern. The price and terms offered were not considered satisfactory, and a resolution was passed agreeing to sell at a much higher figure and on different terms, on condition that the purchasers should agree to carry out a five-year contract which the Standard Co. have with the Canadian K. and S. Co., of Toronto.

Fred Antrobus, shoe repairer, Coleman, Alta., has enlisted with the 192nd Battalion, with which he is sergeant shoemaker. He has sold his business to A. Gentile, who has been in the shoe repair line for the past five years.

Peter A. Doig, general sales manager of the Star Shoe Co., Montreal, spent a few days in Toronto last week calling upon the trade.

J. A. Scott, Quebec, was in Montreal last week on business.

Miller Extracts, Limited, has been granted a federal charter with a capital stock of \$200,000. The new company is empowered to manufacture, buy, sell and deal in dyes, dye-stuffs, tanning and other extracts and chemicals derived from the products of the forest or from other vegetable or mineral products, and to carry on business as leather manufacturers, tanners, bleachers and dyers.

J. P. Kilgour, vice-president of Kilgour, Rimer Co., wholesale shoes, Winnipeg, was in Toronto, Montreal and Quebec recently on a business trip.

J. A. Joyce has been appointed superintendent of the Wm. A. Marsh Co.'s plant, Quebec, and has entered upon his new duties.

J. B. Douglas, shoe retailer, of Calgary, accompanied by his brother, George Douglas, of the Avenue Shoe Store, Winnipeg, were in Toronto, Montreal and London last week on business.

## NOW THE PARKER SHOE CO.

The name of the Solid Leather Shoe Co., Limited, of Preston, Ont., has been changed to the Parker Shoe Co., Limited, which has just been federally incorporated with a capital stock of \$49,000 and takes over the assets, goodwill, plant etc., of the former company. An extension is now being erected to the factory and the capacity within the past year has been doubled.

S. H. Parker as managing director of the company for the past two years and over, deserves much credit for his enterprise and aggressiveness. The Parker Shoe Co. now specialize in women's fine McKays. Mr. Parker has been at the game 35 years and is well liked by all his customers. He began his career with his brother, J. C. Parker, now of St. Albans, Vermont, when the latter ran a shoe store in Montreal, as a retail branch of James Leggatt. Later he was employed in the large warehouse for a couple of years, but returned afterwards to the retail end, when his brother became proprietor of the branch business on McGill street, which he had been conducting. S. H. Parker first traveled for the Lynn Shoe Co., of Montreal, and covered eastern Ontario. He was then with the Tetrault Shoe Mfg. Co. for about ten years, first calling upon the retail trade and afterwards supplying the wholesale. Several years ago he joined the staff of the W. A. Marsh Co., at Quebec, as salesmanager, and made frequent visits to wholesalers in Quebec, Ontario and the Maritime Provinces, with whom he established a strong connection. He became manager of the Parker Shoe Co. in December, 1913.

MANAGER OF THE SHOE SECTION OF  
J. F. CAIRNS' STORE, SASKATOON

EDMOUR BROUSSEAU  
WHO LATELY JOINED THE SELLING STAFF OF  
CORBEIL, LIMITED, MONTREAL

E. Lippert, shoe dealer, of Warton, Ont., formerly of Walkerton, has sold his business to Ashley Bros., of Warton.

Harry J. Fox, who for several years was in the employ of the J. J. Haines' Shoe House, Napanee, Ont., and for the last three years has been with the Burns Co., Limited, Oshawa, has accepted a position with the T. Eaton Co., Toronto, in the shoe department.

The shoe merchants, of Calgary, have signed a collective early closing agreement for the summer months which went into effect last week. The agreement provides for the closing of all shoe stores at 6.30 each evening, except on Saturdays and the nights preceding holidays, when the hour will be 11 p.m. The following firms have signed the agreement:—Richardsons, Limited, G. E. Locke, Nickle Boot Shop, J. B. Douglas, F. H. Baiden, Murrays Limited, Packham & Marshall, Hood & Irvine, Glass Bros., and Classic Shoe Store.

J. H. Bell, shoe retailer, Charlottetown, P.E.I., is having his store renovated.

A very brisk and thriving industry is the Humberstone shoe factory at Humberstone, Ont. This industry will turn out 85,000 pairs of sandals during the present season, and the present output is 800 pairs a day.

T. J. Mullins, of the Toronto warehouse staff of the Kaufman Rubber Co., was quietly married on May 11th to Miss Rhea Mitchell, daughter of the late Thos. J. Mitchell, of Burnt River, Ont. Mr. Mullins, who is a former resident of Halifax and Truro, N.S., has many friends in the trade who will wish him and his bride every prosperity. He was the recipient of valuable presents from the firm and traveling staff. Mr. and Mrs. Mullins have taken up their residence at 58 Shannon street, Toronto.

The F. S. Carr Rubber Co., of Canada, with a capital stock of \$200,000 has been incorporated with headquarters in Toronto. The company is empowered to manufacture, sell, trade, and deal in rubber, automobile and carriage fabrics, rubberised or other wet resisting materials and cloths.

The shoe stock of Smith & Cunningham, 133 Roncesvalles avenue, Toronto, who made an assignment a few days ago, was sold to Hubert Ashplant & Sons, London, and has been shipped to that city.

H. L. Geene, who has for many years represented the White Shoe Co., Toronto, in Eastern Ontario, has opened fine new sample rooms at 41 Queen street, Ottawa.

Harry Thompson, representing the Thompson Shoe Co., and the McCrudden Shoe Co., Montreal, was in Toronto last week calling upon the trade.

G. H. David, of Toronto, who represents the St. Henri Shoe Co., Montreal, in Eastern Ontario, has recovered from an attack of pneumonia.

John A. Walker, of Walker, Parker & Co., Toronto, is spending a few days in Boston and other shoe centres on business.

A. T. Haines, late of Ames-Holden-McCreedy staff, Toronto, has joined the force of travelers for the Miner Rubber Co., Toronto, and is covering Northwestern Ontario.

E. J. Dunbrook has gone into the shoe business in Berlin, Ont., and has a neat, well appointed store.

Huehn Bros. have bought out the business of Oscar Steiss, Heidelberg, Ont.

The general stock of C. P. Brown, Colborne, Ont., who recently made an assignment, has been sold to Fenton & Smith, of Pembroke, Ont., at sixty-nine cents on the dollar. The stock amounted to about \$21,000.

R. N. Williams, who was formerly in the shoe business on Roncesvalles avenue, Toronto, has taken a position in the footwear department of the Robert Simpson Co., Toronto.

John F. Faulds, formerly salesman with H. Ashplant & Sons, London, is now a member of the Mechanical Transport Division and is at present in England.

E. B. Paige, late of the Regal Shoe Co., Toronto, has taken a position with the Goodyear Rubber Co., Toronto, in the shoe findings department.

A new type of outing shoe is being made by the Kaufman Rubber Co., Berlin, which is becoming extremely popular for summer wear. It has an eight-inch bleached duck top, with white rubber sole and carries a solid rubber heel or low heel.

R. B. Wanless, of Coates, Burns & Wanless, London, Ont., was in Montreal and Quebec last week on business.

Jas. A. Arnott, of Orangeville, Ont., spent a few days in Toronto recently calling upon the trade.

George R. Lovell, son of James S. Lovell, a widely known shoe traveler, of Toronto, who joined the 74th Battalion, Toronto, is now at Bramshott, England. Previous to enlisting he was with the Toronto Hydro-Electric System.

### MR. OWENS STARTING IN BUSINESS

Charles L. Owens, who has been associated with the Royal Shoe Co., Limited, Toronto, for the past eighteen years and for a long time past has been general manager, has resigned and intends going into business on his own account at 94 Yonge St. in the premises now occupied by Wm. Mara. He will have associated with him J. T. Elmes, who was with the Royal Shoe Co. nine years and latterly held the position of assistant manager. Mr. Owens has been spending

CHARLES L. OWENS, TORONTO

a few days in Boston, New York and other centres on a business trip. C. F. Tugman, president of the Royal Shoe Co., recently observed his twenty-second anniversary in business. The new general manager of the company is N. A. Smyth and the assistant manager, C. L. Timmins, both of whom have been on the staff of the Yonge street establishment for some time.

A provincial charter has been granted to Owens-Elmes, Limited. The capital stock is \$40,000 and the headquarters of the new concern are in Toronto. The company are empowered to buy, sell and deal in boots, shoes, findings, etc., and expect to open a handsome and well equipped shoe store in the near future at 94 Yonge street. They will handle many high-class lines.

### HANDY DEVICE FOR REMOVING BUTTONS

One of the neatest and handiest devices for removing buttons from a pair of shoes is the Gem Button Detacher. It does exceptionally quick and clean work, being safe, sure and easy. Among its other advantages is that it protects

the shoe from being torn or cut, and all the buttons are collected in the small cup, when cut off. This little machine, which is manufactured by the L. & E. Reeves Co., Cleveland,

Ohio, is made of the best materials and is fully guaranteed. The Canadian selling agents are Canadian Novelty Shoe Findings Co., 2 Trinity square, Toronto.

Doherty & Roy, leather dealers, Montreal, have dissolved partnership.

The Stag Shoe Co., wholesale shoes, Montreal, have recently registered.

H. D'Artois has resigned from the staff of J. A. Scott, Quebec and Montreal. The manufacturers' findings department will in future be handled under the supervision of W. A. Lane, who has for several years had charge of the Montreal office.

The Daily News, of Chatham, Ont., recently issued an industrial exhibition section, in which the natural advantages of the county of Kent were presented, and the announcement made that four new industries were starting Chatham plants. The industrial exhibition section contains an interesting announcement from the Chatham Shoe Co. Ltd., giving a picture of the factory and one of E. S. Hunt, the president, as well as several of the latest styles of shoes turned out by this enterprising concern, who state that they are now ready for business, and that the company in building, equipment and shoemaking ability, is one of the best in Canada. Their lines are women's welts and McKays. The travelers of the firm are now on the road with all the different up-to-the-minute lasts, colors and patterns.

The retail merchants of Quebec city have formed an association. The object is to safeguard the interests of the retail trade no matter what the line of business, and to obtain the co-operation of the manufacturers, the producers and wholesale merchants, for just and equitable prices on all lines of goods and to work together for the welfare and progress of all, as well as to establish friendly relations. The new organization starts off with much enthusiasm and a growing membership. L. F. Falardeau, who is widely known in the shoe trade, has been elected honorary vice-president, while O. N. Shink, shoe retailer, has been made secretary. Among those connected with the footwear trade, who are warm supporters of the new association, are Jos. Plamondon and J. A. Bilodeau.

### SHOE PRICES KEEP GOING UP AND UP

When the late Hon. J. Israel Tarte was Minister of Public Works in Canada, he was speaking at a public meeting one night many years ago and was interrupted by a heckler who asked him why the expenditure in his department had increased so enormously. The aggressive and irrepressible French-Canadian politician, with a twinkle in his eye, significantly remarked, "So you think the sum is heavy, eh? Well, just wait until you see us next year."

The same observation might be applied to the constantly advancing shoe prices. If retailers think they are heavy now the consensus of opinion is, just wait until you see prices next year.

A member of a leading sole leather firm, who is not given to exaggeration or raising false cries, declared last week that he fully expected No. 1 oak sole stock would be a dollar a pound within a year, owing to the scarcity of hides, the shortage of herds, increase in the cost of tanning agencies and the difficulty of getting bottoms for transportation, not to speak of the labor problem and other disturbing factors occasioned by the war.

An Ontario shoe manufacturer recently obtained from a well-known Canadian firm turning out upper leather a comparative statement of the prices of box calf, country veals, matt calf, gun metal, velours and Russia calf that prevailed a year ago and those of to-day. The result astonished even him. The increases run all the way from eleven to sixteen cents a foot on every grade and are all subject to change without notice. This advance alone on upper stock would make a change of thirty-three to practically fifty cents and more on each pair of shoes, allowing three feet to a pair.

The question is now being asked by retailers of many manufacturers, "Can you not give us a shoe in calf leather that will sell for five dollars?" and the invariable answer is, "Not unless we use side leather." Shoes, which formerly sold at three forty and three fifty are now three ninety and four dollars and the end is not yet.

"See this shoe here," remarked a leading jobber the other day, "I formerly sold this men's dull calf blucher for three dollars, and not long ago the price was raised by the makers so that I had to get three twenty-five for the same. To-day I received word from the firm that they could not give me the shoe at all except in side leather and that at a figure which means that I will have to raise it to three fifty. Here is an increase of fifty cents a pair and a change from calf to side leather at that. I do not know what the next move will be."

An eastern manufacturer was up against it for calf and veal leather. He could not get a supply and determined to buy the skins himself in Boston and have them tanned at a local tannery. He had to pay spot cash for the skins, amounting to many thousands of dollars, but hesitated at sending such a large sum and thought over the proposition for several hours. In the afternoon he wired acceptance, along with the money. Back came the answer—"Lot referred to sold; we can give you another but the price will be eighteen hundred dollars higher." Thus a delay of a few hours on the purchase of calf and veal skins cost this manufacturer eighteen hundred dollars and he was glad to get the supply at any price.

One leading firm last week refused a shoe manufacturer an order for glazed kid at any figure, declaring they could not accept more business under any circumstances, and this shoe firm have bought heavily from that leather house for years.

On dull kid prices are from eight to ten cents higher than they have been for the same grade and then only very limited supplies can be obtained. But it is not in leather alone that the tanner and the shoe manufacturer are up against it good and hard. The quotations for laces, buttons, insoles, duck linings, nails, trimming of all kinds, etc., are soaring at a rate never known before.

One may well ask where and when relief will come. No man knows but there is one thing certain that the retailer who buys staple lines is well advised and exercising sound foresight to place large orders now, even at the prevailing high prices. Every indication and inquiries from every source foreshadow the fact that prices, though high now, are very mild to what they will be a few months hence. The retailer will not only have to pay more but get more from the consumer. There is no dodging or sidestepping the issue.

### NEWSY BRIEFS FROM OLD QUEBEC

The following were recently in Quebec:—Walter H. Locke, representing Geo. J. Kelly & Co., Haverhill, Mass.; L. H. Dupre, of the Independent Box Toe Co., Montreal; James Boyd, representing Nugget Polish Co., Montreal; R. E. Woodward, of F. E. Townsend & Sons, Lachine; A. Isseman, of Walpole Rubber Co., Montreal; J. E. Gaumont, of La Cie des Cuirs et Chassures, Plessisville, Que.; H. Hurtubise, of the Panther Rubber Manufacturing Co., Sherbrooke and L. S. Odell, Montreal.

The Comfort Shoe Co. are installing new machinery and working on their samples. They have been granted a provincial charter, the share capital being \$49,000.

Bertrand & Thibault have now completed their various installations and are at work on their samples.

The repairs on the establishment of Brown & Rochette, wholesale shoes, are completed and the appearance of the building is greatly improved.

M. Amelieu Beaubien, of Louis Beaubien, and L. Borne have each purchased up-to-date six-cylinder automobiles.

GETTING READY FOR CAMP BREAKFAST AT RIVIERE A PIERRE, LAKE ST. JOHN DISTRICT, QUE. PETER OUELLETTE, SHOE AND LEATHER FINDINGS, ON THE LEFT, WILBROD RICHARD, SUPPLIES, AND JOS. TANGUAY, SHOE MANUFACTURER

Jos. Blouin, shoe dealer, has bought the building where he is located on St. Valier street, and is using the bottom flat for his store.

Ed. Laforte, shoe dealer, of St. Valier street, has removed a couple of doors from his old stand and has added considerably to his stock. He now has one of the finest shoe shops in the city.

Geo. E. Amyot, corset manufacturer, has bought the building formerly occupied by the Rock Shoe Co., which was visited by a serious fire some time ago. The walls have been pulled down and a larger structure will be erected.

Leather is continually on the increase. Winter tan calf is now fifty cents a foot, box calf forty-eight cents, and there is practically no kid in the market. Calfskins procured from the butchers cost thirty-four cents a pound. Black chrome lamb costs sixteen cents a foot and is very scarce. On account of the high price of leather, it is likely that fabric tops will take its place to some extent.

492 St. Valier Street, QUEBEC

Murray Ray, formerly of Sault Ste. Marie, has been appointed manager of M. B. Young's shoe store, 924 Bloor street West, Toronto, and has entered upon his new duties. He succeeds John Day, who has enlisted for overseas service and is a member of the 208th Battalion.

E. J. Bliss, president of the Regal Shoe Co., and Edgar Gould, director of sales, Boston, were in Toronto recently on business. Harry Litchfield, formerly of the Toronto factory, also spent a few days in the city.

A. Levy, shoe retailer, 260 Yonge street, Toronto, has returned from a business trip to New York and Boston.

Arthur Bland, who for the past four years has been in the women's department of H. & C. Blachford, Yonge street, Toronto, has enlisted for foreign service and has joined the 129th Battalion, Dundas, Ont.

J. G. Settle, who represents the Murray Shoe Co., London, was in Toronto for several days recently showing a fine range of autumn samples.

H. H. Lightford, superintendent for J. M. Humphrey & Co., St. John, N.B., was in Boston recently on a business trip.

Wilfrid Comeau has removed his shoe repairing shop to 22 Maple avenue, Amherst, N.S.

Perth, Ont., will soon become a thriving shoe centre owing to the shoe factory being so busy. Last week no less than seven families of shoe workers were brought to the town by the Perth Shoe Co., Limited, says a local paper.

## Pharaoh used to write his letters on a brick

and it certainly must have been tough work in Pharaoh's days for the bookkeepers when they had to make out their monthly statements. Still it was the only way they had until some bright spark discovered a better method. And then, right there, began the troubles of the discoverer, for thorny is the path of the business reformer. In days gone by, when Canada grew good timber, as close as the hair on the hide of a cow, wooden shipping cases were all right. But there's a better method now—*better and cheaper!* It's a fact! We can prove to the complete satisfaction of any manufacturer that he can actually effect the savings here indicated by using

### Martin Corrugated Fibre Board Shipping Cases

And, moreover, this line is an All-Canadian product. By using them you have all the satisfaction of knowing that Canadian capital is being employed to the certain, if indirect, benefit of this country. But the savings you can effect are our unanswerable argument—an argument that no man of the least business capacity can afford to ignore.

# The Human Foot

**Anatomy, Deformities and Treatment**

By DR. WM. M. SCHOLL, Chicago

**T**HIS book has been written and published after repeated requests and demands of those in the shoe trade seeking practical information on the human foot in its normal and abnormal conditions. The book is written with a view of meeting the requirements of the layman, as the dry, technical terminology has been dispensed with.

It is written in clear, plain style that everyone can immediately comprehend. Nearly four hundred pages, over three hundred illustrations and all pertaining to the human foot.

It is a volume that should be in the hands of every shoe dealer, shoe buyer, shoe fitter, shoe salesman and shoe manufacturer.

**Partial List of Contents**

- The Bones
- The Tarsus
- Arches of the Foot
- Soft Structures of the Foot
- Muscles and Tendons of the Leg
- The Arteries of the Foot
- The Nerves of the Leg and Foot
- The Skin and Nails
- Comparative Anatomy
- Physiology
- Mechanical Consideration of the Human Foot
- Examinations
- Weakened Foot
- Flat Foot, Broken Down Arch
- Treatment of Flat-Foot.
- Metatarsalgia, Morton's Toe
- Method of Fitting Arch Supports
- Hallux Valgus and Bunion
- Painful Heel
- Hammer Toe.
- Weak Ankle—Sprained Ankle—Tubercular Ankle

**Partial List of Contents**

- Pes Cavus—Hump Foot—Hollow Claw Foot
- Knock Knee—Bow Legs—Deformities of the Knee.
- Rheumatism—Gout—Other Joint Affections
- Diseases of the Feet
- Dislocations Affecting the Feet
- Corns (Cornu, Horn)
- Callosities—Callous
- Skiagraphy
- History of Footwear
- Footwear and the Fitting of Shoes
- Hosiery
- Care of the Feet
- Method of Making Plaster of Paris Cast of the Foot

## TIME FOR CALM, SANE THOUGHT

**Manufacturers and Retailers Begin to Plan for Future—Panic  
Not a Good Thing for Shoe Business—Business Settling Down**

A CONFERENCE of tanners, shoe manufacturers and dealers was held on May 25th at Philadelphia at which the leather and shoe situation was thoroughly discussed and a resolution passed requesting Congress to restrict the exportation of leather. This action has caused bitter comment and opposition on the part of prominent leather producers who take the stand that incalculable injury may be done by such a course to the export trade without realizing any appreciable results to the home industry. It is shown that the regular imports of hides into the United States very largely exceed the normal exports of leather and should the war end there would be precipitated a condition of affairs that would be disastrous to both shoe and leather interests.

This hysterical attitude of the retailer is not in the end conducive to his interests or those of the other departments of the trade. As one manufacturer points out, there has been enough leather so far to go around in staple lines, and there is no ground for alarm at present as to prospects of a general famine of leather, although, if the war keeps up it is hard to say just what may happen. In the meantime the dealer is making more money than ever, for if he pays a high price for specialties he is getting a correspondingly higher profit and people will have to wear shoes as long as their money lasts. This forcing of sales through promoting panic amongst consumers is not good business. It may make sales a little larger for the time being and thus embarrass manufacturers and boost prices, but it would be far better if the public were given to understand that there will be shoes ready for their feet right along at reasonable prices.

The wise dealer as well as the manufacturer sees the possibilities of danger that lurk in the inflated conditions that at present prevail. Should the war suddenly end there would be such a scurrying for cover as has not been witnessed in a life time. Meanwhile tanners are following a wise policy in buying only for immediate requirements. This is the only thing that has kept hides from soaring to the half dollar mark. As it is buffs have reached twenty cents at Chicago and it only needs a little excitement amongst tanners to make raw stock take to the air. A prominent manufacturer remarked the other day: "We are keeping our lines steadily at our regular margin of profit changing from day to day as we pay more for our materials. We feel this is the safest way for us and we believe that the dealer will be in pocket by being conservative as to his ordering. In fact we believe the wild insistent demand for novelties and the over-ordering on certain lines has been largely responsible for the high prices the dealer has had to pay."

It is time for a clear head and a steady hand in the shoe business.

# SHOULD ONE RETAILER STEAL ANOTHER'S HELP

Symposium of Views on the Salesmen's Problem and the Attitude Taken by Different Firms—Clerks Desire to Escape Night Work and Naturally Seek a Change—Why Some Shoe Stores Keep Open Late Against the Proprietor's Wishes

"I WOULD like to quit on Saturday night."

"But you should give us a week's notice. You know that is usual."

"Well, if I am required to give a week's notice, I will. But I certainly would prefer going on Saturday next."

"How is that?" asked the proprietor, "have you anything in view?"

"No, nothing."

The speaker had served for some years in the store and naturally Jenkins the proprietor was a little surprised at his sudden desire to cut his connection with the establishment. He, however, did not want to press the matter too far, and as it seemed the young man had evidently made up his mind to quit, he finally consented to let him go on Saturday night.

## All Pre-arranged on the Quiet

"Now, it is a peculiar thing," remarked Jenkins, "that a married man with a family should, during war time, with nothing in view, voluntarily resign, when we knew he certainly had no intention of enlisting. What does it all mean? It means that a tacit understanding, or secret arrangement has been made between my man, Dolson, and some other retailer whom I do not know at the present time. It has evidently all been patched up, and while Dolson has not been definitely engaged, still he is pretty sure where he can find a berth, at an increased salary. In the meantime, he will walk around the streets for two or three days, telling others that he has resigned, in order not to connect his new boss with having entered into any conspiracy, or underhand work of securing him. Oh, there are more ways than one by which one retailer can take the help of another retailer in the same town or city. There is a great deal of this going on now-a-days—this stealing, as it is called—and many dealers in Montreal, Toronto, Ottawa, Winnipeg and other cities, have had to pay their clerks more money, for help is at a premium at the present time. Everybody appears to be making a bid for somebody else's salesmen."

## Do No Injustice to Another

"No," declared one merchant, "we never hire a clerk from any establishment in our city, unless he has resigned or been released. We would not think of doing a fellow shoeman an injustice—neither do we have any preliminary understanding regarding a clerk resigning and then coming to us to get a job."

"I am of the same opinion," spoke up another shoeman, "I would not consider taking away another dealer's salesman, even if that salesman approached me and I wanted extra help—unless I first spoke to his employer. There should be a certain code of ethics in all such matters."

"Well, I know what it is," asserted Jasson. "When I was out at lunch to-day, I was told that both my clerks had been phoned by another shoe concern, who proffered more money. The result was I had to give them a couple of dollars extra per week, although trade is not by any means as good in the lines I handle, as it was with me a couple of years ago, and I am paying more money than ever. Of course, this matter of luring help away is a game which two can play. While Brown may steal Smith's clerk to-day by offering him a few dollars a week more, with less night work, Smith may retaliate next month. You know there is always a 'come-back.'"

"Yes, sir, I have been 'held up' for higher wages three or four times during the past few weeks," asserted another shoeman, when interviewed on the help question. "It is getting to be a very serious problem, not only to retain your men, but the increase we have to pay when business does not warrant advances. I suppose it is largely a case of supply and demand, and the demand just now is greater than the supply."

## Serious Problem to Secure Help

One shoe retailer in a leading city, advertised in a local paper for a good shoe clerk, with a good salary attached. He got one reply and that from a fellow who, under normal conditions, would be regarded as a second-rater.

Another high-class establishment in Ontario, inserted an advertisement for a clerk in the men's department.

"I had three applicants, only one of which was eligible. At another time," declared the proprietor, "I would have had thirty applicants—in fact, in times gone by I was afraid to place an ad in the papers over my own name knowing that I would be inundated with inquiries, telephone calls and seekers after a position."

"It is strange—this help problem," was the opinion of another employer, "Why, I had a young man who left me last week and went to a down town store, which closes at six o'clock, except Saturday. Mind you, I only worked this fellow three nights a week, yet he is willing to take \$4.00 less at another establishment, in order to escape the night drudgery. Of course, I do not blame any fellow in the shoe business for wanting shorter hours, and seeking to elude after six o'clock duty as much as possible, but for a young fellow to sacrifice \$4.00 a week is certainly a surprise."

## Less Salary for Shorter Hours

"Yes," added a Yonge Street shoeman, "We often have applications from outside places by persons who tell us they are willing to accept a less salary if they can only get rid of night work."

"I do not blame them," ventured a suburban dealer, "I do not like it myself, but we have to do a certain amount of it, being in a residential district. A lot of people are paid on Friday and on Monday, and naturally stroll out to spend some of their cash. We have got to corral it while it is hot, or we will not catch their trade at all. We all work too long hours for what money we get, and surely we can come to some concerted action, whereby we can close at seven o'clock, say, on three nights of the week—Tuesday, Wednesday and Thursday—whichever is the most convenient for each district. I used to keep open till 11 o'clock, but now I close at nine, and I find I do just as much business. If one kept open the whole time, like an all-night restaurant, there might be an occasional night-hawk or intoxicated individual who might conceive the idea of buying a pair of shoes, even at one or two o'clock in the morning. But look at the expense—why, an occasional pair of shoes sold would not pay for the light burned."

## Making Meeting Place of Store

"Yes," exclaimed another member of the company, "this keeping open late is certainly a funny game. It looks as if we hung around for somebody to come in and talk, and as long as anybody will talk, we are there to talk with them. That is not selling shoes—and there is no money in keeping open just for the sake of creating a rendezvous of your establishment."

# GET AFTER THE TRAVELING GOODS TRADE NOW

**It Is a Branch of the Leather Business Coming More Rapidly to the Front and the Shoeman Should Realize His Opportunity—Initial Investment Is Not Large and Not Much Space if Properly Used is Required—A Trade Bringer to the Regular Lines**

**“W**HERE are you going to spend your holidays?” This is the question being asked of every one from the head of the firm down to the messenger boy.

With the advent of warm weather and sunshiny days the thoughts of the average mortal naturally turn to a few days respite from duty. What members of the shoe trade are thinking—well the same notions are being entertained with reference to a “get-away” occasion by persons in all other lines of activity.

There is no branch of the leather goods business which is growing more rapidly than travelers' requisites. The June season starts hundreds of happy young couples off on their honeymoon, and the pilgrimage to various summer

Leaving out of the question for the time being the actual trade being handled by some competitor, look at the possible field of operations. In a town of from 1,000 to 6,000 population—taking these figures arbitrarily—there are dozens of business men of all classes continually traveling. Did you, as shoemen, ever stop to figure out how many suit cases, grips, or handbags these men carry while thus traveling? Who supplies this trade? Most likely some city merchant, or perhaps the mail order houses. They cannot get what they wish in their home town, and hence are forced to give their custom to strangers—often against their will.

Are you going to admit, if your neighbor saddler is in the field, that such articles fit in better with horse collars,

**A** “TRAVELING window” which made pedestrians want to leave right away on their summer vacation. The floor is made of unpainted boards, the muslin stretcher used as a background is painted to represent bricks and a railway notice is tacked on the wall to suggest a railway platform.

resorts and watering places begins. It is surprising that more shoemen, who are not cramped for space or hampered for lack of capital, do not install a traveling good department. One would think that many of them would do this for their own protection. They let the general store, the departmental establishment, the mail order house and others get in on their business in the matter of carrying boots and shoes, and here in a trunk department is a splendid profit-bringing, constantly increasing opportunity presented that the shoe merchant neglects whereby his turnover can be increased with practically no added overhead expense. The shoeman should take in every range closely allied to shoes, that will bring more people to his establishment, and possibly no lines work in better in meeting the needs of customers than do traveling goods and hosiery.

How often when one is purchasing a club bag, a trunk, a suit case, or a satchel, can the sale of a pair of shoes be made, and often the remark will be heard, “Oh, I am going away for a few days and I think I need something new for my feet.” A pair of shoes is sold and the tactful and diplomatic salesman can introduce the subject of having a neat, up-to-date traveling case.

harness, and other equine necessities than they would in a shoe store? Is not the average citizen much more likely to enter your place of business than that of the saddler? Unless he has a horse or is a farmer, the saddlery interests him little. And yet such places get nearly all the trade not handled by the city merchants or mail order houses. It is rather an adverse commentary upon the ability of the average shoeman to grasp a waiting opportunity, is it not?

## Articles for Feminine Use

Furthermore, a moment's thought will convince any shoeman that there is a large trade to be secured by interesting the feminine element of the town. From trunks to small handbags, the merchant has a great deal of scope for effort, and much room for expansion. What woman does not prefer a new trunk to the old affair she has been making answer the purpose for years? And it is comparatively easy to persuade her to purchase for shorter trips a smaller and more easily handled steamer trunk. It looks natty, is less susceptible to accident, and keeps the contents much more tidy.

Then there is the handbag question. Here is a large field for exploitation in the hands of the skilful shoeman.

Nothing pleases a woman better than to be presented with a handsome handbag. Note the opportunity assured by this phase of the problem around holiday seasons. It can be made a mine, if properly handled. And there are many leather toilet cases, purses, and different articles of such nature that can be added as conditions warrant. There is room, you see, for indefinite expansion. Why, there is even a good field among the school children for school bags.

### Retailer vs. Mail Order House

Now there is no question that much of this potential trade will be secured by mail order houses if shoe retailers do not grasp the opportunities presented. In fact, a great deal of actual business is being handled by these people as it is. Why should this be? They handle no better class of goods than can the ordinary retailer, if as good. And people have to buy blindly, taking the word of the house for everything. Even if they are protected by the "money-back-if-dissatisfied" guarantee, this will not save lost time or disappointment if the goods are unsuitable or misrepresented. Mail order houses have some great advantages that are denied smaller retailers. But they have great and more than compensating disadvantages that give retailers the whip hand if they are live enough to rise to the occasion.

Personality is a great outstanding factor in business relationships, but it doesn't operate by mail. The personal equation is a law of nature broader and deeper than any business system or locality. Your personality will turn the scale in your favor every time—if you are the man you ought to be and other factors in the problem are anything like equal. If you believe in the square deal under all circumstances, are cheery and optimistic, and know your business thoroughly, you will attract custom like a magnet. The trouble with the average merchant is that he lacks confidence both in himself and in his goods. If you can only realize the powerful lever you possess by virtue of being on the spot and bringing your personality to bear, the mail order bogey will not trouble you.

### Service Essential

The merchant who cannot score by emphasizing the superior quality of the service he can render, as compared with the mail order man, is a back number. For example, how many people have any correct idea of size when ordering a trunk? Some persons will order a 40-inch trunk from a mail order house, and when they get it, they have a small house on their hands—a regular white elephant. By investigating the matter at a retailer's, they would have found that a 30-inch or 32-inch size is large enough for nearly everyone. This is only one example out of many that could be cited. Here is where you come in, and by knowing your stock and its possibilities thoroughly, you can score knock-out blows. Feature the fact that no trouble is too great, nor any amount of time too long to spend in suiting a reasonable customer. Compare this with the "pig-in-a-poke" mail order method.

### Buy Intelligently

It seems almost an anomaly to mention this factor of success in retail merchandising, but sound caution along this line is often conspicuous by its absence. Don't allow yourself to be stampeded by any salesman against your better judgment. In launching any new feature, it is better to progress slowly but surely at first. Get the "feel" of the trade in the opening months, and expand as conditions warrant. Avoid tying up too much capital on the one hand, and not having a large enough assortment to choose from on the other. The right sort of traveling salesman will be of great assistance to you in picking the best lines. It is better to leave the other kind severely alone.

A good start, however, can probably be made with a dozen different styles of trunks ranging from about \$2 to \$5 wholesale, or a little more. Stock up with one or, at most, two sizes in each style, depending on the space at your disposal. If situated near the manufacturer or a distributing depot, one size in each style will do, ordering from catalogue for anything beyond this size. Of course, if you have the space and the capital to order more largely, well and good, but this is hardly the wise policy. Small capital and large turnover should be the motto. The same policy should be followed with suitcases, clubbags, ladies' handbags, and different accessories, whether of a toilet nature or otherwise. From \$75 to \$100 should provide a small, compact stock working on the above basis. As stated previously, it will be well to take the representative of a good reliable firm into your confidence. His experience and assistance, if unselfishly given, should be of great value to you.

### Space Required

Many objections on this score are made to the scheme of installing a leather goods department. Jones will claim that owing to the small floor space of his store, he has not a foot for trunks. Perhaps he has a high ceiling. If so, a platform can be built over the office or in the rear of the store, just high enough to hold a few trunks. Or a dry cellar can be utilized by erecting a strong skeleton frame in which to put the trunks. In Smith's long, narrow store, they may be run down the centre. There are always many ways in which unused space may be used advantageously for this purpose. If necessary, a few square feet will suffice for the trunks piled one on another, although this way is not ideal.

Suitcases, handbags and other leather goods can be kept in spare shelves, preferably with glass fronts, or in any spare corner fitted up for the purpose, provided it is dry and clean. Every shoeman will have his own problems to meet in this particular, but a little forethought will enable him to solve them satisfactorily. Owing to the diversity of store plans, it is impossible to do more than point out one or two methods of utilizing spare space as above.

### Feature Value to the Customer

Take the public into your confidence, and let them know about your new departure. Use every means of publicity you know of, only use them intelligently. White space is not worth anything alone. It's what you put into it that counts. Get up a series of good gingery ads. about your new department. Feature the value to the customer of being able to make a personal selection of the style of trunk or bag desired. Not one person in a hundred has a correct idea of size. Here is where you come in.

Feature as well the improvement in personal appearance occasioned by a natty club or handbag. Then why carry around a shabby old-fashioned affair? Show the difference in convenience and appearance between a new trunk with the latest word in sub-divisions and trays for small articles, and an old ramshackle one-compartment nuisance. An when you have aroused desire in this way, clinch the argument by giving a brief, truthful description of the article, along the same lines you would use in a personal talk. ]

### Give It Regular Attention

The public wants information, not mere general claims. Let the goods talk—and to that end be sure you yourself are thoroughly acquainted with all the talking-points of the article in question. And be specific. Talk about one thing at a time, not about the whole department. That's the only sure way to get results. Don't advertise trunks and shoes in the same ad., if there is a daily paper in your town. In a weekly sheet you may have to. At any rate, be sure that your leather goods department gets regular attention and a fair share of advertising space.

## DO YOU LISTEN TO "TALES" ABOUT OTHER FELLOWS

**Do Not Encourage Callers in the Knocking Game or Agree With Nasty, Slighting Remarks—It Does Not Win You Any Trade and is Apt to Prove a Boomerang in Effect—Too Many Customers Willing to Roast if They Are Not Checked.**

"I GOT these shoes at T——'s a few days ago and they are simply rank. Look at the fit! Did you ever see such monstrosities?"

"I bought this pair that I have on at K——'s and you bet I will never go there again. I paid six dollars for them and they are not worth half the money. I will never darken his door in the future."

"What do you think of the way that oxford has given out at the heel?—and I have only worn them a short time. That is the kind of truck your opposition sells. I do not believe he has got a decent pair in his shop."

"Look how that welt has given out and that seam ripped. Catch me handing any more of my good cash over to A——. Say, he would cheat you out of your good name and reputation if he could."

"Yes, he soaked me seven dollars for the things that I have on. He told me they would give me good service and be comfortable. I have suffered untold agony. The leather has piped and the shoes are all out of shape."

Ever hear any of your customers make slighting and sarcastic remarks like the foregoing and even worse, against one of your competitors? Of course you have. It is a favorite pastime, a source of delight with some classes of people. They think that you will agree with them in the knocking business.

This brings up the question of how do you treat your competitor? Do you silently assent to all the denunciation heaped upon his head, his stock, his staff or his service? Very probably you do and think thereby you are currying favor

*THE inviting and artistic front of the new Walk-Over Boot Shop in Montreal showing the splendid display facilities.*

### IMPOSING AND IMPRESSIVE FRONT OF MONTREAL SHOE HOUSE

There was presented in the last edition of the SHOE AND LEATHER JOURNAL excellent interior views of the admirably appointed new Walk-Over Boot Shop in Montreal and on this page there is seen a splendid illustration of the front of the establishment, which is in every way a credit to the Canadian metropolis. The front is a little over thirteen feet wide and twelve feet high, while the entrance is sixteen feet deep. The two front lights of plate glass are two feet wide and the return lights are twelve feet long or deep. Verde antique marble is used as the base of the show windows and the

entrance is terazzo, with marble mosaic border, and the trade mark of the store being set in the centre. All exposed woodwork is of solid mahogany, including the dome of the entrance. The front transom is of art glass and the transom lights over the central show case and doors are four-inch bevelled plate glass. The metal work of the exterior, which is the Easyset System, is in polished copper finish. For display purposes and up-to-date features the front, which was designed and erected complete by the H. J. St. Clair Co., Limited, of Toronto, is striking and effective.

with the caller who comes to you for that new pair of shoes. By a glance, a nod, a dry hard laugh, or some vague remark, you convey the impression that any disdainful observation or well-seasoned roast heaped upon the other fellow is well deserved.

#### Your Knock May Come Back

Why do you do it? Do you think it gains you anything? Do you imagine you are getting in right with a new patron and driving a nail in the other fellow's coffin? Do you dream that you are evening up with him and taking away his trade and undermining his business? Well do not delude yourself any longer. Perhaps the complaisant nod which you bestow on the complaining customer, or your suave acquiescence is in reality a boost for the other fellow, only you are not wise enough or prophetic enough to see it. Don't backbite, don't stigmatize, don't be mean, sarcastic or jealous of the other chap. He has probably as good a right to be in business as you have and no mortal man can satisfy every person. There are people that no shoe retailer can please, try as he may. They would find fault with the archangel Gabriel and cast slurs behind his back if they got the slightest encouragement.

Remember that the shoes which the other fellow sold were not of his own making and there are always two sides to every story. You have not heard the other side—only that of the querulous, calumnious customer who probably will slander you next when he or she gets a chance.

"I always speak a good word for the other fellow and never, even by implication, do I harm him, no matter what a customer may have to say," remarked a leading Western shoe retailer this week. "I endeavor to mind my own affairs and run my own business without having a hand in the things that pertain to the other chap. I learned a good lesson when I first started in business three years ago. A well dressed lady, belonging to one of the well-to-do families of the town, came in. She was the wife of a doctor and wanted a pair of tan lace boots, with spool heel and short vamp. "Not like the contraptions I have on," she added disdainfully. She poked out her No. 5 foot and showed me a soiled shoe with a couple of eyelets missing and a rent in the cabarette top. "I got these down at M——'s she continued "and they are too broad and hurt me at the heel. I have worn them only a little while, and you see what happened? I will never go to him again. He overcharged me in the first place and in the second place they did not fit me properly."

#### He Talked Far Too Volubly

"I agreed with her and told her she would be wise to steer clear of such an establishment in the future. Well, what did she do but go back shortly after to M—— and tell him exactly what I had said and that man has never spoken to me since. I do not blame him either. I would like to impress upon my fellow shoemen that a customer who will bear a tale will frequently carry one as well and you may be the next 'victim.' Now when a caller has a grievance I frankly tell her or him that any shoe is apt to go wrong, that little faults will crop up even in the most costly lines and that it will be well, if they feel the complaint is justified, to go back to the merchant from whom the footwear was purchased and he will no doubt make matters right. By being frank, cordial and friendly I find that I have not lost anything. An honorable course pays, and I am thought well of, not only by my customers but by my competitors.

#### Do Not be a Weather-Vane

"I do not believe in being all things to all men—a veritable weathercock veering this way and that, knocking when a knock is handed out and praising when a good word is spoken. Be a good fellow but not at the expense or integrity of the other chap. He has his trials and difficulties the same as I do. Human nature in the customer is pretty much the

same the world over and it is best to be cheerful, polite and open-minded.

"Well, you will think that I am giving you a sermon, but I find that we get on this mundane arena pretty much what we give. A middle-aged woman came into the store the other day with a most peculiar shaped foot. She showed me a pair of button shoes with cloth tops, and one of them was out of shape, but not noticeably so. 'I got these at —— and they are rotten,' she asserted with some vehemence. 'I asked them for three and a half AA and they gave me a three B. Look how that toe bulges out.'

#### Explained Few Things to Her

"I examined the footwear and told the lady that it was not possible to keep all sizes and widths in every line and we have to carry so many different styles. Knowing something about fitting shoes and finding that she had three toes about the same length I realized at once how difficult it would be to suit her on a certain last. The last was a swing one, whereas she should have been given a straight one. I did not coincide with her condemnation of the shoeman whose name she mentioned. I told her that the shoe did not fit her badly at all and that I did not think that she had ever worn a more comfortable boot. She admitted that perhaps she had not but, at the same time, took occasion to call attention to the slight bulge at one side. I informed her that would happen on any such a last and she was candid to admit that perhaps I was right; that she had not been so wofully used after all, and had perhaps been hasty in her judgment, when she learned from me that it was no easy matter to give her a shoe that would remain perfect, and she must make allowances.

#### Be a Credit to the Trade

"Now I felt better after upholding in a kind, friendly manner the establishment that she mentioned, for M—— is a credit to the shoe trade, keeps a good stock and gets a fair, reasonable profit. Perhaps one of his clerks did not give what this woman demanded or made an error in judgment and my salesmen are liable to do the same. Why should I pose as the only simon pure, infallible foot fitter in the city? We want more respect and co-operation in the trade, more kindly, thoughtful consideration and less jealousy, censure and bickering. Let hawkers run down one another's wares but shoe merchants, who want to uphold the dignity, reputation and best traditions of this business, should show that they are upright, conscientious and cordial men in every sense of the term."

#### FIRM FRIEND OF TRADE ASSOCIATIONS

Louis F. Falardeau, shoe retailer of Quebec, who was recently elected honorary vice-president of the Retail Merchants' Association of that city, which body was lately organized, is one of the most progressive business residents in the Ancient Capital. Mr. Falardeau has ever taken an interest in merchants' organizations and is a former vice-president of the Retail Merchants' Association of Canada. He has long been a public-spirited citizen, having been in the shoe game for over thirty-three years. The subject of this reference has built up a wide connection and enjoys one of the largest businesses in Quebec. Mr. Falardeau is popular with all classes and has done much to uphold the welfare of the mercantile ranks of Canada in general, and the boot and shoe trade in particular. Ever a strong advocate and believer in the benefits of getting together, he is of the opinion that men engaged in kindred lines can accomplish much by united, aggressive and harmonious action.

## IMPORTANCE OF WELL LOCATED REPAIR STAND

How the Passing People are Drawn to an Up-to-Date Establishment—Transfer Points on Car Lines are Advisable—Toronto Shoe Repairer Guarantees all His Work and Makes Use of Motorcycle for Gathering It In and Sending It Out

**P**ROBABLY one of the most influential factors in building up an active, aggressive trade in the shoe repair line is in having a well located stand where the equipment, if installed, can be seen and is in itself an advertisement. The importance of an eligible site cannot be too much emphasized, especially in the larger cities, and the same may be said with reference to the smaller towns.

In an eastern city of some fifteen thousand inhabitants an ambitious fellow recently installed a complete shoe repair shaft and stitcher. There were several hand method repair

found the situation of the shop convenient and the service satisfactory. Since then the car routes have changed somewhat but, when once a trade and connection are established, it is difficult to break them off. While there has naturally been some decline in the men's trade, owing to so many males going to the front and enlisting, Mr. Butler reports that his women's and children's business to which he has been devoting special attention, has grown. Although the help problem is acute he has not fared in this any worse than others. Many master shoemakers have also gone to the

AN INTERIOR VIEW OF THE SPACIOUS AND WELL EQUIPPED SHOP OF UNITED SHOE REPAIR CO., TORONTO,

men in the place. They promised to do all sorts of things in cutting prices and running the new chap out of town if he introduced machinery. The old way was good enough they told the people. The quick repair fellow started in, but he had established his business at one extreme end of the leading thoroughfare and did very little harm, for many persons never bothered looking him up. He decided that a "change of base," as they say in military manoeuvres, was necessary if he was to get the trade, and after a few weeks he came right down into the heart of the city. The current of patronage changed and now he has all the trade that he can attend to. People began talking about his outfit and his work and he had a display window in which he could show findings and samples of shoes "before" and "after" they had come out of his "shoe hospital."

One of the best located shops in Toronto is that of the United Shoe Repair Co., 667 Queen street west, of which D. W. Butler is manager. The width is nineteen feet. He is only seven doors west of Bathurst street and, in starting business six years ago, he distributed cards all over the city to the effect that shoes would be called for and repaired and that his stand was close to a leading transfer point—Bathurst and Queen. Persons coming down to work in the morning could leave their parcels and they would be ready for them at night when going home. The idea caught on and as there was no extra expense for customers they soon

war and there are not as many shops in the cities as there were and only the best are surviving. Thus conditions have in a measure righted themselves.

### Motorcycle for Delivery Purposes

An important innovation has just been made by the United Shoe Repair Co. and a motorcycle is now used for collecting and delivering work. It is faster than a bicycle and much more ground can be covered and, with well mapped out routes, it is expected that the service will be much improved. Mr. Butler was born in the business and learned the trade on the bench, his father being a practical shoemaker. Some years ago the proprietor was in the quick shoe repair line in Toledo, Ohio, and, after selling out, returned to Toronto and bought the business at his present stand, 667 Queen street west. He always believes in using the best of stock and purchases in large quantities, principally in backs, bends and sides. He has always carried a large supply of leather and findings and secured thereby the best possible terms. As an instance of how leather prices have gone up, he states that he has some extra large No. 1 oak soles which he bought five years ago for twenty-two cents a pound. To-day that same leather is fifty-seven cents a pound.

"No, I have not raised my prices as yet and I am not doing business at a loss either," added Mr. Butler. He has always done a large amount of work for the militia and at

the] Exhibition camp kept a man all winter who collected the boots from the soldiers and took charge of their delivery again to the Tommies. That man is now at Niagara camp looking after the footwear repairs of the boys in khaki.

In the winter of 1914-15 Mr. Butler kept seven men on the Exhibition grounds, Toronto. They were engaged under the direction of the senior ordnance officer and an inspector re-inforcing all new military boots with nails at the shanks

THE EXTERIOR OF MR. BUTLER'S SHOP, 667 QUEEN ST. W., TORONTO

and heels. About ten thousand pairs were reinforced and this preliminary was attended to before the new shoes were issued to the men. Of the pairs on which new bottoms were placed there were about eight thousand, including the final rush order.

Mr. Butler has a complete equipment at his repair shop, including a Goodyear repair outfit with stitcher, which is run by a five horse-power motor. He also has a Crow loose nailer and a McKay stitcher, there being only one or two other repair shops in Toronto with the latter machine, and a leather splitting machine. He guarantees all work and during the six years that he has been doing business in Toronto, so splendidly has every job been executed, that within this period he has had to replace only one pair of men's soles and one of women's and four pairs of rubber heels. That is a record of which he is proud. He keeps four men constantly employed.

#### PUTTING ON RUBBER HEELS PROPERLY

A great many cobblers, or repair men, have the fault in putting on rubber heels of setting them too far back. The writer has noticed several instances of this character, and wishes to point out the unsatisfactory effect, which is an injury to the shoe repairer's business, says the Shoe Repairer and Dealer.

To begin with, every shoe repairer should know that in putting on rubber heels he should use a heel substantially the right size. He should have a sufficient supply or assortment of rubber heels to enable him to do this.

Now, taking the right sized rubber heel, it should be placed on the shoe in a natural position, so as to give a heel of the same pitch and lines as the leather heel which it replaces.

The rubber heels I noticed, and which I criticise, were set so far back that they had the effect of projecting behind the heel-seat of the shoe, and if the repairer had scoured them down to line up properly with the heel-seat at the back, he would have shortened the heel in length so that there would not have been anything like the tread surface or wearing surface to which the customer is entitled. Neither

would there be the proper support under the foot, as the long heel coming well forward under the shank gives better support than a short, peg-like heel.

Another bad effect of setting the rubber heels too far back is that when the heels are shaved or scoured on the edge, much being taken off the back edge of the heel leaves an open joint, because they have shaved into the cup of the heel. The cup of the heel being designed to conform to the shape of the heel-seat of the outsole requires a close-fitting heel with very little taken off the edge, so as to keep the edge of the heel tight all around the heel and next to the sole.

If you set the heel back and shave out the cup at the back end a large open joint will appear. Set the heel forward to its true lines and then use a good grade of rubber cement, and you will make a tight joint, give the heels a pleasing shape and satisfy the customer. These are the kind of points that the shoe repairers should consider in order to increase the volume of their business.

#### "PEDAL POSSIBILITIES FOR PROMINENT PEOPLE"

By G. B.

The Allies—"Walk-Overs," smart and easy.

Sir Sam Hughes—Plain, straight last, storm-proof.

Pres. Wilson—The "Just Write" shoe.

Jess Willard—Pug toe, upper cut from the shoulder.

Frank Moran—"Eye-Cuts," counters not too stiff.

Prohibitionists—Plain "pumps," "tap" soles.

Von Tirpitz—Cosy slippers, hemmed with navy.

Admiral Jellicoe—Bulldog effect, large eyelets, "sea" width.

The King of Bulgaria—Two-tone effect blucher, straight "foxing."

Sir Roger Casement—"Swing" last, dancing pump.

The Kaiser—Detests any "line" studded with Canadian product. Always wears a "soft upper"; at present credited with a "top" of extreme flimsy material.

The Crown Prince—"Dull kid" blucher, well "slugged" (Verdun style), a good "tanning" is at present in "pickle" for his special benefit.

"Tommy Atkins"—"Drill" lined puttee kids, "steel ornaments" fixed accordingly.

Count Zeppelin—Has little admiration for the recent showing of "fall" styles.

"Jack Canuck"—Full "grain" material, stoutly built; a little "lacing" on the side.

The Sultan of Turkey—Full "goat" slipper, at present suffering with a sore foot from "a tack" (a lasting one) left by a finisher named D. Nicholas.

King of Greece—Flexible sole, back-straped.

A Highlander writes regretting that military regulations do not allow high-cuts, although "short skirts" are "all the rage" in his regiment.

The Royal Flying Corps say that felt bals are popular, wing tips preferred, and add that even they will not be able to "reach" the altitude of shoe prices if they soar much more.

#### HE WOULD GET ARRESTED—SURE

"Upon my word," declared the wit of the party, "I have kept open so long evenings that if I got one single night off, I don't know what on earth I would do with myself. I really believe that I would cut up so I would be arrested. If we cannot have early closing, let us have a half holiday during the summer months, at any rate. Why, you would not take a mule and work him every day. He'd balk and kick. Seriously speaking, though, two of the greatest obstacles, or contentions that we have to meet with in the retail shoe business to-day, are the help problem, and the long hours. The man who can solve these satisfactorily for all shoemen, will be a veritable Moses, to lead us into the promised land of prosperity and peace."

# IS THE SHOE TRAVELER PAID SUFFICIENTLY?

**Representatives Point Out What They Have to Contend With, How Expenses are Mounting Up and Selling Difficulties Increased, Yet Commissions and Salaries Have Not Been Advanced—Comparison With Remuneration Received by Other Roadmen**

“**C**OME over to my summer home—I have a splendid place at K—, with a fine view of the sea and broad piazzas, where I enjoy life in the good old summer time.”

So spoke a traveler for a Boston shoe firm to a Canadian knight of the road, as they got discussing shoe conditions generally, the turnover for the season and the remuneration which each received. The American gentleman, when pressed for farther particulars about his resort by the ocean breezes, fully revealed its beauties and attractiveness, but in no ostentatious way, and the result was the Canadian last year spent a couple of weeks with him. He was surprised to find the number of travelers for American firms who have summer residences, many of which cost many thousands of dollars, and are more pretentious than the permanent homes of any Canadian traveler, even in the larger cities.

“Now,” declared the speaker, who is one of the oldest and best-known travelers in the Dominion, “how many shoe representatives of this country receive anything like the salaries that are paid the road men across the border or have delightful warm weather retreats when off their beats? Of course, I know that ‘far away fields look green,’ but I happen to have some inner knowledge of the condition of affairs. There is scarcely a reputable firm across the border that is not paying its representatives 6 per cent., while there are very few concerns in Canada giving more than 5 per cent. Salaries of most American travelers are double those of Canadians, and while I am not going into figures, as I do not deem it wise to parade statistics too much, I want to tell you we are not receiving nearly as much money as we should. Many shoe travelers do not make as much as woollen, hat and cap, millinery and other representatives, who do not do one-half of the business we do, and yet have more money. Do you know our income has practically been the same for years, and as we have to pay expenses out of our salary we are coming out at a smaller end of the game every year.

## How Expenses are Soaring

“Now, here are my figures for traveling during the past three years. I cover some long distances in the east, but it will show you how expenses are climbing up, but not commissions. For sample room, railway fare and baggage transportation, meals and other expenses, it cost me, in 1913, on the average \$35.00 a week; in 1914 the figure had gone up to \$41.50, and in 1915 it reached \$45.00. I am not living any better, eating any more, or engaging costlier rooms than I did two or three years ago, and one will naturally ask, why the increase? Well, every little item helps to swell it. There is the war tax on railway tickets and the war tax on letters; the doubling of the cartage charges on trunks, and the increase of 50 per cent. in hotel rates in Chatham, London, Hamilton, Stratford, Toronto, Montreal, Ottawa, etc., to what they were five years ago, and it is but natural to expect that these will go still higher when prohibition comes into effect. We are not complaining of the hotel and other charges, but we certainly think that the time has come when more liberal concessions should be accorded us, based on the business we do and the responsible positions that we hold. A traveler has to dress well and be presentable on all occasions. He has to possess a wide knowledge of shoes, an intimate acquaintance with his goods, far greater than that required in many other lines, whose representatives are more liberally paid than we are.

“Last year I sold \$135,000.00 worth of goods, and the salary which I received is considerably less than three per cent. of this amount. I know another man who sold the same amount of goods and he is getting even less than I am. There may be some men of mediocre ability and limited selling capacity with a never increasing showing in business at the end of each year. These may be content to struggle on, making \$100.00 or \$125.00 a month, but for a man who is a salesman, who has to keep keyed up to the highest pitch of enthusiasm, energy and devotion to duty for several months of the year; well, he wants to make more than a bare living. He desires to provide something for the proverbial ‘rainy day.’ Not necessarily is he looking for summer homes, costly automobiles, motor boats and other evidences of wealth, but he would like to know that his position is worth something more to him than a decent living.

## Very Few Getting Big Income

“There are many shoe salesmen in the United States making all the way from \$7,000 to \$15,000 and more a year. I would like to know the men in Canada who are corraling this amount, no matter what house they represent, what territory they have, or what special vending ability they possess. You can count the number of such fortunates on the fingers of one hand, and yet there are scores of road men in the Dominion whose sales run annually from \$100,000 up to a quarter of a million. And these chaps are not nearly as well paid as representatives in other lines.

“But there, I do not want to be talking too much. I have told you something of the increasing cost of selling, how our expenses mount higher and higher each succeeding year, and yet we receive but little more return than has prevailed for the last decade.”

“Yes,” spoke up another member of the company, “when it is seen that a traveler is making a nice income for himself, there are several firms who have different plans for reducing it—either cutting down his commission, restricting his territory, or placing him on a straight salary. Apparently they cannot stand to see him earn a large amount on his own behalf, although at the same time he is making money for the house. These firms want to get a nice profit, not only out of the shoes, but out of the signally successful traveler’s services as well. Now, do you know that I go down to the factory two or three times a year, and stay there a week or two, and all this costs money. The house has never offered to pay my expenses, when we are deciding upon the samples for the coming year.

“I mentioned this matter to the president the other day and he said—‘Why, are we not making all these alterations and putting in this and that line of lasts and patterns for your particular benefit, so that you, indirectly, get more from the sale of our goods?’

## Making Money for the Manufacturer

“‘Yes,’ I replied, ‘in a sense you are; but do you not think my services in the way of consultation and advice are worth my expenses at least? Let me tell you right here and now that if it were not for myself, and some of the other boys assisting you in doping out these samples, you would never get very far on the road to expanding business. We are the ones who sell the goods and build up your trade, and if you got out these models yourselves, according to your own ideas, I am afraid many of them would never catch on.’

“A shoe traveler requires special knowledge and aptitude for the business. He must know shoes and styles. When a

man sells hammers, mops, stoves, vacuum cleaners, repair outfits, orthopedic appliances, snow shoes, brooms, washing machines, wringers, corrugated boxes, grass cutters, grandfather's clocks, auto cycles, pianos, hammocks, garden hose, musical boxes, talking machines, electric fixtures, electric batteries, book-cases, stepladders, skates, self-adjusting sweepers, shoe findings, Victrolas, plumbing supplies, electrolysis equipments, dental floss and other such supplies, antique furniture, billiard tables, multigraphs, rubber stamps, tents and awnings, dictaphones, tomb stones, fireproof doors, gas mantles, electric signs, etc., he does not have to contend with the various trials which a shoe traveler runs up against.

"These goods are standard and not changed materially to suit customers. But shoe samples have to be changed, and we have to exercise skill, forethought and judgment. Why, we show one sample and the man says—"I would like that with a plain toe instead of a tip, a spool heel instead of a Cuban, a seven-inch top instead of an eight, and then perhaps he wants a slip sole and some alterations in the perforations, the facing or foxing, or this pattern on another last, or the bottom finish altered, or different colors, combinations, stitching, eyelets, ornaments, buttons, straps, insole, counter, etc., etc."

#### Intimate and Expert Knowledge

"Oh, the changes some retailers want are many. We have to know instinctively whether these can be made; whether certain patterns will fit certain lasts, or certain lasts certain patterns, the extra cost for changes, etc., and generally to be as versatile and alert as a vaudeville entertainer or a master of dancing. This may seem like a flippant comparison, but the qualifications, insight, aptitude and mastery of detail that a really successful shoe salesman has to possess, the appearance he has to keep up, the connection he must maintain, the hard, persistent, concentrated work he has to do, should all be taken into consideration and should receive an adequate recompense—one that will not only enable him to live well, but to put something by as an insurance protection against the future.

"How many travelers are there to-day who have been on the road for a quarter of a century who have made a competency, who, if they lost their position, their health, their prestige, or their influence, or their batting and fielding ability (to use a baseball expression), have enough to live on comfortably and pleasantly? Let those and have speak up, and if they have not, it is time that the men on the road united in an aggressive, concerted movement to demand more generous recognition, either in commission or salary, from those whose interests we serve so faithfully and wholeheartedly."

#### GIVES PRETTY BOOTS TO THE BABIES

It has been the practice of an enterprising shoe dealer in Eastern Ontario, who adopts not a few novelty methods of making his store and himself solid with his patrons, to send a pair of infant's soft soles to every new-born babe within a radius of twenty miles of his store. Does such a scheme prove profitable? Are the parents grateful? Do the mothers talk about the generosity of the dealer and his thoughtfulness, and do they tell their neighbors? Do they come in and admire the tiny foot toggery?

Well we should say that they do, and the expressions of gratitude are sincere and unaffected. Here is a unique letter recently received which indicates how the fond mother appreciates such an open-hearted act of the shoeman. It reads:—

"Dear Friend,—With pleasure I take the opportunity to write you these few lines to let you know that we received the nice present you sent to our baby. We were very thankful for the boots

and they are very pretty. Now, I would have written you before, but my dear mother has been very sick. She was ill a week before I was. I was up to see her yesterday, and washed for her. She has failed terribly. We also have a sick horse, that is not out of danger. The vet. was here last night. But for myself, I am real well, and John Wesley—that is our boy—he is very good. My mother intended coming to stay with me, but it was impossible for either of us to get away. I am thankful to say she is now able to get out. It was her heart and lungs that troubled her. I was up to see her before the baby was three weeks old. I must bring this letter to a close, as we are going up home to kill our pigs, so I thought I would finish this while waiting for the rig. I must thank you again for those little boots which you sent. Richard—that is my husband—and the baby, join me in sending their best to you."

#### ANOTHER SHOEMAN GOING OVERSEAS

Captain S. E. Vermilyea, of the 155th Battalion, C.E.F., who has enlisted for foreign service, is an enthusiastic military man, being the son of the late Major S. W. Vermilyea, of Belleville, Ont., who passed away a couple of years ago. The subject of this reference attended business college in 1906 and afterwards spent some time in the Merchants Bank of Canada, in Belleville. He next got into the shoe game and clerked in the retail store of A. W. Vermilyea & Son for a year and a half, after which he went on the road for

CAPT. S. E. VERMILYEA, BELLEVILLE, ONT.

the Belleville Shoe Co., covering the northern district. He then divided his time between selling in the store and on the road, until his father was taken ill, when he took charge of both the wholesale and retail ends of the business. In March last Captain Vermilyea enlisted for overseas with the 155th Battalion. Since he was fifteen years of age he has been soldiering in the Bugle Band and as a private in the ranks. In 1911 he took out a commission as lieutenant in the 15th Argyll Light Infantry, Belleville, and received his captaincy in command of the company in the fall of 1914. He is at present stationed in Picton, Ont., with the 155th Battalion C.E.F.

R. H. KENNEDY, MOOSE JAW, SASK.

## LIVE WHOLESALE FIRM OF WESTERN CANADA CELE- BRATES FIRST AN- NIVERSARY

Two Aggressive Brothers Who  
Are Forging to the Front and  
Establishing a Strong Con-  
nection by Splendid Service and  
High Ideals

JAMES KENNEDY, MOOSE JAW, SASK.

**T**HE wholesale firm of Kennedy Bros., Moose Jaw, Sask., which was launched just a year ago, is meeting with a large measure of success in the jobbing line. Their business slogan is "Kennedy's Good Goods with Superior Service Satisfy," and this the house lives up to in every respect.

At the outset, the brothers were specially fortunate in securing for a warehouse a splendid three-storey brick and concrete block, on River street west, with spur trackage, and located in the wholesale district, yet only one block from the retail business centre. The members of the firm, who are R. H. Kennedy and James Kennedy, have had a long and successful experience, which has well qualified them to enter the larger field. They carry a full line of dress and staple shoes, under their own brand, known as the Kennedy Shoe.

They also represent Messrs. Valentine & Martin, Waterloo, the Columbus Rubber Co., Montreal, and other progressive eastern concerns. In addition to their splendid line of footwear, the firm job staple goods, under their own brand, such as men's shirts, caps, underwear, mitts, gloves, braces, sheepskin coats, mackinaw coats, overalls, etc. Kennedy Bros. report that the business has, during the first year exceeded their most sanguine expectations, and they have built up a fine connection in the West. Trade has shown a gratifying gain each month. It is not their intention to grasp at the largest business, and they believe that growth best which is on a sound, safe and conservative basis. While the members of the firm are just now doing all the traveling themselves, it is their intention to add one or two men during the coming season.

Robert H. Kennedy and James Kennedy, who constitute the partnership of Kennedy Bros., Moose Jaw, Sask., are both of Irish extraction, the former being born in 1880, near Ballyhaise, and the latter in 1882. At twelve years of age Robert was apprenticed to the dry goods trade for four years, and at the end of his apprenticeship held positions at Ballymena, Dundalk, Portadown and Newry. Believing that larger opportunities existed in Canada, he sailed for the Dominion ten years ago, on May 24th, and, arriving in Toronto, took a position with W. A. Murray & Co., afterwards associating himself with the McLaren & Co., Limited, of St. Catharines. It was while in the Garden City that his ability brought him under the notice of one of the members of the firm of Mitchell, Hembroff & Maybee, Limited, in whose employ he went west, and remained with

that organization until it was purchased by Messrs. Maybee-Kennedy, Limited. In the new firm he occupied the position of vice-president, and was manager of the retail branch. In this capacity his intimate knowledge of the business, together with his tact and courtesy, resulted in a very large volume of trade.

James Kennedy served an apprenticeship with Messrs. A. Gray & Co., of Cavan, Ireland, and was afterwards employed in several centres. After spending two years on the road in the Emerald Isle he came to Canada six years ago, setting sail on April 1st. However, with due consideration to the date, the trip did not prove to be any April fool jaunt, for immediately upon his arrival in Winnipeg, James secured a position in the Robinson Department Store, where he remained until the fall of 1911, when he joined the staff of Mitchell, Hembroff & Maybee, Limited. In the firm of Maybee-Kennedy, Limited, James Kennedy held the office of secretary, and also acted as buyer and manager of the wholesale branch. When the brothers went into business for themselves, in May, 1915, they brought to bear upon their new enterprise thorough experience, sound judgment and trained ability, which have been recognized in a manner that they had never hoped for. Not only have the new firm become well established, but the partners feel that they are merely upon the threshold of a more extended and useful career, wider service and higher achievement.

### WHERE SHOE SHINING IS AN ART

Boot cleaning, one of the milder recreations that Saloniki offers, ranks among the national industries of Greece. To sit drinking little cups of Turkish coffee and having his boots cleaned at the same time is the Greek's ideal of a pleasant afternoon. The lustrous, as Greek shoeblacks are musically called, though usually of tender age, is a true artist and is by no means content with dull burnish.

He first meticulously scrapes your boot clean of the smallest fragment of mud, then wipes it carefully so as to have a perfectly clean background to work on. After that he applies the blacking, not by dabbing the blacking brush into the tin, but with a variety of little metal implements and sponges.

When he has brushed this to a bright polish you imagine that your shine is over, but it has really only begun, for the lustrous now goes on to bring out the high lights by smearing your boot over with a colorless cream which he brushes again to great brilliance and finishes off by two or three minutes friction with a velvet cloth.

### NEWSY BRIEFS FROM FAR EAST

The accompanying picture represents one of St. John's, N.B., most prominent and successful citizens, Edward L. Rising, sr., who is president and general manager of the firm of Waterbury and Rising, Limited, dealers in wholesale

E. L. RISING, SR., AGE 59 YEARS, HIS SON, H. W. RISING, AGED 29 YEARS, AND HIS GRANDSON, E. L. RISING, JR., AGED 2½ YEARS.

and retail footwear, who recently celebrated his fifty-ninth birthday anniversary. The picture represents three generations of the family as it contains his son, Harold W. Rising, the secretary-treasurer of the firm, and his grandson, Edward L. Rising, jr. The latter will no doubt keep up the family record in shoe circles.

At a recent meeting of Portland Methodist Church Sunday School teachers and officers in St. John, N.B., Mayor R. T. Hayes, president of the firm of J. M. Humphrey & Company, Limited, wholesale boot and shoe dealers, was elected superintendent. Mayor Hayes served in this capacity for several years and by his untiring efforts achieved gratifying results.

Lieut. Percy J. Steel, of St. John, N.B., is in Halifax, N.S., taking a machine gun course. During his absence his senior clerk, Frank Merrill, is taking charge of his boot and shoe establishment. Mr. Merrill was recently elected president of the Knights of the Round Table of Portland Methodist Church.

David Bassin has opened up a new shoe store at the corner of Sydney and Union streets, St. John. Mr. Bassin has been in the boot business for a number of years and anticipates success in his new venture.

The McRobbie Shoe Company, St. John, N.B., are removing to new quarters in King street. The store is more commodious than their old stand and as it has an attractive front increased patronage should result.

Boot and shoe dealers in St. John report that sales in the month of April surpassed all previous records and compared favorably with the Christmas sales. This would indicate that financial conditions are exceptionally good despite depressions brought on as a result of the war. The firm of Waterbury & Rising have seven representatives on the road continuously and in addition have three of the largest retail shoe stores in the city, thus it will be seen that business conditions in this particular line are flourishing. Other wholesale and retail houses declare that their travelers are doing well and that trade conditions are gratifying.

### OPTIMISM VS. PESSIMISM

I would rather be an optimist, seeking the star that pierces the night of gloom, or looking for the silver lining to the sable cloud, than be a pessimist, searching for fuel to heap upon the smouldering fires of despair, writes H. C. Yawn, in *Manufacturers' Record*.

I would rather snatch the sunbeam and weave it into song and laughter, than take the shadow and transform it into the muttering of discontent.

I would rather take the prattle of innocent childhood, and make it the guiding star of my pilgrimage, than take the wail of the disconsolate, and make it the siren voice toward which my barque should forever sail.

I would rather take the dimple from the rosy cheek of my babyhood, and endeavor to transplant it in perennial setting upon my own brow, than take the wrinkle from the face of the hopeless, and make it a part of my own visage.

I would rather take the notes of nature's songbirds, and make them consonant with the melodies of my own soul, than take the croakings of the toad and arrange them into jarring discords that should forever greet my ear.

I would rather take the rose, painted by the hand of the Eternal Artist in tints of celestial beauty, and pin it on my breast, than take the seared leaf, blighted by the breath of the Frost King, and use it as a badge to portray my sombre feelings.

I would rather chase the rainbow, that spans the brow of evening, in quest of the fabled bag of gold, than seek surcease from sorrow, by plunging into the murky waves from London's Bridge.

I would rather watch the eagle, in his spiral course to the vaulted blue, than watch the slimy snake as he makes his crooked trail through the slush and mud.

### WIDELY KNOWN IN PRAIRIE PROVINCES

W. A. English, who recently joined the staff of the Hartt Boot and Shoe Co., of Fredericton, and is now covering Western Canada, from Moose Jaw to Vancouver, is widely known to the shoe trade in the West. He has followed this line of business for the last fifteen years, having

W. A. ENGLISH, EDMONTON, ALTA.

started in as a boy in his father's store. For the last six years he has been calling upon the trade in Alberta and Saskatchewan. His first position on the road was with the Thos. Ryan Co., wholesale shoes, traveling out of Winnipeg. After spending a year with that firm he took a position with the Ames-Holden-McCready Co., remaining with them five years and looking after the province of Alberta. Mr. English resides in Edmonton and reports that business with him, so far, has been exceptionally good, and that a feeling of splendid optimism prevails throughout the West.

# IMPORTANT CONFERENCE MAY CLEAR SITUATION

**Caution and Unity were the Watchwords at Representative Trade Gathering—  
Speculative Buying Discouraged—All Unnecessary Restriction on Importation of  
Hides and Skins Should be Removed—The Present State of Affairs Reviewed**

**T**HE Toronto Shoe Retailers' Association received a cordial invitation to send delegates to the timely conference held in the Chamber of Commerce, Philadelphia, on May 25, to consider present conditions affecting the shoe and leather trade. Owing to the short notice, it was decided not to send any representatives, but a telegram was despatched by the executive, expressing approval of the object of the conference and promising the gathering every support and encouragement in their work.

Some important business was transacted at the gathering, which consisted of representatives of the National Tanners' Association, the National Morocco Manufacturers' Association, the National Boot and Shoe Manufacturers' Association, the National Shoe Wholesalers' Association, and the National Shoe Retailers' Association. Several resolutions were carried.

The key note of the representative assembly was caution, co-operation and conservatism. The conference was marked by mutual goodwill and an earnest endeavor to meet conditions as they arise and work together for the best interests of the trade in general. It is the consensus that good will result from the gathering, and there was no disposition shown to arouse feeling or stir up strife.

Some of the resolutions carried were as follows:—

Whereas, it being the object and desire of this conference to co-operate to prevent further advances in the price of shoes and leather, and to maintain prices at the lowest possible level, be it

Therefore resolved, that in view of the scarcity of leather and other materials entering into the construction of shoes, largely due to abnormal conditions brought about by the European war, and in view of the consequent abnormal prices of all materials entering into the cost of shoes, the conference of the shoe and leather interests of the United States recommends that earnest effort be made and immediate action be taken to relieve, as far as possible, the difficulties attending the collection, release and transportation of hides and skins and other materials now held in foreign countries necessary for the manufacture of leather and shoes.

Further resolved, that we favor the modification of resolutions placing unnecessary restrictions on the importation of hides and skins.

Resolved, that in view of the present high prices of materials entering into the construction of shoes, we recommend that in pricing merchandise replacement values be taken into consideration, and that we discourage speculative buying by shoe manufacturers, shoe wholesalers and shoe retailers.

The Committee on Resolutions, with the addition of John S. Kent, B. Harrar, A. H. Geuting and Joseph Strasberger, was empowered to go to Washington to present the views of the conference to the diplomatic authorities.

## The Situation Will Be Studied

The object of the joint conference was explained by A. C. McGowin, of Philadelphia, president of the National Shoe Retailers' Association. He said that the purpose of the meeting was to devise in some fashion, if they could, a set of resolutions that would be put into pamphlet form to be sent to every distributor of shoes in the United States

with advice as to what action or position should be taken at this vital time, when no one seemed to know where we are going to stop in the advance of the price in the sale of shoes.

The joint conference of 1914, just after the war began, was of very great advantage. It steadied the situation, and it helped the retailer immensely, and naturally helped the consumer, or the wearer of shoes.

"The publicity to be gained by a meeting or conference of this sort saves many dollars to the retailer and wholesaler of shoes in the telling to his customers of the situation," added Mr. McGowin.

## With Calmness and Fortitude

Another leading member sized up the situation very well when he said: "All departments of the shoe and leather industry have gained in business and profit by reason of the war, prices are extremely high and prudence would suggest a 'setting of the brakes.' Our industry should not be permitted to degenerate into a mad scramble for more and larger sales.

"The present situation is decidedly abnormal and will no doubt remain so as long as the war continues. The pendulum has swung dangerously high. Overbuying, overtrading and overproduction are ominous terms which are forgotten when booms are raging. There are times when business needs the whip and spur, but upon other occasions there is more safety and sanity in Shakespeare's line, 'Wisely and slow, they stumble who run fast.' Our trade is not in need of stimulation to-day. Everywhere buyers are anxious for goods and high prices are accepted without question. Conditions are without precedent, hence cannot be safe.

"I do not look for a sudden recession of values in leather and shoes after the war, but there surely must come a gradual decline in the demand and price of even such staples as shoes. The best suggestion I am able to give you is that you do not attempt to anticipate and predict what the markets will be too far hence.

"The sole leather tanners' word to shoe manufacturers and retailers is to be as conservative as the peculiar circumstances permit. Do not attempt to look too far into the future. As I have tried to explain, the nature of our business forces us to buy far ahead, but we do not recommend that policy as safe and sane for those who are so fortunate as to be able to follow the markets from day to day.

## Secure the Release of Hides

At a meeting of the National Boot and Shoe Manufacturers' Association held in New York city previous to the assembly in Philadelphia, the following was adopted:—

In view of the scarcity of leather and other materials entering into the construction of shoes, largely due to the embargoes placed by belligerent countries, and to restrictive regulations upon importations of hides and skins, and in view of the consequent abnormal prices of all materials entering into the cost of shoes, the Executive Committee of the National Boot and Shoe Manufacturers' Association, at its meeting, May 24th, 1916, at the Hotel Astor, New York City, recommends that earnest effort be made and immediate action be taken to secure the release of hides and skins and other materials necessary for the manufacture of shoes now held in foreign countries; and

Further resolved, that we favor the modification of regulations placing unnecessary restrictions on importations of hides and skins.

Resolved, that we discourage speculative buying by shoe manufacturers, shoe wholesalers and shoe retailers; and in view of the present high prices of materials entering into the construction of shoes, we recommend that in pricing merchandise replacement, values be taken into consideration.

### SPEAKS GLOWINGLY OF WESTERN CONDITIONS

About thirty years ago James J. Kilgour went as a young man to Winnipeg to woo from dame fortune a livelihood. After serving some time in retail shoe stores he met in Frank W. Rimer, a man whom fate decreed was to be his lifelong friend. Shortly after this friendship commenced a partnership was formed between these two gentlemen and a charter applied for in 1898, bringing the present firm into existence. At that time they occupied small premises on Main street. Under the judicious guidance of the heads of the house the business made rapid strides and in March,

A. K. FERGUSON, WINNIPEG, MAN.

1899, they purchased the site on which the present buildings stand, one a six-storey warehouse, the other a three, and from a very small business this firm has made splendid progress. In 1908 Mr. Rimer died, his place on the directorate being filled by J. B. Kilgour, a brother of the president. In 1914 J. P. Kilgour, son of the president, was admitted to the firm.

On the death of F. W. Rimer the house lost its credit man, for the deceased partner handled all credits. His desk was, in 1908, filled by A. K. Ferguson, whose home town is Simcoe, Ont. Previous to taking the credit desk of this firm Mr. Ferguson was with the Bank of Hamilton for a number of years. His banking experience served him in good stead in handling credits, tempering the credit man's tendency to "take a chance" with the banker's conservatism. In 1912 he was offered the secretaryship of the Canadian Credit Men's Trust Association, Limited, for Saskatchewan, which position he accepted and organized that province for the Association. The directorate of the Association then appointed him assistant general manager of the head office, Winnipeg, which position he filled until a short time ago, when he was admitted a partner of the Kilgour-Rimer Co.,

Limited, and now holds the office of secretary-treasurer and credit manager.

Mr. Ferguson is popular with his own and all other firms, for he possesses the knack of making and holding friends. No trouble is too great for him to go to, to supply brother credit men with credit information, and he will drop everything in order to give a sister house all data he has in his possession in connection with any account. No matter how dark the clouds might roll, Mr. Ferguson always has a smile. He claims that optimism wins nine out of ten battles. Of course, he always endeavors to temper his optimism with the consistency that should govern all business dealings.

Mr. Ferguson is to be congratulated on the advancement he has made since coming to Winnipeg in 1908, when, as he stated to the SHOE AND LEATHER JOURNAL, "I did not know what a 'credit man' meant, nor what his duties were, but when you have a good strong hand at the helm and a man with the business ability of J. J. Kilgour, it is no great credit to me that I have been taken into the firm. My experience in the Bank of Hamilton and also with the Canadian Credit Men's Association, where I handled the adjustment bureau for three years, stands me in good stead in my present position.

"Regarding the outlook of Western Canada, I feel that 1916, although it will not be as 'bumper' a year as 1915, has much in store for us and the whole of Canada. It is true that the winter was severe and the spring backward, but I have confidence in the West and feel certain that 1916 will give us a crop that will only be exceeded by 1915. That crop, however, is not by any means all marketed, and my opinion is that there will be a steady flow of money right up and into the time that proceeds of the 1916 crop will be coming in. This is evidenced by the fact of the steady reduction in past due accounts which usually have to be carried till after seeding. Business was never better in my experience and you would be surprised if I would quote you the amount of money that is flowing in in a steady stream."

### GRADUATED FROM THE BENCH

(See Front Cover)

Mr. Chas. A. Ahrens began life as a harnessmaker, having served his apprenticeship at the trade and followed the good old custom of "travelling." He started in business for himself in 1879 in Berlin, but afterwards sold out to enter the carpet slipper business with his father in 1883. In 1889 the senior member of the firm having been appointed town treasurer, C. A. Ahrens took in as a partner, Mr. Fred Bornhold, and the business was enlarged to embrace the manufacture of leather slippers and shoes. In 1907 Mr. Bornhold withdrew and Mr. Ahrens became sole proprietor of a very prosperous shoe manufacturing concern. In 1911 the former premises on Queen Street were found inadequate and a new factory had to be built into which the business was moved in 1912. In 1913 it was organized as a joint stock corporation with Mr. Chas. A. Ahrens as president and managing director and Fred H. Ahrens as secretary-treasurer.

The Ahrens business is an example of the steady growth of a prosperous shoe enterprise from a little top flat proposition with a local trade to a commodious factory with business Dominion wide. Mr. Chas. A. Ahrens has put his best brain and muscle into the establishment which bears his name, but has not been side tracked even by its claims. He takes a broad interest in his day and generation and is quietly identified with ideals and enterprises that have the betterment of humanity in view. He has the rare fortune of having a son to follow him and maintain the name as well as the Ahrens ideals in the shoe trade. Our readers will be glad to see the features of one so long connected with the Canadian shoe trade.

# CONDITIONS IN THE LEATHER ARENA REVIEWED

**No Let Up in the World-Wide Demand for all Kid Leathers—One Hundred Per Cent. More for Goat Skins Than a Few Weeks Ago—All Upper Leathers are Scarce and Prices Show Decided Upward Tendency—Leather Contracts Not Valid**

**J**UST what the leather manufacturer is up against at present in the matter of supplies, prices and service is comprehensively stated by a leading firm of kid leather tanners. This concern is one of the largest on the American continent and, in writing to a Canadian customer a new price list and touching upon conditions generally, they say:—

“The adoption of the new quotations has been made absolutely necessary for the reasons that we are now paying 100 per cent., and more, advanced prices for our goatskins than we were just a few months ago. Every new lot of goatskins we receive is at higher prices, and further large increases in prices are being talked of and demanded. Also the materials and chemicals we use in tanning and finishing, dyestuffs, glycerine, oils, etc., are several hundred per cent. higher in cost than normal prices. It is the same now with freights and insurances, and to illustrate this, it is now costing us in the vicinity of 40 cents per dozen to get our goat skins from Buenos Aires to New York, and from other shipping ports in proportion. Tanning materials are about four hundred per cent. higher in price, and where we paid for glycerine in normal times 15c. to 16c., what we are now using is costing us 63c.

“There is hardly any need to refer to the labor conditions which we are now facing, as this is true everywhere and in all industries, although perhaps the situation is more acute here, and higher wages being paid than in other parts of the country, on account of the tremendous demand there is for labor in the munition and shipbuilding plants.

“Our April 26th price list barely covers the additional costs we are being obliged to pay, and which we seem to be utterly powerless to prevent and still continue to do business, and it is perfectly obvious that if we are confronted with further difficulties, still higher prices are unavoidable.

“Coupled with the difficulties in getting supplies of goatskins and materials at any price, there is the increased demand for glazed kid to cope with, and which is, as you know, many times greater than it was in normal times. If the production of glazed kid were ten times more in quantity than it now is, there would be an ample outlet for it all in this country, to say nothing about the tremendous demand there is from foreign countries.”

## What Are Contracts Worth?

The extent to which the war is affecting the shoe trade may be gauged by the fact that some shoe retailers, who have placed orders for fall delivery, have been notified by eastern firms, who, while acknowledging the receipt of the order, have stated that they would endeavour to fill same, to the best of their ability, but cannot guarantee to do so, owing to the fact that they may be unable to obtain the necessary supplies of leather. Another serious drawback is the absence of skilled help, so many competent operatives having joined the colors. “Leather contracts are not worth the paper they are written on at the present time,” declared a leading shoe manufacturer this week. “There is no way of enforcing the terms of such agreements, and what is one going to do if the skins are not to be had? Why the tanners cannot give us a supply, and I tell you the future looks mighty serious. The only man who is safe to-day is the fellow who has his stock under his own roof. Orders and covenants of all kinds are, owing to unusual circumstances, in many cases, not worth the paper they are written on. My firm is now filling orders only on the proviso that they

can get the leather to make up the goods. Many others simply refuse to quote prices, and will not guarantee any date of delivery. They will accept business only at the quotations prevailing when the shoes are shipped and providing they can get the leather.”

## Manufacture of Leather

According to a preliminary statement by the United States Bureau of the Census showing the results of the 1914 study of the manufacture of leather in the United States, there was a decrease of 19.5 per cent in the number of establishments between 1909 and 1914, but an increase of 12.1 per cent in the value of the products. The number of hides and skins of all kinds tanned during 1914 represented a decrease of 5.3 per cent, compared with 1909, and the number of cattle hides tanned showed an increase of 25 per cent in value and a decrease of 4.5 per cent in number.

Reports were received from 767 establishments having a total output valued at \$374,512,939. In 1909 there were 953 establishments with a total value of products amounting to \$334,105,561. Of the total number of establishments reported in 1914, 27 were engaged primarily in other industries, but made leather to the value of \$7,160,436, and used it in further manufacture. In 1909 there were 34 similar establishments, which made and consumed leather valued at \$6,095,106.

## More Advances Predicted

Glazed kid for shoes will go higher in price in the next three months, says a leading Philadelphia firm. Coming on the heels of an advance of 7c a foot on this leather last week, it is predicted that with the tremendous increased cost of raw skins, freight and war risk insurance manufacturers are paying, further material advances are certain on leather going over the counter in August and September.

In proof that the glazed kid situation is daily growing more acute, tanners point out that before a goatskin is started through the factory to-day, each foot carries an average cost of 5c paid for freight, insurance and war risk.

“The average price on all grades of small skins, running from 40 to 45 feet to the dozen, including freight and insurance costs to-day, is 14c per foot,” one manufacturer said. “Before the war, freight from Calcutta averaged \$7 a ton on goatskins and we are to-day paying \$110 a ton. It is reported this week that \$150 per ton was paid for a cargo out of Aden. This means that the cost of goods being put into leather for sale about August or September will be at least 14c a foot over normal prices a year ago, and, too, this does not include increased cost of chemicals or an average increase of 25% in labor cost. Glazed kid manufacturers are reluctant about buying when they know they must ask large advances in order to come out whole.”

There has been marked scarcity of glazed kid stocks for some time and the shortage will be more acute in the near future, according to another producer, because of labor troubles, which in the past ten days have seriously curtailed production in, at least, three Philadelphia plants, and the fact that most of the others are not running to capacity because of the scarcity of raw materials.

No let-up in the world-wide demand for all kid leathers is noted in the market and all manufacturers are reported as sold up to the limit. Certain grades are not to be obtained at any price.

FOR FALL

FABRICS

Black and Dark  
Colors

Men's and Women's  
Shoes

It is inevitable that cloth top shoes for men and women will be in universal demand from now on.

Leather prices are higher than ever before — but leather at any price is almost off the market.

Fabrics are the logical replacers of leather. Besides, on their own merits, they have won the feet of the people.

In no other material is there such a wide style range as in fabrics.

# With the Shoe Manufacturers

Pithy Note and Comment on Shoe Matters—What the Makers of Shoes are Saying and Doing—Shoe Facts and Fancies

**T**HE coming fall will see the short skirt still worn. This is the decree that the Styles Committee of the National Cloak, Suit and Skirt Manufacturers' Association adopted at the recent annual convention held in Cincinnati. In connection with the short skirt it is declared that its smartness and youthful appearance make its popularity universal. All this is good news to the shoe manufacturer who can rely on the demand for high cut models continuing while the shoe retailer may safely stock 7½ and 8-inch shoes in the dull and dark tan shades.

## Bottom Polish That Meets All Needs

G. J. Trudeau Co., Limited, Montreal, have been appointed sole Canadian selling agents for the Cock of the Walk Manufacturing Co., Boston. This company have been for several years selling their bottom polish to Canadian manufacturers and their business has of late grown to such an extent that they have been compelled to appoint a representative in this country. Their agents will carry a fresh stock in Montreal at all times. Cock of the Walk, which has been on the market for many years, is made from selected Carnarba wax by a secret process, and its makers claim for it the certainty of a uniform polish that will not fade nor dry up, and will not stain or discolor delicate leather. This polish is especially adapted for ladies' fine shoes.

## Where Will the Cost End

In the opinion of Canadian shoe manufacturers shoes will go higher and higher in price. One leading firm in a recent letter to the trade, says calf leather, men's weight for shoes selling at \$5, cost 29 cents in June, 1915, and this month it costs 48 cents, and three cents more for top grades. For twenty-three other materials and parts used in shoes, prices are quoted in the same way, and the same or even a greater increase in the price in each case is shown. Kid stocks have shown a 33 per cent rise in the last few weeks, and sole leather is at the highest price ever known in trade history. Shoe accessories of every kind are from 50 to 200 per cent higher.

Shoe manufacturers report that they have increased prices from 25 to 40 per cent to the retailer since the war began. The latter must ask it from the consumer. Another reason for increasing cost, especially in ladies' shoes, is that ladies are wearing them very high up on the ankle now, thus taking very much more leather. Since the war began one manufacturer has advanced prices on a standard make of shoe as follows: \$3.10, \$3.25, \$3.50 and \$4.10, an increase of a dollar. Because of this steady upward tendency, retailers have been placing large orders so as to protect themselves against further raises. As a result, most of the shoe manufacturers have had all they could do in the last few months. At the beginning of the war business was bad, but one manufacturer said yesterday that the past year has been the busiest year he has ever had.

What fall styles and fall prices will be is impossible to state just now. At present it appears that tan calf will be a big seller. White will continue strong for tops. There is certain to be a shortage in popular calfskins, according to manufacturers, and in sole leather as well.

In spite of the shortage, more attention to shoes is being paid by the buyer than ever before, and especially in the

case of women. A buyer for a big department store said recently that the demand for novelties grows daily, even affecting the millinery trade.

"Hitherto women have always paid more for what they put on their head than for what they put on their feet," he remarked. "The position is now reversed. Women are buying \$12 shoes and \$5 hats."

## Making Use of Old Army Shoes

The question has been raised as to what becomes of the old Army boots. It is generally thought that, after being repaired once or twice, the boots are discarded, probably incinerated, with other refuse, and finally deposited on the land. It is questionable whether there is not a considerable waste in this procedure. The tanning matters can be recovered from both chrome and vegetable tanned leathers, while patents have been taken out to utilize detanned leather for glue-making, although we have not yet heard that the methods have been applied on a manufacturing scale. Where curried leathers are used, however,

GEORGE A. SLATER, MONTREAL, WHO HAS JUST BEEN ELECTED CHAIRMAN OF THE MONTREAL BRANCH OF THE CANADIAN MANUFACTURERS' ASSOCIATION

it would doubtless pay to recover the grease. We understand that the utilisation of old boots has lately received attention in scientific circles, and a shoe trade chemist in Waterfoot, Eng., has worked out a method of preparing various by-products from this waste material. We believe the scheme has been submitted to the War Office, and if it should be accepted, another step in the successful application of chemistry to industry will have been taken.

## How Far May Clerk Go in Fitting

The momentous question, "How far may a gentleman shoe salesman go in fitting a pair of high-top shoes on a woman?" was still unsettled after one perplexed salesman

# GAMBIER

MONTREAL.

and two women customers took their case before a Cleveland magistrate.

Mrs. Charles Trebes, aged 30, accompanied by Miss Mary Coy, aged 20, was exchanging a pair of shoes in the shop of Isadore Feldheim, aged 50, when suddenly boxes, foot rules and shoes began to fill the air.

"He was insulting," said Mrs. Trebes. "It was shocking the way he behaved."

"I was merely fitting on a pair of shoes," Feldheim told Police Judge Silbert.

The judge opined there should be a sliding scale for exposure of a woman's silk hose, depending on the kind of shoes. He dismissed the case.

#### Wooden Soles Being Made in Hungary

Holland may have a competitor in its famous wooden shoes line! The Magyar Boripar says that, owing to the fact that hardly any sole leather can be obtained for civil use, several of the leading Hungarian shoe manufacturers will manufacture shoes with wooden soles. The shoe factory "Turul" at Temesvar, Hungary, has already started the manufacture of such shoes. Also other manufacturers will follow the example, and are busy buying the necessary quantities of wood.

#### Unique Shoe Co. Removing to Simcoe

With only three votes recorded against the measure the by-law to grant the sum of \$20,000 to the Unique Shoe Co., of Toronto, was recently carried by the ratepayers of Simcoe, Ont. The loan is repayable in twenty annual installments with interest at 5½ per cent, and is secured by mortgage and notes of the company, who will erect a factory to cost \$10,000.

The new home of the Unique Shoe Co. will be 40 x 150 feet, two storeys high. It will be built of brick, mill con-

struction, and there will be ample light. The building will adjoin another, 50 x 60 feet, having two storeys and basement, which is already on the site in Simcoe. The present one will be used as an office and stock room, while the new structure will be devoted to manufacturing purposes.

It is expected that the Unique Shoe Co. will begin operations in their new premises about the middle of Sep-

J. W. PHILLIPS AT A ROUND TABLE CONFERENCE

tember, and from 60 to 75 hands will be employed. The present output of the factory is 350 pairs a day, but this will be more than doubled, with the added facilities and wider expansion in Simcoe. The Unique Shoe Co. make infants', children's, girls' and misses' stitch down welts, and McKays, and lads' and youths' patent leather McKays in the finer lines, as well as ladies boudoir slippers and other specialties. This firm, established two years ago, have made rapid progress, so that more accommodation had to be secured.

Jasper W. Phillips, manager and secretary of the company, has had a wide experience in the shoe trade and is a Toronto man. His first acquaintance with leather was gained in the cutting room of the Harvey-Van Norman Shoe Co. when Thos. Sisman (now of Aurora) was the foreman of the cutting department. Mr. Phillips next took a position

with the John McPherson Co., of Hamilton, where he worked in the lasting, turn and McKay departments and then spent some years in the best shops in Rochester in widening his insight, being employed in such well known plants as E. P. Reed & Co.; Williams Hoyt & Co., and others. He spent considerable time in sole leather stock rooms, so that his experience has been well rounded. Returning to Toronto, he was superintendent and manager of the B. L. Kennedy Co.'s factory, which was wiped out at the time of the big fire, some 11 or 12 years ago. This concern made children's and misses' turns and McKays. Mr. Phillips then organized the Solid Leather Shoe Co., which was started on Duke Street, Toronto, and after two years' operation, the company sold out to Preston capitalists, who removed the industry to that progressive town, where for three years, Mr. Phillips was the manager of the concern. He then organized the Unique Shoe Co., which has been operating since 1914 at 12 West Market Street, Toronto.

#### Ideal Shoe Co. on Sound Basis

That the ratepayers of Elmira, Ont., appreciate local industries is evidenced by the fact that the by-law to grant a \$6,000 loan to the company was carried by a big majority a few days ago. New stock has also been subscribed, and the company will now confine themselves to boys', misses' and children's shoes to the wholesale trade only. F. Nolin-sky, the manager of the Ideal Shoe Co., and W. E. Metz, the superintendent, are thoroughly experienced and practical shoemen. Mr. Metz served his apprenticeship and then worked with some of the best factories in the U.S. Coming back to Canada a few years ago, he conducted a retail shoe store for a long time. He then took a situation as salesman for a couple of years, and on the formation of the Ideal Shoe Co. joined that organization. Mr. Nolin-sky started at the bench, and was later with the Berlin Felt Boot Co. for ten years. He next was engaged with the Rock Island Shoe Co., Rock Island, Ill., and the North Star Shoe Co., Davenport, Iowa, where his insight in the trade was considerably broadened and strengthened. His next position was with J. & M. Rosenfield, of Rock Island, wholesale shoe distributors, where he came in contact with all the different lines of footwear. Returning to Canada, he started manufacturing infants' felt and leather bootees, and afterwards organized the Ideal Shoe Co. Ltd. Under the direction of Messrs. Nolin-sky & Metz, it is expected that the company will have with its added capital and improved manufacturing facilities an exceptionally busy and prosperous season.

#### Splendid Season's Business Done

Speaking to the SHOE AND LEATHER JOURNAL on the business done by Jas. Robinson since the opening of the fall season, George Robinson, Montreal, expressed himself as being particularly pleased with the turnover to date. A feature in the orders placed was the return of interest in men's shoes which have been ordered in greater quantities than for months past. Mr. Robinson stated that there was no letting up in business although as a usual thing the heaviest fall placing had been done by the 20th of May. He stated that the firm had opened and was still opening new accounts in greater number every week than for some years past.

The trade are realizing more every day that prices must advance more and more. Illustrating the manner in which prices had increased, Mr. Robinson showed the writer a shoe which a year ago was sold to the trade for \$3.00. This year it started at \$3.10 and increased successively to \$3.25, \$3.35 and \$3.50. And further, this season at the advanced price, it is being sold with a side leather vamp and calf tip instead of all calf as a year ago. It was a men's gun metal welt, single sole, dull calf top. Another shoe which is a popular seller is a mahogany bal, Neolin sole. It

started at \$3.85 and went to \$3.90, \$4.00, \$4.10, \$4.30, and is due to go to \$4.50. Illustrating the advances in McKay shoes he produced a velours calf blucher, dull calf top, which has been priced successively at \$2.85, \$3.00, \$3.25 and \$3.50, a remarkable advance of 65c in a few short weeks. Another line, a white kid shoe, was bought by this firm a couple of weeks ago at a figure exactly \$1.50 less than paid to-day. He stated that quotations had advanced twice a week during the last four weeks and were still upward in tendency. Jobbers are having increasing difficulty in getting supplies from the manufacturers, one prominent maker writing the firm that they could not give a price on a dull calf top shoe, but offering to make it with dull kid top. Few manufacturers will make any definite promise as to dates of delivery.

#### Business Survey of the Antipodes

J. A. McKenzie, manager of the Victoria branch of the Canadian Consolidated Rubber Co., left recently for the Antipodes, where he will spend five months, on a survey of the Australian and New Zealand fields, looking to an expansion of the already important business done by the company there. Mr. McKenzie will spend about seven weeks in Sydney, a month at Melbourne, and a fortnight each in Adelaide, Brisbane and New Zealand. The territory will be closely studied, with a view to organizing the Commonwealth into a district agency, and the prospects will be especially sized up on behalf of the footwear department of the Canadian Consolidated Rubber Company, although the tire business will also be investigated. Mr. McKenzie was born and educated in Carberry, Man., and made his

J. A. MCKENZIE, VICTORIA, B.C.

first step in earning a living by delivering groceries. A few years later he went to Winnipeg, where, for some time he was connected with a widely-known wholesale shoe house. Ten years ago he became identified with the Canadian Rubber Co., in Vancouver, and in 1907 joined the Victoria branch of that firm, now the Canadian Consolidated Rubber Co. Besides being a keen business chap, Mr. McKenzie is an ardent golfer, and looks forward, during his leisure moments, while abroad, to some fine sport in the wide, open spaces of Australia,—the only complaint against the golf course in Victoria being the lack of range. #### London Shoemen Elect New Officers

The annual meeting of the London Retail Shoe Dealers' Association was held on Monday, May 17th, and considerable business was transacted. Reports showed the affairs of the association to be in a sound and flourishing condition.

J. E. THORNE, LONDON, ONT., THE NEWLY ELECTED PRESIDENT

A resolution was submitted and unanimously adopted to close every Wednesday afternoon at one o'clock during the months of June, July and August. The matter of wholesalers selling retailers was discussed more or less informally, but no definite action was taken, although it is probable that this question will come up again and some forward movement made, unless the practice shows some signs of diminishing.

The following officers were elected for the coming year: President, J. E. Thorne, of Thorne Bros.; first vice-president, John R. Morrison, of the Morrison Shoe Co.; second vice-president, Philip Cook, of the J. P. Cook Co.; secretary-treasurer, Wm. J. Ashplant, re-elected. It may be of interest to note that this association, which was organized five years ago, has a good record and has done creditable work in various lines, promoting harmony and unity among the trade, and taking a high stand on several matters of importance. Much credit for the work and worth of the association is due to the energetic secretary, Wm. J. Ashplant, who has proved the right man in the right place. Mr. Ashplant is not only active in association work and in shoe retailing, but he is also vice-president of the London Bowling Club. Others who don the ducks and take running shots at the kitty are Jack Morrison, Brown Bros. and Casselman Bros., all of whom are live spirits among the sporting fraternity.

Mr. Thorne, newly elected president of the London Shoe Retailers' Association, is widely known among the trade, and has been a resident of the Forest City for the past 32 years. He began his connection with the footwear game by entering the employ of Ashplant & Tanton and seven years later opened out for himself in his present premises, east corner of Market Lane, where he has been very successful. Well liked by his fellow merchants, he has always been a strong advocate of closer co-operation and progressive work along retail association lines. The retiring president of the association is N. K. Wanless, who enjoys a large measure of esteem in London business circles. He made a capable presiding officer. Another alert member of the association and a past president is Rowland Hill, who recently celebrated his sixteenth anniversary in business.

#### Has Enlisted for Overseas Duty

Wm. W. Breithaupt, second son of L. J. Breithaupt, president of the Breithaupt Leather Co., Berlin, has enlisted

for overseas service and has gone to London to take up an officers' course. Mr. Breithaupt is no novice in training. For over three years he had charge of the Berlin Boy Scouts, and during that period was one of the contingent of scouts which went to England in 1911 to attend the coronation. W. W. Breithaupt has been in the sole leather end of the Breithaupt company's business for some time, starting in the Berlin plant, where he took up work in the tan yard, getting right down to the ten hour-a-day grind, the same as his forbears did in the pioneer stages of the business. After being in the Berlin tannery for awhile, he continued his work at the Penetang branch, and later, decided to get a thorough knowledge of the Trent Valley Oak Sole Leather at Hastings, where he remained up to the time of his signing up with the colors. L. J. Breithaupt, it may be stated, also has a son-in-law in the Canadian militia, Captain Dr. John R. Perry, who is in charge of the surgical department of the Overseas hospital now situated at Hamilton.

#### The Best Convention Yet

The annual meeting of the Saskatchewan Retail Merchants' Association was held in Regina on May 9 and 10. There were over 300 delegates in attendance and the gathering was the fourth one under the auspices of the Association. The citizens of Regina extended a warm welcome to the visitors, and Mr. G. A. Maybee, of Maybees, Limited, president of the Association, delivered an inspiring address. He asked that his name be not considered again as president of the Association, and during the convention a hearty vote of appreciation was tendered him for his faithful and ener-

GEO. A. MAYBEE, MOOSE JAW, SASK.

getic services, which have earned for him the title of the "Grand Old Man" in retail merchandising. He was given a new office, that of honorary president of the Association. It was decided that the next convention would be held at Moose Jaw. The social festivities constituted a pleasant feature of the gathering, and the citizens of Regina did much to make the stay of the delegates enjoyable. The proceedings were brought to a close by a banquet, held at the King's Hotel, tendered by the Regina Branch of the Association. Hon. J. A. Calder, Mayor W. D. Cowan, C. F. Rannard, president of the Manitoba Association, G. A. Maybee, honorary president of the Saskatchewan Association, and A. A. Evans, the newly elected president,

**Prospector's Boots Were Up to Sample**

An interesting case was tried recently in the York County court, Toronto, before Judge Winchester, in which fifty-one pairs of prospectors' boots, made of porpoise leather and lined with French calf skin, played an important part.

The plaintiff was J. P. McLaughlin, general merchant, of Timmins, Ont., who sought to recover from McLaren & Dallas, wholesale shoe merchants, Toronto, the sum of \$200 damages for alleged breach of contract. The boots, which had been made in England, were bought by the plaintiff in October, 1913. As the wholesale house had had the most of them in stock for quite a while, it was decided to clear them out. Originally the boots were sold at a much higher price than that charged Mr. McLaughlin, but as they were somewhat heavier than those generally used by prospectors in Canada and were, therefore, not moving freely,

they were offered Mr. McLaughlin at a lower figure. A sample boot was shown Mr. McLaughlin, who stated that he would take the whole lot. The sample was left with him and the goods were shipped by McLaren & Dallas within a few days.

According to the evidence submitted, the plaintiff sold twenty-three pairs. Two pairs, which he sent down to have replaced and which had been returned by his customers, were found to have been burned on the soles, yet no mention was made of this in the letter in which the plaintiff asked credit from the wholesale firm for the burned pairs. Other pairs were secured and sent down for which a claim was made, and, in connection with these, expert evidence was called, which showed clearly that the porpoise leather had been properly tanned and that the only fault was the leather had not enough stuffing—that it had not been oiled.

It appears, from the evidence, that the boots had been left for some two years on the upper shelves of the plaintiff's store, subjected to extreme heat and cold and had not been oiled or given the necessary care. In reviewing the evidence the court said that this was not the fault of the defendant, and added there was little wonder, under the circumstances, that the boots did not show up as well kept boots should. The experts called by the defence had declared emphatically that the boots were as good as they were represented to be, not only in regard to the quality of the leather, but also in the manufacture. One witness for the plaintiff stated that he had bought a pair of these boots on a month's credit and that inside of thirty days he had found that they were breaking out and had thrown them away. The witness admitted that he had later paid Mr. McLaughlin personally for the boots, yet had made no complaint to him about them being unsatisfactory and had continued to deal at the store since the transaction.

The judge, in rendering judgment, said that he accepted the evidence of the experts and, upon the facts, found that the plaintiff McLaughlin had knowledge of the boots, and bought them according to sample, accepted the goods delivered according to sample, admitted that they were the same kind of boots and that no misrepresentation had been made by the traveler for the defendant. The boots were still as he represented them to be and, as no defect had been shown in them, the court found that the defendant was not liable and dismissed the action of the plaintiff, with costs.

**Predicts Heavy Run on Fabrics**

J. WESLEY HESSENAUER, BERLIN, ONT.

manner in which the samples were shown. It is always difficult to visualize a fabric in a shoe when only a swatch is shown, and to get over this difficulty Einstein's have to all intents and purposes made a shoe, to the last stitch, through mounting on a card a life-like model. In this way manufacturers not only observe the appearance of the fabric as it will appear in the shoe, but they are also offered the very latest lasts and patterns reflected by Brooklyn style creating centres. Two women's lines shown appealed particularly. A full quarter, combination, champagne fabric and Havana brown calf with a new style back strap and Louis heel, with buttons to match the fabric. Another novelty was an evening slipper with strap across the instep and another above the ankle. All colors desirable are included in the range of fabrics for both men's and women's shoes. For fall Mr. Einstein predicts a heavier run on fabrics than ever before with a preference for blacks although the darker shades of the warmer colors will be in demand. For women's some attractive figured brocades are being shown as well as a sprinkling of plaids in addition to the usual line of fabrics.

#### May Regret His Hasty Action

A rather good story is being told of a footwear merchant who received three cases of men's gunmetal shoes from an eastern firm recently. They were spring goods, but had been delayed in delivery, owing to labor troubles, the shortage of leather and other unforeseen causes. When the merchandise arrived, the retailer was so indignant that he immediately shipped it back. The shoes were all of a conservative style and perfectly safe to stock. His competitors are now having the laugh on him for his shortsightedness and hot-headedness. When the same gentleman desires similar lines to those which he indignantly returned instead of getting them at the old figure of around \$3.30 to \$3.40 per pair, he will pay \$3.90 or \$4.00, and perhaps a good deal more. It does not pay to ship goods back these days, even if they are delivered a little late. Prices are ascending so rapidly, that those who have contracts which are being filled, should regard themselves as very fortunate.

#### Popular Young Shoeman Joined the Colors

J. Wesley Hessenauer, son of Alderman J. H. Hessenauer, shoe dealer, Berlin, Ont., has enlisted with the 118th Battalion. It is interesting to note that this young man who has joined the colors and intends doing "his bit" for

the Empire, tried to enlist over a year ago, but was turned down. This time he would not take no for an answer, and is now the sole representative of the retail shoe trade in Berlin in the military ranks. Signaller J. W. Hessenauer is one of the most popular young men, and when the battalion recently left for Carling Heights, London, Ont., to train for the summer, scores were down at the station to give him a send-off. He is also a capable shoe salesman, and is now a member of the signal school of London. Recently an enjoyable house party, which ended in a recruiting meeting, took place at the residence of Alderman J. H. and Mrs. Hessenauer, Frederick Street, Berlin, and as a result, five new members decided to join the 118th Battalion. Grand Union Lodge, I.O.O.F., of which J. Wesley Hessenauer is a member, at a special meeting recently presented him with a ten dollar gold piece.

#### NEWS BRIEFS FROM WINNIPEG

W. J. Moisley, of Regina, who represents the Williams Shoe Co., spent a few days in Winnipeg recently on business.

Geo. Wheeler, manager of the findings department of Kilgour-Rimer Co., Winnipeg, has a new Cadillac runabout, in which he does his regular trips throughout the city.

Rosecrans Murphy, representing Julian & Kokenge, Cincinnati, was in Winnipeg recently, with a host of advance lines of ladies' novelty shoes, as well as several staple lines.

M. W. Murdoff, of Trenton, Ont., representing Thos. G. Plant of Boston, was in Winnipeg recently on business.

The pictures of two brothers, who have recently enlisted, are presented on this page. Alf. Bender was with the Ryan-Devlin Shoe Co. for five years. Before that he was engaged in Bad Axe, Mich. Corporal A. Bender was formerly with the T. Eaton Co., being first assistant in the men's shoe department. Previous to that he was with the Ryan-Devlin Shoe Co. He began his experience in the footwear game with Charles E. Raven, of St. Thomas, Ont. Corp. Bender is now with the 203rd Battalion known as the "Hard and Dry," under the command of Lieut. Col. Hansford.

The lease of Fred Hendren's store in the Kensington Block, Winnipeg, having expired, and being unable to secure a suitable location, he sold his stock. It is Mr. Hendren's intention to open on Portage Ave. in the near future, or as soon as an eligible site can be secured. He will carry a select and representative stock. Bert Hendren,

who was manager for his brother, has in the meantime, taken a position with the Regal Shoe store, Winnipeg, being in charge of the men's department.

#### ENTERPRISING FIRM BECOMES INCORPORATED

Valentine & Martin, Limited, is the name of the firm of Valentine & Martin, shoe manufacturers, Waterloo, Ont., who last week were granted a federal charter, with a capital stock of \$200,000. The firm make men's, boys' and youths' Standard screw and pegs, and men's Goodyear welts. Mr. Valentine, senior member of the organization, is of Scotch extraction, and learned shoemaking at the bench,

after which he became acquainted with the machine method. He spent some years in Dundee and came to America in 1887, where he found employment in Lynn, Mass., making turn shoes. Twenty-six years ago, Mr. Valentine located in Toronto and engaged with the old firm of Cooper & Smith. He was later with the J. D. King Co. for some eight years in the turn department. He then went to Montreal, where he was with the Thompson Shoe Co., for some time, and afterwards journeyed to Quebec, where he organized the factory of J. B. Blouin & Son. Thirteen years ago he saw that there was a splendid opening in Ontario, for a factory producing staples. He located in Waterloo, beginning in a small scale, but from the first met with great success. In 1912 a Goodyear welt department was added, while there have been numerous extensions to the plant, which is now one of the largest in the province. Some nine years ago, J. B. Martin joined forces with Mr. Valentine, and the two have made a strong team. Their goods are sold in all parts of the Dominion, and their brands, such as the "Everwear," "Canadian Workman," "Construction," and "Valentine" shoes are recognized for their wear and worth in every section of Canada.

#### THEY FAVOR DAYLIGHT SAVING

At a well attended meeting of the Toronto Shoe Retailers' Association held in the Temple Building on May 30th, the Daylight Saving movement was discussed, and a resolution was passed, strongly endorsing the plan, which is being adopted in so many cities and towns of Ontario, and will probably go into effect in Toronto some time during June. It was felt that the movement was one in the right direction, and several speakers heartily endorsed the proposition. It is the intention in the near future to hold a conference between the wholesalers and retailers, to discuss some matters of mutual interest, and the executive was appointed to arrange a suitable date.

#### SELLING YOURSELF AND STAYING SOLD

No qualification is more important to a man going into business in the employ of others than the ability to sell himself, his time, his services.

It is a fine thing to be able to sell for others and to get a big salary for doing it, but selling must begin right at home. It must begin with selling yourself to some one before you can start to sell for them.

Just as a salesman can always get rid of any amount of goods if he does not care what the price, so he can always sell his services to some one if it makes no difference to him how much salary he is to receive. Profitable salesmanship is never as easy as mere unloading. Make yourself worth a good price and then do not hesitate to ask the price.

A young fellow once came to me and said, "You don't

want to get a cheap chauffeur, do you?" That was the last thing I wanted, a cheap chauffeur. My neck is too valuable to me. But I did happen to want a driver just at that time, and I would have been glad to hire a young chap who was willing to work at a comparatively low wage, but no "cheap" chauffeur for mine!

And there is no good employer of the sort a man wants to work for who is going to hire employes who rate themselves as cheap. It is just like selling anything else. You are not going to find prospective buyers believing the goods worth more than the seller claims for them.

The man trying to sell his services should have enough self-respect, a good enough opinion of himself, to command the respect of his prospective employer. Don't try to give the impression that you know it all, because you lack quite a lot of that, but show that you do know something. On the other hand, to get a position by over-rating yourself can end only in a downfall. You know what happens when a man sells goods on the strength of a recommendation beyond what they will stand. He gets the goods back or he gets more complaints than he can take care of, and he is pretty sure to lose a customer.

Your ability to serve the man to whom you want to hire will in a considerable degree be judged by your ability to sell yourself, to present your personality and your qualifications in a pleasing manner. Study up in advance what you are going to say and do to make your selling talk as convincing as possible.

SOME OF THE 1916 OFFERINGS IN EIGHT INCH HIGH  
OUTING FOOTWEAR—BY KAUFMAN RUBBER CO.

## MALTESE CROSS RUBBER HEELS

The resistance to wear, the *wearability* of these heels is a remarkable feature.

They outwear any leather heels, that's certain. Some say they outwear two leather heels, some say three. There's no crumbling or chipping, as in most heels—just slow, gradual wear.

This economical quality of wear, with their never-failing resiliency or springiness, makes the Maltese Cross Heels the most satisfactory on the market.

Let us send you a sample lot and see for yourself how and why you can recommend them.

Gutta Percha & Rubber, Limited  
Toronto

# SPORTING SHOES SHOULD BE FEATURED NOW

The Big Opportunity for Their Sale is During the Month of June—Some Effective Suggestions on Putting in an Outing Footwear Window—The Present Summer Will Be a Leader in Sports and the Live Dealer is the One Who Is Going to Cash in

“WHITE Shoe Week” for the sale of outing and sport shoes will be observed by the trade across the border from June 12 to 17. The idea was suggested a year ago by the Shoe Retailer and seems to have caught on, and it is predicted that the sales this season will exceed those of last summer by a great majority. There is no doubt that outing shoes—sporting footwear as it is popularly called—is gaining in favor and appreciation each season. Such shoes are now made with solid leather heels and are cut high in the leg. They possess style, dignity, comfort and flexibility, and are being presented in all shapes from the bal with the eight-inch top to the daintiest kind of a pump.

## Make a Good Display of Tennis Goods

The first thing to consider when displaying white footwear is to provide a suitable background, selecting a color that will not only show the shoes to good advantage, but one that is pleasing in every other respect. Blue, green, black, rose and purple are all good colors. However, the colors most suitable are the cool ones, such as blue, green and purple. Green is most preferable because it reflects the summer atmosphere. Thoroughly impress in your mind that in every instance a summery atmosphere must be reflected. This is a mistake made time and again by a great many merchants and display men.

The nature of the sport shoe being more or less suggestive as to its use makes it a very simple matter to do something very appropriate and out of the ordinary when it comes to ideas for displaying them amid their proper surroundings, and in connection with certain things that have a tendency to point out the uses for which these are used. In fact, the keynote of all good display work depends entirely on the ability to create and inject just such thoughts into the display.

It does not require the mind of a genius to be able to create ideas that will sell goods. The first thing to do is to stop, look, and think. Think in the right direction. Consider the nature of the merchandise. Its selling points should be carefully gone over and every detail should be taken into consideration. When this has been done, proceed with the plans for displaying them properly.

Very forceful displays can be created by introducing into them such articles as suggest the uses to which the shoes may be applied. The tennis racquets, golf sticks, etc., used in connection with pictures of outdoor scenes, done in silhouette style, combined with the use of imitation bark paper, produces a setting that is quite inexpensive, yet easy to install and of a most appropriate nature.

Accessories, such as tennis racquets, net, golf bag, sticks, etc., may all be borrowed from a local sporting goods dealer.

## Get at the Game Early

The shoe merchant who does not push sport and outing shoes during the early summer months, is overlooking some big opportunities. Take the matter of sport shoes, alone. Men and women are taking their sports more seriously than they once did; they are dressing more in harmony for the sport than used to be the custom. The result is a demand, or at least an increased desire, for golf, tennis, and outing footwear of every description.

Tennis has a very strong revival of popularity in all parts of the country. The young men and girls and the older men and women who once played the game wearing

ordinary “sneakers,” are to-day prospects for regulation tennis shoes, if their advantages are properly presented. And so it goes, through the entire field of sports and outing.

The time is ripe for a good, strong campaign showing people how they will enjoy their favorite sport much more if they wear the right kind of shoes. White Shoe Week, June 12-17, opens the door. We might make as the slogan for such a campaign, “You Can’t Do Your Best at Your Favorite Sport, Without the Right Kind of Shoes.”

This slogan could be made the subject of a good sized newspaper adv., or a series of small advs.

The shoe for each sport should be taken up and described in detail, telling the people to whom you are talking just how the shoe in question makes playing the game easier and more enjoyable. A very convincing description could be given, for instance, of how the right golf shoe might make a big difference in a man’s score.

## Strong Arguments to Present

“Champion — wears this type of shoe,” would be a strong argument to present to any golf or tennis enthusiast. Such a statement might be illustrated with a photograph, placed in a prominent place in the window, of the champion, alongside the special shoe featured.

Efforts could also be made to induce certain local organizations to adopt a special type of shoe. Capital could be made of this fact.

Window trims can feature different kinds of recreation: one week a canoe, another week a tennis court, another week a golfer. Display cards calling attention to the different kinds of sport shoes should be phrased in the language of each particular sport.

For instance, a card back of a golf shoe might read: “It’s Hard Work to Make Bogey, but This Shoe will Help.” Similarly, a tennis shoe card might read: “Even the Shoes Play a Part in Taking the Set. Be Sure Your Tennis Shoes are Right.”

“Vacation Suggestions” is another productive way of selling outing and sport footwear. In the newspaper or circular advertising give a list of the different kinds of footwear each member of the family should have for their vacation trip.

## In a Class by Themselves

Mark Twain was no different from the men and women of to-day except, perhaps, in this instance: He possessed the nerve that the masculine element usually lacks. Men have for so many years been subjected to a rigorous discipline in the matter of sombre clothes that they are afraid to assert themselves as Twain did, though under it all they love white. Witness their tossing of conventions to the wind during vacation and blossoming forth in white trousers, white sox, and white shoes.

White shoes! There is an intonation about the word white that puts it in a class by itself. It suggests many things, but most of all purity. This is a selling point worthy of consideration—particularly by the shoe retailer, whether he caters to men or women.

Having asserted that love of white is innate with all humanity, let us narrow the subject by applying the text.

The sale of men’s white shoes is, roughly speaking, a dead issue in comparison with current sales of like footery in the women’s department. This very fact makes it a worth while field for investigation.

# AMONG THE SHOE MEN.

A. L. Dupont of Dupont & Frere, shoe manufacturers, Montreal, has returned from a business trip to Winnipeg.

W. E. Woelfle, of the Woelfle Shoe Co., Berlin, Ont., was in Montreal recently on a business trip. He reports that trade is good and the factory is running overtime to keep abreast with the orders on hand.

D. C. Lambe, of Huntsville, Ont., dealer in shoes and men's furnishings, recently assigned to McLeod Tew, of Hamilton. The stock which is valued at \$2,431.35, will be sold on June 7th.

James Brown, one of the oldest merchants in Mount Forest, Ont., where he conducted a shoe business for very many years, passed away on May 26. In his earlier days Mr. Brown took a keen interest in all pertaining to the welfare of the town, serving for several years on the School Board. He always took a deep interest in church work, being a consistent Presbyterian, and served as secretary for many years. He leaves a wife, one daughter and three sons, one of whom is in France.

The contract for the erection of a new warehouse in Regina, Sask., for the Canadian Consolidated Rubber Company, has been let to the Poole Construction Company, of Regina. The cost of the building will be about \$35,000, and the site is on Broad street. The structure will consist of two storeys and a basement and is arranged to carry another three storeys when required. The material will be of re-enforced concrete and the building will be practically fireproof, being of the latest type, and well appointed in every respect for warehouse purposes.

J. Stevenson & Co., shoe retailers, Sault Ste. Marie, Ont., recently made an assignment to McLeod Tew, of Hamilton. The stock and fixtures amounting to \$12,614.93, will be sold by auction on June 7th.

Shoes that have gone up \$1 a pair since the first of the year will advance another dollar next fall. Sol Wilo, secretary of the executive committee of the National Boot and Shoe Manufacturers' Association said recently in New York. The Association met last week in Philadelphia to discuss the most serious situation that has arisen in the trade since 1896, when what is called "the leather crisis" arose. The association considered a proposal that an embargo be laid on the exportation of all finished leather until the belligerents of Europe shall have raised their embargo on the exportation of raw material to the United States.

Sydney, B.C., wants a military camp, and its business men have prepared data urging such a move on the part of the military authorities. Among those who are members of the Sydney Board of Trade, and have taken an active part in the agitation, is Robert Sloan, shoe merchant.

The new Cut-Rate Shoe Store, Calgary, has been holding a special sale.

The Perth Shoe Co., which was reorganized some time ago, has obtained a new charter, and is empowered to take over the business of the Perth Shoe Co., formerly the Winn Co. Ltd., and carry on the business of manufacturing, selling and dealing in shoes. The capital stock of the company is \$100,000.

C. L. Owens and John T. Elmes, who, for many years were associated with the Royal Shoe Co., 88 Yonge St., Toronto, as announced last issue of the SHOE AND LEATHER JOURNAL, have withdrawn their interests with that company, and will open up a handsome new shoe store at 89

Yonge Street, on August 1st, with a full representative line of the highest-grade and smartest creations in footwear.

It has been decided to enforce the Sunday closing by-law in Quebec city with respect to shoe shine parlors. Action was taken on this matter owing to a petition signed by several employees who requested to be relieved of Sunday work.

The Chatham Shoe Mfg. Co. Ltd. have begun operations in their new premises in Chatham, Ont. E. S. Hunt, in a recent interview, expressed the opinion that in a few months the company will be turning out 1,200 pairs a day. E. D. Crosse, of Rochester, N.Y., has recently joined the firm as an expert pattern man.

Among those who have recently joined the 131st Westminster Battalion, C.E.F., is Edwin H. Johnston, of Johnston's Big Shoe House, Ltd., New Westminster, B.C., who is a brother of Ald. J. J. Johnston.

Wm. H. Walker, of Halifax, has been awarded the contract for supplying 29 pairs of rubber boots at \$5.50 per pair, to the street and water committees.

A novel advertising scheme has been inaugurated by the G. & C. Shoe Outlet, 37 St. Catherine street east, Montreal, which helped to commemorate Mother's Day. Red and white carnations were given away to the many who called.

O. Chagnon & Co., shoe sealers, of St. John, Que., recently assigned to V. Lamarre.

The death took place recently in Quebec of a former well-known shoe manufacturer of that city in the person of M. H. Lachance, at one time proprietor of the Dominion Shoe Company. The deceased gentleman, who retired from business about six years ago, was much esteemed amongst the business and other members of the community. He leaves a wife, formerly Miss Hebert, and a son, Eugene, by his first marriage, and many other friends to mourn his loss.

Petitions from the shoe retailers, men's furnishing and clothing merchants, of Vancouver, B.C., each with a large number of signatures, asking the council to license all the merchants in these lines in the city, in order to enable the six o'clock closing by-law to be enforced easily, and suggesting that the license fee be made nominal, say \$5.00 a year, has been received by the Vancouver city council and referred to the finance committee.

Z. Roy, who has conducted a shoe repairing business in Cornwall, Ont., for a number of years, left recently for Quebec City, where he will go into business with his son.

D. C. McDonald, a well-known shoe traveler, died recently in Antigonish, N.S. He had covered the Maritime Provinces for the past twenty-five years and was well liked by the trade who will miss his cheery presence and welcome visits.

The by-law in favor of granting a loan of \$6,000 to the Ideal Shoe Co., Limited, was carried by the ratepayers of Elmira, Ont., by a majority of 223. The Ideal Co. will make extensive additions to their plant.

Wholesale boot and shoe merchants in the West report a healthy situation as regards the placing of business and the payment of accounts. They, however, continue to complain of the difficulty of getting supplies from the factories. It is said that the labor situation is handicapping the shoe factories greatly. A large number of expert workmen have

enlisted, and it is difficult to replace them. In the meantime there is a ready sale for practically all the western jobbers can get their hands on. Leather footwear market continues to firm up steadily, and manufacturers have withdrawn their price lists entirely. They will not, for example, accept business for next September delivery except on the understanding that the prices for such will be those in effect at that time. Consequently the jobbers are not placing orders for fall delivery as they otherwise would. Retail merchants in Western Canada have placed a satisfactory amount of fall business, but they are face to face with the great uncertainty of prices.

L. M. Ward has opened a store in the Covert Block, Canning, N.S., in which he will carry a full line of rubbers, boots and shoes, as well as dry goods and men's furnishings.

The Regal Shoe Co., of Toronto, announce that in their samples for fall they have snappy creations on six different lasts in black calf, which the retailer can sell at the popular price of \$5.00 per pair, and make a good profit. Another interesting statement by the company is that all the prices which now prevail on their various lines, will hold good to the regular agents of the company, from one end of Canada to the other, until all have been called upon. This statement is made in view of the fact that many inquiries have been received, urging haste in the matter of interviews, such parties writing in evidently under the impression that owing to the rapidly ascending cost and scarcity of leather, etc., quotations will go much higher. The company, however, will see that all their agents in the various provinces obtain fall lines at the present prevailing quotations.

The annual meeting of the Retail Merchants' Association of Manitoba, will be held in Winnipeg, June 6, 7 and 8. It is expected that the gathering will be the largest and most representative one of retail men ever convened in the province. Among the important topics, which will be discussed, will be "How to meet mail order competition"; "The

handling of bankrupt stocks"; "Do you Favor Taxing Mail Order Houses"; "Buying, Cash and Credit"; "Should we have our own Trade Journal"; "Value of Advertising in local paper"; "Co-operation between merchant and farmer," and "Consolidated Buying." C. F. Rannard, president of the Rannard Shoe, Ltd., Winnipeg, is the president.

The Imperial Shoe Company have opened a store in Regina.

The Parrott Shoe Co., of Saskatoon, have sold stock to C. D. Mitchener.

J. G. Maxwell has started in the boot and shoe business in Swift Current, Sask.

Rose Steinberg (Quality Shoe Store) has moved to Kamsack, Sask., from Winnipeg.

R. E. Jamieson, general salesmanager of the Canadian Consolidated Rubber Co., and W. A. Eden, secretary of the Dominion Rubber System, were in Toronto recently on business. The latter received the congratulations of many friends on his recent marriage to Miss Mabel S. Henderson, daughter of L. L. Henderson, 581 Lansdowne Avenue, Westmount. Mr. and Mrs. Eden have lately returned from a trip to the southern states and have taken up their residence at 518 Grosvenor Avenue, Westmount. The office associates and friends of Mr. Eden presented him with a purse of gold.

Clarence Bedford, 1 Boothroyd Avenue, a boy employed by the Blachford Shoe Mfg. Co., Toronto, was injured about the head and sustained a fracture of his right leg when he fell down the elevator shaft from the sixth story of the company's premises at 90 Sherbourne Street recently. The marvel is that he escaped so fortunately and is alive to-day to tell of his experience.

At the annual meeting of the Saskatchewan Credit Men's Trust Association, which was held in Regina on May 6 and 7, Geo. W. Macfarland, of Regina, manager of the western branch of Williams Shoe, Limited, Brampton, was

elected president of the Association. Among those who delivered addresses were T. D. McGee, manager of the Thos. Ryan Co., Winnipeg, who spoke on co-operation as a factor in business.

Monroe Einstein, of J. Einstein, Inc., was in Montreal recently on business.

Recently a competition was held by the Dominion Rubber System in essay writing—the subject being "the preparation of a salesman." Miss M. M. Holland, of the head office, Montreal, won the first prize, which was a gold medal; Mr. W. G. Evans, of the Toronto branch, captured second premium, a silver medal; while the third award—a bronze medal, went to Mr. E. Maidens, of the London branch.

Acting manager W. R. Stewart, of the St. John, N.B., division of the Canadian Consolidated Rubber Co., is on an extended business trip to Newfoundland.

Charles Ahrens, shoe manufacturer, of Berlin, Ont., was in Montreal lately on business.

C. S. Sutherland, general manager of the Amherst Boot & Shoe Co., Amherst, N.S., was in Montreal recently calling upon the trade.

The marriage of Miss Florence Aileen, daughter of Dr. and Mrs. H. A. Greene, Fredericton, N.B., to James M. Palmer, secretary-treasurer of the Palmer-McLellan Shoe-pack Co., was solemnized at the home of the bride's parents, 498 King street, recently. Rev. W. P. Dunham, of St. John, assisted by the Very Rev. Dean Neales, performed the ceremony. Mr. Palmer and bride left on a wedding trip to Boston and New York.

H. E. Moles, managing director of J. & T. Bell, Limited, Montreal, has been nominated as one of the city representatives on the Montreal branch of the Canadian Manufacturers' Association.

Charles Duclos, of Montreal, representing the firm of Duclos & Payan, was in Toronto on business last week and called upon a number of members of the trade.

Robert E. Bennet, western Ontario representative of Ed. R. Lewis, leather dealer, Scott St., Toronto, has joined the ranks of the benedictines, being married in St. Mark's Church on May 31st to Miss Elizabeth Reed, 617 St. Clarens Ave., Toronto. Mr. Bennet and bride are spending a few days in Montreal, Boston and New York and many friends will join in wishing them every success and prosperity.

George A. Blachford, of the Blachford Shoe Manufacturing Co., Toronto, is on a business trip to Boston, New York and other eastern centres picking up all the latest pointers and suggestions in women's shoe styles for the coming season.

T. Sisman, shoe manufacturer, Aurora, Ont., was in Montreal recently seeing his daughter, who is a nurse, leave for overseas service.

The Woelfle Shoe Co. Ltd., Berlin, are working up until 9 o'clock each night and report business as very satis-

factory. Since the outbreak of the war about 75 per cent of their male help has enlisted, but matters are now gradually working around in good shape and the production of their lines of women's McKays has been considerably increased.

The new addition to the factory of the Parker Shoe Co., Preston, Ont., which is 40 x 60 feet and three storeys high, is rapidly nearing completion. The extension is built of brick and will result in greatly increasing the capacity of the plant.

H. W. Pearson, manager of Ames-Holden-McCready, Limited, Toronto, is spending a few days in Montreal on business.

N. MacFarlane, of the MacFarlane Shoe Co., Montreal, spent a few days in Toronto last week.

Fred P. Beemer, western Ontario representative of the Blachford Shoe Manufacturing Co., Toronto, has returned from an extended fall selling trip throughout the western provinces and reports a very successful season.

It is understood that Fairweathers, Limited, will shortly install shoe departments in their establishments in Montreal and Winnipeg and will handle several leading lines of ladies' shoes in which they will specialize.

Wm. H. Marsh, of the Wm. A. Marsh Co., Quebec, was in Toronto recently, calling upon the trade.

A permit has been granted to the Robert Simpson Co., Toronto, for the erection of an eleven storey mail order building on the west side of Mutual St., Toronto. The structure will cost \$400,000.

R. E. Jackson, representing George E. Keith & Co., is in Toronto on business having concluded a most successful trip throughout the western provinces.

Contracts are being invited for the erection of a twelve storey factory building to be erected by the T. Eaton Co. in Toronto. It is rumored when the new building is completed that the company will install a plant for the manufacture of shoes.

Geo. A. Slater, of Geo. A. Slater, Limited, has been nominated for the position of chairman of the Montreal branch of the Canadian Manufacturers' Association, which will hold their annual meeting on June 6. Lieut.-Col. W. J. Sadler, of Sadler & Haworth, leather merchants, Montreal, has been nominated as one of the Montreal city representatives.

Harold Johnson, son of Jos. Johnson, shoe retailer, 479 Parliament St., Toronto, who has been on the inspecting staff of the Canadian Army Shoes at Ottawa, has returned to Toronto and taken a position in his father's establishment.

Geo. E. Chambers, and N. E. Woodall, of the Regal Shoe Store, Yonge St., Toronto, were in Buffalo recently on a business trip.

Charles Newton, of the Robinson Department store, Winnipeg, is spending a few days on business in Toronto, Montreal, New York and other eastern centres.

L. B. Shafer, representing the Moore-Shafer Co., Brockport, N.Y., spent a few days in Toronto this week with a fine line of samples, in which a number of the latest offerings are featured.

The Canadian Shoe Findings Novelty Co., 2 Trinity Square, Toronto, are handling a complete range of the highest grade buckles, bows, rosettes, etc., in every style for the colonials. They are also selling a black cloth top dye which is guaranteed not to penetrate, fade or rub off.

Dr. Helen M. Beck, late of New York, who is in charge of the orthopedic department of the new Walk-Over Boot Shop in Montreal, spent a few days recently in Toronto. L. H. Wienke, of the Toronto store, is paying a visit to Detroit.

L. F. Jackson, of Toronto, has returned from an extended selling trip throughout the Maritime provinces in the interest of the Brandon Shoe Co., of Brantford, and the Blachford Shoe Mfg. Co., of Toronto.

## THE NEWS FROM QUEBEC CITY

J. E. Matheson, representing The United Awl and Needle Co., West Midway, Mass., and H. B. Parker, of Parker-Irwin, Ltd., Montreal, were in town recently.

Wm. Desbiens, formerly assistant superintendent of Wm. A. Marsh Co., has taken charge of the finishing room at Tourigny & Marois.

E. Tremblay, shoe manufacturer, suffered from a fire which occurred at his private residence. Most of the damage was caused by smoke and water.

Quebec shoe merchants are still keeping busy, and wholesalers report that collections are fairly good. There is a great demand for bronze dyes for ladies' shoes.

Jos. Tanguay has started business in his new shop on St. Dominique Street, and is busy on his samples.

M. H. Lachance, who some years ago was the proprietor of the Dominion Shoe Co., died recently. His funeral was largely attended by friends and acquaintances, among whom he was held in high esteem.

As a result of the sudden hurricane which visited Quebec lately, considerable property damage was caused in all parts of the city while E. Belanger, aged about sixty years, is lying at the point of death at the Hotel Dieu Hospital, having been swept off the roof of a tannery on De Courcelles street when the storm was at its height. Belanger, who is employed in the tannery of J. Guay & Sons, rushed to the roof of one of the sheds which is used for drying skins. The wind struck the building so fiercely that it was apparent that the roof would be carried away. The employees fled and all escaped but Belanger, who fell to the street with the tem-

HERE IS A WINTER HUNTING SCENE AT RIVIERE A PIERRE, LAKE ST. JOHN DISTRICT, QUE. JOS. THIVIERGE, SHOE MANUFACTURER OF QUEBEC, IS SEEN ON THE LEFT, AND LUCIEN BORNE, KID LEATHER MANUFACTURER, QUE., ON THE RIGHT

porary roof which served as a protection for the skins. The drop was about fifty feet and when the man was picked up he was unconscious. He had one leg fractured and suffered grievous internal injuries from which he is not expected to recover.

The Quebec boot and shoe manufacturers are working up to full capacity and many of them are working night

and day. This is due to the phenomenal increase in orders coming in for footwear from all over the Dominion. At the beginning of the war, the merchants cut down their stocks, by decreasing their regular orders, and now that business is improving, with the probable prospect of a shortage in imported leather, orders are pouring in to a larger extent than the factories are able to cope with, and already some of the Quebec factories have had to refuse further orders.

B. W. S. Martin, of the John Ritchie Co., Quebec, who spent a few days recently in various centres in Ontario, has

ENJOYING TARGET PRACTICE BEFORE BREAKFAST AT RIVIERE A PIERRE, LAKE ST. JOHN DISTRICT, QUE. LUCIEN BORNE, KID LEATHER MANUFACTURER, QUE., ON THE LEFT, AND P. OUELLETTE, SHOE AND LEATHER FINDINGS DEALER, ON THE RIGHT.

been with the company for 25 years, and during the past five has represented them on the road. He has a son, Pte. W. J. J. Martin, who has enlisted with the 73rd Royal Highlanders, of Montreal, and is now at East Sandling, England. Private Martin, previous to joining the colors, was with the Bank of Montreal in Granby, Que.

The shoe store belonging to Mr. J. Edmond Drolet, at 363 St. John Street, Quebec, was badly gutted by fire which broke out recently. The fire originated from some unknown cause in the rear of the store and had gained considerable headway before it was discovered. A large portion of the stock which escaped the fire was damaged by smoke or water.

Philo England, of Cowansville, Que., passed away recently, in the eighty-fourth year of his age. When a young man he became apprenticed to his brother, Isreal, at Knowlton, Que., where he spent several years learning the tanning trade. He later worked at Fairfax, Vt., and Providence, R.I. With his brothers Francis and George he conducted a tannery at Fulford, for a quarter of a century.

# Has Anybody Jumped Your Claim?

If the repair requirements of your customers are not already taken care of in an entirely satisfactory manner (and by that we mean by somebody equipped as we can equip them), it will pay you well to write us **now** for a catalog and full information regarding the advantageous terms on which we place our machines with shoe retailers. We would also be glad to supply any specific information you may require about this wonderful and growing part of a shoe retailer's business.

We are pioneers in this business. Our machines have earned a high reputation for excellence in construction and durability. They are in use by the most successful shoe retailers and shoe repairers, and with them we supply a service that is only paralleled by that which has built up the great shoe industry of the country.

Your request for information will place you under no obligation to us. We are glad to supply it.

## Union Shoes for Union Men

The retailer who meets the demand of every possible buyer in his town handles Union Stamp footwear.

Dealers who do not carry Union Stamp shoes are not soliciting their rightful share of the shoe business of their city.

The Union man will have Union shoes for himself and his family. He demands them and if he cannot obtain them will turn elsewhere.

To you, Mr. Retailer, who advertise Union Stamp shoes the tide of trade is turning.

You cannot afford to neglect the Union trade, and even the man who does not buy Union shoes merely because of Union principles recognizes the high quality of Union Made footwear.

You have nothing to lose and all to gain by carrying these shoes.

Let us send you to-day a list of manufacturers who make shoes bearing the Union Label and add a live selling asset to your business for the coming year.

Remember, no matter what any manufacturer may say, no shoes can be considered Union-Made unless they have the Union-Stamp

## REMARKABLE BUSINESS SITUATION

**Busiest Season Manufacturers Have Experienced in Years—Sellers Cautioning Buyers to Exercise Prudence—Leather and Shoe Producers Playing a Waiting Game—Dealers Anxious as to Prices.**

**S**AID a prominent shoe manufacturer recently: "I have been nearly forty years in the shoe business and have never seen a situation just like the present in shoes. Ordinarily we ought to be working three days a week at this time of the year, but just now it is a question of getting out the stuff fast enough. Where a dealer has been accustomed to buying sixty pairs of a certain kind of a shoe, he is demanding ninety or in some cases doubling his order. What with the lack of help and the anxiety of dealers to get goods we are at our wits end. We have been trying to supplement our own production with eastern goods and find it as impossible to get goods in Quebec as to make them here. We have enough orders ahead of us just now to keep us busy for six months to come and that without reference to the approaching sorting season for fall. I don't see why dealers should be so tremendously nervous about goods as there will be plenty of shoes and leather to go around. It is true that stocks are somewhat low and that present ordering does not warrant any feeling that retailers are overloading, but there does not seem to me to be any sense in this pushing and jostling for goods, as it is only embarrassing the shoe manufacturer and jobber and is actually bolstering up prices, as anyone can readily understand. If shoe manufacturers could go a little easier it would lessen the pressure on the leather men who find themselves in the strange position to-day of being sought after rather than seeking buyers. Just fancy, oak sole sold last week at 58c and promises, with slaughter and Spanish of the hemlock varieties, to go higher. I don't see any reason for the tremendous advances that have taken place in light leathers, particularly dongolas. I think manufacturers are partly to blame for 'boosting' costs on themselves. We are absolutely following a day-to-day policy and selling goods on a regular advance on cost. We had a concern write in the other day to have a balance of a spring order filled that was given last fall. Ordinarily this dealer would have objected if we had tried to complete this order in June, but the boot is literally 'on the other foot' just now and he is annoyed because we will not let him have these few pairs at last October's prices." The situation as given by this manufacturer is typical of conditions that prevail.

One of the foremost tanners in the province expressed the feelings of most of the leather trade when he stated to a representative of the SHOE AND LEATHER JOURNAL that his firm was playing the game "close to the cushion." Tanners have followed for some time past a policy of only producing what they could see sales ahead for. This, under existing conditions, has resulted in a shortage of certain lines of stock, and the increased demand has had the effect of enhancing values to an extent that has made a constant revision of costs necessary.

Manufacturers are wisely beginning to advise their retail customers to exercise greater conservatism in buying. It is in the interest of all concerned that the "watchful waiting" policy of the tanners should extend to the other departments of the trade or we will be up against a more serious condition of affairs than already exists.

The "boom," if such it may be called, does not seem to be confined to leather goods. The rubber trade claims that the business in tennis and sporting shoes generally is practically double that of a year ago although the season has not properly commenced.

## HOW LIVE REPAIR BRANCH HELPS SHOE STORE

**Keeps the Establishment in Touch With the Right Kind of Shoes and Enables Careful Discriminating Purchasing—It Helps to Create Satisfied Customers and Affords a Well Rounded, Complete Service—Burlington Man Who Thoroughly Knows Shoes**

“**I** LIKE the shoe repairing end of the business because it keeps me in touch with the kind of shoes that I am handling and enables me to buy the right sort. For instance, I sometimes get a certain pair to sole for the second and even the third time and if I am not handling that

H. A. GRAHAM, BURLINGTON, ONT.

make and have an opening for such a line, when the traveler calls I know something about the quality, comfort and durability of his goods before purchasing.

### Making Good Some Defects

“Again, in even the best makes, I find that the top lift comes off, a seam rips, or the welt gives way, etc., and it is up to us to fix the shoe, which we do cheerfully. This frequently turns a dissatisfied customer into a satisfied one.

“Our business is not so large that it takes up all spare time and any such moments that I have I can spend to advantage sewing on soles, trimming edges, finishing, etc. I believe in the old saying that ‘what is worth doing at all is worth doing well,’ and I like to see good shoe repairing—properly finished work that is a credit to the establishment, and am of the opinion that such work brings trade and helps to retain it. The aim of this store has always been to satisfy its patrons, as a satisfied customer is not only a pleasant one to do business with but an advertisement that even printers’ ink cannot surpass.”

### Of Great Service and Convenience

Such is the view taken by H. A. Graham, of Burlington, Ont., who has been in the retail shoe business in that town for the past ten years. Ever since he started he has operated in connection with his neat, well-kept premises an up-to-date quick repair outfit. He regards machinery as a big improvement over hand work and would not go back to the latter under any consideration. He has a Champion stitcher, finisher and edge trimmer, as well as buffers and skate grinder, fourteen feet over all in length, the equipment being run by a one-horse power motor.

Mr. Graham is a Burlington boy and, after serving his apprenticeship in that town in the shoe line, went to Hamilton, where for nine years he was on the road for John Lennox & Co., wholesale shoes. Ten years ago he entered the retail footwear business for himself in his native place

and has made a success of the venture. The slogan of his inviting and attractive store is “The Home of Good Shoes.”

So far as the repair branch alone is concerned he finds it a fair investment and working in conjunction with the store he believes that it has resulted in bringing more business to him, for he finds that the store helps the repair department and vice versa. He has a special man in charge of the repair outfit who, in cases of special rush or emergency, is able to help out in the selling end. Mr. Graham makes known the facilities of such a department by suggesting to patrons that if their shoes need attention they can receive it right on the premises, and in all his advertisements in the local paper the announcement is made that shoe repairing is done promptly, neatly and quickly.

### Shoe Store Logical Place for Repairs

The prices which he obtains for the general run of work are:—

Men’s sewn soles 85c., nailed 70c., heels 30c.  
 Women’s sewn soles 65c., nailed 50c., heels 25c.  
 Misses’ sewn soles 60c., nailed 45c., heels 20c.  
 Children’s soles, nailed, 40c., heels 15c.  
 Rubber heels 50c.  
 Rubber heels, women’s, 40c.  
 Patches 10c. up.  
 Turn soles, women’s, 75c.

Mr. Graham says that with the uncertain condition of the leather market he expects to raise the figure for repairs. He does not see why an ordinary shoe store should not do repairing as it is certainly right in the line of business carried on. No collecting or delivering of repair work is done, as all that can be properly handled comes in.

### Building Up Steady Patronage

Always stocking a good class of footwear Mr. Graham has built up a strong, steadily increasing trade. He has also demonstrated that a live repair department brings business

MR. GRAHAM'S ATTRACTIVE SHOE HOUSE, BURLINGTON, ONT.

to his establishment that he otherwise would not secure. He has always believed in good service, courteous treatment and honorable dealing and his record in both the shoe retailing and repairing line is one which proves conclusively that success can be achieved in one’s home town or any good centre by industry, application and faithful attention to detail.

## THE SCARCITY OF LABOUR

**Manufacturers Struggling Against Heavy Odds—Orders Plentiful,  
Workers Unobtainable—The Use of Unskilled Help Runs Up Costs—  
Why Do Not Women's Organizations Take Up This Great Problem.**

**M**ANUFACTURERS in all lines will tell you that it is not the scarcity or high cost of materials that is occasioning them embarrassment in connection with production. It is simply impossible to get enough help to turn out the goods. Many of the factories are running less than fifty per cent of capacity for no other reason than that they cannot get adequate help. In most cases they are crippled even further by having to take unskilled and untrained workmen. One manufacturer stated recently that his manufacturing costs had increased forty per cent since last year on account of the drain for recruits upon his establishment necessitating the employment of untrained workmen. It is unfortunately the case that the best men heed their country's call, while the class that could be better spared remain at home and either provide indifferent substitutes in the factories or on the farm or dawdle away their time in pool rooms or corner stores.

With conditions as they are to-day one may well ask why the women and girls of the country have not arisen to the occasion. One has only to pick up the daily papers in our larger cities and towns to find column after column of advertisements calling for female help. Some of the appeals are almost frantic in their character and evidence the sore straits in which manufacturers find themselves for producing goods in which the skill and quickness of female workers are essential. A whitewear manufacturer recently stated that never in the history of his concern had it been so difficult to procure machine, laundry, finishing and packing operators. In fact this gentleman stated that, the present recruiting methods were robbing them of their best workers. Girls were marrying soldiers and living on the pay and patriotic allowance, and instead of working were having a gay time, attending the movies, or gadding about. The tendency seems natural as shown by an incident reported from a German town, where the police rounded up a lot of these habitues of amusement places and had their allowances cut off.

It would seem that right here is a more pressing and promising field for the operation for our women's organizations than in the recruiting leagues. Recruiting is more properly a man's job, while the pressing home of the necessity of those "staying with the baggage" doing their part ought to commend itself to the eloquent persuasiveness of some of those who now adorn platforms at recruiting rallies. In England women are taking men's places even in machine shops and tanneries. There are dozens of occupations in Canada that could be filled quite as well, if not better, by girls or women than by boys or men. A western furniture factory is using girls to-day to do packing and others to do light finishing. We firmly believe that if the women of the country realized the actual conditions of affairs they would gladly respond, but it has seemed hitherto everybody's and therefore nobody's business to point out the fact that the whole country is just now suffering for lack of recruits for its industrial army, quite as necessary to its safety as those who don the khaki.

One naturally asks what is the use of spending vast sums of money talking "thrift and production" when our industries languish for help that is lying about unused. There should be an immediate effort to register and label all industrial as well as military "slackers" and there should be a campaign upon the part of the women's organizations of the country to see that the help needed for lighter industrial vocations be forthcoming.

# TELL YOUR CUSTOMERS WHY SHOES ARE SO HIGH

**Causes Which Have Contributed to the Present Stringent Conditions—Interesting Figures That Tell a Convincing Tale—The Advances on All Materials Have Been Heavy and the Termination Does Not Yet Appear—Comprehensive Summing-Up**

“**M**Y but your shoes are awfully dear. The last pair that I got here cost me much less than you are asking now.”

“I know it,” remarked the courteous salesman, “but this is a matter over which we have no control.”

“What has caused shoes to go up so? You are asking a dollar and a half more for this pair and two dollars more for that pair than you formerly charged and I am not going in for any fancy kid colors either,” observed the fair caller.

What is the cause, for she was of an inquiring turn of mind, although no haggler about price. A woman in comfortable circumstances, without extravagant tastes and of quiet ideas, she, like many others who have about all they can do to make ends meet financially, wanted to be given some plain, intelligent reason why there has been an advance before parting with so much more money for her footwear.

To be told that any article has gone up fifty or one hundred per cent. in price, and when the merchant or salesman is asked why and gives a vague, evasive reply—“Oh, it is the war”—well, this will scarcely satisfy many persons. They are apt to go away with the idea or suspicion that the retailer or a member of his staff is “slipping one over on them,” to use a colloquial expression, and perhaps they wish they had tried some other shop.

## Being Familiar With Facts

To avoid any such apprehension and to convince customers that all retailers of shoes are in the same plight, is evidence of efficient and progressive salesmanship. It is a part of the service which every boot store should render to its patrons. It is not to be supposed that every shoeman runs an intelligence bureau or a department of public information, but he should have the facts at his command if he finds—as he frequently does—that persons do not always accept everything for granted and like to know the causes leading up to enhanced values in any article they purchase. Such a buyer feels much more satisfied and goes away with the feeling that the merchant has really been compelled to pay more and in raising the selling figure is getting only a fair profit.

Not to be able to offer the explanation when required leaves any salesman open to suspicion or lack of interest in the line in which he is engaged. It creates a bad impression in the opinion of the customer and engenders distrust. If a strong, solid connection is to be enjoyed and maintained there must be a bond of mutual confidence and sympathy between buyer and seller.

Every retailer knows today that he has to pay more for his shoes—much more than before the outbreak of the war. He has the evidence in his invoices, his statements and drafts. The reasons why have been driven home to him by the average traveler, who is well armed with the facts of what the manufacturing trade is up against, before he starts out on his tour.

Contributing causes which are readily recognized by the retail trade are perhaps not so patent or intelligent to the customer. Generally speaking all calf and kid leather shoes—fancy colors are not being spoken of—have, in men’s Goodyear welts, gone up from sixty cents to one dollar a pair, while in women’s high cut bals, in all dull leathers, the advance has been from seventy-five cents to one dollar and a quarter and even more.

How much higher prices will go next season no man can

foretell and neither can he prophesy with any degree of accuracy or knowledge.

It is well for the merchant to provide helpful and instructive information and lead persons to an intelligent appreciation of why footwear is so much more expensive to-day than it was a year ago when costs began to mount steadily and have been ascending ever since.

One could go into very elaborate and exhaustive data regarding the whole situation but such an explanation would be wearisome to the average lay purchaser. To supply sufficient particulars for the retailer to be conversant with the situation and to pass on to the public is the object of this article.

## The Climb in Percentages

In the first place it may be pointed out that everything entering into the manufacture of footgear has been advanced and many things are still augmenting in price. This includes all kinds of leather and findings, even cartons, labels and labor, the latter being all the way from twenty to thirty per cent. higher. Now the wage outlay does not mean that all operatives in a factory have received an increase in pay, although in a great many instances they have. What it does mean is that so many boot and shoe workers, the trained, skilled help, have joined the colors and are now doing their bit in the present struggle for liberty and freedom. It means that many plants are running only about fifty to sixty per cent. of their capacity, whereas they have orders on hand or in sight which would keep them running overtime. All kinds of unskilled and indifferent labor has to be pressed into service. Anyone knows that when a plant is not operating to its fullest extent and yet has a volume of business on hand that would justify such activity, the cost of production goes up proportionately. The overhead expenses remain practically unchanged, and whether in an industrial or any other sense, such a handicap is a most trying problem to overcome.

All calf leather has gone up during the past year from thirty to sixty per cent., patent leather at least thirty per cent. and over, and all colored kid, from two hundred per cent. up. Sheepskins are from eighty to one hundred per cent. higher and sole stock, both oak and hemlock, from thirty-five to fifty per cent. Insoles, heels and counters are fully twenty-five to fifty per cent. more than a year ago; linings from fifteen to twenty-five per cent.; laces from one hundred to two hundred and fifty per cent., etc., etc. Then there have been very substantial advances in thread, nails, eyelets, hooks, buttons, shanks, pull straps, cements, welt-ing, and as some auction sales bills used to read, “other articles too numerous to particularize.”

## The Cause in Brief

Why has leather gone up? Well, previous to the war, the bulk of high-class calf skins in the world came from Europe, which supply has been practically shut off owing to foreign embargoes, the absence of shipping facilities, the depleted number of merchantmen, the excessive war insurance risk, and ocean freight which costs about five times as much as it did two years ago.

Then there is the war tax of seven and a half per cent. in Canada and the increase in the cost of tanning agencies.

(Continued on page 48)

# YOU CAN MAKE MONEY OUT OF HOSIERY EVERY DAY

How It Attracts and Interests Women in the Shoe Store—Its Worth as a Business Builder and How It Harmonizes with the Colored Shoe Situation of To-day—The Best Method to Install and Manage Such a Department—Some Objections Answered

**W**HEN the rage for colored footwear was never as wide as it is to-day, when skirts are short and are going to stay abbreviated for another season, when white, grey, champagne, ivory, fawn, bronze, brown, pearl and other shades are decidedly fashionable and my lady fair must have hosiery to match—what a glorious opportunity for the ambitious shoe dealer to “cash in.”

Never will such a favorable circumstance present itself again to inaugurate a hosiery department. It is now as attractive and interesting to female patrons as a millinery parlor, a pink tea or a church wedding.

Women are paying more for their pedal toggery to-day than ever. The result is that hosiery—silk, cashmere, lisle, varying in weight and texture—never appealed with such intensity and convincing force as at the present time. For a score or more years there has been nothing more dignified, graceful or impressive created in the footwear line than the high cut colored kid shoe or the splendid two tone effects. They stand out as the acme of style, skill and art and bring the highest price ever known for ladies' foot attire.

It is natural, therefore, that the hosiery firms should make special seasonable efforts to match every hue, shade, or tint evolved by the leather or boot maker. Nowadays pretty, colored hosiery is having a reign supreme, a demand unparalleled and if it is the function of the average shoeman to cater to everything that pertains to the feet, here is his

chance to reap a rich return, considering the original investment is not heavy.

More and more shoe merchants in the leading cities and towns of Canada are handling hosiery, and it is becoming a part of all well regulated, down-to-date boot shops.

As a shoe retailer you are in the game to make all the money you can. You may have selected the footwear business as the most congenial field in which to exploit your talent, time, energy and capital. Be not slow in adopting new ideas and profitable avenues of trade.

Running a hosiery department in a shoe store is an idea which has gone far beyond the experimental stage. Have you ever given careful thought to the close connection between shoes and hosiery, and how this relationship can be taken advantage of to boost your profits? Take the case of the man who comes into your store, buys a pair of shoes, and then has to walk a block down the street to get the hose he needs. In cold print, it looks pretty much like neglected opportunity on your part, doesn't it? It would be a genuine relief to the man if he could purchase his hose at the same time and place he gets his shoes. You could make that sale and many another of a like nature, if you were prepared to supply the demand. Nor would you be dependent upon the class who purchase only when driven by necessity. For instance, a prospective shoe buyer who is being fitted, is attracted by a fine display of various styles of hose in a neat show case near by. He may not particularly need hose just then, but his interest is aroused. This gives a tactful salesman the opportunity to “get in right,” and as a result

***T**HE inviting interior of Mark Mundy's shoe store, Galt, Ont., which is well laid out, the stock neatly kept and the traveling goods shown to the best advantage. Palms and potted plants add much to the attractiveness of the store.*

he sells several pairs of hose as well as the shoes. The customer goes away pleased, and will remember that store not only when he wishes shoes but hosiery as well.

There is no denying the fact that every woman is almost irresistibly attracted by hosiery displayed in a pleasing manner. It is hard for her to pass by such a window. The value of the hosiery department in securing women's custom is slightly different than in the case of men. A man will come in to buy shoes and stay to buy hose; a woman is more likely to come in to look at hosiery and end by buying shoes as well. When you consider that once you have a woman's custom, you often have that of the whole family, you can readily see its value to your hosiery department and your business as a whole. She will surely make all purchases for the children from you, and is quite likely to buy for her husband also. Many retailers, especially in the cities, cater to the high class women's trade by keeping in stock a wide variety of all colors and qualities in women's fancy hosiery. They make a specialty of matching practically every color of gown and slipper worn; some who are near to the manufacturers going so far as to make arrangements to have hosiery dyed any special shade in two or three days at most.

Of course, this is beyond the province of the average shoe retailer, but it will give a hint as to the possibilities of your hosiery department. A reasonable range of styles and colors, in these days when colored kid and other slippers are so much worn, will greatly increase your total sales—and your profits.

Another feature which is worthy of attention, is the possibilities of this department during the holiday season. These are almost limitless. It has this additional advantage, that the stock is quickly turned over, and at a good profit. The best class of business is attracted thereby, and it is a splendid feeder to the various shoe departments proper. Women do most holiday hosiery buying, and are readily persuaded to buy shoes for themselves as well.

#### Why Backward About Going at It?

So much for the value of the hosiery department in attracting business and increasing gross sales. Many retailers who refuse to go in for hosiery will admit some of the foregoing statements, but are afraid to take the plunge owing to initial cost, inexperience, lack of room, or other assumed difficulties in the way.

As for initial cost, no department can be added to your store with so little outlay at the start as a hosiery section. Skeptical retailers by the score have demonstrated this. For example, an average pair of men's fancy shoes would probably cost, wholesale, \$3.50; for this amount a dozen or more pairs of good hose could be purchased. These figures are not absolutely exact, but are near enough for all practical purposes. Again, in hosiery, invested capital is turned over much more rapidly than in shoes, consequently your money is not tied up to the same extent. The profit on this turnover is also considerably greater than is the case with shoes. The danger of shopworn stock is also obviated.

Inexperience need not frighten any shoe dealer from installing a hosiery section. All needed information will gladly be given by the manufacturers or jobbers with whom you do business, and a little application of the hard common sense and acumen you apply to other parts of your business will pull you through with little difficulty.

Lack of room is about the weakest objection of all. When you consider that five dozen men's half-hose or three dozen women's hosiery can be placed in the space required by one pair of shoes, you can see how groundless is the fear of lack of space. Some shoe stores doing a large trade in hosiery need only one small corner to shelve all the varied lines they keep in stock. For interior display purposes one show case is usually sufficient, which takes little space.

Be sure that in buying your stock you select principally nice lines—good selling colors varying in weight and

texture. The quality must be good. From the start it should be your policy to avoid the cheapest grades. Dealers in the smaller towns who cater to country trade to a considerable extent, will need to carry a fair-sized stock of the coarser grades to go with the heavy footwear sold to many customers. The average shoe dealer, however, will find it to his advantage to sell only medium and higher-priced goods. Leave the cheaper trade to the department and specialty dry goods stores, who buy in large quantities and make price the chief feature in selling. Carry good stock, then demand a fair profit. As a shoeman, you occupy a strategic position, which can be turned to good account. In women's hosiery it is inadvisable to carry too complete a line at the outset. In the fancy grades, careful and limited buying should be the plan of procedure until you have the situation thoroughly sized up. A good range of blacks and plain colors, varying in weight and quality will make a fair beginning. You will turn over the stock often enough to be able to make any changes deemed advisable.

#### Show Hosiery on Forms

Good display is very necessary to ensure success. For this purpose, several hosiery forms should be purchased. For interior display in the average store a good sized show case could be used with profit, and both men's and women's hosiery could be tastefully arranged therein. It is always advisable to use forms when displaying hosiery. They make the goods appear much as they do when in use, thus appealing more powerfully to the eye. In displaying women's fancy hosiery, it will aid materially in selling the goods, if they are shown in conjunction with a fancy slipper of the same or harmonious color. It is hard for a woman to resist the desire to purchase when such a combination is seen.

Both the show case and the hosiery department itself should be near the front of the store in a position sure to attract the attention of people going to and from the department proper. Hosiery should be featured in the store window periodically. If the latter is tastefully trimmed in harmonious colors and the proper lighting effects secured at night, results will always follow.

The sales force should be in thorough sympathy with your plans to boost the hosiery department. Urge them to take every opportunity to tactfully urge the purchase of hosiery along with shoes. With women especially, these suggestions will surely bear fruit, if pains are taken to show the effect produced by matching hosiery and footwear. Take your salesmen into your confidence. Give them a certain percentage of all sales of hosiery made, as many stores do with their findings department. This will stimulate their interest and benefit you. If the department grows rapidly, it may be necessary to put one salesman in complete charge. In such cases, it would probably be advisable to drop the commission idea in justice to other employees. These are matters for individual adjustment.

Lastly, don't forget to give the hosiery department a fair share of the advertising space used, which can be charged up against the department. As a general rule, when advertising this line of goods, feature it separately. In this way, better results will be obtained. In fairness to the department, keep careful record of all sales made. After a proportionate share of all proper expenditure has been charged against this section of your business, you will find—if you push the sales in a vigorous manner—that you have added a considerable amount to the right side of the profit and loss account at the end of the year, to say nothing of the stimulation received by the other departments. A silent salesman or special show case can often be installed where space allows, either inside or in the entry outside the store. When placed outside, this will solve to a very large extent the problem of giving the hosiery department a fair amount of display space, especially where the dealer is short of room in the window.

# THE LARGER OPPORTUNITIES FOR SERVICE

**High Note Sounded at Annual Gathering of Manitoba Business Men—C. F. Rannard is Made President for Second Term—Several Pieces of Important Legislation Secured—The Protection of Legitimate Interests—What the Association Has Done**

**C**HARLES F. RANNARD, president and managing director of the Rannard Shoe, Limited, Winnipeg, was re-elected president at the second annual meeting of the Manitoba branch of the Retail Merchants' Association of Canada held in Winnipeg on June 6, 7 and 8.

The nominating committee's report that President Rannard had been nominated for a second term was greeted with great approval by the convention. Mr. Rannard was unwilling to accept either the work or the honors of the position for another year, and it was only the wish of the entire convention which finally prevailed upon him to agree to re-election.

Other officers elected were: Vice-president, J. A. Banfield; second vice-president, A. G. Box, hardware dealer, member of the firm of Box Bros., Souris; secretary, J. H. Curle; treasurer, T. S. Connell.

Delegates to the Dominion convention: J. A. Banfield, T. S. Connell, Horace Chevrier, C. F. Rannard and W. T. Devlin.

Mr. Rannard, whose firm conduct three large retail shoe stores in the Prairie Capital—two on Portage Avenue and one on Main St., is one of the leading shoemen of the Dominion, and is widely known to the trade. He has always taken a deep interest in all that pertains to the advancement and welfare of mercantile interests and the closer association and mutual helpfulness of business men.

Many friends will congratulate him on his re-election as presiding officer of the Retail Merchants' of Manitoba. In his address to the members he said in part:

## Association's Policy

"The policy of our Association is to secure the co-operation of every retail merchant in Manitoba of high standards, of shop-keeping, that commercial exchange may be developed, that wastage and loss by overlapping, price-cutting and suicidal competition may be reduced to a minimum, and that many abuses under which the individual merchant suffers to-day may be remedied, and larger opportunities for his service to his community created.

"Before this Association was organized there was little protection for the retail merchant. He was the target for fakir and thimble-rigger, who exploited the community and generally left between two streaks of light. The trading stamp and phoney premiums were debauching his business, his credits were uncertain and unscientific, and he was driven from pillar to post by exactions that were often unreasonable and unfair; but by working together many of these old abuses have been eliminated, wise and remedial legislation has been secured, scientific credits are coming more and more to the front, and a healthy and hearty spirit of fraternal co-operation is being evidenced more and more every day so that it seems no idle boast to say that here in the West, we are on the eve of a new era in merchandising, so that if this spirit grows as it should the retail merchant will find many excess burdens taken from his shoulders, and he will be able to distribute his goods to the ultimate consumer at the least possible cost and the highest standard of salesmanship.

## Clean Advertising

"The success of business enterprises is linked with judicious advertising. No commercial activity is more closely connected with every other commercial or industrial enterprise the world over, nor is any single line of business so interwoven in these modern times as advertising retail business. To a greater extent than is generally realized, a

business is built and successfully carried on by advertising. If it is true and correct it has a big influence in swaying your business in a right direction, but if it is false and dishonest it will act as a loadstone to your business.

"Why is it that advertising stands on a much higher plane than it did a few years ago? Because, in early days advertising was used in the promotion of almost every act of fraud, and people looked askance upon everything that was advertised, but nowadays it has acquired a new dignity and new strength. Business in Canada is facing better days. The national confidence has been quickened with the result that sincerity and honesty pay bigger dividends than ever.

"Let our motto be 'Truth in Advertising.' The greatest enemy to successful advertising and to successful business is the quack and the fakir, and the more money they contribute the greater the loss. Every time a man or woman is cheated by a bogus advertisement the pulling power of all advertising is so much weakened, because the

C. F. RANNARD, WINNIPEG, MAN.

fakir and the publisher accepting the advertisement have taught just so many more people to distrust all advertising. There will be more advertisers and they will get more and quicker results when the quacks and the fakirs are driven out of business, and during the last few months this association has been driving them out of business every day. I am sure all advertisers will agree that they ought to be driven out, as they are a detriment to all channels of better business, as well as defrauding the public out of their money.

"Our legislative committee has been able to assist, by counsel and co-operation, in securing several pieces of important legislation. We have a 'Bulk Sales Act' so framed that no man can sell his business, put the money in his pocket, and depart for fields new and pastures green, without his paying his just debts. There may be objectionable points in the legislation at present framed; if so this organization ought to be big enough and wise enough to so amend them as to meet the changing or enlarging demands of the times."

# DO YOU KNOW HOW TO CORRECT FOOT TROUBLES?

An Important Branch of Retail Shoe Business—The Proper Manner to Adjust and Fit Arch Supports so as to Secure the Best Results—Few People Who Would Not be Better for Use of Light, Springy Arch Support—Necessity of Proper Foot Toilet

By Dr. C. VERMILYEA

**T**OO much emphasis cannot be laid upon the importance of the toilet of the feet. The pedal extremities have been in the past the most neglected part of the body, but fortunately the public is waking up to the great necessity of care for these extremities, if one is to walk or stand in comfort and with grace. The easy grace and carriage of the body is to a very great extent dependent upon the perfect health of the feet. This health can only be maintained by proper care and toilet of man's best servants—the feet.

Foot soap, powders, ointments, etc., all enter into the proper toilet of the feet. The live shoe merchant who displays these items will get handsome returns both in profits and added prestige among his patrons.

Proper care in fitting arch supports is an important matter. The leather at the heel of the support should fit snugly right back to the counter while the forward end of the leather should come just back of the bones at the ball of the foot. Care must also be taken in having the front end of the metal come past the arch in the shank of the shoe, as when the metal is too short it has a tendency to break the shank. The adjustment of the plate to fit the foot is a most important matter.

The amount of elevation in the support depends upon the weakness of the muscles in the foot to be fitted. When these muscles are very weak the arch of the foot is crowded down entirely flat by the weight of the body upon it. This case requires the supports to be adjusted quite low and elevated each week until the correct elevation has been reached. The first object in adjustment is to give the wearer the greatest possible comfort and it is by gradual elevation, a little at a time, that this is accomplished most successfully. In some very bad cases it will be found that the scaphoid bone (the small, flat bone in the centre of the arch) protrudes at the inside of the foot. In this condition this bone may be felt with the finger. Sometimes the flange at the inside of the arch support will cause a soreness of the flesh at the point where the scaphoid bone presses against the flange. If this soreness is very pronounced the flange should be hammered in such a manner as to create a hollow at the point of contact. Later this hollow may be hammered back a little at a time until the wearer can stand the pressure of the flange in its original position. By this time the scaphoid bone will have been gradually forced back into place and thus an important work performed.

## Tendency to be Forced Outwards

Many cases will be found where there is a tendency for the foot to be forced outwards by the arch support. This is particularly true of a support with a high flange on the inside. This condition may be easily remedied by skiving a piece of leather and glueing it under the leather at the heel of the arch support, having the thick side at the outside of the foot. This throws the foot to the inside and against the flange of the support, thus supporting it from both sides. This pad at the heel should not come any farther forward than the shank of the shoe, or in other words, it should not come forward of the heel.

Often the wearer of an arch support will complain that it is too high at a certain point. In a great majority of these cases it will be found that the elevation of the support at other

points will equalize the weight and give better results than to lower the plate at the point complained of as being high.

Experience has exploded two old ideas in the matter of arch supports. The one is the necessity of high flanges on the metals and the other is that an arch support must be heavy to be of sufficient strength. There are exceptional cases that require exceptional arch supports, but in the main it will be found that best results are obtained by a light resilient support with a low flange that supports the arch underneath and slightly towards the inside of the foot. It is much better to provide barely sufficient support to assist the weak muscles and thus still keep them in action than it is to provide so much strength in the support that the muscles become entirely dependent upon it, thereby losing a great deal of their natural functionary powers.

## What Each Sale Should Mean

In fitting arch supports personally the writer always advises the regular use of an ointment made by him. This "Toe-Komfort" ointment is a food to the tissues and the rubbing in, using it as a massage cream, stimulates the blood action, thereby assisting nature to a very great extent in correcting the weakness and defects present in the tissues and muscles of the feet. Every sale of arch supports should carry with it the sale of a good foot ointment, foot soap and powder. In powders care should be taken to use only those of a high grade that actually contain ingredients of medicinal value.

Very few indeed are the members of the human family who have not some defect in the transverse or metatarsal arch of the foot. The arch is located inside the flesh at the ball of the foot and extends just back of the small toe to a similar position back of the great toe. The flattening down of this arch is productive of a great many ailments, including pains and aches in the forward part of the foot, callouses on the balls of the feet, turning under of the tips of the toes, aggravation of bunions trouble, elevation of the middle toe joints and resultant corns and inflamed bursal sacs, etc.

The correction of trouble in this metatarsal arch is accomplished by giving support back of the heads of the metatarsal bones. These bones are easily located by feeling the ball of the foot with the fingers. Support should not come directly under the ball but back of the small, marble-like heads of these bones. Sometimes results may be obtained by glueing a leather wedge between the metal and leather at the forward end of a pair of ordinary arch supports, but it is much preferable to use the regular metatarsal arch support made for these cases. In fact, very few people with foot trouble will be going astray in using the metatarsal arch support properly fitted.

There are very few people to-day who would not be the better for the use of a light, springy arch support. Among the lightest that the writer has seen is one which for a size four boot weighs less than two ounces. This support gives good service and should enjoy an extremely large sale owing to its great lightness of weight and resiliency.

In my next article I will take up the subject of mechanical correction of bunions and crooked toes. Should any readers desire to ask questions on anything of interest to them along the line of prevention and correction of foot ailments, shoe fitting, etc., the *SHOE AND LEATHER JOURNAL* will be pleased to receive and answer queries promptly.

# FOR WORK AND PLEASURE THEY CAME TOGETHER

**Important Conference Held by Representatives of Kaufman Rubber Co. Characterized by Much Enthusiasm and Camaraderie—Many Valuable Suggestions Received and Profitable Interchange of Views—What the Boys Did in the Way of Business**

**W**HEN good fellows get together, either for business or pleasure, there is "something doing every minute." If you do not believe it, ask the representatives of the Kaufman Rubber Co., who, during the week of June 19th, attended the conference at the company's headquarters in Berlin.

The programme was certainly a unique and interesting one, and the time was most profitably and pleasantly spent. During the day there were important conferences on trade conditions, output, the outlook for the coming season, efficient salesmanship, production, delivery, styles and other important subjects. The social features were delightful and thoroughly enjoyed. Not the least outstanding event of the programme was the presentation to A. R. Kaufman, general manager of the company, of a handsome bear rug, while W. E. Wing, sales manager, received a beautiful set of leather upholstered living room furniture. Neither of the recipients was looking for anything of this character and each was therefore doubly grateful for the unexpected evidence of esteem and goodwill.

The branch managers from all parts of Canada, who are in charge of stocks carried in the different cities throughout the Dominion and a number of local salesmen were in attend-

ance. The object of the convention was to discuss business topics and more especially "Life-Buoy" rubbers. Among the visitors were:—Frank Henderson, branch manager, Vancouver; Geo. Stockand, branch manager, Edmonton; Harley Henry, branch manager, Saskatoon; Murray McGowan, salesman, representing Winnipeg branch; S. G. Amero, branch manager, London; J. S. Townsend, branch manager, Hamilton; W. S. Wood, representative Niagara district, St. Catharines; L. B. Hutchison, branch manager, Toronto; James C. Bryant, salesman, Toronto city; J. S. Lovell, salesman, Northwestern Ontario; E. A. Chalk, salesman, Northern Ontario; E. E. Code, branch manager, Ottawa; A. D. Kippen, salesman, Ottawa; F. W. Burrill, salesman, Ottawa; John J. Duggan, branch manager, Montreal; O. J. Killam, branch manager, St. John; W. H. Semple, branch manager, Truro; Chester McLure, branch manager, Charlottetown, and J. S. Pierce, salesman, Charlottetown.

## Bit of Plesantry Now and Then

The business of the company received first consideration, and conventions were held throughout the forenoons of each day. The visitors being of a particularly congenial nature, a bit of pleasure was naturally enjoyed, arrangements

THE RECENT GATHERING OF THE KAUFMAN RUBBER COMPANY'S MANAGERS AND SALESMEN IN BERLIN

Back Row (left to right)—W. S. Wood, St. Catharines; J. S. Townsend, Hamilton; S. G. Amero, London; E. A. Chalk, Toronto; Jas. Bryant, Toronto; A. D. Kippen, Ottawa; Harley Henry, Saskatoon.

Centre Row—W. H. Semple, Truro; F. W. Burrill, Ottawa; O. J. Killam, St. John; E. E. Code, Ottawa; J. J.

Duggan, Montreal; Geo. Stockand, Edmonton; Frank Henderson, Vancouver.

Front Row (sitting)—J. S. Pierce, Charlottetown; J. S. Lovell, Toronto; W. E. Wing, Sales Manager; A. R. Kaufman, Manager; Chester McLure, Charlottetown; Murray McGowan, Winnipeg; L. B. Hutchison, Toronto.

for which were very successfully carried out by Mr. Hutchison and Mr. Amero. The latter is a prince of entertainers and was the leading spirit of the social side throughout the week. The visitors appreciated the entertainment in his charge on the evening of the opening day, and also his capable handling of the "Clam-bake" Wednesday, and the assistance rendered on the evening of the banquet.

Monday was reception day, the visitors being met at the station by automobiles as they arrived. This was naturally one of the happiest days of the week, as an opportunity was given to the salesmen from the extreme West to meet for the first time salesmen, selling the same line of goods, from the Maritime Provinces. All of the various branch managers have favored the company with previous visits, but many of the salesmen never had the opportunity of meeting their fellow-salesmen from other parts of the Dominion. This occasion was naturally one of considerable pleasure and conducive of a great amount of benefit to the company through the exchange of views among the salesmen themselves, and the valuable information that was brought out from all parts of the country at the meetings.

Tuesday morning was largely spent in an inspection of the entire plant, under the care of the manager, A. R. Kaufman, and the efficient superintendent, J. H. Roedding. The afternoon was taken up in an open discussion of all general matters, and at about four o'clock the party were the guests of the company in an automobile trip to the Cressman Woods, one of the new natural parks along the Grand River recently taken over by the Waterloo County Parks, and which is being preserved and beautified for the future. From here the outing led past the home of Homer Watson, the noted painter, through the picturesque village of Doon to Preston Springs, where a sumptuous dinner was enjoyed at the Kress House.

The forenoon of Wednesday was spent entirely in business discussions, and again on this occasion much valuable information was conveyed by the salesmen. The expression of opinions on the different lines of goods from representatives in New Brunswick and Nova Scotia, and also the opinions on the same lines from representatives in the extreme West, were exceedingly interesting, and many new ideas.

#### Clam-Bake Was Attraction

In honor of the salesmen's visit, the manager, A. R. Kaufman, declared a half holiday for the entire office staff on the Wednesday afternoon, consisting of thirty, and a monster picnic of both staff, salesmen and a number of other business friends, was held at the village of Conestogo on the Grand River, a point about eight miles from Berlin. The picnic was the sensation of the entire week, as through the kindness of Mr. Amero something out of the usual had been arranged. Only a few of those present were acquainted with what is usually termed a "Clam-bake," and naturally the others were eager to know exactly what the main feature of the afternoon had in store. Mr. Amero, however, had made due arrangements, and a large shipment of live lobsters, clams, chickens, etc., had arrived by express from Gloucester, Mass., during the morning, and had been carefully stored away on ice. It is frequently stated that anticipation is better than realization, but one questions the wisdom of this saying, in view of the surprise and enjoyment that awaited those who had the privilege of being present.

During the forenoon several heavy laden automobiles had made the trip to Conestogo with barrels, several dozen bags of charcoal, picnic tables, etc., including, of course, the delicacies from Gloucester. A large quantity of stones was first selected, about which the charcoal and an entire cord of wood was arranged and a fire commenced, which was well taken care of for a number of hours by several in attendance. After these stones had been heated to a white heat, a quantity of them was selected and placed in the barrel on a layer of sea-weed, and over which another layer of sea-weed was

placed. The entire barrel was then completely filled alternately with layers of sea-weed, chicken, lobster, clams, onions, potatoes, wieners and other articles, and sealed, and placed under ground for several hours. During these preparations the fifteen lady members of the office staff were occupied in laying out the tables and preparing numerous other delicacies.

The most interesting event occurred about six o'clock, when the barrel was unearthed and opened to the view of about sixty spectators, to the majority of whom it was something entirely new. Little time was lost in placing the entire company at the tables, and the long looked for event, which had been promised weeks before by Mr. Amero, became a realization. The afternoon was devoted to sports, including a tug of war between two teams of the representatives of the company. The baseball match was also one of the most interesting events, and it had not progressed very far before the manager decided that many of the salesmen were far better adapted to selling "Life-Buoy" rubbers than holding a glove or striking a ball.

#### Around the Festive Board

The entire day of Thursday was devoted to business, and proved of much value to the company. On the evening of this day a banquet was held in the capacious dining hall of the Walper House, at which A. R. Kaufman, manager, presided. The tables were nicely decorated, one feature being the beautiful place cards, which were designed and sketched by Mr. Wood, branch manager at St. Catharines. A paper, consisting of about twenty-five pages, containing comic reference about various salesmen, jokes, amateur verse, etc., was also distributed at this time, and the different bits of literature created an uproar of laughter throughout the entire banquet. After the sumptuous repast, which was thoroughly enjoyed by all present, an address of welcome, on behalf of the company, was given by Mr. Kaufman, after which addresses were given by each of the different branch managers, who reported, not only on general trade conditions in the different provinces, but also on little experiences they had with the trade in their territory and other matters of interest concerning the cities in which they lived. S. G. Amero, of the London branch, assisted in the programme in his usual capable manner, relating many amusing stories and presenting a few of his sleight-of-hand tricks, which were much appreciated by the company. He has proven himself on several occasions to be an entertainer of the very highest order.

Geo. Stockand, of Edmonton, presided in his capable manner. He entertained the guests with his humorous remarks and called on the various branch managers for short addresses.

After the programme, A. R. Kaufman, manager of the company, was presented with a handsome bear rug, and W. E. Wing, sales manager of the company, received a beautiful set of leather-upholstered living room furniture. The presentations were made, on behalf of the guests, by S. G. Amero, who referred to the cordial relations existing between the salesmen and the company, and requested that these gifts be received as an expression of their goodwill. The recipients, in appropriate replies, thanked the guests for their kindness, and hoped that the kindly feelings existing between the salesmen and the Company might long continue. The banquet closed after the singing of several songs and the National Anthem.

All of the branch managers report that the rubber footwear business is excellent in their respective territories, and the company's output this year will be larger than ever before. The outing shoe end of the business is one that is receiving increased attention this year. The high price of leather shoes and the present demand for white footwear are both factors in augmenting the sales of this department, which have increased tenfold during the last three years.

# TORONTO SHOE REPAIR MEN START WELL

Live Association Formed to Promote the Welfare and Progress of the Trade and Revise Schedule of Prices—Raw Materials Have Gone Up from 25 to 100 Per Cent.

**T**HE Toronto Shoe Repair Men's Association was formed at an enthusiastic gathering held on June 22nd at the shop of Chas. F. Robertson, 457 Queen street east, when there was a most representative assembly. Officers were elected, regular monthly meetings will be held, matters of mutual importance discussed, and other important questions taken up.

For some months it has been felt that the shoe repair men of Toronto should get together in their own interests, to promote harmony and unity among the members and secure an adequate return for their labors, in view of the sharp advances in raw materials of all kinds. The repair men of Ottawa some time ago formed a wide-awake association and enhanced prices by 15 per cent. It is believed that an organization of a similar kind can do much to raise the standard and promote the welfare of the trade in Toronto and a few of the leading members decided to call an impromptu meeting.

The attendance was surprisingly good and it did not take many minutes for the members to get down to business. There was but one feeling among those present and it was that the present prices were far too low and not one in the trade was making any money and was working longer hours than he should, both from a health and business standpoint. Charles Jeeves, 418 College street, presided, and Arthur Butterworth, 557 Yonge street, acted as secretary.

In opening Mr. Jeeves spoke of the necessity of organization and securing better prices for work. Not one of those present was earning more than a living and shops were kept open too late. There was no reason why the shoe repair man should have to work night and day to make ends meet.

"Everything that goes into the repairing of a shoe has advanced from twenty-five to one hundred per cent. and yet there are some trying to get along doing work at the old figure. It cannot be done," declared Mr. Jeeves, "and in order to show you how prices have ascended I have prepared a few figures and here they are. In December, 1912, side

sole leather was selling for 32 cents; backs were 45 cents; No. 10 cut soles were \$3.50 per dozen. These prices were subject to the usual five per cent. discount. To-day side sole leather is selling for 48 and 49 cents, backs 59 and 60 cents and No. 10 soles for \$4.40. The difference in the price on the side sole leather in what we were paying then and now is 16 cents. The difference is 14 cents on backs and the difference on No. 10 cut stock is 90 cents per dozen. All taps have advanced in proportion, and other kinds of leather.

"Nails were selling four years ago from 5½ to 9 cents, according to the quantity. To-day nails are selling from 13 cents per pound up to 21 cents. Iron nails were selling from 5 cents to 7 cents per pound. Now the price is 8 to 10 cents. Brass rivets which were disposed of at 35 cents per pound in 1912 are now 80 cents. Blakey's plates were selling for 25 cents per dozen cards and to-day they are 55 cents, with practically none on the market."

After several others had endorsed the remarks of Mr. Jeeves and referred to the necessity of union, better prices and shorter hours, it was decided to form an association to be known as the Toronto Shoe Repair Men's Association. The initial membership fee was placed at one dollar and every man present joined cheerfully in the move.

After discussing matters relative to getting an adequate price for their work and holding monthly meetings, appointing committees and drafting a constitution and by-laws, the following officers were elected:—

President—Chas. F. Robertson, 497 Queen street west, Toronto.

Vice-president—Chas. Jeeves, 418 College street.

Secretary—Arthur Butterworth, 457 Yonge street.

Executive committee—D. Pretty, F. J. Barry, A. Brodie, D. B. Butler, Jos. Sagar, T. J. Carter.

An effort will be made to include practically all the repair men in Toronto in the new organization, which starts off most encouragingly with live, aggressive officers, and a spirit of unity and earnestness that betokens success.

## OFFICERS OF TORONTO SHOE REPAIR MEN'S ASSOCIATION

CHAS. F. ROBERTSON, PRESIDENT

CHAS. JEEVES, VICE-PRESIDENT

A. BUTTERWORTH, SECRETARY-TREASURER

**NEW SCHEDULE OF REPAIR PRICES IN TORONTO**

At a meeting of the newly formed Toronto Shoe Repair Men's Association held on June 29th in the Canadian Foresters' Building, 22 College street, Toronto, there was a large attendance and several new members joined the organization, which will hold its next gathering in the same hall on Thursday, July 13th, when the matter of early closing will be taken up. The members, in view of the constant advances in raw materials, labor, etc., have raised the price on all lines of repair work, the increase being about ten per cent. on the average.

The new schedule has been agreed up and will go into effect at once. Cards will be printed and posted in the shops of all the members of the association. First class work will be guaranteed at the following prices and only the best of materials used:—

Men's sewed soles and heels .....	\$1.35
Men's nailed soles and heels .....	1.10
Men's half soles, sewed .....	1.10
Men's half soles, nailed.....	.85
Men's heels .....	.35
Women's sewed soles and heels .....	1.15
Women's half soles, sewed .....	.85
Women's soles and heels, nailed .....	.90
Women's half soles, nailed .....	.60
Women's heels .....	.30
Boys' nailed soles and heels, 1 to 3 .....	.75
Boys' nailed soles and heels, 3 to 5 .....	.90
Boys' heels .....	.30
Youths' heels .....	.25
New elastics .....	.75
Building new heels .....	.75 up
Youths' nailed soles and heels, 10 to 13½ ....	.75
Youths' nailed soles and heels, 7 to 10 .....	.65
Girls' nailed soles and heels .....	.75
Toe caps .....	.30
Patches .....	.10 up
Men's full soles and heels .....	2.00
Men's full soles and rubber heels .....	2.25
Men's full soles .....	1.75
Rubber heels, men's and women's .....	.50
Women's full soles and heels .....	1.75
Women's full soles .....	1.50
Women's turn soles .....	1.00
Men's turn soles .....	1.35

**HOW OTTAWA REPAIR MEN GOT TOGETHER**

E. A. Schryburt, who was the organizer of the Ottawa Shoemakers' Association and is also secretary-treasurer of

E. A. SCHRYBURT,  
OTTAWA,  
ONT.

that body, writes the SHOE AND LEATHER JOURNAL as follows on the methods adopted to accomplish the end in view:—

"Seeing that my Toronto pals want to organize them-

selves, I will give you a rough idea of how I started. First, I called a meeting, in order to raise the prices, owing to the advance that had gone into effect on leather, thread, nails, etc. The attendance at that meeting was good, but might have been better, as we had only sixty shop owners present out of ninety-five. We discussed the matter and afterwards decided on a ten per cent. increase, but, before adjourning the meeting, I called another one for the following week and made a programme and will describe how I proceeded. After having about eighty-seven of the shop owners present, I proposed a motion for a 20 per cent. raise on all repairs. Some of those present made a kick, so I suggested a 15 per cent. advance, which, after some consideration, was carried. We then elected a committee to get out cards and placed advertisements in all the local papers, so as the public would know about our association, and before adjourning we called another meeting for ten days later. At the third gathering, I got down to the fact of the necessity of an association and explained to the men what an association meant to us all, and what could be brought about through unity and harmony. A vote of those present was taken, and the sentiment was decidedly in favor of forming such a body, 75 voting in favor of my resolution. Then we elected a committee. We meet every four weeks. The following are our officers: President, J. A. Schryburt; vice-president, H. Bookman; secretary-treasurer, E. A. Schryburt; councillors—H. Victor, E. Bookman and P. Bark. These constitute all our officers. At our regular meetings which, as I say, are held every four weeks, we take up matters regarding those who do not keep up the prices and then we fine any offenders, or give them notice that if they do not stick by the figures adopted we will cancel their membership and take new ones in their places, as there are always men who are glad to link up with a good thing like our association is proving to be.

"Now, regarding the money part of the business, you, of course, know that it costs something to do all this work, as there is always a lot of incidental expenses. At the first meeting I collected fifty cents from all those in attendance. At the second meeting the same amount was levied. This made one dollar in all, which paid the expenses and the fee of entrance for all those who had attended the first two meetings. Now, all who join have to pay an entrance fee of \$5.00. All members are assessed fifty cents per month.

"It may be of interest to note the present prices obtained by the members of the Ottawa Shoe Repairers' Association, the recent increase being 15 per cent. The figures are:—

**Price List for Best Work**

Rubber Heels.....	\$0.50
Men's Sewed Soles and Heels.....	1.40
Men's Nailed Soles and Heels.....	1.15
Men's Sewed Soles only.....	1.15

### AN AGGRESSIVE MAN IN BUSINESS

A. A. Evans, who was recently elected President of the Saskatchewan branch of the Retail Merchants' Association, is a well-known resident of Outlook, Sask., where he is senior partner in the firm of Evans & Loughheed, who handle shoes, clothing, dry goods, etc., and have a branch at MacRorie, Sask. Mr. Evans has always taken an interest in association work, and has shown public spirit in the town in which he resides, being a member of the council, the board of trade

A. A. EVANS, OUTLOOK, SASK.

and other bodies. Born near Allenford, Bruce County, he learned the mercantile line at Lion's Head, and then returned to Allenford, where he was in business for himself for some years. Selling out, he went to Owen Sound and became a member of the wholesale produce firm of McDougall & Evans, Limited, in which he still retains an interest. About five years ago he took up his residence in Outlook, and has been a forceful factor in the progress of that town. A man of quiet disposition and good executive ability he has always met with success in everything to which he has turned his hand. Under his direction, the Retail Merchants' Association of Saskatchewan should have one of the most encouraging and satisfactory years in its history.

### SHOE MERCHANTS SHOULD KEEP CALM

The speculative spirit in purchasing both leather and shoes should be restrained and there is practically a lot of groundless fear prevalent regarding future supplies. It is to the interest of all that such a feeling should be allayed. Writing to the SHOE AND LEATHER JOURNAL one leading firm says:—"We quite agree with you that with prices at high water mark, it is no time for shoe retailers to speculate. A certain amount of this has taken place, but we think possibly the high water mark was reached some time ago, so that in many cases it may prove a wise purchase. By this time we believe that buying is pretty well over, excepting possibly with the jobbers. Nevertheless your good advice may be helpful to many, and undoubtedly normal purchases by the retailers would aid in steadying prices, although unfortunately, quotations in this country are practically dependent on those obtained in the United States."

Another wholesale firm says:—"We quite agree that there seems to be too much speculative spirit in the retailers' orders, and no doubt this has had a lot to do with the advance in price."

"It is more or less difficult to forecast future shoe prices owing to the war conditions," remarks a large Ontario wholesale shoe merchant. "It appears, however, that the tanners who are acting closely together in regard to prices are making the best of an opportunity and no doubt their profits would compare favorably, if made public, with steel, car, milling and other large corporations whose financial statements for the past year have recently appeared in Commercial Journal.

"In 1912 the factories were more busy than they are to-day and trade conditions then indicated that the production was hardly equal to the demand, as immigration was pouring into Canada from all quarters, the building trades, railroad construction and public works of all kinds were booming, affording employment for all comers, yet in 1913 and 1914 the shoe factories were comparatively idle, or doing only a fraction of their former trade.

"From personal observation I am of the opinion that retailers during the past five or six months have bought more than their ordinary requirements warrant, consequently I would not be surprised if trade tapers off during the balance of this year. Further, all the shoe factories in Canada are now running to capacity, which would indicate that the production of footwear will shortly exceed the actual demand, owing to the population being more or less at a standstill in Canada. These opinions may or may not forecast actual shoe conditions for the balance of the year but will at least control my actions."

### POPULAR SHOEMAN IS LIVE RECRUITER

A. E. Hogarth, who recently enlisted for overseas service with the 201st Battalion, Toronto, and is now at Camp Borden, is a young man favorably known in the shoe trade. For a considerable time he was on the warehouse and traveling staff of Blachford, Davies and Co. He began his career in the footwear game thirteen years ago, with the Burns Co., of Oshawa, starting in as messenger boy. After a period of five years he went to western Ontario, where he worked for some time in Chatham and London. Returning to Oshawa,

A. E. HOGARTH, OSHAWA, ONT.

he joined the selling force of the Burns Co. and later came to Toronto. Mr. Hogarth is an expert window trimmer, and while in Oshawa won a number of prizes for his efforts in this direction. He has lately been doing considerable active recruiting work for his battalion and, through his enthusiastic endeavors, several young men have enlisted.

# Maltese Cross Rubber Heels

**Longevity**—Long life, resistance to wear and abrasion.

**Resilience**—Springiness, ease and comfort in walking.

These are the things that you look for in a rubber heel. You don't find them often in the same heel, but when you do they make that heel better than another.

**Maltese Cross Heels** have both of these qualities in the highest degree. They are the most satisfactory heels on the market.

Let us send you a sample lot and see for yourself how and why they are better.

MADE ONLY BY

## Gutta Percha & Rubber, Limited

Regina, Saskatoon, Calgary, Edmonton, Vancouver

# GREAT CALL FOR ALL TENNIS LINES CONTINUES

**The Present Season is the Liveliest Ever Known—Merchants Report That All Classes Are Taking to Outing Footwear—Special Window Trims Make Strong Appeal to the Public—Stock is Quickly Turned Over and the Profits are Satisfactory**

**N**OW is the time for the shoe merchant to push the sale of sporting shoes. Business in this line was never better, and July should prove an exceptionally active month in the disposition of this type of footwear. Are you well stocked up? Owing to the high cost of leather shoes, canvas and rubber productions are receiving a larger measure of attention than at any time previously. They can be bought for one-third of the cost, and will last as long as the average person cares to wear summer foot toggery, which is for one season. Formerly the sale of tennis goods was confined to persons who indulged in outdoor sports or went for a holiday in the country, or to some lake or seaside resort, but now, the shoes possess such style, attractiveness and shapeliness they are seen on the streets of all our towns and villages. Every factory which specializes in this line has had to increase its force yet cannot keep up with business.

## Borrow a Few Bats

It is well to make special window displays of tennis and outing shoes. If necessary, borrow a baseball and bat, a football, some tennis racquets and a net, a croquet set, or anything suggestive of outdoor life, and by placing the shoes in among the sporting goods, the effect of the trim is made doubly impressive. Sporting shoes do not go out of style to the same degree as leather shoes of all kinds. The profit on them is equally as satisfactory, and stock can be turned over quickly, but the thing to remember is not to load up too heavily, for naturally such shoes are seasonable and if not disposed of within the next few weeks, there is likely to be little call for them, except for indoor athletic purposes, until the warm season comes around once more.

## Do Not be Unreasonable

Examine your stock closely and see on what lines you are short. Do not expect manufacturers to fill sorting orders the same day as they are sent, but give them a little time. "It is getting to be a perfect nuisance," said one of the managers of a large branch warehouse the other day. "Retailers will send in orders for certain sizes and styles right up to five o'clock in the afternoon and expect us to deliver them the same day. This is not fair or considerate. We have to get out the goods and we have not a special messenger or conveyance leaving the warehouse every hour, the same as a street car does on a suburban line. If merchants would use a little more forethought and phone us their orders in the morning, we could get them out the same day, but to expect all business to be filled as promptly as a telephone call is answered is certainly out of the question. We have never seen anything like the rush we have here now. Why, in two days last month, we did more than in all the corresponding month of June, 1915."

The outing shoe habit is taking hold of people who go in for comfort and ease; and now that this class of footwear possesses as much attractiveness, practically speaking, as any other line, people of all ages and conditions are taking to it with increased interest and appreciation.

## The Price of Crude Rubber

It begins to look as if large buyers had rejected the New York rubber market, and have been laying in a stock directly from first hands. In fact the buyers at Para and Singapore, who represent leading American manufacturers, have bought direct in those markets such large amounts that British

brokers and importers fear the elimination of London as a distributing point. This state of affairs is quite possibly due to the action of the British Government in placing an embargo on the exportation of rubber from British ports, except under certain conditions. The consequence is a plethora of crude rubber in Great Britain and in Eastern British Colonial ports, and not enough demand to uphold the market.

## Price is Going Down

The ruling prices in the New York market show a slow but steady decline. On March 1st, first latex pale crepe was selling at 92c. By April 1st, the price had declined to 85½ to 86c. On May 1st it had dropped to 76c., while June 1st the quotation was 67c. To-day the asking price for best quality is 65c., and possibly 63c. would be accepted, a decline of nearly 33 per cent in the last three months, while predictions are rife that the decline will continue and reach 60c. or less. Fine up-river Para has shown a similar decline. In fact plantation rubber dominates the market to-day, and prices of Brazilian rubber are now governed by, instead of governing, plantation rubber quotations.

## Will It Swing Back?

However, there are many importers who believe that the price pendulum will swing the other way within a short time. Were labor, compounding materials, linings and felting correspondingly cheap footwear manufacturers could afford to continue present prices.

But with all the other factors still soaring, some of them doubling and trebling in price, the reduced cost of rubber is more than balanced by the extra expense otherwise.

We quote: Up-river fine, 65c.; island fine, 59c.; up-river coarse, 47½c.; island coarse, 29½c.; caucho ball, 50c. for upper and 48c. for lower; cameta, 34c.; centrals and Mexicans, 46 to 47c.; first latex pale crepe, 65c.; smoked sheets, 63½c.

## GERMANY LOSES THE RUBBER CONTRABAND ON DUTCH SHIP

CANNY WAY IN WHICH THE GERMANS ATTEMPTED TO GET RUBBER CONTRABAND ACROSS FROM THE UNITED STATES. FOUR THOUSAND PARCELS LIKE THE ABOVE, SUPPOSEDLY CONTAINING BREAD FOR BRITISH PRISONERS IN GERMANY AND EACH CONTAINING ONE POUND OF RUBBER, WERE TAKEN OFF A DUTCH SHIP BY THE ALERT BRITISH NAVY, AND CONFISCATED TO BRITISH USE BY THE PRIZE COURT.

## ANOTHER SHOEMAN BECOMES BENEDICT

Thomas Melville Wark, who is the manager of the United Shoe Dealers' store, Port Arthur, Ont., recently joined the ranks of the 'benedicts, being married to Miss Olive Harriet, daughter of Mr. and Mrs. F. Pyett. The ceremony was solemnized in St. Paul's Presbyterian Church, Port Arthur, on June 12th. Mr. Wark and bride spent a few days in Toronto on a visit. He began his mercantile career with the Hub Clothing Store of Port Arthur, which also handles boots and shoes. Taking an active interest in the footwear end of the business he later entered the employ of the United Shoe Dealers and has been manager for some years now. Mr. Wark is an expert window trimmer, paying special attention to displays of every kind, and some of his efforts in the decorative line have won more than local reputation.

## ON "SHOES AND EFFICIENCY"

Probably not one person out of ten gives enough thought to the choosing of footwear, says H. Addington Bruce. The rule seems to be, take what is fashionable, and be content if the shoes don't pinch too much. In footwear, that is to say, appearance usually is rated far above comfort. And, incidentally, though this is not generally appreciated, appearance usually is rated above health and efficiency.

Shoes that fit badly or are wrongly constructed always do more or less injury to the well being and working ability of the wearer. A particularly grievous offender is the high-heeled shoe so popular among women.

A German orthopedist, Doctor A. Ritschl, has recently declared, with justifiable warmth of feeling, that a high-heeled shoe is an abomination out of place in an intelligent nation. There are several reasons for his sweeping condemnation of this special type of shoe.

For one thing, a shoe with high heels is almost certain to cause a harmful strain of the foot muscles. For another, it tends to develop corns, a weakening of the great toe, and eventually flat foot. Further, the wearer of a high-heeled shoe is virtually compelled to take short, mincing steps, and to adopt a slouching attitude when walking, instead of stepping out briskly, the body erect.

This weakens the muscles of the body, interferes with the breathing, and thus interferes with the proper oxidation of the blood. The vitality of all the organs is thereby lowered, and in particular the brain fails to be adequately nourished.

Some degree of impairment of thinking power is sure to result. It is doubly sure, since wearers of high-heeled shoes find it so difficult to walk, that they do not walk enough. They prefer to be carried from place to place in street car, carriage, or automobile. As time passes, they walk less and less. Hence they suffer from lack of exercise, so necessary to mental and bodily health. They become restless and nervous, or lazy lethargic.

The same is to be said of the misguided many who, if they do not make the mistake of affecting high-heeled shoes, make the equally serious mistake of wearing pointed ones that are both too short and too narrow for their feet.

Women are not alone in making this mistake. Thousands of men make it. Foot-crowding, disturbed circulation, corns, muscular strain, a tendency to tire easily and a growing distaste for walking are the inevitable consequence.

Pointed shoes, say Fisher and Fisk, the well known authorities on personal hygiene, must be driven out of fashion. Shoes must be made to fit the foot, instead of trying to force the foot to fit the shoes.

This judgment will be endorsed by all seriously interested in national health and efficiency.

Let each one of us do his or her part. If we have not already done so, let us forthwith abandon the old harmful habit of "foolish vanity."

We need not run to the opposite extreme of wearing shoes that are needlessly ugly. But if we would keep our working power high we must subordinate the looks of our shoes to sanity of design and comfort of fit.

## SOFT SOLES GO UP IN PRICE

There has recently been an advance of 15 to 25 per cent. in infants' soft soles and moccasins. This is due to the scarcity and high prices for lambskins, dongola kid and other leathers, as well as the shortage in blue, white and pink dyes, and the exceptionally high figure prevailing for silk trimmings,

# Shoe Service

What is meant by shoe service? The proper kind such as The Empire Shoe gives means that the shoe will retain its shape, give ease to the foot, elasticity to the walk and stand all reasonable wear and tear—in short to be in every respect worthy and dependable. That's the only kind to buy.

A BRIGHT THOUGHTFUL ADVT, BY BERLIN SHOE HOUSE

thread, buttons and laces. The recent advance is the first one since the war, and the only reason prices have not been increased before is that manufacturers had a large stock of supplies on hand, which has been exhausted. Now that they have to enter the market for raw materials they find they "are up against it" in many ways. Soft soles that formerly sold at \$2.40 per dozen are now \$3.00; those that were disposed of at \$3.00 are now \$3.75; those at \$4.80 are now \$5.50; those at \$5.25 are now \$6.00, and those at \$6.00 are now \$6.50. The factories are rushed with business and find it difficult to meet the orders and get sufficient help.

Acton, Ont., is making an effort to secure a shoe factory, as the citizens of that town consider the site an eligible one for such an industry, there being two tanneries located there. Acton is situated on the main line of the Grand Trunk Railway and has excellent shipping facilities. It is understood the municipality will give liberal consideration to any responsible shoe manufacturing enterprise.

### OPENING NEW STORE IN MONTREAL

It is understood that it is the intention of the Hartt Boot and Shoe Co., of Fredericton, N.B., to open an exclusive men's retail store in Montreal in September next. The premises occupied will be at 467 St. Catherine St. West, in the block between Metcalf and Peel. The location is on the north side of the street and only a few doors from Geo. G. Gales & Co.'s place of business. It is likely that the Hartt Boot and Shoe Co. will have a sample room in the same building as the retail enterprise, for the accommodation of buyers coming in from western points. The shop will be splendidly fitted up and will possess every modern convenience and comfort.

### THE WORTH OF THE JOBBER

"The jobber may be popularly blamed for the high cost of the goods on your shelves, but this is unjust," said T. D'Arcy McGee, vice president of the Canadian Credit Men's Association, in an address before the Retail Merchants of Manitoba at their recent convention in Winnipeg. "His services are indispensable. I could name a dozen things which, if they could be curtailed or eliminated, would revolutionize the cost of the goods on your shelves. Take the millions of dollars spent in fancy and attractive packages—goods put up at enormous expense so as to appeal to the public in attractive form and convenient to handle, also because we have advanced ideas along sanitary lines. We did not demand the wrapped-loaf of bread 20 years ago.

"Take the cost of advertising well known lines. They are well known because of the millions of dollars spent in making them well known. Who pays for it? Look over the advertisements in any popular magazine, and they are legion. Yet I understand that in one popular journal the advertising receipts run a quarter million dollars per issue. The matter of delivery service—in a city this is a big item. Duty on imports. The war, with its upkeep of enormous armies and all the wastage that goes with it. Then there is the fire waste. You cannot get away from the loss and waste even if you are well insured—it all filters back in the general levy. The food waste, the waste and loss in handling fruits and perishable goods, our modern requirements such as our telephones, our motor cars and motor trucks; the shifting of rural population to the city, curtailing the production on the farm and increasing the consumption in the city, shifting the balance of supply and demand; the vast amount of money put into non-productive investments during our boom period—all these things have grown upon us and we accept the conditions as a matter of course—and pay for it.

"I have given you only a few of the reasons why I think the jobber a necessary business adjunct and why we should be doing business at the old stand. The established system as we have it to-day, is more economical because the manufacturer finds it cheaper to sell through the wholesaler, with loss eliminated from his cost book and with the jobber calling on him; he has no traveling expenses to pay, while selling to the retailer he must needs employ a small army of salesmen and provide for the greater risk of losses. I think that the solution of meeting mail competition is to be found along other lines, and that your executive is capable of finding the solution."

### WHAT ASSOCIATION HAS DONE

E. M. Trowern, of Toronto, secretary of the Dominion Board, who was present at the Manitoba gathering, gave an interesting history of the formation of the Retail Merchants' Association from its inception as the Retail Jewellers' Association of Canada to its present state.

In the early days, he said, they went to Ottawa to get the duty taken off diamonds. They were troubled with unscrupulous men in the business, who thought nothing of going to New York and putting three or four thousand dollars' worth of diamonds in their socks and letting the decent fellow pay the duty. They told the government they had to make the other man pay the duty as well, or take it off.

It so happened that an election was imminent, and the government refused to consider their wants, asking: "What would the public say?" Unsuccessful, they returned to Toronto, and the speaker came to this conclusion—that they went to Ottawa with a shot gun, when they should have taken a cannon. Thereupon they struck out the word "jewellers" from their name, and made it Retail Merchants' Association of Canada.

Later on they were troubled with wholesalers selling to the consumer. That was an old gray-headed subject. They took the matter up with the wholesalers, who replied, "Oh, yes, we are all going to help you, and will stop it as soon as everybody else does." They put an end to it in Toronto, with the exception of one house. There was always one, said Mr. Trowern, and that was the fellow who gave more trouble than all the others put together. It was to get that one man that he was willing to sit up at nights and set a trap for. This man replied that he was running his own business, and wanted no interference.

The only thing they could do then, was to talk about him among the retailers, and circulate his doings among the decent men of the business community. This reached the wholesaler's ears, and he replied that if they said that about him, or put anything in a letter that was detrimental to his business, he would institute proceedings at once. Then they began to ask themselves what rights they had. Labor men could talk in the public squares and discuss questions of wages, and nobody could touch them. It was discovered that these men had secured special legislation from Ottawa to do this, so the Retail Merchants' Association went to Ottawa, and after years of hard work, secured a special charter which enabled them to say what they pleased about wholesalers or manufacturers, and send it throughout the length and breadth of the land. Since it has been recognized that they had some power, the merchants were beginning to get some of their rights. Mr. Trowern took care to point out that these rights were not secured from Provincial Parliament, but by special acts of parliament at Ottawa.

### PIONEER IN SHOE MACHINERY LINE

Jos. Schryburt, the president of the Ottawa Shoemakers' Association, has had a life-long experience in the trade. A native of Quebec City, at ten years of age he was apprenticed with the late Mr. Pilon, of Lachine. After working for different firms in Montreal, Mr. Schryburt came to Ottawa in 1885, and two years later established a business of his own, since when he has been constantly engaged in his own particular line. Up to six years ago he occupied himself mostly with the repair trade and custom boots, especially those for deformed feet. Mr. Schryburt was the first one to introduce shoe machinery in Ottawa, a distinction of which he is rather proud, and to-day, at 641 Somerset street, Ottawa, he has one of the best equipped establishments to be found anywhere. He made the first steel box toe for hockey boots used by the National Hockey Association clubs, and later, finding that the steel was too cold, he introduced a substitute in the shape of fibre toe hockey boots, which have proven to be better than the original. The fibre toe boot is very much in use to-day for hockey purposes. Mr. Schryburt is one of the deans in the shoe trade in Ottawa and has a very well established business.

### SHOEMAN HAS THREE SONS IN THE ARMY

Not many men in Canada possess the proud distinction of having three sons serving in the army, two having been at the front for some time, and the third joining but recently. Such is the worthy record of W. H. Jardine, of Toronto, eastern Ontario representative for the Blachford Shoe Manufacturing Co., with which firm he has been for the past year and a half. Previous to that he was for fourteen years with the W. B. Hamilton Shoe Co. as one of their western travelers. Mr. Jardine's two sons, Harold and Wm. H., have been in the firing line for over a year. Harold Jardine is a member of the Canadian Mounted Rifles and Wm. H.

HAROLD JARDINE ON THE LEFT AND HIS BROTHER W. H. JARDINE ON THE RIGHT.

is with the 35th Battalion. He was wounded at Ypres on April 11th and is now in the hospital at Middlesex, Claxton-on-Sea, England. When 400 Canadians were called upon to take a crater Private Jardine was wounded by an exploding shell, two shots entering his shoulder, two his back and one his hip. It was at first thought that his leg might have to be amputated, but this is not now considered necessary and he is making good progress. Harold Jardine, who is with the headquarters signal staff in Belgium, has so far escaped injury. John, the third son of Mr. Jardine, enlisted a few weeks ago with the Royal Canadian Artillery and is now at Niagara-on-the-Lake. It is interesting to note that both Harold and William Jardine, previous to joining the colors, were members of North Toronto Hockey Club, and out of the twenty-one boys in that sporting organization every one has donned the King's uniform. This is a remarkable record of devotion and loyalty.

### NO WORK, NO PAY IS NEW RULE

"I do not look for faults in an individual, for I know that none of us is perfect. We all have our shortcomings and idiosyncrasies. When my staff is low in numbers there invariably appears to be a constitutional weakness and the ailments, real or imaginary, that afflict my sales people would, proportionate to ranks, put the list of casualties at the war front out of business. Nearly every day, one of my clerks is off on some pretext or other, principally a strained back, a chronic cough, bronchial trouble, high temperature, pleurisy, headache or something of that character.

"Now, I suffer from all these myself," continued the speaker, "but I manage to come to work each morning,

simply because I have to. Frequently a member of my staff will lay off for days at a time, and send me no word, and I have to plod along as best I may. Why, a friend of mine allowed his clerk a couple of days absence last month, supposedly to go to a northern town to see his father who, he said, was ill. The absentee sent excuses for delaying his return and on investigation it was found out that he was trying out another job which had been offered him to see if he could make good. Naturally, his former employer, on learning this, fired this man instanter.

"Henceforth, no member of my staff who is off for illness is going to be paid for lost time. I know that is the way I was served when I worked in a western city. Though there were ten of us in the store on a busy Saturday, or a rush night previous to a holiday, it was the practice of two of the boys to be afflicted with some malady which, strange to say, occurred periodically at the times spoken of. The proprietor suspected that they were shamming, or imposing upon him, and shortly afterwards announced that no person who was off owing to illness would be paid for the time lost. Well sir, that proved a perfect panacea, and there were no temporary indispositions or passing pains that kept away those who had previously feigned illness. They were on the job every day, except during the two weeks holidays allowed each member of the staff. I am going to try out this scheme here, and I believe it will cure one athletic fellow and a couple of girls who have been the chief offenders in the matter of not reporting regularly for duty."

### A SPECIALIST AND AN INVENTOR

(See front cover)

A man whose name is known in the shoe arena from Victoria to Halifax is John T. Tebbutt, president of the Tebbutt Shoe and Leather Co., Three Rivers, Que. He is an inventor, not of the dreamy, long-haired, visionary stamp, but a man whose inventions are practical and useful in every sense of the word, and have given relief and comfort to scores of people who have to be on their feet for many hours a day. These patented lines include—Doctors Anti-septic, Non-Perspiro, waterproof double soled and double stitched shoe, and the Professor Gold Cross Cushion Sole shoe, with central soles of asbestos. Others that may be mentioned are a double laced hockey bal, an aluminum steel box toe hockey bal with ankle support and strangle hold strap, as well as an anti-acid shoe, made from a leather in the tanning of which no acid is used. Mr. Tebbutt is also the originator of many copyrights and trade designs. His native city is Northampton, England, which is the centre of the British boot trade. There Mr. Tebbutt got his first acquaintance with all departments of the business, and on coming to Canada in 1885 he had a wide understanding of the various operations in shoemaking. His first position was with the Ames-Holden Co., Montreal, and soon after he took charge of the factory of the late Richard Smardon, with whom he eventually went to Three Rivers. Twenty-two years ago Mr. Tebbutt severed his connection with Mr. Smardon and, with his brother, Jas. S. Tebbutt, launched the firm of Tebbutt Bros., wholesale shoe house. Six years later they acquired the plant of the Three Rivers Shoe Co. and began manufacturing. They have built a business that is in every way a credit to them both in men's and boys' lines. Mr. Tebbutt has always believed in specialization and giving the public something different, and has made known the distinctive qualities of his shoes by wide publicity, not only in the trade papers, but the daily and weekly journals of Canada. Always taking a lively interest in the progress and welfare of Three Rivers, which his factory has contributed so much to make the enterprising, thriving and industrial centre that it is to-day, Mr. Tebbutt is ever a gentleman of genial disposition, courteous manner and untiring enthusiasm. He is a progressive shoe manufacturer in the best sense of the term.

THE CONGENIAL GROUP OF "MINER MEN" ASSEMBLED AT GRANBY, QUE., IN FOURTH ANNUAL CONFERENCE

## THE MINER FORCES FOREGATHER

Fourth Annual Conclave of Branch Managers, Salesmen and Representatives of the Miner Rubber Company, Limited, Held at Granby, Que., June 26th, 27th and 28th, 1916—Business and Pleasure Combined to Make the Gathering Enjoyable as Well as Profitable—The Finest Yet

THE Miner Rubber Company, Limited, believes in "getting together" as far as its employes are concerned and has learned the important lesson that the best way to secure thorough co-operation between the administrative, producing and selling ends of a business is to thoroughly discuss the interests of each department in the presence of the others. At all events they pronounce their annual conferences held between the managers, superintendents, salesmen and representatives one of the best movements inaugurated by the management since its inception, and so successful has the latest effort proven that it has been arranged to have regular conferences at short periods at Granby with the heads of the office and factory departments, under social auspices, in order to have the co-operative idea given more regular and effective scope.

The first day of the convention this year was devoted to sight seeing and pleasure. Headquarters were provided by the company at the "Windsor," Montreal, for the guests, who then were given a two hours' drive through the city in an observation car. At 5 p.m. a private electric car was in waiting at the depot of the Montreal and Southern Counties Railway to bear the party to Granby, a distance of about fifty miles, through one of the most picturesque rural districts of Quebec.

"Granby" and "Miner" are so intimately associated that one almost conveys the idea of the other. Granbyites all admit that their town, now a thriving place of about six thousand inhabitants, was practically put on the map by the Miner interests and the old inhabitants speak with great feeling concerning what the late S. H. C. Miner did for the locality in various ways outside his own business enterprises. Mention his name and the citizens will all do it homage.

The evening at Granby was devoted to the picture show in a local theatre and a musicale held in the parlors of the Granby Hotel, the programme being impromptu and provided by the guests, who proved their versatility in ways other than selling Miner rubbers. The pace was kept up well into the wee sma' hours.

On Tuesday, June 26th, the forenoon was devoted to a practical demonstration of the production of rubber footwear. The guests were conducted through the immense Miner plant from basement to attic and were permitted the opportunity

of closely observing the making of a light shoe, an arctic and a rubber boot from start to finish. Those who thus familiarized themselves with the process of rubber shoe making for the first time, ought certainly to be better qualified to discuss the goods they sell from day to day than they were before. As the plant is thoroughly up-to-date it was an eye-opener to most of those present.

The mill, which is one of the best built and best equipped on the continent, is splendidly situated. Just now, although nearly midsummer, it is operated by water power, on account of the plentiful supply afforded by the Yamaska River this year through the prevailing weather. It possesses nevertheless a powerful steam auxiliary to take the place of the 500 horse-power water turbine system when occasion necessitates the use of the former.

Our readers are already familiar to a greater or less extent with the process of converting raw rubber and other materials into footwear so that we need barely mention what the visitors saw on their trip through the factory.

The work begins in the basement, where the crude rubber is stored, and where it is washed in huge machines and hung up or put through drying machines. The raw rubber when dry is sent to the grinding room and here passed through rollers which roll and crush it until it is in a condition for manufacture. It is next mixed with various ingredients to give it the proper consistency and strength, when it is again passed through rollers which refine and remove foreign substances. It then goes to the calenders when it is incorporated with fabric, some being made into sole and some into upper stock, the rollers pressing the sheets out to the required thickness and stamping the patterns thereon. These come from the rolls in long sheets which are cut and placed on cotton frames. The next process is the cutting up of these sheets into the various parts to make the shoe, the work being done by hand and with such deftness that one is astonished at the results.

The pieces when cut out are taken to the shoemaking department where they are built into whatever kind of shoe may be in process of manufacture at the time, the parts being cemented quickly, the shoe being passed from operator to operator until finally the work is completed.

When finished the shoes, are hung on racks which are

run into curing or vulcanizing ovens where they are subjected to 250 degrees of heat, rendering the product smooth and complete in appearance, ready to endure wear and impervious to water. The operations vary of course with the goods. The heavier lumbermen's and top boots are cured by the vacuum, sometimes called the "pressure," process, which gives more satisfactory results on this class of goods.

One is struck throughout the Miner plant with the genius for organization that characterizes the whole establishment and to the evident care taken for the comfort and convenience of the employes. As an instance of the latter a new bridge has been built across the river at the rear of the plant for the convenience of operators, saving a wide detour to their homes. After luncheon the entire staff went into conference and spent the whole afternoon planning improvements in goods, selling methods and so forth. Everybody seemed to enter into the spirit of making Miner rubber footwear the standard for quality in Canada.

The evening was devoted until nine o'clock to a cinematograph show in which was inserted occasional skits touching up the members of management and staff. Roars of laughter were frequent.

The whole was brought to a fitting conclusion by a banquet at the Windsor Hotel at which about a hundred guests sat down. After a most sumptuous repast, interspersed with songs and choruses, the guests and others present were called to order by W. H. Miner, the general manager, who presided, who called for the toast to the "King."

The next toast was "Our Guests," proposed by the chairman and responded to in a very witty and timely speech by Mr. Arthur Congdon, of Winnipeg.

The "Miner Rubber Co." was proposed by Mr. Jas. Acton, who gave some interesting reminiscences of the late founder of the company, Mr. S. H. C. Miner, whose aim was to eliminate foreign made footwear in Canada.

#### A Pleasing Incident

A pleasing event in connection with the banquet was the presenting to the chairman, to be handed to Mrs. S. H. C. Miner, the President of the Miner Rubber Co., of a handsome basket of crimson roses. Mr. R. B. Griffith of Hamilton, on behalf of the visitors, expressed their profound admiration and respect for the lady who has sought so faithfully to carry out the ideals and policy of the late founder of the business, and asked that the good-will and wishes for continued life and prosperity be extended to her on behalf of the staff, and particularly its selling force.

The Chairman and Mr. Macaulay responded for Mrs. Miner in suitable terms. Mr. Macaulay referred to the fact that it was not generally known that Mrs. Miner took

a keen personal interest in all the details of the business and was intimately familiar with its progress and development. She followed with the utmost care the various moves that were being made to keep Miner goods in the lead in rubber footwear in Canada. He was confident she would be deeply touched by the kind remembrance of those who were united with the management in promoting the success of the ambition so dear to her late husband. He only regretted that the latter had not been spared to witness what had taken place in the last few days.

The gathering broke up with cheers for the King, the Company, and the singing of "Auld Lang Syne."

#### In A "Miner" Key

Everybody pronounced the fourth Miner convention the best yet.

The Menu and Toast List was an ingenious imitation of a Miner rubber outsole tied with a scarlet ribbon, quite a souvenir in itself.

No doubt as those present were expected to put the good things heard at the Convention in their pipes and smoke them, each visitor was presented with a souvenir in the shape of a handsome ooze tobacco pouch with a silver clasp, bearing the Miner Rubber Co.'s initials.

The police of Granby were provided with gum shoes for the occasion, so that the peace of the guests could not be interfered with and so that they might show the visitors the way to the hotels after hours. Granby is some town after eight o'clock. Eh, What?

There was nearly being wan less of the party at the close of the first evening's show. It looked for a while as though the freedom of the town extended to the guests was not to be permitted to a certain Miner high official. The tall officer, in a hat four sizes too big for him, was induced by the vigorous rescue inaugurated by Charlie Mills, to let the patrol go without its victim.

Arthur Congdon is some story teller. If what he knows and what the Miner General Manager and Treasurer know about Winnipeg were put together, it would provide an evening's entertainment in itself.

Why didn't Alec. Angus respond to the S.O.S. call he got on the telephone? Ask him.

A feature of the last night was the attempt of Gauthier of Ottawa to teach Griffith to sing "O Canada," in the original French, at 2 o'clock in the morning.

Who stole the editor's night shirt?

If Ontarians could sing "O Canada" in French as well as the Quebec sang "The Maple Leaf" in English, there would be no bi-lingual question.

## GUARANTEE

WE HEREBY GUARANTEE to pay the full cost of all shoes returned to us in which it is shown that by actual wear our Columbia Fibre Counters have literally broken or worn out and have failed to outwear the original shoe.

THIS GUARANTEE does not cover claims where the counters still remain intact, though bent out of shape through causes other than actual wear.

CANADIAN COLUMBIA COUNTER COMPANY

By .....  
Treasurer

*The  
Backbone  
of  
the Shoe*

THE business of a counter is to stand up. It is to the shoe what the spine is to the body: Everything depends upon it.

When the counter fails to perform its required function, the shoe loses its usefulness, becomes unshapely, wears out easily, and speedily finds itself discarded.

Columbia Counters *stand up*. They have to. We guarantee them to do so. We shall be glad to give you every opportunity to verify the strong claims we make.

A post card will promptly bring our representative to your factory.

# With the Shoe Manufacturers

Pithy Note and Comment on Shoe Matters—What the Makers of Shoes are Saying and Doing—Shoe Facts and Fancies

**T**HE financial report presented to the shareholders of Ames-Holden-McCready, Limited, Montreal, at the annual meeting held on June 22nd, showed profits on the year's operations amounting to \$321,791.

After deducting interest on bonds, loans and reserve for bad debts and depreciation, the surplus was \$52,861.

In moving the adoption of the report the President, D. Lorne McGibbon, spoke optimistically of the future. He said that while the profits for the past year might seem small on the volume of business done, this was because of the fact that this business included a \$1,000,000 army order on which there was practically no profits. He pointed out that the first part of the year resulted in a loss, but during the latter portion the loss was made up and a profit shown.

Speaking of present prospects Mr. McGibbon said that domestic trade during the first three months of this year had increased 40 per cent. and that the outlook was very satisfactory.

Referring to the heavy increase shown in the liabilities of the company Mr. McGibbon explained that this was the result of a special bank loan of \$450,000 which was necessary to take care of the army shoe business. Besides this the company had foreseen the advance in raw materials and large quantities of goods were in stock and shown in the balance sheet at cost prices.

Inventories show an increase of from \$800,000 to \$1,000,000, added Mr. McGibbon, but these goods will be sold and when paid for liabilities will be reduced again. He said that the company had nearly two and a half million dollars worth of raw material on hand which had greatly increased in value.

Mr. McGibbon explained that the large falling off in domestic trade made it necessary to take this army shoe business at a very low figure in order to keep the plant in operation and meet overhead charges. This year domestic business had shown a big

improvement and no further army shoe orders would be taken at the old prices.

"The company, in my opinion, has turned the corner, and is now on the high road to success. It is true we have some heavy bank loans to wipe out before we consider dividends, but these will be taken care of in time and I am looking forward to dividends. Personally I have great faith in the company," concluded the President.

Four new directors were elected on the Board of Directors—Clarke S. Jennison, of New York; Hon. Wallace Nesbitt, Toronto; Hon. C. P. Beaubien and R. E. Dildine, Montreal. The board as now constituted is as follows:—D. Lorne McGibbon, president; A. L. Johnson, vice-president, Winnipeg; Herbert B. Ames, M.P., vice-president; J. C. Holden, Hon. N. Curry, Victor E. Mitchell, Fayette Brown, Sir Thomas Tait, Shirley Ogilvie, S. J. LeHurray, Clarke S. Jennison, New York; Hon. Wallace Nesbitt, Toronto; Hon. C. P. Beaubien and R. E. Dildine. N. R. Feltes is the general manager of the company.

## Too Late Now for an Embargo

Shortly after the war started two years ago, several prominent shoe manufacturers suggested that the administration should, in the interests of the American people, place an embargo on the exportation of leather and shoes, says Shoe Topics. They realized that the high prices Europe could afford to pay for its war necessities, such as leather and shoes, would be too great a temptation for those most interested and that all thoughts of the domestic demand would be overlooked. The executive committee of the National Boot and Shoe Manufacturers' Association held a meeting a short time ago to consider a proposal that an embargo be laid on the exportation of all finished leather until the belligerents of Europe shall have raised their embargo on the exportation of raw materials to the United States. It seems a little bit late in

the day to be asking for an embargo on leather that has already been disposed of. We know that due to the agreed of some shoe manufacturers and the leather people generally, manufacturers are now begging for leather and paying most any price to get enough to fill orders that they now have on hand.

It seems there isn't anything to be done now but grin and bear it, although an embargo might do this much, restrain competition between American manufacturers and European manufacturers for American leather and thus prevent prices being driven to a famine point, which will be the result if something isn't done to prevent Europe taking on American leather.

#### The Trend of Shoe Styles

Last manufacturers are showing many new styles for 1917 in the line of new tips, foxings, vamps and stays, says an exchange. The manufacturers cannot get rid of their cloth top styles; the retailers will not buy them for they know that the public wants an all leather shoe. There has been a noticeable falling off in novelties for immediate delivery. This applies to both the men's and women's trade. Most shoe factories have lots more business than they can handle. Fall orders are coming in earlier than ever and many of the factories now have their floors filled with fall goods. The wing tip pattern will be used on a great many shoes, both for men and women. One wing tipped pattern was seen recently in an oxford of dark tan, also black calf, one had a white and one the regular sole. They retail at \$7.50. A sport oxford was also seen recently in a smart shop, of white buck, combined with trimmings of black, tan or pearl.

#### Making Shoes Under a Cover

Why are more shoes going through to-day under a cover than at any time in history. The white shoes

have to be covered and so do all the various shades of uppers in everything but black. In fact the black shoe is about the only one that could not be soiled in the handling all through the shop, says an exchange.

It is apparent that shoes cannot be lasted so well when a cover is used, all because the operator cannot see what he is doing, or cannot see so well. This is noticeable when one looks closely at the shoes when they are in the packing room.

The toes are wrinkled more or less in many shops, and some foremen of the treeing and packing department have an idea that a lot of toes are spoiled, so to speak. Naturally a treeing foreman does not want to see many wrinkles in shoes when they come to his department, and no one will blame him for this. The more wrinkles in a shoe the more ironing, as every wrinkle must be ironed out.

It was never intended that shoes would be made under a cover and get a good job. In fact the placing of cloth on the outside of an upper changes the whole aspect of things and not only adds to the labor but to the expense, too. Even where certain operations are paid for at a little extra price because of the cover, the arrangement is hardly satisfactory. A shoemaker likes to see the shoe he is working on, and the more of an artist he is the more he takes pride in his work. A true workman wants to see a thing grow under his hand, and in the case of a shoe he is denied this, as the shoe itself is hidden.

Not only at the lasting but all along the line there is more or less trouble on account of the cover. The operator on the welting machine can't see his upper, and this may make a whole lot of difference at times. If the shoe has a good full upper it will go through all right, but if it is a short upper it makes it bad.

Then, when the shoe comes to the forepart trimmers it may cause more or less trouble. There are plenty of shoes that have to be cleaned out around the forepart edge, and

still more that should be cleaned out more or less around the heel-seat, and the cover is in the way. If the cloth itself is rather loose and full of wrinkles it is all the more difficult to handle at the edge trimming. It is at this operation that good judgment can be passed on how a cover is put on a shoe; if it is put on so that it fits neat and tight all around, the edge trimmers will not mind it so much.

There are some shops on women's fine goods where most everything goes under a cover just now. All the white canvas, white buck, white kid, grey upper leather and all other fancy leathers and all the fancy fabric tops have to be protected with a cloth cover. And these are the shoes that the workmen cannot see; shoes that must be made in the best possible manner and shoes that most people will admit could be made much smoother if there was nothing in the way to hide the work.

It adds heavily to the cost of shoes to make them this way, as the cover must be cut, stitched, lasted, cut away in the packing room and so on. The material itself costs something and it all represents a dead loss, as the shoes themselves are no better from the wearing standpoint. They look better though, and to keep them looking at their best the covering is now considered an absolute necessity from which there is no escape at the present time. At some time in the future a way may be devised to put shoes through in a natural manner, but the inventors have not introduced such a method yet.

If a shoe "creeps" you can see it if there is no cover, but with a cover you can't see it, and this is the main difference so far as smoothness is concerned.

#### Another Factory Doing Its Bit

The town of Milton, Ont., is endeavoring to do its share towards providing the half million men that has been set as Canada's contribution towards the great world struggle that is being waged for liberty and civilization. The accompanying illustration shows the band of the 164th Battalion of the County of Halton lined up in front of the Milton Shoe Co. factory on the main street of the town. In common with other manufacturing enterprises just now the Milton Shoe Co. is having its time keeping its required quota of operators but is managing to meet the situation and serve

its customers with its popular line of machine-sewn and Standard screw specialties. Under the new management the concern is forging steadily ahead in the quality and volume of its output.

#### Canadian Day at Boston Fair is July 17th

The eighth National Shoe and Leather Fair to be held in Mechanics' Building, Boston, July 12th to 19th, will be the most successful shoe and leather exposition ever held in America. Exhibits of shoes, leather, shoe and leather machinery and supplies of all kinds used in the manufacture of shoes and leather will be shown by leading firms from vari-

ous parts of the country. There will also be exhibits from England, Scotland, France and Canada.

As the Shoe and Leather Fair has been extensively advertised all over the world, buyers are expected here from Great Britain, Holland, France, Scotland and other European countries, as well as Cuba, Central America, Brazil, Argentina, etc. There will be a large delegation from Canada headed by Frank J. Boyden, of the Slater Shoe Co., Montreal, W. P. Francis, of the John Ritchie Co., Quebec, and H. C. Carter, of the Colonial Hide Co., Montreal and Quebec. There will be also many trade members from Toronto, sev-

MECHANICS' BUILDING, BOSTON

eral points in Ontario and the Prairie Provinces. Special Pullman cars will bring the Canadians from Montreal, Quebec and Toronto. They expect to arrive on Monday, July 17th. This will be "Canadian Day" at the Shoe and Leather Fair and visitors from the Dominion will be cordially welcomed.

The programme of the Shoe and Leather Fair week is as follows:—Wednesday, July 12th, opening of the Shoe and Leather Fair at 2 p.m.; Thursday, July 13th, outing of the Boston Shoe Travelers' Association with visiting shoe merchants and buyers; Friday, July 14th, special events at the Shoe and Leather Fair building; Saturday, July 15th, Superintendents' and Foremen's Day at the Shoe and Leather Fair building. Large numbers of superintendents and foremen of shoe factories will be present to inspect the exhibits. Monday, July 17th, will be Canadian Day at the Fair. Tuesday, July 18th, automobile trip to United Shoe Machinery Company's plant at Beverly, Mass; Wednesday, July 19th, Shoe and Leather Fair closes at 10 p.m.

With the exception of the big outing on July 13th, all events through the week will centre at the Shoe and Leather Fair at Mechanics' Building.

Wm. Noll, of Foster Rubber Co., and W. M. Oakman are in charge of arrangements for the outing and expect to take a trip to Nantasket by special steamer with members and guests. Thomas F. Anderson, secretary of the New England Shoe and Leather Association, has made arrangements to keep open house for all callers from United States, Canada and abroad, at his headquarters, 166 Essex street. Visitors are welcome and all information obtainable by the Association is available for their use.

Exhibition space at the Shoe and Leather Fair is almost entirely sold out and every foot of area on the main floor will be occupied when the doors open. Among the Canadian exhibitors will be the Davis Leather Co., of Newmarket, and A. Davis & Son, Kingston, Ont.

All members of the shoe and leather trade are hospitably invited to visit Boston during the Shoe and Leather Fair week and will be cordially welcomed.

#### Declare Six Per Cent. Dividend

The Hartt Boot and Shoe Company, of Fredericton, N.B., at their annual meeting held Wednesday afternoon, June 21st, declared a dividend of six per cent. for the year on the capital stock. The old board of directors, comprising

John D. Palmer, John A. Reid, John Kilburn, Edward Moore and J. W. McCready, were re-elected. There was a good attendance at the meeting and all the shareholders spoke optimistically regarding the outlook for the ensuing year. All of the directors' reports were highly satisfactory.

The company is planning to open a large retail store in Montreal and will handle their own product of high grade men's shoes. They aim to make it one of the best shoe stores in America.

Vice-President Reid recently returned from New York, where he was looking over large retail establishments and picking up ideas with a view to introducing them in the new establishment.

#### Have Acquired Button Factory

Edward C. Hood, Columbia Counter Co., Boston, was in Montreal last week on business in connection with the Canadian Columbia Counter Co. Owing to the fact that he could not get buttons quickly enough to fill his orders, G. J. Trudeau, Managing Director of G. J. Trudeau Co., Limited, made arrangements last week for the purchase of the button factory of the S. Lewis Co. at New Bedford, Mass. The new company will be known as S. Lewis, Inc., and Mendoza Langlois, Mr. Trudeau's partner, will be President of the concern, and Mr. Trudeau a director. The Managing Director will be W. J. DeWitt, who is Vice-President and Sales Manager of the Lionne Co. in Boston. The factory has a capacity of 600 great gross a day papier mache buttons, in both hand and regular finish.

#### Speculating on Style Problem

What will be the leading style characteristics shown in women's shoes for next season is a question that is heard now and again. Last year the spring samples of some Canadian shoe manufacturers were either well under way or practically completed by the early part of July, but things are different now, when supplies of raw material, prices and labor are such determining and, in not a few instances, deterrent factors. Some factories have given no thought whatever to next season's offerings and are wholly engaged in turning out what orders they have in hand for fall, wondering where they can secure sufficient help and produce the goods on order when required.

It is predicted by one influential member of the trade that the style problem will largely resolve itself into whatever the makers can buy or secure. At any rate the new spring samples will not appear until considerably later than other years, owing to the unusual circumstances that have arisen during the past few months in the trade, with which everyone in the wholesale, retail, supply and production line is thoroughly familiar.

A recent despatch from Lynn, Mass., says that the tendency to make lasts longer and narrower, which threatened to bring about a run on needle toes, has been checked, and a reverse action has set in. The new lasts have toes a trifle shorter and rounder than those that have been in fashion for dress footwear lately. There is a tendency towards coin toes.

There also is going on refinement of lasts for growing girls, for walking, for sports and for skating. An extreme last, for boots for wear when ice skating, has a narrow toe and a heel 1 6-8 inches high. That's a staggering style for those who are familiar with broad-toe and flat-heel shoes for skating.

It is expected that the return to rounder toes will lead to a run on patent leather shoes. There seems to be a generous supply of patent leather ahead, particularly that made from cow hides. It could not be used advantageously on needle-toe shoes, because it is liable to crack when the

lasters pull it over the narrow toes. But it can be used advantageously on round-toe shoes.

If patent leather is used it is likely that cloth tops will come back into fashion. A noted tanner of calf leather is advising shoe manufacturers to substitute cloth for calf leather. He thinks that calf is getting too high in price for safety. It seems, by the way, that shoe manufacturers are listening to the advice of tanners that they go cautiously, and deliver to customers good shoes.

The demand for black shoes continues good. The colors for late fall are mahogany brown and battleship grey. More

THE U.S.M. CO'S OFFICE IN BERLIN

bucks, suedes and castors will be used than for a long time. They will be used for whole boots and for tops in combination with black or colored vamps.

The general run of boots will be 7½ inches high, a good height for wear with short skirts, most of which are between seven and eight inches from the ground. Heels for dress boots will be two inches high. Many will be of wood. Heels for walking and sport shoes will be low and broad. Lace boots continue to hold their popularity.

#### The U.S.M. Offices in Berlin

Recognizing the important and strategic position of Berlin in the shoe manufacturing line in Ontario, the United Shoe Machinery Co., of Canada in 1914 opened a well-equipped branch on King street, in that live city, views

INTERIOR VIEW OF U.S.M. CO'S OFFICE

of which are presented on this page. It is under the direction of L. W. Hanson, who is also the aggressive manager of the Toronto branch and pays weekly visits to Berlin, keeping in close touch with the trade. A competent traveling and mechanical staff is maintained at the Berlin office, with Wm. Kilpatrick in charge. A full stock of machinery parts, findings, etc., is carried and the branch, which is a rapidly developing and progressive one, is a great convenience to

#### Sole Leather Still Ascending

Sole leather is steadily advancing in price. Recently an increase of two cents on hemlock went into effect, and how much higher the figure will go is not known. The following are the prevailing prices, quoted by one leading firm: Hemlock—Bends, 60c.; backs, 55c.; crops, 49c.; sides, 42c. Number 1 Oak sole, which was recently advanced in price by one cent is now selling at: Bends, 62c.; backs, 55c.; crops, 50c.; sides, 43c.

#### Ask Retailers to Reduce Orders

Getty & Scott of Galt, Ont., have sent out the following notice to the trade, which explains itself:

"Our travelers have just completed their fall trip for 1916. For some time past we have realized that it would be impossible for us to make all the goods that were being sold. One of two courses seemed open to us; to take our travelers off the road before the completion of their trips, in that way disappointing many customers, or to complete the trip and total up our sales, figure the amount of goods we could make and then ask each customer to reduce his orders in the same proportion. We find an increase of

50% over the last largest fall trip. With labor conditions as they are we cannot hope for the present to more than hold our own in factory production. We are, therefore, compelled to ask you to go through the order placed with our representative and reduce it one-third. The trade will understand how deeply we regret having to take this action, but with conditions so abnormal we can see no other solution. Kindly give this your prompt attention in order that

## SOME FAMILIAR FACES IN THE ANCIENT CAPITAL

EDGAR A. SHEE, WIDELY KNOWN LEATHER SALESMAN AND DISTRIBUTOR

J. C. LECLERC, SUPT. FOR JOS. TANQUAY, SHOE MANUFACTURER

W. P. FRANCIS, VICE-PRESIDENT OF THE JOHN RITCHIE CO., QUEBEC

we may not be delayed in getting your goods into the works. Sorting trade has been so heavy with us that we are late in getting started on fall work, so that under most favorable conditions and with the orders reduced, we will be late enough in many deliveries. Again assuring you of our regret that we are unable to fill your order in full and trusting to hear from you, we are,

Yours truly,

GETTY & SCOTT, LIMITED.

#### White all the Way Through

A new line that will arouse considerable interest in manufacturing circles is that now being handled by G. J. Trudeau Co., Limited, Montreal. It is a white heel board put up in the usual way, but having the advantage of being white all the way through instead of the usual color. Mr. Trudeau expects that manufacturers who have had difficulty in regard to chipped heels and who have had complaints of the varnish wearing off the ordinary heels, will welcome this new article. It has had considerable success in the States.

#### Sets High Standard in Service

The store of the Ingledeew Shoe Co. at 666 Granville street, Vancouver, an illustration of which recently appeared in the SHOE AND LEATHER JOURNAL, is one of the finest on the Pacific Coast and has for its slogan "Vancouver's Smartest Boot Shop." It lives up to the slogan in every respect. Situated in the heart of the business district of Vancouver, with a handsome mahogany front and well lighted show-windows, it is one of the city's most attractive retail establishments.

The store has a frontage of twenty-five feet with two large display windows, ten by twelve, and an entrance (six feet wide at the front), with double doors. The front is finished in mahogany as is also the interior.

The single shelving system is used, the shelving being nine feet in height with an eight inch moulding at top and a six inch baseboard. The shelving runs full depth of the store (eighty feet) and is divided into sections containing

one hundred and twenty cartons to a section in the ladies' department and eighty-five in the men's.

The office is situated at the rear on a mezzanine floor which is nine feet above the main floor, and is ten by twelve. This is shelved on both sides and front and used as the children's department.

The floor is carpeted with an Axminster carpet in a pattern to harmonize with the mahogany fixtures. An electric vacuum cleaner is used three times a week to clean this carpet.

The lighting system is composed of six clusters of lights, each cluster containing six lights of sixty c. p. each. These clusters are hung at intervals of ten feet and are directly in the centre of the store, twelve feet above the floor. This makes a lighting system which is almost perfect.

The store is heated with hot water, the radiators being placed between the chairs down the centre of the store.

Findings are kept in wall cases, one on either side of the store at the back of the windows.

W. W. Ingledeew, the proprietor and manager, is one of the pioneers of the younger generation of Vancouver's shoemen, having been connected with the shoe business in that city for the past seventeen years.

#### GREAT HELP TO THE TRADE

*The "Shoe and Leather Journal" is certainly a great help to present day shoemen, and I do not see how any progressive store can do without it, as it is a great factor in the improvement and elevation of the trade generally. I wish you increasing usefulness and success.*

Belleville, Ont.

J. J. HAINES.

**TELL YOUR CUSTOMERS WHY SHOES ARE SO HIGH**

*(Continued from page 20)*

and dyes of all kinds. The increased cost of certain chemical agencies and extracts is all the way from twenty-five to five hundred per cent.

In sole leather the same state of affairs prevails. The average advance of all tanning materials used by firms producing bottom stock in Canada is to-day over one hundred per cent. A tremendous amount of stock has gone into army shoes, and in addition to these obstacles there are the difficulties in getting dry hides, booking space for shipment and the extremely high cost of carriage. All these have contributed to the present anxious state in regard to sole leather, which is advancing steadily.

**Why Kid is So High**

In kid leathers which have been in requisition to an extent never known before, owing to the eight and nine-inch high-cut boots for women, the situation is tense. Formerly the supply of the world came principally from Russia, India, Arabia, South America and China, while other countries produced smaller quantities. Since the war Russia has not exported any goat, sheep or cabretta, calf or Russian colt skins, while shipping facilities have been crippled from both India and Arabia.

**What a Year Has Seen**

Here are the comparative prices of the various items that enter the manufacture of a shoe, as furnished by a leading maker of men's fine welts. The period covered is the past year.

Items	June, 1915	June, 1916
Gunmetal calf.....	\$0.30	\$0.42
Box calf.....	.29	.42
Russia calf.....	.31	.45
Matt calf.....	.26	.39
Chrome side leather.....	.26	.38
Patent.....	.31	.38
Dull kid.....	.25	.44
Colored kid.....	.25	.48
Glazed kid.....	.25	.44
Sheep skins.....	.08	.11 1/4
Outsoles, oak.....	.40	.48
Outsoles, hemlock.....	.37	.45
Insoles.....	.15	.21
Heels.....	.12	.20
Counters.....	.07 1/2	.09
Box Toes.....	.04	.06 3/4
Welting.....	.07 1/2	.08
Facings.....	25% increase	
Linings.....	3% increase	
Shanks.....	10% increase	
Thread.....	\$1.10 to \$1.20	\$1.88 to \$2.44
Nails.....	5% increase	
Eyelets.....	3% increase	
Hooks.....	3% increase	
Laces.....	.65	1.72
Buttons.....	7% increase	
Pull straps.....	6% increase	
Cement.....	10% increase	
Cartons.....	1.23	1.30
Labor.....	15% to 25% increase	

**On Medium Price Lines**

Another manufacturer who makes a medium priced line of McKay and Standard screw for men submits the following.

Items	June, 1915	June, 1916
Box calf.....	\$0.28	\$0.40
Chrome side leather.....	.30	.33 1/2

Patent.....	.31	.36
Dull kid.....	.21 3/4	.30
Glazed kid.....	18 3/4.	.34 1/4

Thread.....	From 25 to 50c.	lb.
Nails.....	About 10%	increase
Eyelets.....	"	"
Hooks.....	"	"

Laces.....	About 10% increase
Buttons.....	" "
Pull straps.....	" "
Cement.....	" "
Cartons.....	" "

**More Interesting Figures**

Here are the figures of another leading concern making high-grade women's shoes.

Items	June, 1915	June, 1916
Gunmetal calf.....	\$0.27	\$0.43
Box calf.....	.27	.43
Russia calf.....	.30	.48
Matt calf.....	.24	.40
Patent.....	.28	.36
Dull kid.....	.16	.32½
Colored kid.....	.25	.43
Glazed kid.....	.14 to .30	.28 to .50
Sheep skins.....	.07	.12 to .15
Heels.....	.10	.20
Counters.....	.5 to .8	.6 to .15
Box toes.....	.02	.2½ to .4
Welting.....	.05	.08
Linings.....	.13 to .16	.15 to .20
Thread.....	80% advance	
Laces.....	100% advance	
Cement.....	25% advance	
Labor.....	20% to 30% advance	

**Steady Gain in Hides and Skins**

A comparative report of the price of country hides and skins in Chicago of to-day with those of a year ago is interesting:—

	June, 1915	June, 1916
Heavy cows.....	17-19½	19 -19½
Bufs.....	17-19½	19½-20
Extremes.....	17-19	21½--23
Branded hides.....	16-17	18 -18½
Calf skins.....	18-22	30 -36
Kips.....	17-23	22 -26

**Jump in Bottom Stock**

The following shows the increase in sole leather:—

	June 1916	Apr. 1916	Mar. 1916	Feb. 1916	Nov. 1915	Mar. 1915	Sept. 1914	Oct. 1913	Nov. 1912	Aug. 1912
<b>Hemlock—</b>										
No. 1 Sides.....	42	40	37	35½	34½	33½	32	32	30	28

No. 2 Bends.....	60	58	52	51	49	46	45	45	42	41

Backs—35% trim; Bends—50% trim.

**Calf Skin Situation is Serious**

In reviewing the present prices for calf skins and the outlook for fall, one of the leading Canadian tanners, in a recent letter to an eastern firm, sums up the situation as follows:—

Yours of 23rd, duly to hand and in reply would say, as you know for months past we have not been booking orders ahead but at the same time we have been doing everything we could to protect and help our Canadian customers. In fact for the last five or six months we have practically refused to ship outside of Canada, with the exception of several very small lots to real good customers, and, if we had been willing to give customers outside of Canada the goods they wanted they would have taken every skin we could have produced. We think that you will ap-

prove of our position, as we must all work together for Canada first.

Then as to a further quantity which you may require later on—we expect to be in a position to take care of your wants, but the price will be whatever the figure is at that time. We cannot book anything further ahead at this price than above quoted.

The writer has just returned from a visit to New York and Boston, endeavoring to size up the situation for the balance of the year, and without doubt, raw calf skins of all kinds are higher today than they have been yet since the war began and, with the embargoes on from almost every foreign country, if the war continues until the end of the year or until next spring, it will be worse, as nobody knows where raw calf skins will come from to supply requirements. Of this you, however, may be certain any orders that we book for you, you will get the goods without any trouble. You can absolutely depend on this, as we do not take an order for anything that we are not covered with raw material to fill.

The following letter was received in reply: "We have your kind favor of the 26th, and must say that we fully approve of your position and greatly appreciate the fact that you are doing your level best to protect your Canadian customers. It is, indeed, very creditable to you to protect their interests."

The glazed kid situation is also growing more acute. Tanners point out that before a goatskin is started through the factory each foot carries an average cost of five cents paid for freight, insurance and war risk. The average price on all grades of small skins, running from 40 to 45 feet to the dozen, including freight and insurance costs to-day, is 18 cents per foot. Before the war freight from Calcutta averaged \$7 a ton on goatskins and to-day it is \$110 a ton. This means that the cost of goods being put into leather for sale about August or September will be at least 14 cents a foot over normal prices a year ago, and, too, this does not include increased cost of chemicals or an average increase of 25 per cent. in labor cost.

**HOW MODERN REPAIR SHOPS INCREASE**

The rapid increase in the number of machine shoe repair outfits seems to spell the doom of the old-time hand repairer, or cobbler, which has long been the popular name for this class of workmen.

It is true that there are a good many people who stand by the hand men yet, but their number is diminishing all the time, and it looks to be a question of only a few years more when all the individual repair shops will be gone.

It is likely that greater care is needed in repairing by machine than by hand, and this is one reason why many customers are yet left to the cobbler. The machine can spoil a shoe by cutting the welt up pretty badly, a thing that is liable to occur if the operator is not careful. The machine can run too far out on the edge, or it can run too far in. If it gets in too far it may get to the in-seam, and if it is out too far it may spoil the looks of the edge; make the edge look like a saw tooth edge in fact.

But it is, indeed, seldom that a shoe is hurt to any extent in the machine repair plant. On the other hand, the machine does a good job in most cases, else it would not be as popular as it is and becoming more so all the time.

With the complete machine equipment a pair of shoes can be tapped and heeled in very quick time, and cheaply. The cheapness of the system is what gets the trade, although repair work today cannot be done by one system very much cheaper than by the other. It can be done in far less time though, and this is an important factor in the upbuilding of the system.

# AMONG THE SHOE MEN.

Charles McGilvery, shoe dealer, of Simcoe, Ont., who has been ill for some time is improving steadily.

Hon. E. J. Davis, of the Davis Leather Co., Newmarket, Ont., spent a few days in New York and Boston recently.

J. O. Boughner, who was formerly in the shoe business in Simcoe, Ont., has once more entered the retail ranks in that town.

Central Leather Co. of New York, declared the regular one per cent. and an one per cent. extra on the common stock.

Miss Mary Bethia Hayes, daughter of Mayor R. T. Hayes, president of J. M. Humphrey & Co., Limited, of St. John, N.B., was united in marriage recently to Professor George Douglas Steel, of Prince of Wales College, Charlottetown, P.E.I. Rev. George Steel, Superintendent of Methodist Foreign Missions, officiated at the ceremony. Mr. and Mrs. Steel left on a honeymoon trip to Bras D'Or Lakes, C.B.

S. G. Amero, manager of the London, Ont., branch of the Kaufman Rubber Co., spent a few days in Toronto recently on business.

The controversy between the city officials of Fredericton, N. B., and the Palmer-McLellan Shoe-pack Company is at an end, the city council granting the company permission to go on with the work of erecting a tank for a sprinkler system being installed at the company's factory in Fredericton, N.B. The trouble arose over Mayor Mitchell taking exception to the company placing the foundations for the tank on what he claimed was the Aberdeen St. extension. After special meetings of the council the company is allowed to continue the work as originally planned.

Vooght Bros., North Sydney, N.S., have installed a pair of specially made oak settees, made by the Oxford Furniture Co., in their shoe section.

S. C. Parks, shoe retailer, 1224 Yonge street, Toronto, who is Deputy Grand Master of the Grand Lodge of Ontario, Independent Order of Oddfellows, was in Brockville, Ont., on June 21st, attending the funeral of the late Senator Daniel Derbyshire, who was a former Grand Master of the Order.

D. A. Leonard, representing the American-British-Canadian Distributors, Toronto, has returned from a successful selling trip to Winnipeg and various points west.

W. A. Law, one of the popular travelling representatives of the Kilgour-Rimer Co., wholesale shoes, Winnipeg, is receiving the congratulations of his friends on being the proud father of a bouncing eight-pound girl.

The Greb Shoe Co., Limited, has been incorporated with a capital stock of \$40,000, and headquarters in Berlin, Ont. The company is empowered to purchase the good will, assets, etc., of the Berlin Shoe Mfg. Co., Limited, and to manufacture, buy and sell boots and shoes. Charles Greb, president of the Berlin Shoe Mfg. Co.; E. Haedke, vice-president, and Erwin C. Greb, secretary-treasurer, will be identified with the new company.

James C. Bryant, of Toronto, who is on the selling staff of the Kaufman Rubber Co., Berlin, is spending his holidays, along with his wife and family, at Keswick, Ont.

The marriage took place on June 29th of Miss Mary Elletta, elder daughter of Jolliffe D. Reilly, shoe retailer of Welland, Ont., to Charles Lake Coulson, B.A., Sc., Lieutenant in the 98th Overseas Battalion.

The "Shoeman," which has been published by the Arthur L. Evans Co. Inc., Boston, for a number of years, and was one of the brightest and most progressive journals in the trade, has been merged with the "Shoe Retailer" of Boston, the amalgamation taking effect July first.

The colonial pump returns to favor this summer with new and very smart buckles of white metal, enameled in black, and cut steel. If one prefers the tongueless slipper they will surely be delighted with new white suedes, with jetted steel buckles placed high on the instep.

O. J. Killam, manager for the Kaufman Rubber Co., at St. John, N.B., spent a few days in Toronto lately, on his way home from attending the recent convention in Berlin.

William Pollard, of the office staff of C. Parsons & Son, Limited, leather and shoe findings dealers, Toronto, was married at Central Methodist Church, Toronto, on June 21st, to Miss Ella Van Every, daughter of H. W. Van Every, Dovercourt Road, Toronto. They have returned after spending a few days at western points, and are receiving the congratulations of their friends.

Ed. R. Lewis, leather dealer, Toronto, spent a few days last week in Montreal and Quebec on business.

Edwin Chapman, shoe dealer, of Ailsa Craig, Ont., has received the sad news that his son who enlisted with the first Canadian contingent, has been killed at the front. Many months ago he was wounded and later returned to trenches, only to meet death in the recent fighting.

W. T. Purvis, warehouse manager of the W. B. Hamilton Shoe Co., Toronto, who recently underwent an operation for appendicitis, is making splendid progress toward recovery.

Frank Springstead, of the Toronto traveling staff of Ames-Holden-McCready, Limited, is now calling on the trade in the larger centres of Ontario, devoting his attention exclusively to the special new line of fine goods which the firm is producing, known as the Corona range, made in both men's and women's.

The shoe findings houses of Toronto, recently sent out notices to their customers that their terms, instead of being five off, thirty days, or net, four months, have been changed to two per cent., thirty days, and net, sixty, from the date of shipment. The change has been made owing to the sudden and repeated advances in all lines of findings and leather.

Geo. Nickle, of the Nickle Boot Shop, Limited, Calgary, who is opening his second shoe store at 212 Eighth Avenue West, in that city, has been spending a few days in Toronto, Montreal, Quebec and other cities. It is expected the new store will open about August 1st.

Among the recent shoe and leather visitors to Boston, who spent several days on business in that city, were Walter Smardon, Montreal; W. M. Angus, St. John, N.B.; J. A. Reid, Fredericton, N.B.; J. S. Townsend, Hamilton; F. A. Guinivan, Toronto; S. E. Wygant, Montreal.

Private James Walter McIntyre, a former employe of Ames-Holden-McCready, Limited, wholesale boot and shoe dealers, St. John, N.B., branch, was killed in action in France on June 16th, according to an official report received by his stepfather, George N. Breen, this week. He was twenty-three years of age and a graduate of St. John High School and Kerr's Business University. After completing his course in the latter institution he was engaged on the office staff of Ames-Holden-McCready, Limited, where he remained for two years. He resigned his position to take up a course of studies for the ministry and was stationed at Pleasant Vale, Albert County, New Brunswick, as a probationer, when he joined a well known New Brunswick Battalion. The day the telegram arrived announcing his death was the thirteenth anniversary of his mother's death. He was a bright young man and won the esteem of a host of friends.

Many friends of Louis O. Breithaupt, son of L. J. Breithaupt, president of the Breithaupt Leather Co., Berlin, will sympathize with him on the sad and untimely death of his wife, which took place on June 27th. The deceased, whose maiden name was Miss Mabel Louise White, formerly resided in Milton, and was married to her bereaved husband last summer. During her residence in Berlin she made hosts of friends. The remains were interred in Mount Hope Cemetery, Berlin.

E. F. Keene, late of Randolph, Mass., who has been appointed superintendent of the Regal Shoe Co., Toronto, and has been ill for some time, has sufficiently recovered to assume his new duties upon which he has entered this week. Mr. Keene has had long practical experience in the manufacturing and financial ends of shoemaking, and comes highly recommended for his new and responsible post. Harry Litchfield, of Boston, has been spending sometime at the Regal factory, while C. S. Corson, general sales-manager, is now completing an extended selling trip throughout the larger cities of the Prairie provinces.

The Canadian Shoe Findings Novelty Company, 2 Trinity Square, Toronto, have just received a new cleaner for satins, suedes and all colors of kid shoes, silk, felt, or cloth tops, and also a Glycerine paste, that is greaseless,

for gunmetal and smooth dull finish leathers. The Company are also showing to the trade a wax polish for leather, which is satisfactory and reliable in every respect. The Company have recently been appointed selling representatives for Dr. A. Posner's Scientific Shoes for children and growing girls, and Dr. Posner's Ankle Brace Shoe. The firm report a very active demand for their splendid line of cleaners for all the new fall shades.

It is fully expected that the Chatham Shoe Co., Limited, of which E. S. Hunt is president, which went into liquidation a short time ago, will be successfully re-organized under a new name and will begin operating again in the new plant at Chatham, Ont., under favorable auspices.

Mr. Justice Kelly, Toronto, has dismissed the action of Frank Dyche Law, broker, against Thomas N. Dunn, A. H. Davidson, Archibald Orr and Gideon Grant, to recover \$5,790, alleged due for special services in organizing the Standard Tire & Rubber Co. in the course of which \$154,000 was subscribed and \$38,600 paid. Judgment is reserved as to the liability of the company on a claim for \$129.71. Justice Kelly held that the plaintiff's remuneration had been ample.

#### PLEASING DISPLAY OF OUTING SHOES

The accompanying illustration demonstrates how a striking and effective special display of outing and white shoes for both women and men can be made. The special window trim was put in by the Factory Shoe Store, St. Paul street, St. Catharines, Ont., and attracted much attention. This establishment was started four years ago and has met with an encouraging measure of success. The firm, which is composed of L. Leveys and A. Leveys (the former of whom is seen standing in the doorway), has adopted wide-awake methods of doing business, and gets up some forcible advertising. The Factory Shoe Store not only handles footwear of all kinds, but makes a specialty of dress suit cases, hand bags and umbrellas and has a well-equipped hosiery department, which is found to be a valuable adjunct. The firm announces in connection with the store that no goods are exchanged or repaired on Saturdays and that it always lives up to its advertisements.

THE  
FACTORY  
SHOE STORE  
ST. CATHARINES,  
ONT.

A. E. Doig, who has been covering the Maritime Provinces for Gutta Percha and Rubber, Limited, Toronto, has taken the management of their new Halifax branch,

F. NOLINSKY, ELMIRA, ONT., MANAGER OF THE IDEAL SHOE COMPANY

No. 143 Granville street, the opening of which was made necessary by the great increase in the company's trade in the Maritime Provinces. A complete stock of Maltese Cross rubber footwear, tennis shoes, rubber heels and mechanical goods is carried in the new branch in Halifax.

The Edmonton Shoe and Leather Company, which has a plant at Manchester sub-division, out on the extreme

W. E. METZ, ELMIRA, ONT., SUPERINTENDENT OF THE IDEAL SHOE COMPANY

southern limits of Edmonton, suffered severe damage recently. The tannery was completely burned to the ground and it was only through the strenuous efforts of the firemen that the factory itself, an adjoining building, was saved. The origin of the fire is unknown. The estimated loss is \$11,000 on the building and plant and \$2,000 on the contents.

The employes of the Nursery Shoe Co., St. Thomas, Ont., have donated 30 pairs of socks for the 91st Battalion with a request that it be turned over to "B" Company, commanded by Major A. E. Medcalf, president of the company.

C. S. Sutherland, General Manager of the Amherst Boot and Shoe Co., Amherst, N.S., was in Toronto last week on his way west to Regina and other points.

The contract for the erection of the new factory of the Unique Shoe Company of Toronto, which is removing to Simcoe, Ont., has been awarded. Work will be pushed forward rapidly. The new factory will be 40 by 150 feet and two storeys high. It will be built of brick, mill construction, and there will be ample light on every side. It is expected that the Unique Shoe Co. will begin operations in Simcoe in a couple of months.

Lieut.-Col. F. C. McCordick, tanner of St. Catharines, Ont., who is connected with the 35th Battalion, has as-

LIEUT.-COL. F. C. MCCORDICK, ST. CATHARINES, ONT.

sumed temporary command of the First Canadian Training Brigade in England during the absence of Col. A. Smart on leave.

John F. Clark, of Clark Bros., Limited, St. Stephen, N.B., and R. L. Savage, eastern representative of the firm, recently returned after spending several days in Boston, New York and other shoe centres, looking into the latest ideas in foot toggery for fall wear. Mr. Clark reports that the favorite colors for fall will be dark brown in both kid and calf leathers, while there will also be navy blues and battleship grey shades presented to the trade. Shoes will be cut from 7½ to 8 inches high, with long vamp and plain toe, and liberal sprinkling of perforations. The new seamless button, and bal with stag vamp, promise to be decided favorites, the latter predominating. A number of shoes are being shown with patent vamps and buck tops in grey, field mouse and brown, while colored kid with brown buck tops will also be worn by smart dressers. Wood Louis heels, covered with materials to match the uppers, will also be a distinguishing characteristic. Vamps are generally from 3½ to 3¾ inches in length, and it is expected that a number of cloth top boots will also be brought out. Generally the styles will be smart, pretty and impressive, with the darker tones predominating, buck tops being leaders in many models.

### RETAIL SHOE BUSINESS IS ACTIVE

The condition of the retail shoe business in all parts of the Dominion is reported as exceptionally good and the summer trade has been ahead of that of previous years. Better prices have been obtained owing to the advanced cost in all lines of footwear. The only drawback is the difficulty in getting goods from the factories, many of which are handicapped owing to the fact that scores of employes have enlisted for foreign service. Several retailers find it a source of anxiety to secure the extra assistance required on Saturdays and have had to make use of inexperienced help. Notwithstanding these difficulties there is a feeling of optimism with regard to a splendid summer trade and the demand for white shoes was never as pronounced as at the present time. Women's high cuts in colored kid are still selling well and pumps and colonials are enjoying a large measure of favoritism. The men's business has also picked up in many centres and military dress boots have been moving in all places where there are battalions being recruited.

### THEY WILL VISIT BOSTON FAIR

Several touring parties are likely to leave Montreal for the Shoe and Leather Fair in Boston, aiming to reach there for Canadian Day, July 17th. Among those who hope to go down are W. V. Matthews, who is making up a party comprising superintendents and assistants of the various Ames-Holden-McCready factories. Paul Roy, W. A. Lane, Oliver Tetrault, Bob Fraser, Euthrope and Adelaar Guay and Bert Parker.

### WHAT SHOES HAVE TO STAND

People are constantly finding fault with the shoe manufacturer for supplying a poor quality of shoes, but sometimes when we see what shoes are called upon to stand, we wonder that they do so well, says the Maritime Merchant. We were in a city store one day recently, and a strapping big woman, estimated weight about 12 stone, came in to make a purchase. She selected a pair of high white kid turn button boots, size 5½. The boots went on all right, but they would not button, so before she took them she had the buttons

moved over a bit. After she went out, we said to the merchant, "Do you think those shoes will hold their shape?" "Hold their shape nothing," said he. "What do you expect when a great big woman crowds her weight into a delicate little pair of thin soled articles like those. But that is what they are bound to do," continued he, "and perhaps the shoe merchant is the last man who ought to make complaint. No doubt the sales are larger than they would be if women were as sensible as men in the matter of shoe purchasing."

### PALATIAL AND IMPOSING NEW BOOT SHOP

The new Walk-Over Boot Shop recently opened at 786 Granville St., Vancouver, by the McRobbie Shoe Co., is one of the most artistic and inviting footwear emporiums in Western Canada. The front embodies all the good points and attractiveness of the regulation Walk-Over exteriors in the cities where these well known shoe establishments are located. The accompanying picture shows that the front of McRobbie's Walk-Over Boot Shop is very similar to that of the Walk-Over Boot Shop in Toronto, and the one in Montreal. Previous to installing the new front, Mr. McRobbie took an extended trip through the leading cities of the east, and gained many valuable suggestions which he incorporated in the interior, fittings, appointments and facilities of his new establishment. The decorations are quiet and harmonious, while the interior is exceptionally well lighted. Full length mirrors add to the handsome and impressive character of the store, and on the mezzanine floor at the rear, are located the offices of the company. The McRobbie Shoe Co., formerly did business at 301 Hastings St. West, but decided to move up town and get right into the very heart of the mercantile district. The recessed entrance is handsomely tiled and the bulkheads of the windows is of Verde antique marble, while the supports are of copper. Prism glass, which forms the transom lights, sheds a flood of sunshine into the interior, and adds much to the beauty of the front. At the recent opening, the appearance of the store and the splendid new styles presented, created a decidedly favorable impression, and the McRobbie Shoe Co. was heartily congratulated.

*THE splendid new store of the McRobbie Shoe Co., 786 Granville St., Vancouver. The latest display facilities and artistic features are presented in this attractive entrance.*

I. Weingarden, of Windsor, Ont., has opened a second store in that city.

LaRose & Cousineau, shoe manufacturers, of Montreal, recently assigned.

H. W. Stark Co., Limited, shoe retailers, Winnipeg, recently suffered a loss by fire.

The Public Benefit Shoe Co., Limited, of Toronto, has been granted a charter. The capital stock is \$40,000, and among the incorporators are R. C. Milne, W. A. Draper, A. E. Prestridge, C. S. Freeman and Frank D. Smart.

Many friends of R. Foster Scott will congratulate him on his recent marriage to Miss Jeanette Beatrice, daughter of Mr. and Mrs. John McKinley, of Galt. The interesting event took place on June 20th at the home of the bride, 7 William street, Galt, Ont.

R. R. Macaulay, of Montreal, secretary of the Miner Rubber Co., was in Toronto last week on business.

N. M. Davidson, of Berlin, assistant treasurer of the Canadian Consolidated Felt Co., was in Toronto last week on business.

John Dunbar, of Scott-Chamberlain, Limited, London, spent a few days in Toronto last week on business.

William O'Brien, at one time a shoe merchant on Dundas street, London, Ont., was found dead in bed at the home of his son-in-law, T. J. Parkinson, 289 Ridout street south, in that city on June 23rd.

The Independent Button Fastener Machine Co., Inc., of Boston, Mass., who make automatic button attaching machines, and have established a wide connection in Canada, have opened an office at 5 Wellington street east, Toronto, where a full stock of their machines, supplies and parts will be carried. There is also a service station in connection with the office and all machines sold will be kept in repair for the first year, free of charge.

H. S. Chapman, who carried on a retail shoe business for three years in Clinton, Ont., has retired and joined the 216th (Bantam) Battalion, Toronto, for overseas service.

James A. Whatley, shoemaker, Dublin street, Peterborough, who has been ill, is able to resume business.

H. D. Wing, of the United Shoe Dealers, Parry Sound, spent a few days in Toronto last week on business.

A quiet wedding took place on June 14th at Campbellford, Ont., when Miss Alice D. Weston, daughter of F. W. Weston, president of the Weston Shoe Co., was married to Geo. W. Austen, of the editorial staff of the Mail and Empire, Toronto. Mr. Austen, who is a young man highly esteemed in newspaper circles, and bride have taken up their residence at 38 Dorval road, Toronto.

F. W. Knowlton, of Montreal, general manager of the United Shoe Machinery Co., of Canada, was in Toronto, Berlin, London, and other points recently, calling upon the trade.

Clayton E. Hurlbut, of the Hurlbut Co., Preston, has returned from a business visit to Rochester, New York, Boston and other shoe centres.

A meeting of the creditors of the Canadian Oak Leather Co., Limited, of Brantford and Woodstock, and also of Thornton's, Limited, dealers in hides and leather, Brantford and Woodstock, was held recently.

Geo. A. Blachford, of the Blachford Shoe Manufacturing Co., Toronto, recently returned from an extended visit to the principal shoe centres of the United States, where he picked up a number of style pointers, and the latest ideas in footwear. He states that anything that is pretty and in good taste will likely prove a favorite this fall. So far there appears

to be no outstanding characteristics marking the trend in women's footwear fashions, such as the colored cloth tops of a few months ago, the Gypsy button boot later, the high-cut kid bals of the present, etc. A variety of pleasing patterns and hues will be presented and manufacturers will try out several new ideas, but these will necessarily be restricted to what they are likely to procure in the open market, in the way of stock, colors, etc.

Geo. Thorne, 161½ Church street, Toronto, has installed a 22-foot model "N" repair outfit, with stitcher, supplied by the United Shoe Machinery Co.

Wm. H. Brimblecombe, who for several years was connected with the Murray Shoe Co., of London, where he occupied a responsible post, has joined the staff of the Blachford Shoe Manufacturing Co., Toronto, as quality man. He has had valuable experience in connection with the production of fine footwear, not only in London, but in other cities, and is well qualified for the new position which he has assumed.

Wm. Kilpatrick, late of the Montreal office, United Shoe Machinery Co., is now resident representative of the company in Berlin, succeeding Geo. Bott, who has joined the motor boat patrol in connection with the British naval service.

#### LEAVING THE GATE OPEN

L. M. Young, in speaking before the convention of the Retail Merchants of Manitoba, said:—

"It is demonstrated beyond all question of doubt, that the finest medium of advertising in the world to-day is the local newspaper, as it is not only sure of getting into the homes, but into the very hearts of the people. The local merchants who do not pay proper attention to their advertising are simply leaving the gate open for the mail order house to come in and harvest their crop. For, remember, if you are not getting into the home, the mail order catalogue is very much there."

#### NEWS BRIEFS FROM ST. JOHN

Lieutenant Percy J. Steel has returned from Halifax where he took a special machine gun course.

William O'Connor of the staff of Waterbury & Rising, St. John, N.B., received a letter June 20th from his brother Frank, who is with a Canadian unit in France, having returned to the front after recuperating from sirapnel wounds received while in action. At the time of writing his brother was well, although he stated that he had gone through a terrible engagement.

Harold W. Rising, secretary-treasurer of the firm of Waterbury & Rising, St. John, left a few days ago on an extended automobile tour through the Maritime Provinces. He combined business with pleasure and intended visiting all of the firm's customers with a view to stimulating trade. Mr. Rising left St. John and went to Digby and planned to travel along the South Shore to Halifax. From there he went through Annapolis Valley and back into New Brunswick.

PHILEAS FREDERICK, Auditor, Accountant, Collector and Adjustments, Insurance, Real Estate, Loans on First Mortgages, Joint Curator with Lefavre Gagnon "for Leather Business." Apply No. 79 Des Stigmates street, Quebec. Phone 3992.

PRESTON ONTARIO

# Lace Shoe Logic

You can't make any mistake in purchasing lace shoes at this time.

They have always been the most reliable staple and now they are the style, too, so they have everything to commend them.

Lace shoes mean quick fit, quick sales — no come-back for free repairs.

This is now more than ever a factor, for high cut boots never did look well when buttoned and every additional button is a problem in fitting. High cut laced shoes, on the contrary, are easy to fit; they look well. Laces form an adjustable fastening; they automatically meet and satisfy the many conditions in fitting which, in the case of buttons, require time, expert attention and repeated expense.

Lace shoes are not shelf warmers. They are in demand now; they will be even more so next season.

You know your trade, but if you have any doubts as to what to buy, lean towards lace shoes; it is the logical thing to do.

# FOOT TROUBLES

AND HOW TO RELIEVE THEM

*What can hit the shoe dealer and his salesman any stronger than those headlines? Every store, large and small, regardless of location, now have this question solved for them. After fifteen years of experience Dr. Scholl's method is a complete unit modified and ready for every progressive shoe dealer.*

## Difference in Feet

The reckless selling of arch supports is practically a thing of the past, thanks to the far-sightedness of the shoe trade. They realize that there is a vast difference in feet, in the sizes and shapes, dimensions, types, etc., so that it has become an established fact in their minds that to secure results in the fitting of arch supports and corrective appliances the individual foot must be considered. And so it has been brought down to two important facts.

**First—The appliances themselves must be anatomically constructed with an orthopedic object in mind.**

**Second—There must be a means of fitting and making the adjustments to the individual foot.**

Both have been accomplished and are ready for you to adapt. With Dr. Scholl's scientific appliances and devices for a purpose and a practical, established need of each and with Dr. Scholl's arch fitter and raw hide hammer, you will be able to relieve foot troubles. The entire proposition is one of service and profit. Over five thousand up-to-date shoe dealers are now using Dr. Scholl's method and are cashing in on the wonderful service. Dr. Scholl's travelers and educational demonstrators are always at the service of Scholl customers. Write to-day for full information.

# HOW TO DEAL WITH "KICKS," JUST AND UNJUST

**Persons Who Seek to Obtain Rebates and Exchanges From Retailers When They are Not Entitled to Consideration—Misrepresentations Regarding How Long Shoes Have Been Worn, When Bought and Even the Price Paid—What Merchants Say**

**T**HERE are grievances in all trades, troubles to overcome and difficulties to adjust. Some of these are small and others large and more perplexing to handle.

In an ordinary shoe stock there are many different lines. Live retailers have private marks whereby they can readily recognize all pairs that are carried in stock, even months after they have been disposed of. Others cannot. Some merchants are imposed upon by people demanding a refund or pointing out defects in shoes which were not bought at the store where they make complaint.

Again, in asking for a rebate or exchange on a pair that may, for some reason, have gone wrong, customers, without perhaps any intention of misrepresenting affairs, will assert that they have worn the shoes only a few days where it may have been several weeks. A few will even declare that the price paid was larger than was actually the case. It is well to guard against such imposition, wilful and otherwise, for women and even men frequently dislike a style after wearing a shoe for a short time and seek to secure another pair or obtain an allowance on various specious pretexts.

It is interesting to learn the experience and views of various representatives in the retail shoe trade on such a matter.

A. E. Matheson, of The Bootery, Victoria, B.C., says that they use their own uniform labels on all cartons and do a strictly cash business. Considerably more customers than in normal times seek to secure rebates, repairs free and misrepresent the period they have worn the shoes, the price paid, etc. In this respect women are the chief offenders. The desire to exchange shoes after making a purchase, is decreasing. In reference to the matter of refunding the purchase money to dissatisfied customers, Mr. Matheson says: "If the customer is reasonable and cannot be suited, we refund the money. We always endeavor to make an equitable adjustment if the shoes have proved defective."

## Do Not Allow any Impositions

John Affleck, proprietor of the Yale Shoe Store, Winnipeg, writes: "We do not have many customers trying to impose upon us for rebates or exchange and we adjust all complaints cheerfully, as we consider such a course a good advertisement. We, however, do not allow any impositions and find that we receive the most complaints from men. We do not find the desire to exchange shoes increasing, as boots properly fitted will please more surely than styles. We refund purchase money to dissatisfied customers and, with all complaints, like Buster Brown, we keep smiling."

Gross & Dawson, of Moncton, N.B., report that they have few complaints of any kind and what few they have come principally from women customers. They generally accept the statement of their patrons in whom they have confidence. They endeavor always to arrange matters satisfactorily in the case of complaining customers and either make an allowance, or give a fair exchange.

Farmer Bros., of Arnprior, Ont., say they never have much trouble with customers in the matter of rebates or exchanges. On most fine lines they have their own label put on the shoe either on the pull strap or inside on the lining. Purchase money, in the case of dissatisfied patrons, is cheerfully refunded and the firm endeavor to fit, suit and please all callers in the store before they go with their parcel and nearly always that is the last seen of them until they are wanting another pair of shoes.

J. A. Wiggett & Co., Sherbrooke, Que., have no private marks on the shoes they sell but they can distinguish them at all times. As the firm sell for one price only they can remember the figure on every shoe. "We seldom," they add, "have customers misrepresent the price but very frequently they stretch matters in reference to the length of time they have worn the shoes. Persons will say they have had them for four weeks only when, as a real fact, it is probably eight. Complaints are about equally divided between men and women. We refund purchase money to dissatisfied customers in case their grievance is a reasonable one. We find that the public is more unreasonable regarding footwear than any other part of their apparel."

The Vernon Shoe Store, of Vernon, B.C., observe that they have occasional complaints with parties misrepresenting the time that they have worn the shoes, the price paid, etc. The desire to exchange shoes is decreasing and if customers cannot be suited with other goods, the price is refunded by the store.

## Have Private Cost Code

Wallace Bros., Halifax, N.S., have a private cost code on all shoes handled by them and, in the case of complaints, find it is a common practice with most parties to misrepresent the length of time they have worn the goods. Women are more prone to make complaints than men. "We find that the desire to exchange shoes after they are bought is decreasing and we make a practice of carefully fitting all parties, but if a customer is dissatisfied after making a purchase we readily refund the money, as we believe that it pays every time," they conclude.

The Goodwin Shoe Co., Vancouver, B.C., say: "We have our own label on the shoes and on every pair sold we put the date in ink on the lining. Very few complaints come to hand but in case they do the patron is generally under the impression that he has had the footwear for a shorter time than is really the case. We handle men's shoes only, fit carefully and have very few exchanges. We refund the purchase price to all persons who are not satisfied just as cheerfully as we take the cash in the first instance. We run no sales and consequently have the same price for every man every day so that there is no misrepresentation, in the event of the shoes being brought back, regarding the figure that they were sold at."

## Stamped on Lining or Shank

J. T. Heath, of Orillia, Ont., thinks it is a good plan to have all shoes accepted and put in stock, either stamped on the shank or marked on the lining to identify them. Some customers seek to obtain rebates when they think the shoes have not given satisfactory wear, often from unjust causes, such as the footwear being burned, snagged, etc. "You ask, do we find parties misrepresenting matters regarding the length of time they have worn the shoes, the price paid, etc., and we may say yes. Only yesterday a man brought in a pair of ladies' five dollar patent button boots and said they had been worn for three weeks and then only on Sundays and special occasions. On investigating we found that the goods had been purchased three months ago. The desire to exchange shoes appears to be increasing. We generally refund purchase money to customers whom we cannot satisfy."

Gales & Co., Ottawa, have the stock number on the lining of all their shoes. They do not keep a record of those sold for cash but have a record of all charge sales.

They find that they have not many complaints but occasionally persons seek to procure rebates, exchanges, etc., and misrepresent matters regarding the time they have had the shoes and the price paid. The firm refund money to any customers who are not perfectly satisfied with their purchase, and do it willingly.

A. J. Gahagan, of Woodstock, Ont., states that they find persons who try to secure a rebate often misrepresent the time that they have worn the shoes, saying they have had them only a few days or weeks when it is often months. Women complain more than men about their footwear and, in case persons are not suited, money is refunded. "Our trade is mostly staple and there is very little reason to complain and when complaint is made often such grievances are justified," they declare.

#### Proper Fitting is Good Barrier

A Saskatoon firm report that they have all shoes stamped where possible "— Shoe" and give every customer a cash sales slip. The percentage of patrons who seek to obtain rebates or misrepresent the length of time that shoes have been worn, the price paid, etc., is not large and, without question, money is refunded in the event of the person not being pleased. The desire to exchange shoes is decreasing as, if attention is given to proper fitting, most people go away satisfied.

F. E. McLeod, of Lacombe, Alta., says that he has not found it necessary to have any private mark, as he holds very closely to his regular manufacturers. Whatever complaints are made on the part of the public are usually justified and since no cheap lines are handled, few grievances are heard and those made are generally genuine. "Yes, we refund money to dissatisfied persons, as we go on the principle that our customers are always right."

F. P. Carney, of Belleville, Ont., declares that he does not receive many complaints and that the number of persons who desire to exchange shoes is decreasing. "I refund," he adds, "the purchase price for goods returned in proper condition and for any good reason. On account of frequent changes in styles, particularly in women's fine shoes, I find it more difficult to please women than when styles did not change so often."

#### Makes Them Bring Slip Back

A. T. Marshall, of Stewarts, Limited, Renfrew, Ont., states a separate bill is made out for each sale, whether cash or charge, "and we insist on each customer keeping the bills. We are not troubled much with persons trying to secure rebates, free repairs or exchanges, but we do meet an occasional one who wants something for nothing. In case of people asking for a rebate, owing to the shoes not giving sufficient wear or from other cause, we ask them to return the bill showing the date of purchase, the amount paid, etc. We do not find parties wanting to exchange footwear after it has been worn except where it has proved defective. In the matter of refunding money in the case of not being satisfied, if the claim is a good one we will replace a pair of

boots free of charge. Each shoeman must have his own judgment in regard to handing back the cash. We find that there are a few people who will often want a pair of shoes altogether too fine for the wear they expect to give them. We had a case not long ago of a lady buying a pair of five-dollar patent leather light turn shoes and putting them on to go to work in a mill. Now, she had to travel two miles to her duties on cement sidewalks. I confess that I did not expect to see her using them that way, especially at first."

#### Shoemen Are Too Lenient

A leading shoe house in Hamilton say they have weeded out all lines of shoes during the twelve years that they have been in business, which do not give satisfaction and now handle only dependable ranges. They still have a few complaints in which persons returning the footwear will say they have worn the shoes only about half the length of time that they really have, and that they paid a higher price than they did. In some cases with dissatisfied customers purchase money is refunded, "but we always ask a chance to see if we cannot suit customers with some other styles. In dealing with all grievances discretion has to be used, coupled with knowledge of leather, the conditions under which the shoes have been worn, and the firm who have made the goods. Generally shoemen are too lenient in the matter of listening to the complaints of customers, but one gets to know such 'kickers' in time."

#### Believes in Goodness of Mankind

"We consider it a good policy to refund the money in case the shoes have not been soiled," writes a Calgary shoe firm. "By doing so we find that the customer who is dissatisfied will generally come back. We do not find many people trying to impose on us but, in case they return a pair, they usually think they have had the shoes a much shorter period than they really have. In stating the price they paid us for the goods they are generally correct and there is little imposition or misrepresentation on this score. It is impossible to lay down hard and fast rules in regard to dealing with and handling complaints generally. Each case must be considered on its merits. One must use good sense and judgment and never lose your temper or your patience, no matter how trying or exasperating the conditions. It does not do for the merchant and the customer to get angry at the same time, as then things are liable to be said, action taken and motives misconstrued.

"Keep cool, be pleasant and let your mind be an open one. Seek to do by others as you would be done by. Of course, there are fakirs and deadbeats in every line of business, both in front of and behind the counter, but each year there appears to be less and less of them. I am an optimist and believe that the world is growing better, that a higher sense of honor and confidence is prevailing, and although I now and then have my faith in human nature shattered and undermined, still I come up smiling.

"You will meet disagreeable, unjust and querulous people in all walks of life but the vast majority are clean-minded, fair, decent and honest. One encounters so many sunny-natured, genial, obliging, thoughtful and kind persons in business life that he can readily afford to forget the cranks, crooks and crabs. I do not think many customers will wilfully lie about the wear or condition of a shoe but are often under a wrong impression regarding the time they have had them, the service they have subjected them to, etc. It is like waiting for a street car. If one is not at hand or in sight you will hear persons say, 'Oh, I had to tarry a full quarter of an hour before a car came along,' when if they had consulted their watches they would find that not half that many minutes had elapsed. It is so easy to have our imagination play us false. But there is a lot of good in even the worst of us, which we should endeavor to bring out at all times."

#### FINDS IT A GOOD FRIEND

"I am sending you two years' subscription for the Shoe and Leather Journal. I may add that I appreciate your paper very much, and as long as I am connected with the shoe game, I want to be a reader of your paper."

Yours very truly,

J. A. Smith.

2321 Trafalgar Road, Vancouver.

# FIFTY-TWO YEARS AT IT AND STILL GOING STRONG

Handsome New Front and Extensive Interior Improvements Carried Out in the Haines Shoe House, Belleville, in Honor of the Long Business Career of the Proprietor—How Times Have Changed and Better Conditions Prevail All Over

J. J. HAINES, BELLEVILLE, ONT.

Resplendent with an attractive new front and an improved interior, in honor of his fifty-second anniversary in business, the shoe house of J. J. Haines, Belleville, Ont., has taken another step in advance. The store is practically a new one throughout. The front is a Kawneer copper one with prism glass over the windows which affords a flood of light. The work of installation was done by

P. G. Denike, of Belleville, and the front, with its recessed entrance, hardwood paneling and tiled flooring, is one of the best, neatest and most striking that could be desired.

"It is a real pleasure for people to shop in our store now," declared Mr. Haines, who this month is celebrating his fifty-second anniversary in business.

Just think of that, over half a century of continuous shoe service in the one stand and still going strong, for the walk and carriage of Mr. Haines indicate that he is good for many more years of active mercantile life.

It was June, 1864—three years before confederation—that Mr. Haines, who was then in his twenty-first year, came to Belleville and opened a retail branch for the A. & C. N. Ross Co., who made the "Penitentiary" shoe in Kingston, with convict labor. His father was a traveler for this firm for a number of years and, in order to widen operations, the Ross people decided to start branch stores. A few months later the concern sold out to Geo. Offord & Co., of Kingston, and returned to Auburn, N.Y., and Mr. Haines was given an opportunity to purchase the stock in the Belleville store.

## Develops System of Stores

To-day the Haines Shoe Houses are among the solid, progressive and most reliable institutions in the province,

being located not only in Belleville, the headquarters, but in Trenton, Napanee and Smith's Falls.

Mr. Haines, the founder, is, as already stated, still at his desk, enjoying good health and taking a cheerful outlook of affairs. He has always been an optimist, and ever looked on the pleasant side of matters. Naturally he has instituted a number of reforms in shoe retailing. Among these may be

AN INTERIOR VIEW OF THE HAINES SHOE HOUSE, BELLEVILLE

mentioned the strictly cash, strictly one-price system, the discontinuance of appropriation, the early closing movement, and the elimination of the repair branch from the retail stores. The firm have always been liberal users of printer's ink and have adopted many other modern methods of advertising until the Haines Shoe Houses are leaders in their line.

"Yes," continued Mr. Haines, "it is interesting to recall methods of over half a century ago and contrast them with

*THE impressive and handsome new front recently installed in the historic Haines Shoe House in Belleville, Ont.*

those of the present day. Retailing is now on a much higher plane and a more dignified calling than in the early sixties. Then, it was frequently the custom on the part of a patron to haggle over the price. The disposition to bicker seemed to be in everybody. If you said a shoe was \$3.00, possibly you would be offered \$2.50 and maybe \$2.75, and if you did not come down, the customer might walk out. I have known people to come back two or three times and make us an offer for a certain kind of a boot, which appealed to them very strongly, and if they purchased two or three pairs, why, they looked for a substantial reduction. It was not long, however, before we thoroughly convinced our customers that we had one price and one price alone, and we also eliminated the credit system, starting an entirely cash business about fifteen years ago.

#### Practice Got to be Farce

"Among other abuses that we have stopped is that of approbation. It continued to develop to such an extent that it finally became a farce. There was only one way to cure it, and that was to wipe it out altogether, which we did. Yes, I could give you many reminiscences of the trade. No one was thought to be a merchant half a century ago who did not put up heavy wooden shutters every night. You would think that certain stores were to be bombarded, or attacked by a mob. But the wooden shutters are a relic of the past and now we have handsome show case windows and display fixtures that tend to invite the attention and arouse the interest of the public at all times, rather than shut out the views of the store, which the old-time barriers did.

"We regarded the windows in those days as merely useful for letting in light. Now we believe them to be one of the greatest factors and forces in selling shoes, and have always endeavored to have as tasty, attractive and timely trims as it is possible to instal. I also remember, in the earlier days, the long-legged calf boots that were worn. They were regarded as the proper thing for every occasion, and in one lot we got as many as 900 or 1,000 pairs from Montreal, Brown and Childs being one of the leading makers.

#### Keeping Faith with Public

"Yes, times have certainly changed and changed for the better. Any success that I have met with in the shoe trade I attribute to keeping faith with the public, and to the hearty co-operation and support of my staff. We have always endeavored to let the people know that they could rely on what any member of our force said, or any statement made in our advertisements. Every special sale that we have conducted has always been a genuine one. We have endeavored to improve our service in every way, and to be courteous, prompt, attentive and considerate to the public.

"Fifty-two years of business life is a long time to look back over, but during the last fifteen particularly, improvements have been most marked. We always close at six o'clock, except on Saturday nights and believe that ten hours a day should be sufficient to satisfy anyone."

Another remarkable feature in connection with Mr. Haines' long career is that he has all along been doing business in the same stand. During that time the premises have been twice visited by fire and the proprietor suffered a heavy loss. But in each case the store was remodelled and the new front, just installed, makes the third radical alteration to the spacious and attractive footwear establishment."

#### WHY CHANGE OF HEEL MUST BE GRADUAL

"There is little use of any woman who has become accustomed to wearing the grotesque shoes of to-day to put on hygienic shoes without first having her feet properly straightened," asserts the father of scientific chiropody, Maurice J. Lewis, M.D., who for twenty-one years of ser-

vice as secretary of the New York State Board of Medical Examiners, gave up his position to found the New York School of Chiropody.

"I say any woman rather than any man because women are the chief offenders when it comes to wearing shoes that look well rather than those best suited to the shape of their foot," Dr. Lewis says. "A corn is merely a symptom denoting in most instances that one or more bones of the foot is out of alignment, if not actually displaced. Actual demonstrations have proved that a corn which has troubled a person for years can be entirely eradicated without the use of a knife or chemical by simply restoring the bones to their normal position. The toe must be straightened and strapped in position.

"This is a treatment that requires time, patience, skill and knowledge. Feet that are forced into shoes that have their toe point in the centre of the sole certainly will have the bones dislocated and be tortured with corns on the ends and on the tops of many of the toes. Nail folds, due to lateral pressure of the other toes, and painful ingrowing nails will be induced, while the great toe forced toward the centre of the foot will form a bunion at the joint.

"Much has been said both for and against wearing high heels. The fact of the matter is that high heels suit some feet and low heels others. The shoe should be selected that suits the foot. The trouble is that the manufacturers of shoes make every shoe with the same level and expect it to fit all arches, high or low. There is as much sense in such shoemaking as there would be in making one size of dresses and expect both large and small women to wear them. A normal arch may be one-fourth of an inch high and it is possible for it to be an inch and a half. Certainly such feet, the highest and the lowest, will suffer if forced to wear shoes of the same level.

"As the ordinary shoes take very little account of fitting the arches they create the need for artificial arch supports. The anterior transverse arch to be maintained should have a shoe sole that will fit up and into the arch. To do this the sole must be convex, not straight or concave. The flat or concave sole must eventually let the bones of the foot drop with the accompanying results of flat foot and corns. With the heel of the foot on a spool two or three inches high or a foot with high longitudinal arch encased in a heavy flat-soled shoe it is not unreasonable to expect the arches to weaken and often break down.

"A woman who has become accustomed to wearing high heels should not attempt to go at once to wearing shoes with low heels. If she does she will be troubled by a feeling as if she were falling backward and will suffer with cramps in the muscles of the calves or have pains in the soles of her feet or the joints of her toes. The reason for this is that some of her muscles have grown lax by disuse and others have stretched or contracted to fit the position forced on the foot by the high heels.

"Let a woman who has been for some time wearing high heels attempt to walk on the floor in her bare feet. You will notice that she begins by walking on her toes. The heel cord has become shortened and to put the foot flat on the floor causes pain.

"So before putting low heels on a woman who has become accustomed to wearing only high heels you must first restore the foot to normal conditions. The shortened tendons of the toes should be massaged and the toes should be forcibly fixed each day for a few minutes. The shortened heel cord should also be stretched and massaged, though care should be taken that the foot does not suffer by it. The foot should always be inverted when the heel cord is stretched, either by manual force or by suitable machinery or exercise. The heel of the shoe should gradually be lowered until finally the normal height required by the height of the arch and the shape of the foot is reached."

# HOW THE SHOE RETAILER CAN HELP THE JOBBER

Promptness in Meeting Obligations and Accepting Drafts Without Offering Flimsy Pretexts Would Keep Down Expenses and Avoid Delays and Misunderstandings  
—The Wholesale Footwear Merchant has His Troubles in Buying and Stocking

**“YES,** they think our life is a pleasant one, that because we are in the wholesale business, we make money in wholesale lots. It is peculiar the views that some people take of other people's affairs. Many a retail shoeman will admit that one of the greatest difficulties he has is buying wisely, conservatively and timely, and yet his stock amounts to only a few thousand dollars, whereas mine consists of several hundred thousand dollars,” declared a leading jobber the other day, when speaking of conditions in his business.

“Prices are going up, up, up all the time. We have to buy hundreds of pairs in various lines with increases ranging 25c. up to \$1.25, and we must carry a very heavy stock in order to meet emergency demands and to cater to our sorting trade. Some day the bottom will fall out of the present high prices—although I do not think it will be soon, and there is where our danger lies.

## Have to Exercise Caution

“We are liable to be caught with scores of thousands of dollars' worth of goods on our hands, and because of a decline in price, retailers will expect us to extend an immediate decrease, not taking into consideration the myriads of pairs that we will have on hand. So you see that the buying problem of the wholesaler is much intensified in his business to what it is in the retail line. He must have a representative and ample stock and yet take every precaution not to be loaded up when the slump comes. To preserve an even keel, as it were, and sail along under a fair breeze, without dashing on the unseen shoals of low prices, or listing with too heavy a cargo, requires a clear mind and a cool head.

“One of the worst features in connection with our business is the collection end. I would not say that we lose many dollars through bad accounts, for we watch our credits pretty closely, but we certainly have all kinds of troubles getting in the money. We will send out a statement to a retailer who has bought so many pairs—after the goods have been shipped, of course—telling him, if there is no error, to kindly accept a draft, which will be presented on such a date. Now, we do not hear from him, and the draft goes forward. He does not accept it, and back comes the document, and then we have to write inquiring about matters. This all means delay and there is the extra postage, the stamp on the draft, charge of the bank for collection, etc. We have to take up the whole matter again and the same expense is repeated.

## Poor Excuse Better Than None

“The reasons certain retailers give for not accepting the drafts are numerous and ingenious, such as being sick, out of town, did not know that you were in a hurry, was not in when the messenger called, or I have sent a couple of pairs back to you which I want you to make good. Now, very possibly these shoes have been sent after the draft has been presented, and such an excuse is flimsy, to say the least. A retailer will very frequently ask, after offering such pretexts as these, for fifteen or twenty days more in which to pay for the goods—without interest, of course—and in the meantime we are still out of our money. At the expiration of twenty days we send another draft along for collection, when it is possibly accepted and possibly not. Nearly one-half of

our customers seem to make it as difficult as possible for us to collect promptly and in accordance with our usual terms. We have written several letters where one should do, presented a draft at least twice, where once should answer, paid extra postage, extra war stamps and extra collection dues.

## Trust Should Not be One-Sided

“It is amusing to have certain of our customers say that the reason they did not accept the draft was on account of sending two or three pairs of shoes back to us, for which they want credit before they will honor the original call on their purse. This is refreshing; here we extend credit to the retailer to the extent of hundreds and hundreds of dollars, grant him so many days in which to pay his account, and yet he is not willing to trust us to make good two or three pairs—ten or twelve dollars worth at the most. The arrangement certainly seems a little unbalanced.

“Then again, certain customers will offer no excuses for not honoring drafts, and will not even answer letters. They give us all sorts of trouble—even when the statement and

Drawn by Mac Michael

FAIR ONE: "I'M AFRAID THESE LOUIS XV. HEELS ARE MUCH TOO HIGH FOR ME. PERHAPS YOU HAVE LOWER ONES—SAY ABOUT LOUIS X. WOULD DO, I THINK."

amount are correct and the goods up to the mark. I have merely outlined some of the troubles which the jobber faces to-day, and yet to hear some of the members of the trade talk about us you would think our life was one of 'beer and skittles,' to use a colloquial expression.

## Do as You Would be Done By

“I am certain that if some retail merchants stopped to consider the inconvenience and useless trouble they give to the wholesaler by thoughtlessness, delay or carelessness they would not continue the practice, but would follow the golden rule—doing by the jobber as they would wish that their private customers, who have been given credit, would do by them. A little reflection on the part of some offenders will surely arouse them to a sense of fairness and promptness in the matter of making business relations and transactions more agreeable and cheerful.”

### PICKING UP POINTERS, NO MATTER HOW BUSY

"No, I cannot come over and see your lines, I am not buying anything just now, and it is too early to place an order, declared a widely-known and old-established shoeman, when a traveler called upon him a few days ago.

"Well, I know," responded the traveler, "but I have some things which I think will be of interest to you, and although you may not give me an order, it will cost you nothing to look. We have the most representative presentations of snappy footwear that have ever been put out by our people, and I think it would well repay you to call over at my sample room if only for a short time."

"No, we are not interested in the slightest," remarked the merchant, offering some temporary excuse.

Thus does many a retailer lose an opportunity to familiarize himself with the shoe styles, market conditions, and the trend of trade generally. There may not be a great deal to learn from certain houses, but this was a firm that stands at the apex of the development of the industry in Canada, and sells the very best merchants.

PTE. GEORGE R. LOVELL, SON OF JAMES S. LOVELL, SHOE TRAVELER, TORONTO, WHO IS A MEMBER OF THE 74TH BATTALION AND IS NOW AT BRAMSHOTT, ENGLAND.

The attitude of indifference, or not buying anything, or full up, etc., has done service for many years, and often results to the detriment or disadvantage of the retailer.

"I tell you," remarked another shoeman, when discussing the incident, "I never refuse to look at a traveler's offerings, although I do not buy from one-third of those whose sample rooms I visit. But I pick up many timely pointers, establish good connections, learn much that is going on, and perhaps find the way opened up for doing business with some of these firms at a future day."

A traveler does not necessarily expect every man that enters his sample room will buy of him, any more than the canvasser for any proposition has reason to hope that all persons he calls upon will give him an order. Time may be a very valuable asset in the conduct of business, and no doubt is, but a traveler in many respects is the best friend of the retailer. He can give him suggestions and tips, information and data, that often come in very handy. The traveler should receive a friendly greeting, even if none of his lines are purchased. He likes to see the welcome sign hung out and reciprocates any kindness or consideration extended him.

Perhaps some one speaks up and says: "Oh, if I listened to the representations of the various men who call upon me,

and took time to glance over their samples, I would be neglecting my business, giving poor service to customers and losing valuable moments."

This is the interpretation which some men place upon their attention and movements, and to hear them talk you would think they are as rushed as Lord Kitchener, David Lloyd George, or even Sir Sam Hughes. It is the busy man who finds time, takes time and makes time. He opens every avenue for information and seeks to broaden his ideas, extend his acquaintances and develop his knowledge of shoes and styles. Generally he "noses around," to use a colloquial expression, to find out "who's who and what's what." He comes in contact with the best houses from which to buy, those who give the most expeditious service, the highest values and the best quality goods. He scans the horizon and peers into the future. He knows what is coming and is ready. He does not wait until everybody else stocks a thing before he places it on his shelves, and his attitude is one of preparedness—preparedness for bigger, better and broader business, larger profits and greater turn-over.

### A CAREER THAT IS WORTH WHILE

(See Front Cover)

An optimist in the most liberal interpretation of the term, a gentleman thoroughly acquainted with the operation of every machine in his factory, who has held important positions in the largest plants, both in the United States and Canada, and has made a signal success of his own business, is Mr. A. Brandon, managing director of the Brandon Shoe Co., Limited, of Brantford, Ont. He is well liked and well thought of not only by those who work under him but by his associates in the trade. For four years successively he has been elected Chairman of the Ontario Boot and Shoe Manufacturers' Association and he occupies a similar position in the Leather Manufacturers' Safety Association in connection with the operation of the Workmen's Compensation Act of the province.

His natal city is Glasgow, Scotland, where he spent some time in the shoemaking trade and, on coming to Canada as a husky, athletic youth he perfected his experience in extensive plants in Toronto, Rochester, Detroit and St. Louis. Taking charge of the shoe factory in Aylmer, Ont., some nine years ago, he organized the Brandon Shoe Co. One evening in October, 1909, the boiler in the town waterworks and lighting plant exploded, doing great damage and setting fire to the factory adjoining, which was completely consumed. Desiring a larger centre for operation Mr. Brandon then moved to Brantford, although pressed by the citizens of Aylmer to remain—a voluntary list of several thousand dollars being raised. He located in the thriving industrial city of Brantford, being offered no inducements except exemption from taxation for a term of years. The Brandon Shoe Co. surrendered its original charter and took out a new one, increasing the capital stock to \$100,000. A two-storey factory, 40 x 120 feet, was built with an output of four hundred pairs a day in men's welts. Within three years another storey was added and the building extended, making the present structure 60 x 180, with a capacity of one thousand pairs daily and the widely-known trade-marked shoes of "Brandon," "Monarch" and "Dr. Brandon" are now sold in every part of the Dominion. In 1913 Mr. Brandon inaugurated his "21-day service" in the matter of filling orders, which has proved immensely popular with the trade. Of quiet disposition, a tireless worker and splendid administrative capacity, Mr. Brandon has few hobbies, motor-ing and lawn bowling being his favorite pastimes. Although frequently pressed to enter the municipal arena, he has confined his civic activities to membership on the Collegiate Institute Board, although he takes a warm interest in every movement pertaining to the industrial advancement and welfare of the Telephone City.

# Stray Shots from Solomon

You are not the man you once were and certainly not the man you thought you would be five or ten years ago. You have lost your grip. You had a clear head for business, were as bright as a new dollar and as far-sighted in a deal as an eagle and as hopeful as a boy just fresh from school. Now you are an old "rag." You are living a day at a time and walking with a feeling of dread as to what may be before you. You have lost interest in your business, your family, your friends and, saddest of all, in yourself. Your obligations are indifferently met, your books are behind six months or more and you feel sometimes as though everything were going to the devil. And so it is. Listen! Do you think you can do any better at that game than thousands of men as good and better who have tried it? Don't you know that "None that go unto her return again, neither take they hold of the paths of life?" Can't you kick with your feet the bones of those who have traveled that same path before you? Do you not see the hell that yawns at your feet? You see it, but the awful spell is upon your soul and you are drawn irresistibly into the vortex. Make a break for liberty. At all costs cut yourself loose. Take your last chance. Get back to the "path of life."

o o o o

One reason why the millenium seems so far off at this twentieth century dawn is that most people have their hands so occupied that they cannot make even a left-handed effort to reach their less fortunate fellows.

Life has gotten to be such an eternal grab that, with both hands full, greedy getters snatch still at passing chances with their teeth. Saint and sinner seem to vie with each other in mad rush after the dollar until we can really spell creed with a "g." This feverish, ungodly thirst for gain is fast crushing out all the noble instincts of the race. Surely the whole of life is not the piling up of money or the making of a big name. The words of Solomon: "Better is a handful with quietness, than both hands full with travail and vexation of spirit," have a deeper meaning than simply illustrating the folly of individual accumulation at the expense of peace and happiness of mind. The curse of this age is the men with their hands, mouths, ears, stomachs, pockets and stockings so full of the product of their selfish getting that the widow's tears are unpitied, the orphan's plea unheard and the cry of the poor ascends to heaven against the inequality of conditions which makes possible such injustice. Woe to the man with hands so full that he cannot grip some poor sinking wretch or get in a body blow on some evil that threatens the common weal. We hardly know which is the worse, the man who sits down in a safe spot and enjoys his grafts "with quietness" while the 4.7 guns of the devil are pouring their hissing shrapnel or detonating lyddite into the quivering helpless masses around him, or the hog-eyed, pot-bellied scrub who gathers

the spoil amid the cries of the anguished and the groans of the dying and takes himself off to gloat over his success.

o o o o

He is a wise man who can say with Paul, "I have learned in whatsoever state I am therewith to be content." Now Paul did not sit down and expect to be spoon fed. There are some people who seem to take a great deal of comfort out of the promise "The Lord will provide," and they implicitly follow the injunction "take no thought for the morrow." These are the people who leave widows and orphans for which their relatives, friends and the community at large have to provide. There is a wide difference between contentment and shiftlessness. Paul was content to be wherever he found swing for his dauntless aim and his tireless energy. If you put him down in Asia or in Europe, in Jerusalem or Rome it was all the same so long as he could fulfil what he considered to be his great mission. To be content is to give oneself fully to occupying whatever sphere he is placed in. There is no happiness comparable to that which comes from the realization that we are occupying to the fullest our niche. There is a great deal of senseless striving after that which is only a disappointment and anxiety when it is attained. Says a Wise Man, "Give me neither poverty nor riches; feed me with the food that is needful for me; lest I be full, and deny Thee, and say, 'Who is the Lord?' or lest I be poor and steal and use profanely the name of my God." Being is better than getting. Learn to be content.

o o o o

There are men who would rather work a day than think a minute; and they live up to their convictions. That is why the poor are "always with us." You have only to see the way some people go about their work to understand why they never make any headway. The man who uses his head will come out ahead, whether his business be handling a shovel or managing a bank. Brains win every time, and Providence exercises little partiality in their bestowment. The trouble is not that people are without brains, but that they do not use what they have. It takes brains to shovel a ton of coal into a cellar in a quick, clean, satisfactory way, quite as much as it does to engineer a railroad. It is troublesome and often tiresome to think, but the reward is sure and satisfying. The thinker will accomplish more in a month than the plodder will in a year, if he add to his thinking industry. The wise man says "Much study is a weariness of the flesh" and it is through fear of this weariness that so many of us just amble along and trust to luck to bring things out on the right side. Let us weary the flesh a little this year. Do more studying and less floundering.

# Historic Quebec—Great Shoe Centre

QUEBEC, interesting historically and in many other ways, has an appeal to the sentiments of shoemen that has existed for many years. Contrary to the general opinion, Quebec is not the oldest shoe town in Canada, as shoes were manufactured in Montreal for many years before the first factory was opened in Quebec. It undoubtedly possesses the distinction of being the oldest tanning centre we have, for while that industry can be traced back a couple of hundred years, it is impossible to learn with accuracy just when the real tanning was done. Probably the North American Indians, who treated deerskin for moccasin making and other uses were the original tanners.

Anyone delving into the history of the shoe and leather industry in Quebec will be surprised at the number of names which have been identified with tanning and shoe manufacturing during several generations. There are many names too that are not any more than history to-day.

Bresse & Cote appear to have been the first to manufacture shoes on a large scale in Quebec, having opened their factory on Cote d'Abraham or Abraham Hill in 1867. They ran their factory a few months until the dissolution of partnership took place, Mr. Bresse continuing alone in a new factory on St. Paul street and Mr. Cote going to St. Hyacinthe to found the business which bears that name to-day. Mr. Bresse is the outstanding figure of early shoe manufacturing days. He built up a big business and became wealthy through it. He died rather suddenly in New York many years ago. His former partner, Mr. Cote, died a little over two years ago.

Meanwhile, a few months after Bresse & Cote began operating J. & J. Woodley commenced to manufacture. This was another concern that contributed a great deal to the early history of the

trade. In 1870 J. B. Richard commenced in what was then known as St. John suburb, soon to be followed by Binet & Laroche and Paul Couture. In 1871 the Woodley factory was turning out as many as 2,000 pairs of shoes per day, doing quite a business in the old-time prunella shoes for women, some styles retailing as low as 60c. and 70c. In 1871 O. Migner entered the field and five years later built the factory at present occupied by Lagace & Lepinay. At this time we get in touch with the first of the factories which have continued to exist. John Ritchie who had been for some years identified with the Woodley factory assumed a partnership interest in the business in 1876, and the concern was run under his name. Mr. Ritchie is the doyen of the shoe manufacturing industry in Quebec to-day and he is always looked upon as one of the most substantial men in the trade.

The Marsh factory was established by the late Wm. A. Marsh in 1880, the firm name being Marsh & Polley and their factory that at present occupied by O. Goulet. Four years later Mr. Marsh took over the business himself and occupied new premises, first renting the factory on the site of the present building, which was subsequently purchased and enlarged. In the early 90's and toward the beginning of the century many of the present day factories were started, including those of Luc Routier, Tourigny & Marois, J. M. Stobo, O. Goulet, Gale Bros., and others.

Referring to the tanners, in 1870 P. Cloutier, the father of J. A. Cloutier, who conducts the business to-day, was probably the biggest leather man in the business. Other outstanding figures were Germain, Turgeon, Poliquin, Richardson, Labreque, Rochette, Nazaire Fortier, who is still in business and began in 1873, while Lucien Borne inaugurated

ON THE LEFT IS A VIEW OF ST. VALIER ST., QUEBEC, THE HEART OF THE SHOE MANUFACTURING CENTRE, SHOWING ON THE RIGHT, MARSH, U. S. M. CO. AND RITCHIE PREMISES AND ON THE LEFT A SECTION OF TOURIGNY & MAROIS' NEW FACTORY. IN THE CENTRE VIEW IS PRESENTED COTE D' ABRAHAM, WHERE THE FIRST SHOE MANUFACTURING WAS DONE IN THE ANCIENT CAPITAL. ON THE RIGHT IS ANOTHER VIEW OF ST. VALIER ST., SHOWING U. S. M. CO., RITCHIE AND GALES ON RIGHT, LUCIEN BORNE'S SALES OFFICE ON THE LEFT WHERE AUTO IS, WITH THE TALLY-HO AND COMFORT SHOE CO.'S OFFICE UPSTAIRS.

the present business in 1871. Most of the leather tanned in Quebec in the early days was shipped to Montreal but with the growth of the shoe manufacturing industry in their city tanners were able to build up a business with their own manufacturers.

There are twenty-three shoe factories in Quebec and the annual pay roll amounts to two million dollars. The number employed in the industry in Quebec is 4,000 and the production of shoes amounts to eight million dollars annually. St. Valier street is the heart of the shoe and leather centre of Quebec. Practically all of these industries are in St. Rochs

and St. Sauveur. St. Valier street was first a leather thoroughfare, but there are more shoe factories than tanning establishments on it to-day. The boot and shoe manufacturers of Quebec have an association of which J. S. Langlois, a lifelong shoeman, is secretary. Mr. Langlois began business as a retail shoeman in 1876, having a store on St. Joseph street. Fifteen years later he commenced manufacturing. Being in that field for many years, he has a thorough knowledge of all branches of the shoe business and an acquaintance which covers all of the trade in Quebec, so that he is an ideal man for the position he fills.

#### J. A. Scott

Surviving nearly a score of wholesale leather merchants who were familiar firms to the trade of Quebec and considered as fixtures on St. Valier

J. A. SCOTT, QUEBEC

street, J. A. Scott now occupies a warehouse twice the size of that in which the business was begun. The increased size of the warehouse is mentioned simply to indicate the expansion of his business,

which is conducted to-day on premises 130 by 40 by four stories. Mr. Scott secured his first experience with the old time firm of O. L. Richardson, established back in 1825, being with them for nine years. He was appointed agent for the Anglo-Canadian Leather Company, as it is known to-day, in 1893, and has continued to represent them. Eight years ago he extended his activities so as to supply the trade with upper leathers and shoe manufacturers' findings, and four years ago he opened a Montreal warehouse. Mr. Scott is one of the best known men in the shoe trade of the Ancient Capital, and his dealings with his customers are made very pleasant by the mutual esteem which exists.

#### Lagacé & Lépinay

This firm, established so recently as June, 1914, has only lately completed its removal to the large factory on St. Anselme street, 180 x 72 x 4 storeys, which enables them to reach an output of 12,000 pairs of shoes a week. This is a considerable increase over the original production of 600 pairs a week, attained in the St. Valcir street factory, where they had two floors at their disposal. Later they occupied the whole building. Men's, boys', youths' and little gents' McKays and Standard screws are made by the company. The two partners make an excellent team. J. P. Lagacé was for seventeen years connected with the Ritchie Company and knows shoes from the cutting room to the shipping department, while Mr. Lépinay has had wide experience along financial lines. The former looks after production and the latter attends to the office and selling ends. Their shoes are sold through jobbers exclusively.

### John Ritchie Co., Limited

John Ritchie is the doyen of the shoe manufacturers in Quebec, and it is safe to say that no firm is more widely or favorably known in Canadian shoe circles than his. Since 1876, when he founded it, Mr. Ritchie has been steadily developing the business, which is to-day one of the largest in the Dominion. Until a couple of years ago, Mr. Ritchie

JOHN RITCHIE, QUEBEC

took a very active interest in the affairs of the company but latterly, while remaining president of the company, he has turned over the executive work to W. P. Francis, vice-president and J. E. Warrington, treasurer, both of whom are continuing the policies of progress which are responsible for the success of the house. They are specializing in men's

J. E. WARRINGTON, QUEBEC

and women's Goodyear welts, and the factory has grown from a rented portion of a building to a plant covering a ground area of 25,000 square feet, with a manufacturing floor space of 54,000 square feet.

Probably no factory on the continent is more carefully laid out or more scientifically conducted.

Their capacity is 2,200 pairs a day, and the business on hand is such that they cannot turn out the goods on order within the working day.

### Tourigny & Marois

Tourigny & Marois operate one of the largest shoe factories in Canada, having in March, 1915, moved into the large, modern plant built on plans specially prepared by Mr. Marois, who has made a lifelong study of scientific methods as applied to shoe manufacturing. The new factory contains 180,000 square feet of floor space, being six storeys high, and laid out so that the work in process never doubles back. It has a capacity of 5,000 pairs a day. Always selling to the jobbers, exclusively, Mr. Marois found himself in a position to give exceptional service in the enlarged plant and since

ALFRED MAROIS, JR., QUEBEC

moving into it has been able to ship shoes ten days after receipt of order, something which had placed him in a strong position with the jobbing trade. The firm specializes on a medium line of welts, McKays and Standard screw, in goat, calf and kip. Mr. Marois left W. H. Polley in 1899, after 14 years experience, latterly as superintendent, to engage in business himself, in partnership with Paul Tourigny, M.P.P. Mr. Marois bought out his partner in 1912, since which time he has conducted the business alone. Although the growth of his own enterprise has kept him busy, yet he has had time to become associated with other enterprises. He is interested in the Victoriaville Furniture Company, the Victoriaville Clothing Company and other companies. He is vice-president of the Quebec Boot and Shoe Manufacturers' Association.

Visitors to the Tourigny & Marois factory are invariably struck by the sumptuous manner in which the offices and sample rooms are finished and furnished. The ceilings are beamed, the wood used

in them and the walls being California redwood, and the other fittings are oak. Mr. Marois' private office is a dream of comfort, yet a practical workplace. There are no finer offices on the continent. Mr. Marois' son, Alfred, jr., is associated with him in the business, being in the cost department.

#### Lucien Borne

L. H. Borne, in charge of sales and the city branch of Lucien Borne, Quebec, states that at the present time Quebec is supplying more than fifty per cent. of the upper leather being cut in Canada. This is a large statement to make, but it gives one an idea of the importance of the tanning industry in this centre, one of the oldest firms engaged in the business being this one. Founded in 1871, it was a pioneer house and one of the first tanneries to employ chrome tannage for goatskins and calfskins. The tannery at Limoilou has been growing every year and the scope of the sales department has been enlarged, and it is turning out to-day 200 dozen Quebec kid, 300 dozen glazed kid, and 200 dozen chrome sheepskins each week. Quebec kid is a new line introduced but a few months ago to replace medium-priced goatskins which have practically gone off the market since the first of the year. The founder of the business is still hale and hearty, though he leaves the active management to his two sons, Joseph, in charge of manufacturing, and Lucien H., who handles sales and looks after the Quebec store.

#### Max Clement & Sons

It is over thirty years since the founding of the business of Max Clement & Fils, tanners, Quebec. The founder, Mr. Max Clement, was the father of the present sole owners, Messrs Oscar and Omer Clement. Mr. Clement, sr., was the first tanner in Quebec to split leather, using the belt knife machine, after learning how to operate it in the old time Robson & Lochrie tannery at Oshawa. Their output to-day is larger than ever before and consists chiefly of chrome tannage in kips and horsehides, in dull, gunmetal and box kip finishes. Besides a full range of samples in bark tannage is shown. The tannery is located at 224-228 St. Helene street, Quebec, in the heart of the shoe manufacturing section and branch stores are maintained at 214 Lemoine street, Montreal. Mr. Oscar Clement keeps very closely in touch with the firm's customers in all parts of Canada.

#### Lamontagne, Racine & Co.

One of the busiest factories selling supplies to the manufacturers is that of Lamontagne, Racine & Co., Quebec. The members of this firm are J. A. Lamontagne, Aurele Lamontagne and Louis Racine. The business was established in the old St. Pierre factory, which it soon outgrew, making it necessary to remove to the present commodious quarters where the most up-to-date machinery is installed and every facility given for the production of their goods expeditiously and satisfactorily. The factory

THE HANDSOME PRIVATE OFFICE OF A. E. MAROIS, QUEBEC

These two illustrations indicate the growth of our business since its establishment in 1914. Then we occupied the two upper floors of the building shown below and made 600 pairs of shoes a week. Now we occupy the above factory and can make 12,000 pairs a week.

has a daily capacity of 12,000 pairs of counters and 600 sheets of insoling as well as 3,000 pairs of box toes and the business booked by the company keeps the staff busy shipping to all parts of Canada. The principals of the firm are practical men who know their business from beginning to end, so that it is not surprising that they should be able to make the class of lines most wanted by manufacturers.

#### J. E. Samson, Enrg.

Specializing on heavy staple shoes in Standard screws to sell to merchants wanting a popular-

J. E. SAMSON, QUEBEC

priced, everyday shoe, this firm has built up a strong connection with jobbers. They make a full

line of Standard screws and McKays, of course, but Mr. Samson believes in specialization, and this is the result. He makes, as well, a hockey shoe of his own patent that is widely known. Before starting this business, with J. A. Cloutier, the hide man, as a silent partner, Mr. Samson was for seven years with the old Rock Shoe Co., and before that learned the business with J. H. Laroche, Thos. Duchaine and other manufacturers who were good teachers. The firm has been remarkably successful for one established only two years and as a result doubled the factory capacity, its premises now extending through from Arago street to St. Valier street.

#### Nazaire Fortier & Company

Nazaire Fortier founded the business which bears his name in 1873 and he has been building up a reputation as a tanner ever since that time. For a great many years he worked alone, assuming all responsibilities of the business, but it grew to such an extent that in 1911 he formed a partnership with Roméo Giguère and his son Henri Fortier, under the firm name of Nazaire Fortier & Co., since which time the business has grown to the point that for over a year the tannery has been running day and night to supply Canadian trade.

Mr. Giguère has been with the firm for nearly twenty years, and looks after finances, office work and sales department, while Mr. Fortier devotes his time to the manufacturing, being assisted by his son, who is learning the business from start to finish. Chrome and combination tannage upper leathers are produced in the plant on St. Valier street, which has more than doubled its size since the business started. Two years ago the firm introduced into Canada doped split leather, and their gunmetal finish side leather is known as being one of the best made.

Mr. Fortier finds time to devote to other interests besides his business, and among other things is a director of La Banque Nationale.

INQUIRIES SOLICITED

ESTABLISHED 1873

### The William A. Marsh Co., Limited

One of the most widely known shoe factories in Canada is that of Marsh in Quebec. Its founder, the late Wm. A. Marsh, who died July 23rd, 1914,

FRED. W. MARSH, QUEBEC

was one of those sterling characters old-fashioned enough to believe that a manufacturer had obligations other than making money. He held to the

DAVID MARSH, QUEBEC

belief that a good reputation oftentimes was worth a great deal more than gold, so he made sure that Marsh shoes were made as good shoes are when honest value is given. The result is that the name

Marsh stands for a great deal in Canadian shoedom. The big Quebec factory turns out 3,000 pairs of shoes a day in men's and women's fine welts and McKays and is always busy. The distribution is secured through jobbers exclusively and no firm has a stronger connection with the wholesalers or does a more consistently large business with them. The late Mr. Marsh was fortunate in having three sons to take up his work where he left off. Fred. W., president, David and Wm. H. who are making a name for themselves as members of the progressive younger group of shoemen who have come to the fore in the last three years. They are fortunate in having the advice and co-operation of R. Stanley, for many years with the organization, and secretary-treasurer of the company.

### Pierre Blouin, Reg'd.

Although this concern is a comparatively new one, succeeding the old business of F. Blouin, for 25 years in the boot, shoe and findings line, it is making good progress. Pierre Blouin was a member

PIERRE BLOUIN, QUEBEC

of the old company and has a practical knowledge of all branches of the business and a wide connection throughout Canada, and as manufacturers of shoe findings, and dealers in upper leathers of all kinds produced by tanneries controlled by the firm they are able to give the shoe manufacturers a complete service. Mr. Blouin is still a young man and should be able to build up a big business in his chosen line.

### St. Lawrence Last Co.

A. Langlois, who is the proprietor of the St. Lawrence Last Co., Quebec, took over that plant almost a year ago and since that time has been most successful in turning out lasts to the satisfaction of a growing clientele. The business was formerly conducted as the Dominion Last Co. and

**A. LANGLOIS, Proprietor**

their plant on St. Helene street is widely known to the shoe manufacturers. Mr. Langlois is putting in considerable new machinery in the course of the coming year so as to make the plant up-to-date in every respect. He is fortunate in having as foreman Fred. Fossey who has had many years' experience in the business.

**Lachance & Tanguay**

Cleophas Lachance and Jos. Tanguay, who conduct a shoe factory on Bigaouette street, Quebec,

CLEOPHAS LACHANCE, QUEBEC

have shown a steady growth since November, 1899, when they commenced business on Crown street, under the name of Brunet, Lachance & Tan-

ALF. DUPERE, QUEBEC

guay. Eleven years ago the first mentioned retired from the business. Their factory is 140 x 40 x 3 storeys high and they go in for McKays and Standard Screws in medium and fine grades. Mr. Lachance is the inventor of a number of specialties which are known to the shoe trade of the Dominion.

**Richard Freres**

Established in 1901, Richard Freres represent in Quebec district some of the best leather manufacturers in Canada. Their agencies include such firms as Beardmore & Co., Davis Leather Co., Clarke & Clarke, Duclos & Payan. Besides representing these firms they do a considerable jobbing business in leather and findings. The partners are Arthur J. Richard and Wilbrod Richard.

**Dupere & Garant**

An enterprising firm that is doing an increasingly large business is Dupere & Garant, who were established in 1910. They carry a complete line for manufacturers of such needs as bows, threads, inks, varnishes and leather board, and they have developed a considerable connection with the cobblers, through having some good agencies covering this trade. Alf. Dupere and Alf. Garant are both hustlers and as they are selling the right class of merchandise they are well received in all the factories.

**J. M. Stobo**

J. M. Stobo, who manufactures a complete line of fine and medium shoes, welts, McKays and Standard screws for the jobber, has been in business fifteen years, having commenced on his own account in 1901, at the corner of Joseph and Dorchester streets. In 1905 he removed to the present larger quarters, where he has been engaged in building an annually increasing business for 11 years. Mr. Stobo is a thorough-going shoeman, having received his train-

ALF. GARANT, QUEBEC

ing under such old timers as J. E. Woodley, Polley, Harvey & VanNorman, and others. His first position was in the cutting room, in 1884, but later he got into the storeroom, when that meant getting into the real heart of the business. From then on he went through the mill to the point where he felt competent to inaugurate his own business. His success has justified his judgment.

#### Gale Bros., Limited

This firm was established in 1905 and has met with wonderful success in the manufacture of high-grade lines of McKays for women, misses and chil-

H. V. GALE, QUEBEC

dren. They are situated in a commodious four-storey building with an area of some 12,000 square feet. Their output is 10,000 pairs a week. Gale Bros. are getting out for the present spring season a full range of ladies', sporting boots and shoes. They are also putting in a line of pump lasts. In conversation with a representative of the *SHOE AND LEATHER JOURNAL*, Mr. Herbert V. Gale said that business was never better with them. The man-

agement of the firm is in charge of Mr. Herbert V. Gale, president, Mr. B. Gale, vice-president, and they have associated with them Mr. W. L. Francis as sales manager and Mr. John V. Hatch, superintendent.

#### O. Goulet

O. Goulet is one of the veterans of Canadian shoe manufacturing, and no history of the industry in Quebec would be complete unless it gave him the credit he deserves for "sticking to his last," in the proverbial shoemaker fashion, as he has done. His connection with the shoe business dates from 1885, when he entered the employ of the late G. Bresse. But he was not long an employee, for in 1892 he became a manufacturer, having as a partner V. Garant, who remained with him for 17 years, when the partnership was dissolved. Mr. Goulet continued alone. He has been on St. Valier street all of the time except the first six years, when the factory was on Churest street. During all these years the firm has made medium grade peg, McKay, Good-year welt and Standard screw shoes for the jobbing trade.

#### Marier & Trudel

Marier & Trudel, Limited, are one of the younger firms who have made splendid progress since commencing business in 1910. They make a general line of medium-priced men's, boys', youths', little gents' and women's McKays and Standard screws. Their factory is situated on the corner of Colomb and Nelson streets, and has a capacity of over 70 cases a week. They sell to the jobbing trade only.

#### Joseph Tanguay

Joseph Tanguay, Quebec, is one of the latest Quebec shoe men to decide to become a manufacturer and has secured spacious premises of over 10,000 square feet on St. Dominique street, where he will manufacture a complete line of Standard screws and McKays, men's, boys', youths', little gents', women's and children's and infants' boots and shoes, as well as boots for all kinds of sports, and children's sandals. Mr. Tanguay has spent practically all his life in the shoe business, having been with the Slater Shoe Co., Montreal, and more recently with the Rock Shoe Co., Quebec. He has associated with him Mr. J. C. Leclerc as

factory superintendent, who is also well known to the trade, having formerly been with O. Goulet.

JOS. TANQUAY, QUEBEC

It is the firm's intention to go direct to the jobbing trade.

**M. Louis Beaubien, Enrg.**

This firm, composed of Louis Beaubien and Isiae Beaubien, are located on St. Valier street, at the corner of Boulevard Langelier. They do a large

LOUIS BEAUBIEN, QUEBEC

jobbing business and have a staff of five travelers covering the provinces of Quebec and New Brunswick. A retail store was the first venture of Louis

Beaubien in the shoe business and this was established in 1886. Four years later he branched out in the wholesale line and has built up a big connection and carries a general line of footwear.

**Luc Routier**

Luc Routier, who is one of the most genial and best known shoe manufacturers in the ancient capital, took charge as proprietor of the factory which bears his name in 1903, having for many years been engaged in the shoe industry as foreman and superintendent. His factory is equipped with the latest and most up-to-date machinery for the manufacture of medium grade McKays and Standard

ISIAE BEAUBIEN, QUEBEC

screws for men, boys, youths and little gents. Mr. Routier has associated with him as sales manager H. R. List, who is fast becoming one of the prominent shoe men of Quebec city.

**Jobin Limited**

Jobin, Limited, was founded in 1889 by Jobin & Rochette. In May, 1911, Mr. Elie Jobin took over the business, and is at present the head of the firm. The factory occupies a four-storey building 100 x 80 feet. They sell their entire output to the retail trade, which consists of Goodyear welts, McKays, Standard screws and pegged shoes, also all kinds of shoes for country trade, both heavy and light, for men, women, girls, youths, boys and children. While they do business in all parts of Canada their trade has lately been mostly confined to the East.

**Duchaine Shoe**

Duchaine Shoe, Quebec, will shortly move to larger and more spacious premises situated at 29 Renaud avenue. They are district selling agents for the North British Rubber Co., Limited, Edinburgh, Scotland, as well as carrying a general line of boots and shoes.

### J. H. Larochelle & Fils

J. H. Larochelle & Fils began business in 1892. They manufacture principally heavy pegged boots. This line is well-known throughout the Dominion. They also manufacture other lines, including the Lion brand which is deservedly becoming more popular daily.

### L. Duchaine

This business was established in 1896 and produces medium grade McKays for men, women, youths and infants. The factory is a three-storey building on St. Valier street, 60 x 165 feet. Mr. Duchaine has always taken an active interest in everything pertaining to the shoe industry in Quebec City.

### Edgar Clement

Edgar Clement, tanners, have recently enlarged their plant to double its former capacity. They have now a spacious four-storey building with some 18,000 square feet. They specialize in gunmetal and black chrome sides.

### J. B. Drolet & Co.

J. B. Drolet & Co., Limited, specialize in men's and women's Goodyear welts, as well as men's, women's, boys' and youths' McKays. They go to the retail trade and have seven travelers covering Canada for them. Unicus and Long Life are two of their branded lines that they have been very successful with. J. B. Drolet, jr., is president of the firm and has associated with him J. Chouinard as vice-president and general manager.

### Jos. Guay & Fils

The foundation of the present tanning business of this firm was laid in 1860 by Messrs. Julien & Guay. When Mr. Julien died Jos. Guay, sr., continued the business, having associated with him the present head of the firm, Louis Guay, under the name of Jos. Guay & Fils. The present factory,

TANNERY OF JOS. GUAY & FILS, QUEBEC

which was built in 1909, is 40 x 120 feet and has all the up-to-date machinery necessary to produce chrome patent side leather, gunmetal box and dull kip, as well as colored leather. Their output is

about 600 sides a week. Mr. Louis Guay is president. He and his brother, Omer J. Guay, comprise the personnel of the firm.

### Edgar A. Shee

One of the live wires in the trade in the Ancient Capital is Edgar A. Shee, 611 St. Valier street. He is the sales manager and distributing agent for Quebec city and district for the Robson Leather Co., of Oshawa, Ont., and also represents the Collis Leather Co., Aurora, Ont., in Quebec city. Mr. Shee deals in hides and pelts and is a wholesaler of upper leather. The firm was established by his uncle, M. M. Lynch, in 1885, who was the representative of Barbour's Linen Threads up to the time of the formation of the combine among thread manufacturers. Mr. Shee took over the business at the death of his uncle, Mr. Lynch, in 1909, and reports matters at present as being in a flourishing condition.

### Shoeman is an Alert Officer

O. N. Shink, who has been in the retail shoe business in Quebec for the last twenty-four years and is among the most successful merchants, was

O. N. SHINK

recently elected secretary of the Retail Merchants' Association of that city. He has had a thorough experience in the trade, being for several years a leather cutter and at one time connected with the Dominion Shoe Co. as a shareholder. Later he was a foreman for five years with the Wm. A. Marsh Co., which position he left to engage in the retail shoe line. He has always been an ardent supporter of association work among the trade by whom he is well liked and well spoken of.

**NEWSY HAPPENINGS FROM OLD QUEBEC**

T. X. Mineau, representing the F. F. Dalley Co., of Canada, Limited, Montreal; W. D. Fox, of the Lion Polish Co., Toronto; H. Taylor, of G. J. Trudeau Co., Limited, Montreal; W. L. Bolster, of the Columbia Counter Co., Boston; J. E. Matheson, of United Awl and Needle Co., West Medway, Mass.; J. G. A. Pontbriaud, of Parker, Irwin, Limited, Montreal, and L. S. Odell, of Montreal, were in town recently on business.

J. E. Warrington, of the John Ritchie Co., has returned from a successful fishing trip.

Lucien Borne has returned after a short holiday trip to Lake Edward, where his time was passed in fishing and hunting. He has a new six-cylinder Studebaker car.

John Ritchie, of the John Ritchie Co., is spending the summer at Orleans, which is his usual place of recreation during the hot months.

Alfred Marois, jr., recently spent a few days in Toronto.

J. E. Samson, of J. E. Samson, Enrg., is now occupying his enlarged and improved factory.

Edgar Clement was out of town recently enjoying a short holiday.

Manufacturers in Quebec are exceptionally busy, some having orders for six months ahead. Dongola kid is exceedingly scarce, many firms having ceased to take orders for same. Sole leather has taken a jump of four cents a pound, and some tanners venture the opinion that the price of leather this coming fall will be the highest ever known.

The W. A. Marsh Co. have installed in their building a time-keeper clock. They are also doing some inside repairs, as well as a large amount of renovating and painting.

Louis Beaubien, wholesale shoe dealers, have completed the repairs to their premises by having a cement sidewalk laid around the building.

Shoe retailers in Quebec are all busy and collections are good. The outlook for summer trade is considered satisfactory.

R. Richard, Les Saules, Que., has started to make a leather board and is busy at present in the manufacture of shanks. He has made some repairs to his premises, including a floodgate, and expects to double capacity in the near future.

**RUBBER COMPANY REMOVES TO GRANBY**

The F. S. Carr Rubber Company of Canada, Limited, have removed their factory and office equipment into the

premises purchased from Walpole Rubber Co., Limited, at Granby, Que., consisting of a five-storey brick main factory building and a brick cement mixing building complete in every detail, with automatic sprinklers, firewall, doors, etc.

The F. S. Carr Rubber Company were formerly located at Tilbury, Ont., where they rapidly outgrew their space and found it necessary to seek larger quarters.

Their present line consists of the well-known Neverleek auto fabrics, of which they are the largest producers in the world and their "Victor" rubber heel, which has taken the shoe trade by storm. They are well known as proofers of Mackintosh fabrics for the trade, as well as making a complete line of rubber sheetings, hospital supplies, druggists' sundries, carriage robes and top materials, ground sheets, shoe factory supplies, to which may be added a complete line of mechanical rubber goods.

The officers of the company are as follows: Frederick S. Carr, Boston, Mass., president; W. B. Rood, Boston, Mass., vice-president; T. H. Dumper, Boston, Mass., treasurer; R. S. Cummings, Boston, Mass., secretary; J. A. Duval, Framingham, Mass., factory manager; P. G. Dunham, Granby, Que., general manager for Canada.

**CANADA TRUNK & BAG LIMITED**

This name, although a new one to the trunk and leather industry of Canada, does not represent a new company or organization. Owing to the decision of the citizens of Berlin to make a change in the title of the city the above firm has decided to change its title to one which is distinctly Canadian, and will herewith be known as Canada Trunk and Bag, Limited.

The company began to manufacture suit cases and club bags in March, 1912, beginning in the third storey of a large building situated in Berlin. Owing to the rapid increase in business it soon outgrew these small quarters, and in 1913 erected a large and commodious building, well appointed and arranged to bring the cost of manufacturing down to a minimum and make working conditions healthful and pleasant. Particular stress was laid on the fireproof construction, and that workmen should have plenty of sunlight and fresh air.

Canada Trunk and Bag, Limited, will continue along the same progressive lines, manufacturing a full range of leather goods, and a large assortment of trunks, running from the cheaper small box trunk up to and including their

WM. W. BREITHAUPT, BERLIN, ONT., WHO HAS ENLISTED FOR OVERSEAS SERVICE AND IS NOW TAKING AN OFFICER'S COURSE IN LONDON, ONT.

ON THE LEFT IS P. R. LOGAN, MANAGER OF THE SHOE DEPT. OF DAVID SPENCER, LTD., VANCOUVER; ON THE RIGHT IS W. G. FALLEN, OF GALT, WESTERN REPRESENTATIVE OF GETTY & SCOTT.

ROBERT E. BENNET, WESTERN ONTARIO REPRESENTATIVE OF ED. R. LEWIS, TORONTO, WHO RECENTLY JOINED THE RANKS OF THE BENEDEICTS

Ever-ready wardrobe trunks. The very rapid growth of the annual sales shows clearly the popularity which the goods have attained with the traveling public of the Dominion. The firm has always tried to give to the Canadian people the latest and best designs. These, with the excellent workmanship have produced baggage suitable for travelers of all kinds. This is shown clearly in the recently featured wardrobe trunk known as the Ever-ready line. At the time this trunk was first shown in Canada it was undoubtedly the only wardrobe featuring all the conveniences of an expensive trunk and still selling at a very moderate price.

The representative of the company in Western Ontario is J. A. Dickson, and in Eastern Ontario C. W. Vinson, who are both widely known. W. E. Boon, of Montreal, who is the representative in Montreal and the Maritime Provinces, is a well liked man in the trunk and leather goods trade, having spent many years in the territory which he now covers. Through the Western Provinces Canada Trunk and Bag, Limited, has Adams Bros. Harness Mfg. Co. as its representatives. They carry a full stock in Winnipeg, Saskatoon and Edmonton, thus making shipping facilities for the Western Provinces very convenient. Further west in British Columbia Messrs. Storey & Campbell handle a full stock of goods for the trade on the coast.

### AN INLAND SEA TRIP

**I**N these days when ocean travel to most people has more or less lost its attractions the tendency is to turn to substitutes for this very invigorating and stimulating process of mind and lung stretching.

Canada enjoys in the Great Lakes an almost perfect alternative for salt water voyages with the added advantages of scenery and the breaking of the monotony by occasional stops. There are all the elements—change and uncertainty of atmospheric conditions and the transition at times from sunshine to weather that will suit the most ardent lover of nature in the rough.

As a demonstration of the possibilities of these great inland seas the Canadian Press Association was recently tendered a trip by the Canadian Pacific Railway from Port McNicoll on Georgian Bay to the Twin Cities of Lake Superior—Fort William and Port Arthur—the head of the

CANADIAN LOCKS, SAULT STE. MARIE

grain and ore carrying trades of Canada. About one hundred and fifty newspaper men and their wives participated in the hospitality of the C.P.R. and thoroughly enjoyed every moment of the trip.

A special train left Toronto at 2 p.m. on Saturday,

June 3rd, and reaching Port McNicoll three hours later the party took the "Keewatin," the new palace screw steamer that plies between that port and Fort William. Promptly at six o'clock the lake journey was begun and the

C.P.R. S.S. KEEWATIN, KEEWATIN

steamer headed for Sault Ste. Marie. After a night's journey the St. Mary river was entered and the passengers enjoyed a couple of hours' sail between the Canadian and American shores to Canadian "Sault," where an immense lock provided with double gates for emergencies raises passing vessels to the level of Lake Superior. It is said that the tonnage through the St. Mary River is several times greater than that of the Suez Canal, although the latter is open all the year round as against the seven months of navigation possible with the former.

Out of the canal at the upper end the river leads out into Lake Superior, the largest body of fresh water on the globe. It affords all the changes and uncertainties of the Atlantic with sunshine, fog and storm. Fortunately or otherwise for the men of the press it showed itself in its gentler moods of sunshine and shadow, there being just enough of the latter to enhance the attractiveness of the former. After passing beyond the mouth of the upper St. Mary River the good "Keewatin" directed her course due north-west to what has for nearly three centuries been the head of lake navigation.

Fort William was originally an Indian trading post and became one of the chief centres of the Hudson Bay Co.'s operations. Recently a monument has been erected where the original trading post stood. Later Port Arthur was established and for a considerable time it outran its older rival. When the C. P. R. shops were removed to Fort William, however, the older settlement was given a fresh start and for some years the two places raced neck and neck for the ascendancy. To-day with a united population of over twenty thousand they have learned the value of mutual forbearance and friendly co-operation.

The visitors were entertained by both cities, visiting the various elevators, dry docks, etc., which make them the "hopper" of the grain trade of the great west and the headquarters of the ore business of the Great Lakes.

The party was entertained in the usual sumptuous style of the Canadian Pacific throughout and reached Toronto after a five days' trip crammed with pleasure and interest from start to finish. On the return trip a visit was made at the "Soo" to the immense pulp and paper plant located there and to the works of the Algoma Steel Co., the process of paper and steel rail making being watched with interest.

The social features of the trip were excellent, of course, everything being done by the company to ensure the comfort, convenience and pleasure of the guests. To anyone seeking an outing such as can be obtained nowhere outside an ocean liner and with the additional advantages of safety and scenery the Great Lakes trip ought to appeal most strongly.

# With the Shoe Manufacturers

Pithy Note and Comment on Shoe Matters—What the Makers of Shoes Are Saying and Doing—Shoe Facts and Fancies

**P**REPARATIONS are now practically complete for the Eighth National Shoe and Leather Market-Fair which will be held in the Mechanics' Building, Boston, Mass., from July 12th to 19th, under the direction of the Jacobsen Publishing Co. It is expected that a large number of Canadian shoe and leather men will be in attendance as well as many foreign buyers from all parts of the world. The exhibits will be larger and more varied than ever and the Fair will be a common meeting ground for

MANAGER W. D. BENNETT, BOSTON, MASS.

buyers and sellers in all lines connected with the trade, manufacturing, wholesale, retail and supplies. R. C. Jacobsen is the president of the Fair and W. D. Bennett manager.

In the previous exhibitions there has always been a generous representation from the Dominion who find it convenient to meet friends there both in a business and social way. One feature is being emphasized this year, and that is that the advantages of the Market-Fair in Boston, from July 12th to 19th, have been made apparent to foreign buyers in the shoe and leather industries.

The Market-Fair makes it easier for them to become better acquainted with shoes, leather, machinery and materials than by any other method. All the booths will be very attractive and buyers will meet more salesmen and see more samples during the week of the fair than would be possible through months of travel on the road. Special rates have been arranged on all the railways. The city of Boston will extend a warm welcome while the management of the institution are leaving nothing undone to ensure its success in educational, commercial and broadening features and by a representative attendance from all over the world.

## Hew to the Line in Make of Goods

"I do not believe in misrepresentation," declared a leading shoe man the other day. "If the stock which I handle is made in England, Ireland, France, the United States or Canada, I candidly tell the inquirer so, if he asks. There is no good in resorting to evasion or subterfuge of any kind. Some Canadian shoe firms, I am sorry to say,

will turn out shoes stamped with a high-sounding name, to convey the impression that the goods were manufactured across the line. I do not think this is fair to the trade. I know a friend of mine tried recently to work a certain 'kind of a scheme,' as he called it. He wanted the shoes stamped to suggest the idea that they were made over the line. He got a reply back from this manufacturing firm to the effect that with reference to the sole stamp, they could not under any circumstances stamp the shoes made by them as suggested, namely, the '————' shoes. The house added that the product was absolutely Canadian and they were proud of it and while they did not mind using a sole stamp supplied by a customer, they could do so only when such a stamp would not in any way tend to deceive the public.

"I ran across another instance," declared the speaker, "in which a certain title was used, and the name of a big city across the line added. This appeared on the end of some cartons. The firm is a Canadian one, who has built up an exceptionally large business, and there is no reason why it should seek to convey the impression that some of its goods were made across the line. Canadians should have more pride and spirit and independence, and recognize their own worth, ability and facilities to a greater extent than they really do," he concluded.

## Death of Mr. George Rumpel

A pioneer in the manufacture of felt footwear, a respected business man, an honored citizen, and a public-spirited gentleman, joined the silent majority on June 5th in the person of George Rumpel, of Berlin, Ont. The

THE LATE GEORGE RUMPEL, BERLIN, ONT.

immediate cause of his death was heart trouble and the news came as a great shock to the community. He had enjoyed good health up to a few weeks ago, and of late had shown signs of improvement, being able to attend to business mat-

Write for Quotations

**McARTHUR, IRWIN, LIMITED**

ESTABLISHED 1842.

MONTREAL.

ters. Mr. Rumpel, who was sixty-six years of age, was born in Muelhausen, Germany, and came to Canada in 1870, settling in Hamilton, Ont., where he resided for some years. About forty-two years ago he attended a Saengerfest, held in Berlin, and liked the people and the young town, and being firmly convinced that it had a bright future, he decided to locate there. His subsequent career proved to be an active, industrious and upright one. Anything that he undertook was carried out with zeal, capacity and perseverance. Beginning the making of felt footwear on a small scale, his skill and mental vigor were his chief assets in the early days.

George Rumpel was a man with convictions. He had singleness of purpose and the disposition to conquer. The Berlin Felt Co. was formed with a capital of \$100,000 and Mr. Rumpel was at that time superintendent. The concern was then employing about 100 hands and was practically the only felt shoe enterprise in the Dominion. The company was later bought out by Mr. Rumpel, under whose aggressive management the business was enlarged and perfected. Many improvements were introduced in materials and manufacture, and the lines began to take on the artistic features that now characterize felt footwear.

From the parent company a number of other companies have since branched out with success. Mr. Rumpel practically withdrew from a life of constant activity when his large plant was taken over by the Canadian Consolidated Felt Co. and gave his thoughts for a while to the improvement of the felting process. Within the past few years he established a felt factory of his own and with the assistance of one of his sons, Walter, had been devoting his practical mind and experience to the manufacture of high-class felt.

The name of Rumpel is still prominently connected with felt footgear, by the establishment of a factory by another son, Oscar Rumpel, for the making of men's, boys'

women's, misses' and children's felt footgear. During his long residence in Berlin there was never a good industrial proposition before the city which did not receive the support and endorsement of Mr. Rumpel, who possessed constructive genius and executive talent to a remarkable degree.

Deceased was mayor of Berlin in 1898 and served at different times as alderman and reeve, and also as a member of the park board. He was a director of the Economical Fire Insurance Co. and the News-Record Co. In the passing of Geo. Rumpel, Berlin sustains a distinct loss, and his funeral was attended by representative men in all walks of life, interment being made in Mount Hope Cemetery. Rev. H. A. Sperling, pastor of St. Peter's Lutheran Church, paid a warm tribute to the deceased, to his useful and active career, sympathetic nature and sterling integrity. The pall bearers were L. J. Breithaupt, G. C. H. Lang, W. H. Schmalz, Carl Kranz, H. L. Janzen and H. Krug. Mr. Rumpel is survived by his wife, two sons, Oscar and Walter, and two daughters, Mrs. H. D. McKellar and Miss Hilda Rumpel, all of Berlin.

## Why Not Rise Earlier?

Writing to a Toronto paper on the daylight savings movement, A. R. Kaufman, general manager of the Kaufman Rubber Co., Berlin, says:—

"I agree that the confusion caused by changing of time in different localities should be avoided. This can naturally be done if all agree to a uniform change of one hour throughout the Dominion. It may, however, be very difficult to have this uniform change made.

"I have been wondering why some paper does not suggest making use of daylight by merely rising an hour earlier and retiring an hour earlier, but not changing the time at all. I personally can see no objection to this, even after discussing it with others. Some factory employes might at first object to the idea of starting to work at six in the morn-

ing instead of seven, but when they realize that they retire one hour earlier their objection would no doubt be withdrawn. The time for meals, etc., would be advanced one hour, but I personally can see no objection to the noon hour, for instance, being from eleven to twelve instead of from twelve

"I understand that some railways object to this changing of time on account of its interference with their timetables. The plan I have suggested would likely overcome that objection. I might also add that I personally would be willing to have some uniform plan adopted for the entire twelve months of the year instead of for only about six months. I do not think that there is any particular benefit derived in winter, but I also cannot see any objection. If the time must be changed I would suggest that the different times throughout Canada be advanced one hour permanently. This would avoid any necessity of change in spring and fall, and, as just stated, there might not be any objection to time being advanced one hour during the winter as well as the summer months. If the above suggestion appeals to you, please advocate it."

**What Canada Imports in Leather**

The following figures, which have been obtained from the Department of Trade and Commerce, Ottawa, show the imports of leather into Canada during the past three fiscal years. The statistics are interesting and are well worth preserving for future reference. It will be seen that the war has caused a great many changes in the imports from the United Kingdom, the United States and other countries.

**Rate of Consumption Unparalleled**

A recent report received by the Trade and Commerce Department, Ottawa, tells of the activity of the shoe and leather trade in Leeds, England.

The shoe and leather trades continue to be deeply involved by the incidence of the war, which, in combination with an ever-increasing demand on the part of the general public for footwear, has kept all the branches of the industry in a particularly active state. The present rate of consumption is without a parallel, and, in view of the immediate necessities on both military and civilian accounts, the growing shortage of labor is causing great anxiety. Should the military authorities carry out their intention to further limit the certified workers in the boot and leather trades, the requirements of the public, but particularly the Army, cannot be met except by purchasing in foreign markets. The imports of American and Swiss goods have already increased considerably in consequence of the inability of English manufacturers to cope with the needs of the market, and until much of the labor is restored to the tan yard and the boot factory, the position cannot change.

All the centres engaged in civilian boot manufacture continue to work under great pressure, and many millions of pairs of boots, shoes and slippers are on order, the demand for ladies' and young children's goods being particularly heavy. The English Army Clothing Department have entered into an agreement to produce eight or nine million

Rubber

Wear  
Longer

### THE "PEERLESS" WAY

The growth of dealer interest in the "**Peerless**" line has been no less phenomenal than the sales growth of Dunlop "**Peerless**" Heels. We receive hundreds of requests every month for the empty box rebates.

If you have never sent in the empty "**Peerless**" cartons, to receive for each the one-and-a-half cents in cash by return mail, ask one of your cobbler friends to show you what his earnings from these returned boxes represent.

All this double-earning capacity of "**Peerless**" Heels is possible because the Dunlop Line sells readily through being a Quality product, backed up with a sufficiency of advertising.

Your jobber will ship you the necessary supply of "**Peerless**" Heels. Be sure to mention the name "Dunlop" to him.

Made in all sizes—and in colors Grey, Black and Tan.

### DUNLOP SOLES ALWAYS LEAD

Rubber Soles are more and more coming into popular favor. Some people wouldn't be without them winter or summer.

Once a customer of yours knows from experience that Dunlop Rubber Soles are just as efficient, just as surpassingly good as Dunlop "**Peerless**" Heels you will find he will have no other make of rubber sole.

Freedom from cracking, most generous wear-well record, never a sign of drying out—these Dunlop features are bound to impress the user.

Manufacturers in great numbers use the Dunlop Rubber Sole in making up their stocks—another good sign of quality and consistent behavior reaping their just recognition.

Made in all sizes and in colors Grey, Black, White and Tan.

Dunlop Tire & Rubber Goods Co.,  
F. 3 Limited H. 77

## RUBBER SOLES

pairs of boots for Russia, and these have to be completed by the end of the year. It is reported that all the firms in the country which have made military footwear since the commencement of the war are to be requested to execute a portion of the order, and that in consequence civilian requirements are to be put on one side. Three million pairs of Cossack or "knee" boots are included in the arrangement. These will probably be made in the Midland centres and in London. Of the remaining five or six millions, which are of the ankle type, large quantities will be manufactured in Leeds and district. It is understood that the first three million pairs are to be delivered by the end of June.

**Athletic Shoeman Going to Front**

W. Reginald Percival, of Percival Bros., wholesale shoe dealers, Montreal, who have retired from business, has enlisted with the 66th Battery and is now in camp at Petawawa. "Reg" was formerly well known in aquatic sports, having won several championships when connected with the Britannia Cance Club. For the past two or three years he was a popular referee in hockey circles. His many friends in Montreal and St. Lambert, where he resides, recently gave him a dinner at the St. Regis Hotel and presented him with a wrist watch, a bull-dog safety razor, and

W. REGINALD PERCIVAL, MONTREAL

several other useful articles. W. Reginald Percival is another of the many shoemen of the Dominion who have joined the colors and will do their bit in the present crisis for King and Country.

**The Story of a Certain Ball Game**

Although a traveler may now and then "put one over" on the shoe retailer, still, when it comes to baseball, the latter have their revenge by 10 runs to 6. A contest, filled with thrilling sensations that would gladden the heart of any fan, was pulled off on Wednesday afternoon last, which is a half-holiday with many of the footwear merchants, at Willowvale Park, Toronto. The city representatives of the manufacturing and wholesale houses thought they could trim their customers on the diamond and were invited to "go to it." For six innings the struggle continued with pretty even honors but in the fateful seventh, when the retailers massed five runs, there was a scene of intense enthusiasm on the part of the spectators. Alf. Bawden twirled for the travelers, while Alf. Neale performed a similar service for the

dispensers of foot toggery in pair lots, and incidentally helped his supporters to win by scoring a home run. Norman Ingram was the umpire and his decisions were never questioned. Although the price of leather is high and the commodity scarce the foot fitters had no consideration for the ball and pounded out two and three baggers in a merciless manner. Here is the story, individually and collectively.

The Retailers—A. Neale, p.; B. Sproul, 2 b.; Chas. Bayford, c.f.; N. Chappelle, r.f.; J. A. Barlow, s.s.; T. Kelly, c. and r.f.; B. Cardwell, 1 b.; J. A. Queen, 3 b.; H. Johnson, c. and p.; T. A. Wilson, r.f.

Shoe Travelers—G. Nicholson, 2 b.; J. Melrose, 3 b. and l.f.; D. Bain, 1 b.; W. Young, s.s.; J. C. Bryant, l.f.; A. Parker, c.f.; P. J. Maher, r.f.; H. Saunders, c.; A. Bawden, p.; G. A. McClennan, 3 b.; W. Edwards, r.f.

**How Shoe Prices Are Climbing**

Are prices still going up in the shoe line? Well, they certainly are. Some manufacturers advanced figures four times during the fall selling season now coming to a close with an aggregate increase from eighty cents to upwards of one dollar per pair. "See here," remarked a leading wholesaler this week. "Look at this men's side leather shoe. On January 1st I bought this for \$2.20 and now I am asked \$2.95. Here is another line in men's gunmetal calf, which three months ago cost me \$2.45 and today the price is \$3.70, and here is another sample, formerly bought at \$2.50, which has jumped up to \$3.80. Here is a women's calf bal, McKay, for which I paid \$1.90 at the beginning of the year. It is now \$2.65; and gaze at this women's dongola kid, McKay, which a few weeks ago was purchased by me for \$1.65 and now the quotation is \$2.65. On practically all lines of footwear that I buy from the manufacturers I have to pay the factory more than I formerly sold them at. Where the ascension is going to end I cannot tell and nearly every day I receive advices, when ordering certain goods, that the figure has increased from ten cents up. But I suppose that we are all in the same boat and should be thankful to get shoes at any figure."

**Unparalleled Demand for Sporting Goods**

Some idea of the extraordinary development in tennis and sporting shoes is furnished by the following figures, supplied by one of the leading firms. In 1913 their placing and sorting orders on this line of goods amounted to \$18,000. The next year they went up to \$30,000 and last year to \$110,000, while so far this year, and the season has only just begun, the placing and sorting orders have touched the quarter million mark. These figures show that shoe dealers for the past three years have found themselves quite unprepared when the season came on and manufacturers have been severely put to it to get out the goods in time for the summer trade. They attribute some of the increase in the lines to the high cost of leather shoes but mainly to the better class of goods made, and the fact, where once they were only available in men's, boys' and youths', and a few women's, they are now made in all ranges, down to fours in children's, and are created in a style that makes them presentable for street wear. Outing shoes are seen with solid heels, solid rubber soles, leather insoles, etc., and are decidedly cool, comfortable and dressy. The result is that the rubber shoe manufacturers who two or three years ago were generally slack in operations between January and June are now able to keep their help fully occupied, which is an advantage to the whole industry. Certainly the sporting shoe returns so far exceed in volume and outlook the expectations of even the most sanguine.

### WELL KNOWN IN RUBBER GOODS LINE

P. G. Dunham, general manager for Canada of the F. S. Carr Rubber Co., Limited, who recently removed their plant from Tilbury, Ont., to Granby, Que., has had an extended experience in the rubber world. The old homestead was in Northumberland, New Hampshire, where the subject of this reference attended school and worked at odd jobs in paper and sawmills and on railways, until 1892, when he

P. G. DUNHAM, GRANBY, QUE.

went to Boston and resided in that vicinity. There he learned the leather belting business and worked in leather shoe factories for some years. He was also engaged in the real estate line for a while. Seven years ago Mr. Dunham removed to Granby, Que., where he became manager of the Walpole Rubber Co., Limited, and after having organized their rubber heel business, acted as foreman and superintendent at Walpole, Mass. Two years ago he resigned from that company and went with the F. S. Carr Rubber Co., Limited, of Canada, who manufacture many exclusive lines.

### MR. LEWIS APPOINTED CANADIAN AGENT

Ed. R. Lewis, 21 Scott street, Toronto, has been appointed Canadian agent for Henry Gitterman & Co., 33 Spruce street, New York city, the widely known shoe fabric house. This step has been taken in order that the company may look after the wants of their numerous Canadian customers more efficiently than ever and, in the selection of Mr. Lewis, they have secured an aggressive and well liked representative who is in close touch with the shoe industry. Mr. Lewis, who has recently enlarged and completely renovated his premises will carry a full range of samples of the Gitterman lines. Gitterman & Co. have offices in Boston, St. Louis, Rochester and Haverhill in the United States and have a very extensive line of shoe fabrics, a large number of which they convert themselves and are originators of other fancy shoe fabrics. They are also large converters of white shoe cloth and have a comprehensive range of shoe bindings.

### WILL TAKE AN OUTDOOR POSITION

Earl Stewart, who has been in the retail shoe business in Owen Sound, Ont., for the past seven years, is selling out. The stock is now being disposed of rapidly. He has been advised by his physician to procure an outside position and his intention is to go on the road as that life agrees with

him. Writing the SHOE AND LEATHER JOURNAL Mr. Stewart says that he found the paper valuable and a great help to him at all times. He does not consider a retailer can keep right up to the mark unless he procures a live trade journal and reads it carefully. He can thus learn the opinions of others, some of which are likely to be of special benefit to him or point out more clearly that he is on the right track in the buying as well as in the selling branch of his business.

### GUESSING VOTE ON SHOE BY-LAW

A display of the various lines manufactured by the Unique Shoe Co., of Toronto, was shown in one of the big show windows of the H. S. Falls Co., Simcoe, Ont., for several days before the voting on the by-law. Its attractiveness no doubt assisted in creating popular sentiment favorable to the by-law. Added interest was also due to a guessing contest. The ladies were invited to guess what would be the total number of votes cast in the election, and over two hundred of them took advantage of the invitation. Each of fifteen guessing nearest won a prize of a handsome pair of slippers.

### HIGH HONOR FOR WESTERN SHOEMAN

G. W. McFarland, manager of the western branch of the Williams Shoe, Limited, at Regina, Sask., who was recently elected president of the Saskatchewan Credit Men's Trust Association, is a popular and progressive business man, who enjoys the confidence of all those with whom he comes in contact. He spent the early years of his life in the wholesale lumber business in Toronto, and later engaged in the retail mercantile line in Northern Ontario, where he was for a considerable period, prior to 1906, when he joined the staff of the Sovereign Bank as manager of their North

G. W. MCFARLAND

Bay branch. He continued with that institution a number of years, after it went into liquidation, having had charge of the Imperial Paper Mills at Sturgeon Falls, Ont., in their interest. In 1915 Mr. McFarland joined the Williams Shoe, Limited, and opened the western branch of the firm at Regina about a year and a half ago. A large business has been developed under his direction and the venture has proved successful in every way. A force of travelers is employed and the outlook for the coming season is fine.

### MET DEATH IN AERIAL COLLISION

Geo. E. Williams, a widely known shoeman of Toronto, and until recently connected with the wholesale establishment of D. D. Hawthorne & Co., but now farming near Ailsa Craig, received the sad news last week of the death of his son, Flight Sub-Lieut. Geo. K. Williams. The latter was killed in a collision with another British aeroplane, almost directly after he reached the battle front. The fatality occurred at Luxeuil, France. The home of the deceased was at 147 Gore Vale, avenue, Toronto. Previous to taking up aviation and learning to fly at the Curtis School, the deceased young man was an instructor in the drafting department of the School of Practical Science, Toronto. He was 28 years

GEO. K. WILLIAMS, TORONTO

of age, unmarried, and prominently connected with young people's work in the Wesley Methodist Church, Toronto. Many friends will learn with very deep regret of his death. Mr. Williams, sr., has two other sons serving in the army.

### HOW TO KEEP TRADE AT HOME

Any "home merchant" who isn't awake and fails to tell the people about his wares, should read this startling statement made by the manager of a big Toronto mail order house recently! "We have a bureau whose duty it is to read the country newspapers. There is not a paper of any consequence in our territory we do not get. The bureau looks over these papers and when we find a town where the merchants do not advertise in the local press, or where the advertisers do not change their advertisements regularly, we immediately flood that section with our literature. It always brings results far in excess of the same effort put forth in territory where the local merchants use their local papers."

### WELL-KNOWN SHOEMAN COMES TO TORONTO

L. Murray Ray, who was recently appointed manager for M. B. Young, shoe retailer, 924 Bloor street west, Toronto, has had an extended experience and insight into the shoe game. He succeeds John Day, who has joined the 208th Fusiliers for overseas service. Born in Welland, Ont., at an early age he removed to Chicago where he was educated and got his first acquaintance with the footwear business.

Some fifteen years ago his father, a contractor, was engaged in the building line at Sault Ste. Marie, Ont., and the son thought he would like to try his hand at carpentering. The work did not appeal to him, however, after his connection with the shoe business, and he entered the service of W. J.

L. MURRAY RAY, TORONTO

Detweiler, shoe merchant, of the Soo, with whom he remained for fifteen years, being manager and buyer a large portion of that period. Mr. Ray has many friends in the trade and has taken up his residence on Carling avenue, Toronto.

# WHY NOT ANSWER YOUR LETTERS PROMPTLY?

**Too Much Indifference and Selfishness on the Part of Many Firms and Individuals—Inconvenience and Loss Resulting From Delayed or No Replies—Flimsy Pretexts for Not Responding that are White Falsehoods—Many Houses Are Offenders**

“**M**EAN enough to steal the coppers from a dead man’s eyes, or rob a baby of a sugar plum,” sums up the thoughtlessness and selfishness of some people, not only those in the business world, but private citizens as well. They pay no heed to any communications or obligations, business or social, unless there is some advantage to be gained, some favor to win, or monetary consideration or advancement in prospect.

For instance, the practice of some people not answering letters seems to be growing more and more pronounced, even when a stamp is enclosed for a reply. Perhaps the recipient pockets the stamp, and thinks he is three cents ahead of the game, and secretly admires his own cupidity and sympathises with the stupidity of the sender. Subsequently a postcard may be sent, calling attention to the fact that no answer has been received, but still the same long silence prevails, and no reply is forthcoming. One feels, under such circumstances, like writing:—“If you cannot favor us with the information desired, or even forward an acknowledgment of our communication, kindly return the stamp.”

## Too Narrow and Selfish

It needs something to jolt some people out of a snug, complaisant existence. The whole attitude of not answering letters—of paying no attention to them—is an evidence of indolence, indifference, narrowness, pure downright cussedness or callousness, owing to the inconvenience with which others are put to by reason of the delay or oversight, or just plain, common neglect. It would perhaps not matter much, but often some information that is hoped for, facts or data that mean much to the writer, yet are delayed or not forthcoming, hold up many important things.

Another reason many letters, business and often social, are not answered is pure procrastination on the part of the recipient. The intentions are good but the path to perpetual punishment is paved with such flagstones. The task that should be undertaken at once or on that day at any rate, is laid aside and in time forgotten, the letter either being covered up in the general litter of a desk, or table, and finally lost, or, if recovered, is so old that a sense of shame prevents a reply.

In ordinary conversation, if a business man should ask a polite and proper question of another (which he knew the latter distinctly heard, and no reply was vouchsafed) and the question was repeated, and still no reply, one would accuse the latter of grave discourtesy and lack of genuine gentlemanly qualities. The word, rebuff, rebuke, snobbish, boorish, or even a stronger term might be used. Yet what is a letter but our thoughts, questions, statements or announcements committed to paper. Letter after letter may be sent to certain men who never turn a hair and never reply; they seem to possess no sense of courtesy or consideration. If, casually, they afterwards meet the sender, they offer a flimsy excuse. “Oh, I intended to answer that, but I forgot about it.” “I thought you would come up to see me,” or “I was really too busy to attend to the matter.”

## Some Shilly-Shally Excuses

Possibly the most shallow and stupid excuse of all is “I was too busy,” or “I had not the time.” Busy people generally make or take time. Those who have the most to do, seem to possess moments when they can attend to the little acts and kindnesses, which stamp them as leaders

in their line and outstanding figures in the community. There is an old saying, “If you want anything done, ask a busy man to do it—the others have no time.” It would seem that “the others” are a growing army.

Manufacturers complain of retailers not answering their letters in reference to orders, drafts, returned goods, grievances, etc., and retailers bestow anything but complimentary reference upon manufacturers who ignore certain wishes, or dodge a direct answer to certain questions.

All this adds to the uncertainty and distrust which should not be prevalent in business where mutual confidence and co-operation should reign. Some men pride themselves on the fact that they never answer a letter. When finally compelled to do so by force of circumstances, shortage of goods, a break-down in their plant, absence of supplies, or other unforeseen circumstances, they will send a telegram or lettergram. They offer the excuse—“Oh, I positively hate to write. It goes against every grain of my nature, and every fibre of my being.” If a man can spell, and hold a pen, he might have thought enough to print a message. Even the briefest acknowledgment of certain matters is preferable to long-continued silence; a taciturnity that cannot be broken by any awakening that may be given through the mails or over the wires.

## Don’t be Lop-sided in Business

Much more might be said in this line of the utter carelessness and want of business methods evidenced by a large number of merchants, and others who do not attend to their correspondence. They accept everything as a matter of course, of right, and only acknowledge a letter when it is something to their immediate personal advantage or gain—a very one-sided arrangement.

On the other hand, many large houses in business to-day attribute a measure of their success to the fact that they always have answered every communication promptly, even the receipt of a circular, a calendar, or a marked copy of a newspaper being acknowledged, if not by letter then by means of a postcard. Such houses win a high place by their kind, considerate business methods and are referred to as firms with whom the ordinary man loves to do business.

The next time you do not answer a letter, just turn around and put yourself in the other fellow’s place. See if you cannot exercise a little of the spirit of the “Golden Rule,” and “do unto others,” in the matter of correspondence, “as you would be done by.” Perhaps you, yourself, have written a letter on an important matter and waited day after day for the receipt of the information, and after a reasonable period, marked by patience and tolerance, have sent other ones, only to learn that no response is forthcoming.

## Paid Back in Your Own Coin

You know that you were not in a pleasant state of mind, that you called the party at the other end all sorts of names and imputed every kind of motive. He is possibly paying you back in coin of the same material. The way you have discharged your epistolary obligations toward him is being returned to you ten or mayhap a hundredfold. There is nothing like a man getting a little dose of his own medicine in this world to broaden his conception of things and start sympathies that have not self as first consideration. Now, be good and answer all letters promptly and pleasantly.

# AMONG THE SHOE MEN.

C. D. Jones, shoe retailer, Hamilton, recently suffered a small loss by fire.

A. Schwartz, shoe retailer, of Montreal, recently made an assignment.

W. P. Plant, of Hastings, Ont., was in Toronto last week calling upon several members of the leather trade.

Maple Leaf Tires, Limited, of Toronto, have been incorporated with a capital stock of \$500,000.

H. S. Chapman, shoe dealer, Clinton, Ont., recently assigned to C. B. Hale.

The Lady Belle Shoe Co., of Berlin, is running to fullest capacity, the orders received for fall having exceeded the highest expectations of the company.

Gutta Percha & Rubber, Limited, Toronto, have built a new warehouse on West Lodge avenue at a cost of thirty thousand dollars.

John J. Tilt, of Toronto, Western Canada representative of the Brandon Shoe Co., Brantford, Ont., has returned home from an extended and successful selling trip throughout the Prairie Provinces.

Fred Mercer, of the firm of Hugh Mercer & Son, Markdale, Ont., was married recently to Miss Richardson, of that town. Many friends will extend their congratulations.

The annual meeting of Ames-Holden-McCreedy, Limited, Montreal, will be held on Thursday, June 22nd, for the receiving of the reports of the directors for the past year, the election of directors, etc.

J. G. McDiarmid, of Toronto, representing the Murray Shoe Co., London, returned a few days ago from a business trip throughout the Western Provinces, which was very successful.

The stock of J. Stevenson & Co., shoe dealers, Sault Ste. Marie, Ont., who recently made an assignment to McLeod Tew, amounting to nearly \$12,000, was purchased by H. Megginson, shoe retailer, of Sault Ste. Marie, at 64½ cents on the dollar.

## THE LATEST FREAK IN SUMMER SHOES

Fashion has decreed that the conventional heavy white shoe worn during the summer season shall give place to the natty linen shoe, light in weight and attractive in appear-

ance. This pair is of green linen and tips of flowered cretonne, and is the latest innovation in the sport shoe line. Its popularity is assured and it will be seen on the avenue, boardwalk and golfing green.

The book debts of the Rock Shoe Manufacturing Co., Quebec, in liquidation, amounting to the sum of \$77,991.24, were recently sold to M. J. T. Bisson, of Quebec, for three-quarters of a cent on the dollar.

R. S. Gerash, shoe retailer, of Verdun, Que., recently made an assignment.

John Matchell, of Earlton, has started in the shoe repair business at Englehart, Ont.

The warehouse of the Kallman Rubber Co., 310 West Craig street, Montreal, was broken into recently and several pairs of long rubber boots, some running shoes and rubbers stolen. Laurence Piche, 23 years of age, was arrested when seen carrying a bag containing the footwear along the street.

F. D. Snyder, who was formerly connected with the Moncton Footwear Co., Moncton, N.B., has gone to Amherst, N.S., where he has become associated with Walter Calhoun in the footwear business.

The name of the Berlin Trunk and Bag Co., Limited, Berlin, has been changed under the provisions of the Ontario Company's Act to that of the Canada Trunk and Bag Limited.

The stock of shoes and men's clothing of D. C. Lambe, Huntsville, Ont., who recently made an assignment, amounting to \$2,431.35, was purchased by Wardell Boyd & Sons, of Huntsville, at 70 cents on the dollar.

Arrangements have been completed for the annual picnic of the Canadian Consolidated Rubber Company and the Canadian Consolidated Felt Co., which will be held in Waterloo Park, Waterloo, Ont., on July 1st. It is expected that the event will be attended by thousands of persons.

J. J. Kilgour, president of the Kilgour-Rimer Co., Winnipeg, is at Lick, Indiana, on a holiday visit.

H. Sabloff, for several years in the retail business, and E. Wisenthal, who was a representative of Daoust, Lalonde & Co., have entered into partnership and will carry on a wholesale shoe business at 74 Victoria square, Montreal, under the name of the Stag Shoe Co.

The Levine Leather Co., of Toronto, has been incorporated with a capital stock of \$40,000, to buy, sell and deal in leather and leather goods. The incorporators are: Samuel Levine and Joseph Honeyford; Benjamin Spiegel, Samuel Rosen and Bell Gordon, all of Toronto.

The name of the G. V. Oberholtzer Co., Limited, Berlin, of which N. B. Detweiler is president and D. B. Detweiler vice-president, has been changed under the provisions of the Ontario Company's Act to the Hydro City Shoe Manufacturers, Limited.

J. L. Tretheway, of Toronto, who is on the traveling staff of the Brandon Shoe Co., Brantford, is spending a few weeks at his summer home at Lake Temagami.

At the annual meeting of the Manitoba retail merchants, C. F. Rannard, president of the Manitoba Board of Retail Merchants' Association, presented a magnificent trophy to the rink of retailers who won the competition last winter between wholesalers and retailers.

H. O. Andrews & Co., shoes and dry goods, Calgary, have assigned to the Trusts and Guarantee Co., Limited.

Bignell & Knox, wholesale shoe dealers, Montreal, have recently registered.

Miss Mary Valentine, daughter of James Valentine, of Valentine & Martin, Limited, shoe manufacturers, Waterloo, Ont., was chosen as May Queen by the students of the

*Doctors*  
ANTI-SEPTIC  
SHOE  
NON  
PERSPIRO  
PAT 1908 1909

Here's a shoe that is absolutely waterproof in both sole and upper. The sole is also constructed in a manner that assures an even temperature of the foot in all weathers.

What does the average man want *first* in footwear?

The answer comes out clear and distinct and without the least hesitation—*Comfort*.

There's no doubt about it—*Comfort* is the *first consideration* in selling men's footwear.

And then come style and value.

These well-established facts are responsible for the undiminished popularity of Tebbutt's special lines—"Doctors" and "The Professor" shoes.

In their design comfort comes first, but it doesn't interfere with neat and natty style.

You'll never see better looking shoes. And certainly none are made that are more supremely comfortable.

*THE Professor*  
PAT. N.º. 119409  
GOLD CROSS  
SHOE

This shoe has the same qualities that distinguish the "Doctors" Shoe. But, in addition, "The Professor" is fitted with a patent, cushioned inner sole that greatly improves the ease of the foot when walking.

Be sure your jobber fills your order with the original—"Doctors" and "The Professor." produced in Three Rivers, Quebec, by the Tebbutt Shoe & Leather Co. Limited.

If your jobber cannot supply you, please write us direct.

The Tebbutt Shoe & Leather Co. Limited  
Three Rivers Quebec

Ontario Ladies' College at Whitby recently. She was chosen for her womanly qualities.

T. H. Bigwood, shoe retailer, 492 Bloor St. W., Toronto, enlisted some time ago with the 208th Battalion as a sergeant in the band. His wife is continuing the business having been associated with her husband for years in the footwear line at 826 Yonge street, from which stand Mr. Bigwood moved to Bloor street west a few months ago.

A. Gemmill, who started business in 1850 on King street, near Yonge street, Toronto, and has been in that neighborhood ever since, making fine custom hand-made shoes, passed away recently. Mr. Gemmill was practically the only person left who was making a high-grade custom shoe. He moved to 196 King street west in 1913 and since the war broke out had been extremely busy with officers' boots and leggings. Mr. Gemmill's business was recently purchased by J. H. Sutton, who was his foreman for several years. Mr. Sutton, who has had over thirty years' experience, will continue the business in the same stand.

Charles E. Slater, of the Comfort Shoe Co., Limited, Quebec, Que., was in Toronto calling on the trade last week.

A new line in women's footwear which will likely be offered by some manufacturers for next season will be a five-button, five-inch top, with Louis heel and ornamental cloth quarters, surmounted by a collar or cuff of the same leather as the vamp. Artistic ideas of foxing are also noticed. Whether my lady fair will take a fancy to the low cut after the extreme high cut of the present remains to be seen.

#### A MOVE IN THE RIGHT DIRECTION

George E. Boulter, wholesale shoes, has removed from 189 Church street, Toronto, to larger and more centrally located premises at 3 Wellington street east, corner of Yonge street. The new quarters of Mr. Boulter are attractively fitted up with hardwood floors, elevator service and mission oak fixtures. The walls are done in oatmeal green and the woodwork in white enamel. Mr. Boulter, who represents the John McPherson Co. and John Lennox & Co., of Hamilton, the Perth Shoe Co., of Perth, and the Menihan Shoe Co., of Rochester, N. Y., has now some thirteen hundred

GEORGE E. BOULTER, TORONTO

square feet of floor space, with special facilities for quick delivery, being in daily touch with the factories, especially in connection with lines ready for instant shipment. Harry C. Arnold is in charge of the sample room while Wilfrid V. White is covering the Toronto city trade.

Mr. Boulter has recently been elected a director of the Perth Shoe Co., of Perth, and Norman E. Ingram will be associated with him in looking after the city interests of the company. Mr. Boulter, who is widely known to the shoe trade, is receiving the congratulations of many friends on his handsome and convenient new business home.

W. J. Detweiler, shoe retailer, of Sault Ste. Marie, Ont., was in Toronto last week calling upon the trade.

L. F. Morrice, of Madoc, Ont., who recently sold out his business in that place, has bought the shoe stock of Rudolph Miller, of Milverton, Ont., and takes possession next month.

C. A. Davies, of Blachford, Davies & Co., wholesale shoes, Toronto, has returned from a business trip to Montreal and Quebec.

W. F. Martin, of the Kingsbury Footwear Co., Montreal, has been spending a few days at Atlantic City.

Frank Smith, representing the John Ritchie Co., Quebec, has returned from an extended and successful Fall selling trip throughout the Prairie Provinces.

W. J. Sisman, of the T. Sisman Shoe Co., Aurora, Ont., recently joined the ranks of the benedicts and is receiving the congratulations of his many friends.

H. Megginson, shoe merchant, of Sault Ste. Marie, Ont., spent a few days in Toronto last week on business.

W. E. Short, Western Canada representative of the Kingsbury Footwear Co., Montreal, returned recently from a very successful trip through the Prairie Provinces.

J. A. McLaren, of McLaren & Dallas, wholesale shoes, Toronto, is in Montreal, Quebec and Boston on a business trip.

Walter May, of Boston, who is installing the widely known May cutting system in the factory of Wm. A. Marsh Co., Quebec, was in Toronto last week on business.

Among the recent visitors to the factories in Montreal and Quebec were D. D. Hawthorne, of Toronto and Hugh White, of the White Shoe Co., Toronto.

A. L. Bartlett, shoe dealer, 596 College street, Toronto, who has for some time been conducting a branch store at 1360 Bathurst street, has sold out the latter to Mr. Walker, late of Winona, Ont.

W. G. Fallen, who represents Getty & Scott, Limited, Galt, in the provinces of Alberta and British Columbia, returned last week and reports that his trip was the most successful that he has ever had.

G. H. Ansley, manager of the Perth Shoe Co., Perth, spent a few days in Toronto last week. The company are making a fine new line of English walking balm for women with wing tip, Neolin sole and rubber heel, which come in dull calf, mahogany and white calf. The range, which is both artistic and comfortable, is taking well with the trade.

H. W. Pearson, manager of the Toronto branch of Ames- Holden-McCready, and R. W. Clarke, manager of the wholesale end in Montreal, spent a few days in Boston and other shoe centres on business last week.

Geo. A. Slater, chairman of the Montreal branch of the Canadian Manufacturers' Association, was in attendance at the recent general meeting of the organization, which was held at Hamilton.

The shoe merchants of Yonge and King Streets, Toronto, with two or three exceptions, have decided to close every Wednesday afternoon during the months of July and August.

The west end shop of Geo. G. Gales & Co., shoe retailers, 481 St. Catherine street west, Montreal, gave ten per cent. of their total sales on June 6th—tag day—to the cause of the Iverley Settlement. This depot supplies pure milk and ice to the poor mothers in the neighborhood. Messrs. Gale also kindly gave the use of their store to the ladies for headquarters on tag day.

Max Mandelker, of Jonquiere, Que., recently issued to his many customers a nicely illustrated circular containing splendid half-tone cuts of leading brands of shoes. The circular was worked out on patriotic lines and took very well. Some of the phrases and expressions aroused considerable interest, such as—"Who said I was dead? Why I am more alive than ever and more so than the Kaiser We'll-Hell-Him. I am the man who protects you against high prices." Other original references were—"Women like pretty feet; men adore

them. Let this pump do it." "If our armies were not in the way, Kaiser We'l-Hell-Him would swim here to get these boots for his barefooted army."

In the tournament of the Dominion Game Protective and Trap Shooters' Association, which was held at Cobourg last week, the second highest score in the Grand Canadian handicap was tallied by S. G. Vance, shoe dealer, of Tillsonburg. Mr. Vance was elected a member of the executive committee at the annual meet, which it was decided to hold next year at Sandwich, on the grounds of the Essex Golf and County Club.

W. S. Pettes, of Montreal, has returned from a successful trip in the interest of the Perth Shoe Co. throughout the Maritime Provinces and reports that trade is in a very satisfactory condition. He has gone on a few days' fishing outing.

J. G. Settle, representing the Murray Shoe Co., London; H. B. McGee, representing Minister Myles Shoe Co., Toronto; Wm. Lindsley, representing E. T. Wright & Co., St. Thomas, and R. L. Savage, of Toronto, representing Clark Bros., St. Stephen, N.B., were in Montreal last week calling upon the trade.

The new addition to the Parker Shoe Co., Limited, Preston, Ont., is nearing completion. The extension, which is of brick, three storeys high, 40 x 60 feet, will be used for stock room, cutting room and fitting department and will result in the output of the factory being doubled. The

Parker Shoe Co., report that, with the completion of the new wing, they will be the largest exclusive manufacturers of women's McKay shoes in the Dominion selling wholly to the jobbing trade.

T. J. Mowat, manager of the Neill shoe store, Galt, Ont., has in his possession an interesting curiosity in the shape of a gigantic hand-made shoe, size eighteen. The monster was turned out by G. W. Wentworth, Haverhill, Mass., in 1855, for a special exhibit in New York City and is, therefore, sixty-one years old. The shoe is made of cowhide, being a work blucher, with full triple sole, on a straight last and is hand-pegged. Mr. Mowat prizes the curio highly and occasionally uses it in the window for display purposes with humorous show card references such as "Come in; we can fit your feet no matter how large," or perhaps the ponderous piece of footwear will rest beside a baby's cack with the wording, "Everything in footwear, for father or the tiny toddler."

Robert Wall, of Montreal, who represents the Perth Shoe Co., Perth, Ont., has returned from a very gratifying trip in the interest of the company throughout the Western Provinces, going as far as the Coast.

John F. Clark, of Clark Bros., Limited, of St. Stephen, N.B., and R. L. Savage, of Toronto, who represents them in Ontario and Quebec provinces, are spending a few days in New York, Boston and other shoe centres picking up all the latest ideas in novelty footwear and style tendencies.

FAMILY SHOE SHOP-STREET FLOOR

A WELL DISPLAYED AND INSTRUCTIVE ADVERTISEMENT OF  
MONTREAL FIRM

Wm. J. Fletcher died recently at his home in Orillia from a stroke of paralysis, without ever regaining consciousness. He was a shoemaker by trade and worked with his father for a number of years. Afterwards he built a small shop on William street in Orillia, where he plied his trade until his death. He was 56 years of age.

Thos. Hollowell, of Brantford, has joined the Bantam Battalion. He is a shoemaker by trade and has been appointed shoemaker sergeant of the 226th.

P. J. Losier, shoeman, of Weyburn, Sask., has moved into a new store, which has been completely overhauled and renovated. His place of business is now one of the most attractive.

The Quebec branch of the Canadian Consolidated Rubber Co. recently moved into the Begin building in that city.

From all over the country come reports of the unprecedented demand for sport shoes. Wholesalers and retailers state they did a bigger business in May than in any previous month in their history. The requisitions have simply been unprecedented, and outing footwear is growing decidedly more popular all the while. Since many shoes are built with rubber heels, they are being worn very much for street use, particularly by the younger people. Tennis goods have now much snap and character, style and fit, and come in such a variety of pleasing patterns. This no doubt accounts for the exceptionally active trade that is being done in them, and keeps the manufacturers operating to the fullest capacity. Retailers in all parts of the country have the same story regarding the popularity and unwonted demand for all lines of tennis shoes.

A direct line of steamships with a sailing every six weeks has been established by the Johnson Line between

Gothenburg, Sweden, and Chilean ports, according to B. H. Holgren, a Chilean importer, who arrived in New York on the steamship Stockholm from Gothenburg. The British blockade preventing rubber from reaching Sweden is being seriously felt in that country, according to Hans Lagerlof, of the Scandinavian-American Trading Co., who returned on the ship from an eight-week business trip to Sweden.

Claude Des Rosiers, who has been transferred from the Quebec branch to the Montreal branch of the Canadian Consolidated Rubber Co., was presented with a silver wrist watch on the occasion of his departure.

G. P. Stockton, representing C. S. Hyman Co., Limited, London, Ont., who has been confined in the hospital for a month, having undergone an operation, is now recuperating, and expects to resume his regular trips to Montreal and Quebec in a few days. Many friends will be pleased to hear of his recovery.

T. R. McKenzie, of the Vancouver branch of the Canadian Consolidated Rubber Co., lost his samples recently in a fire at Hazelton, B.C., when the sample room of the Hazelton hotel was completely destroyed.

Ralph Fraser, manager of the shoe department at James Ramsey's, Limited, Edmonton, Alta., has received news of the death of his brother at the front.

Morris Tobin was awarded \$4,000 damages against his former employers, the Elmira Felt Company, of Elmira, Ont., for personal injuries sustained while operating a shoddy picking machine. The plaintiff claimed the accident could have been avoided had the machine been properly guarded. This was denied by the defendants, who contended the plaintiff had shown negligence. The case was heard in Toronto before Justice Latchford and a jury. The plaintiff sued for \$10,000 damages.

Le Baron C. Colt, vice-president and managing director of the National India Rubber Company, Bristol, R.I., died on May 24th, as a result of an automobile accident. The late Mr. Colt, who was well known to the officers of the Dominion Rubber System, was a cousin of R. C. Colt, director and assistant secretary of the Dominion Rubber System. Although a young man, he was eminently successful as a manufacturer, and his untimely death has cut short a very promising career.

### APPRECIATES THE PRICE TABLE

We are always anxious to receive the "Shoe and Leather Journal" and you will find enclosed one dollar for another year's subscription to your valuable paper. The table of prices, which you published a few weeks ago, has been the means of putting us in a position to do a better business. We have this data posted up for ready reference and always consult it on checking merchandise.

Yours sincerely,

Vermilion, Alta. BRISSETT & YOUNGBLUT

### ALL TRADE NEWS AND VIEWS

Enclosed you will find a dollar to cover my subscription for another year. We always look forward to the semi-monthly arrival of the "Shoe and Leather Journal" as it gives us all the news of the trade and keeps us in touch with the shoe fraternity.

## A Shoe That Sells Itself

Will fit 40 per cent. more feet than the ordinary shoe, because it is UNLOCKED and therefore finds the CONTOUR of the FOOT. Fits normal as well as abnormal feet.

### An Absolutely New Principle

applied to modern shoemaking. The lasts are ball bearing and follow the *bottom shape* of the human foot. The upper and sole patterns are SPRUNG and cut under a NEW METHOD. This gives the arch a SPRINGY, FLEXIBLE SUPPORT that is always with the foot and does not pull away from the foot when the heel leaves the ground.

- ☞ Comforting to All Feet.
- ☞ Prevents Flat Foot and Arch Trouble.
- ☞ Means Repeat Business.
- ☞ Makes Friends.

## “WRITE—WIRE—PHONE”

Here is a hackneyed phrase you often hear or read.

Often it means nothing.

With James Robinson it signifies three different ways by which you can place this big warehouse at your service.

# Has Anybody Jumped Your Claim?

If the repair requirements of your customers are not already taken care of in an entirely satisfactory manner (and by that we mean by somebody equipped as we can equip them), it will pay you well to write us **now** for a catalog and full information regarding the advantageous terms on which we place our machines with shoe retailers. We would also be glad to supply any specific information you may require about this wonderful and growing part of a shoe retailer's business.

We are pioneers in this business. Our machines have earned a high reputation for excellence in construction and durability. They are in use by the most successful shoe retailers and shoe repairers, and with them we supply a service that is only paralleled by that which has built up the great shoe industry of the country.

Your request for information will place you under no obligation to us. We are glad to supply it.

# Survival Value

What is it? Survival Value is the lasting prestige added to all footwear by the affixing of the **Union Stamp**—it is the surviving standard because:

- 1st It is a guarantee of honest footwear, made under the best conditions.**
- 2nd It is a pledge of expert workmanship.**
- 3rd It is the pass-word which opens the sales doors to Union Men everywhere.**
- 4th After the other inducements have all been recited, the conclusive and finishing argument is the UNION STAMP.**

Every shoe bearing the **Union Stamp** retains a sales value of long duration, for no shoe bears the stamp unless it has been produced under the proper conditions and represents honest value.

For mutual profits, better and bigger business, insist upon the official stamp of the **Boot and Shoe Workers' Union**—the only guarantee of Union Footwear.

## THE BUSINESS OUTLOOK

**General Business Situation Good—Prospects in the West Continue Bright—Ontario and the East Promise Well Notwithstanding Backward Summer Weather—Payments Good and Buying Better Than Usual**

**B**USINESS conditions in Canada were never better as a whole than just now. Especially is this so of the shoe trade, which is experiencing unprecedented activity for this time of year. Usually the months of July and August are such that both wholesaler and retailer simply wait until the Dog Days pass before expecting anything like normal conditions. To-day manufacturers and jobbers are facing a situation that is not only perplexing but harassing. Where factories have run half time they are now pressed for goods by dealers to an extent that, with the shortness of help, they are put in a most peculiar position. This month will, however, see the worst of this condition over, although some dealers are agitated already about spring goods.

Meanwhile, business conditions throughout the country are most reassuring. Wholesale people report collections as better by long odds than for the same period for several years. Reports from the west are particularly satisfactory, money coming forward on current account as well as in payment of old bills. The crop outlook there is good for, notwithstanding the diminished acreage owing to the war, prices will bring the results in cash fully up to ordinary years.

In Ontario there has been considerable talk about shortage of crops, and, no doubt, the acreage in many lines has been reduced. The deficiency will, however, be made good in other ways. The hay and oat crops will be good, and other produce will help to wipe out any likely deficiency in the sum total on staple lines. In Quebec and the Eastern Provinces the outlook is better, as far as crops are concerned, than in Ontario, as there has not been quite as much rain. The shortage of help has, however, militated against agricultural as well as industrial development.

The great hindrance in all lines just now is the scarcity of labor. Both farmers and manufacturers are feeling the pinch very keenly and, no doubt, many will suffer as a result. The effort to enlist the co-operation of women and school children has not been a marked success so far. There does not seem to be a full appreciation of the real situation. Here is where the authorities have failed to rise to the occasion.

■ In the shoe trade all eyes are turned towards the new samples for spring. The interest centres in prices rather than the goods. Shoe manufacturers are inclined to hold back as long as possible to allow the atmosphere to clear. The policy will be to sell subject to changes in cost of raw materials. Few shoe manufacturers are sufficiently bought ahead to be able to give definite prices for spring delivery and changes in prices will necessarily be the order of the day with respect to styles, high boots in women's and an accentuation of the modes in these as well as men's lines will be found in the new season's offerings.

# THE WAY TO SETTLE THE "KICKS" OF CUSTOMERS

The Normal Obligations of a Dealer to His Patrons—Just and Unjust Demands and How They Should Be Decided—Improper Fittings One Reason for Many Complaints—How Co-Operation and Education Will Solve All Perplexing Problems

**T**HIS is a subject which has bothered every thinking retailer. Most of us want to be fair with our customers and fair with ourselves, and at the same time make all the profit we can. Webster says a complaint is an expression of grief, censure or dissatisfaction. When a customer complains he expresses his dissatisfaction with some part of his purchase. For the purpose of analysis, I have divided complaints under two headings: namely, complaints on merchandise and complaints on store service, says F. E. Butterworth, of Regal Shoe Store, Pittsburgh.

Complaints on merchandise are those which trouble us most. There are a few complaints which we get, such as soft toe boxes, soft counters, and other defective materials which may happen to be used. Every retailer welcomes such complaints, because he knows that his customer is entitled to an adjustment, and that the manufacturer from whom he bought the shoes, if he is at all reliable, will be ready and willing to make a proper credit allowance. However, it so happens that these are only a small proportion of our complaints. Customers make many so-called unjust complaints, such as broken vamps in russet shoes, cracked vamps in black calfskin shoes caused by abusive wear, other complaints on wear, where the appearance of the shoes is sufficient proof that they have been worn for a purpose for which they were not intended. Remember, I called such complaints "so called" unjust complaints. They are unjust from the point of the maker and designer of the shoe and from our point, but not from a customer's.

When a customer makes a complaint, such as I have just described, he does it because we have educated him to do so. In the past, we have vied with one another, trying to see who could outdo his competitor in the liberality with which he adjusts complaints. I have seen the time when I would almost hand a customer the key to my store to satisfy him. We have not educated him to know that many complaints are unjust.

Next, are the complaints on store service. Store service includes every action made to serve the buying public. Store service is either good or bad, as it measures up with the standard set up by other retail stores in our locality.

## Improper Fitting Creates Dissatisfaction

The majority of complaints which I receive on store service concerns improper fitting, and the non-delivery of purchases at the time promised or within a reasonable time thereafter. Is the customer justified in making such complaint? I say yes positively. Why? We have educated the public to complain, and so have other merchants. One often sees a sign reading something like this, in public lunch places, particularly: "If we please you tell others, if we don't, tell us." Perhaps we don't have that sign in our stores, but the attitude taken by other merchants is reflected in our business, with the result that our service must be above complaint.

Complaints about improper fittings simply show how weak we really are. Members of our sales force do not know when a shoe really does fit a foot, and again they allow customers to purchase shoes which they know will not be satisfactory. Clerks have been educated to make sales at the expense of a customer's comfort and satisfaction. If one of you gentlemen were taken ill this morning, our chairman would delegate some one to call a physician. The physician's advice and instructions would be carried

out. Because he is a registered physician we have confidence in his ability. Does the average customer have anything like that confidence in a salesman? No, because frequently incompetent, inexperienced help has abused a customer's confidence.

Many complaints on store service are related to complaints on merchandise. It is acknowledged that store service and merchandise go hand-in-hand. No store is successful without a good percentage of efficiency in both branches. One is dependent upon the other. Often complaints on the wear of merchandise may be traced to something in store service which left an unfavorable impression on a customer's mind at the time the shoes were purchased. Perhaps he was not welcomed with a cheery greeting, or perhaps the salesman was a little too insistent upon his purchasing this particular pair of shoes, or perhaps he didn't have quite the right size, and made a substitution. Result—the customer was just looking for a chance to find some fault with the shoes. Again, many complaints which I am forced to settle are caused by improper fittings, either too narrow or too short. Such shoes are subjected to an additional strain which they will not stand.

## Educate Public to Make Proper Complaints Only

By this time some of you are wondering how big is Butterworth's allowance and rebate expense. Let me assure you that this item is not sufficient to prevent me from conducting my business well within the average percentage of total operating expense, as shown by the Bureau of Business Research at Harvard University. With many, however, the rebate and allowance item is becoming a formidable enemy toward the making of a profit. Because of the increase in this item, we must not jump to the conclusion that the customer is wrong. Even if we could band ourselves into a strong organization we could not refuse to adjust complaints. The Pittsburgh Railways Co., the Standard Oil Co., or any of our large corporations are glad to adjust complaints, but they endeavor to educate the public to make proper complaints.

There is a way to settle complaints on the basis that a customer is always right, and still reduce our allowance and rebate expense. It is by co-operation and education. Let us teach the public that the price which they pay for a pair of shoes not only covers actual wear, but comfort and beauty. Let us build up our sales forces to the point where the buying public will have confidence in a salesman's opinion. Let us co-operate one with the other in the settlement of complaints. Try to cut down the amount of the allowance to each customer. Do not give him a new pair when he has had two month's wear. Stick to our associations, and the result will be a satisfied buying public, and an honored and profitable shoe retailing profession.

### THE BEST INVESTED DOLLAR

You will find one dollar enclosed for my subscription to the "Shoe and Leather Journal." We consider the subscription the best invested dollar in our business and congratulate you on the steady improvement in your paper.

A. McDERMAND.

# KEEP AN INDEX OF YOUR CUSTOMERS' FEET

**A Business-Like Way of Keeping Close to Your Trade—Its Manifold Benefits Explained—It Saves Time on Future Fittings and Is a Guide When Buying—The Application of Scientific Principles—When You Get a New Patron, Keep Him**

**T**HE retail store should be a business-like institution. Too often it is unbusiness-like. A well-managed factory makes a business of knowing about how many orders it can handle, and who has bought its product. In other words, the management has its finger on the pulse of the productivity of the plant, knowing to within a small margin how much raw material is required, how work is distributed, the relation of sales to manufacturing, etc. A thousand and one details are taken care of each day, consequently that plant proceeds on a business basis. There is no scrimmaging around to find out facts about the business.

Scientific management can be applied with equal value to the retail shoe trade, says the "Shoe Retailer."

Keep an index of your customer's feet. One retailer accomplishes this by means of "My Book," as he calls it. In this book he jots down the name, address, number and style of the shoe sold. Of course, he gives a careful fitting in the first place.

One morning the writer found him down on his knees carefully measuring a foot, asking the customer to stand with full weight on the foot, looking at the arch and noting the tread of the old shoe. Then he began to try on shoes and after some time found a fit that suited.

"That's fine," the woman remarked, "I always dread to get a new pair of shoes. It usually takes all day to find a pair that will fit, and then I am not always satisfied after I have worn them a bit."

"We'll always keep a pair in stock for you, in your style, size and price. You can 'phone or send your order by mail any time," he assured her courteously. "When we once know a customer's size, we aim to supply him whenever he calls for a new pair of shoes."

## A Real Service for Customers

The woman beamed. Her manner and words expressed real thankfulness and it was evident that this retailer had landed a steady customer. Anyone would have appreciated the service of that shoe store, but still there was the question whether it paid. It took a long time to fit that pair of shoes.

"Does it pay?" I asked. "To take all that time to fit a pair of shoes seems giving a little over of good measure of service." With a shrewd glance, the retailer explained his reasons for such careful service.

"We are in business to make a profit, and we believe we can afford to give so much time to the fitting of shoes.

"It is true that it takes a good deal of time and patience to fit a shoe but—that applies to the first fitting. After that by glancing into my book and looking up the data, we can supply the customer in a much shorter time than we could in the old way where we made a fitting each time. We save the time of trying on a half dozen or more shoes. We also save the actual motions of getting down the various boxes. So after the first fitting all the gain is on our side.

"Then there is the practical side of my book when we come to stocking up. It keeps a check on the buying. We know pretty well just what shoes our customers will want and about when they will want them. After a while we know about how long each customer wears his shoes. We know his peculiarities of foot habits.

"We had to put in some of the brilliant topped footwear this season, because we have quite a trade from young women who are nobby dressers. But our lists showed us just how many pairs we could sell.

"It is good business sense, if I may say so. It enables

us to make more frequent turn-overs, and still not invest too much capital in stock. We make a bigger profit, because we are seldom left with a lot of stock on our hands when styles change or the season closes.

## System Keeps Customers Coming Back

"Better even than all that, though, is the fact that it keeps customers coming to the store. They stand by us. It takes an unusual bargain or cutting of prices to tempt our customers away. When you remember that every time a customer calls for shoes, and failing to find them in our store, goes to a competitor, then it is readily seen that in 90 per cent of the cases such a customer is lost. We don't intend to lose many customers in that way. It is hard enough to get customers in these days of competition, and when we get them, we intend to keep them, if thought and good service will do it.

"There are customers who live in Chicago; one man, for instance, we have supplied with shoes for the past seven years. Another customer, a woman, writes every year for her shoe supply. Here is a man who lives 500 miles away. He had chronic foot trouble until we began to take care of his shoe problem. Now he sends in his orders regularly. By means of the parcels post it is easy to fill out of town orders.

"There are advertising possibilities in this way of serving our trade. It is easy and profitable to write a personal letter to our customers, if we are featuring new styles that they will like, or putting in a new line that will be likely to meet with their approval. By this method there is no waste of stamps or time on doubtful prospects.

"But we are outgrowing the book. We are going to have a card index for each customer and keep a regular index file. It will enable us to write down additional data and keep a more complete and more readily accessible record." This retailer was enthusiastic about his plan. Do you blame him?

AN EXTERIOR VIEW OF THE SHOE STORE OF SMITH BROS., WINDSOR, N.S.

## "ONE OF THOSE REAL DAYS THE FISH DID BITE"

Party From Quebec Went Angling but Toronto Wholesale Shoe Merchant Showed Them All a Few Wrinkles—Says His Word Used to go At Par but Since Telling of His Experience on That Memorable Jaunt Things Apparently are Different

"There are days when the fish won't bite:  
It's either too calm or else it's too rough;  
It's either too warm or not warm enough;  
The wind's the wrong way or the moon's not right;  
It's either too cloudy or sun's too bright;  
It's either too wet or else it's too dry,  
Or for some other reason, you can't tell why—  
There are days when the fish won't bite.

"But there are days when the fish will bite:  
When it's not too calm and it's not too rough,  
When it's not too warm but just warm enough.  
And the big, old fellows, oh, joy, how they fight!  
Your rod's bent double and you keep your line tight.  
How they leap, how they run,  
Gee whizz, but it's fun,  
On the days when the fish will bite."

Oh, it's great to go fishing; especially if you are a fisherman and know how to describe your success with becoming modesty and sang froid.

Hugh White, of the White Shoe Co., Toronto, went down to Quebec the other day and while there fell in among some real anglers. He became seized with the idea that he too could do something in that line. Along with David Marsh of the Wm. A. Marsh Co., Walter May, of Boston, and Edgar Clement, tanner, he started in an automobile to a point some thirty miles north of the Ancient Capital. They certainly had a good time, although it rained a great part of the while but, according to the members of the party, the fishing was so fine that no one seemed to pay and special attention to the wet. The ride out was pleasant(?) and the only mishap was getting stuck in a ditch, but another motor soon hove in sight, came to the rescue of the stalled company and pulled them out. Finally they disembarked on a four-mile tramp over the rugged landscape and came to the lake.

Now, here is what Mr. White says—that they caught four hundred trout and that he landed just one hundred and fifty of them himself, which he brought home to Toronto and distributed among his friends. The sport began with a bang. Just as the party were approaching the spot, which is known only to certain shoemen and tanners and after they had rounded the hill, Mr. White asseverates that he saw a big fish lying quietly and peacefully near the shore—evidently having heard of this jobber's splendid angling proclivities. There was an old line lying along the bank apparently left there from the previous year. Mr. White picked this up and happening to have a loose hook in his pocket, attached it to the string, cast it in the water and the gamy trout was landed without even a struggle.

### Mosquitoes—Just a Few of Them

Well, to narrate in detail the accomplishments of the members of the party would be like painting a lily or gilding fine gold. Finally after the lake was depleted of all its piscatorial denizens the quartette started back to Quebec in the rain. They hit only the high spots on the return and landed in town looking like a pack of drowned rats, but still smiling. Every few minutes Mr. White's arm would give a twitch as if he had contracted St. Vitus' dance by yanking in so many fish, but he has now recovered sufficiently to guide his new Hudson super-six around the streets and suburbs of Toronto.

Mr. May seemed to be sugar-coated as the flies and

mosquitoes all made for him on the memorable outing. He didn't seem to have the knack of training them to sit on his hands or his face without biting. Apparently he did not have enough patience with them, because the moment they bit him, he would kill them instead of taking them gently aside and explaining what an impolite thing it was for them to turn their teeth upon their host. Mr. May was still scratching the sore spots vigorously when he left for Boston.

Mr. Clement seemed to be immune from all outside attacks, which fact was not comforting to Mr. May. He acted as chauffeur and certainly gave the quartette a lively ride home. Well, when Mr. White landed in Toronto he

ONE OF THE SMALLEST SPECKLED BEAUTIES CAPTURED BY MR. HUGH WHITE, TORONTO. NOTE TWO FOOT RULE RESTING ON LOWER RUSTIC BORDER.

had wired instruction ahead to have his auto with the latest submarine attachments affixed come to the depot so that he could carry home the trout that had been forwarded in a specially sealed compartment coach.

The next day there was a meeting of the board of directors of the Independent Rubber Co. at Merriton and among those present were Philip Pocock, of London, James Robinson, of Montreal, J. A. McLaren, of Toronto, R. F. Foote, of Merriton, and Mr. White, the eminent exponent of piscatorial pursuits. After the business of the session had been concluded Mr. White naturally began to tell his fellow associates something of the success of his recent expedition. As he proceeded he grew more fluent and eloquent and immediately some of the members began to heckle him in regard to weight, number, deliveries, etc., but Mr. White was undaunted. He valiantly stuck to his story about landing 150 fish, but was met with such impertinent interjections as, "Oh yes, it is a fine day," "My, but don't the crops look well," "Wonder how long this warm weather will last," etc.

Then, with fire in his eye and murder in his voice, Mr. White arose and passionately exclaimed—"Well, gentlemen, there was a time when my word at this board used to be taken at its face value but it seems that day is past. Henceforth, when I go on a fishing trip you will never hear a word from me regarding the success of my jaunt. Of course, it is very easy for men who have never achieved any distinction in that line to belittle and deride the accomplishments of one who is a meek follower of Izaak Walton. I assure you that I can substantiate every word spoken in reference to the number that I caught and the respective weights and sizes. Allow me to thank you most sincerely for your very kind and appreciative hearing and most gentlemanly and courteous words of endorsation, and now I'll say Good-day."

# BUILDING UP THE PERSONALITY OF YOUR STORE

**It Is the Impression That the Customer Receives on Entering a Store that Determines if He Shall Become a Regular Patron—If Every Attention is Given to Ensure Satisfaction with Your Purchase It is Ten to One That You Will Be Satisfied**

I must say a word or two about what seems to be the retailer's main problem to-day. That is, higher prices and the novelty situation. These may, no doubt, be looked upon as our most serious problems in the retail shoe business to-day. The first of these problems, it would seem logical to suppose, should not cause us to be greatly exercised, so long as we do the fair thing by our customers. The public is rapidly coming to realize that higher prices will necessarily prevail, until the relations of supply and demand have again returned to a normal or near-normal state.

Novelties are more or less cause for anxiety with many retail shoe merchants. But it would seem unwarranted anxiety when the matter is given logical consideration. From statistics I have been able to secure from various quarters, it is apparent that from 35 per cent to 50 per cent of the retail shoe output to-day is on novelty goods. This percentage has shown an increase of probably 15 per cent to 30 per cent since four or five years ago. The most difficulty seems to be that the retailer becomes excited when he is considering buying his novelties and therefore is apt to make some mistakes in the styles which he buys and the manner in which he buys them.

IT would seem wise, therefore, to recommend a careful analysis in each instance of the probable amount of novelties which can be sold and on that basis determine just how much capital should be invested in novelties. When this has been determined, this amount should be absolutely set aside for this purpose. I am speaking now, from the experience of two prominent New York State retailers, both of whom have reduced their novelty buying to an exact science. Each of these figures about so much for a running novelty stock, the remainder for staples, and insists upon not overbuying on either.

While leaving room for a quantity of novelties they can readily sell and buying only those which are likely to interest their particular class of trade, and with frequency offering something radically new in this department, both of these merchants are finding their novelty problem not only simple, but very profitable.

As one of these merchants expresses it: "I am careful not to overdo any particular novelty style. Women tire of the same style after a short time and are ready for something different. Therefore, I sell while there is interest and clean up gradually, adding new styles to take place of the old."

Both of these dealers find little element of speculation in this matter of buying novelties. The idea of both of them is to buy so there is certainty of cleaning up, on the assumption that it is better to buy 30 pairs less than 10 pairs more than can be sold, part of which must be practically given away and the rest remain on the shelves, a dead loss.

## The "Personality" of a Store

But the main point which I wish to convey in the few moments at my disposal is what I will term building a retail store into a definite personality.

The day is rapidly passing when men and women consider the retail shoe store simply a place where they can buy shoes. They are, it may be unconsciously, influenc-

ed in their choice, by what I choose to call the "personality" of some one store.

For an illustration to get a clear idea of what composes this personality: You have all no doubt seen what is termed a composite photograph, for example, of a group of prominent men. You have in this composite photograph one which possesses all the lines of character and expression of each individual. The mind of a customer holds some such picture, I imagine, of the store where he prefers to trade. Into this mind picture enters every detail: Attention, merchandise, service and environment.

The right kind of merchandise is the most vital consideration in the composition of this picture. It is the first consideration. In days gone by there was an accepted expression that "the American public likes to be fooled." But while this may still pertain in rare instances to-day, the vast majority of Americans want the truth, the whole truth and nothing but the truth.

## Success Built Around Confidence and Friendship

If Jones says certain favorable things about his shoes, which his customer's experience fails to corroborate, Jones has gone a long way toward the loss of a customer. The sentiment for truth in advertising and selling alike, must be faithfully observed or we will lose our hold on business growth. True business success is built around confidence and friendship. And there is no more efficient way to instill confidence and friendship, than by the right kind of advertising, truth-laden and substantiated by clean cut service.

But while honest merchandise may be of prime consideration, we must not forget that retailing possesses a social, as well as an economic side. The personal element must be reckoned with. People like to trade where there is an atmosphere of welcome, where there is time for a pleasant word, and where the desire to dispose of merchandise and "capture the coin" is not apparently the one and only thought. The two can, and must be blended successfully so that buying and selling become mutually agreeable and a true business friendship is formed.

Suppose, for instance, that Mr. Jones, the proprietor, steps casually up to Mrs. Brown who is being waited upon by John, his clerk, and addresses Mrs. Brown in some such manner as this: "Good afternoon, Mrs. Brown, is John taking good care of you? How does that shoe suit you? Does it fit comfortably?" It will readily be seen by Mrs. Brown that Mr. Jones has a personal interest in the service which she receives in his store, and it does much towards making her pleased and satisfied to trade with Mr. Jones.

We hear much about the human interest in advertising. It is a good thing, and, well executed, makes advertising more effective. I would recommend it for your advertising, but would likewise urge you strongly not to forget it in your selling, for it plays fully as important a part in selling as in advertising.

The other day I chanced to overhear a conversation between two ladies who were seated just behind me in the street car. It ran something like this: Lady No. 1: "I went into so-and-so's store the other day to get a pair of shoes. I thought at the time that they would be all right, and the clerk seemed very anxious to sell them and he assured me that the fit was perfect. So I went out. But the shoes don't fit at all and they hurt my feet terribly. I am disappointed in that store. They are always boasting in their advertising what expert fitters they have, but I don't see it."

"Lady No. 2: "I never have any such experience and I have traded with so-and-so for years. Why don't you try them?" Lady No. 1 replies: "All right, I will. Will you go with me this afternoon?"

This conversation has in it a lesson of importance with regard to service. Perhaps the dissatisfaction of Lady No. 1 was partially her own fault. The clerk might have been helplessly facing a predicament, which is sometimes the case. But I was inclined to agree with the lady in the case because of some of my own experiences in having shoes fitted. The point is: Dealer No. 1 lost a customer because his fitting service was not what it should have been, and dealer No. 2 gained a new customer through a regular one who boosted for him because her shoes were always fitted right. This one instance demonstrates the value of careful service, not only in fitting, but in all points from the showing of the shoes to the wearing of them by the customer.

### The Store Environment

There is one feature which enters largely into the personality or mind impression of the store and that is environment. To begin with, let us start from the outside—the approach, which is the display window. In the opinion of alert merchandisers the show windows form an invaluable part in their publicity. The show window will do one of two things. Either instill interest, which must eventually result in buying, or repel. There is no "happy medium." Let us picture two methods of window treatment, you have seen both, and will readily see that our conclusions are correct.

Here is a window of a shoe store in a promising location. Your first observation is besmeared glass. Your next is shiftlessly arranged merchandise and dust everywhere. What must be your ultimate conclusion with regard to that store? And it certainly goes farther than the store alone—it influences your opinion of store, merchandise, service and of the personal characteristics of employer and employe. Your conclusion is just this: That store is not out ambitiously after business; the quality of their merchandise is questionable; you conclude that you would prefer not to buy there. These and other thoughts are to be expected and it will take a long effort to break down the harm created by a shiftless window. This store you pass by without a further debate. The same thing applies to the interior. The arrangement of goods on the shelves and counters, cleanliness of the floor and furniture. The mind of the average man or woman thrives on things artistic and neat.

Further down the street you stop, impelled by something which you later decide is an attractive window. Here the glass is clean, clear and bright; nothing to indicate that dust ever existed; merchandise artistically displayed, and here and there, attractive messages pertaining to that merchandise and the service of the store. You are interested—you cannot avoid being interested; 999 times out of one thousand, if you are looking for shoes, this is the place where you choose to buy them. You feel that these people are anxious for your trade. Inside you find the same thrift and cleanliness. Every attention is given to insure satisfaction with your purchase, and it is ten to one that you will be satisfied. Let me say right here that the latter type of window is the rule rather than the exception in this city. I will not say that the first type has altogether disappeared, for I would be dodging the truth.

These suggestions are made with the idea that those of us who are giving our windows proper attention, will exert ourselves to do even better and that those of us who are not watching them closely enough will give these suggestions a trial.

### Shoe Store No Place for Shiftless Dressers

Personal appearance counts largely also in this store personality—possibly more than is generally appreciated.

It is a task for me to do business with the shiftless dresser, the man who displays little heed as to his personal "get up," even though his proposition be ever so attractive. I have reason to question this ability. He does not impress me as possessing sufficient ambition to care whether I am pleased or not. Therefore, I say if I were a retailer of shoes I would be very careful that my personal appearances should be subject to no criticism, for if I neglect it, sooner or later some customer will find my very carelessness reason for trading elsewhere.

Now perhaps the question arises in your mind, "What has all this to do with my problems of to-day?" Simply this, the more complicated become our problems the more keenly do we need to develop that side of our business which makes and holds friends, and to my mind there can be no better way than by "truthifying" (to coin an original expression) our advertising and putting the real story of our service into it—in displaying our merchandise in eye-pleasing environment—and in developing the social end of our business as energetically as we have heretofore emphasized its economic side. Let us play the game from the customer's standpoint as well as from our own, and play it fair and square.

Thus we shall form a personality in our store which will cause people to select it as their store in the same relative way as we choose our friends, because of certain traits and characteristics which seem pleasant to them.—By E. H. Cowles, advertising manager for Utz & Dunn Co., before the Rochester Retail Shoe Dealers' Association.

### MAKING THE WRAPPING PAPER WORK

A merchant who was not satisfied merely to print his business card on his wrapping paper, added the following announcement: "This wrapper is valuable—save it. To the boy bringing in the largest number by (specified date) we will give a pair of school shoes. The girl bringing in the largest number will receive a pair of walking boots free. A souvenir will be given to every boy or girl bringing in ten or more coupons. Ask your friends to help you save them."

This looks to be a particularly attractive idea, the only possible exception being that many people object to carrying a parcel looking as though it were wrapped in a bill poster. This difficulty could be easily remedied by having the message printed on a small sticker not more than a couple of inches wide, to be placed on the wrapper neatly and inconspicuously.

### HANDLING NOVELTY SHOES PROFITABLY

We have been stung on cloth tops and other novelties because we tried to merchandise them the same way we handled our staple lines. It is very much like the millinery business, which is nothing but novelties; they do not order six months ahead and in tremendously big quantities, but in smaller lots and as the styles come out; and the shoe men should bear in mind and adopt these principles to the extent that they will fit this business. If we do, we will not have so many out-of-date novelties on hand, and we will be able to make money on the things as they come out. I think that the women are going to want pretty shoes during the coming seasons just as they have during the last year, and we will have to handle them according to the demand. It is up to each man to study his business and find out exactly what he can use, then to buy accordingly. We do not want to discourage the novelty business; it has afforded the best opportunity the shoe men have ever had to make money, but we must study it closer, not buy so far ahead and only buy goods as we want them."—Edwin Hahn, before the Washington Shoe Retailers' Association.

### HIGH HONOR FOR TORONTO SHOEMAN

The new Grand Master of the Independent Order of Odd Fellows in Ontario for the coming term will be S. C. Parks, who has been a shoe merchant in Toronto for several years. He has always been an active and an energetic worker in the ranks of the society and at the forthcoming Grand Lodge meeting at Chatham, on August 9th, 10th and 11th, he will step into the highest position in the gift of the Triple Link brethren of the province. For the past year he has been Deputy Grand Master. Mr. Parks' native town is Galt. There he attended school and played about the streets. When he got down to the more serious business of making a living, he learned the trade of a machinist. Then he took a position with the Canadian General Electric Co. in Peterboro, where, after spending a year he went to Woodstock. There he met Ed. Squires, then manager of the Neill Shoe Store in that city and an old Peterboro friend. Mr.

S. C. PARKS, TORONTO

Squires asked Mr. Parks, who had Saturday afternoons off each week, to give him a hand in the store at selling shoes. This is how the subject of this reference happened to get into the footwear game. He liked the business from the start, and after a short experience was called to the headquarters of the Neill system in Peterboro, where he served four years on the staff. He next went with Gough Bros, who were then doing business in that city, having charge of their shoe department. They afterwards removed to Toronto, and Mr. Parks secured the appointment of manager of the shoe department of the Robert Simpson Co., Toronto, which he filled for four years, trebling the business in that time. His next connection with the trade was as traveler for the James McCready Co., of Montreal, covering North-western Ontario. Just eight years ago he started business for himself at 1224 Yonge street, where he has a neat, well-laid out shop, with fine display facilities.

It was in 1898 that Mr. Parks joined Olive Branch Lodge No. 88, I.O.O.F., Woodstock, and later transferred his membership to Otonabee Lodge No. 13, Peterboro. On coming to Toronto he became identified with Wilton Lodge No. 242, and his advance in the order has been rapid. After going through the chairs in Wilton Lodge, it was not long before he was appointed District Deputy Grand Master, when the whole of Toronto constituted one district. He had twenty-five lodges to visit and such has been the progress of Odd Fellowship in the Queen City that to-day there are forty-

eight lodges with six district deputy Grand Masters. In 1914 at the Grand Lodge session in Toronto he was elected Grand Warden. Last year at Stratford he took a step higher, becoming Deputy Grand Master, and next month he will be elevated to the post of Grand Master, an office which he will no doubt fill with the same devotion to duty, active interest, and thorough application that has characterized his regime in all his relations with the fraternity. To rise from the plane of a newly initiated member to the dignity of Grand Master of the province in less than a score of years is, to use a colloquial expression, "going some."

Mr. Parks is also Past Chief Patriarch of Rehoboth Encampment, No. 50, and a past Captain of Canton Toronto, No. 7, Patriarchs Militant, with the rank of Major on the general staff and assistant Inspector General of the Cantons of Ontario. Well liked throughout the order, he is also popular in the shoe trade, the members of which will congratulate him on his splendid advancement in one of the leading benevolent and most progressive organizations on the North American continent.

### MUST WATCH BUSINESS CLOSER

"I cannot see that shoes are going to be any cheaper this fall."

"Don't anticipate beyond your power of paying your bills."

"Pretty shoes are going to be with us indefinitely. I would not call them 'novelty shoes'; they are really 'pretty shoes.' Just as long as the women wear short skirts and they are going to for some time because of the fine showing they make, we will sell them. They have been the making of the shoe business, for they are what have shown us to be real merchants instead of just ordinary shoe men who do not know how to do business."

"The time is at hand when we will have to be better merchants. We will have to watch our business closer. We will have to figure day for day. We will have to watch our trade every minute. If we do all these things we will make more money this year than we ever did before in two years. If we don't, we will find that we will go 'broke' quicker than ever before. We will have to get our profits. Shoes that are right are shoes that the people want, and these will bring any price within reason that one chooses to ask for them. If we buy wrong and have wrong sizes and wrong styles, we will have shoes that are worth less than at any time in the history of the business."—J. A. Berberich, before the Washington Shoe Retailers' Association.

### LEARN TO "SIZE UP" YOUR CUSTOMER

Some of the greatest men in the world, commenced their business life in some work connected with footwear, says the Invictigram. It is said that England's little giant, David Lloyd George, was a cobbler during his early days. We know that there are notables, past and present, who have had a like start. The fact of the matter is, the shoe business in any branch, has much to offer to the young man who is ambitious, and in the retailing of shoes, opportunities are offering, which did not exist a few years ago. The shoe retailer, as a whole, has modernized his business as quickly if not more so, than other classes of retailers. To the shoe salesman, in these stores, one of the greatest helps to advancement is, a knowledge of human nature, and he who would care to make a good start on the ladder of success, must understand the peculiarities of humanity. He must be able, at a glance, to size up a customer as he enters the store. The more quickly he can do so, the better able he is to handle that customer, make the sale, and commence on the next buyer. In some of the biggest stores, the motto is: "Never let a customer remain unoccupied," and to prevent this, you will see one clerk making a round of three or four customers, leaving several styles of shoes with each.

## A MAN OF PARTS

(See Front Cover)

One of the most modest of our prominent leather men and yet one who stands in the forefront of the business to-day is Mr. John Sinclair, of Barrie, Ont., who is the executive head of the Barrie Tanning Company.

Mr. Sinclair and his brother, who are both practical men and know the trade from the hide through to the finished leather, began business for themselves in a small way in the town of Port Hope in a ramshackle place that soon proved not only inadequate but unsuited to their growing business.

In January, 1893, they moved to Barrie, after organizing a company that put up their present plant which, by the way, has had to be extended several times since they began operations.

Mr. Sinclair is one of those quiet, unobtrusive business builders who keep their mind on the race and their nose to the grindstone. He has only one hobby and that is making and selling leather, although he manages to mix in some of the local affairs of Barrie and the district.

He is appreciated by a wide circle of friends who know his worth and has been honored by his leather confreres with election to office in the Tanners' Section of the Board of Trade.

He is one of the newer generation of tanners who do not settle down in ruts but go out to see what others are doing in their line. He has been talked of several times for municipal honors in Barrie and has more than once made a reputation in addressing the council and other public bodies, but so far he follows the policy of minding his own business.

## "CONSOLIDATED" PICNIC WAS A HUMMER

The annual picnic of the employes of the factories of the Canadian Consolidated Rubber Co. and the Canadian Consolidated Felt Co., held at the West Side Park, Waterloo, Ont., on Dominion Day, was a fitting and enthusiastic celebration of the forty-ninth natal day of Canada. There were over five thousand people in attendance, and the event was the most successful and enthusiastic ever undertaken by the employes. There was a splendid programme of sports, which started in the morning and continued until late in the evening. Some thirty-two items in all were scheduled and at night there was a magnificent display of fireworks which was viewed by thousands. All the arrangements in connection with the big undertaking of the employes were well carried out and the prizes given for the different events were valuable. The frog and wheelbarrow races, the pie eating contest for boys under fourteen, the watermelon contest, the Mutt and Jeff race and other features were highly amusing.

A burlesque baseball match in which a rugby football and short bat were used resulted in the score of 14 to 12. A tug-of-war inter-company contest between the Kimmel felt factory and the Berlin felt factory vs. the Merchants Rubber Co. and the Dominion Tire factory aroused much interest. The Dominion Tire team of nine men, under Captain Findlay, won out after an exciting pull. In the relay inter-company race the Merchants Rubber team conquered.

Refreshments of all kinds were served by the Consolidated Co. at which there was an abundance of good things, including ice cream, lemonade and soft drinks. Even free street car tickets were provided the employes so that every one could attend the great outdoor fete. No detail was lacking to contribute to the comfort and enjoyment of the throng, who spent an unusually happy day.

T. H. Rieder, vice-president and general manager of the company, was on the grounds and P. Y. Smiley, general factory superintendent, was here, there and everywhere. Two excellent bands provided music.

The following were the officers of the day:—

Committee of management—C. C. Hahn (chairman), N. M. Davison (secretary), E. W. Voelker, chairman sports committee.

Chief clerk of course—E. D. Campbell. Assistant clerks of course—Course No. 1, O. Fleischauer, J. W. Kirkland; No. 2, H. Wellein, R. C. Weber; 3, W. J. Smith, J. Faber; No. 4, H. Wolfhardt, Mr. Hedrich.

Official judges—Course No. 1, A. H. Kabel (chief), H. K. Ratz, W. Merkle; No. 2, Gus Albrecht (chief), J. Koch, H. Krueger, W. McDonald, H. Wise; No. 3, W. Ostrandér (chief), George Schmidt, J. Oliver, H. Jacobi, O. Hiller; No. 4, A. Steen (chief), C. E. Whitter, F. Petch, W. S. Findlay, Mr. Eisfelt.

Official records—Herman Kraatz, Herbert Meihm, R. W. Lautenschlager.

Official starter—Leon Pequegnat.

Course curators—Wm. Koerler, H. Graber.

Course police—L. B. Albrecht, Peter Weidenheimer.

Announcer—John L. Holtz.

## TAP SOLES GO UP TWENTY-FIVE PER CENT.

The price of sole leather is still ascending and last week there was an advance of twenty-five per cent. on all kinds of tap soles and top lifts. The new quotations apply to rights and lefts and straight cut. The figure now prevailing on some of the most purchased lines are:—Men's taps, XX, six inches high, per dozen pairs, \$6.60; men's taps, XX, 5½ inches high, per dozen pairs, \$6.15; men's taps, 4½ inches high, per dozen pairs, \$3.45; women's taps, XX, 4 inches high, per dozen pairs, \$2.90; XX, 3½ inches high, per dozen pairs, \$2.50; women's taps, X special, 4 inches high, per dozen pairs, \$2.15.

There is a corresponding increase in slip soles for men and women and also for top lifts.

The new price list for sole leather that went into effect last week shows an increase from two to seven cents per pound. The advances are from two to three cents on sides, three to five cents on backs and five to seven cents on bends. The terms are two per cent. thirty days, nett sixty. The new prices are:—

	10 Sides or More One Shipment	Less than 10 sides
Spanish Sides—		
No. 1 or Best.....	50	51
No. 2 or Good.....	49	50

# WHY THE MAIL ORDER BUSINESS SUCCEEDS

Reason Why People Shop Away from Home Not Always Price—Retailers May Benefit from a Study of This Question from a Disinterested Standpoint.

By A SMALL TOWN RETAILER

**W**HY do people buy by mail? Ask that question of a hundred different persons and note the wide variety of answers you will get. Ask it of the country dealer who, perhaps, suffers the most from mail-order competition, and the chances are he will tell you that the quest for a lower price is the factor that influences most mail-order purchases. Ask the people themselves who buy through the mails and you will hear many interesting things.

That is what I have been doing. As a small-town retailer I've heard many queer explanations offered in excuse of buying by mail. The question of a supposed difference in price between the local store and the catalogue house, I will admit, is the one thing that seems to induce most people to send away for their goods, but it is by no means the only reason advanced, as will be shown when the story gets under way.

The mail-order business has such a tremendous effect on all merchandising that any new evidence on the subject is always of interest to advertisers generally.

Mail-order houses claim that the fact that they offer a great variety of merchandise to select from, that they show the latest styles and give astonishing values, are among the chief reasons for their success. But there are many other reasons why people purchase by mail that are even more significant to those who may be able to profit from the moods of the buying public.

## Makes Buying so Easy

Many persons lack self-assertiveness. They know what they want, but haven't the stamina to insist on getting it. In dealing with others they usually get the worst of it. For this reason many business men try to conduct their important deals by mail. In this way they are firm and insistent on their rights, and do not give the other fellow a chance to put one over on them. People have more confidence in themselves in their own homes or offices. They can do business much more successfully talking across their own

desks than they can over the desk of the other fellow.

These little things, insignificant and subtle as they may seem, have an enormous influence in piling up mail-order sales. One who has not dealt with the customer in the store has no conception of the number of persons who are too timid to buy what they want with ease and assurance. What a relief it is for these folks to find refuge behind the pages of a catalogue.

## Purchases Get Too Much Neighborly Attention

What a source of revenue for the mail-order houses is the bashful young man in a small town or country community who has a sweetheart! He is one of the foundation-stones of many a big catalogue success, notably in the jewelry field. To go into a local store and ask for a piece of jewelry or a set of furs or any other such tell-tale article requires more courage than the average young swain possesses. In a few hours the news would be all over town. "Have you heard that Tom Jones bought a set of fox? I bet it is for Mary Ann," is the kind of persiflage that would be put forth to the embarrassment of both the persons most intimately concerned in the purchase. Even though he may be unknown in the store, the sensitive young man hates to be suspected of having a sweetheart. To avoid suspicion he sends to the mail-order house for the article of adornment for his "girl." Should anyone be inclined to doubt the importance of this reason for purchasing by mail, just let him talk to the express agent in almost any town under 25,000!

Professional men have the mail-order habit. Many doctors, lawyers and clergymen dislike to shop. They seem to have a natural distaste for bartering for the petty things in which the storekeepers deal. Perhaps this trait is an inheritance from their professional ancestors, who had an aversion for "mere tradesmen." While the professional men who buy by mail are in the minority, their number is sufficiently large to entitle them to consideration in this article. They find it much easier and more in keeping

*A*N effective and striking display of summer footwear made by Mundy's Shoe Store, Galt, Ont. The draping, arrangement and grouping are very pleasing.

with their dignity to look up what they want in a catalogue and send a check off for it than to go to the inconvenience of going out to a store and thus probably taking an hour of their time. Of course, the people who buy through the mails to avoid the bother of shopping are not confined entirely to the professional ranks.

#### Catalogue Habit Pleasing to Some People

While many persons purchase from a catalogue because they dislike to shop, there is still another class who buy in this way because they like to shop. Let me explain this paradox. Those who live in the country haven't much opportunity to go on a shopping tour. Running through the fascinating pages of a bulky catalogue is the nearest that they can come to experiencing the same pleasure that the city-dweller finds in rummaging through many stores in quest of the elusive bargain. As is well known, the propensity of women to go into a store for the sole purpose of buying only a five-cent package of hairpins and who usually buy many other things in addition before they come out, is what makes the job of catering to the feminine buyer so attractive. The catalogue-purchaser has much the same habit. Picking up the book with the intention of selecting a half dozen towels, the person often winds up by mailing a rather lengthy order. The lure of the illustrations and the descriptions leads the reader of the catalogue to shop through its pages for hours at a time. In the meantime the order grows. In the winter time the favorite indoor sport of the farmer is the perusal of his choice assortment of catalogues. He and his family shop all through the winter. "The shopping tendency of people," said a mail-order man, "is one of the most important factors in the success of our business."

People go to the movies to be thrilled. There are those who buy by mail for the same reason. I know many persons who send off for their goods for no other reason than they like the thrill of waiting for the shipment to arrive. The suspense and expectancy give them a pleasure that is hard to describe.

In every town there are a number of impecunious families, who finally succeed in running up a bill with every merchant whom they can induce to trust them. Eventually their local credit becomes worthless. In the long run, these people almost invariably become mail-order buyers. Not being able to have their purchases charged, they won't give the merchant the satisfaction of selling them for cash. The country over there must be thousands of families in this class. In the little city in which the writer lived for years there were dozens of them.

"I am sending you this order for a peculiar reason," wrote a woman to a mail-order firm. "I am a hunch-back, and, while it is not difficult to fit me, still I find it unpleasant to buy my clothing in our local stores. The clerks do not like to wait on me, and often I hear them making slighting remarks. This is the first time I ever bought by mail, but if I find it a satisfactory method of purchasing I'll order all my clothing in this way."

That was several years ago. The trial order turned out so well that this lady has been buying from a catalogue for herself and family ever since. If you thought you knew why people purchase by mail, did you ever think of the reason given by this woman? Yet her letter explains why many thousand people prefer to buy from some distant mail-order house rather than patronize their local dealers. Not all of them are physically deformed, of course, but they are impelled, nevertheless, by motives similar to those that induced this shrinking little lady to send away for her apparel.

Strange as it may seem, many persons are too sensitive or too bashful to go into a store and buy the thing they need. They may be particular in their tastes, but too diffident to insist on getting exactly what they want, and hence come away with something that they let the clerk sell them,

but which is not satisfactory. This is one reason why farmers are so prone to buy through the mails. Of course, not all farmers are timid about asking for what they want, as anyone knows who has dealt with them. Still the fact stands out that many country people buy through the mails because they are shy about asserting themselves when in personal contact with others. This is especially true when it comes to purchasing articles with which the buyer is not familiar, or that is not bought every day, such, for instance, as a suit of clothes or a hat. It does not require any courage to go into a store to buy a quarter's worth of sugar or a can of peas, but almost any shoe clerk, for instance, will tell you that many people are embarrassed about buying a pair of shoes.

"Dealing with the bashful customer," said the proprietor of a clothing store in a small town, "is one of the problems of my business. Of course I don't mean that they are so shy that we have to go out in the street and coax them in with a piece of sugar. They come in the store and ask for what they want, but unless the clerk is both patient and tactful he is likely to sell them something that does not suit or else drive them away without buying at all. Many a lost sale is due to the clerk's inability to deal with a shy buyer. However, I would sooner lose a sale than have the customer take the first thing that is shown him, be dissatisfied, and as a result send his future orders to a mail-order house. This is something that is likely to happen very frequently unless the merchant takes precautions to guard against it."

A department store man in a somewhat larger city has had a similar experience. "We find it necessary," he said, "to make things easy for the diffident shopper. It is hard to make our clerks realize that a certain few of the customers who approach them every day are timid, and should be treated with exceptional courtesy and kindness, but nevertheless this is a service that we try to give."

Those who are not familiar with small-town conditions have no idea of the enmity that exists in many places between the farmer and the merchant. The retailer is regarded as a parasite. He is supposed to be living on his wits. If he shows any evidence of prosperity the farmer jumps to the conclusion that it is all coming out of his pocket. "I'll be gumfoozled if I'll support that fellow, with his stiff collar and gold watch-chain, any longer. My orders are going to ——— after this." While this may appear to be a joke it became a very serious matter in some sections. It is to counteract this very condition that farmers' and merchants clubs are being organized all over the Central West. Fortunately these clubs are working wonders in creating a feeling of co-operation between the country people and the business men of the town.

#### Poor Storekeeping

The dealer himself educates many persons in the advantages of mail-order buying. Poor storekeeping has driven more people to patronize the catalogue houses than any other single cause, excepting only the price argument. For example, such a little thing as the failure of many merchants to mark their goods in plain figures has turned many patrons to the people who sell by mail. A shopper is rightly suspicious of the retailer who marks his merchandise with a cipher price. Furthermore, many people are a little hesitant about asking the price of an unmarked article. They are afraid it may be more than they thought. How dealer-negligence works into the hands of the catalogue houses is such an extensive subject in itself that I have space but to barely refer to it in this article. Of course there are many reasons why people buy through the mails, other than those I've mentioned, but most of them are well known and it is not necessary to discuss them here. The purpose of this article has been to show that many factors enter into mail-order buying besides those that are commonly recognized.—Printers' Ink.

# The Prosperous Provinces

## Down by The Sea

FENETY AVE., FREDERICTON, N.B.

**W**HILE shoe manufacturers and jobbers in the Maritime Provinces may not be large in number, the quality of the shoes made in the factories of the Lower Provinces goes a long way to offset this fact, and the character of all firms engaged in the shoe industry is so high that no shocemen will gainsay the importance of the industry in the East. Readers of this paper have long been familiar with such names as Hartt, Clark, Taylor, Amherst, Higgins, Logan, Crosby, Wry, Humphrey, Palmer, and a little more detailed information regarding the establishment and development of the enterprises conducted under these names will prove interesting reading.

### FREDERICTON

Fredericton is happy in the possession of three shoe industries, the widely known Hartt Boot and Shoe Co., the old established John Palmer Co. and the progressive Palmer, McLellan Co., the first-mentioned concern making high-grade men's welts and the last two, larrigans and heavy footwear. Fredericton itself is the outgrowth of a small Acadian settlement known as St. Anne's Point, and dates back to 1768. It is a beautiful old city shaded by stately elms rarely seen in such profusion.

QUEEN ST., FREDERICTON, N.B.

Situated on the St. John River, and being the gateway to the New Brunswick hunting and fishing grounds, it is a popular tourist resort. It is the capital of the province and has many beautiful public buildings.

### Hartt Boot and Shoe Co., Limited

This firm was established in 1899 at which time the present factory was built. At the beginning the company endeavored to make nearly everything in shoes, their production in the first few years including men's and women's lines in welts, McKays, Standard screws. It did not take them long to realize that a brighter future seemed likely were they to specialize, and as a result they discontinued making women's shoes and shortly afterwards gave up the manufacturing of everything in men's shoes except the Goodyear welts. For the past eight or ten years the factory has not made anything except men's welts, and the development of their business is a tribute to the soundness of their judgment in deciding to specialize. The company are making a high-grade men's welt shoe of which any Canadian shoeman may be proud, because it compares with the finest made anywhere. The factory has a capacity of 1,200 pairs per day.

The business is practically owned by the president, J. D. Palmer, and the vice-president, J. A. Reid, who are the active managers of the firm, and have been since the reorganization of the business seven years ago. When Mr. Palmer became identified with the company there was a large amount of new capital put into it and he and Mr. Reid took over the controlling interest in the enterprise, and they own nearly all of the stock. Mr. Palmer is a man of large experience and is not only a practical shoeman but combines with it a broad knowledge of business gained from his wide insight. He looks after the financing and selling ends of the business while Mr. Reid looks after the factory. Mr. Reid is a lifelong shoeman, having been in the business all his life. He has a very high reputation among the shoemen throughout the country.

J. D. PALMER, FREDERICTON, N.B.

J. A. REID, FREDERICTON, N.B.

CHAS. K. PALMER, FREDERICTON, N.B.

### John Palmer & Co., Limited, Fredericton, N.B.

This business was established in 1877 by John Palmer and Edward Brown, under the firm name of Brown & Palmer, and operated the first shoepack and larrigan factory of any consequence in Canada. Mr. Brown died after a few years and John Palmer purchased his share of the business from the estate of the deceased and operated under his own name till June, 1901, when the present company was organized. Five years ago John Palmer retired, being succeeded in the management of the business by his son, Chas. K. Palmer, the present president, who has spent 27 years with the firm, learning the business from the tannery to the office. The history of the enterprise is one of constant progress, as illustrated by the expansion of sales which necessitated the erection of the present factory, 240 x 50 x 3 with boiler house 50 x 26. The premises place all departments under one roof in a modern building.

UNIVERSITY OF NEW BRUNSWICK

Production up to 2,000 pairs a day can be obtained in this plant, which employs a staff of 140 to 200. Over fifty styles of waterproof shoepacks, larrigans, moccasins and sporting boots are made under the Palmer Moose Head Brand. Their most recent introduction is a range of summer shoepacks, which have "taken on" very generally. The firm do a large business in trench boots, too. Directors of the firm are—Chas. K. Palmer, president; John Kilburn, vice-president; J. Fraser Gregory, Geo. A. Kimball, W. S. Kilburn, Wm. M. Todd is secretary-treasurer.

### Palmer-McLellan Shoepack Co., Limited

A factory 200 x 50 x 3 is required to enable this company to fill its orders for waterproof shoepacks, sporting and work boots. They have been growing steadily since the inception of the firm on May 25th, 1912, and are considering, even now, the erection of another storey on the present plant, which houses the tannery as well as the factory. The development of sales in their heavy work boot department is largely responsible for their thoughts in this direction. These boots are made chiefly for farmers, drivers and others wanting a most serviceable boot at a reasonable price. The company fills a growing demand for sporting boots, too, W. A. McLellan, who has had many years' experience in the business, is the managing director of the firm, being ably assisted by J. Howard Richards, the vice-president, and Jas. G. Palmer, the secretary-treasurer. R. W. McLellan is president.

### ST. JOHN, N.B.

Founded on a rock by the Loyalists in 1783, St. John has been growing steadily ever since, notwithstanding the fact that the city was almost completely destroyed by the great fire of 1877. It has a population of 43,000 and every citizen is a booster for his own city. It is a railway terminal, a winter port for Atlantic liners and year around port for the West Indies and liners plying between Canada

#### J. M. Humphrey & Co., St. John, N.B.

J. M. Humphrey & Co. are manufacturers as well as jobbers, having a factory in which they specialize more and more on the heavier welt shoes, though their output of staple Standard screw lines is maintained. As jobbers they cover all of the

THE HOME OF L. HIGGINS, MONCTON, N.B.

Maritime Provinces and Quebec, employing eight travelers. The firm constitutes a partnership between R. T. Hayes and C. P. Humphrey. They, in company with the late Frank Humphrey, who died in 1906, purchased the business from the J. M. Humphrey estate in 1894. Mr. Humphrey founded the firm in 1880. Both partners had been identified

with the former business, Mr. Hayes as manager, and are practical shoemen in every respect. They represent the Miner Rubber Company in the Maritime Provinces. Mr. Hayes has just been elected mayor of St. John.

#### MONCTON, N.B.

Moncton is the second largest city in New Brunswick and is a centre of considerable importance to the surrounding country as is evidenced by the number of wholesale houses located there. Here are the offices and workshops of the Canadian Government Railways with over 3,000 employes. It furnishes cheap power through its close proximity to the natural gas wells of Albert. Its population is 12,000.

#### L. Higgins & Co., Moncton, N.B.

Established in 1879, Mr. Higgins has the distinction of owning the only concern in Moncton which has not altered its name since organization. Mr. Higgins himself is sole proprietor of the business, which grew from a small retail establishment

RETAIL STORE, L. HIGGINS & CO., MONCTON, N.B.

to one of the largest wholesale and retail concerns in the East. In 1905 Mr. Higgins bought the Redding factory at Yarmouth and manufactured shoes there until 1910, when the factory was destroyed by fire and not rebuilt. He was interested in manufacturing, and made a nice general line of welts, McKays, Standard screws and pegs. Since 1883 the firm has been doing a wholesale shoe business and it has been steadily growing. In New Glasgow, 30 years ago, a branch retail store was established, being to-day in charge of H. H. Heckman. The Moncton retail store, one of the finest to be seen anywhere in Canada, is in charge of F. J. H. Jones. Four travelers represent the firm in the Maritime Provinces. Mr. Higgins himself is one of the most progressive business men in Canada. He is a big figure in Moncton financial circles, and a citizen

who has done much to build up the city. He is a director in the Times Printing Co., President of Tuplin, Irving Black Foxes, Limited, and while a keen business man has been known to go for a day's fishing once in a while as witness the fact that he is president of two live clubs, the Adogawaasook Fishing Club and the Shediac River Fishing Club.

#### ST. STEPHEN, N.B.

St. Stephen, with a population of nearly 4,000, is one of the prettiest towns in Eastern Canada. It is across the river from Calais, Me. It is not the home of many industries but those which are located there are the most enterprising in the country, including as they do Clark Bros' factory, Ganong

WATER STREET, ST. STEPHEN, N.B.

Bros.' Chocolates, and the St. Croix Soap Works. It is a beautiful residential town and is surrounded by an excellent agricultural district which always contributes to the development of a town.

#### Clark Bros., Limited, St. Stephen, N.B.

Three brothers, natives of the district, constitute the partnership in this enterprising concern which is successfully specializing on the production of a women's high-grade McKay shoes. They are John F. Clark, the president; Wm. E. Clark, the vice-president, and Jas. F. Clark, treasurer. All of them are practical shoemen. John Clark spent many years in the United States, being general superintendent of the Craddock-Terry factories, Lynchburg, Va., where a volume of ten million a year is their output. Jas. F. Clark was for eight years superintendent of the same firm's women's high-grade factory, while Will Clark was identified with the Commonwealth Shoe and Leather Company in their Skowhegan factory. The progress of the firm is more remarkable, considering that they were completely burned out in 1913, nine months after they opened the establishment in St. Stephen. But they were not daunted, rebuilding at once a factory that is 152 x 50 x 3 and capable of a production of 1,200 pairs a day. John, James and Will look after finances and purchasing, sales and factory, respectively.

#### SACKVILLE, N.B.

A manufacturing town of 3,000, Sackville is also quite an educational centre, having Mount Allison University and several other establishments located there. It has a branch railway line connecting with Cape Tormentine which in the near future will be the principal railway connection between railways on the main line and those on Prince Edward Island, upon the construction of docks at Cape Tormentine and Cape Traverse which will enable the Canadian Government Railways to operate their new car ferry, capable of carrying a heavily loaded train. This will enable goods to

**A. E. Wry-Standard, Limited, Sackville, N.B.**

Formerly two firms were manufacturing shoes in Sackville—the A. E. Wry Co. and Standard Manufacturing Co. Some time ago they amalgamated and under the management of A. E. Wry, who established the former business twenty years ago, the present company is doing a rapidly increasing business. They make a complete line of staple footwear and also do quite a large trade in larrigans, of which they manufacture over 80,000 pairs a year. In spite of the fact that the factory was demolished by fire at the beginning of the year Mr. Wry is doing business as usual, as no time was lost in putting up an even better building with all modern equipment. A. E. Wry is president and general manager of the company and G. T. Morton secretary.

a peninsula has nice weather all the year round. Its manufacturers are numerous and their volume of business is large.

#### The Robert Taylor Co., Limited

One of the oldest shoe factories in Canada is that of the Robert Taylor Co., Limited, Halifax, which was established by the late Robert Taylor in 1867.

Mr. Taylor had been carrying on a wholesale and retail business for some years before that date, when he started making shoes by hand in the rear of his shop. Soon the reputation of the shoes grew so favorably that larger and larger premises were required and some years ago the firm occupied the present large factory, 120 x 40 x 5 storeys on Albermarle street. The founder of the business died in 1900, but Messrs. W. B. Taylor, the president, and R. D. Taylor, secretary and manager, are continuing the progressive policies of the founder in such a way as to secure a steady expansion along safe lines. Originally doing business only in the Maritime Provinces, the company to-day sell all over Canada, employing eight salesmen. The firm manufacture McKays, Standard screw and peg goods, of which lines a complete range is made, and they make a particularly fine line of children's shoes. They also do a wholesale business of increasing volume in welts and turns. As the first shoe factory to be established in the Maritime Provinces, the factory and proprietors enjoy a particularly warm spot in the hearts of all the trade of the East.

#### AMHERST, N.S.

Amherst is one of the most important manufacturing centres in Eastern Canada and is one of the few places in the world that obtains its electrical energy direct from the pit mouth. The Chignecto coal mines are only a few miles away and there power is generated and conveyed to Amherst. There are large car works, foundries and other industrial establishments as well as the factory of the Amherst Boot and Shoe Co. There is a good farming country around Amherst and annual winter fat stock shows are held there.

#### Amherst Boot & Shoe Co., Limited

The Amherst Boot & Shoe Co., Limited, of Amherst, N.S., will next year celebrate its golden jubilee. It was away back in 1867, which year marked the birthday of the Dominion of Canada, that this firm

**THE ROBERT TAYLOR CO.**  
*Limited*  
*Halifax, N.S.*

was formed and incorporated, and its record has been one of expansion and prosperity. The company may well review its career with pride and any success attained has been well deserved, for the principles which have guided and animated it, have been those which underlie the soundest and most progressive business institutions of the Dominion. Each decade has seen remarkable changes in the shoemaking industry and the Amherst Boot & Shoe Co. has kept pace with the advancement. From the outset the company set itself to perfecting the heavier grades of solid leather shoes and boots and has won its pre-eminence and present prestige by closely adhering to this purpose. It was awarded the gold medal at the Dominion Exhibition of 1906 for footwear in this class.

About four hundred lines are manufactured which comprise shoes for the farmer, the miner, the prospector, the surveyor, the engineer, the harvester, the truckman and the mechanic, as well as every day working shoes for women, misses and children, boys and youths—in fact everything required for the family in all weathers and all seasons are produced and sold in every part of the Dominion. By the application of sound business principles and with the co-operation of their customers, the volume of output has expanded until the factory, plant and warehouse of the company occupy a square 210 x 220 feet on Station street in Amherst. The sales last year reached nearly a million dollars and the output during the present year is expected to touch one and one-eighth million dollars, which is certainly a remarkable record of development and achievement.

Percy C. Black is the President of the Company, C. S. Sutherland, manager, and T. N. Campbell, secretary-treasurer. Mr. Sutherland is a frequent visitor to the shoe centres of Canada and the United States and is widely known as a capable shoeman and an astute business manager. The Amherst Boot & Shoe Co. has branches in Halifax, Charlottetown and Regina, Sask., where large stocks are carried and splendid service given.

CLOCK TOWER, HALIFAX, N.S.

## PICTOU, N.S.

Pictou is one of the oldest towns in Nova Scotia and a local port of some importance, steamers running from there to ports on the north shore of Cape Breton and to the Magdalen Islands. It has a population of 3,500, and besides having several large industries, including the Logan tanneries, is quite a summer resort.

### Logan's Tanneries, Pictou, N.S.

John Logan inaugurated this business sixty years ago when a tanner's lot was one that gave him vari-

J. P. DONALD, PICTOU, N.S.

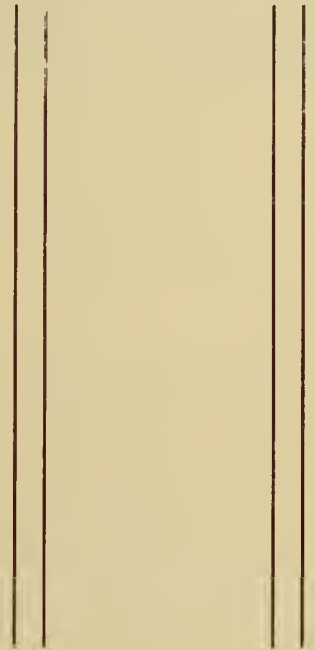

ety if not profit. His original tannery was at Lyons Brook, outside of Pictou, where the leather is made to-day, and the old gentleman had to cart all his product miles to the coast for boat shipment. Hemlock sole leather is the only line made to-day, the firm having concentrated on this article to the exclusion of all else. Two fires mark the history of the business, the present management assuming the direction of the company subsequent to the last one four years ago. James P. Donald, manager and secretary, is a practical tanner, as much so as any other man who has been forty years at it, so it is no wonder that he has developed the organization entrusted to him as it never was pushed before. Today the tannery has a capacity of 2,000 sides a week, and, when extract is available, orders continuously on hand keep it going steadily. Incidentally, it is interesting to know that Mr. Donald has three sons at the front.

### The H. H. Crosby Co. Limited, Hebron, N.S.

It was in 1859 that the business at present conducted by this firm was first established so that it may well claim to be one of the old-time shoe factories. Nevertheless, the methods employed in it are as aggressive as in the newest establish-

HARTT BOOT AND SHOE COMPANY, LIMITED, FREDERICTON, N.B.

is a thorough-going shoeman. The other members of the board of directors are C. H. Cahan, K.C., G. M. Crosby and J. M. Cahan. The factory is in the form of a main building with a wing, the former 100 x 28 x 3, and the latter 110 x 35 x 2. Its capacity is 1,000 pairs a day, and the lines cover a full range of staple footwear. The firm specializes on its Young Canada School Boot on which it has made quite a name for itself. They sell throughout the Maritime Provinces, Quebec and Ontario. Mr. Crosby states that the firm has been busier than ever before in its long history. Although handicapped considerably through enlistments from the factory; increased business has made it necessary for them to put up another building 25 x 35. At the same time they installed a 50 h.p. oil-burning engine.

#### CHARLOTTETOWN, P.E.I.

Charlottetown is the capital of Prince Edward Island and the chief commercial centre and is situated on Hillsborough Bay and has a population of 12,000. It is splendidly laid out.

#### Goff & Co., Charlottetown, P.E.I.

Thirty-five years ago Mr. Goff, in partnership with L. W. Goff, his brother, and the late John Dorsey, started the shoe manufacturing firm known as Dorsey, Goff & Co. They made a popular line of men's, women's and children's heavy peg and nail lines. Mr. Dorsey died in 1886 and the two brothers conducted the business until 1907, since which time Mr. Goff has been sole owner. For years, while manufacturing, a wholesale business was being done, and the

care of this and his retail store caused Mr. Goff to give up manufacturing in 1914.

#### MacKenzie, Crowe & Co., Bridgetown, N.S.

One of Bridgetown's leading industries is that of the MacKenzie, Crowe & Co., Limited, manufacturers of shoe packs and larrigans. Shoe packs, as you may know, are what we ordinarily know as moccasins, while larrigans are a sort of moccasin with long legs. The business of this company was started in 1890 as a partnership, four or five men being employed. To-day over forty are employed and more are wanted. Fifteen have so far enlisted from among the employes of the MacKenzie, Crowe Co., and before the war made such a heavy draft on their employes they had 60. A. B. MacKenzie is the General Manager.

CITY OF ST. JOHN, N.B.

# Great Pulling Power

☐ Regular advertising in the SHOE AND LEATHER JOURNAL has great pulling power, for the simple reason that this publication reaches every month practically every well-rated footwear dealer in Canada.

☐ And the live shoe dealers have confidence in the SHOE AND LEATHER JOURNAL—confidence gained from long acquaintance with its progressive and fearless editorial policy.

☐ The SHOE AND LEATHER JOURNAL is read from cover to cover and the manufacturer who advertises regularly in its pages gets a regular hearing for his message in the most economical way possible.

# ADVERTISING WHEN OVERSOLD

## Danger of Cutting Down or Discontinuing Advertising When Orders Run Ahead of Capacity

“**W**HAT is the use of one advertising. We have more orders now than we can take care of?” This statement is frequently made at times like the present when business is abnormally good, and is urged by concerns that have always a more or less ready market for their products.

Theoretically there would seem to be wisdom in ceasing to ask for business when a concern is unable to take care of it; and, when orders are piling up in advance, it does seem like not merely waste but folly to spend money on publicity or in soliciting more trade.

Here, however, are the opinions of men whose standing and business acumen are unquestioned and whose ideas are vindicated by the undoubted success of their establishments. They are quoted by “Printer’s Ink” in a recent issue.

### Satisfied to Plug Along

“The great fault with manufacturers and merchants,” declares H. C. Brown, of the Victor Talking Machine Company, “is the fact that they are satisfied to plug along at the same rate of speed without looking to the future. If that were the policy of the Victor Company we should worry ourselves to our graves. I want to be frank, and tell you that we would not be satisfied if we did not have orders on hand sufficient to run our plant for several years without taking another order. But we must keep this condition going, and we succeed only by the fact that we are continuing to advertise and will continue to do so as long as newspapers and magazines are published.”

Another large concern which makes a basic product that is largely sold to other manufacturers as their raw material, and whose name is withheld, says: “Twice in our history we have been seriously oversold, and the first time we yielded to pressure from customers and stopped advertising for a year. The plea was that we could not supply the demand and were only embarrassing ourselves and the trade. There was a substitute product however which began to be more and more used and, consumers who had ceased to be influenced by our advertising, allowed manufacturers to use more and more of this substitute. The result was that the shortage in the market was gradually remedied at our expense, and when we began to advertise again we had an up hill fight and many old customers had to be won back and the work we had accomplished done over again. The second time we were asked to discontinue our consumer campaign the directors, politely but firmly refused, and the campaign is going ahead today although we are probably more heavily oversold than at any time in our history.”

### Effect of Beginning and Quitting

In a letter on this subject, H. J. Winsten of “Black Cat Hosiery” fame, says: “We have had one of the most forcible examples of beginning and quitting, and so on, in advertising of any concern I know of. Ten years ago we were great advertisers of our Black Cat children’s hosiery, and as the result of Mr. Cooper’s death our entire advertising practically stood still. Surprising as it may seem to the general run of business men, we still feel the effects of advertising ten years ago, and today our best sellers are those that were advertised at that time.”

Mr. R. P. Spencer, formerly of the Federal Motor Truck Company, and now of the American Optical Co., Detroit, says: “It has been my experience, conducting various sales and advertising campaigns, that the highest point of efficiency in both the selling and manufacturing is attained when the factory is oversold. Such a condition tends to cut down factory overhead and fills the sales force with confidence resulting in increasing business.”

“We hear about a good many plants which are producing up to full capacity,” says Chas. R. Stevenson, general manager National Veneer Products Co., “but as a matter of fact I have never yet seen one. If I were to suddenly find myself in the position of being unable to fill orders I should seriously consider the possibility and advisability—of working my plant on a double shift, which would enable me to secure a tremendous reduction in my overhead expense and consequently a great increase on my net profit. If my sales were not large enough to warrant me in doing this I should make a careful study in detail of each operation, with the idea of reducing the time it required and of securing the increased production which the reduction in time of each individual operation would enable me to secure.”

### A Forceful Factor In Winning Out

H. S. Dudley of the Atlas Portland Cement Co., says: “It is not primarily an advertising question: it is a matter of finance. If the manufacturer is in a position from a financial standpoint, to increase his output rapidly, he should continue to advertise on his present basis, and perhaps increase it because when you are winning out with something you want to use that something perhaps to an even greater extent.”

“It seems to me,” says V. L. Price, “that the thing the manufacturer should stop to think about and the question he should ask himself is this: ‘Is the advertising the cause of the sales condition?’ If such be the case, in my judgment he will be taking a considerable chance if he reduces his advertising continually. In my experience, when advertising is cut down to a radical extent, it always gives the purchaser an impression that something is wrong. Then too, there is that almost impossible condition of getting back after a let-up in sales or advertising effort.”

In commenting upon this whole “oversold” question, S. C. Lambert says: “The manufacturer who is oversold might do well to consider the possibilities which that condition affords. Instead of slowing down his whole selling organization and dropping out of the public mind to the injury of his name and the weakening of his prestige, it is possible to preserve both and even enhance their value by taking the public into his confidence.

“In some cases it is wise to come out flatly with the announcement that deliveries cannot be made without delay and to ask customers to be patient. Or it is possible to emphasize the progress that is being made on a new factory or additional equipment, thus suggesting, without directly saying so, that the oversold condition is only temporary. Nothing breeds confidence like success, and if the public thinks a concern is so successful that it cannot keep up with its orders, that in itself may be turned into an asset.”

# With the Shoe Manufacturers

Pithy Note and Comment on Shoe Matters—What the Makers of Shoes are Saying and Doing—Shoe Facts and Fancies

**W**ELT shoes make up at 41.4 per cent of the total number of shoes produced over the border, so the United States census bulletin for 1914 says. The number was 6.6 per cent. greater than in 1909. It was much greater than in 1904, and very much greater than in 1894. Indeed, it is a comparatively new shoe, for welt machinery has come into common use only in recent years. The last year there has been a particularly great improvement in machinery for making welt shoes, and, since people seem to like them, there is every indication that there will be a further great increase in their production.

Shoemakers who have worked on welt shoes have gained a great deal of additional information concerning methods of making them, and they are now able, it is safe to state, to make a better welt shoe than ever before, and to do so at a less labor cost per pair. Their production has brought in to greater prominence than ever the matter of bottoming a shoe, in all details from the fitting of the stocking to the final finishing of the sole.

In the first place, the stock must be well and properly fitted, for upon the stock fitting is dependent the lasting, sewing, trimming and the finishing of the edge. Hence, in first-class factories the stock is fitted with greater care than ever.

In lasting this shoe there is a new machine, the No. 7 bed lasting machine, which has to do with the success of the stock fitting. It has a device which locks the toe of the insole into position, while the wipers wipe over the upper. This device fits right down into the shoulder of the insole, so that the wipers cannot come up over it and crush down the shoulder, and thereby lay the foundation for a lot of trouble in stitching around the toe of the machine with the inseam sewer.

The inseam sewer has been much improved the last year or so, and it will sew a better and a tighter seam than ever, and at the same time save welting. It has the new automatic device for stopping the machine and for cutting the welt. As it stops the machine automatically, it saves labor for the operator, and it also enables him to stitch at top speed all the way around the shoe. The automatic device for cutting off the welt always cuts precisely the same, and that ensures perfect fitting of the welt where it is butted, and, also, just enough of the welt to start the next shoe properly.

The outsole sewer likewise has the automatic stopping device. This saves labor, of course, and it also improves the stitching. Both the inseam and the outsole stitching machines will run at very high speed. It is said that the outsole machine will go faster than any operator can keep up with it. A fast operator of an inseam stitching machine has done 1,000 pairs of women's shoes a day.

The speed of any sewing machine, of course, depends upon the character of the work it does and upon the quality of the bottom stock. A rubber or a fibre sole may be stitched as coarse as four stitches to an inch, while a leather sole shoe may be stitched from 12 to 14 stitches to the inch, or even 16. In one shop even 30 stitches to the inch were taken, but that was much too fine. It weakened the sole, for the needle cut too many holes in it.

However, the main point is that the improved sewing machines will sew a better and a tighter seam than ever did welt-sewing machines before. They will do it, and there will be not a single thread beneath the sole of the foot

when the shoe is worn. There won't be a tack, either. The welt shoe provides the most flexible forepart and the smoothest insole that the shoe-wearing public ever has known.

Another improvement that is coming in welt shoes is that of a perfectly smooth heel seat, free from nails to irritate the heels of the feet of the wearer. This improvement will come by the insertion into the heel seat of the insole of a metal disc, which will prevent the heel nails from sticking up into the heel seat of the shoe.

When the welt shoe is perfectly smooth from heel to toe, it will be even more popular among shoe-wearing people than it is these days. The improvements in welt machines that are now coming into use will make the welt shoe more popular among shoe making people. It is fairly safe to predict that the 1919 census bulletin will show that 50 per cent of the shoes made in America will be welt shoes.

## Extra Dividend on Shoe Machinery Common

The directors of the United Shoe Machinery Co. have declared the usual quarterly dividend of 2 per cent (50c) on the common stock and an extra cash of 6 per cent (\$1.50) and 6 per cent in 7 per cent. preferred stock of the Thomas G. Plant Co. The cash dividends are payable July 5 to stockholders of record June 22.

The Plant Co. stock will be distributed on July 15 "or as soon thereafter as circumstances will permit, but the stock so distributed will not carry the right to receive any dividends declared thereon prior to October, 1916."

The usual quarterly of 1½ per cent (37½c) was declared on the preferred stock, payable July 5 to stockholders of record June 22.

The extra dividend on the common stock compares with previous extra disbursements as follows:

- 1915—10 per cent stock and \$2.50 in cash.
- 1910—10 per cent stock and \$1 in cash.
- 1909—10 per cent stock and 50 cents in cash.
- 1907—25 per cent stock.

The distribution of Thomas G. Plant Co. preferred stock is "on the basis of fifteen one-thousandths (15-1000) of a share of said preferred stock of said Thomas G. Plant Co. for each share of the common stock of the United Shoe Machinery Corporation.

With the par of Plant preferred \$100 per share and Shoe common \$25, the 6 per cent dividend in the former stock gives to Shoe common stockholders \$1.50 of Plant stock for each share held. In other words, 200 shares of Shoe common will get three shares of Plant preferred, worth, say, \$300, thus making the cash equivalent \$1.50 per share on Shoe common.

## The Artistic Baby Louis Heel

Real style in footwear always comes by a process of evolution, and it can be very well illustrated by the development in heels the past five years, says the Boot and Shoe Recorder. Within this five year period the trade has experienced the blending of the lines of the Cuban heel and the Louis heel into the type of heel commonly termed "Cuban-Louis." Then came the period when the base of the heel was flared outward into the commonly known "kidney heel." Then followed the greatest development of the Louis heel in the true lines of that heel in varying heights from one inch and one-half to two and three-quarters, side measure. This was produced in both the covered and the

ESTABLISHED 1842.

MONTREAL.

leather forms with an art in shoemaking unparalleled heretofore. Much attention was paid to the breast of the heel, to the pitch, and to the lines of the arch. Truly the heels produced have been as artistic as good shoemaking could ever hope to perfect.

With these developments in heel building brought to a point of perfection naturally designers turn to the development of heel lines co-related with these successes. Someone a long time ago thought of the idea of translating the Louis heel into the type of footwear worn by misses and the result was the low Louis heel. There were, however, many errors in practical shoemaking and shoe fitting to be overcome. First and most important, the last which was to carry the low Louis heel needed revision, for it is not practical or possible to produce a good shoe on a heavily wooded pump last such as had been used for some years in the growing girls' type of shoe. It was found necessary to readapt the wood, to put the fitting quality into the last so as to take the heel slightly higher than the low heel and at the same time keep the balance. The heel finally produced and now termed the "Baby Louis Heel" is built on a last designed for it exclusively and we illustrate the last and show in contrast just where the wood is placed in the high Louis heel to equalize fitting values. In many cases the low Louis heel can be made more graceful than the one referred to if the underlying principles are retained and the heel lines made a trifle more graceful.

This type of heel has been tested out in many of the high-grade shoe stores the country over, and its appeal to the customer this past few months has been such as to warrant our emphasizing it as a coming style development of considerable magnitude.

#### Improvement in Finish of Kid Shoes

Improvements are being made each year in the methods used in tanning leather and notice is being made in the

improvement in the finish of kid shoes; the grain is smoother, and more silky. It also is due to improvements in finishing off the grain of the leather.

In one large factory they are finishing kid skins with ironing machines like those used in steam laundries for ironing linen. These machines have long cylinders of polished steel, which are heated by gas. The cylinders revolve over the skins, one by one, and iron them out very finely.

The tanner has had to readjust the machines, so that they will iron leather.

#### Want Russian Embargo Lifted

The members of the special committee appointed at the recent gathering of the shoe and leather trade in Philadelphia recently interviewed Secretary Lansing at Washington and presented the following case:—

1. That Russia is holding to-day approximately a three-years' accumulation of hides, practically all of which are of no value to her and cannot be used by her under present conditions.

2. That the United States is standing in great and immediate need of this volume of raw material, and is ready to pay full cash price for the same.

3. That because of this lack of raw material the price of footwear has already advanced this year one dollar a pair, not to mention a further necessary advance if the situation continues, which means, assigning but one pair per year per person, a tax on the American people of at least \$100,000,000.

4. That vessels returning from Russia are coming in ballast, indicating very clearly that ocean transportation is not a factor.

5. That the evidences of friendship so practically and abundantly manifested by the United States for Russia since the beginning of the war should incline that Govern-

ment to a reciprocity in lifting the ban on the export of the light skins at least in favor of this country, and that, with the help of the State Department and the American Ambassador at Petrograd, it would seem as if the Imperial Government of Russia must be brought to see not only the wisdom but the mutual advantages, that would accrue to two friendly nations through consenting to this course.

Mr. Lansing was urged to put forth every effort possible to secure the prompt lifting of the hide embargo by Russia.

Members of the committee appeared to be well pleased with the probable results of the conference, several of them expressing the opinion that a measure of relief at least was bound to follow the negotiations that, it is confidently expected, will be started at once.

### Some Interesting Leather Figures

The U.S. Census Bureau's summary concerning the leather industry, including the five years between 1909 and 1914, reveals something of the same tendency which has been shown in other lines of trade and commerce, in other reports of the bureau—a reduced number of establishments, a greater output, and greater value of output. In 1909 there were 953 establishments with a total output valued at \$334,195,561. In 1914 the number of establishments reported had fallen to 767, but the value of the output of this reduced number of establishments was \$374,512,939, an increase in values during the period of \$40,000,000, stated in round numbers.

The figures are interesting in other ways. The production, tanning and manufacture of harness leather showed a sharp decline during the period, a fact to be attributed, no doubt, to the rise and spread of the automobile and the falling of the horse into relative use. Yet the decrease in this line of manufacture was but little more than half, told in percentages, of the decrease in the making of bookbinder's leathers. The decrease in harness leathers was approximately 25 per cent, and that in bookbinder's leathers about 44 per cent. Must the automobile habit also be held responsible for an abatement in the reading habit, or can the loss be charged to the growing preference for cloth-bound books?

Perhaps the most striking figures in the list are those showing the first effects of putting hides on the free list. This was done in 1909. During the period included in the comparative figures, beginning with the year hides were put on the free list, the number of hides tanned decreased 5.3 per cent. Evidently foreign hides have been taking a corner of the market, but instead of the imports reducing the price, the cost in the last year of the comparison was 4.1 per cent greater than in the first, and in spite of the removal of the tariff. The value of cattle hides tanned in 1914 was \$30,000,000 greater than the same value in 1909, although the number of such hides tanned in the latter year was nearly 1,000,000 less. In measuring these statements, we must keep in mind the falling off of the domestic supply of hides, the consequential advance in leather, all of which retarded consumption.

### What Findings Case Should Contain?

A findings department is the best paying side line a shoe repairer can invest in. To the repairer who is about to place one in his shop the following suggestions are made: Handle goods your trade will need, but do not hesitate to introduce something new. Advertise your case and keep it looking attractive and neat. A complete case should contain laces, rubber heels, heel cushions, heel grips, arches, foot soap, foot powder, foot balm, heel and sole plates, polishes, blacking and polishing pads, colored kid cleaner, shoe brushes and trees, ankle supports, bunion protectors,

### Doing Good Business in France

N. Tetrault, of the Tetrault Shoe Mfg. Co., Montreal, has just returned from his third trip to France, having been away, on this occasion, for several months. Mr. Tetrault has been successful in establishing an excellent connection with leading retailers and department stores in Paris and other large French cities, having sold through the sales staff

N. TETRAULT, MONTREAL

he employs in France no less than nineteen shipments of Canadian shoes, men's and women's, no shipment being less than two hundred cases.

Since his first trip Mr. Tetrault has been a strong advocate of the development of trade with France. He has insured for his own firm a large future business, and believes sufficiently in the outlook to maintain a warehouse at 9 Rue Marseilles. He explained that it was difficult to do business in France at present for many reasons, freight for example, being \$35 a ton, which means 20 cents on a pair of welts. The duty on cartons is 2 cents each. There are exasperating delays in getting goods across and even more delays in getting them released from the ships, as labor is almost impossible to secure. But the man who has in stock in France, the goods for which there is call, can get his own price. All of Mr. Tetrault's shoes were on French lasts, designed after his study of the French market. He says the popular shoe in civilian circles to-day is one with a ridiculously short vamp, and a tip so short that you can hardly notice it. French manufacturers are making all military requirements of that nation. No orders are being placed in America or elsewhere. Employees in French factories are "spelled" in the army—that is no worker is constantly at his place in the factory, but each man of military age who is a shoe man, gets the chance to serve his country and to ply his trade, a few of them spending more than two or three months at one time in the factory.

### Progress of Canadian Government Railways

Those of us who have always considered the Canadian Government Railways as constituting a system connecting Montreal with the Lower Provinces, find it a little difficult to realize that to-day reference to the Canadian Government Railways must create a picture in the mind of a wonderful transcontinental line, the newer part of which is opening up a land of untold and heretofore inaccessible wealth for Canadians.

Those who are fortunate in being supplied with the literature prepared by the Canadian Government Railways obtain a comprehensive idea of the development that is constantly going on, not only in the building of new lines West, but in the improvement of existing lines through territory which has been served for many years. Two recent booklets published by the Canadian Government Railways are entitled "Notes by the Way, Lines Quebec and West," and "Notes by the Way, Lines Montreal and East." A perusal of these brochures will be most interesting to every Canadian. The booklet dealing with Western lines takes one from Quebec to Northern Ontario, past Spirit Lake where the Canadian Internment Camp is, through the "Clay Belt" and the fringe of the mining country, and on to Fort William, Port Arthur and Winnipeg. It gives one full particulars about the various towns through which one passes, and is profusely illustrated with intelligently taken photographs, the idea behind the booklet being to give a stranger to the territory covered an adequate idea of the extent of the resources and beauty of the area traversed. An extended reference is made to the company's new summer resort at Minaki, Ont., not far from Winnipeg, for which, however, a special folder, has been issued, "Notes By the Way, Lines Montreal and East" is equally interesting along similar lines, and even an old traveller in the Lower Provinces is pleased and surprised at the information given in the little work, which causes him to see new beauties and discovers for him resources and wealth in the Maritime Provinces which he did not dream existed.

Particularly interesting to the tourist and sportsman is a series of three folders, one La Baie de Chaleur, another "Abegweit" (Cradled on the Waves) and a third "Out of Door." At a time when all tourist travel abroad is stopped, the Canadian Government Railways wisely have prepared the most attractive literature they have yet issued in the hopes of interesting travellers in the beautiful Baie de Chaleur and Abegweit (Cradled on the Waves), the Indian designation for Prince Edward Island. The literature is most attractively printed, and the excellent color maps give one an excellent idea of the layout of the provinces, and their unlimited possibilities for all kinds of holiday pleasure.

The booklet entitled "Out of Door" is issued for those interested in hunting, fishing, boating and golf, and desiring accurate and detailed information regarding the open season for hunting and fishing in Quebec and the Maritime Provinces, the location of good hunting and fishing districts, and the names of guides, hotels, and other essential information. The department which names the golf courses, and describes them, will be found useful to all who are interested.

### Retail Shoe Business is Active

Many retailers are getting ready for their semi-annual clearing midsummer sales. The majority of shoe merchants now hold such in August, whereas the tendency was formerly to start them in July. Business in every line of the shoe trade has been good and there has been a splendid demand for all kinds of white goods and sporting shoes. A scarcity of many lines in tennis goods is reported. Generally speaking the volume of trade which the average footwear merchant has done in the past three months has been well ahead of the corresponding period of last year and the outlook for fall is promising in spite of increased prices. The people have now become pretty well educated to the fact that shoes cost from twenty-five to fifty per cent more than a year ago and are paying the higher figure with few complaints.

### How Raw Materials Go Up

Writing to the SHOE AND LEATHER JOURNAL a leading manufacturer of calfskins says:—

year ago at \$2.25 a piece we are paying \$3.65 for, which is 62 per cent. increase on raw material from last season. Dye materials this time last year and the present price are advanced 250 per cent. to 750 per cent., yet the price of the finished article in leather has increased only 60 per cent., which shows that the increase of the finished article has not advanced in comparison with the raw skins and dyeing materials."

#### THE ASSOCIATION GROWS RAPIDLY

The Toronto Shoe Repair Men's Association held their regular semi-monthly meeting on July 13th, in the Foresters' Building, College St., Toronto. There was a splendid attendance and some thirty new members joined, making the membership now over sixty, although the association is not yet a month old.

The new schedule of prices has been adopted, printed and distributed. Committees were appointed to call upon shoe repairers in different districts of the city and induce every man who is in the repair line to join the association.

The next meeting will be held on Thursday night,

July 27. It is probable that in the near future the question of closing all shops at seven o'clock in the evening during the summer months may be taken up and also the Wednesday half holiday movement. Several shoe repair men already close on this afternoon and others are falling into line.

## NEWSY BRIEFS FROM QUEBEC

G. G. Parker, of the Boston Last Co., Montreal, J. D. Woods, of Cotton Threads, Limited, Montreal, and T. D. Cobb, of John McEntyre, Limited, Montreal, were in Quebec recently.

The factories are still keeping busy and some have orders for six months ahead.

Alf. Rainville, shoe dealer, of Levis, has made a voluntary assignment.

J. E. Samson, Enrg., are now occupying the new flats that they have added to their building. They can run 125 cases a week.

Naz. Fortier & Cie, tanners, of Quebec, have painted their building and have made extensive repairs.

The new building of Brown & Rochette, wholesale shoes, at the corner of St. Valier and St. Anslme streets, is entirely finished and is now occupied by this firm, which is growing rapidly.

A. R. Kaufman, of Kaufman Rubber Co., Berlin, and Jack Duggan, of Kaufman Rubber Co., Montreal, were in town in connection with the Quebec branch.

Jos. Metivier, manager of Elie Jobin, Limited, is spending a vacation at his country home at Cacouna.

Pierre Jobin, of Elie Jobin, Limited, passed away on June 30th after two months' sickness. The funeral was largely attended. The remains were interred in St. Charles' cemetery.

Jos. Tanguay has started his new factory which has a capacity of 100 cases a week.

J. P. Lagace, of Lagace & Lepinay, was in Boston for a week on a business trip.

Alf. Garant, of Dupere & Garant, was in St. Hyacinthe and Drummondville on a business trip. He reports that business is very good and collections better than ever.

The shoe retailers are very busy, but they cannot get sufficient stock from the factories owing to the scarcity of materials. The prices of last year have risen from 75 cents to \$1.00 a pair.

## AUGUST IS TIME FOR CLEARANCES

This slogan is worthy of general adoption by local and state associations of retail shoe merchants, and the proof of organization initiative lies in action toward co-operation of the members promptly as a situation arises. This year a situation has arisen which makes it highly desirable for merchants to sustain the raw material markets whenever possible—and assuredly these markets cannot be sustained by premature clearances, which mean either profit reductions or net losses to merchants, and an increasing strain on the raw material situation through the resultant demand for stock replacement. Shoes are worth their replacement value to-day; anything short of that is potential loss, to avoid which the initiative of the Massachusetts Retail Shoe Merchants' Association should be followed, as expressed in the following resolutions of the executive committee:

It is important at this time to consider taking action on the semi-annual mid-summer mark down sales of the shoe

## USEFUL AND INTERESTING

*Enclosed please find \$1.00 to cover my subscription to the "Shoe and Leather Journal" for another year. I find the journal very useful and interesting, as it keeps folk in the smaller centres in touch with the trade everywhere in the Dominion. Wishing you continued success.*

*Yours sincerely,*  
Perth, Ont. F. B. POWELL.

**Packard's Special**  
**"WHITE'O"**

This is the line to feature during summer days when so many people are wearing white shoes—and soiling them

**L. H. PACKARD & CO., LIMITED**  
**MONTREAL**

retailers of the state of Massachusetts, and we, the members of the executive committee of the M.R.S.M.A., approve and endorse the recommendations to the members of the Massachusetts Retail Shoe Merchants' Association, as follows:

We, the executive committee of the M.R.S.M.A., believe that the question of the semi-annual mid-summer markdown sales in the retail shoe stores of our members is of extreme importance to all of us this year and we have endorsed the following resolution:

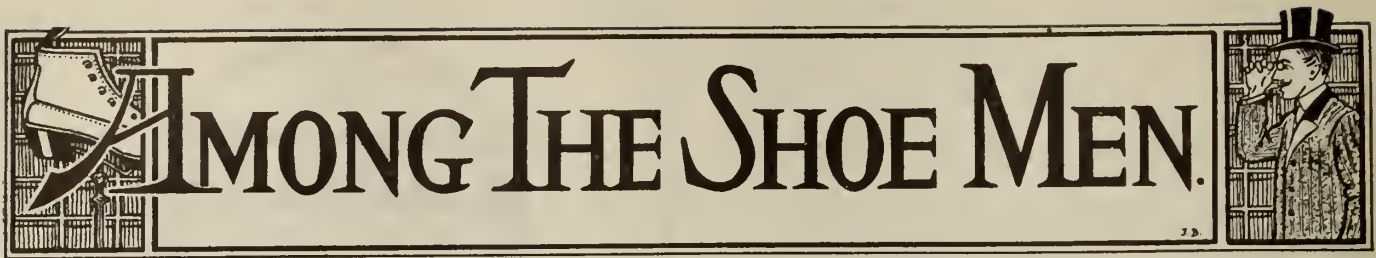

Whereas, The continued and rapid advance in the prices of all footwear purchased by shoe retailers on account of the increase in price of leather and other merchandise used in shoes and believing that the increased cost of leather will not diminish for some time to come and realizing that shoes now on our shelves are worth more now than they were when ordered, and if conditions continue, will be worth considerably more in the future, and

Whereas, It has been the custom of many shoe retailers to begin their mid-summer mark-down sales July 1st, to unload shoe stocks and realizing that it has been the habit of many customers to put off buying their footwear until the sale starts,

We believe that it is wise and important on the part of shoe merchants of the State of Massachusetts and throughout the country generally, to adopt a different policy this year, and start their mark-down sale August 1st, instead of July 1st, eliminating, as far as possible, staple and standard lines of shoes from their sales and confine them to fancy and novelty footwear only, whereby the retailer can get full profit on shoes sold, particularly during the month of July.

Be it resolved that the members of the M.R.S.M.A. postpone their mark-down sale from July 1st to August 1st, eliminating as far as possible from their sale, staple lines of shoes and not sacrificing footwear unnecessarily, thereby securing a legitimate profit on shoes sold during the month of July.

# AMONG THE SHOE MEN.

H. V. Tilley, of Charles Tilley & Son, Toronto, and wife, have returned from an extended trip to Western Canada and California.

L. B. Hutchison, manager of the Toronto branch of the Kaufman Rubber Co., is on an extended motor tour of the Maritime Provinces in company with O. J. Killam, of St. John, N.B.

The firm of Waterbury & Rising, St. John, N.B., have added a qualified foot specialist to their staff in the personage of Ronald S. Edwards, who recently graduated with honors from Illinois College of Chiropody.

Another increase in the price of shoes is predicted in the Maritime Provinces as a result of the general rise in calfskins and hides.

The stock of H. S. Chapman, shoe dealer, of Clinton, who some time ago assigned, was sold at Suckling & Co.'s, Toronto, on July 5th, to H. C. Borbridge, of St. Thomas, Ont., at seventy-six cents on the dollar. The stock of rubber and leather shoes, trunks and findings amounted to \$4,869.

E. A. Chalk and family, of Toronto, are spending the summer holidays near Orillia.

H. V. Shaw, secretary-treasurer of Jackson & Savage, wholesale shoes, Montreal, and wife, spent a few days in Toronto and Niagara Falls last week on a holiday trip. While in the city Mr. Shaw called upon a number of friends in the trade.

J. J. Connor, who is western representative of McLaren & Dallas, Toronto, has returned from an extended selling trip throughout the Prairie Provinces and reports business as greatly improving in the West.

J. G. McDiarmid, of Toronto, and wife, are spending the heated term at Christie's Lake, near Perth, Ont.

Arman Charbonneau, 15 years of age, had his right hand severely crushed by being drawn under a roller while working a shoemaking machine at the Tetrault Shoe Company works, Demontigny street, east, Montreal.

The shoe retailers of Rochester, N.Y., will hold what is known as the Rochester Retail Footwear Exhibit at Powers' Hotel, in that city, on September 12th and 13th next.

The Toronto Leather Novelty Co., of Toronto, recently registered.

James F. Clark, of Clark Bros., St. Stephen, N.B., spent a few days in Montreal recently on business.

Kenneth Savage, of the staff of the Walk-Over Boot Shop, Toronto, has returned after spending his holidays in Montreal, Boston and Brockton, Mass.

A. Levy, of the Right Form Shoe Store, Yonge street, Toronto, has returned from a visit to Boston and other New England shoe centres.

W. J. Heaven, manager of the Anglo-Canadian Leather Co., Toronto, is on an extended business trip to the Maritime Provinces.

Robert Fraser, of Montreal, has returned to that city after a business trip to Toronto and Berlin.

W. A. Lane, of Montreal, manager for J. A. Scott, is receiving condolences owing to the recent death of his father.

William Northgrave, road commissioner for St. Mary's, Ont., passed away recently at the age of fifty-three years.

He had been in the service of the town for fifteen years and was an uncle of R. M. Northgrave, shoe merchant, of St. Mary's.

Owens & Elmes expect to open a handsome new shoe store at 89 Yonge street, Toronto, about the first of next month. The establishment will be one of the most attractive and splendidly fitted up of any in the Dominion.

Richards & Sons, boots and shoes, Winnipeg, have dissolved partnership; Geo. Richards continues under the same name.

R. Volhoffer, shoes and harness, Southey, Sask., has sold out.

J. P. Kilgour, vice-president of the Kilgour-Rimer Co., Winnipeg, returned recently after a business trip to the east.

George Ryan and G. C. Malcher, vice-president and sales manager of Thos. Ryan & Co., Limited, were recently in the east on a business trip.

W. F. Martin, of the Kingsbury Footwear Co., Montreal, spent a few days in Toronto on business last week.

George Stockand, wholesale shoes, Edmonton, Alta., has returned to the West after spending some time in Berlin, Toronto, Montreal and Quebec on business.

J. B. Kilgour, proprietor of the Regal Shoe Stores in Winnipeg and Toronto, has returned to the West after a recent visit to Toronto and other points.

H. Boak, who represents J. H. Hirst, shoe and slipper manufacturer, Waterfoot, England, was in Toronto last week with a fine range of samples and called upon a number of members of the trade.

George H. Witheridge, of the staff of D. D. Hawthorne & Co., Toronto, is spending his holidays in Orangeville, Orono and other centres in Ontario.

J. S. Ashworth, of Toronto, Canadian representative of Sir H. W. Trickett, Limited, accompanied by his wife and family, spent a few days at Jackson's Point, Ont.

Wesley Allen, of the traveling staff of C. Parsons & Son, leather dealers, Toronto, and wife, are spending a holiday at Rosemount, Ont.

John Christie, of the Christie Trunk and Bag Co., Amherst, N.S., spent a few days in Toronto and other Ontario centres last week on business.

P. M. Goff, of Toronto, who has returned from a few days' fishing expedition to the Severn river, reports having had first-class luck.

D. Rowan, shoe retailer, 1627 Dundas street, Toronto, has taken in the store next door and has installed a modern and very attractive new front.

W. G. Parsons, of C. Parsons & Son, Toronto, who is a member of the St. Simon's Lawn Bowling Club, took part in the recent tournament of the Ontario Bowling Association at Niagara-on-the-Lake.

J. A. Cyr, general manager of the Rena Footwear Co., Limited, of Montreal, has been visiting Boston, Lynn, Haverhill and Brockton in the interests of the company.

H. E. Wettlaufer, of Berlin, was among the live representatives of the shoe trade who took part in the recent tournament of the Ontario Bowling Association at Niagara-on-the-Lake.

Lieut. M. J. Parsons, of the 19th Battalion, Q.O.R. machine gun corps, who went over with the second con-

tingent to France and has been in the trenches for several months, has returned to Toronto. He is a son of W. G. Parsons, Toronto.

Mr. Fred Baird of the Rannard Shoe Limited, No. 1 store, Winnipeg, who has charge of the men's shoe department, has gone on a vacation through the Eastern Canadian and American cities as far as New York. Mr. Baird has been with the Rannard Shoe Limited for several years and is visiting the Eastern style markets in order to promote the welfare of the progressive company he is with. Mr. H. A. Maher, of Ft. Dodge, Iowa, Mr. Roy Thompson of Minneapolis, Minn., and Mr. J. A. Bengé, formerly with Messrs. French, Schreiner & Urner, of St. Paul, Minn., are now with the No. 2 store of the Rannard Shoe Limited, Winnipeg. Miss J. W. Turner, formerly with Stobarts Limited, wholesale dry goods, is filling a similar position with the Rannard Shoe Limited No. 2 store.

One leading manufacturer of men's welts writes the *SHOE AND LEATHER JOURNAL*: "I might advise that the prices we give for 1916 are not the prices of leather to-day. The prices of leather to-day, I think I am safe in saying, are 6% higher than you last quoted. I might add that by the time we go out with our samples about the 1st of September, I believe the price of leather will be advanced 10% and also an extra 5% on the findings. That will be about the additional figure that shoes will be selling for next spring."

Julius Lipsky, of Montreal, was awarded \$1,886 by Mr. Justice MacLennan in a suit taken under the Workmen's Compensation Act. Lipsky was employed by the Canadian Consolidated Rubber Co., Montreal, and met with an accident which incapacitated him from work for a long period. In view of the permanent injury, the court granted him the amount mentioned.

Emile Joseph, shoemaker, 815 Bank Street, Ottawa, was arraigned before Judge Gunn in Ottawa on a charge of unlawfully having 150 pairs of government rubbers in his possession. He was found guilty and was given a suspended sentence on furnishing bonds for one year. The rubbers in question were given Joseph by Quartermaster-Sergeant Clark of the Engineers, who some time ago was convicted and given suspended sentence for obliterating the government stamp on binoculars.

A shoe manufacturing industry may be established in Winnipeg, according to an announcement made by Louis Kon, chief of the department of immigration of that city. Mr. Kon, who is co-operating with the industrial bureau, said that a prominent shoe company operating a number of large factories in St. Paul has been in communication with him, and will establish a factory in Winnipeg shortly if freight rates and leather prices are satisfactory.

An important industry has been secured for Guelph and will begin operation early in the fall. A deal has been closed whereby the Partridge Rubber Co., of Montreal, goes to Guelph. They will occupy an entire top floor of the building of the Standard Tire Co. The new firm will manufacture a variety of small rubber goods which are staples on the market. The machinery of the Standard Tire & Rubber will be used by the Partridge Rubber Co., who will employ 65 hands at the outset.

It is understood that J. A. Scott, the widely known leather merchant of Quebec, is going to the front as a major, in the battalion being raised in Quebec, under the command of Lieut.-Col. Sir William Price. Major Scott is an old military man, and during his absence, Mr. Wilson will look after the office and financial end of his business, while Messrs. Lane of Montreal and Blouin of Quebec, will look after the leather end.

The firm of Farmer Bros., Arnprior, Ont., has been dissolved, William Farmer retiring. Edwin Farmer will still carry on this old established business, which is so widely known in Eastern Ontario. He has a thorough knowledge

of the shoe game and announces that he will continue making a good line of hand made boots, including Farmer's River boots, while shoe repairing will be attended to in all its branches, by skilled workmen. A new policy is announced in connection with the house, and that is, from this out in order to give patrons the very best value, a strictly cash business will be done.

W. P. Francis, who is vice-president of the John Ritchie Co., Quebec, is highly regarded in shoe-making circles, and since coming to the Ancient Capital, a little over two years ago, has made many friends in the trade. From 1903 to 1908 he was vice-president of the N. R. Packard Co., of Boston, Mass., and upon the death of Mr. Packard in 1908 the partnership was dissolved. He then managed the Geo. H. Snow Co., and after remaining there for a couple of years, had decided to retire, but was urgently pressed to accept the management of the Emerson Shoe Co. of Rockland, Mass. There he was for some years before coming to the Ancient Capital in 1914, where he is prominently associated with the John Ritchie Co., and has demonstrated his ability, judgment and skill in the making of fine footwear. W. L. Francis, sales manager for Gale Bros., Limited, Quebec, is a son.

The shoe dealers of Calgary are closing their places of business on Wednesday afternoons at one o'clock during July and August. All the shoe shops on Eighth Ave. and First St. West agreed to the weekly half holiday with the exception of one.

A memorial service in honor of the late Corporal J. Walter McIntyre was held Sunday evening, July 9th, in the Methodist Church in Brookville, St. John county, N.B. The little edifice was crowded to its capacity and the service was one of the most impressive ever held within its walls. The entire community, regardless of Church affiliations, took advantage of the opportunity to pay a tribute to the memory of the young departed hero, who gave up his life on the battlefields of France for the honor of his King and Country. Rev. George N. Somers paid an eloquent tribute to the young soldier. Corporal McIntyre was formerly bookkeeper with the firm of Ames-Holden-McCready Co., Limited, St. John's branch.

The City Council of St. Thomas, Ont., has passed through the initial stage the proposal of the Monarch Knitting Company of Dunnville and St. Thomas to erect a \$50,000 hosiery factory in St. Thomas, and to employ 200 hands within the year, in return for a \$30,000 loan and fixed assessment for \$10,000. The company has just paid off a similar loan made in return for the location of a knitting and spinning factory here.

Mrs. Nellie Humphrey, widow of Frank Humphrey, who was a member of the firm of J. M. Humphrey & Co., wholesale shoe dealers, St. John, N.B., died a few days ago at her home in Hampton, N.B. Her husband predeceased her in 1906. Besides her daughter, Miss Ruth, and two sons, Douglas and John, she is survived by two sisters and one brother.

Among those who are attending the Shoe and Leather Market Fair in Boston are W. A. Hamilton, E. R. Lewis, D. D. Hawthorne, W. A. Moore, Wm. Edwards, jr., J. A. McLaren, Hugh White, Theodore King, J. A. Matheson, Toronto; Peter Smith, of the Muskoka Leather Co., Bracebridge; John Clark, of the Acton Tanning Co., Acton; Wm. Chamberlain, Galt, and many other representatives of the shoe and leather interests of Toronto and throughout Ontario.

Fairweathers, Limited, St. Catherine st. west, Montreal, intend installing a shoe department in their establishment. The department, which will specialize in high-class ladies' footwear, will be on the ground floor and will be superbly fitted up. Miss Little, who has been assistant buyer with John Murphy & Co., Montreal, in the shoe section, will

have charge. The very latest novelties will be carried and prices will range from six dollars up to twenty-five dollars per pair. C. L. Owens, of Toronto, who has supervised the buying, has returned from a business trip to New York, Boston and other eastern centres. He was accompanied by Robert H. Fairweather, of Toronto.

The Sherbrooke Footwear Co., Sherbrooke, Que., which is under the management of J. H. Hamilton, is very busy and is specializing on the manufacture of women's shoes, while a jobbing department has been opened up which carries all kinds of footwear.

Captain P. M. Rising, son of E. L. Rising, of the firm of Waterbury & Rising, St. John, N.B., arrived safely in England with the 104th Battalion, according to a cablegram received by his wife on July 7th. Prior to enlisting he was connected with the management of King street retail store.

Mayor R. T. Hayes, of St. John, N.B., recently received a letter from his son, Lieutenant Ralph Hayes, of a Canadian artillery unit, in France. He spoke of having gone through some severe engagements, but fortunately escaped injury. Prior to enlisting he was connected with the management of J. M. Humphrey & Co.'s shoe factory in St. John.

A. L. Dupont, shoe manufacturer, Maisonneuve, has returned from a motor trip to Boston.

F. H. DeLancy, son of F. N. DeLancy, of J. & T. Bell, Limited, Montreal, who underwent an operation for appendicitis, is progressing most favorably, having left the hospital a few days ago.

J. H. Moore, who represents the Minister, Myles Shoe Co. throughout the Maritime Provinces, has returned to Toronto after a very successful selling trip. He received the sad intelligence last week that his brother, D. L. Moore, formerly of Cornwall, but for the past five years residing in Calgary, had been killed in action at Hooge. He was a member of the 12th Mounted Rifles and went to the front with the Second Canadian Contingent.

The many friends of O. J. Killam, manager of the St. John, N.B., branch of the Kaufman Rubber Co., will sympathize with him in the loss of his only son who was about twelve years old. Death was caused by appendicitis.

J. N. Gibson, city traveler for Blachford, Davies & Co., Limited, Toronto, who has been ill for the past three weeks, is able to resume his duties.

W. W. Lindsley, of St. Catharines, Ont., who represents the firm of E. T. Wright & Co., St. Thomas, Ont., throughout the Maritime Provinces, has returned after an extended trip and reports a very satisfactory selling season.

C. S. Sutherland, of Amherst, N.S., S. H. Parker, of Preston, Ont., James Clark, of St. Stephen, N.B., F. P. Stockton, of Hymans, London, W. A. Hamilton of Toronto, W. Taylor, Halifax, J. T. Tebbutt, of Three Rivers, Que., and Mr. Turner, of Merchants Consolidated, Limited, Winnipeg, were in Montreal recently on business.

The Independent Rubber Co., of Merriton, Ont., are erecting several more dwellings in that town for their employes and are also putting up a large lodging house for the living quarters of several girls. The buildings are of a superior type and provided with all modern conveniences.

H. R. Emery, of Blachford, Davies & Co., Limited, Toronto, has been spending a few days in Ottawa and other eastern centres.

The merchants of North Toronto will hold a big picnic at Centre Island on Wednesday, July 19th, and among the interesting events will be a return baseball match between the city travelers of the shoe and findings houses and the shoe retailers of Toronto. It will be remembered that a few weeks ago the footwear dealers managed to score a signal victory over the travelers and the latter now demand satisfaction. It is expected that there will be large attendance at the picnic.

A. M. Jarvis, manager of the Murray Shoe Co., London, and J. G. McDiarmid, Western Canada representative of the firm, have returned from an extended visit to the leading shoe centres of America, looking into next season's style tendencies and picking up pointers on the outlook generally.

James D. MacKay, of Fredericton, N.B., died very suddenly at his residence, 492 George Street, a few days ago. He had been to church in the morning and was about the house during the day. The deceased was well known and highly respected. He was born at Boiestown, Northumberland county, August 26th, 1835, being the only son of the late William MacKay, of that place. In 1873 he removed to Chatham, where he resided until 1888. While a resident of Chatham he held important positions. Since 1888 he had been a resident of Fredericton except for a period of about three years during which he was manager of the Davidson lumber business at Salmon River, St. John county. In Fredericton he established the boot and shoe business still conducted under the name of MacKay & Co. He represented St. Ann's ward in the City Council for some years, and later became city auditor. He was also fisheries officer for York county, resigning the office about three years ago on account of failing strength. The late Mr. MacKay is survived by a widow, three sons and one daughter. One son is J. Walter MacKay, who conducts the shoe business of MacKay & Co., Fredericton.

The new home recently purchased by Gutta Percha and Rubber, Limited, at 143 Granville street, Halifax, N.S., is a four-storey brick structure with cut stone front and has been made thoroughly modern. A new freight elevator has been installed and the building placed in first-class shape for doing business with the quickest possible dispatch and order, being situated in one of the best wholesale sections of the city of Halifax. A. E. Doig, the manager of the Halifax branch, has been with the company for the past ten years. He started with them on February 1st, 1906, in the Montreal branch, under W. H. Galt, who was then manager and is now general sales manager. Mr. Doig, began shortly after he left school as a youth and has been with the Gutta Percha & Rubber, Limited, ever since. He was born and educated in St. John, N.B., and came to the Maritime Provinces as representative for the company on the death of Mr. Ogle, and when the Halifax branch was decided upon he was made manager.

Edgar P. Reed, "dean" of the Rochester shoe manufacturing trade, and honorary vice-president for life of the National Boot and Shoe Manufacturers' Association, also known affectionately as "Father" of that association, because it was in his brain that the idea of forming such an association originated, recently celebrated his fiftieth anniversary of entering the shoe business. Mr. Reed, who is in his eightieth year, was born February 14th, 1837, at Moriah, Essex county, N.Y.

# REGAL SHOES

The REGAL SHOE styles, made in our Canadian factory, are identical with those being sold concurrently in the Exclusive REGAL SHOE SHOPS of London, New York and other great cities.

That's why the REGALS are usually seasons ahead of others in new style features.

This fact is one of the many distinctive advantages enjoyed by merchants who sell REGAL SHOES.

Another one is that we sell to one merchant only in each locality, so that the first man to get REGAL SHOES in any locality gets the full benefit of the peerless REGAL Reputation.

If there's no REGAL SHOEMAN in your town, write us for particulars of the REGAL LINE and sole agency proposition.

# FOOT TROUBLES

AND HOW TO RELIEVE THEM

*Proper equipment means efficiency and efficiency is the byword of modern business. Efficiency and Service work hand in hand and the entire Scholl organization is at your command.*

Genuine results are obtained when the **right appliances** are **scientifically** fitted. Ten years of education through trained representatives, through the trade press and the remarkable efficiency gained in the use of Dr. Scholl's Arch Fitter and method of fitting have placed the sale of all foot appliances on a higher plane. This naturally removes from the market the undesirable ones, because today the shoe dealer recognizes that with the Scholl simplified method all feet can be fitted with any shoe and be made comfortable.

## How to Fit Arch Supports

This is Dr. Scholl's Arch Fitter on the new cabinet ready to place anywhere most convenient to the fitter. The cabinet is substantially built of solid oak, dull finish, with three drawers for Dr. Scholl's Foot Comfort Specialties, and inside the self-closing doors are compartments for a small assortment of arch supports. The cabinet is an ornament as well as a practical instrument of efficiency for every shoe dealer.

With Dr. Scholl's Arch Fitter all adjustments can be made accurately to produce results in relieving foot troubles. Fitting is a science and this machine was never designed to be used as a bluff, but because arch supports sold over the counter will not produce results.

If you wish to cash in on the foot trouble people that come into your store every day and get the profit and prestige that will come to you automatically from doing so, write to-day for further information.

## FRENZIED SHOE BUYING

**Dog Days Do Not Kill it—Argument and Ridicule Do Not Turn it From Gambling in Futures in Shoes—Manufacturers Alarmed and Inconvenienced**

**T**HE SHOE AND LEATHER JOURNAL launched a "Jack Johnson" a few weeks ago at the evil of trying to "beat the game" in shoes. Notwithstanding the many favorable comments received from manufacturers, dealers and even leather men there seems still to be sufficient gambling in footwear futures to keep the market keyed up to the hysterical point and to maintain the unhealthy, nervous tension at which shoe manufacturing has been conducted for some months past.

It is surely a strange situation when manufacturers have to ask customers to reduce their orders and advise them to put off placing their requirements for the coming season; yet this is being done today by some large concerns.

Here is a letter, by the way, from an American shoe company to a large customer in Buffalo, which a representative of the SHOE AND LEATHER JOURNAL picked up recently. It evidences the acuteness of the situation across the line, and, in an emphatic way, backs up what this Journal has been saying for the past two or three months. It says:—

"Sir,—If you are one of the many dealers that have been buying shoes at the rate of 90 miles an hour, you should now stop, look, and listen.

### Stop

"Stop long enough to reflect over your past years of shoe experience and realize that you have never made a dollar speculating in footwear; and in fact, have lost a great deal in trying to 'beat the game' by buying heavily for future needs.

### Look

"Look into the future, with a clear vision, and see that there is sure success for those who have conserved their cash and are in a position to go into the market next fall and purchase shoes that will be in strong demand—and then sell them at a good profit, and not be loaded with shoes bought early that you 'thought' were going to be good, but that will be killed by new advance styles brought out by the tanners and manufacturers next August and September. It has happened several times before, and may happen again this fall.

### Listen

"Listen to the advice of a true friend and the advice of your own conscience and good judgment, and we believe that you will follow our suggestion and adopt a hand-to-mouth policy of buying.

"There is no occasion for alarm, and all orders placed should remain in force, but don't keep on loading up with shoes that you will have to put in cold storage.

"Reserve a liberal amount of cash, with which to handle your business on the new styles that will be in vogue this fall, but as yet have not been born."

This hits the nail on the head. The feverish anxiety of dealers to keep covered with shoes is having the effect on the one hand of "boosting" footwear prices and, on the other hand, will undoubtedly result in large stocks of "cold storage" shoes in the near future. Should the war suddenly terminate there will undoubtedly be a panicky turn to affairs, for a time at least, which will mean a tumbling market, until conditions readjust themselves.

# HOW DO YOU FIGURE THE PROFITS ON SHOES

**Too Much Guesswork and Not Enough Certainty—Do You Know Your Percentage of Cost to Do Business?—Necessary to Get Higher Prices and Larger Margin Owing to the Great Advance in Costs All Along the Line—Right and Wrong Methods**

**T**HIS question was given to many members of a certain trade in Canada and the United States. If an article costs \$1.00 and you know your cost of doing business is 22 per cent. and you wish to make 10 per cent., what is the selling price?

You will hardly believe me when I tell you that fully three-quarters of the merchants answered the question wrong. The majority gave \$1.32 as the selling price, whereas the correct figure proved to be \$1.47.

A great many people reason this way. Well, my article costs a dollar, so I must add (mark the word add) to this my business cost, 22 per cent., and the 10 per cent. I wish to make.

Remember the cost price is not a thing to be added to, but is a percentage of the selling price.

The simplest non-technical way to arrive at the selling price in all cases is to add together all your percentages, deduct them from 100, and divide the remainder into your cost, the quotient being your selling price.

I will now give you some illustrations of why many fail in business because they figure their profits incorrectly.

### The Right Way

Example—

Expense of doing business is.....	25%
(Figured on gross sales, i.e., selling price.)	
It is desired to make a profit of.....	10%
(Must be figured on selling price.)	
Cost of an article.....	\$2.00
Find the selling price.	

Solution—

	Rent	Delivery charges
Expense	Light	Telephone
Selling Profit	Heat	
Price Cost	Wages	Interest on Capital invested
	Advertising	Depreciation on stock
	Insurance	Bad debts
	Freight	
	Express	Extraordinary expense

100% equals..... Selling Price

35% equals..... { Profit 10%  
Expense 25%

65% (of selling price) equals..... Cost

\$2.00 will be 65% of selling price.

Divide \$2.00 by .65 equals \$3.08.

Answer—

Selling price should be made \$3.08.

Proof—

Expense 25% of \$3.08 equals.....	\$0.77
Profit 10% of 3.08 equals.....	.31
Cost 65% of 3.08 equals.....	2.00
	<hr/>
	\$3.08

### The Wrong Way

Figuring it as 25% plus 10% or.....	\$2.70
Which is less than cost.....	\$2.00
Plus expense.....	.77
	<hr/>
	2.77

That's why they fail.

### Touch Every Part of Cost

Henry Drummond says that there were three blind men once asked to touch an elephant. One of them

felt his trunk, another his ear, and the third his tail. They each thought they had touched the elephant, whereas it was only a part.

Is this what we are doing to-day on this question of profits? Are we figuring that when we add 25 per cent. to our cost, we are making 15 per cent., because our cost of doing business is only 10 per cent. If so, we are wrong, and it is one of the vital nails which we need to hit on the head and drive it home fast.

The man who says he is doing business to-day for 10 per cent. either wants help or is telling a lie. That man around the corner from you, who thinks he is doing business on a 10 per cent. basis, is not only going down hill very fast, but he is taking you along with him, as in nine cases out of ten you will meet his price in order to retain some valued customer or for some other reason.

A firm down east went to the wall a few years ago. For about five years previous to the crash they were putting from \$3,000 to \$7,000 on the wrong side of the profit account. When the re-organization took place one would suppose they had learned a lesson. What are the facts? Last year their audited statement showed that on a bond issue of \$500,000 and a further capital of \$1,000,000, they made the large sum of \$12,000, and after deducting 6 per cent. interest on the bonds, they were \$18,000 in the hole. What was the reason? Either they were adding the princely sum of 10 per cent. to cost, or their overhead expenses were much greater than they had figured.

### How It Feels to Run Shy

Did you ever go on a holiday jaunt and think that you had prepared yourself with sufficient funds or letters of credit and have to borrow money on which to pay your return journey. Did you ever start out on an automobile tour with your tank filled to its utmost capacity, feeling sure you had enough "gas" to carry you through, only to learn that you were five miles from a supply station and were completely stalled for want of fuel? Did you ever go to a family picnic with the youngsters, thinking you had provided a plethora of provisions for the outing, only to discover that before the day was half over the last scrap had been taken from the hamper and devoured?

All these situations are predicaments which, while they may appear amusing to the reader, are anything but enjoyable, when you are "the victim," and it is the same thing in mercantile life, in the matter of figuring profits. Many a man thinks that he is making so much on each pair of shoes, and at the end of the year, that he has cleared up a profit of so many hundred or thousand dollars, but on taking stock and examining his bank account and bills payable, finds too often that the alleged profit is a minus quantity. He has lulled himself into a false sense of security, and indulged in the pleasant fiction that he was making money, when he was not, as it has proved. It is a rather rude shock to him to awaken to the fact that, on the year's operation, he is not a dollar ahead, but that he has come out "short."

### Figure Profits on Selling Price

There is altogether too much guesswork in the figuring of profits, the cost of doing business and overhead outlay. One man figures one way and one another, but like everything

else, there is a right and a wrong method of doing things. All profits should be figured on the selling price and not on the cost price. "Why?" someone asks. Well, in the first place the expense of making that sale, or leading up to its conclusion, all comes out of money received from the transaction. The selling price might be interpreted as the money received and placed in the till or cash register. Out of this there has to be deducted the outlay for help, rent, light, heat, insurance, freight, telephone, repairs, advertising, display fixtures, delivery, interest on invested capital and many other items. There fore the ratio of profit should be gauged upon the selling price.

Much has been said and written upon this subject, yet little attention has been paid to it by some merchants. In the belief that a good thing will bear repetition and perhaps help to drive home some facts that should be patent to the retailer, the SHOE AND LEATHER JOURNAL once more presents to its readers some additional data on how to figure profits. Many a man in business has fooled himself out of margins and eventually failed by calculating percentages of profits on the cost price, when everything should be figured on the selling price. There is a difference between profit on the cost price and profit on the selling price, which often spells success. Sometimes a shoe merchant will say—"Oh, I just cleaned up 25 or 30 or 33% on that transaction," referring to the cost price, but when the calcium light of selling price is turned on, it is then discovered that the profits have only been 16 1-3%, 23% and 25%.

Give some attention to the following table and, with the increasing prices for shoes, which in many instances have gone up as much as 25 to 40%, the advance in wages, owing to the scarcity of help in the shoe store and the higher cost of living and general trend of everything to maintain war values, see that you are not profit shy in the shoe game.

20	% added to cost is 16 1/3 % profit on selling price
25	% added to cost is 20 % profit on selling price
30	% added to cost is 23 % profit on selling price
33	% added to cost is 25 % profit on selling price
35	% added to cost is 26 % profit on selling price
37 1/2	% added to cost is 27 1/4 % profit on selling price
40	% added to cost is 28 1/2 % profit on selling price
45	% added to cost is 31 % profit on selling price
50	% added to cost is 33 % profit on selling price

**Not How Cheap but How Good**

People have the money and will pay the price if you have only the fortitude and strength of character to get enough for your goods. Of course, it requires more of a backbone than a wishbone, but the retailer to-day, who is making money, is the one who is not catering to the public on a "how cheap" basis, but on a "how good" basis. He talks quality, style, attractiveness, snappiness, smartness, and gets a commensurate price. He is not harping on "cheapness," "less than cost," "marked down," "turning them loose at so much," "now selling at so-and-so," and other arguments. There are always plenty of men in every town who can get the cheapest trade. Any person, by raising a shout and plastering his store front with a miscellaneous assortment of boots and shoes, so that the whole exterior is literally a leather fortification, by putting huge figures on cotton signs, distributing flaring dodgers and using flamboyant ads, can corral the cheap trade. This schooling does not require any long term of study or application. Such a man is a storekeeper and nothing more, and there is a vast difference between a storekeeper and a merchant. A merchant is one who caters to the wants of his customers on the highest and best plane. He gives value, quality and service, keeps a well assorted, up-to-date stock, buys only from reliable and progressive manufacturers, has a dignity and distinction about his premises and selling organization that proclaim the worth of the man, the efficiency of his establishment and the excellence of his goods. He creates a bond

of confidence and mutual trust between his patrons and himself. He gets a fair percentage of profit on all the lines that he handles and stands back of his record, his stock, his work and his word. He is not here to-day and away to-morrow; he does not pretend to be in business for his health, or for the sole benefit of the public. He is there, the same as as you and I, and everybody else are, in our respective spheres—to make money and make it honestly, uprightly and legitimately.

**Along Sure and Safe Road**

But this is getting away from the profits. He knows how to figure profits, he knows the cost of doing business, is able to compare the records of successive years and to put his finger on any weak point in his organization. What are the causes of failure in business? Not getting sufficient profit on goods, not figuring that profit correctly, getting overloaded with various lines and granting too much credit.

The man who is cutting prices to-day is really committing commercial suicide. No matter what price he puts on his shoes, he will meet the allegation that his figure is too stiff or that some retailer down the street is disposing of the same boot at 25 or 50 cents per pair less. There is never very much money to be made out of this class of people—they can always do so much better elsewhere, or think they can.

Let that other fellow get their trade and some day these people will find out that while they may have obtained footwear for so much less, they have got an inferior quality or the man who sold them will learn that there has been mismanagement in his business or he is unable to pay his creditors and disaster awaits him around the corner.

**How to Figure Turnovers**

In answer to the question—What is the correct way to figure the number of times a stock has been turned in a year? "System" gives the following reply:

Divide the average stock on hand during the period, at cost, into the sales for the period at cost. Or divide the average stock on hand during the period, at selling prices, into the sales for the period.

For instance: Suppose the sales are \$100,000 a year and the goods these sales represent cost \$50,000. There are four inventories during the year, showing the stock on hand at each time to have cost \$12,000, \$10,000, \$8,000 and \$14,000, and to have been marked to sell for \$24,000, \$20,000, \$16,000 and \$28,000 at those times. The annual rate of turnover would be figured either this way:

$$\frac{\$100,000}{\$24,000 + \$20,000 + \$16,000 + \$28,000}$$

Or this way:  $\frac{\$50,000}{\$12,000 + \$10,000 + \$8,000 + \$14,000}$

Which in either case is 4 6-11; since

$$\frac{50,000}{4}$$

$$\frac{44,000}{4}$$

is exactly the same as

$$\frac{100,000}{4}$$

$$\frac{88,000}{4}$$

Either method of figuring the rate is entirely accurate.

ENJOYING BASEBALL GAME AT MERCHANTS' PICNIC

The above illustrations are snapshots of a baseball game between the shoe retailers and travelers of Toronto, and were taken at Centre Island. No. 1 shows a general view, with Billy Young batting, and Norman Ingram, centre, next to bat. No. 2 is a group of interested fans, prominent shoemen, including Messrs. Waller, Allen, Blachford, Shinnick, Fegan, Martin and Snider. No. 3 is a study in expression. Tom Kelly, who scored six runs for the retailers, is batting, and Dick Nicholson is catching for the "grip" artists.

It is the same old story. The shoe retailers of Toronto possess an invincible ball team and in the return game at Centre Island on July 19th, when the merchants of North Toronto held an enjoyable picnic, they defeated the city travelers by 27 to 17 in a seven innings contest. In a struggle at Willowvale Park some weeks ago the shopkeepers were also victorious over the city footwear salesmen by 10 to 6. The latter asked for an opportunity to wreak their revenge on the retailers but when the chance was afforded them the representatives of the wholesale houses did not make good. A large number of the trade attended and there was great enthusiasm, in spite of the sultry weather, when Umpire T. A. Wilson, of Bloor street west, called "play ball."

The retailers have a bunch of players that would make the Toronto Eastern League team go some to hold them. For the travelers Bain, Bawden and Young were always on the job and were largely responsible for keeping the score from getting into the three figures. Chappell, Kelly and Bayford for the shoe dealers proved themselves to be efficient at the bat, while Barlow and Rogers also made a good show-

ing. Here is the official score but it does not in any way represent the intense interest that was manifested in the fray.

Shoe Retailers

SOME CATCHY MODELS FOR MY LADY FAIR

Here are some of the latest offerings in ladies' foot attire. On the left is a brown kid button with saddle, foxing and covered wood heel of black kid. In the centre is a grey nubuck lace boot; invisible cyclots, black kid tip, one-piece stay and overlaid cuff and foxing. On the right is a Russia calf 7 1/2 inch button boot; vamp, foxing and cuff to match; brown cloth top; brown buttons and buttonholes.

# SHOE REPAIR MEN ARE GETTING BETTER PRICES

Following the Example of Ottawa and Toronto the Repair Men in London, St. Thomas, Peterboro and Other Cities Have Come Together—The Schedules that Prevail in the Different Centres—Sole Leather Still Ascending in Price

Owing to the high and constantly increasing cost of sole leather, tap soles and heel lifts, the scarcity of labor, the ascending rate of wages and other causes, the shoe repairers in many cities have advanced their figure on all lines of work, following the example set by Ottawa, Toronto and other places.

The following price list has been agreed upon in London, Ont.

Men's sewed soles.....	\$1.00
Men's nailed soles.....	.75
Men's heels srtaightened.....	.35
Men's rubber heels.....	.50
Boys' sewed soles.....	.50
Boys' nailed soles.....	.65
Boys' heels straightened.....	.25
Youths' soles.....	.50
Heels straightened.....	.25
Women's sewed soles.....	.75
Women's nailed soles.....	.55
Women's turned soles.....	.85
Women's heels.....	.25
Women's rubber heels.....	.40
Misses' nailed soles.....	.45
Misses' heels.....	.20
Men's new heels.....	.60
Ladies' new heels.....	.65
Ladies' toe caps.....	.35
Men's toe caps.....	.40
Infants' half soles.....	.30
Ladies' back straps.....	.35
Ladies' shoes dyed black.....	.30
Men's shoes dyed black.....	.35
Buttons.....	.20
Men's whole soles.....	1.50
Counters.....	.50

The following firms in London are charging the above prices:—Modern Shoe Repair, Famous Shoe Repair, Ward's Shoe Repair, Thorne's Shoe Repair, First-Class Shoe Repair, Advance Shoe Repair, Metropolitan Shoe Repair, XL Shoe Repair, American Shoe Repair, Rodger's Shoe Repair, London Shoe Repair, Paxman Shoe Repair, Standard Shoe Repair, Wyatt's Shoe Repair, Read Shoe Repair, Guymer's Shoe Repair, Brown's Shoe Repair, New Method Shoe Repair, Canadian Shoe Repair.

## St. Thomas Men Get More

The shoe repair men of St. Thomas, Ont., have got together and recently had the following advertisement prominently placed in the daily papers of that city:—

Leather has risen in the last seven years over 100 per cent. The best quality soles that are used by the repairers of this city have risen in that time from \$2.70 to \$6.15 per dozen, and other leathers in the same proportion. To meet this great advance the shoe repairers of the city are compelled to charge the following prices:—

Men's soles and heels, sewn.....	\$1.50
Men's soles, sewn.....	1.20
Men's soles and heels, nailed.....	1.25
Men's soles, nailed.....	.90
Ladies soles and heels, sewn.....	1.25
Ladies' soles, sewn.....	1.00
Ladies' soles and heels, nailed.....	1.00

Ladies' soles, nailed.....	.75
Men's heels.....	.40
Ladies' heels.....	.30
Boys' soles and heels, nailed, 3 to 5.....	1.00
Boys' soles and heels, nailed, 11 to 2.....	.95
Boys' soles, nailed, 3 to 5.....	.75
Boys' soles, nailed, 11 to 2.....	.65
Misses' soles and heels, nailed, 11 to 2.....	.85
Misses' soles, nailed, 11 to 2.....	.60
Girls' soles and heels, nailed, 8 to 10½.....	.75
Girls' soles, nailed, 8 to 10½.....	.50
Children's soles, nailed.....	.40c. up
Boys' heels.....	.30
Girls' heels.....	.30
Children's heels.....	.25
Men's long sole,s nailed.....	1.25
Men's long soles, sewn.....	1.75
Rubber heels (ladies' or men's).....	.50
New heels, complete.....	.85
Men's toe caps.....	.60
Ladies' toe caps.....	.50
Boys' toe caps.....	.50
Misses' toe caps.....	.50
Children's toe caps.....	.35
Pieces on sole, men's.....	20c. up
Pieces on soles, ladies.....	15c. up
Patches from.....	.15
Patches (cement).....	.25
New elastic set.....	1.00
Men's button fasteners.....	.15
Ladies' button fasteners.....	.20

## Peterborough Falls in Line

An all round increase for shoe repair work has gone into effect in Peterborough and the men there declare they should have taken action long ago. The firms who are getting higher prices for their work are:—P. J. Hickey, Geo. A. Foy, W. A. Greenslade, City Footwear Co., J. V. Calderone, John Carey, Samuel Whatley, J. W. Miller & Sons, C. E. Smith, T. I. Hill, Jas. H. Whatley, Wm. Petrie, J. D. Stenson & Sons, John Kylie.

The prices that prevail now are:—

Men's sewed soles.....	\$1.15
Men's sewed soles, through the heels.....	1.50
Men's nailed soles.....	.90
Men's heels.....	.35
Women's sewed soles.....	.75
Women's turned soles.....	.85
Women's nailed soles.....	.60
Women's heels.....	.25
Girls' sewed soles.....	.60
Girls' nailed soles.....	.55
Girls' heels.....	.25
Boys' sewed soles.....	.85
Boys' nailed soles.....	.75
Boys' heels.....	.30
Children's soles.....	.45
Children's heels.....	.25
Patches.....	.15
Hand sewn patches.....	.20

### Association Keeps on Growing

At the last meeting of the Toronto Shoe Repairers' Association there was an exceptionally large attendance. Several new members were received and the new schedule of prices, which was issued some time ago, is being strictly adhered to on all sides. The Association, although only a few weeks old, is making splendid headway, and since its members set the example of increased prices, repair men in other cities have followed suit. Walter Burnill occupied the chair owing to the absence of President Chas. F. Robertson who was away on his holidays. Mr. Burnill gave the members an inspiring talk on unity and co-operation and briefly referred to the present conditions of the trade as contrasted with those prevailing before the war. He added that the present increased prices were altogether too low and in order to make a decent living and pay one hundred

WALTER BURNILL, TORONTO, WHO SPOKE ON "CO-OPERATION"

cents on the dollar it would soon be necessary, in view of recent sharp advances in leather, for the members to raise the present figures. His remarks were received with applause.

The next meeting will be held on Thursday, August 10th, in the Foresters' Building, College street, Toronto, at which it is hoped there will be a large and representative attendance.

### What Shoe Repairer is Up Against

Editor SHOE AND LEATHER JOURNAL, Toronto:—

Dear Sir,—I notice that the shoe repairers of Toronto have formed an association with the object of getting increased prices. I wish them every success in their organization work, but I would like to know can increased prices be obtained by all when one repairer will use No. 1 oak sole, while his opposition down the street will use bellies? The result is that the man who uses bellies, cuts the repair price in half. The same thing applies to another important part of the business—in fact, the best paying part—namely, rubber heels. Some wholesalers of rubber heels are selling repairers direct, at an even lower figure than they dispose of them to the jobber. What is the result? Repairers who buy these heels are putting them on at 25 and 30 cents a pair. In this way, they are cutting their own throats. The extra business that is secured by slashing prices amounts to

nothing as patrons very frequently, if not generally, leave such establishments, owing to the inferior material used. But how can the trade stop this class of man doing business?

Another point against higher repair prices is that one store in the city last week sold 500 pairs of Goodyear welt shoes at \$1.85 a pair. The purchaser may say—"Why pay

THE SHOP OF COLLEGE SHOE REPAIR CO., TORONTO,  
CHARLES JEEVES, PROPRIETOR

\$1.50 for new soles and heels when I can get an entire new pair of boots for 35 cents more? It is certainly a hard, cold world for the shoe repairer.

Yours truly,

Winnipeg, July 27th.

ST. CRISPIN.

### A LIVE PROPOSITION

(See Front Cover)

Mr. Joseph Daoust is a demonstration of the words of the wise man—"Seest thou a man diligent in his business, he shall stand before kings." Although just turned fifty and only in the shoe business for a little over fifteen years, Mr. Daoust has made his mark not only in shoes but leather, for he represents both these departments of trade.

He began in the dry goods business and was so successful that he was manager of one of Montreal's wholesale dry goods establishments at the age of twenty-six. He had had an eye on the shoe business and in 1891 took an interest in a small jobbing business on St. Paul street with Mr. Lalonde in Montreal, still retaining his position with the dry goods house. In 1899 a factory was established in Acton Vale, Que., for the manufacture of staples and this proving at last too restricted and inconvenient a location, the business was removed in 1903 to Montreal, where it expanded rapidly. In 1905 Mr. Daoust bought out his other partners and in 1908 secured the present premises at on Victoria Sq. vacated by the Ames-Holden Company. In the following year a tannery was established in Montreal, the one at Acton Vale being closed, and since that time the equipment of both shoe factory and tannery have been so remodelled and added to that Daoust, Lalonde & Co., have now the largest and most complete facilities for the production of leather and shoes in Canada. Mr. Daoust (pronounced Dow) is a genial, whole-souled French Canadian, broad in his education and views, having traveled extensively. He is an ex-president and also treasurer of the Canadian Rubber Boot and Shoe Jobbers' Association and made his maiden speech in English at the banquet held in Toronto in 1904. He is philanthropic in his inclinations and does good work in his parish at Outremont, where he lives. He takes a little recreation in fishing occasionally but he likes fishing for business best.

ON THE LEFT IS MR. WEBB'S RANCH DWELLING NEAR POWELL RIVER, B.C., AMONG THE BIG STICKS, BUILT ENTIRELY OF "SHAKES" SPLIT FROM CEDAR LOGS. THE CENTRE SHOWS ALL ABOARD FOR THE HIGHLANDS WITH MACHINERY ON THE LIGHT RAILWAY AT THE POWELL RIVER CO'S. WHARF READY TO BE DRAWN UP THE MOUNTAINS. THE RIGHT HAND SCENE SHOWS SHOE MACHINERY BEING HAULED UP THE MOUNTAIN OVER THE LIGHT RAILWAY OPERATED BY THE POWELL RIVER CO. THE CARS ARE HAULED UP THE SLOPE BY A CABLE SIX THOUSAND FEET LONG AND RUN DOWN BY THEIR OWN WEIGHT. NOTE THE STEEP GRADE.

## HOW MR. WEBB MAKES SHOES FOR LUMBERJACKS

**A Complete Repair Outfit at Powell River, B.C., Which is "Farthest Point North" for Footwear Machinery—Novel Method of Transportation to Land It—Characteristics of the Logging Boot and the Severe Service It Constantly Has to Undergo**

**A**N installation of shoe machinery of particular interest to shoemen has just been completed in the premises of the Webb Shoe Co., Powell River, B.C.

Because it is the farthest north yet that anything of this kind has reached up the Pacific Coast, the novel transportation methods necessary to bring it to its destination, the work upon which it is to be employed and the fact that the present user is one of the best known shoemen on the Canadian Pacific coast all add to the interest of men who like to watch the doings and comings and goings in leatherdom.

The machinery, consisting in the main of a Goodyear Model N stitcher with steam generator, and a 16-foot buffing and finishing outfit, was supplied by the United Shoe Machinery Company, of Montreal and is now actively employed in the construction of miners' and loggers' shoes, which are in considerable demand in the district as well as for the regular repair trades.

Owing to the geographical location of Powell River and the attendant difficulties of transportation arising, it is characteristic of the company supplying the machinery that it was accompanied from Vancouver to Powell River by their agent for that territory, who personally shipped, traveled with and installed the outfit, seeing the first few pairs of loggers stitched and finished to the satisfaction of all concerned.

### Bustling Centre in the North

Nestling among the mountains, Powell River is a small but prosperous little town on the Pacific Coast about one hundred miles north of Vancouver, and can be reached only by the coasting steamers which form the sole means of transportation to the host of small towns, mines and logging camps along the rugged but wealthy Pacific coast of British Columbia. The origin and backbone of the town is the Powell River Pulp and Paper Company, a large concern employing upwards of a thousand hands.

In addition to the ordinary mill hands and mechanics there come the small army of lumberjacks and loggers who cut, boom and raft and generally work in supplying the large quantity of logs which a mill of this kind consumes. To these men shoes are an all important feature—so important that the writer has heard it said among them that with a good pair of shoes and a hat they can be happy. Usually, however, they wear a little more than this equipment while following their calling; but that shoes and good shoes are an all im-

portant feature to them is borne out from the distance some of these husky fellows will travel to get the work of a craftsman they fancy.

### Specialist of Long Experience

For many years—some thirteen to be exact—Mr. Webb, who is managing the Webb Shoe Co., had catered to the particular and individual demands of the B. C. lumberjack and miner in footwear matters, and had at different times owned three stores in Vancouver, being for a number of years on Water street, where he maintained a widely-known and prosperous shoe business, earning a reputation for footwear among the lumbermen that is largely the cause of his enterprise at Powell River.

Unfortunately, as business successes came to Mr. Webb his health left him until at last, after a complete physical breakdown and at the stern command of his physician, he had to seek absolute rest and change. Physically weak and broken in health Mr. Webb tried several resorts, and finally went to an old happy hunting ground of his, the big timbers on the mountains around Powell Lake, where he had often spent a vacation. Here, report has it he returned with speckled and rainbow trout aplenty, often with grouse and once or twice larger game.

So well did this locality suit the failing health of our subject that he settled and took up a government grant or ranch of fifty acres of virgin bush two miles out of Powell River and proceeded to live on it. In this he was ably seconded by his wife who came to take care of mere man's creature comfort and to give the home touch to this clearing among the big sticks.

### Built a Home in Woods

A house—nay, a home—was soon built of "shakes" or boards split from the magnificent straight grained cedars which grow in profusion around and the little clearing began to grow in size and assume the aspect of a garden. With the growing of the clearing, the humid mountain air and the hand of nature worked their charm and in less than a twelve-month Mr. Webb says he was wondering why he had ever had to seek health. Back came the old business restlessness and being alive to the possibility of the shoe business in Powell River, particularly in the making of the stout lumbermen's shoes, soon the Webb Shoe Co. was formed by local

business men, prominent among whom is Mr. Wilshire, with Mr. Webb at the wheel—of the Goodyear.

The organization, although only a small one, bids fair to be highly successful for no sooner was it known locally that the "Webb" logger was to be made again than orders began to roll in and the S.O.S. was sent the U.S.M. Company for mechanical help to assist in handling the business.

But Mr. Webb is still very mindful of the health side of the question and walks night and morning the two miles to his ranch. After scrambling, puffing after him up the mountain side and seeing him nimbly spring the four or five feet on to the trunk of a fallen forest giant, one must conclude that there is a lot to be said in favor of the bush life from the health point of view.

### The Logging Boot is Stout

A word as to the construction of these logging boots in which the Webb Shoe Co. will specialize, for the benefit of those shoemen who are interested.

The shoes—a stout article—are made of various materials, kip or calf when it can be procured, and at present of an

WEBB SHOE CO., POWELL RIVER, B.C. MR. WEBB AT THE DOOR WANTING TO KNOW "WHAT'S ON?"

oil tanned grain upper with high waterproof tongue and vary from 6 inches to 15 inches in the leg. A few are welted, but for the main part this top is lasted over a stout insole and a full length slip of good quality nailed or rivetted over the whole, a generous edge being left projecting to form the mock welt. Then the full length outsole is attached and fair-stitched to the slip on the Goodyear stitcher, sometimes two rows of heavy stitching being employed. A broad heel is attached and in most cases the whole "calked" with the sharp calks with which the log roller must be equipped to ensure a safe footing and grip as he scampers along and over the floating logs and timbers.

One essential feature in which a logger differs from any other is in the soft, extremely high toe. The man on the logs must have footwear that fits snugly all around the foot, allowing no spare length in the foot, the toe coming right to

the end of the boot. To allow the necessary play an extremely high toe is made and the extra size which cannot be allowed in length given in depth or height. Shoes built on this principle seem to stand the constant soaking and wetting and drying to which they must be subjected much better than those made other ways and are the prime favorites with the B. C. lumberjacks.

### NATURE DEMANDS SHOCK ABSORBER

"You men," said the doctor, "are certainly deserving of the success the very great automobile invention has been. But have you ever thought of the underlying principle which gave rise to the practicability and popularity of the automobile at the present time?" "Well, I will tell you. It is the word 'comfort' and the reason for the comfort of the modern automobile is the use of rubber tires. Rubber tires blazed the trail towards the goal which you pioneers strived for. The march of progress began with the use of the same principle as my rubber heels. They take up the shock. My rubber heels take up directly the shock and jar which would naturally be imparted to the spine—the storage battery and transmission base of our body. That is the fundamental reason for rubber tires and it holds true of rubber heels. They have never found a substitute for rubber and I do not think they ever will because of these facts.

"In our every day practise we physicians treat shattered nerves. People sometimes tell me it is their high strung temperament. We prescribe remedies to build up those wasted nerve centres, but we should get right down to the basic cause of these ailments. I'll tell you the heel is where nervousness and kindred diseases originate. The laws of nature are violated when we wear leather or wooden heels and the individual himself has to pay the penalty.

"We sometimes marvel at the physique of the ancient Greek. Of his lighthness and poise of body. That perfection of the human body was reached through care, the safeguarding of the body from shock. This is exemplified by the mythological character, Achilles. This Greek, you remember, was immortal, all but his heel. They at last did away with our friend Achilles, by shooting him in the only vulnerable spot on his body, the heel. The moral of this story is the same principle the mothers of to-day lay down to their children, 'Walk on the ball of your foot,' but they should first do away with the leather heel, rubber heels, on the other hand, put one on one's toes.

"I predict that within a few years the school boards of our great public school system will require pupils to wear rubber heels and so eliminate the shock. I am glad to say that several of the leading military academies have adopted this ruling. It means much to the coming generation to have them go through life physically fit without bearing that heavy load called nervousness. They will have the advantages of the modern rubber heel principle which we did not have in our early training, but which is not too late at this stage of life. The sooner we substitute rubber for leather heels the sooner we come to nature's method which is always best. The human body needs shock absorbers even more than the motor car. My professional colleagues and your family doctor will bear me out in my statements."

### THE BEST DOLLAR'S WORTH

"I read your paper every time I have a chance. I consider it the best dollar's worth I have ever had in a business way. I frequently get ideas for window trims out of the Shoe and Leather Journal."

Summerland, B.C.

A. J. BEER

*THE historic shoe house of leading firm in Arnprior, Ontario.*

#### CHANGE IN EASTERN SHOE FIRM

A change has recently taken place in the personnel of one of the oldest shoe firms in Eastern Ontario whereby William Farmer, of the historic footwear house of Farmer Bros., Arnprior, retires from active mercantile life and the business is now being carried on by his brother, Edwin Farmer.

Both brothers have been practically brought up in a shoe store. Their father was a shoemaker in Wales and on

EDWIN FARMER, ARNPRIOR, ONT.

Arnprior ever since and the original enterprise which was established by his father in Perth is now conducted by G. B. Farmer, a cousin of Farmer Bros. The latter have been boot makers as well as boot sellers and have achieved more than a local reputation with their widely known Farmer River Boot, which has for many years been sold to the lumber firms on the Ottawa river. The firm also make custom boots for a few customers who reside in different parts of the country and write in to have their shoes made by order.

Four men are kept working on the bench—all hand work. The firm have not yet added any shoe repairing machinery but intend doing something in this line in the near future. A large repair trade has also been done for many years by skilled workmen who finish up their jobs in fine style. Edwin Farmer has a well laid out, airy, roomy store of two flats and a basement and carries a selection of the most up-to-date footwear manufactured by leading Canadian firms. He also features traveling goods, mitts, moccasins and hosiery. The business from this out will be conducted on a strictly cash basis in order to give patrons the very best value. A large and well established trade through good values, efficient service and courteous attention has been built up and the firm is among the most solid and reliable footwear houses in the province. Under the direction of Edwin Farmer the prestige and standing of the enterprise will be well maintained.

#### DEATH OF CAPTAIN BEARDMORE

Capt. C. O. Beardmore, son of the late Walter G. Beardmore, and formerly an officer of the Royal Canadian Regiment of Halifax and the Royal Grenadiers, Toronto, passed away at Philadelphia recently while on a visit to his mother. The intense heat brought on an attack of heart failure, which caused his death. Capt. Beardmore received his early education in Switzerland, and afterwards attended the University of Toronto, of which he was a graduate. He became associated with his father in the leather business, but was compelled to retire on account of ill health. He served with the Canadians in South Africa. When the present war broke out he was in England and volunteered, but was rejected on account of his health. He was widely known in Toronto, having been a member of University societies, York, Hunt and Argonaut clubs.

coming to Canada in 1856 started in business in Perth, Ont., In 1868—just forty-eight years ago—William Farmer, one of the sons, who has now retired, opened out for himself in Arnprior and was joined some fourteen years later by Edwin Farmer, the present proprietor of the business. With the exception of a year or two the latter has been in business in

We don't see how Maltese Cross Rubber Heels could be made any better. Certainly, on the two main points where heels differ most---the springiness and the resistance to wear---they are just about right.

They are in all respects the most satisfactory heels that we know of.

If you haven't been keeping them, let us send you a sample lot to test for yourself.

See if the Maltese Cross Heel isn't the kind it will pay you to sell.

## THE RUBBER INDUSTRY EXPANSION

The rubber gatherers in jungles of the Amazon, the Orinoco and the Congo, make incisions an inch and a half long, three-eighths of an inch wide and a half inch deep in the bark of the tropical trees which sometimes attain a height of 60 feet and a circumference of 8 feet. Beneath these cuts the natives attach small cups to catch the rubber milk, which is not the sap of the tree. The average Para rubber tree yields two ounces of milk a day. By coagulation in the smoke of a wood and palm nut fire the milk yields one-third its weight of the prized rubber, the normal annual production of a tree being ten pounds of rubber, and the flow continues fairly constant for a number of years.

One of the bye-products of rubber harvesting, and one which promises extensive development, since plantations of these trees have been successful in Sumatra, Ceylon and the Straits Settlement, is the rubber seed, which yields almost half its weight of an oil closely resembling linseed oil, and adapted to the same uses.

There are many varieties of rubber producing trees, vines and shrubs, the most valuable species being that which yields the standard "para," and which grows over an area of a million square miles in Brazil alone. The world production during the year preceding the European war was 151,000 tons, her nearest competitor, the Dutch East Indies, yielding 8,000 tons. The United States in that year imported more than twice as much of the raw products as Great Britain, which stood second as buyer.—National Geographical Society, Washington.

## WHAT RUBBER HEELS DO FOR YOU

In the olden, golden days of the dime novel detective's prime, that super-Sherlock was invariably portrayed in a dozen or more chapters as stealing noiselessly on his rubber heels along some shadowy corridor or down some darkened street. Nowadays things are different. The cheap fiction sleuth has gone. Any detective who commits himself to the dangers of a shadowy corridor isn't modern. With his feet comfortably shod with easy slippers, the present-day Sherlock Holmes sits secure in his office and figures out in his brain just what the modern crook would do. If there is an arrest to be made, a six-foot man from Cork goes out and makes it.

About the only thing society has left of the melodramatic hero of old is his rubber heels. It has put that to practical purposes and it may be found to-day, making things easier for people in every walk of life, who must be or choose to be continually upon their feet. It is society's chief defence against the hard pavements and harder sidewalks.

And those who must walk through civilization have found a blessing in the soft easy spring of the rubber heel. It has a friend and ally in the salesman, whose feet are the important asset in his earning power. It has a backer in every nervous person to whom the sharp report of a hard leather heel is like a knife wound.

A business man once said that there was nothing as disconcerting to him when he was immersed in thought, as the sound of his stenographer's heels when she walked across the office floor. An explosion beneath his office window could not upset him more than his capable typist did when she walked about in the next room.

If the girl herself was nervous her emphatic walk was partly responsible for it. She didn't know it, of course, and neither did her employer. All he knew was that she got on his nerves, but to both comes the heritage from the old gum-shoe sleuth.

When man was made there was in his manufacture no provision for the wearing of heels. Society ordered him to wear them and without any questioning he put them on. And now if society's tyrant, the shoe designer, decides that

he shall wear a one-inch heel this season and a half-inch heel next season man has nothing to say. He simply wears them.

Chiropodists, the later-day scientists who have discovered in the last decade more things about the human foot than could be told in a diplomatic note of regulation size, are recommending the rubber heel as a means to give the walker the elasticity nature intended he should have.

They are daily performing operations made necessary when the process around the heel bone can no longer stand the strain of hard heel-pounding on a hard surface, causing the formation of a "spur," a very painful growth. With each operation the patient is being warned of the ill effect of the hard leather heel.

## RUBBER AFTER THE WAR

That the dearth of rubber in the Central Empires after the war will more than compensate for the cessation of war requirements is the opinion expressed by Clayton, Ridges & Co., who are endeavoring to interest Canadians in the plantation rubber market which has its headquarters in London. Statistics contained in a pamphlet entitled "Rubber Facts," issued by an Anglo-Canadian firm of rubber share brokers, show that whereas in 1905 British plantation rubber supplied only 510 tons, or less than half of one per cent. of the world's requirements, these plantations in 1915 furnished no less than 108,000 tons, or 68 per cent. of the world's production, which in this short ten-year period had increased nearly threefold owing chiefly to the advent of the automobile and its coming into general popular usage.

The bulk of this huge quantity of plantation rubber, which can be approximately valued at \$1,300 per ton, comes from these new rubber estates which are similar to the Niagara orchards and are planted about 100 trees to the acre, each tree yielding at maturity about 3 or 4 pounds per annum of latex or sap.

Low capitalization, sound management and dogged pertinacity have all contributed to these excellent results, and even now the zenith is far from having been reached—very little new planting has been done since 1912, and it is quite possible, for the reasons given above, that we shall see a world's rubber shortage during the next two or three years, corresponding with the development of the motor and motor truck industries.

## ANOTHER ISSUE OF MILLION DOLLARS

A resolution authorizing the issue of one million, five year—six per cent.—second mortgage debentures, half to be issued presently, was passed by the shareholders of Ames-Holden-McCready, Limited, at a special meeting held in Montreal last week.

D. Lorne McGibbon, president of the company, explained that the issue was for the purpose of settling for a large shipment of leather which had been delivered sooner than had been anticipated. He said that this leather had been purchased at a very attractive price and very much lower than it could be secured at the present time. When the purchase was made deliveries were to be made from time to time, but the shippers had delivered it more rapidly than was anticipated, and the company could not afford to refuse to accept the goods.

He explained also that the domestic business during the months of May and June had doubled that of the same months a year ago, to say nothing of the army business. He said that the capital they had heretofore was all right for the business they were doing, but with increased business and increased stocks more capital was needed.

Mr. McGibbon explained that they had secured a good market for the issue, the sale of \$400,000 being already assured at par.

# With the Shoe Manufactuurers

Pithy Note and Comment on Shoe Matters—What the Makers of Shoes are Saying and Doing—Shoe Facts and Fancies

**W**HILE everyone connected with the shoe industry knows what a sole leather cutter is, very few, perhaps, know of the real inventor. His name was Joel C. Gleason, who had been all his life connected with the shoe industry. Mr. Gleason died the past week at his home in Marlboro, Mass., at the age of 65 years. Years ago he invented the cutter while in the employ of Henry Parsons, and it was sent out under his name. It was invented many years ago, and Mr. Gleason got the idea, he said, while watching a man in the shoe shop striking a die a blow it with a mallet. A few years ago the patent run out and since that time the United Shoe Machinery Co. has been making them, as well as Henry Parsons. Mr. Parsons was a foreman in the shoe factory for many years, and retired from active business about five years ago.

## School of Leather Making

Along with the other encouraging features of the shoe and leather trades it is pleasing to note that a large firm of leather manufacturers, the Benj. N. Moore & Sons Co., of Boston, have just started a two years' course of industrial training and leather making in their factory.

In connection with this course, which we believe should prove a fine thing both for the trade and for the young men taking advantage of it, we give below a schedule of the course:

## Two Years' Course

	Mths.	Per Wk.
Shaving.....	2	\$ 5.50
Sorting raw stock.....	3	5.00
Cellar Work—		
Coloring.....	3	6.00
Tanning.....	3	6.00
Putting out.....	2	6.50
Tacking.....	2	7.00
Trimming.....	1	7.50
Seasoning—Colors, black, etc.....	3	8.00
Rolling.....	1	8.50
Stacking.....	1	9.00
Glazing.....	2	9.50
Sorting (finishing room).....	1	10.00

They will start one boy per month only.

Those that show fitness will be given a position at the end of the second year as assistant foremen or selected workmen.

Those that show special ability will be sent outside for further education, as for example, Pratt Institute or chemical or industrial schools.

Those that show selling ability would be placed in the various offices or put out on the road.

Before starting on such a course, the applicant must be a graduate of some high school. He must have his parents' consent in writing and show that they will be interested enough to follow him in his work and see that he does his part.

Each boy will attend what courses of instruction may be given or lectures given to the Superintendents' and Foremen's Association.

## Do Two Shoes Constitute a Pair?

To many persons buying a set of footwear the above question may appear foolish, but to those who are acquainted at all with the business, and who think about it to any extent, it will not appear so foolish.

True it is that for all the years shoes have been made the general acceptance has been that two shoes made a pair, and of course they do in the actual meaning of the word, but if we take the shoes separately and examine them from every angle we will find that while we have two shoes, we seldom have a pair. This may be a paradox, but nevertheless is perfectly true.

The condition exists to a greater extent when business is rushing, as it is at present, than when orders are hard to get, and customers are more particular, for then every operation is watched closely, and every workman has to keep

*NEW type of trench  
boot manufactured  
by the John Palmer Co.  
Limited, Fredericton, N.B.*

on the line and do his best. Now most everything gets by, for the demand is so great that "fussiness" is forgotten.

It is stated that some firms are reducing their overhead by letting out some of their high-priced foremen, and keeping inferior men on a greatly reduced salary, and instances are known where foremen are simply working by the day and not on straight time as formerly.

It is worth something to some men to be considered a boss, and it is poor policy for any firm to get rid of its valuable men for the sake of a few dollars off the payroll, but as it is a condition of present times it will have to run its course.

This is a condition that may have some influence on the quality of the product, and the consumer suffers, for the average person buying a pair of shoes does not know a welt from a McKay, and cannot detect the many little points in the shoe which go to make two shoes not a pair.

We were recently shown two shoes by a gentleman who knows nothing about the inside of a shoe factory, and asked our opinion of the goods, knowing we had had years of experience in the manufacturing line. They were oxford bals, made on a pointed last with gunmetal uppers, and at the first glance looked well, but on closer examination they were no credit to the firm whose name was stamped on the inside, and

MONTREAL.

in the shank. The retail price was \$5.00 per pair, and at that price they should have been nearer mates than they were.

We found the left vamp to be clear, soft and fine. The right vamp was a cut far removed from the other, and fat wrinkles were visible when the vamp was drawn under the finger, which was a sure sign that the sorters in the cutting room were either careless or were not properly instructed. Right here is one point that so many firms miss, and that is rushing the orders to a stunt.

Even on heavy, unlined shoes this is a bad error of judgment, and reacts upon the reputation of the firm so doing in time. The best reputation a firm can have is uniformity of product, and how many fail to maintain that reputation, though the man who buys the upper stock is always harping at the tanners for more uniformity in their leather. Some lay the blame on the cutters, but it must be remembered that the cutters are held down to figures, and in some shops one vamp lost is shouted aloud through the cutting room as though the whole business had gone wrong, so that the cutters are constantly in fear of rebuke.

To get uniform shoes they should be cut in pairs, and matched from skin to skin, but in the case of medium grades it is a good plan to cut in bulk, and have the sorters match the shoes, except in colors, which must be cut in pairs at all times. Black shoes can be cut in bulk, sorted, and matched up in pairs, and the only objection to that is that they must carry too much cut stock in the room, which brings the cost up a little. With good judgment on the part of the foreman and sorters this stock can be kept down to a very small item, and the benefits to the product far outnumber the expense. The sole leather can be more uniform, and nothing is thought of carrying rackfuls of stock in this room. Heels, counters and box toes are all about equal, so it really is the upper that has to be watched.

The pair of shoes mentioned above were well made. The workmanship was good on edges, heels, and general

appearance, though the vamping was a little irregular on one shoe, showing it had been done on a single needle machine when it should have been done on a two needle, which is another case of false economy in many firms. Trying to make one machine do the work of two never saves a cent. Every point against making this pair of shoes a pair could have been remedied and should have been long ago, but the fact that the demand is greater than the supply carries such work by, and the customer gets the wrong end of the game. The discriminating purchaser will look at all these points, but your ordinary layman does not know, and consequently after he wears a pair of shoes a short time, one of them begins to show the difference in quality that the treers and dressers have covered up for the time, and the general good appearance of the feet is ruined.

Many wearers will remark that they wear one shoe out sooner than the other, but the next pair they get may show that the opposite shoe may show the wear first, which is due to the difference in grading and workmanship.

It is admitted that feet vary, but the average feet are alike, and are made to vary by the wearing of ill-fitting shoes until they become chronic, and do vary.

With all the modern equipment, and all modern methods, the fact remains that careful supervision and skilled labor are imperative if good shoes are to be produced and uniform shoes are to result.

This is a condition which confronts manufacturers today, and changing help and supervisors frequently will not remedy the situation, but securing good help, paying good wages, and retaining the best supervisors possible to procure, will relieve the situation.—American Shoemaking.

#### Dull and Bright Finish on Kid

They are putting in a good many kid uppers in men's high-grade shoes this year, but it is noticed that some of these uppers are not finished up as brightly as they might

be when they are ready for the carton. Everything done in the line of finishing an upper is done in the treeing room, but it all depends upon where the shoes are going as to the brightness of the finish.

If men's shoes, made with a kid upper, are going to the New York trade, they will probably be finished off dull. On the other hand, if they are going to the Southern or Western trade, the shoes will be finished off very bright.

The way they handle the kid upper in some of the rooms is to clean it dry, then iron it off while it is on the tree foot, and then dress it if the shoe is going to be dressed. If it is not going to be dressed they put it on a rotary brush (a yarn brush in most cases), and give it a good brushing. This will bring it out so that the upper will show a good, natural finish. It may look dull after it goes around a little, but if they rag it up at any time they can see a marked difference in the gloss.

Shoes can be made bright or dull just as the buyer wants them, and in either finish they will look well when they are leaving the factory, and this is always the case with high-grade shoes, in which they use only the best stock.

### Buying Trimmings and Linings

It seems that the biggest part of the shoe manufacturers are buying their trimmings from outside parties at the present time. This will apply particularly to the trimmings for the inside of the shoes, and include top stays, tongues, and all that class of inside trimmings, says Shoe Topics.

Of course there is some advantage in buying the small parts from those who make a specialty of cutting them. Most shoe factories do not make their pieces fast enough to cut what they want, and they have found that it is better to sell these and buy the trimmings back from the men who prepare them. Many large shops will cut some of these small parts, but in most cases they cannot get them in sufficient quantity, so they have to buy them from outside parties.

Some of the concerns that are cutting these parts have special dies from the shoe factories so that they can cut any part wanted by any particular manufacturer's pattern. Of course there are certain parts of the trimmings that will fit any shoe and can be sold to any factory. Take tongues, for instance, or backstays, and there is no particular difference between these in the different shoes made by many manufacturers.

Those who are making a specialty of cutting trimmings, linings, or any other part, which they sell to the shoe shops, make it a point to cut all they can with dies. If they can run dies they can get over the work ever so much quicker. One would naturally suppose that most of these small parts would be cut with a die everywhere, but it is not so, for in a good many cutting rooms they will use a knife and pattern on even the smallest pieces. Naturally, if they do not have dies, they will use the pattern, but at the same time they have not developed the use of dies as much as they should in many a cutting room.

It has come to the point now where a shoe manufacturer can buy the whole lining for his shoe, all ready to put into the shoe, and firms cutting these linings have an idea that they can cut them themselves. There are quite a few firms cutting whole linings now just for shoe factories alone, and they stand ready to sell any part of the lining or the whole lining itself according as the manufacturer may want it. All the drill, or duck, or cloth lining that they may be cutting is, naturally, cut on a beam machine so that a dozen or more thicknesses can be cut at one time. In this way the cutting is done very rapidly.

### Mr. Plummer Goes to St. John

W. H. Plummer, late manager of the shoe department of the Sussex Mercantile Co., Limited, Sussex, N.B., has been appointed manager of Wiesel's Cash Shoe Store, St. John, N.B., which is his native city. He has entered upon his new

duties and will, no doubt, meet with the same measure of success in his present position that has characterized his career in the past. Mr. Plummer has been in the shoe game for nearly twenty years. He started at the foot of the ladder by running errands and sweeping floors at Mitchell's Shoe Store in St. John, N.B. In 1902 he took a position with Waterbury & Rising in their King street store, St. John,

W. H. PLUMMER, ST. JOHN, N.B.

with whom he remained five years, and in 1907 he went to Sussex, where he took charge of the shoe department of the Sussex Mercantile Co., which post he has just resigned. Mr. Plummer is a clever window dresser, a good stock-keeper and an expert buyer, and has a wide knowledge of the worth, workmanship and wear of all foot togery. From time to time he has contributed a number of interesting articles to the SHOE AND LEATHER JOURNAL.

### The New Broad Shank for Men

Those who make a note of the new styles in men's shoes will notice that the shank is wider to-day than it has ever been in recent times. In fact, the shank of to-day in the best class of work is fully as wide as ever it was in the old-time brogan. This is a peculiar feature of present-day shoemaking, and it only goes to show what different styles can be evolved even in the shank of shoes.

In some of the shops the last over which this shoe is made is called the "strand," but whether this is its name in other shops, it is a fact that it is all the style now in the five and six dollar shoes. This same wide shank last carries a narrow toe in most cases, and it would be hard to explain how it happens that the narrow toe is coming back again, especially in a shoe with such a roomy shank. The same toes are running pretty low, too, and the whole shoe seems to lay down flat on the ground. An extremely flat bottom like this, with its toe touching the ground, would seem to be a very hard shoe to keep in shape, and may not suit all classes of people.

When the shoe is all made up with the heel on it seems to set perfectly flat, and there is no turn-up at the toe whatever. Now, the effect of this would seem to be that the vamp would wrinkle across the ball when the shoes are in wear a little while. In walking the toe is forced up when the heel comes off the ground, so that it is only a question of a few days when the toe is raised to some extent, thus causing a slackness in the upper which will show in wrinkles across

the front part of the shoe. This is a thing that can hardly be avoided when a shoe is made in such a shape that it cannot retain the shape any length of time in wear.

In most shoes the toes are raised a little, at least, and these seem to fit the feet so that there is general satisfaction with the shape of the upper. But when the toe lays down the time will soon come when it will look to the wearer as though the lining of the shoe was pulled too tight over the toe in lasting. In fact, such complaints have already been made by the people who are wearing these shoes. When the vamp shows a wrinkle they suppose that the vamp was slack and the lining tight, whereas when they come to rip up the shoes it was found that the lining was lasted properly and was not pulled tighter than the rest of the shoe. Shoes were then made for these same people with no vamp lining or other lining in the forward part at all, and the wrinkles appeared just the same.

### Shoe and Leather Situation Reviewed

Now that the Eighth National Shoe and Leather Fair is over and is considered a success from all viewpoints, the situation in Boston is inclined to be a little quiet. A great volume of business is reported as having been placed during the week, and prospects of future transactions are remarkably good, says "Hide and Leather."

The chief item of interest at present is the placing of another foreign army shoe contract among the South Shore business manufacturers, and this has had a tendency to take care of any surplus leather which may have been made in anticipation of this class of trade and prices are firmer in consequence. It is believed that there is another very good sized order pending, to be placed among the South Shore manufacturers.

Shoe manufacturers are, as a rule, well supplied with orders which will keep them running to their full capacity in many instances until the first of the year. Just how much leather is owned by these manufacturers is not known, although it is believed they have large quantities.

The calf leather market continues much the same as for the last few weeks. There is a good demand for all finishes, and while it is difficult for tanners to secure raw material for future requirements, it is hoped they will be able to take care of all trade coming their way. Prices continue strong and are quoted all the way on blacks, from 40. to 55c. a foot, and some especially choice selections as high as 56c. to 57c. a foot. There are, of course, inferior grades of leather which can still be bought between the range of 30c. and 40c., according to grade, weight and tannage. Tan calf is becoming more and more popular both for the men's and women's trade. It is reported that a large quantity of this leather is to be used during the coming run and prices rule one to two cents a foot higher than for the black.

Matt calf is in good request but small supply for the manufacturer of high priced shoes, and this trade, though small, is sufficiently large to take care of the amount of leather manufactured in this finish.

It is reported that more and more side leather is being produced each month, and many manufacturers of calfskins are turning their attention this way, working in some of the better classes of hides at the present time. Black leather and finishes resembling calf continue to sell freely, prices ranging from 28c. to 36c. a foot. Heavy-weight elk leather continues in good request and small supply, prices ranging from 30c. to 38c., according to grade, weight and tannage. Satin and kangaroo are in good request but small supply. Leather which used to be sold at 14c. to 15c., is to-day reported as selling as high as 21c. to 22c., and in some instances over these figures. The supply of this class of leather is well taken care of.

Leather suitable for the use of the army shoes, heavy bark tan or combination leather, is reported as being very attractive.

### BUDGET OF BRIEFS FROM WINNIPEG

M. E. Cafferky, sales manager of the Rannard Shoe Company, Limited, No. 2 store, took a pleasure and business trip to St. Paul and Minneapolis recently.

John Affleck, president of the Yale Shoe Store, Limited, was in Grand Forks recently on a business trip.

J. B. Kilgour, proprietor of the Regal Shoe Store, Winnipeg, intends leaving for the east in a few days in search of the latest footwear novelties.

John Duffy, formerly of the Hudson Bay Co.'s shoe department, has taken a position with the Yale Shoe Store, 321 Portage avenue.

The Chicago Cut-Rate Shoe Store has started business on Portage avenue, Winnipeg.

L. Farewell, who represents the Hartt Boot and Shoe Co., Limited, has returned to the city after a very successful selling trip.

John Harness, who for the past five years has been connected with the Yale Shoe Store, has gone to Calgary,

JOHN HARNESS, WINNIPEG, MAN.

where he will look after the financial end of Geo. Nickle's two shoe establishments in that city.

S. T. Bates, lately of Regal shoe staff, is joining Struthers & Co., who are jobbers and manufacturers' agents in all lines of footwear.

Bert Harrison, of the Great West Saddlery office staff, has returned after spending an enjoyable holiday at Grand Beach, the new C.N.R. park.

George Locke, of Calgary, passed through the city recently on his return from business to the eastern shoe markets in both Canada and the United States.

H. Solotoy, city representative of Kilgour, Rimer & Co., entertained the members of the warehouse staff recently to an enjoyable party at his home. A very pleasant time was spent by all, and the occasion is one that will live long in the minds of those who had the good fortune to be present.

A meeting of the shoe repair men of the city was held recently when a new price list was drafted, involving considerable increase owing to the increasingly high cost of material, labor, etc. J. Johnston was elected temporary president; I. Abram, secretary; M. Klempnet, treasurer; W. Keckler and J. Risch, committee; It is likely that the organization will be formed on a permanent basis, and an effort made to include all the repair men in the city, as it is felt that "in union there is strength." The necessity of securing more generous prices appeals strongly to all.

**GUAY'S  
Waterproof Counter  
A SPECIALTY**

Our latest Counter is waterproof dressed, preserving it against perspiration and outside moisture. It is moulded full length or released end as ordered. We guarantee it to fit any last and to outwear the shoe. We will pay cash for every pair of shoes in which our Counters wear out before the shoes.

# Stray Shots From Solomon

There are some men whose idea of independence seems to be a compound of narrowness, mulishness, selfishness and bumptiousness that is as hard as flint but as mean and cheap as mud. They stand alone and sniff at the very idea of their dependence upon other people's opinions and good will. Theirs is the splendid isolation of the clam who thinks when he shuts his dirty little shell that he has comprehended within it the earth and the fulness thereof. These people have to learn the truth of the apostolic statement as applied to every day life—"No man liveth unto himself." The man who shuts himself in forgets that the world shuts him out by the same door. The world will leave absolutely alone the man who desires nothing but his own company, so that there is no difficulty in securing "isolation." A great many people find fault with the world and the church, for that matter, for their cold, hard indifference to individual interests; but they seldom pause to ask themselves if there be no reason for such a condition in the individual himself. To the open-hearted the world is ever open-hearted. It gives a quid pro quo every time. You smile at it and you get a smile in return; turnup your nose at the world and it will as cordially despise you. If you are not getting a share of the world's appreciation look within; "sin lieth at the door" in the shape of some disregard of its golden rule. A man may stand alone for a considerable time and may even thrive in his splendid isolation; but woe to him that is alone when he falleth. Woe to the man when he lies prone upon the earth whose stiletto of cynicism or spite has stilled every trace of sympathy that may have throbbled for him in the hearts of others. Woe to the man for whom, on account of his own self-banishment from the sympathies of a living world, no hand is outstretched to steady his staggering steps or lift him from the slough of misfortune or distress.

o o o o

There is not a class in Canada that has prospered in the past three or four years as has the farmer. Yet the government has "mercifully" accepted him from the provisions of the new war tax scheme. Every other business concern and business man must bear his share of the heavy burdens and responsibilities of this greatest world war but the farmer is to be "spared." There are farmers in this country who are individually worth thousands of dollars to the tens of business men who have not up to date contributed a single five dollar bill to any of the war funds. There is a farmer in one of the best counties in Ontario who owns a hundred and fifty acres of valuable land, within a short distance of Toronto, who has so far contributed the magnificent sum of two dollars to

the Red Cross Society as his self-sacrificing contribution to this great cause. He is only one of many who have thus distinguished themselves. These men have no more right to escape their share of responsibility than others. We must not, they say, hamper the country's greatest national industry! "Fiddlesticks!" you say. Nay "politics."

o o o o

There is a disease that plays almost as much havoc with humanity as drunkenness and it is twice as hard to reach because of its respectability. You cannot judge a man's mouth by the number of gold fillings that adorn his front teeth or a woman by the pearly whiteness that is

THE BLACK MOUTH

disclosed by her rapturous smile. The dentist or a well-applied tooth-brush often keep in splendid repair a fence that encloses a hell pit of meanness and corruption as deep as perdition itself. When a man gets the black mouth his case is as hopeless almost as the leper and he ought to be driven by society into the ostracism that this moral uncleanness deserves. There are some people who have not a good word for anybody. The sneer, the innuendo and the bitter invective are ready for use at all times, and the innocent, the unfortunate and the helpless are their special prey. There is to them no such thing as goodness because they have throttled every spark of charity and knifed every noble aspiration that ever existed in their small souls. Were it not for the highly contagious nature of this disease there would be little use referring to it; but there is perhaps a chance of turning aside possible victims of the fell malady. Realizing this fact, the wise man says: "Put away from thee a forward mouth and perverse lips put far from thee." Learn to speak well of people. If you can't say anything good of a man say nothing evil. A pure, sweet mouth is more to you than the satisfaction of expressing even what you feel justified in saying. Never get the reputation of being one of those vermin of society who exist upon the life blood of other people's reputations. If you would be a murderer take a dagger or a pistol and go out and live the life of Cain, taking the consequences; but don't sneak about in society or haunt the pews of a Christian church and carry on this dastardly slaughter of human souls. To those who are tempted in the direction of loose tongues and who have as yet not developed into character assassins, we would say get the unruly member under. Nip the disease in the bud. The first time you are tempted to backbite a business competitor or a social acquaintance close your teeth or bite your tongue.

Tenders must be for the unencumbered value of the properties, but the Liquidator, at his option, may require the Purchaser to assume all or any of the above encumbrances attaching to the parcel or parcels tendered for, in which case credit will be given on the purchase money accordingly.

All rent, taxes, insurance, water rates and similar items will be adjusted to completion of sale.

Terms of Payment: Ten per centum of the amount ten-

dered on the acceptance of the tender, and the remainder of purchase price in excess of the encumbrances within thirty days from acceptance without interest, secured to the satisfaction of the Liquidator, the difference to be paid by the assumption of the encumbrances as aforesaid if so agreed, or, if not so assumed, to be paid with the balance above mentioned.

The sale will be subject to existing tenancies, particulars of which and of encumbrances may be obtained from the Liquidator or his Solicitors.

Tenders will be opened at the Office of the Master-in-Ordinary at eleven o'clock a.m. on the 2nd day of September, 1916, and all Tenderers are requested to be then present.

All tenders must be accompanied by a marked cheque payable to the Liquidator for 10% of the whole tender, which will be returned if the tender is not accepted, and forfeited if the tender is accepted and purchase not completed by the Purchaser.

The highest or any other tender not necessarily accepted.

As to Parcel No. 1, the Purchaser shall search the title at his own expense, and the Liquidator shall not be required to furnish any abstracts or to produce any deeds, declarations or other evidence of title, except those in his possession. The Purchaser shall have ten days from date of acceptance in which to make any objections or requisitions in respect to the title, and in case the Purchaser shall within such time make any objection or requisition which the Vendor shall from any cause be unable or unwilling to remove or answer, the Liquidator may then by notice in writing rescind the sale, in which case the Purchaser shall be entitled to a return of the deposit money without interest, costs or compensation.

As to Parcels Nos. 2, 3, 4 and 5, these will be sold at a rate on the dollar, subject to shorts and longs.

The other conditions will be the standing conditions of sale of the High Court so far as applicable.

Further particulars as to the properties, inventories, encumbrances, leases, etc., may be had on application to the Liquidator or his Solicitors.

Dated at Toronto this 26th day of July, 1916.

**HAPPENINGS IN OLD QUEBEC**

Albert Huot, formerly foreman in J. E. Samson, Reg., fitting room, is now in charge of a similar department with the W. A. Marsh Co.

J. Albert Guimont, formerly accountant at the L. Gauthier Co., is now filling a position of a similar kind with the W. A. Marsh Co.

James Adair, shoe salesman, was overcome by the heat recently and was taken to the Hotel Dieu Hospital, where he remained for two days.

The cheapest grade of colored calf L. D. which was recently selling at 41 cents, has taken a jump of three cents. H. M. "B." grade, which was selling at 48 cents, is now raised in price to 51 cents. Matt sides cannot be obtained at any price. Tanners are refusing to bind themselves for any quantity over 100 dozen. The trouble is caused by the scarcity of labor, and also of skins.

The stock of Alf. Rainville, shoe dealer, of Levis, who assigned a few days ago, will be sold on Tuesday, August 8th, in the office of Lefavre & Gagnon, of this city.

Shoe factories are keeping busy working on samples for jobbers, and also in filling their orders.

The following visitors were in the city recently:—Alf. Lambert, Montreal; Chas. Weaver, Trenton, Ont.; E. O. Weston, of F. J. Weston & Son, Toronto; J. W. Leslie, of John McPherson Co., Hamilton; D. D. Hawthorne, of D. D. Hawthorne & Co., Toronto; J. A. McLaren, of McLaren & Dallas, Toronto; Hugh White, of the White Shoe Co., Toronto; J. B. Jardine, of J. B. Jardine & Co., Toronto, L. H. Dupre, of Independent Box Toe Co., Montreal, and W. A. Hamilton, of the W. B. Hamilton Shoe Co., Toronto.

**HE LIKES THE SELLING GAME**

J. E. J. St. Laurent, who for the past four years has been on the traveling staff of the Quebec branch of the Miner Rubber Co., Limited, was born at St. Anaclet, Que., on November 16th, 1886. There he resided until he was sent to the Seminary of Rimouski to be educated. In 1903 he began to work in his father's general retail store, where he spent the next four years. Mr. St. Laurent next became a

J. E. J. ST. LAURENT, QUEBEC

telegraph operator and was with the Canadian Government Railways for two years. In 1909 he entered the service of the Maritime Nail Co., Limited, of St. John, N.B., as traveler in Eastern Quebec, and finally engaged with the Miner Rubber Co. in 1912, for part of Eastern Quebec. Mr.

St. Laurent, whose favorite sports are fishing and hunting, is a member of the Club "Etang Neigette," and is well liked by a large circle of customers.

**SUMMERING AT ROCKERY LODGE**

There are shoemen and more shoemen but only one Rufus Savage—the great scout—who owns perhaps the loveliest point on Lac Ouimet, Que. The genial Rufus is a jolly fellow and generous, too, for he placed his cottage at the disposal of John Gaston Settle, another shoeman, who in turn invited R. W. Scott, an old railway man.

They with their families started for this picturesque lake nestling in the Laurentians, six miles from Shawbridge, and upon arrival found a beautifully situated and fully equipped bungalow, "Rockery Lodge"—a typical name, as Mr. Savage has evidently been busy for years collecting rocks to build attractive grottos and winding paths. The outlook from the piazza is superb—the calm lake with a background of the dark wooded Laurentians. Here frequently one hears and often spies the timid deer quietly feeding by the lake's edge; here also birds are in abundance; here too in "Dozor's" brook, as well as the lake, speckled beauties entice the angler; here everything and everywhere makes one feel "this is the life."

**NO HOPE FOR CHEAPER SHOES**

If one is looking for any encouragement of his hope that shoes may ere long be cheaper, he need not go to R. D. Taylor, of the Robert Taylor Co., Halifax. He says that he would not be surprised to see the average man about Halifax paying \$10 for a pair of ordinary walking boots if the war continues for another year. In his opinion there is nothing less than this in prospect and all the big manufacturers are shaping their views in that direction. The cause is, of course, the shortage of leather in face of an abnormal demand. Mr. Taylor says that this gets worse all the time, and for two reasons: The producers are making less and the consumers—take the needs of Russia for instance—are wanting more. One present difficulty about production in the Dominion at present is that there are not enough hands to properly man the tanneries. One of the largest tanning firms in Canada reported to Mr. Taylor a few days ago that over fifty per cent. of their employees, practically all the young men, had been gathered in by the recruiting sergeant. "We shall not," said he, "be able to get back to our normal output so long as the war continues."

Asked whether stocks of shoes throughout the country were large, Mr. Taylor said that he had no definite advices on that point, but his impression was that they were not very heavy. While in some cases the dealers may have anticipated advances and purchased a little more liberally than usual, it is equally probable that they in turn have passed the word along to their customers with a view to increasing sales, which they have. Mr. Taylor expressed the opinion that business conditions throughout the provinces were worthy of confidence, although he had to confess that July bills are not being paid as well as he would like to see them. He is hopeful that this condition may be remedied before the end of the month.—Maritime Merchant.

**HE ADDRESSED ROTARY CLUB**

An interesting and instructive address was recently delivered before the Rotary Club of St. John, N.B., by C. Henry Smyth, manager of the Union street branch store of Waterbury & Rising, Limited. His subject was footwear and hints from the leather market, which he dealt with in an able manner. Mr. Smyth was the first boy employed by Waterbury & Rising when they began business in 1878 in St. John and has gradually worked his way up to the position that he now occupies.

# THE GREAT BOSTON SHOE AND LEATHER FAIR

The Eighth National Shoe and Leather Exhibition—Held Amid Heat and Rush—  
What is New in Shoes and Leather—Pleasure Combined With Business—Many  
Canadian Representatives Present on Canadian Day—Glad Welcome For Visitors

**T**HE Eighth National Shoe and Leather Fair was held in the Mechanics' Fair Building, Boston, Mass., July 12-19, 1916. Naturally, from the condition of the shoe and leather trades at the present juncture, there was neither the number of exhibits nor the volume of attendance that prevailed in some former exhibitions. There were comparatively few manufacturers displaying shoes.

W. D. BENNETT, BOSTON, MANAGER OF THE FAIR

The boot and shoe machinery, was of course, well represented by the product of the United Shoe Machinery Company and by other special machines. A feature of the exhibition was the shoe repair equipment outfits, shown by the various companies making these machines and appliances. A full working repair shop was shown, and this brought out considerable interest, especially on the part of retailers. Another feature of the show was the presence of a large number of sole and other leather substitutes. At least a dozen products of this kind are being shown which indicates a tendency in this direction, brought about by high prices of leather and the general scarcity of materials. On account of the extreme heat during the week the Exhibition was in progress, an agitation was started, which will probably result in the Fair being held at a more suitable time of the year.

## The Decorations Were Attractive

The decorations of the building were light blue and gold, and the effect was cool and beautiful. Flowers and potted plants added to the general interesting appearance. The samples were displayed under the most attractive and pleasant conditions, and buyers and sellers had leisure for discussion, and met to talk business to the accompaniment of music and the general hum of conversation. The only exhibit that represented the Canadian shoe and leather industries was that of the Davis Leather Co., Limited, Newmarket, and A. Davis & Son, Limited, of Kingston, Ont., who exhibited lines of calf and side leather in black and colors. Samples of shoes made from their leathers were also displayed in a very neat showcase, and attracted

a good deal of attention. The Davis booth was the headquarters for the Canadian contingent, and the energetic Boston representative, Mr. E. Everett Bird, did his best to make Canadians at home. In this he was ably assisted by Messrs. Andrew J. Davis, Elmer Davis and H. W. Davis. The tropical weather that prevailed in Boston made the Davis exhibit a favorite rendezvous for those who felt the heat. They installed a large electric fan for the occasion and numbers found this spot the coolest place, not only in the Shoe and Leather Fair, but in Boston. Very flattering comments were heard on the part of the American trade, upon the samples shown by this enterprising concern.

The United Shoe Machinery Co.'s exhibit occupied a prominent position in the centre of the hall. Nearly all these machines were operated by electricity, and many were a revelation to the trade itself, especially the button hole and embossing machines. Operators were on hand also plying their varied handiwork. The Goodyear Welting Machine and the Goodyear Stitching Machine attracted a great deal of attention as usual, and the wonderful way in which they performed their work impressed all who watched their operations.

## Auto Trip to U. S. M. Co's. Plant

One of the great attractions of the Convention was the visit of the shoemen to the plant of the United Shoe Machinery Co. at Beverly, Mass. The company arranged for the required number of automobiles to be on hand at the Exhibition Building at 9.30 on Tuesday, July 18th, and a party of 150 was soon speeding along the beautiful shore drives of Massachusetts. A welcome change of temperature was felt when the autos approached Revere Beach. In passing through Lynn, cheers were exchanged between the autoists and the various shoe factories, with an extra display of good feeling when the autos passed the Lynn office of the United Shoe Machinery Company. Upon the arrival of the visitors at the club house of the company, pictures were taken, which will be presented later on as complimentary souvenirs. An excellent luncheon was served in

MECHANICS' BUILDING, WHERE THE FAIR WAS HELD

a tent in front of the club house, and the cool winds having given all a good appetite, the repast was fully appreciated. Immediately after the luncheon, competent guides escorted the guests through the various departments of the plant, the main factory of which is about one-quarter of a mile long. The return journey was made through a number of exclusive summer resorts, and the party arrived at the

Mechanics' Building after having taken in one of the most entertaining and instructive features of the entire Fair.

Among the outings was that of some five hundred shoe and leather men, who embarked at Rowes Wharf on Thursday, July 13th, on a special steamer, to enjoy a trip around Boston Harbor, from which they viewed the busy navy

E. EVERETT BIRD, BOSTON, WHO GAVE THE CANADIAN GUESTS A ROYAL WELCOME

yard at Charlestown, the various islands in the bay and the interned German merchant vessels, held in the harbor since the beginning of the war. Dinner was served at Nantasket Beach at 2 p.m.

Among the exhibitors at the Fair were Pfister & Vogel, of Milwaukee, Wis., who showed an extensive line of calf and side leathers in the various new shades, particularly the new mahogany shade. Lotus calf in two colors is one of the best selling features of the company, and their new chrome splits for shoe topping attracted much interest. E. P. Douglas was in charge of the exhibit.

The Dupont Fabrikoid Co., of Wilmington, Del., through their agent, H. P. Mitchell, explained to shoe manufacturers the benefits to be derived from using their different substitutes for leather.

Kenworthy Bros. Co. attracted much attention to their excellent showing of many felt specialties used in shoe manufacturing. The Kenworthy brothers were in charge personally. Their new inner sole felt and white felt welting received special attention.

The Mousam Counter Co. showed horn fibre counters and a complete line of leatheroid trunks and cases used by shoe manufacturers and their salesmen. Sales manager, Wm. E. Eaton, was in charge and on Canadian Day had several Canadian flags suspended at various points in the booth. John B. Crapo, the Canadian representative, was on hand to greet many friends from Canada.

J. Einstein, Inc., of New York City, showed in a very clever way a great variety of cloth stock made up in shoe styles by the Simplex System. His extensive stock of shoe cloth was much admired by large crowds of visiting buyers.

The Reece Button-Hole Machine Co., Boston, Mass., exhibited eight of their principal machines in operation, and also the original machine invented by John Reece in 1881, from which model the various developments of the Reece Button-Hole machine up to the present superior rapid type were shown.

Marden, Orth & Hastings Co., had two very attractive booths, shared by the Robeson Process Co., manufacturers of spruce extract. Marden, Orth & Hastings were featuring powdered larch bark, total soluble solids, 90 per cent., and

"osage orange aurantine," 100 per cent. pure, in powder and paste.

### Some of the Canadians Present

Among the Canadian visitors to the Boston Shoe and Leather Fair were the following: L. J. Breithaupt and L. O. Breithaupt of the Breithaupt Leather Co., Berlin; N. M. Davison, Canadian Consolidated Felt Co., Berlin; W. A. Moore and J. A. Matheson of Beardmore & Co.; W. A. Hamilton of the W. B. Hamilton Shoe Co., Limited, J. A. McLaren of McLaren & Dallas, D. D. Hawthorne of D. D. Hawthorne & Co., James Acton, President Acton Publishing Co., all of Toronto. George Bonner of the Bonner Leather Co., Robert Fraser, Tommy Lane, H. D'Artois, D. R. Freedman, O. H. Hymmen, A. G. Mooney, G. H. Davis, G. F. Lister, Henry Whitley, J. C. Stevenson, Paul Roy, Frank De Lancy, L. F. Payan, A. Dupont, B. E. Daoust, F. J. Boyden, Slater Shoe Co., C. H. Albee, M. C. Mullarky, J. McEntyre, Howard Cobb, Ernest Whitley, from Montreal. From Quebec were W. P. Francis, John Ritchie Co., H. C. Carter, Colonial Hide Co., Fred Marois of Tourigny & Marois, W. A. Marsh, L. Routier; J. E. Samson, O. Goulet, H. Gale of Gale Bros., P. C. LaChance, T. H. Lane, W. Girouard. From St. John, E. J. Fleetwood and J. Wiesel. From Aurora, A. Bonisteel and Sydney Collis of the Collis Leather Co.; Harold Davis and Elmer Davis, Kingston; A. J. Davis, Newmarket; E. R. Lewis, Toronto; John Clark, Acton Tanning Co.; P. A. Smith, Muskoka Leather Co.; M. J. Sheehy, Perth Shoe Co., Perth.

### Visitors From Dominion at Fair

Here is a group of Canadians who were caught by the photographer at the Shoe and Leather Market Fair held recently in Boston.

In the company are noticed—Bertrand, E. Daoust, H. C. Carter, Robert Fraser, W. H. Purcell and Paul Roy, of Montreal; L. F. Payan, of St. Hyacinthe; James Acton,

J. A. Matheson and W. A. Moore, of Toronto; L. J. Breithaupt, of Berlin, Ont.; Harold W. Davis, of Kingston, Ont.; Andrew J. Davis, of Newmarket, Ont., and M. J. Sheehy, of Perth, Ont. Other members of the group are E. Everett Bird, Boston, who represents the Davis Leather Co., of Newmarket, Ont; F. S. Klebart, of Wyandotte, Mich., and A. B. Butman, of Boston.

# AMONG THE SHOE MEN.

The stock of R. A. Gerash, shoe dealer, Montreal, was sold recently.

P. J. Hickey, shoe dealer, of Peterborough, recently assigned to J. R. Corkery.

Lamonts, Limited, shoe dealers, Saskatoon, have sold out.

R. S. Thompson, shoe dealer, Wallaceburg, has assigned.

The owners of the Beehive Store, boots and shoes and dry goods, Wetaskiwin, Alta., have discontinued business.

J. J. Haines, shoe retailer, of Belleville, Ont., and wife are spending a few weeks at Gregory in the Lake Muskoka district.

Fire broke out recently in the premises of the Chatham Shoe Co., Chatham, Ont. The flames were quickly extinguished before much damage was done.

Henri Cousineau, shoe dealer, Montreal, has assigned to V. Lamarre and the assets were sold August 2nd.

Peter Codallas, former proprietor of the Montreal Shoe Shine, has sold his interest to W. Christ, and has opened up a new shop with Jim Wee in Brandon.

A. Rumford, shoe merchant, Thedford, Ont., will probably sell out his business, on account of ill health.

The assets of A. Schwartz, shoe retailer, Montreal, were recently sold.

Owing to the tremendous increase in the price of leather, local shoe repairers in St. Thomas are advancing charges. A new schedule of prices on all grades of work has been drafted.

The Toronto Leather Novelty Co. was recently registered in Toronto, Ont.,

J. A. Johnston, of the J. A. Johnston Company, wholesale shoes, Brockville, has returned from attending the Boston Shoe and Leather Fair.

The assets of LaRose & Cousineau, shoe manufacturers, Montreal, were sold on July 26th.

E. R. McBride, of Belleville, Ont., general manager of the Haines shoe houses, is spending his holidays at Presqu'île Point, near Brighton, Ont.

Mayor R. T. Hayes, president of the firm of J. M. Humphrey & Co., St. John, N.B., has returned home after a business and pleasure trip combined to Quebec, Montreal and Valcartier.

Mr. and Mrs. R. L. Savage and family, of Rosedale, Toronto, are occupying their bungalow at Lac Ouimet, Quebec.

Word has been received in St. John, N.B., that Lieut. Harry C. Simmons, who was in command of the Travelers' Platoon of the 104th Battalion, has been promoted to the rank of Captain and adjutant of the battalion in place of Captain Hieland. Captain Simmons was connected with the traveling staff of Ames-Holden-McCready, Limited, wholesale shoes, St. John branch. The letter stated that the promotion was the result of his good work since donning khaki. The battalion is at Shorncliffe, England, and has already been reviewed by the King. The men are getting down to hard work in the expectation of soon going across to France.

Messrs. J. A. & G. E. Johnston, of the J. A. Johnston Company, wholesale shoe merchants, of Brockville, Ont., have returned from a buying trip to Montreal, Three Rivers,

and Québec. They report that prices of all kinds of shoes have advanced tremendously, and that it is impossible to get deliveries of certain leathers, at any price. Men's heavy shoes that formerly retailed at \$2.50 will have to be sold at \$4.00, men's fine shoes that used to be \$4.00 will now be \$5.00 to \$6.00. Women's shoes that used to sell for \$1.75 and \$2.00 will have to be \$3.00, with all other lines in proportion. The manufacturers claim that it is impossible to buy leather even at the advanced prices now being charged by the tanners. Dongola kid that sold for 12c. to 14c. a foot is now 38c. to 40c. Sole leather has advanced for 22c. pound to 50c. pound. The findings used in making the shoe having advanced 100 per cent. to 200 per cent. Labor of all kinds is scarce, and in many factories more than half of the most skilled operators have enlisted. The rubber factories are also held up by the shortage of labor.

Gagnon, Lachapelle & Hebert, Montreal, have installed some new machinery, including a rapid heeler, a laster and twenty sewing machines. They have enlarged their offices also and their production is running in the neighborhood of 125 cases a week.

Polyglot Rubber Trade Directory, a directory of the rubber and allied trades covering the United States and Canada, has just been issued by the India Rubber World of New York. In addition to giving the names and addresses of manufacturers of rubber goods and full particulars regarding their products it contains information concerning the great variety of compounding ingredients, fabrics and machines used in rubber manufacture. It is furnished with a polyglot key making the information available in all languages.

The Schultz-Ruck-Delf Shoe Company, general offices and main factory at Cleveland, Ohio, have recently elected new officials, vacancies being caused by the death of Mr. Delf. E. J. Schultz was elected president, George Ruck, treasurer, E. F. Buzek, vice-president and sales manager, and C. H. Boehmer, secretary. Mr. Buzek has been affiliated with the company for a large number of years—in fact since its infancy, having progressed through the various departments of the factory and having been on the road for years. His activities and his success have secured for him his new position with the company. C. H. Boehmer, an expert accountant and a man of mature judgment and keen business sense, has been connected with the company as manager of the crediting and accounting department. Many years ago he was a shoe dealer himself and his long experience in this field, plus that of an accountant, has made him a most valuable asset to the Schultz-Ruck-Delf organization.

A new and important industry has been secured for Guelph and will begin operations early in the fall. A deal was recently closed whereby the Partridge Rubber Company, of Montreal, will go to Guelph and occupy the entire top floor of the building of the Standard Tire Company. The new firm will manufacture a variety of small rubber goods which are staples on the market, and will employ 65 hands at the outset.

The death occurred recently in Uxbridge, Ont., of one of the best and most popular citizens of that town, in the person of W. H. Brownscombe, shoe merchant. Mr. Brownscombe had been in business in Uxbridge for the past eleven years, and during that period had earned a reputation for

being a scrupulously honest business man, and one who commanded the respect of every one with whom he came in contact. His death, which was very sudden, was due to heart failure, and although he had been in his usual good health, he had of late been settling up every little detail of his business, which to his closest friends, appeared as though he had heard and obeyed the call "Set thine house in order." Mr. Brownscombe was born in Port Hope, Ont., 66 years ago, and was in the boot and shoe business in that town for over thirty years, a business that was established by his father, Jas. Brownscombe, over sixty years ago. Besides his widow, who was Miss Sarah Found, of Port Hope, he is survived by four daughters, two brothers and four sisters. Mr. Brownscombe was an Odd Fellow for many years and was in possession of the highest honors from the lodge in Port Hope, of which he was a member at the time of his death. The funeral service was conducted by the Rev. H. L. Partridge, of Islington, a former pastor, and the Rev. J. J. Coulter, pastor of the Uxbridge Methodist Church. The interment took place in the family plot, Port Hope.

Lieutenant Joseph B. Patchell, of the 140th Battalion, who formerly managed Main street branch store of Waterbury & Rising, St. John, N.B., spent a few days in that city prior to leaving for Aldershot, where he will take a special infantry course.

A first-class boot and shoe store has lately been opened up in the McLeod Block, McDougall and Rice streets, Edmonton, where the proprietor, Mr. Richardson, is now conducting a very special shoe sale. Before coming to Edmonton, Mr. Richardson for the past ten years was the owner of one of the finest shoe stores in Calgary.

Unless the world develops a substitute for leather within two years America will be the next wooden shoe nation, was stated recently at the convention of the Illinois Shoe Retailers' Association. Speakers declared that the country is in the throes of a leather famine. R. W. Ranney, president of the association, warned the delegates that governmental action was necessary if leather boots and shoes were to remain within the reach of working men.

Harold W. Rising, secretary-treasurer of the firm of Waterbury & Rising, St. John, N.B., received a letter July 25th from his brother, Captain Percy Rising, who is quartermaster of the 104th Battalion and who formerly managed Union street branch store of the firm. In his letter he gave a few details of camp life in Folkestone, England, and said they expected to move to the front in the near future. At night he said flashes of light can frequently be seen on the horizon indicating where big guns are in action. He also told of a recent raid over Folkestone and the hot reception accorded the unwelcome visitors. Captain Rising expects to spend a few days in London before departing for the trenches.

A recent despatch from Binghampton, N.Y., says:—It is announced that H. B. Endicott, of Boston, and George Johnson, of this city, owners of the largest shoe manufactory in the world, have refused a syndicate offer of \$45,000,000 for their factories. The offer included payment of \$5,000,000 cash to bind the bargain. Messrs. Endicott and Johnson declined to accept the proposition, believing the future value of their plants far in excess of the figures named. Endicott, Johnson & Co. have large shoe factories in Endicott, N.Y., and in Johnson City, N.Y., near Binghampton, where they employ about 10,000 men and women.

An interesting event took place recently in Belleville, when the boys of the 155th Battalion, which was recruited from Hastings and Prince Edward counties, came up from Barriefield camp, near Kingston, and were presented with new colors by Argyll Chapter, I.O.D.E., in the presence of thousands of spectators. The colors were displayed for several days in the window of Vermilyea's shoe store in Belleville, together with a group picture of the Battalion, and attracted much attention. In the adjoining window there

was shown a fine range of footwear, from the regular Canadian army shoe to the latest military dress boot. The display was attractively executed by W. M. Leslie, manager of the store.

A booth at the recent fair in Calgary, Alta., which was said to be well worth a visit, was that of Gutta Percha & Rubber Limited, in the Industrial Building. The goods shown included motor tires, belting of various kinds, rubber shoes of all descriptions, the celebrated Maltese Cross rubber heels, hose, etc.

Messrs. J. T. Griffith and Lewis McNaughton recently acquired sole control of the Arnprior Felt Co. in that town, having filed the highest bid therefor. It is their intention to run the factory to its fullest capacity.

D. Lorne McGibbon, the president of Ames-Holden-McCready, Limited, Montreal, announces that the entire issue of \$500,000 six per cent. five year debentures, authorized at a shareholders' meeting last week, have been disposed

AN ATTRACTIVE AND ARTISTIC WINDOW DISPLAY BY GALT, ONT., SHOE HOUSE

of at par. The new money, as already reported, is required to finance large purchases of raw materials. Par for an industrial second mortgage issue is an exceptionally good price, and the issue was disposed of in very short order.

A neat and imposing upright electric sign has been erected by McLean & Anderson, shoe retailers, St. Clair avenue, Toronto. The sign can be read for a long distance and attracts much attention.

S. H. Parker, of the Parker Shoe Co., Preston, Ont., was in Toronto this week showing a fine new range of samples in women's McKays to the wholesale trade. The Parker Shoe Co. is now occupying the new factory addition, which is 60 x 35 feet and three storeys high. The basement is used for a stock room, the next floor for cutting purposes and the top floor for fitting, while the old portion of the building is devoted exclusively to making, finishing and shipping. The capacity of the plant is now 1,000 pairs a day and business is reported by Mr. Parker to be very active.

R. B. Gravlín, of the White Shoe Co., Toronto, is spending his holidays at Beaverton, Ont.

The annual picnic of the Adams Shoe Company, Toronto, was held on Friday, July 28th, to Dundurn Park, Hamilton. There was a large attendance of the employees of the firm and their friends, who spent a thoroughly enjoyable day. An interesting program of races and sports was heartily entered into by all. A tug of war between the cutters and members of the finishing room resulted in a win for the former, while a team personally captained by Wm. N. Adams, pulled against the lasters. The latter were successful and in the concluding tussle the cutters again

came out triumphant. The picnic, which has been a lively event for several years, was the most successful ever conducted by the employees of this progressive firm.

Joseph Wiesel, of St. John, N.B., dealer in shoes and clothing, has been succeeded by J. Wiesel & Co.

Hunter Bros., dealers in footwear, men's furnishings, etc., Rossland, B.C., are opening a new store in Trail, B.C.

Geo. H. Ferguson, of Vancouver, B.C., who is the Western Canada representative for Clark Bros., Limited, St. Stephen, N.B., is spending a few days in the East, preparatory to making a special trip with new samples.

Percy R. Billings, who covers the smaller towns in the Prairie Provinces for the Regal Shoe Co., Toronto, has returned and is spending his holidays at his home in Trenton, Ont.

Hood & Irvine, shoe retailers, Eighth avenue west, Calgary, have recently moved into a new store, which is splendidly fitted up and very attractive in appearance. Their new business home is one of the largest and best laid out footwear establishments in the Prairie Provinces.

Chas. A. Blachford, of the Blachford Shoe Manufacturing Co., Toronto, has returned after spending a few weeks holidays at Mazengah Island, Lake Rosseau, Muskoka.

Ed. Lynch, who represents the Minister-Myles Shoe Co. in the Western Provinces, has returned to Toronto after a two months' trip and reports having had a very satisfactory season.

Fred. A. Blachford, of H. & C. Blachford, shoe retailers, Yonge street, Toronto, has been spending his holidays at Lake Rosseau, Muskoka district.

Many Canadian friends will regret to learn of the death of John H. Pearce, former general superintendent of shoe factories for the Dominion Rubber System, at New Haven, Conn., recently, after a short illness.

The general sales staff and the factory superintendents of the Dominion Rubber System met in convention last month in Montreal to discuss trade conditions in general and Dominion Rubber System products and policies in particular. R. E. Jamieson, general sales manager, presided over the gathering.

Ames-Holden-McCready, Limited, Montreal, have started the issue of a neat monthly publication known as "Shoe Facts" for distribution among the Canadian retail footwear trade. The paper is well printed and nicely illustrated and contains a number of interesting and timely articles. "Shoe Facts" is ably edited by R. E. Dildine, manager of publicity for the company, who was also recently elected a director.

N. L. Collins, buyer for Christie-Grant, Limited, Winnipeg, was in Montreal, Quebec and Toronto during the past few days on business.

J. A. Connor, of Toronto, who is division manager for

Ontario of the Canadian Consolidated Rubber Co., was successful in capturing the Shea Challenge Trophy at the London Bowling Tournament in his former home in London. As a permanent memento of the occasion the Lawn Bowling Association recently presented him with a handsome silver mounted tea service which, needless to add, is thoroughly appreciated by Mr. Connor.

P. A. Doig, of Montreal, general sales manager of the Star Shoe Co., spent a few days in Toronto this week showing a fine range of new samples to the trade.

G. T. Clarkson, liquidator, 15 Wellington street east, Toronto, is advertising for tenders for the purchase of the assets of the Chatham Shoe Co., Chatham, Ont. Bids will be received up to September 1st next. The buildings are valued at \$20,000, the power plant at \$7,107, the machinery and equipment at \$4,153. The stock of raw materials and supplies and shoes in process of manufacture are valued at \$7,978, the office furniture at \$664 and the lasts and patterns at \$3,602. The conditions of sale and terms of payment are set forth in an advertisement in another column.

Recent cable despatches from England give the pleasing information that Sir Douglas Haig, Commander-in-Chief of the British forces in France and Belgium, had mentioned Lt.-Col. Massie, of St. John, N.B., for gallant and distinguished conduct in the field. This honorable distinction, for services rendered, will prove gratifying to the numerous friends of Lt.-Col. Massie, who, previous to enlisting two years ago, was maritime manager for the Canadian Consolidated Rubber Co.

Clayton S. Corson, general sales manager of the Regal Shoe Co., Toronto, has returned from an extended and highly successful fall selling trip to the larger centres of population in the Prairie Provinces. Mr. Corson went as far West as Victoria and reports that the prospects for a bountiful harvest are bright. He found trade in the various cities which he visited particularly good for this season of the year, and the outlook for fall business is most promising. The Regal Shoe Co. is exceptionally busy at present, turning out 700 pairs a day. Extensive improvements have been made to the offices and E. L. Keene, manager of the manufacturing department, has entered upon his new duties, and is much interested in the work of production.

At the fourth annual meeting of the National Council of Canadian Credit Men's Association, Limited, held in Vancouver, B.C., last month, F. A. Todd, office manager, Quebec Division, of the Canadian Consolidated Rubber Co., attended as delegate from Quebec Province.

A large number of shoe retailers in the various towns and cities of the Dominion are now conducting their annual midsummer sales and clearing out all lines of warm weather footwear. The past season has been an exceptionally active one for all ranges of white goods and outing shoes. In fact, many firms have been completely sold out of several lines. The alert shoe merchant is now preparing to cater to the school children's trade, and capture a large portion of this business, which generally comes with a rush during the last two weeks in August. A number of advertisements by enterprising shoemen are featuring footgear for children, while special window displays are being made. Their timeliness is emphasized by appropriate showcards reminding the juveniles that vacation days are rapidly passing and good comfortable shoes are as necessary as a scribbler, a school bag or a pencil box.

The Blachford Shoe Manufacturing Co., Sherbourne street, Toronto, have removed their offices, sample rooms and shipping rooms to the second flat of the large building in which they are located. The floor space thus vacated is now divided between the cutting, stitching and finishing rooms. The congested condition in the plant has thus been removed and much needed accommodation provided. The Blachford Shoe Manufacturing Co. are now turning out

2 cents a word first insertion—1 cent a word subsequent insertion. No advertisement less than 50 cents per insertion accepted. Please remit cash with order.

---

WANTED—By experienced traveler, with good connection, a line of men's or women's shoes as side line, on commission, for Western Ontario, including Toronto. Apply Box 4, SHOE AND LEATHER JOURNAL, 1229 Queen street west, Toronto.

---

WANTED for 1st September, a shoe traveler with connections in Nova Scotia, Cape Breton, New Brunswick and Prince Edward Island. No use to apply unless you have first-class references and connection. Address Box (X), care SHOE AND LEATHER JOURNAL, 1229 Queen street west, Toronto.

450 pairs of women's welts a day and specializing in high-class lines. This enterprising firm, who started two years ago, with a daily output of 125 pairs, have more than trebled production within this short time, and the future looks exceptionally bright.

Philip Jacobi, 5 Wellington street east, Toronto, have been appointed sole distributing agents for Ontario for the

Air Treads, which is a combined vacuum heel cushion and ventilator for men's and women's shoes. This important invention is being patented in Canada, Great Britain and the United States, and distribution agents will soon be appointed in the various provinces. Air-treads will be extensively advertised, and it is expected there will be a remarkable demand for this new invention.

# Has Anybody Jumped Your Claim?

If the repair requirements of your customers are not already taken care of in an entirely satisfactory manner (and by that we mean by somebody equipped as we can equip them), it will pay you well to write us **now** for a catalog and full information regarding the advantageous terms on which we place our machines with shoe retailers. We would also be glad to supply any specific information you may require about this wonderful and growing part of a shoe retailer's business.

We are pioneers in this business. Our machines have earned a high reputation for excellence in construction and durability. They are in use by the most successful shoe retailers and shoe repairers, and with them we supply a service that is only paralleled by that which has built up the great shoe industry of the country.

Your request for information will place you under no obligation to us. We are glad to supply it.

# The New Unlocked Process Makes Shoes Fit Better

There is no doubt about this, nothing experimental. It is an absolute fact that cannot be refuted. And it is due to a new and better method of shoe construction, the UNLOCKED Process, by which the shoe is allowed to find the contour of the foot. Shoes made by the Unlocked Process

## *Prevent and Relieve Flat Foot and Arch Troubles*

Lasts are ball-bearing and follow the bottom shape of the human foot. Upper and sole patterns are sprung and cut under a new method. The shoe also carries an upper leather bandage, which, together with the upper, encircles the body of the foot. These features give perfect foot freedom and a flexible support that mean real ease and comfort for the wearer.

## *And the Styles are the Latest*

Our new range of Unlocked Process Shoes offers you the choicest new styles.

## HOW LONG WILL IT CONTINUE?

**The All Absorbing Question—Manufacturers and Dealers Both Anxious—Leather Men Don't Seem to Worry—Tremendous War Needs Still Loom Strong—Will the Millinery Trend in Women's Shoes Hold Out?**

**H**OW soon will the war end and what will be the effect of peace on business? These are questions of the hour that call forth an amount of speculation that becomes more feverish as the indications of the successes of the Allies' cause grow apace. Nobody can answer either query. From the very beginning of hostilities the guessers have been at work, and even Lloyds have been willing to bet on the fascinating subject. All conjectures, so far, have been so wide of the mark as to be absolutely worthless and have only served to demonstrate how little even so called experts can be depended upon to foretell the future of this most baffling of the wars of history. It is safe to assume, however, that Germany has fortified all the ground between her armies and Berlin, and that unless some cataclysm occurs they will fight a rear-guard action to the gates of the city, which means months of slow, patient fighting.

As to the effects of the war on trade now and hereafter, it may be taken for granted that so long as the many industries stimulated by the production of munitions are kept moving and the money thus put in circulation continues to flow through regular channels, business will keep up pretty well the pace at which it has been moving. When the extra pressure is removed there will undoubtedly be a pause to permit the necessary readjustment, but even that will be only temporary, for with an amount of destruction of materials of all kinds and the depletion of supplies resulting from the war operations, there will remain the necessity for bringing conditions back to the status quo which will take a considerable time.

As to the shoe and leather trades, one has only to consider the tremendous consumption of materials involved in the conflict to realize that when it is all over tanners and shoe manufacturers will be kept busy enough producing leather and shoes for ordinary purposes, for with the high prices prevailing to-day there is a spirit of economy abroad that is bound to have the effect of reducing the amount of shoes both in consumers' and dealers' possession. Reports come from Great Britain that present war orders will use up every ounce of leather in sight for the next six months, and so great is the pinch that the government, through the press, is counselling the people to be as economical as possible in the use of footwear, asking them to make one pair do where they formerly used two.

The increase in the demand for high shoes for women has put the pressure on leather production in another direction, with the result that the cost of light stock has risen so far above normal as to almost double the price of shoes of this class. Notwithstanding this, the demand has not even faltered, and the chances are that this fall and winter will see more high priced shoes worn by both men and women than ever before.

One good effect that is likely to prove more or less permanent is the raising of the standard of values. Where once five or six dollars was regarded as fairly high, ten or twelve is being obtained without a murmur. This will make it easier for the retailer if not the manufacturer to secure more adequate margins on his goods when the leather market subsides.

In the meantime there is no prospect of lowering costs and fortunately no indication of the public being frightened at the prices they are being compelled to pay these stirring times for their footwear.

# QUALITIES WHICH MAKE FOR GOOD SALESMANSHIP

Human Elements That Enter the Composition of the Successful One—Keeping a Force Keyed Up to the Proper Pitch—Some Men Object to Anything That Will Take Them Out of the Beaten Path—A Good Physical Make-up Helps Considerably

**Q**UITE some time back a poet of more or less renown gave the world something to think about when he asked questions about what constitutes a State. He then made the whole thing easy by going ahead and answering himself. Even if he had not gone to that trouble, there are selling executives in the business world who say it would be a lot easier to answer his questions than to reply to similar ones on the subject of what constitutes a salesman.

There is nothing harder in the world than to keep a sales force keyed up to the proper pitch, according to a man who has directed the selling for a wholesale concern for a number of years, and the reason is that there are so many different human ingredients in its composition. Discussing his woes recently he said:

"After so many years that I am ashamed to tell you the real number. I remember distinctly a thing that happened at a circus I attended as a boy. It was an equestrian stunt in which Signor Somebody-or-Other, after having appeared before all the crowned heads of Europe, etc., attempted to gain the plaudits of the crowd by riding three horses at once. His plan was to stand with a foot on the back of each of two horses, with the third horse running free between. He got along swimmingly until the off horse, for some reason or other, began to forge ahead of his mates. The rider apparently could not hold back the disturber, with the result that he soon came down with an inglorious kerplunk on the back of the centre horse. Rather shamefacedly he stopped the act, remounted, and was off again. The same thing happened a second time, and the remounting process was repeated. Even then the off horse proved too ambitious for his mates, and the performer gave up in despair.

## Admires The Fighting Spirit

"To-day, as the head of a large sales force, I am virtually in the same position as the circus performer who tried to ride the three horses. Somebody is always forging ahead, that is, disobeying orders and corraling extra business thereby, or somebody is lagging behind. It is only with the greatest effort and expenditure of diplomacy that I have thus far been able to keep myself from coming down with the 'kerplunk' that marked the circus rider's fall.

"I am a great admirer of the fighting spirit in a man, and I maintain that without it no one can be a successful salesman. Show me a brave man and I will show you a man who can sell goods. But deliver me from the salesman who uses this fighting spirit with the proper amount of reserve in the securing of orders, but who retains all the wrath he has acquired in the meantime in order to spill it out on my head or the head of some other executive. There are plenty of such men, and there are also plenty of men who do not like to stay 'in line.'

"For instance, we used to sell all our goods on a net basis. The result was that half the force was clamoring for a change to regular, and because I did not see fit to fight to the last ditch with the heads of the business in order to get them to change their policy—the sales were increasing with leaps and bounds at the time because of the close figuring of costs and attractive prices—heaven was called upon to witness my shortcomings. When I remonstrated and showed the staff the advantage of operating the way we did, the 'kickers' came back at me and said that the buyers did not care much about the actual selling price of the goods. What the buyers wanted, they said, was to have their employers think they were 'live ones' by having the invoices show nice long datings and fat discounts.

"About a year ago the selling policy was changed under pressure from a newly elected executive, and regular terms were made the basis of selling. Then the objectors to the old system held a jubilee, but when they came back from their first trip under the new plan their attitude was changed. Almost without exception they reported that the buyers were inclined to turn down the goods offered them because the prices were higher than they used to be. Naturally, they had to be higher, for the nice healthy discounts we gave had to be figured into the costs. This incident proved to my satisfaction, more than anything else, that one of the principal ingredients of a salesman is a disposition to object to the way the business is run. I believe the credit office will bear me out in this.

## Wanted Praise for His Efforts

"A third ingredient is vanity, or rather a kind of temperament which is not wholly unlike that suffered by men in the more artistic walks of life. This element is not present in the make-up of all men, but in some of them it is so strong that they have to be figuratively patted on the back all the time in order to keep them up to the scratch. An experience I had with one man when I was first elevated to this job taught me that. This salesman was a brilliant talker and a good 'closer,' but he was inclined to be as erratic as an opera star.

"Soon after I became head of the department he made one of the best sales that has ever been put across by any one connected with the house. Not knowing his peculiarities, I wrote him a formal letter of acknowledgment after the sale I spoke of, and the effect was the same as pouring water on a blaze. His work during two or three weeks that followed was so perfunctory that I felt obliged to take the matter up with the head of the house. When I told the chief all the facts in the case he chuckled. Then he called his secretary and dictated a note to the salesman, suggesting that he run back to the city over Sunday. He got in late Saturday afternoon, and that night the chief, the salesman and myself had a 'jolly-go-bang.' It broke up in the wee small hours of Sunday morning, but when the roadman left for his territory again that night he was satisfied that I was a 'regular fellow' after all. From then on he did splendid work. His trouble was that he realized that he had done something big, and he thought he should be praised a little for it. Believe me, he can have all the praise he wants as long as he keeps turning in business.

"While all sales managers may not agree with me on this point, I am a great believer in good-looking salesmen, whether they have to sell to women buyers or men. I don't choose my men by their looks, and I have no use for the 'Willy-boy' type, but, all things being equal between a homely salesman and a good-looking one, I will take the latter every time. I know a lot of good salesmen who do only about half as much business as they should just because nature has built their faces along such irregular lines that they look almost grouchy even when they smile. Such men as that have a handicap to offset that does not trouble the good-looking salesman.

"And I don't want any fat salesmen, either, when I can get lean ones who will fill the bill. I don't question the assertion that most fat men are good-natured, but I contend that they cannot stand the gaff the way their thinner brethren can; that they tire more quickly, and that, when tired, they cannot well conceal the fact. The result is either lost or diminished business."

# THE ESSENCE OF GOOD LIVE ADVERTISING

What Great Merchant Prince Says of Value of Publicity—Give Information Regarding What You Have, a Proper Description of the Goods and Tell What the Honest Prices Are—The Typographical Appearance and Layout Help Greatly

**J**OHAN WANAMAKER is known all over the world as the pioneer of retail advertising who blazed the way followed since by successful merchants on this continent and abroad. In an open letter addressed to the delegates through the Philadelphia papers this merchant prince said amongst other things:

"When this little store closed its doors on its first day's business, away back in 1861, the sum of \$24.67 was found in the old-fashioned till under the counter; the 67 cents was left there for making change next morning and the \$24 was taken out by the founder and spent with the newspapers, which were asked simply to say that the new store was open and doing business, and had a good stock of goods useful to the people.

## Newspapers Best for Store

"Our little allowance for advertising money went to the newspapers then, as it goes, nearly altogether, to-day, because, if I ever have a monument for discovering anything, it will be for finding out that the only advertising of direct and instant benefit to both merchant and customer is in the daily newspaper of known circulation. All others are vanity and vexation of spirit.

"Throughout fifty-five years of experience we have not been able to discover that there was any other rightful function of advertising than to do just that one thing—to inform the public that the merchant had brought in certain goods, with a proper description of them, and what the honest prices were.

## "Our Greatest Effort for Years"

"Our greatest effort for years has been to keep to this simple, serviceable form and go no further.

"What is the use of building up a tremendous, vastly expensive, unnecessary army of advertisers throughout the country, almost as big and certainly as costly as the largest army that the most enthusiastic preparedness advocates want to have the government raise to carry rifles?

"What good does it do to have a false advertising element stand between the merchant and his customers?

"Surely the people will, after a while, realize that there is an immense amount of wastage, and it must be paid for by the people who buy the goods."

## Paper That Won Gold Medal

The paper of the convention, which was awarded the Higham Gold Medal for the most constructive effort embracing the fewest words took up the theme of "readable type" so insisted upon in the Wanamaker method. It was read by Benjamin Sherbow, designer of typographical arrangement, New York. We quote that part of the paper referring more particularly to this subject as worthy of a permanent place in the ad shop of every retail advertiser, as follows:

"The man who designs advertising print should ask himself this: What must this piece of advertising do? How can I make type do its most effective work in helping the reader to a quick understanding of the advertising story; how can I make it easy and still easier for him? And if the designer attacks his job in this spirit, even though his skill is not great, I believe he will go farther toward making good

advertising than the man who is concerned merely with producing the fuss and feathers miscalled 'artistic printing.'

## Must Know Results Sought

"We must get a more sympathetic understanding of what the advertiser is trying to accomplish. Let us give our best thought to what he has written about his product or service and then plan and contrive our typography so that the reader will be able to grasp, with the least amount of time and attention, what is being said to him.

"Let us use only types of simple, vigorous design, easy-to-read and good to look at, in such sizes and with such leading as will make our print most inviting to the eye.

"Let us give more time to the study of easy-to-read arrangements of type—to those valuable aids to comprehension that make print easy to understand.

## Reference and School Books

"Look at the typography of the dictionary or any other first-class work of reference. Look at our best school books. Look at the skill and care with which they are put into type so that we may readily comprehend their text. How many of our catalogues are so well arranged? They might readily be if we gave to this business some of the time that is now used to produce pretty decoration and marvellous color schemes.

"Don't let's play tricks with type that make the reader wonder what we are up to. Don't let us willy-nilly force our type into arbitrary forms that it pleases us to admire but that add nothing of value to our purpose. Don't let us look longingly at fine old book pages and try to reproduce them to steam shovel catalogues unless they belong there. Let us rather study hard the sense of the information or argument that we are trying to convey in print, and then make the type say it so clearly, so simply and so efficiently that it will be read, understood and remembered.

## Advertising Ideas Basis

"We must keep in mind always that the starting point for the typographic arrangement of any piece of advertising is the advertising idea itself, and not some abstract effect that is to be obtained.

"Nowadays, when I am asked to design a type-style for a magazine or newspaper advertisement or for some printed matter for which no plan has yet been decided on, and for which no text has been prepared, I ask the client first of all to make clear to himself what it is that he has to say before he interests himself in the physical form his advertising message is to take. And occasionally he is frankly puzzled at my absurd notion that I should need to know very much about what the advertisement is going to say in order that I may intelligently design a type-style for it.

## Must Inform, Not Dazzle

"In advertising print, typography must serve the advertising idea. It must furnish the quickest, clearest, cleanest medium for the expression of ideas and the conveying of information. It must not seek to dazzle by a display of dexterity for its own sake. It must avoid all decided eccentricities of arrangement that obstruct the reader and hinder the clear flow of the text, because that will injure the chances of the advertisement to get itself read. As someone has said: 'When an idea will not bear a simple form of expression, it is the sign for rejecting it.'

# CHARACTER TOLD BY LOOKING AT YOUR SHOES

**Men and Women Who Are Particular About the Fit and Looks of Their Pedal Toggery Are Generally the Best Customers—Why Lighter Leathers Reinforced by First-Class Backing Material Are Becoming Popular with Well Groomed Persons**

IT is often said that a man can be known by the company he keeps, and it is equally true that character can be told by looking at the foot covering of men and women. Nearly everyone admires a well-dressed foot, and comparatively few can select their own footwear, as the desire to have their feet look like some one else's often causes them to select a shoe entirely different from what they should wear, both for style and comfort.

## Perfect Fit Is Necessary?

Unless a shoe fits the foot perfectly it is bound to go out of shape in the "breaking in" period, and a perfectly-fitted shoe does not have to be broken in. That is where the trouble of the retail shoe clerk comes to the surface. He has to please the eye and vanity of the customer, and often against his own good judgment sells them a pair of shoes which suits their fancy but does not their feet. After a short time of wear they often come back claiming the shoes do not fit them, or that they were not properly made, as they got out of shape soon after being put to use; and all kind of fault is found with the poor clerk when he is absolutely innocent. But that is one of his burdens, and the working class have many to carry, and are as unreasonable as the above.

In the present age of advertising along advertising lines the buying public are becoming wiser every day regarding the construction of shoes, for we find the sectional parts shown in an intelligent manner in many of our leading magazines, as well as in some daily papers. These cuts give everyone who can read a very good idea of the construction of shoes, so that a visit to the factory is not necessary, nor even as good, for the multiplicity of operations which a shoe has to go through before it gets to the wearing stage is too bewildering, and the average person will come away from a large plant with about as much of an idea of the process of making a shoe as we do after a visit to the big three-ring circus: we know we have seen a big show, and a whole lot of things, but we are not able to tell much about it, and will have to go several times in order to thoroughly absorb the entire thing.

## Get Idea of Construction

But by looking at the picture of the shoe as shown in the sectional cuts we get a good idea of the construction, and it is not necessary to see the machinery in motion which performs the several operations.

Thus it pays to read the advertisements about things we actually need, and the use for your advertising matter of to-day is an educator in every sense of the word; and that is why it pays to read the advertisements, as well as it pays to advertise.

## Quick to Take Up Points

Discriminating dressers are studying these things, and are quick to take up new points of manufacturing as soon as they have them put before them clearly, and grasp the benefits to be derived by themselves in purchasing goods constructed along scientific principles, which they can readily see will improve the looks as well as comfort of the shoe.

That is why shoes made from lighter leathers and reinforced with a first-class backing material are becoming so popular with the well-groomed person who wishes his feet

to be well dressed, realizing that an ill-fitting shoe will spoil the looks of a 50-dollar suit.

## What the Backing Does

Shoes made in this manner are becoming more popular every day, and are being asked for at the retail shops by all who have made a study of the matter, as they know that their feet look neater when shod in this manner, and that the shoe will not run over or get one-sided so easily, as the backing prevents the leather from stretching and also protects it from the perspiration which has such a decaying tendency in almost every case.

This process adds to the character of the shoe, and gives character to the foot and wearer, and we will find, if we study the human family carefully, that the men and women who are particular about their foot covering, and who keep them looking neat and clean, are also clean in all other departments of their characters.

## A FACTOR IN LEATHER

(See Front Cover)

CECIL G. MARLATT comes by his leather instincts naturally as the son of one of Canada's earliest and best known tanners, the late S. D. Marlatt, of Oakville. He has succeeded in putting up the Marlatt leather record several notches, for not only is the original Marlatt business at Oakville a much more pretentious and effective factor in the leather business than it was when he took the helm but the "son of his father" has become connected with other and even larger enterprises of a similar character. In addition to being president of the Marlatt & Armstrong Co., Limited, of Oakville, of which he became a partner in 1879, he is the executive head of the following corporations:—The Magnetawan Tanning and Electric Co., Limited, Burk's Falls; Tobey Limited, Collingwood; Oakville Leather Co., Limited, Oakville, Ont., and Galvin Hide Co., Limited, Hamilton, besides being a director of the Victoria Harbor Lumber Co., Limited. He knows the leather business from hide to finished product and has been honored in various leather organizations from time to time by being given prominent positions on their officery.

No one in the leather trade is better appreciated as a man than Cecil G. Marlatt. The very soul of courtesy and geniality he has made a wide circle of friends both inside the trade and out. He is sound in judgment as he is sunny in temperament and in social organizations with which he has been connected, he has been honored quite as much as in the leather trade from time to time by election to responsible positions.

He finds time, notwithstanding the pressing claims of his many business interests, to devote considerable attention to public and social duties. He has been both mayor and reeve of Oakville and has been chairman of the water and light committee of his town since 1908 as well as an active member of the Halton County Council. His hobbies are yachting and golf, to the former of which he devotes considerable spare time. He has been Commodore of the Royal Canadian Yacht Club and is intimately associated with the Inter-Lakes Yachting Association in the work of which he has taken a very lively interest. In the best and fullest sense of the word C. G. Marlatt is described by his friends not only as a man of weight but a "jolly good fellow."

# TEN DOLLARS WILL SOON BE PRICE OF SHOES

**Leading Member of the Trade in St. John Declares that the Day is Not Far Off when the Ordinary Pair Will Bring This Figure—Thinks that Forty Per Cent. Profit is the Correct One Under Present Conditions—How All Styles Have Changed**

“LET me warn you that ten dollar shoes are coming and coming fast. The five dollar boot of last year is the six and the six and a half dollar one of to-day. Some lines of shoes that we bought this spring have advanced from twenty-five to thirty per cent. I notice a number of trade journals are advocating that the retailer should get a gross profit of forty per cent. Now this may seem a large margin except to some of you business men who are making from fifty to two hundred per cent. We must all admit that it is necessary to make a fair average profit if we are to satisfy the banks and meet our obligations fully and promptly. If a shoe costs five dollars, at forty per cent profit on the cost price it means retailing that pair at seven dollars. If the figure advances to six dollars it means to the merchant not alone the one dollar increase but forty per cent on that one dollar when a sale is made to the customer. This brings the selling figure up to eight dollars and forty cents. You can readily understand how soon some of the retail shoemen will be asking you ten dollars a pair. Why should we not get it, particularly on ladies' styles. The fair sex will often pay this sum and frequently much more for a hat which will not even keep out a few drops of rain.”

## The Birth of Shoemaking Art

So spoke C. Henry Smyth, manager of the Union St. branch store of Waterbury and Rising, Limited, of St. John, N.B., in an instructive and timely address on the present shoe and leather situation before the members of the Rotary Club in that city. Mr. Smyth has devoted considerable study to the present state of affairs in the footwear world and his review and comment will doubtless be read with much interest. He has been in the shoe game since 1879, working his way up from messenger boy to manager.

In the course of his remarks Mr. Smyth said,—“We in the footwear business can look back to the third century and claim a lineage to a saint. St. George, St. Andrew and St. Patrick societies can claim their patron saint and we have ours in the first shoe maker, Saint Crispin. The lineage dates back to the third century, when olden days were not golden days any more than are the present. ‘When might was right and knights would fight,’ the man who developed brain power had to seek a sanctuary in a monastery. It was then a monarch who wore the accustomed sandal of the day stubbed his royal toe and in heated language, which probably would not bear repeating, ordered that the ground be strewn with rushes, the same as his castle yard. It was then that St. Crispin, born of an inspiration and in sympathy with the monarch, made the following request: ‘Sire, if thou wilt place thy foot upon this measure, I will in twelve hours cover the earth with leather.’ Much as the monarch doubted, the request was granted while the courtiers stood near ready to accuse the Rev. Genius of heresy. Next day the royal feet were encased in a pair of leather shoes. So the legend ascribes this poor monk as the maker of the first pair of shoes.

“Since then we have the shoe maker and the cobbler doing their missions, not alone repairing soles, but trying to save souls. We have to our credit that in 1793 A.D. the first foreign missionary to India was a Baptist cobbler by name, Wm. Carey, who also organized the first Foreign Missionary Society in England. We have to-day the cobbler doing his bit in France. Some of these men have left their

benches and families and for the English shilling have joined or enlisted in the A.M.S.C. A recent lecturer in this city who was engaged in Y.M.C.A. work back of the front stated he saw old army boots stacked ten feet high that looked fit for nothing, but were in a short while made fit by these men of the A.M.S.C. So you see in these cases, and no doubt others could be mentioned, the errands of mercy which are falling to the workers of leather.

“Since starting in the footwear business in the spring of 1879, I have seen quite a few changes in the boot and shoe business. St. John then had quite a few boot and shoe manufacturers. We had firms such as: T. G. Ralston,

C. HENRY SMYTH, ST. JOHN, N.B.

Valpeys, Vincent, McEate, Robinson & Hall, Francis & Vaughan, Peters & Sutherland, J. W. Corréil, who succeeded T. G. Ralston and J. T. Hurley, who succeeded Robinson & Hall. To-day none of these signs adorns the front of any manufacturer of boots and shoes. Quebec competition and manufacturing on a small scale tells the tale. To-day, however, in New Brunswick, we have J. M. Humphrey & Co., boot and shoe factory in this city, also the Sackville factory in Sackville and the Hartt boot and shoe factory in Fredericton, up-to-date in their surroundings and equipments, and all doing a good business. We have also a few larrigan factories.

## From Prunellas to Goodyear Welts

Styles, as you know, since '79, have changed and it would not do for a shoe of that date to be placed on a counter for sale to-day. That was the day of serges or Prunellas with a sprinkling of French and American kid for women, while splits, buffs and domestic calfs predominated for the men. Tan boots were not on the list at all and the lasts were clubs compared with the ones of to-day. Then we did

not have the Goodyear welt machine as prominent as to-day, our welt work being sewed by hand. We had not only cobblers but real shoe maker shops, which were conducted by such men as The Nobles, Barkers, Ramage, McGill, Kelly, Thourgood and others. To-day, with the exception of a very few who make shoes to order, we have only the cobblers who find it more profitable to repair than to make shoes.

"It may interest you to know that the making of Good-year welt shoes in an up-to-date factory such as that of J. & T. Bell of Montreal requires eighty-three (83) operations, and that the shoe has to be handled that many times before it is ready for the consumer. I could enumerate them but know it would be of interest only to a shoe man. I am informed by Messrs. Bell that every output of lasts for a season's run of one style costs over \$1,000.00, the sizes running from 2½ to 7 and the widths A to E. They never allow a season to go by without introducing two and sometimes four and five new styles of lasts. Thus you can understand one of the things which contributes to the added cost of footwear, for if four or five new lasts are introduced it means that many thousands of dollars in this factory alone that the consumer has to pay for. When lasts go out, they are consigned to the furnace. In all up-to-date factories, where lasts are plentiful, a shoe is not allowed to leave the last in less than three weeks. To do so, would mean an ill-fitting and ill-looking shoes. This is one of the touches which goes to make up the appearance of all up-to-date footwear.

#### The Embargo Goes on Leather

"Leather is now a munition of war. France and Russia took the lead. Russia could not run the risk of a blockade of her railways as she needed her rolling stock to transport munitions. Now England steps in with leather and other articles and she says that she wants the tonnage for other purposes. Canada, however, is not affected to any great extent by this embargo, but it may seriously hit the export of shoes from the United States, for it is estimated that the amount of goods they have sent to the United Kingdom this year will not fall short of \$50,000,000. Our cousins, however, in order to counteract this shrinkage in their trade are credited with having pushed their goods into other foreign countries. They are now feeling the pinch on account of the scarcity of leather.

"Authority says that England by reason of her supremacy of the seas, controls the leather market. She controls all the skins that come from India, Arabia, East Coast of Africa, Cape Point and many other markets. She has practically at home commandeered all leather supplies by notifying the manufacturers that they must not exact more than 2% profit on their sales, otherwise the Government will take the entire control into their own hands. While leather supplies are very scarce in other countries, she is credited with having a supply sufficient for her needs as was evident by her acceptance from Russia of an order for 9,000,000 pairs of army boots. This is going some when you consider what it takes for her own supply of army boots, for 5,000,000 men, either at the front or in training. Allowing for drill purposes a pair every two months, and for trench work a pair a month, requires 45,000,000 pairs a year; besides she uses an immense quantity of leather for belts, saddlery, harness and other equipments. Thus you can imagine the big part our Mother Country is playing in this one commodity alone. It is also estimated that there are 50,000,000 men under arms altogether operating in Europe. To supply these men for one year would require one billion pairs of boots or allowing for wastage 50,000,000 buff hides.

#### When Calf Skins Were Cheap

"To-day we in Canada are up against it for fair, as leather prices are soaring. Here in St. John raw calf skins sell for

32 cents per pound, while in larger centres better prices prevail. In my early days in the footwear business 8 cents for calf skins was a good price and when they got to 12 cents it was gilt edge.

"Before the war leather was imported from the following countries: Russia, Austria, Germany, Belgium, Holland and France, and it was from them also that the bulk of the high class skins came. We cannot, however, say that the scarcity of skins is all due to the war, for we in Canada as well as the United States are not raising the cattle that we should. An article I received shows that in 1901 there was 59% as many cattle in the U.S. as people while in 1916 there was only 38%. When you consider the different purposes leather is being put to, such as trunks, automobiles, etc., it is little wonder that there is a strong pinch being felt in the hide market. To-day on account of scarcity, manufacturers are refusing orders, as they cannot see where some kinds are coming from. I know of a small order for \$1,200.00 being refused.

#### Frivolous Styles and Combination Colors

"In the hide market, the butcher and hide men go together, for no one kills a cow just for its hide. So it sometimes means a case of wait. The usage of leather has outstripped the demand for beef. We in Canada are bankrupt for leather mainly on account of our export business, not raising enough cattle and our neighbors across the line buying up everything in sight at very high figures. In 1915 we exported 350% more than in 1913. In order to prevent shipment across the line it is understood a deputation of tanners will soon wait on Minister of Trade and Commerce, asking for an embargo on leather and hides, so as to keep the same in our own country. This may help to regulate the cost. In the face of all this shortage, we find the people demanding the frivolous styles such as high cuts and combination colors. Strange to say, this fad has reached staid Old England. We also find the fashion makers cutting ladies' skirts shorter while boots are going higher. High-leg boots mean more expensive footwear as we cannot get as many pairs from the same amount of skins as the lower cut footwear.

"Already substitutes are being introduced in shape of Neolin and Rubberhide. Both are compositions composed of leather, fibre and rubber. It has been proved by the Chicago police that Neolin wears longer than sole leather. In Austria and Germany, they are wearing wooden sole shoes in the trenches, and in Canada, if England's supplies give out, we may have to do the same. The Berlinger Tageblatt of March 7, published in Germany, states that the people are complaining on account of the best part of their shoes being made of pasteboard, in other words paper, and tells of one man who brought action in the civil court on account of his shoes lasting only a few hours. However, it seems such a state of affairs cannot be helped as an enormous amount of leather is required for use in the army, and the former supply has been cut off from Russia. There are other stumbling blocks which in time will have the tendency to add to the scarcity of leather. For instance, what are we to do when all China becomes civilized and her millions start wearing boots.

#### The Service that is Given To-day

"In conclusion, may I draw your attention to the service you are getting to-day to what you did thirty years ago—so many more styles and shapes to choose from, different lasts, more widths, shoes fitted properly to the feet, approbation which makes the store-keeper carry a heavier stock on account of certain sizes being out on approval. Shoes called for, repaired promptly and delivered, etc. All these should go to make the purchaser pleasant and happy."

# Shoemen and The Exhibition

❧
**Importance of the Exhibition as a National Institution. Great Annual Inspirational Opportunity for Busy Retail Merchants**
❧

THE MAIN ENTRANCE

This habit of mind unquestionably testifies to their modesty and breadth of vision. At the same time, the broad-minded man will be unwise to allow his appreciation of others to interfere with a fair view of the efforts of his own countrymen—men, who, like himself, are helping to bring the name of Canada to the very forefront of the nations. "Justice before Generosity" is just as good a principle as it ever was—and no better principle has ever been enunciated.

Now, consider for the moment, the colossal achievement of Canadian organization that is represented by the Canadian National Exhibition. That there have been bigger exhibitions of a similar nature, both in Europe and America, need not be denied. World's Fairs like that recently held in San Francisco, or the St. Louis Exhibition of a few years ago, were certainly gigantic attractions. At the same time, it should be recollected, when making comparisons, that these World's Fairs are isolated incidents, that have occurred at irregular times in different places. They have been, in every sense, transient. Buildings and other works erected at tremendous cost, have had to be demolished after a brief life had concluded their period of usefulness. Nothing remains of them but a memory. Truly, a spectacle of wastefulness, that is the reverse of edifying to behold.

But the Toronto Exhibition—or, to give it its full and well-deserved name—The Canadian National Exhibition—

PARLIAMENT BUILDINGS, TORONTO

CANADIANS are all too prone to overlook the records of achievement made in their own country and to see those of other countries through a sort of mental magnifying glass.

is a world's fair of a different character. It is permanent. Its buildings and other works have a continuous existence. It serves a really National purpose in the encouragement of enterprise of every legitimate kind. It stimulates the friendly competition among rival producers of almost every description of wealth. It places the results of such competition in the view of a National public, and in this way, gives a better knowledge of the myriad arts of peace to millions of people, who must otherwise continue in ignorance of them.

And it keeps up the good work from year to year.

Commencing in the year 1878 as an ordinary fall fair, it has been, through the efforts of many public-spirited citizens, developed to a point where it is the largest annual

ON THE EXHIBITION GROUNDS

industrial and agricultural exhibition in the whole world. Its grounds and buildings now cover an area of 264 acres, representing a permanent capital investment of about \$2,000,000.00.

## Come This Year

Everybody knows that a busy retail merchant is about as closely tied to his store as any man could be. But he needs a change and relaxation no less than do men not so tied to their business premises. In fact, a change and relaxation, are, for him, absolutely essential. It's a good thing for the shoe merchant to leave his store occasionally and go away for a few days, preferably to a larger city, and there see what other merchants in the same line are doing. Such a visit is enjoyable as well as educative, resultful as well as recreative.

The Canadian National Exhibition occurs at a time and place that make it almost a duty for the Canadian shoe merchant to visit its halls of wonder and delight.

Consider the dates—August 26th to September 11th—a period when summer activity is waning and the fall season not yet in swing, a time when sorting orders for fall and winter lines should be placed if delay in delivery of seasonable goods is to be certainly avoided.

And consider the place—Toronto—a city whose shoe jobbers and factories supply retailers in all parts of the Dominion, a city that is, quite apart from the great exhibition, an attraction in itself, with its metropolitan life and

# Special Values During Exhibition

August 26th to September 11th, 1916

**W**E always endeavor to make it really worth while for retail shoe merchants to visit our warehouse while in Toronto for the Exhibition. And this year is no exception to the rule. In all departments—leather, felt and rubber footwear—you will find smart seasonable goods at special prices.

## Come and Make Your Selection

Our warehouse shelves are full of good values in lines that are standard quality, and well-known to the trade, among which the following may be mentioned.

### The "Imperial" Shoe

A range of Goodyear welts and McKay sewn shoes for men and women. They are made in all fine leathers on smart, up-to-date lasts.

### "Varsity" Brand

McKay sewn and Standard Screw. A medium grade, light shoe for Men's, Boys' and Youths' everyday wear.

### "Witch Elk"

A range of Hunting and Sporting boots of recognized merit, noted for hard-wearing qualities and comfortable fit.

### "Maple Leaf" Brand

Solid leather working shoes, every pair guaranteed. The line that will earn you the active goodwill of the customer who wants reliable wearing quality.

### "Little Canadian"

Misses' and Children's fine shoes. A splendidly-made shoe, specially suited for growing feet and having the most attractively neat fit and appearance.

### The "Sportsman" Boot

This famous line comes in 10, 12 and 15 inch leg. They are double-soled to heel. Goodyear Welt, full Bellows Tongue, made in **Chocolate Calf, Pearl Calf, Smoked Elk and Black Elk.**

**ELMIRA FELTS, ENGLISH SLIPPERS, THE "BIG FOUR" BRANDS OF RUBBER FOOTWEAR, "KANT KRACK," "DAINTY-MODE", "ROYAL" AND "BULL-DOG."**

Our warehouse is only about five minutes' walk, directly east along Front Street from the Union Station. We are easy to find and hard to beat for Shoe Values.

MADE IN CANADA

## WHAT THEY ARE

Ventiplex Insoles are not felt. They are made from a specially constructed, five ply, porous fabric, consisting of wool, hair and India fibre, interlaced in such a manner as to form thousands of wicks in the countless pores with which the fabric abounds. It is a firm, strong, yet soft absorbent material, especially adapted to the manufacture of Insoles.

# See This Machine At Work

While you are in Toronto for the Exhibition, come and see this great little machine do its work. We can show you this machine earning good money in several Toronto shoe repairing plants, and where they are proving entirely satisfactory and earning handsome dividends on their moderate cost. You will be interested in this, because it points the way to profit for you.

## Overseas Trench Boot

This boot is very highly commended by the highest military authorities of Canada. For the man on Overseas Service the Overseas Trench Boot is really a necessity and many have been sold by shoe dealers to people who desire to make a thoroughly useful and acceptable gift to friends and relatives in Khaki. That its superior merit is fully appreciated by soldiers at the battle-front is evidenced by the fact that several of the returned veterans have taken the trouble to tell us what comfort it has proved to them personally.

## SHOEMEN AND THE EXHIBITION

*(Continued from page 27)*

movement, its facilities both for pleasure and instructive sight-seeing, and for the transaction of business direct with the wholesale trade.

A magnificent programme of amusements always forms an important part of the Exhibition attractions, and this year the Grand Stand features will eclipse all records for wonder and novelty.

This will be "Federation Year" at the Canadian National Exhibition and everything has been planned to

NEW TECHNICAL SCHOOL, TORONTO

symbolize Imperial unity and power, the new bonds of Empire brotherhood welded in the crucible of war on distant battlefields. In keeping with the significance of the event, plans have been laid for a Spectacle of unusual beauty and brilliance, a superb, satisfying simile of Empire might and cohesion. Over 1,200 performers will be required and they will include soldiers, representing all parts of the British domains the world around, from the lathy, dignified Sikh and the big, black chiefs of Somaliland, to His Majesty's own Brigade of Guards. The pageant will be enacted before a 700 foot reproduction of the British Houses of Parliament, the War Office and Westminster Abbey, all constructed with a wealth and truth of detail such as to almost convince onlookers who have been there that they are back in the "Heart of the Empire."

Enumeration of the many other attractions of the Great Fair is not possible here. But you may be sure, they

MANUFACTURERS' BUILDING

are all worth seeing and will amply repay your expenditure by the recreation and inspiration they will afford.

**Realistic Fight with Aeroplanes**

An anti-aircraft gun, such as is now mounted all over England and on the battlefields in France, Belgium and elsewhere, is being sent over by the British War Office for use at the Canadian National Exhibition, and will be utilized for the purpose of making the fights between the invading

aeroplanes and the land forces stationed on Exhibition shore more realistic, the battles being staged under conditions similar to those existing in Great Britain and the war zone. The Admiralty has also been asked to approve the shipment to Toronto of a 20-foot model of the Hercules, a first class battleship built in 1911, and at present one of the most powerful in the British Navy. An effort was made to secure a submarine for exhibition on the water-front, but the Admiralty protested on the ground that every one now available is required for war purposes. Negotiations have since been opened with the United States government for the loan of one, but so far no definite answer has been received.

From the standpoint of process exhibits, the production of goods under factory conditions, the Canadian National Exhibition will be particularly interesting this year. Two different firms will produce shells, one shrapnel and the other high explosive, another firm will put in a large number of looms and manufacture linens, while still another will produce breakfast foods before the crowds. There will

CITY HALL, TORONTO

also be silk winding processes, glass cutting, aluminum spinning, gas mantle manufacture, and a working model of a powder mill in full operation.

**Will Avoid Last Year's Mistake**

A year ago all over the Province there was great disappointment among the people coming to the Exhibition the last couple of days to learn that the rates on the railroads had expired. It was too late then to have the matter rectified, but the Exhibition management took the matter up with the railroads and found that there had been a mistake in the circular sent out to their agents, the result being that on the closing days people going to Toronto had to pay full fare. This year the matter was attended to early and the Exhibition has the assurance that there will be no repetition of last year's trouble. The rates extend over the full two weeks period.

One of the features of the Federation of Empire pageant at the Canadian National Exhibition this year will be a living flag, 150x100 feet, which will be unfurled at a moment when it will seemingly put a great loyal seal on "Federation" just prophetically proclaimed from the House of Parliament, which will form part of the background for the patriotic pageant. Several of the Colonies and Overseas Dominions, which will be represented in the Federation procession have sent greetings to Dr. Orr and best wishes for the success of the Exhibition, together with official flags to be carried at the head of the contingent representing them.

# The Shoe Repair Man

IN putting on the rubber heel lift or half heel, first be sure that when you have reduced the height of the heel to the proper level to which the rubber should be attached, the leather surface is level, says the Shoe Repairer.

Leather heels are subjected to extreme pressure in what is known as the heel compressor, a pressure approximating forty-two tons to the square inch. The result of this pressure is that the lifts of the heel are apt to be considerably distorted, owing to their varying thickness and to their varying degrees of firmness.

Therefore, when you have reduced the height of the heel to the desired point, you are very apt to find that the surface is very uneven. It will do you no good to take off another lift, for the same condition will be found on the next lift.

Neither can you add a new lift of leather and get a satisfactory result, because the unevenness will cause a bad joint between the old lift and the new lift of leather.

The only thing to do is when you have reduced the heel to the proper height, take a wood rasp and level the surface so that you will have a smooth, even surface to which to attach the rubber heel lift.

Another advantage of this suggestion is that the rough surface resulting from the use of the rasp makes a fine surface on which to use rubber cement, so that you not only get a tight joint between the rubber lift and the leather heel, but you get one that is cemented and that will remain tight permanently.

## The Profits on Repairing

A recent article on how to run a retail shoe store on \$10,000 states that there is 25 per cent. profit possible on repair work. This writer says:

"Great profit can be made in the repair business if handled properly. Get your customers to bring back their shoes for repairs and charge enough to give the best class of work with high grade of leather, have it done properly and quickly, 25 per cent net profit is possible on repair work. Put in a repair outfit in your basement when your sales reach \$25,000, it will pay you, one man for machines and a cobbler can handle the proposition, and you can in time work into custom shoes at tremendous profits. Do not stock heavily on findings, polishes, boot trees, laces, etc.; a small amount must be carried. Hosiery can be added in a few lines of black and tan for men and women. A glass showcase is necessary for a hosiery department. Fancy buckles are a big money-maker, but should not be considered by the \$10,000 shoe man."

## How He Gets Business

Much might be said about the live methods of one man who has always catered to a good class of trade and emphasized the superiority of his work, the good stock used and the skilled methods employed rather than presenting the price features. He stands back of the quality of all his output as the following letter despatched recently to customers fully explains:—

The other day we repaired a pair of shoes for you. We hope the quality of our work came up to your expectations. It is our aim to fully satisfy our customers. Our responsibility does not end when you have paid for your repairs and taken them away. We do not claim perfection for our work. We will, however, stand back of every job we do

and repair free of charge any part of our work that is faulty.

We apply these same principles to our new shoe department. We are quite sure that shoes bought from us and repaired by us will give you better value in shoe service than can be obtained elsewhere.

When next in need of new shoes you are invited to inspect the style, test the wear, and enjoy the comfort of ——— or ——— boots.

In connection with his men's shoe department, which he has found a profitable adjunct, the proprietor takes the same high stand regarding comfort, service and satisfaction as the following demonstrates.

It is our desire that all shoes purchased from us shall give the best of satisfaction to our customers. With this end in view we are prepared to repair all welt, sole and upper rips free of charge.

The perfect shoe is the shoemaker's ideal, but as yet no maker has reached that desirable goal. The old adage that a stitch in time saves nine applies with greater force to shoes than to anything else we wear. In case of need do not fail to take early advantage of our free repair service.

When other repairs are needed kindly remember that ——— Shoe Repairing Works is well and favorably known throughout the city for good work. Remember also that we take a special interest in repairing our own shoes, and that you may depend upon getting the very best attention at the lowest price consistent with good work.

## Keeping Tab on the Work

No stubs or counterfoils are given customers by this shop, for these are often lost or mislaid, or the party changes his clothes or forgets to bring the stub. In short, people do not want to be bothered with a ticket system, and the less red tapeism or form there is about handling repairs the better for quick, expeditious work. This man buys his tags in lots of twenty-five thousand, numbered consecutively, both on the top and the stub. The former portion contains a dotted line for the name and address of each customer, which is always carefully taken in order to avoid confusion. There are spaces for the nature of the work to be filled in pencil in abbreviated form and lines for "time received," "when the work is to be done," and "the date." On the stub there are also lines for the name and address, the nature of the repairs, the time, the price, who received the work at the counter, the workman, etc. The full tag is attached first to the shoes and when they are taken into the repair department the stub is detached and each one is placed in a compartment drawer under the proper initial of the owner of the footwear. When John Jones calls to get his shoes the drawer is opened and the stub taken out. If he drops in earlier than the work is promised he is informed that the shoes are not ready yet, but if he calls at the time allotted or after, the work is certainly done. No delays are permitted and barring accidents every job is finished when promised. There is nothing more irritating or annoying to the customer than to find that repairs are not completed when needed and when calling for work he does not care about making useless trips.

## DISPLAYS REPAIR WORK ON OPEN WINDOW

How Busy Vancouver Shoemaker Arouses the Interest of the Passing Public— Gives Special Attention to Crippled Feet—The Latest Equipment Installed and Quick Service Rendered—Always Seeking Ideas That Will Bring More Customers

ONE of the busiest spots to be found in Canadian Pacific leatherdom, is that beehive of industry known to the residents of Vancouver and surrounding towns and to quite a few men in the trade as the World Shoe Co., 64 Hastings St. W., Vancouver, B.C.

Mr. Pierre Paris, the genial proprietor and promoter of this concern hails, as his name might be taken to indicate, from the land of the tricolor. However, he did not come from Paris but from the southern portion of France. Some nine years ago he arrived in Canada bringing with him as working capital the intimate knowledge of custom shoe making that one finds as a peculiar asset to those men who learned and mastered the footwear game in the provinces of the fleur-de-lis.

Mr. Paris plied his craft in various shops in Vancouver, and some two or three years ago opened for business in his present stand, one of the busiest spots in Vancouver's liveliest street.

Realizing the important part that modern machinery plays in the up-to-date custom and shoe repair line, Mr. Paris early installed several of the latest machines suitable to his business. Among these was a large Goodyear shoe

PIERE PARIS, OF VANCOUVER, HUGGING A LAST.

repair outfit with rapid outsole stitcher attached, a large sole leather press and several smaller machines. Subsequent business growth has induced the purchase of another of these repair outfits to augment his equipment

At the present time the World Shoe Co. is making a specialty of custom made loggers' and miners' boots.

One of Mr. Paris' hobbies is the personal care and attention given to badly crippled feet. He is skilled to a marvellous degree in concealing, as in an ordinary shoe, the various corks, supports and elevators that deformed feet necessitate. It is part of his doctrine that the necessary

corks and supports should be hidden as far as is possible. His theory is that the absence of any unsightly "appliance" undoubtedly adds much to the patron's mental and physical comfort.

The proprietor of the World Shoe Co. is thoroughly up-to-date. He is a strong advocate of display and other

ATTRACTIVE PICTURE POST CARD ISSUED BY MR. PARIS.

forms of advertising, and is always seeking to make any change that will keep his business prosperous and progressive.

Recently, in response to a new idea, the entire double front of his store was removed and replaced by a side entrance front, the window portion being provided with a large rising lower sash, much after the style of the windows used in fruit stores.

In this window two work jacks were fixed, the actual window board being used for a tool bench. Now, in favorable weather the lower half of this window is raised, with the result that this novel, semi-open air demonstration of construction and reconstruction of footwear for the masses attracts a great deal of attention and a small crowd of spectators frequently lines up.

Right on the window front board with nothing to cover them, but so placed that the public can easily pick them up and look them over, are various custom-made shoes. Some are only half finished. Rubber, leather, or neolin soles, rubber heels, etc., are also displayed and inquirers can be instantly satisfied regarding the probable cost of this or that class of work, or an estimate given even without the customer entering the shop.

# EDMONTON PLANS TO KEEP BUSINESS AT HOME

Are Showing the Actual Situation to the Home Owners of the City—Are Extending Them a Real Service—Interesting Facts Regarding this City's Buy-at-Home Campaign

**I**N the City of Edmonton, Alta., a well organized campaign has been started for the purpose of curtailing the amount of money that is being sent outside for home requirements.

The ordinary family has only one thought in mind when making up a list from a catalogue, they think they are getting the same value and service for less money. This idea is a fallacy, as there are many things to be considered when making purchases.

Say one hundred families in a town were to send fifty dollars each to a mail-order house—that is \$5,000.00. When it is gone there is that much less in circulation in the town. It takes some time before anything happens, aside from an acknowledgment of receipt of the money, that \$5,000.00 if in circulation would be sufficient to pay the wages of 250 men for a whole week, their efforts would have produced at least another \$5,000.00, that in itself should be sufficient to keep the money at home—if the people realized the truth.

Spend the \$5,000.00 in the stores of the local merchants. What then?

Part of it goes to the city treasury in the form of taxes and licenses. The local merchant is a heavy tax payer and does much to support the public institutions and helps to educate the children and create for all an opportunity to have a home.

He employs a great many people who have families to support and who are all contributing to the common good of the town in which you live; by spending your money at home you help the town along—when it is sent to other places, that person, the sender, is nothing more or less than a tax on his fellowmen and is deserving of public exposure.

## The Buy-at-Home Campaign

Each week an entire section of one of the city's papers is devoted to this question. It consists of about ten pages. Nearly every local industry and most of the merchants, wholesale and retail, advertise therein. The interest of the reader is attracted by a large size cartoon—one having a human interest touch and generally related to some common occurrence that has been the experience of every family at one time or another.

In good sized type is some logical reasoning appealing to the home sentiment of the individual. The following appeared in one of the issues of this "Buy-at-home section."

"Every part of the animal kingdom, from the elephant to the ant, has a home and each will fight for its home. The man who wouldn't, deserves to lose it to the one who will. On the convenience, comfort and beauty of your home, depends the happiness of your family. If that isn't your first thought, you have no right to a family.

"The extent to which your home represents comfort and happiness to your family and yourself depends largely on the success of your business, and the degree of the success of your business is dependent almost entirely on the prosperity of your city.

"The prosperity of your city depends absolutely upon the conduct of its inhabitants. The degree of your loyalty to your city and those who live in it measures the comfort of your home, your prosperity, and the happiness of your family.

"To still further emphasize: Every dollar you spend in your home town circulates and leaves a profit in every hand that holds it. You don't want the money you spend to go toward buying automobiles for someone in another city.

You would certainly prefer that it be used for schools to educate your children, so that they may become intelligent and successful citizens. Remember that money sent away from your home town rarely returns, and that when you send it you are deliberately sapping the life and strength of your own community. You are actually stealing from your children and your friends. When you buy away from home you are doing for some other community what you should be doing for your own. You are taking from those you care for to give to those in whom you are not interested. To patronize home industries is a duty every citizen owes to himself and those he loves.

"You may need credit some time. Money may be required for local improvements, such as schools and churches. You must get it at home—from your local merchant. Remember, that as you need him, so does he need you; that as his prosperity depends upon you, so does yours depend upon him.

Distributed among the advertising are a number of terse paragraphs with a bold heading such as:—

### A Plain Truth

"A man may patronize the mail-order houses for years, may send them in that time hundreds of dollars—and at the same time they wouldn't accommodate him for a two-cent stamp. This the plain, unvarnished truth. If you think otherwise try it for yourself and see. These out-of-town houses do not know you—do not care to know you—are not interested in you in any way—only in the money you send them. Spend your money with your own townsmen, who know you for what you really are, who appreciate your worth, your business, your assistance in building up home interests.

"Then there are a number of attractively set reading notices.

**The goods are right here where you cannot only see them but feel them—Co-operation is the key to the city's growth**

"Variety is the spice of life and we have a variety of merchandise in Edmonton that will satisfy the most exacting taste. Edmonton is a catalogue of real articles and materials. It is not printed on paper and advertised through circulars, but is right where you cannot only see but feel. One's eyesight is a great deal easier deceived than one's sense of feeling.

"It isn't as if Edmonton merchants didn't have the goods. They have. Edmonton has as fully equipped and as up-to-date stores for a city of its size as any place in the country, and one cannot help being "suited" somewhere. Perhaps the exact thing you want cannot be found at the first store; then go to the second, and to the third, if necessary. No merchant can feel hurt because you patronize another Edmonton store for what he doesn't carry, and if he's the right kind of merchant, he'll have what you want the next time. But he has the perfect right to feel that you are a town "knocker" if you buy that same article away from home when you can do as well or better in Edmonton. You want to make your living in Edmonton, don't you? Well, others want to make their living here, too. Do unto others as you would be done by.

"The man who wants one hundred cents' worth for every dollar he spends should put his money into articles manufactured at home, thereby saving all freights, commissions, or other expenses that increase the price of merchandise."

# THE HUMAN FOOT—ITS BUILD AND PURPOSE

How Certain Ailments Are Caused and May Be Relieved—Flat Foot Affects People in All Walks of Life—Many Do not Know What Their Real Trouble Is—The Basic Principles of the Arch Support—Use of a Broom Stick Gave Inventor First Inspiration

By ELMER POYER

**T**HE skeleton of the human body is a bony structure consisting of 200 separate bones (not including the ossicles of the ear). Each of these 200 bones is joined to one or more bones, with one exception, viz., the os hyoides. The skeleton may be divided into four sections: the skull (22 bones); the trunk (52 bones); the upper extremities (64 bones), and the lower extremities (62 bones).

The subject under discussion requires for its principal consideration the bones of the lower extremities; that is, from the trunk down. This includes the os inominatum, which forms the principal part of the pelvis; the femur, or thigh bone; the patella, or kneecap; the tibia and fibula, or leg bones; and the bones of the foot.

The bones of the foot are divided into three sections; the tarsal (7 bones), the metatarsal (5 bones), and the phalanges (14 bones).

The tarsal bones are those which form the heel and longitudinal arch of the foot. They are: the os calcis, or calcaneum, otherwise the heelbone. On top of this is the astragalus, or talus. In front of this is the scaphoid, or navicular, so called because of its boat-like shape. In front of this again we find the three cuneiforms, or "wedge-form." These three are located on the inner side of the foot. On the outer side, in front of the os calcis, is the cuboid (cube-like).

The metatarsal bones are those which form the transverse arch of the foot. They are the 1st, 2nd, 3rd, 4th, and 5th Metatarsals. The first three are joined to the three cuneiforms. The 4th and 5th are joined to the cuboid. Unlike most of the other bones of the body, the articulations of the Metatarsals are immovable.

## Bones which Form the Toe

The phalanges are the bones which form the toes. The phalanges are divided into three classes: proximal, medial and distal phalanges. The great toe has only two phalanges, the proximal and distal. The other toes each have three.

The above comprise the twenty-six bones of the foot. All of the bones are closely joined together, presenting a structure wonderfully adapted in strength and symmetry to its work of sustaining the superstructure and the balancing of the skeletal body frame.

In addition to the twenty-six bones of the foot, there are sometimes found small, round bones in the ball of the foot directly beneath the head of the first metatarsal. These are called Sesamoid (seed-like). They are abnormal and may become very troublesome, but can be removed very readily by a chiropodist or surgeon. Sesamoids are found only in the feet of adults.

Many of the bones, at their articular ends, are lined with a semi-elastic substance known as the cartilage, and are held together by ligaments which bind them firmly where there are no movable joints entering into the structure. This is especially the case in the tarsus of the foot, or that part back of the metatarsal bones. These ligaments are

numerous and usually take their names from the bones they connect. For example: the Calcaneo-Astragaloid, connecting the calcaneum and the astragalus; the Calcaneo-Cuboid, connecting the calcaneum and the cuboid, etc.

The ligaments are constructed of white, non-elastic fibres. They are absolutely unyielding in their tension, and those of the foot are properly the strongest in the body. They are non-elastic, as stated above, and when stretched they remain so, and the arch of the foot drops. When the arch has dropped it cannot be permanently raised through the action of the muscles of the foot or leg. The restoration of a fallen arch can be accomplished only by the reconstruction of the torn or loosened ligaments, which requires that the parts affected be kept at absolute rest. It therefore follows that a fallen arch can be restored to its normal position only by means of an absolutely rigid support which will hold the parts in their proper position until the ligaments become sufficiently strong to withstand the strain placed upon them.

ELMER POYER, NIAGARA FALLS, ONT.

## Fifty Per Cent Have Pedal Ailments

You will, no doubt, be surprised to learn that more than 50% of the people are afflicted with flat foot, either in its incipient or advanced stage. Large as this percentage may seem, it is, nevertheless, the conservative estimate of experts who have made an exhaustive study of the human foot and its ailments. Flat foot, or Pes Planis, affects people in all walks of life, especially those who are compelled to stand or walk a great deal. Many who suffer with their feet do not know what their real ailment is, and often attribute it to different causes. Rheumatism and gout are usually unjustly blamed for this suffering.

A normal foot presents a concave surface on the inner and under side. In the case of a flat foot this surface is more or less flattened out, and sometimes, in very advanced cases, the foot presents a convex surface, the arch of the foot being lower than the heel or ball. Flat Foot is painful, making walking agony instead of pleasure as it should be. It is destructive to footwear, as shoes are built for normal feet, and cannot be expected to withstand the strain put upon them by a flat foot. It takes the elasticity out of the sufferer's gait, and makes him walk with a halting, hesitating step as though trying to pick out the soft spots on the hard pavement.

It is very important in the treatment of fallen arch or flat foot, that we understand the causes which brought on this condition. Flat foot is the result of many and varied causes, of which the following are a few of the most common: Congenital weakness; continued and excessive strain; diseased conditions; accidents; debility from old age; sudden strain.

In the first of these the muscles and ligaments are naturally weak and undeveloped, and the weight of the body is too great for the ligaments to bear.

In the second we will consider people whose vocations impose upon them a great deal of standing or walking, and

those who continually support heavy weights, either in the shape of excess adipose or the bearing of heavy burdens.

Diseased conditions of the body, and the foot in particular, have a tendency to destroy the tensile strength of the ligaments. People who have accumulated an excessive amount of fat, or adipose tissue, suffer a degeneration of the fibrous structure, besides having to sustain greater weight than intended to be borne. While it is true that the ligaments of the feet are stronger than those of any other part of the body, they are not strong enough to withstand the strain we oftentimes foolishly and unnecessarily put upon them. Athletes often put a strain upon some organ, or part of the body, beyond its abilities to bear it, and the result is disastrous. A case in point is that of a man who lifted a weight of 1,200 pounds. The result of his rash act is that to-day that man is a physical wreck. In jumping or falling from a considerable height, the impact on landing on the feet is very liable to rupture some of the ligaments. Old age naturally weakens the tensile strength of the ligaments of the feet as well as the rest of the body.

The symptoms of flat foot may be considered under two headings: viz., objective and subjective. The objective symptoms are those which are apparent to the eye of the observer, such as the dragging, slouching gait, the bulging in of the shoe, disclosing the flattened or averted condition of the foot. Oftentimes, too, the symptoms are apparent in the temper of the sufferer.

#### **"Oh My Feet Are Tired—They Burn"**

The subjective symptoms are those which are not apparent, but which are the cause of making life miserable for the sufferer. Callouses are found on the ball of the foot. The most common complaint we hear to-day is this, "Oh, my feet are tired!" There will be a burning sensation, sharp pains in the heels, swelling of the ankles, pain at the bottoms of the feet and on the upper side of the instep, weariness in the calf of the leg, extending to the hips. There will be dull, aching pain, in the back and the nape of the neck. You may be incredulous if I tell you that persons with continuous headaches can often times be cured by a pair of properly fitted arch props.

When a person's shoes are found to be worn unevenly and more on the outer than the inner side, it is an indication of flat foot, for reasons as follows:

"The centre of gravity of the body will align with a point on the upper side of the instep, just a little forward of the leg and somewhat to the inner side thereof. When the foot flattens this point is thrown farther inward, and to overcome this there is a subconscious tendency to turn the foot so as to bring the point indicated farther outward, where the tuberosities of the fifth metatarsal forms a solid support from the ground upwards. This is done in the early stages of the disease and will naturally cause a wearing away of the sole and heel of the shoe on the outer side. When the shoe is further inspected it will be found that the seams at the inner side are found to be ripping, which would not occur if the foot were at its normal arch. Callosities form at the ball of the foot, because there is a tendency to assist in the holding up of the arch by the action of the muscles in the calf of the leg, drawing back the forward part of the foot.

"The tendons of these muscles pass down the leg posteriorly, and beneath the sustentaculum-tali, and when the muscles are contracted there is a lifting of the posterior portion of the foot and the weight is thrown forward and the ball of the foot receives an excessive share of it. This, in conjunction with narrow shoes, inevitably brings about the formation of callosities. It may be stated that the wearing of short shoes produces the same result, for the same reason, i. e., the retraction of the toes.

"The stinging pain in the heel is due to the tearing away of the fibres composing the ligaments from their origin in the roughened portion of the tuberosity of the Os Calcis,

or Calcaneum. The same thing applies to their insertion in the lesser bones of the Tarsus. The annular ligament becomes stretched, for as the longitudinal arch is flattened and lengthened, the transverse arch also spreads.

"The cuneiform, or wedge-shaped bones which lie snugly together when the arch is normal, have their apexes separated on the under side and the borders at the broader ends are more forcibly pressed together, causing pain from pressure. The Os Calcis, which normally occupied an inclined position, now lies almost horizontal. The scaphoid is pushed downward and the articulations are no longer normal, because there is a general dislocation of them all.

#### **Unequal Pressure Causes Irritation**

"As the foot is turned outward, or everted, the tuberosity of the fibula on its articular side will press harder against the outer side of the astragalus. The ankle joint is no longer normal; the unequal pressure produces irritation, the irritation produces eodematous swelling with concomitant pain, and the sufferer is told that he has rheumatism of the ankle. This in nine cases out of ten is an incorrect diagnosis."—Extract from "Flat Foot," by Immanuel Lundquist, M.D.

As previously stated, the only way in which a flat foot can be restored to its normal position is by the use of an absolutely rigid support which will hold the parts in their proper positions until the torn or loosened ligaments are repaired and resume their natural functions. It is not practicable to take a flat foot and raise it immediately to its normal position and keep it there, as, with such treatment, the cure would be more painful than the disease. What is necessary, therefore, is a support which, although it is absolutely rigid, can be raised from time to time. It may be necessary for the patient to wear this for some time. At first it should be quite low, and raised say once every week or so until the arch has reached its normal position. After that the support should be worn for a time to give the ligaments an opportunity to regain their lost strength.

There are many different styles on the market to-day, some of which are good, and some of which are not. This article was not written with any idea of advertising any line of arch supports and you will pardon me for mentioning a particular style of support.

#### **Used Broom Handle to Raise Arches**

Mr. James W. Arrowsmith is the pioneer inventor of arch supports. Before beginning this treatise I talked with Mr. Arrowsmith regarding his first arch support, the Arrowsmith adjustable arch prop. He was engaged at the time in orthopedic work, and was himself a sufferer from flat foot. He said that his feet became so bad that he was compelled finally to relinquish his position as it was practically impossible for him to walk the two blocks from his home to his place of business. He tried to get relief from prominent physicians and surgeons in New York City and elsewhere, without success. Finally, thrown upon his own resources, he began to experiment. One of his first experiments was that of carrying a piece of broom handle with him and standing on it every minute or so. This would raise the arch slightly and rest the foot enough to allow him to take a few steps more.

Mr. Arrowsmith worked for three years, applying many ideas, before he achieved success. The result of these three years of unceasing labor was the Arrowsmith Adjustable Arch Prop, with which every shoeman is familiar, and which has practically revolutionized the science of orthopedics.

The basic principle of the arch prop is adjustability. The slitted fingers on the inner side of the prop allow it to be raised or lowered in such a manner as to get the proper amount of pressure at any particular spot required. All credit is due to the fertile brain of the inventor, who has brought relief not only to himself, but to thousands of other sufferers.

## SOME SHOES—OH YES, THEY WERE

WE called on a business friend of ours not long ago—no, no, not to borrow money. Besides, as soon as he saw us he started in to tell us how bad times were and how hard it is to get money from the banks, says P. O'D. in "Saturday Night."

"Only the other day," he said, with the look of a hurt child in his beautiful eyes, "I dropped in on my banker to get fifty or sixty thousand to build an addition to the factory, and he had the nerve to tell me he was sorry, but—"

Horrible, wasn't it? No wonder the tired business man is tired, with the banks acting up like that and denying him those little opportunities to make twenty per cent. or so on someone else's money.

We tried to tell our friend how shocked we were to hear of this commercial Prussianism. But we doubt if our horror seemed entirely genuine. You see, we couldn't help thinking that if we were to go in to our banker—one of our bankers, that is—and ask for fifty or sixty dollars, not to speak of thousands, he wouldn't say he was sorry. He would simply ring a bell and a large colored porter would drop us out of a front window on to the street.

But we didn't intend to talk about money—depressing, isn't it, the way those financial considerations will obtrude themselves. We really set out to tell about our friends' shoes. They were the first thing that struck us as we entered his office—we speak metaphorically, of course. They were on his desk.

Our friend is not a particularly large man, but they were the biggest pair of soles we have seen in years. In fact, they looked more like a couple of those shields the French soldiers are using against liquid fire. They had no heels, and they were shaped so that a man seemed to be pigeon-toed no matter how he placed them.

When our friend emerged from behind them in order to shake us by the hand and tell us how hard up he was, we saw that they were low shoes—oxfords, that is, though built on lines not usually associated with that haunt of classic culture. Heaven only knows where all the leather came from. They reminded us of pictures we have seen of Robinson Crusoe, only these contrivances weren't held on with puckering strings.

### Burst Forth into Speech

All through the financial conversation retailed above we couldn't keep our eyes off his feet. Finally we burst into speech, though politeness dictated that we should

VARIOUS TYPES OF FOOTGEAR SEEN NOWADAYS

refrain from personalities of that sort. But then we are never polite to capitalists—it makes them haughty.

"What's the idea, Alf?" we asked, pointing to the nearest sector of one of them. "What are you trying to do—wear a couple of your old suit cases?"

"Well, what's wrong with that shoe?" he demanded in a very chilly tone, lifting it onto his knee and examining it very intently, as though he had never noticed it before.

"Oh, nothing, nothing," we hastened to explain; "it's probably a very nice shoe if you have to wear that kind.

But what happened to your feet to spread them out that way? Something run over them?—or are you getting gout?"

"Let me tell you something, my boy—"

Whenever our friend calls us his boy and leans over the desk and shakes his finger at us in that way, we know that he intends to be stern with us for our own good. That is his way of setting out to shed a little light in the dingy recesses of our intellectual cavity.

Well, he told us all about those shoes. It seems that they are a new foot-health shoe, which is going to revolutionize the whole science of footology, or whatever they call

OH! THE WORK OF LACING UP THESE HIGH CUTS

it. When people find out about those shoes, according to our friend, they will promptly pitch all their old, unscientific toe-pinching shoes out of the window and will rush down town—in their stocking feet, we presume—and buy the only shoes that really conform to the shape of the natural foot.

Our friend proved it by diagrams. He had a whole drawer full of illustrations and literature on the subject. First he showed us the perfect human foot as exemplified in babies and in African savages—those faddists always go to extremes.

"Now, there's the foot as it ought to be," he said in triumph. "There's the foot that has never been squeezed out of shape."

### The Different Kinds of Biped

We said that the babies' feet were all right, but that, personally, we had been unable to retain either the pink tootsies or the innocence of our extreme childhood. And as for the African savages, we could easily understand that their feet had never been squeezed—nothing but a pair of sliding doors or a couple of freight cars could squeeze anything so wide. They were about the size of flagstones.

"But why the dickens should anyone want feet like that?" we asked.

"Well, perhaps they are a bit big," he admitted grudgingly, "but then look at the magnificent development of the arch and the muscles. No foot troubles there, my boy."

We said that as a matter of fact they looked rather flat to us, but that in any case we wouldn't have them, no matter how well developed they were. What's the use of cultivating feet that you couldn't drag through the doorway of a limousine? No wonder African savages won't wear pants.

"The whole truth with fellows like you, my boy," said our friend sternly, "is that you are always thinking

about style and appearances. So you go to work and jam your feet into dainty little shoes, and—"

We coyly got our number tens as far under our chair as possible, and said that perhaps we did devote a little too much thought to the daintiness of our footwear. But, doggone it, the girls insisted on us looking nice, so what could we do?

"And that's the result," said our friend, displaying some rather horrible illustrations of the sort you can see hanging in any chiropodist's window. "That's what your feet look like when you take your shoes off."

### Comparisons are Not Pleasant

This was too much, reader, altogether too darn much. We said so—summoning to our aid a few gems of style we had recently heard a motorman use to an automobilist who had just run over the fender of the car. We said our feet were a darn sight better looking than his, even if he did go about in moccasins all year round.

Then he got mad. He said that rather than suffer the agony visible in every step we took he would go barefoot for the rest of his life. He said he would rather have wooden

sniff that almost shook her back-hair down. She also glared at us personally in a most unpleasant fashion. She seemed to think we had been smuggling liquor in. Then she stalked majestically out—probably to phone Alf's wife. Alf will have to fire that girl in the interest of office discipline.

We left almost immediately. Alf seemed to want us to go. We left in such a hurry we almost took our socks and shoes out to the elevator to put them on. But we won that contest—we won it by one hole less in our socks.

We are not going to buy any of those foot-health shoes. Not for ours, dear reader, so long as we can manage somehow or other to hobble about on our poor round feet. We will continue to buy unhealthy shoes that look good—for a few days, anyway, if they keep their shape so long.

Once we bought a pair of shoes with no other idea than honest comfort—only once. They were of white canvas and were built on the lines of a boat-house. They were comfortable all right, so far as the feet were concerned, but they caused such acute distress of mind that we gave up wearing them after a week or so. We never realized how many humorists we were acquainted with till we started pushing those shoes around town.

The last straw was laid on one day when we were standing on a corner waiting for a car. Two young ladies of rather pronounced style were also waiting. They wore ostrich plumes and a good deal of gum—but it didn't interfere with their speech.

"Say, Maudie, if you had them shoes," said the one with the more active piece of gum, "you could put rockers on them and they'd be great for the twins."

We didn't look around, but we knew they were talking about us. We knew it by the way they laughed. That night we asked the landlady to give the shoes to the wash-woman.

"But what do you want her to do with them?" said our landlady in the tactless manner which even the best of women display at times.

We suggested that she might put them in the window with geraniums in them—see Hints to Housekeepers in The Ladies' Home Journal.

### Buying Footwear for Looks Only

Since then we have bought shoes for good looks solely—also about a size too small. There is nothing like showing your feet the way they should go. Of course they make walking a little harder sometimes. But what's the sense of walking when your friends have motorcars?—we select friends on that basis.

Our sympathies are entirely with the girls in the matter of footwear. The little dears are quite right. Think of marrying a woman who wore commonsense shoes and low heels! That sort of woman would walk in Suffrage parades and make her husband carry a banner. She would set him to washing the dishes and would forbid smoking in the house. And if he came home after ten at night heaven only knows what she'd do—probably step on his Adam's apple.

No, no, girls, nothing like that! If you want us—(we pause for a reply. What, none? Oh, well, probably their blushes are speaking for them)—anyway, we hope you'll go on squeezing your cute little number fours into cute little number twos, as of yore.

We also trust that you will continue to wear pumps which are unhealthy, and those white kid knee-boots, which are not altogether proper. They look nice, at any rate, no matter what the moral reformers may say of them—nasty wretches!

Incidentally some low fellow suggested the other day that if boots kept getting longer and longer and skirts shorter and shorter, ladies would finally be going about in waders and a frill around the neck. That's just exactly what he said—the optimist!

## GIVE YOUR FEET A PICNIC, TOO

GIVE THEM REST, coolness and ease in Outing Footwear such as Kilgour's Regal Shoe Store makes a specialty of. Don't spoil the day with aching feet. Before you go on that picnic, outing or vacation trip, don't fail to drop in here—see our neat and varied line of Outing Footwear for ladies or gentlemen.

legs than a pair of poor crippled props like ours. He also said that his feet weren't more than half the size of ours and were twice as handsome.

Well, you know, friend reader, there is only one way to settle a dispute of this sort, and that is to make a showing. When a couple of men start raising one another like that, there is nothing to do but lay down one's hand—or foot, as the case may be.

In about two minutes we were both prancing around that office in our bare feet, shouting and gesticulating like a couple of banana-cart men in a collision. All we needed were a few rings on our toes and jewelled anklets to make us resemble a pair of classical dancers. With gauze trousers and a frill or two, we would have passed for a section of the Russian Ballet.

### Tall Boney Girl With Glasses

Right in the midst of it Alf's stenographer came in—a tall, bony girl with glasses. Alf's wife picks his lady typists, so far as we can judge. This saves Alf a lot of trouble—a lot of trouble picking them, that is.

Well, when Alf's stenographer saw us both, she gave a

# With the Shoe Manufacturers

Pithy Note and Comment on Shoe Matters—What the Makers of Shoes are Saying and Doing—Shoe Facts and Fancies

**T**HE second wood heel attaching machine to be installed by the U. S. M. has just been placed in operation in the factory of Clark Bros. at St. Stephen. This machine eliminates danger of the heel becoming detached when being worn. The nails are driven in at an angle to the centre. Expansion nailing takes care of the different widths. This is a new machine, the first having been installed just recently in the Getty & Scott factory at Galt.

## The Vanity Heel is Attractive

Several Canadian shoe manufacturers have been shown the new Vanity heel which appears as a decided novelty and to be meeting with a large measure of appreciation. It will be seen on a number of late fall models and also on the new spring samples now nearing completion in most factories. The heel never played a more important or striking part in the appearance of a shoe than it does to-day, and the Vanity pedestal is among the most artistic in style and finish. It is a leather or combination heel with some sort of celluloid finish that gives it the smooth glossy effect of a wood heel. It also has a top plate and bottom plate of ivoryoid. This plate is as thin as a wafer. It may be bronze, blue, green or white or any other color. It makes a pencil stripe around the top and the bottom of the heel, the like of which has never been seen before. These heels cannot come off and scour and finish as easily as all leather. They are being put on the latest model women's and girls' shoes and are attracting much attention.

## Colored Heels to Match Tops

A number of manufacturers are having good results in the employment of concentrated colors to make their

heels match the various hues in leathers. A shoeman turning out a small range of shoes in, say, ten different shades of leather, can buy half a gallon or a gallon of white color and eight or ten small bottles of concentrated colors, in various shades. Then he can mix his own colors.

## Boot Famine Feared in Britain

A possible famine in leather for civilian boots, owing to the exceptionally heavy demands for our own Army and those of the Allies, is foreshadowed by the Shoe and Leather News of London, Eng., in its current issue. In setting out the Government's requirements during the next few months, this journal says:—

"The upper leather required is a serious matter—3,200,000 feet chrome sides for the field service boot, 18,000,000 feet of memel for the Cossack boot, 2,500,000 feet of russet kips for the Italian order. These boots must be delivered by September 30th next.

"Between September 30th and November 15th they will require a further 9,000,000 feet of upper leather for the Cossack. Also they require 7,000,000 feet for ankle boots for the British Army, these boots to be delivered between October 1st and December 30th.

"Sole leather is equally a serious proposition. First is required the necessary sole leather to bottom the boots just mentioned in regard to upper leather, and 1,000 tons of bends for shipment to Russia.

"The Government have come to the conclusion that there is not nearly enough upper leather being produced in this country. The Russian Government have given them an order, and are prepared to take up to 40,000,000 feet of

upper leather for shipment between now and the middle of November.

"These figures fairly put in the shade anything that has ever been heard of before for such a short delivery period. They mean that there may practically be no civilian leather available in a very short time, it being the Government's intention to put a 'toothcomb' through the market and take everything they can use, whether it is suitable or unsuitable."

#### The Statement Shows Surplus

The balance sheet of the Ames-Holden-McCready, Ltd., Montreal, dated April 30, at the time of the annual meeting in June, and now made public, shows accounts payable, \$532,306, bills payable \$264,981, a total of \$797,287, against cash on hand \$80,626 and accounts of bills receivable of \$906,773, a total of \$987,399. Bank loans, including a special loan of \$450,000 on the war contract stand at \$2,046,000, while the stock on hand is carried at \$2,406,642. Bonds outstanding are \$914,000, preferred and common stock \$6,000,000 and surplus \$9,038, making total liabilities \$9,766,327 against \$8,535,216 two years ago. As the report was not made public a year ago the figures as of date April 30, 1915, are not available for comparison.

The profit and loss account showed net profit of \$321,791, leaving a surplus for the year of \$52,861 after bond interest, depreciation of \$54,709 and \$45,982 applied to bad debts and reserve. The balance forward of \$30,885 brought the total at credit of profit and loss account to \$83,746, and from this \$74,707 was applied to provide for losses applicable to 1914-15 and previous years, leaving a surplus to carry on of \$9,038.

#### Is the Leather Supply Nearly Ended

Leading English and American shoe trade publications have made an analysis of the demand for leather created by the war in Europe and have estimated the approximate

amount required for the army shoes, saddlery and harness and other military equipment for the estimated fifty million men now in arms in Europe.

These shoe and leather publications are in substantial agreement that the number of cattle hides required to satisfy this demand for leather will be approximately sixty million hides per year.

To this unheard-of demand for leather for military purposes of the warring nations of Europe must be added the extra demand created by neutral nations making more or less military preparations for national defense.

These estimates do not take into account the regular commercial and civilian demand for normal purposes, and when it is considered that it is estimated there are not over five hundred million head of cattle in the entire world, it is apparent that at the present rate of using up leather, all that there is in sight would last but a very short time, even if the hide bearing animals were killed for their hides alone.

Under these circumstances the suggestion that lines of shoes be planned so as to consume the leather that is available seems somewhat inadequate. The chronic condition appears to be that as soon as a demand appears for any particular kind of leather there is an immediate shortage.

No doubt the shoe trade will continue to use all the leather that is available, but the condition of the supply and demand in the leather market, points clearly to the necessity that large volumes of shoes must be made of other materials in the very near future, and it would seem as if those who pioneer in making shoes from materials other than leather will have the advantage of the early start. That such materials are now available is well known. It is a question of educating the trade and the public to lay aside their prejudices.

Shoes made from fabrics and other materials besides leather will have one important advantage, and that is in

the matter of price. Leather shoes must continually advance in price without any increase in quality. The quality of the other shoes is apt to improve and be reliable. With leather shoes high and of poor quality, and with shoes made from other materials cheaper, more durable and more comfortable, prejudice will be swept aside, especially as the substitute materials are improved to be better adapted to shoemaking operations and to take on better finishing effects and appearance,—Superintendent and Foreman.

### Are Fabrics Coming in to Stay

The day of fabrics is at hand if one can judge the variety and quality of cloths being incorporated in the best grade of shoes. In finish, feel, appearance and texture certain fabrics now very closely resemble leather. A retail dealer who was shown a certain new brand of fabric the other day declared he did not want any white kid shoes. They were too costly for his trade and he was afraid he could not clean up on them. His astonishment was rather great when he was informed that the sample was not white leather, but a white fabric at one-third the price of white leather, and he immediately placed an order for some of the shoes. If a fabric can be woven so fine and smooth as to be mistaken for white kid, there might be a possibility that the surface might be so treated as to make it resemble some of the other popular leathers. There have been previous attempts to make fabrics resemble leather, with pretty fair success so far as looks went, but it was done by the application of some kind of a coating which would wear off and crack and peel, which made it entirely unsuitable for use in shoes.

In the case of the fabric referred to, however, there would be no such trouble, for it is the fabric itself that looks like leather, and not an outside coating of some other material. It appears that there might be some method of embossing this fabric to obtain the characteristic finish of other kinds of leather than kid, and that the adhesive backing cloth with which this fabric is always reinforced would have a tendency to make that finish permanent, so that shoes made of the fabric so finished would always look like leather shoes, while they could be made much cheaper, more uniform, and more durable.

In regard to adhesive backing cloth, in using it to reinforce light leather, it is necessary to smooth out any wrinkles there may be in the leather, in order that they may not become permanent and disfigure our shoes. If this is true of an undesirable condition like a wrinkle, why should it not have the same result in a condition which we wish to make permanent?

### What Fancy Colors Impose on All

Colored shoes have been in vogue now for a good many years, but there never was a time in the history of the trade when the colors were so variegated. Heretofore it was generally a tan shoe that was worn in the colored upper, but to-day every shade is seen, and especially in women's, says an exchange.

An upper that has been quite popular and which is being cut now to a large extent is the so-called pearl-grey kid. In some shops they are running quite a lot of it, and had quite a run of it for the past several months. Of course, this is not the only color on which they had a long run, as many other shades were made, some of which were put in the whole shoe and some of which were merely cut for the top.

With all the different colors that are being worn to-day in women's it would seem that the latter are using less and less common sense in the matter of footwear, but whether or not, it is a fact that the shoemakers of Canada have had a very difficult time in getting out all these different shoes, and especially in the better lines. It is a well-known fact that a colored shoe requires a lot of extra work, not only in the cutting department, but in every department.

In the cutting department they have to be extra watchful with colored stock, as it has to be sorted both for color and weight, and sorted several times in some cases. The colors will vary to a great extent in a bunch of skins which are supposed to be the same, and not only will a bunch of skins vary, but a single skin will vary in its colors. This makes it all the more difficult to cut these shoes, as they have to be uniform in all respects in color, weight and everything else.

All this colored stock that has been cut so much the past year or so has helped to carry up the cost of shoes beyond normal. The stock itself naturally costs more, and it costs more to make the shoes right through in every department. They are shoes, too, that very few manufacturers would care to carry ahead in stock, although here and there a manufacturer will carry ahead a few on a certain line. It may be safe enough to make stock shoes with black uppers, but when it comes to this fancy stuff no factory can do it very well, as there is likely to be a change at any moment. The only safe thing to do is to make the shoes on order, and that is just what is being done by a majority of shops.

### The Canvas Insoles in McKays

The canvas insole is still being cut to quite an extent for McKay shoes, and it seems to be cut to more of an extent in the women's shops than in the men's. This insole can be cut on the beam dinker just the same as the leather insole, and when cut on that machine, with a die, it makes a nice clean-cut edge.

The canvas insole has been used some time now, and for certain shoes it seems to be very satisfactory. It is a very flexible insole to put onto a McKay shoe, and it is greatly improved in some of the factories where they add a thickness of felt to it, which makes it all the better. This felt comes next the foot and it allows the McKay stitch to sink into the sole much better.

Felt is used in all classes of cushion insoles, but when felt is worked in connection with a canvas insole in a McKay shoe it is not put in expressly to make a cushion, but still

it has some effect along that line. It makes the whole inside softer to the foot, and if a good, smooth sock lining is used on top of the felt, which is generally the case in a good quality McKay, the whole inside is extra smooth and in good condition to give the best satisfaction.

#### The General Situation Over the Border

A steady business is still noted in white shoes in the retail stores. Grey and champagne pumps are now being put on the bargain tables at prices considerably below the original cost of the shoe in many cities. Business in the wholesale houses is now between seasons, and consists principally of filling in lots of white canvas goods and tennis pumps, says "Shoe Topics."

In the opinion of the writer the heels of boots have not been given much attention up to this season, but now they hold quite an important place and will surely get more attention from now on.

The imitation wood heels look good in most cases, especially those with the aluminum and ivory plates. The enamel-baked aluminum heels are satisfactory, also the black celluloid heels, but these do not come in colors, much to the regret of many manufacturers.

Salesmen are now in for samples and preparations are being made for an early season. Specialty plants are getting their men out to book early orders as most of this class of stock is made up to order. Samples of the specialty as well as of the staple lines are all out.

Clearing sales are appearing with dealers but mostly on odds and ends. There seems to be more of a disposition to hold out for regular prices on staple stock than usual with leather prices strong.

Men's oxfords have sold well so that some of the large stores have only a few lots of odds and ends left over for their markdown sales. The markdown is not as great this year as in other years. This shows at least that the retailers realize the value of stock in hand and are not going to sacrifice staples to any extent.

#### A Live Wire in Organization

E. A. Schryburt, of Ottawa, is an organizing genius, although only 21 years of age. He recently got together the shoe repair men of the capital city and formed an association which started off with a large membership and bright prospects. Mr. Schryburt is secretary and treasurer of the organization and certainly will leave no stone unturned to ensure its welfare and usefulness. As a result of the effective but short campaign carried on by Mr. Schryburt, prices were advanced 15 per cent. and the Ottawa Shoemakers' Association have had very few complaints from the public. Mr. Schryburt, who is a native of the Capital, entered the shoe trade with his father eight years ago, and has always worked with him. He has taken a great deal of interest in shoe machinery, and does all the repair work in the Capital for the Landis Machinery Co. The splendid organization, which has been formed in Ottawa, among the shoe repair men, shows what can be accomplished through unity and co-operation.

#### Last Extensions to Sizes and Widths

One day a shoe manufacturer went into a retail shoe store to buy a pair of shoes. He had been trading in this particular store for several years because he found a particular make of shoe there for his own wear that was to his liking. The manufacturer and the retailer were not personally acquainted, and neither had ever had any business dealings with each other. The retailer did not know that his customer was a manufacturer, and the manufacturer in turn, had usually purchased his shoes of one of the clerks.

On the occasion referred to, however, the manufacturer was buying a pair of shoes of the proprietor, the size desired being 11, 4 wide. After trying on the shoes, the manufac-

turer thought they felt a trifle short at the toe, and then the following conversation took place:

Manufacturer. "If you could give me size 11½, 3 wide, I would get substantially the same measurements and gain a little in length."

Dealer. "The size 11½, 3 wide, would be just a half-size longer than size 11, 4 wide."

Manufacturer. "Oh, no, 11½, 3 wide, would probably be a quarter size longer than 11, 4 wide, because the 4 wide probably has a quarter size extension over the 3 wide."

Dealer. "What do you mean by extension?"

Manufacturer. "I mean that in the grading of lasts the standard size on the wider width is usually extended in length so as to enable the carrying of the style effect with the fuller measurement and give a more graceful appearance to the wider shoe. Also, for the reason that the wider the foot, the more it will extend in length, as well as in width,

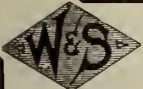

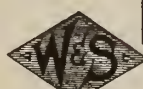

when the weight of the body is thrown upon it. This means that 3 wide usually will be about a quarter size longer than 2 wide; four wide will be a quarter size longer than 3 wide; five wide will be a quarter size longer than 4 wide. Thus, 6 wide will be a full size longer than 2 wide, in cases where the quarter size extension rule applies."

Dealer. "I have been retailing shoes practically all my life and I never heard of such a thing as last extension before."

Manufacturer. "I have been making shoes for a number of years. I have bought many thousand dollars' worth of lasts and whenever I place a new order for lasts one of the first questions the last salesman will ask me after deciding upon a new model is what the extension will be between the different widths. Sometimes the same rule is not followed on all styles of lasts. In some cases there is an extension of a half-size in length between one width and

another, while in other cases the extension is an eighth, but these are extremes. The quarter size extension is a very common rule and I am quite confident that if you could give me size 11½, 3 wide, instead of size 11, 4 wide, I would have a shoe one-quarter size longer with practically the same measurements throughout."

Dealer: "This is certainly news to me. Any way should not this knowledge be an advantage in fitting."

Manufacturer. "It certainly would be if used for that purpose. It is a common practice of retail shoe salesmen to work sizes and widths in the effort to make a sale from a short stock, but if they would work the sizes and widths in combination with the extension idea for the more perfect fitting of the feet of customers, they would be doing a really good thing both for the customer and their employer."

The writer wonders how many shoe dealers there are who, like the one quoted in the above dialogue, have never heard of the matter of last extension, or who do not understand the relation of last extensions to sizes and widths and the increased facilities they offer under the quarter size extension rule, for the better fitting of the feet of their customers, obtaining in this way gradations of quarter sizes in length accompanied with various combinations of size and width measurement.

One cannot always determine the extension by measuring a single pair of shoes on the size stick. It is quite possible that there may be enough difference in the curve of the heel seam, or the lasting and inseaming at the toe, or the trimming of the edge at the toe, so that the quarter-size difference between two shoes of the same size and different widths may not be conspicuously apparent, but if several pairs of the same size, but of different widths are measured, difference enough will be noted to indicate that the extension is there.

## HIS HOBBY IS SELLING SHOES

By W. G. C.

**T**HE Morrison family is a fairly large one. Numerically, it stands on almost equal terms of frequency in the telephone book and the city directory with the Jones and the Murphys. Bearers of this ancient and honorable Scottish patronymic have been famous in all

JOHN R. MORRISON,  
LONDON, ONT.

the walks and the motor drives of life. There have been rich Morrisons and poor Morrisons—possibly. I say possibly advisedly, because the fact is not probable; all the Morrisons I ever knew had the characteristic old Scotian propensity to acquire wealth, or else they had it thrust on them in the form of bequests. Anyhow they always seemed to be on friendly terms with money. Be this as it may, the Morrison clan has had and still has and likely will continue

to have worthy representatives in every department of life, which brings us right up to our subject, Mr. John R. Morrison, of London, Ont., the first vice-president of the Retail Shoe Dealers' Association of that city.

A school teacher once complained to Johnny's mother about Johnny's standing in class; she said he was always at the foot. Whereat Johnny's mother retorted that it didn't matter anyway, as Johnny was going into the shoe business when he grew up.

This must not be construed as reflecting on the shoe business—not by several city blocks. But it only goes to show that young candidates for the shoe trade get their training very early in life. So it was with John R. He was born into the shoe business and took his schooling on the side as it were.

After scraping something more than a bowing acquaintance with the three R's in the public schools, he attended the high school and left off in that exciting part of the course where a celebrated Italian named Mr. Caesar was about to mix things up with the Helvetians. That was, say, twenty-two years ago.

About that interesting part of life therefore when young John R. was batting out flies on corner lots and parting his hair in the middle, his father started the Morrison Shoe

Co. in London. This meant that John had to quit the junior league and help his parent put up a sizable batting average in the major league selling shoes. At that he was some Ty Cobb. He got busy; so did the store, and from this state there has been no change. The store has a list of customers—clientele they call it in stores that do an auto trade—among the solid artisan class and farming community, that might well be the envy of any merchant. John R. must have been something of a hustler in the early days, for besides attending to his job in the daytime, he hustled around the store in the evenings and on Saturday afternoons, for there was no Retail Merchants' Association in those days to regulate selling hours.

After a while he grew tired handling leather and went over to a woollen house where he kept books for fourteen or fifteen years. But, aside from this lapse, and it must be admitted it is a serious one, he has stuck consistently to shoes. Ever since he helped his father sell his first bill of goods he has been a passive shoe man even when he hasn't been active on the job.

Ask John R. if he has any hobbies and he looks at you and smiles. His hobby is really selling shoes, and as the Scotsman would say, he does that to peer-fection. How do I know? I watched him. But selling shoes is not his only recreation. In between times he bowls—on the lawn—with the Thistles. And though he has never reached the responsibility of a skip the chances are that he can draw a saving one right to the "kitty" when the other rink is lying shot. Bowling, alternating with motor trips to Toronto and Port Huron, form a safety valve through which the worries of storekeeping and chasing fluctuating leather prices up and down the market column can escape.

John Morrison's middle initial is R., which stands for Reliable. If it had been S it would have stood for System. For in the Morrison store is a method of keeping track of the three floors of stock—boots, shoes, rubbers, suitcases, grips, trunks and surplus quantities—which, while simple enough, is the last word in effectiveness. Perhaps that's why it's so effective; it's simple. The same system covers sales, too, so that any moment the number of sales made during a given time or the amount of stock on hand can be ascertained. This shows that J. R. didn't lose any time when he was in the woollen business. In other words the National Cash Register has nothing on him.

**T**HIS is a smartly trimmed window of "Fleetfoot" outing shoes recently installed by the Regina Trading Co. of Regina, Sask. The special display attracted a good deal of attention, excellent taste and artistic ability being shown in the neat arrangement and setting.

# HOW LEADING SHOE MANAGER "GOT THERE"

**"The Mere Squirt of a Shoe Salesman" Was Not Afraid to Say No and Put Things Squarely Up to the Management—Had Ability to Know When He was in Wrong and Admit the Error—Make Good in Spite of the Anvil Brigade—Get Out of the Rut**

**T**HE real reason for my getting my present job, as near as I can figure it, is the fact that I admitted that I had made a mistake," said the manager of one of the big shoe departments in a Western city.

"I started selling shoes in a town of about 20,000 people. I flatter myself that I was a pretty hard worker. I suppose I might have said, when you asked me how I got the job, that hard work did it, but I don't believe I would have been telling the whole truth.

"When I applied to the department store owner he gave me a frank talk. He told me their shoe buyer was getting old and that they needed new blood in the department. They wanted a man who could train up as assistant to the buyer. The buyer, so the merchant said, had been with them for years and would continue with them as long as he lived and cared to hold the job. What they wanted was a live man to train with him.

## Salesmen in a Rut

"When I asked what was the matter with some of the salesmen already in the department the merchant told me the men were in a rut, and warned me that I must not fall into the same tactics of 'doing just what I was paid to do.'

"I accepted his statements at their face value and took the job. Incidentally, I might have taken the job anyhow, because it offered more money, and, as I said before, I had a strong suspicion that our store was going to be sold out.

"When I went to work two weeks later the Anvil Chorus rang loud and clear. After the ice was broken and I had gotten acquainted with the other salesmen in the department they began to tell me what a bunch of old skinflints the management of that store was. 'You got the same line of bull that we did, didn't you?' chirped up the man who apparently was the leader of the Knoekers' Club. 'Going to be trained up as assistant to the buyer?'

"I merely laughed but made no reply, but I made up my mind, from what I saw around, that if these men were not getting a chance at the assistant buyership it was largely because they were not willing to work for it. I made it a point to keep out of departmental cliques; and the easiest way to do that was, of course, to keep busy.

"Now, no one who has ever worked in a shoe store," he continued, "will question the statement that there is work enough to keep shoe salesmen out of mischief. When you are not selling goods you can be checking up stock, seeing what lines are short and doing the dozen and one things that ought to be done, but often are neglected.

"At the end of the first year I had made a pretty good record on sales; so I went direct to the store's owner and struck for a raise. He told me frankly that he couldn't afford it. I asked him what my sales had been. He gave me the figures frankly. Let us say that they were \$15,000. Of course, I knew myself about what the totals were, and his statements merely confirmed my own estimates.

"Now," I said to the merchant, 'suppose I were to sell \$18,000 worth of shoes this year, wouldn't I be worth an extra percentage in that case?' He admitted that if I could increase my sales to that figure they certainly could afford to pay me more money. So we agreed that if I sold shoes to the extent of the volume named I was to get a cash bonus of a certain amount. Of course, I had to make the full \$18,000 or not get a cent extra.

"Then I reminded the merchant of his statement that I was to be trained up as assistant manager. 'If I am going

to be assistant,' I said, 'don't you think it is time I was initiated into the mysteries of the job higher up?' I got an instant admission as to the justice of this, and from that time on when the buyer had any purchases to make I always accompanied him.

"Well, my bonus plan worked out all right, but there were certainly times during the year when I got the cold shivers, fearing that I would just miss the figure set and, after all the hard work, fail to get the extra money at the end of the year. It was a good thing for me, but if I had known as much at the beginning as I did at the end I probably would have made my bonus suggestion on a percentage basis and not on a fixed amount of sales.

## Opposed Manufacturer's Plan

"It was while acting in a sort of advisory capacity to the buyer that I got the opportunity which finally led to my present job. One of the big wholesale shoe houses wanted us to make a change in the way we were handling their shoes. We had been doing business with the house for years, and, of course, we had confidence in their judgment. The proposition, however, did not seem right to me. When the buyer asked me about it I opposed it. I hadn't been at the early conferences at which this proposition was taken up, but when the final show-down came the buyer called me to come along.

"We went to the hotel and met the salesmen, and the proposition, after a preliminary talk, was brought up. The buyer turned to me with a question as to my opinion, and I told him I thought the plan was entirely wrong.

"Well, sir, you should have seen that salesman go up in the air. He certainly did reach the ceiling with the fireworks. 'The idea of a young squirt of a shoe salesman being allowed to dictate store policy!' This was his line of talk, and he warmed up to his subject as he went along. I stuck to my guns, however, and the plan did not go through. Neither did it go through the next season.

## Big Enough to Admit Error

"In the meantime I had been doing a great deal of thinking. Here was a big manufacturing concern, in touch with retail concerns all over the country. Season after season they put the plan up to us and told of its success in other territories. After all, my experience was limited, and I finally figured out that I, probably, was wrong. So when the manufacturer's salesman again put up the proposition I said that I believed we had better try out the plan, and gave my reason for changing my mind. The plan worked out successfully, and the matter, so far as the salesman and I were concerned, was never referred to again.

"But evidently he had not forgotten it, for when the management of this store wanted a buyer that salesman who had referred to me a 'mere squirt of a shoe salesman' promptly sent in my name.

"There is no need to go into details as to negotiations. You can see for yourself that I got the job. I spoke to the salesman some time later, and he admitted that he had told the house that, in his opinion, a man who had the nerve to first oppose a plan that he considered bad and then had the courage to admit his mistake ought to be able to hold down a manager's job in any store satisfactorily.

"So if you want to know how I got my present job, I would say that it was: First, because I was not afraid to take my propositions to the management; and second, the ability to know when I was wrong, and admit my error."

## THEY LANDED NUMEROUS MARINE MONSTERS

Messrs. Gagnon and Marois Had a Whale of a Time Catching Cod on the High Sea and Salmon in the Quiet Pool—The Former Was Pulled Out of Boat but Rescued Just in Time—The Race Grows Exciting and Who's Going to Get Pennant

**O**H the pleasure of going to the high sea to fish for cod. Imagine the infinite delight when you land nine of them, one weighing 59½ pounds, and all within a few hours.

And then, the joys of angling for salmon the next day in a famous pool, when 13 are captured, each tipping the beam from 29 to 45 pounds, anything of less weight being thrown back into the water.

The mantle of champion fisherman in the shoe and leather arena has suddenly fallen from the shoulders of Mr. Hugh White, of the White Shoe Co., Toronto, who recently scored the high water-mark in fishing achievement back among the Laurentians several miles from Quebec. Mr. White must be given full credit for his remarkable per-

ONE OF THE MEDIUM SIZE COD FISH THAT THEY CAPTURED

formance and, it was thought by the trade, that his splendid record would stand for some time.

What a hollow evanescent thing is honor. At best, it is only a fleeting mockery.

The story of the Toronto jobber's angling achievement has now been eclipsed to such an extent that it seems a mortal shame to furnish readers of the *SHOE AND LEATHER JOURNAL* with an accurate account of what two ardent admirers of Izaak Walton, one hailing from Montreal and the other from Quebec, pulled off a few days ago. If you would learn the plain unvarnished truth read again the opening paragraphs of this concise contribution to the angling history of the Dominion.

### Some Speed and Some Sport

Narcisse Gagnon, proprietor of Aird & Son, the widely known shoe manufacturing establishment in the commercial metropolis, and A. E. Marois, proprietor of Tourigny & Marois, the mammoth shoe plant of Quebec, motored down to Matane seventy miles below Rimouski a few days ago on a cod and salmon fishing expedition. As one may judge from the modest illustration on this page they did not bother their heads about catching such a small insignificant looking fish as they recently saw in the *SHOE AND LEATHER JOURNAL*, typifying one of the speckled beauties corralled by Mr. White. They not only made a prodigious catch but came back with such tanned countenances and hard

sun burn that even their most intimate friends scarcely recognized them.

Mr. Gagnon has a pretty lively time of it down by the sounding sea meeting exactly a hundred and ninety-five

NARCISSE GAGNON, MONTREAL, CHAMPION FISHERMAN OF THE SHOE AND LEATHER TRADE.

cousins not to speak of uncles and aunts and he had so many stories to tell that the time flew around all too quickly. Recently he bought a beautiful eight cylinder Cadillac car and was anxious to give it a good trial. In company with Mr. Marois he left Quebec at three o'clock one afternoon and landed at Riviere du Loup, 120 miles below the Ancient

A. E. MAROIS OF QUEBEC, ASSOCIATE CHAMPION ANGLER OF THE TRADE

Capital, at 6.45 the same afternoon, which was a pretty speedy run.

The next morning they started out at 9 o'clock and reached Rimouski at 11.50 a.m., and from there they jour-

neyed at high velocity to Matane. There they had the pleasure of going to the high sea for cod fishing, followed by a visit the next day to a salmon pool. One of the salmon was so large that it pulled Narcisse out of the boat and, had it not been for the guide securing a strangle hold on him, he might have gone down forever. As it was, he did not get wet any further up than the neck. Narcisse grew so fond of the water at the sea shore that he had to bring some home with him in case he should get dry on his way back to Montreal. He reached his factory safely, the fish following by special car.

#### Going Into Promotion Line

These two prominent shoe manufacturers, Messrs. Marois and Gagnon, while on a fishing expedition also had a big business proposition in view. It is rumored they have obtained options on certain islands in the St. Lawrence below Quebec. They are forming a company and shares will soon be placed on the market and offered to leading jobbers in the larger cities. On these fertile lands with their splendid grazing surfaces, it is the intention to raise goats and sheep for the use of their skins in the shoe trade. Tanneries may also be established and thus, to a certain extent, the present pronounced shortage in the supply of leather will be eliminated.

It may be stated that Mr. Gagnon is happy in his undisputed and newly-found angling honor. His hand grasp is heartier than ever, his smile more alluring and his demeanor as modest as can humanly be expected under the auspicious circumstances. For one man to land a fifty-nine and a half pound cod, and salmon weighing up to forty-five pound is a deed not to be classed with the tame and monotonous pastime of merely getting one hundred and fifty speckled trout. The latter showing does not rank in the same class, grade or quality. Mr. Marois is naturally proud of the ability and performance of his friend Narcisse, and pleased to have been his aide and associate on this outstanding occasion.

The accomplishment of these two gentlemen will surely stand for some time as the long distance record for fishing. If there are any other shoe or leather exponents who feel that they can outrival it—why "come on Macduff."

The summer season is growing short and the SHOE AND LEATHER JOURNAL would like to hear from several other contestants before making its final award of the pennant for the greatest fishing feat of the year 1916. Every angler in the footwear arena should get a hustle on. "Gentlemen, the time is brief."

#### BUDGET OF NEWS FROM QUEBEC

Cleo. Lachance, of Lachance & Tanguay, was in Boston on a business trip.

Wilbrod Blais, tanner, of this city, has added a new storey to his building.

E. Tremblay, shoe manufacturer, Quebec, was in Montreal recently on a business trip.

The Wm. A. Marsh Co. have installed one Reece finishing and one Reece corder machine.

J. Walter May, of the Wm. A. Marsh Co. was recently on a business trip to the United States.

Shoe manufacturers in Quebec are all busy with jobbers' samples, and are also working hard to complete their orders.

Lucien Borne, kid manufacturer, has installed a new 60 h.p. engine, which will greatly increase the capacity of the plant.

The following visitors were in the city recently:— P. A. Matton, shoe dealer, Sorel, P.Q.; J. A. Bignell, of Bignell & Knox, Montreal; A. Tetrault, of The Home Shoe,

Montreal; J. N. Ault, of A. W. Ault & Co., Ottawa; August Bowman, of John Lawrie & Sons, Chicago.

The first and last dividend in the matter of the Rock Shoe Co. Ltd. will be paid on August 22. The receipts of the stock, machinery, etc., amount to \$59,984.90, disbursement, \$54,792.66. The privilege reclamations amount to \$41,163.59 and the other reclamations amount to \$105,541.56. The creditors will receive 39c on the dollar.

The stock of Alf. Rainville, shoe dealer, of Levis, was recently sold in the office of Lefavre & Gagnon. The stock was valued at \$4,519.32 and the store fixtures at \$168.90, and were disposed of to Nazaire Fortier at 65½c on the dollar. A cash register, valued at \$700, was sold to Messrs. Blackwell & Landry of Montreal for \$225.

#### HAS SEVERED LONG ASSOCIATION

A. L. Johnson, who for the past year and a half has been general salesmanager and one of the vice-presidents of Ames-Holden-McCready, Limited, Montreal, has retired

A. L. JOHNSON, MONTREAL

from that position and it is understood that he will shortly become associated with another enterprise. Mr. Johnson is widely known to the shoe trade from coast to coast. Thirty-five years ago he landed in Winnipeg, when the flourishing Prairie capital was little more than a hamlet. He is one of the pioneer veterans of the west. In 1886, Mr. Johnson became associated with Ames-Holden Co., and was the first shoe traveller to visit Edmonton, where he went before any railroad was in operation. For twelve years he covered Manitoba, Saskatchewan and Alberta, and on retiring from the road was promoted to the management of the Winnipeg branch of the Ames-Holden Co. On the amalgamation of that concern with the James McCready Co. in 1911, he was continued in the position until February, 1915, when he came to Montreal to assume the duties of general salesmanager of the Company, from which position he has just retired. Much of the large business done by the Ames-Holden-McCready in the west is due to the foresight, energy and early work of Mr. Johnson.

R. E. Dildine has succeeded Mr. Johnson as general salesmanager of Ames-Holden-McCready. He has had charge of the advertising of the firm for some time and will still supervise the publicity department.

# AMONG THE SHOE MEN.

W. E. Wing, sales manager of the Kaufman Rubber Co., Berlin, was in Toronto last week, calling on the trade.

J. A. McLaren, of McLaren & Dallas, Toronto, spent a few days in Montreal last week on business.

J. R. Roach, for ten years with the U.S.M., has joined the selling staff of John McIntyre, Limited, Montreal.

The La Prairie Heel & Counter Co., Montreal, was recently registered.

Jos. Weizel, shoes and clothing, St. John, N.B., has been succeeded by J. Weizel & Co.

Frank Rivers, shoe repairer, was burned out during the recent serious fire at Blind River.

J. V. Budd, shoe retailer, of Toronto, recently made an assignment.

The assets of Louis Auger, shoe retailer, of Sherbrooke, Que., were sold on August 11.

Jos. Pine, quality man at Ames-Holden-McCready factory No. 2, Montreal, has resigned.

George Chambers, manager of the Regal Shoe Store, Toronto, is spending his holidays at Jackson's Point, Ont.

Alex. Inrig of the Lady Belle Shoe Co., Berlin, was in Toronto recently and reports that his firm are rushed with orders and are working to fullest capacity.

A. Lecours, of the Canadian Footwear Co., Pointe Aux Trembles, has returned from spending a holiday at Old Orchard.

J. C. Sherin, of Lakefield, Ont., was in Toronto recently calling upon the members of the shoe trade.

The employees of the Slater Shoe Co., Montreal, held their annual picnic at Lavaltrie on August 12. The event was greatly enjoyed.

E. P. Mullarkey, for several years superintendent of Wm. A. Marsh Co., Quebec, is now superintendent of the James Muir Co., Montreal.

Walter Burnill, vice-president of the Toronto Shoe Retailers' Association, and family, have been holidaying at Jackson's Point, Ont.

G. J. Scott, who represents P. Jacobi, shoe store supplies, Toronto, in Western Canada, left for the prairie provinces last week on an extended selling trip.

S. H. Bryant of the staff of Coates, Burns and Wanless, London, Ont., spent a few days recently in Toronto on a visit to his brother, J. C. Bryant. He was accompanied by his wife and family.

Alf. Winn has been appointed representative for Toronto and Eastern Ontario for Coates, Burns & Wanless, wholesale shoes, London, and has opened a sample room in the Yonge Street Arcade.

W. T. Purvis, of the W. B. Hamilton Shoe Co., Toronto, who underwent an operation a few weeks ago for appendicitis, is once more attending to his duties, and is being congratulated on his complete recovery.

Harry Dallas, of Toronto, was in Montreal and Quebec recently on a business trip and calling upon the trade.

O. M. Brooks has completed a most successful selling and installing trip on behalf of the U. S. M. Goodyear shoe repairing department. He went through to the Pacific Coast.

Donnell, Carman and Mudge, Inc., have bought the business of A. F. Clapp & Co., sheep skin tanners, Boston, Mass. Mr. Donnell spent a few days in Toronto last week with Ed. R. Lewis, leather merchant, who will continue to

act as Canadian representative of the firm for whom he has worked up a large trade.

A. B. Harris, of Deloraine, Man., has purchased the shoe stock of P. J. Hickey, 174 Hunter St., Peterboro, Ont., who recently made an assignment. The stock was sold at 63½ cents on the inventory value.

Edward Cook, secretary of the Toronto Shoe Retailers' Association, returned last week after a holiday motor tour through New York State. He was accompanied by Mrs. Cook.

J. Stebelsburg's shoe store at Tenth Avenue and Granville Street, Vancouver, was visited by burglars on Saturday night, the thieves getting away with about \$45 worth of shoes, leather and other goods.

Dufresne & Galipeau, widely known as Montreal jobbers, are now manufacturing a staple line of peg shoes. Dave Lemay, formerly with the Farmers' Shoe Co., is superintendent.

J. L. Chisholm, manager of the Invictus Boot Shop, Toronto, and Morley Chisholm, manager for A. Chisholm, West Toronto, have returned after spending an enjoyable holiday, camping at Bobcaygeon.

Among the recent visitors calling on the shoe trade in Montreal, were J. S. Townsend of Hamilton, R. B. Griffith, Hamilton; C. A. Davies, of Blachford, Davies Co., Toronto, and R. H. Greene, of Gutta Percha & Rubber, Limited, Toronto.

Ten-day sales were held, beginning Saturday, August 12, at the main store of the McCall Shoe Co. Ltd., 666 Queen St. W., Toronto, and also at the three branch stores of the company. These stores are now in the hands of G. W. Groves & Co., merchandise brokers.

The Canadian Shoe Findings Novelty Co., 2 Trinity Square, Toronto, extend a hearty invitation to all out-of-town shoe retailers to visit them during the progress of the Canadian National Exhibition, Aug. 26-Sept. 11. They have in stock a complete line of fall novelties, buckles, laces and polishes.

A general meeting of the Vancouver Shoemakers' Association was held recently at 625 Pender Street west, at which the president, Mr. George H. Morris, filled the chair. After the usual business some interesting discussions took place. At the close of the meeting twenty-six new members were enrolled.

C. F. Veitch, who is in charge of the footwear department of the Toronto warehouse of the Canadian Consolidated Rubber Co., is able to attend to his duties again after several months illness. Mr. Veitch has greatly improved and his many friends in the trade are pleased to see him again at his desk.

F. W. Wadsworth, secretary-treasurer of L. H. Packard & Co., Limited, who died recently, was with that company for over thirty years. He had been ill for over a year. His son, Gordon F. Wadsworth, has been western traveler for the same company for a quarter of a century. J. W. Strike succeeds Mr. Wadsworth as secretary-treasurer.

J. G. Watson, shoe retailer, of Montreal, was unable, owing to ill health, to attend the annual meeting of the Dominion Board of the Retail Merchants' Association of Canada, held recently in Winnipeg. It was the first time in the life of the organization that Mr. Watson was not able to be present, and a resolution of regret was sent by the

delegates. It was moved by C. A. Maybee, of Moose Jaw, past president of the Saskatchewan Provincial Association.

A pretty wedding took place recently in St. Saviour's Church, Waterloo, Ont., when Vera Sterling, second daughter of Dr. and Mrs. W. J. Sterling, Waterloo, was wedded to Milton Detweiler, Lieutenant in the 118th Overseas Battalion, son of D. B. Detweiler, vice-president of the G. V. Oherholtzer Co., shoe manufacturers of Berlin, Ont.

A. W. Donovan, president of the E. T. Wright Co., Inc., of Rockland, Mass., spent a day or two last week in the Canadian factory in St. Thomas, Ont., with his brother, E. E. Donovan, the manager. He reports the shoe manufacturing business as booming in the United States as well as in Canada. The only drawback is the scarcity of leather, due to the war shutting off supplies, principally from Russia.

A leading Winnipeg jobber remarked recently that he did not expect to see any decline in prices till six or nine months after the close of the war. Shipments from eastern factories are coming forward in good volume to jobbers who made early purchases, but late buyers are having difficulty in obtaining supplies for fall and winter requirements. Collections continue very satisfactory.

The shoe repair men of Oshawa, Ont., like those in all other towns, have been having a hard time lately trying to keep their prices down in view of the soaring cost of leather. They have decided that they cannot stick to the old prices as the value of the leather has advanced and they must raise their prices accordingly. The repairers had a notice inserted in the Oshawa newspapers advising the public of an increase in the figures for all lines of work.

Fred A. Todd, of the Canadian Consolidated Rubber Co., Montreal, has been elected vice-president of the Montreal branch of the Canadian Credit Men's Association. N. R. Feltes, of Ames-Holden-McCready Limited, and D. S. Benvie, of James Robinson, who is a past president, have been elected on the board of governors of the Association for the coming year.

H. W. Parsons, of the Nugget Polish Co., Toronto, has returned after attending the Calgary and Edmonton fairs, where the firm had splendid exhibits. Mr. Parsons leaves this week for Sherbrooke, Quebec, and Halifax, where he will have charge of the Nugget displays. John Harris, manager of the company, and L. R. Howard will supervise the usual attractive booths at Toronto and Ottawa expositions, while F. B. Bollard will visit the Western Fair at London, where the company have taken space.

Considerable damage was done, mostly by water, when fire broke out in C. S. Hyman Co.'s tannery, London, Ont., recently. Smoke in large quantities was being emitted from the fourth storey of the building when the firemen arrived. The blaze started in the loft, where hundreds of sides of leather were being dried. The building is heated by steam and the temperature of necessity is kept high. The fire was confined to the top storey of the building, this floor being enveloped in smoke when the firemen arrived. The electric wires had become disconnected and the work of the brigade was doubly difficult because of the darkness.

Styles of shoes, especially for women, will be of the "common stock variety, instead of the excessive high-top kind" next season, according to statements of manufacturers made recently in Chicago at the convention of the Illinois Shoe Dealers' Association. The colors will be dull grays and champagne, due to the shortage in dyestuffs. The prediction was also made that there would be an increase of from 20 to 40 per cent. in the price of shoes the coming winter, on account of the war, which has shut off the supply of dyestuffs and imported leather.

The Guardian of Charlottetown, P.E.I., in a recent issue, says: Mr. L. B. Hutchison, manager of the Kaufman Rubber Co. Ltd., Toronto, has been making a tour of the Eastern States and Maritime Provinces. Mr. Hutchison, better known as Hutch, spent a few days in Charlottetown.

Besides being interested in the matter of rubber footwear, he has also considerable investment in the Silver Fox industry of Prince Edward Island. This being his first visit to the Island, he was most anxious to see some fox farms, and after being shown through several of the largest ranches on the island, he expressed himself as entirely satisfied with his investment. Mr. Hutchison, after seeing parts of our island, was delighted with Charlottetown and the surrounding country. He was particularly pleased with the conditions of the roads in our province and spoke in most favorable terms with reference to the hotel accommodation. We hope to have an annual visit from Mr. Hutchison and the acquaintances that he made while in Charlottetown will surely give him a royal welcome when he comes again."

The annual picnic and excursion of the Maple Leaf factory of the Canadian Consolidated Rubber Co. was held last month to Grimsby Beach. The steamer Turbinia left Port Colborne, with a crowd of about six or seven hundred employees and their friends, and fine weather prevailed throughout the day. There were spirited races and games, for which valuable prizes were contributed by the company and officials, as well as the merchants of Port Dalhousie and St. Catharines. There was a lively tug of war between the English and Scotch which resulted in a win for the former, and the cutting and shoe room nine was successful in a baseball game against the rest of the factory. The Port Dalhousie band provided admirable music, and the various attractions at Grimsby were thoroughly appreciated. M. Lippert, superintendent of the factory, was chairman of the committee of arrangements; D. N. Boettger was chairman of the sports committee and A. H. Wellein, secretary.

Speakers at the convention of the Illinois shoe dealers uttered the prophecy that unless the world develops a substitute for leather within two years "the United States will be the next wooden shoe nation." What will happen should this vision be realized is told by The New York Sun as follows: "Make everybody wear wooden shoes and the porch climber would join the roc and dodo, or else the Y.M.C.A. The efficiency expert, able no longer to slip noiselessly about your business, would be more occupationless than Othello. The pussyfooter could annoy us no more with his sickening stealth. Men would come home earlier of nights, soberly clanking oak upon pine as they mounted the front steps. Clog dancing would be restored to its proper place in the arts. All the world would click a xylophonic tune. Mahogany shoes, made from old pianos, would take us out on Sunday. The ladies could have their number 3's enamelled in pink."

P. A. Doig, sales manager of the Star Shoe Co., Montreal, recently spent a few days in Toronto calling upon the trade. The new samples of the firm are more attractive and representative than ever. There is a fine showing in white canvas and sea island duck goods for spring, with high cut tops, in both bals and buttons. Made from the same materials, Mary Janes and Colonials with self bows and white and silver buckles are decidedly neat and tasty. Some of the high boots for misses and growing girls have scroll cut tops. White lines, for which it is expected there will be a strong demand next season, are turned out from babies to growing girls'. A new offering is a gem cushion welt with a patent innersole. These are made in all sizes from infants' to growing girls'. Two new lasts have been added this season, one being an orthopedic last and the other a coin shape toe for misses and growing girls. In the highest class models many are seen in both button and lace in box calf, glazed kid, chocolate and black, with white lamb facings. The company are also turning out a pleasing range for little gents with copper toes, while in glazed and chocolate kid there is witnessed Romeos with elastic goring and plain vamp or seam down the front. These appear to be taking well. All fantastic effects and showy combinations have been eschewed and in the staple lines and in quieter contrasts the showing is a comprehensive and inviting one.

Harry Lewis, manager for P. Jacobi, Toronto, has returned after spending a pleasant holiday at Lake of Bays.

Geo. E. Boulter, 3 Wellington street east, Toronto, has returned from spending his holidays in New York State.

F. R. MacMillan, head of the MacMillan Department Store, Saskatoon, was in Toronto recently, calling upon several members of the shoe trade.

A. J. Cook, shoe retailer, 2042 Queen street east, Toronto, has assigned to Charles Bonnick.

Walter Yates, city traveller for McLaren & Dallas, Toronto, has returned after spending his holidays at Janetville, Ont.

W. W. Veitch, of the Harvard Shoe Store, Winnipeg, was in Toronto, Montreal and other cities recently on a business trip.

Mr. McCallum of the traveling staff, Winnipeg branch of Ames-Holden-McCready Co., was in Toronto and Montreal lately on a visit.

Howard C. Blachford, president of the Toronto Shoe Retailers' Association, is spending a vacation at Mazengah Island, Lake Rosseau, Muskoka.

P. W. Day, formerly with S. B. Foote & Co., Montreal, has been appointed sales manager of the F. S. Carr Rubber Co. of Canada, and has entered upon his new duties.

J. Malouf, 357 Third avenue south, Saskatoon, has closed his shoemaking shop and taken a position as foreman of shop No. 1 of the Goodyear Shoe Repairers, of which F. A. Robinson is proprietor.

Harry McKean of Toronto, who, until the last season represented the Blachford Shoe Mfg. Co., Toronto, in the Maritime provinces, has rejoined the staff and will cover Toronto and northern Ontario for the firm.

Peter Richardson and wife, of Calgary, were in Toronto, Montreal, Quebec and other eastern shoe centres recently. Mr. Richardson has lately opened up a new store in Edmonton.

Harry Thompson of the Thompson Shoe Co., Montreal, spent a few days in Toronto recently. The Thompson Shoe Co. have just begun the manufacture of felt slippers at 36 St. Genevieve street, and are turning out 200 pairs a day in various styles.

The annual picnic of the employees of Chas. A. Ahrens, Limited, Berlin, Ont., was held at Riverside Park, Bridgeport, on August 5th. The event was a most successful and enjoyable one. It was largely attended by the men and the members of their families. A splendid program of sports

was run off and much enthusiasm was aroused in the different events, which numbered thirteen in all. The good things supplied at the refreshment end of the picnic were all that could be desired.

W. H. Jardine, who has been on the travelling staff of the Blachford Shoe Mfg. Co., Toronto, for some time, covering eastern Ontario, has taken an important position in the shoe branch of the mail order department of the Robt. Simpson Co., Limited, Toronto.

The Anglo-Canadian Leather Co., whose tanneries are at Bracebridge and Huntsville, have a very fine band at their plant in the latter town. A concert was recently given by the musicians at the Huntsville dock and a splendid program rendered.

Chas. Hagen will establish a new shoe store at 30 Queen street south, Berlin, Ont. He was identified with the shoe business for many years before his removal to the west. His new shop will embrace all the latest features and be equipped in first-class style. A wide range of high grade shoes will be carried.

S. A. Bell of Toronto, who for several years represented Geo. A. Slater, Limited, west of Port Arthur, has become identified with the Blachford Shoe Mfg. Co. of Toronto, and will cover eastern Ontario and the province of Quebec. Mr. Bell has a good record as a salesman and is widely known to the shoe trade.

#### CAPTURED FIRST PRIZE IN WINDOW DISPLAY

The accompanying attractive, neatly arranged window, was one that captured first prize for the province of Saskatchewan in the competition conducted by Geo. A. Slater, Limited, Montreal, during the Easter Season. The window was designed and decorated by R. C. A. Lawson, son of John T. Lawson, shoe merchant, 1847 Scarth street, Regina, Sask. The latter has been in the shoe business in the capital city of Saskatchewan for the past six years, and has met with a large measure of success. Some months ago his store was removed from 1723 to 1847 Scarth street, where he has attractive and well-laid out premises. Mr. Lawson has always been an ardent exponent of original and timely window displays, and attributes much of his trade to the efforts made in this direction. His son, R. C. A. Lawson, gives personal attention to all special trims during the course of the year.

*THE pulling power of beautifully dressed footwear windows.*

J. J. Connor, western representative for McLaren & Dallas, Toronto, left last week on an extended trip throughout the Prairie Provinces. E. J. Kew, sample room salesman of the same firm, is spending his holidays at Port Colborne, Ont.

The shoe stock of R. S. Thompson, Wallaceburg, Ont., who recently made an assignment, was sold a few days ago at Suckling & Co.'s, to Wm. Hockin, shoe retailer, of Wallaceburg. The stock amounted to \$3,342.00 and the price paid was 77½c. on the dollar.

F. G. Clarke, of Clarke & Clarke, leather manufacturers, Toronto, accompanied by his wife and son, Leighton, have gone on a trip to England. Mr. Clarke's elder son, Norman, who is a member of the 5th University Co. Princess Patricias, is engaged in active service in France.

S. T. Duclos, of Duclos & Payan, St. Hyacinthe, was elected alderman for ward two in that city a week ago to-day by a majority of 85, the largest ever obtained in that ward. It was a by-election caused by the resignation of Magloire Cote, who for the past six years has been the alderman for that ward, but has now resigned owing to ill-health.

S. Grimason, who is manager and buyer for the shoe department of R. H. Williams & Sons, Regina, Sask., was in Toronto and Montreal recently on a buying expedition. He reports business in the shoe line in the Capital city of Saskatchewan as being brisk, his department showing a very gratifying gain over that of last year.

Good progress is being made on the new buildings of the Unique Shoe Co. of Toronto, which are being erected in Simcoe, Ont. The foundation is completed and the brick work is under way. One structure for the making of black shoes will be 40x130 feet, while the other, which will specialize in white footwear, will be 50x60. Both edifices will be two storeys high and connected. J. W. Phillips, manager of the company, states that they expect to begin manufacturing in their new premises in Simcoe early in October and will have a capacity of 1,000 pairs a day.

Embracing many new features and the latest appointments, the new shoe store of Owens-Elmes, Limited, was opened for business at 89 Yonge street, Toronto, last week. C. L. Owens and J. T. Elmes were for many years con-

nected with the management of the Royal Shoe Store, Toronto, and in branching out for themselves, have secured agencies for many leading lines of footwear. The firm have one of the most attractive and artistic shops to be found anywhere and the formal opening was attended by a very large number of patrons. The store is 120 feet deep by 23 wide, the wall fixtures are of mahogany, the fitting chairs and settees, ornamental pillar lamps and stands are all of Belgian grey oak, trimmed with cane. The single shelf, uniform carton system prevails throughout, and the labels are in grey and white, with script trademark signature of the firm.

H. H. Lightford, who until recently was manager of J. M. Humphrey & Co.'s boot and shoe factory in St. John, N.B., has accepted a position with Sears, Roebuck Co., of Chicago, as travelling superintendent of eight of their largest districts. Mr. Lightford came to St. John about two years ago from the States and succeeded E. A. Reading as manager of Humphrey's factory. Since that time he has proven himself to be a competent manager, a good business man and a conscientious worker. While the company keenly regret his loss they willingly accepted his resignation in order that he might avail himself of such a golden opportunity of advancement. Prior to his departure for his new field of labor a few days ago his employes made him the recipient of a slight remembrance of the esteem in which he was held by them. Mr. Reading, who has been engaged with the Robert Taylor Co. of Halifax, N.S., has accepted an offer to return as manager for J. M. Humphrey & Co.

#### A WINNER IN MANY LINES

J. A. Connor, of Toronto, who is division manager for Ontario for the Canadian Consolidated Rubber Co., will soon have to build an extension to his home in order to

J. A. CONNOR, TORONTO

#### WANTED

SHOE TRAVELER, to handle line of women's fine shoes, exclusively. Only those having experience and ability to command large business need apply. Write stating qualifications and giving references to, Box 104, SHOE AND LEATHER JOURNAL, 13 Coristine Building, Montreal.

WANTED—By experienced traveler, with good connection, a line of men's or women's shoes as side line, on commission, for Western Ontario, including Toronto. Apply Box 4, SHOE AND LEATHER JOURNAL, 1229 Queen street west, Toronto.

SHOE TRAVELER—Eighteen years' experience, wants a line of women's or men's McKays and welts, to carry in eastern Ontario. Splendid connection and good salesman. Box 6, SHOE AND LEATHER JOURNAL, 1229 Queen street west, Toronto.

shelter the trophies that are coming his way. At the Canadian Whist Congress, held in Toronto in April last, Mr. Connor and Mr. W. J. Ashplant, of London, won the International pairs Championship, and each gentleman was presented with a handsome full jewelled gold watch, bearing the emblem of the league. Recently Mr. Connor was successful in capturing the Shea Challenge trophy, at the London Lawn Bowling Tournament, London, which city is his former home. As a permanent memento of that occasion, the Lawn Bowling Association presented Mr. Connor with a valuable silver mounted tea service, a picture of which is presented in this column. It shows the genial rubber man carrying off the silverware with becoming modesty and warm appreciation.

D. D. Hawthorne, of D. D. Hawthorne & Co., Toronto, is spending a few days in Boston and other New England points on a business and holiday trip.

S. Cleland, shoe retailer, 1162 Yonge St., Toronto, has considerably enlarged his store and made other improvements to his establishment.

Miss Maud Whittle, daughter of Robert Whittle, who is on the staff of Ames-Holden-McCready, Limited, Toronto, died a few days ago as the result of severe burns when a coal oil stove near which she was preparing breakfast exploded. The explosion ignited her dress and before she could extinguish the fire which broke out, her clothes were a mass of flames. She rushed down stairs and fell unconscious, and before many minutes, expired. Miss Whittle was twenty-five years old.

Miss K. F. Thornton of the staff of D. D. Hawthorne & Co., Toronto, is spending her holidays at Metapedia and other Quebec points.

Clayton S. Corson, sales manager of the Regal Shoe Co., Toronto, has returned from spending a few days in Boston, Mass.

R. H. Partridge, city traveler for Ames-Holden-McCready, Limited, Toronto, wife and family have returned after spending two weeks holidays in Kingston, Ont.

J. C. Budreo, shoe retailer, 1344 Queen Street W., Toronto, has returned after enjoying a couple of weeks at Stony Lake points.

Recently at their store at the corner of Notre Dame and Inspector Sts., Montreal, the board of directors of the Singer Fite-Rite Shoe Co. Limited met and declared a dividend of 9 p.c. Max Singer was re-elected president and managing director. The directors were a happy crowd, being well pleased with the results of a hard year. The total sales were in excess of \$125,000. The new year is being started with a \$40,000 stock, and contracts given for another \$100,000 at old prices. The Singer Fite-Rite Shoe Co. Limited have a branch at Panet and St. Catherine east, and intend opening new branches soon in Montreal.

Alfred Hand, of Ames-Holden-McCready, Toronto, and wife have returned after spending a few days holidays in Buffalo and other points.

At the recent Grand Lodge meeting of the Independent Order of Odd Fellows for Ontario held in Chatham, Ont., S. C. Parks, shoe retailer, of Yonge Street, Toronto, who has ably filled the office of deputy Grand Master for the past year, was elected Grand Master, and is now receiving the congratulations of many friends on his elevation to the exalted position. W. J. Bartlett, of Brampton, another shoeman, who is a member of Golden Star Lodge, No. 101, was appointed Grand Herald; E. C. Garbutt, who is in the shoe business in Picton, Ont., was re-elected Grand Treasurer of the Grand Encampment of Ontario; Fred Evanson, shoe retailer, of Prescott, who was one of the representatives from the Grand Lodge of Ontario to the Sovereign Grand Lodge and attended the session last year in San Francisco, was also among the delegates to the recent Grand Lodge meeting in Chatham. Several other members of the shoe and leather trade were also at the recent session.

The majority of retailers are now holding August clearing sales of left-over summer footwear in which oxfords and white goods are being featured. The trade during the past season has been exceptionally strong in sporting shoes of all kinds and the factories and wholesalers have been unable to supply the demand. Shoe merchants are looking forward to an active fall business and to a particularly good school children's trade. Wholesalers report that collections are very fair and that sorting is keeping up remarkably well for August. A large aggregation of visitors from Ontario and western points are expected to come to Toronto during Exhibition week, August 26 to Sept 11th. The wholesalers are making extensive preparations for the merchants from outside towns and villages and will have many snaps to offer

in various lines. The number of retailers visiting Toronto every year during Exhibition is growing larger. They all take advantage of the occasion to pay their respects to the Fair and do considerable buying.

W. F. Smith, of the travelling staff of Ames-Holden-McCready, Limited, Toronto, has returned after spending his holidays at Muskoka Points and F. W. Knibbs, also a member of the travelling force, is back from a pleasant vacation at Atlantic City.

#### WHEN YOU HAVE AN ENCLOSURE

"I wish you would draw attention to one fault that many retailers have," said a member of a shoe findings house, the other day, "we very frequently receive out-of-town orders for polishes, laces, brushes, rubber heels, in-soles, tap soles, etc., with the request that they be sent over to another wholesale house to be forwarded as an enclosure. Now the great fault lies with the man who gives such an order, that he does not notify the person or firm to whom we are to send the goods, that there is an enclosure coming. The latter, not being aware of another parcel arriving, often forwards the goods before our reaches his establishment, and then we are blamed by the dealer for neglect of duty, oversight, etc. If all persons ordering an enclosure of goods to be sent to another firm, would notify the latter, they would know what to expect, and there would be less trouble and misunderstanding, not to speak of delay and disappointment. When a shoe dealer wants a parcel sent from one wholesale house to another to go out with certain goods, either by freight or express, he should notify the management of the house to which the enclosure is to be sent, and they would then know what to expect."

#### ELIMINATE STAPLE LINES FROM SALES

The Retail Merchants' Association of Massachusetts recently passed the following resolution, which speaks for itself:

"Whereas, the continued and rapid advance in the prices of all footwear purchased by shoe retailers on account of the increase in the price of leather and other merchandise used in shoes, and believing that the increased cost of leather will not diminish for some time to come and realizing that shoes now on our shelves are worth more now than they were when ordered, and if conditions continue, will be worth considerably more in the future, and whereas, it has been the custom of many customers to put off buying their footwear until the sales start,

"We believe that it is wise and important on the part of shoe merchants of the state of Massachusetts and throughout the country generally, to adopt a different policy this year, and start their mark-down sale a month later, eliminating, as far as possible, staple and standard lines of shoes from their sales and confining them to fancy and novelty footwear only, whereby the retailer can get full profit on shoes sold."

#### WELL PLEASED WITH JOURNAL

Enclosed you will find my subscription for another year. I am well pleased with the information which I receive by being a constant reader of your valuable paper. It is bright, newsy and instructive.

Yours respectfully,

Madoc, Ont.

A. KINCAID.

# Lace Shoe Logic

You can't make any mistake in purchasing lace shoes at this time.

They have always been the most reliable staple and now they are the style, too, so they have everything to commend them.

Lace shoes mean quick fit, quick sales — no come-back for free repairs.

This is now more than ever a factor, for high cut boots never did look well when buttoned and every additional button is a problem in fitting. High cut laced shoes, on the contrary, are easy to fit; they look well. Laces form an adjustable fastening; they automatically meet and satisfy the many conditions in fitting which, in the case of buttons, require time, expert attention and repeated expense.

Lace shoes are not shelf warmers. They are in demand now; they will be even more so next season.

You know your trade, but if you have any doubts as to what to buy, lean towards lace shoes; it is the logical thing to do.

## Placing Season Now Here

*Don't make the mistake of  
underestimating the demand for*

## Speed King Sporting and Vacation Shoes

The season just closing has certainly set a new high record for output in our factories. And, even at that, some merchants who were over-cautious in their placing orders were understocked during the busiest days of the season.

Speed King Sporting and Vacation Shoes are no speculation—they have come to stay and you'll see the demand get bigger and bigger every summer, for no shoe is so easy and dressy for outing wear.

# AERO-PEDS

## AIR-TREADS

*Patents Pending in Canada, Great Britain and U.S.A.*

### What! and Why! Are Aero-Peds?

**A**ERO-PEDS is a cushion formed to place inside the shoe at the heel, and is composed of a series of resilient air cells, each cell provided with its individual air vent. In conjunction these cells contain two cubic inches of air when inflated and form a pneumatic cushion that absorbs the shock or jar felt when walking.

Aero-Peds, in their function, ventilate and force a circulation of air around the foot and throughout the shoe when walking.

The weight of the body on the feet when walking alternates from heel to ball. This pressure, coming in contact with Aero-Peds at the heel, causes the air cells to expel the air they contain. Two cubic inches of air are consequently forced from the boot at the top and eyelet holes. In its reflex action the pressure of weight being transferred to the ball allows Aero-Peds to expand; a vacuum being formed of an equal amount of fresh air drawn into the boot from the same openings.

Aero-Peds ventilate the shoe, lessen perspiration and form a pneumatic cushion that completely absorbs the shock and jar when walking.

Aero-Peds will be extensively advertised to the consumer in the best publicity mediums of the country. Dealers will consult their own interest and that of their customers by preparing to satisfy the demand that will be created.

Order a sample dozen from your jobber.

Aero-Peds are distributed by

# UNLOCKED PROCESS

## *A Big Improvement In Shoemaking*

Shoes made by this process fit 40 per cent. more feet than any other make of shoe on the market, because they are Unlocked and find the actual contour of the feet. The ball-bearing lasts follow the bottom shape of the human foot. Upper and sole patterns are sprung and cut under a new method, giving the arch a springy, flexible support that does not pull away from the foot when the heel leaves the ground.

A Natty "BELL" Style  
Unlocked Process

## Foot Troubles Vanish

in the majority of cases when Unlocked Process shoes are worn. This can be demonstrated right in your store and on the feet of your most skeptical customer. Ease and comfort will convince conclusively.

Our Unlocked Process Shoes are made in a big variety of modest new styles.

## OPENING OF FALL BUSINESS

**Plenty of Money Circulating—People Have the Mind to Spend  
—Footwear Commanding a Front Position—General Conditions  
More Normal in Materials—Labor Situation Still Acute**

SEPTEMBER is supposed to be the first month of the fall season in retailing, although it often is very little different from August in the character of its attendant weather. The vacation season is over and the schools re-open, which means that the summer shoe is largely superseded by more substantial foot coverings and children have to be reshod to meet the requirements of the wear and tear of playground and schoolroom.

Indications point to a good business for the current month. Dealers say that shoe trade is opening well. It is claimed by most shoe handlers that the past summer has been the most active in their line in nearly a generation. Now that autumn is on, in name at least, there is a little uncertainty noticeable as to the purchase of styles that have prevailed during the past spring and summer. In the larger cities and towns, nevertheless, there is apparently no cessation as yet of the demand for white and colored footwear in leather, although canvas goods have disappeared largely from the spotlight in both men's and women's.

Manufacturers who have been out with spring samples report a steadier feeling amongst the retail trade generally. There has been a noticeable subsidence of the eagerness and even feverishness that has characterized the buying for some months past. Both on sorting and placing orders there is a tendency to go slow and more particularly with the latter. Those who expected a rush have been disappointed and although there is a tendency on the part of large buyers to fully anticipate these requirements there has so far been no appreciable tendency towards overbuying. Retailers seem to be weighing carefully not only the trend of prices but the style movement and are not as inclined as earlier in the year to gamble on foot fashions. The high shoe of moderate proportions seems to be taken for granted and with the exception of a few innovations as to buckles, buttons and such like adornment there will be no marked departure from the favorite styles of 1916.

Notwithstanding the hide market is more listless and inactive than for some months past leather men are standing pat. The steady demand for prime stock at home and abroad is keeping supplies well cleaned up and as they are based on the high prices already paid for hides and skins there is no reason, tanners say, why they should materially alter when hide prices drop half a cent. It looks as though at present the war was going to be maintained in unusual activity throughout the winter which means that the pressure upon leather and shoe supplies of all kinds is going to be even greater in the next six months than ever.

The immediate future does not, therefore, hold out any hope of any mitigation of the severe conditions under which the shoe and leather trades have been working for nearly a year.

# SHOE PRICES GO HIGHER THAN EVER FOR SPRING

**The Figure for Leather and Scarcity of Help Complicate the Situation—Manufacturers to be on Safe Side are Accepting Orders Only on Such Lines as They are Fully Covered—Numerous Complaints Heard from Retailers Over the Excessive Cost**

**“H**OW about prices?” is the absorbing question with retail shoemen in connection with the spring models which are now nearly completed by all Canadian firms and will be presented for the consideration of the trade during the next few weeks.

The scarcity of leather, particularly colored kid and calf, the uncertainty of sufficient supplies and the shortage in help have delayed the preparation and completion of samples to an abnormally late period. Prices will be fully ten per cent. higher on most lines than last season. Manufacturers do not guarantee prices for any length of time and changes in quotations are likely to take place over night. The majority of firms will only accept orders for what leather they have in hand. They cannot count on getting supplies of this and that kind of material the same as they could a year or two ago and, with each revision of figures, up go the costs. The majority of firms do not wish to be in the position of asking customers to reduce orders after they have been booked and travelers will accept business only on such stock and colors as their houses have in their possession. Last year owing to the uncertainty of everything connected with the shoe trade prices were elevated by some concerns three or four times. If the retailer has to pay from ninety cents to two dollars and even more per pair for the same line of men's and women's shoes, of equal quality, to what he had a year ago, he has the consolation that “misery likes company” and that all his competitors are in the same boat.

## Ever on the Upward Grade

“Look at these samples of tobacco brown and Havana brown calf,” said a leading leather salesman to a certain manufacturer the other day. Now these are men's weight and our price to-day is from forty-eight cents to fifty-three cents. A year ago we were selling the same lines at twenty-four and twenty-five cents. I then made the prediction to you that prices would be doubled for spring and you see that my forecast has come true. I want to make another prophecy and that is if the war continues another six months, the figure for these lines will touch seventy-five cents per foot.

Shoe manufacturers are informing their travelers that they took some orders at the increased cost last year on which the firms lost money. Some concerns who thought they were fully protected dropped as much as fifty cents a pair and they say that they do not intend to be caught in the same predicament this season. They believed they could get supplies from certain leather manufacturers who had always filled their contracts in the past without a murmur or delay of any kind but, when they asked for deliveries in order to make up goods for which their travelers had already booked business, they found that they were up against it. Leather contracts are not enforceable under any circumstances during the present upheaval and if tanners cannot get the raw stock how can they deliver the finished product? It is predicted by one manufacturer that dull kid will cost the shoemaker as much before the present season ends as colored kid did last year and another firm writes that they are now paying one dollar per foot for white and colored kid laid down at their door.

## The Public Will Have to Pay

There is no possibility of prices receding and even when faced with the fact, that if they delay ordering they will have to pay more, some retailers are not worrying. One man

remarked—“I have all the goods I want now and a large proportion of those that I have ordered have not been delivered. If they arrive I will be well covered for I placed very heavy orders last spring. I saw this thing coming and made preparations for it. When I have to buy again I will pay whatever figure is prevailing at the time. The public will have to whack up for it and that is all there is to it.”

Of course, there is a great deal of complaint heard from buyers regarding the unheard-of prices. They naturally want to see costs kept down, but the majority thoroughly understand the underlying conditions. They recognize that it is no more pleasure for the makers to raise prices than it is to boost them in the retail store. When a lady customer comes in and serenely asks why she has to pay two dollars more for a shoe of the same make and style than she did last year, it requires some tact and ability to satisfy or convince her. Otherwise she might be inclined to think that the retailer was trying to “put one over on her.” She imagines perhaps that the dealer is endeavoring to “do her.” The dealer in turn is apt to pass on the “compliment” and to be of the opinion that the manufacturer is trying to get the best of him. There is this difference, however, and that is the retailer from his wider acquaintance with conditions which prevail is predisposed to be more reasonable and to take a philosophic view of the question with his broader knowledge of the trade.

The day of the five dollar popular priced shoe is going and now comes the six, seven and eight dollar boot, of no better grade or material. “I am willing to pay the higher prices if I get good stock,” remarked a well-known buyer this week. “I do not want my goods made down to a price, for that means the stuff is not in them. Certain men may think they can gauge the cost of a shoe, but can they? In the ordinary shoe I am told by inserting inferior insoles, box toes, counters, lining and trimmings, equipment which for the most part does not show, there may be effected by the manufacturer a saving of from forty to sixty-five cents a pair and yet the shoe to all outward appearances will be as good as one which is honest and solid all through.

## Cannot Fill Orders on Books

There is not a shoe manufacturer in Canada to-day but who has orders for hundreds, yes, thousands, more pairs than he can turn out; first, because he cannot secure the help, and secondly, because he cannot get the leather. He is working along under very trying circumstances and doing the best he can to give deliveries, although there are many grievances. Scores of orders have had to be cancelled simply owing to the inability of the producers to meet the business on their books.

The same man believes there is no use in “grouching” about matters. Many of them know in their own retail business what they are up against in the matter of having to increase the salaries of sales people, and being unable to fill the places of those who have left for higher remuneration. If their employes number hundreds, as they do in many factories, how much more intensified is the help problem, particularly with one factory bidding against another for operatives in the different departments.

# PALATIAL NEW SHOE STORE OPENS ITS DOORS

The New Footwear Establishment of Owens-Elmes is Complete in Appointments and Superb in Arrangements—Fitting Furniture of Belgian Grey Oak and Mural Fixtures and Show Cases Are of Mahogany—High Grade Lines Will Be Handled

THE latest addition to the handsome array of shoe stores on Toronto's main retail artery, is the artistic, inviting establishment of Owens-Elmes, Limited, 89 Yonge St.

The opening of this palatial footwear home marks the launching out for themselves, of two young men, C. L. Owens and J. T. Elmes, both of whom were for a number of years associated with the Royal Shoe Co. as manager and assistant manager. Mr. Owens is one of the brightest young men in the footwear business, and has had a large experience in buying—his connection with the best recognized manufacturers having secured for his firm, the agency of the smartest, and most distinctive lines, in both women's and men's high-grade shoes.

The new store is 120 feet deep by 23 wide. The front portion, to the depth of 85 feet, is used for the men's and women's department, and separated by an ornamental

Inside these stands, on which rest potted plants, are shelves for laces, polishes, and other findings, that are in quick demand.

Directly at the entrance of the store, and also in a prominent position in front of the slipper department, are

THE IMPOSING AND IMPRESSIVE FRONT OF NEW SHOE FIRM IN TORONTO

mahogany archway is the cosy slipper department, and at the rear of this is the well-fitted up office of the company. The fixtures are of mahogany, being 7 feet 9 inches high, and above the shelving is a grey and blue frieze. The ornate ceiling is done in grey, and the carton labels are grey, with the name of the firm in white script letters, the effect being very pretty.

## The Pretty Decorative Plan

The fitting chairs, settees and foot stools are of Belgian grey oak, trimmed with cane, and of Jacobean design. Down the centre there are pedestal lamps of Belgian grey oak, trimmed with cane, and shadow cloth. There are also neat jardiniere stands of the same type of construction.

C. L. OWENS, TORONTO

large, complete mahogany showcases, with brass pedestals. On the left of the interior is a cheval plate glass mirror, and surrounding it are 35 small drawers set in mahogany frame work in which are kept hosiery and tailor-made gaiters. This arrangement is Mr. Owens' special design, being neat and compact. The flooring is of maple, and runners of a special weave are laid in front of the fitting chairs and

J. T. ELMES, TORONTO

settees. The entrance door is of oak with bronze kick plate, and the floor neatly tiled in blue and white, with the monogram "O.E."

The front is of the most modern type, with splendid showcase windows. The flooring is of oak, and the back-

ground and sides of Belgian grey. Surmounting the wooden portion of the background, there are fifty bevel casement windows. At the front there are three acorn frosted lights, with 11,500 watts in each. The interior artificial illumination is furnished by two rows of brass electroliers, the light being thrown over the fitting stools, so that every facility is afforded for the best service in this respect.

Over the ground floor windows there is a bay, display window, on the second floor. This is dressed at the same time as the main windows. Both the lower and upper

*Owens-Elmes*  
LIMITED

THE TRADE MARK OF THE FIRM

windows are protected from the rays of the sun by imposing awnings, of special design, the color tones being copper and white, with curtain of plain white.

Off the slipper room is a ladies' lavatory, fitted up with all modern accessories, and at the left is a shoe shine parlor, which, being very convenient, is at the same time quite private. The office at the rear is well equipped. The whole character of the interior, its quiet, chaste decorations, its beautiful color scheme, its display of foliage and flowers, subdued lighting effect, and unique modern fixtures make the Owens-Elmes Shoe Store one of the smartest and best. Only the highest grade boots are handled, prices ranging from \$5 to \$25, and the business done so far has exceeded the most sanguine expectations.

It is the intention of Owens-Elmes to develop a large mail order connection and a fine beginning has been made in this direction. While price cards are used on a number of lines of footwear shown in the windows, it is noticeable that the tickets are very small and neat—quite different from the usual type. All shoes are shown in pairs with very few in the window.

The house also invite their patrons to come in and have their shoes shined with the compliments of the firm. Many other features will be embraced in the appointments and service of the store in the near future.

#### PLAYING THE SHOE GAME WELL

It is no easy matter to build up and hold a retail shoe business. Competition is keen, expenses are high and profits are none too big. Yet there are department managers who make it go, year in and year out. Their success is attributable to a number of things: shrewd buying, skillful merchandising, live advertising ideas, good management. The last-named includes the employment of ambitious, energetic, intelligent salesmen or saleswomen.

There is no general rule or description that covers the abilities of the best type of shoe salesmen. They vary greatly. But there are everyday instances that point out wherein merit consists.

There is a salesman in a shoe department in the Central West who has never actually lost a sale—that is, in the sense of failing to sell every customer who falls to his lot.

Yet, it sounds extravagant and improbable; but it is true. There is a great chess-player who has never lost a game. There are billiard players who have never lost a game. Read the history of indoor and outdoor sports if you are skeptical.

This salesman does not sell shoes exactly like a sports-

man plays, but his idea is the same—to keep up the average by selling two every time he loses one. His sales do not mount up vastly in volume, but they make money for the store.

Here is an instance of how he works:

Early last spring a regular customer came in for some lightweight shoes. It fell to the salesman in question to wait on her. He could not find a shoe in stock to fit her. She wanted a fancy lace shoe for street wear. He asked her for her telephone number and her address, telling her he would be glad to let her know the moment the kind of shoe she wanted arrived at the store.

It never arrived—at least, not exactly the shoe she wanted—and, anyway, she supplied herself elsewhere, as she had to have the shoes at once.

The average salesman would have forgotten the matter. Not this one. He is not average.

When the summer stocks were full and it was time to push out shoes, the salesman consulted a little notebook, vest pocket size. He turned to J and read a notation: "Likes a lightweight, short vamp, medium heel. Walks much and plays golf. Size 5-B."

One afternoon when business was slack the salesman called up Mrs. J—. He had no difficulty in re-establishing the incident in her mind, and he described briefly some new lots that were just being unpacked. He described the last, leather and design, and ended with the assurance that there was a full line of sizes, including "5-B, short vamp."

The customer not only took the 'phone call in the spirit in which it was intended, but she was impressed with the store's courtesy and thorough-going service. She called the next day and bought three pairs of shoes. The store is still even on this salesman's work. He lost one sale last spring and made three two months later. If there is more than one big lesson in this, well and good. But there is one anyway. Does it apply in your shop?

#### THE SELF-SERVICE SYSTEM

Variations of the cafeteria idea are springing up all over the country, says the Boot and Shoe Recorder. A development of the self-service plan is illustrated in this store. Price is frankly the sole attraction; the customer makes his selection and fits himself. Selling expense is reduced to a minimum, while there can be no come-back on complaints.

One company may operate several of these stores in a city. Floor area is reduced to a minimum, and where it is impracticable to keep stock in sight, a push button signal arrangement will have the size and kind desired delivered down a slide direct to the customer from the stock room above.

# ANALYZING A STORE'S COST OF DOING BUSINESS

What the Gross Profit Should Be—Various Other Items Considered in Well Regulated Store—How Different Appropriations Should Be Made—Women's Shoes Because of Greater Buying and Stock Problem Should Yield More Than Men's Lines

Gentlemen:—What should the percentage of profit be in a store doing \$40,000, with expenses as follows:

Rent.....	\$1,020.00	Incidentals, Est.....	\$ 500.00
Light and Power.....	240.00	Clerk Hire.....	3,176.00
Heat.....	180.00	Office Hire.....	780.00
Advertising.....	250.00	Salary of Head.....	2,400.00
Insurance.....	185.00		
Telephone.....	51.00		\$8,782.00

Kindly criticise any department where the expense is excessive.

What per cent on sales should be paid as salary, when each clerk does a portion of the stock keeping, and general store works.

An early reply will be of interest and assistance.

**B**ASED on the general theory that a retailer is entitled to at least 8 per cent net on his volume of business, a 30 per cent gross profit would yield that return in addition to the fairly substantial salary included in the expense account. Your total expense is \$8,782.00, which figures 21.9 per cent. Therefore, a gross profit of 30 per cent, or \$12,000, would leave an earning margin of 8.1 per cent, or \$3,218.

## Average Gross Profit Should Be 30 P. C.

To realize 30 per cent gross profit, you should add 43 per cent to the cost of your goods. It would be impractical, however, to establish this as an arbitrary rule for all departments. A shoe costing \$2.85 usually retails at \$4.00. This yields a margin of \$1.15, or nearly 29 per cent. To earn a literal 30 per cent profit on this shoe you should sell it at \$4.07, which seems to be an impractical selling price for footwear.

On the other hand, a shoe costing \$3.30 should retail at \$5.00. This trade yields a gross profit of \$1.70, or 34 per cent. Thus, the margin would vary on each particular line, but the average or total gross profit, on the total volume, should be at least 30 per cent.

Your gross profit, by departments, would probably show a similar variation. Women's shoes, because of the greater buying and stock problem, should yield a higher margin than the men's lines. The figures below show what might be an average condition on a \$40,000 volume.

Department	Sales	Gross Profit	Per Cent
Men's.....	\$15,000	\$4,200	28
Women's.....	15,000	4,800	32
Children's.....	5,000	1,500	30
Miscellaneous.....	5,000	1,500	30
<b>Total.....</b>	<b>\$40,000</b>	<b>\$12,000</b>	<b>—</b>

You have an exceptionally well regulated expense account. You are spending a little more in the combined labor and salary account than the average store, but you are able to do that because of some unusually low expense items in other departments. Your rent figures are considerably under the average, even for cities of your size. We hope you have a good long lease at your present figure.

You are a little conservative on advertising, and can well afford to increase this appropriation to one per cent. Advertising of the right sort creates volume, and a greater volume would give you a still greater area over which to spread your expense. If you should spend \$500 in advertising this year, and thereby increase your sales \$5,000, you would have a \$45,000 volume and an expense of \$9,282. This, in percentage, would be 20.7, leaving an additional margin for net profit of over one per cent.

Two usual items are missing from your expense list—freight and express—which you may possibly add to the cost of your merchandise; also depreciation, which may be included in the miscellaneous item. If not handled as suggested, you should record them as "any other expense." Taxes should also be included, and you should depreciate your fixtures at 10 per cent of their value each year, if you are not already doing it.

## Some Overhead Items Omitted

It is difficult to separate the expense for straight selling and other store duties, such as stock handling, clerical work, etc. Your pay roll, outside of the salary item, is nearly \$4,000, or 10 per cent. The recent investigation of retail shoe store expenses by Harvard University showed that the percentage of expense for salesforce figures anywhere from 5 per cent to 10.3 per cent. A model group of stores showed 8 per cent and the most efficient group 7 per cent. Your figure is over this average, but you can afford to have it there, because in total amount your selling expense is under the average.

## Sales Expense Per Clerk

Conditions vary so much that it is impossible to determine a definite "quota" for each sales person. In cities there are examples of a single clerk selling as high as \$16,000, but \$10,000 is more nearly a fair average quota. If, in your own case, you employed four regular clerks. A selling \$12,000, B \$10,000, C \$8,000 and D \$6,000, with a \$4,000 margin for the extra men, a 9 per cent commission would pay A \$1,080, B \$900, C \$720 and D \$540. The extent and value of the extra work done by each would affect the amount he was worth to the store.

As a general rule, the straight commission system, except in the matter of ordinary "P. M's." in addition to fixed salaries, is a rather dangerous plan to adopt.—The Shoe Retailer.

# GET PEOPLE TO SHOP DURING QUIET PERIODS

**Shoe Merchant Should Point Out in Both Advertising and Store Cards How Much Better Patrons Can Be Served—Proper Fitting, Personal Attention, Wider Selection and Ample Time—Educate Your Patrons to Come in the Forenoon to do Buying**

ONE of the big problems in the retail shoe business to-day is that of getting trade to flow smoothly instead of in the spasmodic manner so common to most stores.

Go into the average shoe store of an evening that it is open or on a Saturday afternoon and you will generally find more customers on hand than can be properly handled. This means that many customers will not be properly fitted, not to mention the fact that many people will go away unsold. The unfortunate part is that such stores have many quiet periods during the week when customers are

conspicuous by their absence, but when purchasers could be given the highest class of service because the salesman would have plenty of time to devote to them—if they only could be induced to shop at such times.

To regulate the flow of customers so that the slack periods may be filled up and the usual rush periods toned down is something that most shoe men have wished for but very few have made any effort to attain, and this in the face of the fact that the advantages to the customer of shopping at times when the salesmen are not rushed gives the dealer a most forceful argument in a campaign towards this end. It is probably the fact that it would require time to educate people to shop at these favorable periods as well as a little work and money for publicity purposes that has deterred many otherwise aggressive business men from inaugurating a campaign towards this end, but the advantages, financial and otherwise, to be derived from a movement in this direction, are such as to make it well worth while.

## Advantages Are Self-Evident

As to the likelihood of educating people to shop in the mornings and at other desirable times, the advantages are so self-evident, that presented in an intelligent manner, and pounded away at sufficiently, they should certainly create many converts to the practice. The success that has been attained by many of our department stores in inducing people to shop at favorable hours should be a source of inspiration and encouragement to the shoe dealer, who probably more than any other class of retailer finds his biggest business crowded into short rush hours with long intervening periods of comparative quietude.

Of course, the large department stores in the big cities are better fitted to conduct such a campaign than the average shoe merchant because of the larger funds for publicity purposes at their disposal but quite a few of the smaller stores, especially in Western Canada, have done good work along this line by use of fairly small space in the local papers presenting the advantages in a crisp, intelligent manner. It requires some advertising to achieve the desired end, but as was pointed out before, it is worth it. The reduction in the cost of extra help to take care of trade during rush periods in many stores would soon pay for the cost of such a "shop during the quiet hours" campaign, while the general

publicity that such advertising would give to the store should also be borne in mind.

Show cards used in the store would be a valuable help in such a campaign, catching as they would, the attention of regular customers. For instance, suppose a customer is waiting to be served at a time when the store is full of customers and her eye falls on a show card pointing out the advantages of morning shopping, don't you think that she will be likely to resolve then and there to do her shoe buying henceforth in the morning. Signs in the window bearing such inscriptions as "Buy those shoes to-day when we have plenty of time to serve you," "Don't put off your shopping till a busy period" should catch the attention of and influence many people who are thinking of buying a pair of shoes and are giving your stock in the window the "once over."

## The Persuading of the People

The arguments that you should present to customers in such a campaign are simple—that it is advantageous to them to select their shoes at a time when the clerks can give them their best attention and when they themselves have plenty of time to make a careful selection. Arguments along the same line as those used by merchants in all lines of business to induce people to do their Christmas shopping early, can be used. An appeal to the public to help equalize the work of the store and thus avoid an overstrain on clerks at busy periods will be given consideration by many people.

There is no denying that there is much need of some educational work by shoe dealers to induce more customers to shop during the quiet periods and thus relieve the rush hours and a campaign toward such an end should be productive of good results.

Sample of ad that may be used to induce people to shop in the morning:

### SHOP WHEN YOU CAN BE BEST SERVED

We want to give our customers the best possible service.

We want them to have an opportunity of selecting the shoe that best pleases their fancy—we want to properly fit every person who buys shoes at our store.

### DURING THE MORNING

and early afternoon we are not rushed and you will find it an excellent time to do your shopping. Clerks have plenty of time at their disposal to show you our full range of lines and to fit you properly and you can take your time in making a selection. Buying in the morning is

### APPRECIATED BY THE CLERKS

because it relieves them of the tremendous strain under which they have to work when all the business of the day is crowded into a few hours.

# WORE SHOES OVER SUNDAY AND GOT MONEY BACK

The Way Some Customers Will Invent a Lie and Stick To It Through Thick and Thin in Order to Get Ahead of the Shoe Man—How Far Should Retailer Go in Refunding Purchase Price When He Knows that He is Being Imposed Upon

“WHO stepped on this box toe. It is a wonder the weight of the individual did not crush your foot? “No one stepped on my corns, sir.”

“Do you mean to tell me that toe got broken in this fashion without any one tramping on your shoe?”

“That is what I mean to say. The shoe is clearly at fault.”

“Why I can see the mark of the nails of the heel that came down on your boot.

“Excuse me, you cannot. That box toe must have been made of paste board to sink in like that.”

“Well, if you say that the shoe was not broken down through any fault of yours or by no one stepping on it, why I will accept your word. Here is an exchange slip. Go to that department and return the shoes,” declared the manager of the footwear section of a large department store in a leading Canadian city the other day.

## The Customer is Always Right

The manager knew that he was being imposed upon but since he assumed the position he has pinned his faith to high principles. Such is his credence in human nature as a general rule, that he has adopted the motto of “the customer being always right.”

The caller, a middle aged man, well dressed and rather stockily built, went over to the exchange counter and when he got there said that he wanted the money back. He had bought the shoes at a bargain table for three dollars and twenty-five cents. They were one of few pairs of gun metal bals left over from a regular five dollar line. He had secured a snap, worn the boots over Sunday, then deliberately disfigured them at the toe and had the audacity to demand his money back. This being refused, he again went to the manager of the department who pointed out in a polite manner that he thought the store was doing all that was required when it was willing to replace the pair he had brought back with a new pair.

“I cannot find anything here to suit me,” was the brazen response, “and I demand that you return the cash.” The attitude of the customer was both insistent and impudent.

The manager once more pointed out that he was willing to allow him to select another pair, but the caller demurred and defiantly said that he was going to get his money back or know the reason why.

## Got His Money by a Fluke

“Now see here,” declared B—the manager, “I have taken your word for it that the shoes were faulty but you certainly are not going to get a refund of three dollars and twenty-five cents. You have accomplished your object. You got these shoes on Friday, wore them on Saturday and Sunday and now return them to us. You are not content to accept another pair. The trouble is we are using you too well. You do not appreciate generous treatment and let me tell you plainly that we will not be imposed upon.”

“I’m going to get my money back and don’t you forget it,” vehemently asserted the purchaser. “Who is over your head here? Whom shall I see?”

The manager replied that Mr. W—and Mr. C—were the chief executives of the place and up another storey the caller went. By grossly misstating facts and misrepresenting affairs he induced one of the superiors to give him an order to get the purchase money. Not satisfied with his success he had to come down stairs again to the shoe

department and “rub it in,” so to speak, in order to let the manager know that he had won out. He smiled sarcastically and then pretended to one of the clerks that he wanted to buy a pair of shoes but, at the same time, he did not make a purchase. His action was only a bluff.

## They Delight in Deception

This incident brings up the question how far is a shoe manager justified in returning money to a class of persons such as the one referred to, for there are a few deliberately dishonest residents in every community who will lie about the length of time the shoes are worn, the conditions of purchase, usage, price, etc. They buy a pair of shoes for a special occasion and will either wantonly injure them or make up an excuse that they do not fit or have failed to give satisfaction.

Perhaps they have suddenly changed their mind or grown tired of the purchase, the last, the color of the leather, style of fastening, etc., and they expect the shoeman to refund the money. They will not accept a new pair in return. If they do not get the cash back they raise an awful hue and cry. They will not listen to reason, an offer of fair dealing or exchange, and threaten, if they do not have their way, that they will never trade at the store again. They will do a lot of knocking and never allow a member of their family to enter the place, will tell all their friends and relatives what an unscrupulous and unreliable shop you conduct and so on.

## The Ruses Some Customers Adopt

Many persons who seek to obtain their money will be content with having anything that goes wrong remedied, or will accept another pair in exchange or candidly admit that they have had a certain amount of wear out of the shoes. They are willing to allow a certain figure for the service given, but some are obstinate and selfish, browbeating and overbearing and will swear that black is white and vice versa in order to gain their end.

They will buy patent leather and no reputable shoe merchant will ever guarantee such leather from cracking, chipping or peeling. Retailers have notices displayed to that effect and even put slips in the carton telling the customer that under no circumstances can they warrant shiny leathers. Women and even men will come in later and demand their money back when the leather starts to craze. What is a shoeman running a family store going to do about it? Customers will have the nerve and effrontery to say that they never saw such an announcement and that the clerk told them they would wear all right. They want to know what kind of shoes the dealer is handling anyway when they go bad so soon.

The store that adopts the altruistic attitude or sublime idea that “the customer is always right” must expect to be deluded not a few times in the course of a year. Such a policy is too broad and considerate. It encourages fraud and deception.

“Why if I started to hand the money back to every one who bought a pair of shoes here I would very soon be looked upon as an easy mark” remarked one leading dealer. “I would be encouraging fickle-mindedness, artifice and misrepresentation—placing a premium on positive dishonesty in numerous cases,” he continued. “I endeavor to adjust all complaints on their merits and to see that each patron gets good value. Beyond this, I will not go.”

### A RUBBER FOOTWEAR MAN

(See Front Cover)

The presiding genius of one of the newest and most modernly equipped rubber shoe plants of Canada is Mr. R. F. Foote, of the Independent Rubber Co., Merritton, Ont.

Mr. Foote is a shoeman from start to finish and a rubber expert that knows his business from tree to finishing room. Although somewhat Yankeeized to a considerable extent by a considerable sojourn in the United States he is an Englishman by birth and a thorough Britisher in heart and life.

He has followed the rubber shoe business from early youth and has held important positions in some of the largest rubber plants on this continent. He took charge of the Maple Leaf Mill at Port Dalhousie when it was reorganized and when later the Independent Rubber Company was started he superintended its equipment with the result that this company has one of the most complete plants of the kind to be found anywhere.

Mr. Foote is noted for his geniality and the absolute absence of anything like self assertion, and his quiet, direct business style has won him many friends both inside the corporation he handles and without. "All wool and a yard wide" is how a man characterized him in a recent conversation when Mr. Foote's name came up. The JOURNAL joins his many friends in wishing R. F. continued success and prosperity for his company and good health and happiness to himself and his family, for he is a family man.

### HANDSOME NEW SHOE SHOP FOR MEN

The new men's footwear shop which is being opened by the Hartt Boot and Shoe Co., Limited, of Fredericton, N.B., at 467 St. Catherine street west, Montreal, in the block between Metcalfe and Peel streets, is being fitted up in splendid style. The manager of the store will be Ernest Hanlon, who has been in the employ of the Hartt Boot and Shoe Co. for many years. Practically all Mr. Hanlon's life has been spent in the shoe business. He is a most capable man,

ERNEST HANLON, FREDERICTON, N.B.

having had retail experience as well as a wide and comprehensive insight in the factory. Mr. Hanlon has been representing the Hartt Boot and Shoe Co. on the road for the past two or three years, his territory having been northern New Brunswick and a portion of Quebec province. He is being succeeded by J. B. Walker, who has been in the service of

the company for the past eight years and is a well-qualified shoeman. The new Hartt boot shop in Montreal, when completed, will be a thoroughly modern and up-to-date emporium for men's fine footwear. The company intend to sell only their own lines and will naturally cater to the highest class of trade—one in keeping with the established prestige and exceptional quality characteristic of all Hartt shoes. It is probable that the new shop will be opened some time during the latter part of this month.

### HAS BEEN GIVEN LARGER TERRITORY

L. B. Shafer, son of M. A. Shafer, president of the Moore-Shafer Shoe Co., Brockport, N.Y., who covers Canada in the interests of his firm, and is widely and favorably known among the trade, has just received a well merited promotion, being

L. B. SHAFER, BROCKPORT, N.Y.

appointed to look after Nebraska and Colorado, in addition to his present territory. The latter embraces parts of Iowa, Wyoming and Canada. Mr. Shafer will have two able assistants, so that no customers of his in the Dominion will be overlooked. Energetic, genial and capable, his many friends will congratulate him on climbing a notch higher in the scale of responsibility and service. Mr. Shafer has been on the road for five years.

### KEEPING SHOES ON THE MOVE

If I were a shoe dealer, writes a contributor to "System," I would show my shoes walking in my window. I would have a special device made that would lift a pair of dummy feet and set them down again. This might be operated electrically.

I would have a number of these devices placed on an endless chain in my window. A different style of shoe would go on each pair of feet. I would drop my window curtain to within a few inches of the shoe, and reaching from the lower edge of the curtain to the shoe tops, I would show the bottom part of trouser legs and skirts. A price tag might be attached.

Motion in a window almost always attracts attention. Passersby would stop and wonder who was walking all day long in my window. Meantime, they would see my shoes, and the prices.

# WHAT PRICE ARE YOU PUTTING ON SHOES NOW ?

**Stop to Consider If You Are Getting Replacement Values—Now is the Time to Reap Some Return if You Have a Stock Well Bought—Don't Sacrifice Standard Conservative Lines—They Are Worth the Money You Have Been Getting and More**

**H**ERE is a reading notice of a shoeman which appeared in a Western Ontario weekly:

"Great August Clearing Sale of all Lines of Footwear—White Goods, Outing Shoes, Oxfords, Pumps, Working Shoes, Walking Shoes, Dress Shoes, House Shoes, etc., 20% discount on all goods, fabric or leather. Buy now and stock up for the next year. Leather is going up all the while. You will save money by getting several pairs now."

Probably this retailer thought that he was making a catchy bid for extra trade, during the warm weather. If he really lived up to the statement of his seductively worded advertisement he would be losing money in disposing of standard or staple lines at 20% discount. If he were not offering the 20% discount, then he must be classed as a hot weather fabricator. What sense, rhyme, or reason is there in any retailer sacrificing stock, which may have been bought at the lower figures of the past, when such goods, owing to the recent rapid raise in prices, are to-day worth anywhere from 50 to 75% more than was originally paid.

This is his opportunity to "cash in" and make a little money. He should raise his prices accordingly, and if he is clearing out any salable lines, he certainly should take into consideration the replacing cost. Say that a dealer has a man's all-calf Bal, with receding toe on an English last, which he bought a year and a half ago for \$3.20, or perhaps \$3.40. To-day he cannot secure that same shoe for less than \$4.50, and, in many instances, it will perhaps contain side leather, and be inferior in its other component parts. Why should a dealer sell men's calf shoes, because he happens to have had them in stock, at \$5.00, when there is always a steady demand for them? He should by all means get \$6.00, or \$6.50, because he cannot replace them within a dollar or a dollar and a half of what he paid a few months ago.

## Don't Let Conceit Blind You

To clear them out at regular prices (not to speak of a discount) is simple folly. It is a short cut road to a loss, and puts one in mind of the old story of the negro, who was offered fifty cents for sawing a cord of wood. He was a big-feeling fellow, a dignified member of the colored race, and happening to see another coon passing, he proffered him seventy-five cents to saw the wood. The offer was accepted and the colored gentleman looked on while his unfortunate brother worked diligently.

After the pile had been converted into billets, some one approached the pretentious and proud Sambo with the inquiry:—"Where do you make any money on this transaction? You get fifty cents for sawing the wood, and then pay another fellow seventy-five cents for doing the job."

"Oh, Sah," was the happy response, "you forget dat it am with a quatah to be boss."

Perhaps by a parity of reasoning, the dealer who is holding a clearing sale of men's and women's shoes, or even selling them at regular prices, thinks that it is a great thing to have the name of selling good shoes cheap, but he will find out to his sorrow, that he is rather behind financially, through his benign practice. It would be just as short-sighted a policy for a shoe merchant, who happened to buy a home for, say \$5,000, and being offered \$6,000 for it, to think that he was making \$1,000 clear, if on the purchase of another

house, he had to give this profit away to the other chap, and a few hundreds more besides, for the same class of dwelling. He would be that far behind the game.

## Think of the Replacement Values

Leather shoes bought at present prices, providing they are the conservative type, are worth their value, and very much more, as a dealer will find out, when being called upon by the shoe salesman with spring samples. He will find that there has been another substantial raise and there is no telling where this will end.

The SHOE AND LEATHER JOURNAL has gone so extensively into the price problem in past issues, that it seems a matter of supererogation to repeat warnings, or give instruction. There is one thing to be said, and that is, the day of the five dollar calf leather shoe, in either men's or women's Goodyear welts, has passed. The war has brought with it many changes and it is doubtful if the popular five dollar line will ever again prevail.

The evolution of prices affords an interesting study. Fifteen years ago, \$3.50 was what the average man wanted to pay for a pair of shoes. Then the price went up to \$4.00, and of late years to \$5.00. And now \$6.00 obtains a very ordinary boot and will be looked upon in a few months as almost a bargain figure. To see shoes advance to seven, eight and nine dollars would not be surprising, in view of the shortage of labor, constantly increasing cost of leather, the scarcity of hides and skins, and the advances in all other materials that enter into the make up of a boot.

## Some Things to Think About

Many authorities who have devoted special research and brought mature judgment to bear upon this question, declare that the ten dollar shoe is coming fast. Mr. C. Henry Smyth, of St. John, N.B., who recently addressed the Rotary Club in that city, is a shoeman who has been thirty-five years in the game, and given it a great deal of close observation. In his remarks, published in the last issue of the SHOE AND LEATHER JOURNAL, he makes the following terse and pertinent statement:—

"Let me warn you that ten dollar shoes are coming and coming fast. The five dollar boot of last year is the six and the six and a half dollar one of to-day. Some lines of shoes that we bought this spring have advanced from twenty-five to thirty per cent. I notice a number of trade journals are advocating that the retailer should get a gross profit of forty per cent. Now this may seem a large margin except to some of you business men who are making from fifty to two hundred per cent. We must all admit that it is necessary to make a fair average profit if we are to satisfy the banks and meet our obligations fully and promptly. If a shoe costs five dollars, at forty per cent profit on the cost price it means retailing that pair at seven dollars. If the figure advances to six dollars it means to the merchant not alone the one dollar increase but forty per cent on that one dollar when a sale is made to the customer. This brings the selling figure up to eight dollars and forty cents. You can readily understand how soon some of the retail shoemen will be asking you ten dollars a pair. Why should

we not get it, particularly on ladies' styles. The fair sex will often pay this sum and frequently much more for a hat which will not even keep out a few drops of rain."

Another evolution of the trade is that, since colored kid and high cut shoes are in such vogue, women are to-day paying more for their shoes than men—whereas, up to a few months ago, the price of women's footwear was looked upon by the average purchaser as being considerably cheaper than men's shoes. In fact, \$4.00 or \$4.50 was counted a liberal figure for the ordinary woman to pay, and if she went as high as six, she was supposed to be getting the acme of fashion, the perfection of finish, and the daintiest of models. Now, \$6.00 will obtain for "My Ladye Faire" a very ordinary walking or button boot of conservative type, and all calf leather. But if she requires something with a few ornate touches, extra height, or two toned effect, she will pay for a welt, anywhere from \$7.00 up to \$15.00. In the cities, particularly, it is interesting to note that these prices are being paid by women (who are generally economical in their expenditure, and have not too much money to scatter)—without any complaint. They realize that the day of higher values is here, and if they are to be artistically and attractively shod, they have to pay practically double what they did before.

#### Cash in on Your Foresight

Of course, any shoeman who has novelty stuff or "perishable goods," should by all means clear them out. This applies very largely to women's and misses' lines, but on conservative, all-the-year-round sellers, he should be adding from 25 to 40% to what he has been asking in the past. He has a right to make money out of any fortunate purchase that he may have made, and if he does not "cash in" on present values, or get what the real estate man calls "the unearned increment" he is "penny-wise and pound-foolish."

Various merchants' associations have impressed upon the members the fact that the increased cost of leather will not likely diminish, and that shoes on the shelves are worth considerably more in the future, and therefore it is not wise or reasonable to clear them out at mark-down figures. It is all right to have a clearing sale of millinery foot toggery on the first few pairs of which the shrewd retailer has made a long profit, and can therefore afford to clean out the balance, even at cost. But on staple, conservative shoes—bread and butter earners—a different course must be followed. These must be considered in a class by themselves. They are like diamonds or government bonds—worth full value, and the man who has a stock of nice saleable goods on hand, is to be envied.

#### Has the Stock—Will Get Profit

The writer ran across one the other day. He is a far-seeing, calculating chap, who puts two and two together, and draws his own conclusions. "How much stock do you think I have here?" he remarked. "Oh, perhaps \$15,000 worth," replied a traveller. "Well, sir," he answered, "that is what I usually carry in normal times, but let me tell you, down cellar and in the store room at the back of my premises, I have nearly \$40,000 worth of footgear, and every line, with the exception of a few seasonable novelties, is worth to-day from 20 to 40% more than I can get corresponding values at the present time. But, believe me, I am not going to continue selling at present prices. I have advanced all my lines on the basis of present quotations, and intend to make a little money in the shoe game. A fellow in any other vocation who takes a chance, the same as I have, and finds things coming his way, generally reaps some benefit. I do not see why the shoeman, who happens to find himself favorably circumstanced, owing to good buying, unerring foresight, and correct judgment, should not receive some reward for his efforts. I am not in business for my health

and am not taking long chances without reaping a corresponding reward now that the trade wind is veering in my direction."

#### AN ENTHUSIAST IN LODGE WORK

W. J. Bartlett, of Brampton, Ont., who was recently appointed Grand Herald at the meeting of the Grand Lodge Independent Order of Odd Fellows, held in Chatham, is a Triple Link man in more senses than being a member of the order, for he is a shoeman, a poultry fancier, and an angler. This is a trinity hard to beat. It was in 1903 that Mr. Bartlett, who is a member of the firm of W. H. Bartlett & Son, shoe retailers, Brampton, joined Golden Star Lodge, No. 101, in that town. He took an interest in the order from the day of his initiation. It was not long before he began filling the offices, working his way through, until he became Noble Grand. He is now one of the trustees of the lodge and has represented Golden Star on several occasions at District

W. J. BARTLETT, BRAMPTON, ONT.

and Grand Lodge meetings. Mr. Bartlett looks on the Odd Fellows very much as the average man regards a bank. You can get a little more out than you put in—if you attend regularly and take an interest in the work and welfare of the order. Mr. Bartlett has also taken a prominent part in lodge team work, in which Golden Star has been particularly efficient, winning the banner last spring offered by the district in the exemplification of the first degree.

As a shoeman the subject of this reference learned the trade with his father, his present partner in business. He spent seven years on the bench in custom shoemaking and an equal number of years in factory work in the plants of the Williams Shoe Co., John McPherson, and Getty & Scott, Limited. After getting into the retail part of the game, Mr. Bartlett found that his factory experience helped him out greatly in buying. He has been associated as junior partner with his father for over twelve years, and reports business as much better than last year. Though prices are high, W. H. Bartlett & Son find that the general public are willing and ready to pay more for footwear.

Like many other bootmen, Mr. Bartlett has a hobby. He is a poultry fancier, breeding the famous Barred Rock, and has always taken his share of the blue and red ribbons at the exhibitions. He recently spent an enjoyable holiday at Buckhorn, near Peterborough, among the black bass. It was the same old fishing story, the big ones got away.

# HOW TO RELIEVE FOOT AILMENTS IN SHOE STORE

More Trouble Comes from Fitting Shoes Too Short Than from Any Other Cause  
—Close Fit Around the Waist and Instep of Foot with Plenty of Room for Toes is  
Desirable—How to Treat Bunions, Hammer and Crooked Toes and Other Defects

By DR. C. VERMILYEA

**I**N nearly every case of bunion the great toe has been pushed over against its neighbor. Many times it is overlapping or underlapping the second toe. The enlarged joint is generally covered with a callous and may or may not be painful and sore. This callous should be removed by the application of a good foot ointment and by soaking in hot water.

To correct the bunion the great toe must be straightened. In a great many cases this may be accomplished mechanically by the use of a device strapped on the toe and along the foot. Several of these mechanical devices are on the market, some of them to be worn only at night and some others may be worn continuously. Care must be taken to avoid using any device that will tend to force the second toe away from the great toe. On the contrary the second toe should be encouraged to straighten out along with the first toe in order that it may become a support to the first toe after the patient ceases to wear the correcting appliances.

## Exercise the Toes Freely

In selling bunion toe straighteners it is advisable to recommend that the customer take an exercise of the toes twice a day for ten minutes or more. This exercise consists of voluntary muscular movements of the toes in all directions. Difficulty may be at first experienced in voluntarily moving the great toe outwards, but this will be accomplished, even in bad cases, after a few days of effort. The daily massaging of the muscles of the entire foot with a proper foot ointment will also aid greatly in correcting crooked toes as this limbers the muscles and stimulates the blood action, thus allowing Nature to perform her functions and help along the good work.

Most cases of crooked toes will be found to carry with them a misplacement of the bones at the ball of the foot. This may be corrected by the use of properly fitted metatarsal arch supports. These supports have a bulge or elevation at the forward part of the metal and this elevation gradually forces the bones of the transverse arch (located crosswise of the foot at the ball) back into position, thus allowing the ligaments to lengthen to their proper position and permit the toes to lie straight.

Hammer toes and toes that turn up or under are a result of falling of the metatarsal or transverse arch of the foot. The bones of this arch in going down, causing a pulling on the ligaments which turns the toes up or under as the case may be. The effect of this action may easily be demonstrated by taking the foot of a person with toes turned up or under, and placing the finger at the bottom of ball of the foot and pressing firmly upwards. It will be seen that this pressure immediately causes a straightening action in the toes. This same action will result when a metatarsal arch support is fitted. Do not, in fitting this arch support, have the bulge come too far forward. The weight should be carried back of the heads of the metatarsal bones as explained in a previous article. This support is often also a great help in removing the pain from ingrowing nails as it allows the toes to lie down straight and thus removes a good deal of the shoe pressure.

## Good Fitting Is Essential

Too much emphasis cannot be laid upon the proper fitting of shoes in these as well as in all other cases of foot

ailments. A close fit around the waist and instep of the foot with plenty of room for the toes is most essential. This keeps the metatarsal shafts from spreading and increasing the irritation. It is, perhaps, safe to say that more foot ailments come from fitting short wide shoes in place of long narrow ones, than from any other one habit.

Extremely pointed shoes also carry their share of blame for crooked toes and corns, and of course all shoe men know

DR. C. VERMILYEA, CALGARY, ALTA.

the effect of extreme heels. The evils of the high heel, however, may to a great extent be overcome by properly fitting shoes as to width and length and last.

## FANCY SKINS FOR SHOE TOPS

Following centuries of enmity, dating from the day of that historic meeting in the Garden of Eden, daughters of Eve have finally made peace with the serpent and his progeny. Just to prove that hard feelings over the well known incident involving an innocent apple are no longer harbored, some of them are going to wear snakeskin uppers in their fall shoes this year. Further than this, they are going to submit to the shoe designers' dictates to the effect that among the other skins to enter novelty footwear for the coming season shall be lizard, goat, calf, frog, colt, pig, alligator, and the finest grades of deerskins. Sharkskin shoes are by no means remote possibilities at the moment. Even designers, however, cannot make women accept foot coverings from mouse-skins—should this material by any chance prove practicable—but a compromise has been reached with that ancient foe of the fair sex in that one of the popular fall shades will be fieldmouse.

# Classic

## Spring Styles Now Ready

For the Spring placing season, we have completed a range of Shoe Styles that is in a class by itself.

It sets a new standard for Canadian Shoe Production, and easily excels any of our previous high records.

Soft, flexible, mellow, featherweight appearance that appeals to the refined taste of the women's high class trade which is found only in our new process of producing fine footwear, the edges of these shoes are as fine as a nickel, the heels are slender and show the finger marks of refined, artistic shoemaking. All the practical and saleable novelties are illustrated in this famous line. The best efforts of our artists are emphasized in every department of our lines. The shoemaking is equal to the best Brooklyn hand-made shoes. Our prices will astonish you when compared with other values. Our increased capacity is accountable for producing these moderate values. We may be late showing you samples as we were deluged with business last season, but wait for our representative as we will be in a position to ship your orders on time this season.

## IN THE RUBBER SHOE ARENA

**B**USINESS has slackened off considerably in the past month, although until a week or so ago retailers were busy handing out summer footwear. The season has been a record one for both retailer and manufacturer and the chances are that the business in rubber shoes for summer has come to stay. At all events manufacturers are planning for a full season in tennis goods next season. The results so far have been eminently satisfactory; in fact dealers claim that profits are not cut as much on this kind of goods and they are not as troublesome a product to handle. The ordinary rubber business comes in rushes while the summer lines have a steady sale.

### Good for Manufacturers

The boom in this class of rubber footwear has most assuredly been a boon to manufacturers. The great trouble with the rubber shoe factory is the keeping busy of its staff and equipment. In the manufacture of rubbers for ordinary use, the demand comes practically all at once and the force is kept employed at high speed for only a certain period of the year. The production of tennis and sporting goods calls for employment at a different season and will equalize conditions all round. It ought to make for greater efficiency and therefore better goods and lower prices in the end. Manufacturers are now getting in shape their ideas for the coming spring and summer and the expectation of a good season's trade may be found in the increasing number of samples shown as well as in variety of designs. It is expected that colors other than white will boom largely while combinations of rubber and leather will be more plentiful.

### Sole Leather Substitutes

The ever increasing use of rubber and combinations thereof as substitutes for sole leather is becoming more marked as time passes and sole stock continues to climb. There are fully a dozen lines on the market and each month witnesses other candidates for popularity in the realm of "human understanding." While it will undoubtedly be difficult to manufacture a product that will give the wear and other qualities of good sole leather some shoe manufacturers claim that some of the soles already in the market stand up well to the severe tests to which they have been put. There is no reason why the genius of modern production should not succeed in placing footwear beyond the necessity for depending upon the precarious supply of skins for foot covering.

### Rubber Market

The crude rubber market is at present somewhat easier. The scramble for stock earlier in the year resulted in such efforts with regard to supplies that the market has been well covered in all lines in the last few months. The shipping of eastern rubber by way of the Pacific has minimized the risk of seizure and with the greater freedom of traffic between North and South America there has been little cause for complaint as to shipments. Para rubber is at present maintaining its ascendancy over the cultivated grades and is quoted 65 to 66 cents with latex pale crepe at 58 to 58½c. Scrap rubber is quiet.

### Getting Profit on Outing Shoes

"Yes, it is a great pleasure being in the shoe business," remarked a leading merchant this week, "providing you are not up against some professional cutthroat artist, in the

matter of price and misrepresentations. In a community where there are men who try to uphold the best traditions of the trade and make a fair living profit, selling shoes is nice work. It is an attractive, pleasant occupation, one that requires the exercise of skill, tact, courtesy, intelligence and close study, if one is to make a success of the endeavor, but it is awful to be up against such an unjust human proposition as I was, previous to moving to my present location, eleven months ago. There was a fellow a few doors from me, who always had a 'sale.' He pretended to be in the trade for the benefit of his customers, and not for himself, and I guess that he must have lived on bread and water himself, starved his family and given them little comfort or pleasure, judging by some of the prices which he secured. He is still eking out a bare existence, but it will not be long ere he joins the great majority, who have gone down the financial road to the jumping off place.

"For instance, he used to buy boys' black tennis bals for 65c, placing order, and on sorting he would pay 70c. Then he made a practice of selling the shoe for 73c—exactly 8c more than the original cost price—whereas I get 90c for the same article. Then again, this shouting, price-defying, flamboyant shoe dealer (although one hates to call him by such a dignified name), would buy men's tennis bals at 75c and 80c sorting price, which he would sell at 82c. I have always obtained \$1.00 and \$1.10 for the same style of bal and I consider, that in view of the expense of doing business, paying 100c on the dollar, living respectably and keeping one's head above water, the prices I have been charging are not one whit too large. I am glad that I am now in a community where all shoe dealers work together happily and harmoniously. There is none of this underhand, two-faced, giving-for-nothing style of chap. We all get a fair profit on our goods and live up to the standard we have set."

### The Varied Uses of Rubber

Rubber is a commercial product which is used aside from automobile tires to reinforce suspenders and impart elasticity to the human neck. It grows on trees, but it is not so easy to harvest as the coconut or the open-faced prune. The rubber tree does better in a climate which is hot enough to blister the paint on an ice house, and this gives rise to the supposition that hades is not only paved with good resolutions, but other kinds of verdure. So much rubber is used in witnessing the flight of an airship that the price has gone up and a new set of automobile tires starts a gaping wound in the incomes of the plain people. If it were not for rubber, the window trimmer, the star gazer and the town gossip would have to learn a new trade. There would also be a shortage in the supply of street loafers on a wet day. There are several substitutes for rubber, such as chewing gum, slippery elm and harnessmakers' wax, which give the matinee girl the languid air of the contemplative Jersey. Some restaurants use a very ingenious brand of rubber with which to pad griddle cakes and build a waterproof over an omelet, thus making life one long, sweet song for the stomach specialists. A popular delicacy is the rubberized round steak, which is harder to swallow than campaign bunk. The kind of rubber used in making suspenders is derived mainly from decrepit gum shoes, and is liable to go back on a man without any warning whatever. There are many other uses of rubber which are too numerous to mention.

# THE GREATEST WHITE SHOE SEASON EVER KNOWN

All Grades from the Ten Dollar Beauty Pump to the One Dollar Service Oxford Sold Well—Vast Improvements in Lasts, Patterns, Materials and Methods—White is Real Staple Color for Good Old Summer Time—Bright Outlook for next season

**S**ALES of white shoes this year ran into scores of millions of pairs. The rubber companies, who make sneaker pumps and like white shoes, can account for approximately 10,000,000 pairs of white shoes. Maine shoe firms, who make a specialty of white footwear, can account for another 10,000,000 pairs. Then there are the makers of regular shoes, in the old established shoe centres, who can account for a number of million pairs more, says the "Boot and Shoe Recorder."

It's likely that only a census of white shoes will show the exact number of pairs of such shoes sold this year. But that never will be taken. However, while it is uncertain how many white shoes were sold this year, it is certain that sales of white shoes were the largest in the history of the shoe trade. This being so, shoe merchants must have found profitable investments in white footwear.

A review of Summer sales indicates that shoe merchants in big cities of the country made good clean-ups of their stocks of white footwear. Inquiry among manufacturers and wholesalers of white footwear indicates that many retail shoe merchants not only sold out their first stocks of white shoes, but came to market, in July, for additional supplies of white footwear. In all cities, and at all summer resorts, white shoes were commonly worn. They were of all grades from the \$10 beauty pump to the \$1 service oxford.

## A National White Shoe Week

White shoe weeks, with their programs of special sales of white footwear, were a marked success in a number of cities. Next year, it would be excellent, if associations of shoe merchants joined in a general program for promoting sales of white footwear. A nation-wide white shoe week offers inviting possibilities to shoe men, not merely in the matter of increasing sales of shoes, but in calling the attention of the public to the development of footwear.

White shoes are here to stay. Shoe men should make the best of them. White shoes satisfy a public necessity. They are a pleasure to the public, too. They are cool and comfortable for summer. They are bright and cheerful to wear, at all times of the year. They are serviceable, and they may be made as stylish and as expensive as the finest trade desires. Or they may be made as inexpensive as the low price trade requires.

They can be kept clean easily. That's an important factor in their favor. They may be quickly whitened with a sponge and a whitening compound. Many women, who never would think of blacking their own shoes, will whiten them at home. It saves money. It also saves a trip to the bootblacks. That may seem a trifling detail. But the shoe trade, like most everything else in the world, is largely a matter of detail.

## The Basis of Popularity

White shoes are wanted chiefly for the summer time. They are worn with white suits, such suits being the common suits of summer time. White shoes may also be worn with suits of other color. White boots have already been bought for fall and winter. White skating boots, of white buck and of white kid leather, have been ordered by shoe merchants who are located in cities that have ice skating rinks. White shoes, of course, always are proper for party wear, by women, misses and children. Mark Twain tried to make white a popular color among men. But he was ahead of his time in this respect.

A very important reason for the record breaking sales of white footwear is the improvements that have been made in manufacturing them. Take any white shoe of to-day, and compare it with a white canvas oxford, such as was popular ten years or so ago, when the white shoe craze spread over the country. One shoe is a gem of the art of shoemaking. The other looks like a bat. The manufacturers have improved the white shoe in every respect. The last is better shaped. The patterns fit.

And the materials put into the shoe, and the finish of the shoe, are as far ahead of the 1906 shoe as a 1916 auto is ahead of a 1906 car. The upper stock is much better. There have been great improvements in white leather the last few years. The bottom stock is better, too. Leather soles are sorted these days, especially for white footwear. The white soles perfect the white shoe, being white in color and light in weight, which is the sort of bottom stock a white shoe should properly have. The rubber soles, too, are a vast improvement over rubber soles of ten years ago, and the same is true of fibre soles. White canvas itself has been improved. Not only is there better material with which to make white canvas shoes, but there is more of it. Besides, methods of making white shoes have been vastly improved, particularly in the factories, large and small, that have been fitted up especially to make white shoes.

With such betterments as these taking place in the making of white shoes, and in the quality of the finished shoes, it would seem that there are splendid opportunities for shoe merchants to develop the merchandising of white footwear. It is hardly probable that retail stores will ever sell white shoes exclusively, just as some factories make white shoes exclusively. Yet it is probable that every regular retail merchant of the future will make a specialty of white shoes, and will join in the observance of white shoe week, and will try to sell every customer, man, woman and child, a pair.

## ELECTRIC SIGNS ARE POPULAR

Electric signs are being installed by many merchants throughout the Dominion, and in every progressive town and city the brilliant announcements of enterprising shoe dealers are seen. A very attractive electric sign was recently erected for McLean & Anderson, shoe dealers, St. Clair Avenue, Toronto. The sign is 13 feet in height by 4 in. width, and the word "SHOES" can be plainly read at a distance of nearly a mile. The sign is illuminated by twelve inch lens letters, which magnify the light as it comes from the lamps inside. The sign cost about \$125.00, is made from all metal surfaces complete with hanging arms and instructions for working. This appears to be the electric age, whether in the home, the shop or the factory. The sign was erected by the Macey Sign Service, 155-7 West Richmond St., Toronto. Of the benefits of electric advertising there can be no doubt, for, at least, a score of shoemen in Toronto have these illuminations. They claim an electric sign adds to the value of a location by brightening up the surroundings, and shows that a retailer is in business to stay. He is looked upon as "a bright-eyed enthusiast for better business." It is also contended that clerks take a greater pride in their store, and are encouraged to give more efficient service, in keeping with such a high-class front.

 L S M C

THE business significance of the term "Service" has been greatly expanded within the past few years. Merchants and manufacturers especially have heard and used it, and they have helped to add new shades of meaning to it. One way to broaden a language is to add more words; another is to increase the carrying capacity of the words we already have. After reaching freely into every language of importance, ancient and modern, it would appear that the English has words enough: but no limit can ever be set to the growth of the ideas which a word may express.

"Service" has been used until it is almost over-used, until our perception of its great scope of meaning has been blurred, and possibly our sense of its great foundation value somewhat dulled. The word expresses not one thing, but many things; the range between the petty thought expressed by a fussy diner who complains of the "service" and that of world-service, in its genuine and common-sense meaning, is almost world wide. The first is individual, technical, insignificant and unimportant. The second is broad, inclusive and general; but it expresses something which very few men ever achieve directly; the opportunities are rare—and the men still more so! Between these two extremes there lies a field of meanings, both general and special, with which the average man is more nearly concerned.

 Service

The logo consists of the letters "USMC" in a stylized, white, serif font, centered within a dark, textured banner that has decorative scrollwork at its ends. The banner is set against a background of green leaves and white berries.

USMC

There may be service to the nation; service to a community; service to a trade or industry; service to the consumer, as such. All these are general meanings. But in business there are shades of technical and special meaning, which have received new emphasis within the present generation. There is, for example, the service of the "public service corporation," such as a telephone company which sells you nothing tangible or portable, sells you only "service"; that is, it does things for you.

Merchants and manufacturers know still another significance which combines both the commodity and the doing. The merchant sells goods to a customer and sends them home for him. The auto maker sells a car to a customer—and keeps it in order for him. And it will be noted that no "talking point" is more emphasized by auto makers than just this one of their "service" to customers. Its value is manifest. Its appeal is exceedingly strong. It backs up and completes the primary service rendered through the perfecting of the article itself.

**The basic idea is to secure to the customer the HIGHEST USEFULNESS of the ingenious and powerful array of devices and machinery which he has purchased.** It brings the producer and the user into full and effective co-operation.

That is precisely the idea which the United Shoe Machinery Company has long used in its development, not alone in the single and restricted sense of making possible swift and economical repair, but in every phase and department of its manifold work. **The Highest usefulness to the entire shoe trade,** and through that

The word "Service" is written in a white, cursive script font, centered within a dark, circular emblem. The emblem is surrounded by a decorative border of green leaves and white berries, with larger leafy flourishes extending outwards.

Service

USMC

## Where U.S.M. Company Efficiency

A FACTORY built for the purpose of making equipment for other factories, ought to be in itself a model. Judged by all features, the great central plant of the United Shoe Machinery Company, at Beverly, Massachusetts, sets the highest standard of the times in efficiency and perfection. Its size and scope is manifest in lineal floor measure, that runs

Service

## in Material Service Takes Form

to miles; window glass and roofing, that runs to acres. In a word, it is one of the most remarkable industrial plants to be found in the United States. Anyone interested in shoes is made welcome there. Its location is of convenient access from Boston, less than half an hour by train, on the famous Massachusetts "North Shore."

USMC

to the consumer, has been the governing ideal. That is to say, the best "service" in every sense of the word, technical, special and general.

Although its service in the way of quick supply of parts and expert repairs has been developed to a high degree, this is not by any means the most important or fundamental thing the company does in the achievement of the ideal of highest usefulness, through service. Parts are supplied, to be sure, with the aid of numerous branch houses; and well-qualified experts are always ready for instant action, to repair, to install, to instruct, in connection with any and all of the company's numerous machines for the making of shoes. But there are departments which go deeper than this, in the way of fundamental and comprehensive service.

Thus, suppose a man desires to start the manufacture of shoes; an experienced and amply equipped planning department will learn from him the kind and class of shoes he intends to make, and how many per day, whether children's shoes, women's shoes or men's shoes; fine shoes or heavy working shoes; a hundred pairs a day, or many thousand pairs a day; the range of price and quality he intends to cover; the location, whether in large or small town or city.

Having this data, this department will not only advise him, but will draw exact plans for him indicating how large a building he will need; the best proportion as to width and length and height between floors, and number of floors, this depending somewhat on the price of ground; the best material considering locality, with reference to cost and fire risk, etc.; the number of each

Service

The logo consists of the letters 'USMC' in a stylized, white, serif font, set against a dark, textured background. This is enclosed within a decorative banner that has a scalloped top and bottom edge and is adorned with green leaves and white berries. The banner is positioned at the top center of the page's decorative border.

USMC

kind of the many machines which make up a complete factory equipment, for the given number, class and quality of shoes intended; the exact floor space required for each machine, and the entire layout of placing the machines so as to have the work proceed from one process to another, clear through from cutting to packing, with the best economy of motion; the best types of racks, bins, and all the accessories and appliances, down to the air-circulating systems, the heating and power, the lights—in short, every detail that has been worked out by long experience from the foundation walls up to the roof—and the roof itself!

Suppose the manufacturer is already established, but wants to enlarge; the addition of equipment to what he already has is calculated with the same precision and completeness. Or suppose he is moving from an old plant into a new and larger one; again there is a perfect balance between his needs and the suggestions received.

The shoe manufacturer who is equipped with the United machinery is thus the beneficiary of the company's best experience not only from the beginning and all through his course of business, but, **even before he begins**. He has a plant which cannot be surpassed for the economical production of shoes. He is in a position to pass on in turn to his customer, the shoe dealer, the advantages of a system of machinery which has done a generous portion of the work of making the Goodyear welt shoe a world's standard in footwear.

Back of all this lies the inventive power which has devised the United machines, and the wonderful development of productive facilities for making them, as em-

The word 'Service' is written in a white, cursive script font on a dark, circular background. The circle is surrounded by a decorative arrangement of green leaves and white berries, which is part of a larger decorative border at the bottom of the page.

Service

 USMC

bodied in the great plant of the company at Beverly, and an economically admirable system of furnishing the leading machines and of caring for them, the total cost per pair of shoes being but a few cents.

In all this there is a sum total of "service" to the entire shoe trade of no mean proportions. The only thing in a shoe today which has not gone up largely in price is the machinery cost!

The dealer in shoes, as well as the manufacturer, can say truthfully of a United product, "These shoes are made by the world's best method of manufacture, with the world's best and most economical machinery."

That there is a tremendous service here to the consumer is manifest. It is also a national service—a world service. Those who are busy with work of the United do not trouble themselves much about that; they trust it to take care of itself. They KNOW that work well done—in other words, good service—is the soundest, strongest, surest foundation any man or any concern can possibly have. They are interested in having not only shoe manufacturers but shoe merchants and shoe wearers informed as to what their work is; its scope, its methods, its perfection of detail, its strength of co-operation with the entire shoe trade, its continual search for betterment, its perpetual study of how it may the better SERVE, in the turning out of this great common necessity of civilized life, the modern shoe. They feel confident that better acquaintance will lead to appreciation of that work, in its exemplification of what enlightened modern thought has come to recognize as the real purpose and ideal of all business, which is precisely and specifically "Service" in all its phases of meaning.

 Service

# Leather Trade Jottings

Items of Interest to Leather Producers and Users—What is Being Talked About in Leather Circles at Home and Abroad

**L**EATHER business has not been quite as brisk during the past few weeks on account of the fact that it is between seasons and although shoe manufacturers have been nosing about for stock they do not feel the pressure of necessity as when operations are in full blast. From the way sorting orders are coming in, however, and the indications for an early opening of spring trade some of them are already anxious and are feeling the market. Nevertheless the feeling prevails that the feverishness which has characterized the market for the past few months has more or less abated and there will be more sense and reason in the situation from this time on. At the same time tanners are holding firmly at present figures and as supplies are limited there is no immediate prospect of easement.

**American Conditions.**—In a report of the leather markets at Boston, Hide and Leather says:

More inquiry is reported by dealers in upper leather and all indications point toward activity early in September. While the domestic business was quiet during July and August the foreign demand was sufficient to keep down accumulations of leather.

Side upper leather tanners report trade increasing especially on fine side leather used as a substitute for calf. This leather is reported to be sold ahead. Prices are firm at 35c. per foot and the volume of business booked ahead precludes any drop, any change will mean more, rather than less.

In calf leather, blacks move slowly, tanners are finishing their best skins in colors. The foreign demand for these colors is good and that trade is paying prices above domestic buyers' views.

In glazed kid the foreign demand is brisk, taking the entire output of many large tanneries in Philadelphia and Wilmington. The domestic trade is reviving and if present conditions show no changes, kid leather will go higher.

Sheep leather is sold up to bare floors and as very little raw stock is coming in, stocks of finished leather cannot as yet be duplicated.

Split leather in wax finish has taken a boom the past week. Many large cable orders from abroad have been received.

Local sole leather tanners report that new sales for domestic consumption are only of moderate volume but that they are having a very good demand for most standard lines for export in sides, backs and bends. This keeps current tannery receipts well in hand and prices thus far very well sustained.

**English Conditions.**—The production of army shoes both for the British and Allies continues to tax the English trade to its utmost.

At the half-yearly meeting of the Manchester Chamber of Commerce, Mr. R. B. Stoker reviewed the position of various trades. Dealing with leather he said: "The abnormal demand for leather brought about by the war is using up hides quicker than they are grown. The government now controls the price of hides from beasts slaughtered in Great Britain, and this has steadied the price of leather. It is interesting to learn that 64,000,000 hides are required annually for military purposes alone. Manufacturers are now employed on boots for Russia; 3,000,000 pairs were ready for delivery by the end of June, and a further 6,000,000 pairs will be ready by the end of September, and when it is borne in mind that the Cossack high-legged boot takes 7 feet to

8 feet of leather for the upper, it will readily be seen what an enormous quantity of leather is required. The sizes required are from 9½ to 15. It is estimated that men in the field, in reserve, on lines of communication, on garrison duty, and training at home will make a total of 50,000,000 men under arms in Europe. The military estimate is four pairs of boots per man per annum, making a total of 200,000,000 pairs per annum to supply present armies. As 1,000,000 pairs of boots require 5,000,000 feet of upper leather, or 190,000 hides, and soles require 33,000 hides, or 223,000 hides for every million pairs of boots, it follows that for the grand total requirements for the 200,000,000 pairs of boots per annum, 44, 600,000 hides will be called for. These boots are soled once before being cast aside, which accounts for further 6,600,000 hides. Harness, saddlery, leggings, bandoliers, bags, etc., take 12,800,000 hides. The grand total shows an annual consumption, therefore, of 64,000,000 hides for military purposes alone.

**Hide Conditions.**—The hide market is somewhat quieter and prices have fallen off half a cent. Hide and Leather says:

There seems an impression that there is going to be a brisk demand for hides, which will soon materialize. No one seems to be looking for much lower hide prices this fall. Rather the reverse. The foreign dry and wet salted market keeps firm with some large lines of South Americans taken this week by Europe which makes just so many less to come to America to compete with domestics. The packers are making hides very fast owing to the big slaughter at all centres and a liberal run of range cattle is expected in these markets the latter days of this month. The hide market is closing pretty much unchanged with the undertone if anything on the easy side.

Heavy native packer steers are quoted at Chicago at 26c., with country buffs at 19½c. The listless condition of the country hide market seems to promise slacker prices, but dealers are looking forward to increased demand this month to stiffen the market.

**Some Troubles of Tanners.**—Writing to a leading paper, a Philadelphia tanner says:

For the past year or more glazed kid manufacturers have been voluntarily advancing the wages of tannery workers in all departments. This constant advancing has been going on until at last it has reached a point where it must stop. Let me give some wage figures. Men and boys who two years ago earned \$8 are now getting \$12; those who then got \$14 are now receiving \$20 to \$25; those who earned \$15 to \$16 are now getting \$25 to \$30.

There is much unrest just now among the kid factories, and the next demand from the workers will be, we are informed, an 8-hour day.

Matters have now reached a point where the manufacturers must, in sheer self-defense, band themselves together and stoutly refuse further concessions.

The mandate of the workers, as expressed by their executive committee, is as follows:

"No one shall be employed in any capacity in a tannery unless he first comes before this body, representing the men, who will decide whether or not he may go to work."

Thus, were this to prevail, the time honored right to employ and discharge would by one sweep be taken away from the entire industry.

I do not think that the kid manufacturers will forego this necessary right.

## To the Manufacturers and Retail Trade

I buy all kinds of surplus and bankrupt shoe stocks in any quantities and pay spot cash.

Do not keep goods on your shelves. They will not earn money there for you.

Get in touch with me at once.

### MAJOR WILKINSON HOME FROM FRONT

Major Geo. H. Wilkinson, one of the most popular militia officers of Windsor, Ont., has returned home from the front. He was wounded in the last Ypres battle and expects to return to the trenches in France within two months. This is the second time since he left Canada with the first contingent, that Major Wilkinson has been given leave of

MAJOR GEO. H. WILKINSON, WINDSOR, ONT.

absence from the front, on account of wounds. Major Wilkinson has been in the shoe business in Windsor, Ont., for many years, and is not only a well liked military man who has been doing his bit for king and country, but in footwear circles, he is well thought of and highly esteemed. His many friends are glad to see him around again and trust that his health may be sufficiently robust to allow him to return to the front—which he confidently expects to do.

### WELL QUALIFIED FOR NEW POSITION

R. E. Dildine, who has just been appointed general sales manager for Ames-Holden-McCready, Limited, Montreal, has had an extended business and selling experience, which qualifies him in every way for his new and responsible position. He began in the retail end, spending some six years in a grocery, a department store and a shoe house. Subsequently he entered the newspaper arena and served in various reportorial and editorial capacities, going from that into trade journalism with the Dry Goods Reporter of Chicago. There he spent some time in both the writing and advertising end of the field. Mr. Dildine further broadened his insight by filling the post of manager of publicity for different concerns, the most prominent of which was Endicott, Johnson & Co., the largest shoe manufacturers in the United States. With them he remained six years, during the latter portion of which he was also chief director of sales. Going to New York, Mr. Dildine became editor of the shoe section of the Dry Goods Economist, where he remained until 1914, and then he joined the editorial staff of Printers' Ink. In February last he became publicity manager for Ames-Holden-McCready, Limited, from which he has just been promoted to be general manager of the sales department.

### HAS ENTERED UPON NEW DUTIES

E. W. Day, recently appointed sales manager of the F. S. Carr Rubber Co. of Granby, brings with him to this new position a valuable experience extending over several years, which will be particularly helpful to him. His work in New York and other American centres, before coming to Montreal, has given him wide knowledge of manufacturing costs, and this, coupled with practical selling work, should enable him to make an excellent showing with Victor Cushion heels, and allied products.

# MORE SHOE REPAIR ASSOCIATIONS FORMED

The Increasing Cost of Raw Material Sends Up the Prices—How the Members of Trade Are Getting Together in Various Towns and Cities to Better Conditions and Elevate the Industry—Trade-Mark May Be Adopted By Some Associations

**O**WING to the constantly increasing cost of sole leather, cut soles, etc., the prices for shoe repairing have recently been raised in St. Catharines, Ont. The advance in leather in the last six months has been over 100 per cent. and the best quality soles that are used by the repairers of the St. Catharines Association have risen from \$2.70 to \$6.15 per dozen. To meet this advance, the repair men of St. Kitts, who raised their prices in April last, have again been forced to boost them. During the summer months the repair shops closed Wednesday afternoon. On week days the closing hour is now 6.30 p.m. and on Saturdays 5.00 p.m. throughout the year.

The following are the members of the St. Catharines Shoemakers' Association:—Wm. Legg & Son, W. Inglis, J. Shaw, H. Katzman, H. Sparkes, Fred. Pople, W. McCause, A. Malpass, W. F. Smith, A. E. Orrell, B. Sloane, C. Marrack.

" Half soles, nailed .....	.65
" Rubber heels .....	.50
" Leather heels .....	.25
Patches, cement .....	.25
" machine .....	2 for .25
Boys' Half soles, nailed .....	.75
Misses' Half soles, nailed .....	.50
Heels of leather 25c. a pair, no job under 10c.	
Heel seats 15c. pair, toe caps for children 35c. pair.	
Boys' 50c., men's 75c. pair.	

## He Travels with an Awl

"Be a shoemaker and see the world," is the sound advice of Harold Stepan of New York city. He is a Spaniard, only twenty-one years old. For five years he has accomplished two very difficult and incompatible things—self-support and an extensive exploration of the Western Hemisphere, "from Greenland to Antigua"—almost. He is one of those rare persons who indulge their wanderlust without becoming derelicts. He is always a producer—the direct descendant of a long and dignified line of journeyman cobblers.

"If you want to be foot-loose," he says, with a soft accent and a radiant white smile, "be a shoe-maker."

"As soon as I get my second citizen papers I go. It's too hot on land these days."

Shoemaking, he thinks, is the most profitable and pleasant trade there is. Even in New York, where people don't have shoes made to order, where repairing is the only demand made upon his skill, his average earnings are \$5 a day. And Saturdays—he made a graceful foreign gesture—

"Saturday I work all night, until nine o'clock in the morning."

That is the one inconvenience that the world gives a shoemaker. Everybody wants their shoes trim and bright for Sunday.

For one reason, young Stepan would rather work in Latin countries, especially among the French and Spanish, where people from all classes have shoes made to order. There shoemaking has all the dignity of a creative art. After he has spent many years learning the craft, people recognize him as a designer and a craftsman, and pay him accordingly, as much as ten or twelve dollars a pair. Peasants come to him for great tough boots, hand-sewn with thick leather thongs, that last not only a lifetime, but

IF YOU WANT TO BE FOOTLOOSE BE  
A SHOEMAKER

“even unto the third and fourth generation.” And in the cities actresses and dancers and fine ladies give him orders for thin, pliant, lustrous dancing shoes.

“But wherever I go I get work,” he says. “Everywhere there are shoes to be mended. I am in good fortune because people like me. One lady asked me why I am always smiling, and I told her. You see, when I was born my mother smiled. Ever since I have been smiling.”

#### Association May Have Trade Mark

There are now over 80 shoe repairers identified with the membership of the Toronto Shoe Repairers' Association, and, considering that the organization is only two months old, this is certainly remarkable progress. At the last meeting the by-laws and constitution were further discussed, and are now in good shape to be printed. The members are also talking of adopting a trademark and having the name of the Association registered. The trademark will be printed on all the cards and literature of the Association. Another revised price list will shortly be issued and become the property of all the members. S. Burnett, of the Toronto Shoe Repairing Co., has been appointed assistant to Arthur Butterworth, secretary and treasurer. The Association will hold its next regular meeting in the Foresters' Building on Thursday evening, September 7th, when further progress will be made and many important questions taken up.

It is possible that some kind of a neat sign will be gotten out and placed in the windows of the members, in order that the public may know the men who are endeavoring to uphold the worth and welfare of the trade and place it on a better basis, so far as prices and working conditions are concerned, than it has been for some years.

#### Are You an “Aloofer?”

Yes, there are always certain men in every organization that will not have anything to do with it. They hold aloof and declare that they will not countenance any “union”—that they are not extortioners or tyrants—that they are satisfied with

a reasonable profit and that every man who belongs to the association is there to overcharge the public or to obtain some distinct advantage, generally of a selfish or grasping character. Of course you have heard many men talk like this. They will not join any society, any lodge, any church, or any band, social, educational or charitable. They can't see any good in this, or any benefit in that. They prefer to do everything all by their “lonesome.” Possibly it is a wise thing, in a way, for it takes all kinds of people to make a world. The more such cantankerous chaps eschew associations, the better for the associations, for they would be knockers or kickers of the most pronounced type.

In regard to shoe repairing, while the members of the trade have come together in various cities, there are a certain few who will hang out, men who adopt a very knowing look and superior attitude, saying, “Well, let the others do as they please—I prefer to run my own business, make my own prices and manage my own shop. I do not want anybody else butting in, telling me how to do things, or what I shall charge. I am quite competent to take care of this end of affairs myself.”

You all know this style of individual. You can find one in every block or two, and generally, he is a small man in the trade—one who is merely marking time, who does so much work this week and is content if next week's receipts equal the last week. He does not branch out—his business does not grow; he is satisfied with eking out a bare existence, and can see no farther than the front door, and three meals a day. “Yes, we still have some of these men, who are cutting prices,” remarked a leading shoe repairer the other day, “a great many of them are foreigners and I hope they will keep right on cutting, for there is a sure end to that sort of thing these days, with the rapidly advancing prices for leather and the high cost of labor.”

#### Another Shoeman Joins Colors

A. E. White, who had charge of shop No. 2 for the Goodyear Shoe Repairers, Saskatoon, is one of the many followers of St. Crispin who has enlisted for foreign service. Mr. White is a shoemaker of the first rank and has the touch

A. E. WHITE, SASKATOON,

of an artist first and last in all his work. He was born at Cheltenham, England, and is now with the 96th Highlanders at Camp Hughes, Man. Of a quiet, even retiring disposition, Mr. White made many friends during his two years' residence in Saskatoon.

# FOOT TROUBLES

AND HOW TO RELIEVE THEM

*The greatest service you can render to your trade is the giving of foot comfort—relieving foot troubles and making all shoes feel easy and comfortable. Such a service not only costs you nothing, but actually brings you a handsome profit in addition to building up your patronage*

Dr. Scholl's Foot-Eazer (Left Foot)

The Correct Way to Fit Dr. Scholl's Foot-Eazer—  
From Metatarso-Phalangeal Joint Flush with Heel

## Dr. Scholl's Arch Fitter

Showing method  
of making heel  
adjustment.

## Dr. Scholl's Foot-Eazer

This tremendously popular, scientifically constructed appliance is the key to that sort of service. It is not intended only for people with foot troubles but can be worn by anyone with ease and comfort to the feet. In cases of foot ailments it gives instant and permanent relief and comfort. It supports the fallen arch of the foot and thereby removes the cause of nearly all foot ailments.

It prevents the elongation of the foot and the crowding forward of the toes into the tip of the shoe, thereby taking the pressure off of the sore or painful corns, cramped toes, bunions, etc.

It is light, springy, easy to wear. Does not break down the shank of the shoe but spans the body's weight from heel to ball of the foot—not depending upon the shoe shank for support.

Dr. Scholl's Foot-Eazer, to be most successful, should be accurately fitted. It must be adjusted to the contour of the foot in a position of rest. Its heel must come flush with the heel of the foot. The forward end—the tip of the leather—should come just to the metatarso-phalangeal joint. The distance between these two points determines the size of Foot-Eazer required—regardless of the size of the shoe worn. (Arch supports should not be selected according to shoe sizes.)

Dr. Scholl's Arch Fitter is a necessary adjunct to the shoe man's equipment. With it the Foot-Eazer can be quickly and easily fitted, thereby again giving that unequalled service.

# GOOD FRONT ADDS PRESTIGE AND MAKES SALES

**Businesses Are Made or Marred by Character of Store Front—Some Suggestions that Will Help the Dealer in Considering His Own Store Front—A Number of Retailers Have Adopted the Idea of Double Decked Windows for Displays**

**T**HE value of putting up a good front is recognized in every line of endeavor. Appearances count for much, and nowhere is this more true than in the shoe business. This is very strongly demonstrated in our large cities where businesses are made or marred by just the matter of the store front. I know of a store that carries a full assortment of goods in its line, gives good service and even has a very good interior, but has been unable to attain any degree of success for the simple reason that the front is poor. It is unattractive and forbidding, giving the public a bad impression and making it impossible to arrange window displays that sell goods.

Every dealer will be able to bring to mind cases where stores are greatly handicapped by poor fronts. And it is quite often the case that a merchant is able to pick flaws in the store fronts of other dealers, but does not recognize those in his own. A dealer gets so used to seeing his own store that he is unable to see its faults. You may be such a man yourself for you are only human. Therefore, when you come down to your store to-morrow, try to view it through the eyes of an outsider—a critical outsider. You may find that it falls down badly in its mission of attracting the public and making sales and requires a complete overhauling, at least, if you look at it in a critical manner, you cannot help finding some features that might be improved.

## **New Store Fronts that Pay for Themselves**

There are hundreds of cases where a new front in an old building, or an alteration of some kind, has paid for itself in a very short time. If you are deciding to alter your store front, or if you are building a new store, give a good deal of attention to the matter. Decide on the type of front that is best suited to your locality and to your particular line of business. There is no set design that will produce the best sales results, but there are undoubtedly certain types that tower far above others in the matter of creating trade. Some comment on the various types may prove of interest.

Unless the store stands in from the sidewalk or the sidewalk is particularly wide, or the window very deep, it is generally agreed that the window floor should be in a raised position, so as to bring the shoes on display more within the line of vision of the person looking in the window. Dealers have added a good deal to the selling power of the window merely by the alteration of the floor, so as to have the display so that it will be better brought to the attention of passing customers. The height of the window floor sometimes has to be raised to suit the class of goods on display. For this purpose some dealers have removable floors of different heights that can be changed when desired.

## **Double-decked Windows**

Quite a few dealers have adopted the idea of a double-decked display window, with the main display floor raised up to a considerable height and a supplementary display space below. Most dealers using this style of window, that the writer has questioned on the matter, express great satisfaction with them. One man stated that when goods are taken from the main display that they are arranged in the lower section. He says that many people will see the shoes on display, are interested but not quite decided to buy. A second view might be the means of making a sale, and if they have been taken from the main display floor, they are still to be seen in the lower section. He considers this one of the greatest values of the double-decked window.

Where there is the space, a front with a wide, inviting entrance and deep, inclining windows, is often found to possess a high sales value, as the displays are so arranged that they are visible to people as they approach the store.

The entrance or vestibule should always be made plenty wide enough, so as to make it easy for people to enter the store. If possible, make it easier to go in than to go by, and by all means make it more attractive to do so.

## **A FEW "DONT'S" FOR "BUSY" SHOE SALESMEN**

Don't work hard—work was only invented for the lower animals and slaves—it is, strictly speaking, out of style—its vogue has gone.

Don't try to please cranky customers—they might come back and buy something in future.

Don't kick if things don't seem to come your way—just wait—your time will come.

Don't associate with salespeople who know more than you do—it might enable you to learn something worth while. What's the use?

Don't try to be on time—the boss won't appreciate it anyway, and it might mean waiting on an extra customer or two.

Don't try to fit a customer's foot perfectly—if you do, they will only come back and ask for you, and this would mean a lot of bother. Let them tell their troubles to a chiropodist.

Don't sympathize with the firm—they're rich and haven't a worry in the world.

Don't give out any information to other employees—you must monopolize all knowledge—besides, it might lead to your advancement, and that would mean greater responsibility for you. Duck it!

Don't show the style shoe the customer calls for. Tantalize her by offering just the opposite. She may get peeved and walk out. This hint is a worksaver.

Don't try to adjust complaints amicably. Give the customer who brings back shoes a real argument. This will lend a bit of excitement to a dull day.

Don't bother to draw a customer's foot. Just guess at it. She won't know the difference anyway. Service? Bah!

Don't worry, especially about your health. Keep any old hours and do just as you please. Specialists tell us that health is much a matter of the mind; so let's forget it!

Don't look for work, neither wish for it. Why wait on more than one customer at a time? Let 'em wait—they will get good and tired. Then you will be able to hand them any old thing.

Don't be backward. Come right out strong; and if the customer makes a remark about your poor service, retaliate by calling her attention later on to the fact that she has flat feet, or that one of her feet is larger than the other, or one of several similar remarks now in vogue in the better shops.

## Britain Awakes

**T**HIRTY-FIVE years ago, when Britain was threatened, "Ouida," the celebrated novelist, wrote the following lines, which seem almost prophetic. "Ouida," whose real name was Louise de la Remée, was French by birth, which makes the tribute all the more striking.

*"Great England put her armor by, and stretched*

*Her stately limbs to slumber in the sun.  
The nations, seeing then how long she slept,  
Communed together, and in whispers said:  
'Lo! She is old and tired; let us steal  
The crown from off her brows. She will not  
know.'*

*And Goneril and Regan, over seas,  
Mocking her, cried: 'Her time is past. Her  
blood*

*Is sluggish, and her rusted sword from out  
Her scabbard she will draw no more.' And so  
Thus gibing, flung with cruel hands the seeds  
Of discord and of hate amidst her sons.*

*But from the East there came a blast too loud,  
As from the West there came a taunt too much;  
And she, awaking, raised her head, and saw  
Around her all the faithless friends, and all  
Her sisters and her children jeering her,  
And crying 'She is old' and meting out  
Her lands among themselves, and parcelling  
Her honor. Then, swift as lightning flashes  
From blue skies, her glance of scorn fell on them,  
And they crouched, like wolves that are o'er-  
mastered.*

*England stretched out her hand and touched  
the world—*

*England arose, and spake, and calmly said:  
'Nay! I am mistress still!'*"

### WHY KITCHENER?

*The name of Kitchener will not go down in history as that of a great fighter. There have been more brilliant tacticians and more masterful commanders in connection with Britain's military achievements.*

*Kitchener was a business man even more than a soldier, an organizer rather than a fighter. His course in Egypt, in Soudan, in India, in South Africa and the present campaign in Europe gave ample evidence of this. His well laid plans are now bearing fruit in the greatest war of all ages.*

*The taking of his name by Berlin is a fitting tribute to greatness that stands no chance now of ever being dimmed by future events.*

# Kitchener, Ontario

## Canada's Newest City Re-Named The Passing of Old Berlin

THE City of Berlin, Ontario, has ever been noted for the astuteness of its business men. On this account it will be no surprise to other Canadians to learn that these astute business men, after deliberating upon the move from every point of view, have decided to give their city a new name, for the events of the past two years have created a decided prejudice against the old one. To many people this prejudice will seem most irrational. But, rational or irrational, there it was; and in their business-like way, the citizens decided to remove it so that the progress of their city might not be hampered.

The new name chosen is Kitchener.

This name has been selected from a list of some hundreds that have been suggested, the selection having rested with a committee who were empowered to award a prize of \$250 to the person, either in Berlin or outside of it, whose suggestion for a name was finally accepted.

Naturally enough, the passing of the old name will not be regarded without some feelings of regret by many of those who, by their votes, have helped to bring the change into effect. These will be found very largely among the older generation of citizens who have seen their city develop from

an insignificant village into one of the most important communities in the whole Dominion.

Their city has become endeared to them by long association with its activities. Memories of its early days are always with them. They have themselves borne a very important share in the building up of its fame. To them its name cannot be associated with anything but peace and prosperity. They have planned for it and worked for it, devoting many an hour from their own most pressing personal affairs to its advancement. Upon its streets sound the echo of the footsteps of old friends, now departed, who, in the days gone by, helped to establish the name of Berlin in the good estimation of their fellow-countrymen.

Of those who voted for the change, banishing their own feelings of sentiment for the sake of the public good, many bear the names of families which have been closely identified for more than a hundred years with the history of Waterloo County.

It was in the later years of the eighteenth century that the forests which once covered the present site of the county of Waterloo began to disappear before the axe of settlers from Pennsylvania. These, for the most part were the

# THE BUSIEST BUSINESS HIVE IN CANADA

## VIEWS IN AND ABOUT KITCHENER, ONT.

"Pennsylvania Dutch" who, with a strong liking for British institutions, and a consuming hatred of militarism, combined an enormous capacity for hard work.

To parody a celebrated sentence describing the exploits of an ancient emperor—"They came; they worked; they prospered."

In the course of years, as one generation succeeded another and the population increased, villages began to form in various parts of the settlement, one of which was (doubtless out of compliment to a nation at that time in close alliance with Britain) called Berlin. Later, in the year 1852, Berlin was selected by the Legislature of Upper Canada to be the seat of the newly established county of Waterloo.

It is a matter of public record that the site upon which the county buildings were erected was a gift to the County Council from one Frederick Gaukel—a striking instance of the public spirit for which the people of this city have long been noted.

From this time onward, with the advent of the railways and the general introduction of power driven machinery, the village of Berlin began to form into an industrial community.

At its incorporation as a full-fledged city, in the year 1912, who could have foreseen that, within a few years, any necessity could possibly arise that would render a change of name advisable? In truth, such a thing was never dreamed of. But the dwellers of any community, while they may retain a just pride in their own municipal organization, must remember that their community is only one of the many hundreds of communities that form the Dominion of Canada, and that

occasions arise when, for the good of the whole country, local pride must give way.

And such an occasion has come for Berlin. Through no fault of her own or of any of her responsible citizens, the name chosen for her by the sturdy old pioneers of a century ago, has become distasteful to the great majority of Canadians.

So a change was due, and a change has been effected.

What was called Berlin is now called Kitchener.

The name Kitchener is singularly appropriate from every point of view. Kitchener of Khartoum will go down in history as the greatest of Britain's generals, not from a fighting standpoint, for it may be said that he claimed no particular distinction as a man of war, but as a great Empire organizer and builder. To him we owe, to a large extent, the prestige not only of British arms, but British ideals, in Egypt, South Africa, India and everywhere that his wonderful genius for organization, resourcefulness and courage of action have been brought to bear. There is no doubt that the present united plan of action resulting in the present European situation to-day may be traced to the same far-seeing planning that brought the end of the South African war, and peace and security to Egypt and India. There is thus a fitting correspondence in the name that has been chosen to represent one of the busiest and most aggressive business centres of the Dominion.

And under this name the city will continue to progress, for in the indomitable enterprise of its business men it possesses an impetus for advancement that no common obstacle can impede.

Here's luck to Kitchener!

A BIRD'S EYE VIEW OF THE CITY OF KITCHENER, ONT.

Below is a photographic illustration of our new building, which is thoroughly equipped with new and modern machinery for the manufacture of Ladies' High Grade McKay Footwear.

Our salesmen are now showing new samples of Lady Belle shoes, which have gained popularity for style and quality. Include a liberal assorting of Lady Belle shoes in your Spring placing order, and you will be assured of the right merchandise for a good Spring selling season.

# THE VISION OF SHOEMAN NOW FULLY REALIZED

**Mr. D. B. Detweiler is the Man who Nursed the Hydro-Electric Until It was Able to Walk—History of the Power Development Movement and Expansion in Kitchener Which May Well be Termed the Hydro City—The Progress of Power Facilities**

**H**YDRO City Shoe Manufacturers, Limited, is the new name of the G. V. Oberholtzer Co., Kitchener, Ont. The new title is made coincident with the change of name of the city, but there is no change in the personnel or management of the firm, which is widely known to the trade, and has established a strong connection in all parts of the Dominion. N. B. Detweiler is the president and treasurer of the company, and D. B. Detweiler the vice-president. The fore-fathers of these gentlemen immigrated to the State of Pennsylvania from Switzerland some three centuries ago. Their grandparents were born in the State of Pennsylvania, as well as their parents, who came to Canada in 1823 and 1828, respectively, settling in Waterloo county, where they died. Messrs. N. B. and D. B. Detweiler were born in Waterloo, where they have ever since resided, both taking an active and public-spirited interest in the progress of Kitchener, and serving in various municipal capacities. N. B. Detweiler became associated with Mr. Oberholtzer in the management of the business in 1897, and he with his friends acquired the stock of the company in 1901. The quality of the goods of the firm has steadily improved and each year the sales have shown a gratifying gain. B. D. Detweiler has always taken an active and aggressive interest in the great waterways of Canada and has written a great deal on the subject of ocean navigation, via the St. Lawrence and Welland Canal route. He was also the man who "nursed the hydro-electric until it was able to walk," and was styled by Ald. Mills, of Kitchener, as the originator of the hydro-electric system, getting a vision of Niagara power about the year 1902.

The Hydro City Shoe Manufacturers are having information printed on their letter heads, giving some interesting facts regarding Kitchener, the Hydro City, which will be read with appreciation at the present time.

## "Kitchener," the Hydro City—Why?

"In years to come this place will be known as the Hydro City."—Sir James P. Whitney, late premier of Ontario, in his speech at the banquet following the inauguration of the Hydro-Electric Power Commission's system in this city—October 3rd, 1910.

"Although an inland city, we, by science, were the first to grasp Niagara power through Sir Adam Beck's unique, municipal co-operative system, the most complete and greatest in the world."

Here is a succinct history of the development of the Hydro idea in this busy manufacturing centre. The first

organization meeting of municipalities to secure Niagara power was held on June 9th, 1902, and on February 17th of the following year, at a largely attended meeting, including the mayors of 18 municipalities, the government was requested to appoint a Provincial Power Commission. It was on October 3rd, 1910, that the Hydro-Electric Power Commission system was inaugurated in Kitchener, twelve municipalities being under contract for the Commission covering 8,000 horse power. So rapid was the development that in June of the present year the Niagara system included over 100 municipalities and the load exceeds 100,000 horse power. Thirty more municipalities will connect up in the near future and eight other systems are supplying over 50 municipalities. In many places rates have been reduced 75 per cent. and over, and this is regarded only as the beginning of greater things. One thousand farmers are being served, and this number will be increased many times in a comparatively short period. The Niagara system consists of approximately 433 miles of high tension (110,000 volts) transmission line. Kitchener supplies a power rate of 24 hours for \$21, the distance from Niagara being 90 miles, and Windsor, 240 miles distant, has recently been connected electrically.

## New Shoe Company is Progressing

The Lady Belle Shoe Co., Limited, Kitchener, Ont., makers of ladies' fine McKay shoes, have been rushed from the day that their plant opened on February 15th last, and are now employing about fifty hands. The company have received some very encouraging letters from customers, expressing satisfaction at the way the goods have turned out. There is usually some defect in manufacturing for the first season, but the Lady Belle Shoe Co. have had practically nothing returned to them, which speaks volumes for the workmanship, fit and finish of their lines.

The members of the firm are A. A. Armbrust and Alexander Inrig. The name Armbrust has been identified with the shoe trade of Kitchener for a good many years. The father of A. A. Armbrust was a member of the Armbrust-Oberholtzer Co. and the subject of this reference was with the Oberholtzer Co. for fourteen years, being their western Ontario representative for six years. He was also one of the organizers of the Woelfle Shoe Co., being secretary-treasurer of that firm, and in the fall of 1915, in association with Mr. Inrig, organized the Lady Belle Shoe Company.

# Hydro City Shoe Manufacturers Limited

(Formerly G. V. Oberholtzer, Limited)

**Kitchener - - Ontario**

**W**ITH the change in name of Ontario's HYDRO CITY, the birthplace of the Hydro Idea, it has seemed opportune to change the firm name as above, although we had practically decided upon this course a considerable time ago.

Although the name of OBERHOLTZER is one of the OLDEST and most REPUTABLE in the shoe trade of Canada, the fact that the founder of the firm has now been deceased many years and that there has since been no one of the name connected with the business during that period, made the change more or less desirable.

There is absolutely no change in the personnel or conduct of the business, and certainly no change in the old policy of the firm to give the trade the BEST GOODS that experience, money and a well equipped plant can produce.

Our LINES FOR SPRING will manifest the same progressiveness of ideas, thoroughness of workmanship and attractiveness of appearance that have won for its goods the confidence and support of the trade in the past. Do not buy till you have seen our range of

No. 705—44", 18.50

## "EVERREADY" Wardrobe Trunks

They contain the most accessible automatic one-motion garment rack yet invented. Unbreakable, fitted with the simplest and most reliable follower on the market.

Wardrobe trunk convenience has been a luxury enjoyable only to few until the introduction of this eminently practical trunk so easily within the reach of everyone.

Let our representative show you our complete line of General Purpose Trunks, Suit Cases and Travelling Bags.

**CANADA TRUNK & BAG, LIMITED**  
KITCHENER, ONTARIO

**NEW COMPANY IS PROGRESSIVE***(Continued from page 56)*

Mr. Inrig has also had a wide insight into the shoe line, beginning his career with Cooper & Smith in Toronto in 1892. He has also been connected with firms in Toronto,

A. A. ARMBRUST, KITCHENER, ONT.

Montreal and Preston, and went to Kitchener in 1906 at the time of the organization of the Western Shoe Co. At the inception of the Welfe Shoe Co. he acted in the capacity

ALEX. INRIG, KITCHENER, ONT.

of superintendent and remained with that company until the fall of 1915, when, with Mr. Armbrust, the Lady Belle Shoe Co. was launched.

**Are Doing Record Business**

The Greb Shoe Co., Limited, Kitchener, Ont., are specializing on men's Standard screw shoes and making

what is known as the Greb shoe. The business of the company was incorporated in 1910 as the Berlin Shoe Mfg. Co., Limited. For some years they sold only to the wholesale trade and later on, under the name of the McKellar Shoe Co., commenced going direct to the retail. When the present proprietors took over the business in March last year, the latter name was discontinued. The officers of the Greb Shoe Co. are Charles Greb, president, and Erwin C. Greb, secretary and manager, both of whom have been connected with the industry since its inception. Under the present management the business so far this year has more than trebled any corresponding period since operations were begun. The outlook for the shoe trade in Kitchener which possesses the distinction of having more boot and shoe factories than any other city of similar proportion in the Dominion is very bright.

**Mr. Brooks Assumes New Position**

Oliver M. Brooks, who has been appointed traveling salesman of the United Shoe Machinery Company in western Ontario, being connected with the Kitchener office, succeeds George F. Hennessey, who has just been made resident manager. Mr. Brooks has entered upon his new duties and has

OLIVER M. BROOKS, KITCHENER, ONT.

met with a cordial welcome. A thoroughly practical man, he can make a shoe by hand from the ground up, having served a long, hard apprenticeship. Although at the time he thought it all work and little play, yet he is glad that he completed the course. Mr. Brooks has been an extensive traveler and knows every portion of Canada intimately. Previous to coming to Kitchener he was with the United Shoe Machinery Co. in Montreal, and for some time past has been giving special attention to the repair trade and machinery end of the business. In the interest of the company, he made a series of trips in 1915 which took in practically every town of over 3,000 population in the Dominion, including those in British Columbia and Prince Edward Island. This year he has completed an 8,000 mile journey to the Pacific coast and Prairie Provinces, which took a little over four months. Mr. Brooks says he is looking forward with interest to a closer association with the shoemakers of Western Ontario, and the intimate knowledge of the different branches of the specialized industry, which he hopes to obtain by a closer contact with them.

## To Play the Game Well

Each year adds to our list shoe manufacturers who are playing the game for all its worth, and playing it safely.

Here's one :

"A shoe factory making men's welts have used on an average of two thousand pairs of Columbia Fibre Counters per day for nine months and haven't had a single pair returned—some record"—and if they did, we would pay for every pair that was returned.

*(Customer's name on request)*

There's money for you in playing the game safely.

# With the Shoe Manufacturers

Pithy Note and Comment on Shoe Matters—What the Makers of Shoes are Saying and Doing—Shoe Facts and Fancies

**A** DECREE of importance to shoe manufacturers using the so-called universal clincher machines put out by the Champion Shoe Machinery Co., of St. Louis, through the Universal Shoe Machinery Co., was entered August 7 in the United States District Court for the District of Maine in a suit brought by the United Shoe Machinery Co. against the Farmington Shoe Mfg. Co. of Farmington, N.H., alleging infringement of the United Co.'s patent to Casgrain, No. 864,951 by use of universal clincher machines. In this suit the Champion Shoe Machinery Co., as the manufacturer of the alleged infringing machines, intervened and was made a party defendant with the Farmington Shoe Mfg. Co. This decree is in accordance with a decision handed down by Judge Hale, July 1, in which Judge Hale, after a careful review of the evidence, held claim 4 of the Casgrain patent in suit valid and infringed and directed that a decree for an injunction and an accounting of profits and damages with costs issue against both defendants.

Another suit brought against the Federal Shoe Co. of Lowell by United Shoe Machinery Co. for infringement of the same patent re universal clincher machines is pending.

## Will Millinery Shoes Continue Popular?

I was asked the question: "How long will women continue to wear millinery shoes?"

Now this is a hard question to answer, but from our own view of the matter it looks as though this class of footwear was only in its infancy, for we can readily see where every week brings out something a little more elaborate.

How many times have our fair ladies tried at many shoe stores to get shoes and pumps to match their new gowns, only to return home without them, but now one of our large progressive concerns has on the market a fabric, which, when on the foot, cannot be told from white leather and which can be colored any color. These colors may be obtained at any drug store and are commonly used in every home. Thus this new cloth opens up a new field for the retailer, who can now sell shoes to be colored the same as the milliner sells hats to be trimmed at home.

As to the call for millinery shoes, why, women are only just beginning to find out how a pretty shoe gives a more dressy appearance than a swell trimmed hat. Ever notice a stylish woman wearing shoes with the heels run over and which might need a little dressing? Of course you have, and you have thought now if she had a pair of smart shoes on what a difference it would make.

Now again there are times when a woman with a stylish pair of shoes on would be wearing a last year's hat which might be a little faded and not quite the latest style, but you would not think but what she was perfectly dressed. Why? Because a well-dressed foot is the first thing for a woman to look after and when she has that she need not worry so much about her other clothes as long as they are whole and clean, which goes to show that women should dress their feet first in order to get the most stylish appearance.—Shoe Topics.

## Mr. Hennessey Takes Step Higher

Geo. F. Hennessey, who for the past four years has been traveling representative for the United Shoe Machinery Company, in Ontario, has taken permanent charge of the office in Kitchener. Mr. Hennessey came to Toronto from Montreal in 1912, taking up the duties of S. G. Amero,

who had become connected with the Kaufman Rubber Co. After being associated with the Toronto branch, Mr. Hennessey was transferred to Kitchener at the opening of the office of the Company in that city. He is very popular with shoe manufacturers and shoe repairers, and is a gentleman who wears well, and not only makes, but retains

GEO. F. HENNESSEY, KITCHENER, ONT.

friends. His successor is Oliver M. Brooks, late of the Montreal office, who is now on the road. L. W. Hanson is manager of both the Toronto and Kitchener offices of the United Shoe Machinery Co., with Mr. Hennessey as resident manager in the latter city.

## Forcing the Use of Poor Soles

There was never a time when manufacturers had such difficulty in getting proper bottom stock for their shoes. Probably they could get enough such stock for their work if they could afford to pay for it, but the price of cut soles has gone so high at the present time that it is impossible to buy and use good quality soles except in the best shoes, and as a result of this, inferior soles are now used to a much greater extent than before, and especially in certain grades of shoes that sell at a medium and low price, says an exchange.

Many of these soles are branded to a more or less extent, and there are others that do not carry brands, but are wrinkled so that they are all out of shape when they come from the cut sole man. Some of these badly wrinkled soles are of rather poor quality and are really not fit for outsoles, but they are used in the low cost work. They will be used for a long time yet, or until better soles can be obtained at a reasonable cost.

Where a sole comes all wrinkled up and all out of shape it has to be put in temper before it can be worked. A good way to handle such a sole is to wet it up in fairly good shape and let it stand over night. The next morning it can be rolled out, and it will roll out flat, and that is the only way that it ever can be made flat enough to be made into a McKay or any other shoe.

Take a light union sole, very badly wrinkled, and you are liable to crack the grain if you undertake to roll it while

ESTABLISHED 1842.

MONTREAL.

it is dry. These are the soles that are now being worked into many shoes, and even if they are of poor quality they will cost something like twenty-two cents a pair at the lowest, while the next grade above will cost twenty-four cents, and there will not be so very much difference between them.

I am speaking now of women's outsoles which generally come under the head of shoulder soles and scratched soles, and which come along at from twenty-two to twenty-six cents per pair. These are soles that many manufacturers are putting into women's shoes, and it is safe to say that they will not give expected satisfaction in wear. Still, the price of the shoes will not warrant a more expensive sole, such as a semi-fine sole, for instance, which would cost 32 cents per pair, much less the fine soles, which would cost at least two cents a pair more than the semi-fine.

In some shops, where so-called semi-fine and fine soles are seen sorted for women's work, it is pretty difficult to recognize any difference between them. As already said, the fine sole will cost more than the semi-fine, and while it generally pays to get the best, still there are some of the semi-fine that are quite as good as the others, so far as the wearing qualities are concerned. A so-called semi-fine outsole is thrown out on account of some slight imperfection, in most cases, and which imperfection, while it may somewhat mar the looks, will not interfere with its wearing qualities, so that one will give about as much service as the other.

#### Waterproof White Sole Leather

From the very nature of a waterproof material it would seem that all efforts to waterproof white leather and retain its snow-like whiteness would be out of the question. Yet white leather has been satisfactorily waterproofed and is now appearing on the market and has been used most successfully in shoe factories. The writer recently saw some of this leather and was surprised at its clean appearance

and its intense whiteness. It had just as strong waterproof qualities as could be given to any sole leather. This waterproof white leather trims cleanly and takes a very good edge. It is also said to be more durable than white leather that has not been waterproofed. It will be a further boon to white shoes.—Superintendent and Foreman.

#### Small Year for Low Cuts

The production of pumps, oxfords, and other low cut shoes in Lynn shops this year is the smallest for many a year. Some shops had no low cut season at all, but kept on making boots right through the spring and summer run. The few manufacturers who did make low cuts had a very short season on them. Boots seemed to be wanted this summer by women as much as they are wanted in the winter.

#### Exhibits That Interested Shoemen

The Canadian National Exhibition, Toronto, which has become possibly the most widely known Canadian institution of the day, attracted thousands of visitors from every province of the Dominion, and from across the border. The special features of the Fair were thoroughly appreciated, particularly the Federation of the Empire spectacle, which was a masterpiece of pageantry and stagecraft. This year the pretty booths were also a revelation and a delight to the vast company of daily visitors. In the shoe and leather arena, while the exhibits were perhaps not as numerous as in other years, they nevertheless attracted a great deal of favorable comment.

In the Manufacturers' Building the Anglo-Canadian Leather Company occupied their usual space and made several very agreeable changes in their display, which was in charge of S. L. Lawther. The exhibit of "Maple Leaf" hemlock and oak leather, tap soles, heels and counters, as well as the various materials used in the conversion of the

raw hides into the finished product, afforded an interesting study.

The Minister-Myles Shoe Co. were again in evidence, their fine display being under supervision of J. W. Cottrell. All the new spring styles in both men's and women's shoes were presented, along with skins of the various leathers, used in the turning out of the fine footwear made by this firm. Several new creations in colored kid and two-tone effects were much admired.

A. R. Clarke & Co. had a well arranged display of gloves and mitts, and the various kinds of leather, from which they are manufactured. They also showed different lines of warm, comfortable garments made by this firm, who clothe a man from head to toe. The "A.R.C." brand of patent leather was featured.

The Walk-Over Shoe Store, Yonge street, Toronto, had an artistic and varied display of the beautiful new fall styles carried by this firm, in both men's and women's high-class footwear. The booth was attractively dressed by L. H. Wienke, window artist, while Dr. G. L. Conquergood had a complete chiropody department fitted up with all the latest appliances, and many visitors were consulting him for relief from foot troubles.

Under the grandstand Beal Bros. made an attractive display of oil tan moccasins, sporting and military boots, shoe uppers and other lines of findings, which were seen to advantage in a large glass showcase.

The Dunlop Tire and Rubber Co., in the Process Building, had an extensive exhibit of mechanical goods, and a very interesting presentation of their popular rubber heels.

Gutta Percha & Rubber, Limited, also made a creditable showing of military rubbers, lumbermen's rubber boots, leather tops, plain overs, croquets, tennis and sporting shoes and other offerings in the rubber footwear line. The Maltese Cross trade mark was a prominent adjunct.

Nugget Polish Co. occupied a new enlarged booth, showing to advantage the various polishes made by this widely known concern. A demonstration of the merits of the Nugget preparations was also given and the usual souvenirs to the kiddies were a source of delight. John Harris, Canadian manager, L. R. Howard and F. B. Bollard were in charge.

Chas. Tilley & Son, had a well-arranged and well-balanced display of the various polishes, creams and pastes manufactured by this firm, together with a representative line of findings. H. Turner was in charge.

The Scholl Mfg. Co. demonstrated the benefit and comfort of their well-known arch supports for the relief of foot suffering. The wide range of orthopedic appliances and other lines manufactured by this firm were on view and much

interest was aroused in the display which surpassed any previous effort of the company.

Canadian Shoe Findings Novelty Co., 2 Trinity Square, Toronto, made an imposing showing under the grandstand of different widely known lines of polishes. A large amount of advertising matter was distributed, each bill being numbered. Every person holding the 100th number was entitled to a box of Griffin's sterling paste, free of charge.

**A Flexible Wooden Sole**

Barna S. Kohlener, a Hungarian captain of cavalry, whose military usefulness was ended when he lost an arm, has devoted himself since his incapacitation to inventing a

F. E. HOLLAND, CITY SALESMAN, GOODYEAR TIRE AND RUBBER CO., TORONTO, AND C. M. IREDALE, SALES MANAGER OF THE CANADA LAST CO., TORONTO, SEEKING TO ESCAPE THE RECENT WARM WEATHER

wooden-soled shoe that shall have the virtue of flexibility, and announces that he has solved this problem, the hardest that has confronted wooden-soled shoe enthusiasts.

His invention is a sole that, instead of being made of one solid piece of wood, is constructed of a number of layers joined together by heavy oils or fats that thicken and grip the pieces of wood together. After countless experiments, Capt. Kohlener declares that wooden soles constructed in this manner have the elasticity of leather soles, and in addition can be made of old and worn material worked over.

# INDEPENDENT RUBBER COMPANY'S PICNIC

The Annual Event a Great Success—Large Representation of Workers and Friends—Directors and Visitors Well Represented

**T**HE annual picnic and re-union of the Independent Rubber Co., Toronto, was held at Victoria Park, Niagara Falls, Ont., on Saturday, August 19th. Some 200 employes and their friends filled the electric cars provided by the company for the occasion and left Merritton at 9.15 a.m. for the Falls under the chaperonage of Manager Foote and Mrs. Foote. "Uncle Chris," the perennial genial presiding genius of this annual fete, was of course on hand doing the usual credit to his four score years and two. Mr. and Mrs. P. Pocock, of London, ran down for the occasion in their automobile and joined the party at Merritton

At the Falls a coterie of directors and friends from Toronto, including President Jas. Robinson, Messrs. J. A. McLaren, H. White, Mrs. White, Jas. Acton and members of Mr. White's family joined the picnic party at luncheon.

An extensive programme of sports was provided for the occasion, including foot races, jumping, tug-of-war, etc., into which the company entered with great zest, the events being warmly contested throughout. The event of the day, however, was the baseball match between the shoe-making department and the rest of the factory which was so keenly fought out that an extra innings had to be arranged to secure a decision. The game was won by the shoemakers on a score of 18 to 16. The day was extremely warm and by the time the ball game was over the players looked as if they had been in the factory mill pond. Although the playing was good and the score close, there was the utmost good feeling throughout. The prizes which were valuable and practical were distributed at the close by the committee, of which C. S. Hunter was chairman and J. Anderson, secretary.

No more beautiful place in Canada could be found for such a reunion, the picnic grounds being in full sight of both the American and Canadian Falls and the grounds which are under the care of the provincial government were looking their best. The only drawback was that the attractions on both sides of the boundary were such that the party scattered before a group picture could be taken of the members. Snaps were however secured by the SHOE AND LEATHER JOURNAL of the directors and visitors.

It was a great pleasure to the employes and guests to have with them again Mr. Jas. Robinson, president of the company, who looked once more like himself and was as usual brimful of good stories and reminiscences.

Manager Foote handles a picnic like he handles everything else. There was not a hitch in the whole proceedings from start to finish, the party arriving home safely about eight o'clock, tired but happy.

"Uncle Chris" who is too well known now to need an introduction, to the rubber shoe trade at any rate, is one of the youngest old men of his day. Considerably past the eighty mark, his eye is undimmed and his mental vigor unabated. He is able to hold his own in bridge, fishing, conversation or any other occupation calling for alertness of mind and quickness of eye. His reminiscences of the Falls that cover half a century of his life are a never failing source of interest to those who have only occasionally seen this natural wonder.

The directors' luncheon at the Clifton House was a social function that afforded the directors, their wives and their friends present an opportunity for the exchange of those personal amenities that characterize particularly the men who are at the head of this great enterprise.

## Those Who Captured Prizes

The following were the winners in the different events for which valuable prizes were donated, all the contests being spiritedly entered into:—

Baseball match—Won by the Shoe Room Department. 100 yards race—1st, Harry Bowman; 2nd, Wm. Bowman; 3rd, Art Heaton. Young ladies' race (50 yards)—1st, M. Lefebvre; 2nd, Doris Smith; 3rd, Etta McPherson. Boys' race (100 yards), 16 years and under—1st, Wm. Taylor; 2nd, Wm. Scott; 3rd, Chas. Hill; 4th, Frank Wade. Married men's race (100 yards)—1st, Wm. Bowman; 2nd, J. Stewart; 3rd, Jim Reid; 4th, A. Heaton. Married ladies' race (50 yards)—1st, Mrs. Reid; 2nd, Mrs. Kaupp; 3rd, Mrs. Leeson; 4th, Mrs. Cameron. Girls' race (75 yards), 16 years and under—1st, M. Brennan; 2nd, D. Smith; 3rd, I. Cudney; 4th, K. Lucking. 200 yards race—1st, F. Bow-

Bowman. Ladies' aggregate prize—M. Lefevbre.

**THE "RETURN SHOES" EVIL**

Women who have always sought long wear in foot-gear endurance and most about style—that is, are daily falling into line with those who think least about wear as far as selection is concerned. Tan calf and black kid have been displaced by the "ice cream" shoes on women who formerly would not buy patent leather in view of the stores' frank announcement that they did not guarantee patent leather at any price, says the "Dry Goods Economist."

The reports of many stores in various centers as to numerous complaints and dissatisfaction regarding the wear of the present "perishables" is a natural outcome of the change referred to.

Probably no department of retailing suffered more than shoes from the abuse of the privilege of returning goods when

such abuse was at its height, and no department, therefore, has benefited more by the general movement against the evil. Unless the merchants stand behind their shoe departments during the present season and protect them as much as possible against unjust demands, the greatest summer the shoe trade has ever seen will not be what it should be in the way of profits.

The demand for patent leather shoes has gone steadily ahead, in spite of the fact that almost nobody expects any redress in case of dissatisfaction with the leather. People who want patent leather shoes evidently forget about durability. They want a handsome pair of "patents," and they are willing to pay a good price for them.

It is the same with most of the women who buy the "ice cream" shoes of the present summer. They buy them just as they have always bought patent leather. They hope to get reasonable wear out of their shoes, but they buy them primarily from a fashion motive. A skilfully offered suggestion from the salesman, to the effect that the fancy styles are "not guaranteed," will not stay the demand any more than it has hampered the sale of patent leather shoes. And such a suggestion to customers who are changing from the more substantial shoes to the light "glove" styles will save the department manager later on from a lot of ineffective explaining and, in many cases, from the cost—or loss—of an extra pair of shoes.

"What to Expect and What Not to Expect in Footwear, and the Reasons," is the title of a folder issued by the Massachusetts Retail Shoe Merchants' Association, Inc., and distributed by E. W. Burt & Co., Inc. This folder contains technical information of value to every shoe salesman.

**THREE WELL-LIKED TRAVELLING SALESMAN**

Here are three representatives of the Hydro City Shoe Manufacturers, Limited, Kitchener, Ont., formerly the G. V. Oberholtzer Company. J. Lauffer looks after the interests of the firm in Manitoba and Saskatchewan, and A. Foster in Ontario east and north of Kitchener. Both these gentlemen have been in the service of the company for the last twenty-three years, and are well and widely known to the trade. Frank M. Smith is the traveler seen in the centre. He represents the Hydro City Shoe Manufacturers and the Lady Belle Shoe Company in Western Ontario. All these gentlemen are now calling upon the trade with snappy new samples for the coming season.

THEY ARE NOW OUT ON  
SPRING SELLING TRIP

J. LAUFFER

F. M. SMITH

A. FOSTER

**NEWSY BRIEFS FROM WINNIPEG**

W. Brown, of the staff of the Ryan-Devlin Shoe Co., is spending his holidays in Toronto and other eastern centres.

Bert Hendron, late of the Regal shoe store, has taken a position on the road with the Thomas Ryan Co., wholesale shoes.

W. Patterson, of the staff of Kilgour, Rimer & Co., who has been confined to the house, is able to be around again.

G. J. Scott, western representative for P. Jacobi, shoe store supplies, Toronto, was in Winnipeg recently on his way west.

Business in retail line is very good and it would appear as if bronze shoes would have the call for fall among the fair sex. Dark tan and mahogany seem to be selling well in the men's line with a preference for the English last and medium toe.

**BUDGET OF NOTES FROM ST. JOHN**

A. V. Wright, of Moose Jaw, Sask., who was formerly employed with McRobbie Shoe Company, Limited, and Percy Steel in St. John, N.B., and went west a few years ago, arrived in the city a few days ago and was warmly welcomed by many friends and acquaintances. He is wearing the King's uniform and is attached to the 128th Battalion, which he will join in Halifax.

E. A. Redding has arrived in St. John to take over the management of J. M. Humphrey & Company's boot and shoe factory, succeeding H. H. Lightford, who accepted a position with a large shoe and leather concern in the States. Mr. Redding had been employed with the Robert Taylor Company in Halifax.

Elmore Davis and wife, of Kingston, Ontario, passed

through the city a few days ago en route to his home, after having toured the Maritime Provinces, combining business and pleasure.

Harold W. Rising, secretary-treasurer of the firm of Waterbury & Rising, Limited, returned August 25th from a camping trip along the St. John River.

E. L. Rising, president of the firm of Waterbury & Rising, was on a trip to various points in Ontario on business.

Percy Steel, boot and shoe dealer in St. John, N.B., received a letter recently from his brother Private William A. Steel, who is convalescent from an injury sustained on June 2nd. Private Steel left Montreal with the 42nd Highlanders and proceeded to the front with that unit. On June 2nd he was struck on the ankle with a piece of flying shrapnel and the bone was broken. He was sent back to a base hospital where he remained for a few days and was then sent to England. Although his ankle is still badly swollen he has been attached to the 92nd reserve battalion, at his own request, and expects to return to the front in a few weeks.

**GIVES THE CURIOUS NO SATISFACTION**

"Some times I have a stranger come in and ask me what size or width such a shoe is. I know they have got it somewhere else and think the size or width has been misrepresented in order to effect a sale. Now I never give such parties any satisfaction. I state that each shoe manufacturer has his own code of markings and as I do not handle the line it would be impossible for me to tell without having the code at my disposal. If the caller is persistent, not to say nery, I have a card and show them exactly what I mean. I inform them that in some markings the first figure represents the size, in others it represents the width and in others a subtraction has to be made; that no two firms adopt the same designations. Then I give them some examples knowing that one not acquainted with the business can never comprehend such a system of hieroglyphics. I have enough worries over my own business without paying attention to the complaints or suspicions of some other fellow's customers," said a leading Montreal retailer.

# AMONG THE SHOE MEN.

W. E. Woelfle, of the W. E. Woelfle Shoe Co., Kitchener, Ont., was in Toronto and Montreal last week on business.

Richard O'Roque, superintendent of John McCarthy & Sons, sheep skin tanners, Salem, Mass., and Thos. Dunney, superintendent of Peabody, Mass., plant of Pfister & Vogel, spent a few days in Toronto last week on business.

The James Muir Co., shoe manufacturers, Montreal, are this season adding a popular priced line of women's Goodyear welts and fine McKays, in addition to their regular range of men's welts, by which they expect to increase their output considerably. They report business very good, and are looking forward to a most successful season.

C. L. Van Geel, sales manager of the Tillsonburg Shoe Co., Ltd., was in Toronto last week on business.

Jos. A. Hamel passed away recently at the residence of his son in Brantford. He had been ailing for some weeks, and was sixty-eight years of age, being born in Quebec. Mr. Hamel was employed for many years as a shoemaker in the factory of Getty & Scott, Galt, Ont.

Samuel G. Amero, manager of the London, Ont., branch of the Kaufman Rubber Co. has joined the ranks of the Benedicts. On August 17, at St. Patrick's Church, McCaul Street, Toronto, he was wedded to Miss Agnes Gertrude Morgan, of Toronto, formerly of Lynn, Mass. The ceremony was witnessed by a number of relatives and friends of the uniting parties. Mr. Amero and bride, after a visit to Gloucester, Lynn and other New England centres, will take up their residence in London. Many friends will extend congratulations to Mr. Amero, who is widely known to the shoe trade through his long connection with the Toronto office of the United Shoe Machinery Co., and during the last few years, with the Kaufman Rubber Co.

J. A. Pine has recently resigned his position as quality man of the Ames-Holden-McCready factory No. 2, Montreal.

Harry E. Litchfield, for the past 12 years connected with the Regal Shoe Co. and holding positions of responsibility, has resigned. Mr. Litchfield, who is well known in Toronto, having held an important post in the Canadian Regal Shoe factory for some time, entered the employ of the company as paymaster.

"Here's the limit." A "lady" went into a prominent shoe store the other day in Toronto in quest of footwear. After giving the clerk a "pleasant" half hour she decided on a pair of grey suede boots. Imagine the chagrin of the clerk when she tendered "in exchange" a pair of shoes from a certain big store, requesting the clerk to return them for the equivalent refund.

The employees of Getty & Scott, Limited, of Galt, Ont., recently held their annual outing to Niagara Falls, Ont. The excursion, which was under the auspices of the Benefit Society, was attended by over 500 persons and was successful and enjoyable in every way.

David Marsh, of the Wm. A. Marsh Co., Quebec, was in Hamilton, London and Toronto last week on business.

William Avison has resigned his position as foreman of lasting department at Getty & Scott's factory, Galt, Ont., and is succeeded by Chas. Holmes, of Lynn, Mass.

Wilfrid Argue, shoe dealer, 235 Broadview Avenue, has opened a new shoe store at 1382 Bathurst St., between Alcina and Helena Avenues. The store, which was built

by Mr. Argue, is a neat, attractive one, and a credit to the business establishments in that part of Toronto.

The Huck Glove Co. Ltd., with a capital stock of \$50,000 and head offices in Kitchener, has been granted a charter. The company is empowered to manufacture and deal in gloves, mitts, etc.

Th. Meyer, manufacturer of stitch down sandals, and play outing shoes, Montreal, was in Toronto last week calling upon the trade.

It is understood that the Canadian Consolidated Felt Co., of which T. H. Rieder is president, will erect a large addition to the Kimmel Felt Factory, on Margaret Avenue, Kitchener, Ont. Contracts have been let for the work and the present floor space will be increased by nearly one acre.

Jos. Patterson, of St. Mary's, Ont., who lately moved into a new store in that town, which he has splendidly fitted up, spent a few days in Toronto last week, calling upon the trade. Mr. Patterson has been in the shoe and traveling goods business for the past eleven years.

## ENTERS UPON NEW DUTIES

F. O. Woods, who has been connected with the Regal Shoe Store, Winnipeg, for the past two years, has gone to Saskatoon, where he has taken a position in the shoe section of the J. F. Cairns department store. Mr. Woods was born in Pictou, N.S., and worked there eight years, where he laid

F. O. WOODS, WINNIPEG, MAN.

a good foundation in the shoe game. Coming to Winnipeg, he was for three years with the Moyer Shoe, Limited. Mr. Woods recently returned from Pictou, N.S., where he was attending the funeral of his father. A young man who has given close study to styles, values and fitting, many friends will wish him every success in his new position.

There is no doubt that shoe manufacturers in Canada are in better shape now than they have been for years past. A large leather firm in the United States who is selling in that country and has kept a record of the methods of payment reports a much larger number of accounts being paid within thirty days than ever before. The percentage of bills paid from over thirty to over ninety days is also much smaller now than for the past four years.—The Weekly Bulletin.

E. E. Bird, of Boston, representative for the Davis Leather Co. and A. Davis & Son, is spending a few days in Newmarket, Toronto and Kingston.

In its fiscal year just ended, American Hide and Leather admits a balance of profits of 12 per cent. for \$13,000,000 preferred. But this is after an interest sinking fund and depreciation item of \$1,465,125, an increase of \$409,417, or 55 per cent. over the previous year. This \$409,417 is equal to an additional 3.1 per cent. on the preferred. In other words, the fair statement is that American Hide earned 15.7 per cent. on its preferred stock in the last year. Practically every cent of the \$409,417 increase in interest and depreciation seems to have gone into purchase of bonds.

Russell C. Foy, city traveller for Minister, Myles Shoe Co., Toronto, has returned, after spending his holidays at Presqu'île, Ont.

The annual excursion of the employees of J. Leckie & Co., shoe manufacturers, Vancouver, was held recently to Bowen Island. It was the occasion of the fourth annual outing given by the company to their staff in all departments, and was attended by over three hundred persons. An interesting program of sports and games was run off, and the events were keenly contested. The picnic was unanimously voted the most successful ever held.

S. T. Duclos, of Duclos & Payan, leather manufacturers, St. Hyacinthe, was elected alderman for ward two in that city recently by a majority of 85, the largest ever obtained in that ward.

J. A. Crawford, who conducted a shoe repairing business in Brockville, died recently at an advanced age. He came originally from Belleville.

M. J. Ramsay, shoe retailer, Walkerton, Ont., was in Toronto last week on business.

W. J. Detweiler, shoe retailer, of Sault Ste. Marie, Ont., was among the many recent Exhibition visitors to Toronto.

C. F. Schuszler, who is on the traveling staff of the Regal Shoe Co., of Toronto, has returned from spending a pleasant holiday at his old home at Springfield, Ohio.

E. J. Hill, Lethbridge, Alta., head of the department store in that city which bears his name, is spending a few days in Toronto.

The new samples of Jackson & Savage, Montreal, are now being shown to the trade, which is being covered in north-western Ontario by A. T. Hanes, in south-western Ontario by S. G. Best, by Geo. D. Lloyd in Toronto, and the north, and L. J. Iles in Eastern Ontario. Four new lasts have been added in the men's line, being of the medium recede toe and full round toe type. There are a number of offerings in mahogany and tobacco brown, together with a few cloth tops. Some samples have rubber soles and heels, and the models are plain, conservative and decidedly neat in appearance. A splendid range of shapely shoes for boys in both welts and McKays is also shown, in all leathers, and on right-up-to-the-minute lasts. There is also a nice line for girls and misses. One exceptionally strong feature this year is the presentation of white goods for men, women, misses and children, in all styles, both low and high cut. These come in poplin, sea island duck and canvas, being smart and trim.

Lamontagne Limited, Montreal, manufacturers of harness, trunks and bags, have opened a branch store at 52

Crown street, Quebec. Eugene Mercil, who has had a wide experience in the leather goods trade, has been appointed manager. The firm made a very creditable display in the Industrial Palace, at the recent Quebec exposition.

T. H. Rieder, vice-president and general manager of the Canadian Consolidated Rubber Company, Limited, Montreal has been elected to the board of directors of Ames-Holden-McCready, Limited. His election fills the vacancy left by the recent resignation of A. L. Johnson.

E. W. Day has been appointed sales manager of the F. S. Carr Rubber Company of Canada at Granby. Mr. Dunham, the general manager, reports unusually active demand for rubber heels.

W. G. Fallen, one of the western representatives of Getty & Scott, Galt, Ont., attended the Imperial Shrine session in Buffalo and also the Great Priory gathering in Hamilton recently.

Mr. and Mrs. Chas. Bonnick, of Toronto, left this week on an extended trip through the West. They will go as far as Banff and will visit their son at Red Deer, Alta.

A. L. Johnson, late general sales manager, Ames-Holden-McCready, Limited, was in Toronto last week on his way to Winnipeg. It is understood that Mr. Johnson is making arrangements to go into the wholesale shoe business in Montreal.

George Rupert Lovell, son of James S. Lovell, of Toronto, the widely known shoe traveler, who crossed the seas with the 74th Battalion C.E.F., and afterwards became a member of the 52nd Battalion, B.E.F., entered No. 13 General Hospital, Bologne, France, on August 15th, suffering from concussion.

E. Larose, sales manager of the Canadian Footwear Co., Montreal, has returned from a holiday trip to New England points.

Bert Parker, of Parker-Irwin, Limited, Montreal, has returned from a business visit through the Maritime Provinces, calling upon the shoe factories.

G. L. Waldon, one of the western representatives of Getty & Scott, Galt, Ont., was married in London, July 15th. He spent his honeymoon in Detroit, Chicago, St. Paul and Minneapolis, and also a few days in Atlantic City. Mr. Waldon will reside in Galt, where he will look after the interests of his customers when off the road.

Harry Adams, of Montreal, will carry the Canadian Footwear Company's lines in the Western Provinces during the coming season in addition to the range of the Slater Shoe Co. He left last week on an extended trip to the Coast.

W. A. Lane, manager of the Montreal office of J. A. Scott has gone to Quebec in the interests of the upper leather department of the firm, during the absence of Mr. Scott at the front.

T. L. Guinivan, of the Walk-Over Boot Shop, Yonge street, Toronto, has returned from spending his holidays in Boston and other New England points.

H. Grey Hodges and wife, of Chatham, Ont., were in Galt recently on their way to Toronto Fair. While in Galt they visited Getty & Scott on a buying trip.

The Woelfle Shoe Co., Limited, Kitchener, Ont., report business exceptionally good. In spite of the scarcity of help due to the large number of enlistments from their factory they have enjoyed remarkably good success and are in a position to give their customers fine service during the ensuing season. Their new spring samples are right up to the minute, being the most representative and attractive they have ever produced.

Jas. B. Grant, formerly of the Slater Shoe Co., Montreal, will cover the territory from Port Arthur to Moose Jaw for Scott-Chamberlain, Limited, of London, Ont., for the coming season.

Jas. Dillon, of Dillon & Moore, shoe retailers, St. Catharines, Ont., was in Toronto last week on business.

At a recent lawn bowling tournament at Exeter, Ont., second prize in the trophy event was captured by a rink of bowlers from Seaforth, skipped by Walter Willis, shoe dealer, of that town. Mr. Willis, who lost in the final, was runner up last year. He won the Seaforth tourney, and was also runner up at Stratford last year, which makes him the runner up on three occasions. He is an ardent and skilled bowler, and it was only by the hardest kind of luck that he was defeated in the Exeter finals.

The shoe stock of George Stanyon, Unionville, Ont., has been sold.

Frank Fishman, dealer in shoes and clothing, Welland, Ont., recently assigned to N. L. Martin.

R. M. W. McLaren, secretary and managing director of D. K. McLaren, Limited, manufacturer of leather belting, etc., Montreal, died suddenly at his home in Westmount, Que., on August 20. He was the youngest son of the late D. K. McLaren, being connected with the firm from its inception. The deceased was well known in manufacturing circles and leaves a wife and two children, a brother, W. F. McLaren, being president of D. K. McLaren, Limited.

M. Venerando has bought out the shoe repair shop of John Sutherland, 163 Simcoe St., Peterborough, Ont.

The Chicago Cut Price Shoe Co., of Winkler, Man., has opened a shoe store in that town. The business is controlled by W. W. Veitch.

J. B. Douglas, boots and shoes, Calgary, have changed the name of their business to The Douglas Shoe Store, Limited.

Jacob Wirth, dealer in boots and shoes, Neudorf, Sask., has sold out to Wirth & Saltzman.

Adam Sippel, shoe retailer of Kitchener, Ont., and wife, spent a few days in Toronto last week. Mr. Sippel, who has been ill for some months, is gradually regaining his strength, and hopes in the course of a few weeks to be able to attend to business, which has been looked after in his absence by his son, who has been associated with him in the store for some years.

C. L. Owens, of Owens-Elmes, Limited, shoe retailers, Toronto, spent a few days in New York recently on business.

An interesting and well arranged display of Neolin soles and Wingfoot rubber heels was made recently in the window of the Regal shoe store, Toronto. Several of the latest styles and lasts in men's shoes, made by the Regal Shoe Co., Toronto, all having Neolin soles and Wingfoot rubber heels, were shown to advantage, while cards bearing samples of the sole stock and heels were exhibited among the fine collection of footwear which was attractively arranged by J. F. Dorman.

Stanley H. Packard, purchasing agent for Ames-Holden-McCready, Limited, Montreal, was in Boston recently on a business trip.

W. J. Ashplant, of H. Ashplant & Sons, London, Ont., was in Toronto last week calling upon the trade.

Alex. Ross, manager of the shoe department for Thomas C. Watkins, Limited, Hamilton, was among the visitors to Toronto during the Exhibition.

The second annual picnic of the office and warehouse staff of the Canadian Consolidated Rubber Co., Toronto, was held to Centre Island on August 19th. There was an interesting programme of games and sports and a baseball match between the shoe and mechanical departments, the former winning. J. A. Connor, Ontario manager of the company, pitched a couple of innings for the mechanical department. His efforts were altogether too "mechanical" and he was taken out of the box and relegated to a less dangerous position in the field. There were nearly a hundred in attendance and all were entertained to an excellent dinner by the company.

The placing season for tennis and sporting shoes opens on September 5th and the new price lists have been issued to the trade. Due to the advance in the price of duck and

other materials an increase of five to ten cents a pair prevails on most lines. Owing to the Exhibitions in Toronto, London and Ottawa, it is not likely that the representatives of the various firms will call upon the trade until about the middle of the month.

J. S. Lovell, who represents Corbeil, Limited, of Montreal, in Ontario, was showing a fine range of new spring samples in Toronto last week. Three new lasts of the recede, moderate toe have been added and a number of the offerings have rubber soles and heels and Neolin soles. The firm are making a specialty of their Landover welts for men and boys while their Leader brand is right up to the mark. The company are also stocking various lines of staples. There is a liberal showing in tobacco brown, mahogany and nut brown calf in both bals and bluchers with straight and wing tips. The boys' range is replete on neat foot-form lasts and the showing in white canvas for women's, misses' and children's in both high and low cuts is an attractive one.

W. C. Myers, of Toronto, who represents the La Parisienne Shoe Co., of Montreal in Northern and Western Ontario and the Western Provinces, was showing models of new spring lines in Toronto during Exhibition week. The range

THE JOSTLING CROWD IN FRONT OF THE SHOE STORE OF GEORGE C. LOCKE & CO., CALGARY, ALTA., DURING A RECENT SALE

embraces welts, turns and McKays in all the leading shades, tops being from seven and half to eight inches. Tobacco brown, mahognay, dark grey, white and other colors are featured on plain, receding toes and Louis heels. A number of combination colors are seen. Calf leather shoes are right to the front, a few having cloth tops. The line of turns in dull and glazed kid is exceptionally inviting, while a leader is the plain pump with imitation collar and feather edge. Several new lasts are represented. In white goods, kid, calf and duck, there is a pleasing offering. The high cut bal with seventeen and nineteen eyelets appears to be a favorite in all the darker shades while the two-tone effect is not overlooked.

P. M. Goff and S. M. Clapp, of Toronto, have gone on a fishing expedition to the Port Severn River and expect to land the largest catch of the season, having engaged several flatcars to bring home the marine monsters.

Robert Wall, who represents the Perth Shoe Co., Perth, Ont., in the Western Provinces, left last week on an extended selling trip with a fine line of spring samples, embracing all the latest ideas in styles.

J. W. Deegan, of North Bay, spent a few days in Toronto last week calling upon the trade.

R. H. Greene, secretary and manager of the footwear department of Gutta Percha and Rubber, Limited, Toronto, is on an extended business trip to the company's branches throughout Western Canada, going as far as the Coast.

Howard Duffield, of the John McPherson Co., Hamilton, was in Montreal and Quebec last week on business.

Elmer Poyer, of the Canadian-Arrowsmith Manufacturing Co., Niagara Falls, Ont., spent a few days in Montreal last week. He reports business at the factory as being exceptionally brisk and looks forward to an active fall trade.

The John Palmer Co., of Fredericton, N.B., are unusually busy in the shoepack line at the present time, domestic trade being ahead of last year. The firm are somewhat short handed, a considerable number of their employes having enlisted for overseas service. The trench boot department of the company is exceptionally busy on special orders, going direct to the consumer—a good many of the boots going to the trenches, England and to the training camps in Canada.

G. H. Ansley, manager of the Perth Shoe Co., Perth, Ont., spent a few days in Toronto last week on business.

W. J. Badcock, shoe repairer, has removed to larger and more commodious premises at 102 10th street northwest, Calgary.

### NEW HEEL PAD CIRCULATES AIR

A new invention has just been placed upon the market which is meeting with a warm reception, not only on the part of the retail shoe trade, but of those who are using it. Known as "Aero-Peds," they are being manufactured in Toronto at the present time and introduced to the trade by leading findings houses. Aero-Peds are cushion forms to place inside the shoe at the heel. They are composed of a series of resilient air cells, each cell being provided with its individual

air vent. This forces a circulation inside and through the shoe, keeping the foot cool and comfortable. The resilient air cells contain two cubic inches of air when inflated and form a pneumatic cushion that absorbs the shock or jar felt when walking. The weight of the body on the foot, when walking, alternates from heel to ball, and this pressure, coming in contact with Aero-Peds at the heel, causes the cells to expel the air they contain. Aero-Peds are the result of years of study and experiment, and are regarded as a decided advance in making life's walk nice and comfortable. Aero-Peds are transferable, and in addition to having a nice cushion effect will wear well and afford foot sufferers every ease and satisfaction.

C. H. Reilly, shoe retailer, of Welland, Ont., spent a few days in Toronto last week.

John R. Miller, shoemaker, of Wapella, Sask., has opened a shoe store in connection with his business.

John P. Wilson, of Midland, Ont., was in Toronto lately calling upon the trade.

Mr. Shewan, of Nation & Shewan, Limited, Brandon, Man., was in Montreal and Toronto recently on business.

A recent despatch from London, England, says:—Of great interest to Canadian leather dealers is the announcement through the press bureau that certain classes of Canadian leather will be required for Government purposes under the Defence of the Realm Act. They include Canadian oak sides best and seconds, in the following weights: Fourteen, sixteen, eighteen and twenty pounds; bends, seven, eight, nine and ten pounds. Butts are included and will be calculated as two bends. Returns of such stocks in Britain compulsory. It is expected that the Canadian Government will issue a similar announcement.

A maker of women's shoes is making up a new line of boots for winter wear. They have soles of a new white leather, that is slip-proof and waterproof. It is light in weight and flexible, too. The uppers are of black calf, tan calf or white leather. The shoes are either for street wear or for skating wear.

A deal has been closed whereby the Partridge Rubber Company will take over the business of the Standard Tire and Rubber Company, Guelph, carry out the contracts, etc., and besides this will transfer the Montreal business to Guelph. The Montreal factory has been engaged in the manufacture of all sorts of small druggists' rubber goods, and have some excellent contracts on hand. The Montreal hands will be brought to Guelph.

F. P. Stockton, of the C. S. Hyman Co., London, Ont., spent a few days in Montreal last week, calling upon the trade.

R. B. Van Dine, shoe dealer, Fredericton, is putting in a new store front, which will add much to the appearance of his well kept shop.

Albert A. Schnurr, for many years engaged in the shoe and grocery line at Linwood, passed away at the hospital in Kitchener, Ont., after a brief illness. Deceased is survived by his aged father, two brothers and three sisters.

Robert D. Ayling, who represents Church & Co., of Northampton, England, and has sample rooms in the Canadian Building, Victoria street, Toronto, has returned from spending his holidays at Lake Erie points. Mr. Ayling has just received some high-class samples from his firm who specialize in an exclusive men's trade and devote particular attention to women's high-grade welts. Several new lasts are seen this season, straight and of the orthopedic type. Scotch brogues, high and low cut, with wing tips and perforations on tip, foxing and lace stay, are right to the forefront. These come in dark brown and black leathers, with full double soles. Another interesting shoe is a man's patent button, with antelope top, while other offerings are seen in tan and black kid, and kangaroo, in bal and blucher. Ladies' and gentlemen's riding boots of tan and black calf, with hand closed seams and hand welted are superior productions in every way. A nice line of women's shoes is seen in a plain tan willow calf bal, eight inches in height and brogues in both high cut and oxford styles, with straight moderate toe. A splendid showing is also made in military leggings and tailor-made gaiters. Church & Co. report that, while they are well covered with leather for a season or two, they are apprehensive of future supplies, after their present stock is exhausted.

R. L. Savage, of Toronto, who represents Clark Bros., Limited, has returned from a business trip to Montreal and St. Stephen, N.B., and is now showing a splendid range of snappy new models to the trade.

E. D. Pretty has taken a position with the Goodyear Tire and Rubber Co., Toronto, and is covering Western Ontario in the interests of Neolin, which he reports is taking well with the shoemaking trade. Mr. Pretty has had an extended experience as a shoe worker and is meeting with unusual success on the road.

W. Howarth, shoe retailer, 952 Gerrard east, Toronto, has sold out to A. E. Cudmore, who was in business a few years ago at that stand. Mr. Howarth has opened a new store at 772 Yonge street, near the corner of Bloor, in the premises formerly occupied by the uptown branch of the Royal Shoe Co.

George H. Ferguson, of Vancouver, who represents Clark Bros., Limited, in the Western Provinces, spent a few days recently in St. Stephen and left last week for Winnipeg.

R. E. Jamieson, general sales manager of the Canadian Consolidated Rubber Co., Montreal, was in Toronto lately on business.

M. L. Savage, Calgary, who represents the Tetrault Shoe Mfg. Co., and J. A. & M. Cote in the West, was in Montreal last week on business and before returning to the Prairie Provinces is spending a few days in Ayer, Mass.

H. S. Campbell, shoe retailer, Fredericton, N.B., was in Montreal on business last week.

James Stewart, catcher of the St. Stephen, N.B., nine, has won his Special Prize, donated by the Amherst Boot and Shoe Co., of Amherst, N.S., for the most runs made in the first round. Mr. Stewart had seven tallies to his credit. Every year since the league first opened, through the instrumentality of W. G. Miller, manager of the Amherst Boot and Shoe Co., Retail, the league players have had something to compete for.

The Perfection Tire and Motor Co., Limited, manufacturers of automobile tires and mechanical rubber goods, will erect a factory in Niagara Falls, Ont., providing the rate-payers ratify a by-law which will be presented to them in three weeks.

George H. Taylor, of Toronto, who represents the Kingsbury Footwear Co., spent a few days in Montreal recently.

Jas. Lawther, of Toronto, who represents the Hartt Boot & Shoe Co., is spending a few days in Fredericton, N.B.

Orders for 26,000,000 pairs of shoes for the British, Serbian, French, Russian, Italian and Belgian armies have been received by British manufacturers since the outbreak of the war. One-fourth of the total, or more than 100,000 pairs a week, have been alone supplied by the workmen of Northampton, the chief seat of the English shoe manufacture, an hour's ride northwest of London. The manufacturers of this place are turning out a second instalment of 3,000,000 pairs of footwear for the Russians this time, boots known as the Cossacks. Owing partly to their pre-occupation with army contracts, partly to depletion of their staffs of male operatives, and partly to restrictions imposed by the Government on the disposal by tanners and merchants of leather suitable for army purposes, boot and shoe manufacturers are finding considerable difficulty in supplying the demands.

The great trouble with the counters that go over on the side has not so much to do with the quality of the counter as the height of the heel itself, says Lynn Telegram. Any extremely high heel would have a tendency to throw a counter

over just the same as a low, broad heel would have a tendency to hold it up. Take some of these very high heels, and the top-lift is about as large as a 25-cent piece; in some cases not so large, and there is almost nothing for a woman to step on or stand on, and it is almost impossible for a woman to have a straight heel under such conditions. With an extremely small top-lift a heel is bound to tip one way of the other and sooner or later the whole shoe is bound to go over on the side. As soon as a heel begins to wear off the counter is bound to go, so that it is actually necessary to get these high heels straightened up at once if the shoes are to continue in wear. Even where the heel-seat is broad enough for the heel of the foot it is necessary to keep the heels straight and this is especially true of all those high heels that are worn so much at the present time.

#### SHOEMAN WHO HAS PUBLIC SPIRIT

E. C. Garbutt, shoe retailer, of Picton, Ont., who was re-elected Grand Treasurer of Grand Encampment of Ontario, I.O.O.F., held recently at Chatham, Ont., is widely known both in Triple Link circles and in footwear ranks. He has had thirty-three years' experience in the shoe game,

E. C. GARBUTT, PICTON, ONT.

and a remarkable instance is that he has been under the same roof for that period, having been employed by the late J. C. North for twenty-nine years, the last nineteen of which he participated in the profits earned by the firm. For the past four years Mr. Garbutt has been running the business himself.

In regard to his connection with the Independent Order of Odd Fellows, the subject of this sketch joined Bay of Quinte Lodge, No. 143, in 1880, and passed through the several chairs. He is also identified with Picton Encampment No. 72, having the honor and rank of P. C. P., and also D. D. G. P. Mr. Garbutt also enjoys the distinction of being Past Grand Patriarch and Past Grand Representative of the Grand Encampment of Ontario, and as already stated, now holds the position of Grand Treasurer. A Past Master of Prince Edward Lodge, No. 18, A.F. & A.M., Mr. Garbutt is also Past Preceptor of St. George Preceptory, Picton, and a member of Prince Edward Chapter, R.A.M.

Mr. Garbutt is another of the many shoemen who take an interest in the welfare and progress of the town in which they reside, and for the past fifteen years has been a member of the Board of Education.

**WHOLESALE SHOE MANUFACTURERS**—A practical, experienced shoeman and salesman, with some twenty years' retail experience, is opening a sample room and desires to represent manufacturers of all lines of footwear. Those carrying stock lines preferred. Might consider road position. Will get business. Best recommendations. What have you to offer? Box 8, SHOE AND LEATHER JOURNAL, Toronto.

# COMFORT SHOES

That's a name that could be worthily added to already well-established names of these shoes

*Doctors*  
ANTI-SEPTIC SHOE  
PAT 1906 1909  
NON PERSPIRO

Here's a shoe that is absolutely waterproof in both sole and upper. The sole is also constructed in a manner that assures an even temperature of the foot in all weathers.

*THE Professor*  
PAT. N<sup>o</sup>. 119409  
GOLD CROSS SHOE

This shoe has the same qualities that distinguish the "Doctors" Shoe. But, in addition, the "Professor" is fitted with a patent, cushioned inner sole that greatly improves the ease of the foot when walking.

There is just that mark of "Something Different" about these shoes that gives them distinctiveness and sets them apart from the general and common run of men's footwear.

First comes COMFORT; then MANUFACTURE; next is STYLE, followed by FINISH, all culminating in one of the BEST SHOE VALUES in the trade to-day.

Surely the above are the qualifications of a good seller and, as these shoes have now become well known, the demand for them is growing constantly. Specify by name to your jobber when ordering and should he not keep them write us direct.

# At the Head of the Line

After another year's test of the wearing and selling qualities of

## “MONARCH,” “BRANDON” AND “DR. BRANDON” CUSHION SOLE SHOES

They have proven beyond all doubt their superior wearing worth. Dressy in design, fine in finish, masterfully made, they have secured and retain that top place with the buyers of shoes, from which they cannot be dislodged. The advantage is all yours to handle them.

### The quality that is built into these lines

has been one potential factor in their popularity and immense sale. Possessing a range to meet almost every requirement the various types of men's feet demand, places you in a position to render an unusual shoe-service. The plainer and more common-sense shapes have been adhered to, as these are most called for by the public.

**PROMPT SERVICE** is an outstanding feature in our Order Department. Phone, wire or write and test it.

As it is impossible for our representatives to see all of our customers early in the season, we would kindly ask you to wait and see the Brandon Samples before placing your orders. It will be to your advantage.

*“Where quality counts we win”*

## That Shoe Dealers Should Write Us

For  
Spring

asking that we make sure our travellers should not miss them with the Spring Samples, is a strong proof of the real trade advantage of CLASSIC SHOES. In fact, it speaks volumes for the commercial standing of these well-established lines.

When shrewd dealers, who have handled these goods, season after season, fear they miss seeing the Spring Samples, it demonstrates that CLASSIC SHOES give that satisfactory service to customers, that results in a continued profit-producing business for the dealer, and has made the shoes a standard, yes, even a classic in fine footwear.

The  
Classic  
Welts

Shoes of Quality for  
Women and Children

**GETTY & SCOTT LIMITED**  
GALT - ONTARIO

# This Season's Samples

represent the best efforts and achievements of the style-smith's craft. The vogue dominating Spring's demands will be featured in lasts with pointed recede toes, high heels—some as high as 2½ inches—in Louis and Grecian designs. The chief characteristic is an adherence to the feather-weight type, with extremely light edges, that lend an airy and stagey effect. The flexibility of the soles rivals that of a cosy slipper that a woman may roll up and slip into her hand bag.

Now  
Ready

The leading shades for Spring will be greys, browns and two-tone effects in grey and bronze, and these and harmonizing shades will predominate in our Spring lines, in addition to black kid, patents with black cloth tops, and light kid calf with dull kid tops. Nor have we overlooked novelty whites, wing tops and perforations, collar tops, etc. All high grade.

## THE COMING SPRING AND SUMMER SEASON

**Looking Ahead—Manufacturers Show Faith by Their Works—Expect a Good, Healthy Season—Will Start Earlier Than Last Year—Styles More Assured—The Atmosphere Clearer as to Materials and Prices**

**T**HE lady on this month's SHOE AND LEATHER JOURNAL cover is Spring's "First Robin." Paris has sent forth the mandate that skirts are to be longer—down to the ankles if you please—and down they must go. The full effect upon the shoe trade is somewhat difficult to determine so far in advance, but shoemen do not seem to be doing much worrying. The lady shows beneath her trim ankle the contour of the white pump, which is to be the pièce de resistance in footwear next year, so that the SHOE AND LEATHER JOURNAL cover practically tells the whole story.

Manufacturers claim that in spite of the peculiar conditions of last June and July, their sales for the past six months have gone very little above normal. As a result they have lost some of the "jumpiness" that they showed early in the summer, and are more inclined to sit down and look the situation squarely in the face. The result is that in the past few weeks there has been the first decided lull in the leather market that has occurred for the best part of a year. Both in this respect and the necessity for calmly calculating what the future has in store, in the way of demand for footwear, they are better off than they have been for a considerable time.

Notwithstanding the lull and the disposition on all sides to "gang a steadier gait," there is no indication upon the immediate horizon of the ushering in of the day of cheaper leather or shoes. Thoughtful consideration of the limited supply of raw stock, and the tremendous demands that are being made upon the capacity of our leather producing establishments for present and future use, will lead anybody to realize that counting upon a weakening condition in leather is leaning upon a fragile reed. Manufacturers are basing their prices to-day upon what they are able to procure stock for, and there can be no doubt but that they will have to stick to the hand-to-mouth policy they have had to follow for the past year, and make all quotations subject to change without notice.

The retailer has not so difficult a proposition before him as a year ago. Conditions are more stable. He is in a better position to gauge the future and can feel safe in anticipating to a moderate extent his requirements for the coming season. Good retailing will this year be exemplified more than ever by good buying. As outlined in our "Fashion Hints," there are very few radical changes in the better class of shoes. It is comparatively safe to order fairly liberally of fine and medium lines, and the advice given by a prominent American shoeman at a convention some time ago is more apropos now than when it was uttered—"Go slow on Novelties." The bread and butter of the trade are the lines which eighty to ninety per cent. of the people buy, week in and week out. Loss comes principally by over-stocking with fashion freaks that are like "the chaff which the wind driveth away."

The JOURNAL's advice to its readers, from a careful review of the situation, is to buy early of such lines as are regular sellers, avoiding extreme styles. Pick out a few of the more sensible novelties and then, later on, feel your way with regard to the rest.

One thing seems to be certain—the coming season will be a "WHITE" one, for the fad has struck men's as well as women's lines.

# COMBINATION OF COLORS—VARIETY OF DESIGNS

Contrasting Shades and Artistic Decorative Effects are Marked Characteristics of New Spring Styles in Women's Foot Toggery—Very Few Changes in Lasts, Height or Heels—More Variety and Dash Seen in Men's Lines, Particularly in Oxfords

**A** RIOT of colors, a blending of hues and a harmonizing of effects on a scale never previously attempted are leading characteristics of the new models for spring and summer which are now being presented to the retail trade in the Dominion.

Kid is still the leading leather in feminine footgear and it comes in several new shades, but colored calf is a claimant

**T**O B A C C O brown  
bal, perforated  
wing tip, recede  
toe, on Duke last—By  
James Muir Co.

for honors. The high-cut bal with the long, pointed recede toe is being featured, although some button boots are shown, but not in large numbers. Smart, classy footwear in the darker shades appears to be in the lead but the lighter tones are liberally displayed.

White will, of course, retain its well established popularity and more models than ever are being offered in white kid, calf, buck and suede, not to speak of the numerous fabrics in white such as reignskin, corkscrew, cravanette, poplin, sea island duck and canvas.

The wing tip, both perforated and imitation, is witnessed on a number of models. As for height, the shoe for my lady faire runs from seven and a half to eight and a half inches. The leather Louis heel as high as two and a half inches is noticed on certain lines, although Cuban and peg pedestals are not overlooked by any means.

There seems to be no limit to the ability of designers of shoes of the better kind to turn out novelties in women's footwear for spring.

## More Variety and Color for Men

In the popular-priced men's styles there is more variety and combination of color than has been seen for some time.

**T**O B A C C O brown  
bal, long low toe,  
heel slightly flang-  
ed—By John Ritchie  
Co.

A little more "pep" is put into the productions, and two-tone effects, new colors, elaborate perforations and wing tips are being featured. It is thought that the effect of the novelty shoes, which have held such high favor in women's lines, may be extended to the men's and, although few new leath-

ers are seen, there are some entirely new toppings, such as pigskin, pencil calf, cordo calf, morocco grain, dark cherry calf, pebble grain calf, etc. There is a tendency toward narrower toes and broader shanks.

The majority of models have low heels from 6-8 to 9-3, with close edges, while blind eyelets continue their popularity. There is one thing outstanding, and that is the stag vamp, and the dark shades of tan leather. There seems to be an opinion that African brown, tobacco brown, cherry calf, mahogany brown and all the other members of the "brown" family are going to sell particularly well. More firms are using rubber and fibre soles, as these have been found to give splendid satisfaction and retailers are taking hold of them with more confidence.

On the whole, there is little change in lasts. The moderate recede toe is now being universally accepted. The high toe and the medium high toe die hard, but are gradually disappearing. Some of the highest class firms are, of course, not presenting the novelty lines and the other striking leather combinations in men's shoes. They have gone so far as to have medium perforations and scallops on the tips, foxing and lace stay, but models shown by other firms are fantastic enough to please the most fashionably dressed young man. Striking contrasts in colors are seen very largely in sport shoes

**L**I G H T grey nubuck  
with Havana brown  
calf foxing, facing  
and saddle, Avenue last  
—By Scott-Chamber-  
lain.

and oxfords. There are combinations of pearl grey and brown, black and brown, tan and brown, white and cherry, battleship grey and dark brown, black calf with pigskin toppings, and other contrasting shades. Circular foxing is also seen on a large number of the models, along with white and colored stitching. In low cuts, new patterns with extended vamps, stag vamps, two-tone effects, overlap eyelet stays, etc., are offered for the consideration of the "lords of creation."

## Gingering Up Men's Trade

The object of the dash in color, which has been introduced into men's shoes, is to tone them up and make them appeal so strongly to the young man, that more than one pair a season will be bought. The men's trade has not been what it should be, owing to the conservative character of the lasts and patterns, the tendency of both youth and old age to economize during the present period of European strife, and the fact that so many buyers of smart footwear are now serving their country. It is hoped by the trade that the new effects, tones and combinations of shades will cause men's shoes to move more freely. In some models there is a tendency toward the eccentric and freakish, but it is not thought that this will appeal to wearers of high-class shoes. Such persons do not object to attractive color combinations, or the spice of originality in production, but they do not want to go around with their feet rendered ostentatious by a style

*Canadian Shoe and Leather Captains*

CHAS. A. BLACHFORD

GEO. A. BLACHFORD

## A PROGRESSIVE PAIR

**P**ROBABLY the youngest house in the shoe manufacturing line in Canada, but nevertheless, amongst the most progressive and aggressive, is the Blachford Shoe Manufacturing Co., Limited, of Toronto. The firm consists of Chas. A. and George A. Blachford, both of whom have shoe blood in their veins for at least two generations.

George A. Blachford is a son of Mr. H. P. Blachford, of H. & C. Blachford, for practically half a century leaders of the retail shoe trade of Toronto. George A. took to shoes as naturally as a duck to water, and in his pursuit of the best inside knowledge of the art of modern shoemaking, he went to Lynn, Mass., when quite a youngster, and was drilled in the game, in factories such as that of A. E. Little & Co. (Sorosis Shoe), and Faunce & Spinney. He was connected later in Canada with the Minister-Myles Shoe Co. and the Murray Shoe Co., where he did good work before embarking in the present enterprise. He takes charge of the manufacturing end of the firm's business, and Blachford Shoes speak for his ability and skill in the designing and production of modern footwear.

Chas. A. Blachford, who has charge of the office and sales departments of this live establishment, is a son of Mr. A. W. Blachford, for many years a partner in W. B. Hamilton, Son & Co., and later with Blachford, Davies & Co., and who is one of the best known and most respected members of the shoe trade of Canada. Charles A. Blachford had seven years' training in connection with the office and warehouse end of the Blachford-Davies business, and in this way came into intimate personal touch with the retail shoe trade and its requirements.

His thorough business training, added to his courteous, gentlemanly spirit, has won him a high place in the esteem of both wholesale and retail trades. He is all business, and while affable and agreeable to an extreme, devotes his entire thought to the cementing of the relationship between the company and its customers, which is built upon the principle outlined in the phrase, used with regard to Blachford shoes, "Your Inevitable Choice." It is a good choice.

Both Blachfords claim they are too busy and too young yet for hobbies, so they "stiek to their last."

so loud that one can almost hear the shoes coming down the street.

In a few samples the shanks are broader than they have been for some time. These carry a narrow toe in most cases

**N**EW colonial pattern with wing tip effect—By Ames-Holden-McCreedy, Limited.

and it seems hard to explain how the narrow toe is in vogue, especially in shoes that have roomy shanks.

The bal is still the favorite dress shoe for men of taste and good judgment. It appeals to the average conservative individual as the neatest and most appropriate. Of course, a large number of bluchers are shown, but they are generally in the more medium priced lines.

#### Two-Tone Effects for Women

To describe women's shoe styles is like painting a picture of the rainbow or depicting on canvas the beauties of the autumnal tinted leaves. There is color everywhere, and of every hue, and under every name. Solid color creations, two-color creations and everything that tends to create mode is the big asset.

Another noticeable feature besides the very artistic colors is the light, dainty, airy effect of the models that are being shown now to the retail merchant by enthusiastic travelers. The soles are light, many of them having feather edges; shanks are slim and heels neatly breasted and trimmed. Plain pointed toes, with vamps, three inches to three and a half, are strong features of the line in novelty colored kid

**M**AROON kid, heart vamp bal, ivory kid top with maroon collar—By Blachford Shoe Manufacturing Company.

shoes for "Miladi." On some models the wing tip is shown, but by far the largest proportion of samples have the unadorned, elongated forepart.

Heels are about the same altitude as last season and the leather Louis still reigns supreme. The beauty, style, color combinations, inlay work and shoemaking cleverness in the

new samples are some things that have never been previously achieved. Perforations of every kind and fancy patterns with artistic trimmings that serve to accentuate the two-color effects are replete in every range.

Grey of various shades, brown of the darker hues and blues are strongly featured along with lighter colors, such as ivory, champagne, white, buff, fawn, dove and pearl grey, sand, bronze, etc. Then there are green, red and purple in color combinations. Whatever contrast is used, there is generally a lighter shade for the top and a darker one for the vamp and foxing. In fact, color harmonizing has been carried to such an extent that every combination, not absolutely shocking or revolting, has been evolved.

#### Some Very Striking Contrasts

Many shoes have tops of one color and vamps, foxing, lace stays and collars of another hue. There are scalloped, circular and curved foxing and various other decorative designs. Black and white is proving a very pleasing combination and is seen with the stag vamp, the brogue vamp and with heart-shaped throat, wing tips and ornate foxing. One of the leading showings of the season is a full semi-lace wave vamp, which has a rounding effect at the throat, while the

**P**ARADISE button boot, scalloped seamless vamp—By Blachford Shoe Manufacturing Company.

vamp is high toward the forepart, finished up with a slightly inverted curve at the heel. Tobacco brown is having a large call, wholly and in combinations with tan and ivory kid, and it is anticipated that deep grey, black and mahogany brown should prove good sellers for the conservative buyer.

It is impossible to name the colors that appear in grey, to which there are no less than nine names given, varying according to the shade, and the idea of the manufacturer, while in brown there are some seven shades. In blue, no less than ten, from midnight blue to sky blue. In green there are at least half a dozen names given, from bottle green to apple or Nile green. So, not only in the shoes themselves, but in the names, color is everything. But when it comes to two-tone effects, and the lighter colors, the average shoe merchant, who is catering to the medium class trade, will likely go slow on the rather dazzling models, and confine his purchases to the quieter tones and more solid colors, like tobacco or African brown, battleship grey and dull and glazed kid.

The lace bal is still the favorite shoe. Some attempts have been made to introduce the button, but the tall tops with their dash and snap, their pleasing appearance and graceful decorations, have won a place that will not cause them to be easily superseded.

In women's footwear it is interesting to note that colored suede and colored buck are being featured on many

of the highest class shoes, but kid is still the prime favorite in the matter of leathers, on account of its glove fitting qualities. The conservative buyer should purchase straight cut tops only, for they are safer than the Wave, the Lang-

**H**AVANA brown kid, scalloped vamp and collar, with new Vanity heel, showing aluminum insets at base and top—By J. & T. Bell, Limited.

try, the Trooper, the Hussar, the Crescent and other cuts, a few of which are seen.

Plain effects will be noticed in pumps, with very small ornaments—and the quiet elegance of patent leather will continue in popularity. They will carry the Louis heel and possess perfect fitting qualities. Some new designs are seen in Oxfords, and more new patterns will later be presented for the consideration of the trade.

#### Walking Boots With Low Heels

In the walking and sport shoe line the low heel, wing tip, saddle strap, collar and cuff effects in white and tan, black and white, two shades of brown, green, ivory, cherry, etc., are seen. The athletic boot or English walking shoe, or whatever name it may be called, has attained a measure of popularity and should prove a good seller.

Everything points to the fact that next season will be the greatest white line that was ever ushered in. White kid and white calf, white buck, suede and all fabric materials in white, will predominate in many comfortable models.

Buck is used considerably for tops in many smart styles, particularly in fawn, tan and brown, as well as mustard, pearl and ivory.

The Vanity heel is also observed on women's styles. The heel never played a more important or striking part in the appearance of a shoe than it does to-day, and the Vanity pedestal is among the most artistic in style and finish. It is a leather or combination heel with some sort of celluloid finish that gives it the smooth, glossy effect of a wood heel. It also has a top plate and bottom plate of ivoryoid. This plate is as thin as a wafer. It may be bronze, blue, green or white or any other color, and makes a pencil stripe around the top and the bottom of the heel.

#### A Summary of the Changes

Reviewing the styles generally it is stated that women's oxfords may return to popular demand next season and that there will be many novelties in color combinations and materials. Summing up the trend of styles generally one leading manufacturer who has visited all the producing centres gives the following comprehensive statement:—

In women's lines the changes in the lasts are few, if any, and the chief alterations are in the patterns which are caused by the styles of heels as adapted to the use of the shoe. For outdoor and athletic service the low heel requires certain patterns; while the dress boot can have high heels and be different in many ways from the other type.

"Color combinations and decorative effects are observed; contrasts of material and colors in the vamp and upper afford fields for distinctive styles. Two-tone effects are being secured by using kid vamps of brown or grey with toppings of suede, buck or nubuck of lighter shades. White tops to black patent or gun metal vamps are presented, and the tendency seems to be toward the patent-leather goods. The use of cloth toppings varies; in some lines it is very slow, while staple black boots, the tops of which are black cloth, are everywhere accepted and in good demand.

"In men's lines the brown boot in dark shades is taking a place as a desirable boot, but its price is advancing, and since calf-leather is in demand far exceeding the supply, side leather will be used more and more. If the particular customer requires real calf leather in his boots he may face the high price, and must face it if he would possess the boots.

"So long as cowhide is substituted for calf skin, the use of other substitutes in the sole and other parts of the boot is perfectly consistent; and if rubber can be substituted for sole-leather, composition material can be substituted for rubber."

#### Whites—Novelty—Brown

Here is the way one student of styles views the trend in footwear fashions and perhaps he is not far astray:—

"Two-tone effects will be strong. Browns are coming actively and are very nice in the two-tone effects. A new mahogany shade should be a winner. A patent vamp with white calf top of washable leather ought to be a splendid number. The demand for the pearl grey will not be as strong as it has been, and darker shades of grey will be the most popular. Ivory kid is now called for. A navy blue vamp with ivory top will be good. The call for white shoes this late in the season is an indication that white shoes will be more in requisition than ever. The 8 and 8½ inch boots will be the biggest sellers."

#### Prices Were Never so High

Prices rule much higher than last season and the advances have caused many retailers to rub their eyes or disbelieve their ears. With prices galloping from fifty cents up to two dollars a pair more than last season there is little

**M**AHOGANY brown bal with perforated vamp and lace stay, leather Louis heel—By Getty & Scott, Limited.

wonder that some amazement or chagrin is expressed on the part of the merchant, "but they buy all the same," after getting over the shock.

It is absolutely useless to object to the higher figures. There is no avenue of securing the goods desired at a less sum elsewhere and the only alternative is to pass the aviating

# How Being Himself Won Trade

Advertising is Common Sense and Honesty—Several Methods that Have Won Trade—Can't Copy City Store Advertising—A Store Paper that Helped the Reader—Merchants' Association that Brought Record-breaking Sales in July Without Bargain Appeal

By GUS RICE

**I** REMEMBER well when I called on the editor of the weekly paper in my home town in 1892 and asked what a half-page space would cost for one year. I had opened my store and wanted to do business. The editor nearly fell out of his chair in sheer surprise. We finally made a contract for half a page, which included permission to use some front page space free.

A boy and I looked after the business of my store in those days. The boy did the sweeping and dusting and I the buying, selling, advertising writing and office work. In spare time, I helped the boy keep the store clean.

The boy is now a successful man and I am still doing the buying—but for four stores.

I am also writing my own advertising matter, doing part of the selling and working out selling ideas and systems. I am still the handy man about the place, except that now I have a combination bookkeeper and stenographer and an assistant to help me do the buying, manage the four stores and help me do the selling here in the original store, with the assistance of two other young men.

## He Manages Four Stores

Managing four stores, keeping in close touch with all the important details, offers some problems, but the situation also has some advantages in addition to the natural advantage of having the profits from four stores in place of one.

An idea or selling plan that will work in one will often work in all, especially when they are all in medium-sized towns, in the same general section, as my stores are. It is often possible to switch stocks from one to another, supplying needed sizes, or moving goods at regular prices in one store which, for some reason, failed to go in one of the others.

I want to tell in this article, principally, how I handle the advertising for the four stores and keep in touch with local conditions all the time.

## Common Sense and Honesty

I have heard it said that advertising is an art. I hold it is not. It is a combination of common sense and honesty. It takes common sense to choose the proper language and to know when and to whom to say it, and honesty to win the confidence of the reader.

The artistic word-painter may be able to catch the imagination of the reader and hold it for a short

time but I believe a lasting impression can be made only by a real heart-to-heart talk, couched in plain matter-of-fact language, concise and right to the point.

I believe such an advertisement not only draws, but it holds the attention of the public. I do not aim for the result of today. I must make a lasting impression upon the mind of my reader. By suggestion, I aim to train his mind to think of Rice when he thinks of neckwear, for example, and to lead him unconsciously to my store when he wants to buy a collar, because he feels that here he will find what he wishes and that my clerks will look after his wants better than others.

## Simplicity and Truth Needed

The merchant who can train his help to cooperate with him to obtain such a result is fortunate and the advertising writer who is able to make his suggestions stick in the mind of the reader is an engraver of human hearts—a master workman.

Flowery word-pictures will never get such lasting results, because they do not touch the heart.

I hold that an appeal to the dollar is no appeal, because the dollar is only a medium of exchange and looks the same on one counter as on another. I realize that my customer of today may be drawn toward my competitor tomorrow. I cannot afford to take the chance of losing him. I must appeal to his sense of fitness. I must impress him with the thought that my store service is honest and capable, and that we are doing all possible to please him. By showing him certain little attentions when making his purchases, I must make him feel that no one knows his tastes quite as well, nor can take care of his wants quite as satisfactorily as we can.

To do all this and do it right, I have always felt, a man must be intimately acquainted with the people to whom he is talking. The man a thousand miles away with his stereotyped phrases cannot be of use to me. He cannot obtain the result I require. He must come in actual contact with my people to be able to reach their hearts.

## Merchant Must be Himself

Business in the city, a few miles away, for example, is done in a different way. Many and many a dollar is being thrown away annually by country merchants copying advertisements which they see in the great metropolitan dailies and which are

absolutely unfit for their requirements. It is well to read such copy and study it carefully and pattern after it when it can be of use. I have obtained many a good suggestion this way. The danger is in not knowing where to draw the line.

The secret is to put yourself into the place of your reader and make up your mind before an advertisement goes into print, whether such and such a phrase will appeal to your reader or will repel him, or will be of such little interest that he will never give it a second thought.

Study advertising and study human nature as it is displayed by your own neighbors, and do your own talking to them in your own way, even though you do employ a regular advertising writer. Make your own personality felt, because a man's business can never be larger than he is himself.

#### **Sent Him a "Summons"**

Some years ago I heard of a farmer who had several boys who had never been in my store. I wrote him several personal letters, took pains to have some of his friends tell him about my store, etc., all without avail. I gave this man a great deal of thought. I wanted his business and I finally made up my mind to employ drastic measures. I wrote him a letter which sounded as if it had come from some official at court. I told him that he must be in my store on a certain day. Several weeks passed before he came, but when he did, he excused himself for being late. He had been busy in the harvest field. He and all his family are today among my best customers.

Some time ago, I wrote a number of articles signed as "Jimmy the Booster." He touched somewhat upon local matters, asking people to help him boost. He mentioned, in every talk, that Rice had hired him and that he could be found at Rice's store. He always found room to make some kind of remark about a certain pair of boots at Rice's which he had bought or about which some one else had told him. Even now people mention Jimmy. One man told me he had bought a pair of shoes from "Jimmy the Booster." I had pointed out my bookkeeper to him as Jimmy. He wanted Jimmy to be a person, and I was a little too modest to pose in the leading role myself!

#### **How He Uses Birth Returns**

There is another plan which has brought me business. I obtain from the Board of Health in every town where we do business a list of the boys born during the month and send each baby a personal letter, telling how glad I am to make his acquaintance. I wish him a long life and prosperity and take pleasure in presenting him with his first pair of shoes, which I forward with this letter. I tell him I hope he will buy (or see to it that his parents buy) his first shoes from me. I ask the boy to tell his father we are also well prepared to please grown people.

Perhaps you will notice in this connection that in all my advertising, whatever I do for the other fellow, I never let him lose sight of the fact it is Rice who is advertising. I talk about Rice and what he can do for the people who need clothing and how glad he will be for the opportunity to do it. It is

always apparent to the people what my motive is.

Last year I issued a store paper occasionally, "The Rice Booster," and this was a good thing. People were interested in it, though it talked a lot about my store.

#### **Store Paper Was Helpful**

But in addition to shop talk, it carried some information which farmers found useful, as well as a good deal of miscellaneous matter of interest to all people. For example, there was a little item about clover bloat, and others along the same general line, intended to help farmers. Again, there was an article seeking the answer to the question, "Is Friday an Unlucky Day?" I tried to get into the paper just enough matter of this kind to keep people interested and keep them reading what I wanted to say about Rice's stores.

This paper, of course, would hardly have been possible except for the fact that I have four stores. This gave it a better circulation for the effort and expense put into it.

About a year ago, we formed a Business Men's Association with a membership of eighteen merchants. We have done some mighty good work during the year. We had tried for many years to get together in the right way; had commercial clubs and what not, but never could get results. The interests seemed to clash. This time, the merchants decided to try it alone, and they elected me president.

#### **Local Newspapers Helped**

I realized it meant more hard work than expenditure of money. In a small town people are not in the habit of spending much cash. We exercised our gray matter some to devise ways to wake things up. I called upon the editors of our two weekly papers and showed them it would be to their benefit to help boom the town. They were glad to do their part and have given us one or two columns of front page space every week.

The first move was a "dollar day" for the last Saturday of the month. The papers pushed it on their own account. The merchants all bought space liberally and advertised some mighty good values. The association had several thousand circulars printed and had them distributed by automobiles in the surrounding territory. Some of us used personal letters and others, circulars, in addition to our regular newspaper space. The day was a success.

The next special effort we called a "red arrow" sale. Every member displayed a red arrow in his window. I ran one clear across the street pointing to my doors. We again had the association advertise the event in the country and in surrounding towns. The newspapers helped—the day was a greater success.

#### **Auction Sales a Success**

The next month, we started free auction sales. We provided free auctioneers and told people from far and near that we would sell for them, free, anything they might have to sell—that we would provide the buyers, and we invited them by letter, circular and newspaper advertising to come and

see the crowd. The people came in droves. It was a gala day—and the biggest success of all.

Business simply boomed. We could not wait on the people. I suggested that we let well enough alone and continue the auction sales and dollar days—make them permanent—and that we have, every sixth month, a get-together day, the purpose of which should be to invite the people to town to get better acquainted with the merchants—a day on which the merchants could show the people their appreciation of their patronage of the past six months.

The last Saturday in July, we had our second get-together day and it was a wonderful success. The merchants themselves were surprised that it was possible to get such a crowd together and sell so much goods in one day. We were swamped. The streets were literally packed with people, and the stores did a land office business—and in July, and no cut prices either!

#### Everyone in the Movies

We had 1,000 feet of moving picture film taken and invited everybody to be in the picture; we had all kinds of old-fashioned games on the streets, and had a regular old-fashioned barbecue.

It took two large oxen to feed the crowd. We had an industrial parade more than a mile long, a parade of children as long, and possibly a mile of other

people. Everybody wanted to be in the picture, which meant another big day when we got ready, the last Saturday in August, to show the picture.

The day cost only about \$300, of which we got back nearly \$200 for admissions to see the picture here and in surrounding towns.

The free auction days are still going on. We would not give them up, because the crowds are coming and are just as large as ever.

#### Are Making Credit Rating List

We are now working on a rating list. Every man in the surrounding country is being rated as a protection against men who do not pay and to help honest, worthy people obtain credit when they need it. We feel this step will be of great benefit all around.

We had been bothered a great deal, like other towns, with itinerant merchants, box-car peddlers, etc. We felt the time had come to call a halt, and we went before the town board and insisted it pass an ordinance to do away with this evil. We prevailed upon them to pass an ordinance and have had no more such trouble.

This move, while it helped the merchants, was good for the people of the community, too. But, after all, what is good for the merchant—what is really good for him permanently—ought to be and usually is good for the people he serves.—Associated Advertising.

*THE attractive and well laid out new shoe store of Joseph Patterson, St. Mary's, Ont., which was fitted up from his own design, see page 72.*

## SOME BRIGHT SELLING HINTS FOR OCTOBER

Timely Suggestions in Window Displays and Decorations—Thanksgiving Day, October 9th, Affords Splendid Advertising Opportunity—Making Use of the Variegated Foliage of Nature—The Traditions of Hallowe'en and How to Arouse Interest

The wonderful strides made in advertising during the last few years has created new demands in all departments of merchandising—but irrespective of the modern methods that have been introduced, it is really surprising how very many merchants fail to recognise what a potential factor a well dressed window is in selling of footwear. True, very many appreciate the selling value of windows, but should there be any doubters let them go to the large department stores and hear the department managers clamor for windows. These men know by experience the selling value of windows.

Then why not devote some time to your windows—systematically too. Not a splurge this week and nothing doing for the next two or three. Each week change the window at least twice, and better still, three times. It is not a case of whether you have time to do it, it is a case of can you afford not to do it.

Always be seasonable with your window trims. Take advantage of local conditions, situations and circumstances. Each month will furnish something peculiar to itself that will work in nicely in the way of schemes for trimming.

October is rich in window suggestion. Out-of-doors the brighter colors are fading, while the woodlands are turning to rich golden yellows and the softer sepian shades and pleasing browns. So yellow and browns should dominate your color schemes for store and window decoration.

There should be little need for special sales during the month. Money begins to circulate freely. Farm products are pretty well marketed and buying becomes easier.

### Take Advantage of Thanksgiving

Early in the month Thanksgiving offers a splendid advertising opportunity. For one week previous to it arrange a "Harvest Home Week." Dress the window on Monday, Oct. 2nd, with various grains made into sheaves not more than three or four inches in diameter. These will trim your corners and centre back. Grapes on the vine can be festooned in the back. Other fruits and vegetables, in groups of six or seven, can be arranged attractively on the bottom and on fixtures. Have them washed scrupulously clean. Be careful not to over do it so as to detract from the shoe lines you are displaying. These should be a shoe decoration, not a farm exhibit. If you can have any specials to use as leaders during the week, they will attract business. Advertise this "Harvest Home Week" in the paper, emphasising the values you have to offer and head your advertisement with "Harvest Home Week" at so-and-so's store. You will find this will be sufficiently different to attract attention to your store and that is good advertising.

### Autumn Leaves as Decorations

A pretty trim can be arranged to follow the "Harvest Home Week" with the introduction of autumn leaves. Branches, with the beautifully variegated foliage cut the proper lengths, can be artistically arranged on the background of the window. A sprinkling—giving the effect of fallen leaves—may be dropped here and there on the bottom. A little care and patience in the arranging of your lines in this seasonable bit of trimming will produce a very effective window.

Then will come Hallowe'en. Take every advantage of an opportunity. If there is anything people are talking about

work it into your advertising. Dress a Hallowe'en window. The colors are yellow and black. If your windows are large enough put a life size figure in, dressed in peak cap and the other regulation witch attire. Hang a pot on a tripod of sticks. With red and yellow paper and electric lights represent a fire underneath. At night leave the window dark, except this light under the pot. Other emblems are cats, owls, moons, stars, etc., all of which may be purchased at your stationer's or cut out of black and yellow paper.

Should a figure not be obtainable cut a witch riding a broom, out of a black card and suspend it in the window with black thread. Turn an electric fan on sufficiently to keep it in motion. Arrange this window a week ahead of the date. Advertise Hallowe'en values, emphasising party slippers, pumps and light shoes for indoor wear.

A little attention to your displays and decorations will work wonders in bringing more trade simply because people will take notice of your up-to-dateness.

### SIT TIGHT AND TAKE YOUR PROFITS

There is great need of hard common sense in considering the profit situation. This year many retail shoe dealers have realized greater profits than they ever hoped to make. In most instances trade was brisk, customers were easily satisfied and, to the hardworking retailer, it began to look as if the shoe millennium was coming.

The temptation always presents itself to the dealer to cut prices and get the credit of selling goods cheap. When profits are ample the tendency is to share them with customers. It is not necessary to explain further; everyone will understand the incentive to cut prices when the margins of profit are ample, but the important consideration at this time is that we are living in extraordinary times when ordinary rules fail.

Prudent business men are proceeding on the assumption that profits must be large at the present time to counter-balance the inevitable slump in prices which will follow the end of the war.

Another consideration is that styles change so quickly, and novelties follow each other so rapidly that there is always danger of the dealer being left with stocks on hand which can only be closed out at a loss.

There is a gaining and a losing tack in merchandising as in sailing. Big profits are likely to induce extravagance if it is not well understood that the long profit periods should be averaged with the losses that may come later on.

Retailers might well take a leaf out of the book of the big contractors of war materials. They realize the danger of making great profit showings and resort to expedients to equalize the big gains of today with the small returns that may follow. In taking account of stock they charge everything to expense and do not add the betterments to their inventories. They charge off fixtures and questionable stocks to profit and loss. In this way the books do not show such fabulous profits that the balance sheet puts the members of the firm into a fool's paradise.

Keep up your prices, make all the profit possible, but remember that times will change and the profits of today may be needed to tide you over future conditions.—The Shoe Retailer.

**WELL LIKED IN SHOE TRADE**

S. A. Bell, who has joined the traveling staff of the Blachford Shoe Mfg. Co., Toronto, and will cover eastern Ontario and the province of Quebec, has had a wide experience in

S. A. BELL, TORONTO

the shoe game. His native town is Trenton, where he attended both the public and high schools, and afterwards spent three years in the Jarvis Collegiate Institute, Toronto. His first position was in a shoe shop in Trenton, where he spent two years, going to Montreal in 1903. He was engaged for several years with W. H. Stewart, on St. Catherine street west, and later with his brother, Malcolm Stewart, on St. James street. Six years ago Mr. Bell joined the traveling staff of George A. Slater. Limited, covering Quebec, for the first year, and during the last five ably looked after the interests of the firm in Manitoba and Southern Saskatchewan. Mr. Bell has always been a hard worker, a genial friend and a capable salesman, a trinity of qualities that is difficult to excel.

**NEWS HAPPENINGS FROM ST. JOHN**

John Cummings was in St. John last week. He represents the Breithaupt Leather Company, of Kitchener, Ont.

C. Hazen McGee, representing the Murray Shoe Co., of London, Ont., was in St. John lately. Mr. McGee was formerly mayor of St. George, N.B.

Travelers with spring shoe samples are arriving in the city and in addition to new lines they are introducing prices which are fairly staggering local retailers.

J. A. Campbell, who is representing the Kingsbury Footwear Co., Montreal, was in St. John, recently on his way east. Mr. Campbell formerly resided in St. John and during his short stay renewed acquaintances.

Frank W. Merrill, head clerk in Percy Steel's shoe store, St. John, N.B., was on a tour recently through the Eastern States visiting different shoe centres with a view to getting some new ideas for use in his department.

Friends in this city are pleased to learn that Douglas McRobbie, of Vancouver, formerly of St. John, has been appointed Canadian traveler for the Walkover Shoe Company of America. He is a son of John H. McRobbie, of the McRobbie Shoe Company, of this city. About four years ago

he left St. John and went to Vancouver, where he became associated with his brother in the shoe business. His wife is visiting her mother in Riverside, N.B.

Word was received in the city a few days ago of the safe arrival in England of A. V. Wright, of Moose Jaw, Sask., who left Canada with the 128th Battalion. He was formerly employed with McRobbie Shoe Company and Percy Steel, of this city.

Charles R. Wallace, who was formerly employed in Percy Steel's boot and shoe store, and is at present in France with a Canadian unit, writes to a friend in this city that he is well. He said he had gone through some terrible experiences, but had fortunately escaped with his life. Private Wallace left St. John in 1914 with an artillery unit and has since been doing his bit for King and Country.

**LIVE SHOEMAN AND EXPERT BOWLER**

Walter G. Willis, of Seaforth, Ont., is an adept in two lines—selling shoes and bowling on the lawn. An expert skip, the chances are that he can draw a saving one right up to the kitty, when the other rink is lying shot. As President of the Seaforth Bowling Club, Mr. Willis took part recently in a tournament at Exeter and was the runner up in the finals. This year he won the Seaforth tournament. When he is not carrying off the silverware in a competition it is owing to the hardest kind of luck, for he generally manages to land in the finals or semi-finals. In any other position he would be lost. In his early days, while attending the Collegiate Institute in his native town of Seaforth, Mr. Willis was a member of the famous "Hurons" football team, winners of the Canadian championship, 1890-91. He left school the latter year to assist his father, the late Robt. Willis, in the shoe game, and was taken into partnership eleven years later, the firm being known as R. Willis & Son. This partnership continued until 1907, when Mr. Willis, sr., took over

WALTER G. WILLIS, SEAFORTH, ONT.

the business of his eldest son, W. H. Willis, up street, while Walter G. Willis bought out his father's interest and became the sole owner in the old stand. For the past nine years he has conducted a successful business with an annually increasing turnover. Mr. Willis believes in newspaper advertising and gives it close supervision. He carries a six-inch double column announcement, which is changed every week.

GEORGE H. MORRIS, PRESIDENT

CHAS. CULLEY, VICE-PRESIDENT

A. C. CORNELL, SECRETARY-TREASURER

**VANCOUVER REPAIR MEN USE NEWSPAPERS WITH GOOD EFFECT**

**T**HE Vancouver Shoemakers' Association, which was recently organized, is an aggressive body, and meeting with splendid success in keeping up the interest of the trade and securing remunerative prices on all classes of work.

The officers for the coming year are Geo. H. Morris, president; Chas. Culley, sr., vice-president; A. C. Cornell, secretary-treasurer. The committee are—T. H. Biglin, J. Long, D. J. McDonald, J. Mecredy and J. T. Brown.

Meetings are held on the second and fourth Thursdays in each month. It is likely that when the association is on a solid working basis monthly gatherings will be sufficient. Over 50 per cent. of the shoemakers in Vancouver belong to the organization, and to get all in line is the object of the officers.

In order to convince the public that the shoemakers should get a higher price for their work, the association inserted advertisements in the Vancouver papers, which read:—"Public notice is hereby given that, owing to the continued advance in the cost of leather and all other material used by shoemakers and the shoe repairers in Vancouver, the trade have been compelled to raise their prices accordingly."

The association believe that this will help those who have not yet joined to obtain the revised prices in an easier manner, and have the effect of causing the remainder of "the boys" to become enrolled as members.

A. C. Cornell, secretary-treasurer of the Vancouver Shoemakers' Association, has his office at 620 16th avenue east, and states that, judging by the manner in which the association has already conducted its business, everything points in the direction of having lots to say and do in the future for the weal and welfare of the trade.

The following is the revised price list which went into effect recently:—

Men's full soles and heels, leather or rubber.....	\$2.75
Men's half soles and heels, sewn, leather or rubber..	1.60

Calks.....	each .01
White leather.....	extra

### MR. MOREAU ENTERS UPON NEW POST

J. C. Moreau, of Toronto, has been appointed general sales manager for Blachford, Davies & Co., Limited, Toronto, and has entered upon his new duties. He is well known to the shoe trade, particularly in Western Canada, which he has covered for the past six years for the London Shoe Co., London. Previous to going with them he was with Robinson & Lindsay, when they were in business in Toronto. He started in the warehouse twelve years ago and afterwards took a

J. C. MOREAU, TORONTO

position on the road looking after the interest of the firm from Toronto to Windsor. Mr. Moreau will leave for the prairie provinces about October 1st and will go right through to the Coast. He will be accompanied on the trip by C. A. Davies, President and General Manager of the company. The record of Mr. Moreau as a salesman has been a highly successful one and he enjoys a good connection with the trade.

### NEWSY BRIEFS FROM OLD QUEBEC

Among the recent members of the trade in Quebec were: E. R. Lewis, leather merchant, Toronto; J. J. Duggan, Kaufman Rubber Co., Montreal; C. W. Williams, of the Hyde Manufacturing Co., South Bridge, Mass.; and L. F. Mahler, representing the Champion Shoe Machinery Co., St. Louis.

Jos. Guimond, superintendent of the Plessisville Shoe and Leather Co., Plessisville, Que., was in the city recently. His firm has taken another large contract for military boots and is keeping busy all the time. The output has been doubled during the past few months and many new, up-to-date lines added.

Walter May, of the Wm. A. Marsh Co., Limited, was a recent visitor to Boston.

W. P. Francis, of the John Ritchie Co., spent a few days in Boston and other New England centres recently.

Albert Charon, shoe manufacturer, of Contrecoeur, Que., was in the city lately on a business trip.

Shoe manufacturers are all busy at present and some have orders which will keep them operating up to December, before they are filled. The indications are that there will be no dullness in the trade during the coming winter.

Alfred Garant, of Dupéré & Garant, and E. Tremblay, shoe manufacturer, were in Sherbrooke recently in connection

with their business. They report that the Sherbrooke Footwear Co. is exceptionally busy. Many retailers called at the factory during Exhibition week.

The retail trade is well satisfied with the business done during the past few weeks, while wholesalers report that collections are very good. All kinds of leather have taken a jump, sole stock being up 2 cents, while dongola kid is selling all the way from 26 to 40 cents, without any contracts being allowed.

Major J. A. Scott is busy recruiting for overseas service and is as enthusiastic and popular in the military arena as he is in leather circles.

The Nugget Polish Co., Toronto, and F. F. Dalley Co., Hamilton, made attractive exhibits at the recent Quebec Fair. Much interesting advertising matter was given away by these firms.

An interesting event took place at Lorette recently when over 100 persons assembled to join in the celebration of the fifteenth anniversary of the wedding of Mr. and Mrs. Edgar Clement. A very pleasant time was spent. Many valuable and handsome presents were given the host and hostess.

### OPENS NEW STORE IN KITCHENER

C. W. Hagen, who recently opened an attractive new shoe store at 30 Queen St. South, Kitchener, Ont., has been 28 years in the shoe game. In 1907, he left for the west, and until then, was in the footwear line in Berlin. While in Alberta, Mr. Hagen, was still connected with the business although he was interested in land as well. The dimensions of his new boot shop in Kitchener are 80 by 18 feet with an up-to-date window. Single shelving prevails throughout the store, and the fixtures are white enamel. The interior

C. W. HAGEN, KITCHENER, ONT.

is well lighted, while there is a large mirror standing near the rear which partitions off the repair department as well as makes the interior appear longer. Mr. Hagen has two tables, white enamel, and six settees, each six feet long which are in quarter cut oak. He has also one eight foot quarter cut oak silent salesman, and six footstools to match the settees, making the appointments of his establishment pleasing and up to date.

# HOW TO ADVERTISE RETAIL SHOE STORE

**Publicity Must be Honest and Persistent—The Less Money You Have to Spend in Advertising the More Regularly You Should Keep at It—If Your Goods are Not Right You Better Not Advertise Them—Advertising Will Not Make Up for Slipshod Methods**

*Advertising is written salesmanship, and if one is able to write well, you might say that they should be able to talk well, yet you know how many a merchant is an excellent salesman and always knows just the right thing to say and when to say it, in order to make a sale, still, he may make a very poor job of it when he goes to write an advertisement.*

*It is a fact that ten seconds is all the attention the average advertisement gets. Obviously, then, your ads have to command considerably more than the average amount of attention if they are to produce results. You've got to make ads leap right off the printed page or out of the envelope and speak in tones that cannot be resisted and won't go unheeded. How to do this is your problem.*

This brings us to the question: "What is necessary in one's ad copy to accomplish all this?" One may answer, "Catchy illustrations;" another says, "Good position;" yet another answers, "Get the right medium;" another replies, "It is what you say and how you say it;" still another says, "It is the right use of white space and unusual display that counts." I recall reading not long ago of an ad-man lying on his death-bed; the doctor had notified them that the end was near; the wife was sitting nearby, holding his hand, and asked, "John, dear, what do you want put on your tombstone?" John replied, "I don't care so much about the text, so long as it is well-displayed and has plenty of white space."

And so it is, I find, with a great many advertisers. They have a hobby that some one little thing is the all essential thing of advertising. Of course, all of these things about an ad is important, but don't lose sight of the important thing—the thing that counts above all else—the thing that must be right or all the rest is useless. The most important thing about any advertising you write is *not* the illustration—*not* the display—*not* the words it contains—it is the goods, the service and the reputation behind it.

## The Goods, Service and Reputation

Now that's one of two thoughts I want to leave with you today—that the most important things about any advertisement that you put out over your name are the goods, the service and the reputation behind it.

Men unconsciously read into your ad copy what they already know about your store, your goods and your service. If you get their attention to an ad so that they read it, be sure that your goods back up the ad. If the goods aren't right, you had better not advertise them. Advertise something else that you know is right. It pays to be honest in everything, but in advertising it not only pays, but is absolutely essential. Why I see ads every once in awhile that might better not have been published. The store would have profited more to have paid the paper to leave the space blank. Why? Simply because the store advertised something it could not deliver—the public knew it, so, the ad simply "Rubbed it in" and proclaimed to all, "see what liars

we are. See how we misrepresent. You can't believe anything we tell you."

The brainest advertising man on earth cannot make a success of your store, if you don't make it the right kind of a store. Advertising is not a cure-all for all business ills, and it won't make up for slipshod methods, even if you have good goods. Neither will it atone for back-number, second class goods, even if your methods are right.

Now for point number two: Too many merchants, I find, want to take advertising like they take epsom salts—a big dose tonight and expect results tomorrow morning. Advertising is not like quick action pills at all. Instead, it is like liniment. It must be correctly applied and gently rubbed in. One application in itself will not do the trick. You must rub until you touch the right spot. Rub until you find prospective customers coming your way. Then apply some more of the lotion and rub it in again and again. For results, you have got to have good advertising just as you have to have good liniment. It takes steady rubbing to cure the case and do the trick, but rub it in with brains and you will take it out with dollars.

## Slender Thread of Low Prices

All permanently successful merchants have the right idea. They know it costs too much to pull a man to their store by the slender thread of low price that may snap any minute and let him go back to the other fellow next time. It is not the individual sales you want to make through your advertising so much as it is to make friends and permanent customers. Make men like your store so that they will just naturally think of you when they think of shoes. You can't do that in a minute any more than you can change a Presbyterian to a Baptist in a minute or a Democrat to a Republican. You must keep everlastingly at it, remembering that your early advertising is a seed which you sow in the minds of the public, and your advertising is the irrigation that makes them grow. You must allow time to allow the seed to grow. You know that if a seed starts to grow and then is retarded from growth for several weeks, it is a difficult matter to start it to growing again, and the crop is certain to be greatly reduced. It is exactly the same with advertising. It is the steady consistent advertising, that follows regularly week after week and month after month and ultimately builds up a feeling of confidence and good will in the public mind favorable to your store.

## Keep It Up If You Would Win

Successful advertising is invariably persistent advertising. The less money you have to spend, the more essential it is that you keep regularly, continually and persistently at it. Spasmodic advertising won't do. It wastes a part of your advertising appropriation because it produces only partial results and you have no money to waist. Occasional advertising may bring you business temporarily under certain extraordinary conditions, but you never can make customers that way. Occasional spurts and splurges won't get you any permanent results. It is far better that you spend less money each time and keep continually and persistently at it.—V. C. Devine, Chicago.

# With the Shoe Manufacturers

Pithy Note and Comment on Shoe Matters—What the Makers of Shoes Are Saying and Doing—Shoe Facts and Fancies

THE attached letter received last week by a Canadian shoe manufacturer from a large kid concern in the United States tells its own story:—

"We beg to acknowledge receipt of your order No. 1712 for — dozen — kid color —. In reply we wish to inform you that we regret exceedingly not being able to accept this order, for the reason we are overbooked with orders at the moment. Under the present prevailing conditions, we think it unwise to book any further orders until we have caught up in some measure with our back orders, and therefore, we regret exceedingly not being able to book your order for the present. However, as soon as we are in a position again to book further orders, we will communicate with you."

## SHOE PRICES HIGHER THAN EVER

An American journal, in an article dealing with the cause of the increased cost of leather goods, says: "Shoe and leather prices at present are the highest the world has ever known. Yet when one considers the world's needs for shoes and leather in the immediate future, who can even forecast what prices are going to be? The world hungers for meat and leather and as long as it does prices will rise."

Dry hides from Buenos Aires have sold as high as 30c. a pound; gossip says it will go to 35c. That's a world's market price, a price established by tanners of the world in their keen competition for raw material. There's no element of speculation or of manipulation about it. Time was when Buenos Aires hides sold for 5 and 6 cents a pound. The United States, England, France, Canada, various countries of South America all compete for Buenos Aires hides.

New York merchants are buying millions of pounds of Buenos Aires hides, three and four times as much as they bought before the war. Recent advices from abroad are that German hide brokers are preparing to form a syndicate to buy these Buenos Aires hides after the war. Take the matter of white kid, now so popular in women's boots. It is made of selected kid skins from many lands; yet the world's supply of kid skins, once most abundant, is now too scarce. The shepherds of India, the great kid skin country of the world, of Turkey, the Balkans and of France and Russia have left their flocks and gone to the war. Sole leather, selling to-day at two and a half times the price of a few years ago, would be commanding one dollar a pound where it not for the new substitutes for soles such as fibre, neolin and rubber.

Even the small things have not escaped the rise in price. Bristles for brushes come from Russia; laces are from 100 to 200 per cent. higher. Wax that blacking is made of and the oils that leather is dressed with never were scarcer or as high in price. Some of the best oil for dressing is made from cod liver oil, and that material is all sent to England to be used in hospitals. All chemicals are outrageously high. Some cannot be had at any price. Chrome is a chemical used in tanning upper leather. Tanners no longer say "It costs a little more." They do say this cost us 400 and one item has jumped to 700 per cent, since the war. The mayor of a celebrated shoe manufacturing city in England, and who is also the head of a large shoe syndicate, says the time for high priced shoes has arrived. He says:

"One does not need prophetic vision to foresee that shoes will be higher. The war is directly responsible. And

there are other factors, which should not be left out of consideration, such as high freightage, due to the scarcity of ships."

Foreign governments are still ordering army shoes in millions of pairs. The great bulk of this leather must be supplied by the United States. This, in addition to the domestic call must make a market for all the leather that can be produced and as a consequence prices must be higher.

## CELEBRATING THEIR SILVER JUBILEE

Daoust, Lalonde & Co., Limited, Montreal, are celebrating this month their twenty-fifth anniversary. In 1891, in association with Mr. Lalonde, Joseph Daoust, the president of the company, commenced a wholesale shoe business. In 1899 they began to manufacture, and also operated a tannery at Actonvale, Que. In 1903 the shoe factory was removed to Montreal, where manufacturing on a larger scale was carried on. In 1905 Mr. Daoust assumed complete control of the business on purchasing his partner's interest. In 1908 the firm moved into the large factory formerly occupied by the Ames-Holden Co., and situated on Victoria

JOSEPH DAOUST, MONTREAL

square, and the tannery was removed to Montreal in the same year. The business was changed into a limited liability company in 1912, Mr. Daoust taking this step in order to make it possible for many of his employees to become shareholders, capitalization of the company being \$750,000. The shoe factory has a capacity of about 2,000 pairs a day. The company's tannery is situated on Iberville street, and it is growing in size regularly, the last addition being made to it this year.

Joseph Daoust, the president, was born in St. Eustache, Que., February 23rd, 1865, his father being a successful tanner at that place, and in Montreal. Before entering the shoe and leather field, he was general manager of the P. P.

Martin Co., Limited, Montreal, wholesale dry goods. He has been president of the wholesale rubber boot and shoe association. He was the first president of the boot and shoe section of the Montreal branch of the Canadian Manufacturers' Association, and he is a director of the Chambre de Commerce, member of the Board of Trade, and a governor of the Montreal General and the Notre Dame Hospitals. He is a director of the New Ontario Oil and Gas Co.

#### DISPOSAL OF OLD LASTS

Will you be kind enough to let us know what modern factories in men's welts are doing with their old wooden lasts? You will greatly oblige if you will let us know if they adopt special methods so as to derive as much as possible from this item, or if they simply burn them, asks a shoe manufacturing company, to which "Superintendent and Foreman," replies as follows:

We would say that within recent years old lasts have been utilized to a very great extent. There are a number of concerns today that make a business of remodeling old lasts, and it is really wonderful to what extent the style of the lasts can be changed, especially the toe.

Of course, it is easy enough to reduce the old lasts in size, but what may not be understood by our correspondent is that those who make a business of remodeling old lasts have means of adding to these at any desired point.

We understand also that machinery and methods are now available by which old lasts can be remodeled with accuracy both as to toe shapes and as to measurements, so that if an old last is susceptible of being remodeled to a certain style, the work coming from the remodeled lasts will be satisfactory.

Another type of reconstruction of old lasts is that a number of factories have changed their old block lasts into hinge lasts by sawing them for the hinges and inserting

the hinges, and it is said that this has worked out very satisfactorily, and has helped to save the original investment in block lasts, while at the same time giving to the shoes and to the factory all the benefits that accrue from the use of hinge lasts.

Still another idea that is being utilized to some extent, and is, perhaps, not available to our correspondent, but is one that we feel should be mentioned in this connection, is the use of the patented waist increaser, by the use of which pump lasts can be used for making high boots. It is said that this little device has been found practical, and that one manufacturer said that if he had used it last year he could have saved \$30,000 in lasts alone.

#### INDEPENDENT COMPANY WIN

The United States Circuit Court of Appeals of the Northern District of Illinois has just handed down a decision in favor of the Independent Button Fastener Machine Company, of Boston, in a suit brought by the Elliott Machine Co., of Grand Rapids, Mich.

This suit was brought against one of the users of "Isbam" machines in 1913, and the Independent Button Fastener Machine Company at that time filed a petition to intervene and to be made a party to defend the suit.

This suit was first tried in January, 1915, before the United States District Court for the Northern District of Illinois, Eastern Division, and on May 31st, 1915, a decision was rendered in favor of the Independent Button Fastener Machine Co., from which decision the Elliott Machine Co. appealed.

The last decision, as rendered by the United States Circuit Court of Appeals, affirms the decision of the lower court that the "Isbam" machine is not an infringement of the Elliott machine.

**A VETERAN IN THE LEATHER ARENA**

(See Page 39)

Fifty years in the leather manufacturing business and still at it, as he approaches his seventy-second milestone, is the record of William Craig, of the firm of Wickett & Craig, Limited, Toronto. He has been through all departments and takes as much interest and satisfaction in his work as he did half a century and more ago, when in the town of Port Hope, he entered the sheepskin tannery of his father, the late William Craig, as a youth of sixteen. A few years later he was taken into partnership and the firm became Wm. Craig & Son, and on the death of his father, in 1891, the subject of this reference carried on the business until 1902, when he closed it out for the purpose of joining with Mr. S. R. Wickett, who had been established for many years in Toronto, under the name of Bickell & Wickett. This connection has been a pleasant and profitable one for Mr. Craig and he has never regretted the move he then made.

Many extensions have been made to the plant of Wickett & Craig, Limited, since that time, and the factory now has a frontage of 480 feet on Cypress Street, and possesses a capacity of 500 sides a day, the principal lines turned out being bag and case leathers, strap, bridle and oil tan larrigan leather, as well as Goodvear wetting.

All his life Mr. Craig has been interested in Y.M.C.A. and church work, being a member of the former body for over half a century. In 1867, he was instrumental in having a branch of the Y.M.C.A. started in Port Hope, where the institution flourished for a long period. For many years he has been on the Board of Directors of the Y.M.C.A. in Toronto, and has been an active member of the Bloor Street Baptist Church.

A veteran of the Fenian Raid of 1866, he was attending the Military school in Toronto at the time the Fenian prisoners were brought to Toronto gaol. He then belonged to the Port Hope Rifle Company and was one of the body that formed the prison guard.

Up till recent years Mr. Craig has always been fond of travel and has visited many countries. He is an amateur photographer of some skill and has a large collection of pictures taken during his travels which he highly values.

By way of amusement he also takes an interest in bowling, being a member of the Royal Canadian Yacht Club. He is also an enthusiastic gardener and spends much of his leisure among his flowers.

Although always attentive to business, Mr. Craig has been associated with many useful and philanthropic movements, and his interest in life and those about him is as keen today as when he first entered the business world over half a century ago.

**ADVANTAGES OF WIDTH IN SHOES**

"Leather in men's shoes would wear longer if the shoes were made broader," says a shoe manufacturing expert. "Both the sole and the upper leather would wear longer.

"Often the people blame the tanner when their shoes do not wear as long as they expect," he continued. "They complain that the tanner makes poor leather. But the fact is that they wear shoes too tight.

"Notice a pair of shoes on the average man. The uppers spread over the sole on either side, at the ball of the foot, where the pressure comes, when a person stands or walks. Every time he puts his foot down the flesh presses against the upper leather, like the flesh of the hand pressing against a glove that is too small. That wears out the upper leather before its time. Besides, he treads on a narrow

strip of leather, instead of a broad strip, and the narrow strip wears out the quicker, of course.

"If shoe manufacturers would only make broader shoes," concluded the shoe expert, "and men would wear them, then leather would wear much longer than it does these days. And we would have less talk of a leather famine."

**LEATHER FOR WOMEN'S HEELS**

A Lynn shoe manufacturing expert says that there is nothing like leather for heels of women's shoes. Rubber does not serve as well as leather for women's shoes. Men may accept it as a substitute, but women find fault with rubber heels. Wood heels are fashionable, but expensive. Leatherboard heels are cheap, but they do not wear well. The shoe expert says that if makers of women's shoes added several lifts of good leather to the heels of their shoes, in place of lifts of leatherboard, that the shoes would be greatly improved. It would cost more to use the leather lifts, but it would not pay, because the shoes would wear longer.

**POPULAR COLORS IN LEATHERS**

A visit to the Collis Leather Co. works, at Aurora, Ont., reveals the fact that this concern has demonstrated the truth that if you produce a good thing people will wear a path to your door. The popularity of Collis calf, in the comparatively short period of its existence, is nothing short of marvellous. They are having a great run this year, their two specialties, Tobacco Brown and Toney Red. They seem to have hit the right thing in both these shades, which, as may be observed from shoe fashions for spring wear, seem bound to hold the centre of the stage in both men's and women's lines. They already find their capacity taxed by the demand that has been created for these and others of their lines in black as well as colors.

**MR. RIEDER ELECTED DIRECTOR**

T. H. Rieder, Montreal, vice-president and general manager of the Canadian Consolidated Rubber Company,

T. H. RIEDER, MONTREAL

Limited, was recently elected to the board of directors of Ames-Holden-McCreedy, Limited. His election fills the vacancy left by the recent resignation of A. L. Johnson.

*(Continued from page 38)*

costs on to the customer who is entirely at the mercy of the market. It is a case of Hobson's choice in paying the extra money and securing the shoes or going without. It may be rather perplexing to understand just why prices are so very high but it must be patent to any retailer who has taken the trouble to get a line on the situation, that the time was not so long ago when it was unnecessary to utilize every scrap of leather, or very inferior leathers and shoes were more easily made with a great deal of leather in them. Manufacturers of shoes today are trying to get the highest degree of efficiency out of the combinations of peculiar materials necessary to be used, and to produce high-grade boots. Hence the increased price is not so much of a premium for mechanical and artistic skill in shoemaking as might have been expected. Recently each season has made the task of producing high-grade footwear more difficult than was the case the preceding season, but in spite of it, the character of the boot produced is unimpeachable.

## Many Leathers Difficult to Secure

Manufacturers who are now figuring the cost of next spring's samples are said to be "up against it." Certain leathers continue hard to get, which may mean still higher prices. Every manufacturer wants early business in order to keep the cutting well ahead of the making. In normal times the manufacturer could contract for a certain quantity of leather a little under the market price, which enabled him to figure certain samples at prices that brought the large orders early. Now the only inducement for trade is to tell the customers to buy early, before prices get a chance to advance any further.

## Conservative and Impressive Models

The new spring models of the Hartt Boot and Shoe Co., Fredericton, N.B., show that refinement of design and beauty of outline so characteristic of the high-class shoemaking of this progressive firm. Naturally the offerings are largely of a conservative type, and in keeping with the exclusive trade, to which the Hartt Boot and Shoe Co. are catering—the highest grade of men's business. The company have put in six new lasts. Their policy—as is well known to the trade—has been to keep their range of lasts thoroughly up-to-date in every respect, as regards the requirements of a high-class men's shoe factory, and this policy they are continuing. Their new lines embrace all the neatest and most impressive

**D**ULL calf bal, stitched tip, blind eyelets, low heel—By the Hartt Boot and Shoe Company.

effects in shape, style and finish and superior craftsmanship, but there is nothing showy or flashy. The representatives of the company are now out looking after the interests of their customers in their respective territories.

## Blachford's Advance Style Offerings

The Blachford Shoe Manufacturing Co.'s new samples are now ready and their several representatives have left to visit their many customers on their respective territories; Mr. Fred Beemer covering Western Canada, R. J. Trethewey looking after the trade in Western Ontario, S. A. Bell representing

this firm in Eastern Ontario, L. F. Jackson making his regular trip through the Maritime Provinces, and Harvey McKean will look after Northern Ontario and assist Chas. Blachford in the city of Toronto.

This firm has adopted two new very handsome lasts, one of these, namely, their "Lenora last," is a dressy walking boot last with a recede toe and carrying a  $3\frac{7}{8}$  inch vamp with a  $1\frac{1}{2}$  inch finished heel. The other, their "Betty" last, is in the order of a "sport last." The forepart, however, is longer, enabling this last to be made with a very dressy toe, getting

**T**OBACCO brown bal, with wing tip, neolin sole and rubber heel, London toe—By Eagle Shoe Company.

away from the usual heavy and thick appearance found in the majority of sport lasts. On these two new styles they are showing a large range in tan and mahogany calf and also striking combinations in colored and black calf vamps with buck tops. A very beautiful effect noted is a mahogany calf lace boot with a chamois buck top, also several very handsome styles in tan calf with white buck and tan buck tops, and black calf with dark, also light grey buck tops.

In style effects for dressy wear, a fairly long vamp, narrow toe on lasts carrying a  $2\frac{1}{4}$  inch finished heel will of course be most popular. Plain toe effects are shown very strongly, although the number of tip shoes and shoes with wing tips are noticeable and undoubtedly indicate accurately a stronger demand for tip shoes in the future.

Black kid of a very fine and superior quality is being shown most generously and while Mr. Blachford feels that the big volume of business will be done in this leather, nevertheless, colored calf and kids will command a large share of the trade in ultra dressy footwear, while a large business is expected in both black and colored shoes, and white tops and two-toned effects in subdued harmonizing colors are expected to be particularly popular. Some very striking styles are being shown in a lace boot with a full heart vamp, the top being trimmed with a collar of same material as vamp, and collar made with heart effect to balance this style in the vamp. Another very beautiful design is a button and lace boot with a seamless scallop vamp, three full curved scallops on each side of the vamp and one at the throat; a variation in this style by using a vamp and loop foxing is most pleasing, the same general effect is retained but the loop foxing enables two-toned combinations to be produced with very striking results. A very quiet and effective style in this model is a matt kid lace boot made with a patent loop scallop foxing. A smart and striking design is shown in a lace boot with a high bulge circular vamp carrying a peak foxing and top. This design is entirely unusual and is certainly full of ginger. Another very beautiful model is a lace boot with circular vamp and foxing, the lines of which are exceedingly attractive. This carries a high cut top with a full collar. This effect in patent leather with a white top is very smart. A number of one-toned and two-toned styles are being shown in another model which is particularly beautiful on account of its straight and almost severe lines. It is a button and lace boot with a bronze vamp and foxing, high cut trooper top. This same

## First Spring Trade Number

**T**WENTY-SIX years ago, on December 1st, 1890, the SHOE AND LEATHER JOURNAL issued its first Spring Trade Number. It consisted of two hundred and ten pages, and contained full page photogravures of the principal shoe centres of Canada, as well as half tones of the leading shoe factories and shoe stores. There were over two hundred portraits of leather men, shoe manufacturers and shoe retailers. It was the first and most costly effort of its kind ever issued in the shoe trade, and will be easily recalled by old timers in the trade.

EARNSCLIFFE,  
OTTAWA.

17<sup>th</sup> Dec 1890.

Dear Sir,

I am much obliged to you for the Spring Trade Number of the Canadian Shoe and Leather Journal which you have been good enough to send me. The engravings are remarkably fine specimens of artistic workmanship, while the rich appearance of the

the whole number indicates that the shoe and leather trade is in a flourishing condition.

I am glad to observe that you are sound on the great question of protection to native industries.

Believe me

Yours very truly  
John A. Macdonald

James Acton Esq.  
33 Richmond St West  
Toronto.

The circumstance was recalled recently by the discovery, in one of our old files, of the above letter from the late Sir John A. Macdonald, to whom a copy had been sent on the suggestion of the late E. F. Clarke, M.P., Mayor of Toronto, a personal friend of the publisher, and an old printer, who intimated that the "Old Man" would be glad to see the evidence of Canadian shoe prosperity.

December 1st was then the usual time for displaying Spring Samples.

# Spring Footwear Fashions

Hints From Shoe Style Centres of Things To Be—  
What the American Leaders Expect Will Take  
the Popular Eye in the Coming Spring and Sum-  
mer Seasons—Continued Novelties in Women's  
Lines—Men to Have a Dash of Millinery Ideals

## WOMEN'S WEAR

TO some extent there will be a revulsion from the hysterics of the past season, and simpler styles will be the rule. There will not be the same loud contrasts in materials in the better class of goods, although in the medium and cheaper grades, harlequin styles will still rule. The changes in the higher grade lines will be rather in the lasts and heights of tops. Dame Fashion has decreed that skirts must come to just above the ankles, so that there will not be the incentive to high effects in shoes. The 7½ and 8-inch styles will prevail, with variations in the tops. The narrower toe will be the vogue, and will be given that long and narrow effect.

In materials, soft leathers will rule largely, suedes and bucks leading. There will be a goodly following of kid and patent, which seems to be coming back in the samples seen. In the soft leathers whites are the rage, with the darker tones of grey following. Neutral greys, fawns, browns, ivory and cream are found in combination with mahogany and tans.

Novelties will abound in sport shoes, which seem to keep pace in liveliness with the startling effects in sport coats and skirts. In this class will be found mustards, greens, purples and ivories, in combination with whites, tans, mahogany and deep cherry. Laced boots continue to be the favorites, especially

in white goods and combinations, although some handsome buttoned designs are shown in combinations of dark and light brown and bronze that ought to take well. On the whole, the buttoned shoe is gaining ground, notwithstanding the adverse garment fashions.

Ornamentation is said to be diminishing so far as perforations, curves and inlay work on high class shoes are concerned, but from the samples shown elsewhere, this would not appear to be very noticeable. In some lines of samples, in the medium grades there is a marked tendency towards bizarre effects. In low cuts, however, there is still a good deal of ornateness, through buckles and otherwise.

Pumps will lead again next spring. There will be a great many in patent and almost as many in pure white, and throughout quiet and graceful colors will be used. Oxfords will be worn more next season, on account of the reaction, to some extent, from high cuts.

Heels will be lower, as a rule, but the Louis XV. and Cuban will maintain their popularity to the full. Toes will be longer and narrower—welts will be worn more as the materials in women's shoes grow stronger.

There is one thing that seems to be certain and that is, we are to have a decidedly "white season," the only difficulty being to pick out just what form to which the popular feeling will incline.

## MEN'S WEAR

Men's lines show the "jumpy" tendency that no doubt originated in the nervous skittishness of women's lines for the past season. Certain it is that not for a considerable time past has there been such a leaning towards millinery effects in men's footwear, than in the samples for the coming season.

This is not so true, of course, of high class, regular selling lines, which have, in a large measure, held fast to the principles of staidness and sobriety. Even these, however, display an inclination towards ornateness that is in the air.

The best models continue after the English custom style and toes remain about the same, with a tendency to greater narrowness or pointedness, the recede being more pronounced. There are no new leathers of importance, the mainstays being tan, gunmetal and Russia. Pigskin is, however, being shown in some lines, both alone and in combination

with other leathers. Heels are slightly lower, although the range is from seven-eighths to one and an eighth. Edges are trimmed closely, and some spade shanks are shown. Combinations of light and dark tan seem popular. The medium tan is, however, the prevailing vogue.

Ornamentation has run riot in the majority of lines, pinking, perforating, wing tips and so forth being almost universal in medium goods.

Sport shoes will attain an importance never yet realized this coming season. These will appear in canvas, suede, buck, plain and in combination with tans and blacks of various shades. Amongst the novelties are Russia tan, with brown buck quarters, gunmetal vamps and quarters, with grey buck tops. Two-tone oxfords will be the rage, mahogany vamps, with tan or ivory quarters being much seen. Dark cherry calf is one of the most striking in sport goods.

*(Continued from page 57)*

style is also being made in a 7½ inch crown top. Altogether the effects produced from these patterns are particularly pleasing.

Probably the most handsome style in the line is shown in a lace boot with a full seamless wave vamp. This has a rounding effect at the throat while the vamp is high towards the forepart, finishing up with a slightly inverted curve to the heel. This will be an expensive shoe to cut but the style should certainly appeal to those desiring the utmost beauty and good taste in women's high grade shoes.

Another very effective model is the Arena boot. This style is made on a sport last with many different effects in waist bands and saddle straps, while the foxing follows the general shape of counter but makes an imitation strap effect to the instep and in combination with a leather eyelet facing produces a style that is entirely unusual and particularly suitable for extreme effects in walking boots and novelty skating boots.

In colored kid leathers Mr. Blachford anticipates a large call for tabasco brown, also this leather with combinations in tan and ivory kid. Solid grey kid shoes in a medium grey shade will also be a very strong seller, while grey kid boots

styles will predominate as these particular shades are going to be worn to a large extent in dress shoes. Bronze is also featured extremely strong on account of brown shades being so much in demand. The factory is running on nothing but high cuts just now with extremely light soles, and so flexible

**M**AHOGANY brown bal, light colored top and mahogany collar, half Louis heel—By Eagle Shoe Co., Limited.

**S**TAG foxed bal, of blue kid with pearl kid top, leather Louis heel, perforations—By Clark Bros. Limited.

that the shoes can be rolled up like a cosy slipper and put in a handbag if necessary. In the staple line, black kid has proved to be a big seller and will no doubt continue to be so. There is also a considerable call for patent leather with black top, high cuts, and also light calf with dull kid tops. The firm are of the opinion that next spring and summer will be one of the greatest white seasons ever known and the high white bal will prove a winner. These are predictions which have been gathered by them from various style centres. Wing tips and perforations are among the leading features, and also collar tops in combination effect. One particular shoe which the firm show just now is a woman's Goodyear welt, five-gauge sole, which weighs less than the ordinary light made McKay. The toe can be sent back into the heel without injuring the boot. This is due to its flexibility, and the shoe is made under a new

with steel grey vamps and Quaker grey tops are particularly suitable for their high grade city trade.

It is also anticipated there will be a call this season by exclusive stores for bronze kid boots. At the same time, beautiful effects have been produced in green kid, two shades of blue kid and in maroon kid and these leathers in combination will undoubtedly meet with favor with stores having an ultra stylish patronage.

While the high cut button and lace boots will be big sellers, Mr. Blachford expects a large call in more staple shoes with a 7-inch top and with this in view, all of their patterns have been changed to bring staple lines up to this

**Light, Flexible and Refined**

The new models of Getty & Scott, of Galt, bear all the latest touches and ideas prevalent in making fine footwear. The firm believe that the trend of shoe fashions for fall will be brown, grey and two-tone effects in grey and brown, worn principally in high leg bals, while some buttons will be shown. The principal feature in the new lasts of the company is the pointed recede toe and high heel, some as tall as 2½ inches, in Louis and Grecian type. These shoes are made featherweight style with extremely light edges, and have an airy and stagey effect. For spring it is felt that the same

**D**ONALDA lace boot. Havana brown kid vamp, foxing and collar, ivory kid top, pin hole perforations, half Louis leather heel—By J. & T. Bell.

patent process of the firm and compares favorably with the best hand-made boot in workmanship, airiness and flexibility.

**Long, Slim Toe Effect**

Three new lasts are being shown by the Smardon Shoe Co., Limited, Montreal, two being boots and one a pump. Their spring, 1917, range contains some interesting re-

301 AIRD AVE., MONTREAL

fections of the latest ideas in footwear. For women the long, slim toe effect is in evidence in the newer lasts which are shown in a variety of patterns. A light grey kid with full quarter has a dark grey vamp with insertion in vamp and top, which creates a stylish effect. Another nice model is a light grey suede with a half-Louis covered heel. Another fancy line is one of black kid, scalloped, with white

**M**AHOGANY brown bal with seamless foxing, perforations and Louis heel.—By Minister Myles Shoe Co.

top, and a very smart shoe is that which is of cloth with kid facing, kid wing tip and half-Louis heel. Tans are shown in some very smart effects and the representation of white shoes, including sport styles, is wide.

In low street shoes and evening slippers, some of the nicest effects they have produced are included in the new range of models. Same long vamp is observed in these, as in the boots, and the ornamentation while simple is very effective. Some particularly nice buckles are used with good taste, as are also smaller button ornaments. Colonials are well represented. Combination effects in both low and

**T**OBACCO brown kid vamp and foxing, champagne kid top, Gazelle pattern.—By Perth Shoe Co. Limited.

high cut lines are shown in such profusion as to satisfy all tastes.

#### Some Very Snappy Patterns

J. & T. Bell, Limited, Montreal, are showing a number of particularly attractive new lasts in their range of women's shoes. One is a Donald lace, ivory kid top, with a half Louis leather heel. It is a really smart model with one of the

newest patterns. Another desirable pattern which, like that already mentioned, comes in a variety of shades, shows a scalloped vamp in Havana brown kid. Both are eight inch tops, and both on the same new women's boot last. The last mentioned has a vanity heel, which should prove interesting. A third model which is prominent in the range, is a lace, which has a French top and full quarter, with inset in vamp and top. This comes in white and Havana brown kid, but is obtainable also in other color combinations. It is made in button as well. Their showing of pumps embraces the latest effects which aim to give to the shoe that length and slimmness that fits in with present styles. The samples are all made on pump lasts and are shown chiefly in patent and kid. The colors are about the usual range. In the Colonials larger lapels are noticeable. In the more fancy pumps a nice lattice effect is shown on one, in place of the usual ornament. Beading is used on a growing number of models.

Their men's shoes are shown on a variety of interesting lasts, with some minor changes in patterns. The most striking last is a straight one with a globe toe that results in

**A**LL black kid bal, plain toe wave top, Louis heel.—By Canadian Footwear Co.

the building of a common sense shoe with more than the usual amount of style.

#### Pretty Novelties in Kid

The new models of Clark Bros., Limited, St. Stephen, N.B., come in a variety of pleasing colors and combinations that set a new high water mark in novelty effects and superior workmanship. The leading one-color creations are mahogany brown, navy blue and battleship grey, as well as ivory, pearl, white, black, red, green and purple. They are shown in 8-inch high bals, on longer and more pointed lasts and carry Louis heels, in either leather or wood, the former predominating. Two-tone effects are a strong feature, the vamps being dark and the tops light. Ivory and pearl uppers are pleasing combinations with brown, blue and grey vamps. Bucks are also shown in different shades of brown, grey and field-mouse. There are several striking offerings in black and white, which along with the contrasting colors of the two-tone boots, make the range exceptionally imposing. There are some new patterns presented—seamless, stag vamp, three-quarter fox, and whole quarter creations. A marked characteristic of the line is the number of perforations seen on nearly every model. There are miniature apertures on the vamps, foxing and lace stay. The dainty, airy effect of the shoes is at once noticeable, being trimmed very close, while all the two-tone effects have feather edges. The splendid lines of Clark Bros. in McKays and imitation turns come in all widths. Kid is practically the only leather shown, with the exception of a few in patent. The firm believe that novelty kid shoes,

### Beautiful Colors and Designs

The new models of the Perth Shoe Co., Perth, Ont., reveal all the latest colors and patterns in fascinating footwear. The range is by far the superior of anything ever

**P**OLISH gun metal boot, perforated vamp, imitation tip, Cuban heel.—Moore-Shafer Shoe Mfg. Co.

turned out by the company. There is a strong line of English walking shoes with low heel, saddle straps and wing tips which come in mahogany and African brown and black, as well as white calf, with Neolin and leather soles and rubber and leather heels. The wing tip and the stitched wing tip are predominant. They are smart, comfortable and attractive. In novelty colored kid bals with eight and eight and half inch tops there are observed one color, as well as two-tone effect and contrasting shades which blend and harmonize to perfection. The leading colors are African brown, oyster grey, pearl, battleship grey, blue grey, champagne and white.

**W**OMEN'S high bal, whole foxed, half Louis heel, eight inch top.—By Blachford, Davies & Co., Limited.

In two-tone effects there are pleasing combinations of light and darker shades. The new gazelle pattern, on long pointed lasts, with 17-8 leather Louis heels and an abundance of perforations, is very smart. In the two-tones the vamps, foxing and lace facings are in one color to make the contrast with the tops more accentuated. There are some creations in all white with ivory sole and heel and some smart offerings in black and white. In the solid colors tobacco and mahogany brown, battleship and Quaker grey and white are right to

the forefront. The range embraces a number of sport shoes in white nubuck with various colored trimmings in the way of tips, foxing, lace stays and saddle straps. Some of the striking models are a tobacco brown vamp and circular foxing with champagne kid top, an all tobacco brown bal with straight tip and saddle and an all black kid bal. In white shoes there are several choice creations in high cuts made of reingskin which is taking well with the trade. In color combinations, pleasing patterns, and smooth shoemaking the line, which are all Goodyear welted and made in widths from A to D, establishes a new high water mark for the Perth Shoe Co., who report business as being exceptionally brisk.

### Very Few Changes in Lasts

The Brandon Shoe Co., Brantford, Ont., models for the spring of 1917, which are attractive and pleasing, run heavy in gunmetal, mahogany, nut brown, tobacco brown, and Russia calf. There will be very little change in lasts, as those of last season were very popular and good fitters. Merchants adopting the plan of stocking staple shoes find it to their advantage. It is much easier sorting lines and the

**G**LACED kid button boot with eight inch leg, whole foxed, leather Louis heel.

firm can give customers satisfactory service, when they come back asking for the same shoe. Owing to the extreme advance in leather, the retailer will be able to sort up his range, which enables him to clear his shelves more often and not leave any surplus stock for the bargain counters. The extreme changes this year will be wing tips with perforations. "We think these extreme styles will be in vogue only for the present season, as we believe they are just a passing fad. White duck shoes with fibre soles will be very popular for spring," said Mr. Brandon.

### Many New Lasts Added

Eight new lasts have been put in by the Eagle Shoe Co., of Montreal, for Spring, 1917—four in their men's lines and four in their women's McKays. An interesting men's last, new to the line, shows a London toe in an all kid model with 9/8 regular heel. Another one is a new recede toe, while there is also a natty medium toe model. This is better than anything they have yet produced in this style. Another new last is an F width. Kids are strong, as are also shoes in dark tan, while there is a fair sprinkling of patents and some nice fabric lines. The showing of fibre soles is extensive.

In women's lines, the eight-inch top is used almost universally, while the long vamp with the recede toe effect is observed in the newest. Another new line is a stout last, EE width, with a medium heel. There are a fine lot of new patterns which are among the nicest yet shown. Colors are strongly shown, field-mouse grey and white predominating.

A pretty range of pumps is also offered, some especially nice designs being combinations, champagne and black, black and white and nigger-brown and white. These come in patent and kid as well. There is not much ornamentation on the pumps, which gives them a much smarter appearance than usual.

#### A Splendid Range All Through

What will prove to be one of the best and most attractive lines being shown to the trade for Spring, 1917, is that of the Kingsbury Footwear Co., Montreal. It may be remarked that whites are strongly represented for next spring, including one or two sport models that deserve special attention. The wide use of sport shoes this summer has created unusual demand for them which is almost certain to be even larger next year. Three new lasts are shown in white, including a new growing girls'. The sport shoes are made up in nubuck and canvas and in various combinations, particularly champagne and dark greys, with white soles and heels.

More than fifty designs are to be observed in the low-cut shoes, over thirty of them being new. Ornaments are few and small, being replaced to a certain extent by inserts in combination colors. Few Colonials are seen. There is an extensive range of straps, from one to five in number. This includes combinations as well as patent, and kid shoes in color and black.

In the high cuts a very nice shoe is a patent fancy Polish with white washable kid top. Another of the five new lasts installed by the company is a dark tan sport shoe with fancy perforations and imitation wing tips. The eight-inch top is almost universal and the heels are mostly full Louis leather. These shoes are in full leather and combinations. Fabric tops are shown in the range, but not featured, as the company is uncertain of them at this date, although they figure on a strong run in blacks. Mouse brown, dark grey kid and a dark tan or mahogany brown calf, with the white of course, are the predominating shades.

#### Recede Toes are Still Strong

The new samples by the James Muir Co., shoe manufacturers, of Montreal, are completed and their travelers are

**G**UNMETAL walking boot with dull calf top, perforated tip, vamp and lace stay, low heel.

now out. The company have put in several new lasts, which include the natural form, the Orthopedic style and also "the Duke" last, which bids fair to be a big seller for city trade. Recede toe styles are growing more popular, although the moderate high toe is still holding its own, especially with the country and western trades. The wing tip also appears to be coming into favor in the higher grades of footwear. Havana brown and mahogany are the most favored in the colored leathers by the big buyers. The company expect to have a

heavy business in these goods. Vici kid will also likely have a large measure of appreciation in the finer grades of shoes. The company report that their popular priced line of Goodyear welts for men, made out of selected side leathers in velours and gunmetal, on up-to-date lasts, is commanding big business in these days of high prices. The company are also adding a popular priced line of women's Goodyear welts and fine McKays, which they expect will increase their output considerably.

#### Tobacco Brown for Men

The John Ritchie Co., Quebec, believe that owing to the high price of calfskins and other materials, next spring will see a large number of side leather shoes sold, probably more

**S**O-COSY boudoir slipper with pom-pom—By The Hurlbut Company.

than ever before, in the line of Goodyear welts. For tops, a large quantity of horsehide and matt kid will be used. The company state that in the better lines there will be a big demand for gunmetal calf and a stronger tendency to sample colors than there has been for some seasons past. The John Ritchie Co. are showing several new offerings in the new tobacco brown and Havana brown shoes, which are made up on the new long, low toe last. Some are seen with wing tips, and there are perforations of a pleasing type.

#### Fibre Soles Taking Well

The new samples of the Tetrault Shoe Mfg. Co., Montreal, are as usual pleasing and representative, and a number of novelties are presented. The firm are of the opinion that African brown and mahogany shades will predominate. A number of the models carry fibre soles, which have taken very well, the Tetrault Co. being the first in Canada to introduce Neolin bottom stock. Receding toes are getting to be better sellers in districts where they could not find any favor previously.

#### Plain, Conservative Effects

The new samples of the Woelfle Shoe Co., Kitchener Ont., are neat and attractive, and the range is more complete than ever. A number of pumps are seen in patent, gunmetal and kid, with large square tongue and square and oval buckles. Some are piped with white, while others carry dainty kid collars. The two-piece ornament is also a favorite. Two new lasts have been added in both high and low cuts, the Princess being one of the new offerings. It has long, narrow toe, very smart and on graceful lines. The company are also featuring a woman's cushion shoe, both in button and lace, with rubber heel and flexible soles. Most of the models carry a half Louis or Cuban heel and come in pleasing patterns. There is an entire absence of showy effects, the whole range evidencing quiet, conservative characteristics, which the company feel will appeal to the buying public.

#### Brown will be the Vogue

The Murray Shoe Co., London, have added three new lasts in women's and four in men's. In the former the lasts are particularly attractive, two being of the low heel English effect and the other a fine toe, with medium heel for dress wear. In regard to the prevailing styles the company think there is one shoe that will be the largest seller for women. It is made out of dark brown calf or kid

with leather Louis heel and light flexible sole. They form their ideas for this from the fact that the prevailing colors in women's wear are nigger brown and dark green trimmed with brown and the brown leathers match to perfection.

### The New Vanity Heel

The Minister, Myles Shoe Co., Toronto, are presenting to the trade all the latest conception in the smart line of foot toggery which fashion decrees. In the women's are seen several color creations and combinations that are striking and artistic. Among the snappy models is noticed a nut brown bal with grey kid top and scalloped vamp, and a patent bal with new square throat carrying a white kid top and ivory sole and heel. Another pleasing offering is a patent bal with brown kid top as well as a champagne

PAIR OF PUMPS—A STAPLE STYLE

and blue kid shoe with wing tip, the scalloped vamp and foxing being of blue and the tip and top of champagne. The new Vanity heel is shown on a number of lines, also the heart shaped throat. An all mahogany bal, a wine colored kid bal, and other models with grey suede and grey buck tops, as well as several imposing models in dull calf, patent, and white and black lend much variety to the splendid range. In walking shoes tan and black and other combinations are shown, while in low cuts there is noticed a wine kid pump with small tongue and white kid foxing, along with several delightful color contrasts. In the men's line four new lasts have been added from the narrow drop toe to the wide, round full toe, carrying perforated wing and imitation wing tips. A mahogany brown bal with tan suede top, a nut brown bal with white buck top, and low cuts with tops of morrocco grain, pencil calf, grey, tan and brown are decidedly handsome.

The creations for the season embrace all the leading colors, decoration and combination to be found in the highest grade of footwear.

### Featuring all the New Things

The new samples of Ames-HoldenMcCready, Limited, Montreal, embrace all the nicest ideas and features in stylish footwear. The wing tip, stitched and imitation, is on many of the men's and women's models. In the former range are seen a tobacco brown boot, with sand buck top,

with pinking and perforations, and another shoe has a white buck top with imitation wing tip and ivory sole and heel. A patent with white buck top and another patent with top of sand shade are natty offerings. A patent Oxford with grey buck top and another in tobacco brown with sand buck quarters are very classy. There are numerous models in gun metal and other leathers, with wing tip and perforation on tip, foxing and lace stay. A number of samples have ivory soles and rubber heels as well as composition soles. In the women's lines there are seen dressy creations in all the leading and popular shades of kid and calf leathers with wing tips, and others with plain pointed toes, in seven, eight and nine inch, height. A bal with Havana brown vamp and white kid upper and an all mahogany brown bal, with wing tip, are very attractive. Other models are in battleship grey, white and black, sand, ivory and other shades, carrying leather Louis heels. There is a chic range of pumps and colonials, the latter, with imitation wing tips and square tabs, coming in Havana brown, white, battleship grey, black and buck of various colors. A few of the high class Corona line are button, but the high cut lace bal is the leader in all the prevailing colors and combinations. Several new lasts have been added, but the custom last in men's and the pointed recede toe in women's have the chief call.

### A Splendid Array of Models

The new samples of Daoust, Lalonde & Co., Ltd., Montreal, are the finest which have been produced in the twenty-five years successful history of this enterprising firm. The range is replete in color, style and attractiveness. In the men's line, the custom last is shown in mahogany and tobacco brown, dull calf and patent. Some carry perforated tips while a few are shown with colored tops. Perforations are noticeable on most of the models. In women's lines, the slim, long forepart is being featured, in grey, Havana brown, ivory, black and white, and champagne. There are some nice two-tone effects, and solid color offerings, with  $7\frac{1}{2}$  and 8 inch top, carrying both plain and wing tip toes, with curved foxing and perforations. The leather Louis and Cuban heels are also shown. Several new lasts have been added in men's and women's, which, in company with new patterns and all the most popular colors, make the Patricia, Paris, and Metropolitan brands more representative and resplendent this season than ever.

### SPLENDID ENTERPRISE OF SHOE FIRM

The plates issued in this number by the Blachford Shoe Manufacturing Company, demonstrate not only the up-to-dateness of this concern's ideas in women's footwear, but its enterprise in placing its ideas before the shoe trade of Canada.

The expense and trouble to which they have gone to provide readers of the SHOE AND LEATHER JOURNAL with reproductions of their outstanding lines for the coming spring is worthy of the appreciation of those who are particularly interested in this class of goods and will, no doubt, be shown in a tangible way.

We feel safe in saying that the effort from a "graphic arts" standpoint has never been excelled in this country, and shows that Canada is able to hold her own both in high class footwear and typographical demonstration of our industrial advance along this line. The SHOE AND LEATHER JOURNAL is proud of these Fashion Plates as a sample of its ability to do justice to the shoe trade in its columns.

### LADY LANDED LORDLY LUNGE

With a catch of five muskel-lunge, the largest of which weighed thirty-two pounds and measured four feet one inch in length, as well as thirty-two pickerel, each tipping the beam from two to four pounds, a jolly fishing party spent several days recently angling at the mouth of the Severn River. The party was composed of S. M. Clapp, shoe merchant, Victoria street, Toronto, his son, Cecil Clapp and wife, P. M. Goff, representing the Drummond Shoe, Johnston Carey of the Carey Shoe Co., George H. Hutchinson and

THE FISH  
MR. GOFF CARRIED  
HOME

J. C. Keatings. They were guests at the hospitable Bay View house and every day went trawling in a gasoline launch, "The Hope," which slowed down to a speed of three miles an hour. The biggest lunge was not captured by any shoe-men of the company but was landed by Mrs. Cecil Clapp. It took her nearly an hour to tire out the prodigious member of the finny tribe which time and again made a bolt for liberty but finally the monster was brought to within a few feet of the boat and gaffed. The lunge was conveyed to Toronto by Mr. Goff, who was assisted in the work of transportation by Mr. Carey. It is seen in the accompanying illustration with Mr. Goff standing guardian. The latter is a shoe traveler of no small proportions and the lunge was over two-thirds of his height. The mouth of the Severn River, which is the western outlet of the Trent Valley Canal, is a splendid angling ground and the disciples of Izaak Walton returned more than pleased with their luck. They had "the goods on them," and in addition to their piscatorial harvest, brought back some fifty ducks and three dozen snipe. Mrs. Clapp must be given full credit for her pluck and skill in landing such a prize.

### LIVE MERCHANT IN NEW STORE

(See Page 42)

Joseph Patterson, of St. Mary's, Ont., has been in the shoe business since 1906, when he bought out the stock and trade of J. C. Gilpin, one of the town's oldest merchants. The new store which he has occupied since early in the summer is two doors east of the old stand and was remodelled and fitted from Mr. Patterson's own designs, under his personal supervision, into the up-to-date shoe store it is to-day.

The show windows are so formed that the walk between them leading to the main entrance is V-shaped, narrowing towards the door so that two excellent show windows are formed in comparatively small space. The floor of each window is formed by a table with top and under deck exactly

fitting the window, making two display floors, the lower being six inches above the flooring and used for showing small trunks, bags and suitcases and men's heavy shoes. One advantage of this arrangement is that the table is on castors and may be drawn out by opening the prism doors at the rear of the window, and dressed in the store. The wall side of each window is covered with a bevelled mirror to the height of 2 feet 6 inches above the upper floor with two rows of glass shelves swung in front of the mirror. The wall above the mirror is covered with green painted fibreboard on which is artistically painted in white the store motto, "The Home of Better Shoes." Over the windows the ceiling, which is very high, is dropped to the level of the store shelves and the front of the space above covered with prism glass which assists very materially in lighting the store. The side-walls of the store are lined with single shelves to within four feet of the ceiling, with new sliding ladders on each side. The store is divided lengthwise in the centre by a leather fitting couch, polish and findings stand, and lace and parcel cabinets, on top of which is an up-to-date cash register. A comparatively low mirror partition cuts off a small office at the rear of the shop where stock is also examined. The back of the shop is also fitted with plain and prism glass. At night the interior of the store is illuminated with three 250 c.p. lights with artistic shades, while in each window is a similar shaded light of 200 c.p. in the upper section and a 40 c.p. light in the lower section. The floor of the store is of hardwood, waxed and polished.

The shop is not only a credit to Mr. Patterson but to the town and is one of the neatest and niftiest of its kind in Western Ontario.

A novel idea is the use of both sides of the painted sign which hangs over the front door. On the outside of the sign is the lettering "Joseph Patterson," and on the inside, which can be plainly seen from the interior of the store, is the inscription, "Call again, please."

### PROPER WIDTH OF SHOE TO WEAR

Here are some rules by which the width of a shoe can be determined as given in O'Sullivan's foot gauge and arch measuring device:—

A foot that is  $3\frac{1}{8}$  on the bottom requires a 7AA shoe.

A woman's foot that is 2 1-16 on the bottom requires a 4 AA shoe.

Men's—7 AA.....	$3\frac{1}{8}$
7 A.....	3 3-16
7 B.....	$3\frac{1}{4}$
7 C.....	3 5-16
7 D.....	3 6-16
7 E.....	3 7-16
7 F.....	$3\frac{1}{2}$

1-16 between each width.

1-16 between each size.

With ball of foot on ball gauge— $2\frac{1}{2}$  sizes longer than what the foot will draw on length gauge is the proper size of shoe worn by the person to be fitted.

Women's—4 AA.....	2 1-16
4 A.....	$2\frac{1}{8}$
4 B.....	2 3-16
4 C.....	$2\frac{1}{4}$
4 D.....	2 5-16
4 E.....	$2\frac{3}{8}$
4 F.....	2 7-16

1-16 between each width.

1-16 between each size.

The average heights of insteps,  $\frac{3}{8}$ ; high insteps,  $\frac{5}{8}$ ; extra Spanish arch, 6-8; low insteps or so-called flat foot,  $\frac{1}{8}$ . Anything under  $\frac{1}{8}$  is dead flat.

B

BLACHFORD SHOE MFG. CO. LIMITED, TORONTO

## A LEATHER MAN'S VIEWS

**T**HE SHOE AND LEATHER JOURNAL had an interesting talk this week with one of the brightest of our light upper leather manufacturers, who is too modest to permit the use of his name. The substance of his remarks we give herewith:—

*"I think in three or four months it will not be a question of paying the price, but of getting the leather at all. Here is a letter from a foreign establishment which announces that it is absolutely impossible to ship any raw calfskins over twelve pounds, and the prices for skins under that weight are practically prohibitive. Nevertheless we are managing to keep going, but it is nerve-racking work to get the raw materials, not to speak of the labor handicap.*

*"It is the same with dyes. We are depending largely upon American dye concerns and thinking we were getting it somewhat in the neck. I went down the other day to see why our contract was not being filled. I thought someone else was getting part of it. I am satisfied that the dye makers are doing their best. They are having their trials like other manufacturers and, when some of the colors get off, it takes four or five weeks to produce them again. We contracted for supplies as far ahead as 1919, but it makes no difference we have to take what we can get as far as deliveries are concerned.*

*"The demand for colors such as tans, browns, mahogany and similar shades, is such that there is going to be some difficulty in meeting it, so that those who do not anticipate their needs will likely be in a hole shortly. The rage this season will be for these shades, with, of course, foreign importations of fancy light shades that are not made here.*

*"I think indications point to a big business in spring goods. Manufacturers who ordered stock for October delivery are beginning to send in requests to forward by express, so that orders are evidently coming in early from the retail trade. As the manufacturers have been buying from hand-to-mouth for a considerable time there will undoubtedly be a rush as soon as spring business begins to pour in.*

*"We are, by-the-way, having constant appeals from England for light stock which we are unable to meet, as we are compelled to protect our Canadian customers. Here is a letter from an English firm of factories asking for box calf, box side leather, and a lot of lines they would never think of buying outside the United Kingdom heretofore, and we have numerous enquiries from the United States. The leather man is surely under pressure these days. I don't see how prices can possibly remain stationary, and as I said before, it will soon be a question of getting the goods at all."*

### EDUCATING THE CUSTOMER TO HIGH PRICES

Last season, when dealers were compelled to advance the retail price of their shoes to cover the increased cost of manufacture, our readers were advised to seek the good will and support of the editors of their local newspapers in giving publicity to some of the reasons why consumers would have to pay more for their shoes. It was gratifying to learn that hundreds of readers of this journal acted upon the suggestion, with the result that their customers were honestly convinced that they would have to pay more for their new shoes, says the "Shoe Retailer."

With the approach of the new fall season, when still higher prices will be asked for shoes of the same quality, it is noted that here and there dealers are again seeking the support of their newspapers in acquainting the public with shoe and leather market conditions that operate to increase the cost of shoes.

A few days ago we received from George W. Sherwell, of Ogdensburg, N.Y., a clipping from one of his local newspapers in which he told the people of that city a few facts about shoe and leather market conditions. Mr. Sherwell's article is given here just as it appeared in his local paper:

"To the Public:—

"The leather market is in a deplorable condition, and the prices of leather are the highest in the history of the business. We are devoting every bit of energy and our knowledge of the shoe business in buying the very best goods obtainable for the money.

"Buying directly from the manufacturers, and paying spot cash, there is no reason why we should not be able to buy as good shoes, at the lowest prices, as any retailer in the state. Don't fool yourselves or your pocket books that you can buy shoes as cheap as you have been buying them. With the present high prices of leather it is a physical impossibility for you to do so.

"If you are in the habit of buying good shoes continue to do so, because they are the cheapest in the end.

"Whether you buy your shoes at this shop or some

other first-class shoe shop, if you expect to get the same service out of your shoes as you have formerly had you have to make up your minds to pay more for your shoes.

"We are giving the best values we can possibly give and we are leaving no stone unturned to protect the public as well as ourselves from imposition and shoddy footwear. However, no matter how carefully we try to suit the public, there seems to be a tendency among some people to expect shoes, and especially the soles, not to wear out, and thereby expect a lot of free shoe repairing.

"We wish to advise the public that our shoes will wear out. But when we sell a pair of shoes we are giving as good a shoe as we, or any other retailer in America, can sell for the money.

"Under these circumstances, we want the public to understand that we are running no free repairing bureau. We are doing our best to serve the people in the best manner possible through this critical stage of the leather market.

### MAKES SPECIALTY OF SHOE SALES

Mr. A. C. Clark, of Brantford, Ont., late of the Clark Shoe Co. of Brantford and Paris, is making a specialty of

A. C. CLARK, BRANTFORD

running sales for shoe merchants, cleaning out all surplus stocks at a fair margin of profit over and above the cost of running the sale. His efforts to date have been very successful, he having produced good results for W. C. Goetz, Guelph; D. Fulton, Sudbury; W. A. McKay, Palmerston; J. J. Butler, Haileybury; M. B. Young, Toronto; F. H. Shier, Sault Ste. Marie; F. H. Cable, Toronto, and many others. Any merchant desiring to run a good, clean conducted sale, would do well to write him.

### THIS HAPPENED IN IRELAND

A shrewd manager in one of Ireland's stores was recently "downed" by a raw junior clerk of unexpected prevision.

The clerk had completed a sale to a lady who had purchased shoes, value 21s 2d. On opening her purse she found she had only 16s 2d to pay for them. "Never mind," she said, "I'll take the shoes and pay the 5s balance to-morrow."

The clerk took her money and made up her parcel, and away she went.

Now advances the all-seeing manager, like a destroying angel. "Why!" shouted he, "she may never come back!"

"Oh, won't she!" said the clerk. "Of course she'll come back. Shure, I've given her two rights."

## Rannard Shoes

### ANNOUNCING the New Autumn and Early Winter Modes of Rannard Shoes

You are invited to view a few of the favored models in Women's Autumn and Winter Shoes, 1916-17, by the

**Rannard Shoe Ltd.**  
Style Creators

The Original Rannard Autumn Models are ready. For Exclusiveness, beauty, grace, elegance, correctness and superiority of materials, workmanship and finish, the New Rannard Fall Styles probably excel anything ever seen in American footwear.

Don't fail to see our special displays of highest grade styles at our Number 2 Store, Portage and Hargrave.

**RANNARD SHOE LTD.**

ADVT. OF LEADING WINNIPEG SHOE FIRM

## SHOE PORTRAITS

By constant outlay of time, thought, and labor, we keep our styles, not merely abreast of the times, but a little in advance, and an appreciative demand is the result.

**Smardon Shoe Co.**  
LIMITED

533 Visitation St.  
Montreal                      Quebec

We know by long years of experience that much depends upon good methods and skilled labor to successfully build a modern shoe. Shoe building is a science we know, because it's our business to know. Ours are right, but not by accident.

## SHOE REPAIRERS GETTING TOGETHER

Many associations are being organized by shoe repairers throughout the country, says the Shoe Repair Shop. We have earnestly advocated this policy, and are glad to see local associations appear in the field. There is no limitation to this work. In large cities it sometimes proves practical to have the territory limited to a given district. There is much logic in this, for in greater cities, where certain districts are occupied by the wealthy classes, different business methods are brought into existence, and a different class of shoe repairing is called for than that required in the districts populated by poor people. And then there is

Notice has been given by the Army Council of an intention to take possession of all stocks of Bends of 10lbs. weight and upwards, to include all Butts, which are to be calculated as two Bends.—*The Shoe and Leather Record*, July 7, 1916.

The Over-worked Repairer: "Well! This puts the lid on!"

the district which is a medium between these two extremes. A scale of prices, for instance, might be suitable for one of these districts and unsuitable for the other. It is better, however, to wipe out imaginary dividing lines as much as possible; and yet it is always important that an association, to exercise strength, should be so closely allied to a district that it will interest most of the repairers in that district. In smaller towns we often see it practical for an association to take in a circuit of towns. As this movement grows we will begin to see state and tri-state organizations, and also a national organization. The movement will be healthier probably if the growth is conservative.

Last July we published an outline suggestion, hoping thereby to aid repairers of different communities in the primary formalities to be observed in forming an association; and we also published a form for a constitution and by-laws; particularly stipulating that it was simply a draft of a form, and subject of course to changes in any particular, to make it conform to local desires or conditions. We have repeatedly been asked for copies of this issue, until our supply is entirely exhausted; and during the past month we have had numerous requests for suggestions along

this line. We therefore republish the following, which is taken from the July, 1915, issue of this publication:

### The Way to Organize

A number have asked us for the formalities of organizing an association. It goes without saying that the first thing needed is active hustling on the part of repairers interested. Line up as many of your competitors and other repairers as possible, getting their promise to attend an organizing meeting. This initial gathering should first of all form a temporary organization by selecting a president and secretary; and the next important step is to appoint a committee to draft a constitution and by-laws. Hiring a lawyer to do this is unnecessary. Incorporating under the state laws is unnecessary. To aid the committee in drafting a constitution take any ordinary one. It may be used as a guide, and changes may be made in it to make it consistent with local conditions in hand. It is well to get the draft of the constitution before the meeting as soon as possible, and urge that it be discussed in all its phases; and when it is finally adopted it should be signed by all the charter members of the organization; and when new members are taken in they too should sign it; although this is not absolutely necessary, especially if in their application they say that they have read the constitution.

After the constitution is adopted, the next in order will be the election of officers; and here great caution should be exercised. It might be well to defer the selection of permanent officers until a second or third meeting, as it is important that a new association should have officers speci-

### WHAT THE LEATHER SHORTAGE MAY DO TO US

POSSIBILITIES SUGGESTED BY BOOT AND SHOE RECORDER

ally qualified to perform the particular duties to which they are assigned. Cheap politics and favoritism should not enter into consideration.

With these few general suggestions, we would state that we would be glad to discuss any of the points here made more fully with any other who will write us; and if we can be of any personal assistance we want the repairers of the country to know that we are at their command. We will fight for associations so long as they are fair with all branches of the trade, and their primary purpose is to elevate the shoe repairing industry.

# That . . . . . Guarantee

When a man says a counter will outwear a shoe, it may or may not mean something, but when we say **OUR COUNTERS WILL OUTWEAR THE SHOES**, and back that up with our **RIGID GUARANTEE**, that **DOES** mean something.

Remember, our **FIBRE COUNTERS** are made in Canada by Canadians, for Canadians, and from Canadian fibre.

# AMONG THE SHOE MEN.

The Harvard Shoe Store, Saskatoon, has been succeeded by Williams & Causgrove.

R. J. Kidd, manager for R. Neill, Peterboro, left recently on an extended visit to Edmonton and other points in the West.

Gordon F. Wadsworth, representing L. H. Packard & Co., Limited, Montreal, has left on a long trip through Western Canada.

H. R. Emerson, President of the Boston Last Company, was in Richmond, Que., last week visiting the plant, which is very busy.

Philip Pocock spent a few days last month in Winnipeg. Alfred Pocock, of Winnipeg Shoe Co., Winnipeg, has been spending his holidays in London.

Lamont's Limited, boots and shoes, Saskatoon, has been succeeded by Williams & Causgrove.

Roy Graham, of the ladies' shoe department of T. Eaton Co., Winnipeg, recently returned from a two weeks' canoe trip through the lakes of Manitoba.

Peter Logan, who is in charge of the shoe department of Spencer's, Limited, Vancouver, spent a few days recently in Toronto, Montreal and other cities on a purchasing expedition.

Hugh Davidson, representing the MacFarlane Shoe Co., Montreal, left recently on an extended selling trip to the Western Provinces with a fine range of new spring and summer samples.

Shoes to enable persons to walk on water that an Italian has invented are driven forward by paddle wheels which are mounted on eccentric axles and revolved as the wearer shifts his weight from one foot to the other.

R. J. McAllister has succeeded S. A. Bell as representative for Geo. A. Slater, Limited, in Manitoba and Southern Saskatchewan. Mr. McAllister has for some years past covered Western Ontario for the firm and he leaves that territory to be filled by A. E. Elmer.

John McEntyre, Limited, 46 Alexander street, Montreal, Que., have completed arrangements with the Superior Polish Co., Brockton, Mass., to be their sole representatives in Canada for their full line of factory goods, including patent leather repairers, dressings, blackings, etc.

John Affleck, who is president and managing director of the Yale Shoe Store, Limited, Winnipeg, was in Montreal, Toronto, Galt and other shoe centres recently calling upon his many friends in the trade and making large purchases. Mr. Affleck reports the shoe business in the Prairie Capital as being very satisfactory.

J. B. Douglas, who has been in the shoe business in Calgary for several years, has disposed of his shoe stock at 234 Eighth avenue west, and after closing up his other business interests in Calgary, will go to Detroit. He was one of the pioneer shoe merchants of Greater Calgary, and owned several large shoe stores.

A. Mireault, formerly with Ames-Holden-McCready, Limited, Montreal, has been appointed secretary of the Slater Shoe Company, Limited, Montreal, in succession to P. De Grosbois, who has resigned to take over the management of the Merit Shoe Shop, Limited, 510 St. Catherine street west, Montreal.

A fine pair of ostriches, the gift of H. B. Johnston, of H. B. Johnston & Co., leather manufacturers, Toronto, constitute an additional attraction for the thousands of visitors

to the Riverdale Zoo, Toronto. Mr. Johnston bought the birds from I. S. Horne, of Horne's Zoological Arena Company, of Kansas City, Mo. They were shown in the ostrich farm at the Canadian National Exhibition and the farm had leased them from the company named.

The annual banquet of the staff of Kilgour, Rimer Co., Winnipeg, was held at the Fort Garry hotel recently. There was a fine dinner provided and after the good things had been disposed of a number of addresses were made and a profitable conference held. J. P. Kilgour, vice-president of the company, spent a few weeks lately at Beach Laurentian.

H. A. Weeks, who was formerly with Winnipeg Shoe Co., Winnipeg, and lately in the ladies' shoe department of T. Eaton Co., in that city, has joined the colors and is among the many representatives of the shoe trade who have enlisted. He is now a member of the 232nd Battalion and is taking a qualifying course for a commission. Mr. Weeks was born in Glasgow, Scotland, and came to Canada in 1909.

A recent despatch from Boston says that it would not be surprising if further contracts for army shoes were placed soon with American manufacturers by foreign governments. It is rumored negotiations are on for about \$2,000,000 worth and there is possibly more to come. Italy has been recently buying and England has to turn to United States for leather supplies. It is said British manufacturers have received orders for 26,000,000 pairs of army shoes for Russian, Serbian, French, British, Italian and Belgian armies since the outbreak of war. Great numbers have been for Russian soldiers.

Seized suddenly with angina pectoris while at dinner, David Watson Alexander dropped dead at his home recently, 67 Binscarth road, Toronto. For many years he was well known as a leather merchant in Toronto and in more recent years as manager of the London Guarantee and Accident Company. Mr. Alexander was born in Thurso, Caithness, Scotland, and came to Toronto when eighteen years of age. He was a prominent business man, and though retiring from active business life some years ago, he still retained the position of manager of the London Guarantee Company.

Invitations have been received by leading Toronto wholesale merchants to the wedding of Albert Tetrault, son of N. Tetrault, of the Tetrault Shoe Manufacturing Co., Montreal, to Mlle. Paule Duhault, daughter of Mme. L. H. Hebert, Montreal. The ceremony will take place in the chapel of St. James Cathedral, Montreal, on September 21st, Archbishop Bruchesi officiating, and will be followed by a reception at the Ritz-Carlton Hotel.

There has been another advance of ten per cent. in the price of larrigans during the past fortnight. This makes a total advance of 20 per cent. within the past three months. Larrigans will soon be as precious as German dyestuffs if the present pace continues.

An automobile owned and driven by Ernest E. Boye, manager of the Nursery Shoe Company, St. Thomas, Ont., was struck by a Michigan Central Railway west-bound freight train at a level crossing in that city about nine o'clock at night, and demolished. Mr. Boye and a companion escaped being instantly killed by jumping. The automobile stalled on the track in front of the train. It was dragged for a considerable distance, tearing up the rails. Nearly an hour's delay was caused to the traffic on the railway.

- TOP FACINGS, ALL KINDS
- CANVAS AND LEATHER INSOLING
- OIL PAPER FOR SHOE COVERS
- PLUMPING CLOTH, etc., etc.

**F. E. Woodward & Sons**

Lachine, Province of Quebec

### WILL LOOK AFTER THE WEST

W. W. Lindsley, who formerly covered Quebec and the Maritime provinces for E. T. Wright & Co., St. Thomas, is now looking after western Canada for this firm. He succeeds Fred. A. Macfarlane, who supervised that territory for several years previous to the establishment of the Can-

W. W. LINDSLEY, ST. THOMAS, ONT.

adian factory of the firm. Mr. Lindsley is well-known to the trade as an experienced and successful traveler and will no doubt meet splendid encouragement on his new ground. His predecessor Mr. Macfarlane will cover Kansas, Nebraska, Missouri, Colorado and Iowa for the Rockland plant of E. T. Wright & Co., succeeding his brother, who died at his home in St. Louis, last May.

E. A. Chalk, of Toronto, has been appointed Ontario representative for Daoust, Lalonde & Co., Limited, Montreal, and is now out with samples for spring, 1917, as is also W. F. Copp, who handles the line in the Maritime Provinces.

Harry Dallas, jr., who is associated with his father, Harry Dallas, sr., Toronto, representing several English houses in the shoe line in Canada, was married recently to Miss Marion, daughter of Mrs. George Castle, Clarendon avenue. The ceremony took place in Grace Church, Toronto, Rev. James Broughall officiating. After spending their honeymoon in New York and other eastern centres, Mr. Dallas and bride will take up residence in Toronto. Many friends will join in hearty congratulations.

Narcisse Gagnon and wife, Montreal, spent a few days in Toronto last week.

A. E. Marois, of Quebec, accompanied by his wife, daughter and little son, Paul, were in Toronto for several days last week, the guests of J. D. Hawthorne. They also went to Hamilton, where they visited John Lennox and took occasion to pay a visit to Niagara Falls and Buffalo by motor.

The "Aviator" shoe is the name of a patented line in outing footwear which has just been put on the market by the Canadian Consolidated Rubber Co. It is made by a secret process which absorbs all shock in walking. The shoe has a resilient cushion consisting of innumerable air spaces dispersed through a springy mass of rubber securely imbedded in the sole and covered by a tough wear-resisting layer of high-grade rubber. The sole serves as an insulator against hot pavements and any bruising action caused by pebbles or other sharp objects under the foot.

H. R. List, representing Luc Routier, shoe manufacturer, Quebec, was in Toronto last week on business.

A. R. Kaufman, manager of the Kaufman Rubber Co., Kitchener, Ont., was in Toronto lately calling on the trade.

E. R. Lewis, leather merchant, Toronto, is now handling

Duclos & Payan counters, as well as the other lines of leather made by this firm.

Elzear Poulin, a tanner, was drowned in a lime bath for curing leather, at Quebec.

Fred Brereton, who has had some years' experience in the shoe line in Toronto, has started in the footwear business for himself at 328 Danforth avenue, Toronto.

J. W. Foy, of Toronto, has returned home after spending the summer at his cottage, "Bienvenu," on Kumfort Island, near Parry Sound, Ont.

A. R. Ostrander has opened a new shoe store on Royce avenue, Toronto, and is off to a good start in business.

J. A. McLaren, wholesale shoes, Toronto, and wife, have returned from a visit to Chicago, Detroit and London, Ont.

W. L. Francis, sales manager for Gale Bros., Limited, Quebec, was in Toronto last week on his way west to the coast on a business trip.

P. A. Leblanc, of Aird & Son, shoe manufacturers, Montreal, was in Toronto last week for several days on business.

R. Tyler, who was assistant to N. J. Collins, in the shoe department of Christie-Grant, Limited, Winnipeg, has joined the aviation corps for overseas service and is now taking the course at Weston, Ont.

A footwear department for ladies and children has been added to the stock of general dry goods of Smith's Glasgow House, 1176 Queen street west, Toronto.

T. Connor, representing Reed & Co., shoe manufacturers, Rochester, N.Y., was calling on the trade last week in Toronto.

S. Collins Cronk, son of S. C. Cronk, wholesale shoes, 60 Front street west, Toronto, has joined the colors and enlisted with the 67th Canadian Field Artillery, which is now in camp at Petawawa. His brother, Lieut. Frank S. Cronk, has been for a considerable time a member of the 169th Battalion, which has been encamped at Niagara-on-the-Lake and will shortly go overseas. Both boys until they signed up were engaged in the shoe business with their father.

Arthur Donald, of Donald, Carmen & Mudge, Inc., sheepskin tanners, Boston, was a business visitor to the trade in Toronto a few days ago.

J. H. Goyer, of Montreal, who represents H. B. Johnston & Co., leather manufacturers, spent a few days in Toronto recently.

Daoust, Lalonde & Co., Limited, Montreal, have had an inquiry for 30,000 skiing shoes from one of the Allies. The specifications call for laupars, seal or leviathan double soles, leggings 14 to 16 centimetres from heel, and if possible metal lining at point where the sole touches the iron of the ski.

S. T. DUCLOS, ST. HYACINTHE, QUE.

S. T. Duclos, of Duclos & Payan, leather manufacturers, St. Hyacinthe, Que., was recently elected alderman in that city, and is receiving the congratulations of his many friends.

Wm. G. Tapp, manager of the shoe department of the Nipissing Stores, Port Arthur, Ont., writes that business is very good in the footwear line and they are looking forward to a good fall trade. Mr. Tapp says that he greatly enjoys the *SHOE AND LEATHER JOURNAL*, as it keeps him posted on styles, business conditions and all the happenings in the trade.

Mr. Morris and Mr. Beer, of the firm of Morris & Smith, Charlottetown, P.E.I., were recent visitors to Toronto and attended the Canadian National Exhibition.

C. Henderson, of A. Henderson and Son, Pictou, N.S., spent a few days in Toronto recently and called upon a number of members of the trade.

W. E. Short, representing the Kingsbury Footwear Co., Montreal, left recently on an extended trip throughout the Western Provinces with a fine new line of spring samples.

A. Stuckey, manufacturer of shoe patterns, Lombard St., Toronto, has returned from a successful hunting trip in the Parry Sound District.

J. G. McDiarmid, of Toronto, who represents the Murray Shoe Co., of London, throughout the prairie provinces, is now on an extended selling trip with a splendid range of spring samples.

The store at the corner of Arthur and St. Paul streets, in the new Walsh block, Port Arthur, Ont., will be occupied by E. R. Gavin, who expects about November 1st to have on display one of the largest and most complete stocks of boots and shoes ever shown in the Twin Cities. The premises are being specially laid out to meet the requirements of Mr. Gavin's rapidly increasing business.

E. H. Dickenson, shoe retailer of Hamilton, Ont., has gone out of the shoe business.

Recently Ernie Fawkes, of London, late of the Paris Shoe Parlors, Paris, Ont., had a very close call. He had taken a party of friends for an automobile ride to Tillsonburg. While returning through Woodstock the car came in contact with a hydro-electric wire which had fallen across the road. The wind shield happened to be up and the wire caught on same, thus enabling Mr. Fawkes and friends to jump from the blazing car.

John Hutchison, superintendent of the Breithaupt Leather Company's tannery at Penetang, spent a few days recently, with his son, L. B. Hutchison, manager of the Toronto branch of the Kaufman Rubber Co.

J. Wiesel, shoe and clothing merchant, St. John, N.B., spent a few days in Toronto recently and called upon a large number of members of the trade.

The McCrudden Shoe, Montreal, are installing several new machines in their factory.

The Independent Box Toe Co. is enlarging its premises through the addition of a cement basement. Louis Dupre,

the proprietor, says that business has never been so brisk, both for box toes and heels.

The Gutta-Percha and Rubber, Limited, have taken out permits for the erection of a number of additions to the company's works in Toronto, construction of which has already been started. One addition is a two-storey brick shop and garage to cost \$18,000. A second extension is a two storey brick reclaiming building, the cost of which will be \$30,000. The third and largest addition is a four-storey factory building costing \$31,000. The total cost of the additions will be about \$79,000. The new buildings are being erected on West Lodge Avenue, Toronto.

A firm of shoe manufacturers have offered to remove their plant to Acton, Ont., if that town will loan them \$15,000 to \$25,000 and give them a free site for a brick factory. The company employs thirty to forty skilled workmen and has been operating five years.

C. S. Corson, sales manager of the Regal Shoe Co., Toronto, accompanied by C. F. Schuszler, P. R. Corson and W. R. Billings, of the traveling staff of the company, attended a sales conference at the head offices in Boston this week.

T. F. Hobbins, shoe retailer, of Toronto, recently assigned to James Watt.

A winding up order has been granted in connection with the Montreal Shoemaker Co., Limited, who recently assigned to J. G. Duhamel.

The Barrington Street store of Wm. Taylor & Co., Halifax, has been given a new front entrance and it has made a very great improvement in the appearance of the place. The door was formerly at the extreme right, but it is now in the centre and care has been taken to secure sufficient window room on each side for display purposes. Barrington street is now the great shopping street of Halifax, and there are many shoe stores along that thoroughfare which compare favorably with those one sees in the largest cities.—The Maritime Merchant.

George E. Chambers, manager of the Regal Shoe Store, Toronto, is spending a few days in Boston and other New England shoe centres on business.

Travelers are now out taking placing orders for next season's tennis lines on which prices have been increased from five to fifteen cents a pair owing to the high and constantly advancing figure for cottons, leather insoles, thread, eyelets, laces, etc. The sale of tennis and outing shoes during the past season was the largest ever experienced in the history of the retail footwear trade.

A. G. Morgan, a former shoe merchant, of Winnipeg, died recently in Los Angeles, Cal. He was a brother of F. M. Morgan, manager of the Winnipeg branch of Ames-Holden-McCready, Limited. The late Mr. Morgan located in Winnipeg in 1882, and was for many years engaged in the shoe business in the McIntyre block in that city. He sold his business to W. T. Devlin in 1901, and became interested in sheep ranching in Saskatchewan, near Maple Creek. After fifteen years of successful ranching, he disposed of his property and retired to Los Angeles.

Thieves recently broke into the Western Shoe Repairing Co.'s store at 2319 Granville street, Vancouver, but were not successful in carrying off any money.

William Taylor, who came to Canada from Ireland in 1869 and located in Parry Sound, Ont., died in that town recently. He first began business in a small way as a shoemaker and branched into the tanning and wholesale manufacture of shoe packs and boots. His shoe packs were known not only in Canada, but abroad, as he sent them to the trenches in Flanders, the late General Mercer being among the first to wear Taylor's shoe packs.

The stock of A. J. Cook, shoe dealer, 2076 Queen street east, Toronto, who made an assignment a few weeks ago, has been sold to Crystal & Podatsky.

A FISHING PARTY DOWN BY THE ST. LAWRENCE. ON THE LEFT IS GEORGE B. CAMPTON WHO REPRESENTS W. B. HAMILTON SHOE CO. IN EASTERN ONTARIO, AND DIRECTLY ACROSS THE TABLE IS H. W. GILHOOLY, SHOE MERCHANT, BROCKVILLE, ONT.

**ALL YEAR**

**Specialties**

**"FOOT-RESTUR"**

It is not necessary to use an adjusting machine to fit the "First Aid" Foot Restur to any foot. Merely insert button hook in the hole in the heel of the upper plate, swing out plate as shown in illustration and bend it over the edge of a table or chair until it has the proper elevation. This is a patented feature of this Arch Support.

**BUNION SHIELD**

As a relief from the pain of bunions and enlarged joints the "First Aid" Bunion Shield has

no equal. It removes the pressure and prevents friction when walking. It is made of the best grade

of Para gum rubber and is perfectly sanitary. Made in 3 sizes. Retail price, 50 cents each

We are the only manufacturers of Foot Specialties who do not sell their products to the drug trade.

**HEEL CUSHIONS**

This is the most comfortable and durable heel cushion made. A soft bed for sore heels. Removes the jar when walking. Costs less, wears longer and is more comfortable than rubber heels. Made in five sizes. Retail price, 25 cents per pair.

**CUROPAD**

For the relief and cure of hard and soft corns, bunions and callouses. Applied to the calloused part it excludes the air, retains the moisture of the skin, prevents pressure and friction, and finally in this way the hard and false cuticle is gradually removed, the natural skin only remaining. Thus the corn or callous is relieved and eventually cured. Made in nine sizes. Retail price, 10c., 15c. and 25c. each.

**TOE STRATE**

The most common of foot troubles is the crooked or overlapping toes. The "First Aid" Toe Strate is made of soft Russian Sponge Rubber, and gently forces the toes back to their proper positions. Made in three sizes. Retail price, 25 cents each.

## CONDENSED ADVERTISEMENTS

Two cents a word. Minimum charge for an advertisement 50 cents.  
Cash must accompany all orders.

---

FOR SALE—An Electric Repair Shop and small stock of men's and boys' shoes. Only one in a city of 12,000. Doing a good business and getting good prices for work. I will stay with new proprietor till April 1st, 1917, if desired. Will sell at invoice price. Apply for full particulars to Box 10, Acton Publishing Co., Toronto.

---

BUYER AND MANAGER—Wide experience, posted in all markets, now with large western departmental store, open for position on short notice. East preferred. Married. Particulars, Box 12, SHOE AND LEATHER JOURNAL, 1229 Queen street west, Toronto.

## APPOINTED REPRESENTATIVE FOR ONTARIO

R. J. Orr, who for the past fifteen months has been in charge of the orthopedic department of H. & C. Blachford Limited, 286 Yonge street, Toronto, has just been appointed representative of the Canadian Arrowsmith Mfg. Co., of Niagara Falls, Ont., for Toronto and the Province of Ontario. Mr. Orr has had a long experience in the retail shoe trade, beginning eighteen years ago in Toronto. He later

R. J. ORR, TORONTO

went west and obtained an extended insight into all branches of the shoe game in Winnipeg, Brandon and other cities. Going to Chicago, he was in charge of the orthopedic department of the "The Fair" in that city, and he was also on the staff of the Walkover Boot Shop in Detroit. Mr. Orr has devoted much attention to all appliances for the comfort and relief of foot trouble and from his thoroughly practical acquaintance with the lines which he handles, he should meet with a large measure of success.

## MANY SHOEMEN SAW BRIDGE FALL

On September 11th all the shoe factories and jobbing houses were closed in honor of the putting in place of the centre span of the Quebec steel bridge. The result of the accident is deeply deplored, but it is gratifying to learn that another span will be made to take the place of the one which is now at the bottom of the river. The final completion of the bridge means much to the prosperity of Quebec.

During the recent demonstration the city was filled with strangers from all parts of Canada and the hotels crowded. The Chateau Frontenac intend building a large addition to accommodate the thousands of tourists who visit the Ancient Capital every year. It is expected that the hotel will have a dining room capable of accommodating 1,000 people.

**MR. McLAREN RECEIVES SAD NEWS**

J. A. McLaren, of the wholesale shoe firm of McLaren & Dallas, Toronto, received the sad news from Ottawa, this week, that his eldest son, Capt. W. H. McLaren, was "missing, believed to be killed." He enlisted with the 19th Battalion, C.E.F., in Hamilton and in May, 1915, went overseas. In September, following, he crossed to France and had since been in the war zone. He was in his twenty-fifth year, and previous to joining the colors, was a member of the 91st Highlanders, Hamilton. His brother, Capt. John F. McLaren, who is a member of the 58th Battalion, also saw four months service at the front, but was taken ill with hernia and only recently left the hospital, in London, after an operation. He is now at Shorncliffe, England. Capt. W. H. McLaren, who was killed in action, was married, on April 3rd to Miss Beatrice Brown, of Hamilton,

who is now at Hythe, near Folkestone, Eng. The deceased officer was a nephew of Lieut.-Col. J. I. McLaren, of Hamilton, and after finishing his education at Toronto

# Survival Value

What is it? Survival Value is the lasting prestige added to all footwear by the affixing of the **Union Stamp**—it is the surviving standard because:

- 1st It is a guarantee of honest footwear, made under the best conditions.**
- 2nd It is a pledge of expert workmanship.**
- 3rd It is the pass-word which opens the sales doors to Union Men everywhere.**
- 4th After the other inducements have all been recited, the conclusive and finishing argument is the UNION STAMP.**

Every shoe bearing the **Union Stamp** retains a sales value of long duration, for no shoe bears the stamp unless it has been produced under the proper conditions and represents honest value.

For mutual profits, better and bigger business, insist upon the official stamp of the **Boot and Shoe Workers' Union**—the only guarantee of Union Footwear.

## 22-FOOT GOODYEAR SHOE REPAIRING OUTFIT

MODEL N

**T**HIS Outfit represents the highest development in shoe repairing machinery, and meets every demand of modern shoe repairing. It embraces all the essential processes for making new shoes from old ones, giving the maximum of equipment and efficiency in the minimum space. The Outfit has the Goodyear Stitching Machine with all its improvements, including a new style steam generator which uses gas or gasoline for generating the steam, and operates automatically, thereby insuring a uniform heat for keeping the wax in proper condition and requiring little attention from the operator. The Edge Trimming Machine has the new feature of the two shafts, being operated by a single belt, and the cutter grinder is attached directly to the main shaft. This arrangement gives better results with less power.

The Buffing and Scouring Machine has a shaft 57 inches long and carries the following equipment:

- |  |                                   |
|--|-----------------------------------|
| 2 Split Bottom Buffing Rolls           | 2 Flat X-Ray Heel Scouring Wheels |
| 2 "C" Shape X-Ray Heel Scouring Wheels | 1 Heel Breast Scouring Wheel      |
| 1 Pin Wheel Pad Complete               |                                   |

A powerful Blower System removes the dust resulting from the trimming, buffing and scouring operations, and is designed to overcome certain objectionable features of other blowers.

The Finishing Machine has a 78-inch shaft which has all the necessary equipment for black or russet work:

- |  |  |
|--|--|
| 2 Corrugated Rubber Shank Finishing Wheels | 1 Corrugated Rubber Heel Finishing Wheel |
| 1 Corrugated Rubber Bottom Finishing Roll  | 2 Shank and Bottom Brushes               |
| 2 Heel Brushes                             | 1 Stitch Cleaning Brush                  |
| 1 Levelling Roll                           | 1 Bead and Wheel                         |

At the end of the Outfit is the Oscillating Edge Setting Machine which is fitted with union irons and in its motions duplicates hand workmen with quicker and better results.

Each of the machines is operated independently by a friction drive pulley, so that it is necessary to use only those machines which the operator may require. This feature means a saving of power.

All the machines are firmly mounted on legs and driven by a countershaft with carefully adjusted bearings, so that the Outfit runs with very little vibration, and is in every way most efficient.

## A New Principle in Shoe Building

And not only new, but better. It's called the New Unlocked Process and consists of a method of shoe construction that permits the shoe to find the exact contour of the foot. Shoes made by this process will

## Fit 40% More Feet

than shoes made by any other process known to the trade.

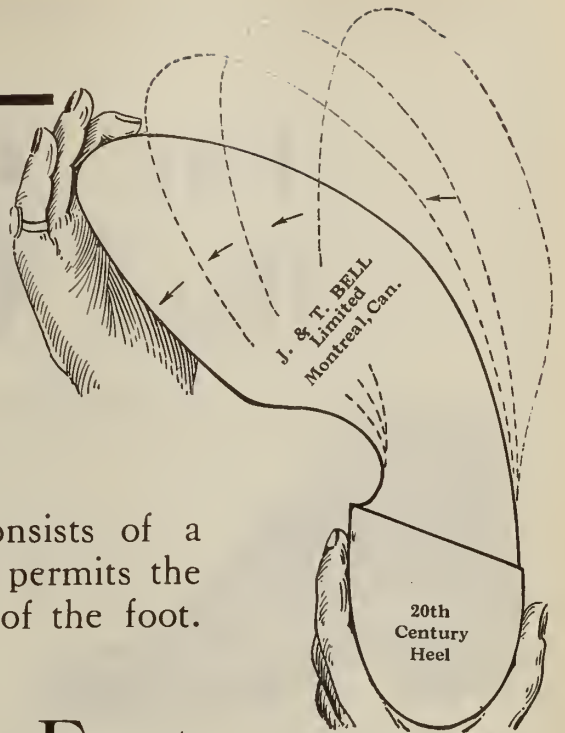

The lasts are ball-bearing and follow the bottom shape of the human foot. The upper and sole patterns are sprung and cut under a new method which gives the arch a springy, flexible support that is always with the foot. An upper leather bandage which, with the upper itself, encircles the body of the foot, gives a freedom and flexible support that is endorsed by many Orthopedic surgeons.

### ASSURED FOOT COMFORT WITH REAL SHOE STYLE

# Lace Shoe Logic

You can't make any mistake in purchasing lace shoes at this time.

They have always been the most reliable staple and now they are the style, too, so they have everything to commend them.

Lace shoes mean quick fit, quick sales — no come-back for free repairs.

This is now more than ever a factor, for high cut boots never did look well when buttoned and every additional button is a problem in fitting. High cut laced shoes, on the contrary, are easy to fit; they look well. Laces form an adjustable fastening; they automatically meet and satisfy the many conditions in fitting which, in the case of buttons, require time, expert attention and repeated expense.

Lace shoes are not shelf warmers. They are in demand now; they will be even more so next season.

You know your trade, but if you have any doubts as to what to buy, lean towards lace shoes; it is the logical thing to do.

SOOTHING, HEALING  
MASSAGE BALM  
FOR TIRED, TENDER,  
ACHING FEET.

Dr. Scholl's Pedico Foot Balm

3  
KEEPS THE FEET  
COOL, DRY AND  
COMFORTABLE.

Dr. Scholl's Antiseptic Foot Powder

Hot, tender, burning, perspiring, odorous feet are perhaps the most common foot troubles. The close confinement of the foot in the shoe, the dust and dirt that work through the tiniest openings—these are some of the causes. Care and attention of the right sort will give relief and comfort. And you can give your trade the means of obtaining that comfort—at a nice profit for yourself—by selling

## DR. SCHOLL'S 3 Necessities for Perfect Foot Comfort

The first of these is Dr. Scholl's Pedico Foot Soap. It is especially prepared in granulated form to require rubbing and massaging, which dissolves the granulations and removes the hard, dry tissues and thoroughly opens the pores of the skin.

It gets into the pores, loosens up the secretions, purifies, deodorizes and thoroughly cleanses the feet and burning soles, and induces active circulation.

The second is Dr. Scholl's Pedico Foot Balm, a soothing, antiseptic, massage balm for sore, tender, perspiring feet, and should be used after the feet have been thoroughly cleansed with Dr. Scholl's Pedico Foot Soap.

It penetrates the skin and gives a cool, restful feeling to the feet. Heals the skin, takes away soreness, stimulates healthy skin action. It is the finest article on the market for keeping the feet in a wholesome, healthy condition.

The third step in the treatment is Dr. Scholl's Antiseptic Foot Powder. It is an ideal antiseptic Foot Powder for hot, feverish, sweaty feet. This Powder is sprinkled on the foot and in the stocking and shoe. It has truly medicinal and deodorizing qualities. It should be used after Dr. Scholl's Foot Balm every morning or when the feet are active as in walking, dancing, etc. It prevents tender or sweaty feet and unpleasant odors.

These preparations retail at 25 cents each—the three for 75 cents. With an order for one dozen of each amounting to \$5.75, we will include a beautiful display sign, some circulars with your name upon them and two electros for newspaper advertising. Order to-day.

## LETTING-GO THE PROFITS

**Are Dealers in Business for Public Benefit?—"Old Prices While Stocks Last"—Do Low Prices Mean Good Business?—Public Are Prepared to Pay for Their Footwear**

**T**HERE is a story of a colored shoe dealer down south who charged a customer two dollars for a pair of shoes that sold ordinarily for cash at four. Being asked why he made the discrimination he replied, "Spec I'll never get paid for 'em an' I'd rather lose two dollars than four."

There is a lot of this kind of philosophy amongst retailers. There are dealers that will spend a lot of time and money digging up a job lot of goods and sit down and mark them at the usual advance on the invoice price, thinking this is good business. There are merchants just now who are crowing in their advertising about having bought shoes when leather was low and giving the dear public the benefit of their enterprise. They seem to think they are in business to keep people supplied with cheap footwear. So much invoice cost is there method of marking goods regardless of the fact that some goods in ordinary times will stand a certain percentage while others will not. There are staple lines in every business that will not bear much shifting of price, while there are others in which an advance of a quarter or half a dollar is neither here nor there.

But why should a retail merchant, because he has had foresight and capital to seize the opportunity, foolishly dissipate the results of his brains and money? One of the largest and most successful retail merchants in the country, in talking of this the other day, expressed his disgust at some of his competitors who were still selling lines at old prices notwithstanding the fact that they were paying for some of them nearly as much as they were getting.

"I bought heavily early this year and not only so but invested money in leather so that I have been able to get a little shoe manufacturing done on my own account. Do you suppose I am giving away the results of my careful planning and heavy investment to the public? I trow not! I am getting for my goods the regular market price at which they are selling in September, 1916. The profit I make I put up against the 'lean years,' when a shoeman had to sell a dollar five shoe for a dollar and a quarter."

This merchant has the "right sow by the ear." There is less sense in a shoe dealer selling his goods at old prices when costs are going up than there is in a purchaser of real estate in time of expansion, tacking twenty-five per cent. to the purchase price and selling his property to the first comer. Now is the time to make a little money. The time will come all to soon, although certainly not for a good while yet, when the market will begin to wobble and the dealer will get his share of serving the "dear public." His policy should be to get the profit while he can. The people just now are keyed up to paying for their shoes and have the money withal to pay the price. The dealer should look out for himself. "Caveat emptor" is a good motto just now.

# GET HIGHER PRICES—BE FRANK IN YOUR ACTION

Have the Moral Courage to get for Your Shoes What you Know They are Worth—  
Keep Price Tickets to the Front as Much as in the Past—Cost of Doing Business  
To-day is Higher Than Ever, and Stocks Run Into More Money—Facing Matters

EVERY man is not brave. Hurl this charge at him, and he gets in a pugnacious mood at once, and says: "If you think there is one atom of intimidation in me, just come around the corner or out on the street, and I will very soon show you." Perhaps he is not a coward in a physical sense, as it has been shown thousands upon thousands of times during the past two years that courage of that character is not lacking.

In the matter of moral convictions, fixity of purpose, straightforwardness of endeavor and frank, clean-cut methods, many a man is, in plain terms, a dodger,—which is another but more genteel name for fear. He knows his duty, but he does not do it—he resorts to expediency, opportunism and subterfuge—a trinity of characteristics

TELL THE PEOPLE WHY SHOES ARE SO HIGH IN PRICE

that are observed very much in the shoe trade now, with respect to high prices.

"Did you notice," observed a Western visitor the other day, "that comparatively few shoe stores are now putting the prices on the styles shown in the window? Perhaps there are two or three pairs, with the mark \$5.00 or \$6.00 on a miniature card, and alongside these is a galaxy of colored models representing the latest achievement in shoemaking art and pleasing patterns. Perhaps an innocent woman is led to believe that these shoes sell at about the same price as the ones which bear the tickets. On entering to make inquiries she discovers to her amazement that the figure for modish foot togery for 'Miladi Fair' runs all the way from \$7.00 to \$15.00, with \$9.00, \$10.00 and \$12.00 as the predominating figure, if one wishes to possess the smartest and latest.

## Make Your Prices known

"Now I do not see why a shoe retailer should hang back from making his prices known. Most people, if they see a style in the window, like to know what it costs before going in to make inquiries. It is not in everyone's make-up to be of a curious and investigating turn of mind. Some people like to 'price' this and 'price that,' and 'look at' this and 'look at' that, and then do the polite 'Thank you,' or 'I will call again' or 'I was only looking around for a friend,' or 'It is not my intention to buy to-day,' or 'I will be in to-morrow,' and with these 'white' fabrications, gracefully retire. This takes up the time of the proprietor, or his sales forces, and while perhaps they are there for this purpose, still on busy days they would prefer not to answer inquiries, that too often mean nothing, or be disturbed by

'pricers,' or 'shoppers' when the establishment is full of 'buyers.'

"In the matter of prices for shoes at the present time, I am going to face the issue squarely," said another Western Ontario shoeman. "There is no use of side-stepping the issue. High prices are here, and will likely stay for some time. I am paying 50c. to 90c. more per pair for my men's shoes than I was last year, and from 75c. to \$1.60 more on my best grade of women's, and have to raise my prices accordingly. Why, what is the use of sailing under false colors? We are all in the same boat, and the man who faces the future courageously is the one who is going to have the smoothest course. People expect to pay more for their footwear. The price of sugar, bread, coal, and everything else has gone up, and why should not shoes, considering the scarcity of leather, and the embargoes on hides, and the score and one uses that leather is now put to, which it was not a few years ago."

## People Expect to Pay More

"It also costs more to do business to-day," said a Hamilton shoe merchant. "I have had to give my clerks a raise of from \$2.00 to \$4.00 per week, and my advertising, printing, wrapping paper and everything else is at a considerably higher figure than a year ago. Naturally the consumer has to pay for all this, but there are several aspects which he does not consider. I am not making any greater profit than I was a year ago, in fact, I have not advanced all prices in proportion to the increased cost of shoes, and the other requirements attendant on doing business.

"But here is the feature that the average shoeman is going to overlook. Suppose that he carries a thousand pairs of men's shoes in stock. I am speaking now of the shoe he formerly brought from \$3.40 to \$3.60 per pair. This would represent, say, \$3,500 in men's fine boots. To-day this same stock will cost him around \$5,000, which means that he has to invest more money, and have no more shoes on his shelves.

"Then, let us take it in women's. Suppose he has 1,500 pairs of women's house, walking and evening shoes, which, on an average, would have cost him from \$3.00 to \$3.90 a year ago. Now, these same shoes, if he puts in any of the leading colors, and patterns, will entail an expenditure of from \$5.00 to \$7.00, almost double what they were before, and his stock, instead of representing about \$5,000, comes up to \$9,000 or \$10,000. Although he is carrying no larger range than a year ago, the money represented in the purchase is from 50 per cent. to 75 per cent. more. He must, therefore, do a large trade if he wishes to turn over the stock three times. This is a point which a great many shoemen do not consider."

## How Shoes Run Into Money

"Why," remarked a Montreal traveller the other day, "A man can give you an order now for \$900 or \$1,000 worth of shoes, and when the goods are sent him, he has only three or four cases. Shoes run into money very fast, and it is necessary to keep them on the move, and at a good profit, if one is going to succeed in the retail shoe business to-day. This is a proposition which is growing harder all the while. The time has gone by when an ordinary man could rent a shop, put in a line of goods and hope to succeed. Now, it is a survival of the fittest. He must know values, be conversant with the demands of his customers and buy right."

# Keeping Up Appearance

Looks Have Influence—The Man as Well as the Shoe  
Must Attract—Slovenliness the Foe to Business Success—  
Shoe Decorations and Good Clothes Best Kind of Advertising

SOME people may be willing to dig their way through dirt to unearth bargains but most men and women prefer a clean, attractive shop and bright, neat salespeople when they start on a shopping expedition. Occasionally one may find a store that is a jumble of goods and ill-kempt people that manages to put away a little money at the end of the year, but conditions to-day, both wholesale and retail, call for attractiveness as well as forcefulness in selling methods.

Money spent in making a store attractive by means of decorative effects suited to the nature of its particular business represents a good investment. Even those who do not possess pleasant, well-furnished homes like to enter a store where the surroundings are bright and where they are sure of rubbing shoulders with the best people of the neighborhood. Business follows the crowd and any means of attracting customers to the store is good merchandising. Nobody likes to go into a dingy, dirty shop that is "run down at the heel," and looks as though the proprietor were having hard work making ends meet. A preacher in a talk to other preachers said recently that it was the "surprise" element in the sermon that counted. He explained that he did not mean sensationalism, but that faculty of saying something new in such a way as to surprise the hearers.

It is the same thing that "pulls" in advertising, whether it be newspaper publicity or in the numerous ways that a customer may be impressed with the facilities of the store to serve him efficiently. "You always have some new decoration or fresh arrangement of your store," said a lady to a merchant as she entered one morning. "You must be making money." The idea fastened itself upon the mind of this customer, that because the merchant was constantly giving his store a "spic-and-span" appearance that he was prosperous, and this very idea probably led her to patronize the establishment. People like to trade in prosperous stores. They like to be seen going in and out of well-to-do establishments and, whether they say so or not, they all have a feeling of satisfaction that leads them to feel prosperous themselves when they enter a shop and find at every turn the evidences of business growth and progress. What some stores need more than any other kind of advertising is a touch of paint and a few decorative effects that will lift them from the dead level of dullness and dry rot to live commercial propositions.

Then as to personal appearance of the merchant there is often room for improvement if not radical departure. The writer saw a shabby, crusty-looking old fellow come out of a dry goods store in a town not a hundred miles from Toronto the other day to arrange some goods that were displayed across the

front. He looked a part of the whole and instinctively the thought came, "do many people go into such a place and transact business with such a back number?" As to age the proprietor ought not to have been in the has-beens, for he was only between fifty and sixty, but he was dressed in a suit of cheap tweeds that looked as if he had worn them for ten years, and his flannel shirt was surmounted by a paper or celluloid collar and frayed tie. This man, the writer was told, had once the best business in the town but he scoffed at new fangled goods and methods until he was left so far behind in the race that he had to cut his store in two. He is now running a little enterprise that probably keeps him in the modest way in which he is content to live.

Merchants do not seem to realize as fully as they should the importance of dressing neatly and well. A traveler stepped into a down-town store the other day and the proprietor gave a whistle as he took two or three turns about the office. "Why you have something new on every time you come in," said he to the grip man. "You seem to be making money, you people." "Yes, we are," replied the traveler, "and if we were not and I was looking shabby and unsuccessful you would be the first man to turn me down." "You'r right, my boy," said the retailer, "none of us want to have much to do with has-beens or failures."

This tells the story of human leaning toward the man who is "getting on" in life. Every man, and especially every woman, likes to deal with a merchant or salesman that gives the appearance of success in his business and most people like neatness and attractiveness for their own sake. The dealer who fails to take this fact into account is guilty of neglecting an important factor in selling. Apropos of clothes and retailing, a young business man some time ago made up his mind to get inside the select circle in his town. He realized the importance of dress in business and already had made an impression in this respect as well as in the church he attended, in which, by the way, he had been asked to fill the position of usher. He purchased a dress suit and laid his pipes to get invitations to one or two of the best social affairs that came off in the town last winter. In this way he met several people of influence and wealth and these introductions have won for him other connections that are yielding him good business returns. His good dressing during business hours makes it possible for him to meet on the street high class people of both sexes who have come to regard him quite in the same category as the local banker, lawyer and other larger business and professional men. Of course, he has something beneath the good clothes to back them up.

Nevertheless the clothes and shoe question is more important than most retailers think.

## DOES USE OF PREMIUMS REALLY PAY?

The Practice has Obtained a Strong Hold in Many Centres—Different Plans Adopted to boom Business—Some have proved Successful and Others have Turned out to be of Doubtful Benefit—Many Different Opinions Expressed—Much Depends on the Nature of Gifts, the Plan of their Distribution and the Object in View

“PLEASE let me know if, in your opinion, and in the opinion of your readers, based on previous experience, there are good results obtainable from specialty advertising, such as rulers, knives, balloons, scribblers, tops, pencil sharpeners, pencil boxes, pencil protectors, dust pans, tin pails, pin cushions, paper knives, fans, broom holders, photo frames, slates, pen holders, blotters, paint boxes, marbles, colored crayons, musical balloons, checkers, flag or fancy medals.

“I have started in the shoe business and would like to know if you can throw any light upon this matter. I have had two or three representatives of novelty firms calling upon me, presenting strong arguments that this form of publicity is the best and most effective that I can adopt,” writes a shoe retailer in an Eastern Ontario town.

Premium advertising is favored by a large number of retailers, particularly those who cater strongly to the children's department. Others, who have tried out various schemes, unhesitatingly declare that there is no permanent benefit reaped by the giving of souvenirs, in the shape of toys, school or household articles. Much depends upon the class of trade that the dealer caters to, the community in which he resides and the kind of goods that he handles.

“Giving premiums to purchasers, is something like asking a man who has always travelled on a railway pass to pay his fare, or expecting one, who has always enjoyed free admission to a theatre, to whack up the same as other patrons do; it goes much against the grain. What people have received, they naturally expect again, and there is danger that the premium business may be carried altogether too far,” says a Stratford shoe merchant.

“If it is once started in a community it is apt to demoralize legitimate trade,” observes a Sarnia firm. “Mr. Smith offers some novelty that possibly costs him five cents each—Mr. Brown may follow with another, that is more original or striking, and in a measure capture the trade which has gone to Mr. Smith. Mr. Green, then, possibly joins in the general premium demonstration, and leads the procession for a while till the community becomes gift-mad.”

### The Returns are Not Satisfactory

“No, I have never found giving premiums brought me any lasting benefit,” remarks an Ottawa shoeman. “I have tried out pretty nearly every plan, and am still sticking to newspaper advertising, booklets and announcements. I know others have given away articles that created a stampede for a while, but I never grow excited, knowing that people, who are generally drawn to one place by a certain inducement, will float to another place, when something more attractive is offered. This kind of patronage is too unstable. I endeavor to make regular, permanent, returning customers, but at the end of each year, I take good care to remember the kiddies in the household, with some appropriate Christmas gift or, if there are no small members in the family, then I send the lady of the home a pair of evening slippers or house shoes, a pair of Juliets, a pair of rubbers, overshoes, skating boots, overgaiters or some other equally suitable remembrance.

“Understand me,” he continues. “I do not make such donations to every housewife who may have bought two or three pairs of shoes during the year. It is only to families whose trade amounts to \$25.00 up. Any household

spending less than this sum for shoes, I do not consider permanent customers. I find that this brings me very good results as it is always pleasant for everyone to be remembered at Christmas time. I do not see why the shoeman should not do something in this line, as well as the grocer, who sends around some oranges, figs, candies, dates, olives, a household plant or a bottle of native wine. I have had satisfactory returns from calendars, and issue one every year. It is generally a pretty pastoral scene, or a more rugged view of mountain and torrent.”

### Believes that Souvenirs Pay

A Halifax dealer writes :—“I have had much increased business from souvenirs. I find they draw quick attention to any department, particularly the children's branch, and at the opening of the schools, both in summer and winter, I enjoy a great influx of trade from the boys and girls, by presenting each purchaser with a scribbler, a ruler, a knife, a pencil case or a school bag. Each season I endeavor to give something different and make it valuable enough to be kept. A whistle, a balloon, a kite, a mouth organ, a bubble blower, and other like trinkets, soon get out of order, but with a ruler, a pencil box, or a knife, one's name, address and line of business can be stamped or printed thereon, and this serves as a very good reminder for some weeks at least that 'Here is the proper place to buy good school shoes, comfortable, durable and attractive.’

“I also send around announcements to the different schools, to the effect that I am offering such premiums, and this gets the children talking about my place. I secure the names of the teachers and send some printed literature to them, and I have found that they are generally willing to allow this to be distributed. In return I give all teachers a special discount of ten per cent. on their personal purchases at my store.

“There are certain other ways of boosting trade, however, with which I do not agree, and have never found any use for, such as guessing contests, voting contests or presenting the person who makes the largest purchase within a certain time, with a rocking chair, or coal heater, or by giving every tenth person who comes into the store, and buys a pair of shoes, their money back, with my compliments. This does not create very much interest, except for the time being, and artificial booming has to be done to stir up excitement. Grown-ups are not so quickly moved to obtain prizes as are children, whose sympathies and interest or curiosity are quickly aroused.”

### Steer Clear of Co-operative Promotions

“I would advise any dealer, if he goes into the premium plan to control it himself,” says a Winnipeg shoeman, “and not have anything to do with any co-operative endeavor or associated movement with others. If he keeps the control of all premiums in his own hands, he knows exactly what they cost him, and what definite results have been obtained—whereas in any general concerted action, he is only a small participant in the cumulative results, which are often very doubtful, and too widely scattered.”

“I have never tried premiums, because it costs too much to get something that is really worth while, and I would not give a trinket away under any circumstances. It is too much like a boomerang. I have once or twice

tried out a very good scheme, "declares one of the oldest shoe sellers in Montreal. "I had a valuable French mantel eight-day clock wound up and put in among the ladies shoes, and offered to present the clock to the one who guessed nearest to the time that it would stop. I know others have tried this plan, but only allowed customers who made a purchase of one dollar or over, to have a guess. I threw the competition open to everybody, had neat slips printed and gave one to every person who called at my store. On this slip it was stated that the prize was an eight-day timepiece, was valued at \$21 and had been wound up on a Thursday afternoon at 3.15. There was a blank for filling in at what time the clock would stop, together with the name and address of the guesser.

#### He Gave Everybody a Chance

"This competition was open for seven days, and I had 4,237 people hand in cards. I got a good deal of favorable publicity out of it, and incidentally, some extra trade. I do not believe in guessing or voting competitions, for generally one has to be a purchaser in order to participate. When I put on a stunt of this character, I charge the cost up to advertising, and allow everybody to take a hand in the game. It gives me a reputation for progressiveness and enterprise, which I might not otherwise enjoy. Premiums may be all right in their way, but I for one, believe in quality goods, exceptional service and straight-forward newspaper advertising. On this I have built up my present business, and while others have skyrocketed into sudden publicity by flamboyant proceedings, the down fall is often as sudden and sharp as the spectacular ascent."

"I am now clear of the premium business, thank goodness," asserts a Calgary footwear merchant. "I got into it some years ago and being in it found it very difficult to get out of it. I have many proposals presented to me since by several concerns who make a specialty of this business, but never again for mine. I think they get the substance while the patron gets the shadow. Premiums

may attract trade, but they do not retain it. I think any man is better off doing business on legitimate lines, and, in these days of high prices, seeing that the value is put in the goods that he handles. The cost of all premiums whether they know it or not comes out of the customer or the goods. If the merchant bears the expense he is decidedly unwise, to say the least."

#### Gives Baby Its First Bootees

Another dealer, who is doing business in a town of three thousand five hundred population in Eastern Ontario, replies that he believes in premiums to a certain extent. "I watch the local papers, and as the birth column each week contains the notices of all new arrivals, I send the proud mother a neat card conveying congratulations, and ask for the honor of presenting the newly born with its first pair of shoes, requesting that the card be brought in by some member of the family, and we will be only too glad to give 'baby a pair of soft soles with our compliments.' This plan has proved very gratifying."

Another stunt tried out by a leading shoeist in Western Ontario, a year or two ago, was to give on a certain day to each purchaser of a five dollar pair of shoes or over, a pair of rubbers gratis. The offer was taken advantage of by a large number of new customers, but the dealer says he would hesitate at trying it out again as the proposition was too costly.

Does the giving of premiums pay? The query is still unanswered. It is a moot question on which the trade as a whole will never agree. The consensus of opinion seems to be that the plan does not contribute to the largest measure of permanent success in the retail shoe game, particularly at the present time when costs are so high and the difficulty of securing sufficient profit to meet the growing expense of doing business and to earn a fair return on one's investment is becoming more and more perplexing all the while.

THE EMPLOYEES OF THE TORONTO BRANCH OF THE CANADIAN CONSOLIDATED RUBBER CO. ENJOYING THEMSELVES AT THEIR SECOND ANNUAL PICNIC AT CENTRE ISLAND, TORONTO

# Stray Shots From Solomon

Don't let your heart run away with your head. A heart is a good thing in its place but if you give it a show it will lead you into all kinds of fool propositions. Have a heart! Yes, but

GOOD-HEARTED FOOLS

don't let silly, piffing sentiment get you where your head tells you you shouldn't be. "He that trusteth in his own heart is a fool but whoso walketh wisely shall be delivered." Lots of good-hearted fellows have let their hearts walk them into the penitentiary and into drunkards' graves. Plenty of men would rather be called good-hearted than wise-headed. "His heart's all right," people say when the want to excuse the folly or guilt of some chap that has gone wrong in spite of knowing better. "Walking wisely" is far more important than "standing in" with folks. When you get off the track the people who now call you good-hearted will call you soft-headed. The world has no use for the man who is down, especially if it has helped to get him there. Don't trust your heart. Keep your eye on the path.

o o o o

It is mighty easy to say yes, yes, to other people's ideas and words. None of us like to have to differ with those about us, and especially our friends. But

TIMELY REBUKE

more people are sent to the devil with pats on the back than get into his company through kicks in the breeches. The candid friend may sometimes be an unmitigated nuisance but he has saved many a heart from sorrow and many a life from shipwreck. Don't see a fellow go wrong through lack of a timely word. "He that rebuketh a man afterwards shall find more favor than he that flattereth him with his tongue." You may have to take "dirt" at the time but you will have your own respect and later on the appreciation of your friend if the rebuke is merited and well meant. This is no warrant for people horning in where they have no business but a hint to the modest man who may be as brave as a lion where occasion rises but who is as timid as a lamb when it comes to telling a friend what he really thinks. And it doesn't mean "bawling out" or "calling down" those who differ with them, as some people seem to think.

o o o o

There is no nuisance like the fellow who goes off half cocked. "Seest thou a man that is hasty in his words, there is more hope of a fool than of him."

THE WORST FOOLS

The fool keeps his mouth shut and when he babbles everybody knows what to expect. But when an intelligent man sets his tongue loose and lets a hot brain run lightning through it there is sure to be death and destruction in the wake. You would give the world to recall some of the words you spat out when somebody taunted you some time ago. That little ebullition of temper that

found expression in lurid language cost you not only friends but money. Many a lawsuit is the result of the insanity that gives rein to a bad tongue. Many a heartbreak and many a desolated home is the result of human snake-bite, the venom of which was stirred up by hasty words. The worst fools are not jibbering idiots.

o o o o

The smallest-souled, most miserable dog of a man that breathes is the fellow who is always trying to "get even." He spends half his time nursing

MAN WITH A GROUCH

fancied insults into intended injuries and hugs his rotten thoughts until they putrify and turn to the poison of asps. This kind of a man does himself more injury than anybody else. We are all familiar with the type. He goes around with the chip on his shoulder. He thinks you are aiming to cheat him in every deal you have with him and is continually trying to put one over on you to get even. If you don't stop and shake hands with him every time you meet him on the street, slobber over him at the lodges, or drop in and hear him wail, you are getting "stuck up" and think you are better than he is. It is easy to become a "groucher." Make up your mind to "get even" and you will find plenty to get even with. "Say not I will do so to him as he hath done to me, I will render to the man according to his work." This kind of thing goes in on a man like the smallpox and kills him.

o o o o

The fellow who soaks and gluts these days is a poor apology for humanity and we have quite a few of these excuses for men right with us. It was once a

BOOZE FIGHTING

custom to say of a boorish person that he had "no more manners than a Russian." We English people have a very bad habit of thinking ourselves a little better than other people and we have been lately getting some lessons. The Russians, for example, have shown that when a serious war confronted them they could smash the vodka bottle, buckle their belts and go into the fight with their heads up. The "frivolous French" have also thrown away their absinthe and gone to a man into the trenches to fight the battle of right and liberty. It has remained to the "superior Englishman" to hug his beer bottle to him and guzzle his booze like the great freeman he is while his country runs short of munitions and men. It will take a generation or two to get this idea of superiority either moral or physical back to anywhere near its old foolish place in Great Britain after the war is over. In this issue the word has gone forth, "Be not among wine bibbers; among riotous eaters of flesh."

# NATIONAL SECRETARY SENDS INSPIRING MESSAGE

**Shoe Men Should Co-operate in Good Faith, and Assist One Another Rather than Fight Themselves to a Business Death—The Work is Growing, Dignity of the Trade is Being Raised, Better Business Methods are Adopted, and Goods Sold at a Profit**

**T**HE retailer must have a clearing house for retailing thoughts and the only way to do that is by association.

By association you will dignify your business and learn to do business as business should be conducted.

The work you are doing now will bear fruit. The retailer once inoculated will never go back to the old system.

You will soon learn that every one is necessary, and that every store has its own character.

A man who attends association meetings and rubs elbows with fellow retailers changes his point of view.

The effort of association is to establish the principle of brotherhood and co-operation rather than antagonism and cut-throat methods.

The foregoing are some excerpts of a stirring message contained in a letter from A. H. Geuting, of Philadelphia, Pa., General Secretary of the National Shoe Retailers' Association, and read by President Howard C. Blachford, at the first fall meeting of the Toronto Shoe Retailers Association, held in the Temple Building on September 28th. It is the intention of the members of the Toronto Association to have some of the officers of the National body address them during the coming season, and arrangements are now being carried on with respect to convenient dates. It is probable that A. C. McGowin, of Philadelphia, and A. H. Geuting, President and Secretary respectively, will later come to Toronto, and tell the shoemen what is being accomplished across the line for the weal and welfare of the trade through the various states bodies and the National Association.

## Correcting a Trade Evil

On important matter which has been accomplished by the Toronto Association, is in eliminating the practice of the various Y.M.C.A. branches securing tennis shoes from wholesalers and selling them direct to members of the Y.M.C.A. at cut prices. The latter body is not in the retail business and wholesalers now recognize that the retail channel is the only legitimate one for the distribution of sporting shoes. All merchandise in the line of footwear purchased by the Y.M.C.A. is now secured through local retailers and the President of that body has given assurance to the shoemen that the institution will not slash prices in disposing of tennis shoes. Thus an abuse which has been rather long standing has been wiped out.

## Unifying Effect of the Work

In his message to the Toronto Shoe Retailers, Mr. Geuting, General Secretary of the National Association, to whom a hearty vote of thanks will be forwarded, said:—

"We appreciate thoroughly the big work that you have before you in associating your shoe retailers in an organized body, to unify customs, practices and good business methods. Five years ago we thought this feat impossible in the United States, but we are glad to say now that we have accomplished wonderful results along this line,

and we do not hesitate to say that we believe within a few years the retail shoe trade will speak with one voice in the United States. In fact, I almost feel that we have accomplished this purpose already, for those that are not with us, practically are with us in spirit, and should any crisis arise to the trade, every one would flock under our banner.

"But, just a word of encouragement to those of your trade that perhaps do not see the light, and will require some persuasion or some particular argument to make them see the advantages of belonging to, and taking part in, association work.

## The Principle of Brotherhood

"First, the effort of association is to establish the principle of brotherhood and co-operation rather than antagonism and cut-throat methods. A man who attends association meetings and rubs elbows with his fellow retailers, changes his point of view and begins to see that the retailing of shoes is an honorable calling and requires scientific study, hard work and industry, and that to be of the best service to the community, they require the best thoughts and ideas that come to the various retailers in their work.

"They will soon find that it is not necessary to take the attitude that was so prevalent in the United States, that

HOWARD C. BLACHFORD, PRESIDENT

to stay in business you must ruin some one else. They will soon learn that every one is necessary, that every store has its own character, its own particular atmosphere, and its own clientele, which stands or falls according to the wisdom with which it is conducted, and that price has very little to do with this; inasmuch as no customer or no dealer in Canada can detect the little differences in shoes, for sometimes it is quality, and other times it may be something quite different, but all enters into the value of the article.

## Clearing House for Thought

"Secondly, the shoe retailers will find, provided they experience is that of the United States, that the traveling

man, and the manufacturers, usually influence the retailer along his way of thinking, which usually runs in the direction of volume for his particular product, and while this is all right as far as it goes, it does not make retailing profitable if carried too far. The retailer must have a clearing house for retailing thoughts, and the only way to do that is by Association, for what is one man's experience, is bound to be of assistance to another in the same line of business, and the only way to get it, is to co-operate in good faith, with the cards on the table and assist each other rather than fight themselves to a business death.

"The third, and most valuable of all, is that you will dignify your trade; you will learn to do business as business should be conducted, at a profit and in a scientific way, to the greatest advantage of the consumer, as well as yourself. Through association you will be able to honor those leaders in your craft who will present the best views, and by their leadership and altruistic work among their fellow members, deserve to be honored. This is what happens in the line of statesmanship—in the line of invention—and in literature and art, and should be done just the same in the shoe business, for the shoe retailers are of great number and they deserve to be honored by their members when their work has demonstrated its value for the good of all.

"The more you enter into this subject, the more it opens out suggestions, and the wonder is that the thought has not been carried out long ago. As a word of encouragement to those of you who are struggling and doing the pioneer work, I might say that the work you are doing now will bear fruit. The retailer once inoculated will never go back to the old custom; it will be sure to grow, and the honor will be all the greater for you who are doing the pioneer work.

"We, in the United States, sometimes feel that there might be a link between the retailers of the United States, with those of Canada. As a Rotarian this link has already been established in the shoe section, and I hope to see it grow. I wish you all manner of success, and congratulate your members on your first meeting this fall."

### THE NORTHERN LIGHT

(See Front Cover)

Mr. Thomas Sisman, of Aurora, has grown up with the shoe trade of Canada, coming to this country from England forty years ago, when he was but a lad. He learned the business where thoroughness is a great essential, having spent his apprenticeship, as well as five years of his time as a full-fledged journeyman, with the well-known firm of Thomas Bannister, London, England. In Canada his experience was with such firms as the W. B. Hamilton Co., Cooper & Smith, Orr & Harvey Co., and others identified with the industry in Canada for the last four decades. Mr. Sisman went to Aurora in 1898, the present business of the T. Sisman Shoe Co., Limited, being organized in 1910. Besides having the technique of shoemaking absolutely at his fingers' ends, Mr. Sisman has demonstrated his breadth of ideas in the development of a large and growing business, in which he has been assisted latterly by his son. First and foremost in his thoughts, of course, is the production of "The Best Everyday Shoe" in Canada, but he manages to give his time and abilities to a few outside matters, taking an interest in education and manufacturing generally. Mr. Sisman is an excellent motorist, but his hobby is horticulture, and he has surrounded his premises in Aurora with the finest sample of landscape gardening to be found, probably, in the county of York or out of it. On Sunday the people of Aurora and other places visit Mr. Sisman's gardens as they might a public park. Mr. Sisman was an officer of the school board in England for two years and is a member of the Toronto Board of Trade, the Canadian Manufacturers' Association, and the National Geographical Society. In religion he is a Methodist and in politics a Liberal, and also a member of the Masonic order.

### WALKOVER BOOT SHOP OPENS IN QUEBEC

Another Walkover Boot Shop will be opened in Canada at No. 10 St. John street, Quebec City. Extensive alterations are now going on and the new store will be as attractive and fully equipped as the ones in Montreal and Toronto. F. A. Guinivan, proprietor of the Walkover Boot Shops in the latter cities was in Quebec recently in connection with the arrangements for the launching of the new establishment, and in regard to the enterprise he said:—

"We believe that the shoeman of the future is going to be as essential to the homes as the doctor or the dentist is today, in other words, fully two-thirds of the public suffer from foot trouble or foot deformities in some form or other, that is to say, two-thirds of the public have corns, bunions, in-growing toe-nails, callousness of the bottom of the foot and fallen arches, which all arise from the ill-fitting of shoes, and we believe the day is coming when shoemen will have to do something other than sell shoes. They must have a scientific knowledge of the feet, and how to fit them properly in such a manner that they will have a chance to grow naturally and to their fullest extent.

A great many of the different foot ailments are caused by the ill-fitting of children's shoes. Shoes that are fitted so short and wide that the toes cannot grow straight and are forced back, which in turn cause bunions, in-growing toe-nails and fallen arches. So the shoeman must have a knowledge of the original cause of this trouble, which enables him to fit feet in such a manner that these causes may not occur. Then, again, he must have a knowledge of these imperfections and how to fit shoes in order to relieve these troubles when they already exist. This necessitates a large stock and many sizes of the style. In other words, any style that we decide to place before the public, we require to stock 128 different sizes to have our complete range. This means the different sizes and half-sizes between 5 and 13 on men's, or between 1 and 9 on ladies', and on every half-size of length we stock eight different widths, which means that no matter how long and narrow or short and wide the foot may be, we have a shoe that corresponds to the measurements of the foot. Every customer's foot is scientifically measured, by the "Footograph" measuring system, which tells us accurately and at once the exact size to fit the customer's foot, which does away with all guess-work on the part of the clerk. Then again, we have to stock many different shapes, because there is no one shape that will fit all feet.

"Excessive abuse of the feet seems to prevail to a greater extent, with the English-speaking people. In other words, such races as the Scotch people, who are by nature tall and thin, have long, narrow feet. By long narrow feet we mean that the breadth is narrow in proportion to the length. The parent's idea of ideal shoes are shoes with wide toes and wide width which forces the child's foot, which is long and narrow, so badly out of shape that in after years he has excessive foot trouble. To prove this theory conclusively, we would cite races such as the French, and nations in the southern part of Europe, where the prevailing style of shoe is long and narrow, and most deformities that we have mentioned are unknown. That is to say, it is very rarely a bunion or enlarged joint is seen in any of the European countries from France to the southward, whereas nine-tenths of the public in the British Isles seem to suffer from this trouble, which is caused solely by the British bootmaker not valuing the length that is required to fit a foot properly, believing that the most essential thing is breadth.

"We have worked out this system of efficiency to such an extent that in our Montreal and Toronto stores we keep a doctor and a trained nurse in attendance. Then the stores are fully equipped with X-ray machines and all such instruments which enable us to fully diagnose the customer's case to such an extent that we know absolutely which style and size shoe will fit."

# KNOW EACH DAY THE VALUE OF YOUR STOCK

Simple System Which Tells the Retailer What Lines are Moving and What Ones Are Staying on the Shelves—A Valuable Index in Sorting and Buying—Kitchener Firm Well Pleased With the Results—Keep Down Large and Small Sizes to Minimum

A GOOD stock keeping system, one that is simple, effective and practical, means much to the progressive shoe merchant. Too few men know where they are at in the variety, number and value of their shoes. They keep tab in their head, as it were, but memory is a treacherous friend, and often deludes its possessor. He imagines that his stock is reduced to so many thousand dollars—that his turnover last year was such an amount and his expenses were about so and so. It is this little word "about" or "around" that deceives many a dealer financially. He thinks he is making money, whereas he should know.

There are various systems of stockkeeping, some of which possess more detail than merit and more intricacy than accuracy. One would almost have to instal a special department to carry out the system. Some systems tell too much and others tell too little, and some are like the proverbial wiseacre, who imagines that he knows it all, but in reality has much to learn.

One of the best systems that the SHOE AND LEATHER JOURNAL has run across for some time is in use in the store of A. Sippel & Son, King street east, Kitchener, Ont. The firm composed of A. Sippel and his son, W. A. Sippel, have been doing a thriving business for ten years. They have a large and well-kept store, 100 feet deep by 22 wide. The slogan of the establishment is "Where the Good Shoes Come From." Universal labels prevail throughout, the design consisting of a shield, surmounted by a beaver and surrounding this is a decorative circular border. On each label, which is printed in blue, there is on the left hand side dotted lines for the stock number and the name of the maker, and on the right hand side for the size and width and the selling price. There is also room on the label to mark the kind of leather and the last and to indicate the cost mark by means of the code of the firm.

In keeping tab on stock the house uses a large loose leaf

ledger, the sheets being about 15 inches wide, with several transverse and upright lines, the former being in blue and the latter in red. At the extreme left is a space for the maker's name, and in the next column is the number of the shoe; then comes the cost column and in the next is the selling figure. A wide space is employed for the description of the shoe, then the name of the last is given, and the width, followed by several spaces for the sizes. The regular sizes,

THE LABEL USED BY THE FIRM

2, 3, 4, 5, 6, etc., are in figures and the half sizes are indicated by a dash. The firm started this system of stock keeping about two years ago, and have found it very satisfactory. They have decreased their number of slow moving lines, obtaining regular prices on the most of them. When they see a range or a style that is not selling in the way it should, they point it out to the clerks, who by an extra effort, can clean them out.

### What is Entered in Stock Book

Speaking of the system W. A. Sippel said:—"We label all cartons when they come in with our own label, on which we write the number, maker, size, cost price, selling price, last and description. This is then carried into the stock book,

		Sizes														
maker	no	Cost	Sell	Description	Foot width	2	3	4	5	6	7	8				
Smith	1402	225	350	Pat. Bal McKay Jewel D		I	X	II	III	II	IX	IX	II	IX	I	I
James	1634	235	350	Pat Bal McKay Unity C		I	I	IX	IX	II	II	IX	IX	II	X	I

and every style is given a separate sheet, but in cases where two lines are similar, they are put on the same sheet. Two or three times a year we total up the entire book which gives us the amount of stock carried. We know by a reference to the sheet that we have so many pairs of this style and that style, and that they cost us so much. Knowing the number of shoes we have in stock and the cost price, it is easy to arrive at the total stock carried. Of course, each salesman uses a counter check book and when a sale has been made, the slip containing all particulars is placed on a file. Each day the sales are checked off on the stock book, being marked by a red line across the original strokes indicating the number of pairs we have in each size. We allow two or three lines at the end of each sheet for extension work, so that in going over the book two or three times a year we can tell just how many pairs we have of each line. Adding up our sales daily and subtracting the sum from the total amount of stock carried gives us the amount of stock at the end of every day. The cost price of all goods received is added to

this amount on arrival. In this way we can tell every day how much stock we carry.

#### Knows What Lines are Moving

"We have found this loose leaf stock book very satisfactory in sorting and buying stock lines, as it conveys the information that we desire to know regarding how many pairs we have sold and what lines are not moving the way they should. Since we started this system we have not nearly the number of large and small sizes we had before, while our stock has been considerably reduced, dead lines eliminated and our turnover is larger. It requires a few minutes to check off the sales slips and mark in the stock book the lines which have been sold. This is generally done by me in the morning, and I consider any time spent upon the system is to the very best advantage. I will be pleased to give to any shoeman interested further information regarding our stock keeping plan if there is any detail which he does not grasp."

## UNIQUE OCTOBER SHOE WINDOW

**T**HIS year Thanksgiving Day will be tinged with a hue of sadness for many homes in Canada.

We can be devoutly thankful for the mercies of Providence in sparing our land itself the devastation and misery that belongs so largely to Europe these awful days of war's dreadful scourge. We have our harvests, our homes secure and most of those we love are with us around the happy fireside.

We should not forget, however, those who have heard the call of country and humanity and have gone to fight the battle of right and freedom across the sea. There will be sad and anxious homes this

Our artist has provided herewith a sketch of a "dugout" in the trenches "somewhere in France" that might be used for an October window of striking originality. The outline of the scheme only is pencilled out and it is left for the intelligent, enterprising window trimmer to work it out in detail which may be varied to suit circumstances.

The sketch could doubtless be worked out by a local painter on a cotton background stretched on a frame and Union Jacks might be used for draping the sides of windows; but any dealer with a little ingenuity can get up a very realistic window from the idea with a few boards, packing cases and the like. As these dug-outs at the front are often made from scraps, the material from packing cases would serve excellently for the framework, doors, etc. Bags filled with sawdust, which is lighter than sand, could be used for the parapets or breastworks and with a sanded floor, a few empty cans, and war relics strewn about, the effect would be startling to say the least.

No doubt a figure could be borrowed for the purpose and dressed in khaki or one could easily be made so as to serve the purpose. The sketch is only an outline which could be improved upon in various ways. Names of recent British victories could be sketched in. It could be made an

excellent recruiting agency.

The whole if well worked out would provide one of the most striking and unique displays that could be imagined and with the words in the foreground, "Absent but not forgotten," the sympathetic touch that would complete its effectiveness might be added. Very few people have any definite idea of life at the front and this would afford them a very good illustration.

Thanksgiving and thoughts will turn to distant France where the trenches hold those who are precious to so many hearts at home.

It is fitting that remembrance should be had of those far away as well as of those who shall never again return. While the interest is centred on the fighting line it might afford the merchant an opportunity for a touching tribute to the absent that would be appreciated by those at home.

# Getting the Vanity Price

Human Nature and Merchandising—Pride Pays for its  
Foibles—Not Quality Alone that Counts—Getting Rich  
on People's Vanity

WHY are some shops able to sell chocolates at a dollar a pound and thrive while others have a hard time getting along turning out very satisfactory goods at fifty cents? There is a store down town that gets from a dollar to a dollar and a half for its confectionery and fifteen cents for ice cream and its counters and parlors are always full, while a block or two up the street you may find an establishment showing lines that make the other prices look like highway robbery. The latter concern does not show a profit at the end of the year anywhere near that of the "exclusive" shop.

There is a flower store on a certain corner that gets three prices for its goods which are delivered of course in dainty boxes in a stylish turnout and the proprietor some Saturdays can hardly supply the demand for his product. Across the way and a little further up the street is a florist who has quite as nice blooms, who cuts his competitor's price in two, but he does only half the business and has to do his own delivering.

There is a shoe store specializing in women's shoes in what might be called the up-town district that gets an average of ten or twelve dollars for a pair of shoes that a woman could go down street and purchase at six or seven dollars, and there are no particular "frills" about the up-town store either. There is a grocery store on a cross thoroughfare, in fact away from the great retail district of the city altogether, that is able to get from twenty-five to fifty per cent. more profit on regular lines and as much as a hundred per cent. more on specialties than its larger and better located neighbors and does a volume of business that represents a handsome annual profit.

There is a ladies' wear establishment, also situated at a considerable distance from the regular retail shopping district, that does a prosperous business in high-class goods the equivalent of which could be had elsewhere for much less money. It is true that most of the lines are exclusive and could not be obtained elsewhere, but those equally as good are sold at some of the departmental establishments at half the price.

Just a few months ago a retail fruit merchant retired with a fortune made from fruit alone which he sold to the four hundred at prices that looked as though he thought the world was an oyster and he the opener.

These instances, which represent facts in one particular city, may be found duplicated in other places to a greater or less variation of circumstance and detail. There are stores everywhere that seem to be able to get the price irrespective even of quality—for in many instances it can be proven beyond

dispute that the goods for which high prices are paid are intrinsically no better than others that may be bought at lower prices.

There is involved here a point that every retail merchant might find it profitable to consider. There is in every community and in every person to a greater or less extent this spirit of pride or vanity which leads even those of good common sense to "pose." Few care to be considered poor, common or mean. There is in all of us a desire to be thought better than we are physically, mentally, financially and morally and we all to some extent are guilty of striving to keep up appearances.

The young man sends his young lady a box of confectionery or a spray of flowers and prefers the "swell" expensive establishment because the young lady will not only consider him wealthier than he really is but because he knows that the offering from the fashionable establishment will appeal to her pride and enable her to boast about her gift.

The same young man goes to a swell King street establishment and pays fifty dollars for a suit of clothes that he could buy on Yonge street for thirty-five, or up-town perhaps for twenty-five, in order that he may show his friends, and particularly his "girl," the tab of the King street tailor who provides the sartorial adornment for the city's upper ten. Of course the same reason leads him to pay ten dollars for patent leathers he could get elsewhere for six.

There is the woman who falls violently in love with a fifty dollar hat she purchases in the "exclusive" store and holds forth on its artistic beauty and clever workmanship to her dubious husband and admiring female friends. Next day she sees her husband's typist with about the same thing that has probably been purchased for ten or fifteen dollars and she wants to throw hers in the scrap pile. The value is in the hat just the same as ever it was, but she has paid thirty-five or fifty dollars for exclusiveness and finds she has not got it.

The same thing applies to footwear and a hundred other lines. People are always on the hunt for things that they think their neighbor can't get or for something that will make them look as good or as big as their more prosperous neighbors.

The moral to the retailer is that there is a possibility of selling more than mere intrinsic value to a customer. The value should be there, but if you let your establishment get a reputation for cheapness you must make up your mind to keep in the cheap class the rest of your life. It may be worth while to sit down and think how much one can make out of this characteristic of human nature, for it is true as the preacher saith, "Vanity of vanity, all is vanity."

# Leather Trade Jottings

Conditions in the Leather Trade—Topics of Interest  
to Leather Producers and Users—Market Still Bullish

**L**EATHER conditions continue strong in all lines in which there is an active demand for regular use or for war contracts. Stocks are all cleaned up and as tanners have been only buying hides as they needed them and have only wet a moderate amount each month, the future does not promise any marked improvement in the supply. Manufacturers are becoming somewhat anxious and are feeling out the market more frequently with small orders, now and then making offers on large lots which do not seem to interest leather men. The export demand continues to become more insistent and if tanners only had the stuff they could get good prices on most lines for shipment across the sea. But business at home has been so good that there is little temptation to encourage orders from a distance.

A SHOE AND LEATHER JOURNAL representative took a walk the other day through a large sole leather storehouse that is usually well filled with stock. Just now it looks like a skating rink.

**Hide Conditions.** In spite of the fact that supplies have been coming in somewhat more freely hide prices continue to expand. It is the season for good hides locally and while tanners are trying to appear nonchalant it is noticed that all that come in seem to find a market. Packer hides are practically up half a cent and the same with country. Heavy native steers have sold at Chicago at 26¾ cents and buff hides at 20½ cents, which evidences a steady advance in values. South American hides have advanced practically three cents during the last month and advices seem to indicate a further rise. Tanners' materials also show the pressure that is being brought to bear upon the situation by war conditions. Leather manufacturers as a consequence of the prevailing difficulty of securing materials and particularly labor are considering further advances in their manufactured product.

**American Conditions.** The leather market is more active and therefore is somewhat stronger. Most of the shoe factories have finished stock taking and are beginning to try out the market. Leather prices are high and a good demand is expected for all classes of leather in the next two or three months. The foreign demand is clearing out any accumulations and although calf is somewhat easier on account of calfskin makers turning out side leathers, there seems to be little hope for a weakening of the market. Prices range from 40c. to 58c. for tans, with usual difference for blacks. Fancy colors range from 50c. to 60c. Side leather seems to be more in demand than any other line and is being gradually worked in to take the place of calf. From orders received by tanners white leather promises to be popular in this line and will be scarce. Quite a little activity exists in patent for foreign shipment but the domestic demand for it is quiet. Glazed kid continues to

dominate the market. With a large foreign demand and the heavy sale at home for fancy lines it is going out of sight. Kid manufacturers are having to curtail their sales and have cut off some of their accounts altogether.

**Production of British Army Boots.** How many army boots have been made in the United Kingdom since the war began? This question, says the Shoe Trades Journal, has lately been raised in certain quarters, and it would be both interesting and instructive to know the exact number, which we trust will be forthcoming from official sources when the war is ended. The number is, of course, added to very considerably every week now, as production has probably reached its maximum for the period of the war. The following figures of military boots produced to date are probably not far off, and, if anything, are an under-estimate:—

British Army and Navy.....	15,000,000 pairs
Russian ankle-boot .....	3,000,000 "
Russian Wellington boot.....	3,000,000 "
French ankle-boot.....	3,000,000 "
Serbian half-Wellington.....	600,000 "
Italian mountain boot (1st order)..	470,000 "
Italian mountain boot (2nd order)..	500,000 "
Total.....	25,570,000 pairs

These figures represent the quantities that have been ordered officially through the Army Clothing Department, but, in addition, big quantities were made for Belgium, France and Russia. Further, there has been an enormous output of officers' boots, which have been supplied to private firms. Airmen's boots, Colonial and native boots, shoes and sandals all swell the list, and, ignoring the vast supplies of ordinary boots taken from stock for military purposes on the outbreak of war, the total quantity produced during the war exceeds thirty million pairs. Two firms—one in Northampton and the other in London—have completed a million pairs each.

**British Boot Famine.** As might have been expected, says the Shoe and Leather Record, some writers in the public press are attempting to raise a scare respecting the probable shortage of boots during the coming winter. It is true that wearers are likely to find their choice of styles greatly restricted, and that boots and shoes will cost more money. But there will be no famine. For it is evident that the considerable stocks held by wholesale factors and retail distributors will suffice for all real needs for several months to come. And these will be supplemented by deliveries from the manufacturing centres, although such deliveries will be much smaller than usual. But there will be boots for everybody who can pay for them.

# SOME THINGS SHOE SALESMAN SHOULD KNOW

He Should Have a General Knowledge of the Normal and Abnormal Foot—How to Correct Pedal Troubles and Afford Relief and Comfort—Clerk Should Try to Make His Customers Feel That He is Worth While as a Shoe Fitter, and a Foot Specialist

By ELMER POYER

EVERY shoe salesman who is worthy of the name is desirous of knowing more about the human foot than the mere knowledge of how to fit a number six boot to a number six foot. If a man comes into the store with a bunion on his foot the salesman should be able to tell that man why he has a bunion and, what is more essential, he should be able to sell that man some corrective appliance which will alleviate the suffering caused by the deformity.

The study of the human foot is a broad subject. It is not to be expected that every shoe salesman has a thorough understanding of every condition of the normal and abnormal foot. That is the duty of the orthopedist or chiropodist. But every shoe salesman should have a general knowledge of the normal and abnormal foot. This is something that can be acquired in a short time.

The first and most essential thing to learn is the names and positions of the twenty-six bones of the foot. Study the diagram on this page, and beginning at the back read forward. The bones are as follows: The os calcis, or heel bone; resting on the top of this is the astragalus, or key bone; directly in front of this is the scaphoid; in front of the scaphoid, on the inner side of the foot, are the three cuneiforms; on the outer side is the cuboid. These seven bones form the tarsus of the foot, comprising the heel and longitudinal arch.

Joined to the three cuneiforms we find the first, second and third metatarsals. The fourth and fifth metatarsals are joined to the cuboid. The five metatarsal bones form the transverse arch of the foot.

The fourteen phalanges form the toes. Each toe, except the great toe, has three phalanges, the proximal, medial and distal. The great toe has only the proximal and distal.

## The Cause of Much Trouble

The astragalus, or key bone, is the source of a large percentage of foot trouble. You will note that its position is such that the weight of the body is thrown upon it with every step. When this bone is forced out of position, the arch of the foot drops and the cuboid is pushed forward. The evidence of this is seen in the shoes of the person whose feet are in this condition. Their ankles turn in and their shoes run over at the outside. Then this person says that the shoes are no good and the man who sold them is a crook or worse, because, "I bought these shoes less than a month ago, and now look at them."

What can a salesman do with a customer who comes in the store with a foot like the one described? A foot that bends inward so much that it has the appearance of a broken ankle? One that is so convexed that the middle of the foot almost makes a hole in the pavement? Shoes are not built for such feet; they are built for normal feet. A shoe "clerk" would sell this customer a pair of shoes. He would never sell the same customer another pair, however. A shoe salesman would correct that ailment and restore the bones to their proper positions by fitting a pair of arch props.

It is in the correction of foot ailments that the shoe salesman is in his element. He sees more feet in a month than the average physician sees in ten years or the average druggist sees in a lifetime. He sees more foot ailments and deformities—observes the wearing of shoes, both proper and improper—watches them as they are being tried out—has the confidence of his customers, who expect that he knows what is best for their case. Should he suggest that which, from a wide experience, he knows positively will benefit his customers' feet, or should he leave suggestion and prescription to a medical practitioner? Here is the answer:—If his experience has taught him anything that will give relief to suffering humanity, it is his duty, and it should be his pleasure, to make use of his knowledge. If he is awake to the best interests of his employer, or his own business, he will try to make his customers feel that he is worth while as a shoe fitter and a foot specialist.

In my article—"The Human Foot, Its Build and Purpose,"—which appeared in the August number of *SHOE AND LEATHER JOURNAL*, I discussed the causes and results of fallen arch and flat foot. The symptoms of flat foot are well known and need no comment here.

Metatarsalgia is the dropping of the transverse arch of the foot. The transverse arch, as stated before, is formed by the metatarsal bones. The arch rests upon the heads of the first and fifth metatarsals, the second, third and fourth metatarsals bridging a marvelously well-protected canal through which the blood vessels and nerves lead to the toes.

If the shoes are too short and too wide the toes are cramped and pushed back. The heads of the metatarsal bones are forced out of their proper positions and must therefore spread out. The arch formed by the second, third and fourth metatarsal bones drops and the heads of these bones rest upon the blood vessels and nerves passing underneath them. The result is cramps and sharp, shooting pains throughout the foot, leading to the ankle and the calf of the leg, and sometimes extending to the hips, back and back of the neck. This is metatarsalgia or splayfoot. The same condition is caused by the wearing of shoes that are too narrow.

Morton's toe is similar to metatarsalgia, differing only in that it occurs at one point only, the head of the fourth metatarsal bone.

## Ailments Caused by Ill-fitting

To relieve the suffering contingent to metatarsalgia or Morton's toe, it is necessary to restore the bones of the transverse arch to their normal positions. This can be done by fitting an anterior-metatarsal arch prop so that the "hump" will come under the bones affected, raising them to their true level. Anterior-metatarsal arch props are made with an adjustable hump, which makes them easier to fit and more comfortable to wear. They are made adjustable by using small leather pads which fit between the front end of the leather and metal. As in the case of flat foot, or dropping of the longitudinal arch, to raise the bones to their proper positions immediately would make the cure less desirable than the ailment itself. The pressure at first must be light and gradu-

ally increased as the wearer becomes accustomed to the supports.

As a relief from the pain of bunions and enlarged great toe joint, a bunion shield gives relief by removing all friction and pressure on the joint. It also prevents the shoe from bulging out and looking unsightly and it is thoroughly hygienic.

The most common of foot troubles is the crooked or overlapping toes. The Toe-Strate restores the toes to their natural position and relieves the pressure on soft corns formed between the toes.

A good heel cushion gives a soft bed to sore heels and relieves the jar when walking. It is an excellent substitute for rubber heels, wears longer and costs less. It has a small tack-like point protruding through the rubber which sinks into the insole, preventing the cushion from moving forward out of position.

For the relief of hard and soft corns, bunions and callosities, a bunion shield should be applied to the calloused part. It excludes the air, retains the moisture of the skin, prevents friction and pressure. Finally in this way the hard and false cuticle is removed, the natural skin only remaining.

### ENTERPRISING SHOEMAN IN NEW HOME

Carson Bradley, who has been in the shoe business in Calgary for the past six years at 1312 9th Avenue east, is removing to a new, commodious store in the extreme centre of the city at 805 1st street west in the Alberta block. Mr. Bradley, who was born in Ottawa, has been twenty-five years in the retail game and possesses initiative and enterprise.

He has always inclined to the higher class trade and believes in appealing or bidding for the business of adults in the footwear line through a good range of children's shoes at maximum prices. He hopes to do even a higher class trade in his new premises. Mr. Bradley is an advocate of live advertising and uses the street cars, the newspapers and monthly calendars, all of which mediums have brought him good results. He gets rid of odds and ends by always keeping a bargain counter in the centre of the store and by holding clearing sales every six months, generally in January and July. Mr. Bradley uses some unique letterheads on which appear the following terse and expressive phrases:—"Style, Comfort and Economy in Women's Footwear," "Children's Shoes Combining Service and Style," and "The Cream of the Market in Men's Reliable Shoes."

He has just concluded conducting a big stock reduction sale preparatory to removing to his new and well fitted up business home at 805 1st street west.

### FOR THE YOUNG MAN STARTING BUSINESS

1. Begin at the bottom. The only way one can learn the ins and outs of any business is by actual contact with conditions of every sort.

2. Choose your calling carefully. Success is not always measured in dollars. You might easily be the acknowledged leader in one business and a failure in another.

3. Go after the highest job in your own business. Every boy ought to make up his mind to be the president of the corporation, or the head of his firm.

4. Remember that few persons fail to get what they really go after.

5. Don't bother about influence. Application and untiring industry will fatten your pay envelope faster than all the "pull" in the world. Men with "pull" who succeed generally use it as a stepping stone to get more work to

do, not less. Concerns worth while favor the man who delivers the goods every time.

6. Never sit back and wait for the help of others. The others are too busy helping themselves to bother about you.

7. Bear in mind that you have got to be better than the other fellow to land the top notch place for yourself. Two men can't hold down the same job. Every boy, once he gets his start, has an equal chance with the others, and getting the chance to start right is the hardest part of the task.

8. Punctuality is only a platitude. To succeed, you've got to beat punctuality to a standstill. Nobody ever got "in wrong" with his employers by working overtime either at the beginning or the end of the day. Clock watchers own no automobiles. The man who listens for the whistle at the factory will never hear it on his own steam yacht.

9. Keep ahead of the game. Always be ready to fill the position next higher up. The successful soldier is always ready for his promotion in rank. YOU be the same.

10. Beware of being side-tracked. Petty spite, jealousy and personal antagonism may rile you almost to the breaking point, but don't be diverted. It will only distract your attention to no good end and may beat you to the ultimate goal.

11. Go long on self-confidence. Never be afraid of tackling anything, even if you fail you learn a lot. No surgeon can operate successfully upon a live man before he has made his mistakes upon a dead one. Bitter experience means better experience.—The Shoe Retailer.

### SHOEMAN RETURNS FROM THE FRONT

Lieutenant Ray L. Brewer of the "Fighting" 26th Battalion, is back from the front, and will take charge of the York county platoon of Lieut.-Col. Guthrie's Kilty Battalion, with headquarters in Fredericton, N.B. Lieut. Brewer left St. John as Lance-Corporal with the 26th Battalion, and as a result of bravery in the battlefields of France soon added two more stripes, and was appointed company sergeant. About three months ago he sustained a flesh wound in the thigh, and was sent to a hospital in England. After he had recovered sufficiently to travel he was recalled home and given a commission with the 236th "Kilty" Battalion. Lieut. Brewer was formerly employed with R. B. Van Dine, boot and shoe merchant in Fredericton, N.B., and about two years and a half ago was given a position with Waterbury & Rising, wholesale and retail shoe merchants in St. John, N.B.

### PRESIDENT CHEVRIER VISITS OTTAWA

The executive officers of the Ottawa branch of the Retail Merchants' Association of Canada, having learned that the president of the Dominion Board of the Association, Mr. Horace Chevrier, a prominent retail merchant of Winnipeg, Manitoba, was visiting the newly established head office at Ottawa, on his way to attend a meeting of the executive officers in Montreal, tendered Mr. Chevrier, the president, and the secretary, Mr. E. M. Trowern, a reception and supper at the Chateau Laurier, with the view of expressing their appreciation of the work that is being done by the Association, as well as to give them a hearty welcome to the Capital.

Their appreciation was further expressed by inviting the president and the secretary to address an open meeting of the retail merchants of the city of Ottawa in the Russell House on Monday evening, September 18th. The meeting was presided over by Henry Watters, president of the Ottawa branch, and it was largely attended by some of the most prominent retail merchants of the city.

have one fault and that is an attempt is made to say too much in the limited space. This is no doubt responsible for the faulty typography to some extent, although the printer has hardly done justice in any case to the matter the advertiser has given him. This space is the one most largely

used by shoe men—three columns fifty lines each—and can be made very effective by constant change and the use of showy bright matter. With ordinary column cuts two at least could be used and by shortening the description the matter could be driven home.

## LARGE SPACE VALUES IN SMALL SPACE COPY

How to Get the Most Out of a Limited Advertising Appropriation—  
Methods of Making Small Space Tell in Newspaper Advertising

**T**HERE are some merchants who do not advertise at all because they cannot do it as largely as others. They have tried using small space, it may be, and have felt they were throwing their money away as far as results were concerned.

In discussing this subject in a recent issue of *Printers' Ink*, Henry A. Beers, an advertising expert, has something to say that ought to interest the small advertiser. After showing that some of the small ads used by national advertisers are bringing results fully as satisfactory as those of their more ambitious competitors, he goes on to outline a plan of campaign for the small advertiser as follows:—

### Play Up the Biggest Point

"The first duty of the small ad, in competition with its big brother, is that it shall be seen. Most essential, then, is it that the small ad shall represent, in addition to a maximum of visibility, the highest degree of repression.

"Limit the text and strive for big effects,' is the rule of a certain successful copy-chief for injecting an eye magnet into his client's small space. 'The small ad has got to get noticed—not to tell as much as you can crowd into it. Limit the points to be made to the fewest possible, and play up the biggest point for all the space will stand.'

"Nor is it a foregone conclusion that the small ad is to be outshone by larger luminaries, if the advertiser will observe but a few of the most simple rules of display. A certain copy writer once laid down a golden rule for effecting display which tells a volume on this all-important question in a few words.

### Keep Off the Square

"Always remember,' he warned, that magazines and newspapers are made up in vertical and horizontal lines, and that any departure, however slight, from this rule achieves display. Put this fact somewhere in the back of your head and let it stick there—'keep off the square.'

"That puts it about as concisely as you could hope to find it anywhere. Whether the variation from the square take the form of angles, bias lines, curved or circular effects, or combinations of these, as this man said, it immediately effects a departure from flat uniformity that creates a display.

"Again, an observance of the most primary rules of tonal contrasts can make the smallest ad on the page stand out 'like a million dollars.' A white circle or triangle in a dark square offers potentialities for full-page attention; or a division of the space according to the five to seven parts rule with one or other of the sections shaded, and the white space arranged with type to balance the darker ground."

To apply this advice to the shoe business, for instance, the first essential would seem to be cuts. Now some dealers appear to think any old shoe cut will do. A few years ago all shoes were about alike to the average reader but now there is such discrimination amongst men as well as women that the effect of an ad may often be spoiled by a poor illustration. If you haven't a good shoe cut or in fact a number of shoe

cuts to represent your lines set about getting them. Write your manufacturers, they will be glad to help you out. Other illustrations will do in a pinch and by writing the *SHOE AND LEATHER JOURNAL* or any engraving house you can pick up special illustrations for various purposes, seasons, etc. But new shoes are the great attraction.

Next to the goods comes the price. Money talks and it pays to have leaders that you can advertise in bold figures. Too many prices bewilder. None at all disgust. We have before us a hundred line shoe ad with a nice artistic cut of a man's shoe within a circle that evidences a good start but a bad finish. There are just a few commonplace words about shoes generally and not a single price specified.

Spend "midnight oil" getting your ads to stand out.

### ENTERS UPON NEW POSITION

Alfred Winn, of Toronto, who has had many years' experience in the shoe business in all its branches, has been appointed representative of E. T. Wright & Co., St. Thomas, Ont., to travel through Eastern Ontario, Quebec and the Maritime Provinces. He will look after the ground formerly covered by W. W. Lindsley, who is now selling the "Just Wright" shoe in the Western Provinces. Mr. Winn has entered upon his new duties and has a fine line of spring samples. E. T. Wright & Co. have added two new lasts of

ALF. WINN, TORONTO

the recede toe variety. The company are also showing several lines of fibre soles and some high-grade sport shoes in two-tone effects. From present indications the firm feel that a dark brown calf will be quite popular, a number of hurry calls having been received for it since it has been shown. The range of E. T. Wright & Co. for spring is very complete and artistic and by far the most representative they have ever turned out.

## “AIM IS TOO SELFISH—OUTLOOK TOO JEALOUS”

Why Members of Shoe Retailers Associations do not Get More Good of Them—  
The Difficulty of Getting Men in the Same Line of Business to Co-operate, and How  
an Organization can be Made Helpful and Useful—The Cumulative Force Grows

**T**HE opening meeting of the Toronto Shoe Retailers' Association for the coming fall and winter, which was held on September 28th, brought together a representative attendance. The gathering was marked by enthusiasm, and a sincere desire to increase the usefulness and influence of the organization.

An excellent address was delivered by Mr. Walter Carr, editor of "Footwear in Canada," who spoke on the worth and work of such bodies, and pointed out the many benefits and advantages to be secured from coming together for the exchange of ideas and the elevation and uplift of the trade. He dwelt upon the need of co-operation and individual interest and gave a number of practical hints on carrying on the work. The history of all organizations, he said, was the same. There was the initial enthusiasm that any new project engendered and after that came the labor of keeping the thing going. Enthusiasm was apt to die down and personal animosities make their appearance.

"We find," he continued, "that members are not what we thought them. We find that the work is harder and the results slower in coming than we expected. In nine out of ten cases, probably, the organization dies an early painless death. Now I have no reason to believe that your organization is finding less of difficulty in overcoming these natural tendencies than other organizations, and without having intimate knowledge, I venture the suggestion that your membership has shown a tendency to diminish and the enthusiasm of your members is less spontaneous than it was in the early months following the formation of your society. On this supposition I am going to make a brief suggestion, or two, first, as to the cause of this condition, and second, as to a possible remedy.

### Do Not Look for too Much

"The average man goes into an organization expecting too much of his fellow members. I say this advisedly. Most of us go into these organizations expecting to find other men agreeable, co-operative, honest and open-minded. But why not look the thing square in the face? We have known John Smith for many years and know that his standards of doing business perhaps do not measure up to our own. Yet we expect to meet a transformed John Smith in our societies and grow disgruntled when we find him still the same mean or independable fellow. We forget all too soon that it was such fellows as John Smith that made our organization advisable, and that the real success of our organization will be judged by whether we can turn John Smith into a decent business man, and we perhaps say, 'what's the use,' etc.

"The aim of the average business man in an organization such as yours is too selfish and his outlook too jealous, I don't know how you feel about it but when I have spoken to men about attending one or other trade organizations to which I belong, they have said, 'Oh, I don't get anything out of going there.' They likely enough add that so and so are using the club or organization to further their own ends. How rarely do we hear a man say, 'I am going to attend this meeting to see if I can help it along some.' What he really says is 'There's John Smith poking his nose in—trying to find out something about my business—trying to get some of my customers—mean fellow—I won't come here again.'"

"We fail to realize how difficult it is for men in the same

line of business to co-operate. Now I am more or less interested in an organization of men who do not come into competition with one another—they are what we call central station men. There is only one central station organization in each town, and so it is easily possible for them to meet together and discuss common problems. But I realize that with men in your position, competing daily as you are, an organization where you discuss your problems openly is a most difficult matter. In the very nature of things it is easily possible that any information given to-day to your fellow retailer should be used tomorrow to corral some of your customers. It follows without doubt that those among you whose methods are the most successful and up to date may well hesitate to speak freely in your meeting.

### Good of the Trade as a Whole

"I am merely surmising when I suggest that the reason some of your members have been irregular attendants at your meetings is because they find other members from whom they hoped to learn much, are unduly reticent and guarded in their utterances. Much as I sympathize with this reticence I would urge, nevertheless, that you keep more prominently in mind the good of the trade as a whole. If your competitor is of that poor type that he can't give you some ideas in return for your own, you may rest assured that he will never be able to use your own methods to your disadvantage.

"We forget that other men likely enough have the same feelings about us that we have about them. If they appear indifferent to us so perhaps do we to them. If they seem to have a low standard of business morals so probably do they think of us. Suspicion is a mighty poor thing to bind men together. Let us throw it off and think better of our neighbor than seems justified by reason, and in so doing we will often find him many times better than we suspected. In general then such organizations as yours go dead the second year—that is my experience—and I offer these observations to encourage you. The causes are largely that we are all human,—all more selfish, more suspicious and more indifferent than we ought to be.

"To whom does an organization like this belong? To the Secretary? To the President? To the Executive? I do not think so. My idea is that it belongs to the members themselves. Then is it not the right of the members to support their own society, to watch its course and to work for its existence. Have the secretary or the president or the members of the executive more at stake than the rest of the members? Surely not. Why then should they be expected to do all the work. I believe the failure of the vast majority of organizations such as yours is traceable to the idea that the secretary has nothing else to do but attend to your business and mine to the neglect of his own. Let us put our own shoulders—every mother's son of us—to the wheels of our organization and push. It is the Private Individual's society as much as the President's.

### Members Must Be Interested

"It is human nature,—and whether it is right or wrong, we must abide by it—that you cannot move a man unless you give him a motive, unless you interest him. Did you ever write asking a man for information and urge him at the end of the letter to reply by return. Do you know what he always says, either consciously or unconsciously—why

should I? Unless your letter is so written that it supplies the answer to that question he will not answer it, and unless your society supplies the answer to the question 'why should I attend?' the individual member will not attend. The success of your organization resolves itself primarily into making it worth while for your members to attend. You cannot as I see it make much headway without a good attendance because so much of your work is educative. When you have succeeded in getting your members interested keep them going by making it worth their while to come regularly. If you give your members good reason to believe that they will miss something worth having if they stay away you can depend on their attendance.

"In the United States practically every city and state of the Union has a shoe retailers organization, to say nothing of the National Shoe Retailers' Association, at the head of

them all. Largely through the combined efforts of these organizations is coming the reclamation of a bigger and better distribution of footwear, with commensurate returns on investment. Mark-up is rapidly taking the place of mark-down and bargain and early-season sales are becoming more of a dead issue each year.

"Standing as your organization does for the social and commercial betterment of the business of retailing, these splendid organizations have, in almost every instance, the unanimous and unqualified support of every shoe merchant worthy of the name. Those who are broad-minded enough to profit by organized effort, are bigger and better shoemen, their businesses have increased and profits grown.

Mr. Carr touched upon a number of other advantages on effective organization and at the close was tendered a hearty vote of thanks for his timely and instructive address.

## HOW TO FIGURE SELLING PRICES OF SHOES

Shoes are made to retail at the following popular prices	Good merchants aim to clear, after expenses including salary for themselves, 10% on sales	Careful research finds it costs shoe merchants, including salary for proprietor, 25% of sales as expenses	After deducting expenses and 10% profit that the merchant wants, we have left the most we should pay for shoes
\$7.50	70c	\$1.75	\$4.55
6.50	65c	1.63	4.22
6.00	60c	1.50	3.90
5.50	55c	1.38	3.57
5.00	50c	1.25	3.25
4.50	45c	1.13	2.92
4.00	40c	1.00	2.60
3.50	35c	.88	2.27
3.00	30c	.75	1.95
2.50	25c	.63	1.62
2.00	20c	.50	1.30
1.75	18c	.44	1.13
1.50	15c	.38	.97
1.25	13c	.31	.81
1.00	10c	.25	.65
.75	8c	.19	.48
.50	5c	.14	.32

This chart is presented to the shoe men, for it may cause each one of you to look your business squarely in the face. Putting thousands of dollars in shoe stocks is one thing. Putting personal time and services into the shoe store is another thing. We ought to draw a salary from our business each week. The other expenses are bound to be paid. By this item we mean insurance, rent, light, heat, advertising, clerk hire, taxes, 10% annual depreciation on fixtures, bad accounts, depreciation on stock, interest on money invested in your store, etc.

Freight and express can properly be figured as expense or cost of merchandise. After you take your business under consideration, if this chart does not fit your business, make one on the same plan that will; then take out your shoe invoices and see if your mark up will produce the desired result.—By S. E. Murray, Clinton, Ill.

The figuring of profits continues to be a big problem with retail merchants. One of the questions that frequently puzzles merchants is how to proportion percentage of profit on selling price to percentage on cost. A Winnipeg reader writes us as follows:

"When I want to make, say 20 per cent. profit on the selling price of goods, what percentage do I add to the cost price, and how do you find it?"

We will take 20 per cent on selling price and follow the method of reasoning by which it is reduced to percentage on cost. You want to make 20 per cent. on selling price or 20 cents on \$1.

Cost of article, must therefore, be 80c.

Therefore, figuring on cost:

On 80c you make 20 cents.

$$100 \times 20$$

On \$1.00 you make \_\_\_\_\_ = 25c.

$$80$$

This equals 25 per cent. Therefore 20 per cent on selling price equals 25 per cent on cost. If an article cost \$2.00 and you want to make 20 per cent on the selling price (which you always figure expenses on) you must add 25 per cent to the cost price, which is 50 cents. Therefore the article sells at \$2.50.

A much simpler method of securing the percentage to be added to the cost price is to use the following formula. Let "X" represent the percentage of profit it is desired to make on the selling price. Then:

$$\frac{x}{100 - x} = \text{percentage to be added to the cost price.}$$

Working it out in actual figures, if a dealer wishes

to make 20 per cent on selling price he adds \_\_\_\_\_

$$100 - 20$$

20  
or \_\_\_\_\_ of 100, equalling 25 per cent to the cost price.

80  
Suppose a dealer buys goods at \$2. His cost of doing business is 17 per cent and he wants to make 5 per cent net profit, or a total of 22 per cent on

selling price. He must add \_\_\_\_\_ or \_\_\_\_\_ of 1.00,

$$100 - 22 \quad 78$$

equalling 28.2 per cent to cost.

28.2 per cent on \$2 equals 56 cents, so that the article will have to sell at \$2.56.

This formula will greatly facilitate the figuring of the selling price of shoes for the merchant and he would do well to memorize it or paste it up in a conspicuous place in his office.

# The Shoe Repair Man

THE shoe repairers of Lindsay, Ont., owing to the big advance in the price of leather and other supplies, recently increased their prices. The following have adopted the new schedule:—Frank Forbert, Chas. Hughes, M. Grozelle, J. Cavill and George Chamberlin. The present prices list is as follows:—

Men's	
Full soles, sewn, and leather heels.....	\$2.25
Full soles, sewn, and rubber heels.....	2.50
Full soles, sewn, only.....	2.00
Half soles, sewn, and leather heels.....	1.45
Half soles, sewn, and rubber heels.....	1.60
Half soles, sewn only.....	1.10
Half soles, nailed.....	.90
Half soles, nailed, and leather heels.....	1.25
Half soles, nailed, and rubber heels.....	1.40

## WHICH SYSTEM DO YOU USE ?

Whether the system of giving stubs or counterfoils to customers by repairers is the best system is open to much debate. The stub or ticket serves as a receipt to the customer and in case the repairer mixes up the shoes or injures them the customer can demand remuneration. On the other hand, if he loses the stub, as is very frequently done, he has to do considerable talking in order to get his shoes, perhaps.

One repairer who does a big business uses tags which have the numbered stubs, spaces for name and address of each customer, as well as the nature of the repairs, time, price, workman, etc. These are always filled in, the full tag attached to the shoes and the stub detached and placed in a

compartment drawer under the proper initial. Some time is taken up with writing, but there are no tickets lost. What is your opinion of the two systems?

## GOVERN PRICES ACCORDING TO COST

"C. E. B.," writing on a system of figuring prices, to the "Shoe Repairer and Dealer," says:—

"I have been for more than a year intending to write to you, but as our hours of labor have been on an average about fifteen hours per day, I have been unable to do so. I am taking a vacation—the second one in ten years.

"You will find here a few words relating to a method of figuring cost so as to allow repairers to get a respectable living for their labors.

"Will you please tell me what you think of a flat price for soling and heeling shoes? The shoe repairer can buy men's R. & L. soles from 30 to 60 cents per pair; whole heels from 8 to 15 cents per pair; men's top lifts, 65 cents to \$1.30 per dozen, and an association making one price and each member furnishing his grade of material, does not give justice to the repairer or the public.

"My idea is that there is only one business way to give

# Rubber Footwear Notes

Getting Ready to Fill Orders—The Labor Question a Serious One—Tennis and Sporting Season Opens Well—Little Change in Prices—Raw Rubber Normal—Other Materials High

**R**UBBER shoe manufacturers all agree that orders for the coming season are better than they have ever been and most of the goods ordered under way. "We could double our capacity if we could get the help" said one manufacturer in speaking of the labor situation. "It is impossible to get either men or girls sufficient to keep up the output." This is the most serious problem that the rubber shoe trade has to meet today. In some lines of materials it is difficult to get just what is wanted, but as a rule these could be had if only the workers could be procured to put them together. "A good many dealers who failed to fully anticipate their rubber shoe wants early in the season are going to find it difficult to get supplies this winter" said another manufacturer. There will not be the usual stocks to draw from.

**Raw Rubber Conditions.** In spite of the war and the increased use of rubber for various purposes the raw market has continued easy, although in the past month there has been a slight quickening. The strange thing has occurred that "wild" rubber is back at its old place at the head of the price list, up-river Para being quoted 73 cents, while latex pale crepe, that a year ago headed the procession in the dollar region, is now quoted at 59 cents. This is undoubtedly due to the large increase in the production of plantation rubber to some extent but also to the fact that the Brazilian rubber has proven its superiority in many ways for manufacturing purposes, notwithstanding the crude methods that still obtain in gathering it. Whether it be that the climate is more propitious or the conditions under which the sap is gathered makes for better quality, rubber producers are hardly yet prepared to say. At any rate the raw product generally speaking is on a much less spectacular basis than twelve months ago.

**The Tennis Season.** Notwithstanding the fact that the past season was a most phenomenal one for tennis and sporting goods and that trade went up by leaps and bounds; manufacturers report that so far there has not been manifested any great disposition to profit from the experience through which retailers have recently passed in getting goods of this class. Of course, the summer season is just over and the dealer has his mind on fall and winter business and while he buys leather goods because he is afraid that prices will go up, he does not seem to feel that there is the same necessity for protecting himself in rubber lines. Manufacturers themselves are somewhat to blame for not seeking to thoroughly inform the trade of the desirability of anticipating their wants in this line. The early orders mean a good deal to the dealer as well as to the manufacturer, who, unless he knows where he is by the beginning of the year when the production of ordinary rubber footwear has terminated, will not be able to do

justice to this growing department of his trade. Labor is hard to get and hard to keep these days and it means much to a manufacturer to have a good run ahead of his mill. A moment's thought on the part of the dealer will bring back to him the disappointments and loss of sales that occurred last season through not being able to get the goods in time. This class of stuff is so uncertain and precarious that manufacturers cannot be blamed for not taking chances in making up ad libitum. Besides, manufacturers point out that prices this winter in materials such as duck linings and other supplies are bound to advance and they cannot protect the dealer who does not protect himself.

**Substitutes for Leather.** There is no doubt that the composition sole is here for good irrespective of the price of sole leather. Shoe manufacturers who have come to scoff have remained to praise. One shoe manufacturer who came into the SHOE AND LEATHER JOURNAL office wearing a pair of compo soles said he had had them on his feet for three months and they had shown little effect of wear besides being much more comfortable than the leather sole. He had not yet commenced using the product on his shoes, which were high grade, but proposed putting in a few lines for spring to try them out. He said that all the objections to the pure rubber sole, both as to manufacture and wear, had been eliminated in the newer products put up by the rubber factories and he predicted a wide use of them for all classes of shoes. When once people get used to the increased resiliency they will hardly go back to ordinary leather, especially if the wear is assured.

**Rubber Scrap.** According to the annual report for 1915 by the American Consul at Quebec, \$122,356 of rubber scrap was exported to the United States, as against \$117,017 in 1914; showing an increase of \$5,339. During 1915 the Province of Quebec imported \$27,623 of manufactures of rubber and gutta percha, of which \$17,667 was from the United States. The previous year these imports amounted to \$32,348, of which \$11,448 was from the United States; showing that, while the total imports of rubber and gutta percha goods decreased by \$4,725, the imports of the same merchandise from the United States increased to the extent of \$6,219.

**Rubber Sausage.** Word comes from Berlin to the effect that a certain Hamburg merchant has been fined 2,000 marks for a unique violation of the pure food laws. The offence committed by this enterprising purveyor of delicatessen consisted in the selling of a commodity purporting to be liver sausage for 2 marks and 20 pfennigs a pound, which proved on analysis to contain macerated rubber, finely ground hair and gelatine. It was absolutely guiltless of liver, other flesh or fats.

## Pithy Note and Comment on Shoe Matters—What the Makers of Shoes are Saying and Doing—Shoe Facts and Fancies

THE annual meeting of The National Association of Tanners will be held in November instead of October in view of an amendment of the Constitution and By-laws adopted during the year. The meeting will be held at the Hotel La Salle, Chicago, on November 16th.

One of the topics on which the meeting will concentrate will be trade acceptances. Directors J. F. Taylor, of Louisville; H. N. Hill, of Cleveland, and President H. F. Lesh, have taken a decided interest in this proposition and are preparing some important records for the meeting.

### CALF SHOES FOR 70c. TWENTY YEARS AGO

A party very familiar with the shoe business recalls by the way of reminiscence the shoe market of 1896, when distributors of boots and shoes were buying from Welch & Landregan, of Lynn, Mass., a high-cut child's shoe,

Sizes 6 to 8.....	\$0.70
Sizes 8½ to 11.....	.80
Sizes 11½ to 2.....	1.00

The uppers were from White Bros. (now America Hide & Leather Co.), genuine box calf; the bottoms of these shoes were all solid sole leather, no substitutes whatever were used.

The wholesale trade paid for the same shoe 65c., 72½c., 92½c., 7 per cent. off, the same range of sizes as quoted above.

In 1896 also a woman's genuine box calf welt, solid sole leather bottom, sold to the retail trade for \$1.50 per pair, less 5 per cent. In the same year J. B. Reynolds, shoe manufacturer, Orange, Mass., was putting out a man's all solid satin McKay at \$1 net to the retail trade and a genuine calf shoe, McKay sewed, for \$1.50.

### ACTON LIKELY TO GET SHOE FACTORY

A by-law will be voted on by the ratepayers of Acton, Ont., on October 16th, to provide the Reliance Shoe Co., Limited, Toronto, with a free site and a loan of twenty-five thousand dollars repayable in twenty annual instalments with interest at six per cent. In return the company agree to erect a factory building costing not less than ten thousand dollars and to install in it machinery and plant to the value of ten thousand dollars. The company further agree to have the new factory in operation by May next and to employ for the next twenty years not less than sixty hands on the average. The loan is to be secured by mortgage on the plant and buildings, being repayable in twenty annual instalments of \$2,176.61. The Reliance Shoe Co., Limited, of which P. E. Rivett is managing director, have been manufacturing shoes in Toronto for the past five years, starting on Adelaide street west and removing later to larger quarters at 350 Sorauen avenue. The company make boys' and youths' McKays and nailed, their trade mark being the "Canadian Boy."

### TRADE OPPORTUNITIES IN GREAT BRITAIN

In the World Bulletin issued by the Department of Trade and Commerce, Ottawa, dated Sept. 25th, is found the following:

There is a shortage in the United Kingdom of boys' and girls' boots and shoes. Manufacturers in Canada who are able to produce children's boots and shoes of a uniform

quality in bulk would do well to see trade inquiry No. 1124, as large quantities are required, and this would appear to be an opportunity for Canadian producers to supply the demand.

Some time ago the Government took control of all the sole leather in the country suitable for army boots. All stocks of lighter weights (6-pound to 8-pound bends and butts) have now been requisitioned, "to be acquired, if found suitable, for Government purposes." The order includes British, Australian, New Zealand and Canadian leathers, and it is feared that if the Government actually takes possession of these lighter weights there will be very little material available for the soles of the better-class civilian boots. The trade state that there is a type of sole leather known as "hemlock tanned," good wearing material, but lacking flexibility and not used in first-class boots. This leather is not affected by the requisition, and in so far as it can be procured from overseas the dearth for general purposes may be to some extent made up. The situation appears to offer an opportunity for Canadian boot manufacturers to find a good market for any exportable surplus they may have of the best quality boots.

### GOOD FEATURES OF UNLINED SHOES

It is said that an unlined shoe, in kid or other such stock, has the advantage of stretching so that it conforms to the foot, but there is another advantage to this shoe too, and that is the extreme coolness of such an upper.

Take a light leather upper and if the shoe is not lined the air can circulate through the stock to quite an extent. The air can get to the foot better at any rate and the proof of this may be demonstrated any time. No better way to prove this was ever tried than that seen recently when a colored finished skin was placed in such a way that it interfered with the free egress of gas from a regular gas pipe. Still the gas was burning just the same but all of that gas that was burned had to force its way through the leather. The arrangement was planned especially to show how porous the finished leather was.

It is a good thing to have an upper that will conform to the foot, and, in summer especially, it is a good thing to have an upper that lets the air through and in an unlined shoe both features can be combined as well as not.

### NEW MANAGEMENT HAS WROUGHT WONDERS

A sketch of the Parker Shoe Co., Limited, is an account of one of Preston's most thriving industries, says the Preston, Ont., "Progress." The company has just completed a handsome new three storey addition which is now fully equipped with machinery and busy turning out women's McKay shoes. Just here it is appropriate to say that the Parker Shoe Co. is to-day the largest manufacturer in Canada of women's McKay shoes that sells only to the jobbers. This class of shoes is their specialty and the factory makes nothing else.

The original building was erected in 1910 by the Solid Leather Shoe Co. It was of red brick two storeys high and 40x100 feet. The new wing is three storeys high and 60x35 feet. Practically every machine and hanger in the place has been rearranged to get economical production. As they now stand the raw material passes in at one end and gradu-

**McARTHUR, IRWIN, LIMITED**

ESTABLISHED 1842.

MONTREAL.

ally travels through the various processes until the finished shoe comes out. As now laid out the lower floor of the old part is devoted to office, sole leather and treeing; the second floor to making. The lowest floor of the new part is used for storage, the second floor as a cutting room, and the top as a fitting room. The factory is ideal for light and ventilation, being lighted from all sides. The present season will see last season's doubled in output. New machines are constantly being added. The product is popular and though the leather market is so uncertain that the usual contracts cannot be made, the firm has no difficulty in keeping sales booked six months ahead.

The present general manager and secretary-treasurer is Mr. S. H. Parker, formerly sales manager and style man with the W. A. Marsh Co. of Quebec City, one of the oldest and largest shoe manufacturers in the Dominion. When Mr. Parker took hold of the old Solid Leather Co. in 1913, they were employing about 25 hands. Today there are 100 on the pay roll. Mr. Parker's first lieutenant is Mr. Harry Steele, also formerly with the Marsh Co. Mr. Steele is factory manager and has revolutionized the internal economy of the place. The new management has wrought wonders and has made the factory one of which Preston has every reason to feel proud.

#### FINAL DECISION HANDED DOWN

The United States Circuit Court of Appeals of the Northern District of Illinois has just handed down its final decision in favor of the Independent Button Fastener Machine Company, of Boston, Mass., in its litigation suit brought by the Elliott Machine Company, of Grand Rapids, Michigan. This suit was brought against one of the users of "Isbam" machines in 1913, and the Independent Button Fastener Machine Co. at that time filed a petition to inter-

vene and to be made a party and defend which the Court granted. It was first tried in January, 1915, before the United States District Court, Northern District of Illinois, Eastern Division, and on May 31st, 1915, a decision was rendered in favor of the Independent Button Fastener Machine Co., from which decision the Elliott Machine Co. appealed. The final decision as rendered by the United States Circuit Court of Appeals affirmed the decision of the lower Court that the "Isbam" Button Machine manufactured by the Independent Button Fastener Machine Co. is no infringement.

#### DOES NOT LIKE EXCLUSIVE AGENCIES

*Editor, SHOE AND LEATHER JOURNAL:—*

I would like to see an interesting question discussed in your Journal, and that is the exclusive agency for shoes. I have been reading that Henry Ford has cut out all exclusive agencies, so far as his automobiles are concerned, and I think it would be a good idea if the exclusive agency was eliminated in the shoe game. Why should I be compelled to buy a certain trade-mark shoe from Bill Jones, when I would perhaps rather buy from Tom Green, down the street? I may not care for Bill Jones and his business methods, but I have to go there for that particular shoe and patronize him. Sooner than do that I go without the shoe I desire and the manufacturer suffers. Frequently a retailer will corner a dozen or so exclusive agencies, not because he wants to sell all these brands of shoes, but to stop some other dealer getting them. Once more the manufacturer suffers, because the monopolistic retailer keeps only a few of each line. The exclusive agent often makes no special effort to push certain shoes, because he knows that if the people want a certain make, they must come to him. If the exclusive agency were done away with and each

dealer had to bid for patronage against other local footwear merchants, the one offering the best service and telling the public about it through the columns of the local newspaper, would secure the largest share of the trade. I would like to hear from others on this matter.

Sincerely yours,  
Observer.

### THE EMBARGO PLACED BY RUSSIA

More and more serious seems the situation to tanners regarding the embargo established by the Russian government prohibiting the exportation of hides and skins and leather for three years. In previous years tanners have imported great quantities of calfskins, horsehides, etc. However, the embargo situation is subjected to sudden changes, and the tanners are hopeful for a quick shift.

Many leather buyers have insisted that calfskins especially were in large supply, and that ultimately the accumulations would find their way to the United States. On the other hand, some authorities with first hand information have insisted all along that raw material for making leather is not in excessive supply in Russia.

Although many have been of the opinion that there were any quantities of hides there, there are from 20,000,000 to 25,000,000 soldiers engaged in warfare in the different departments of the Russian military system. These men must have footwear, first and foremost before any one else, and a large proportion of the men are better shod than ever before in their lives. They are consuming all kinds of leather, and goatskins, calfskins and sheepskins are now being used for lining coats for the winter campaign.

### REGAL SHOE ENLARGING FACTORY

Owing to rapidly increasing business and to add largely to the output of the firm, another storey will be added to the plant of the Regal Shoe Co. on Atlantic avenue, Toronto. An extension will also be built to the north of the factory. The contracts have been awarded and work will start at once. It is expected the additions will be completed before the end of the year.

### IS DEMAND FOR CUSHION SOLE DECLINING ?

A few years ago many factories were making cushion-soled shoes, and especially in men's lines. To-day, however, there are fewer of these shoes being made and it appears that some of the shops have given them up altogether, says "Shoe Topics".

There are several different ways of putting the cushion in the shoe or of making a cushion sole and it is likely that one way is just as good as another. Some of the cushions were made of sheepskin or other soft leather cut to fit inside the insole, put in a pocket and then the whole sewn right in with the welt. This was one way to make the cushion sole, but the cushion shoe made that way is not in great demand to-day as at least two factories making it have discontinued its production.

When a new shoe is first put on the foot, it is a very hard shoe because it is new, but if the shoe has a cushion sole it will feel much more comfortable when first put on and because of this the wonder is that more cushion soles are not made and sold. Many people who have tried these shoes declared that they were the easiest shoe ever put on and that they were very comfortable from the first.

A cushion can be put in any kind of shoe, no matter what the style may be and it ought to help a tender foot every time. If one has a callous on the bottom of his foot he might get a certain amount of comfort by wearing a cushion shoe and if he has a bunion on his foot he ought to get the same kind of comfort by wearing a shoe made over the so-called bunion last. In either case, the surface will

give more or less when pressure comes against it, and that is the main thing to make an easy shoe on the foot. The insole must provide a place for the callous, while the upper must stretch enough so that it will provide a place for the bunion.

All these cushion-soled shoes retail at a higher price than the common grade, and they should retail for more because of the extra work in providing the cushion and putting it in. They are shoes designed primarily for people who have sore feet and who never were fortunate enough to have shoes to fit them properly. They wear ill-fitting shoes until their feet get sore, and then they have to get a pair of cushion-soled shoes, which will feel all right the very first time the shoes are put on.

When a cushion is put in it should be put in so that it will stay right there, and it may be of felt or sheepskin or of both, but it should be of good quality and well made. It may be in a pocket or placed in the shoe without a pocket, but it would be much better to have it sewed right in with the welt so that it will stay where it belongs and remain a cushion as long as the shoe is in wear.

### NEW SHOE COMPANY GETS CHARTER

The A. L. Johnson Shoe Co., Limited, with a capital stock of \$200,000 and headquarters in Montreal, has been granted a federal charter to manufacture, purchase, sell and job in shoes, both leather and rubber. The head of the new com-

A. L. JOHNSON, MONTREAL

pany, who will conduct a wholesale footwear business in Montreal, is A. L. Johnson, former general sales manager of Ames-Holden-McCready, Limited, Montreal, and for many years manager of the Winnipeg branch of that company

### INTRODUCING CHAMOIN TO THE TRADE

The United Shoe Machinery Co. of Canada have been appointed selling agents for the Dominion for Chamoin, which is a new substitute for sole leather, and to lesser extent for upper stock. This article has somewhat of the properties of buckskin but it is firmer and works up the same as sole stock. It can be used for soles on all grades of shoes, but its price makes it more practical for medium and higher grades of footwear. It is claimed that it will outwear sole leather and that it can be finished perfectly, and that the edges can be trimmed and the channeling done as neatly as with sole leather. To replace upper stock, it is used instead of elk, and to a certain extent in place of storm-calf.

N. Tetrault, of the Tetrault Shoe Manufacturing Co., Montreal, has returned from New York.

J. E. Dupre, proprietor Montreal Box Toe and Heel Co., has been in Boston on business.

S. Purvis, who is in charge of the wholesale department of the Hudson's Bay Co., Winnipeg, was in Toronto last week calling upon the trade.

The Tetrault Shoe Manufacturing Co., of Montreal, who are the largest exclusive makers of men's welts in Canada, subscribed the sum of \$25,000 to the recent Canadian War Loan.

Owing to the continual advance in the price of dry hides, another advance has gone into effect on sole leather, quotations being up three cents on sides and four cents on bends, both in oak and hemlock.

The United Shoe Machinery Co. have installed in the factory of Geo. A. Slater, Limited, Montreal, their latest type seven-pincer pulling over machine. This is the first of the new machines to be installed in Canada.

John Jackson, a shoe merchant of Clinton, Ont., for 40 years, and a resident of that town since 1854, died at his home recently in his 89th year. He was the last surviving member and official of the First Methodist Church established in Clinton.

An Australian commission is coming to Canada and the United States to investigate and report on overseas methods of manufacture and production and condition of employment therein. Among the industries to be investigated by six manufacturers is the leather line.

Fire broke out last week in the upper storey of the shoe factory of J. W. Hewetson Co., Brampton, Ont., doing serious damage to the stock room, cutting and fitting departments, while the water soaked through to the lower floor. The loss will be considerable, but arrangements are

being made whereby operations will be resumed at once,—the members of the cutting room already being at work.

Harry Erb died recently in Preston, Ont., aged fifty years, from an attack of paralysis. He was a member of the Solid Leather Shoe Co. (now the Parker Shoe Co.) taking an important share in the management for a number of years. He leaves a widow and one son.

J. D. Lynn, of Truro, N.S., who has had several years successful experience on the road, has been appointed special representative for the Canadian Arrowsmith Mfg. Co., of Niagara Falls, Ont., and has entered upon his new duties. He will cover the Maritime Provinces in the interest of the firm.

James Dillon, of the firm of Dillon & Moore, who have been in the shoe business in St. Catharines, Ont., for the past thirty-five years, has bought the valuable property occupied by the store, and thus secured control of the entire frontage and depth from St. Paul street to Summer street. Mr. Dillon will erect a fifty-foot addition to his establishment, which will make it 120 feet deep. It is his intention to thoroughly remodel and refit the entire premises owing to the steadily increasing business of the firm. He hopes to have the new addition completed and formally opened in plenty of time for the holiday trade.

## RICHARD YOUNG CO.

36 and 38 Spruce Street - NEW YORK, U. S. A.  
 Branch: 54 South Street, BOSTON, MASS.

The Regal Shoe Co., Toronto, have installed a Model C pulling-over machine of the very latest type. Sterling Bros., London, have put in another Ideal clicking machine, and the Unique Shoe Co., Simcoe, two more of the same machines, as well as an additional buffing machine Model G. The Tillsonburg Shoe Co. have installed two grip tacking machines, and the Blachford Shoe Manufacturing Co., Toronto, a Goodyear upper stapler, an insole tack puller, and a rapid tack puller, while the King Shoe Co., Toronto, have just put in a stitchdown staple lasting machine.

R. R. Macaulay, secretary of the Miner Rubber Co., Montreal, was in Toronto last week on business.

"I believe that one of the most popular new colors in kid will be purple," says a leading Toronto shoeman. "I have had a number of inquiries for this shade, and reports come to me from many centres that purple is going to be 'the thing.' In the meantime dark grey, and the darker shades of brown, are moving very well as well as the darker colored shoes with buck tops. Tans are coming back again and mark my words, next season will be one of the most active in tans known for many years. The eight inch top bal continues to be the best seller."

There has been issued by the Logan Printing House, of Chicago, fourteen bright and instructive booklets, entitled, "What makes the Retailer Prosperous?" The author is Chas. A. Sweetland, who has a thorough grasp of his subject, and presents many pointers and valuable suggestions, on various phases of retail life. such as "Personality," "Service," "Affability," "Cleanliness and Order," "Promptness," "Collections," "Advertising," "Pricing and Marking Goods," "Careful Buying," "Window Display," "Extending Credit," etc.

Howard C. Blachford, of H. & C. Blachford, Limited, Yonge street, Toronto, recently spent a few days in New York on business.

A. A. Orendorff representing E. T. Wright & Co., St. Thomas, was in Toronto this week calling upon the trade, and showing a splendid range of samples in men's shoes.

A wedding of interest took place in St. John, N.B., September 21st, when Miss Gladys Marie Callaghan, of the staff of J. M. Humphrey & Co., Limited, wholesale boot and shoe dealers, was united in marriage with John P. Milan. The wedding took place in the Cathedral of the Immaculate Conception, Rev. Francis Walker officiating. In addition to many beautiful presents the bride was the recipient of a handsome Morris chair from her fellow employees.

A Shoe Tree and Stretcher combined, that will fit any boot, is now being handled by leading Canadian findings houses. It is made by A. R. Anderson & Co., of Arlington, N. J. This tree is adjustable to all widths and conforms to the shoe, no matter how long it is worn. There are two sizes in women's and two in men's, which fit all lengths. When the lever is pressed down and the knob at one end of the device reaches the counter of the shoe, the tree widens to the exact size, and allows perfect ventilation. The Fitall tree is made in two sections, each section rocking on the centre and automatically conforming to the shape of the boot. The trees are made in two finishes, natural maple and ebony, and are taking very well with the trade.

William C. Rising, Vice-President of the firm of Waterbury & Rising, St. John, N.B., has returned to work after an absence of two months, due to illness. He received treatment from a specialist in Montreal.

Ed. Lynch who represents Minister-Myles Shoe Co., Toronto, in the Western provinces, left this week on his spring selling trip with a splendid range of samples.

Fred. Beemer, Western Canada representative for the Blachford Shoe Manufacturing Co., Toronto, is now on an extended selling trip to the prairie provinces. He will go as far as the Coast.

J. C. Moreau, general sales manager for Blachford, Davies & Co., Toronto, left this week on an extended business trip to the West.

J. H. Moore who covers the Maritime provinces for Minister-Myles Shoe Co., Toronto, left this week on an extended business visit to the East.

C. A. Davies, of Blachford, Davies & Co., Toronto, has returned from a visit to Montreal and Quebec, and leaves this week for the West. He will go as far as the coast on business and will be absent several weeks.

George Morris, for the past six years foreman of the cutting department of the Regal Shoe Co., Toronto, has taken a similar position with the Unique Shoe Co., who are removing from Toronto to Simcoe, where their new factory is nearly completed. It is expected that the Unique Shoe Co. will begin operations in Simcoe about the middle of the present month. Splendid progress has been made on the new buildings in that town.

The Dominion Shoe Co., 448 Spadina ave., Toronto, have begun the manufacture of hand nailed shoes.

W. G. Damer, Western Canada representative for F. J. Weston & Sons, Toronto, left this week for the Prairie Provinces on an extended business trip. Mr. Damer has been covering this ground for the firm for the past twenty-eight years.

H. L. Daville has returned to Toronto from a three months selling tour of the prairie provinces in the interest of C. Parsons & Son, Limited, leather and shoe findings dealers, Toronto. He reports that business throughout the West is improving steadily.

Among the courses of study added to the curriculum of the Institute for the Blind, at Brantford, Ont., is that of shoemaking. A competent instructor will have charge.

L. S. McKindsey, of Hamilton, who represents the W. B. Hamilton Shoe Co., Toronto, in the Western provinces, left last week on an extended selling trip.

Sergeant Miles Parsons, son of W. G. Parsons, of Toronto, who was a member of the 19th Battalion, C.E.F., and spent some eight months in the trenches, being wounded in the knee by the bursting of a shrapnel, is now one of the instructors in musketry at Camp Borden.

A new leather has been placed on the market, which is known as Spider's Web Kid. It comes in Havana brown, battleship grey, bronze, and black. It is very pretty and artistic, and is shown in a number of spring samples.

A FLOAT WHICH WAS ENTERED BY A PROGRESSIVE BROCKVILLE FOOTWEAR RETAILER IN THE COMMERCIAL TRAVELERS CELEBRATION IN THAT TOWN. THE LENGTH OF THE CANVAS SHOE WAS 12 FEET, AND THE WIDTH AT THE BALL WAS 3½ FEET. SEVERAL HAPPY CHILDREN RODE IN THE IMMENSE SHOE.

## CONDENSED ADVERTISEMENTS

Two cents a word. Minimum charge for an advertisement 50 cents.  
Cash must accompany all orders.

EXPERIENCED SHOE SALESMAN WANTED at once. Young man preferred. Good wages. Apply J. C. Budreo, 1344 Queen street west, Toronto.

WANTED—Traveler for Montreal and the Province of Quebec to carry complete line of widely advertised foot specialties; must speak both French and English and have some road experience. Splendid proposition. State qualifications in first letter. Apply Box 14, SHOE AND LEATHER JOURNAL, Coristine Building, Montreal.

EXPERT SOLE LEATHER TANNER desires to get in touch with leading Canadian firms. Is capable of improving methods in beam house, dry lofts and yard, as well as improving the stock in weight, color and fibre. Can put any leather industry in splendid working order and on a more productive basis. Highest endorsements. Specialist in hemlock, but also thoroughly understands oak and union. Address, W. C. McKeon, 736 Gladwin avenue, Detroit, Mich.

FOR SALE.—An Electric Repair Shop and small stock of men's and boys' shoes. Only one in a city of 12,000. Doing a good business and getting good prices for work. I will stay with new proprietor till April 1st, 1917, if desired. Will sell at invoice price. Apply for full particulars to Box 10, Acton Publishing Co., Toronto.

The new samples of the John McPherson Co., Hamilton, Ont., reveal all the latest features in styles, patterns and lasts. A number of pleasing creations are shown in African brown, grey, ivory, tan, black, and white, while two tone effects in grey and other shades are particularly smart. A very handsome shoe is an 8-inch bal with white kid top and purple kid vamp, and another has an African brown vamp with white kid top, brown collar and wing tip. Perforations are noticeable on most of the models while the long thin forepart is observed with both plain and tipped toes.

G. A. Fraser, boots and shoes and men's furnishings, Rossland, B.C., has discontinued business.

The manager of the Canadian Consolidated Rubber Company for Saskatchewan says that his company's business in that province and throughout the west has been from a third to forty per cent. larger during the present year to date than in the corresponding period in 1915.

S. H. Redding, formerly with the Murray Shoe Co., has assumed charge of the entire making room for the Blachford Shoe Manufacturing Co., Toronto. Mr. Redding has had many years of shoemaking experience and comes to his new field exceedingly well equipped to obtain the high standard required by the Blachford Shoe Manufacturing Co.'s splendid organization.

The Panther Rubber Co., Limited, with headquarters in Sherbrooke, Que., has been incorporated with a capital stock of \$100,000. The company is empowered to acquire and take over as a going concern the property and assets in Canada of the Panther Rubber Manufacturing Company of Stoughton, Mass., and to pay therefor by the issue of capital stock of the present company, fully paid up and non-assessable, and to carry on the business of dealers in rubber, and of manufacturers of and dealers in rubber heels, soles, soling, tires, tubes, mats, hose, and all mechanical and moulded rubber goods, rubber boots and shoes, etc.

Several relics of the battlefield were recently on display

in the window of E. W. Smith, shoe merchant, of St. Catharines, Ont. They were brought from the front and loaned to Mr. Smith by Capt. Burgoyne and Gunner Arthur Black. They consisted of a gas helmet and outfit, tear bag, housewife, soap box, gas goggles, German shell cap, wire nippers, German rifle grenade, darning outfit, German helmet, British officers' 45 revolver, tobacco jar made from a German shell, and other shell souvenirs, a German shell and Belgian money.

Proving to the satisfaction of the court that military boots could be bought by private persons at shoe stores in the city, A. Weiss, a second-hand dealer, of Vancouver, who was charged with an infraction of the Militia Act by offering such boots for sale, was given the benefit of the doubt as to whether he saw the broad arrow mark on the pair he vended, and allowed to go free. At the previous hearing Weiss stated that he could produce boots of the same pattern as those he was charged with selling, and he did this, and produced the bill for the said goods. "If shoe stores can openly sell these goods, I do not see why this man cannot," said the magistrate.

Elzear Poulin, a tanner, was drowned recently at the tannery of Pouliot & Brothers, Arago street, Quebec, when he fell into a lime bath where leather was cured. His body was partly burned by the lime though removed from the bath a few seconds after the fatality.

A recent despatch from London, England, says that the Government, according to the Shoe and Leather Journal, has requisitioned all British sole and upper leather for military purposes. Five per cent. interest, it is stated, will be allowed on the purchase price of the leather requisitioned.

Word was received in Regina recently of the death at the front of Private Jas. Tattersall. Private Tattersall enlisted from Nelson, B.C., but was formerly a resident of Regina, having been employed in that city by the Prairie Shoe Company. His mother and sisters reside in Regina. His father, also a private in the same B.C. regiment, was in the same trench as his boy when death overtook the latter.

The F. & B. Shoe Co., Lasalle avenue, Maisonneuve, have made arrangements with the municipality of Montreal East to erect in that town a shoe factory 45 x 60 by three storeys, work on which has begun. A. Lapointe, the manager, states that the new factory will employ 100 hands, and will turn out 6,000 pairs a week. In addition to turns the company will be in a position to make McKays when the new factory is in operation.

Walter R. Legge, on the occasion of his marriage, was presented with a magnificent case of cutlery from the staff and employees of the Granby rubber factory, of which he is treasurer. He was presented with a handsome casserole dish by the rector and members of the choir of St. George's Church, Granby, of which church Mr. Legge has been organist for the past ten years.

Wallace Waller, manager of the shoe department of the Robert Simpson Co., Toronto, was in Montreal for a few days this week.

J. M. Redmond, of Toronto, was in Montreal last week attending the annual meeting of the Wayland Shoe, Limited, who have enjoyed a most successful year.

James Adair, of Vancouver, is spending a few days in Toronto, on his way West. Mr. Adair, who represents Eugene Thivierge, shoe manufacturer, Quebec, has been in poor health for some time, but is now improving. His many friends are glad to meet him.

W. W. Dickson, buyer for Lennards, Limited, Queen's Road, Bristol, England, was in Montreal this week, endeavoring to buy shoes for his house. Mr. Dickson stated that he was commissioned to buy a million dollars worth of footwear, if he could get what was wanted for the English market, and he proposes to visit the chief American shoe manufacturing centres also.

In St. James' Cathedral, Montreal, on September 21st, Miss Paule Duhault, daughter of Mrs. L. H. Hebert, was quietly married to Mr. Albert Tetrault, son of Mr. and Mrs. N. Tetrault. The bride, who was unattended, was given away by her brother-in-law, Mr. A. A. St. Pierre, and the bridegroom was attended by his father. His Grace Archbishop Bruchesi performed the ceremony. At the conclusion of the service Mr. and Mrs. Tetrault left for New York, whence they sail for a trip abroad. Many friends in the shoe trade will extend congratulations.

L. F. Jackson representing the Brandon Shoe Co., of Brantford, and the Blachford Shoe Manufacturing Co., of Toronto, left last week on an extended selling trip throughout the Maritime provinces.

H. W. Pearson, manager of the Toronto branch, Ames-Holden-McCreedy, Limited, has received word that his brother, Private W. T. Pearson, who went to France with the Third Battalion, South African Infantry, has been missing since July last. The missing soldier is a Boer War veteran.

Mr. J. J. Lembke, who has been with the Chas. A. Ahrens Co., for the past eleven years, has resigned his

J. J. LEMBKE, KITCHENER, ONT.

position with them and is now covering Western Ontario for The Greb Shoe Company, Limited, of Kitchener, Ont.

Mrs. F. Cariss, shoes, Hull, has assigned to J. E. Couture.

S. Gloud representing the Leach Shoe Co., of Rochester, N.Y., was in Toronto last week calling upon the trade.

L. M. Stock, who represents Walker, Parker & Co., Toronto in Western Canada, is now covering that ground with a choice range of models for spring.

Murray W. Crosby, representing the Utz & Dunn Co., Rochester, N.Y., was in Toronto last week showing a fine range of new spring samples in all the popular shades and leading patterns.

John J. Tilt, of Toronto, who represents the Brandon Shoe Co. of Brantford, Ont., in the prairie provinces, left this week on an extended selling trip with a splendid range of samples.

A Montreal leather firm closed a contract one day last week for a certain line of upper leather with a single Canadian concern, for \$100,000, which shows the way things are going.

The rubber footwear manufacturers are very busy and the only difficulty experienced is in the matter of securing

sufficient help. One company report that up to September this year they have done a larger volume of business in rubber footwear than they did during the whole of 1915.

In addition to the group of travellers for the Blachford Shoe Mfg. Co., Toronto, appearing on another page, there has been another added to the staff in the person of Melville Charles Blachford, son of Charles A. Blachford, sales manager of the firm. He arrived on September 29th, and is already making his presence and influence felt.

The Weston Shoe Co., of Campbellford, recently purchased several of the lasts and patterns of the Chatham

**W**HITE kid top, 8-inch, black kid foxing, fudge edge welt, wood covered Louis heel—  
By Utz & Dunn Co.

Shoe Co., of Chatham, Ont., which concern went into liquidation a few weeks ago. The Weston Shoe Co. are incorporating the best of the Chatham Shoe Co.'s lines in their new presentations for spring, and their range of models was never as complete and attractive as this season.

Sir Hamar Greenwood, Bart., the Whitby, Ont., boy, who is now a distinguished member of the British House of Commons, and is paying a visit to Canada, owes much of his success to his gift of rapid thought and repartee, which he cultivated in early youth by assiduous devotion to the debating societies at Toronto University. During one of his Parliamentary campaigns in England he was orating on the folly of purchasing foreign-made goods; but his audience happened

**I**VORY kid top, mahogany Russia calf, 8-inch, whole fox, Russia calf lace stay, perforated quarter, imitation wing tip, wood covered Louis heel—  
By Utz & Dunn Co.

to contain a very sharp-eyed British shoemaker. "Why do you wear American boots, then?" demanded the shoemaker. "Because my feet were made in America," was the instant retort, and the laugh was effectually turned upon the questioner.

T. H. Rieder, Vice-President and General Manager of the Canadian Consolidated Rubber Co., and R. E. Jamieson, General Sales Manager, were in New York this week on business.

There has been some talk in shoe and leather circles in reference to the T. Eaton Co., Toronto, going into the manufacture of leather. The firm have been looking at a Toronto plant that is reported to be on the market.

**GOVERN PRICES ACCORDING TO COST**

(Continued from page 45)

the public justice and get it ourselves, which is by figuring prices as follows:

“Men’s Taps—Add 10 cents to wholesale price.

Cost	Retail price
20c.	30c.
25c.	35c.
30c.	40c.
35c.	45c.

“Findings—Add 5 cents to wholesale cost.

“For labor add flat price as:—

Men’s nailed taps.....	35c.
Men’s sewed taps.....	50c.
Women’s nailed taps.....	30c.
Women’s sewed taps.....	45c.
Boys’ sizes, 1 to 4½:	
Nailed taps.....	30c.
Sewed taps.....	45c.
Youths’ and Misses’ nailed taps.....	25c.
Youths’ and Misses’ sewed taps.....	35c.
Children’s nailed taps.....	20c.
Children’s sewed taps.....	25c.

“My system would be to add 50 per cent. to the cost of your materials to get the retail price of the materials that you use in resoling and heeling, such as leather, nails, thread, blacking, wax, cement, etc. To get the minimum price to charge the public which will enable the shoe repairer to live respectably, pay his bills and have reasonable hours of labor, I believe he should figure the costs as above. For instance, take men’s sewed taps and to the 45 cents for leather add 50 cents for labor, 10 cents for

We are entitled to a respectable living, at reasonable hours of labor, providing we do good work. My fellow shoe repairers, I ask you to consider this as a business system. Be a business man and change your prices when leather prices change. Get the retail price for your material the same as the plumber and carpenter do and then add the cost of labor. You will then have your eyes opened instead of going along

MCLEOD SHOE REPAIRING CO., SAULT STE. MARIE, ONT.

blindly and working 15 hours per day in order to get only \$15 to \$18 per week.

“Wake up and take a vacation. The public will think more of you. Give the public good work, but don’t give them everything. For work neatly done, with good material, charge enough to get a good living by working not over nine hours per day.”

**BIG WILLIE’S ORDER OF THE BOOT.**

He has just given the well-known recognition to his once beleaguered Chief of the General Staff, the great Falkenhayn. It is the way of Princes. First—the Black Eagle. Then—the Boot.—(By W. K. Wassiden.)

blacking, wax and cement; 10 cents for nails, 10 cents for thread, and you have \$1.25, which if you will compare with price lists printed in this paper, you will find to be slightly low. This gives you the idea, although there can be no fixed price for all places, as you must consider the difference in cost of doing business in a city like New York and in a small country town of 1,500 persons, the difference in rentals, in cost of living, and the class of people you have as customers.

**SHOE FABRICS OF QUALITY**

One cannot help but notice the fine quality of fabrics that are now available for shoe uppers. It appears that remarkable progress has been made in this direction within the last few years, and that no condition that can be conceived of in the leather market can cause any great hardship to the public in the matter of shoes, for the reason that we have fabrics today suitable for the making of nearly all kinds of shoes.

We have satins for pumps and slippers, silk brocade effects for high cost boots, heavy, fine woolens for tops and coarser materials for recreation shoes.

For heavy storm wear there are possibilities in heavy canvas treated with oil to exclude water. We read that in the French army a boot with the upper made of this material nailed to a sole of wood is giving much satisfaction for trench use.

But there are other fabrics not mentioned in the foregoing that are doing the largest volume of business. The writer refers to the cotton fabrics, which includes the tremendous volume consumed in white shoes. These range in price and quality from the coarse canvas used in cheap shoes to perhaps the finest of all the shoe fabrics, a product known by a special name and so finely woven as to almost resemble leather in smoothness. The particular fabric the writer has in mind, when backed with gutta percha backing cloth, has all the working qualities of good leather and none of the disadvantages of bad leather. It lasts well, holds its shape, conforms to the foot, is extremely durable, cleans well, and is economical in cost.

This particular fabric appears to have a wide field of usefulness in plain colors as well as white, and also in fancy designs and weaves. It has been hailed as a solution of white leather troubles, but there is no reason why it should not be a solution of the shortage of some other kinds of leathers.

### SHOULD PEOPLE TOE IN WHEN WALKING

Corns, ingrowing nails, crooked toes, bunions, spreading feet, arch trouble, aching feet are all caused by toeing out while walking. It is not natural for those who start with normal feet to toe out, says an eastern physician. How many orthopedic authorities agree with the following observations.

It is natural to toe in, not far in, but just inside of a line straight ahead. All children toe in, nearly all youths toe in. Some people toe in all their lives, but they are few. All barefooted people toe in. All moccasined Indians toe in. No one can run without toeing in. No speed can be made without doing so.

By toeing in the spring of the foot comes from all the small bones of the front part of the foot. In addition, the leverage that raises the body for the next step with the other foot is shorter when it comes from all the toes than when it comes from the great toe alone. The small bones and toes have more spring in them for their size than the large toe has. When one toes out he is trying to walk on the inner side of the foot.

Why does toeing out cause trouble? Because the strain upon the foot in walking is greater than it should be. It inclines the first two bones of the big toe toward the smaller toes by degrees, until the spring finally comes from the inner side of the big toe and its second joint. This undue strain on the second joint is constantly pulling it inward and away from the smaller bones. As the strain continues, the tissues and ligaments that bind the bones in the forefoot together stretch and give way, and finally it becomes separated somewhat and bulges out into what is called a bunion. A bunion is a partial dislocation.

### IMPROVE YOUR MIND ALWAYS

In the giving of advice to clerks there is no end. Most of it is given by men who have never been clerks themselves, and who would have made an awful fist of it if they had been. Occasionally, however, somebody hands out a real good suggestion which is worth posting up. Here is one regarding a clerk's reading. It is from the pen of an employe of Butler Bros., who writes under the name of "The Inspector."

And so young man you think your career is going to be ruined through your lack of education—the kind of education that is gained in schools.

Well nobody with real good sense is going to say that an abundance of book learning is not a highly essential thing these days. But just because a person couldn't or wouldn't go to school enough is no reason why he should limp along through life not knowing the things he should know.

Abraham Lincoln wouldn't be kept down through the lack of school facilities. They even wouldn't give him a light to study at night or any paper to write on. He had to walk miles for his books—and got precious few books at that. Yet we know what Abraham Lincoln did.

When Cato was eighty years old he took a notion that he needed a knowledge of Greek. So he laid to and learned it. Socrates did the same thing with Latin when he was old. Gladstone was eighty-three years old when he was prime minister of England, and yet he found time to gratify his lifelong desire to attain a working knowledge of Greek.

Doesn't it make you a little bit ashamed as you note these facts, to say that you have "no time" in which to improve your mind so you may be a better clerk or a better merchant?

There is just one thing these days that keeps a man in a retail store from knowing what he should know to get the

very most out of life and business. This is his own laziness.

Here is a tip for you young men. If it is wrong, never take another one from me.

Read and study business books. Read a good newspaper every day. Read one or two good magazines. Oh, yes, there are some good magazines. Read at least one good book a month. By a good book I don't mean any silly, sickening love story that might be entitled "The Mistakes of Mary" or something of that kind. If you want a little fiction now and then read Kipling, Dickens, Tolstoi, Hugo, and other old masters.

If you develop your mind to a point that will enable you to adjust yourself to conditions, you will rise. There is no man on earth that can keep you down.

To become more successful, become more efficient. Do little things better. So work that you will require less supervision. The least supervision is needed by the person who makes the fewest mistakes.

### MET WITH ACCIDENT IN TRAINING

Gunner Tom Birch is now in R.F.A. Imperial forces. He was for several years in Canada, being two years at the Slater Boot Shop, Yonge St., Toronto. He went to the Old Country a short time after the war broke out and eventu-

TOM BIRCH, TORONTO

ally signed up to do his bit. Tom met with a bad accident in training getting a damaged leg, but hopes to be able to get a crack at the Bosches yet. He intends returning to Canada after the war, that is, to use his own words, "If the Huns don't get too big a whack at him."

### AN ENTHUSIASTIC SON OF MARS

Stanley Atton is willing, but too young being only 16 years of age. He is employed in the mail order shoe department of the T. Eaton Co., Toronto, and has been training for some time in the F.A., a city battery, transferring from a cadet corps. He stands nearly 5 feet 9 inches, and was

STANLEY ATTON, TORONTO

commented upon at the time of enlistment as the finest physically built youth ever examined by the officiating medical officer.

### GETTING RID OF SMALL SIZES

"Late this winter I noticed that my stock sheets showed too large a percentage of small sizes," said the head of a big women's shoe section.

"Of course, I knew that a cut price would sell these shoes, if the cut was deep enough. But I didn't relish the idea of slashing my profit showing.

"I puzzled over the problem of turning the excess stock into cash without too great a price cut.

"It occurred to me that women who have small feet are mighty proud of that fact.

"Why shouldn't I make capital of this little vanity? Wouldn't a 'Small Foot Sale' be sure to get attention?"

"I decided it was worth the trial. At first, I planned to quote both the price and the size of the shoes. But at the last moment I decided that it was not up to me to define what constituted a 'small foot.' I had some large sizes to sell, too. Why keep anyone away?"

"Let me tell you that it was a mighty lucky thing for me that I had that second thought," he continued. "If I had quoted sizes I would have frightened away about half the people who responded to my ads. Possibly, I would have mortally offended them, as well.

"Did we get a big response? We did. I believe we could have taken a census of the women of our town by listing those attracted by our 'Small Foot Shoe Sale'. I never knew that opinions differed so widely as to what constituted a small foot! We quickly forgot all our established ideas of 'size' and fitted everyone who came in. And I'd hate to tell you the 'length, breadth and thickness' of some of the feet we fitted.

"Of course, a good percentage of the women really did have small feet, and we cleaned up our stocks nicely. But we, incidentally, sold a wide range of shapes and sizes."

### PROPER WAY TO ORDER END SIZES

No retailer wants to lose a sale simply because he does not stock a size 2-AAA in a \$3.50 shoe and yet, often, it has to be done. In nine cases out of ten the dealer is just as well off as if he had large stock which it would be necessary to carry on hand for an unreasonable length of time and then, perhaps, have to clear out at bargain prices. The game works both ways. Here is what one leading authority has to say:

Relative to subject of buying extreme or end sizes, would say that despite the large stock we carry at all times, we buy very sparingly, on small sizes especially.

In women's shoes we buy AAA width in \$5 grades up. We buy E width only in cheap grades or comfort shoes. Our basement shoes are bought mostly from size 4 to 9, and when in need of smaller sizes can always get them from our higher grade department.

In men's shoes from \$5 grade up we buy AA widths. In \$3.50 and \$4, from A width up. In \$2.50 and \$3, from B width up. We buy custom lasts to D width only. High-toe lasts in wider widths and one-half size shorter.

We are never afraid to lose on account of not carrying all our lines in extreme sizes and we believe we have made money by adhering to this principle. We find a large per cent of people who wear extremely small sizes and narrow widths expect to buy their sizes at bargain-counter prices. We, as well as many other retailers, have done a great deal to educate them to expect same, by reason of being compelled to make big sacrifices when closing out lines where too many of these end sizes have been purchased. We have gotten together a great deal of data and information from people who own chains of shoe stores, and this is the result of their experience as well as ours. In the last few years our losses on these sizes have been reduced to almost nothing.

### KNOWN AND READ EVERYWHERE

Enclosed please find one dollar for your valuable paper, the Shoe and Leather Journal. It is known from East to West, and everybody likes and reads it. Sincerely yours,

F. Mathews,  
McRae Shoe House.

Revelstoke, B.C.

### A SOURCE OF INFORMATION

You will find postal note for \$2.00 for the "Shoe and Leather Journal" for this year and next. I always read the Journal with interest and get a great deal of information from it from time to time.

Yours respectfully,  
J. HOCKIN.

Woodstock, Ont.

### GOOD SERVICE TO THE TRADE

We read every issue of your paper and find it very interesting and instructive. We would not be without it and congratulate you upon the bright nature of its contents. The service you are rendering the trade and particularly the shoe repair line, is very satisfactory. Wishing you every success.

Sincerely yours,  
248 St. Paul St.,  
St. Catharines, Ont. W. LEGG & SON.

## NEWSY BRIEFS FROM ST. JOHN

Seven travellers representing the firm of Waterbury & Rising Limited, wholesale boot and shoe dealers, left St. John a few days ago with their spring samples to call on their customers in New Brunswick, Nova Scotia and Prince Edward Island.

Business in St. John this fall is exceptionally good according to reports of several of the leading boot and shoe merchants in the city. This is partly due to residents along the St. John river laying in their winter's supplies, before the closing of navigation in November. Merchants in the north end of the city have disposed of a large number of shoepacks and heavy boots for use in lumber operations in the New Brunswick woods.

William O'Connor, of the staff of Waterbury & Rising Limited, received a letter September 25th from his brother, Private Frank, who is convalescent in a hospital in England, from wounds received while in action in France. He said that his leg was healed from the shrapnel wound, but was still stiff and sore. In preference to lying around in the hospital he sent in his name for a chance to be drafted back to the front, but they refused to consider his offer until he was in better condition to stand the hardships.

## SHOE FACTORY VISITED BY FIRE

The shoe factory of Aird & Son, 482 Ontario street east, Montreal, of which Narcisse Gagnon is the sole proprietor, was damaged by fire this week. The cutting and stitching rooms on the top floor suffered somewhat, but there will be only a slight interruption to the business of the company. The blaze broke out at noon and several employees had a narrow escape. Two of them jumped a distance of from twenty to twenty-five feet.

## To the Manufacturers and Retail Trade

I buy all kinds of surplus and bankrupt shoe stocks in any quantities and pay spot cash.

*Where Quality Counts*

**WE WIN!**

Some Trade Slogans become hackneyed, but the above has been proven so often that it grows stronger every month.

It's easy to skimp on quality and enlarge on finish. That may make a nice looking shoe. But a shoe that wears well is the shoe that brings repeat orders.

That's why we put the quality INTO the shoe, and that's why we win where quality counts.

# Monarch, Dr. Brandon Cushion Sole and Brandon Shoes

will meet the universal demand in Men's shoes, for the range is plenty wide enough to cover almost every call you will have.

Our samples will convince you that

## Perfect Fitting Rubbers

We wish to emphasize the "perfect fitting" quality of Dominion Rubber System footwear, because there is not a shoe made that we cannot fit perfectly. More and more it is recognised that "perfect fitting" is a distinctive feature of Dominion Rubber System brands.

It is easy enough to make a rubber to cover a shoe, but nowadays customers are looking for stylish, "perfect fitting" rubber footwear. That explains why the Dominion Rubber System brands are such trade-winners from Atlantic to Pacific. They combine quality and value with "perfect fitting" in a degree to secure the greatest possible satisfaction.

## GENERAL TRADE SITUATION

**Active Leather Market—Prices Still Going Up—Light Leathers Scarce  
—British Shoe Buyers After Canadian Shoes—Red Tape Hampers Them**

**D**URING the past month there has been a general tightening up of the market in leathers and advances have been made in most lines. This notwithstanding the fact that it has been practically off season for shoe manufacturers. The latter appear to have realized the advisability of getting into the market and covering their probable needs without delay.

The feature of the month has been the export demand which has been insistent in both sole and upper. Buyers for European needs, particularly for army requirements have been quietly picking up whatever they could place their hands on, with the result that all available stocks for foreign trade, particularly sole, has been cleaned up. This has had the effect of further strengthening prices here and has created considerable feverishness on the part of buyers. The past two weeks have been the busiest for a long while in leather.

In light stock prices continue to soar towards the prohibitive and even at the high figures quoted by calf and kid manufacturers it is not possible to receive anything like satisfactory deliveries. A prominent manufacturer of women's shoes who has not had any difficulty heretofore in securing supplies received a letter recently notifying him that an order sent on for kid stock could not be filled as the factory was committed so far ahead to large consumers of its product that it had to cut off transient customers.

The hide market goes on quietly strengthening, the tendency being increased by the fact that tanners have recently been compelled "willy nilly" to go into the market for supplies. They have been holding back for some time in the hope that holders of hide stocks would weaken, but now that the demand has quickened the market has taken a still firmer tone. The same applies to South American hides as to native green, and sole leather tanners have been compelled to pay advances beyond quotations that they refused three weeks ago. Altogether the tone of the market favors sellers and the general fear of getting left is producing a more or less panicky condition that is making it harder to buy raw stock at reasonable figures.

When the SHOE AND LEATHER JOURNAL nearly a year ago called attention to the opportunity afforded by the English market for Canadian made footwear, manufacturers here did not seem to be greatly impressed with the situation. Since that time we have reproduced extracts from British shoe trade papers showing the straits to which the public have been reduced for lack of shoes on account of the tremendous pressure upon the industry through the production of army shoes.

Early this month a representative of a large English retailing syndicate crossed over for the purpose of purchasing for its two hundred odd stores a million dollars worth of shoes. He said it is practically impossible to purchase an adequate supply of the kind of shoes his firm wants at home just now. He has only so far succeeded in picking up a very small portion of his requirements in the United States and Canada.

In connection with this gentleman's visit to this country an instance is afforded not only of the stupidity of governmental red tape but the hindrance it often affords to the business of the country. He brought with him a number of shoe samples upon which to base his purchases. These samples were held for some days and he was compelled to pay duty on them although they were odd shoes and were not used for selling but buying. It is in things of this kind that the efforts of the Trade and Commerce Department are often thwarted by the boneheadedness of customs officials. This is a bad advertisement for us just now.

## BUY SHOES NOW—THEY WILL COST MORE

**The Policy of Waiting or Holding Aloof is Dangerous—Everything Points to Much Dearer Footwear for a Long Period—Get Proper Prices for the Goods—The Help Problem is Another Source of Anxiety to Shoe Merchants Just Now—Some Sidelights**

**"S**HOULD I buy shoes now, or should I wait?" This is the question which is uppermost in the mind of many a dealer at the present time. Is it good policy to hold back waiting until the goods are actually required and pay the then prevailing prices, or should one place orders at the present figure which is on the average from 15 to 25 per cent. over last season?

A survey of the situation discloses the fact that there is nothing in the air to indicate that prices will recede, but on the other hand, there are any number of significant circumstances, which tend to confirm one in the conviction that high as values are just now, they will go still higher.

### Prices Will Soar Some More

Men who are close students of the markets, manufacturing conditions, the trend of business, supply and demand, and all else pertaining to shoe production and shoe retailing, are of the opinion that the leather situation will grow more acute, in consequence of the heavy demands to shoe the fighting hosts in Europe, the new uses to which leather is being put, as well as the large quantities required for army shoes, foreign embargoes placed on hides and skins, the decrease of cattle raising and ranching, etc.

Both upper and bottom stock are increasing in price all the while; the labor situation is growing more perplexing, not only in the matter of scarcity of help, but in incessant demands for increases. Already some of the prices which have been given to travelers, who started out a few weeks ago, have been revised a couple of times, and the revision is upward.

One large dealer declared a few days ago that he had bought all his shoes for spring. "I did not wait for the travelers to come around," he stated, "but went to a number of the factories and had my order booked right there and then. I am taking no chances on the future. I want to be fully covered for the next few months, for I am thoroughly impressed with the idea that shoes are not going to be any lower than they are now for very many months. All signs point to extra cost.

Many and many a retailer has been disappointed because he did not buy when opportunity presented itself. He thought himself fully covered on certain particular lines, only to find that when he wanted to replace them that prices had gone up from 25c. to 85c. a pair.

"We will not have a man's all calf leather shoe in our shop that we can sell below \$7.00 a pair," remarked a leading city merchant this week, "and there will not be a woman's shoe of any kind less than \$6.00, and that only a McKay shoe of the bread-and-butter variety. Shoes after all are the cheapest thing that enters into one's apparel."

Here is what a recent despatch from Boston says on the advancing costs:—

"There has been witnessed during the past ten days one of the most remarkable advances in leather values ever experienced in the history of the industry. About a month ago a buying movement in sole leather started that soon developed into a demand far exceeding the supply. Last week sole leather prices jumped from 3 to 5 cents a pound. The call came first from Europe, followed quickly by heavy buying by our home shoe manufacturers. Even at the higher prices asked the demand continued to grow until now we find cases where close buyers have actually paid prices 7 cents a pound higher for the same tannage of leather than they paid less

than two weeks ago. This week the call for upper leather has become very active, and leading tanners are asking and obtaining prices ranging from 2 to 5 cents a foot advance and on some leathers, such as white and ooze calf, from 10 to 20 cents a foot. Where a few weeks ago buyers stopped to consider the price, to-day they are anxious to place much larger orders than tanners will accept.

"The question now uppermost in the minds of buyers is where they can get leather, the price apparently being of secondary consideration."

The problem of successful retailing is growing more difficult every day aside from the exceedingly high prices for shoes. It is exceptionally hard to secure competent salesmen. Retailers who formerly hesitated about attaching their names to a want ad in the paper, for fear they would be inundated with applications, now make their wants widely known and have not had one answer.

"I do not know whether I can get a shoe clerk for love or money, and I am willing to pay a good deal of the latter," remarked a high-class shoeman this week. "Of course, I know where certain salesmen are discontented, but I will not take one from another firm in this city. I do not think it is square. I would not want another firm in this community to steal away my help, and I intend to abide by the Golden Rule of 'doing unto others as I would be done by.'" I recognize that this may be an altruistic attitude, but I have high regards concerning the ethics of shoe retailing. It is not fair to make a secret agreement with the salesman of a brother shoe merchant, or to engage one clerk to come to you for a little more money, because this system only reacts in the end. The chap who joins your staff for a couple of dollars extra will leave you just as soon as another man boosts the figure. 'Stealing help' may be looked upon with favor by some merchants, but I have never followed such a practice and never will.

### Must Keep Still Tongue

"One has to put up with a good deal today which would not be tolerated in ordinary times. If a clerk takes a longer noon spell than usual, or gets down late in the morning, you simply have to grin and bear it. Ordinarily you would reprimand him, but now, if there is any remonstrance forthcoming, he simply puts on his hat and walks out, knowing that he can get a position anywhere. The wages of clerks have gone up on the average 15 to 20 per cent., and in shoe retailing this extra expenditure should be considered in marking the selling price of goods. It costs more to do business today than ever, and it also costs very much more for shoes in all lines. Prices have advanced in the last two years fully 50 per cent. and in colored kid creations and novelty effects the augmentation has been 100 per cent. If the shoe merchant does not put a proper price on his goods he will not survive very long under present trying merchandizing conditions and the tall cost of doing business," concluded the speaker.

"One important point to remember is that you must adjust prices to the present cost of shoes and in doing so, include not only the stock already on hand, but take into consideration the extra cost of doing business," remarked another dealer. "Stocks run into money much more rapidly now than a year or two ago, and one may expend from \$5,000 to \$10,000 more in buying and not have as large an assortment of lines as he did before the price of footwear started to aeroplane a couple of years ago."

# PROTECTION TO RETAILER AND WHOLESALER

**The Proposed Bulk Sales Act Outlined—Designed to Prevent Collusion Between Buyer and Seller—Endorsed by a Large Section of the Retail Trade—In Force in six Provinces of the Dominion and Every State of the Union Except One**

"The Bulk Sales Act; What it is and How it Operates" is tersely explained by a correspondent of the *SHOE AND LEATHER JOURNAL* who points out that this legislation is now in force in six provinces of Canada, but has not yet been adopted in Ontario. He thinks the proposed measure is not clearly comprehended and has been defeated, like many other good bills, owing to misleading information and wrong impressions.

In order to shed some light on this important matter and afford more definite knowledge, the following article from our correspondent will no doubt be read with much interest:

In the first place it is well to clearly understand what a "sale in bulk" really is, and no better explanation can be given than that afforded by the proposed Act itself:—

## Bulk Sale

Any sale or transfer of stock of goods, wares or merchandise, or part thereof, out of the usual course of business or trade of the vendor, or whenever substantially the entire stock-in-trade of the vendor is sold or conveyed, or whenever an interest in the business or trade of the vendor is sold or conveyed or attempted to be sold and conveyed, such sale, transfer or conveyance shall be deemed "a sale in bulk" within the meaning of this Act.

What does the proposed Act provide in the event of a "sale in bulk?"

(1) That after a sale has been arranged, and the usual evidences of good faith subscribed to—before such a sale shall be deemed valid the seller shall furnish the purchaser with a statement of his creditors for all amounts exceeding \$50.00, and the amounts due to each of such creditors, and shall verify such statement by Statutory Declaration.

(2) If the purchaser fails to get such a statement, duly verified, before completing the sale, then such sale shall be deemed void as against the creditors of the seller unless all the creditors of the seller are paid in full out of the proceeds of such sale.

(3) The purchaser, upon obtaining such written statement, duly verified, shall obtain the written consent of the creditors of the seller, to the amount of sixty per cent. in value and in number of the claims recorded on the statement received from the buyer.

## Consent to Waiver—Trustee

(4) If this consent or waiver cannot be secured from sixty per cent. in value or in number of the claimants recorded on the verified statement then the purchaser shall within ten days from the date of the sale pay all the purchase money or his notes or other documents or sufficient to satisfy the claims of all creditors of the seller, into the hands of a trustee for distribution among all the creditors of the seller. If this is not done the sale from the buyer to the seller is deemed fraudulent, and is void against the creditors of the seller.

(5) The trustee's fees shall be three per cent. of the total proceeds of such sale as shall come to his hands, and shall with any disbursements be deducted from the moneys to be received by the creditors, and shall not be charged to the purchaser or the seller.

There has been a great deal of discussion of the foregoing provision, the statement having been made that the seller would have to pay the commission out of the purchase

price. As will be seen by the above the commission will be paid by the creditors of the seller.

## Protection to Both Alike

The clauses outlined above contain the machinery of the proposed Bulk Sales Act. Wherein do they work a hardship to any honest merchant? The Bill is designed as a protection against the debtor whose object is to make a sale of his stock, put the proceeds in his pocket, and leave for "greener pastures," which are usually in distant fields. It is designed

Fishing on the Credit river—Jas. C. Bryant, Toronto, representing the Kaufman Rubber Co. (in the bow), and Geo. J. Cowling, representing Gourlay & Fogelberg in Toronto and Eastern Ontario. The picture was taken by Charles Bayford, shoe merchant, 1451 Gerrard Street East, Toronto, who was also a member of the party.

to prevent collusion between buyer and seller with a view to defrauding creditors. If enacted it would stop much of the present selling by a certain type of merchant, who disposes of his stock at a very low rate on the dollar, often to a relative or confederate, takes the cash, and decamps for parts unknown; leaving the legitimate and honest merchant in the town to suffer as a result of the cut rate war invariably inaugurated by the buyer.

That it is legislation of a commendable type witness its being placed on the statute books of Manitoba, Saskatchewan, Alberta, British Columbia, Nova Scotia and Quebec, within the past few years, and remember that it is in force in every one of the United States except Kansas.

## Endorsation of Many Merchants

That this legislation has the endorsation of a large section of the retail trade of Ontario is beyond question; that it has not had even greater support is because the Bill has not been clearly understood. It is hoped that this explanation, by practically quoting the provisions of the proposed Act, will bring greater light to those who have desired present definite information but so far have been unable to obtain knowledge concerning it.

# SHOE RETAILERS SHOULD KEEP APPOINTMENTS

Travelers Tell of Their Experiences and the Unreasonableness of Some Customers—Life on the Road is Not All Sunshine and Being Kept in a Town Results in Direct Loss to the Roadman—How the Latter Can Help His Customer—Some Peculiarities

“MY man promised to come at 2 o'clock and look over my samples. It is now 3.35, and he is not here, neither has he sent me any word.”

So spoke a well-known traveler for a western Ontario house, as he sat in his sample room at a leading hotel, waiting for the customer “that someth not.” He had refused another man, who wanted to come down at 3.15, as he fully expected that customer No. 1 would keep the appointment and might not be through by the latter hour. At 3.45 the phone rang and the retailer, without any excuse, told the traveler that he had been delayed and would not be able to get down that afternoon.

“I have waited an hour and a half for you,” was the remark of the salesman, “and have broken another engagement in order to accommodate you.”

“I cannot come,” was the somewhat curt reply, with an air of indifference and no thought of apology.

“Well,” answered the traveler, “I would have appreciated it very much if you had notified me within fifteen or twenty minutes after the hour, as I could have arranged for other appointments or called up some of my friends, who have been waiting to look my lines over. As it is, practically the whole afternoon is gone.”

“I cannot help it,” was the stern rejoinder, “I have to look after my own interests first. The traveler's time is his own; to hear you talk one would think you were in a desperate hurry, whereas you seem to have plenty of leisure.”

## If You Can't Come Telephone

These are circumstances encountered nearly every day by shoe travelers, who complain, and justly too, that certain retailers will make an appointment and are very negligent in the matter of keeping it. Sometimes they turn up late, sometimes they do not. There is one firm widely known to the boys on the road who always keep their engagements promptly, and if any intervening circumstances occur, are quick to telephone the traveler, so as not to keep him waiting. In that event, the latter is able to make other appointments and get through in the least possible time. Most of the town merchants are very good in adhering to their promises, and seldom keep the shoe representative tarrying. In the cities the circumstances are different and many men regard their word too lightly.

“They seem to think,” declared another traveler, “that we have nothing to do but lead a sort of club life at a hotel, and suit the convenience of buyers. We are willing to meet retailers at any hour of the day or night, but we certainly like to have them turn up when they name a time. Since prohibition was ushered in hotel rates have jumped enormously, and it now costs us much more than formerly. In some cases, sample room rent, baggage transfer, etc., have almost doubled, and as to hanging around the hotel at an expense of from \$5 to \$8 a day, waiting for customers who disappoint, without offering any explanation or apology, is not conducive to one's mental equilibrium or serenity of temper. If the tables were turned and the shoe merchant had to do the waiting, he would possibly see things in a different light. Most men like to be busy and when there is nothing to do but hang around, they grow impatient and restless. This applies to nearly all active, energetic fellows,

and business would be more pleasant if some did not so lightly regard their word.”

“Why, I know a dealer whom I have been calling upon for the last twelve years,” remarked another traveler, “who is a martinet in the matter of store discipline, meeting his bills, stock arrangement, etc. His word in all monetary matters is as good as his bond, yet he has never been known to keep an appointment on time, and turns up anywhere from forty minutes to two hours late, without a word of excuse, regret or explanation. I have another customer who, if the traveler keeps him waiting five minutes, or is even interrupted by a telephone call or a knock at the door, when he is buying, grows very excited and petulant. He demands complete attention, yet this same buyer thinks nothing of keeping a traveler waiting thirty, forty or even sixty minutes. Any lapses on his part appear to be all right, but any little frailty on the part of the shoe salesman is all wrong. This fellow cannot see himself as

others see him or he would amend his ways and sweeten his disposition. A kindly glance or a cheery word would help.

“I had another example of a fussy, irritable customer who made four appointments with me and broke each one. Then he made a fifth one at 2.15 o'clock in the afternoon and, thinking of course that he would not honor this promise any more than he did the others, I made an arrangement with another customer to come to my sample room at four o'clock. I waited two hours for customer No. 1 and precisely at four seventeen, two hours and over later, he showed up. I had begun showing my samples to customer No. 2, who was punctual, and the former fellow was so huffy that he walked away with the declaration that he would never buy another dollar's worth from me. That he had broken four appointments and was ever so late in keeping the fifth, seemed a matter of little moment to him.

## A Mutual Bond of Friendship

“It is such drawbacks as this that make a traveler's life discouraging at times,” he declared. “If customers would not break promises they would add much to the pleasure of doing business. They should be more considerate of the traveler, who is the best friend of the retailer. He can give him many pointers and suggestions and not infrequently some side information which will help him very materially. On many occasions he is able to bestow little favors, such as putting through things quickly, giving his order the right of way, and countless small considerations which mean much to the shoe dealer.”

The traveler is a storehouse of information. He is in closer touch with the trade in the various centres than possibly any other person, and shoemen who make a friend of him will find that kindness extended is generally repaid in many ways. It takes a traveler to size up a shoe merchant. The roadman learns to read human nature—he knows not only the goods themselves, but the human propositions that he meets. The measure taken of the merchant by the ordinary traveler is generally accurate and fair. Those business men who are well spoken of by the “knights of the grip” are generally the ones who are doing the leading business in the towns in which they are located. They belong to the progressive and enterprising element.

# SHOE STORE WITH SPLENDID SYSTEM

How Montreal Establishment Has Definite Knowledge of Stock

IT is always interesting to learn how others regard you, especially those far removed from the scene of your activities. In a recent issue of the "Boot and Shoe Recorder," of Boston, the following interesting reference to George G. Gales, of Montreal, appears. It will be read with much interest:—

When Montreal was thirty years younger than it is to-day, and weather beaten houses stood where business now booms, George G. Gales, a Canadian youngster of 10 or 11, first tackled boyhood's chief problem—that of earning spending money. He solved it by selling newspapers with such energy that his supply of candy, white pop and fish lines was the envy of a large juvenile circle.

Among the streets that felt the touch of George's budding genius was West St. Catherine, where each day he tossed a folded evening paper upon the doorstep of one of these old houses. He paid little attention to the place, for he was a busy boy and it meant only one of many customers to him.

### From Newsboy to Merchant

Today the tide of the city's growth has swept over this particular landmark of mercantile ambition, and on the same spot stands a handsome three-story sandstone building into which thousands of customers turn in the course of a year. And by a strange whim of circumstance a sign across the front reads: "George G. Gales & Co., Fashionable Boot Shop."

The rise from newspaper boy to merchant began when young Gales had finished his common school education and a course in a commercial college. He decided that a railroad man's life offered much in romance and opportunity, and for a year he labored in the car accountant's office of the Canadian Pacific Railway for an almost microscopic wage.

Then came several months of severe illness, and when health returned young Gales decided to abandon railroading for retailing; so he went to work in a small shoe store just started by his two brothers. He soon came to feel that he had struck the right business, and when his brothers were ready to withdraw five years later he bought them out.

From that point on the business expanded steadily through eleven years. Then the Canadian Pacific decided to build its Windsor street station on the site of the Gales store, but by that time the proprietor was ready to move to the big establishment on West St. Catherine street.

### Cleaned up Before Moving

When Mr. Gales changed his place of business he changed his plan of business as well. He didn't move a single pair of shoes to the new store, but cleaned them out entirely in a series of sales and then put in a stock of only the highest grade goods, because he saw a broader opportunity in that direction.

"It's business suicide," warned his friends.

"It's business sense," countered Mr. Gales, and went ahead.

Time has proved him right, for the two assets that seldom fail—business ability and hard "digging"—have built up his main store and one branch to the point where they carry perhaps the largest and most exclusive shoe stock in the Dominion.

But there is one factor in this story that many of Mr. Gales' friends overlooked. Business ability with him means more than an attractive store, good salesmanship and in-

Gales knew that more help would bring heavier expense and only temporary relief. He solved the problem by installing mechanical methods.

#### Store Divided Into Departments

During the year that followed Mr. Gales was enabled to cut his office force in half. B. J. Gaul, the accountant, and two girls now easily attend to all the clerical work, obtaining a complete and accurate record of department and clerks' sales—a record that a staff of six was unable to handle before.

The system that accomplishes this is simple. The business is divided into three departments—staple lines carried on the ground floor of the main store; specials, fancy footwear and findings on the second floor, and a general stock in the East End store. Every style of a shoe has a number under the general classes numbered 100, 200, etc.

Only one pair of each size and style of shoe in stock is carried on the shelves, and each night the cashier takes the day's sales slips, which show the stock number, size, price, and salesman's number, and makes up a report of goods sold.

In the morning this report goes to the stockroom and the shoes are replaced on the shelves. In this way each department manager has an accurate perpetual inventory that tells him not only how many pairs of shoes of all kinds are in stock, but how many of each size and style are sold in any given period.

The sales slips are turned over each day to the book-keeping department.

#### Forms Are Very Useful

The record is made up on the sales analysis forms that Mr. Gales has found so valuable in his business. The sales slips are first sorted according to clerks, and the figures are then run off on the adding machine. The operator has only to list the check numbers, cash sales and charge sales—setting the figures down as if on paper. The machine performs all calculations, giving the total for each clerk, and at the same time storing the grand total so that when all the clerks' records have been entered, a total of them all can be obtained. The daily recapitulations are then posted.

With the keyboard split in the same way the daily recapitulations shown in the illustration are then posted one for cash sales, another for charge sales, and a third summarizing the totals of both cash and charge sales. One of these forms is made out for each department and they show the day's business in shoes, rubbers, repairs, hosiery, and findings.

From these sales recaps and the sales analysis by clerks another form is posted daily showing the total transactions by departments, clerks and lines of goods. This constitutes a complete summary of the day's business, and by a glance at it the proprietor can tell which lines are going well, which need bolstering up, and which clerks are most valuable to him.

The Gales stores are up-to-date in every particular. There is a writing and rest room for patrons; all furnishings have been installed with an eye to comfort and convenience; stock is of high grade and is attractively displayed; all office and store equipment is of the most modern type.

#### POPULAR SHOEMAN BECOMES BENEDICT

A pretty wedding was solemnized in St. Mary's Church, Barrie, Ont., on October 4th, by the Rev. Dean O'Malley, when Marguerite Irene, daughter of Mr. and Mrs. D. Powell, Barrie, became the bride of Alfred Branwood Pocock, of the Winnipeg Shoe Co., Winnipeg. Miss Mabel Powell was her sister's attendant. Mr. Elmore Pocock assisted the groom. After the ceremony breakfast was served at the home of the bride, and Mr. and Mrs. Pocock left for Port Hope and London. Among the out-of-town guests present at the wedding

were Mr. and Mrs. Joseph Pocock, Mr. Elmore and Mr. Philip Pocock, London, and Mrs. Stanley, Chatham. Mr. Pocock and bride have taken up their residence in Winnipeg, where the groom is well known in shoe circles. Many friends will extend congratulations.

#### CAREER CUT SHORT BY DEATH

A. M. Haggart passed away at the residence of his mother on Enderby road, Toronto, on October 9th, after an illness of two years. He was well known to the shoe trade in Ontario, entering the Toronto branch of Ames-Holden-McCready about twenty-three years ago. Starting as office boy he was later promoted to charge of the stock room and was next on the road. A few years ago he joined the wholesale shoe house of R. B. Griffith & Co., Hamilton, as junior partner and was there until throat trouble compelled his retirement from active business. The funeral was conducted under Masonic auspices, the deceased being a member of Rehoboam Lodge, No. 65. The late Mr. Haggart was thirty-six years of age.

#### THE SHOE GAME IS GREATEST EVER

"I may say that the shoe game is a great game to play. It may be a little perplexing at times, especially the ladies' part of it, with so many colors, patterns and styles predominating. However, I believe that the footwear business was never better than it is to-day. Shoes are easier to sell at the present high prices than when the figure was much lower, and leather more plentiful. Have what the people want, and the price is no object," declared Robert H. Shore, buyer and manager of the shoe department of L. N. Poulin, Limited,

ROBT. H. SHORE, OTTAWA

Ottawa. He started some fifteen years ago as a parcel boy with James Pratt & Sons, remaining with them several years. He was afterwards with the T. Lindsay Co., Ottawa, and the St. Leger Co., Toronto. In order to broaden his experience and gain a thorough acquaintance with work in the wholesale line, he entered the employ of the W. B. Hamilton Shoe Co., Toronto, remaining there some three years. Mr. Shore was later appointed assistant manager of the shoe section of A. E. Rae & Co., Ottawa, with whom he remained four years, and has filled his present responsible position since 1913. The department over which he presides makes a specialty of ladies' and children's footwear, carrying several of the highest class lines from both Canadian and American shoemaking firms.

Messrs. Shoe & Leather Journal,  
Toronto, Ont.

Dear Sirs:                   ATTENTION - MR. JAS. ACTON.

We wish to take this opportunity of congratulating you and your able Staff on the splendid results obtained in setting up and printing our Special Art Inserts which appeared in the last two Issues of the Shoe and Leather Journal.

By these Inserts we attempted to portray to the Trade via Printer's Art and Ink an accurate and artistic reproduction of a number of our new and advanced Styles and with your hearty co-operation and the adaptness of your Staff, we have undoubtedly been successful. From the many comments which we continue to receive, it is evident that the Trade fully appreciates our mutual effort.

We do not know of any Shoe Journal that has ever surpassed the printing results obtained by you on these Inserts but apart from this, the entire two Issues from cover to cover are a Credit to the Shoe and Leather Industry of Canada.

We wish you and the boys behind the scenes to know that we appreciate good work.

With very kind regards, we beg to remain,

Yours very sincerely,

GAB/P.

### HE LIKES THE SHOE GAME

F. L. Chesnut, who is buyer and manager of the shoe department of Murray-Kay, Limited, Toronto, is widely known to the trade and enjoys the distinction of holding the long and successful record of nearly a quarter century service in his present position with the firm. Recently he completed his twenty-fourth year with Murray-Kay. Mr. Chesnut came to Toronto from Ohio in 1887 and was for

F. L. CHESNUT, TORONTO

some time with the T. Eaton Co. A gentleman who loves the shoe game, there are few better buyers or more discriminating students of style tendencies than Mr. Chesnut, who is liked by his associates and by the many patrons of his well patronized department.

### NEWSY BRIEFS FROM QUEBEC

E. Gaumont, superintendent of the Plessisville Shoe & Leather Co., Plessisville, Que., was in the city the other day and reports that his company have orders which will keep them going many months.

Major J. A. Scott, leather merchant, who has been away for several weeks engaged in recruiting, spent a few days with his family. Major Scott is a very popular military officer and has done most effective work in inducing many men to join the colors, owing to his splendid command of both languages.

J. B. Lamontagne, of E. Thivierge, shoe manufacturer, has been confined to his room, owing to an accident when walking in his shop, whereby his legs were injured.

Nazaire Fortier, tanner, and J. H. Laroche & Fils, are installing a system of sprinklers throughout their establishments.

The Duchaine Shoe Co., wholesale shoes, have removed to their new building on Renaud avenue, St. Sauveur.

W. P. Francis, of the John Ritchie Co., was in Boston and New York recently on business.

Alfred Dupere, of Dupere & Garant, spent a few days in Montreal recently.

J. D. Lagace, of Lagace & Lepinay, is on a business trip to western points.

Among the recent visitors in the city were—W. D. Fox, representing P. Jacobi, Toronto; Louis St. Arnaud, Independ-

dent Silk Co., Montreal; L. S. Odell, Montreal, and E. A. Jones, of Brockton.

The shoe business in general is very good and collections are reported satisfactory. There is a large demand for bronze shoes and the dark brown colors, in both calf and kid.

The Entente delegation from Ontario paid a visit to Quebec recently and the members were warmly received. Among those in the party were T. H. Rieder, of the Canadian Consolidated Rubber Co., L. McBrien, of Kitchener, Hon. E. J. Davis, of the Davis Leather Co., Newmarket, and others.

Several men in the lasting department of the Wm. A. Marsh Co., Quebec, went on strike recently. They demanded a higher wage than they had been getting, although they were working on a contract, which had been entered into by the firm on June 1st last. Matters, however, were satisfactorily adjusted and the employes resumed work. All departments of the factory are again in operation.

### A NAPOLEON IN SHOES

(See Front Cover)

With somewhat of a resemblance to the great Emperor of the French in his earlier and more vigorous days, Napoleon Tetrault, of the Tetrault Shoe Manufacturing Co., of Montreal, has won in his comparatively short life almost as much distinction in the realm of shoes as his illustrious predecessor did on the field of battle.

He has been connected with the shoe business from his lisping days and has all the while had a reputation for achievement in the production of high-class footwear for which his firm has made a lasting reputation. Like the "Little Corporal," he has that infinite capacity for taking pains that some one has said is the foundation of all true genius. At all events he is a master of details not only in shoemaking but in business organization, his factory, office equipment and methods being as responsive as a highly disciplined army.

He has the Napoleonic faculty of reaching out after big things and was amongst the first in this country to realize the immense possibilities that the present great war afforded for aggressive action. He pushed promptly to the front, establishing a business connection in the Old Land that has done much to repair the breach made in the shoe industry of France by the demands of the army. With offices in Paris and an organization that touches the best retail stores in the republic, the Tetrault Shoe Manufacturing Co. have already entrenched themselves strongly in the goodwill of the French people. All of which is due to the sagacity and energy of the head of the house of Tetrault, which is always among the very first introducing new things to the trade and keeping in the forefront of shoemaking ranks.

Vive l'Empereur.

### SHOE POLISHES MAY COST MORE

Not only are shoes going up steadily in price, as well as leather, thread, linings, facings and everything else which enters into the make-up of a boot, but from present appearances it will soon cost more for the average customer to keep his "understandings" polished. Ingredients entering into the manufacture of polishes, pastes and dressings, have increased at an enormous rate, and it may not be long before the price of the ten cent tin will be advanced to 15 cents. In the last two years wax, shellacs, etc., have gone up 25 per cent., chemicals 20 per cent., tin boxes 50 per cent., paper boxes 50 per cent., packing materials 30 per cent., labor 10 to 15 per cent. As for dyestuffs it is a problem to get them at any figure. Manufacturers of polishes are viewing the growing expense of production with considerable anxiety, and while the figure for the finished product has not yet advanced, it is possible that in the near future there will be an increase of about 50 per cent.

## SOME SIMPLE SHOE WINDOW BACK PANELS

Showing How to Make Them—They Possess Great Utility and Are of Much Help to the Window Dresser—The Effective Results Produced by the Use of Wallpaper—Panels Made of Packing Boxes are Economical and Effective—Display Value

There may be various reasons or causes that prevent shoemen in the smaller cities and towns from giving that attention to their window displays that their business demands. One reason is, the average retailer thinks that accessories are hard to make or expensive to obtain. Another reason is possibly lack of time. We are here offering a suggestion that should be of much help to the window dresser (whether he is proprietor or clerk), in making a background at little cost and with little effort.

There are few things that will give such effective results in window trims as wall paper backgrounds. Few, if any, windows are constructed so they can be papered on the back. The suggestion offered is to make frame work panels the proper size to fit into the windows. Should your window be 10 feet long make three panels, all one size or the centre one could be four feet wide and the other two three feet wide each, and the proper height. These panels can be made of packing boxes or material usually to be found about the store.

The size of materials should be about seven-eighths' by one and seven-eighths wide. Check the ends of the uprights about three-quarters to receive the end cross pieces. Do the same with the centre cross pieces. Be careful to bore with small bit, drill or bradawl the side pieces for the nails. Drive the nails V-shaped (see dotted lines) as they will hold better. Use four inch nails with good flat heads. Do not use finishing nails. If the frame is more than six feet high two centre cross pieces should be used.

Braces cut in a mitre box should be nailed in, as shown in the illustration. This makes a strong neat frame flush or flat on both sides.

A quicker way to make the frame is to "butt joint" it. This is shown in Figs. 1 and 2, in the illustration. Fig. 1

FIG. 3—A SAMPLE PANEL

shows how to join the corner. Simply butt one end to the side piece and nail or screw a "strap" of wood on, to lap over the other piece.

Fig. 2 shows how the centre cross bars are fastened. In the lower right hand corner the brace is shown nailed on the outside. This mode of construction makes a stronger frame but has the objection of not being smooth or flush on the back.

When completed cover frames with factory cotton stretched taut and tacked on the edges. Glue size this with a solution of about half pound of glue to a pail of water.

When dry select a suitable paper and frieze and decorate the panels. If desired a base board may be nailed across the bottom of the front of each panel giving a side wall effect. Room moulding may be fastened on at the bottom of the border if desired.

Fig. 3 shows a finished frame after being papered.

The great advantage of these panels is they can be handled readily and may be decorated anew as often as one desires. For furniture or house furnishing displays, an in-

terior room can be arranged in a window with appropriate paper to harmonize with the display by means of a series of these panels.

### Suggestions for Hallowe'en Week

We have emphasized the importance of taking advantage of conditions and circumstances for advertising. Tho' Hallowe'en is not a public holiday it has a sufficient place in the

worked in as decorations. Where the lines displayed vary in price, price tickets should be used.

The two cards shown on this page are suggestions for your window display. They are both about 11 x 17, or can be made half sheet size, 14 x 22 inches. The witch design is not hard to make. It should be done on a yellow card with black lettering and shaded with grey. It is designed for a one price display, but can be used for various prices by

public mind to make a good advertising medium. This year it comes on Tuesday, October 31st. Dress your window on the Thursday night previous. This will give you four days display.

The various Hallowe'en emblems furnish effective decorations both for your store and windows. These are black cats, pumpkins, owls, moons, etc., and the old witch. The colors are yellow and black. The emblems may be had at stationery or novelty stores at a trifling cost, and yellow and black crepe tissue paper can also be obtained and used for the bottom of your window. This same material may be secured in ribbon rolls which is excellent for decorating purposes.

One suggestion for a Hallowe'en window is to secure a figure and dress it in the regulation black witch costume with the peak black hat. Put on this a witch false face. Set the figure as if looking into a pot which is hung on a tripod. For fire beneath the pot use red and yellow paper and the effect will be much heightened if electric lights are placed beneath this paper. At night have all other lights out except those beneath the pot and the effect will have all that uncanniness that accompanies witchery.

If one cares to go to the trouble a fire place can be erected or painted as a background and the witch sit looking into a kettle on a crane.

A plainer trim can be arranged with just the colors yellow and black and the various emblems mentioned above

adapting it the same as this oval design. In this case use individual price tickets on each article.

### Making an Oval Design

The oval card is more difficult to execute. The one shown is done with the air brush, but the same design may be worked with an ordinary brush. Lay an oval pattern on the card and trace around it with pencil, then paint in with brush. A wavy line may be used which is easier to make and just as effective as a straight line. The strip across or behind the oval may be treated the same way. The lettering may be in black and shaded in pale green or grey. The suggestion of this card is for shoes but the same design may be adapted to any line of trade.

### FORMER SHOEMAKER DIES SUDDENLY

John Gordon Morgan, general manager for Western Canada of the New York Life Insurance Company, was found dead, seated in a chair in his room at the Royal Alexandra hotel, Winnipeg. He was a native of Victoria county, Ont., a son of the late John Gordon Morgan, and born on his father's farm, Fenelon Township, September 6th, 1850, and educated at the public schools, Cambray, Ont. After leaving school Mr. Morgan was apprenticed to the shoemaking trade, and he followed that occupation until 1880, when he came to Winnipeg and engaged in the real estate business.

# The Shoe Repair Man

**T**HE shoe repairers of Woodstock, Ont., have formed an association. At a recent meeting of the members W. R. Murray was elected president, L. E. Edwards, vice-president, and J. Hockin, secretary.

A new price list for work went into effect on October 1st owing to the increased figure for sole leather, nails, thread, labor, etc. It is as follows:—

Men's sewed soles and heels.....	\$1.35
Men's nailed soles and heels.....	1.10
Men's sewed half soles.....	1.00
Men's nailed half soles.....	.75
Men's leather heels.....	.35
Men's full soles and heels, sewed.....	1.75
Men's full soles and rubber heels.....	2.00
Men's rubber heels.....	.50
Men's full soles nailed and rubber heels.....	1.25
Women's sewed soles and heels.....	1.00
Women's half soles, sewn.....	.75
Women's soles and heels, nailed.....	.85
Women's half soles nailed.....	.60
Women's heels.....	.25
Women's turn soles.....	1.00
Women's rubber heels.....	.40
Women's soles, nailed and rubber heels.....	1.00
Boys' soles and heels, nailed, 4 and 5.....	.75
Boys' soles and heels, nailed, 1, 2, 3.....	.65
Boys' heels.....	.25
Youths' heels.....	.20
Building new heels.....	up from .60
Youths' soles and heels, nailed, 10 to 13.....	.55
Youths' soles and heels, nailed, 7 to 9.....	.50
Girls' soles and heels, nailed, 12 to 2.....	.60
Children's toecaps.....	.25
Women's toecaps.....	.35
Men's toecaps.....	.40
Men's full soles and heels on rubber boots.....	1.25
New elastic in gaiters.....	.75

These prices are strictly cash. Signed:—

W. R. MURRAY	L. E. EDWARDS
J. HOCKIN	S. MORKEM
ALEX. MCPHERSON	W. DURANT

## SOLE LEATHER TAKES DECIDED JUMP

The price of sole leather is constantly ascending and this week another advance of three cents went into effect following one of three cents a couple of weeks ago. How much higher sole leather will go is a problem, but the general opinion is that the end is not yet reached and that other advances will follow shortly owing to the scarcity of hides, the difficulty in securing labor, the heavy demand for army purposes, and the fact that the call is much greater than the tanneries can meet under the circumstances. It all resolves itself into the old law of supply and demand and the latter is now most insistent, not only at home but abroad, while the supply is growing scarcer all the while. Shoe repairers who recently raised their prices will likely have to do so again, owing to the steadily increasing cost of bottom stock. Tap soles have also undergone another raise of ten per cent. It is not many weeks ago that they

were advanced twenty-five per cent. and the repair men will naturally have to charge their customers more.

The following is the new price list for sole leather, which went into effect on October 16th. The last list was issued on July 1st. The following comparative table will afford readers an idea of how prices are going up:—

	October 16th Prices.		July 1st Prices.	
	10 Sides or More One Shipment	Less than 10 Sides	10 Sides or More One Shipment	Less than 10 Sides
Hemlock Sides No. 1 or Best . . . .	54	55	50	51

## WHY CLEANLINESS IS IMPORTANT

Altogether too little attention is given by too many repairers to the question of cleanliness. We refer not alone to the shop appearance, but to the handling of customers' shoes as well, says "The Shoe Repair Shop." A few days ago we saw a pair of shoes returned from a shoe repair shop with the inside white linings soiled by grease and black. When the shoes went to the shop the linings were soiled only to the extent that wear would naturally soil them. After this customer wore the repaired shoes the first time, he found upon removing them, that this grease and black had soiled his hose. This fact conclusively shows that the soil in the shoes was done by the repairer, and through carelessness of the grossest sort. If we were asked what we thought of such a repairer's job the only reply we could give would be that he ought to be following some other vocation. He is not fit for the repairing business. He might make a good stonecrusher, or grave digger.

Shops that turn out this kind of work are an injury to the trade. There is only one way for this publication, or others in the business, including findings houses, to deal with such people, and that is to try to eliminate them. It is uncharitable to encourage them to stay in the business.

# HOW THE RETAILER CAN MAKE MORE MONEY

**If the Shoeman is Not Making a Good Salary Out of His Business and Building up a Good Bank Account he Needs Expert Constructive Help—The Way Losses Are Created and How They Can be Overcome—What the Live Merchant Should Get**

In writing about this subject, I do so thinking perhaps you are not making as much money out of shoes as you would like; and that some ideas which may help will be welcomed. If a retailer isn't making a good salary out of his business and building a good bank account, rather than merely making a living, he isn't to be criticised. He's got his hands full. He needs help; not dollars and cents, or unreasonable credit, but expert, constructive help; the sort of help that aids us in getting on the right track, says R. E. Costigan, of St. Joseph, Mo., in the "Shoe Retailer."

Such help is gotten from experience, or is gotten from observations of others who are doing what we are trying to do.

Why do not retailers make more money out of shoes? I have been interested in that question because I know many who are not making as much money as they should, or could. In each case there is a reason. In many cases the remedy is in the hands of the retailer himself.

## What Investigations Have Shown

It is evident that the retail shoe business of some dealers suffers many times because it is not fostered, not watched, as it should be. Think of a farmer who sows his seed, then doesn't watch his fields and cultivate!

As long as there are human beings about you in your logical trade territory there's money to be made for you from shoes. Suppose there are 1,500 people within 10 miles of your store. Each person should use about \$5.00 worth of shoes a year; that's \$7,500 for the territory. If you get one-third the trade that's \$2,500 annual retail business on shoes. An average gross profit of 35 per cent. would mean \$875. A good year's profit for a dealer so situated. I can hear some retailer say, "35 per cent. is too high a profit." It isn't all profit. Part is to help to pay rent, your salary, lighting, clerk hire, heating, taxes, etc. Some dealers forget that these items come out of profit—and to them 25 per cent. gross profit is satisfying; but it does not pay the "boss" a salary or help the bank account.

## Secret of Some Retailers' Losses

As an example of pricing, take a natural veal work shoe. It costs \$2.00. It should retail for not less than \$4. A majority of dealers are getting \$4. for it and they are satisfying their trade; because after all a shoe should and will sell for what it deserves. But some dealers are selling this \$4 retailer at \$3.50 and many at \$3.75. Some, at the writer's suggestion, have made the price \$4 and the advance has seen the selling satisfactory. This is just one shoe investigated. It shows what can and should be done by retailers who are not making enough money.

Then take novelties. A duo-tone gray kid polish wholesales at \$4. A shoe of that style should better 40 per cent. gross profit—should sell at \$7. That is the plan of successful shoe retailers. A bronze kid polish, wholesaling at \$3.50 should retail at \$6.00, or at 41 per cent. gross profit.

Another money-losing practice is selling staple shoes at less than they are worth. This summer the writer has seen staple shoes selling at bargain prices. Here were shoes that were worth 100 cents on the dollar; they even may cost the dealers more this fall than the prices put on them for the bargain table. Is that good business? Shoe retailers must

stick up for prices if they are to make money. And never was there a better season to start a fair mark up than this one. For the consumer knows conditions about as well as the retailer.

## Two Young Men With the Right Idea

A salesman told me of two young men in a Nebraska store who make \$8,000 gross profit on shoes each year. They average 42½ per cent. gross profit.

"These two men," said the salesman, "realize that it's about as easy to sell at profitable prices as to mark their novelties high, as they are entitled to do in view of the 'perishable' nature of these goods. Many retailers mark their novelties as low as staples. It's all wrong."

Another thing I have found is that in many general stores the owners do not have a regular shoe department. One dealer I think of right now has his patrons try on shoes in a grocery stock. With a little trouble and slight expense during a dull season he could make a separate department for shoes up near the front of his store. A rug on the floor, several chairs, or settee, a screen or drapery behind the chairs and a fitting stool will do the trick. And it will pay!

The most successful retailers find it an advantage to let one clerk be the shoe manager; he watches the stock, keeps it sorted out, watches for slow movers to avoid accumulation—and what is very important—sees that he is not shy of sizes on good sellers. A lookout on Monday mornings, when things are usually dull, and Monday mail ordering to size up will keep you ready to take care of your patrons.

It has been the experience of many retailers that carrying too many lines is like keeping the eggs in several baskets. It means a hard stock to keep sized up; a bunch of accumulated odds and ends, and a stock that does not have what you need in sizes and styles. It means too many shoes on the shelf.

## Making Two Sales Instead of One

Before very long it will be rubber time. Dealers ought to make more money out of rubbers. In many cases the rubber stock is chucked back out of sight—and too often, out of mind. Too often, rubbers are sold only when asked for. Successful retailers keep rubbers up where they are seen, and thought of, both by the trade and the clerks. They try to sell rubbers when they sell new shoes. Mr. Jones from the country, may buy a pair of shoes today and will very likely need rubbers before he comes in again. His children should have rubbers at home ready to wear to school on the first bad day. Rubbers are very cheap footwear. Rubber is low; leather is high, and is going higher. Rubbers will save shoes. Take advice and start out early; see how soon you can clean up your rubber stock by pushing it. You'll be surprised.

From the above the reader has seen that I believe success in retailing is a matter of efficiency—plus dealing with concerns that have your interests at heart, both in the way of service and advertising.

We don't feel we know it all here ourselves; but we are eager to learn. For instance, we found a way to cut down expense in our lighting. So good a plan did we use that one of the most prominent business magazines in the world took a picture of our office and recommended our plan to others.

*(Continued on page 55)*

## ARE YOU MAKING MONEY IN SHOE GAME?

I have talked to many retailers who thought they were making money, where in reality they were not. Too many are getting too low a gross profit; for there is a difference between a gross profit and a net profit.

Note this: Out of the gross profit must come (unless it comes from a decreasing bank account.

1. Your salary and that of any member of your family who assists you in the store. If you are not making a salary out of your business, you are not entirely successful, for it is not profitable to work for a mere living.

2. Your clerk's salary.

3. Your rent. You should get rent out of your business, whether you rent from another or own your store building.

4. Interest on investment. You should get out of your business a good interest on the amount of

money you have tied up in it; just as if you had the money in bonds where there is none or a small risk.

5. Delivery, drayage, freight.

6. Credit losses.

7. Insurance.

8. Light, heat, water, telephone, etc.

9. Taxes.

10. Depreciation of stock.

11. Stationery, postage, repairs and allowances on shoes, advertising, donations to schools and churches, except those of private nature.

Isn't that a rather formidable list? And yet, is there even one item there that your business should not be paying you?

A checking up of your business with this list is one way to learn just how your business is paying you—and an argument for shoe prices that actually pay you a fair profit.

## Keep This Table Before You in Figuring the Retail Price

	\$2.00	\$2.50	\$3.00	\$3.25	\$3.50	\$4.00	\$4.50		\$5.00	\$5.50	\$6.00	\$6.50	\$7.00	\$7.50	\$8.00	
<b>\$1.25</b>	37	50						<b>\$2.85</b>	43							
<b>1.50</b>	25	40						<b>3.00</b>	40	45	50					
<b>1.60</b>	20	36	46					<b>3.15</b>	37	42	47					
<b>1.75</b>		30	41					<b>3.25</b>	35	40	45	50				
<b>1.85</b>		26	38					<b>3.35</b>	33	39	44	48				
<b>2.00</b>		25	33	38	42			<b>3.40</b>	32	38	43	47				
<b>2.15</b>			28	34	38			<b>3.50</b>	30	36	41	46	50			
<b>2.25</b>			25	31	35	43		<b>3.60</b>	28	34	40	45	48			
<b>2.35</b>				28	32	41		<b>3.75</b>		31	37	40	46	50		
<b>2.40</b>				26	31	40		<b>4.00</b>		27	33	38	43	47	50	
<b>2.50</b>					28	37	44	<b>4.15</b>			30	36	41	46	48	
<b>2.60</b>					26	35	42	<b>4.25</b>			29	35	39	43	47	
<b>2.75</b>						31	38	<b>4.35</b>				33	38	42	46	
<b>2.85</b>						28	36	<b>4.50</b>					36	40	44	
<b>3.00</b>							25	<b>33</b>	<b>4.60</b>					34	39	42
<b>3.15</b>								30	<b>4.85</b>					31	35	39
<b>3.25</b>							25	<b>5.00</b>							33	37

Consult this table before you mark up your shoe prices. And also take into consideration the eleven items, as shown at the top of this page, that are to be gotten by you from your gross profit. The left hand bold face vertical columns show the cost prices; the horizontal column at the top, the selling prices, the squares formed by the intersection of these prices contain the per cent. of gross profit.

### A GOOD MAN ON THE JOB

P. W. Day, who was recently appointed sales manager for the F. S. Carr Rubber Co., of Granby, Que., has had an extended and successful experience and insight into the selling game. He has spent several years in New York and other large American cities as well as in Montreal. He is

P. W. DAY, GRANBY, QUE.

thoroughly acquainted with manufacturing costs and marketing the products of large plants. In his new sphere he is meeting with a wide measure of success with the Victor Cushion Heel and other lines turned out by the company. Mr. Day brings to bear upon his work energy, application and ability of a high order.

### NEWSY TOPICS FROM ST. JOHN

Corporal Harry M. Adams, who prior to donning khaki was employed with Ames-Holden-McCready Ltd., wholesale shoe dealers, St. John branch, was wounded in the left side and leg in action on September 23, according to a telegram received by his brother, Stanley W. Adams, 260 Main street, St. John, on October 5. Corporal Adams left St. John with a signalling unit, under command of Major Thomas Powers, and joined the first Canadian Contingent at Valcartier. After serving in France for some time he sustained a slight injury to one of his ankles, but continued in active service until recently knocked "hors de combat." Corporal Adams was one of the first Canadians to gain honors on the battle field. For conspicuous gallantry, from April 22 to 25th, 1915, he was awarded the D.C.M. When telephone wires were down he carried orders under heavy shell and rifle fire to St. Julien and Ypres salient.

Mrs. Archie Sabean received a telegram, on Sept. 30, informing her that her husband, Private Archie, had been wounded in the left arm, on September 19, and had been admitted to 1st Australian Hospital, in Rouen. Private Sabean went overseas with the 55th battalion, but was transferred to another unit upon his arrival in England. Prior to enlisting he was employed as manager of the shoe department of Bucknan, Colwell Company, in Eastport, Me. He is a St. John boy.

Mrs. W. G. Fisher, 121 Brussels street, received a telegram notifying her that her brother, Private Cecil Hartin, had been admitted to the Third Western General Hospital in Cardiff, suffering from wounds in the right thigh, hand

and shoulder. Private Hartin left St. John with an infantry battalion. He was employed in the Colonial Hide Company prior to enlisting.

Mrs. Elizabeth Quinn, 127 Erin street, got word that her son, Private William Patrick, had been wounded in the right arm and had been admitted to No. 2, I.e Trepot Hospital, France, on September 23. He left St. John as a member of the 55th battalion, but upon his arrival in England was transferred to another unit. Prior to enlisting he was employed in Peter's tannery.

Negotiations are in progress for Armour & Company, of Chicago, to take over the Dickinson Tannery, at Woodstock, N.B. Andrew Hevenor has been in Woodstock for several days arranging the preliminaries, and it is expected that the purchase will be completed in the near future. The plant has been specializing on a moderate grade of sole leather and it is expected that this policy will be continued under the new management. War conditions and the unprecedented demand for leather products, it is understood, has led the Armours to seek an entry into this field. It is stated that \$250,000 is involved in the deal.

Richard J. Walsh, manager of Waterbury & Rising's, King street store, St. John, is receiving congratulations on his recent appointment as Grand Deputy of the C.M.B.A. for the Province of New Brunswick. Heretofore there were several grand deputies, each having authority in his own district, but in future, Mr. Walsh will have authority for the whole province. He has been Grand Deputy for the city and county of St. John for the last two years.

### BIG BUSINESS ON NOVELTIES

The president of a big company, making women's McKays and medium-priced welts, whose product is taken by large wholesalers, big city dealers and department stores who buy in large quantities, reports on conditions as he has observed them, as follows:

"My knowledge and opinion of the over-stock of retail shoe stores and departments is largely related to women's shoes; on the other hand I am only too glad to tell what I think is the situation.

"I really believe there are a great many men's shoes in retail shoe stores and departments at this time, but as to whether there will be an over-stock or not I do not think anyone can tell until the retail season is on us. If there is a continuance of good times, etc., etc., then there will not be an over-stock of men's shoes.

"On the women's end, I think that almost every retail and department store and jobber has more than an average stock of staple shoes, and that all of them have bought a few novelties to start the season with. But in the novelty game, which to my mind will mean at least 50 to 60 per cent. of the business done on women's shoes selling above \$3.50 per pair, I believe that less than 10 per cent. to 15 per cent. have been purchased as yet; and I also believe that those manufacturers who make a play for novelty shoes have a wonderful season coming to them. This is not only my own belief, but I think it is the opinion of others who have had chances for even a broader observation than I have."

### WOULD NOT BE WITHOUT IT

Please find enclosed the amount of my subscription for another year for your valued "Shoe and Leather Journal." I find it indispensable in my business and would not be without it at any cost.

Yours truly,  
JNO. B. SANGSTER.

Moncton, N.B.

# HOW TO MINIMIZE LOSS IN SHOE BUYING

In Order to Make Room for New Styles, Old Ones Must be Cleaned Out—Guard Against Purchasing Some Styles at Different Prices—Average Stock in Well Regulated Shoe Store Should be Turned Four Times Annually—Pertinent Suggestions

ONE of the first things the careful buyer must do is to study the whims of those who will buy from him, says Ben Jacobson, of New York, one of the most expert buyers. He must keep posted on the new ideas in shoemaking and know the good selling styles in all grades from the cheapest to the best. In addition to this he must keep posted on the market value of leather and the other materials that go into shoes. He should also read all of the shoe advertisements he can, whether they be wholesale or retail. He should watch well-dressed men and women, especially those in his neighborhood, and see the styles they wear and how these look on the feet. He should be friendly with all traveling men, manufacturers and wholesalers but he should give his orders to as few houses as possible. Very often, however, he can learn something of value from a house to which he does not give any business.

The problem of planning for a new season must be gone over very carefully by the buyer in order to see that he does not buy the same styles at different prices. His three-dollar shoe must differ from his four-dollar shoe, not only in quality but in style. Having decided on the styles he wants to buy for that season, he next comes to the quantity he can afford to order without hurting the financial end of the business.

Every buyer must remember that in order to make room for new styles it is necessary to clean out the old ones. This is best done by preparing for the clean-out at the time he places an order for a new style. Each stock in his store or department should be assorted into departments or sections, such as men's, boys', women's and girls'. The stock of each department must stand its own turn-overs. If a buyer's stock of women's shoes now consists of 50 styles, and he is planning to put in a new one, he should dispose of one of the present styles, so that when the new one comes in he will still have but 50.

## Relation of Buying to Turnover

The average stock in any well-regulated store should turn four times a year, though some stocks will, perhaps, turn 10 times. It is the slow sellers that pull down the total turnover. A buyer should aim not to carry more than 25 per cent. in stock to the total year's business. For instance, if his store is a "family" store and he sells \$40,000 worth of shoes a year, his sales will, perhaps, be \$15,000 a year on men's and boys' goods and \$25,000 on women's and children's. Therefore, he should not have more than \$3,750 tied up in men's and boys' shoes and \$6,250 in women's and children's stock.

Assuming that the buyer's mind is now made up as to how many new styles he is going to order and which of the

## BUYING CHART

	Stock on Hand 1st of Month	Gross Sales this Month	Cost of Goods Sold this Month	At Once Purchases this Month	Outst'g Orders to be Del'd During Month
Jan.	10,000	3,000	2,100	1,000	
Feb.	8,900	2,500	1,750	1,000	
Mar.	8,150	3,000	2,100	500	3,000
Apr.	9,550	3,500	2,450	500	2,500
May	10,100	4,000	2,800	500	2,500
June	10,300	4,000	2,800	1,000	1,000
July	9,500	3,000	2,100	1,000	
Aug.	8,400	2,500	1,750	500	1,000
Sept.	8,150	3,000	2,100	500	3,000
Oct.	9,550	3,500	2,450	500	2,500
Nov.	10,100	4,000	2,800	1,000	2,000
Dec.	10,300	4,000	2,800	1,500	1,000
Jan.	10,000				
Total		40,000	28,000	9,500	18,500

These figures are for a store carrying a stock of \$10,000 and selling \$40,000 a year on an average of 30 per cent. profit. Note that the at once purchases and outstanding orders combined equal the cost of goods sold. Proportionate figures are used in most any size business.

not necessary for him to get his whole stock in too early, however, for by showing some of the new styles earlier than his competitor he is not only able to sell more shoes, but he is able to get a good idea of what to be prepared for during the rest of the season. Besides this, he will find that the early shopper will give his store good advertising by telling his or her neighbors of having seen certain styles in his store that she had not seen elsewhere.

## Know the Selling Quality

In buying shoes it is important for the buyer to know the wearing and fitting quality, but that this is not nearly so important to know as the selling quality. A buyer will often find two manufacturers in one town using the same material, yet one will get 50 cents a pair more for his shoes than the other, and they will be worth it, because they will retail for \$1 more. It is up to the buyer, therefore, to buy shoes that will sell quickly and give him more than a fixed profit. He will need all the extra profit he can make as a reserve fund, so that he can take a loss in case he makes a mistake during the season in buying the wrong style.

If a buyer is now giving his customers very good values by paying \$2.25 for \$3 shoes he should be able to buy a few styles of \$2.25 shoes that will be so much better than the others that he can get \$3.50 for them, especially in fancy styles.

## How to Recover on Mistakes

If the buyer makes a mistake and orders the wrong style, he should dispose of it as quickly as he can and with as little loss as possible. He should then buy a new style in its place and put larger profit on it to make up the loss. No buyer should return shoes he bought in good faith if the order was filled properly. He must remember that, in these days of efficiency and economy in business, the manufacturer and the wholesaler figure their profits on sales as well as he does. If the shoes come back to them there is

present stock he is going to discontinue, he should not wait too long before cleaning up. He should begin a sale and push the discontinued styles before the new ones arrive. In offering these shoes for sale the buyer should not take his markdown in sections. If he has to take a markdown, he should take a good one while the original selling price is still fresh in the minds of his prospective customers. In that way he will gain new customers and a reputation for being a "live one."

When ordering new styles a buyer should not delay shipments too long, for his competitor may show the same styles before he does. It is a good rule not to wait until the customers ask for new styles, but to show them early. It is

a loss of profit on the sale in addition to the cost of a double handling of the shoes and transportation charges.

### Condemns Single Pair Business

No matter how near the store is to the wholesale market or how small it may be, no buyer should get the single pair, or special order, habit. It is bad for him, and either shows poor salesmanship or bad stockkeeping. It is a habit that grows on a buyer if he finds a sale is hard to make, in spite of the fact that many sales are lost by offering to get special orders. He should try very hard to sell shoes he has in stock, and he should have his sizes nearly complete at all times. He should remember that a customer comes to his store for shoes and not for promises. Particularly with women, there is often a strong probability that even after special orders have been taken they will go to some other store and buy their shoes. Occasionally a buyer will have to take a special order for deformed or odd-sized feet, or for some extremely fancy style. On such orders he should not forget to figure a big profit—even to the extent of doubling his money wherever he possibly can.

### FORMER SHOE MERCHANT IN COURT

That there was sufficient evidence against Percy H. Parrott to warrant his case being sent to a jury was the decision of Magistrate Brown, of Saskatoon, Sask., in the city police court, when he ordered the accused to stand trial on a charge of defrauding his creditors. Parrott was given his preliminary hearing when evidence was adduced alleging that he had committed fraud by concealing assets in his possession when the Parrott Shoe Company, of Saskatoon and Moose Jaw, made an assignment to the National Trust Company last February. The indictment contains three counts covering sums of money amounting to \$7,500, \$6,000 and \$900. One of these sums had been paid to the National Trust Co., the only question on this count being the time at which the payment was made.

The case was re-opened in the police court when T. Lynd, counsel for the defence, and C. L. Durie, prosecuting attorney, concluded their arguments before the magistrate. Mr. Lynd contended that there was an utter lack of evidence to show that his client had been guilty of the offence charged, while C. L. Durie reviewed the testimony that had been given and argued for commitment. The magistrate gave his decision that there was something in the case that needed explaining and accordingly placed Parrott on trial.

The accused was subsequently given his liberty on \$2,000 bail, depositing personal surety for half the amount and securing a friend to go on the bond for the other thousand dollars. Mr. Parrott was brought back from Alberta, where he had gone to reside following his departure from Saskatoon. There was no evidence that the accused had attempted to evade service of the warrant.

### INTRODUCING NEW PRODUCT TO TRADE

K. G. Walters, who for the past eight years has been identified with the United Shoe Machinery Co., in the Montreal and Toronto offices, is a young man who is well liked by all his customers. He first entered the service of the U.S.M. Co. in Montreal in 1908, and had charge of the road work under H. W. Algeo, and was also connected with the sales department. Coming to Toronto three years ago, he took the place of Geo. F. Hennessey, who was attached to Kitchener office, on the establishment of that branch. Mr. Walters is now introducing to the trade "Chamoin" which is designed to take the place of leather, coming in both sole and upper stock. Chamoin is 10 per cent. pure rubber and 80 per cent. vegetable fibre, is sweat-proof and waterproof, and guaranteed not to slip. It is sold in both bends and rolls and it is claimed by the makers, that it can

be stained, waxed and finished the same as leather, while edge trimming and edge setting can be done very neatly on this new material. The bends come in 7, 8, 9 and 10 iron, and the color of the new substitute for leather is a mouse grey. It has already been sold to a number of shoe manufacturers, and Mr. Walters says that the resistance of Chamoin has been demonstrated as 85 per cent. greater than sole leather, on an actual grinding test.

### HE KNOWS WANTS OF THE PEOPLE

Beginning his career in the shoe business in the early nineties with a Montreal firm, Fred J. McCann was a messenger boy and cashier. Later he became a window dresser

FRED J. McCANN, MONTREAL

and salesman. The hours were from seven-thirty in the morning to ten o'clock at night and twelve o'clock on Saturday nights. Spending so much time inside there was little or no opportunity for outdoor exercise of any character and Mr. McCann decided that a change was necessary if his health was not to suffer. He entered the wholesale warehouse of the then firm of George T. Slater & Sons at half the salary he was receiving in the retail end of the business, but the hours were shorter. His next position was with James McCready & Co., shoe manufacturers, where he soon rose to be designer, cost maker and stock keeper. Mr. McCann is now the buyer and manager of the shoe section of Goodwin's, Limited, the biggest department store in Canada's commercial metropolis. He attributes any success that he has met with in the shoe game to a knowledge of the retail wants of the people which has resulted in his promotion to his present responsible post. An exponent of thoroughness and system Mr. McCann possesses executive ability and progressive ideas.

### VETERAN SHOEMAN PASSES AWAY

For the past twenty years one of the most highly respected residents of Ottawa, William J. Barr, passed away recently. He was the proprietor for many years of a shoe store at 130 Bank street, Ottawa, which he operated until February last. Mr. Barr was born in County Donegal, Ireland, seventy-five years ago. Coming to Canada while young, he settled in Hawkesbury, where he first started in the shoe business. Mr. and Mrs. Barr celebrated their golden wedding in June, 1914. Besides his widow, Mr. Barr leaves to mourn his loss three daughters and one son.

# MAKING EFFECTIVE USE OF MAILING LIST

**How to Secure One That is Accurate and Up-to-Date—The Opportunity of Presenting Special Announcements and Sending Personal Letters—All Literature Posted Should be Attractive and Instructive—Much New Business Can be Traced Directly**

Have you a mailing list, in order to send out booklets, leaflets and folders, or do you scatter printed literature about indiscriminately like the ordinary dodger, or handbill proclaiming an announcement of a bargain sale.

The value and importance of a reliable, up-to-date mailing list is not sufficiently appreciated by the average shoe merchant.

Too many men in the footwear line when sending out printed matter throw it about by means of a distributing agent or a boy and very little of it falls upon fertile ground. Much drops by the wayside or goes unread into the furnace or carbage can. Most persons do not care to have their verandahs or front steps littered with papers which are unsightly, crumpled up or blown about. If the literature is enclosed in envelopes how many names are mis-spelled or wrong initials, street numbers, etc., given.

Probably a large porportion of the addresses have either moved away or been called home by the hand of death. The list of such cognomens might be called "deadwood," so far as serving any practical or useful purpose is concerned.

## How to Go About It

"How do I get names?" writes a Sherbrooke shoe dealer. "Oh, well, in various ways. I use the city and county directories or secure names from the assessment roll."

This is a method too commonly pursued. It represents too much waste energy; there are too numerous "loopholes." The selection is too general. It must be more specific—more definite—to be of direct benefit.

Have some system. Revise your list at least twice a year, killing all "dead" names or moribund prospects. Think of the time and effort mis-directed, not to speak of the cost of postage or printing, in sending your literature to everybody's customer. Have your own list and do not peddle it around. You hope to secure trade from your publicity methods, but you can reap no reward unless there is some cultivation done. The weeding process has to be undertaken, and the pruning knife applied.

## The Telephone Book Helps

"But how can I obtain a select and live list?" inquires a Brantford reader. The suburban shoe dealer knows the area of the district to which he can appeal. The telephone book is a source of good names. The persons who have 'phones are usually of the well-to-do class, and as the book is issued frequently, the names can be relied upon as fairly up-to-date and correct. The city directory—just after it is issued—is a very good source, but the names must be chosen with some measure of care and discrimination.

One Hamilton dealer secures a very full list of names each year by giving away a neat, attractive calendar, requesting each person who desires one to sign, giving name and address. He carries this scheme out tactfully, by remarking that he has only a limited number, and, in order to prevent duplication, and to see that his patrons secure one, and that no one will be overlooked, he wishes the signatures. The best plan for the shoe merchant is to keep a special indexed book or card system and enter thereon the names which appear at the head of each sale slip, caution being exercised by the clerks to obtain the right name and address of all purchasers. As the majority of town or city patrons have

their goods delivered, the information is easily secured. If the customer is a new one or a stranger, a polite request for the name is seldom refused.

## A Diplomatic Dealer

An Edmonton footwear merchant writes that a stranger will sometimes say, "What do you want to know for? I am paying for the shoes and taking them with me." I then explain that we often send through the post handsome illustrated style booklets, and would like to have the pleasure of forwarding a copy. This satisfies any lurking curiosity in nine-tenths of the instances, and rarely if ever is a name or address refused me. I have found this method to work admirably."

A mailing list is a means of personally and directly expressing to customers your desire to have their trade, and the returns will be in proportion to the care and thoroughness bestowed on it. Shoe dealers everywhere are losing a certain amount of business to the mail order houses, a class which may be minimized by the proper use of a mailing list, as most mail order purchases are influenced by this very style of attractive advertising literature.

## Splendid Selling Adjunct

A carefully compiled, regularly corrected and revised list is one of the best selling helps that a footwear dealer can possibly have. On the other hand the list which is never pruned and is left to adjust itself is little more than a waste of money. Retailers should not only devote attention alone to those who come into the store, but should obtain, as far as possible the correct names and addresses of those who have never been their patrons, with the idea of developing new business.

A Calgary dealer says that he instructs his clerks to secure the name of every person who makes a purchase. The salesman explains that it is the desire of the firm to have these names for references. If the customer is friendly and cheerful, perhaps the clerk asks him or her if they know of any other persons who would like to receive a nice booklet. By this means the proprietor now only gets the names of those who are spending money with him now, but also those of many other families.

## Co-operating With the Manufacturer

There is no difficulty in securing an accurate mailing list, if a little care and attention is devoted to the work. The secret is to have a bona fide list, and not one that is out of date, incorrect, or unreliable. Persons who have removed from the community or who have died are not of much value to the shoe store. There are a number of manufacturers who at times issue illustrated style announcements or the makers of a trade-mark shoe frequently set forth in neat, printed form, the merits of their particular brand, and are only too willing to co-operate with the retailer in sending out brochures to present and probable customers.

A shoeman who supervises his mailing list will naturally get out of it exactly what he puts into it. There are certain advantages and returns to be obtained through the mail route which are not evident in a newspaper advertisement. Special propositions, and essential points can be incorporated

and presented by illustration and by use of invitation styles of type in a manner and in color, form and effect that cannot be done in the ordinary newspaper announcement.

Such letters mailed in personally addressed envelopes may be made strong in their appeal and contain items of real interest regarding the fashions in footwear, the best selling models, stocks carried, prevailing prices, widths, fitting and store facilities, etc.

A mailing list will work for you if you make it and give you a good return. You can talk to people more intimately and to particular persons more instructively, and convincingly, than you can in a newspaper advertisement.

One Hamilton shoeman has his lists classified and prepares folders with a special appeal to each class. For instance, he has a list of well to do farmers living within a radius of ten miles from the city. Then he has in another compartment the names of all professional men and their addresses. In another section, he has the names and addresses of railway employees. He wrote to various manufacturers and asked for the lists of those engaged in a certain line of work, such as moulders, machinists, firemen, engineers, etc. Still another class is a list of ladies whose names appear regularly in the social columns and are devotees of fashion. Such a category may be exceptionally useful and remunerative in a large centre, but in the average well-to-do community of moderate proportions, a general list would possibly be all that is required for effective service.

#### AN ENTHUSIASTIC MILITARY YOUTH

Lieut. John G. Lennox, son of John Lennox, of John Lennox & Co., wholesale shoes, Hamilton, who enlisted in

LIEUT. J. G. LENNOX, HAMILTON

February of last year, is associated with the Army Service Corps at Niagara Falls and Camp Borden. He was granted his commission in July, 1915. Lieut. Lennox is 19 years of age, and is an enthusiastic military youth. He inherits the imperialistic spirit from his father, who has been most active in patriotic work and recruiting efforts in the Ambitious City.

#### MR. LANE BUYS LEATHER BUSINESS

W. A. Lane, for many years connected with the firm of Paul Galibert, and during the past three years manager of the Montreal branch of J. A. Scott, Que., has arranged with Mr. Scott to take over his Montreal business. Mr. Scott,

who is gazetted as a Major in Lieutenant-Colonel Price's 171st Regiment, C.E.F., is going overseas in the immediate future and feeling that he could not properly look after his Montreal upper leather customers decided to dispose of the business to Mr. Lane. Arrangements were made by Mr. Lane to continue to occupy the same warehouse as was used since the opening of the branch and Mr. Scott has turned over to him his fixtures as well. Mr. Lane purposes carrying the same line of upper leather as before, specializing on kid, and he will retain the organization with which he worked while managing the business for Mr. Scott.

#### SOME ORNATE SHOE CREATIONS

Among the attractive new samples of Getty & Scott, Limited, are all the leading colors in African and mahogany brown, grey, and other shades and contrasting combinations, in seven and a half and eight inch tops, carrying Louis heel and long slender foreparts. Three new lasts have been added. There are a number of novelties which are arousing much interest, these coming mostly in turns and mock turns. There is a patent scalloped foxed bal with green polka dot calf leather top. Another shoe has a dull kid vamp with whole quarters of black and white polka dot calf leather and wood Louis heel covered with the same. Among other striking innovations are a patent bal, scalloped vamp and collar carrying a purple satin top and vanity heel, a tuxedo pattern bal with dull kid vamp and foxing and Nile green satin top, all these being on the Smart Set last. A white buck vamp with cerise top and white buck collar and white celluloid heel is another outstanding creation. A blucher bal with wing tip of black kid and vamp inlay of white buck, white celluloid heel and eyelets and all black quarters; and a white buck bal with tan Russia calf saddle strap and triple stays, white buck quarters and white celluloid heel are among the other interesting offerings seen in a most representative and artistic line which is now being shown in Toronto by S. J. Anderson.

#### EARNINGS MAKE NEW RECORD

A director of Ames-Holden-McCready, Limited, stated recently that the earnings for the first four months of the present fiscal year have constituted a record for that normally dull period, in the history of the company. The company will more than earn the full year's dividend on the preferred stock in the first half year, and on the present scale of business, the full year's report will be satisfactory to all concerned. Whether this will mean an early resumption of preferred dividends cannot be stated, as in all probability the directors will take the opportunity of applying surplus profits to reduction of bank indebtedness. This latter action, however, will automatically stiffen the position of the preferred stock, to the extent of the profits put into the property.

#### KEEP THE QUALITY UP ALWAYS

Speaking to the SHOE AND LEATHER JOURNAL, a representative manufacturer stated that he did not believe it good policy on the part of any shoe retail firm or manufacturer of shoes to cheapen the product in order to make it down to a certain price. While the cost of all leathers was advancing rapidly, there might be a temptation by some makers to put inferior materials into the shoe. This was false economy, and in the end, resulted detrimentally to maker, seller and wearer. "I believe," he continued, "that the solid leather shoe is the only shoe, no matter what cost the materials may reach. The saving effected by putting in certain box toes, counters and insoles is very small—only a few cents at the most. Even if leather has jumped from 50 to 75 per cent. in most cases, there is no reason that the "ingredients" of the shoe should be scamped."

## TWO GOOD MEN ON NEW GROUND

R. J. McAllister, who has been with George A. Slater, Limited, Montreal, for the past six years, is now looking after southern Saskatchewan and Manitoba, succeeding S. A. Bell, who joined the staff of the Blachford Shoe Mfg. Co., Toronto. Mr. McAllister first covered Quebec for the company, and latterly western Ontario, where he had a strong connection with the trade, and won many friends.

R. J. MCALLISTER, MONTREAL

His successor on that ground is A. E. Elmer, who has had considerable experience in the shoe business, having learned the retail, jobbing and manufacturing ends with both Canadian and American houses. Mr. Elmer was for

A. E. ELMER, MONTREAL

some time with Eastwood's, the leading shoe retailers in Buffalo and Rochester, and also traveled through Western Canada for Winch Bros., of Boston. He spent some time in the Abernethy Shoe Store in Kingston and represented the Midland Shoe Co. of that city. An earnest worker, his sin-

cerity, cheerfulness and application should go a long way in serving the interests of Invictus customers throughout Western Ontario.

## SHOE RETAILER FINED FIFTY DOLLARS

J. B. Douglas, shoe merchant, pleaded guilty through his counsel, A. E. Dunbar, in police court, Calgary, to the charge of publishing an advertisement containing false statements and was fined \$50 and costs. Other charges against him were dropped by A. M. Sinclair, acting for the prosecution.

The advertisement in question was printed in the Daily Herald, of Calgary, it was stated. In his plea for a small fine Mr. Dunbar said that the advertisement had contained statements not authorized by Mr. Douglas. After it had appeared he had refused to pay. They had not submitted to him a proof of the ad. before it appeared. Since, however, a compromise had been effected whereby Mr. Douglas had paid half.

The breach of the act was merely technical, Mr. Dunbar said. Therefore he had instructed his client to enter a plea of guilty.

Mr. Sinclair said the prosecution would in view of the plea drop further charges.

Mr. Dunbar continued to the effect that it had been customary for years in Calgary to pull off fire sales, bankrupt sales and selling out sales in all lines of business. His client had merely been carrying on in accordance with the custom of the trade. He had been unaware of any offence, taking it that the point was to deliver to the public the goods advertised at the price advertised. He did not know that the collateral statements in the advertisement had to be absolutely true. Of course, he admitted that ignorance of the law was no excuse but it was a mitigated circumstance.

The act had been passed for the protection of the public. It was to prevent the public from being fooled. The false statements complained of did not refer to the goods, though the false statements were of a character likely to promote sales. The goods were sold at a low price and the sale was to the advantage of the public. No person suffered through the advertisement unless it was Mr. Douglas' opposition in the shoe business. The public at large obtained the benefit of the low prices.

Mr. Dunbar did not think that though the words covered such a case the act was intended to cover a case of that kind. The intention of the act was to cover cases where goods were falsely represented.

There were some grounds for the false statements as it was true that a company was being formed to take over Mr. Douglas' business. Mr. Douglas would, however, hold the controlling interest.

He continued that the statements were customary, though he was not urging that the statements were justified.

"You mean that the public are so used to seeing them that they don't believe them anyway?" asked the magistrate.

"Exactly," replied Mr. Dunbar. "The public doesn't believe them."

Mr. Sinclair said a penalty should be imposed that would be a warning to others. As to the advertisement not having been authorized, the only objection he had heard was that it had been published a day too soon.

The magistrate remarked that it had often been a matter of wonder to him that so many advertisements had been allowed to go unchallenged. He presumed that it was because people in the same line of business were not disposed to take action, fearing that they would be charged with jealousy. He was glad the Ad Club had seen fit to take it up and he hoped that in the future the club would continue to exercise supervision over advertisements.

## A C H A N G E

W. A. LANE announces that in view of the departure of Major Scott, of Quebec, for the Front, with Lieut.-Col. Price's Overseas Regiment, he has arranged to take over the Montreal Branch of

**J. A. SCOTT**  
QUEBEC P.Q.

of which he has been manager since its establishment. He will continue to occupy the warehouse and offices at 218 Notre Dame Street West, and will carry a full line of Upper Leathers, specializing on kid. He requests a continuance of the patronage of the shoe manufacturers with whom he has been dealing.

# With the Shoe Manufacturers

Pithy Note and Comment on Shoe Matters—What the Makers of Shoes are Saying and Doing—Shoe Facts and Fancies

## SHOE BYLAW GETS BIG MAJORITY

The bylaw voted upon by the ratepayers of Acton, Ont., to grant a free site and a loan of \$25,000 repayable in twenty years, to the Reliance Shoe Co., Limited, of Toronto, was carried by a vote of 153 for to 19 against. The Reliance Shoe Co., of which P. E. Rivett is manager, will erect a solid brick factory, 40 by 132 feet, two storeys high, in that town. The capacity will be about 500 pairs a day in men's, boys', youths' and little gent's McKays and nailed. The company agree to have the new factory in operation by May next, and to employ not less than sixty hands for the next twenty years. The Reliance Shoe Co. have been making splendid progress of late, and a larger home will enable them to keep up with the increasing demand for their product.

## SHOE FACTORY REMOVES TO SIMCOE

The plant of the Unique Shoe Co., Limited, 12 West Market street, Toronto, has been removed to Simcoe, Ont., and the company, of which J. W. Phillips is manager, expect to begin operations in that town by November 1st. The new factory has an entire frontage of 195 feet, and the heating, lighting and ventilating arrangements are the best possible. The factory is divided into sections, one containing the offices of the company—another, 50 by 60 feet, will be devoted to the making of ladies' boudoir slippers and children's white canvas shoes and colored goods. Another section, 40 by 130, will be given over to the production of black, cushion sole, stitch down welts and children's McKays. It is possible that men's house slippers may be added some time in the future. The new buildings located on Pond street, Simcoe, are electrically lighted and steam heated, and will possess a capacity of 1,000 pairs daily.

## WOMEN'S SHOES FOR ENGLAND

Because the English Government has requisitioned all British sole and upper leather for boots for the soldiers, W. W. Dixon, a representative of one of the largest of English shoe distributing syndicates, has been in Haverhill in conference with the Gale Shoe Company, regarding possible future orders for women's footwear to supply over 200 retail stores in England and Scotland. Samples were made up according to the specifications and it is expected that an order for \$500,000 worth of footwear will be placed soon. In all Mr. Dixon said that he was authorized to place a \$1,000,000 order for footwtar.

The Gale Shoe Company has been making shoes for abroad for some time and the tentative order is not considered in any sense as a war order, although military necessity has made the orders larger than customary. Several other concerns, in fact, have been making regular shipments abroad, taking their chances of getting their goods delivered to the consignee.

The English distributors are not partial to dull leathers. They want the patent leather or coltskin vamps with cloth tops and thousands of pairs of such shoes have been shipped by one large company to the Aimes concern which supplies 400 retail stores in the British Isles.

Mr. Dixon is buying other classes of shoes, too, such as misses' and children's and he has been seeking to place a

large order for McKay shoes. For oxfords the English concerns want only patent leather and some dongolas.

Haverhill manufacturers, particularly those making women's shoes, are heavily handicapped by the scarcity of leathers for uppers. There has never been a time in the history of the shoe industry in this city when the inability to secure leathers has been so great. The shortage is particularly in the leather novelties and colored leathers.—Boston Transcript.

## CORPORAL WESTON KILLED IN ACTION

The many friends of Corporal Edmund Weston, son of Fred. W. Weston, president of the Weston Shoe Co., Campbellford, Ont., who enlisted with the 21st Battalion, C.E.F.,

EDMUND WESTON, CAMPBELLFORD, ONT.

in October, 1914, will learn with deep regret that he has been killed in action. His brother, Private Clifford Weston, who was with the same unit, and was reported wounded some time ago, is making good progress. The late Corporal Edmund Weston was 24 years of age and had charge of the leather department in the factory previous to joining the colors. His brother, Clifford, is 19 years old, and was on the staff of the Bank of British North America, Campbellford, when he signed up. Both young men were very popular in their native town, and the news of the death of the elder brother has come as a great shock to his relatives and friends.

## DAY WORK AND PIECE WORK

When a foreman changes the system in his stitching room from day work to piece work, he must change many of the plans of running his room and continually be on the watch for quality and not quantity, for the help, of course, when working piece work are on the lookout for themselves,

# GAMBIER

MONTREAL.

and in very few instances do they worry about the interests of the firm, says an exchange.

Some consider day work better, but many are of the opinion that under the day work system employees will try to make their work, in time of shortage, last out the whole day so as to draw a full day's pay.

Under piece work method of paying, they will strive to do up all the work as soon as possible, so they can go home after earning all there is to be earned. In such a case, watchfulness is necessary to insure against slighting the work, as carelessness is apt to result frequently.

Where piece work prevails in the stitching room, it will always be necessary to keep table girls and repair girls on by the day.

In some factories doing table work, where many operators handle each case, it is hard to find just the one who is to be held responsible for mistakes. Table girls, however, in most stitching rooms not only keep the work straight, but watch out for quality as well.

They are also supposed to keep careful watch of each tag, as a check against operators doing their work wrong, and as a check against work wrongly stitched being put together.

In addition to the table girls, most stitching rooms have some stitcher on by the day to do cripples, special cases and samples.

Piece work is almost universally adopted in the stitching, making and finishing rooms of the shoe factories.

weekly and several new lines in McKays will be turned out, in addition to the present range of turns. The building is 45 x 60, three storeys high, with an extension 18 x 24. The structure is built of brick and is well laid out and admirably

A. LAPOINTE, MONTREAL

#### MONTREAL FIRM IS EXPANDING

The F. and B. Shoe Co., Limited, 510 La Salle street, Maisonneuve, will move next month to Montreal East, where their new factory on Champetre street is now in course of erection. The capacity will be about six thousand pairs

arranged. The firm will be in a position to guarantee the delivery of all orders in time. The energetic manager of the company is A. Lapointe.

# SHOE PRICES NEXT SPRING WILL BE STAGGERING

Prominent Leather Manufacturer Says that the Figure for Footwear will Exceed that Thought of by Anybody in the Business in the Last Quarter Century—Tanner Today Needs Wisdom of Job, Patience of Solomon and Other Sainly Qualities

**H**ON. E. J. DAVIS, who has just returned from a visit to Chicago, New York and Boston, where he spent some time for the purpose of carefully analyzing prevailing conditions in hides and leather, says:

"We are in comparatively easy circumstances in Canada compared with the United States, where the market just now is in a state of feverish excitement. With regard to raw calfskins, in which we are particularly interested, there are almost none to be had, and such prices are asked for those available as make the cost of production nearly double what it was a short time ago. As to finished calfskin prices on the other side, there are practically none, as every concern sets its own price. For fancy lines figures are, of course, up in the air, and even for ordinary good lines the tanner can get practically what he asks. There are now almost no foreign raw skins coming into the country, and not likely to be for a considerable time.

"Side leather is rapidly following calf and prices are advancing correspondingly. The high cost of hides and the difficulty in securing selections are largely bringing this about. We have realized this in making purchases to cover our production in this line for the next six months, which I may say we have done very satisfactorily, although at some advance.

"What do I think of the leather and shoe situation? I am convinced that prices will be paid for footwear this coming spring which will exceed that thought of by anybody in the business in the last quarter of a century. The satisfactory part of the case is that the people have the money and are willing to pay for their footwear. So that neither the manufacturer nor retailer has much need to fear anything except delay in making arrangements for his fall requirements."

## WHAT AVERAGE TANNER MUST BE

In a quaint communication sent out recently in response no doubt to the restiveness and insistence of leather buyers, Mr. Sydney M. Collis, of the Collis Leather Co., Limited, Aurora, says:

"Primarily a tanner is a man who makes leather, but today the mere manufacture of stock is only a detail of the business. In this enlightened and progressive age the tanner is compelled to be a merchant, a buyer, a financier, a manufacturer and as able a prophet as any patriarch mentioned in holy writ. To be successful he must be an astrologer, a hypnotizer, and a worker of miracles. If more attainments than these were required we would say so.

"One of the most cheerful and interesting duties of the tanner is to go to the banks and borrow money wherewith to buy dear hides to make into cheap leather. After getting the worst of it from the big packers in a hide purchase he tackles the large cutters of leather. What they say to him is frequently unfit for publication in a respectable journal that goes to the home and the fireside. Asking a leather buyer for more money in these 'Safety First' times should be done over the telephone. If you happen to possess a suit of armour it is best to put the vizor down before quoting higher prices during a personal interview.

"Tanning is proverbially a slow process but a slow tanner, as things go now, would lose his eye teeth the first time he encountered a shoe manufacturer. Buyers of leather

never know what they want until the last moment. If the tanner has not consulted the stars and made big supplies of just the right stock long before buyers had any sort of an idea of what they would need, he (the tanner) is not on to his job.

"The average tanner needs the patience of Job, the wisdom of Solomon and the ability to stand punishment displayed by Shadrach, Meshach and Abednego."

## HOSPITALITIES OF A CANADIAN TANNER

The packer hide salesman had a good time last Thursday evening, says "Hide and Leather," of Chicago. The millionaire tanner king of Canada made his monthly visit to Chicago and gathered "the clan" around his festive board at the "Bismarck," in honor of the most popular hide salesman of the "Big Five" packers. Mr. George Lang, whose firm occupies the same position in Canada as does the Central Leather Co. in the United States, holds John S. Harman in the highest esteem. In fact, by birth both of them are Canadians, but Mr. Harman left the Dominion when a boy, and has surely blossomed forth in his adopted country to a flattering height of success, as one of the few confidential men in the employment of the energetic "forging ahead" packers Morris & Co.

George Lang admires John S. Harman as a man of sterling worth, unswerving honesty, respected by all, and indeed actually loved by men of both the hide and leather trade to an extent rather unique, for though astute in trading, he is a genial soul. So, seizing the opportunity, of Mr. and Mrs. Harman's wedding anniversary, Mr. Lang and his brilliant, whole-souled wife, gave their friends, the Harmans, "the time of their lives," and there was munificence without ostentation. The board, spread before the guests, was gay with flowers and the excellent dinner was thoroughly enjoyed by all. The happy crowd included Mr. and Mrs. George Lang, Mr. and Mrs. J. S. Harman, with their only child, Miss D. Harman, Mr. and Mrs. Harry Hunton, Mr. and Mrs. E. A. Allen, Mrs. Dr. Swift, Miss Madden, Mr. and Mrs. George Rasch, Mr. and Mrs. A. O. Russ, Mr. and Mrs. G. Kries, Mr. W. C. Smith, Mrs. Bryce of Columbus, Henry Elkan, E. J. Madden and Richard McCartney.

# AMONG THE SHOE MEN.

A. J. Chessum, who was for several years on the staff of the Regal Shoe Store, Toronto, is now in business for himself, having taken over the store of Ernest P. Wood, 184 Main street, East Toronto.

E. C. Scarrow, shoe dealer, Owen Sound, was in Toronto last week on business.

Zusman & Co., dealers in shoes and groceries, Welland, Ont., have dissolved partnership. Harry Zusman continues.

W. P. Lagace, of Lagace & Lepinay, shoe manufacturers, Montreal, spent a few days recently in Toronto.

B. W. S. Martin, representing The John Ritchie Co., Quebec, was in Toronto, Hamilton and London last week on business.

The one-half of the upper story of Waterbury & Rising's King street building in St. John, N.B., is devoted to the shoe repairing department. There in a well-lighted room with modern machinery are constantly at work five thoroughly practical shoemakers.

George Grills has joined the staff of S. C. Cronk & Co., wholesale shoes, Toronto.

J. E. Pare, sales manager for Dufresne & Locke, shoe manufacturers, Montreal, was in Toronto, London and Hamilton last week calling upon the trade.

D. D. Hawthorne, wholesale shoes, Toronto, who underwent an operation in the Toronto General Hospital a few days ago, is slowly recovering, although it will be some weeks before Mr. Hawthorne will be able to attend to business.

W. H. Parr, of Beaverton, dealer in shoes and groceries, has sold out to W. H. Brunning.

E. Larose, of the Canadian Footwear Co., Montreal, was in Toronto recently calling upon the members of the trade.

J. P. Buchanan, representing the Smardon Shoe Co., spent a few days in Toronto recently showing a splendid range of spring samples.

J. Heffering, who represents the Tetrault Shoe Manufacturing Co., the Regina Shoe Co., and the MacFarlane Shoe Co., has returned from spending several days in Montreal, and is now on the road throughout Western Ontario, showing a splendid range of models for the various firms.

S. C. Cronk and wife, Toronto, were in Ottawa last week to say good-bye to their son, S. Collins Cronk, of the 57th Field Battery, C.E.F. Gunner Cronk, until recently associated with his father in the wholesale shoe line, is leaving for the front.

The Great West Saddlery Co., Limited, of Winnipeg, Calgary and Edmonton, have been appointed selling agents in Western Canada for Aero-Peds, the now widely known cushion ventilating pads, which fit inside of the shoe at the heel and automatically ventilate and cause two cubic inches of fresh air to circulate at each step. Aero-Peds are being manufactured in Toronto.

The many friends of Mr. Young, of the firm of Logan & Young, Beaverton, Ont., will sympathize with him in the death of his wife which occurred recently.

Knechtel & Co., who have conducted a shoe store at the corner of Dundas & Brock streets, Woodstock, Ont., have moved into larger premises at 469 Dundas street. The store has been re-modelled and is in splendid shape.

Walter Smardon, of the Smardon Shoe Co., has returned to Montreal from New York.

Fred B. Perry, who for the past two years has been with the Regal Shoe Co., Toronto, left last week for Winnipeg, where he joins the traveling staff of the Goodyear Tire and Rubber Co. He will devote special attention to the shoe trade.

W. A. Lane, Montreal, is receiving the condolences of his friends on the death of his mother, which is doubly sad in that her husband, Mr. Lane's father, predeceased her within three months.

Pte. W. S. Larke, who was on the staff of H. & C. Blachford, Limited, Toronto, previous to joining the 83rd Battalion was wounded in the fighting at Somme, by shrapnel in the head and hip, and is now in a military hospital in England.

Getty & Scott, Limited, Galt, have installed an Ideal clicking machine, making five in all, and also a Model "B" McKay stitcher.

**G**OLD cloth colonial pump—By James Robinson, Montreal.

It is understood that there may be some delay in the deliveries of light rubber footwear this season on the part of the companies, owing to the difficulty in procuring sufficient experienced makers and through detention in deliveries of many kinds of materials. Every effort is being made, however, to get out all placing orders as soon as possible.

James C. Fetherston, of the staff of Waterbury & Rising, St. John, N.B., was the lucky winner of a magnificent piano placed on lottery at a recent patriotic fair.

J. A. Cote, of J. A. & M. Cote, St. Hyacinthe, Que., accompanied by his wife, was in Quebec recently on his way home from an automobile trip in which several cities in the United States were visited. Mr. Cote covered a great many miles in his six-cylinder McLaughlin car, and reports having a very pleasant outing.

The entire staff of travelers for Getty & Scott, Limited, Galt, Ont., who have left on their spring selling trip, are most enthusiastic over the new lines they have to offer. The models this year show many new features in the way of heels combinations of colors, pleasing patterns and long, pointed foreparts.

E. L. Rising, president of the firm of Waterbury & Rising, St. John, N.B., was in Boston and New York recently. He had the pleasure of taking in the world's series baseball games.

The Lady Belle Shoe Co., of Kitchener, Ont., report business as being exceptionally satisfactory. They have recently installed several new machines, a Louis heel breast trimmer and a top piece scalloper, as well as several new stitching machines. The new company are in splendid shape and working along with excellent results.

## PROFIT-MAKERS *for* 1916-1917 SELLING

No range of popular-priced footwear gets more attention from keen buyers than that bearing our trade-mark.

The reason lies in the fact that season after season merchants can count upon receiving the very latest styles in all popular materials. Therefore they await our new samples with eagerness.

Our Spring lines will be before you soon—and they will not disappoint.

*WATCH FOR THEM!*

F. W. Knowlton, of the United Shoe Machinery Co., of Montreal, was in St. John recently.

Monroe Einstein of J. Einstein, Inc., New York, was in Montreal last week.

W. E. Woelfle, of the Woelfle Shoe Co., Kitchener, Ont., was in Toronto last week on business.

Frank Forbert, shoe dealer of Lindsay, Ont., has assigned to Charles Bonnick, Toronto.

A charter has been granted to the F. E. Partridge Rubber Co., Limited, Montreal, with a capital stock of \$125,000. Among the incorporators are Geo. P. Cousins, N. R. Currie, F. E. Partridge and V. Cooke. The company is empowered to carry on the business of manufacturers of and dealers in rubber, rubber products and all articles of whatsoever nature made of rubber or in the manufacture of which rubber is or can be used.

**G**REY kid button boot,  
grey suede upper,  
Louis heel—By Jas.  
Robinson, Montreal.

John Dunbar, sales manager of Scott-Chamberlain, Limited, London, Ont., spent a few days in Toronto recently on business.

Harry D. McKellar, of Kitchener, Ont., was in Montreal recently showing a fine line of samples of felt footwear.

Norman C. Hertfelder, of the staff of the Lady Belle Shoe Co., Kitchener, Ont., formerly with the Kaufman Rubber Co., was married on September 28th, to Miss Ella Fleming, of Waterloo, Ont., the Rev. Mr. Schade performing the ceremony. They have taken up their residence in Kitchener.

The W. E. Woelfle Shoe Co., Kitchener, Ont., have plans prepared for the doubling of their factory. An extension, 100 feet by 50 feet wide will be built on the south side, making the premises 200 feet long by 50 wide. Construction will begin at an early date and will be completed within a few months. This extra space will give the company a capacity of 1,000 pairs a day. Business has been coming so steadily and in such large orders that more factory room is absolutely necessary. Mr. Woelfle reports that the outlook for the coming season as being exceptionally good and the plant is working overtime to get out the goods.

James H. Clement, of Woodstock, Ont., died recently from the effects of a fall from a bridge connecting two sections of the Hamilton Oak Tanning Co.'s plant in Woodstock. He was born in East Zorra seventy-six years ago, but had lived in Woodstock practically all his life. He is survived by two sons and three daughters.

C. F. Walker, shoe dealer, is now located at McPherson's clothing store in Portage la Prairie, and has a complete line of footwear.

Leather, sheep hides, etc., such as are exported in large quantities by New Zealand, are much wanted in Germany. To prevent these products from reaching enemy hands new

regulations have been adopted and are being rigidly enforced. Exports of these articles destined for Canada must be consigned to the Department of Trade and Commerce and importers are required to give an undertaking that none of the goods so received are to be re-exported except to Great Britain.

The tower and tank in connection with the new sprinkler system at the Palmer-McLellan Shoe Company's factory, St. John, N.B., has been completed. The roof is on the tower and the painters are at work. At the factory of the John Palmer Co. a tower and tank are built for a sprinkler system. On account of proximity to the Hartt Boot & Shoe Co.'s factory it has been possible to connect the sprinkler systems of that building and the John Palmer Co.'s factory, so that either factory will have the advantage of the two tanks.

The average business man finds it impossible to do business without keeping a want book. He realizes the value of this factor in merchandising, and cannot imagine how a busy business public appreciates frankness in regard to merchants who up to the present time have not deemed it necessary to install anything of this kind, but depend upon memory, and possibly a memorandum jotted down from time to time. A traveling man probably realizes more than anybody else under what disadvantages a man operates who uses the latter method.

It is probable that owing to the constantly increasing cost and growing scarcity of leather the manufacturers of rubber footwear will shortly advance the present price of all leather top lines and those with leather soles.

J. I. Chouinard, of the Regina Shoe Co., Montreal, was in Toronto this week on business.

The corporate name of the Berlin Rubber Mfg. Co., Limited, has been changed to the Kitchener Rubber Mfg. Co., Limited.

One of the queerest reasons for a strike was given recently by packers at Duchaine and Perkins, shoe manufacturers, Quebec. The strikers left work as a protest against orders enforced preventing the men from smoking in the plant. The proprietors told the men that if they persisted in smoking they would have to share the payment of extra insurance premiums, so they walked out. Order was restored, however, and the men returned to work shortly after quitting.

W. H. Miner, of the Miner Rubber Co., Granby, Que., paid a visit to the Toronto branch recently.

The Bowmanville, Ont., Review, says: "We notice that Mr. Fred Foley, shoe retailer, is still delighting audiences with his 'speaking pieces.' Last week he was at Blackstock and Rosemeath, where he pleased two large audiences. This week he is billed for Campbellford where we know he will delight his listeners. Go to it, Fred, 'old chap, nothing like combining business with pleasure.'"

Dominion Tanneries, Limited, has been incorporated under provincial charter. The head office will be at Woodstock, N.B., and the capital stock will be \$200,000. The new company is subsidiary to Armours', Limited, the big American packing company which recently acquired the Dickinson tannery at Woodstock. It is understood that the new company will operate on a large scale. Work will commence at once and additions will be made to the plant in order to handle the increased business. The members of the new company are Mr. Thomas Keogh, of Chicago, Miss A. Florence Coughland and Miss Gladys L. Dodge, of St. John.

The retail shoe business in St. John, N.B., during the past few months has been phenomenal. The merchants are perfectly satisfied with the manner in which the purchasing public have accepted the advanced prices. In conversation with a prominent shoe man a few days ago he said that people are much easier pleased and do less kicking about

prices than formerly, and he explained this by saying that never in the history of St. John were men earning more money.

A recent despatch from Pittsburg, Pa., says that wholesale prices on men's and women's footwear have been advanced fifty to seventy-five cents a pair within the last seventy-two hours. Certain lines have been withdrawn entirely from the market owing to a big shortage in leather.

### NEW FACTORY FOR REGAL SHOE CO.

The Regal Shoe Co., Limited, Atlantic avenue, Toronto, have acquired new factory premises, having leased for a term of years the spacious five storey brick building and basement on the west side of Bathurst street, next to College street. The structure is 65 x 130 feet in dimensions and admirably adapted for the purpose for which it will be used, being well lighted and centrally located. The Regal Shoe Co. will occupy their commodious new home as soon as possible and will possess facilities for turning out twelve hundred pairs daily.

E. J. Bliss, President of the Company, and E. D. Gould, Director of Sales, Boston, Mass., spent a few days in Toronto this week in conference with C. S. Corson, general sales manager for Canada, and E. L. Keene, assis-

tant treasurer, when negotiations, which had been going on for some time, were successfully concluded. The progress of the sale of Regal shoes in Canada has been remarkable when it is considered that about nine years ago Mr. Corson was the sole representative of the firm and there was not a Regal agent in the Dominion. Today Regal agents are to be found in practically every city and town of the nine provinces, and the selling organization is efficient.

Six years ago, owing to the rapid development of trade on this side of the line, largely through the aggressiveness of Mr. Corson, the company found it advisable to establish a factory in the Dominion and purchased the plant of the Sovereign Shoe Co. on Atlantic avenue, which was overhauled and extended. Last fall it was found necessary to lease additional quarters in another building adjacent, the cutting and fitting rooms being removed there. This considerably augmented the capacity of the plant, but business has come of late months in such increasing volume that further expansion has been rendered absolutely necessary, and the splendid manufacturing premises at the corner of Bathurst and College streets have been acquired, with more than double the floor space and every facility for meeting the unprecedented call for Regal shoes.

Regal Shoe Co. was the first industry in its line to have a Canadian branch and the wisdom of the venture has been amply attested by the success which has attended it.

### IS RETURNING TO THE FRONT

Major George H. Wilkinson, shoe retailer, of Windsor, Ont., who was wounded in the last Ypres battle and has been spending some months at his home, expects to depart

GEO. H. WILKINSON, WINDSOR, ONT.

for France again in a few days. Major Wilkinson left Canada with the First Contingent and has been wounded twice.

### SHOES AND STOCKINGS SOLD TOGETHER

It is noticed that some of the leading retailers, especially in the cities and good-sized towns, are now carrying a full line of hosiery or stockings along with their line of shoes. Generally speaking, these retailers are catering to the men's trade and quite a few of them are building up quite a business along this line, says "Shoe Topics."

When stockings were first introduced into the shoe retail stores, many people did not think the venture a good one, but, looked at closely, it is seen that there is a chance to develop more or less business in this direction. Men have to buy stockings just the same as they do shoes, and they always buy more stockings than shoes or, at least, this appears to be the general rule, and when this fact is considered it seems only reasonable to suppose that men would just as willingly buy stockings in a shoe store as in any other store that they may visit.

The great department stores of the large cities and towns are getting most of the trade on stockings and that class of goods but these department stores may be said to be women's stores rather than men's stores. Men do not visit them in any great numbers, hence they have no chance to do any buying there. Accordingly they will buy more stockings from the shoe retailer and the outlook ought to be good for this end of the business.

Yet it may be said that it all depends upon the retailer as well as upon his clerks, as to how many stockings can be sold along with shoes. Every clerk who understands the business and is working for his own as well as his employer's interests, will always suggest any new thing that he may have in stock to his regular customers. In this way many men will buy stockings and other incidentals needed, whereas they might go out without buying any of these things if the clerk or retailer himself did not call attention to them.

There are many things that people can get along without but so far as shoes and stockings are concerned, no man or woman can get along without them very well. Hence it is that the retailer handling all kinds of footwear might just as well handle stockings as these do not take up much room and they may mean a certain source of profit which could not be obtained without them.

### HOW TO GET READY MONEY

Perhaps the best way to get money is to inherit it. This usually requires no brains, skill, trouble or special attitude on the part of the recipient. Neither does it involve any obligations of an embarrassing nature. In this respect it has a distinct advantage over getting money by marriage.

Getting money by marriage is, of course, tremendously popular, and most authorities unhesitatingly recommend it as the best method next to inheriting, but the fact remains that it involves many pitfalls. The wife or husband who brings the money to you may turn out to be considerably of a nuisance, and therefore decidedly annoying to have hanging around. This confronts one with the very difficult task of getting rid of the said husband or wife without at the same time getting rid of the said all-important money. The invention of alimony has served to obviate this difficulty somewhat so far as the female sex is concerned, but there is

H. A. WEEKS, WINNIPEG, WHO IS NOW A MEMBER OF THE 232ND BATTALION, C.E.F. HE WAS A FORMER WELL-KNOWN SHOE SALESMAN IN THE PRAIRIE CAPITAL

still no satisfactory outlet short of murder for poor men with rich and unattractive wives, and murder unquestionably has its perils.

Another excellent way to get money is to have a piece of property, which has been a great burden to you, and which you have been unable to get rid of at any price, suddenly turn out to be immensely valuable because of a big public improvement in the vicinity or the movement of business in that direction. This method, however, requires a certain amount of initial capital and perhaps a modicum of judgment.

## SHOE NEWS IN SHORT SHAPE

Jas. Robinson, of Montreal, is leaving this week for Florida, where he will spend some time.

W. A. Hamilton, of the W. B. Hamilton Shoe Co., Toronto, was in Montreal and Quebec recently on business.

Nap. Tetrault, of the Tetrault Shoe Mfg. Co., Limited, Montreal, was in Hamilton and Toronto this week on business.

James Valentine, of Valentine & Martin, shoe manufacturers, Waterloo, Ont., was in Oshawa and Toronto last week on business.

A convention of branch managers and salesmen of the Ontario Division of the Canadian Consolidated Rubber Co. was held recently in Toronto, J. A. Connor, Division Manager, presided. The selling season for tennis shoes and other matters were discussed. In the evening the members were entertained to a banquet and attended the theatre.

Manufacturers of overgaiters are practically sold up until December next, and are not able to accept any more business. The demand has been very heavy, the eight button height being the prevailing style this year. Dark browns, greys, fawns, chamois and Shepherd plaids are the most popular colors. The prices run from \$15 to \$18 per dozen. If the manufacturers could secure the cloth and sufficient labor they could, in many instances, double their product.

The Kimmel Felt Factory at Kitchener, Ont., is being enlarged says "The Dominion." When the extension is completed, all the manufacturing of the Canadian Consolidated Felt Co., Limited, will be done in the Kimmel Factory, and the old Berlin Felt Factory will be used entirely for warehouse purposes.

Daoust, Lalonde & Co., Montreal, are exceptionally busy with orders and have started night shifts in both their

shoe factory and tannery, to keep up with the rush of business.

The many friends of J. S. Ashworth, Toronto, Canadian Manager for Sir H. W. Trickett, Limited, Waterfoot, England, are congratulating him on the advent of another daughter to his home.

A. McKillop, of A. McKillop & Co., wholesale shoes, Calgary, Alta., was in Montreal, Quebec and Toronto on a buying expedition recently. He reports business as exceptionally good and the outlook as most promising.

W. T. Batstone, who for several years has been manager for Geo. Finlay, shoe retailer, 23 McNab street, Hamilton, is launching out on his own behalf and has leased the premises at 19 McNab street, where he has put in a most representative stock.

The next monthly meeting of the Toronto Shoe Retailers' Association will be held on Thursday, October 26th, at ten o'clock a.m. in the Temple Building, when W. Alfred Moore, of Beardmore & Co., will give an address on the present leather situation and its outlook.

W. T. Fegan, proprietor of the "Big 88," Queen street west, Toronto, accompanied by F. C. Henry, manager of the women's department, and H. O. Doran, manager of the men's, spent a few days recently on a visit to Detroit, Buffalo and Cleveland. They visited the leading shoe establishments in those cities in search of style pointers and general information, and were most cordially received.

Ernest E. Hutchinson, secretary-treasurer of Jos. Eveleigh & Co., Limited, Montreal, spent a few days in Toronto recently with his brother, L. B. Hutchinson, manager of the Toronto branch of the Kaufman Rubber Co.

The many friends of Ed. R. Lewis, leather merchant, Toronto, will sympathize with him in the loss of his third son, Earl Edward, who passed away in the Isolation Hospital from diphtheria on October 13th, aged ten years.

Quartermaster Capt. Jas. T. Sutherland, of Kingston, Ont., who until joining the colors was one of the best known shoe travelers in Ontario, is now in England with the 146th Battalion, which went overseas recently after spending the summer at Barriefield camp.

**HOW THE RETAILER CAN MAKE MORE MONEY***(Continued from page 36)*

That is just one of our cost reducing plans. There are many others. And they all count in keeping down shoe costs.

The newspapers and the trade journals have been full of price talk. Probably no ordinary commercial event has been given more publicity than advances in the price of leather and shoes. Historians have shown us the alleged cause of every market fluctuation for several past centuries, and prophets are pointing upward and downward to future prices with such wild variation that no thoughtful man can help suspecting that their prophecies are influenced largely by personal interest.

I am asked daily for information as to the future prices for shoes; and here again my idea of service is to share with our customers all the reliable information we possess. Neither our best interests nor those of our patrons are served by inducing them to buy what they do not need, or to speculate.

We believe in merchandizing, and we advocate it. We buy only what we think we can sell, and buy it freely. We are not influenced so much by market prospects as by trade prospects. The most important thing is to have the right kind of merchandise and have enough when it is wanted. Prices may be a little higher or a little lower, but the people must have shoes. And you will find that people are willing to pay what they are worth. So we feel that market changes should not be given too much consideration in merchandising. The general trend of hides and leather has been upward and doubtless will continue so, for the world's supply of hides and skins is always growing shorter.

With prices of shoes advancing there's a tendency for dealers to drop a grade. For instance, a man who has been wearing a \$4 shoe finds the same grade retailing now at \$4.50. There's a temptation to drop back a grade in order to buy at the same price. It's not wise. Keep up the grade even if it means an advance. It means surer satisfaction.

Britishers the world over realize that their FIRST GREAT DUTY is to bring the present war to such a conclusion that the HUN MENACE will receive its absolute and irrevocable quietus. To this end their must be neither INDIVIDUAL nor BUSINESS SLACKING.

## Tricketts and the War

In their humble way TRICKETTS have spared neither MEANS nor MEN that this great purpose might be effectually accomplished. In the cheerful and ready sacrifice of their BUSINESS INTERESTS they have felt that they have had the sympathy and support of their fellow subjects.

### WE ARE DOING OUR BEST

to meet the demands upon our LARGELY REDUCED CAPACITY and no section of our WORLD WIDE TRADE is receiving greater consideration than CANADA, which more than ever merits the best that we and others can do for her.

### DO NOT BLAME THE JOBBER

if you are unable to secure your full quota of TRICKETTS SLIPPERS. The fault lies, not here, but in the fact that so many of our men are in the forefront of this GREATEST OF ALL HUMAN CONFLICTS.

### BE PATIENT WITH THE WHOLESALER

remembering PAST SERVICE and looking forward to the time when the BAYONET shall be beaten into the SHOE KNIFE and the MACHINE GUN into the STITCHING MACHINE.

## 22-FOOT GOODYEAR SHOE REPAIRING OUTFIT

**MODEL N**

**T**HIS Outfit represents the highest development in shoe repairing machinery, and meets every demand of modern shoe repairing. It embraces all the essential processes for making new shoes from old ones, giving the maximum of equipment and efficiency in the minimum space. The Outfit has the Goodyear Stitching Machine with all its improvements, including a new style steam generator which uses gas or gasoline for generating the steam, and operates automatically, thereby insuring a uniform heat for keeping the wax in proper condition and requiring little attention from the operator. The Edge Trimming Machine has the new feature of the two shafts, being operated by a single belt, and the cutter grinder is attached directly to the main shaft. This arrangement gives better results with less power.

The Buffing and Scouring Machine has a shaft 57 inches long and carries the following equipment:

- |  |                                  |
|--|----------------------------------|
| 2 Split Bottom Buffing Rolls           | 2 Flat X-Ray Hee Scouring Wheels |
| 2 "C" Shape X-Ray Heel Scouring Wheels | 1 Heel Breast Scouring Wheel     |
| 1 Pin Wheel Pad Complete               |                                  |

A powerful Blower System removes the dust resulting from the trimming, buffing and scouring operations, and is designed to overcome certain objectionable features of other blowers.

The Finishing Machine has a 78-inch shaft which has all the necessary equipment for black or russet work:

- |  |  |
|--|--|
| 2 Corrugated Rubber Shank Finishing Wheels | 1 Corrugated Rubber Heel Finishing Wheel |
| 1 Corrugated Rubber Bottom Finishing Roll  | 2 Shank and Bottom Brushes               |
| 2 Heel Brushes                             | 1 Stitch Cleaning Brush                  |
| 1 Levelling Roll                           | 1 Bead and Wheel                         |

At the end of the Outfit is the Oscillating Edge Setting Machine which is fitted with union irons and in its motions duplicates hand workmen with quicker and better results.

Each of the machines is operated independently by a friction drive pulley, so that it is necessary to use only those machines which the operator may require. This feature means a saving of power.

All the machines are firmly mounted on legs and driven by a countershaft with carefully adjusted bearings, so that the Outfit runs with very little vibration, and is in every way most efficient.

# FOOT TROUBLES

AND HOW TO RELIEVE THEM

Trade  
Mark  
Reg.

Cramplike pains at  
this point indicate  
Metatarsalgia

One of the most difficult conditions for the uninformed shoe fitter to master is that known as "broad foot" with its accompanying tendency to make an otherwise perfectly fitting shoe seem too narrow. This condition is medically known as

## Metatarsalgia—Morton's Toe

This ailment is due to the weakening of the transverse arch which allows the heads of the metatarsal bones to fall. The foot spreads and runs the shoe over beyond the sole. Then Nature in her efforts to protect the nerves on the plantar surface of the foot forms callouses at the ball. Aches, pains and cramps follow. Then enlargements appear at the great toe joint, and at the little toe joint. As the case progresses, cramps and pains become manifest at the bases of the third and fourth toes.

There is but one way to overcome this condition—one way to give relief and comfort instantly and permanently—and that is the proper fitting of

## DR. SCHOLL'S Anterior Metatarsal Arch Support 3 Styles for 3 Distinct Purposes

No. 1      No. 2      No. 3  
Dr. Scholl's Anterior Metatarsal  
Arch Support

This scientifically designed appliance is built with an elevation at the anterior end, just beneath the heads of the metatarsal bones. This elevation correctly adjusted, restores the anterior transverse arch to its normal state, and the cause of the ailment is thus eliminated.

Style No. 1 has, besides the anterior elevation, a flange at the inner side for supporting the longitudinal arch in cases where there is slight weakness in that part of the foot.

Style No. 2 has no flange and is recommended for cases where the longitudinal arch is normal, but elevation is required at the transverse arch.

Style No. 3 has the flange and is longer than Nos. 1 and 2, extending farther forward beneath the heads of the second, third and fourth metatarsal bones. All metal is cut away beneath the first metatarso-phalangeal joint so as not to interfere with the action of the great toe.

These supports retail as follows:—Style No. 1—\$3.00; Style No. 2—\$2.50; Style No. 3—\$3.50. Write for new catalogue just printed.

## The New "Aviator" Shoe

The "Aviator" Sole is something entirely new. It is made by our own secret process, fully covered by patents. It is soft and springy like a cushion, but with all the tough, hard-wearing qualities of high-grade rubber.

The "Aviator" Sole gives much greater foot-ease to the wearer than the ordinary rubber sole. It is a shock-absorber and also serves as a protector against hot pavements.

The "Aviator" Shoe is the last word in footwear for gymnasium or athletic uses. That is why you should include the "Aviator" Shoe in your Fleet Foot order for Spring.

## SHOE AND LEATHER CONDITIONS

**Situation 'Most Acute—Further Strong Advances in Materials  
—Leather Concerns Selling on Day to Day Basis—No Con-  
tracts Being Made—Shoe Trade Well Sold Up for Spring**

**D**URING the past two weeks the leather market has continued to harden in all lines. Hide prices have gone up several points and this has had the effect of causing tanners to become absolutely adamant with regard to contracting for future business.

The Hide Market shows heavy native packer steers quoted at thirty cents and buffs at twenty-three and a half. As a result of the uncertainty of supplies and the feverishness of the demand all leather prices have been practically withdrawn. Price lists are practically valueless and salesmen are being instructed to report offers direct to the house before quoting for large quantities and options are absolutely out of the question.

Manufacturers have to do quick thinking these days. Those who hesitate get left. A prominent shoeman who thought he had contracts for sufficient leather to cover the requirements of his spring trade, but who found his orders considerably ahead of his estimate, has been endeavoring to cover himself but finds it impossible to get what he wants at anything like the basis upon which he has sold his shoes. It is today impossible to pick up any lots of desirable stock at anything like the prices prevailing at our last writing.

Shoe manufacturers report orders for spring goods considerably ahead of last year and most of them are notifying their customers that only such as are put in hand for regular shipment can be supplied at current prices. All orders are stamped "prices subject to change without notice" and today the man who leaves his case in the hands of his manufacturer is getting the best treatment.

Some manufacturers have called in their travellers and say that they are only going to do business for the next six months by mail. The tremendous change in the situation is enabling those in the business to make such a selection of accounts that the weak fellows are having rather a hard time. Manufacturers are endeavoring to look after old customers and are looking askance at new trade.

Where will it all end? is the general question. It is hard to say. If matters keep going on as they are it is a difficult thing to conjecture what the price of shoes will be six months hence. People laughed at the idea of their being any serious shortage of leather six months ago and there are some lines today that money will not buy. To how many lines this may apply next April no man has the temerity to predict.

# WHY SOME SHOEMEN PROSPER AND OTHERS DON'T

In Every Town There is Some Fellow Who Sets the Pace and Leads the Bunch—  
The Reason is he Takes Immeasurably More Pains in Perfecting Ways and Means  
of Doing Business Things—You Generally Catch the Kind of Trade You are After

It is a common belief that intellectual cleverness, or mental power, is the prime requisite for success in the retail shoe business. It is not so. Far more important than "inborn" abilities for the business is the ownership of common horse sense and a talent for work—for hard, persistent, unremitting endeavor in the working out of original, practical and effective "ways and means."

Mental cleverness is the edge of the knife which makes it penetrate, but whether it penetrates deeply or not will depend far more on the force applied to it and the persistent "ways and means" with which it is applied, than upon sharpness of the blade itself.

WHEN Rome was besieged by the Gauls in the time of the Republic, the Romans were so hard pressed that they consented to purchase immunity with gold.

They were in the act of weighing it, a legend tells us, when Camillus appeared on the scene, threw his sword into the scales in place of the ransom, and declared that the Romans would not purchase peace, but would win it with the sword. This act of daring and prompt decision so roused the Romans that they triumphantly swept from the sacred soil the enemy of their peace.

So is it in "humdrum" retaildom to-day; oftentimes, in an emergency, the "ways and means" of a prompt, decided, positive merchant changes the face of everything.

Such a man comes upon the scene of many a dilapidated retail business like a refreshing breeze blown down from the mountain-top. He is a tonic to the towns-people, and success seems to be in the atmosphere.

## Energy Which Means Dollars

In every town, there's a fellow who "leads the bunch." He sets the pace and proves my contention that determination and energy can be coined into "ways and means" which spell dollars, and that without it failure is fore-ordained.

The reason why some shoe merchants are much more prosperous than others is because they have taken immeasurably more pains in perfecting their "ways and means" of doing things.

The animate and inanimate, in this world, are more closely connected than many of us realize; we gauge the prosperity of a man by his personal appearance, and we read between the lines when we stop before a shoe store and size it up.

The consumer of to-day figures that a shoe merchant's ability to please him can be proven by his ability, or lack of ability, to please those who have been before him; in other words, the shoe shop doing a good business puts up a good front, while the store just struggling along looks it.

The fight for the consumer's money and confidence in the towns, as well as in the cities, is being fought out on the store fronts and in the window displays.

In the wee small town, where the merchant is more dead than alive, thinks more of his "pipe" than of "ways and means," the cat forms the window centre ground and the towns-people send to the retail mail order house for their footwear needs.

People like the progressive, the "live wire," the fellow who believes in his shoes before he tries or endeavors to instill this confidence in others; display some substantial

evidence of your anxiety to do business with every person passing your store, and do not be a bit backward as regards the inoculating of original "ways and means" of convincing the other fellow's customer with the fact that you not only desire his business, but that you deserve it.

Your brains may be full of the best shoe ideas in the universe—we will not doubt that—but you must first show your ability to apply; you must first prove your progressiveness on your store front before you can consider yourself entitled to the money of the customer who has been buying at the other place.

What you may know about shoes and shoe merchandising is no more than a chest of tools, for only through actual use does your knowledge possess value.

You are being measured by stiffer standards of progressiveness than ever before; this is the day of advertising, the advertising age, and in a very few years that dealer who does not prove his worth through the medium of printer's ink and store-front advertising will be worse than a "dead one."

## Be In Love With Your Line

The streets of any city or town are not trod hard by the feet of people waiting to do business with you; competition is becoming more keen; it's the competitors that make the cobbles; in getting over them you will wear blisters on your soles, but if your real ambition is to lead, and you put into actual operation original and effective "ways and means," your business will remain unblistered.

That shoe merchant who, although he be located next door to a circus-poster "Dissolution Sale," decides to compel just as many people to come into his store without adopting similar methods, must adopt different and more original "ways and means" of accomplishing his purpose, and in spite of "Below-Manufacturers'-Cost-Price" announcements, he will sell just as many pairs as his neighbor, and at the same time reap his legitimate profit on every sale.

That merchant who had long made a practice of sending out circular letters, and who woke up one morning to the realization that a considerable portion of this advertising material remained unopened when it fell into the waste basket, found himself face to face with the necessity of adopting a more attention-compelling "ways and means;" the next time he sent circular letters to the college girls of his town, he saw to it that they were enclosed in square, plain envelopes, and that they were addressed by a college boy, in a typical college boy's hand.

Suffice it to say that these envelopes were all opened, as were those envelopes sent to a selected list of young men, and which were addressed in the handwriting of a typical young college girl.

That merchant who wants the cash bargain-hunter adopts the proper "ways and means" when he puts in a rough and tumble display of gaudily-ticketed shoes; he who thinks more of the crowds than of sales adopts the necessary "ways and means" when he fills his window with white mice, monkeys and circus side shows.

The people who crowd around such displays are after cheap amusement, and the merchant who prefers to have a "jam of dirty faces" against his window knows that all he has to do is to cater to the galleries, even though he may be devoting the best advertising space in the world to the purposes for which it never was intended.

# NEW EXCLUSIVE STORE FOR MEN IN MONTREAL

The Hartt Establishment is Handsomely Designed and Furnished—Decorative Scheme is in Dark Brown and Rich Cream Shades—Splendid Arrangement of Stock and Every Modern Facility Provided for the Comfort of Customers

ONE of the most attractive retail establishments in the west end of Montreal is at 467 St. Catherine street west, that of the Hartt Boot and Shoe Company, which opened October 23rd, under the management of E. J. Hanlon. It is an exclusive men's store, featuring particularly high class lines.

The store itself is handsomely designed and furnished. The front is of engraved teak wood with white marble base and borders, the entrance being in the centre with a deep window on either side. The floor in each window is overlaid

cupboards are lit by hidden lights and should prove effective silent salesmen. There are four of the large insets and four smaller ones.

Down the centre of the store runs a double row of arm chairs in fumed oak for the use of customers. They are divided into groups of four with a smokers' table with brass top, and holding brass ash trays, etc., to each group. On the left is a customer's writing desk with telephone, and opposite it a ladies' rest settee, for the use of ladies entering the store with their husbands and not desiring to mingle with the men

THE PLEASING AND IMPRESSIVE INTERIOR OF THE NEW HARTT SHOE STORE IN MONTREAL

with eight-inch oak blocks and each is finished in walnut, panelled. There are six lights in each window with helmet reflectors, the latter being hidden by a cream colored valance, which is matched by cream curtains in the upper rear portion of the window. The windows will lend themselves to effective display.

The store itself is 103 feet deep by 26 feet wide, the section which is devoted to the public being 73 feet in depth. On entering, the quiet richness of the store impresses one, the decorative scheme being in dark brown and rich cream shades. Woodwork is all walnut panelled where possible, shelving on either side and at the far end is of the same material, with the monotony of it broken by inset display stands (with mirrors underneath) having glass doors and plate glass removable shelves for holding shoes. These inset

being served. The office and parcelling table are at the rear. The cartons are of linen board of a rich cream color with a special label of the same style pasted on the end. The label is simplicity itself, simply the word "Hartt" in gold and black, which colors, by the way, are used throughout the establishment in connection with the firm name. Cartons are grouped a dozen to each shelf compartment. The two radiators behind the windows are covered, also that in the rear of the store, with grill work effect.

Five rugs of warm coloring judiciously thrown about complete the effect aimed at. Two pedestal lights, one at each end of the row of chairs, contribute to the warm tone effect of the whole. The stock arrangement keeps all of the firm's high class Gold Medal shoes together, the cartons being arranged in chronological order, according to width. The

bals come first, followed by the bluchers, fancy lines such as wing tips and kid tops, vici and kangaroo. On the other side of the store are grouped all tans and colors and specials. Rubbers and findings are carried in the back.

Mr. Hanlon has a simple perpetual stock sheet which is worthy of emulation. In a perpetual binder he has on each sheet a store stock number. This sheet contains besides the stock number, name of last, and a complete description of the shoe. It is divided, one side being to keep track of

E. J. HANLON, THE MANAGER OF THE STORE

goods ordered from the factory, and the other side goods in stock. On the factory side is entered the number of pairs of the various sizes ordered. When these shoes arrive and are put into stock they are transferred to the other half of the sheet, so that Mr. Hanlon knows at all times what shoes he has in stock and what shoes are on order. This system keeps track of outgoing stock by a simple double check. In each carton comes a double slip which contains store stock number, description and price. When a clerk makes a sale he must put this coupon in the cash register with the money. The second check is the counter check book which is used in connection with each sale. This check also goes into cash register, and at the end of the day the two must check up. The manager then subtracts from his stock on hand the day's sales, and each day gives him the balance of shoes on hand without having to go through the shelves to find it. It has a further advantage in that he need never be short a size or width. The duplicate coupon from the carton is sent to the factory.

Four clerks are employed by Mr. Hanlon, who is doing a cash business. Repairs are done outside, as while there is a good storeroom in the rear, he does not feel like handling this work in the store.

### STYLES IN HEELS NEVER MORE VARIED

That there is more development of heel than of any other part of modern shoes seems fairly easy provable. In the first place, there are used for heels these days leather, rubber, leather-board, fibre and wood, and metal reinforcements. Now, in no other part of a shoe, as every shoemaker knows, is such a variety of material used, says "American Shoemaking."

Because of this variety of materials, as well as the multiplicity of styles in heels, there have come into use many new methods of making heels, of attaching them to boots and

shoes, and of finishing them. And there is room for further improvement. Indeed, one heel expert is of the opinion that the time is coming when shoe manufacturers will buy heels not in the rough as they do today, but all shaved, stained and finished. By buying heels in this way, the shoe manufacturers will cut down the items of expense and labor in their healing departments.

Perhaps the nearest approach to this ideal of the heel expert is found in the wood heels, which are fashioned and finished by the heel man. Some are covered with leather, and others with celluloid. Experts on shoe finishes are working on new compounds that will enamel a heel in black and colors. This compound will be applied with a brush, like the enamel paint that the interior decorators use.

The popularity of wood heel shoes, which came to a high mark last spring, brought about the building of new machines especially for nailing wood heels to shoes. These machines took the place of hand workmen.

The sale of rubber heels has run into the millions of pairs. Popular prices at retail range all the way from a dime to 50 cents a pair. The buyer gets his money's worth in wear. The writer has seen a special pair of rubber heels, built for experimental purposes at a cost of about 75 cents, that had worn six months and that were still in good condition. These heels have not been put on the market, and it's not likely that they will be, for it is hardly probable that a number of persons would pay \$1 or more for a pair of such heels and it would be necessary to get that price, and to sell them in numbers, to make a venture in them pay a profit.

The wonder is that some tanners of leather do not develop a special leather for heels of shoes, and make heels of it and advertise them. The success of the rubber companies in bringing out specialties in rubber heels should certainly encourage tanners of leather, or makers of leather heels, to enter into competition for the heel trade. Many a man prefers leather heels to rubber heels. Most all women do, especially for dress shoes. But it's impossible for them to buy an advertised brand of leather heels, even at the modern repair shops, because there are no such brands.

The use of leather board for heels has enabled the machinery experts to design and build a number of important machines for making heels. They sum up in the automatic heel building machine, which cuts, pastes, builds and nails and jacks heels until dry. This machine is a little heel factory in itself.

Styles in heels never were more varied than this year. In the women's trade, where style flourishes, heels are of the Louis, semi-Louis, leather Louis, Cuban, walking, orthopedic and skating and other styles. They range in height from 7-8 to 18-8, which is doubtless the greatest range of heights with which the shoe trade ever was familiar.

The fashion of Louis heels for street shoes brought out the leather Louis heel, to compete with the Louis heel of wood, and it also led to the development of important machines for breasting and finishing this heel. One of the most important of new machines in the heel trade is a device that will automatically turn out wood heels at the rate of 28 a minute.

There are various other new ideas concerning heels in use. One of the latest of them is a protector for high heels, to be used by the woman who drives a motor car, and who fears that she will chip the finish on her heels by knocking them against the pedals. Another new sort of a heel is a special leather heel for skating boots. Some of them are of white leather. The heel of any skating boot, by the way, should be of good leather, strong enough to hold the clamps of the skates. Then there is coming a preparation for polishing edges of heels at home. It will find a place in the family shoe shining kit, beside the box of dressing that is used for polishing the uppers.

# DOES IT PAY RETAILER TO HAVE REPAIR DEPT?

One of the Most Important Adjuncts and the Best Paying, say Some Shoemen—Others Declare That it is Nuisance, and Source of Worry—Arguments Advanced on Both Sides Show Wide Divergence of Opinion—What Repair Department Brings

**D**OES it pay the average shoe retailer better to conduct his own repair department, or to send all work outside and have it done?

Of course, no establishment can successfully dodge the repair business, much as many of the high-class booteries would like to do so. One cannot have such an exclusive, aristocratic trade that it disdains having footwear resoled or reheelled.

In these days of high priced boots, people naturally have more repairs done, and take the shoes to the shop where they were purchased. The latter cannot say—"We do not run a repair department." In the very best grades of shoes there are now and then slight imperfections, such as an eyelet or hook coming out, a top lift pulling loose, a rip on the vamp or foxing, buttons torn off, etc. For its own protection the store must have a certain speaking acquaintance with repairs. Even if there is no thought of repairs in the larger sense of the term, the establishment must now and then be in a position to attend to these frailties in footwear, without sending the goods back to the factory for every little short-coming that creeps up.

## Opinions Differ Materially

If a census were taken of the different shoe dealers, it would be found that those in the big cities do not care to have a repair branch connected with the business. In the smaller towns, the sentiment appears to be in favor of such a department. It is maintained that, if it is given close attention and properly managed, it will yield a satisfactory profit, the same as the Findings Section, Children's Section, Fancy Slippers, hosiery, hockey skates, etc.

Those men who do not like the repair end of the shoe game, declare that it is a nuisance, and one of the bugbears of the business. There is nothing perfect on earth and everything has a drawback. There is always a fly in the ointment, a flaw in the diamond or a cloud in the sunny sky, and the repair end is the spectre in shoe selling.

The whole question, whether to repair or not to repair, so far as getting the work done outside, or having it attended to inside the store is one that will have to be settled by each individual shoeman, according to his location, the dimensions of his premises, the class of trade he caters to, the kind of goods handled, the practices of the other shoemen in the town or city, the number and availability of shoe repairers doing business, range of prices, etc.

"I think a repair department is one of the most important things in any shoe store," said a successful shoeman the other day in discussing the value of such a department. "Perhaps I might modify that statement by saying that its worth will be more felt in a shoe store doing a large business than in the small shop, yet, after all, the small retailer can make good on the proposition if he goes at it in the right way.

## Straight Loss on This Work

"For example, one of the important things that an efficient repair department will take care of is the making of the various small repairs that frequently become necessary on account of faulty workmanship on shoes purchased in the store. When you sum them up it is surprising the total they will run to. Of course, these repairs have to be made free of charge. If you send them out to a repair shop, it is a straight loss in each case, and a loss that would be saved if the store had a good repair department. More-

over, this work can always be sandwiched in between regular jobs, so that the gain is just as large as it looks.

"Look at the matter again from another viewpoint. Every pair of shoes that is sent out to the repairer means the profit that the latter charges on his work is lost, whether it be 15, 20, or even a greater percentage. Naturally, he wants some profit on his labor, and the shoeman has to pay that just the same as any other customer, though he often may get let down lighter, because he turns considerable business the repairer's way. This profit will amount to a

THE OLD WAY                      THE NEW WAY

## Try Our Repair Department

*Shoes Repaired While You Wait*

When your shoes need mending, send them here to be doctored, will make them as good or nearly as good as new

This is only possible by the perfect equipment of our repair shop.

All work fitted by solidity system, nailed with the Crowe nailing machine and finished either black or tan with electric finishing machine.

We use only the best of leathers at all times.

Hunt up any old pair of shoes you have at home--bring them to us---and we'll convince and convert you.

**Quick Service And Satisfaction Always.**

### ENGEL'S SHOE STORE

H. H. Engel,                      THE YELLOW FRONT                      J. D. Schaefer

HOW LIVE SHOE RETAILER IN HANOVER, ONT., FEATURES HIS SHOE REPAIR DEPARTMENT

considerable sum in a year, in a good-sized store. In any store it will mount up to a fair percentage of the miscellaneous expense account.

"But this is all a negative way of approaching the question. There is a positive side, and a mighty important one at that. Here it is. Any shoeman can make a splendid profit from a good repair department; almost as good a profit as he can make from his findings department—that is, if he runs the repair branch as carefully and in as economical a fashion as possible. To do this he should have as much machinery installed as the volume of business warrants. This is one of the principal essentials to the best success. Never waste time on handwork if a machine can do that work as well or better. It will surely do it quicker, and this

very speed will allow a greater volume of business to be done, and consequently greater net profits. It is just here where many a shoeman 'falls down' in tackling this problem. He looks at the immediate outlay, instead of at the future profits. And even the present outlay resolves itself into a small matter these days, when a shoeman can always lease a repairing outfit on a royalty or similar basis. I am for the repair department in the store every time."

That's one side of the question, and it is a side that a large number of successful shoemen thoroughly agree with, judging by the large outfits they keep up. The writer remembers well a talk he had some time ago with a retailer keeping a small store on one of the main streets in a large city. He did not do a large shoe business, but he certainly did a hustling repair trade. He stated that his net profits were frequently \$40 per week, and never less than \$35. He had no machinery, but kept two men busy all day long. And this without a dollar spent on advertising. His only ad. was a small sign hung out in front of his door. "Yes, we do repairs." But he did his work well, and he charged top-notch prices for doing it. He said he wasn't in the business for his health.

#### What the Anti-repair Shoemen Say

Of course, there are two sides to every tale. Here is a glimpse of the contrary side. "I would not have a repair department around my store again for any money," said another retailer. "Why?" "Because when you figure up the profit in it, you never take into account the trouble it takes to get that profit. There is just as much, or more, work entailed in taking in a pair of shoes to be mended as there is in selling a pair—and there is just as much worry when things go wrong. If I spend the same amount of time in looking after my regular departments as I would spend struggling with a repair department, I can make more money every time. As for the theory that such a department brings business to other parts of the store, I do not take

much stock in it. The way I look at it is that I am after a high class trade, and the kind of people who will keep continually running to have their shoes repaired, instead of purchasing new ones oftener, are not the class I care to have for the majority of my customers."

#### Leather Costs Too Much Nowadays

Another retailer stated that there was not much these days in repairing, when one considered the very high price of all kinds of leather. Sole leather, which formed the bulk of the repair man's purchases, was going higher all the time, and the end was not in sight. Add to this the time and trouble it entailed, and a man would be better off to leave it in reliable outside hands. "I send all my repairing out to one man, in consideration of which I get it done at a considerably reduced figure. I have no bother looking after it, and I find that I can get good business at times, because I take the bother of running to the repair man off the shoulders of my regular customers. A good messenger boy will do all the running necessary, in his spare time," was the way he put it.

Evidently the personality of the shoeman has a good deal to do with the side he takes on this question. Both pro and con, very contradictory statements are made. If a shoeman is looking out for all the profits he can get, he is likely to see the great advantage in a good repair department. On the other hand, if he does not desire to be tied up with any side issues, that prevent his concentrating his mind on the main business in hand, viz., selling shoes, he will likely contend that there is nothing in it.

#### ABLE TO TAKE SHORT WALKS

D. D. Hawthorne, wholesale shoe merchant, Toronto, who some time ago underwent an operation at the Toronto General Hospital, is making fine progress toward recovery, and is able to take short walks although it will be a few weeks yet before he will be down regularly to business.

### LIVING MODEL IN SHOE STORE WINDOW

Judged solely by the shoes displayed, this window deserves high commendation. Its attraction was greatly enhanced, however, by the use of a living model to show the various kinds of slippers in the display. Only the feet, limbs

and lower part of the skirt of the model were visible. This clever idea was carried out in a window of the Scott-Halliburton Co., Oklahoma City, Okla., and shown in the Shoe Section of the "Dry Goods Economist."

# GET EXTRA COST AND PROFIT ON THAT AS WELL

**Shoe Retailers Must Adjust Prices to Present Cost of Shoes—In Doing so the Stock Already in Hand Should be Included—Some New Light on the Matter of Turnover of Goods—All Net Profit has to Come out of Gross, and see that Latter is Right**

"IF you don't make a profit, what is the use?" So runs the inquiry that hangs in a leading wholesale shoe house. It is particularly pertinent and applicable at the present time, when many shoe retailers seem to be doing business for their health. They may be making a living, but they are certainly not making money.

"Yes," said one member of the trade, who has given considerable thought to the question, "few shoemen know how to figure profits. When there is an advance on any lines that they buy to replace those shoes sold, or partly sold, this advance should apply to the stock in hand. Take, for instance, the shoes that were bought at \$3.00, which are now up to \$4.00 and \$4.50. In getting a profit on these you should price those that you have in hand on the same basis. If you do not, you are losing money.

"Supposing that you have six thousand dollars' worth of shoes in your store, and you buy another six thousand dollars' worth at 50 cents advance on each pair. You should mark up the \$6,000 already in hand on the same basis as the ones secured at the higher figure. You are entitled to clean up \$3,000 for the goods are worth it. If you do not get what they sell at to-day, providing the war ceases and shoes start to recede in price, you would have to take a loss on your stock. If you are expected to take the loss, it is equally fair to take the gain."

## An Offer That Was Not Alluring

"The trouble with most shoemen is that they do not properly understand the matter of profit figuring," declared another dealer. "Why, I had a man walk into my store the other day, who said:—

"Please let me see the kind of shoe you retail at \$6.00."

"I told him I did not have any."

"Well," quoth he, 'let me show you some and make them up for you.'

"All right; let's see some samples."

"He opened his case and showed me a few. I asked him how much such and such a line was and he said, '\$4.75.' I said: 'You expect me to sell these at \$6.00 and pay you \$4.75 for them?'

"Oh, no," was the rejoinder, 'in thirty pair lots we give you ten per cent. off.'

"Well," I remarked, 'even then I could not sell the shoe for \$6.00, considering the overhead cost, and make any money.'

"Well," came the response, 'you must be a very ambitious retailer. I am selling this shoe to a large number of dealers, which is costing them about \$4.25 or \$4.30 and they are disposing of it at \$6.00. It is excellent value.'

"I cannot make any money on that," I firmly declared, and with that the interview was at an end."

## Figuring Themselves Into Ditch

There are men doing business today in the shoe line whose average profit does not equal their overhead expenses and yet they do not realize it. Out of a gross profit the net profit has to come, and if the gross profit is not enough to cover overhead expenses, where does the net come in? The ordinary retailer does not look this matter squarely in the face. He buys, say, 24 pairs of shoes of a certain line, and he must make a certain per cent. profit on all those shoes to get a net profit. The first twenty pairs he sells have only resulted in him covering himself on the original cost and the

overhead expenses. It is on the last four that he really makes his clean up, and if these last four do not sell—if they remain stickers—then he has not made any money.

To get anything beyond a living in the shoe game in these days of the high cost of living, heavy clerk hire and overhead expense, one must turn over his stock at least three times. If not, he is standing still or simply marking time. Shoes that do not move freely and quickly eat their heads off, so to speak. It is only on the last two pairs of each dozen that the net profit is made. If one has to pay \$1.00 more per pair for a certain line of shoes handled then the selling

SLIGHTLY ON THE LARGE SIZE

The Recruit: "Sergeant, would you mind changin' this pair o' boots for me? They're too big. (Apologetically) I think what you was lookin' at on the paper was my age, not the size of my feet."—London Opinion.

figure should be increased by \$1.00 and the ratio of profit should also be kept up. If the average profit is 35 per cent. it means that you must get the \$1.00 advance and also the thirty-five per cent. on that one dollar when a sale is made to a customer.

## Advanced One Dollar Per Pair

"I was told the other day," remarked another footwear merchant, "that a leading firm had gone over its lines and marked up all men's and women's shoes an extra dollar per pair. This applied to every saleable range in the house, with the exception of children's and on these the jump was proportionate. Of course, certain P. M. lines and shelf warmers would not be included in the advance."

The retailer today has to look out that in case the war should suddenly cease he is not caught loaded up with a top heavy stock. While it would probably take a year for conditions to readjust themselves, and for values to become normal (although never as low as they were before the war), still it is advisable to be cautious and not to purchase too heavily. The minute shoes begin to come down in price, or there is a break in the present quotations, then stocks which are in hand automatically become considerably reduced in value, and may have to be cleared out at less than cost.

To be successful in the retail game today, one must be a careful and discriminating buyer. Study conditions closely, see that the proper profit is put on your goods and keep your stock on the move.

# FABRIC TOPS WILL HELP SAVE THE SHOE SITUATION

**Leather is Mounting so High in Price and Available Quantities are so Limited that for the Attractive Staple Lines the Retail Shoe Trade Should Demand Cloth Tops— They Look Neat, Wear Well, and Come Considerably Cheaper than Leather**

“SHOE prices are very moderate at present, to what they will be three months from now,” declared a leading manufacturer this week. “I have never seen advances in leather come so swift and unexpectedly as they have of late. The scarcity of material is really appalling and the only relief that I see is for the trade to demand fabric tops for next season.

“If the dealers were in accord in this matter they would have it in their own hands to keep down the aviating quotations for footwear. I am not speaking now of novelty or millinery shoes, but of attractive staple lines. If certain women want artistic colors, blending shades, contrasting combinations, inlays, pinking, overlays, etc., they will have, of course, to pay for the pleasure of gratifying their fancy. In the medium class footwear, in which the dealer does his largest business, and which forms the backbone of his turnover, there is no reason why cloth tops should not prevail. I am speaking in the interests of the trade generally, when I make this suggestion.”

The hint thrown out should prove very effective and timely in the present situation. By cloth top shoes, we do not mean the ostentatious and bewildering weaves and patterns which prevailed a year or two ago, but plain, solid colors which are staple, and always look neat and trim. Shoes of this kind, with cloth uppers can be bought from forty to sixty cents less per pair at the present figures, than those lines carrying kid or calf tops, and by next spring the cloth top will possibly be a dollar cheaper, judging by the present ascension of upper leather.

## How Prices Are Aeroplaning

As various composition soles are now taking successfully the place of leather bottom stock, and giving as good wear and effective service as leather does, there is no reason why cloth may not be made to save the upper leather situation, and, in a measure, keep down the price of boots. The advances that have been coming on lately have been tremendous. White nubuck in three months, has gone up from 27 cents to 40 cents a foot; colored nubuck from 30 cents to 60 cents; colored ooze calf, from 50 cents to 80 cents. Black sheep 8 cents a foot and colored sheep 8 cents to 10 cents, while desirable colors in ooze sheep are now 30 cents a foot, and no relief in sight. Colored kid is verging around the dollar mark and is about as scarce as hens' teeth. Black kid has recently gone up 4 cents a foot, although it was thought that the top notch price had been reached some time ago.

The seemingly impossible and the extraordinary are being transcended now-a-days. Women's weight in calf skins, both colored and black are the highest ever known, and it is a matter of being able to obtain a sufficient quantity at any price prevailing. Sole leather has also advanced so that it means an expenditure from 4 cents to 6 cents more on each pair of women's shoes.

Now these are only a few quotations, relative to augmented costs, and the high cut all-leather shoe is becoming altogether too costly for the average shoe merchant to carry, in any large quantities, and the average person to purchase.

If cloth tops came into favor again as they would, by a little united action and effort on the part of the trade, the critical situation would, in a measure, be relieved. A cloth top boot with vamp and foxing of dull kid, calf or patent leather, is as tidy and trim a creation as is desired by the

great bulk of the shoeman's customers. Anything in fancy colors or extreme high cuts of course, cost much more money, in which the shoemaker, retailer and the purchaser have to share, but the average man or woman cannot pay \$10 to \$12 for a pair of shoes and keep a family out of each week's salary.

But it is, after all, not so much a matter of the exceptionally tall figure for shoes as it is a saving of the present leather supply, and the shoe with the cloth top answers every purpose, looks and wears equally as well as an all-leather offering. **Would Welcome Fabric Uppers**

“Yes,” declared a Western retailer, “I do not know what I am going to do, if ordinary lines advance at the rate that they have been doing. I would gladly welcome any kind of shoe or serviceable substitute that would lessen the increasing cost. It is getting to be a serious state of affairs, when we cannot sell a woman a good shoe for every day wear for less than six dollars. If plain cloth tops will keep down the cost, by all means let us have them. Most of our business is done on bread-and-butter lines, and it is the retailer who has to bear the brunt in educating the public to extra cost. One naturally gets tired of instructing and reasoning with certain customers. They will not try to understand the situation, and think we are trying to stick them for an extra fifty cents or a dollar a pair every time they come in the shop. The cloth top shoe, in either button or lace, is trig, graceful and becoming enough for any foot. By all means let us have cloth tops, if we can get them from 50 cents to \$1.00 a pair less than we are paying at the present time for kid or calf tops. If cloth does not come into requisition next season those of us who have several fabric top goods will not be able to sell them at any figure.”

## NEWS BRIEFS FROM ST. JOHN

Another member of the staff of Waterbury & Rising, wholesale shoe dealers, St. John, in the person of Wm. O'Connor, has donned khaki and joined Lieut. Col. Guthrie's 236 Kilty Battalion.

Lieut. Ralph St. Clair Hayes, son of Mayor R. T. Hayes, president of the firm of J. M. Humphrey & Company, wholesale shoe dealers in St. John, N.B., has again been recommended for a Captaincy in the Canadian army. Lieut. Hayes left St. John with a unit attached to the First Canadian Contingent and since that time has distinguished himself on the battlefields of France.

Many friends of Samuel J. Warwick in New Brunswick, will regret to learn that he is seriously ill at his home in West St. John. He was formerly employed as manager of the shoe department of the Sussex Mercantile Company, in Sussex, N.B., and later with Waterbury & Rising in St. John.

Miss Clare Hampton, chief clerk in the True Foot Shoe Company, 339 Main street, has returned from a two weeks' vacation in Boston.

Mrs. William McAvity of 731 Main street, St. John, received a telegram a few days ago informing her that her son, Gunner Frederick McAvity, had been admitted to No. 8 Field Ambulance Depot suffering from a wound in his left foot, but had returned to regimental duty on September 22nd. Prior to enlisting he was employed with Waterbury & Rising, wholesale and retail boot and shoe dealers in St. John.

# NEW RUBBER FOOTWEAR PRICES AGREED UPON

Toronto Shoe Retailers Believe that Reasonable Profit Should be Obtained—Minimum Schedule is Adopted Unanimously—Some Interesting Points Brought Out In Discussion—No Reason Why Business On Any Line of Goods Should be at a Loss

TO consider the selling price of rubbers and obtain a reasonable profit on this class of footwear, the Toronto Shoe Retailers' Association held an enthusiastic meeting on Tuesday, October 31st. A very interesting discussion on the subject resulted in the appointment of a committee to draft a schedule of prices.

The committee recommended that the following be the minimum prices charged for rubber footwear during the coming season, and the report was unanimously adopted. Notices will be sent to all the members of the Association, setting forth the following schedule.

## The Schedule of Prices

	Per pair
Men's Zephyr or Light Weight, First Quality.....	\$1.25
Women's Zephyr or Light Weight, First Quality.....	.90
Men's and Women's Footholds.....	.85 and .75
Men's Heavier Rubbers, First Quality.....	1.15
Women's Heavier Rubbers, First Quality.....	.85
Boys' Heavier Rubbers, First Quality.....	.85
Youths' Heavier Rubbers, First Quality.....	.75
Men's, Second Quality.....	1.00
Women's, Second Quality.....	.75
Misses', Second Quality.....	.60
Children's, Second Quality.....	.50

These are the leading lines, and other prices will be governed accordingly. This is a somewhat higher figure than was secured for rubbers last year, but, in view of the increasing cost of doing business, help, etc., it is felt that a suitable margin must be obtained on rubbers. There was the best of feeling exhibited at the meeting and the action taken by the Association will not doubt, strengthen the will and stiffen the backbone of certain retailers, who have been losing money on rubbers for years, by selling them at too low a figure.

Some of the points covered in the discussion, previous to the adoption of the report, were that, owing to the many styles, shapes, etc., of women's heels prevailing, it frequently took as much time to fit and sell a pair of rubbers, as it did a pair of leather shoes, on which the profit is much greater.

## Have Been Selling Too Low

"Yes," declared one member of the Association, "in view of the high cost of leather shoes, many persons, who would otherwise buy new boots, will endeavor to make their old ones answer by purchasing rubbers. When we are making a sale of rubbers, we are depriving ourselves of the sale of a pair of shoes, in many instances, and it is necessary to get a longer profit on rubbers, for this very reason. Again, lighter shoes than ever are being worn this year, especially by ladies, and if rubbers will save them buying new footwear, they are going to adopt this plan. I certainly think we have been selling rubbers altogether too cheap. Why, it takes fifteen minutes to half an hour to close some sales, and perhaps at a busy time, when customers are kept waiting, who want to buy leather shoes. I have had women come in and complain that a rubber did not fit here or there, and was either too short or too long, too wide or too narrow, and finally, wind up by giving me about 75 cents for the goods, on which the profit would be 15 cents. Now, I maintain that my time is worth 50 cents an hour, during the working day, and if I occupy half an hour to dispose of a pair of rubbers, wherein does the profit come, at the prices that we have been getting?"

"We find," asserted another member, "people will complain just as much over a rubber which goes wrong, as they do over a pair of shoes, and will leave you just as quick, over some grievance, real or imaginary. It behooves us to get a good profit. We should have more confidence in one another, and not be so afraid that the chap up the street is going to get the business. I have found out that when he takes a customer of mine, I will generally get one of his in return. To try to satisfy the bargain hunter is, however, a mistake."

## What Bargain Hunters Expect

"I had a woman walk into my store just before I came down," declared a Queen street dealer, "and ask for a pair of rubbers. I asked her 75 cents, and she raised her head high in the air and, with a look of chagrin, declared that she would not pay any such price, that she had never given over 49 cents in her life for a pair, and she did not intend to do it now."

"Well," remarked a Yonge street dealer, "there is no money in that class of custom. People will pay a good price for a good article, and considering the selling season of rubbers is short, and that stock has to be carried over many months in the year, there is no reason why a profit,—proportionate to that of leather shoes—should not be received. The trouble with most of us is, we think we are making money when we are not. Unless we know definitely our cost of doing business, we cannot figure our profits on a correct basis. At the prices which rubbers have been handled in the past, it would pay the shoeman better to put the money which he had invested in such stock, in government bonds at 4½ or 5 per cent., close his store and go and work for some one else. He would have more cash at the end of the year, and his investments would be safer."

"To make 20 cents on a pair of rubbers, when the cost of doing business is 23 per cent., is making money backwards," said another, who took part in the discussion. "The manufacturers are not afraid to raise their prices for rubber footwear, and I do not see why the retail dealers should hang back in this matter. I charged a dollar all last year for my women's first-grade Zephyr weight, and I got it, too. I had other rubbers at 75 cents, but when a customer came in and asked for the best, I showed her the section of the store where the dollar rubbers were kept, and if she inquired if I had anything cheaper, I said, 'yes, we have another rubber at 75 cents, but it is not quite so good in quality,' and in four cases out of five, I had no difficulty in disposing of the higher priced goods."

## Not a Pleasant Task at Best

"Do you know," remarked a north end merchant, "I had one of the best young men in my employ leave me some time ago, because on sloppy days he had to take a cloth and clean the shoes of customers who came in wanting rubbers. He vowed that he did not think this was the business of a shoe clerk. 'I have never had to clean anybody else's shoes in my life but my own, and I am not a-going to do it here. I can get another job, which is not quite so servile,' he explained, and thus he left me."

Some lady clerks, it was asserted, would not wipe the shoes of feminine customers who came in for rubbers, but would fit rubbers over the wet leather shoes, and perhaps take down several pairs before finding a suitable one. The

next woman customer coming in and seeing the soiled lining would say, "why, it looks as if these goods had been worn." "Why no," would be the response, "we have just been trying them on over some wet shoes, and they did not fit," and the answer would come, "well, I do not like the looks of that kind, please show me some other."

#### Some Points to Be Considered

In view of the fact that it takes as much time, patience, tact, trouble, etc., to dispose of rubbers as it does to sell shoes—that proportionately as large and representative a stock has to be carried, owing to so many different styles of heels, particularly on women's shoes, and the fact that the sale of a pair of rubbers often forestalls the demand for a pair of leather boots, that wiping damp, dirty shoes and fitting rubbers is not, at best, a very pleasant task, and that the general public will pay a good price for a reliable article, the members decided to increase the figures on the different lines to those indicated above, with a recommendation that these be the minimum quotations. The motion was carried without a dissenting voice.

#### Other Questions to Come Up

Another important matter considered was the different Y.M.C.A. branches in Toronto selling tennis and sporting shoes to their members. It was stated that the charter of the institution did not cover the handling of merchandise, and on a vote being taken on the question—"do the members of this association approve of the Y.M.C.A. disposing of merchandise in opposition to the shoe merchants," the sentiment was unanimously against the course now pursued by the Y.M.C.A. This question will be further dealt with at the next regular meeting of the members who will also give heed to the charge, which has been aired several times in the Association, that wholesalers are selling retail, and that the practice should be stopped.

### THE EVOLUTION OF SHOE PRICES

In a recent interview John Dwane who has been in the retail shoe business in Montreal in the one store for the remarkably long period of forty-seven years, said he had never known footwear to be as costly as at the present time. "The primary cause," he added, "is the shortage in raw materials. Much of the hide supply came from countries now at war, and, automatically, this supply has been cut off. The working out of the law of supply and demand has naturally increased the price of hides. Thus, whereas before the war we used to pay comparatively little a pound for hides, they are now selling at twenty-two cents, or even more. And, mark me, even at this figure the supply is restricted, and a supplier cannot contract to give extensive quantities at this quotation. Quotations are ever made subject to change.

"In the days before the war, if a man came in and asked for a pair of shoe laces, I very rarely charged him for them. Now, of course, it is a different proposition. The increase in the cost of the raw material, has caused an increase in cost of the manufactured article to the dealer. Here now is a pair of shoes which used to cost me \$3.00. Now this same shoe costs me \$4.80 laid down in the store. A retail dealer must, of course, make his profit. In the case of a downtown store the margin need not be so great as in the case of the uptown dealer, who has to meet heavier expenses.

"I have been in the business for well nigh a half a century," he continued. "I have seen the days when I had 45 men engaged here making boots to order—for in those days everybody who was anybody, had his boots made to order. Now, with the perfection reached in the manufacture of footwear, it is only people with bad feet, cripples or cranks who have their shoes made to order. And I may say that never have I known footwear to be so dear. The best

class of men's boots are now selling at around \$10, and what with the desire of the gentler sex to display the shapeliness of their limbs, women's boots are costing anywhere from \$12 to \$15 dollars. And the end is not yet. Why a few years ago if you asked a young lady to pay more than \$3 or \$3.50 for a pair of boots, she would think you were a high-way robber. How times have changed."

### SHOE STORE HAS NEW CLEANING SYSTEM

The Burns Shoe Store, Oshawa, Ont., has recently installed a Tuec Vacuum Cleaner. This is the first installation of its kind in a shoe house in the province, although a number have been made in the United States. The machine used is equipped with a 7/10 horse power motor. There are two bearings on this machine, the S. K. F. ball bearing and running in a constant oil bath. The only attention that the machine needs is to clean out the dirt as it collects, and oil it twice a year. The power consumption is very small, and the machine is very compact. The piping, which is 2½ inches in diameter, with two inch outlets, is run from the machine to the different floors. This piping is installed between the studdings, with openings for attaching the hose, conveniently located at various points in the floors of the base boards. To clean any part of the shop, it is only necessary to attach to the nearest outlet, a section of the light weight hose, with the proper cleaning tool. Owing to the large volume of air in the store, the cleaning is done quickly and thoroughly, the dust and dirt being carried to the machine in the basement and not stirred up in the air. The new vacuum cleaner was installed by the United Electric Company, 159 Richmond street west, Toronto. Mr. Burns reports that the new installation is giving entire satisfaction, and that the interior, including floors, shelving, cartons, settees, fitting stools, etc., can be easily cleaned within a few minutes every morning. The Burns Shoe Store is one of the most progressive in the province, and has possibly the finest front and most extensive display facilities of any establishment in its line.

### AN AUTHORITY IN LEATHER TRADE

(See Front Cover)

F. G. Clarke, President of Clarke and Clarke, Limited, manufacturers of sheep skins of all kinds, is one of the most widely known leather men in the Dominion. As head of one of the largest sheepskin tanneries in British Empire, his firm has always set the pace for standard of quality and colors, and maintains branch warehouses in Montreal and Quebec. Of Irish and Scotch extraction, Mr. Clarke was born in Peterborough, Ont., where the present business was established by his father, John Clarke, away back in 1852. On the death of his father in 1877, the subject of this reference entered the leather line and continued until 1882, when the industry was removed to Toronto. Seven years later in conjunction with his brother, C. E. Clarke, the company was incorporated under its present name with F. G. Clarke as president. He has always taken great interest in the leather situation, and market conditions, at home and abroad, and pays frequent visits to the Old Country and Europe. In 1912, he was chairman of the Tanners' Section of the Toronto Board of Trade, and his annual reviews of the trade with accompanying statistics, gathered with much care and research, constitute a "blue book" of instruction and reference. He is vice-chairman of Tanners' Safety Association. Fond of travel, motoring and boating, Mr. Clarke is a member of the Canadian Club, and the Scarboro Golf and Country Club. He has two sons, one of whom Pte. Norman Clarke, enlisted with the Princess Patricias at the outbreak of the war and is now doing duty at the front.

# ONE BOUGHT THE BEST; OTHER KICKED OVER \$1.00

Show the Highest Grade Goods First in Shoe Selling, and do not Seek to Dodge High Prices or Minimize Present Conditions—All Shoemen in Same Boat and all Have to Pay High Cost—Brunt of Facing the Public Falls upon Retail Merchant

“WHAT is the price of this pair of shoes?”

“Eight dollars, sir.”

“Oh, well, I do not care to go that high. Please show me something at a little lower figure.”

“Oh, certainly, we have six and seven dollar shoes but, of course, the quality is not so good.”

“Well, let's look at them anyway.”

The salesman produced a gunmetal, wide round toe boot on a last, different from the one he had been showing, but which retailed at \$6.00. He also pulled down a mahogany blucher, with a moderate recede toe, the price of which was \$7.00. The caller carefully noted the three shoes, all of them being on different lasts, and his eyes reverted to the eight dollar boot which was a nigger brown bal, carrying recede toe. It seemed to have created the best impression, and to be worth the difference.

“After all,” he declared, “it is only a matter of a couple of dollars, and I like the lines and looks of this boot much better than any of the others. It appears smarter and more graceful. There is a something about it more distinctive than the others that you have shown me, although if I had not first seen this shoe at eight dollars I would have been quite content with the six dollar blucher.”

“You are right there,” rejoined the salesman, “you certainly know the best shoe for style and value.”

Always show the highest price shoe first. If you start in low you cannot raise the average customer, but if you aim high you will score in nearly every instance. For a customer to be shown and told that such a boot is the best one carried or the highest class tickles his vanity and sense of importance, for we are all human. If the figure is above what he cares to go the salesman will soon be so informed. Frequently, after glancing at the less expensive lines, the caller will take the best as in the foregoing instance. Show the leading lines first is a good maxim in merchandizing.

Not always does one encounter ready acquiescence in the matter of high-priced shoes. On the other hand there are persons who will not recognize conditions which have contributed to the sky-rocketing of footwear quotations.

## Would Not Listen to Reason

A young man, well-to-do, intelligent and industrious, walked into a certain shoe store the other day and asked to be shown size seven, D width, on the Acme last. This was a staple last with the dealer, and his caller had been in the habit of buying this boot for some time. He was fitted and tendered a five dollar bill in payment.

“Six fifty now,” replied the proprietor.

“How is that?” ventured the caller.

“The great scarcity of leather, the many new uses to which it is put, the shortage of labor and the fact that 75 per cent. of the raw skins of which our leather is made were formerly imported, but have been shut off by the war. These and many other causes have brought about abnormal conditions. You may consider yourself fortunate if in a year or two you are able to buy leather shoes at any price.”

The shoeman took some pains to elaborate upon the untoward circumstances of today, telling the young man that the shoe which he had offered him just now for six fifty would be seven in a short time, but his talk carried no conviction. The fellow rose with a kind of “know-it-all” air, and a quiet intimation in his attitude of “well, you cannot stick me for extra money” remarking that he would go somewhere else, and stalked out.

“Now, what are you going to do with a man like that?” asked the shoeman. “There are several coming in here every week who will not yet believe that prices have gone up, because they have not a stiff acquaintance with the facts, the same as we have. They decline to place confidence in our veracity. The shoe business is getting to be a hard game and in connection with every advance, it is the retailer who has to bear the brunt. The tanner deals with relatively few customers and so does the manufacturer, as compared with the ordinary merchant, who numbers his patrons by the hundreds. It is more difficult, therefore, to educate the multitude to the necessity and justification of higher prices than it is a comparatively few. However, there is this to be said, that ‘misery loves company,’ and practically every dealer is in the same boat. When the situation has to be

“They fit where others fail.”

BRIGHT AND ATTRACTIVE FALL ADVERTISEMENT OF BOWMANVILLE RETAILER

faced, it might as well be faced fairly and squarely. If one attempts to dodge or to elude it, it is only then that fresh trouble looms up and unexpected difficulties.”

Writing to the SHOE AND LEATHER JOURNAL, an eastern retailer says:

“I am still doing business at the old stand, but if shoes go much higher, I am going to quit the game and look for a new job. Do you know anybody wanting to get a chap about my size, ready to put push and ginger into some sphere with room for expansion? Really, I am getting ashamed to ask the prices for some of our lines and especially children's shoes. What are fathers of large families going to do? I must say, however, you are giving some good arguments and facts in your Journal to help us stiffen our backbone, and make some money.”

## The Worst is Yet to Arrive

There is no use in bewailing circumstances over which one has no control. Higher prices are here to stay and if there is any consolation in the remark—“Cheer up, the worst is yet to come”—the retailer is welcome to it. Shoes will go higher and very much so. Some of the boys who started out on the road a month ago have had prices advanced by 50 cents to 70 cents a pair and they thought the cost was high enough when they first got the list. Probably before the season ends there will be another advance of the same amount. Those who are in close touch with the situation believe that prices next spring will be staggering—the highest ever known in the history of the trade. They are also of the opinion that shoes will never be nearly as cheap again as they were during the five or six years before the outbreak of the war. The day of the good cheap boot has passed. There may be some slight recession in price after the European strife, but it will be very small.

### WHAT SEASON HAS DEVELOPED IN SHOE STYLES

The judge and jury in women's shoe styles, as in other toggery, is the woman herself. Therefore it is of vital importance to manufacturers and retailers alike to know what her ladyship thinks of the styles that are being brought out this season, says the "Shoe Retailer." That this court of last resort has decided, unreservedly, for pretty shoes, is not news to the manufacturers and retailers but the fact that this court has not reversed its decision and is not likely to do so, is of the greatest importance in view of the fact that the volume of style boots and shoes being worn is increasing each season. A writer of shoe styles in "Vogue" sizes up the women's weakness for pretty shoes in these words: "The new shoes are so very well modeled that the bootmakers may truthfully claim to have made an important addition to the category of feminine charms. 'Who,' to quote a very ungallant gentleman—or did he mean to be gallant?—'would now look at a woman's face when he may look at her feet?'"

This writer further says of shoes: "The shoes this season are, fortunately, not as arresting in color as in the immediate past; they are more subtle in their appeal. Their charm lies in their beautiful proportions, their carefully worked out details and in their perfection of finish."

The season is far enough advanced to determine several matters of importance. One is that low heel shoes are extremely popular and that manufacturers are having a "time of it" trying to supply the demand. Both tan Russia calf and black dull calf lace boots with a recede toe and long vamp are in demand. There is some demand for combination boots of this style, notably for tops of buckskin or suede. Of the low heel boots the writer in the journal mentioned says that two types of street boots will be worn during the autumn, the low heel shoes with a narrow toe and wing tip, to be worn with a tailored costume or for sport purposes, and most appropriate for a slender, undeveloped person, and the high heel, gracefully arched boot, which is appropriate for the mature, well-rounded figure. It is argued that the maintenance of the proper proportions between the foot and the whole body is the secret of well-selected shoes, and as a matter of fact, a foot which is too small or even too narrow in proportion to the body is quite as unlovely as one which is too large or too broad. It is asserted that this is a fact that has only recently received recognition.

"As to colors," writes this authority, "a great deal of attention is being given to brown, and the browns of the season range through many tonalities from very dark to very light and from a yellowish tan to a shade that is almost wine. The smart English combination of black leather vamp and red brown top is again seen in some of the best walking shoes of the season. Gray buckskin is still smart in entire shoes but really smartest when combined with black kid vamps. The tones of gray range from dark slate to mode, a shade very smart when combined with tan. These and brown shoes, except those of dark glazed kid; are almost exclusively confined to morning and sports wear. A brown boot with a top of biscuit suede is suitable for afternoon wear. The really formal afternoon dress shoes has a black patent leather vamp and heel and a fine black cloth top."

### THE CO-OPERATION OF YOUR STAFF

"Yes, sir," said a leading shoeman, "I believe in taking a personal interest in your clerks, particularly in the heads of departments. It pays well in securing their zeal and devotion to duty, and their having the welfare and progress of the firm at heart. I myself, take a holiday every year, and go to bright cities, and visit establishments. I see how other people are getting along, and how they do things. I pick up live pointers and fresh ideas which I incorporate as much as possible in my own business. I took a few days

off last week, and a couple of my head salesmen went with me. We were shown over some of the finest footwear establishments in the largest Canadian and American centres, and were given a great deal of valuable information on stock keeping, turn over, classification of departments and data regarding special sales, elimination of obsolete lines, advertising plans, sales and commissions, deliveries, etc. Well sir, my men took the greatest interest possible in the outing, and now feel that while they may not be partners, financially, they are in enthusiasm, and spirit, purpose and upbuild."

### MOVES INTO HANDSOME STORE

The formal opening of the new store of E. R. Gavin, shoe retailer, which is located in the Walsh block, corner of Arthur and St. Paul streets, Port Arthur, Ont., took place on Saturday, October 28th, and was attended by a large number of persons. They were delighted with the attractive new footwear home of Mr. Gavin, which is admirably appointed and possesses every modern facility for shoe buying and shoe fitting. Neat cards of invitation were sent to all the customers and friends of the store and the opening was in every way a success.

### AN ENTHUSIASTIC SHOE MANAGER

Richard Coles, who is buyer for the shoe department of the A. E. Rea Co., Limited, Ottawa, Ont., has had an experience of twenty-four years in connection with the foot-

RICHARD COLES, OTTAWA

wear trade. During his three years' association with the A. E. Rea Co., there has been a steady growth of business in the boot and shoe branch more especially in ladies and children's lines. The shoe department is situated on the third floor, and in its arrangement, is one of the prettiest and neatest in Canada. The merchandise carried is of a high grade, and the motto is "Satisfactory Fitting and Quality." The widths carried in ladies' footgear run all the way from AA to EE, a most comprehensive range. Mr. Coles takes a great deal of pride in the department under his special care, and his best energies are devoted to giving complete satisfaction to all customers, and seeing that the stock is kept up to the high water mark in styles, both staple and novel.

# The Shoe Repair Man

**W**HEN repairing heels it is best to ask customers which they prefer, steel nails or steel plates or circlets, says the "Shoe Repairer and Dealer." The steel plate covers more surface and naturally protects better. The idea of applying a steel plate on the surface of the lift is not the correct one, as the lift should be wet or in temper to allow the plate to be sunk in flush with the leather. A steel plate applied in that fashion holds better.

Beware of nails through the sole of a welt shoe that engage the upper and wrinkle it down out of shape. On extension edges this danger is liable to exist more than on narrow edges and when the upper is taken in by nails at the ball, the wrinkled-up shoe upper at that point is quite prominent, even when the shoes are on the wearer's feet. It is caused very often by a nail or two twisting toward the upper and forcing the upper down without going through it. Nails in welt shoes should be driven on a slant toward the centre of the bottom instead of straight through, as with McKays. A nail driven on a slant holds fully as well as one driven straight through the leather.

## Putting on Tap Soles

Taps are not long enough to properly protect the feet and when they are long enough the bottom is thereby rendered stiffer. Between two evils we should choose the lesser, and it seems that protection comes first. Not only are the winter shoes in need of a long tap, extending well down into the shank, but summer shoes are also in need of such taps to repel water and to hold for a reasonable time to the insole. A short tap, however, well nailed in the shank, will tend to lift up and pull out the fastenings. Very little leather is saved and dissatisfaction is sure to follow.

When repairing white shoes or colored shoes of any kind, cover up the entire upper, as they do in the shoe factories. Oil, blacking, etc., must be kept away from delicate uppers, and have all the necessary materials to clean such uppers. A ball of pure cement does fairly well to take off the most prominent spots and chalk, rubbed in quite hard, helps also in giving a new finish to the leather.

Some repairers refuse to sell sole leather to customers, as this breeds trouble. Sole leather is quite high in price and small pieces of sole leather cost too much to-day to sell to customers who naturally think the repairers are soaking them.

If you push through leather with hard spots and veins on the outsole stitching machine, apply a little hot water to the hard spots before stitching, as these hard spots are against the stitching process more than anything else, and many repairers do not use such leather on welt shoes on that account. A piece of sole leather may have hard spots and still be entirely serviceable. The idea that such defective leather can be used only in nailed work is a wrong one.

## Keeping of Sole Leather

Sole leather at the time of selling may weigh a certain number of pounds and ounces and by keeping in stock in a dry place the leather may weigh less after a time. Dry leather is, of course, the correct thing in the repair shop, and to keep in a dry place is therefore advisable—while it may be advantageous to the seller to keep it in a damp, cool place. Repairers, however, should not object when the leather weighs less after being dried out—the matter of weight should be settled once for all time at the time of buying.

Some repairers roll or beat down sole leather, while others do not bother. The old school of repairers beat down the leather, while the modern repairers roll it, but the modern repairers do not even all roll it and the work is as well finished, although the wearing qualities may not equal the rolled sole leather. Rolling or beating sole leather while it is wet does not produce the desired results. The leather must be in temper at the time of rolling, as otherwise the leather will work itself back into its former state.

## Sole Should Fit at Start

When forcing a new sole on an old shoe the tip-seam may be twisted crooked. The sole should fit at the start, as forcing the sole one way or the other will also destroy the fitting qualities, so highly prized in old shoes. You have noticed how much smaller a shoe is after resoling, and you

THE REPAIR SHOP OF R. J. WILKINSON, HESPELER, ONT.

have often experienced pain at points where your foot was free before. It may be that the sole was wet when applied and has shrunk thereafter, or the sole may have been pulled to make it fit to the shoe. It is always safer to hammer down the bottom before starting to nail so as to spread the insole and have the shoes in normal condition.

A string or wire extending the entire line of machines saves much time, as the operator can start or stop the power by means of that wire, which is connected to the starting lever.

## Do Not Neglect Finish

Some customers are in a hurry and do not care to have the bottom finished, and some of the large repairers have a way of quickly finishing the bottom in such a case. It is never business to slight any part of the work, and some repairers would not let work go out unless properly finished, as they consider such a thing as bad advertisement. Do not apply much finish, but rather apply evenly all over, and do not over-brush, as to burn out the wax from the finish destroys the gloss.

The heavy sole is kept down with more or less difficulty, especially when nailed on a welt shoe. The nails then have to be set away from the welt seam and the edge tends to open up. Take the toe or ball and a double row of nails is needed at those points. The nails, furthermore, should be set closely apart to keep out moisture and to hold the outsole down during wear. Why do we see welt shoes with nailed soles? In the writer's opinion it is mainly because

repairers generally do not bear enough on the advantages of stitching. The price of nailing is lower, too, and that, of course, accounts for it, but the difference in price is small as compared to the difference in final results.

#### Enough Nails in the Heel

When fixing heels with new lifts or simply with patches some repairers do not apply enough nails on the lifts, relying too much on the spunk nails through the top lift. Too many nails will not help toward the wearer's comfort, but not enough is still worse, since the heel will not be solid and the under lifts will quickly spread out and destroy the smoothness of the heel edge. Soft leather ought not to be used for heels, as the edge will not stay smooth, and as a matter of fact that applies also to sole edges, but not so much as to heels, since, there is more pressure on the heel and the surface is so much smaller. Hard sole leather does not increase the hardness of the heel, but nails do and a hard leather heel without nails would be practically like a rubber heel.

Some repairers have all the necessary machines except trimming machines and shape edges on a scouring wheel. At first view we would believe that a scouring wheel would finish the edges smoother than a rotary cutter, but such is not the case. Scouring heels is done in shoe factories to remedy the defects of trimming, and where the speed and the output must be high it would not be fair to expect very smooth edges, but in the repair shop it is different, and it is possible to get most excellent results with trimming machines. A liquid is applied to heel edges before scouring and that helps toward filling the crevices and toward a smoother edge.

#### Dry Finish in the Open

I saw a fan on the lower shaft of a finishing outfit and the shoes that had been stained or blackened were set on the floor next the fan and were quickly dried preparatory to finishing. The finish should not be dry on the bottom of the shoe, but should be in temper—that means that by rubbing over with the thumb it should come to a gloss. The same rule applies to edges and heels before the setting operation. To dry the finish by artificial heat is not proper, and the only way is to dry in the open or by means of a fan as suggested by the repairer herein referred to.

Some repairers who have outsole stitching machines resole McKay shoes on those machines. The writer was lately surprised to see the nice work performed on McKay work at outsole stitching machines. The shoes were boys' McKays, and there were some women's shoes also that had been outsole stitched, and although the edge was quite narrow the line of stitching was there well set on the fair stitch welt strip. Repairers who do such work first see to it that the upper is well tacked on the innersole, and a few new tacks are put in at the ball part before applying the new outsole. A piece of iron is used to press down the sole edge and to remove all obstruction that might be in the way of the stitching awl. The smoothing iron, such as used on turn work to press in the upper around the sole, is an excellent tool for that purpose. The fair stitch welt on a McKay shoe is not as firm as on regular welt shoes and the stitches are liable to cut through the welt, so that it is advisable to have the welt dry at the time of stitching. It is well also to file the inside part of the awl point on a long slant to have it pull the shoe towards the table during the feeding operation and thus to set every stitch next the upper, where it must be on a McKay shoe on account of the natural narrowness of the sole edge.

#### Now is the Time to Raise Prices

Shoe repairers who are afraid to raise their prices should take a lesson from a fellow worker. He was very strong in his denunciation of repairers who flaunt cheap work signs, as he knows from the experience of cheap men who started in his neighborhood that it never pays. He

says not very long ago a repairer started up in his very block and made a big clamor about cheap prices. He admits that some of his customers left him for a while to try out the new man, but they all came back to him in short order, sadder but wiser. They had learned that cheap work did not pay. The cheap work fellow lasted a few months and is now down and out. He says his good customers stick to him, and the cheap people he does not want. He has been in his present location for four years, took down his cheap work sign three years ago, and has a good steady trade. As he gets good, high prices for his work he does not have to work so hard and has all the work he can do. His customers do not ask for prices, and do not kick about them when the work is done. They know that everything is advancing in price, and shoe repairing is no exception.

THE CATCHY ANNOUNCEMENT OF A TORONTO SHOE REPAIR ESTABLISHMENT

He wisely stated that now is the time for all shoe repairers to take advantage of the upward tendency in prices and raise theirs to an equitable and just return for their services. The public is educated to paying high prices for their necessities and take it as a matter of course.

#### MORE SHOE REPAIRERS RAISE PRICES

The shoe repairers of Moose Jaw have a new schedule of prices, which they are prominently advertising in the daily papers. They state, that owing to the steady advance in leather and other materials, they are compelled to take this step. Among those who have adopted the new schedule are James Campbell; Moose Jaw Electric Repairers, P. Douglas, proprietor; Empire Shoe Repair Shop, W. Hudson, proprietor; M. J. Malone, M. McGregor, F. Porter, Randell Shoe Repairers, A. H. Randell, proprietor; Varsity Repair Shop, A. Simpson, proprietor; and Andersons, Limited.

The following prices now prevail:

Men's full soles and heels, leather or rubber.....	\$2.75
Men's half soles, leather or rubber heels.....	1.75
Women's half soles and leather heels.....	1.25
Women's half soles and rubber heels.....	1.35
Boys' half soles and leather heels, sizes 3 to 5.....	1.35
Girls' and Youths' half soles, leather heels, sizes 11 to 2..	1.00
Child's half soles, leather heels, sizes 6 to 10.....	.85
Men's half sole only.....	1.25
Women's half sole only.....	.90
Boys' half sole only, sizes 3 to 5.....	1.00
Girls' or Youths', half soles only, sizes 11 to 2.....	.75
Children's half soles only, sizes 6 to 10.....	.60
Men's heels, rubber or leather.....	.50
Women's heels, rubber.....	.50
Women's heels, leather.....	.35
Sewn or Nailed Work.....	Same price

# LIVE TOPICS FROM LEATHER ARENA

## LIGHT LEATHER CONDITIONS IMPROVING

F. G. Clarke, of Clarke & Clarke, Limited, sheepskin tanners, Toronto, who recently returned from an extended business trip to the Old Country, states that leather conditions in Great Britain were rendered rather acute by the large demand for sheepskins for jerkins for the army, and in order to ensure an ample supply an embargo was placed upon the export of skins and the prices fixed. This naturally reduced the sources usually open for Canadian tanners; and the leading sheepskin houses, in view of the restrictions placed upon export by the British government, sent their skins to America and other countries, where very high prices were obtained. The embargo on sheepskins was lifted at the end of August last, and since then, conditions have somewhat improved. Mr. Clarke was able to secure a considerable consignment of pickled pelts, but during the time that the embargo was in force, no shipments were received.

"With reduced supplies, and a very heavy demand from the United States, prices have advanced from 100 to 125 per cent., which puts the figures for all kinds of sheep pelts at an unprecedented level," said Mr. Clarke. "Dyestuffs and chemicals used in tanning and dyeing are still difficult to obtain and sell at very high prices.

"Another difficulty that we, in common with all manufacturers, are up against now, is in securing sufficient experienced help. We are doing the best that we possibly can under the circumstances, and staying by our Canadian customers, although we have been offered much higher figures for our products elsewhere. Owing to the tremendous advance in the cost of colors, we have naturally had to restrict our lines to within reasonable limits. In the abnormal condition of the leather markets of the world the sheepskin tanner has not escaped the advances attendant in other branches of the trade, and conditions so far as supplies are concerned are still difficult.

"Touching upon the war," Mr. Clarke stated that "there was a lot to do yet," and we in Canada knew just as much regarding the probable date of the termination of hostilities as the British people. "I found, however," he remarked, "that there was only one determination in the public mind, and that was, the struggle must be won at all costs, and operations carried on to a successful and conclusive finish, in order that peace may be assured for all time. No half-way measures or temporary means will be tolerated by the Allies."

## HOW SOLE LEATHER IS SOARING

Sole leather is constantly ascending in cost and is likely to go much higher.

The following is the schedule of prices for the different years from 1909, up to the present, on No 1 Oak and No. 1 Hemlock backs.

Year	Oak	Hemlock
1909.....	38 .....	30
1910.....	39 .....	34
1911.....	40 .....	36
1912.....	41 .....	37
1913.....	42 .....	39
1914.....	41 .....	38½
1915.....	48½.....	44½
1916.....	70 .....	67

In a letter to the SHOE AND LEATHER JOURNAL a leading Canadian firm says that there has recently been sold in the United States to Russia in one deal by the Central Leather Co., and Howes Bros. & Co., 750,000 sides of Hemlock sole leather—the amount of sale being approximately \$7,500,000. We are also advised of another large sale of 300,000 sides of leather at a price of 48 cents a pound, which would mean approximately three and three-quarter million.

The raw hide situation is becoming more feverish every day. Reports from South America are to the effect that agents of the British Government are seeking to acquire option on the whole take-off of Frigorifico steer hides for the duration of the war. Prices quoted to-day, October 27th, for South American hides in South America are 42½ cents for Cordovas, and 42¼ cents for B.A.'s.

## LOYAL RESIDENTS GAVE HANDSOMELY

The town of Newmarket entered enthusiastically into the raising of funds for the British Red Cross on Trafalgar Day, and although the people have been giving with wonderful liberality ever since the war started to all the various calls made upon them in connection with military affairs, on this occasion they even exceeded themselves and raised over \$3,700.00 by purely voluntary subscription, the Council not having made any vote for this purpose. One of the interesting features in connection with it was the meeting at the plant of Davis Leather Co., the gathering being called to order by Mr. A. J. Davis and addressed by Hon. E. J. Davis, the president, with the result that the employees subscription paid into the fund amounted to \$389.65, the firm giving their check for \$500.00, making a total of \$889.65.

Owing to war conditions and the absence of Capt. Aubrey Davis in connection with military matters, the president is the only member of the Davis Leather Co. who expects to go north for the annual hunting trip on October 30th. As his eye is as sure and his rifle as certain as it was twenty-five years ago, we expect to report justice to the Davis team from its sole representative.

## MR. LANE BUYS OUT BUSINESS

W. A. Lane, who for the past three years has been manager of the Montreal branch of Major J. A. Scott, of Quebec, has taken over the business in the commercial metropolis. Mr. Lane will continue to occupy the ware-

W. A. LANE, MONTREAL

house and offices at 218 Notre Dame street west, and will carry the same lines of upper leather as before, and specialize on kid. He has been for many years in the leather game, and is well and worthily known to the shoe trade not only in Montreal, but throughout the province of Quebec.

# “OUTING” BRAND SPORTING SHOES

IF you haven't already placed your order for this popular and quick selling brand, this is to remind you that the time for doing so to the best advantage is getting short.

Prices on all kinds of Tennis or Sporting Shoes will be advanced after December 15th.

Ordering now not only ensures a prompt delivery of the goods but will save quite a bit of money.

Branches at Halifax, Montreal, Ottawa, Fort William, Winnipeg,  
Regina, Saskatoon, Calgary, Edmonton, Vancouver.

# IN THE RUBBER SHOE WORLD

## LEATHER TOPS GO UP IN PRICE

Owing to the steadily advancing prices in leather, a condition over which rubber shoe manufacturers have no control, the prices of all leather top and leather soled shoes have advanced considerably. The new schedule went into effect November 1st. The advance in seven-inch top is 20c; nine-inch top, 40c.; twelve-inch top, 65c.; and fifteen-inch top, 75c. In single leather soles with leather heels, the increase is 10c. a pair. In single leather soles with slip sole and leather heels it is 15c. a pair, in double leather sole, with leather heel, it is 25c., and where Hungarian nails are used, the advance is 5c. All the rubber companies this year are behind in their deliveries, owing to the fact that sorting business was done last spring up till the middle of June, which left stocks in the warehouses and the factories very low. During the vernal months the demand for rubber footwear was exceptionally active, due to the wet, sloppy weather. Another contributing cause is the shortage of labor, owing to so many enlistments, and the delay in getting certain materials. The principal factor, however, is that help cannot be secured. In some centres it is becoming a desperate problem to get assistance of any kind. In other years, unless otherwise specified, all the placing orders in rubbers were filled and shipped by November 1st. Many retailers who have not received their consignments are making many anxious inquiries, even wiring the manufacturers to make haste and send the goods by express.

The embargoes placed on freight by the railways and the congestion at many points have resulted in exasperating delays. One firm reports that there have been shipped to it from several points many cases of goods, of which no trace can be found, although every effort is being made to locate them.

"I tell you," said a leading representative of a rubber footwear firm, "every year about this time we have prayed for wet, cold weather, heavy rains and light snowfalls, in order to boom our business, but this year we are mighty glad to see the fine days hang out so long. It is certainly a Godsend to us, and to many retailers. We simply cannot get out the stuff. Although we have been offered business in large volume by retail firms who cannot get their rubber footwear supply elsewhere, we have been forced to turn down the same. There is no use in offending a large number in order to gratify one or two particular persons. There never was a year in which we did not have all our placing orders filled and shipped by this time. The demand for rubber shoes is so increasing, stocks have been allowed to get so low, and the help problem has become so acute that it is little wonder factories have been drifting behind. The rubber shoe industry is growing rapidly every year and if the fine weather will only hang out a little while longer, we will be able to fix up most of our patrons in good style."

## RUBBER PRODUCTS AND WORLD DEMANDS

Over a billion dollars' worth of rubber has, according to a compilation by the Foreign Trade Department of the National City Bank of New York, been brought into the United States since 1900. The imports of the fiscal year just ended exceed 150 million dollars in value, and amount in quantity to 260 million pounds, against a former high record of 172 millions in 1915 and 132 million pounds in 1914.

Approximately three-fourths of the rubber imported in the United States fiscal year 1916 is the product of the plan-

tations of the Orient, about 120 million pounds coming direct from the East Indies and approximately seventy millions from Great Britain, which presumably draws most, if not all, of it from her oriental colonies. A decade ago only about one per cent of our imports was of the plantation product, the remainder from natural forests, chiefly Brazil.

The development of rubber production by the plantations of the Orient, chiefly the Dutch East Indies, the Malayan Peninsula and Ceylon, has been extremely rapid in recent years. The total of plantation rubber produced in 1905 was but 145 tons, in 1910 8,200 tons, in 1913 42,000 tons, in 1914 64,000, and in 1915 107,000 tons. The amount of capital now invested in the rubber plantations of the world is estimated at \$350,000,000.

The production of rubber from the forests of the world had remained practically stationary until 1915, when a marked decline occurred in the production from the natural forests. The total production of forest rubber was, in 1905, 61,000 tons, in 1910 62,000 tons, in 1914 60,000 tons, and in 1915 but about 51,000 tons. The Brazilian product was in 1905 34,000 tons, in 1910 40,500 tons, in 1913 41,000 tons, 1914 40,000 tons, and in 1915 37,220 tons.

## BULK OF RUBBER FROM BRAZIL

The rubber gatherers in jungles of the Amazon, the Orinoco and the Congo, making incisions an inch and a half long, three-eighths of an inch wide and a half inch deep in the bark of the tropical trees which sometimes attain a height of 60 feet and a circumference of 8 feet. Beneath these cuts the natives attach small cups to catch the rubber milk, which is not the sap of the tree. The average Para rubber tree yields two ounces of milk a day. By coagulation in the smoke of a wood and palm nut fire the milk yields one-third its weight of the prized rubber, the normal annual production of a tree being ten pounds of rubber, and the flow continues fairly constant for a number of years.

# With the Shoe Manufacturers

Pithy Note and Comment on Shoe Matters—What the Makers of Shoes Are Saying and Doing—Shoe Facts and Fancies

PLANS have been prepared for the new factory of the Reliance Shoe Company, Limited, of Toronto, which will be erected in Acton, Ont. The by-law, to grant the firm a free site, and a loan of \$25,000, repayable in 20 years, was carried almost unanimously. The new factory will be of solid brick and mill construction, 40 feet by 125 feet in dimensions, two storeys and a basement. The location is at the corner of Bower and Church streets, contiguous to the Grand Trunk Railway station. The property of the company is 120 feet by 132 feet, so that ample space is left for future expansion.

It is expected that work will start on the new building in a couple of weeks. It will be completed and the plant removed to Acton, and in operation by May next. The

tered trade mark of the firm is "The Canadian Boy" shoe while another is the "Canuck." Men's, boys', youths' and little gent's McKays and nailed, are made, and about 250

P. E. RIVETT, TORONTO

Reliance Shoe Company will have about 15,000 square feet in their new home, more than double their present space. They have been in business about five years, having started at 122 Adelaide street west, Toronto, in November, 1911. About a year later, the company moved to 350 Sorauren avenue, and have made steady progress, occupying double the area that they did a couple of years ago. The regis-

ALBERT J. HARRIS, TORONTO

pairs a day being turned out, but in the new factory the capacity will be 500 pairs a day.

The managing director of the Reliance Shoe Company is P. E. Rivett, who has been "in shoes all his life," coming of a shoemaking family—his brothers conducting a factory at Wollaston, Northamptonshire, England, where Mr. Rivett was born, and learned the art of St. Crispin. His parents are still living in that town, and recently celebrated their golden wedding. Coming to Canada at the age of seventeen years, Mr. Rivett worked for five years in the lasting room of Walker, Parker & Co., and later, went into the retail shoe business in Wychwood, in company with R. Stephens. They subsequently opened a repair establishment at 1088 Bathurst street, to which Mr. Rivett devoted his special attention, but, embarking in the shoe manufacturing business, he sold out his interests to Mr. Stephens, and has since been devoting his attention to the Reliance Shoe Company.

Albert J. Harris, superintendent of the plant, who is also a member of the Reliance Shoe Co., has been with the or-

Your  
Shoes

Prevents  
Your  
Shoes  
from  
Cracking

EVAUNOIL is the only preparation made that will put life into Patent Leather, when finished. Without the strength of its fibre, leather is no stronger than paper. That being so, anything that will give life to the fibre of Patent Leather (being as it is a baked leather) will keep it from cracking like Wax Calf, the leather that retains its strength of fibre. How can this be done? In no way except by penetrating the lacquer or coating of the leather, which Evaunoil will do without affecting the lustre.

ganization since its inception. Mr. Harris is a native of Leytonstone, Middlesex, and coming to Canada was engaged with the W. B. Hamilton Shoe Co., and later with the Weston Shoe Company. He was for some ten years foreman of the cutting and fitting room of the Victoria Shoe Company, Toronto.

Both Mr. Rivett and Mr. Harris are earnest, practical, industrious shoemakers, who will, no doubt, meet with a large measure of success in the new and enlarged home of the company at Acton.

#### RE-ORGANIZATION MEETING OF PERTH SHOE CO.

A meeting of the shareholders of the Perth Shoe Company, Limited, will be held shortly to consider a plan for the re-organization of the business, says the "Perth Courier." Since the company was first organized in 1912 it has undergone several changes, but seems at last on a fair road to success.

The general manager, Mr. G. H. Ansley, and the factory superintendent, Mr. M. J. Sheehy, seem to thoroughly understand the business and have surrounded themselves

G. H. ANSLEY, PERTH, ONT.

with a staff of competent foremen in the different departments. The foremen in turn have developed for each department a staff of assistants that cannot be improved upon in any shoe factory on the continent. As a result of this state of efficiency, it is not to be wondered at that the class of boots produced has shown a wonderful improvement. Formerly the output of the factory comprised lines of shoes that might be classed as staple. When Mr. Ansley took hold of the business he decided to make the Perth shoe known to the Canadian trade as a high class article. A change of this kind cannot be made in a day, and it has taken time to work out plans that will make the product of this factory exclusively of the very highest class of ladies' shoes. To-day the company is in successful competition with American manufacturers of the very finest ladies' shoes, and is the largest factory in Canada producing women's fine Goodyear welt shoes exclusively. The customs duty of between 35 and 40 per cent. offers a favorable opportunity for Canadian manufacturers in this line, provided they can produce the style and quality. In this connection the general manager was most fortunate in securing the services of Mr. M. J. Sheehy as factory superintendent. Mr. Sheehy comes from Boston and has introduced into the

factory a style and a finish that makes the Perth shoe the very last word in ladies' high class shoes.

Having solved and successfully overcome the difficulty of production, the only remaining problem was the question of finance. In order to be able to turn its increasing business and take advantage of favorable opportunities to secure raw materials, greater financial resources became imperative. This has resulted in the present re-organization which will ensure to the company the capital necessary for the development of the business, and will enable the manager to follow up in the most aggressive way the splendid start that has been made during the past few months.

Under the present scheme a new company, with the same name as the old one, will be formed to take over the business. In this new company Mr. J. A. Stewart acquires a controlling interest in the stock and will direct the policy of the business. Mr. Stewart is the president of Henry K. Wampole & Co., Limited, and has other large financial interests. Mr. W. E. Danner, the vice-president of the Wampole Co., is associated with Mr. Stewart in this undertaking and the new blood introduced into the directorate of the Perth Shoe Company will include Mr. T. J. Maher, the secretary-treasurer of the Wampole Co., and Mr. H. A. O'Donnell of the law firm of Stewart, Hope & O'Donnell.

The local shareholders will be pleased to know that the re-organization will greatly strengthen the company and that the prospects of success were never brighter.

#### THE FUTURE OF CATTLE TRADE

A recent despatch from Ottawa, says, the whole world will look to this continent, particularly Canada, for replenishing the supply of cattle, which has been reduced to unprecedented proportions by the war. Means towards supplying this need were outlined by H. S. Arkell, assistant live stock commissioner for the Dominion, in evidence submitted to the Dominion's Royal Commission.

He made several recommendations. The first was an intelligent system of handling the industry. Annual statistics were needed, he said, and not, as now, every ten years. Statistics should also show the quality and condition as well as the number of cattle.

There should be definite periods during the year for marketing cattle, so that the farmers could raise cattle to suit that time. Statistics should be neutral and not biased for commercial reasons.

Information and statistics should also be supplied regarding the condition in competitive cattle-raising countries, such as the Argentine and the United States. Field officers ought to be appointed in Canada, and at least one technically trained man should be stationed in Great Britain to organize the export trade.

He believed that there should be more co-operation between farmers in the cattle trade, as there now existed between those selling eggs and wool. A quarter of a million dollars worth of eggs were sold by one such co-operative organization last year. This had led to an improvement in the product. There should also be sale by grade and supervision of stock yards and exchange and commission agents should be controlled by the government.

#### SHOE MANUFACTURERS BOWLING LEAGUE

An interesting schedule has been adopted by the Montreal Shoe Manufacturers Tenpin League. The season opened on October 20th, and will close on April 20th. The following schedule has been drawn up.

November 3—Ames-Holden, No. 1 vs. Star Shoe; Canadian Footwear vs. Slater Shoe; United Shoe vs. Aird & Son; Wayland Shoe vs. James Muir; Kingsbury, No. 2 vs. Tetreault Shoe; Scout Shoe vs. Ames-Holden, No. 2; United Last vs. Kingsbury, No. 1.

November 10—Canadian Footwear vs. Ames-Holden, No. 1; Star Shoe vs. United Shoe; James Muir vs. Slater

**WHY SHOES COST MUCH MORE**

Comparison of prices July, 1914, and July, 1916, on 22 articles entering into construction of shoes, shows that in two years the average per cent. increase of shoe manufacturing materials was 116 per cent., as follows, says the Shoe Topics and there have been several advances since.

	July 15 1914	July 15 1916	P.C. Inc'se
Tan Calf .....	28	55	96
Black Dull Calf .....	26	50	92
White Kid .....	30	60	100
Men's Glazed Kid .....	24	40	67
Women's Glazed Kid .....	22	38	73
Full Grain Side Leather .....	23	36	57
Patent Side Leather .....	24	35	46
Black Sheep Skins .....	5	14	155
Colored Sheep .....	6	16	146
White Grain Sheep .....	8	16	100
Union Sole Leather .....	38	61	61
Hemlock Sole Leather .....	24	36	50
Women's Cut Soles .....	18	33	83
Men's Cut Soles .....	38	52	37
Duck Lining .....	12	16	33
Twil Lining .....	10	14	33
Men's Laces .....	32	1.45	353

Women's Laces .....	30	1.35	350
Buttons .....	33	50	52
Steel Shanks .....	27	1.45	427
Web Pull Straps .....	1.60	3.00	87
Linen Thread .....	90	1.90	111
Total .....	7.10	15.37	26.09
Average .....	.323	.698	116%

Does this not justify the manufacturer in raising his price? He must if he wants to stay in business, and the same applies to the retailer.

**WAR EXPORTS OF LEATHER AND SHOES**

The exports of leather of all kinds from the United States during twelve months ending June, 1916, were valued at \$80,073,887; against for the same period in 1915, \$65,229,116; and against the same period in 1914, \$36,668,869; an increase compared with 1914 of \$43,405,018.

The exports of boots and shoes during the twelve months ending June, 1916, were 20,358,472 pairs valued at \$47,134,810; for the 1915 period 12,402,727 pairs valued at \$24,696,795; for the 1914 period 9,902,334 pairs valued at \$17,867,234.

The total exports of leather, boots and shoes and other leather manufactures during twelve months ending June, 1916, totaled \$146,613,815; against for the same period in 1915, \$120,727,156; and against the same period in 1914, \$57,466,261.

**NEW POSITION FOR MR. COLE**

John H. Cole, who for the past nine years has been secretary-treasurer of the Maganetewan Tanning & Electric Co., Limited, makers of hemlock sole leather, and of Tobey's Limited, makers of oak sole leather, having charge of the Toronto offices of these companies, is resigning his post.

JOHN H. COLE, TORONTO

On December 1st, Mr. Cole will become manager of Knight Bros. Co., Limited, Burk's Falls, Ont. Prior to taking charge of the Toronto office of the Maganetewan Co., and Tobey's Limited, Mr. Cole had supervision of the office of the Maganetewan Tanning & Electric Co. at Burk's Falls. Many friends, while regretting his removal from Toronto, will wish him every success in his new position.

# SOME RETAILERS MAKE LESS THAN THEIR CLERKS

They Do Not Even Pay Themselves Regular Salary—Simply Take out What They Can and Never Know Where They are at—Stock is All Jumbled up and Ill Assorted—A Simple System of Numbering Lines and Placing Them Properly on the Shelves

**H**OW much money do you make annually out of your shoe business? What do you hope for the future? Are you merely marking time—indulging in dreams, or living in expectation?

Are you wondering how you can increase your trade, reduce your stock, multiply your turnover, and strengthen your connection with the public? No man is in business for his health alone. He is there to make money, and if he has not a balance on the right side of the ledger during the present time, there is something radically wrong with him, his methods, his service or his goods.

How many shoe retailers pay themselves a regular stated salary? In the smaller towns comparatively few. They take out of their cash receipts what is required to keep the house going, buy clothes, etc., but they do not have a fixed drawing account of so many dollars per week. Too often the boss "accepts" what is left after paying the rent, the shoe repair man, his clerks and his delivery boy. Yet why should not a retail footwear business pay its owner a regular salary, and a good one at that? If a young man who has previously been earning \$20.00 a week in the service of others launches in the shoe line he should set aside weekly this sum from his business, and collect it, too. The business should, in addition, yield him a return on his investment.

## Where Does the Fault Lie?

What is the use of a man being in business, with all its attendant worries and cares, its difficulties and dangers, if he does not get more out of it than he could in working for others? If he is not going to reap a return on the money he has put into the game, and if he does not see any prospect of receiving more personally in the way of salary, than when he was a clerk, he should remain an employee. Then he would be drawing down quite as much and be free from the responsibilities of running a store and its stock.

Make your business pay your salary, and if it won't do that, there is something radically wrong with you, or it.

There may be many things at fault. Perhaps your goods are too low priced, your extend too much credit, your stock is ill assorted, and you are always out of sizes. Some men never know where they are at in the matter of goods. Their shelves look like those of a variety store; they have no system and trust to memory and chance to find what they want. They are like a ship at sea in a storm without a rudder, compass or chart.

Have some system, do things decently and in order. Don't buy haphazardly, and know what you have in stock.

Writing to the SHOE AND LEATHER JOURNAL, a leading shoe man, in the Middle West, tells of his system which is as follows:

## Dividing Stock into Sections

Any "system" to be at all thorough, may appear at first sight, to the smaller dealer, to be somewhat intricate, but it will be found worth while to familiarize oneself with details. We will suppose all lines are received in "uniform" cartons bearing the firm's (not the maker's) label. One

plan is to divide the stock into sections and apportion a set of numbers to each section, as follows:

Infants' lines.....	100 to 298
Child's lines.....	300 to 598
Misses' lines.....	600 to 898
Youths' lines.....	900 to 1198
Boys' lines.....	1200 to 1498
Women's lines.....	1500 to 2000
Men's lines.....	2000 and up

Line numbers to be clear and easily followed might read: 600, 602, 604, etc., the hundred and fifty numbers thus provided will probably be found ample in any of the lines, except the "men's," where there is no succeeding line to limit its extension.

In the event of line 488 having been repeated on and coming in, finds seven pairs of the original lot still on hand, the new lot takes the even number 488, the left over lot being marked X after stock number, and reading 488 X. Our section numbers must again be sub-divided according to the different leathers, and fabrics, for instance, men's patents, 2000 to 2200; tan calf to 2300; gun metals and calf to 2600; vici kid 2800; grains to 2900; splits to 3000. All the other lines, women's, boys', youths', etc., to be subdivided.

The use of numbers will be found very convenient for the different lines in stock in your store.

We now come to the "stock arrangement" wherein the foregoing is so essential. The only proper shelving is the single carton system from 9 to 12 shelves high from base-board up, the divisions between holding eight men's or 10 ladies' cartons. One side of the store name down to a certain section, men's department; then follows boys', youths', etc. Similarly, the other side: women's, misses', children's. Beginning at the front of the store in the men's department we now find if our stock has been numbered as above, line "2000," our best patent button to sell at \$8.00 (always running button boots before lace), beginning with smallest size, 4 D, is placed on lower shelf at left and follows to right and then continuing in shelving from left to right until all of the 2000 D's are placed, then begins 2000 E size 4, and follows along until exhausted, no matter where in the shelving. Line 2002 the smallest size and width immediately follows, and so with line 2004, working from our best to our cheapest patent button, which is followed by our best patent lace working down the price grade and up in numbers.

If the above schedule is carefully followed it will be evident that our numbers will run consecutively higher as we progress down the store, the better lines being to the front, and where our patent lace ends, our tan button begins, and so on. It goes without saying that all stock is entered in the stock book on being received, as 60 pairs, line 2284, or whatever the number may be, and each pair sold is checked off from the sales slips, which show the number of line disposed of, always revealing how certain lines stand.

This system of placing stock is like turning the pages of a book, and just as simple, if you keep in mind the schedule. Patents, tans, gun metals, vici kids, grains, splits, buttons, always preceding lace, running your \$5.50 tan button, then your \$5.00, then \$4.50, right down to the cheapest tan button before beginning tan lace, \$5.50, \$5.00, etc.

## A REAL STICKER

is what you want when you buy paste. That's why you should buy the best made.

### BRODIE'S PATENT FLOUR PASTE

It never dries out, never releases its grip and spreads with an ease and smoothness that is really unusual. Try a keg — it'll be a revelation of paste perfection.

BOSTON OWNERS EVERETT

# AMONG THE SHOE MEN.

At the next meeting of the Toronto Shoe Repairers' Association, it is understood that the new schedule of prices, which went into effect about two months ago, will be revised, and that, owing to the sharp increase in the cost of sole leather, tap soles, etc., another advance of about 10 per cent. will take place. The membership is now nearly 100, and is growing steadily. Most enthusiastic gatherings, which are well attended, are held every two weeks.

Mr. Callaway, assistant to the president of the Regal Shoe Co., Mr. Butterworth, Regal agency sales manager, and Mr. Reid, superintendent of the Whitman, Mass., factory of the company, were in Toronto during the past week on business.

Elmer Poyer, manager of the Canadian Arrowsmith Manufacturing Co., Niagara Falls, Ont., left this week on an extended business trip to the coast.

Wm. J. Chinnick, late with Gales Shoe Store, Ottawa, has taken a position in the Walk-Over Boot Shop, Yonge street, Toronto.

The Canadian Shoe Findings Novelty Company, 2 Trinity square, Toronto, have been appointed selling agents in Canada for the "Toledo," which is manufactured by the Toledo Button Machine Company, of Toledo, Ohio. This machine uses any kind of wire, fastens all sorts of buttons, and is easily operated.

Bert Grosskurth, of Toronto, who represents the Slater Shoe Company, is receiving the congratulations of his friends in possessing another son and heir.

Eldon B. Keith, treasurer of Geo. E. Keith & Co., Brockton, Mass., spent a few days in Toronto recently on business.

Leon Fischel, 420 Prince Albert Avenue, Montreal, has been appointed representative in that city for the Canadian Shoe Findings Novelty Company, of Toronto.

The King Shoe Co., Toronto, who some time ago completed their large contracts for army shoes, are now manufacturing a line of children's McKays, and have sufficient business on hand to keep the factory fully employed for several weeks.

L. C. Van Geel, of the Tillsonburg Shoe Co., Limited, Tillsonburg, was in Toronto last week on a business trip.

The many friends of D. G. Hardie, of Hardie, Redmond & Co., Limited, 189 Church street, Toronto, are congratulating him on the advent of a little daughter in his home.

The new Walk-Over Boot Shop, which will be opened at No. 10 St. John street, Quebec, early next month, will be one of the most attractive and inviting of any footwear establishments in the east. The store is 26 feet by 80 feet, with mezzanine floor and mahogany fixtures. The regular Walk-Over front, which is typical of all their stores, is being installed, and both the exterior and interior are exceptionally neat. R. Gore, who has been associated with the Walk-Over Boot Shop, St. Catharine street west, Montreal, for some time, has been appointed manager.

Emile Larose, sales manager of the Canadian Footwear Co., Limited, Montreal, spent a few days this week in Toronto, Hamilton and London on business.

Fire broke out recently in the west cupola of the high dry loft at the works of the Acton Tanning Co., Acton, Ont. The building was 115 by 60 feet. The first two floors were of stone and the superstructure of three storeys of frame, metal clad. The building, which was entirely destroyed,

contained many thousand sides of harness and belt leather, some military leather, the factory's store of machinery and parts of repairing, etc. The loss is estimated at \$150,000, and is partially covered by insurance.

H. W. Pearson, manager of the Toronto branch of Ames-Holden-McCready, Limited, has returned from Montreal, where he spent a few days recently on business.

## MR. CORSON TAKES STEP HIGHER

Clayton S. Corson, who has been the aggressive sales manager for the Regal Shoe Co., Limited, Toronto, for some years, has been appointed general manager of the company and entered upon his new duties this week. Many friends in the trade will congratulate him on his well deserved promotion. C. H. Chute, who has had a wide experience in leading factories in both Canada and the United States, and latterly has been in charge of the cutting and fitting rooms, has been made superintendent of the Regal plant, which will shortly be removed to the spacious and well

CLAYTON S. CORSON, TORONTO

appointed new home of the company at the corner of Bathurst and College streets, Toronto. Several additions have been made to the traveling staff of the company. C. F. Schuszler, who has been looking after Ontario, will cover Quebec and the Maritime Provinces. W. R. Billings and W. E. Butterworth, who have been with the Regal organization for a considerable period, will represent the firm in the Western provinces, while Wesley Matson, who has been in the employ of the company for several years, will travel in Ontario. The new spring samples of the Regal Shoe Co. are the most representative and distinctive that they have ever turned out, and embrace several new lasts and patterns that set a top notch mark for "the most popular shoe in the world."

The Dominion Rubber System has eighteen employes who have given from 35 to 48 years of service at the Canadian Rubber factory, Montreal. In a recent issue of "The Dominion," there appear the pictures of five employes who have retired from active work, and are now drawing pensions from the company. They are J. Stuart, aged 72, with 40 years of service; A. Charbonneau, aged 83, with 49

years of service; A. Morel, aged 82, with 47 years of service; A. Groleau, aged 79, with 51 years of service, and J. E. Stewart, aged 72, with 48 years of service.

The shoe store of S. Aizanman, Montreal, was damaged by fire, recently.

L. Jones' shoe repair shop was burned down in a recent fire at Aylmer, Ont.

Day, Ferguson & McDonald, solicitors for the liquidators of the defunct Chatham Shoe Company, Chatham, Ont., it is understood will enter an action against the City of Chatham, at the November sittings, to have an order issued permitting them to dispose of certain fixtures in the building which the liquidator claims are chattels and not fixtures as embodied in a mortgage which the City of Chatham holds on the property. The court will also be asked for an order to proceed with a sale of the building under the Moratorium Act.

P. A. Doig, sales manager of the Star Shoe Co., Limited, Montreal, spent a few days in Toronto recently on business.

Four fires, three of them about an hour apart, broke out in the Canadian Consolidated Rubber Company's plant at the corner of Notre Dame street east and Papineau avenue, Montreal, recently, and as a result the detective department is making an investigation. That the fires must have been caused by an incendiary is indicated by the discovery of a quantity of white powder near the scene of each outbreak. Samples of the powder will be analysed.

An echo of the fatal accident which occurred in Pouliot's tannery, Quebec, recently, was heard in the courts, when a claim was entered under the Workmen's Compensation Act, on behalf of Dame M. Bernier, widow of Elzear Poulin, for \$2,025 damages against Pierre Pouliot, proprietor of the tannery. Poulin fell into a vat while working in the tannery and was fatally burned by chemicals.

Fred. H. Ahrens, of Charles A. Ahrens, Limited, shoe manufacturers, Kitchener, Ont., spent a few days in Boston, recently, on business.

W. J. Detweiler, shoe retailer, of Sault Ste. Marie, spent a few days in Montreal, Toronto and Quebec recently lately.

The Universal Button Fastening and Button Co., of Canada, Limited, with a capital stock of \$20,000, and head offices in Walkerville, Ont., has been incorporated, to manufacture, sell and deal in buttons and button fasteners of every description, and automatic machines for attaching buttons and fasteners, and to place on the market articles composed of metal, cloth, wood or other materials.

The Victor Box Toe & Counter, Limited, has been incorporated, with a capital of \$50,000 and headquarters in Montreal. The incorporators are A. Vigneault, J. A. Hamelin, Emile Delorme, J. B. Trudeau and others. The company is empowered to manufacture, buy, sell and carry on a boot and shoe business, as well as make and deal in lasts, stiffeners, shoe counters, box toes, buckles, laces, hooks, buttons, soles, eyelets, etc.

Z. F. Roy, 113 St. Joseph street, Quebec, who handles trunks, travelling bags, and leather goods, has opened a shoe department and has put in a representative stock of Slater shoes.

In the advertisement which appeared in the October issue of the SHOE AND LEATHER JOURNAL, of Underhills, Limited, who have factories at Aurora and Barrie, it was inadvertently stated that one of the firm's specialties was Warren's, Misses' and Girls' "Turns." The latter word should have read "McKay and Standard Screw."

The many friends of G. A. Bickell, manager of the Toronto warehouse of the Barrie Tanning Co., Barrie, Ont., are congratulating him on the advent of twins—a son and a daughter.

W. F. Locke, manager of the shoe department of T. Eaton Co., Winnipeg, was in Toronto last week on business.

A. W. Donovan, of E. T. Wright & Co., Rockland, Mass., spent a few days last week in Toronto, calling upon the trade.

An automatic fastener for lace boots that is simple is shown in a fall sample. It consists of a lattice of tiny wires on either side of the opening of the boots, and takes the place

of laces or buttons. A tiny key locks or unlocks the lattice as it is pulled up or down. When the fastener is unlocked the shoe is opened just as in a lace boot. When it is locked it is fastened securely to the foot. It is something new and will save a lot of time and labor for women in putting on their shoes, especially in the high shoes worn to-day. As the fastener is automatic, it will not let out, as will laces, to fit a large ankle, nor can it be set over, as can buttons.

A recent despatch from Chatham, Ont., says: Sir George Gibbons, K.C., of London, has entered an appeal on behalf of his clients in the action of the London Shoe Company vs. Levin et al. The action was heard by His Lordship Chancellor Boyd at the fall assizes, held in this city about a month ago, His Lordship dismissing the action as against the defendant (Goldblatt). The action was to have a chattel mortgage made by the defendant Levin in favor of the other defendant, Mrs. Goldblatt, set aside on the grounds that the mortgage was given to defraud the creditors of claim against Levin, a Wallaceburg merchant. The action will be heard in the Appellate Division, Toronto.

A petition for a winding-up order has been made in the case of the Merit Shoe Shops, Limited, Montreal.

F. H. Meinzer, manager of stocks for the Miner Rubber Co., Montreal, spent a few days in Toronto recently.

Mr. Desmarais, of La Duchesse Shoe Co., Montreal, called upon the trade in Toronto last week.

Alex. Duncan has started in the boot and shoe business in Elnora, Alta.

C. G. Marlatt, of the Marlatt & Armstrong Co., Limited, Oakville, Ont., left last week on a trip to England, where he will visit his son, Capt. K. D. Marlatt, of the 4th Canadian Mounted Rifles Regiment, who has been fighting in France for some time but has been granted a few days leave of absence.

W. A. Donald, of Donald, Carman & Mudge, sheep skin tanners, Boston, spent a few days in Toronto last week on business.

R. Marion & Co., shoe dealers, Montreal, have dissolved.

The advance in all kinds of leather continues. Side leather went up two cents a foot during the past week, while raw sheep skins advanced \$3.00 a dozen.

Walter R. Stewart, acting manager of the St. John branch of the Canadian Consolidated Rubber Company, Limited, left for Halifax on a business trip. He is looking after the management of the branch in the absence of Lieut. Colonel A. E. Massie, who is in France with an army service corps unit.

F. H. Braid, formerly in the welting department of the John McPherson Co., Hamilton, has opened a shoe repair establishment on Roncesvalles avenue, Toronto, and has installed a twenty-two foot, Model "N" outfit, with stitches supplied by the U. S. M. Co.

The name of the Berlin Rubber Manufacturing Co., Limited, has been changed to the Kitchener Rubber Manufacturing Co., Limited, and the Berlin Felt Boot Co., Limited, is now the Kitchener Felt Boot Co., Limited.

A. D. Thornton of the head office staff of the Canadian Consolidated Rubber Co., Montreal, has had a little stranger arrive at his home via the stork route, in the person of Jean Meredith Thornton. Mr. Thornton was also recently appointed a Justice of the Peace.

G. E. Wight, of the traveling staff of the Quebec branch of the Canadian Consolidated Rubber Co., recently spent a few weeks holidays in New York State.

FOR SALE—Shoe shelving, oak faced in good condition; men's, 49½ feet; ladies', 52¾ feet. J. J. McKillop, St. Thomas, Ont.

## Eight Reasons Why You Should Sell Arch Supports and other Foot Specialties

- 1st. The Arrowsmith line of Arch Supports and other Foot Specialties is complete, covering everything necessary for the correction of human foot ailments by mechanical means.
- 2nd. The quality of our goods is superior to any other line in material and workmanship.
- 3rd. Our specialties are orthopedically correct in every detail, the result of twenty years of experimentation and practical experience.
- 4th. The needs, uses and benefits of our appliances are well known to the buying public, as a result of years of systematic advertising. Our advertising is not done spasmodically, with a great splurge—we advertise in a steady, earnest manner all the time. The word "ARROWSMITH" is known as the name of a staple article, not a money-making imitation of something "worth while."
- 5th. Our guarantee is binding. Dealers know that goods which are unsatisfactory because of imperfections in material or workmanship will be replaced without question.
- 6th. Arrowsmith service is service unsurpassed. Every order, no matter how small, receives prompt and careful attention.
- 7th. We protect the interests of the legitimate Shoe Dealer by refusing to sell our goods to Drug Stores, Shoe Shine Parlors, etc. We are the only manufacturers of foot specialties who have adopted such a policy.
- 8th. Our goods are "Made in Canada."

An increase in prices before next spring seems inevitable.

A word to the wise is—unnecessary.

### NEWSY BRIEFS FROM QUEBEC

Miss Flore Ida Marois, daughter of Alf. Marois, was married on Tuesday, October 24th, to Nap. Falardeau, son of Cyrille Falardeau, tanner, of this city. Mr. Falardeau is manager of his father's shop. There was a large attendance of relatives and friends at Notre Dame du Chemin Church, where the ceremony took place, and the happy couple left for a wedding trip to New York.

Duchaine & Perkins, shoe manufacturers, are installing a sprinkler system in their establishment.

Naz. Fortier, tanner, is adding another storey to his factory, in order to take care of his increased business.

Hockey boots will be more popular this year than last. J. E. Sanson, Enr., who make a specialty of these outing shoes, report that the demand is much in excess of that of the corresponding season of 1915.

The price of goat skins is very high. This skin is always in great demand, and it is very difficult to procure at the present time.

Dark colored calf is 60 cents a foot, and tanners do not want to take over orders, on account of the scarcity of colors and materials.

Shoe retailers declare that it is easier to sell a \$7.00 boot this year, than in previous seasons, because people are now accustomed to pay more money for shoes than before.

Shoe repairers are very busy, but they complain that it is very hard for them to increase their prices, as the public will not believe that the figure for sole leather has gone up to so great an extent.

Jos. Fortin, shoe repairer, John Street, and H. Auger, of Sherbrooke, P.Q., have installed in their shops, Progressive Outfit, sold by Dupere & Garant, the representatives of the company. Shoe repairers are now beginning to understand that it is in their best interests to install repairing machines, as they are thereby saved both time and money.

The following visitors were in town recently—H. C. Parker, of Parker, Irwin, Limited, Montreal; Chas. E. Alpress, of Wm. H. Horn & Bros., Philadelphia; F. H. Dupre, of the Independent Box Tce Co., Montreal; R. E. Woodward, of F. E. Woodward & Sons, Lachine, Que.; L. A. Dalrymple, of J. A. Dalrymple & Co., Haverhill, Mass.

### RUBBER MAN TALKS TO ROTARIANS

"Production, manufacture and uses of rubber" was the subject of a highly interesting and instructive address by T. F. Davis, of the Canadian Consolidated Rubber Company, at the Rotary Club luncheon in the Halifax Hotel, Halifax, recently.

Mr. Davis gave a description of rubber from the time the trees were barked and the sap obtained until the finished product was placed on the market. Rubber was first heard of among white people in the year 1493, when Christopher Columbus brought a ball of it to Spain. This ball had been used by the Indians in a form of baseball. Rubber is mentioned in history only at intervals during the next hundred years.

It was comparatively recently that it was discovered that rubber could be vulcanized with rubber and could be used otherwise than as an eraser. Later it was discovered that by a combination of rubber, sulphur and heat a composition was obtained which would not become sticky and melt. This is the modern system of vulcanization, and each of the big manufacturing concerns had their trade secrets of the process.

The value of rubber in the present war had been demonstrated by the desperate efforts of the Germans to smuggle rubber into their country. Rubber had been found in bags of coffee which had been consigned to Germany. And when a sailor sank his teeth into a honeycomb, a large quan-

tity of which product formed part of his ship's cargo, he discovered that while there was honey in the comb the cells were made of rubber. Germany's importation of rubber before the war made up twenty-four per cent. of the world's production; her importation now is only four per cent. of the world's production. The scarcity of rubber in Germany was one reason for the supremacy of the British in the air, for rubber was absolutely necessary in the construction of aeroplanes.

### DAILY NOTICES OF SHOE ADVANCES

"I have been in the shoe game for seventeen years," remarked a leading representative of the trade the other day, "and in all that time I have never seen prices advance as rapidly as they are doing at present. I dread to open the mail each morning, owing to the number of notices of increases on the various lines which such missives contain. Practically every leading shoe firm has again withdrawn prices. In a few days a new price list will prevail, and this lasts for a decidedly short time, and is again recalled. I am not an alarmist, but I do not know where this thing is going to end. However, all companies are practically in the same boat and we all have to do the best we can under the present trying circumstances."

### PROGRESSIVE FOOTWEAR MANAGER

H. Vigneault, manager of the shoe department of James A. Ogilvy & Sons, Limited, Montreal, is meeting with splendid success in this responsible position. Exceptionally well qualified by sixteen years of experience, he is well acquainted with the footwear game from every angle. He

H. VIGNEAULT, MONTREAL

began his career with O'Sullivan Bros. Co., Lowell, Mass., shoe merchants and rubber heel manufacturers, and worked for them ten years as a salesman. Coming to Montreal in 1910, he entered the employ of Geo. G. Gales & Co., and was with that firm until he assumed his present post. Mr. Vigneault opened up Gales East End Store in 1912, and managed it until last December. He is progressive, energetic and capable, and has always made a success of anything which he has undertaken.

## Having a Brand

Did you ever think that when a manufacturer makes a special brand of shoes it means that he will be jealous to preserve the integrity of that brand. He will see that the best material shall enter into the shoes, that they shall be made right, finished well and be in every respect worthy to represent the name they bear and the house that makes them.

We have staked our business reputation on the VASSAR and ALTRO brands for women, and BERESFORD and MINISTER MYLES for men, and that means a whole lot to us.

BE SURE YOU SEE OUR

## SHOE AND LEATHER CONDITIONS

**The Situation to Date in Leather and Shoes—Market on Raw Materials  
Feverish and Uncertain—Impossible to Get Quotations Except from Day to  
Day—Shoe Selling a Matter of Getting the Stock**

**S**INCE the last issue of the SHOE AND LEATHER JOURNAL the situation in the shoe and leather trades has become more and more acute. Hides, both native and foreign, have gone steadily upward in price, heavy native packer steer hides having been sold at thirty-two cents and country buffs at twenty-seven cents on the Chicago market. The dry hide market is almost unquotable (both literally and figuratively) with Buenos Ayres selling at over fifty cents. Raw kid stock is almost unprocurable and the prices are such that it would seem as though this branch of the leather trade would be almost put out of business. Shoe manufacturers are receiving every week notices to the effect that orders cannot be filled at any price.

Leather these days is climbing steadily upward. Sole leather has gone up about twenty cents in six weeks and is still soaring. Every other day notification is received of withdrawn quotations and further advances. Calfskins show the sensational tendencies that they have manifested for some months. American quotations run from fifty to sixty cents for black and from sixty to eighty cents for fancy lines. The worst feature of the situation is that even at the high prices manufacturers cannot procure adequate supplies.

Shoe manufacturers are having in one way a serious time with their customers. They find it practically impossible to fill orders as usual and are compelled to employ extra correspondence help in order to keep explaining the difficulties of the situation. In some ways the remarkable circumstances surrounding shoe selling are beneficial, as they help to weed out "slow pays" and moderate the captiousness of kickers. Manufacturers are thus able to discriminate in their sales. Business in novelties and side lines is being curtailed and more attention devoted to staples, which are selling well. Even in heavier upper stock, however, it is becoming more difficult to secure adequate supplies and altogether the shoe manufacturer is up against a situation the most complex and trying in the history of the trade.

The retail shoe trade has enjoyed this fall a run of trade that has been practically phenomenal. With constantly advancing prices dealers have been able to increase their trade steadily as people do not seem to mind the increased cost of their footwear. Mechanics who were earning two and three dollars a day are now getting twice that and with the increased cost of all kinds of merchandise they seem to take the advance in shoes as a matter of course. For years it used to be said that no matter what went up shoes remained on the same dead level. Today footwear as well as everything else has had to bear the burden of the tremendous drain put on staple products by war conditions.

The rubber people, as well as the repair shops, are profiting to some considerable extent by the high prices of shoes and have inaugurated a campaign pointing out the opportunities rubber footwear hold forth for the saving of leather these days. The recent winter weather created such a boom in rubber shoe business that for a time manufacturers and jobbers were almost unable to cope with it. The present year will prove a record one in this line.

Just now the motto of the retailer should be "BUY ALL YOU CAN—SELL ALL YOU CAN—SAVE ALL YOU CAN." For after all these extraordinary conditions cannot last forever.

# WHO WILL BE FIRST TO MARKET ALL FABRIC SHOE?

The One Thing Needful to Give the Public Footwear at Reasonable Prices—Substitutes for Leather are now so Numerous, Strong, Varied and Durable that their Use is no Longer an Experiment—Appearance, etc., are all that Could be Desired

By J. R. WINSTON

WE are the slaves of custom, the inheritors of the mistakes of the ages. No,—this is not a dissertation on the sublime destiny of man, or, on the origin of sin, but just a little talk on present shoe conditions. In view of the present high prices of footwear we want someone with courage and confidence to come out and offer the public a shoe that can be purchased at a reasonable figure, say three or four dollars, instead of eight or ten. The only difficulty is in locating a man who has the assurance and gumption to make shoes different from the other fellow. There is no inspiration like that of an ideal, and as soon as that ideal gains a firm foothold in the mind of some ambitious maker of footwear, who can back up his product with effective and attractive advertising, we will see a reform in the matter of shoemaking, shoe materials and shoe prices.

## People Cannot Afford Leather Shoes

I am not accusing shoe manufacturers of making large profits. I know that the cost of everything entering into the build of a boot, and all kinds of labor, are very high—never so high as now, and are aeroplaning every day. The people cannot pay the price—at least a great many of them are unable to do so. True, there have been increases in wages, but this applies principally to the mechanic, the munition worker, and perhaps, the day laborer. There is, however, a vast army of men, such as bookkeepers, office hands, warehouse men, and hundreds of other employees, who since the outbreak of the war, have been drawing the same salary, and yet they have to face, as serenely as ever, the high cost of living. You can only make a dollar go so far, and beyond that point, you cannot stretch it. While wages in certain lines have increased from 20 per cent. to 40 per cent., and mayhap more, yet I will venture to say that the average advance spread-over on a number of people engaged in multiplex occupations of civil life is not more than 15 per cent., and yet shoes have jumped up in cost fully 50 per cent., and not only shoes, but many other commodities.

One reason I am talking on shoes is that when I said that we were slaves to custom, I meant every word of it. Why should we wait until an animal attains a certain age, and then kill it, in order to obtain its hide—have it tanned and finished, and then put on the market, and finally converted into shoes; and more particularly so, when the number of cattle is decreasing at the rate of 10 per cent. every year, and the population increasing at the rate of 20 per cent. Something is bound to snap somewhere.

## All the Qualities Desired

I believe that the time has come when the numerous materials at hand, some of which so closely resemble leather as to be practically indistinguishable from it, and have all the smoothness, finish, appearance, texture and durability of calf or kid skins, should be universally used. There are cloths and canvases for upper stock, and fibre, and rubber compositions for bottoming purposes that are waterproof and sweatproof, that cut without any waste, and make up splendidly. These afford reliable and satisfactory substitutes, and from them stylish, dependable and comfortable footwear can be made at one-third the present price or less of leather creations. If necessary a leather sole can be used. In fabrics, all colors and finishes, such as suede, buck, etc., can be easily obtained and leather facings, saddle

straps, collar, cuffs, tips, etc., employed if necessary for purposes of ornamentation.

A shoe built of reign-skin, shu-skin, snuff canvas, corkscrew cloth, hair cloth, melton beaver, cravenette, Venetian cloth, and a dozen other materials with special weave and treatment can be made much handsomer, far more serviceable and with longer wearing qualities than the leather shoes we have to-day. On some of the cheaper grades of shoes the use of genuine leather has become practically prohibitive, and the all-leather shoe will soon be out of the grasp of everybody, except the wealthy or the highly paid residents of a community. With so many substitutes and materials, particularly adapted to shoe work, that answer practically all purposes of leather, their use has become increasingly popular, and for tongues and facings, many firms a few years ago, who would have scorned the employment of cloth, are now ready converts.

## Get Away from False Conceptions

Of course, it is hard to break away from old traditions, to launch a new idea and carry it out to a successful conclusion. The infinite resources of cloth are much more than those of leather, and the creations that could be made out of fabrics would surpass anything ever placed upon the market. Shoes could be bought from two to five dollars, embodying every point desired, and the only leather portion need be the soles, but even in this, there are now such admirable and serviceable substitutes for bottom stock, that already the manufacturers are using them to a great extent. One particular product has now passed the experimental stage, and that is fibre or composition soles. They meet every possible requirement. The age of specialization is here, and the substitutes for leather never possessed such merit, strength, smoothness, finish and variety as they do at the present time. Why, only a few years ago, the average merchant scouted the employment of fibre, felt or composition, box toes, counters and insoles, but the use of them has now become so general and they are so satisfactory that few complaints, if any, are heard, and these from certain high-minded individuals, who allege they never buy anything but a solid leather shoe. When told a solid leather box toe, counters and insoles cost them ten to thirty cents more per pair, they readily change their attitude, and declare: "never mind, I guess they will answer, after all."

## Fabric Shoe Bound to Come

Take it from me that the cloth shoe is bound to come. The only difficulty I see in marketing it is that its purchase by certain people might at the present time be looked upon by others as savoring of the penurious or the too economical. But leather shoes are going to go so high in price, that any offerings possessing as much style, snap and individuality should be warmly welcomed and endorsed. It is merely a process of education and swinging preconceived ideas around to a certain point. The manufacturer who will take a bold stand, who will come out with an all-cloth shoe, at a reasonable price, and give it a trade mark name, announce in the trade journals and the daily press what he is doing, to contribute in keeping down the high cost of living, will, within a very few years, be hailed as a reformer and a deliverer—a true benefactor.

# STUDYING HUMAN NATURE IN THE SHOE STORE

The Ability to Quickly and Correctly "Size Up" Customers is a Valuable Asset in Successful Salesmanship—How Differently Dispositioned Customers Should be Given Attention—Men Generally are More Easily Satisfied than Women

**W**HAT constitutes success in salesmanship? Some will name certain qualities and others will mention different ones.

You ask Mr. Green, the shoeman, what he regards as the essential qualities of a good clerk, and he will tell you it is in having expert knowledge of fitting, and a thorough acquaintance with the stock, a pleasant manner, and an obliging disposition. Ask Mr. Brown, further up the street, and he will declare that, while these characteristics are all important, the chief requisite is in an ability to size up customers—that no two patrons are actually the same, and the highest paid salesman is he who is astute and ingenious—who can accommodate himself readily to circumstances, think rapidly on his feet, read human nature quickly and correctly, and in general, anticipate a customer's wants, and help him or her tactfully and sympathetically to come to a decision, and close a sale.

In a shoe store one has to wait upon all classes of people—the enthusiastic, the lukewarm and the ignorant; the cranky, the captious and the critical; the foolish and the wise; the erratic and the phlegmatic; the pompous and the sedate; the virtuous and the sporty; the bashful and the vivacious—in fact, there is no better school for reading character, and meeting every representative on the highway of life.

"I would rather wait on men, as they are not inclined to be so fussy or particular and do not go around from place to place shopping merely to put in the time as some women do," said a veteran retailer. "I admit that when you get hold of a pernickety or finical man he is a 'pippin,' to use a slang expression. There are two classes of male customers that I detest—one thinks that he knows all about shoes, and values. He informs you about the weak points in every boot that you present, telling you exactly what styles you should stock. He seeks to let you know that he knows something about leather and insoles and counters and linings and box toes, for he had a nephew or grandfather in the shoe business at one time or he worked in a factory or a wholesale establishment. The other chap is one who wants to squeeze his number ten foot into an eight shoe, or declares that your shoes are old style, or that Blinkens, down the street, keeps a much nicer assortment. He fusses and fumes around and acts the part of a cissy or a cad. Most men, however, are sensible, thoughtful buyers.

## The Professional Female Shopper

"I believe that I can fit and sell two men while I am attending to the pedal wants of one woman. It is not unusual for a certain feminine type, who has plenty of time on her hands or a few dollars to spend, to go around from store to store. In some places they call these females 'professional shoppers' and in others 'crows,' for they seldom buy and are only looking about. They will stand outside a while and then will come in with a remark, 'I want a pair of dainty evening slippers. There is a style in your window that looks very nice, but I do not think that you can fit me. In fact, I am sure that you cannot, because I have been around and none of the other stores have my size or width in the kind that I desire. However, I would like to see your styles in satin or kid slippers.'

"You might as well make up your mind at first that if you sell that woman you are a dandy. You can rarely if

ever induce her to take off her shoe to be fitted. No, she will not even be seated. She will look at each shoe that you present and find some fault, imaginary or real, with it. The heel is too high or too low, the toe is too broad or too narrow. If the shoe is all right then the price is higher than she cares to go, or she can do better, she thinks, down at Tompkins'. Of course, you have to be polite to such visitors, but if there are other live 'prospects' in the store do not waste too much energy on these fair, time-killing callers, who merely want to view the styles and 'are not buying to-day.' 'Only looking around,' they assert, with every confidence that 'you cannot suit them.' Their mind is negated on this point and you can seldom convert them.

## First Get Your Customer Seated

"Do you know that there is a knack in selling shoes. If a caller comes in I first endeavor to have her take a seat and then proceed to remove her shoe. I pass some general remark, perhaps about the weather.

"I seldom ask the size and am speaking of women customers. I endeavor to get a glance at the lining and find out the size and width of the old shoe. Then I inquire politely if the pair that she has been wearing have given satisfaction or are comfortable, and if I receive an affirmative reply, I next ask if she would like something similar or would she prefer a little shorter vamp, a higher cut or a more receding toe. I am then fairly into the problem of selling. In the meantime I have noted if there is any foot trouble or any peculiarity in the wear of her shoe. I can generally make a sale with a customer who will be seated and allow herself to be fitted.

"Talking about sizes, I see that some shoemen advocate using the measuring stick on all parties. Now, that is not advisable. If a young girl comes in and tells you that her size is four and you take down the measuring stick she is in-

## COULD WEAR MOST ANY SIZE SHOE

Hannah, the old family servant, was sitting with her feet propped on a box when the daughter of the house entered and, impressed with the enormous size of the woman's feet, asked what size shoes she wore.

"Well, Miss Edith," replied Hannah, "Ah kin wear eights. Ah giner'lly wears nines. Dese yere Ah's got on now am twelves, an' de good Lawd knows dey hu'ts me."

clined to grow indignant and thinks that you doubt her word. It is tantamount to saying that she does not know her size. If you went into a haberdashery store to buy a stand-up linen collar and the salesman asked you what size, and after telling him he brought out a tape measure and started to place it around your neck, you would very soon advise him of what you thought of such an insulting act on his part and beat a retreat. So you see that it is not wise at all times to use the measuring stick. You must be a student of human nature to be a successful shoeman to-day.

"It is often in the way you say a thing. If a shoe is a little large for a woman who takes a fancy to the last, and you bluntly exclaim that you can insert an insole and then you are sure the boot will fit, she may retort, 'I will not wear a hot, heavy insole.' But if you remark pleasantly, 'Now, I can place one of our light, zephyr-weight fillers in the shoe and it will, I am sure, then give you every ease and comfort,' she is not likely to object. Yet, perhaps, there is no more difference between a zephyr-weight filler and a canvas insole than there is between a violin and fiddle, yet there is a distinction in the sounding of the words themselves. Violin is a much more dignified title for 'the king of all musical instruments' than is a fiddle, and filler sounds more pleasing and comfortable than insole.

#### Soon Learn to Read Customers

"I can generally tell by the way that a woman comes into the store whether she is going to buy or not. If I know by reputation that she is a mere curiosity shopper, I have worked a rather agreeable revenge on a few of this sort. I will show her a shoe which I know is smaller than she can wear. It will perhaps be a size three, C width, in a kid, welt, with Louis heel, long vamp, artistic perforation, and wing tip. It will be smart and dressy, one of my best selling lines which I retail at six dollars. She will examine it critically, express admiration for it, and perhaps ask the price, and I will tell her three ninety-five. She knows enough about footwear to recognize that at this figure it is a decided bargain. Then she becomes interested and wants perhaps a four and a half, E width. I inform her I am very sorry, but that I am just out of that size. Of course, she will not want any other that I have in stock, as you know an eccentricity of human nature is for a customer to want always just what you have not got, and want it badly. If such a caller was a regular purchaser I would soon take means to secure if possible her width and size, even if I had to send to another store, but with the professional shopper, never.

#### Sensitive on Matter of Sizes

"Women are very sensitive in the matter of sizes, too, and you know that the makes of different factories vary somewhat in the fitting qualities. If a woman is in the habit of wearing a four, and you find that she really should have a five in order to give her satisfaction and fit her foot properly, do not produce a shoe and tell her that it is a five. Impress upon her that it is a four, a little larger than the other one that she has just tried, and explain that there is a variation in measurement according to the style of last used. I am frequently asked if I have not a larger four in the same style. I always say yes, if I think the woman had made up her mind to buy or is pleased, and then I produce a four and a half or a five. Ten to one she will never discover the difference and she goes away happy in the delusion that she can still wear her favorite size, whereas, if you let her know that she was getting a five, she would at once jump to the conclusion that her foot was growing larger and refuse to buy. Women as a rule are punctilious in the matter of age and the size of their pedal extremities. Always cajole them in the idea that they have perennial youth and small feet, and you will steer clear of many entanglements."

#### VIEWS OF DAILY PAPERS ON SHOE PRICES

"If you think the prices of shoes are high, why wait a few months; they aren't a flea bite compared to what they will be then." This is the signal of warning that came from a St. John, N.B. dealer to the St. John Telegraph which adds: He didn't talk just for the sake of hearing himself; he had trade journals and letters from leading wholesalers to bear out the validity of his statements. His parting words to the newspaper man were: "War or peace, the price of shoes is going up to stay up."

The day may not be far distant when the possession of a pair of shoes may be the sign of gilded plutocracy, and the less fortunate mortals will be forced to revert to the sandals of ancients, the moccasins of the aborigines, or even to nature's footwear untrammelled and unadorned.

Leather and the component parts of shoes have been soaring since the war began and now comes the announcement that the British government has requisitioned all leather in England. Russia, like England, has felt the scarcity of leather; the deputy town council at Moscow put into effect the German ticket scheme for obtaining shoes. Two tickets a year, each entitling the holder to a pair of shoes, will be given to each resident.

The scarcity of raw materials is the underlying cause. There is no hope for an early lowering of the price of leather. The supply of cattle is less the world over and the consumption of leather greater. Foreign nations are making restrictions in killing, which, plus the embargoes on export, limit the known quantity of skins available for manufacture into footwear. The economic conditions of the basic materials as well as of labor point up rather than down.

Some shoes are 50 per cent. more costly than they were a year ago. A dealer who purchased a large stock of shoes, yesterday said that nine weeks ago he paid \$3.75 for a pair of shoes, and for the same shoes he is now paying \$4.85. Three dollar shoes are now \$4, and the prices have correspondingly increased.

"Shoe prices will be highest in the history of the country in a short time," he said, "and these prices will affect the man with a stated wage and the family of children. The others, who have always paid \$6 for their shoes, will not rebel at paying \$8 and \$9 now. To show you that these conditions are not brought on by the war alone, the United States in 1906 had a population of 90,000,000 and had 101,000,000 head of cattle. To-day it has a population of 100,000,000 people and only 56,000,000 head of cattle. I had a letter a short time ago from a friend in Calgary. He used to have 1,200 head of stock. Now he has but twenty. He has turned 300 acres into wheat."

Here is what Ottawa Free Press has to say on the important subject.

"Up, up, up," was the answer a Sparks street boot and shoe merchant gave to the question asked by a Free Press reporter.

This merchant assured the reporter that \$5 boots of guaranteed quality for men are a thing of the past. He added that it is not likely that the prices of footwear will ever recede to the level they were at a few years ago.

Men's boots which sold a few months ago for \$5 a pair are now selling for \$7. That is the popular price of men's footwear now, but the price of men's boots of extra quality ranges from \$8 to \$10 a pair.

Women's boots for which \$5 used to be considered a popular price are now selling for \$7.50 to \$9 a pair, and kid and colored leather boots range in price from \$9 to \$12 a pair with some novelties at \$15 a pair. It takes four square feet of leather to make a pair of high cuts. Kid skin advanced in price from 28 cents a square foot to 64 cents, and some kid skin is selling for 70 and 80 cents a foot. Kid skin leather, which was imported chiefly from Europe, is scarce in this country.

# RIGHT AND WRONG WAY TO FIGURE SHOE PROFITS

**Many a Retailer Thinks He is Clearing so Much When he is being Deluded Into Financial Reverses—Only Proper Way is to Compute Profit on Selling Price—The Wholesale Cost is not Something to be Added to But is Portion of the Selling Price**

IT is said that "figures will not lie, but that liars will figure." Figures may not lie in the ordinary acceptance of the term, but improperly manipulated they can mislead, exaggerate, puff up or destroy. They can bring about a fancied security, which has no real foundation.

Many a retailer has "figured" that he has made so much profit during the year, that his running expenses were so and so, and he should have a handsome difference either in the bank or in added stock. On searching investigation it has been frequently found that he has neither, that his surplus is only a myth, a figment of the imagination, and that he is really losing money, whereas, he thought he was clearing a tidy balance. He has sold so many thousand dollars worth of shoes, and made a gross profit of so much. His running expenses were low, and in a few years he would be able to retire.

The whole trouble is he often **thinks**, whereas he should **know**—he imagines, where he should be certain. There is a wrong way and a right way to figure profits. Many a man, if he buys an article for a dollar and sells it for \$1.25, thinks that he has made 25 cents clear, and that his gross profit has been 25 per cent. In reality it has only been 20 per cent., because all profit should be figured on the selling price, and not on the cost price. The cost price of an article is not a thing to be added to, but is a per cent. of the selling price.

In this article the SHOE AND LEATHER JOURNAL presents two tables, one for figuring the net profits, and the other for finding the selling price of any article. It would be well to preserve these for future reference.

A certain article costs \$1 wholesale. What will it have to be sold for to allow a profit of 10 per cent., after allowing 22 per cent. for cost of doing business?

The answers received to this question when sent out by a leading firm ranged all the way from \$1.10 to \$1.60. The majority gave the selling price as \$1.32 or \$1.34, allowing a profit of one per cent. or less, notwithstanding an explanation at the bottom of the question that the answer was not \$1.32.

One man said, "In answering your question, will say that if you had not stated that \$1.32 was not correct, I would have put that price on the article, for I do not charge any profit on overhead expenses. But if you do, I cannot see any other way of figuring but to charge \$1.34 on selling price."

Is there any wonder that this man was not making money? He was on the straight road to bankruptcy and going fast. But he has slowed up now, and will soon be going in the right direction.

Perhaps some of the readers of the SHOE AND LEATHER JOURNAL will think that there would be a profit in the article at \$1.34, and to make sure that they will understand this merchant's state of progress, it is well to explain why and how he was losing money instead of making 10 per cent. profit as he thought.

## The Right and the Wrong Way

If the wholesale price is \$1, and the cost of doing business 22 per cent., \$1.34 does not allow 10 per cent., but only 1.4 per cent. profit. On a gross annual business of \$15,000, he will clear \$150 a year, or a little better than \$12 a month. He said that if the ad. had not stated that \$1.32 was in-

—the sheriff closed up Smith's Jones now has his trade—

correct, he would have put that price on the article. Selling article at \$1.32, he would lose almost one per cent., instead of making 10 per cent. His trouble was that he figured his profit and the amount which he wanted to take out for the cost of doing business, or his percentages, on the cost price instead of on the selling price.

Instead of adding 32 per cent. on the wholesale cost to the wholesale cost he should have added 32 per cent. of the selling price to the wholesale cost. The wholesale cost is not something to be added to, but a portion of the selling price, in this instance, 68 per cent. of the selling price. If the wholesale cost is 68 per cent. of the selling price, then the selling price is evidently \$1.47, instead of \$1.34 or \$1.32.

## Where Difference Comes In

If the cost of doing business is figured on the selling price, that is, 22 per cent. on the gross amount of business done during the year, the cost of selling the article is not 22 cents, but 32 1-3 cents.

If 10 per cent. profit is desired on the selling price, it is not sufficient to add 10 cents to the cost price. Instead, 14.7 cents, nearly 15 cents, must be added.

To prove this, take 22 per cent. of \$1.47, which is 32.34 cents, and 10 per cent. of \$1.47, which is 14.7 cents. Add these to \$1 and you have \$1.47.

An Eastern man said: "If my cost of doing business is 22 per cent., and I wish to make a sale to bear 10 per cent. profit, I should figure it this way:

Cost and cash.....	\$1.22
Profit at 10 per cent.....	.12-02

Selling price.....\$1.34

"I would, therefore, sell for \$1.34 all articles invoiced at \$1 for 10 per cent. profit. Am I correct?"

He is incorrect. As stated before, instead of making 10 per cent. profit he would make a fraction over 1 per cent.

## Figuring It Two Ways

If \$1 is 78 per cent. of the selling price, the latter, of course, would be \$1.28, which he labeled as the selling price to cover the cost of doing business.

Then he deducted 10 from 100, leaving 90, and labeled \$1.28 as 90 per cent. of the selling price to cover profit. \$1.28, of course, is 90 per cent. of \$1.42, which he gave as the answer.

He made the mistake of taking his percentage for the cost of doing business out of the one sum and his profit out of another. He should have taken both percentages at the same time.

A northern shoe firm says:

"We always figure our profit on the selling price, which is the only proper method, as follows:

"From 100 deduct the percentage of profit desired, and divide the remainder into the wholesale cost of the goods.

"The quotient will be the selling price.

"In this case we desire to make a profit of 10 per cent. over the cost of doing business at 22 per cent.

"We take 32 per cent. from 100, leaving 68. Divide

this into 100 and we get \$1.47, the selling price, which will show you the desired per cent. of profit."

**Result Was a Revelation**

Another man wrote as follows:

"Your question, entitled, 'What is the Selling Price,' attracted my attention.

"I picked up my pencil to work it out, but it did not come. Then I took a sheet of paper and went at it with the result given below. It was a revelation to me.

"The figures applied to everyday sellers in my own stock proved that many articles were only returning a bank interest profit. It was a surprise to me."

Then he goes on to figure it out in the following very sensible way:

Let the selling price equal..... 100%  
 Deduct for cost of doing business..... 22%  
 Deduct for profit..... 10%

Cost is 68 per cent. of selling price..... 68%  
 Then 68 per cent is.....\$1.00  
 1 per cent. is..... .0147  
 100 per cent. is 100 times .0147, or..... 1.47

The cost price of an article is not a thing to be added to. It is a per cent. of the selling price.

**TABLE FOR FIGURING NET PROFITS**

If your cost of doing business figured on sales is represented by one of these figures

And you mark your goods at one of these percentages above delivered cost.	%	10%	11%	12%	13%	14%	15%	16%	17%	18%	19%	20%	21%	22%	23%	24%	25%
	25	10	9	8	7	6	5	4	3	2	1	00	1 loss	2 loss	3 loss	4 loss	5 loss
	33 1/3	15	14	13	12	11	10	9	8	7	6	5	4	3	2	1	00
	40	18 1/4	17 1/4	16 1/4	15 1/4	14 1/4	13 1/4	12 1/4	11 1/4	10 1/4	9 1/4	8 1/4	7 1/4	6 1/4	5 1/4	4 1/4	3 1/4
	50	23 1/3	22 1/3	21 1/3	20 1/3	19 1/3	18 1/3	17 1/3	16 1/3	15 1/3	14 1/3	13 1/3	12 1/3	11 1/3	10 1/3	9 1/3	8 1/3
	60	27 1/2	26 1/2	25 1/2	24 1/2	23 1/2	22 1/2	21 1/2	20 1/2	19 1/2	18 1/2	17 1/2	16 1/2	15 1/2	14 1/2	13 1/2	12 1/2
	75	32 2/3	31 2/3	30 2/3	29 2/3	28 2/3	27 2/3	26 2/3	25 2/3	24 2/3	23 2/3	22 2/3	21 2/3	20 2/3	19 2/3	18 2/3	17 2/3
	100	40	39	38	37	36	35	34	33	32	31	30	29	28	27	26	25

Your percentage of net profit is represented by the figure at the junction at the two columns

**Explanation**—If your cost of doing business is 15 per cent. of your gross sales and you mark a line at 25 per cent. above cost, your net profit is 5 per cent. on sales—as shown in the diagram. If your cost of doing business is 18 per cent., and you mark a line at 60 per cent. above cost, your net profit is 19 1/2 per cent. on sales.

**TABLE FOR FINDING THE SELLING PRICE OF ANY ARTICLE**

COST TO DO BUSINESS	NET PER CENT. PROFIT DESIRED																				
	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	20	25	30	35	40	50

**RULE**

Divide the cost (invoice price with freight added) by the figure in the column of "net rate per cent. profit desired" on the line with per cent. it cost you to do business.

EXAMPLE:—If an article cost.....\$60.00  
 Freight..... 1.20  
 \$61.20

You desire to make a net profit of 5 per cent.  
 It costs you to do business 19 per cent.  
 Take the figures in column 5 on line with 19 which is 76

76 ) 61.2000 ( \$80.52 = the selling price  
 608  
 -----  
 400  
 380  
 -----  
 200  
 152

The percentage of cost of doing business and profit are figured on selling price.

# Stray Shots From Solomon

Don't be afraid of spoiling people with praise. There are ten men sent to the devil with kicks to one that is ruined with praise. The reason most of us are so stingy with good words is not so much that we are afraid of spoiling people as that we are so dog-gone mean. It is a hundred times easier to snarl than to smile. Men often hide a selfish, jealous disposition under the cover of "caution" and "reserve." "Withhold not good from them to whom it is due." If an employee pulls off a good stunt don't think it is undignified to show your appreciation. If your neighbor has a piece of good luck step in and rejoice with him. Don't dodge out of the way when you see him coming. When your minister preaches a good sermon call him up on the telephone and tell him. Above all don't let your wife wear her hands, feet and head off looking after you and think it is enough when you give her enough money to "keep the house." There are a lot of mean men who never get into the joke columns of the newspapers.

There are plenty of suicides whose names never get into the papers. There are fellows whose souls are as dead as a door-nail who go in and out amongst decent society and pass for men. There are those reading these words who five years ago were counted in the little world in which they moved but who today know that they are not morally or mentally worth the powder to blow them into the next lot. "He that doeth it destroyeth his own soul." Did you ever know a man that tampered with another man's wife that lived to be anything but a mean, shrivelled up skunk that sneaked along as if he expected a kick under the coat tails at every step? Truly "the dead are there." You wonder why business drags, friends grow leery and your influence is like a wet blanket instead of warm sunshine. It is because you know that if those who pass you on the street realized fully the rottenness of your life you would be strung to the nearest lamp-post. Quit before someone does it for you.

Most misers are obsessed with the idea that they are going to die in the poor house. There are people of means who hang on to their money and who do not seem, with all their hoarding, to get far ahead. "There is that scattereth and yet increaseth and there is that withholdeth more than is meet but it tendeth to poverty." There are men in this city who if they had only shown a little venturesomeness a few years ago might have been independent in their old age. There are merchants who will always be running little two-by-four stores because they are afraid to "launch out into the deep." Solomon was a good advertiser. If there had been newspapers

in Jerusalem in his day he would have used them to further his enormous interests. Saving is a good habit but when it turns to penuriousness it blights everything it touches. The men who have made a success of business or of anything else for that matter, have been men who have known when to let go. Here and there a stingy man makes a success of life but they are like hens' teeth.

It is better to go along quietly and be a "nobody" than to make a splash and have people laughing at you. There are people in this world who spend their whole lives making an "impression," who do not know what it is to have a home worth the name or a little circle where they can sit down and be appreciated. What people think of you does not matter so much as what you think of yourself. Many a man after running about like a bantam rooster proclaiming his importance would die with mortification if he could hear the comments that are made on his performances. "He that is despised and hath a servant is better than he that honoreth himself and lacketh bread." If some men would spend more time attending to their own business and quit trying to make themselves good fellows with the crowd they would stand in better with the world and their families both. Many a fellow is today living on "skilly golee" who might be comfortable if he had not spent so much time chasing the phantom of popularity.

There is no royal road to prosperity. Here and there a man may have it thrust upon him but the majority of men have to win it by hard, patient work. You can put it down that when you get into a hole financially you will get plenty of advice and criticism but little food put into your mouth. The first duty of man in this life, physically speaking, is to look after his stomach. Nobody else will do it. The way to guard against hunger is to earn enough money to buy bread. "He that tilleth his land shall be satisfied with bread." The opposite follows. Don't expect people to sympathize with you if you neglect your business and you have to join the bread line. It is a good thing to take an interest in church, social progress and politics but "safety first" is the duty of every man. Look after your business and let these other things come in when you have done your duty to your family and your creditors. The world doesn't take much stock in the man who is faithful to the prayer meeting and unfaithful to his creditors. Neither does the Lord.

*Solomon*

## PROGRESSIVE SHOE FIRM HAS FINE STORE

(See Opposite Page)

Away back in the days when the gold miners were much in evidence at the Pacific Coast, the late William Johnston, father of the Johnston Bros., of Johnston's Big Shoe House, Limited, opened up business in New Westminster, B.C., for the manufacture of hand-made boots, employing at that time from fifteen to twenty shoemakers, who were kept busy catering to the trade of the miners during the Cariboo rush of that year. In the year 1888, he branched out to the retail trade, continuing until his death in June, 1894, after which his sons carried on the business under the old name.

In 1902 a branch was opened in Vancouver, B.C., and in May, 1907, the two stores were incorporated under the present name. The New Westminster store is probably the largest retail shoe shop in the West. It has a frontage of 33 feet, and runs a clear depth of 132 feet. It is splendidly lighted and fitted up with every modern convenience.

The Vancouver store, which has been completely remodelled since the fire of last year, is 25 feet wide and 114 feet deep. Notable features of the place are its splendid and spacious show windows, attractive fixtures and brilliant lighting. The basement of the store, which is full size, enables the company to carry an immense surplus stock.

The members of the firm are: Wm. B. Johnston, president; George B. Johnston, and A. H. Johnston, while William Love is secretary-treasurer. A. H. Johnston, and his brother, E. H. Johnston, (who has been an employee of the firm) have joined the overseas battalions, the former with the 196th Western Universities, B.C., and the latter with the 131st. B.C. Battalion, and have recently gone to the front. W. B. and G. B. Johnston recently left for the East on business connected with the firm.

## ARE SHOE COMPANY DIRECTORS LIABLE?

A recent despatch from New Westminster, B.C., says:

For the purpose of affording Mr. J. D. Kennedy an opportunity to file authorities in support of his contention that the directors of the R. B. Johnston Shoe Co., of Port Coquitlam, now in liquidation, were liable on a guarantee deposited with the Canadian Bank of Commerce, irrespective of the fact that the bank had accepted book debts in lieu of the amount owing them, Mr. Justice Murphy reserved decision in the case of Bank of Commerce vs. Martin, et al.

Mr. P. J. McIntyre, who appeared to defend the action for one of the defendants, Mr. David Nicks, general yardmaster of the C.P.R. in Vancouver, argued and quoted many authorities in support of his contention, that his client was absolved from liability in respect to the guarantee, when the bank had stepped in and said to the liquidator: "Give us those book debts amounting to \$4,000, and we will take a chance on realizing on them sufficient to defray the amount of our claim of \$2,100." This the liquidator had agreed to, and now the bank after exhausting every means for collection, found the book debts would not defray the company's liabilities to the bank and had commenced action to recover on the strength of the directors' guarantee.

In accepting the book debts and agreeing to collect, Mr. McIntyre argued the bank had relieved the directors, and now found itself in the position of being owners of these debts, which as a matter of law could not be returned to the directors under any circumstances.

Mr. Justice Murphy said he could not overlook the authorities quoted in support of this argument by Mr. McIntyre, and advised Mr. Kennedy to file authorities in rebuttal at an early date.

The R. B. Johnston Shoe Co. was a joint stock manufacturing company established in Port Coquitlam during the boom days of that city, but went into voluntary liquidation in November, 1914. In May of that year cer-

tain of the shareholders signed an agreement to the Bank of Commerce guaranteeing jointly and severally the credit of the company up to \$13,000.

It is on this agreement that the bank, through its local manager, Mr. Davidson, is seeking to recover and Mr. Nicks is the only one of the several defendants.

## SHOE TURN-OVER AND PROFITS

Turnover is very generally misunderstood by retail merchants, but is very easily figured, says the "Boot and Shoe Recorder." Take your total sales for the year at the cost of the merchandise, and divide by the average value of your inventory at cost of merchandise. This gives the turnover. To illustrate: Suppose you sell \$30,000 worth of shoes at the selling price, and that the cost price of your merchandise sold is \$20,000. Suppose the average value of your inventories the first of January, the first of July and the first of the following January is \$12,000 at the cost price of the merchandise, dividing \$20,000 by \$12,000 gives 1 2/3, and this is your turnover.

You will see from this that the question of furniture and fixtures is not taken into consideration.

Among several hundred shoe stores whose figures of business have been investigated, the average turnover is 1 4/5. Many successful stores have a turnover of 2 1/2. Some very successful stores have a much larger turnover. With the present prosperous situation in shoe merchandising a shop should make a turnover of at least 2 1/2, and the larger it could be made beyond this point, the better.

This question of profits is vitally connected with the whole problem of merchandising—regarding which we assume that a shoe merchant will act wisely and well on his knowledge of his business, and that, therefore, his action on this question is mainly a matter of education and knowledge.

Set these points clearly in your mind:—

1. What does my merchandise cost me?

This is easily answered by the invoice in the case of each shipment from the factory.

2. What does it cost me to operate my store and sell my merchandise?

This is a matter of accurate accounting, with a determination to get on the books every last detail of the expense connected with my business.

3. What is the percentage of net profit that I desire in my business?

This is a matter for me to determine and depends upon my ideas of the just and ethical remuneration.

4. What must be my markup to get the selling price of my merchandise?

This is subject to mathematical demonstration.

## A SUBSTITUTE FOR LEATHER

Among the many substitutes which British scientific men and manufacturers have devised to replace articles that are very scarce owing to the war exigencies, there is one for leather which is said to be a very good one.

The artificial leather, as it is called, is practically just as good as ordinary leather. Linen duck is coated with varnish, to which is added a small quantity of siccativ and Venetian red. Several layers of the dried linen are then joined together in sheets of varying thickness. The adhesive mixture used for this purpose consists of four parts of heated wood tar pitch, with the addition, during constant stirring, of two parts of India rubber dissolved in benzol, four parts of Venetian red, mixed to a thick consistency, with French turpentine oil and two parts of cork powder. Sheets thus prepared are compressed between powerful rollers. The product, it is claimed, serves as an excellent substitute for leather, especially for the soles of footwear. It can be easily sewn and pegged, and can replace leather in many of its uses.

ALFRED H. JOHNSTON, WITH 196TH WESTERN UNIVERSITIES BATTALION

EDWIN H. JOHNSTON, WITH 131ST BRITISH COLUMBIA BATTALION

### HONOR FOR MR. CARROLL

Mr. J. M. S. Carroll, manager, Quebec Division, Canadian Consolidated Rubber Co., Limited, has been elected, by acclamation, a director on the Board of Management of the Dominion Commercial Travellers' Association, to hold

J. M. S. CARROLL, MONTREAL

office for years 1917-1918. Mr. Carroll's nomination paper was signed by three past presidents and three ex-directors, viz: James Robinson (wholesale shoes), Charles Gurd, J. Bevans Giles, Hector H. Racine (A. Racine & Co.), Bruno Trudel (Chaput Fils & Co.) and A. M. Ellicott.

### SLIGHTLY ASTRAY IN HIS FACTS

Editor SHOE AND LEATHER JOURNAL:

Dear Sir,—In your issue of October 2nd an article appears regarding a clerk's reading under the heading, "Improve your mind always," and credited to the pen of an employe of Butler Bros., who writes, as you say, under the name of the "Inspector." Admirable as the idea inferred is, I find several of the points or instances quoted hard to reconcile with the facts.

Perhaps the incentive to improve my own mind caused me to ponder over his reference to Cato, the Roman gentleman who was born in 95 B.C. Your correspondent says—"When Cato was eighty years old he took a notion that he needed a knowledge of Greek. So he laid to and learned it." Perhaps our friend "The Inspector" or some other reader of the JOURNAL will enlighten me on the following question. How did Cato learn Greek at the age of eighty when history says that he was born in the year 95 B.C. and his failure in defending the ancient city of Utica made him commit suicide in B.C. 46, at the obvious age of 49? Again, I must take "The Inspector" to task for his remarks on Gladstone.

He rightly points out that the "Grand Old Man" became prime minister of England at 83 years of age, but he might have added the fact that it was Gladstone's fourth premiership, so he could hardly be called a novice. The assertion that Mr. Gladstone learned Greek at that age can be safely refuted. First, because being educated at Eton and Oxford, Greek would surely be one of his accomplishments, being an essential of classical education. Secondly, because included in his chief books is found his great work, "Studies in Homer," written in middle life, and it would scarcely be possible to write of the great Greek poet without a "working knowledge" of the language, and thirdly, because

soon after becoming premier his sight failed him and caused his early retirement.

I will not quibble on "The Inspector's" relegation of Kipling with the "old masters" as he puts it. I have a strong suspicion that the writer of "The Absent-minded Beggar" is still with us.

However, "The Inspector's" motto is O.K. "Improve your mind always" is a good slogan. Here's another for the retailer—"Improve your windows all the time."

Sincerely yours,

SANT A. CLORSE.

### NEWSY JOTTINGS FROM ST. JOHN

Miss Hazel Elizabeth McCarthy, daughter of Mrs. Elizabeth and the late Dennis McCarthy and Edwin T. McCluskey were united in marriage recently in the Cathedral of the Immaculate Conception, St. John. Rev. Miles P. Howland officiated at Nuptial Mass. Miss McCarthy was a member of the staff of Francis & Vaughan, retail shoe merchants. She was kindly remembered both by the firm and her fellow employes.

William O'Connor, junior clerk in Waterbury & Rising, wholesale and retail shoe merchants, St. John, who recently enlisted with the 236th Kilty Battalion, has gone to Fredericton to join his unit, which is stationed there. Prior to his departure he was made the recipient of a beautiful silver watch with illuminated figures and hands, suitably inscribed, from his fellow employes.

In J. M. Humphrey & Company's wholesale store in King street, is displayed a magnificent large silver loving cup, which was won by the tug-of-war team of the 115th Battalion, part of which is now at the front and the remainder in England. The cup was put up for competition at Valcartier Camp, and was won by the St. John Battalion.

Joseph Gray, of Gray's Shoe Store, Main street, St. John, has returned from a trip to several cities across the line where he was visiting the large manufacturers.

### ENJOYING DUCK SHOOT NEAR WINNIPEG

Here's a jolly group of hunters who sallied forth from Winnipeg recently for a day and a half's shooting at the lodge of J. R. C. Struthers, situated on Lake Manitoba. If the party had killed all the ducks they shot at they would easily

have filled the shack. The members developed ravenous appetites. It is sometimes alleged that shoemen cannot eat heartily, but the exhibition of this company would go to explode any such fallacy or theory. Mr. Plews of the McLaughlin Automobile Co., is seen on the extreme left. Then comes Arthur Robertson, of Wellband & Robertson, shoe merchants, J. R. C. Struthers, manufacturers agent, J. P. Kilgour, vice-president of the Kilgour, Rimer Co., Limited, wholesale shoe merchants, and on the extreme right is Syd. Buckler, of Buckler & Sons, shoe dealers, Winnipeg.

# WHY SHOES ARE SO HIGH IN PRICE TODAY

**Due to the Fact that Hides, the Raw Material from which Footwear is Made have Advanced Tremendously—Leather is a Munition of War and Law of Supply and Demand Still Holds Sway—How Dyestuffs, Oils, Freight, Labor Affect Matters**

**“W**HY Shoe Prices Advance—Some Facts and Figures” was the subject of a timely and instructive address given before a well attended meeting of the Toronto Shoe Retailers' Association recently.

The speaker was W. Alfred Moore, sales manager for Beardmore & Co., Toronto, who has devoted much thought and attention to the hide and leather situation as it is today, particularly in reference to sole stock. He emphasized the fact that shoes to be the same quality today must advance in price, and the consumer must either expect to pay higher prices for the same quality of footwear, or if sold at the old figure, to get a poorer product. Boots and shoes were sold on such a close margin that it was impossible to absorb any extra cost on the material without advancing the price.

In opening, Mr. Moore referred to manufacturing costs in general and said that these depended largely upon the expense of raw material, which is used in the manufacture. In other words high cost in raw materials could not produce a low cost manufactured article. From high priced wheat a low priced flour could not be made, and the same truth applied to leather. A low priced shoe could not be made from high priced material.

That shoes are very much higher in price today than two years ago is due to the fact that hides, the raw material from which shoes are made, have advanced in price in the case of sole leather hides, 30 to 40 per cent. over the current prices in July, 1914.

This advance in the price of sole leather hides is not nearly as large as the increases in the cost of other classes of hides and skins, such as goat skins, used for the manufacture of glazed kid skins and sheepskins, used to a large extent for linings and facings on men's and women's shoes.

## Millions of Sheep Died of Drought

Last year there was a very bad drought in Australia and in portions of New Zealand and twenty million sheep alone died as the result of this drought. In many cases, the abattoirs and places where they cured hides and sheepskins were unable to work owing to the scarcity of water, and many thousands of skins spoiled through lack of proper curing facilities. The British and French Armies are equipping all their men for this winter's campaign with sheepskin coats.

Calfskins, which have been probably the most popular leather of all those used in the manufacture of shoes, have advanced tremendously in price and goatskins are costing fully 100 per cent. and more than they were when the war opened.

These are only a few instances to show why tanners, and in turn shoe manufacturers, are obliged to ask more money for their products.

Leather is a munition of war, and in Great Britain and in France, also in Italy, the tanneries there under Government control are being worked to full capacity and hides must be obtained to keep these tanneries running, so as to supply the armies with boots, saddlery, harness, etc., and to obtain the hides, they are willing to practically give any price and if we tanners on the continent of America want hides we have to give equally as good prices as they are paying for them in Europe.

All materials and chemicals used in tanning and finishing, dyestuffs, oils, etc., are several hundred per cent. higher in cost than normal prices. For instance, hemlock bark in July, 1914, cost us \$9.00 to \$9.50 per cord, delivered

at our tanneries, whereas it is costing us at present \$13.00 to \$13.50 per cord, which is about 50 per cent. advance. Chestnut oak extract, which, to a large extent, is used in the tanning of oak sole leather, in July was costing us 4.07 cents per unit of tanning—there was no duty then—our present contract is more than double and this price is f.o.b. the extract factory in the United States and in addition there is a duty or war tax of 7½ per cent. to pay.

Solid quebracho in July, 1914, was 3 cents per pound, landed on the dock, New York. Our present stock on hand in our tanneries cost us 11 cents, same terms plus duty and other charges from Buenos Ayres, say, nearly 11½ cents to New York, this price being nearly 400 per cent. higher. Heavy insurance, including war risks, have added to the increasing costs of hides and materials.

## The Heavy Increase in Freight

Freight on hides from South America to New York and Boston in July, 1914, was 70 cents, and we have got them as low as 17 cents per 100 pounds; the last rate we paid was \$2.50 per 100 pounds, but our representative in South America has advised us that he expects an advance. This is nearly 400 per cent. increase. We have recently paid much higher rates; in March we paid \$4.00 per 100 pounds.

Packer steer hides in July, 1914, were at 19¾ cents and 20 cents, while we have paid 28 cents for them, being an advance of practically 40 per cent. Yesterday they sold at 29 cents and now 30 cents is asked.

Common tannery labor was \$9.00 and \$10.00 per week in July, 1914, this has increased over 20 per cent.

Cod oil in July, 1914, was bought at \$105 per ton. We have just bought two lots at \$200 and \$207 per ton, respectively.

It all amounts to the question of supply and demand. As I said before, leather is a munition of war. The usual trade routes have, in many cases, been either closed entirely or embargoes have been in effect, which stopped the usual quantities of hides and skins going forward to the various markets where they had, heretofore, been handled.

In addition, there has been a decided shortage of beef cattle in the United States and Canada, due largely to the fact that cattle are rapidly disappearing from the great ranches in the West, and while our population is increasing, our cattle are decreasing in number; in other words, the increase in population is greater than the increase in the cattle supply, and this will be more marked in the future as cattle are being slaughtered now for the armies in the field and they are now being replenished. I look for a more marked shortage of suitable hides when the war is over than at present, if that could be possible.

## New and Varied Uses of Leather

Nor is the tremendous demand for leather for war purposes, together with the diminished supply of hides, the only factor in the higher prices of hides. It is also caused by the constantly increasing demand for new and varied uses. Take the automobile—a comparatively new invention—it consumes an enormous amount of leather annually. The multiplication of machinery calls for more belting. Our belting department, the largest in Canada, has been running night and day, due to the demands for leather belting, caused by the increased wear and tear on all that is used in the munition and other factories making war supplies.

Traveling also has increased enormously. The leather

traveling bag is a necessity today, and another factor is that some barbaric countries emerging to a more civilized condition are requiring leather for shoes and other articles. Japan, China and the Scandinavian countries, for instance, are constantly using more leather for shoes.

With all the modern inventions, etc., the tanners and shoe manufacturers have exhausted their ability to make leather and shoes out of the present high-priced hides at the old ruling prices. Shoes, to be the same quality, must advance in price, so the consumer must either expect to pay higher prices for the same quality shoes or, if sold at the old price, get a poorer shoe. Boots and shoes are sold on so close a margin that it is impossible to absorb any extra cost on materials without advancing the price.

### INTERESTING ITEMS FROM QUEBEC

The employees of the Wm. A. Marsh Co. and the John Ritchie Co. have formed a bowling club, which may later be merged into the Industrial Bowling League.

A small fire was discovered about 11 o'clock on Sunday evening in the lasting department of Gale Bros., Limited. Some damage was done by water.

Jos. Tanguay, shoe manufacturer of this city, recently celebrated the twenty-fifth anniversary of his marriage. In honor of the event a banquet was tendered him in the Merger Hall. Handsome presents were received from A. E. Marois, P. Bertrand, W. Richard, F. Blouin, J. A. Pion, C. Leduc and many other friends and relatives, among them being a splendid silver fruit dish.

A banquet was given all the employees of Naz. Fortier, tanner, on the occasion of the company taking possession of the new building. The interior was handsomely decorated, and after an enjoyable evening the assembly broke up at a

### SHOES MAY CHANGE—FEET NEVER

Stout Customer:—"That shoe is too narrow and too pointed."

Salesman:—"But you know they are wearing narrow, pointed shoes this season."

Stout Customer:—"That may be, but I am wearing my last season's feet."

late hour. Some of the speeches were excellent, chiefly those delivered by the Messrs. Fortier.

Dupere & Garant have taken over the agency of the Steel Company of Canada, Limited, of Montreal. They will carry full lines of nails and tacks for shoemaking.

Trade in general is very good—some houses doing one-third more business this year than in previous years. Collections are also satisfactory, but leather prices remain high. Sole leather No. 1 is selling at 55 cents. Dull sheep chrome is 19 cents and 20 cents a foot. Shoe thread is very scarce, and has taken a jump of a few cents per spool. Tacking sole wire is also scarce, and some manufacturers are tacking their soles by hand. Zinc and brass slugging wire is also high in price.

### BE PROMPT WITH TRAVELERS

Punctuality is a most desirable virtue, says an exchange. It is usually the selfish man who is not punctual. If you make a promise to meet a salesman at a specified time, do so regardless of the inconvenience it may cause you; or at any rate advise him in ample time that you cannot keep the appointment so that he may make other use of his time.

The time of business men, and especially of the traveling salesman, is valuable. Even minutes are counted in his day's itinerary. Negligence in keeping an appointment may mean the change of another's plans for the entire day or night. If your tardiness affected only one person, it might not be so serious, but it makes an endless chain of difference to other people than the one disappointed.

The man who possesses the reputation of always being late loses the confidence of every respectable business man. Promptness is a real asset and one that many retailers have found almost indispensable in their business relations with the traveling man and others with whom it is necessary to make appointments.

### REALLY NOW, WHAT'S THE ANSWER?

The Man on His Knees (to himself)—Why do they always look at all the shoes in the shop before deciding on the first pair?

### HOW TO MAKE SHOES WEAR

The following letter recently appeared in a Toronto paper and was signed by "Druggist":—

"The people of Canada are being advised, and quite properly so, to go easy on shoe leather; and to those who find the shoe account increasing to alarming proportions, a word of advice regarding the proper care of shoes may be acceptable. Leather needs oils, and especially so when made up into shoes, which are exposed so much to the weather and the wear of cement walks. Few people realize the difference which regular oiling makes in the longevity of shoes. A pair of shoes well oiled—particularly the soles—will last two or three times as long as if not oiled. True, some people do use oil on their shoes, but very few give the leather enough oil. Rub it in—lots of it—give two or three applications at each oiling—rub it into the soles until they are thoroughly permeated or even stand the shoes in oil about one-eighth of an inch deep for an hour or two. Repeat the treatment every three or four weeks or oftener, according to the condition of the leather. Of course the leather must first be dry and clean. New shoes particularly should be well oiled before wearing. A good petroleum oil such as floor oil or separator oil answers the purpose well and is inexpensive. After a day or so the oil will not interfere with polishing the shoes; and you will be surprised to find how soft and comfortable your shoes feel and pleased to note how long they wear. As for instance: The writer has been wearing a moderate priced pair of shoes, treated as indicated, almost continuously for nearly five years. The shoes have been half-soled five times during this time, but the uppers are quite pliable and look good for another five years' wear. Yes, and I am on my feet more than the average person, and have not a corn, bunion or ingrowing nail on my two feet."

### MUST NOT USE NAME "PALMER"

Chief Justice McLeod gave judgment at St. John, N.B., recently, in the suit of the John Palmer Co., Limited, vs. the Palmer-McLellan Shoepack Co., Limited, to restrain the defendant company from using the name "Palmer" in advertisements, trade mark and corporate name. Mr. M. G. Teed, K.C., appeared for the plaintiff, and Mr. P. J. Hughes for the defendants.

The case was argued before Chief Justice McLeod in July last and judgment delivered lately grants the injunction on all points but that of the corporate name.

It is understood that the John Palmer Co. will apply to the provincial government for the removal of the name "Palmer" from the name of the Palmer-McLellan Shoepack Co., under the Joint Stock Companies' Act.

The solicitor of the Palmer-McLellan Co., has given notice of an appeal from the decision of Chief Justice McLeod.

The Chief Justice found that the defendant company, by their advertisements, circulars, etc., have endeavored to make purchasers believe that they were buying the plaintiffs' goods, and that the name "Palmer," used on their goods, was used for the purpose of deceiving the public, and that the defendants' trade mark is calculated to deceive.

He further decided that the plaintiff is not entitled to restrain the defendant from using the present corporate name, as that name was given them by the Governor-in-Council under the provisions of the Joint Stock Companies' Act, and could only be taken away by that same power.

The Chief Justice found as a fact, however, that the use by the defendants of their corporate name has led to confusion.

The defendants were ordered to pay the costs of the action.

The defendants' solicitor stated that the defendants desired to appeal, and asked for a stay of proceedings, which means a suspension of the injunction. This application was opposed on behalf of the plaintiff and was not allowed, but it is understood that a further application will be made to the court.

His Honor expressed a hope that a modus vivendi could be reached by the two companies.

### MADE SPLENDID SHOWING AT FALL FAIR

The enterprising firm of Porter & Robbins, shoe merchants, of Yarmouth, N.S., made a very attractive display of footwear at the Western Counties Exhibition held in Yarmouth on October 4th, 5th and 6th.

This firm has occupied a booth at the big fair for the past eight years, and believes such a method of publicity is a good one to keep its name before the public and introduce itself to a lot of new people at a comparatively small outlay. This year the entire interior of the booth was papered, giving it a much brighter appearance and a more permanent aspect. The stand was considered the most artistically decorated one in the building.

Porter & Robbins report that, in spite of the heavy advance in the price of all lines of shoes, business is good and they look forward to a bumper holiday trade.

*THE striking and effective display of leading shoe firm at Yarmouth Exhibition.*

### DOING HIS BIT AT THE FRONT

Private Norman Clarke is the son of Mr. F. G. Clarke, president of Clarke & Clarke, Limited, leather manufacturers, Toronto. He is now 22 years of age and before enlistment in Princess Patricia's Regiment, was in his third year at the University of Toronto. He, however, received his military

PTE. NORMAN CLARKE, TORONTO

training in connection with the McGill University of Montreal, and, like so many fine young Canadians, sacrificed a fine prospect to serve his country in the hour of need. He is now with the Canadian Division "somewhere in France."

### SHOES FOR FLAT FEET

A recent examination of high school children in New York City showed that 32 per cent. had weak feet, and about 18 per cent. the worst forms of flat feet, the arches being completely broken down, according to Dr. Arthur C. Jacobson, in an article in the Medical Times.

City life, the writer says, has much to do with the increase in the number of children suffering from defective feet.

"Hard pavements and the giving up of the muscular development that comes from going barefooted have bearings on the subjects," says Dr. Jacobson. "The barefooted child in the city, parents are afraid, might be taken for a neglected and poverty stricken slum dweller. And so even in the home the feet are encased from the earliest period in leathern splints. Then the matter of diet has to be considered. Soft diet makes soft tissues, and along with dental deterioration goes deterioration of the feet."

Proper shoes, with plenty of room for the toes, for the children while they are small are recommended by the physician. He condemns most of the metal arch supports and other contrivances, as they merely support the arch by pressure and do not correct the tendency of the feet to turn out while walking.

### HAS OVERCOME REFUND EVIL

Everyone—especially the men—who is acquainted with Mrs. Zella S. Corson, owner and manager of the Portia Shoe Shop, Chicago, takes his hat off to her. This is not because of her sex, but because her ability is recognized, says the J. and K. Shoe News.

Mrs. Corson has made a marked success of her business. She originated the entire proposition and named the shoe which she features—the Portia. She handles only shoes for women.

In view of Mrs. Corson's success, a few facts on how she has overcome the evils of the refund question should be of interest. First of all, she advertises along this line: "Our patrons are treated with the utmost courtesy, but are not urged to buy what they do not want, or should not have; consequently we do not refund on shoes which have been fitted and sold." Mrs. Corson also inserts one of the slips

in every parcel going out of the store and writes that "it works like a charm. We have not had a single request for refund since we began doing this. We exchange goods, but have very little of this to do as we are very careful about fitting in the first place."

Mrs. Corson thinks some of the large department stores are partially responsible for the abuse which she is seeking to correct. She says that they "have given women all sorts of liberties in this respect, but the specialty shops do not need to follow their example."

She certainly deserves more than a little credit for taking the bit between her teeth and solving one of the most vexatious questions that confront the retail shoe merchant. Many men have abandoned the problem, feeling that the solution could not be reached. Mrs. Corson knew that it could. And backed up by the right shoes and good service she has demonstrated that the question could be answered.

### VALUABLE REFERENCE ON RUBBER

The Polyglot Rubber Trade Directory of the United States and Canada, has been recently issued by the India Rubber World, 25 West 45th street, New York, N.Y. It is an interesting and instructive volume of 425 pages, and gives an alphabetical list of the rubber manufacturers of North America and their products. The work is replete with data concerning the large number of compounding ingredients, fabrics and machines used in rubber manufacturing. Former issues have been of use to those who read English only; but the present edition, by means of its polyglot key is understandable by all who read the principal modern languages. A valuable contribution to this ready reference volume is the trade mark names of the various rubber manufacturers. The Polyglot Trade Directory contains other timely and valuable data, which reflects credit upon the publishers, and affords evidence of much research and investigation.

### NEW SHOE COMPANY HAS FULL STAFF

The A. L. Johnson Shoe Co., wholesale shoes, have leased warehouse premises at 17-19 St. Helen street, Montreal, where they will carry a general line of footwear. The company is now fully organized. A. L. Johnson, late vice-president and sales manager of Ames-Holden-McCready, Limited, is at the head of the organization. R. C. Riley, who has for many years been associated with Mr. Johnson, is secretary-treasurer. H. Wellband, who has been in business in Dominion City, Man., for some years, has disposed of his interests there and will travel out of Winnipeg for the new company, while M. McLeod, a widely known shoe salesman of Edmonton, will represent the A. L. Johnson Shoe Co. in Alberta. Mr. Johnson, is spending some weeks in the West and looking after the selling end. All the prairie provinces will be thoroughly covered.

### VETERAN IN FOOTWEAR GAME

G. B. Farmer, shoe retailer, of Perth, Ont., has been in business in that town for 44 years, and is still hale and hearty. Many years ago he conducted a large shoemaking shop, and employed as high as twenty men. Mr. Farmer did considerable cutting himself, and among his associates in the early days was Thomas Ryan, now wholesale shoe merchant of Winnipeg. Another former resident of Perth is D. D. Hawthorne, wholesale shoe merchant, Toronto. Mr. Farmer has a well-lighted and spacious store, and what is most unusual the backyard of the shop is just as neat and attractive as the front portion. He carries a line of traveling goods in addition to a most representative stock of footwear, and while the cost of shoes is rapidly ascending, he finds that the majority of people thoroughly understand the contributing causes, and pay the higher figure cheerfully.

# CHRISTMAS SHOE WINDOW CARD SUGGESTIONS

The Season When Every One is Interested in What the Store Has to Say—Make Good Use of Your Windows—Many Lines Handled by Footwear Retailers Make Appreciated and Appropriate Yule-Tide Gifts

December—The month of gladness. The month so impossible to separate from the thought of Christmas time—that period of joy and good will and cheer, when hearts are made happy, when the spirit of giving is shed abroad in the land.

And it is this good feeling cast broadcast that makes December the merchants' one harvest month of all the year.

It is surprising how many shoemen make the mistake of not advertising for the rush period of Christmas, because the business will be good anyway. This is unfortunate. It is possible to even increase business, and why should it not be done at the Christmas season as well as any other?

It may be that your lines are not those that will come to the mind of the average person as being classed among Christmas gifts. But the useful present is gaining a foothold more and more each year. Then why not impress upon the public the advisability of buying gifts that will give a lasting pleasure because of their continued usefulness?

As early as the first of the month you should have your advertising, decorating and selling plans laid so as not to distract your mind from the selling end when the rush season comes.

Advertise that you have gifts for the entire family, from baby to grandpa. Increase your newspaper space and feature some shoe every day giving brief description, and quoting price.

And no season offers more opportunities for decorative displays. The central figure will, of course, be old Santa

Claus. The dominant colors, are white, red and green. The floral trims will be largely holly, but of late years the poinsettia has been introduced with telling effect. Evergreens may be introduced. Snow effects are very pleasing and may be made with cotton batting and diamond dust. Soap chips also may be used for frost effects. Red and green crepe tissue paper is obtainable at moderate cost, and is very pretty for decorations. In fact, it may be had with Christmas designs of holly, etc., on it.

The window card suggestions are for the Christmas trade, for almost the entire month will be devoted to Christmas selling. These cards may be any size from 11 x 17, 14 x 22 to 22 x 28 inches. The "Christmas Giving" card design is very attractive. The bells are done in gilt or yellow. The ribbon in red and the large letters in red, small lettering in black. Old Santa may be pasted on, or if painted his coat and trousers should be red.

"Christmas Gifts" is about the same treatment. But blue ribbons may be introduced if desirable.

The \$7 card is an air brush design; but can be made with an ordinary brush. Two patterns are required, the square and the scroll. The large letters and figure should be red and small letters black and shading in pale green.

The old Santa card is another air brush design. The crescent is made with two circles—the large one laid on first and air brushed. This removed and small one laid on and treated the same. The candle pattern is laid on first and circles laid over it. The poinsettias are painted in red or

may be cut out and painted on. Santa's coat and cap are red, the fur is white. The lettering is in red and shaded in pale green.

The "Holiday Trade" card is made by cutting two patterns, laying the larger one on first and air brushing around it. Then remove and place the smaller one on. Cut a strip the exact width of the margin and bevel the end to finish the corners.

Shoe retailers have many more Christmas' lines than one would think of at first thought. There are ball and party slippers for sisters, wives and best girls; fine shoes for young men; slippers for husbands, all kinds of comfy slippers for house wear and boots galore for the younger people, the boys and girls. Shoe dealers who care to go to the expense (and it will pay to do so) may obtain colored Christmas labels which can be pasted on ordinary cartons for the Christmas trade; and neat little "From" and "To" cards may be purchased at trifling cost which customers may insert into the shoe parcels intended for presents.

Various shoe polishing outfits make very tempting Christmas gifts and should not be left out of Christmas window displays.

### WHAT WILL REPLACE LEATHER?

What's going to take the place of leather? Every day we hear of the increasing cost of leather. The European demand is stronger than ever before. Domestic buyers are covering their immediate needs only. Europe is bidding 15 per cent. above domestic prices, and yet the export business is not over 10 per cent. as the balance is being saved for the American manufacturer. It is, however, understood that should sales follow the bidding that Europe could easily use 90 per cent. of the production. This wouldn't leave much for United States use, says an exchange.

This "watchful waiting" policy is hitting the leather purchaser, for knowing of the foreign demand the factory owner or manufacturer is shoving up the prices. Just an instance. How about shoes? Prices are advancing steadily. Good shoes are half again as costly as they were two years ago. Note the following:

Pittsburgh—Wholesale prices on men's and women's footwear have been advanced fifty to seventy-five cents a pair within the last seventy-two hours, and certain lines have been withdrawn entirely from the market owing to a big shortage in leather, according to an announcement here by officers of the Pennsylvania Shoe Travellers' Association.

The organization, which is composed of salesmen from various parts of the United States assigned to this territory, was formed at a meeting last week. Many letters were read from firms manufacturing shoes announcing an advance of 37 to 66 cents a pair on upper stock and 8 to 10 cents a pound on sole leather. Two lines of shoes were advanced 75 cents a pair in two days.

Of course, leather is used for many other purposes besides shoes. The upholstery field needs it or an equivalent. The furniture, automobile, as well as steam and railway car industries use it extensively.

The increasing prices and shortage of hides is making the leather user think. At the present price he can't afford to use all genuine leather, hence for some uses he is being supplied with what is known as split leather. Said split leather is merely a sectional sheet of a hide. Such splits will, of course, not equal non-split hide leather for shoe soles, harness or belting. In fact, at the present time shoe manufacturers have not found a suitable substitute for shoe leather, sole or uppers. In some cases as many as four splits are made from one hide. The top layer is used for fine bookbinding. The second, a thicker layer still, bears the natural grain of the leather and is known as genuine leather No. 1. It is used for upholstering high class automobiles and furniture.

The third layer is thicker than the second, and is soft and spongy, besides it has no natural grain. This part of the hide is again split. What these latter splits lack in appearance is put on by coating them with a surfacing compound, and then embossing that coating so as to imitate the grain desired. But the strength isn't there, and the splits don't last, which adds misery to the life of the local dealer who sells the upholstered article.

Many manufacturers have found a way to avoid the effect of this fast wearing material. Leather substitutes are taking its place for many uses. They are stronger than split leather, because while the latter is merely a sectional sheet of a hide, a leather substitute has for its base a specially woven very strong cotton cloth.

That's how some people are taking care of a product shortage. The world is full of changes. Some day we are liable to have substitutes for eggs.

### A FACTOR IN CANADIAN SHOEMAKING

(See Front Cover)

F. W. Knowlton, manager of the United Shoe Machinery Company of Canada, Limited, is personally known to every shoe manufacturer in the Dominion, with whom he has been coming in more or less intimate association for over a quarter of a century. A native of Lewiston, Maine, where he attended school and started on life's highway, he learned the trade of a machinist, which he followed successfully for a number of years. He was still engaged in this work in Boston, Mass., when he was invited by the Goodyear Shoe Sewing Machine Association of Canada to come to Montreal and take charge of their manufacturing department. The company, at that time, turned out a welt sewing machine, an outsole stitcher, and a few auxiliary machines. Later it became the Goodyear Sewing Machine Co. of Canada, and in 1899 the United Shoe Machinery Co. of Canada, was formed, taking over the Goodyear interests, and Mr. Knowlton soon became manager.

At that time the organization had only a small factory in Montreal. They now have three well equipped outside branches: Quebec in charge of J. W. Rogers, Toronto and Kitchener in general charge of L. W. Hanson with Geo. F. Hennessey as assistant, in charge of the Kitchener office. The formation of the United Shoe Machinery Co. of Canada, was possibly the most important event that has taken place in the evolution and expansion of the trade, and by having offices in the leading shoe centres, where full lines of supplies and machinery parts are carried, they are able to give rapid and efficient service to every patron.

Since he became identified with the industry, which is the sixth most important in the Dominion, Mr. Knowlton has seen the number and size of shoe factories, and their output, very largely increase.

When the Goodyear concern first commenced manufacture in the Dominion, they leased the top flat of a small building, remaining in that location for about ten years. At the end of that period they moved to a larger building which had been erected for them, but within a short time found these quarters too small, and in 1902 they built a much larger factory on Lagauchetiere street. In 1910, finding this factory inadequate, although a large addition had been built in the meantime, they erected an extensive four storey brick and steel structure in Maisonneuve, which has already become too small and a large addition is in process of construction at the present time.

Naturally Mr. Knowlton exhibits a pardonable pride in the growth and development of the company in Canada to which he has devoted his mechanical and executive ability. Of a quiet, earnest disposition, his chief hobby is the success of the work in which he is engaged. With over 150 shoe factories throughout the Dominion, his main purpose, along with his capable staff, is in seeing that "service," the watchword of the company, is given to every customer in its broadest and fullest interpretation.

# City of Montreal

Canada's Commercial Metropolis—Its Wonderful Development and Growth—The Seaport of Half the North American Continent—The Hub of the Shoe and Leather Business of Canada

**A**LTHOUGH not the seat of government, even of its own province of Quebec, Montreal is the chief city of Canada, and its commanding station at the head of ocean navigation up the great St. Lawrence, while being also the sole outlet of navigation for the vast chain of inland fresh water seas, marks it out for a great commercial future. While thus the leading seaport and manufacturing centre of the Dominion, its magnificent situation on the fertile island formed by the confluence of the Ottawa with the St. Lawrence, and overlooked by an imposing mountain, gives it many attractions for the seeker of scenic beauty; while to these attractions are to be added a long and romantic history.

Montreal was founded on the site of the Indian town of Hochelaga, a name still preserved in one of the wards of the city and in many local institutions. For more than a hundred years before the knightly Maisonneuve landed here, Hochelaga is known to have existed as a fortified town.

Upon the triangular piece of ground upon which stands the Custom House, with its clock tower overlooking the busiest part of the wharves, Sieur de Maisonneuve landed in May, 1642, to lay the foundations of a city, and from it to establish a new

"Kingdom of God." The ceremony that took place upon his landing, the name—Ville-Marie—that was first bestowed upon the place, and the circumstances of its early development all show that though it was so well suited for trade, Maisonneuve had in his mind a religious and not a commercial purpose.

The early history of Ville Marie is full of romance. Champlain, very unwisely sided with the Hurons in the bitter war which was raging at the time of his arrival, and the French for fifty years struggled with difficulty against the enterprises of their implacable enemies. Montreal, being nearer to the Iroquois cantons, chiefly felt their fury, and in 1660, the whole island up to the palisades of the town was swept by Indian war-parties. A deed of heroism—by which Dollard and seventeen other Frenchmen devoted themselves to death—alone saved the town. In 1665 the Marquis de Tracey arrived from France with the noted Carignan regiment. He defeated and punished the Iroquois, and established forts at St. Therese, Sorel and Chambly, to check their incursions. The latter two places still retain the names of the captains of his regiment, who built the forts. Then Montreal rapidly grew into importance, and became the centre of the fur

trade with the West, and of the expeditions to retaliate upon the English colonies to the south, the atrocities which the Iroquois, the allies of the English, had inflicted upon Canada. From Montreal also started Joliette, Hennepin, and La Salle on their adventurous careers of Western exploration.

Montreal became a fortified city, and the remains of these old forts are still to be traced about the city and on the picturesque St. Helen's Island opposite. In 1760, Montreal, after the fall of Quebec, capitulated to the English. Sixteen years later it fell for a short time into the hands of the Americans in their struggle for independence, and was visited by Ben Franklin, who operated the first printing press used in Montreal. After the Revolution, Montreal began to thrive under British rule, and became the political as well as the commercial capital of Canada. The former honor, however, was taken away from it as a punishment for the riots and the burning of the Parliament buildings in 1849.

Architecturally speaking, Montreal is the London of Canada. It has more variety in its architecture, and its public buildings are more massive and tasteful than those of almost any city on the American continent. The blue gray limestone with which the island abounds is eminently suited to producing graceful effects in architecture. Most of the private houses are built of stone, and several of the better class have been built at a cost of over half a million dollars.

If Montreal is rich in historic associations, it is also rich in commerce and manufactures. Situated on the banks of the greatest river in the world, its shipping has developed and its harbor accommodation so improved, that it is soon likely to become a greater shipping centre than any port in North America, besides New York. It is the natural ocean outlet for nearly two-thirds of the area of the continent, and the transcontinental route via Montreal

is shorter than any other by hundreds of miles. Montreal is 288 miles nearer Liverpool than New York, and Chicago by this route is 368 miles nearer Liverpool. Forty years ago a single line of railway entered the city of Montreal; now it is the converging point of fourteen lines and their affiliations. It is the great central point of two of the most magnificent railway systems in the world—the Grand Trunk, and the Canadian Pacific—whose splendid workshops and warehouses employ nearly 200,000 people. The total mileage of these systems is over 10,000 miles.

The port of Montreal enjoys the singular distinction of being an ocean port, and yet 986 miles inland from the sea—reckoning this to be the Straits of Belleisle. It has direct connection by water with that great chain of inland seas, which make the geographical situation of Canada unique.

“TETRAULT SHOES ARE SOLD BY ALL THE LEADING JOBBERS”

## Are You A Good Guesser?

Even if you are not, you can *figure* it just the same. Turn up page 64 of this issue and note the “*Upward Climb*” of the *Tetrault Shoe* in its Record of Monthly Sales.

## Money For Those Who Guess

Here is something to interest both *Clerks* and *Proprietors* and even Message Boys of Canadian shoe stores. To those who make the nearest guesses as to what our sales for the year 1916 will total, we offer the following prizes in the order of their nearness to the correct amount:

1ST PRIZE	-	\$75.00 CASH
2ND PRIZE	-	25.00 CASH
3RD PRIZE	-	15.00 CASH
4TH PRIZE	-	10.00 CASH
5TH PRIZE	-	5.00 CASH

### CONDITIONS

- (1) Open to all handlers of Tetrault Shoes from Coast to Coast.
- (2) Record of Sales will appear in each issue of Shoe and Leather Journal to December 15th.
- (3) After December 15th daily sales will not be added at factory, to prevent information leaking out.
- (4) Guesses will not be received until after December 15th issue of SHOE AND LEATHER JOURNAL is out.
- (5) Contest will be closed January 5th, 1917, and envelopes opened by committee of well known retailers, who will announce the lucky guessers. Mark envelopes “Guessing Competition.”
- (6) When sending in your guess you must give correct register number in lining of any one of our shoes.

## LOOK OUT FOR THEM

In the next two issues of the *Shoe and Leather Journal* will appear the Sales Records for November and one half of December. This will give the cue. Figure out what the last half of December ought to be, add it and SEND IN YOUR GUESS for the twelve months.

*DON'T SEND IN GUESSES TILL AFTER DECEMBER 15*

## OUR MONTREAL NUMBER

The Headquarters of Canada's Shoe and Leather Trades—Splendid Representation in this Number of Leading Manufacturing Concerns of the Metropolis

**M**ONTREAL, almost from the beginning, has proven its right to be considered headquarters for the shoe and leather trades of Canada. Early in the history of the business Toronto dominated to some extent and then Quebec elbowed its way into a front position, but Montreal has gone steadily ahead establishing itself as the centre of influence in this particular line.

The present issue demonstrates to some extent the tremendous advancement of the city generally and of the shoe trade particularly in the past quarter of a century and the development has practically only begun.

We have always endeavored to give Montreal its proper place in the realm of shoes and leather and twenty-seven years ago this month we first devoted an issue to the advancement of its claims as the shoe centre of Canada. In this number we have given considerable space to the demonstration of its national as well as commercial importance and although the effort has been somewhat hurried it speaks for itself.

In the issuing of this Montreal number to the trade Mr. J. Clark Acton, the secretary-treasurer of the Acton Publishing Co., who has had charge of this issue, makes his debut as far as the eastern trade is concerned. Mr. Acton, who has been for some time connected with the company in another capacity, is the youngest son of Mr. James Acton, the

J. CLARK ACTON

president of the company, and will hereafter make his headquarters at Montreal. Already he has made many warm personal friends in the east and he hopes, through the assistance of Mr. Henry Kavanagh, who has been connected with the Montreal office for several years, to keep the SHOE AND LEATHER JOURNAL in such close touch with the Quebec and maritime trades that our subscribers from coast to coast will reap the benefit. The present issue is but an indication of what it is our desire to do for the trade in Montreal and eastern Canadian centres, in which it is hoped that Mr. J. Clark Acton and the SHOE AND LEATHER JOURNAL will have the hearty co-operation of all concerned.

We desire to extend to the trade in Montreal and the East a hearty invitation to visit our Eastern Office, on the ground floor of the Coristine Building (St. Paul and St. Nicholas Sts.) so admirably situated in the very heart of the wholesale business district of Montreal. It is quite close to the Board of

Trade, General Post Office, Harbour and the wholesale leather district, and accessible by several lines of street cars.

Our watch key is out and all our facilities for furthering the interests of the trade or of its individual members is at their disposal. With its almost thirty years of service to the shoe and leather trades the SHOE AND LEATHER JOURNAL hopes to add to its efficiency and that of its staff in the more thorough "touch" with Montreal and Quebec.

# CHANGES IN SHOE MANUFACTURERS

Complete Metamorphosis of Shoe and Leather Trades in Quarter Century  
 —Most of the Men in the Trade at That Time are Dead or Out of Business

ELSEWHERE we reproduce at one quarter size a plate used twenty-seven years ago of the principal men connected with the shoe and leather industry of Montreal. More than half of those whose faces appear upon the plate have passed away, and all but one shoe manufacturer—Mr. G. A. Slater—has dropped out of active shoe manufacturing. Of the leather trade only two remain, while Ed. Packard represents the “old guard” as far as the findings trade is concerned.

A glance at a picture such as this causes one to realize the constant changes that mark the progress of the business

world and brings us to think of the brevity of human life.

Changes in the factories and their methods have been quite as great. One could take all the factories in Montreal in 1889, and put their output through almost any two or three of the present day shoe mills.

There has been a steady improvement not only in the arrangement and equipment of the factories but in the volume and character of the output. In employees as in employers have also been marked changes, as one who watches one of these modern shoe plants disgorge its human contents upon the street at quitting time may observe.

# Montreal—Great Shoe Centre

How the Shoemaking Industry has Expanded and Progressed During Recent Years—Something about Factories Large and Small—The Men Behind the Enterprises and their Lines

**M**ONTREAL, the commercial metropolis of Canada, is today the foremost centre of the shoe and leather trade in the Dominion, and has within its borders and surrounding district forty-five shoemaking plants.

The total output of shoes in the Dominion of Canada is over 60,000 pairs daily, and of this more than one-half are produced in Montreal and vicinity, where several large factories turn out many thousands of pairs per day, while there are many smaller ones whose output runs from 300 pairs up. All kinds of footwear are made, from the finest bal to the ordinary everyday staple, and thousands of employes find daily employment in the shops.

The largest shoe manufacturing firm in Canada is Ames-Holden-McCready, Limited, who have an output of about 12,000 pairs a day in their three spacious factories. In February, 1911, the present organization was completed by the merging of the Ames-Holden Co. and the James McCready Co., both of whom had built up large businesses. The former had a well-equipped plant on Inspector street and a large factory in St. Hyacinthe, while the McCready establishment was on Mount Royal avenue. Ames-Holden began business fifty-eight years ago, and the James McCready Co. was established in 1871. Ames-Holden-McCready, Limited, have warehouses in Toronto, Winnipeg, Edmonton, Vancouver and St. John, and make all grades of men's, boys', youths', women's, misses' and children's welts, McKays and turns, and also pegged and standard screw. D. Lorne McGibbon is president of the company; N. R. Feltes, general manager, and R. E. Dildine, general sales manager, and W. V. Mathews, general superintendent.

The oldest shoe firm in Canada is J. & T. Bell, Limited, who have been in business nearly 103 years. It is a far cry from the little squat factory on Notre Dame street, in which Joshua and Thomas Bell, the founders of the business, began making shoes in a small way early in 1814, to the

splendid and admirably laid out home of to-day on Inspector street. The two brothers, Joshua and Tom Bell, made women's turn prunella cloth buskins almost exclusively, and at the death of Thomas Bell, the business passed into the hands of Samuel Bell, another brother, by whom, in time, it was sold to the latter's nephew, the late John T. Hagar, and the late John Stephens. The partnership between these two, was dissolved after a couple of years, and John T. Hagar continued operations as sole proprietor. On the death of Mr. Hagar in 1909, the business was formed into a joint stock company, with H. E. Moles as vice-president and managing director. Under his direction the present flourishing industry continues to-day. Mr. Moles has been identified with the J. & T. Bell, Limited, for some twenty-eight years. F. N. De Lancey is the efficient superintendent. The firm make high-grade welts and turns for both men and women, as well as many specialties for which they have the sole right of manufacture in Canada. Among these are the Dr. A. Reed Cushion Sole for men and women, the cushionette turn shoe for women, and the Doctor's Special water-proof boot.

George A. Slater, Limited, Ontario street east, makers of the famous "Invictus" Shoe, have achieved a wide reputation and a unique position in Canadian shoemaking. The founder of the business is Geo. A. Slater, whose father, George T. Slater, was one of the pioneer manufacturers in Canada. Twenty-nine years ago, George T. Slater passed away, leaving his two sons, George A. and Charles E. to continue the business as George T. Slater & Sons. George A. had a thorough practical acquaintance in his father's factory, and was splendidly qualified to take hold of the reins on the death of his parent. He was energetic, systematic and well skilled. After dissolving the old concern, George A. Slater began business on his own behalf, in a way that has afforded his firm the widest scope for specialization. George A. Slater, Limited, are among the most successful shoe

### MONTREAL

businesses in Canada, and have so firmly entrenched and established the "Invictus" shoe, that it stands to-day among the very highest types of gentlemen's footwear.

The Tetrault Shoe Manufacturing Co., 327-331 Demontigny street, Montreal, are the largest industry in the Dominion specializing in men's welts exclusively. The factory is one of the most progressive in Canada's Commercial Metropolis, and also one of the busiest. Mr. Tetrault, the founder, has been connected with the shoe game all his life, is a master of organization, and directs his forces with the skill and precision of a military commander. The firm maintain permanent offices in Paris, and an organization that touches the best retail stores in that country. The house of Tetrault is also one of the very first in introducing new things to the trade and keeping to the forefront in shoemaking art and ideals. Mr. Tetrault is publishing figures of his monthly sales, and is offering valuable prizes to retail patrons of the firm who come the closest in guessing the total sales of the firm for the year just terminating. This competition is likely to arouse much interest, and is but another evidence of the enterprise of the Tetrault Shoe Manufacturing Co.

The big wholesale shoe house on McGill street of James Robinson is one of the great institutions of the trade, and with a force of twelve travelers a very wide territory is covered and an immense stock carried. The business

*St. Lawrence Boulevard, a Great Retail Thoroughfare*

is the largest of its kind in Canada and was founded thirty years ago. Its expansion has been steady and strong, its service prompt and efficient and its stock representative and complete. "Jim" Robinson has always been one of the big men of the trade in the fullest and best meaning of the term. His unremitting attention to business and devotion to duty resulted in his health becoming precarious a few years ago, but his vast interests in no way suffered, for his son, George, ably took hold of the reins and has won his spurs as a shoceman by his earnest and skilled direction. He met a situation which was suddenly thrust upon his shoulders faithfully and progressively, and while his father's health at the present time is better than it has been for a long period, and he is at the warehouse occasionally, his son is the driving force and is ably assisted by D. S. Benvie as office manager. James Robinson is a Montreal man, in which city he has lived all his life. He possesses public spirit and for several years served as a member of the city council and was frequently mentioned as the most likely man to be mayor of the commercial metropolis when, owing to his then delicate state of health, he was compelled to retire temporarily from business and municipal life.

Daoust, Lalonde & Co., Victoria Square, are one of the best known houses in the shoe producing line in the

Dominion and are leather manufacturers as well. In 1891, in association with Mr. Lalonde, Mr. Daoust started in the shoe jobbing line in very small quarters on St. Paul street. The business grew steadily and eight years later a factory was established at Acton Vale, which in 1903 was removed to Montreal. Two years later Mr. Daoust bought out his partner's interest and assumed full control of the business. Eight years ago the spacious premises formerly occupied by Ames-Holden Co. on Victoria Square were acquired. The tannery, which had been established at Acton Vale, was closed and the firm began the manufacture of leather in Montreal on a much larger scale. The equipment of both the shoe factory and tannery has been so remodelled and extended that Daoust, Lalonde & Co. have now the largest and best facilities for the production of shoes and leather. Associated with Mr. Daoust are his sons, Louis, assistant superintendent of the shoe plant, and Armand, superintendent of the tannery. Recently Mr. Daoust celebrated his twenty-fifth anniversary in connection with the shoe trade and was the recipient of numerous congratulations on his honorable and successful career. A. Dubois is superintendent of the shoe factory and Auguste Bertrand is general sales manager. The firm employ a large force of salesmen and turn out about ten thousand pairs of shoes a week.

Aird & Son, Reg., 482 Ontario street east, who make men's, boys', youths', and women's McKays and turns, and have a well established connection with the jobbing trade all over the Dominion, have reached the position where they have the fourth largest output in Canada. The business was commenced eighteen years ago under the firm name of Mailhot et Gagnon, consisting of P. Mailhot and Narcisse Gagnon. The latter had been in the retail shoe line for a number of years. The industry was launched at 555 St. Timothee street and in 1899 the firm purchased the plant and goodwill of Aird & Son and built a considerable addition to the Aird factory at 585 St. Timothee street. Four years ago they erected the present building on Ontario street east, which is 50 x 140 feet, with four storeys and basement. Narcisse Gagnon is now the sole owner of the business and in the management is ably assisted by his son, Emile Gagnon, and F. X. LeBlanc, who is superintendent and sales manager. Some weeks ago the firm suffered from a fire in the cutting and stitching rooms but have again resumed operations and are running to fullest capacity.

The Smardon Shoe Co., 533 Visitation street, have been in business for the past 14 years. The factory was first located at 92 Beaudry street, where Mr. Smardon, after resigning from the J. & T. Bell, Limited, where he had been superintendent for a number of years, began the manufacture of misses' and children's shoes. It was not long, however, before he started making women's welts, and later removed to the present premises of the company, which have become inadequate to meet the demand for their very high class lines. Plans and specifications are well under way for the erection of a new factory on Ernest street, between 4th and 5th aves., Maisonneuve. The present capacity is 800 pairs a day in women's and misses' fine welts and turns, but in their new home the company will have an output of 1,500 pairs daily. Mr. Smardon, who is a native of Markham, Ont., came to Montreal many years ago, where he was closely associated with the wholesale shoe trade in various capacities before going into business for himself. He has associated with him his two sons, Reg. Smardon, who is on the sales staff, and G. F. Smardon, who is in charge of the designing department.

L. H. Packard & Co. are one of the most widely known and progressive houses in the shoe store supply and findings lines in Canada. Away back in 1870 a small shop was opened

on St. John St. by L. H. Packard, who passed away in March, 1914, and his brother, Ed. Packard, the present head of the company. Later they branched out in the manufacturing line. The shoe findings stand grew steadily and then larger premises were taken on McGill street. In 1903 there was formed a limited liability company and three years later the splendid warehouse and factory on St. Antoine street was erected. The present officers are Ed. Packard, president,

*St. James Street*

Mortimer L. Packard, vice-president, and James William Strike, secretary-treasurer. From the cobbler shop started forty-six years ago the present splendid business with its wide connection and representative stock has been built up. The firm does a thriving manufacturing business in shoe dressings and polishes, lamb's wool soles, overgaiters and leggings and infants' soft soles. L. H. Packard & Co. have long been headquarters for sole leather, window and shoe store fixtures and findings of all kinds. They also carry an unusually attractive range of hard sole boots and shoes, McKay sewn, for misses, boys, youths and children and their travelers cover thoroughly every portion of the Dominion.

The Star Shoe Co., Limited, Montreal, who were organized about ten years ago by J. B. Hurteau, are at present turning out 1,500 pairs daily. They contemplate erecting in the near future a three-storey addition to their present building, and effecting other alterations, which will give them considerably more space. The company will then be in a position to turn out 2,000 pairs daily. The officers of the Star Shoe Co. are E. H. Lanthier, president; J. B. Hurteau, director and general superintendent, and P. A. Doig, general sales manager. All are well and widely known to the shoe trade, and since the re-organization of the company over a year ago, remarkable expansion has taken place. The company manufacture boys', youths', gent's, little gent's, growing girls', misses', girls' and child's McKays, and babies', infants', girls', misses' and growing girls' turns—over two hundred different lines in all.

The Kingsbury Footwear Co., 679 La Salle avenue, who have an output from 10,000 pairs a day upwards, have long been specialists in women's medium McKays and turns, and during the past year have started making women's welts, which, no doubt, will attain the same splendid reputation and high standard as have characterized their McKay lines. The daily output of the factory in 1905 was only 1,500 pairs, in 1908 it had been increased to 4,000, and in 1911 to 6,000, while the present output is seven times what it was eleven years ago. The Kingsbury Footwear Co., Limited, are specialists in women's footgear and have established a national connection and prestige for their well-known brands—"Kingsbury," "America's Pride," and "Canada's Pride." Raoul Lanthier is president of the company, N. F. X.

Dufresne first vice-president and W. F. Martin second vice-president and general sales manager.

The James Muir Co., Maisonneuve, possess one of the finest specialist factories on the continent. The firm began making shoes in Quebec many years ago and moved to Montreal in 1913, where they have a large four-storey building, which is specially laid out and thoroughly adapted for the making of footwear. James Muir, Sr., is president of the company, and James Muir, Jr., secretary and treasurer. Some of their well-known brands are "The Pathfinder," "Canadian Gentleman," "Sir Knight," and "The Academy." In addition to their men's welts, the company recently added a popular-priced line of women's Goodyear welts and fine McKays, in which they have developed a large business, their output being increased considerably. The company have made great strides since locating in Montreal, and their goods have achieved a firm place in the favor of the retailer and the consumer alike. Their spacious factory, as already stated, is not only modern in layout and equipment, but has been visited by many shoemen from other centres.

The Eagle Shoe Co., 587 Beaudry street, have been established 12 years, being launched by Oscar Brunet, the present head of the firm, along with several associates. They first began business at 360 Providence street, making both men's and women's shoes. The industry was removed eight years ago to its present location, where the output is about 600 pairs a day of men's and women's welts. Over a year ago the company started making women's McKays, and have been devoting special care and attention to their women's lines, bringing them up to the same high plane as their men's shoes. Eagle shoes are sold in all parts of Canada and have won an enviable reputation for style, finish, fit and comfort.

The Canadian Footwear Co., whose factory at Point Aux Trembles is one of the newest and most flourishing in the Dominion, have a splendid modern four-storey building, 45 x 120 feet, and an output of 150 cases a week in women's, growing girls' and children's McKays. The attractive show-

*Victoria Square*

rooms and sales offices of the company are located at 44 St. Antoine street. The brands of the company are "Carmen," "Venus" and "Canadian Footwear." Their excellently equipped factory was erected about a year and a half ago and since starting operations the output has doubled and is constantly growing. L. E. Gauthier is the president of the company, J. E. Charbonneau, vice-president, A. Lccours, secretary-treasurer and managing director, and Emil Larose, general sales manager.

#### LIGHTING THE SHOW WINDOW PROPERLY

The success or failure of show window lighting depends largely upon the choice and proper use of lamps and reflectors. There are hundreds of ways to light show windows and the market offers many kinds of appliances for the purpose. Each window presents a distinct problem for the merchant and the lighting man. It has often been found that by replacing old equipment with properly designed reflectors, the light on the goods can easily be doubled without any increased lighting cost. It is common to find losses of 30 to 50 per cent. in window lighting installations. These losses are mainly due to the poor design or improper shape of the reflectors, which are not suited to window lighting.

The lamp and reflector are the essential elements of the lighting unit. Now that window lighting methods have become fairly well standardized, the lamps most commonly used are the 60-watt and 100-watt sizes.

Present practice in show window illumination indicates that the units for one lamp only are preferred to reflectors with more than one lamp, such as clusters, troughs, etc. The individual reflector allows absolute control of the light given off by the lamp, and delivers it on the goods within certain limited angles, thus avoiding a waste of light on the sidewalk and on the window top.

The chief factors to be considered in the selection of the window equipment are the height of the window, its depth, the height and nature of the background and trim. Windows can be roughly divided into three general classes—high, average and low—which may be either deep or shallow. High, narrow windows, such as are usually found in jewelry stores, which require a concentrated beam of light, are the most difficult to illuminate satisfactorily. The majority of average windows can be best lighted with a "scoop" shaped reflector. This kind of reflector lights the high

points of the trim and also gets light down on the lower portions of the display.

Methods of trimming show windows vary, and in many cases of high trim it is necessary to use two distinctly different types of reflectors to get an evenly illuminated display; one type to light the upper trim, and another style to concentrate light down on the middle and bottom trim.

It is only in recent years that the proper consideration has been given to the nature of the background in selecting window lighting equipment. Backgrounds may be solid, mirrored, open, or made partially or entirely of glass. Especially in the case of an open or glass background is it necessary to use care in selecting the type of reflector which comes down over the lamp far enough to prevent the direct light of the lamp from shining into the store. Customers and clerks need not be subjected to the annoying and harmful glare of the brilliant lamp filament when reflector units can now be obtained to take care of this condition.

The number of reflectors to use in a window depends upon the degree of brightness that is desired by the merchant, upon his realization of the advertising and selling value of bright windows. The closer the units are spaced the brighter the window becomes, and vice versa. As a general rule, for average installation, the lights should be spaced 18 to 24 inches apart when 60-watt lamps are used, and 24 to 36 inches apart when 100-watt lamps are used. For brilliant lighting a closer spacing is necessary.

The mechanical features should not be overlooked in placing the reflectors; much trouble in installing will be avoided if standard wiring fittings are employed. The kind of shade holders that are recommended by the manufacturer of the reflectors should be used, and the suggestions of the electrical contractor closely followed, as he is familiar with inspection requirements and insurance regulations.—Signs of the Times.

from

Cracking

EVAUNOIL is the only preparation made that will put life into Patent Leather, when finished. Without the strength of its fibre, leather is no stronger than paper. That being so, anything that will give life to the fibre of Patent Leather (being as it is a baked leather) will keep it from cracking like Wax Calf, the leather that retains its strength of fibre. How can this be done? In no way except by penetrating the lacquer or coating of the leather, which Evaunoil will do without affecting the lustre.

*Hamilton, Ont.*

# CHANGES IN SHOE MANUFACTURING

The Onward March of Modern Shoe Factory Production as Evidenced by Some of the Ads Taken From the "Shoe and Leather Journal" of 1889

ON this page we reproduce from our issue of November 15th, 1889, two pages of shoe styles represented in two of the most prominent page advertisements of that number. They were regarded at the time as representative of the best ideals of shoemaking, and a comparison between the illustrations and those on other pages of this issue will afford some idea of the tremendous advances made, not only in shoe making, but in the engraver's art.

We have selected a few pages at random from that issue of twenty-seven years ago, and reproduced them on another page, and the result will be well worth more than a cursory

glance. Practically all of the concerns are now out of business or the business has passed into other hands or other management. In fact, the latter is true of all of them, for even J. T. Bell, the oldest concern in the trade, and the oldest advertisers in the SHOE AND LEATHER JOURNAL, is now a limited company, and the members of the firm at that day have both passed to the great beyond.

It might be mentioned that the production of Goodyear Welts was just at its inception, and that it was quite the thing for high class establishments to advertise hand welts and hand turns.

SPRING STYLES  
1890

*PROMINENT features of this well known western concern's Spring line set forth in their page advertisement in issue Nov. 15, 1889. Note the wonderful advance in shoe cuts as well as styles in twenty-seven years.*

## MONTREAL'S COMMERCE

To-day the annual value of Montreal's manufactured products is over two hundred millions; fifty millions go into the pay envelopes each year at the city's factories, and the value of the buildings and machinery involved is over a hundred and fifty million dollars.

This phenomenal development is largely due to the city's unique position. Other cities on this continent have equally as good railway facilities; other cities have lake transportation; other manufacturing centres are also ocean ports—but none other has the happy combination of all three of these advantages.

Montreal can thus assemble raw material and ship manufactured product with greater facility than any other city on the American continent. Montreal to-day produces 16 per cent. of the total manufactures of Canada and pays 17 per cent. of the total manufacturing wage bill. Montreal handles a quarter of the entire trade of the Dominion.

Customs duties collected at the port of Montreal last year exceeded twenty-five million dollars. A thousand sea-going vessels dock at Montreal's wharves during the season of navigation, bringing one hundred and fifty million dollars worth of merchandise.

This is the Montreal of to-day. Though the city has always occupied the premier place commercially in the Dominion, its greatest mercantile growth has taken place within the past twenty-five years. The city did not figure as a manufacturing place until some fifty years ago, though from its earliest history it has been famous as the country's great distributing centre.

The Sherbrooke Footwear Co., Limited, of Sherbrooke, Que., has been incorporated with a capital stock of \$50,000. The company is empowered to manufacture, sell and deal in boots and shoes. The incorporators of the company are W. T. Hamilton, manufacturer, Chas. W. Cate, John P. Wells, Chas. D. White and Jean May Stewart.

## MONTREAL—GREAT SHOE CENTRE

*(Continued from page 65)*

The Slater Shoe Co., Limited, is one of the oldest and most historic concerns in Montreal and makes men's high grade welts which are widely known, and sold in every part of the Dominion. The large factory of the company has a capacity of one thousand pairs a day and the firm has an extensive in-stock department. About two and a half years ago the firm was reorganized with L. E. Gauthier as president; Ralph Locke, vice-president; A. Mereault, secretary-treasurer, and A. A. Locke, sales manager. F. J. Boyden is the efficient superintendent of the plant which under his direction is capably managed and exceptionally busy.

The La Parisienne Shoe Co., Limited, La Salle avenue, Maisonneuve, started business in a small way on Cote street in 1902, under the name of Poliquin and Gagnon, and later the style was changed to the La Parisienne Shoe Co. The company have a four storey brick building 45 x 75 feet with an output of 2,700 pairs a week and contemplate erecting an addition in the near future which will give them a frontage of 120 feet on La Salle avenue. The firm turn out women's fine welts which have a superior reputation. The officers of the company are George Poliquin, president; Jules Gagnon, vice-president; A. Jeannotte, secretary-treasurer; J. A. Lavoie and M. Gauthier, directors.

The Macfarlane Shoe Co., Limited, 61 De Normanville street, Montreal, at the head of which is N. Macfarlane, have an excellently equipped and superbly laid out factory, having moved from 92 Beaudry street to their present spacious home four years ago. The building is a four-storey brick one, 45 x 150 feet. The company make infants', children's, growing girls', and misses' turns and welts. Their daily output is about 1,800 pairs. The Macfarlane Shoe Co. have been rushed to the limit during the past few months and scarcely know which way to turn in order to fill all their orders.

The Regina Shoe Co., 330 Notre Dame street east, Montreal, at the head of which is J. I. Chouinard, make the famous Regina and Diana shoes, the former in McKays and the latter in welts and turns. Mr. Chouinard, in the past few years, has won an important place in the shoe-making world. He started a retail store in 1886, and determining to widen his field, entered the wholesale line, under the name of J. I. Chouinard, at 314 Notre Dame street east, where he still conducts a large business. About ten years ago he formed the Regina Shoe Co., which occupies the same block on the south side of Notre Dame street. The Regina shoe has attained much prestige as a classy and attractive production. In 1911 Mr. Chouinard organized the Columbus Rubber Co., Limited, of which he is president and general manager. He is also a director of the Wayland Shoe Co., Limited, Montreal, and in many other connections he has proved his executive ability and business capacity.

La Duchesse Shoe Co., Inc., Montreal, have a spacious five-storey building and are contemplating erecting an extension, in the near future, which will give them about 6,000 square feet extra. B. Vaillancourt is the progressive head of the firm, whose output is about 9,000 pairs a week of women's McKays. The company also make women's and misses' turns and do quite a large trade in men's and women's slippers. D. F. Desmarais, who is also a member of the firm, ably looks after the selling end. He is a bright and energetic young man who is bound to succeed in the footwear game and has won a high place in the regard of his customers.

Scheuer, Normandin & Co., 6 St. Helen street, specialize in felt footwear, white canvas goods and evening slippers. The members of the firm are Louis Scheuer and Jean Normandin. Mr. Scheuer has been for a long time in this branch of the shoe business, and is well known to the trade. He is conversant with felt and canvas goods from the initial process to the finished article and is considered to be an expert in this particular line. Mr. Normandin looks after the financial interests of the firm, and is a splendid office man. Scheuer, Normandin & Co., are sole agents for the Daniel Green Felt Shoe Co., Dolgeville, N.Y., and cover Canada from coast to coast. The firm represent several well-known manufacturers of felt slippers and are sole agents in Canada for C. F. Bally, Limited, of Switzerland, who make high grade satin and leather slippers. The firm also carry a complete range of English and Canadian made felt goods and show a fine selection of canvas footwear. It is their intention to include in their stock in the near future medium and high class leather goods from infants' to women's.

The Renà Footwear Co., 611 Beaudry street, Montreal, are makers of men's, boys', youth's and little gent's McKays, and specialize in women's medium priced McKays. The firm sell to the retail trade and cover all parts of Canada. Their representatives are Auguste Martineau, Montreal and suburbs, J. A. Perron, province of Quebec; H. Thompson, Eastern Ontario; W. C. Myers, Western Ontario; R. B. Chalue, Western provinces, and W. E. Demers, Maritime provinces. The company have been six years in business. A. Dessault is the president; U. Boulaire, vice-president; L. Dessault, secretary, and J. A. Cyr, manager. Mr. Cyr has been some fifteen years in the shoe arena, and is a good shoeman, who is well liked by the trade and progressive in ideals and management.

Gagnon, Lachapelle and Hebert, 55 Kent street, have been established a little over a year and have made fine progress. The members of the firm are T. Gagnon, who looks after the cutting room, J. Lachapelle, who is in charge of the finishing room and W. Hebert, who handles the sales end, and supervises the finances. The firm specialize in fine McKays for women and in white canvas goods for misses and children. They occupy a large four storey brick building and have a capacity of 7,500 pairs a week. The firm sell to the jobbers only and are very busy.

Charbonneau and DeGuise have been established over over three years. C. H. DeGuise who is still a young man comes from a family who for a long period have been identified with the shoe and leather business. F. X. Charbonneau has been engaged in the shoe game for over twenty years with various firms throughout the province and later branched out for himself. Charbonneau and DeGuise have met with much success, and their plant is now working at full capacity, turning out about five thousand pairs each week. They make men's, boys', growing girls' and infants' in McKays and Standard screw.

Jackson & Savage, proprietors of the Boy Scout Shoe factory, began the manufacture of shoes in 1911, specializing on Boy Scout boots. Since then many other lines have been added, including the Scout Master, and now a general range is made in men's, boy's and youths', women's, misses' and children's McKays and welts. H. C. Hatch is the superintendent of the factory.

The Victor Box Toe & Counter Co., Limited, of which G. J. Trudeau is the managing director, has begun the manufacture of felt box toes and fibre and leather counters at 1245-1247 St. Hubert street. The capacity of the plant is

25,000 pairs of box toes and about 40,000 pairs of counters a day. Mr. B. Fralick, formerly with E. L. Gowdy & Co., of Brockton, Mass., has charge of the manufacturing end. The company occupy two floors, 210 x 40 feet. They guarantee that all their fibre counters will outwear the shoe, while the felt box toe in uniformity, resistance and durability has been proved to be all that the most exacting manufacturer can demand. It is now employed by many of the leading shoe factories in Canada.

F. E. Woodward & Sons, who, in January last, took over the business of the cement department of Fisk, Limited, which had been running for eleven years, report business as being exceptionally brisk. They manufacture rubber cement of all kinds for the trade, corking shoe filler for filling good-year welt shoes, backing cloth of all kinds, up to sixty inches in width with paste or cement, canvas and leather insoling, top facings of all kinds, and box toe materials. The head of the firm is F. E. Woodward, while R. E. Woodward is sales manager, and K. D. Woodward factory superintendent. All were formerly connected with Fisk Limited. F. E. Woodward was in charge of the cement department of that firm, of which he was manager, until taken over by himself. He first started the manufacture of cement and afterwards introduced the other lines. R. E. Woodward joined Fisk, Limited, cement department in 1907, and worked in the factory until 1912. He has been selling since for Fisk, Limited, as Woodward & Son had charge of the sales over all Canada. R. E. Woodward has a general all round knowledge of the manufacturing end of the business. After graduating in the university of Maine, as a chemist, E. D. Woodward joined Fisk, Limited in July, 1912, and has had charge of the manufacturing end ever since. He is the superintendent of the factory for F. E. Woodward & Sons, and devotes considerable time to experimenting on new lines.

#### A VETERAN WHO KEEPS YOUNG

A gentleman who is always glad to see you, greets you with a whole-hearted smile and warm handshake, is F. X. LeBlanc, of Aird & Son, Reg., Montreal, with which firm he has been associated for the past twelve years. Mr. LeBlanc, who is highly thought of by the trade, is an expert in footwear production and sales, and has all details at his finger tips. On first acquaintance no one would have any idea of the length of time Mr. LeBlanc has been identified

#### CONDENSED ADVERTISEMENTS

with the industry of St. Crispin, until he had the pleasure of hearing him mention names of the leaders in the trade as far back as 1880, and in such a manner as to convince his hearer that he was on intimate terms with them. Mr. Le-

F. X. LEBLANC, MONTREAL

Blanc has always kept pretty well in the background, "sawing wood and getting results." Young in spirit and enthusiasm, with him, "business is pleasure, and pleasure is business."

#### WILL OPPOSE STRAPPING SHIPPING CASES

In the Canadian Freight Classification, No. 17, which has just been published, an item appears on page 64, applying to footwear which reads as follows:—

"Boots and shoes not otherwise indexed by name, in boxes less than carload lot shipments, will carry one and one-half first-class rate.

"In boxes made of wood and strapped at each end with metal straps completely encircling the box and attached thereto, first-class rate.

"In packages named as above in carload lots, minimum weight 24,000 pounds, will carry a rate of third class."

The rubber footwear manufacturers particularly are taking serious objection to the foregoing order, and it is probable will carry their case to the Railway Commission. They say it would cost them thousands of dollars extra to bind cases with wire, and would result in delays. One leading firm told the SHOE AND LEATHER JOURNAL that while fibre cases were no doubt all right for leather shoe manufacturers and jobbers who shipped by express, they would not answer at all the requirements in the shipments of rubber shoes by freight. Several jobbers, when interviewed on the subject, declared that the regulation compelling them to strap the boxes with metal straps at both ends was a hardship, and an unnecessary expense.

## TORONTO REPAIRERS AGAIN ADVANCE PRICES

The Toronto Shoe Repairers' Association, at a well attended meeting, recently adopted another new price list which has gone into effect. The increase, which averages from 10 to 15 per cent., has been rendered very necessary owing to the rapid advances in the figure for sole leather, tap soles and top lifts.

The Association which is not yet six months' old has a membership of over 100, and the regular fortnightly gather-

Association and at every meeting a number of applications are received.

The new Toronto repair price list is as follows:

### Comfort - V S - Discomfort

Did you ever notice after a day out you sit down heavy in your chair, and say, Oh my - I am tired, I must be getting old. I used to be able to walk twice as far as I can now?

In fact, you think all sorts of things. But did you ever take up your shoe and examine it? Just glance at the heels, and notice, how they are all worn down on one side. That is the reason you feel old! You are not walking flat. Therefore, every step you take you are straining the calves of your legs.

You are practically every bit as young as you used to be. REMEMBER WE ARE ALL AS OLD AS WE FEEL!

### GET THOSE HEELS STRAIGHTENED AND FEEL YOUNG AGAIN

RING UP HILL 2207 And I will send for them

**R. STEPHENS,**

A POINTED AND INSTRUCTIVE ADVT BY A TORONTO SHOE REPAIRMAN

ings are marked by large attendances and lively discussions. The membership fee has been fixed at three dollars a year, and a trade mark card suitable for framing will shortly be issued to every member to hang up in his shop. Many repair men who at first held aloof are now coming into the

## SOLE LEATHER KEEPS ON AVIATING—HOW HIGH WILL IT GO?

The price of sole leather continues to ascend and during the past few days there have been two more advances. A comparative statement of the figures prevailing nine months ago with those of to-day is presented. The advances range from fifteen and sixteen cents a pound up to eighteen,

and the end is not yet in sight. No wonder that shoe repairers have to increase their prices for all lines of work.

Here are a few statistics which tell the story of increasing costs, the terms being 2 per cent., thirty days; nett sixty. How soon another jump will take place, no one can tell.

	Mar. 4th, 1916 Prices		Nov. 4th, 1916 Prices

#### GO AFTER THE SKATER'S TRADE

Skating weather will soon be here. This should mean increased business for the smart repairer who knows how to go after it. A pair of old shoes which have been discarded for ordinary wear can be fixed up to make a fine pair of skating shoes. You know this, but perhaps it never occurred to the owner of the shoes. Let them know about it. Put up a sign in your window where passersby will be sure to see it. It might read something like this:

### Prepare Now for the Skating Season

Bring in Your Old Shoes and

Let us Convert Them Into

### A FINE PAIR OF SKATING SHOES

A Patch on the Sole, A Low Common  
Sense Heel, and Presto!

You're All Ready for a Glide O'er the Ice

In fixing up shoes for skating put some extra nails in the heels, and use a reasonably good leather from the first lift to the last.

Sharpening skates is a simple operation and there is no reason why the shoe repairer can not do it successfully. But you must acquaint the public with the fact that you are prepared to do it. A neat little sign in your window reading "We Sharpen Skates" will turn the trick.

Straps and buckles on skates are subjected to rough usage and wear out frequently. Enterprising repairers should carry a stock of these goods and make a nice profit on such repair work.

#### TAP SOLES ARE STILL SOARING—WILL SOON BE DOUBLE IN PRICE

In sympathy with the constantly upward prices of sole leather, cut stock is increasing all the while. During the past nine months there have been several advances which on the average total between 70 per cent. and 75 per

cent. Here are some comparative figures on a few lines, giving those which prevailed in February last and those now in effect, which means that the shoe repairer must get prices for his work commensurate with his outlay.

				Prices per dozen pairs Feb. 6, 1916	Prices per dozen pairs Nov. 6, 1916
Men's tap soles	XXX	Grade No.	8 L	\$ 4.30	\$ 7.45

## SHOE NEWS IN PARAGRAPH

Ralph Locke, of Dufresne and Locke, shoe manufacturers, Montreal, spent a few days in Toronto last week calling upon the trade.

Important dates to be remembered in placing orders for spring, 1917, are that the Lenten season begins with Ash Wednesday, February 21st, and that Easter Sunday falls on April 8th.

R. B. Gravlin, of the White Shoe Co., Toronto, spent a few days last week on a business trip to Montreal and Quebec.

Fred. P. Beemer, who represents the Blachford Shoe Manufacturing Co., Toronto, in the Western provinces, has returned from an extended and successful spring selling trip throughout the West.

Toronto Leather Company is among the concerns who have recently registered, as well as the Beaver Rubber Company, Toronto.

The Victor Box Toe and Counter Co., Limited, Montreal, have recently registered.

Roy Wilson, manager for Johnston and McCormick, shoe dealers, St. Thomas, Ont., was in Toronto last week calling upon the trade.

Messrs. Hennessey & Wilson, late of Calgary, have opened a new shoe and men's wear store in North Lethbridge. It will be known as the Cash Store.

Richard Weston, of the Weston Shoe Co., Campbellford, Ont., spent a few days in Toronto last week, calling upon the trade.

W. Alf. Moore, salesman for Beardmore & Co., who was operated upon in Toronto General Hospital a few days ago for appendicitis, is making good progress toward recovery.

G. J. Scott, who represents P. Jacobi, shoe store supplies, Toronto, has returned from an extended trip to the Western province, and is now calling upon the trade in New Brunswick and Nova Scotia.

William Taylor, Jr., of Parry Sound, Ont., who is producing lace, moccasin and harness leather, has succeeded his father, who passed away a few months ago. Mr. Taylor, Jr., is a practical man and has managed the tannery for twenty-five years.

Bert Packard, of the L. H. Packard & Co., Montreal, spent a few days recently in Boston on business.

C. S. Sutherland, general manager of the Amherst Boot and Shoe Co., Amherst, N.S., spent a few days in Toronto last week.

Geo. G. Gales, shoe retailer, St. Catharines street west, Montreal, was in New York recently on a business trip.

Mr. Howe, who was formerly superintendent of one of the Ames-Holden-McCready factories, has taken a position as foreman of the bottoming room of the Regal Shoe Co., Toronto. Mr. Whitney, late of the Brandon Shoe Co., Brantford, Ont., has taken charge of the finishing and treeing room of the Regal Shoe Co.

Nap Dupont, wholesale shoes, Montreal, has registered.

H. E. Wettlaufer, sales manager of Charles A. Ahrens, Limited, Kitchener, Ont., and former president of the Ontario Hockey Association, has been elected honorary president of the Kitchener Hockey Club for the coming season.

Bilodeau & Garfinkle, shoe dealers, Montreal, have registered.

In a fire which broke out recently in Sydney, C.B., considerable damage was done to D. P. MacDonald's shoe store. The premises were gutted and the stock injured by water.

W. G. Simpson, who has been engaged for the past four years with the Miner Rubber Co., as accountant in the To-

ronto Warehouse, and for the last two years in Montreal, has been appointed manager of the Montreal Branch. Many friends will congratulate him on his promotion.

Sam Long, a Chinese shoe repairer of Vancouver, proceeded with the completion of a wanted job in the shoe repair line on a recent Sunday morning, and was brought before the court on a charge of breaking the Lord's Day Act. It being the Oriental's first offence, the charge was withdrawn.

A new shoe store has recently been opened in Saskatoon by E. J. Naylor, who is well known in that city, having until recently been with the Williams and Causgrove shoe store, and prior to that time, acting as manager of the Harvard Shoe Store.

The premises of the Goodyear Rubber Co., Montreal, were burglarized recently, the thieves getting away with goods valued at \$800. A large quantity of the goods was later discovered in a cellar on St. James street, by the detectives, and identified by J. McNally, manager of the local branch.

L. P. Chapdelaine, who has been attached to the Ottawa Branch of the Miner Rubber Co., is now with the Montreal office of the company. S. Sherman, late of Montreal and Granby, has taken charge of the office of the Miner Rubber Co. in Ottawa.

M. H. Shibley, of Toronto, who represents the Brown Shoe Co., of St. Louis, Mo., and has sample rooms in the Yonge Street Arcade, has returned from an extended selling trip throughout Saskatchewan, Alberta and British Columbia, and reports business as being very satisfactory. F. A. Kitley, who is associated with Mr. Shibley, returned from Manitoba and Northern Ontario after a successful selling expedition in the interests of the Brown Shoe Co.

An effort is being made to form a bowling league which will be composed of city travelers and Toronto shoe retailers. Many are adepts at the interesting game of ten pins and it is thought that teams of seven can be formed and matches held one night a week. The retailers say that they can trim the travelers the same as they did in baseball last summer, and the latter declare they would welcome a chance to get even for the defeats on the diamond. The movement in favor of a bowling league is growing strongly and will likely take definite shape in the near future.

Stark's Shoe Store, Vancouver, was the stage set for a very interesting exhibition recently when the store staff and friends were the guests of F. E. Rutledge, of Chicago, in a moving picture "evening." Mr. Rutledge, who is one of forty travelers of the Scholl Manufacturing Co., of Chicago, engaged in similar work all over the continent, gave a scientific and educational lecture on foot troubles. With the assistance of the pictures he also demonstrated the Scholl appliances for the correction and cure of foot ailments. The staff of the Stark store will be given a ten weeks' correspondence training course from the Scholl School.

A recent despatch from London, Eng., says:—"The government's demand for leather is enormous. There is a greater shortage of leather than the government anticipated. Between October 30th and November 15th they required a further 9,000,000 feet of upper leather. Also they require 7,000,000 feet for ankle boots for the British army; these boots to be delivered between now and December 30th. Sole leather is equally a serious proposition. The Russian government have given the English government an order and are prepared to take up 40,000,000 feet of upper leather for shipment between now and the middle of this month. These figures are far away the biggest and fairly put anything that has ever been heard of before in the shade for such a short delivery period. This means that there may practically be no civilian leather available in a very short time, it being the government's intention to put a tooth comb through the market and take everything they can use, whether it is suitable or unsuitable."

## What's in a Name?

Much, when one has the goods to back it up. We are justly proud of the name

L. M. Barnett, Proprietor

Mayor R. T. Hayes, of St. John, N.B., has received an invitation from the Canadian Club, of Boston, to be present at their annual banquet, which will be held in the Copley Plaza Hotel on November 20th. Mayor Hayes is president of the firm of J. M. Humphrey & Co., wholesale dealers in boots and shoes in St. John.

G. A. and C. A. Blachford, of the Blachford Shoe Mfg. Co., Toronto, have returned from a business visit to New York, and other cities. They say that it is becoming more difficult every day to buy leather at any price, and that firm found it necessary to pay as high as \$1.20 per foot for colored kid skins during the past few days.

R. M. Beal, of the R. M. Beal Leather Co., Lindsay, Ont., has returned, after spending some days in New York City.

M. J. Sheehy, superintendent of the Perth Shoe Co., Perth, Ont., spent a few days recently in New York, Boston, and Philadelphia, on business.

H. E. Moles, of J. and T. Bell, Limited, Montreal, was a recent caller upon the trade in Boston.

T. G. Bowerman, who has been in charge of the shoe department of the "Fair," Picton, Ont., has removed to Stouffville, where he is conducting a store in the Fair Syndicate System, which has now seven stores in the following places: Picton, Napanee, Gananoque, Trenton, Wellington, Brighton and Stouffville.

The name of M. Lefkowitz, & Sons, Limited, Montreal, has been changed to the British Rubber Company.

The F. and B. Shoe, Limited, of Montreal, has recently been incorporated.

A charter has been granted to van der Linde Rubber Co., Limited, with capital stock of \$350,000 with headquarters in Toronto. The company is empowered to carry on the business of manufacturers and dealers in rubbers and moulded goods, and to cultivate rubber plants, guayule, and all other plants capable of being used in the manufacture of rubber, or similar products, and to carry on the business of rubber plantations in all its branches.

The Canadian Juvenile Shoe Co., Limited, has been granted a charter, with a capital stock of \$50,000, with headquarters in Sorel, Quebec. The incorporators of the company are J. L. B. Leclaire, J. B. W. Leclaire, of Sherbrooke, Jos. E. Harpin, and Wesley H. Sharp, of Montreal. The company will manufacture turn shoes for children, and have added a full equipment for that purpose, supplied by the United Shoe Machinery Co.

D. D. Hawthorne, wholesale shoe merchant, Toronto, is making fine progress toward complete restoration to health, after his operation of some weeks ago and is now able to come down to business for a few hours each day.

John McCullough, shoe retailer, 866 College street, Toronto, is opening a branch store at 950 Bloor street west, near Dovercourt, which will be under the management of W. Ship, who has been in the employ of Mr. McCullough for several years.

The Cluff Shoe Store Co., Vancouver, has purchased the business of the Banner Shoe Store Limited at 649 Hastings west, in that city. Mr. Fred Cluff will be the manager of the new firm. He has been the manager of the Banner Shoe Store since its incorporation.

Charles Newton, manager of the shoe department of J. Robinson, Winnipeg, who recently underwent an operation in the hospital, is making good progress toward recovery.

J. E. Roome, who has been in business in Glencoe for 35 years, has disposed of his grocery, crockery and shoe business to W. J. Strachan. Mr. Roome will retain the agency for the Bell Telephone Co.

Clarence Jackman, late of the Chilliwack Shoe Co., Chilliwack, B.C., has taken a position with the Ingledew Shoe Store, Vancouver, B.C.

The Perth Shoe Co., Limited, of Perth, Ont., has been granted a federal charter with a capital stock of two hun-

dred thousand dollars. The new charter empowers the company to acquire the assets and undertakings of the old company which have a provincial charter. The incorporators are John A. Stewart, F. W. Hall, Hugh A. O'Donnell, W. E. Danner and T. J. Maher.

Fred Davidson has taken over the shoe business of H. B. Samels, Oshawa, and has moved the stock into new premises on Simcoe street, which he is having remodelled and redecorated.

Calgary shoe repair men have advanced their prices for all lines of work owing to the increasing cost of leather, nails, etc. This was decided upon at a meeting recently held.

L. F. Jackson, of Toronto, who represents the Brandon Shoe Co., and the Blachford Shoe Mfg. Co., in the Maritime Provinces, has returned from a successful spring selling trip.

A recent despatch from Boston, Mass., published in several leading newspapers, says: "Leather boots and shoes will retail at \$20 to \$30 a pair in the not far distant future, according to the prediction of leading leather and shoe manufacturers and retailers of Greater Boston. High leather shoes will soon pass and cloth tops will soon be all the rage, they say."

The warehouse of the Borbridge Saddlery Co. on Ross avenue, Winnipeg, was completely destroyed by fire last week. The loss is estimated at \$100,000. E. J. Hoover, in charge of the mail order department, was burned to death and several other employees were injured.

J. G. McDiarmid, representing the Murray Shoe Co., of London, has returned to Toronto after an extended and successful visit to the Prairie Provinces.

Alf. Winn has returned to Toronto after a trip of several weeks' duration to Quebec and the Maritime Provinces in the interest of E. T. Wright & Co., St. Thomas, Ont.

The annual meeting National Association of Tanners was held in Chicago last week. \$15,000 is to be raised for Tanners' Research Laboratory to investigate leather methods, tanning materials and effective means of disinfection against anthrax.

A prominent Yonge street retailer, of Toronto, informed a SHOE AND LEATHER JOURNAL representative the other day that four ladies of the same family came into his store, bought four pairs of shoes and gave him \$100, and received no change. Of course the shoes were particularly fancy creations, but it just goes to show what people will actually pay for stylish footwear.

It has been predicted by some of the best style authorities that button shoes are fast gaining favor with women and it will only be a short time before these dressy models are once more in vogue. One reason is that button boots have always been considered a full dress shoe and a lace shoe has always been considered as a walking or sport shoe.

Fancy cloth tops in all colors are again making their appearance for spring, and there is in some centres a tendency to go strong on this particular line.

Fire broke out recently on the two top flats of Adams Bros. Harness Mfg. Co., 204 King street east, Toronto, doing much damage. Manufacturing operations will, however, not be interrupted.

The North British Rubber Co., Limited, 43 Colborne street, Toronto, are looking for a man calling himself McKenzie and claiming to represent them. He has no connection whatever with the concern and they would be glad of information that would lead to his being located.

Henry Boulter, who for fifty years was engaged in the civil service in Toronto, and was superannuated in 1905, died recently. Mr. Boulter, who was born in Wiltshire, England, came to Canada when 20 years of age, and had attained his 80th year. He is survived by his widow, and three sons, one of whom is George E. Boulter, wholesale shoes, 3 Wellington street east, Toronto. Mr. Boulter had the distinction of opening the first money order and savings department in the Toronto Post Office.

# "SAVE THE LEATHER"

The above quotation is from the British Government, which is now urging that rubbers be worn more extensively.

Economists are also urging the same.

This is sure to increase the demand, and you should keep well sorted up with the popular, long-wearing Brands—"KANT KRACK," "DAINTY MODE," "ROYAL," "VERI-BEST" and "DREADNAUGHT."

Then do not be late in placing for "SPEED KING" Lines, for the demand is going to be big this coming season.

# FOOT TROUBLES

## AND HOW TO RELIEVE THEM

*The giving of foot comfort is not merely a matter of profit. Neither is it only a matter of service. It should be to every man a source of pleasure because of the great good he can do in this manner for his fellow men.*

Bone displacement in  
Bunion

One of the most painful of all foot troubles is the bunion. And it is a common one as well. The bunion is caused by the crowding over of the great toe, due to short or narrow, pointed shoes—short, pointed hose—or sometimes weakness of the arch which allows the toes to crowd forward and together.

Continued crowding of the toes brings on inflammation at the joint of the great toe. The bunion forms over the joint, the cartilage becomes affected, the ligaments adjust themselves to the altered conditions and the inflammation and enlargement continue until the pain and soreness make attention imperative.

## Dr. Scholl's Bunion Appliances

The surest way of removing a bunion, next to a surgical operation, is the application of one of Dr. Scholl's scientifically designed bunion appliances. These have been successful in thousands of cases, and every shoe dealer should carry a complete stock of them—not only for the service and the profit but also for the sake of relieving the pains and discomforts of his customers.

Dr. Scholl's Toe Flex is an ingenious and accurately designed invention for correcting crooked toes, restoring normal action to the great toe, so that nature will straighten the crooked bunion toe. Dr. Scholl's Toe Flex is wedge shaped, extremely comfortable to wear, and made in three sizes and shapes to fit all feet. Retail price, 50c. each.

Dr. Scholl's Bunion Reducer is a scientific shield made of para rubber to conform to shape of bunion, relieves all pain or tenderness in bunions or enlarged joints. Takes away pressure, keeps shoe in shape, excludes air, retains moisture, and reduces the enlarged joints. Made in three sizes: No. 1 small, No. 2 medium, and No. 3 large. Also rights and lefts. Retail price, each 50c.

## Dr. Edison CUSHION SHOE

## The Easiest Shoe for Women

This is the shoe that has won the unqualified favor of a great multitude of women. The reason for this is that it combines attractiveness and comfort which

is not true of all cushion shoes. In fact the Dr. Edison Cushion Shoe disproves the old theory that good looks must be sacrificed in shoes to gain foot comfort.

**The New Retail Price is \$6.00.** These styles illustrated are now being advertised nationally at the new retail price, \$6.00. Women will, therefore, be attracted to these four particular styles and be familiar with the new price.

**Get Them from Stock.** This is a prime time of year for cushion shoes. Order your sizes today. Also, ask for sample of mailing booklet which we supply **free** to help create added interest in The Dr. Edison.

**One Dr. Edison Agency in each city.** It may not be too late for you to procure it. Write for proposition.

**D**OMINION RUBBER SYSTEM brands of Rubber Footwear are distinctive because of the fact that **QUALITY** has been made the essential feature. That applies to heavy grades for lumbermen and miners as much as it does to the lighter weights for women and children. It is as true of long boots as it is of sandals. In Rubbers, Overshoes, Gaiters, Combinations or Boots, inside and outside, sole as well as upper, we insist on maintaining our standards of excellence, and the shoe merchant who stocks a Dominion Rubber System brand has full benefit of our qualities and our unequalled variety of styles.

The largest rubber manufacturing Company in Canada and in the British Empire stands back of the Dominion Rubber System brands.

## THE LEATHER SITUATION

**Conditions Change Overnight—Business Done on the Minute—Leather Men Don't Know What to Ask—Looks Like Famine Already in Light Stocks**

A SHOE manufacturer who has just returned from Philadelphia, says he was negotiating a fair sized order for kid and left its conclusion till next morning. He was told that prices had advanced five cents a foot overnight and only by dint of pressure could he get part of his order filled at that.

We have been handed a letter recently by a local shoe manufacturer from another kid concern, which says in part: "The past few days have seen the most drastic increases in the cost of goat-skins which have yet occurred, some kinds being quoted at nearly four times their normal prices. We have our own buyers in the primary markets who are obliged to pay the ruling prices for the skins from day to day, and therefore, not knowing to what extent these prices may advance, we are unable to take orders for future deliveries of glazed kid while these very unsettled conditions of affairs prevail."

A calfskin manufacturer in discussing the situation with the SHOE AND LEATHER JOURNAL the other day, said: "Raw skins seem to be steadily advancing and sensational prices are being asked and obtained. For instance, a few have recently been allowed to come out from France under permit. They have sold at eighty cents a pound, which means ninety cents to a dollar for Russia or high class blacks made from such stock at only a moderate profit. We have had to refuse orders from outside customers for large quantities of medium grade black gun metal at seventy cents in order to protect our regular trade."

Fancy calf lines such as ooze and some other lines are now selling on the other side at a dollar and upwards. Side leathers as they continue to take the place of calfskins show the tendency to steadily increase in value and although some relief is experienced in this and the use of heavier weights in calf, the situation does not seem to be affected much.

With hides approaching the thirty-five cent mark at home and South Americans still on the rampage, sole leather continues to aeroplane, until it is freely predicted that before the turn of the year dollar sole may be in sight. Certain selections are almost unprocurable and those who buy seem to be taking stuff they would have turned up their noses at six months ago.

A shoe manufacturer who realizes what the trade is up against just now, writes us: "We might just add that we have advices from some of the leading tanners stating that sole leather will be \$1.00 per lb. and calf skin \$1.00 per foot when we are eating our Christmas dinner. If this prediction is correct, and we have every reason to believe it is, it will mean a change of at least \$1.00 per pair for men's footwear."

# PREDICTS RETURN OF CLOTH TOPS IN SHOES

Fabrics Would Materially Help the Situation as it Affects the Shoemaker who is Working Against Conditions Never Experienced Before—The Satisfactory Character of Leather Substitutes—Toronto Shoe Manufacturer Gives Retailers Some Facts

“ABOUT ten months ago I had the pleasure of addressing your Association at its annual banquet, and at that time was assured by a few of my friends that while what I said was alright, they thought it altogether too serious. However, if conditions were serious last February, they are apprehensively serious to-day.

“Having returned but a few days ago from visiting the leading shoe and leather markets in the United States, I can say that the trade is to-day facing conditions that have never been witnessed before in the history of shoemaking. I am not an alarmist, but there is no use hiding facts.” So declared George A. Blachford, President of the Blachford

GEORGE A. BLACHFORD, TORONTO

Shoe Manufacturing Co., in a timely and instructive address before the members of the Toronto Shoe Retailers' Association on Thursday, November 23rd.

Mr. Blachford imparted a great deal of interesting information and was asked several questions by those present in regard to the leather situation. At the close he was tendered a cordial vote of thanks.

Mr. Blachford declared that the way leather prices were ascending was amazing, and the shortage in supplies and raw skins, was literally staggering to one who got up against these conditions as the shoe manufacturers have to at the present time. Last June sole leather, (oak and union sole leather) was selling at about 60 cents; to-day it is 85 cents per pound with the forecast of reaching \$1.00 per pound before January 1st. In days gone by it was with a feeling of pride that a shoe traveler referred to a fine kid boot, when making a statement that it was cut from 30 cent kid, then the top notch price.

## All Leather Quotations Withdrawn

How different to-day when the better grades of kid cost from 55 cents to 65 cents per foot. Manufacturers, who formerly paid 14 cents to 16 cents for kid which went into the cheaper grades of shoes are now paying 36 cents and 38 cents with the leather inferior than when selling at the

old price. At this moment, practically all quotations in the leather markets have been withdrawn, kid selling from day to day at that particular day's price. The supply of raw stock ahead of the large kid industries is very uncertain, tanners claiming that they do not know where they are going to get their supply of skins during the year of 1917. Philadelphia and vicinity is not only the great kid centre of the world, but to-day is the centre of tremendous industries making war materials, with the result that labor in the kid industries has advanced for 75 per cent to 100 per cent., contributing a serious advance to the cost of production. The large munition plants have taken large numbers of experienced kid workers, with the result that the tanners have had to break in green and inferior help, resulting in further cost of production and inferior quality results. If it were possible in the tanning of leather to-day to work every skin out, to the utmost, it would probably result in 10 per cent. saving in leather at the shoe factories.

During the past year patent leather has been the most staple leather on the market, but recently advances have been forced on the tanners and the manufacturers in the past few weeks have been asked from 4 cent to 6 cent increase with future supplies and prices extremely uncertain.

## Sheep Skins Bring Former Kid Prices

In the matter of sheep skins, prices are now being paid for this material that at normal times we paid for kid. A few months ago the British government placed an embargo on all sheep skins, purchasing the supply as far as possible in outside markets and requiring all the skins in the market controlled to be shipped to London. We might say that the British government controls practically to-day's entire sheep skin supply, New Zealand being probably the greatest contributor. These skins are re-sorted in London, the British government retaining what it requires for the use of its own and Allied armies with the result that the balance, including the poorer and lighter weights, are allowed to be sold for neutral consumption.

The condition in the calf skin market has become probably more serious still, and it was only recently that a large American tanner claimed that after he had sold some 1,000 dozen on hand, he would have no more calf skins suitable for women's work at any price until next spring. When I reached Boston some two weeks ago, calf skins, suitable for women's work, were selling at 60 cents per foot. Four days later on returning from New York, the price had advanced to 72 cents.

## Colored Kid Over One Dollar

Colored kid is to-day selling from 90 cents to \$1.20 per foot, having advanced since last September 30 cents to 40 cents per foot with the leather manufacturers absolutely independent. It is a case of pay the price or leave it, and even at this extremely high price, this leather is being taken by the shoe manufacturers just as quickly as it can be turned out.

It was reported that a few weeks ago, Japanese traders practically cleaned up the market for what is known as India kid. This was done with the approval of the British government in order that the leather may be used for supplies for the Russian Army with the result that black India kid, which in normal times sold around 14 cents, is now being

(Continued on page 32)

# SENSIBLE AND SERVICEABLE GIFTS FOR YULE-TIDE

The Shoe Retailer has **Unique Opportunity** to Drive Home Wisdom of the Useful and Practical in Holiday Remembrances—How Representative Dealers Tell of Dainty Slippers, Warm Felt Footwear, Dressy Shoes, Military and Skating Boots

**T**HE harvest periods for the alert shoe retailer are the Yule-Tide and the Easter-Tide seasons. The former is now at close range, and the wise merchant is one who prepares <sup>now</sup> for the big business which should come his way. He must see that his stock is well arranged and accessible, that the store interior is neat and trim, and made unusually attractive with some appropriate decorations. The windows should reflect the Christmas spirit in life, color and association, and afford ample suggestion of what is suitable for every member of the family.

More and more and particularly during <sup>the</sup> war time the necessity of giving useful, practical and serviceable gifts is being emphasized. There are so many and varied selections in the ordinary shoe emporium that it should not be hard to please and satisfy the most exacting caller. The enterprising shoeman not only has his shop and windows full of the latest and most beautiful styles of house and street shoes, slippers, overgaiters, leggings, moccasins, felt boots, rubbers, overshoes, hockey boots, skates, etc., but he sees that these lines are featured in his announcements in the daily and weekly papers.

## Solving the Gift Problem

Make your printed matter radiate the gladness and festivity of the coming season of peace and good-will. Let it be known that a gift is none the less pleasing and acceptable because it possesses a sane, utilitarian character. The newspapers are urging the people to take the affairs of every day life during the present strenuous era with seriousness, calmness and fortitude, and no mercantile establishment presents more appropriate or saner offerings in the gift giving line than the family footwear dispensary.

Every announcement should have an attractive and timely caption or heading. This should be followed by a few words of greeting, explanation or instruction. The various lines which your establishment presents for the holiday season should be noted, and it is good business to indicate a range of prices, but it is not necessary to specify a figure for every shoe.

The far-seeing shoe retailer should also emphasize the necessity of early buying, explaining that when lines are complete a better selection is open to patrons, a more competent and painstaking service given, as well as personal and prompt attention. Now and then, when people wait till the last week to make their choice in footwear, they are not properly fitted, or buy something which they really do not care for. In looking over the advertisements of representative shoe retailers in Canadian cities it is gratifying to observe the quality of the publicity, its attractive nature, well-balanced display, and the manner in which the various lines handled are featured.

In this edition of the SHOE AND LEATHER JOURNAL the caption and introductory paragraphs of various Christmas advertisements are given. They will be found worthy of perusal, and offer the busy fellow, who has little or no time at this season of the year to devote to ad. writing, helpful hints, and catchy phrases.

Use the newspapers freely, at this season. They will yield you good returns, as most people faithfully peruse the

advertising columns of their favorite journal around Christmas time, in order to find out what is available in the way of Yule-tide donations. Make your advertisements edifying, interesting and helpful.

## A Handy Shopping List

Here is the list of a <sup>London</sup> shoe firm who say, "The useful gift is always the most welcome." "Look over these selections, they will help you reach a decision."

slippers for their own use. It seems to be natural for them to wait for the women folks to provide them. This season we think our range will meet with approval. The nice soft, high cut Faust, Popular Opera and Everitt, Strong Long Wearing Leather and the "Comfy" felt.—Waterbury & Rising, Limited, St. John, N.B.

\* \* \*

Nothing is more acceptable as a Christmas gift than a pair of comfortable house slippers. You'll find complete new ranges to choose from—priced moderately at Pocock's.—Winnipeg, Man.

\* \* \*

The welcome gift is the useful gift. You can find nothing more practical for a Christmas gift than a selection from our choice lines of Christmas footwear.—McManus & Co., Fredericton, N.B.

\* \* \*

Your Christmas money goes further if you give footwear from "Wallace's" store. There's scarcely anything under the sun that a shoe buyer can think of that can't be found quickly at our store. The right gift—the right quality—and the right price all combined.—Wallace Bros., Halifax, N.S.

\* \* \*

Give useful gifts this year. No gift will be more appreciated than something useful and serviceable—shoes—slippers—overshoes, etc., make real gifts—gifts that will be well thought of.—Abernethy Shoe Store, Kingston, Ont.

\* \* \*

Give footwear this Christmas. We are showing the most complete range of footwear suitable for Christmas gifts that have ever been displayed in Belleville. Moderately priced.—Adams, the Shoeman, Belleville, Ont.

\* \* \*

Varsity shoes fit well, feel well, look well, are well made and well worth the price. Purchase a pair for Christmas.—Marshall Shoe Co., Moose Jaw, Sask.

\* \* \*

A Merry Christmas! When the problem of something to give for Christmas confronts you, turn to this store for relief. We offer our trade the most practical and sensible of all Christmas gifts.—Weizel's Cash Store, St. John, N.B.

\* \* \*

Christmas shoes and slippers. Bear in mind that there is a long, hard winter ahead. Then why not buy useful presents, such as shoes or slippers. Our stock was never in better shape, so make your selection Now—make a payment on them, and we will hold them for you.—J. D. Climie, Hamilton, Ont.

\* \* \*

Baby's Christmas, the toddling pet of your home, and perhaps some friend's home, must surely receive something nice this Christmas. May we suggest a pretty pair of baby boots as being suitable. Come in and see the nice assortment we are showing.—Gorman's Boot Shop, Belleville, Ont.

\* \* \*

Good footwear will be appreciated for Christmas gifts. Do you know there is nothing more suitable, more acceptable for holiday gifts than good footwear. And this Christmas, particularly, you will desire to give substantial gifts, something your friends will appreciate because they possess value as well as a token of the spirit of the season. Don't you think good footwear will fill the bill? Everybody appreciates good footwear and it comes in so many different forms that you can have no possible difficulty in making the selection you desire.—The Wm. Taylor Co., Halifax, N.S.

\* \* \*

Christmas shoe pointers for men. Only the best quality leather enters into the making of Wak-in Shoes for men. Absolutely solid throughout. No paper. No inferior materials. No skimping. Hundreds of our satisfied cus-

tomers will gladly testify as to the A1 wearing qualities of Wak-in high grade footwear.—Wak-in Shoe Store, R. M. Howe, proprietor, St. Catharines, Ont.

\* \* \*

Quality, style, workmanship, are the three features of our shoes, which make appropriate and acceptable Christmas presents. In workmanship, in leathers, in style, our shoes are as fine as can be made. They're the very perfection of shoemaking.—The Ingledew Shoe Company, Vancouver, B.C.

\* \* \*

Christmas footwear! There is going to be a sensible Christmas. People are going to give, and people will appreciate, practical, useful Christmas gifts. Nothing will be more appreciated than some of the gifts listed below. Look them over well. You will find something good for every member of your family.—J. W. Priest, Pictou, N.S.

\* \* \*

An ideal gift—like Christmas this gift appeals to all the ladies, choice carriage boots. Look to us for the right styles in ladies' carriage boots, to wear over those evening slippers and pumps. Most society people do. The new styles are very handsome—they could not be more so. Made of black velvet with a nice white quilted lining and black fur trimming running around the top and down the front, they are tied up neatly around the ankle with silk ribbons, and the soles are covered with rubber to prevent slipping.—Ryan-Devlin Shoe Co., Winnipeg.

\* \* \*

Christmas gift suggestions at the popular shoe store. We are now ready for the great rush of Christmas gift buyers, and are showing the largest and finest assortment of holiday footwear, particularly desirable for gifts, and suitable for every member of the family. There is nothing that you can give that will be more appreciated than shoes and slippers.—George E. Reynolds, Stirling, Ont.

\* \* \*

\* \* \*

Christmas slippers for gifts. Slippers, the old "homely" gift—made new again by such slippers as you find here. Delightfully dainty boudoir slippers, novelties in hundreds of irresistible styles; handsome, easy-to-put-on, inviting slippers for men and women, full of comfort and service, and with that final touch of distinction found in Rannard's offerings.—Rannard Shoe, Limited, Winnipeg.

\* \* \*

Skates and boots—nothing makes a nicer present than a pair of skates and boots. We have skates from 75 cents to \$5.00 a pair, and boots in all sizes.—Pringle Stark & Co., Huntington, Que.

# HELPFUL HINTS ON SELLING SHOES FOR CHRISTMAS

**Ideas which the Footwear Retailer can use to Advantage in his Bid for Yule-Tide Business—Do Not Overlook the Youngsters as They Will Advertise Your Store—When you Arouse the Curiosity and Interest of the Juvenile Population it Pays Well**

**I**F you want to interest the parents in shoes for Christmas you cannot do better than first interest the children. When other stores, more particularly the book stores and the toy shops are vieing with one another in an effort to secure the interest of the juveniles, it is wise to make sure that the fathers and mothers are not also side-tracked in that direction.

What plans are you making for your Christmas season that will secure the interest of the kiddies. Whatever you decide upon do not overlook the new and rapidly oncoming fathers and mothers. They will be a big advertisement for you during this season. It is interesting to note the number of grown people who will stop to see the simplest children's display in a window at Christmas time. Show a window of children's slippers, moccasins, sandals and skating boots, if necessary, carefully arranged with a touch of life to it, even though dolls are used to do it, and you will interest everybody. Catering to the comforts and pleasures of the little ones will not only please the parents, but it will pave the way to sales to the parents, also besides, the boy of to-day will be the man of to-morrow. Men are but children of a larger growth. So do not forget the old people either.

It is now that footwear dealers' thoughts turn to suitable holiday attractions and to plans that will make the public look closer. It is just the time of year, too, when he is extra busy and has little or no time to devote to the actual devising of some good, novel holiday "stunt," some feature that will make the populace "sit up and take notice." The suggestions set forth here are, perhaps, not new to every reader, but the dealer who has not tried them can rest assured that the plans have been tried with every success.

From December 1st it is well to make known that all goods bought from now on will be retained and delivered any date specified, up to Christmas morning. The reason for this, is many homes have a little "busybody" or so who has a longing to poke in odd corners and hunt in secluded spots as the holidays are approaching. Mother dare not leave the house for fear the hiding place of some gift may be discovered. This can be remedied and turned to business by that oldtime notice, "Goods held till the holidays."

## Public Reception for Santa

While on the subject of holiday "stunts" to please the kiddies—and all wise men know that is the way to reach the parents—here is a plan put into operation by a leading city store. It consisted of a public reception to Santa Claus worked up in an elaborate form.

The first hint was given in the form of a newspaper "ad" entitled "A Wireless from Santa Claus." This consisted of an imitation wireless message form as follows:

Santa Claus Wireless

To the Satisfaction Shoe Store,  
Pleasureville, Canada.

Tell all the good children of your town that I will make my headquarters at your store. Will arrive at the Station as soon as I can finish making useful gifts for all good boys and girls. My arrival will be announced in good time.

(Signed) SANTA CLAUS, North Pole.

A copy of this wireless was pasted on the window, so all the children could see it and the mothers could show the children tangible evidence that such a person as the good saint really existed. Next day another wireless was posted reading as follows:

I am almost ready to visit your city. Tell all the boys and girls who ask for me, I will visit them very soon.

This was placed beneath the first "wireless" and an advertisement, calling attention, was inserted. By this time groups of children could be seen daily outside the window and parents were being quizzed with regard to the date Santa would arrive.

The next move was to post another "wireless," reading as follows:

Am already to leave the North Pole, and will arrive at the Station, Wednesday next, December 20th. Tell all the good children to meet me and those who cannot I will be glad to welcome at my home in the children's department, where I shall make my headquarters till after Christmas.

To carry out the plan so well conceived, a person of portly build was costumed as the good saint, given a seat on the train a few miles out of town, so he could "make good" the wireless and disembark at the station as per message.

Here is a sample newspaper advertisement to help you obtain the proper person for your "Santa":

## SANTA CLAUS

A man of genial disposition who can successfully impersonate Santa Claus for a shoe store. Address 713, newspaper office.

On the day appointed for Santa Claus' arrival, the crowd of boys and girls commenced to congregate outside the station; there were small kids, and tall kids, white and black, lean and fat, in fact, all the kids that could possibly get there, in the mob. Children that could not come by themselves were accompanied by parents. Promptly at the time advertised the train drew up at the station and with shouts of the frenzied little folk, Santa, with smiles and bows, was escorted to a waiting automobile and followed by frantic children. He and the children paraded through the streets, and by the time he reached the store that advertised his coming, it seemed that all the children in the town followed in the wake of the machine. Once at the store, he took up his post and remained there till after Christmas.

It is needless to say that the store reaped its reward from this move and the merchant who tries this "stunt" will be amply repaid.

## At His Headquarters

Another Santa Claus idea, one that has been used before, but always with success, is for a store to advertise as follows:

Santa Claus has taken up his headquarters in our store where he will be pleased to welcome good little boys and girls in our children's shoe department daily, from 10 a.m. till 4 p.m. Come see him surrounded by his gifts.

This, as a rule, causes all children to beg, plead and coax the "grown-ups" to take them to Blank's store. Those who are too young to read, of course, have this gratifying bit of news read to them by their parents.

At last the memorable day arrives and the kiddies are taken to the store. Behold, there is the jolly, red-faced saint, with his gifts, all surrounded by holly.

A good mechanical feature, representing a skating doll will make a good window feature in featuring hockey and skating boots, as well as skates which many shoemen handle profitably. The scheme is very easily arranged and yet can be worked so effectively as to make the illusion almost perfect. Fasten an old bicycle wheel to the ceiling of the window and connect it up with a heavy cord belt running over pulleys to an electric motor.

Directly below this, on the floor of the window, place a large mirror flat and bank up around this high piles of cotton sprinkled with diamond dust. Also sprinkle diamond dust on the mirror to represent ice.

Then suspend the doll on a thin wire or piece of black thread from a spoke of the wheel. Cut skates for the doll out of pieces of tin. These should just clear the mirror. When the wheel revolves slowly the doll will skate around in different evolutions and give the appearance of actually skating.

Dress the doll in furs or some other Christmas costume. This skating effect can be made a part of almost any Christmas window trim.

**Revolving Show Case Rack**

A revolving show card rack operated entirely by the heat waves of the furnace was successfully tried out by a Nova Scotia shoe dealer last Christmas with gratifying results.

An old bicycle wheel is made use of in the contrivance. It is suspended some distance down from the ceiling, and has vanes made of cardboard interwoven with the spokes. The heat waves catch these and cause the wheel to rotate. The wheel is on roller bearings, so that it rotates easily.

Triangular sheets of cardboard, advertising various lines of footgear and findings, are nailed around the entire rim of the wheel. Being in continual motion they attract attention, and accordingly receive more notice than if they were stationary.

Not only does the moving wheel serve to catch the customer's eye, but if it is going slowly the proprietor knows

that the furnace needs attention, when, otherwise, in the rush of work, he might not notice that the store was getting cold.

This idea can be extended if desired. By means of belts a number of these could be operated from the main wheel, or additional registers could be used for rotating signs in different parts of the store, or in the windows. No doubt this original idea will be found of interest and value by other shoemen.

**Holiday Window Showing Fireplace**

The old custom of hanging the Christmas stocking in front of the fire place furnishes a good idea for a central feature that will catch the eye of the younger generation, and remind grown-ups that Christmas is fast approaching. The fireplace may be constructed out of old packing cases and covered with brick paper or can be built with suitable package goods. If you want to represent a fire, put an electric light under red tissue paper and cover it with charred sticks of wood. Two Christmas stockings, one at either side of the fireplace, are filled with seasonable lines, and a Christmas tree may be used at one side and stoppers, hockey boots, over-gaiters, rubbers, etc., placed on it. The tree can be illuminated by small electric lights of various colors. The latest models on stylish shoes for both dress and street wear may be placed in the foreground.

**Have Santa's Post Office in YOUR Store**

A plan that can be employed where holiday goods for young children are carried, is to have a special Santa Claus' Post Office. Rig up a decorated box with a letter slot in it. Place the box in a conspicuous place and put a sign on it, reading "Santa Claus' Letter Box." Advertise that all children desiring to write to Santa Claus should mail their letters in the box he has left at your store for that purpose. State that if this is done no stamp is required on the letters. Children should be impressed with the fact that they must sign their names in full, and also give their papa's names. These letters can be then mailed to parents with a circular, circular letter, etc., in respect to your goods.

**HANDY REFERENCE TABLE FOR SHOE RETAILERS**

Showing the Percentage of Profit on the Selling Price of Shoes that Retail from Four to Twelve Dollars a Pair—The Cost, the Retail Figure, the Gross Profit and Percentage—A Table Worth Cutting Out and Preserving

Footwear for both indoors and outdoors makes an appropriate Yule-tide remembrance. You can defy the Storm King if you purchase here

Always something new and appealing will be found here—the very latest novelties in fine footwear, trim and graceful in every detail.

# WHEN GOOD FELLOWS GET TOGETHER IN WOODS

Members of Horseshoe Hunt Club Captured Fine String of Deer—The Majority Cast Their Ballots in Guessing Contest in Favor of President Wilson—Organization is Conducted in Business-like Manner, and There is Waiting List for Membership

**T**O get out in the open and feel the exhilarating moods of mother nature in the glorious autumnal month of November, is a rare delight. When the outing is with congenial associates in a persistent chase of the fleet-footed deer and amid true camp life environs of the forest primeval, the experience is one not soon to be effaced from one's memory gallery.

The Horseshoe Hunt Club is home again from the northern wilds with every member in fine fettle.

The maximum number of members which can belong to this club at any one time is fixed by regulation at twelve. This number has been completed now for some years and there has been and is now a waiting list anxious to have their names enrolled as members so soon as there is an opportunity.

The number who took part in the hunt this year was eleven, several of whom were visitors accepted by the club in lieu of some members who, through war conditions and for other reasons, were unable to go themselves. The party consisted of John H. Ross, Brockville, president; Elmer Davis, Kingston, secretary-treasurer; Jas. L. Johnston and David S. Johnston, Ottawa; Dr. Skinner and Jas. Moore, city clerk of Guelph, from Guelph, and Rev. John Scott, Streetsville; Fred Underhill, president Underhills, Limited, Aurora, and Dr. Scott, J. R. Y. Broughton and Hon. E. J. Davis, Newmarket.

## On the Way to Hunting Ground

The club joined with the McDonald Club, of Toronto, of which Mr. J. K. McDonald, of the Confederation Life, is an active member, and attended all through the hunt, their camp being located about four miles from the place where the Horseshoe Hunt Club is established. Mr. McDonald is 79 years of age and seemed to be about one of the youngest men of the party. Together they engaged a Pullman car, which left Toronto on the Cobalt train at 8.30 p.m. on the evening of October 30th, the other members of both clubs joining enroute as was convenient for them. This car was shunted at Huntsville during the night and the party left early in the morning of the 31st by steamer across the lake and from their landing the members were driven back ten or twelve miles to their respective camps.

The Horseshoe Club had one of the most, if not the most,

enjoyable hunts in their long experience. The weather was all that could be desired and as a result of the hard two weeks' work on the runways the full number of deer the law allows was secured by the club. This club is run in the most systematic and businesslike manner in every respect. On the evening of the 14th the annual meeting was held at which the minutes of the meeting of the previous year were read and approved and various business matters in the interest of the club taken up and disposed of in a very thorough, businesslike manner. A service was held on the afternoon of Sunday, November 6th and November 13th, at which twenty-seven persons were present. On the 6th, Hon. E. J. Davis took charge of the service, and on the 13th Rev. Mr. Scott was in charge.

The club are indebted to Mr. Broughton for taking up one of his Edison machines with a various assortment of records which added very much to the pleasure of the occasion and at the close of each Sabbath service he gave a regular Edison concert.

## Guessing Result of Presidential Election

The club seemed to be pretty good guessers, as on the evening of November 6th, in discussing the probabilities of the presidential election, which took place the next day, it was suggested that each member write the name of the man he thought would be elected on a ballot and sign it. The slips of paper were closed and sealed in an envelope to be opened after the result was known. It was about a week after the election before it was certain who was elected and then the ballots were opened. There were thirteen all told, including the cook and guide, in addition to the eleven members, and three were found to be for Hughes and ten for Wilson. It was also discovered that seven out of the eleven members were Masons and four of the seven past masters of the Blue Lodge.

The party broke camp on Thursday morning, the 16th, after taking a photograph of as fine a string of deer as ever went out from that section of the country. On arriving at Huntsville in the evening a Pullman car was waiting for the two clubs and the Newmarket nimrods reached home on Friday morning about six o'clock, the others going on to their further destination. All enjoyed a splendid time and felt very much improved in health by the outing.

# RETAILERS SHOULD SELL SHOES ON PRESENT BASIS

Leading American Shoe Manufacturer After an Extended Tour of Canada says he Found Unexampled Prosperity Everywhere—Tanners Responsible for Great Waste of High Priced Leather—Predicts the Greater Use of Fibre Soles, and Cloth Tops

**T**HERE is no hope of lower footwear or leather prices until the war ends. On the contrary leather and shoes are expected to go still higher.

This sums up the present situation and outlook as reviewed by several leading authorities who delivered addresses at a dinner of the Boston Shoe and Leather Club recently.

Among the speakers was A. W. Donovan, of E. T. Wright & Co., manufacturers of men's shoes, Rockland, Mass., whose Canadian plant is located in St. Thomas, Ont., and is under the management of his brother, E. E. Donovan. "The Shoe Retailer" gives the following report of A. W. Donovan's remarks, which will be read with much interest. He was asked to tell the club of conditions across the border in Canada, where his company operates a branch factory. He said that on a recent visit to the Dominion he found the shoe and leather situation there about the same as it is in the United States. Hides and leather are sold on a parity with prices asked for the same grades in this country and the available supply is no greater.

On a trip of 3,000 miles through Canada, during which he was particular to observe the agricultural and industrial conditions, and from his observations in the many shoe stores which he visited, Mr. Donovan said he found unexampled prosperity, despite the unfavorable influence of the war and the absence of tens of thousands of Canadians who had gone overseas to help England in her war with Germany. "They can't go broke and they can't go hungry, because the wheat crop, which is the basis of Canada's wealth, is more than double the yield, per acre, in the United States.

After summing up the business conditions in Canada, Mr. Donovan turned his attention to the leather situation in the United States. He said that the tanners are responsible for a great waste of high-priced leather when it was cut up into vamps, because they did not finish the skirts of chrome tanned upper stock to compare with the finish given the centre of the skin.

He said that it was a crime that the trimmings of upper stock costing from 50 cents per foot upward should be used for tongues, facings and stays, when every inch of it should be finished so that it would be suitable for vamps or tops.

This poor and inefficient method of finishing the skins, said Mr. Donovan, represented an additional cost of at least 12½ cents in making a pair of men's shoes, which could be saved the manufacturer, retailer and consumer. In a men's factory making 3,000 pairs per day, and allowing the waste from the trimmings of these poorly finished skins to average 10 cents per pair, the economic loss should total \$300 per working day, which, in these unprecedented times, should and could be saved if tanners would give as good finish to the skirts of the skins as they do the centre of them.

## Strong Endorsement for Fibre Soles

Mr. Donovan came out strongly in favor of the combination, or fibre sole, stating that now it was known that most of these soles were better than sole leather, that they wore longer, and gave better service. The greater use of fibre soles at this time would result in a big saving and at the same time give the consumer shoes with outsoles which in every way were better than sole leather. He also urged the greater use of cloth, in black and combinations of color, as a means of keeping down the higher cost of men's shoes.

In the retail trade, Mr. Donovan said that altogether too many retailers were not selling their shoes on the basis of what it would cost them to replace their present stocks, which, he said, was the only sane, safe and sure way of retailers meeting the present situation. He said that retailers, as a rule, were afraid to ask the prices they would on the basis of replacement, yet it was his experience and that of others in the trade that the people were willing to pay the price.

## Apoloized for Asking Five Dollars

He told of visiting a retailer's store in Buffalo, N.Y., recently, and asking for a pair of men's opera boots. The retailer, with a smile, brought forward a pair, size 10 D, which fitted Mr. Donovan, and, in an apologetic way, said the price was \$5. Mr. Donovan asked him how many pairs he had and the dealer said about 100. "Box them up and send them to me, and I will pay you \$5 for every pair, then when you want some more they will cost you \$8.65, for these boots were made in my factory."

He said the same store had a stock of 35,000 pairs of men's, women's and children's shoes which the dealer could not duplicate under \$18,000 of their former cost. These shoes, he said, should be advanced in price to include the \$18,000 which it would cost to replace them. He urged all retailers, to re-price their present stocks on the basis of the cost of replacing them.

Twenty-five or thirty years ago, said Mr. Donovan, the men's factories were filled with zebra leather, porpoise and seal, but to-day these leathers are not known in the trade and have not been a marketable product in shoes for years. He predicted that calfskins would go out as these leathers did, and that well tanned and finished chrome split leather would take its place.

In conclusion, Mr. Donovan paid a warm tribute to the business policy and efficiency of the United Shoe Machinery Co., stating that at a time when increases were being asked for all kinds of materials used in manufacturing, that shoe manufacturers found great relief in knowing that the cost of the use of machinery to make shoes remained unchanged, and that the efficiency of the company in maintaining its machinery in the highest state of perfection had made it possible for the manufacturers to handle the enormous business which they have received during the past year.

## ALL MATTER OF FEELING

Hullo Blucher, what's the matter with you?

Oh, I'm right down on my uppers.

Gee that's too bad! for pon' my sole I never felt better'n my life.

# THROWS SHOES ON FLOOR; THEN SUES RETAILER

Endeavoring On Six Occasions to Satisfy Woman Customer, Hamilton Merchant Refused to Refund Money the Second Time, Having Done so Once in Vain Effort to Please—Doubtful if Archangel Gabriel Could Successfully Cope with Some Cases

## SHOE STORY IN SHORT SHAPE

- 1.—Came in to see stylish shoes. Did not buy.
- 2.—Entered a week later to price some models in the window. Did not buy.
- 3.—Came late at night, stayed two hours and bought a pair of six dollar patent, high cut shoes. Had no money, but asked that shoes be laid aside to see if her husband would let her have patent leather.
- 4.—Came in Saturday night with husband. Had shoes fitted again and stretched. Price paid and footwear taken away.
- 5.—Returned three days later. Said she was not pleased with footwear and wanted money returned, which was refused. Shoes finally taken back and money refunded with exception of \$1 which was allowed retailer for the hours spent in fitting, stretching shoes, etc.
- 6.—Came back again in half an hour. Took another style of boot made by a different firm and paid \$5.
- 7.—Came back again with second pair of boots and demanded refund of her money, which was refused. Threw the boots down and walked out.
- 8.—Entered suit in the Division Court to recover the money, which was refunded, plaintiff having to pay costs of action.

**T**HE foregoing is a brief summary of the negotiations leading up to the fitting and selling of a pair of women's shoes in a Hamilton footwear establishment. The merchant was C. M. Haist, 26 James street north, and the customer was Mrs. J. P. N—. It illustrates a few of the trials and tribulations of a shoe retailer in seeking to serve and satisfy some women customers.

There is possibly not a footwear dispenser in the Dominion who has not had his patience exhausted, his nerves shattered and his temper soured, in trying to please certain punctilious lady patrons, but it is not often that the exasperating circumstances result in a suit in the Division Court.

"When a woman wills, she will." That is all there is about it, and even the most obliging shoe dealer is apt to give way under the severe strain and stress. If a woman calls seven times and up to that point a man's equanimity has not been disturbed, he is almost entitled to a seat among the saints. Human nature has its limit. Cold water under a slow fire will come at last to the boiling point, and the usually imperturbable temper of Mr. Haist could not, like Tennyson's "Brook," go on forever. On the 7th visit of his lady customer, the denouement of the drama was reached

and the scene shifted from the shoe shop to the chambers of the court.

Commenting upon the action of the plaintiff, or rather the plaintiff's husband, the Hamilton paper says:—

## A Doubtful Sort of Satisfaction

In connection with the action of plaintiff against C. M. Haist for the recovery of \$6, the price of a pair of shoes for his wife, which he claimed that she did not want, it was learned this morning what an expensive thing litigation is. The plaintiff won his suit, His Honor Judge Snider, ordering that the shoes be taken back and \$5 refunded, and this was done. N— had a lawyer for which he paid out the \$5 and the costs of the action amounted to \$2 besides a half-day's pay which will be deducted from his wages. In all it cost him nearly \$10 and all his trouble and now his wife has not even got the shoes.

C. M. Haist in conversation with the SHOE AND LEATHER JOURNAL furnished the following particulars of the transaction: "Yes," he said, "on a very busy Saturday, Mrs. J. P. N— came into my store and asked me to show her some stylish high lace boots. I inquired what kind she preferred.

"She said: 'Oh, I don't know, show me some.'

"I accommodately fitted on various models in all colors, including blacks, browns, greys and blues.

"After about a half an hour's work she informed me that she didn't intend buying today and was only looking around,' but, two of the styles suited her very well and would I kindly set them aside until Monday night, when she would bring her husband to help her decide which pair she should have.

## How It All Came About

"I complied with her request, but she failed to come back Monday night as promised. The following Saturday she came in again, this time only to price some styles in the window, and left once more without buying.

"On the following Wednesday night as I was just closing my place of business, about nine-thirty, intending to get home as early as possible, she, with a friend, bobbed up serenely for a third time to 'try on more shoes.'

"I marshalled all my patience and fitted on every thing from 'soup to nuts,' and, after serving her until about eleven-thirty o'clock she finally decided on taking a patent leather, high cut turn sole pair made by a leading Montreal firm. The price was six dollars.

"She then sweetly informed me that she had no money tonight and would I 'set them aside until Thursday night, to give her husband a chance to see them laced up on her and decide as to whether he would allow her to have patent leather.'

"Again I 'set them aside.' Matters went along until Saturday night, when at the busiest hour she again came in with her husband. She had the shoes fitted for his benefit. She complained of the left boot pinching a little and asked me to put the stretcher in it for a minute.

"After again lacing it up, her husband asked her if they suited. She said, 'why yes, only you don't like me to have patent leather.'

"He replied, 'O well if they suit you I don't care what you have,' so she decided to take the footwear. He paid me and I considered the transaction closed.

AN ARTISTIC DISPLAY OF WOMEN'S ATTRACTIVE FOOT TOGGER BY A LEADING WESTERN FIRM AS SHOWN IN "SHOE ECONOMIST SECTION"

"Imagine my feelings on the following Tuesday, when on returning from lunch, I found the lady back again 'fitting on shoes.' I asked her what the trouble was now, and she said that she was not pleased with the patent leather pair after all and wanted to see some others.

#### Did Not Want Pair Anyhow

"After trying on various styles she decided that she didn't want shoes at all, and desired her money refunded. This I didn't feel justified in doing and I informed her so on the grounds that I had worked hours for her to try and satisfy her fickle mind. She then asked me to accept \$1.00 for the time I had spent and also for the depreciation of the value of the shoes from such constant fitting and stretching. To get rid of her I complied with her request and refunded her \$5.00 and took the shoes back.

"In about half an hour she came back again and remarked that I couldn't get away with her money so easily and took away another pair made by an eastern firm, which she had previously tried on. She again gave me the \$5.00. I certainly thought that I had seen the last of her this time, but again at about seven o'clock in the evening she brought the second pair of boots back and demanded the refund of her money in full.

#### Threw the Boots on the Floor

"I flatly refused to give it to her, and advised her to leave the premises and take the boots with her. She threw

the boots down and walked out leaving them there, after having first informed me that she would institute proceedings to recover the money. This she did with the result that Judge Snyder gave judgment to the effect that I should refund five dollars or give her the shoes. Mrs. Nelson to pay the costs of the suit."

#### HOW HE ADJUSTS SHOE TROUBLES

"If shoes are properly sold and properly fitted there is generally no 'come back' or complaints," remarked the head of a live shoe department the other day. "There is less grievance with the novelty shoes than there used to be with the old staple shoes, because novelty shoes get soiled before they are worn out and are discarded because they are shabby before they are worn to a point that would justify a complaint.

"We do have some troublesome kicks, of course. For instance, on June 15th of this year a woman bought a pair of Colonials for \$5.95. She has a charge account in the store and this was not paid until August 5th, when she sent a check for \$3.75 to cover these shoes, claiming that within a week of the day of her check she was offered the same shoes for less than that price.

"I don't know what the office will do about that, because the store is very generous with customers and may decide to allow it, but, so far as I am concerned, I cannot see how we can do business on such a basis. From my point of view the woman who will take such an advantage of a store can do her trading elsewhere and the store which gets her business is welcome to it.

"We have had some complaints last summer of the rusting of buckles on washable white kid shoes. It seems to me that the manufacturer of a washable shoe should see to it that he uses a material in his buckle which will not rust through. I believe a customer has the right to complain in such an instance, and I have made good the complaints; but I cannot induce the manufacturers to make them good to me. In fact, I cannot buy, beg, borrow or steal buckles to replace those complained of by customers; so I have bought a number of plain white celluloid buckles.

#### ALWAYS FULL OF INTEREST

Please find enclosed express order for \$1.00 for another year's subscription to the "Shoe and Leather Journal" which we appreciate very much. It always contains some valuable information regarding the shoe and leather world.

Yours truly,

JNO. T. LAWSON.

Regina, Sask.

### BIG SUIT OVER SHOE FIRM'S NAME

Voluminous affidavits were filed in the Supreme Court, New York, recently, following the granting of a show cause order issued by Justice Cohalan requiring the Slater Shoe Co., Inc., and Harry H. Aronson, of 1159 Broadway, to explain the use of the name which is owned by J. & J. Slater. The application was made by the last named concern which has a number of stores in this city with its principal place of business at 415 Fifth avenue.

It is said that the defendants have four stores in Boston, one in Providence and one in Manchester, N.H., and one in New York at the southwest corner of Broadway and 27th street, within two blocks of the plaintiff's Broadway store. Signs covering the building of the defendant can be seen for many blocks.

The plaintiffs say that they have a large mail order business and that mail intended for them has been delivered to the defendants and customers of theirs have complained of the poor quality of shoes sent by the defendants to them on the supposition that they were dealing with the older concern. Many letters are incorporated in the papers filed in the court, together with newspaper articles telling of alleged visits to the defendants' store and the treatment accorded them.

The court is asked to grant a sweeping injunction prohibiting the defendants from using the name Slater in any manner and in addition they are asked to submit an accounting and pay over \$50,000 damages for the losses already incurred.

J. & J. Slater claim that the defendant is incorporated under the laws of Massachusetts. The plaintiffs were represented by Emile Pincus.

### CAPT. SUTHERLAND AGAIN HONORED

Capt. J. T. Sutherland, Kingston, Ont., who is now overseas, has been re-elected president of the Ontario Hockey Association, by acclamation. Nominations closed recently, and the custom of giving the president two terms in office was observed. With Capt. Sutherland at the front,

CAPT. J. T. SUTHERLAND, KINGSTON

the duties of his office will devolve upon the first vice-president, Sheriff J. F. Paxton, of Whitby. Capt. Sutherland is widely known to the shoe and leather trade, having

been for many years representative for the Cook-Fitzgerald Co. in Ontario, and later, Scott-Chamberlain, Limited, London, until he joined the colors. "Jim" comes of a well-known shoemaking family that has been in business in Kingston for nearly three-quarters of a century, where his brothers are still engaged in the retail line. The re-election of Captain Sutherland is a tribute to his popularity, enthusiasm and devotion to hockey. He has always been a staunch supporter of clean athletics.

### MAKING SUCCESS OF SHOE LINE

Percy M. Levine, proprietor of Levine's Shoe Stores in St. John, N.B., has only been in the boot and shoe busi-

LEVINE'S SHOE STORE, ST. JOHN, N.B.

ness for three years, but during that period of time has achieved marked success. When James V. Russell was elected commissioner of St. John three years ago, Mr. Levine purchased his store on Brussels street. On year ago he decided to branch out and he opened a store in Charlotte street. Since that time he has built up a good business and is receiving a fine patronage. Recently he made a few alterations to his Charlotte street branch store. The accompanying cut shows the location of the store and the proprietor standing in the door.

### WHY SHOE TREES SHOULD BE SOLD?

With the cost of shoes going up it pays to give special care to one's footwear.

Some people seem to think that shoe trees are merely pretty ornaments, whereas they are really necessities. The leather in shoes should not be allowed to shrink, which it is apt to do if shoes are taken from moist feet and left in a warm place. If trees are used shoes will keep their shape. Wet shoes should never be dried at a stove or on a radiator, or near a heater of any description. The effect of the heat so applied is to dry the oil out of the leather and cause the shoes to crack.

Another thing not to do is to let shoes stand in a damp place, or in a closet near the heat. Leather should not be allowed to become dry. It should be kept soft, quite the same as when it is in its natural condition on the animal. Natural animal oils should be rubbed over the shoes occasionally. In many cases if one would rub banana skin on the shoes it would be sufficient. This not only cleans, but keeps the leather soft. For brown shoes this is especially good, as it takes off all stains, and one using this simple cleanser is astonished at the result.

The two principal things to be remembered regarding the care of shoes are that the shoe trees should be slipped in as soon as the shoes are removed and that the leather should be kept clean and soft.

### UNIQUE YULE-TIDE WINDOW ARRANGEMENT

This Christmas display effect requires considerable time in construction, but is really worth the trouble. Take the centre of your window and fix a door, as seen in the sketch. A boy is needed to operate the opening and closing. The one side is with background setting for outdoor goods, and the other for indoor, fixed accordingly, as an indoor apartment showing slippers, etc. The door is opened with string or cord attached to the top corner and extended each way to the back. The originator of this idea had the

boy dressed as Santa Claus at the top operating the door, and it proved one of the most striking successes yet seen. Of course the idea is one well worth trying, and would be probably new in your town. In the matter of appropriate backgrounds, many good ideas may be culled from the Christmas magazines, and carried out without much outlay.

### NEWSY BRIEFS FROM ST. JOHN.

Mayor Hayes and Mrs. Hayes have returned to St. John, N.B., from Boston, where His Worship was a guest of the Canadian Club at their annual banquet held at the Copley Plaza, Monday, November 20th. He took advantage of the occasion to extend greetings to the many Canadians assembled there. While in Boston Mayor Hayes heard "Billy" Sunday and was deeply impressed by the speaker. Mayor Hayes is president of the firm of J. M. Humphrey & Co., wholesale shoes, St. John.

Mrs. Mary E. McAvity died at her home, 43 Harrison street, St. John, N.B., recently. She is a sister of John H. McRobbie, president of McRobbie Shoe Co., Limited, of that city. She is survived by one other brother, one daughter and one granddaughter. She was president of the north end branch of the W.C.T.U. for twenty years and was one time vice-president of the Women's Council and also county president.

Local boot and shoe merchants are having difficulty procuring colored gaiters to meet the demands of their customers. Joseph Gray, of Gray's Boot and Shoe store, Main street, recently had to send a rush order to New York to get a supply to meet the demand.

Neolin and rubber soles are being used quite extensively in this city despite the fact that the price for soles is very high. Some dealers charge upwards to two dollars for resoling boots and this figure is beyond the reach of the poorer classes. If the price was within the reach of all there is no

doubt that fibre would be in great demand, as many people are dissatisfied with the wearing quality of leather used by many of the local repairers.

### PREDICTS RETURN OF CLOTH TOP IN SHOES

(Continued from page 20)

sold as high as 40 cents to 50 cents and when tanned in colors, selling as high as 70 cents per foot.

In connection with leather suitable for sole stock you will be interested in knowing that the British government was in the world's markets recently for several million cow hides; the amount is almost incomprehensible. This has resulted in price going up day by day with no relief in sight.

In reference to cotton which affects shoe linings, we understand that next season's cotton crop has already been largely bought up at prices which will, of necessity, result in higher prices for cotton linings next summer than we have yet paid.

One result of the present conditions will be to force shoe manufacturers to replace leather as far as possible in shoes. Substitutes for sole leather are well known and found to be equally as good as leather in the matter of general excellence. Undoubtedly the materials along this order will be more and more used in the near future. On the other hand, there is no real reason why leather should be used in top facings, eyelet facings or button fly linings. Fabrics are now on the market for this purpose which are proving entirely satisfactory. The use of them will help, if only to a small extent, in holding down the prices in staple and medium priced lines of shoes and I feel satisfied that in a short time these and other materials substituting leather will be standard items in shoes.

### Use of Cloth Would be Helpful

The use of "cloth" in the tops of shoes would materially help the situation to-day. While cloth top shoes will not come in with a rush, undoubtedly a strong movement for their return is on the way. Makers of high grade women's shoes are now showing high priced fabrics in their lines. If these become popular, we can hopefully look forward to the return of black cloth to style in probably a year's time, although further advances in the price of shoes may accelerate the movement. Keep in mind that cloth tops will not come back until the consumer considers them stylish or absolutely necessary. Only the other day I received samples of colored fabrics which would cost 55 cents per foot, very much less than colored leather, but about the price of colored kid two years ago.

Substitutes for leather are being used very extensively to-day. Leather box toes are becoming a thing of the past, leather counters are going only into the highest grade of shoes and it is questionable if these leather counters are giving as general good satisfaction as fibre counters, which are now in general use. It might surprise some of you if you knew to what extent leather had been done away with as an insole in McKay footwear, and now a fibre insole is on the market which is not only suitable, but will give every result desired in lower priced and medium priced welt shoes. The old claim that there is nothing so good as leather has been refuted.

On behalf of the shoe manufacturers I would ask the retailers to realize they are working against conditions never known before. The obtaining of supplies is not only uncertain but deliveries are constantly interfered, with with the result that usual prompt shipments of shoes may be affected accordingly. We cannot buy as we used to buy and it would seem of necessity that in the near future shoe manufacturers will be forced to take only immediate business for materials which they actually have, but certainly to follow the old system of taking orders months in advance would have to be discontinued until normal conditions return.

# CAN YOU GUESS ?

## TETRAULT LEADS THEM ALL

Business for Eleven Months \$1,787,637.89  
GET INTO THIS GUESSING CONTEST

1ST PRIZE - \$75.00 CASH

2ND PRIZE - 25.00 CASH

3RD PRIZE - 15.00 CASH

4TH PRIZE - 10.00 CASH

5TH PRIZE - 5.00 CASH

### CONDITIONS

- (1) Open to all handlers of Tetrault Shoes from Coast to Coast.
- (2) Record of Sales will appear in each issue of Shoe and Leather Journal to December 15th.
- (3) After December 15th daily sales will not be added at factory, to prevent information leaking out.
- (4) Guesses will not be received until after December 15th issue of SHOE AND LEATHER JOURNAL is out.
- (5) Contest will be closed January 5th, 1917, and envelopes opened by committee of well known retailers, who will announce the lucky guessers. Mark envelopes "Guessing Competition."
- (6) When sending in your guess you must give correct register number in lining of any one of our shoes.

Here is What You Have To Do:

Guess what our total business for 1916 is

### *Monthly Sales of Tetrault Shoes for 1916*

## MONTREAL

## SHOE RETAILERS NOMINATE OFFICERS

(See Opposite Page)

At a meeting of the Toronto Shoe Retailers' Association held Nov. 23rd, the nomination of officers for the coming year took place. Much interest was taken in the proceedings. Some of the men, who have served faithfully and well during the past year and a half positively declined to accept office again, and retired with the well earned thanks of the members of the Association.

Howard C. Blachford was finally prevailed upon to accept nomination for the presidency for another term, although he strongly urged the organization to select a new man, and infuse in it "new blood." The voice of the meeting, however, was unanimously in favor of his retaining office.

The following nominations were made, and the election will take place early in January.

President, Howard C. Blachford.

Vice-president, A. Levy.

Treasurer, C. C. Allan.

Secretary, J. H. Shinnick and J. Warden Jupp.

Sergeant-at-Arms, N. A. Roy.

Executive Committee: W. T. Fegan, J. H. Shinnick, S. C. Parks, H. A. Russell, W. B. Parvin, R. S. Ritchie, Geo. W. Warriner and Walter Burnill. From the foregoing four will be selected.

The retiring secretary, Edward Cook, who has ably and energetically discharged the duties of that position, and declined to accept renomination either as president, or as secretary, will, by virtue of his office, be a member of the new executive.

The meetings of the Association have been very well attended and characterized by instructive addresses, lively discussions, and a spirit of progressiveness and co-operation

## DO YOU WANT TO WIN \$75.00?

If you are a good guesser, study the figures in the advertisement of the Tetrault Shoe Manufacturing Co., of Montreal, the largest makers of Goodyear welts in Canada. You have a splendid chance to win the first prize of \$75.00, \$25.00 for second, \$15.00 for third, \$10.00 for fourth and \$5.00 for the fifth.

In this issue of the SHOE AND LEATHER JOURNAL a statement of the sales for the month of November appears, and in the December 15th edition will be given the sales for the first half of December. All that contestants have to do is to estimate what the last half of December will be, add up the total for the twelve months, and send in the grand total for the year. No guesses are to be sent in until after December 15th.

Here's a chance for everybody from the messenger to the proprietor to get into an interesting game without costing anything to enter. The competition is open to all handlers of Tetrault shoes in Canada. The contest will close on January 15th, and the envelopes will be opened by a committee of well-known retailers, who will make known the lucky guessers. The envelopes should be marked "Guessing Contest." There is only one condition and that is, when sending in a guess the competitor must give the correct register number in the lining in one of Tetrault's shoes.

## SHOEMAN'S SON KILLED IN ACTION

Wm. J. J. Martin, son of B. W. S. Martin, sales manager for John Ritchie Co., Quebec, Que., was killed in action in France recently. His parents received a wire from Ottawa stating that he had died from wounds at No. 4 Clearing Station, France, on November 2nd. The last letter that they had from their son was dated October 24th, and at that time he was in the best of health. Pte. Martin would have been nineteen years old next month. He stood over six

foot, and was built in proportion. Before enlisting he entered the Montreal Bank in Quebec, and after some months was transferred to the branch in Granby. In October of last year he went to Montreal and enlisted as a private with the 73rd Royal Highlanders. His regiment sailed from Halifax on April 1st, and on arriving in England was stationed at East Sandling Camp for a while and afterwards at Bramshott Camp where it was attached to the 4th Division. In August last, the boys left England, and were for some time in Belgium before going to France. Mr. Martin's many friends in the shoe trade will deeply sympathize with him in the loss of his son.

## A SHOE ENTHUSIAST

(See Front Cover)

To know the "shoe game" from end to end was the ambition of William Chamberlain when he took up the shoe business thirty years ago. He first of all mastered the selling end and so thoroughly did he become acquainted with the retailers' ideals of a good selling proposition in footwear that he made a wonderful success as a shoe salesman. Added to his knowledge of shoes and shoe selling, and entering in a large measure into his success has been a geniality and adaptability that has caused him to be known through the length and breadth of the land as "Bill" Chamberlain. He has the wonderful faculty of enthusing, not only his associates and employes, but all with whom he comes in contact.

He has put CLASSIC SHOES "on the map," so to speak, and has by his marvelous executive ability placed the "Getty and Scott" and "Scott-Chamberlain" plants in the front rank of Canadian shoe enterprises. He exercises that supervision of the factory output, and direction of sales that has steadily brought the product of the two concerns to their present enviable position.

But he is neither a grubber or driver. He finds time to devote to other matters than mere shoemaking and selling. He takes a lively interest in sports, and is a general all round good fellow, who can take his part in everything from hunting out an up-to-date shoe to making a mile a minute run to Toronto in his six cylinder.

He is a "Galt" enthusiast, and is identified with all that concerns his town's progress and development. He is proud of his town, and especially of the handsome palatial home that he has just completed and which is one of the ornaments of the city.

## A RICH SOURCE OF IDEAS

How many traveling salesmen called upon you last year?

A hundred?

If so, there were one hundred of the keenest of brains, loaded with many hundred ideas and unlimited information relating to your business, at your service—free.

Ideas are costly. Without them you can make no progress.

If you could travel half the year, as salesmen do, and visit with shoe dealers in other cities and states, you could gather equally rich and varied funds of shoe-selling knowledge.

But you cannot spare the time.

Salesmen can. It is their job.

So, it pays to let their eyes and ears work for you.

You may not need their goods, but you do need all you can get out of their experience.

Use them courteously. Ask them questions. Listen to them.

And make each man pay you for the time you give him by leaving with you at least one good, practical idea.

Then use it.

# Rubber Footwear Notes

**Big Rush with Seasonable Weather—Largest Business in History of Trade—Better Handled Than Usual is Verdict of Retail Trade—Booming Rubbers Through Special Sales**

**T**HE rubber shoe trade of Canada never had a more successful season in its history. Placing orders came in well, in spite of the dropping of the discount for early orders, although at the outset, it looked as though booking might be a little slower. There are two factors that have contributed largely to swell the volume of business, the fact that stocks carried over from last season were small, and the general upward tendency of prices in all other lines seemed to give buyers the impression, that rubber shoes would possibly go the way of all flesh these days, and take to the air. Supplemental orders have therefore been more liberal than usual for this time of the year, and although retailers have still left themselves open for further supplies, should a seasonable rush occur, stocks are better at this time than the average. There has been no weather as yet, to call for the sale of the heavier lines, but there is abundance of chance still, for weather calling for their use.

**Rubber Selling Campaign.** As referred to in last issue, a campaign has been inaugurated to encourage the sale of rubber footwear from the standpoint of footwear economy. The advertising done in the daily and weekly press, while until recently endorsed by no particular company's name, and evidently done for the general promotion of rubber sales, has no doubt, had the effect intended, of stimulating business generally, although to what extent, the sales of rubbers are taking the place of those of leather goods, it is difficult to say. Winter has always been a time of leather economy, as people naturally wear their defective leather shoes, with rubber protection during that period of the year, when the weather underfoot permits it. Undoubtedly the tendency this year will be to save shoe leather, which has become abnormally high, and dealers can blame neither the consumer, nor the rubber people for taking advantage of present conditions. The advertising of rubbers by those interested in their production, is therefore not only good business, but common sense, and the company responsible for the large outlay that is no doubt represented by the advertising in question, is only doing the natural and reasonable thing.

**Some Retail Criticisms.** While the general purpose of the advertising may be commendable, there have been some respects in which the advertising has, so to speak, got under the skin of the dealer. The latter is naturally, jealous of the interference with the sale of a class of goods, on which he stands to make better profit, and has resented the attempts of some of the earlier advertisements to lay undue stress upon the expensiveness of leather

footwear, and more especially, the impression created, that there has been no advance in the prices of rubber shoes. While it is quite true that rubbers are amongst the few products that have not gone skyward in the past twelve months, it is equally true that they are not quite as cheap as they were a year ago. But the advance has been the natural outcome of enhanced costs in other materials than rubber, as well as labor, and it is aside from the mark to refer to times when rubber was so costly that there was practically no money in rubber shoes.

**A Wide Awake Policy.** The "Consolidated" is to be encouraged rather than criticized for its efforts to extend in every legitimate way, the sale of its product, and that of the other rubber mills who participate in the benefits of its campaign, in common with other producers and sellers. The SHOE AND LEATHER JOURNAL has encouraged in its columns, the use of all legitimate expedients in the manufacture of footwear, that will help to relieve the situation in leather costs, even at the risk of sometimes incurring the antagonism of leather men. For the same reason, it has within the past few months, been urging the development of the shoe repair department as a further help in this direction. The retailer should welcome every means to keep down the cost of his goods, and at the same time, use every effort to turn an honest penny, and as a result, the majority are looking on the whole question in the light of getting the most possible out of a most puzzling situation.

**Fitting Rubbers.** Much damage is done, not only to the rubber shoe business, but to the reputation of a store, by carelessness in fitting rubber shoes. There was a time when people thought that anything would do that would keep out the wet, and keep off the mud. To-day, there is such infinite variety in shape and style, that there is no necessity for shoving off on a customer, ill-fitting or ill-looking rubbers. A gentleman went into a prominent downtown store the other day, and asked for a pair of high rubbers. The clerk brought him a pair of broad, heavy-looking shoes that were evidently intended for country trade. After looking at them a moment, without trying them on, he got up and went out with the remark: "I do not want horse shoes, I want rubbers." In the fit, rubbers should neither be too large nor too small. The former get sloppy and the latter break down, especially at the heel. A well-fitted rubber means better wear, better satisfaction and therefore, better business.

### RECENT HAPPENINGS IN QUEBEC

J. Rochette, a former shoe manufacturer of Quebec, died recently. The funeral took place on November 24th, and was largely attended.

M. A. Poirier, late foreman in the lasting department of Lachance & Tanguay, is now in charge of the same department in the factory of Lagace & Lepinay. F. X. Trepanier has succeeded Mr. Poirier at the former plant.

Alphonse Renault has taken charge of the lasting department at Tourigny & Marois factory.

Louis Guay, of J. Guay & Fils, tanners, was in Montreal last week on business. He reports that trade is good but raw hides are very dear.

Sole leather is now 65 cents a pound, box calf 74 cents to 75 cents a foot; box kip, 39 cents and 40 cents, while some tanners are asking 26 cents for chrome dull lamb.

E. Thivierge, shoe manufacturer, has installed a rapid heeling machine, and is running his plant to capacity.

G. G. Parker, representing the Boston Last Co., Richmond, Que., spent a few days in the city last week.

Dupere & Garant have been appointed representatives in Quebec for the Steel Company of Canada, Limited. They will carry a full stock of nails and tacks.

Owing to the recent snow storms and sloppy weather, the retailers did a splendid business in rubber sole shoes and rubber footwear.

### CAPT. SCOTT ENTERTAINED

Capt. James A. Scott, of the 171st Battalion, C.E.F., the esteemed and genial leather merchant, was entertained at a farewell banquet at the Chateau Frontenac, Quebec, recently, by a large number of friends, among whom the boot and

CAPT. J. A. SCOTT, QUEBEC

shoe manufacturers of the city were well represented. Mr. Arthur Richard presided. Among those at the head table, besides the guest, were the Rev. R. Lagueux, Cure of St. Roch's, Col. Bernard, Lt.-Col. Talbot, Lieut. H. Scott, Mr. A. G. Russell, Mr. Eugene Trudel, Rev. Capt. Belford, Mr. J. A. Cloutier, Mr. Carter and Mr. Shaw, of Montreal.

The tables were set out with Killarney roses, maiden hair ferns and smilax. Music and menu left nothing to be desired.

Mr. J. A. Cloutier acted as toast-master. After the toast to the King had been duly honored Mr. Cloutier pro-

posed the toast to the guest of the evening, and in this connection presented Capt. Scott with an automatic service revolver.

Sheriff Blouin followed in an eulogistic speech, regarding the patriotic spirit and excellent business qualities of the officer, who was adding to the respect and esteem he enjoyed in the community the deep admiration of all, on account of his enlistment in the service of King and country. His numerous friends and many who did not know him personally would wish him bon voyage, bon success and a safe return.

In his response Capt. Scott referred to his pleasant business and social connections with those present and sincerely thanked them for the honor they had done him. "Our Guest," and "the Ladies" were also toasted, while the gathering was treated to several songs by Mr. P. Hebert, in one of which the shoe manufacturers of Quebec were made the topic.

There were about eighty guests present and the following persons were the subscribers to the banquet: Messrs. P. Bertrand, Cleophas Blouin, Pierre Blouin, J. A. Cloutier, J. A. Duchaine, W. P. Francis, Herbert Gale, Paul Hebert, Cleophas Lachance, Rev. R. Lagueux, J. S. Langlois, C. E. Lepinay, J. D. Marier, David Marsh, J. P. Parent, Edouard Picher, Wilbrod Richard, Luc Routier, J. A. Saillant, J. M. Stobo, Louis Blouin, Lucien Borne, Jr., J. B. Drolet, Ludger Duchaine, Nazaire Fortier, O. Goulet, Elie Jobin, J. P. Lagace, J. B. L. Lamontagne, J. H. Larochelle, J. C. Mahy, A. E. Marois, Pierre Ouellet, John Perkins, Arthur Richard, Cyrille Robitaille, A. G. Russell, Erienne Samson, Joseph Tanguay, Eugene Trudel.

### PRICES HIGHER—OUTLOOK DARKER

"I think the condition of affairs is getting awful," remarked a leading wholesale shoeman this week. "In my twenty-three years experience in this line, I have never seen matters as serious as they are to-day. To speak frankly, the present state of affairs is 'getting my goat.' I was down east the other day, and the prices which manufacturers are asking us for staple lines is more than we are getting from our customers, and we thought our figures were pretty high. It is impossible to get some kinds of leather at all—all quotations are withdrawn, prices changed from day to day, and if one can get any sort of an order accepted, he feels like holding a demonstration. You simply have to get down on your knees to get so many pairs of such and such a line made, and then you are not sure whether you can get them at all. I believe that we are only on the verge of high quotations, and by next fall, unless the war comes to a sudden termination, present figures, high as they seem, will be thought moderate. Every day or two, there is an advance in leather. Any man who can get shoes at any price now should be thankful, and have very little fault to find with the cost."

"I found on my visit to the Eastern market, that shoe manufacturers would not take an order or give quotations in many cases," remarked another wholesale shoe man. "If you ask them to make a certain line, they will tell you that they must first find out whether they can obtain the stock, and then they may possibly give you a figure at some distant date, but anything like present acceptance of orders, at a fixed definite price, is altogether out of the question. The advances that have taken place are amazing. Calf leather was selling at 59 cents, dongola at 45 cents, and sole leather for women's McKays at 73 cents, while buffs are practically off the market and box kip exceptionally high. The principal difficulty at present, so far as I can learn, is in getting sole leather. No manufacturer is sure of supplies in any line, and some of them are talking of closing down after the first of the year,—if a measure of relief is not afforded in certain kinds of leather."

# The Shoe Repair Man

## POOR BUYING CAUSES LOSSES

"It seems to me," writes a Western Canada repair man, "that certain repairers are trying to plug the wrong hole. It would suit some better to discontinue giving 20 and 25 per cent. to the stores on monthly accounts rather than to be trying to raise prices to an almost prohibitive figure. Another leak that I have noticed is poor buying in many little things, and some big ones as well, I would not mind giving 5 or 10 dollars as a prize for the best article on some such subject as, 'Cutting Down the Material Cost in the Repair Shop,' 'Eliminating Waste and Leaks in the Repair Business,' 'How and When to Buy,' etc., I believe that a good many men who might do so are not taking their discounts. They seem to think that 2 per cent. is not worth striving for.

"Another thing that I would suggest is a convention of shoe repairers to be held next year at some central point. I know of several from this section of the country who would attend. It is time the shoe repair men got together in one large organization the same as they are doing now in local associations. The latter bodies have proved beneficial and stimulating to the trade and may the good work go on. I would like to hear from fellow repair men in other parts of the Dominion what they think of a national convention."

## EACH SHOULD FIX HIS OWN PRICE

Editor, SHOE AND LEATHER JOURNAL:

If you have space in your valuable paper, and care to publish these few thoughts of mine, it may be the means of putting myself and some others right along certain business lines.

I have read several of the articles published in your paper in reference to prices adopted by shoe repair men's associations in different parts of Ontario. Having checked over several of the items, under my rule of arriving at a proper charge, I do not think they are correct. In my preparatory days of manufacturing, I was taught to fix all prices along lines of leather, workmen's wages and overhead expenses. After putting these together and adding my profit I have found this rule to work out well in my own case.

I am under the impression that such prices as are published from various associations in your paper are usually arrived at by the calling of a meeting of repair men, who assemble in a room and talk things over. Questions are put and answered and as a result prices are fixed more as a compromise than from real knowledge of what is a proper charge. I think it is brought about by not having a correct idea of what the items of overhead charges are, and by not having a proper ledger account kept of all overhead expenses, and also by not keeping a correct ledger account of the gross business done during the year. This would enable you to add the correct percentage on every dollar of work passing through your hands. Under such conditions I cannot see how you could go wrong.

Fix the price for the work you do. Add overhead charges and put on your profit. Then keep on smiling and see how you come out at the end of your business year. Now I would like some of your subscribers who know a lot more than I do to tell me where I am wrong.

After the three—leather, wages and profit—I hold that everything else entering into the work comes under the head of overhead charges. I am going to give a list of what I

consider they are, and would like someone to add such items as I have not taken into account: rent, taxes, loss accounts, telephone charges, insurance, manager's salary, nails, blacking, polish, thread, wax, oils, renewals, express and freight charges, interest on stock carried on machinery, depreciation of plant, electric power used, fuel, light, books and stationery, and all other things used that are unforeseen and not provided for, but are required for use in your shop.

With kind regards for the "Journal," I am, sincerely yours,  
Oakville, Ont. E. H. GULLEDGE.

## DOES NOT FAVOR JOINT PRICES

Writing to the SHOE AND LEATHER JOURNAL a leading member of the repair fraternity in Winnipeg, says that shoe repair prices are changing "with the wind of late, and that is quite frequent." The Association which was started some time ago has gone to the wall. The members only got their cards out in printed form when another change took place in leather prices, so the cards were torn up. Now when a person brings in a job for sole and heel, we enquire, "Do you wish the work done today?" If so, the price is quoted, and if the party says "No hurry at all," we remark that the figure is for today only, inferring that tomorrow's quotation may be higher. Most of them pay when they leave the article in order to take advantage of today's prices.

"My prices are now:—

Men's full soles of leather, Neolin, rubber, elk or felt with either leather or rubber heels .....	\$3.00
Men's half soles, sewn or nailed .....	1.25
Men's half soles, sewn, elk .....	1.50
Men's heels levelled of leather or rubber .....	.50
Ladies' half soles, sewn, oak leather .....	1.00
" half soles, sewn, elk .....	1.25
" spool heels, leather .....	.25
" rubber heels .....	.50
" walking boot heels, leather .....	.35
Misses', boys' and youths' in proportion.	

"The people are taking to advanced prices nicely, as they thoroughly understand the conflicting causes. A large manufacturer from Quebec was here recently and told one of our jobbers that the lowest priced boot that he could quote for fall, 1917, in men's welts, was \$6.00 a pair. That sounds fine, don't it?

"Yes, it is an admirable thing for repair men to tell a customer how to economize. For instance, a man comes in with a box kip blucher, slip sole, welt, which he bought a few months ago. They have gone wrong at the toes and heels and he says, 'how much will it cost me to have these understandings half soled and heeled using No. 1 stock?'"

"I say, '\$1.75.'"

"'Oh,' he'll answer, using the name of some Greek or Roman deity, 'why I paid only \$2.25 for them and I have worn them six months.'"

"It is fine for the repair man. One wholesale representative came to my shop recently and told me he could sell me No. 1 oak for 78c. per lb. in five roll lots. Soon another man came in, and informed me I could have it for 60c. in five roll lots, and during the afternoon a third fellow entered and imparted the knowledge that if I took ten rolls, I could have it for 66c. a pound, spot cash.

"How is it these prices happen to vary so much on the one day, and all for the same identical brand of leather?"

How aggressive shoemaker in Western city advertises the facilities of his modern shop

Herein is one good reason why I contend that shoe repair men cannot have a set price. One man called the other day and remarked: "Well I was just in three other shops and asked the price of a job, and all were different. Now you are still different." I added: "Well that's my price and it is on that card there in front of my counter; you can see it for yourself."

Skates sharpened.....							.15

# AMONG THE SHOE MEN.

A new Walk-Over boot shop which is under the management of R. J. G. Gore, has been opened at 10 St. John street, Quebec city. The inviting establishment is finished in mahogany and has the regulation type of Walk-Over front, the same as the stores in Montreal, Toronto, and other cities. There is a mezzanine floor and the appointments and fixtures are decidedly artistic and attractive.

E. D. Pretty who has had considerable experience in selling on the road and is well-known in shoe making circles, has been appointed city representative of the United Shoe Machinery Co., Toronto, and has entered upon his new duties. He succeeds K. G. Walters who has joined the selling staff of the Regal Shoe Co., Toronto.

The King Shoe Co., Limited, of Toronto, have received through the Militia and Defence Department at Halifax, an order for 20,000 pairs of boots for the Imperial Navy. The consignment has to be completed in two months time and it is understood the price is around \$5.00. The boot is a chrome black kip blucher, with slip sole. The slip sole is attached to the insole by Standard screws and the outsole is Goodyear welted to the slip sole while the shank is McKay sewn. The naval boot in pattern and last resembles very closely the regulation Canadian Army boot.

The Regal Shoe Co. are removing from their factory on Atlantic Avenue, Toronto, to their spacious and admirably appointed new home, corner Bathurst and College streets. The cutting and fitting rooms are already in operation, and the other departments of the plant will be going in a few days. It is expected that by the middle of the month, the making of shoes in all branches will be in full swing. The new factory of the company is one of the best lighted and splendidly located that could be desired. The structure is 65 by 130 feet, and the capacity of the plant will be 1,200 pairs a day.

H. R. Emery, of Blachford, Davies & Co., wholesale shoes, Toronto, spent a few days recently in Montreal and Quebec, on business.

The excavation and foundation for the new shoe factory of the Reliance Shoe Co., in Acton, Ont., are completed. The contract for construction work has been awarded to J. B. MacKenzie, of Georgetown. The building will be of solid brick 40 x 125 feet in dimensions, two storeys and basement, and the capacity of the plant will be five hundred pairs a day.

The assets of Mrs. A. Gould, shoe store, Ottawa, will be sold.

A Russell Hewetson, of Brampton, was elected President of the Ontario Union of Christian Endeavor Societies at the annual meeting held in Toronto last week. He is secretary-treasurer of the J. W. Hewetson Co., shoe manufacturers, Brampton, and is a former president of the Toronto C.E. Union.

K. G. Walters, late of the United Shoe Machinery Co., Toronto, has joined the selling staff of the Regal Shoe Co., Toronto, and is covering Western Ontario.

Andrew McGlashan, of York Mills, Ont., died recently at the age of eighty-one years. He was born in York Mills, but had lived a good many years in Toronto. From the early years of the last century, the name of McGlashan has been associated with the leather business. Andrew McGlashan, the grandfather, being a large property owner in York Mills and Toronto, who carried on business at the south-

east corner of Yonge and Queen streets in 1854-7. The late Mr. McGlashan, who was a widely known tanner, is survived by two sons, Thomas, of Pickering Township, and Elwood, of Toronto, and by one daughter, Miss Alison, of Toronto.

E. T. Jacobi, of Toronto, and Clayton Hurlbut, of Preston, Ont., have returned from an extended business visit to Boston, New York, Rochester and other centres.

W. F. Martin, of the Kingsbury Footwear Co., Montreal, who recently underwent an operation is able to be around again and greet his many friends.

Geo. Cloos and Roy E. Wilson, of St. Thomas, Ont. have bought the shoe business of Johnston & McCormick, who are retiring. Messrs. Cloos & Wilson have taken a permanent lease of the premises, and will no doubt continue the business in the same progressive manner as it has been conducted in the past. Mr. Wilson has been for the past few years, manager for Johnston & McCormick.

A. L. Johnson, of A. L. Johnson Shoe Co., Montreal, was in Toronto last week on his return from Winnipeg.

Geo. E. Boulter, of Toronto, spent a few days last week in Rochester, N.Y.

The Miner Rubber Company, of Granby, Que., have bought out the F. S. Carr Rubber Co., of the same town. The latter firm until a few months ago when they removed to Granby, were located in Tilbury, Ont. Granby is shortly to become a city. A bill to this effect is now being presented at Quebec, and it is expected that the first meeting of the new city council will be held on the fourth Monday in January, 1917.

**AERO-PEDS**

**Will Make Your Feet Healthy**

With **Aero-Peds** in your boots you continually walk on real air cushions that automatically generate a circulation of air at each step, and aids to keep the feet dry and warm.

**McARTHUR, IRWIN, LIMITED**

Montreal

Toronto

The new warehouse of the Canadian Consolidated Rubber Co., in Regina, Sask., has been completed. The present building consists of two storeys and a basement, being 50 x 100 feet, but provision has been made for adding another three storeys when required. The new structure is fire-proof throughout being built of the Trussed Concrete Steel Co. system of reinforced concrete with outside walls of solid pressed brick. A one pipe steam type system of heating has been installed and fire protection is provided by a 4-inch stand pipe with fifty feet rubber hose and connection on each floor. Freight elevator, weighing scale, vault, ample office accommodation, etc., make the new warehouse complete in every detail.

L. M. Stock, Western representative of the Walker, Parker Co., Toronto, has returned from an extended selling trip throughout Western Canada.

J. H. Moore, who represents the Minister, Myles Shoe Co., in the Maritime Provinces has returned to Toronto, after a highly successful trip, going as far east as Charlottetown.

Morris and Smith, shoe retailers, Charlottetown, P.E.I., have recently installed a handsome new front which greatly improves the appearance of their store.

Alf. Minister, of the Minister, Myles Shoe Co., Toronto, spent a few days recently on a business trip to Boston, and other New England shoe centres.

Extensive improvements have been made to the shoe establishment of Fletcher Johnston, Limited, Stratford, Ont. A new plate glass front set in a Belgian grey oak finish, with a centre entrance, giving two show windows instead of one, as formerly, has been completed, and also the rear end of the store has been made almost all of glass to admit light to the orthopedic department, which has been newly equipped and extended to meet this growing part of the business. The whole interior of the store has been

painted and decorated and a new floor laid, making the Johnston shoe house one of the most attractive in Western Ontario.

J. J. Connor, who represents McLaren & Dallas in the Western provinces, has returned to Toronto, after an extended selling trip.

Harry Thompson, of the Thompson Shoe Co., Montreal, spent a few days in Toronto last week on business.

S. C. Cronk, of S. C. Cronk & Co., Toronto, was in Montreal and Quebec, recently, calling upon the members of the trade.

Ed. Lynch, Western Canada representative of the Minister, Myles Shoe Co., Toronto, is home after a tour covering several weeks in the West where he reports business as steadily improving.

Percy J. Steel, retail shoe dealer, St. John, N.B., is at present in Toronto taking a cavalry course at the school there. When this is completed he will be qualified for a captaincy as he has already successfully taken a lieutenant's course in infantry and machine gun work. Despite repeated efforts he has been unable to get attached to any Canadian unit.

The mitt and robe factory of the Sovereign Co., Delhi, Ont., was destroyed by fire, recently. The firm was filling government orders, and there are suspicions that the fire was of incendiary origin.

J. S. Lovell, of Toronto, representing Corbeil, Limited, Montreal, H. B. McGee, sales manager of the Minister, Myles Shoe Co., Toronto, and E. W. McTear, who is on the traveling staff of P. Jacobi, shoe store supplies, Toronto, have been nominated as candidates for the Board of Directors from Toronto on the Commercial Travellers' Association. Sixteen men are in the field and nine are to be elected. The result of the vote will be known at the end of the month when the annual meeting of the Association will be held.

Charles Holden, of Winnipeg, Western sales manager of the Canadian Consolidated Rubber Co., is a candidate for Reeve in the rural municipality of Assinaboia, Man. The election takes place on December, 19th, and Mr. Holden's many friends will wish him success at the polls.

Elmer Poyer, manager of the Canadian Arrowsmith Mfg. Co., Niagara Falls, Ont., who recently returned from a business trip to Winnipeg, Calgary, and other western points, was in Montreal last week, accompanied by R. J. Orr, Ontario representative of the firm.

J. H. Goyer, of Montreal, who represents H. B. Johnston & Co., leather manufacturers, spent a few days in Toronto lately.

The J. C. Hemond Shoe Co., Montreal, have consented to assign.

J. P. Caffery, shoe dealer, of Hamilton, has assigned to McLeod Tew.

All the travellers of Getty & Scott, Limited, Galt, Ont., who have been on the road for spring, have been recalled. The firm reports that their representatives were out the shortest space of time of any selling season, and the orders exceed in volume any preceding showing. The firm is sold absolutely up to capacity, and running to the limit in all departments.

Extensive additions are being made to the Grandy, Que. factory of the Canadian Consolidated Rubber Co. At one end the extension will be forty feet long and the same width and height as the old building. At the other end, a three storey and basement, fifty feet square, will be built. It is expected that these additions will be completed in about two months when the mill will be able to turn out nearly ten thousand pair per day. The Reclaiming Factory building at Granby has been turned into a modern warehouse for the Granby plant and manufactured stock transferred to the new warehouse.

F. X. Charbonneau, of Charbonneau & Deguise, Montreal, spent a few days in Toronto last week on business.

Ed. R. Lewis, leather merchant, Toronto, has returned from a business trip to Boston.

Harley Henry, wholesale shoe merchant, Saskatoon, spent some time recently in Montreal and Toronto on a business trip.

J. J. Tilt, who represents the Brandon Shoe Co. of Brantford, Ont., in Western Canada, has returned from an extended and successful selling trip throughout the Prairie provinces.

R. E. Bennet, representing Ed. R. Lewis, Toronto, was calling upon the trade in Ottawa last week.

Paul Roy, leather merchant, Montreal, spent a few days in Toronto recently on business.

Work is progressing favorably on the large addition to the retail shoe store of Dillon & Moore, St. Catharines. James Dillon, who was confined to the house a few days with illness, is able to be around again.

Harry McKellar, who represents the Rumpel Felt Factory of Kitchener, spent a few days recently in Winnipeg, and entertained the buyers of the wholesale shoe houses to a luncheon at the Fort Garry.

The Quebec Shoe Store, of Winnipeg, has opened a branch in the Stobart Block, on Portage avenue, in that city.

Rosecrans Murphy, representing the Julian & Kokenge Shoe Co., Cincinnati, was in Montreal and Toronto last week on business.

The shoe store of Mrs. J. Patton, 21 Gottingen street, Halifax, was visited by fire recently and considerable damage done to the stock by water.

"Pete" Cowan, who formerly represented the Brandon Shoe Co. throughout western Ontario, was in Winnipeg recently on his way to the Coast. He is buying "spuds" now in large quantities instead of selling footwear, and says that the potato life is the only one.

Letellier & Co., shoe retailers, Ottawa, recently suffered a fire loss.

The decision of the British Government, says The Manchester Commissioner, to acquire further stocks of leather, is causing considerable anxiety among boot dealers and repairers. Already all the best leathers in English tanyards have been taken by the Government, and the most recent decision is to commandeer other classes of leather from which sales are made. From 2s 6d to 3s per pound is being paid for leather which before the war cost 1s 6d and 1s 9d, and in view of this latest decision a famine in boot leathers is threatened. A number of leather substitutes are being put upon the market, and some of them are proving satisfactory. The demand for light leathers has been relieved by the use of velvet, poplin and canvas tops in women's boots, but these will be of little service during the winter.

There is no relief in sight from present high prices of shoes, according to officers and directors of the National Shoe Retailers' Association, who met recently in Pittsburg to arrange for the National convention in Cincinnati in January. The retailers were so sure high prices would continue that a lengthy discussion was held to provide a substitute for leather in the manufacture of shoes, and a committee was named to make a thorough investigation of this matter.

J. P. Kilgour, vice-president of the Kilgour, Rimer Co., Winnipeg, was in St. Paul recently on a business trip.

#### DEATH OF ESTEEMED SHOEMAN

A. W. Ault, who for the past twenty years had been in the wholesale shoe business in Ottawa, passed away recently, aged 58 years. He had been in poor health for over a year. Mr. Ault was for two terms a member of the city council and a highly respected and progressive resident of the Capital, as well as being a member of the Board of Trade, director of the Protestant Hospital and a past president and treasurer of the Y.M.C.A. Previous to locating in Ottawa, he was a member of the Stormont County Council for a number of years. Born in Aultsville, where a general store was established several years ago by his father, and is still in existence, Mr. Ault retained his connection with it as secretary. On the death of his father, about 21 years ago, Mr. Ault, who had spent five years in Chicago, returned to Aultsville, but, after a short stay in his native village, went to Ottawa, where he joined forces with J. V. Poap, wholesale shoes. The firm was known as Poap & Ault for three years, and for the past seventeen has been styled The A. W. Ault Co. They employ travelers and carry a select and representative stock. Very many friends throughout the country will regret to learn of the passing of Mr. Ault, who took an interest as well in military work. He was captain of one of the companies in the 59th Stormont and Glengarry regiment, and when pressure of business compelled him to give up military work he was placed on the reserve of officers for that unit.

He was a prominent member of the Masonic order, including Rouge Croix 18th degree.

He leaves his widow, at present at Aultsville; three sons, Lloyd, of Ottawa, Arthur Donald, of the R.C.H.A., Kingston, John Gerald at home; two brothers, Harold Ault, of Washington state, and Charles S. Ault, of Aultsville; one sister, Mrs. Ida Ault, of Toronto.

Ever since his father's illness, Lloyd Ault has taken his father's place in the A. W. Ault Co., Limited, and the business will continue under the joint management of Mr. Lloyd Ault and Mr. L. C. Wilson.

Leather to the value of \$450, stolen from the storehouse of Crocker & Co., St. Thomas, Ont., last week, was found in the woods on a farm north of the city hidden under brush and leaves.

The Chicago Cut Rate Shoe Store, which was a branch of the Harvard Shoe Store, Winnipeg, has closed.

H. C. Carter, of the Colonial Hide Co., Montreal, spent five to discourage "these vulgar fashions."

well known in the States, having formerly been in the hide business in Boston, also in Malone, N.Y. In February, 1914, he opened the Colonial Hide Co., at Montreal, meeting with success from the start. Since the date of starting less than three years ago, Mr. Carter opened other branches at Quebec, Ottawa, Three Rivers, Sherbrooke and St. John. The Colonial Hide Co. has been doing good business in Canada under Mr. Carter's able management. At the time of the Shoe and Leather Fair in Boston last July he was one of the leaders of the Canadian delegation. Although coming

into the Canadian trade almost as a stranger from the States, Mr. Carter's personality won him many friends and valuable business connections. He is well known and highly esteemed in the Canadian trade.—Hide and Leather.

A small fire occurred recently in the premises of the Central Leather Goods Co., 1191 Bathurst street, Toronto.

At a recent meeting of the Executive of the National Council of Women held in Kingston, Ont., the evil results of forcing the foot into shoes of unnatural and injurious shape, which recent fashions have made popular, were emphasized and an appeal was made to the National Executive several days in Boston during last week. Mr. Carter is

Geo. Yeo has changed the name of his place of business in Teeswater, Ont., from the Cash Shoe Store to the Classic Shoe Store. The cash system has been so successful and profitable to both the business and its patrons that there is no thought of ever making any change in that particular, says Mr. Yeo.

THE MANNER IN WHICH SHOE LEATHER QUOTATIONS ARE SOARING

**Calf leather:** men's weights, medium quality Russia for men's fine shoes.

1915	1916				
July	March	October	November 4	November 25

## 22-FOOT GOODYEAR SHOE REPAIRING OUTFIT

**MODEL N**

**T**HIS Outfit represents the highest development in shoe repairing machinery, and meets every demand of modern shoe repairing. It embraces all the essential processes for making new shoes from old ones, giving the maximum of equipment and efficiency in the minimum space. The Outfit has the Goodyear Stitching Machine with all its improvements, including a new style steam generator which uses gas or gasolene for generating the steam, and operates automatically, thereby insuring a uniform heat for keeping the wax in proper condition and requiring little attention from the operator. The Edge Trimming Machine has the new feature of the two shafts, being operated by a single belt, and the cutter grinder is attached directly to the main shaft. This arrangement gives better results with less power.

The Buffing and Scouring Machine has a shaft 57 inches long and carries the following equipment:

- |  |                                  |
|--|----------------------------------|
| 2 Split Bottom Buffing Rolls           | 2 Flat X-Ray Hee Scouring Wheels |
| 2 "C" Shape X-Ray Heel Scouring Wheels | 1 Heel Breast Scouring Wheel     |
| 1 Pin Wheel Pad Complete               |                                  |

A powerful Blower System removes the dust resulting from the trimming, buffing and scouring operations, and is designed to overcome certain objectionable features of other blowers.

The Finishing Machine has a 78-inch shaft which has all the necessary equipment for black or russet work:

- |  |  |
|--|--|
| 2 Corrugated Rubber Shank Finishing Wheels | 1 Corrugated Rubber Heel Finishing Wheel |
| 1 Corrugated Rubber Bottom Finishing Roll  | 2 Shank and Bottom Brushes               |
| 2 Heel Brushes                             | 1 Stitch Cleaning Brush                  |
| 1 Levelling Roll                           | 1 Bead and Wheel                         |

At the end of the Outfit is the Oscillating Edge Setting Machine which is fitted with union irons and in its motions duplicates hand workmen with quicker and better results.

Each of the machines is operated independently by a friction drive pulley, so that it is necessary to use only those machines which the operator may require. This feature means a saving of power.

All the machines are firmly mounted on legs and driven by a countershaft with carefully adjusted bearings, so that the Outfit runs with very little vibration, and is in every way most efficient.

## Lest We Forget

**W**E Canadians are sailing the perilous course between the Scylla of business and the Charybdis of pleasure. We are prosperous and prosperity seems to be wielding its fateful siren influence upon the people. We are practically "pleasure mad" and that in spite of the sobering shadows of the greatest war this country or the world has ever known.

We have sent a quarter of a million of our men across the seas to fight for the greatest cause that has ever formed a battle gauge. These men have done honor to the cause and their race and thousands of them fill nameless graves in a strange land, while we sit about our comfortable firesides in our slippers, and read tales of their wonderful achievements; or throng the "movies."

The dead in France and Flanders mutely appeal to us to fill the gaps they have left. The living remnant, with hands outstretched and voice of agonized pleading, cry, "Come over and help us." But our ears are heavy, our eyes dull and our arms are palsied by the curse of prosperity and the blight of pleasure-seeking. They practically call in vain.

We encourage this cowardly faltering with the belief that the recent heroic sacrifices of these brave men and their fellows in France have brought the end of the war in sight. Therefore, "on with the dance, let joy be unconfined."

Yet the war has only begun and it belongs to the Teuton so far by all the rules of the game. Who will dare say what the next six months shall bring? Who will be responsible if the last ounce of men and means fail to be placed in the balancing scale?

In an important engagement in a war waged in the last century, a standard bearer, far in advance of his company, placed his flag on the very breastworks of the enemy's fortifications. "Come back," he was ordered. "I can't. Bring up your men!" was his reply as he fell dead at his post.

The cry reaches Canada in the midst of Christmas festivities this year in clarion notes, "Bring up your men." This is the message that is needed this Christmas more than the angels' song at Bethlehem. Will our preachers be true to the needs of the country and the world?

Will we continue to FORGET?

# Leather and Shoe Situation

- Prices Still Going Upwards—Manufacturers Scouting the Market—Leather Men Holding Back—Shoe Manufacturers Sold Up for Months—Retailers Well Bought Ahead

THE situation remains unchanged as far as the upward tendency of leather and shoes is concerned, although the talk of peace has given pause to some extent to the speculative pyrotechnics of the market in some directions. Sole leather as well as standard lines of upper stock have continued to advance until "dollar leather" for Christmas has been almost realized.

The holiday season has so far been exceptionally good, and the heavy purchasing of footwear has encouraged dealers to speculate to an extent not only far beyond anything hitherto known in the trade, but borders upon the alarming. The SHOE AND LEATHER JOURNAL has already warned retailers that there is nothing but trouble in shoe speculation just now. Should there come, through any chance, a stoppage in the flow of money that is inundating the country, people will look twice before they will buy shoes at present figures. The proposed peace conference by the Central Powers last week, was followed by a drop in wheat, and other speculative merchandise and stocks, and should negotiations begin there is not the slightest doubt that there will result a hesitation on the part of buyers of all classes, wholesale as well as retail.

There is a genuine shortage in some classes of leather, but there is not the slightest doubt that considerable stocks of other lines are being held for speculative purposes, and should any uncertainty arise as to the war continuing, there would be an immediate weakening. All those making and selling shoes should bear this fact in mind. As it is, it looks as though some shoe enterprises that have not anticipated the gymnastics of the leather market were going to find themselves in an awkward predicament in the next few months.

Meanwhile raw stock goes steadily up, and the strange thing is that there seems to be plenty of hides forthcoming as soon as the price is put on the counter. They are now worth considerably more than meat, and the tanner must feel today that his business has attained an importance that it has never yet known in the history of the industry. But what he and the rest of those interested in leather and its products cannot understand is, that in spite of the increased use of beef for ordinary and war purposes, and the fact that the demand for staple footwear on this side of the Atlantic is not so tremendously beyond the ordinary, that cow hides should outrun even the beef itself to such an alarming extent.

It is a time for wise caution and carefulness in movement, and, although a man has to be governed to some extent by what is going on around him, the wise operator will look well to his steps

in the next few months. The late Baron Rothschild gave as the foundation for his great success the principle that he never bought at the lowest price and never sold at the highest. That is business genius.

Just now, and particularly at this season, a word with regard to some of the traits developed by the exacting business conditions prevailing will be in place. There is a tendency to crowd in every stampede, and the seller is often no more to blame than the buyer. We are hearing constantly of cases when buyers in their anxiety to get in "on the ground floor" are doing things that may be good business, but bad morals. These are times when a man's character is put to the severest test in the conflict between self interest and truth, money-making and uprightness.

Let the seller as well as the buyer beware lest in this tendency to grab he gain the world and lose his "soul."

## A GREAT NUMBER

The present issue was practically a spontaneous effort on the part of the shoe and leather trades. Like "Topsy" it "grewed" and that almost in an night. This closes the twenty-ninth volume of the SHOE AND LEATHER JOURNAL which is thus still "going strong." This volume is by far the largest of the twenty-nine. Since January 1st we have given the shoe trade of Canada a book five inches thick of 1,716 pages of matter of vital interest to their business. Where can such a book be purchased for one dollar? Here is for a bigger and better 1917.

## CHANGES IN SHOE LEATHER TRADE

The publishing of our 1889 plate of the Montreal shoe and leather trades awakened such widespread interest that we have been induced to reproduce the plates of the Ontario trade issued at the same time. They afford an interesting study of the changes that a quarter of a century work in the personnel and business of an industry. In the first plate, on page 53 of this number, there are sixteen faces out of the twenty-two that through death or otherwise have been removed from the activities of the trade. In the second plate, on page 55, there are only eight out of the twenty-two that are today factors in the shoe and leather business. Only fourteen out of forty-four or about thirty-two per cent. of those engaged in the shoe and leather trades of a quarter of a century ago are still at the game.

## HOW HOTEN TRIED TO "GINGER UP" MEN'S DEPT.

Made Timely Suggestions and Picked Snappy Saleable Lasts, but was Side-Trackd in the End—Essayed to Enlist the Young Men's Interest and Enthusiasm but 'Twas no go—Getting Tired of Conservatism and Staidness he Journeyed West

"GINGERING UP" the men's department is a thing frequently discussed by shoe dealers at the present time.

Owing to so many men being at the front, or in training, the trade in masculine footwear has fallen off to a certain extent, and how to make up the loss, by inducing the lords of creation at home to buy more pairs, is somewhat of a problem.

"The only way I can see that it can be done, is to change the styles as frequently, and as radically in men's footwear, as is done in women's footwear, and this will give the youthful dressers a chance to buy more pairs than they have in the past. "However," remarked the aggressive and alert manager of a leading Western store, "gingering up the men's branch is exceedingly difficult, when you have not the sympathy and co-operation of the proprietor."

"See here, Hoten," remarked a former boss to me, 'we are paying you more money than any shoe clerk in this establishment. You have always made a good showing in every other branch, and we put you among the men's shoes, thinking that your work and worth would reveal some results, but we must say that you have been a disappointment.'

### The Same Shoes Year after Year

"I can easily account for that," I answered, 'you know I am not in charge of the department, only first assistant, and Tonkin, who is over me, is set in his ideas, staid in his notions, and conservative in his tastes. We have a lot of lasts that answer for men of middle age, or those of mature years, such as the Banker's Last, the Progress, the Straight, the London Toe and President, as well as the Right Form Foot Form, the Doctor's, etc., but we have nothing of a snappy, catchy character. Neither have we any fancy tops, and until we have all these, with perforated patterns, and wing tips, and special soles, such as neolin, fibre, ivory, etc., we shall have no ginger or dash in the men's department.'

"Well," came the reply, 'I will speak to Tonkin and he will get you what you want. I am sure that you have only to draw his attention to the matter after I have talked to him, and you will secure exactly what you require.' I may add that Tonkin had been at the helm for nineteen years, and had not been away from his post a half dozen times in that long period.

"With this assurance, I was told by Tonkin the head man, a few days afterwards, that Ralsum, who represented Craigston & Co., from whom we purchased a large number of shoes, would be in town in a couple of weeks. I was to go down and look at his latest and smartest offerings, and pick out exactly what I wanted, with the assurance that Tonkin would place them in stock. I told the latter that we certainly should get more of the young men's trade if we stocked a few classy and distinctive lines. He said—'All right, go to it.'

"A few days after I met Ralsum and he asked: 'What are you doing down here?'

### Some Natty and Nifty Stuff

"Oh," I rejoined, 'we are going to put in some nifty, up-to-date stuff. Tonkin has told me to make the selections, and I am here for that purpose.' He gave a rather sardonic smile, and I picked out exactly what I wanted and informed him that Tonkin would give him the sizes, widths, and quan-

'Ralsum said: 'I do not think Tonkin will buy these.' I inquired 'Why?'

"Oh well, he will have to undergo a complete metamorphosis, and change his ideas if he does.'

"I requested Ralsum to tell me if I had not made good selections. 'Certainly,' he answered, 'you have picked out the best selling lasts that I have. We cannot make them up fast enough.'

"Well, I know I can sell five cases on each of those lasts if you can have them delivered within four weeks,' was my parting reply, and I adjured Ralsum to try his best with Tonkin to put them over. The latter went down to the sample room in the Tertion Block, and came back with triumphant smile on his face. I met him at the door and said: 'Well, how many pairs did you order on the samples I picked out?'

"Oh," he answered, with a sauve air, 'now you really did not think that I was going to place any business on those lasts! Why, my dear fellow, we would never sell them in the world.'

"I made no protest whatever, and came to the conclusion that there was no future for me or for the men's department under Tonkin. I resigned two weeks later and secured a job in a more progressive establishment.

"Oh, I forgot to tell you of another stunt I tried to work, to boom the men's department, before I attempted to pick out lasts that were suitable for young men's trade. "Art" Dunn was the champion foot runner of our county. He had suddenly burst into fame, was a good sport, and well-liked by the young men. I went to him one evening and said: 'Arthur, would you mind using a pair of Dr. Blick's Flexoid shoes?'

### Sure, Use My Name in Ads

"Sure," he answered, 'only too glad to use them on the track. I have often heard of them, and know they are great.'

"Then, of course, I revealed the ulterior object I had in view and quietly asked him if he would mind us using his picture, and a statement in the county papers, to the effect that Arthur Dunn, champion runner of Nutane county, was wearing Dr. Blick's Flexoid running shoes.

"He gladly gave his consent. I knew that when once this advertisement appeared, all the boys in town who were taking an interest in athletics, would want a pair of these shoes. I was well pleased with the result of my interview, and went back to lay the matter before the manager of the department. But he ridiculed the idea and waxed sarcastic at my expense.

"What—give Dunn a pair of running shoes free?'

"Yes," said I.

"Never, not as long as I am managing affairs here. If he wants a pair of Dr. Blick's Flexoid Shoes, he can pay for them, the same as anybody else.'

"Now this took all heart and spirit out of me. To have presented Dunn with a pair of these shoes would possibly have cost us at that time about \$3.75. We would have got valuable advertising from it, and boosted our sales on this particular brand tremendously.

"I have only one thing to say and that is, when you are in an establishment where suggestions are not accepted, where originality is dcadened by antagonism, and conservatism, where you are given no credit for brains or initiative—why, get out quick."

## SOME JANUARY TRADE BOOSTING SUGGESTIONS

**I**F you have rushed through the water in a high speed motor boat, with the spray flecking your face as the bow turned big, smooth-faced furrows on each side, while in your wake a dancing, foaming path of ruffled swells told the tale of your exhilarating speed, and then of a sudden your gasoline went low and you were forced to creep along at a speed that left scarcely a ripple behind, or if on some blossom-day in May you have motored along a fine stretch of country road at a law-defying pace, and the song of the birds and the scent of the flowers added special charm to the sport, when suddenly "engine trouble" demanded that you should substitute a snail like crawl of three miles an hour for your forty mile rate—if so, then you will know something of the feeling of after Christmas trade-days—when you are forced into the slowing down pace of your business car.

It is the contrast that makes this slowing seem really worse than it is. But it is a fact that trade drops away after the Christmas season. There can be little doubt but the cause is simply a reactionary effect, after the extensive buying that is always indulged in during the holiday season. People get the buying habit then and buy unnecessarily, with the result that they slacken up right after Christmas.

Now it is the merchants opportunity to overcome this condition. January offers no special days or holidays to take advantage of from an advertising point of view. But at this season many merchants run a half yearly sale or a pre-stock-taking sale to put some pep and vim into business. There will always be "left-over" lines and possibly odd sizes that will need clearing out. On such it is well to make a sweeping price reduction and offer them at a figure that will make them move quickly. Make a complete "clean up" sale of everything that is hanging. Run it for ten days or two weeks according to the amount of goods you have to

clear out. In some cases it may be well to supplement with a special buy of some lines that you can offer at low prices and include in this sale. Manufacturers and wholesalers are just as anxious to unload during the month of January as you are and you may be able to pick up something at a great price attraction. Advertise the sale in the paper and place a cotton sign across the front of the store announcing it. Always be careful to put the dates of the sale on the sign, and in all the advertising. Never announce a ten or twelve days' sale without giving the dates, for it would still read a ten days' sale after it had been running nine days, which would be misleading.

Start your advertising at least three days in advance of the sale and dress your windows two days ahead. Adhere strictly to the time of starting the sale. Do not sell anything in your windows nor take orders for any of the lines on sale, one minute before the advertised time of starting. Nine o'clock is a good time to begin the sale as that allows ample time for customers to reach your place of business without standing outside to wait for store opening. If you arrange for the opening day to be on Saturday morning it will give your customers from the country an opportunity to take advantage of the values you are offering.

It should not be forgotten that the object of this sale is two fold. One to convert slow selling and off-season lines into ready cash, and make room for new goods, the other to attract customers to your store, and if possible get them interested in regular lines in which there is a greater margin of profit.

If this sale is properly handled it should prove a good business getter.

(Continued on page 94)

# DOES PARTNERSHIP IN THE SHOE BUSINESS PAY?

The Sad Experience of Some Who Rush Into Associations or Mercantile Arrangements Without Serious Thought of the Many Unforeseen Dangers and Difficulties That are Likely to Loom Up—Better to Give a Valued Employee a Share in Profits

**P**ARTNERSHIP frequently proves to be the easiest, quickest and surest road to invite business troubles.

There are, of course, instances where partnerships have been formed between men, who have known each other for years and been life long friends which have worked out well. Then again, partnerships have been formed by bosom cronies who soon after entering into a business alliance became sworn and implacable enemies.

The reasons that men go into partnership are many. Sometimes the load is too heavy for one to carry and the duties too varied for him to discharge. The idea is put forth that two heads are better than one, and that a team can draw a heavier load than a single horse. Another object in forming a partnership is the investment of additional capital with which to afford facilities for expansion and wider markets.

In some cases partnerships work out satisfactorily. Each man has certain strong points, or is a specialist on certain lines and the combined characteristics of the two, leaves no weakness in the organization; but it is not always that qualities of mind and heart dovetail so admirably that no friction, suspicion or jealousy exists.

## Suspicion and Distrust Loomed Up

"Yes," remarked a Western Ontario shoe dealer, "I had a man come along a few years ago, whom I had known for ten years. I had always heard him well spoken of, and he appeared to me in every way suitable to enter business, and put money into it. He had ample capital and his object was to associate himself with me so as to find an outlet for his ability and insight. He had grown weary of the monotony of living retired. I was a little bit crowded at that time for ready cash. My head clerk had just left me, and the circumstances were propitious for availing myself of the proposition which he made one afternoon in the store, as we sat talking about the shoe game generally.

"Things went along very well for three or four months, until the ardor and fervor of my new associate began to lag. I was on hand early every morning, but he started coming down late, offering various pretexts for his absences. Then he took an occasional afternoon off, and finally a great many. While he did not do much selling on the floor, he was supposed to look after the financial arrangements. Well, it soon developed that things were in a helpless mess. Discounts that we should have taken advantage of were not attended to and in some cases we were pressed for payment of bills which I thought had been settled long since. Customers' bills way past due were not sent out or collected, and my associate grew indolent and indifferent although quite willing and ready to take his twenty-five dollars a week out of the business every Saturday night.

## Who Paid for the Cigars?

"Then, too, to show you how suspicious one man can become of another, and the way little things may be exaggerated—take this instance—just one out of a dozen. I was a smoker and he was not. It was my usual custom on returning down town from the house to enjoy a good cigar. Every time I walked into the store with a cigar in my mouth, my partner would look at me with a rather suspicious air, as much as to say, "I wonder if you pay for that smoke yourself, or if it comes out of the general fund. Oh, it is easy to magnify bagatelles until they become in-

surmountable barriers. If it is at all possible to get along without taking in a partner, it would seem advisable to do so—that is my conviction. Our dissolution came within two years, and I paid sweetly for my experience."

"If it is absolutely necessary to take in more people and more capital, I believe the facilities of the joint-stock Companies' Act should be taken advantage of" said a London, Ont., shoe retailer. "Where a concern is a joint stock one, it is much easier and more satisfactory to handle the internal affairs of any business. Then the man with the most money invested or who controls the most stock has the say, whereas in a partnership affair, there are often divided interests. If two men are not pulling together in partnership, one is trying to exercise greater privileges, or usurp more authority than the other.

"Men enter into partnership for various reasons, very often to retain the services of an old employee, or to give employment to some relative, or friend who perhaps is out of a job and has some capital to invest. The outcome is very likely to be disappointing and unsatisfactory to a degree that can never be desisted at the outset. It is well to think long and wisely before taking in a partner. Partnerships often led to more law suits, loss of money and severance of friendships than any other combination. The commercial bulletins contain numerous notices of dissolutions of partnerships, which are getting to be as frequent in Canada as marriage divorces in Chicago."

## Debate the Matter Seriously

Speaking of tying a valued employe to you without giving him a partnership "Shoe Topics" offers the following sane and timely observations.

In the every day discussion of the legal problems of business, questions growing out of partnership will probably come up oftener than any other question. Therefore the following will strike a responsive chord in many breasts:—

I have a very good man in my employ who has been with me for about twelve years. He is a good all-round man, and has done considerable selling, both in and out of the store. He also has a good idea of advertising, and is such an employe as any retail store will not let go if he can be held. The writer is getting along in years and has thought of perpetuating this man in the business, but doesn't know how to do it. Should it be done by giving him a partnership interest? The writer has never had a partner and hesitates to go into that, owing to the danger that a man who was satisfactory as an employe might not make such a good partner. Will you please discuss this if you think it is important enough to find a place in your always interesting column. The idea is to retain the services of the employe referred to on the most effective plan, without any danger to the writer or the business.

Yours,

To take a partner or not to take a partner, is almost as much "the question" as the one asked in the famous soliloquy of Hamlet. And if business men would debate it longer and harder there would be fewer unhappy partnerships.

My advice to this correspondent, and to anybody else in the same boat, is not to take an employe in as partner if you can possibly hold him in any other way. Take a partner only as a last resort, when the result sought to be accomplished can be accomplished in no other way.

In practice I have found that the best way, everything

# The Fool

*"But it isn't playing the game," he said,  
And he slammed his books away;  
"The Latin and Greek I've got in my head  
Will do for a duller day."  
"Rubbish!" I cried, "The bugle's call  
Isn't for lads from school."  
D'ye think he'd listen? Oh, not at all;  
So I called him a fool, a fool.*

*Now there's his dog by his empty bed,  
And the flute he used to play,  
And his favorite bat—but Dick, he's dead,  
Somewhere in France, they say;  
Dick with his rapture of song and sun,  
Dick of the yellow hair,  
Dicky whose life had but begun,  
Carriion-cold out there.*

*Look at his prizes all in a row;  
Surely a hint of fame.  
Now he's finished with—nothing to show;  
Doesn't it seem a shame?  
Look from the window! All you see  
Was to be his one day;  
Forest and furrow, lawn and lea,  
And he goes and chucks it away.*

*Chucks it away to die in the dark;  
Somebody saw him fall,  
Part of him mud, part of him blood,  
The rest of him not at all.  
And yet I'll bet he was never afraid,  
And he went as the best of 'em go;  
For his hand was clenched on his broken blade,  
And his face was turned to the foe.*

*And I called him a fool—oh, blind was I!  
And the cup of my grief's abrim;  
Will glory o' England ever die  
So long as we've lads like him?  
So long as we've fond and fearless fools,  
Who, spurning fortune and fame,  
Turn out with the rallying cry of their schools,  
Just bent on playing the game.*

*A fool! Ah no! He was more than wise,  
His was the proudest part;  
He died with the glory of faith in his eyes,  
And the glory of love in his heart.  
And though there's never a grave to tell,  
Nor a cross to mark his fall,  
Thank God! we know that he "batted well"  
In the last great Game of all.*

—Robert Service.

considered, to tie a valued employee to a business is by giving him a share in the profits. This is the largest part of what he would get from a partnership anyway, except some authority which he might misuse. If I knew him and his capabilities well, I should make a long time contract with him as an employee, providing in it a regular salary and a percentage of the profits. To protect myself I should also include a provision that the contract was conditional on the continuance of satisfactory service on his part.

Giving an employee a share in the profits of course does not constitute him a partner, particularly when you have made a contract of employment with him which gives him the share in the profits as part of his compensation. Therefore he is as much subject to your orders as he was without the share in the profits, and he cannot bind you any more than any other employee can, unless you wish him to.

## How He May Injure You

Contrast this with his ability to do you harm, if you make a partner of him. The essence of partnership is agency. Each partner is the agent of the others, and can do things which, though hurtful to the firm, will still bind it. When you make an employee your partner, you are to a certain extent at his mercy in the following respects:—

1. He can bind you, and the firm, and with it any other individual members, by an act within the ordinary scope of the partnership business.
2. He may receive payment for a firm debt and give receipts, and the other partners are bound even though he never turns in the money.
3. He may compromise or release a firm claim.
4. He may draw checks against the firm's assets and endorse and cash checks drawn in the firm's favor.
5. He may make contracts, even bad contracts, with reference to the firm's business which bind the other partners.
6. He may cancel insurance on the firm's property.
7. He may buy goods on the firm's credit, even though he thereby runs the partnership into overwhelming debt.
8. He may engage employees and make contracts with them that bind the firm.
9. He may acknowledge a debt, and thus bind the firm, even though the other partner may wish to repudiate it.
10. He may make promissory notes, even though he abuses this trust for his personal benefit, and the firm is bound. He cannot waive exemption for the firm in a judgment note, however.
11. He may borrow money on the firm credit even to the point of mortgaging the partnership's personal property.

## What You May be Liable For

Even in another way the individual partner is liable for the acts of his fellow partner. He is liable for any loss to third persons caused by the fraud or wrongful act of his partner, if that act was in the ordinary course of business, even though he knew nothing about it and give his partner no express authority to do it. This extends even to the misapplication of another's money by a partner; the firm must make it good if done in the course of ordinary business.

In none of the above instances can the power of a partner be restricted, except by agreement between the partners which to be worth anything as against outsiders must be brought to their attention.

I have often thought that if I could have something like the above printed on a card, and hand it to every business man who was thinking of taking a partner, I would probably cut down the number of new partnerships, by half. And I certainly would cut down the number of lawsuits by half, and the number of unhappy business relations by half.

# LIVE SHOE HOUSE WITH SPLENDID SYSTEM

The Way that Alert Shoe Man in Chatham Keeps Tab on his Stock, Sales and Profits—Knows Every Day how each Department Stands—Manner in which Sales Slips are Made Out—Well Appointed Establishment, and How it is Managed

THE handsome and up-to-date footwear establishment of H. Grey Hodges, at 82 King street, Chatham, Ontario, is divided into eleven departments:—1, ladies' high shoes; 2, men's high fine shoes; 3, rubbers of all kinds; 4, ladies' low shoes and slippers; 5, men's staple shoes; 6, boys', youths' and little gent's; 7, infants' and chil-

and selling price of each article, the total for each department, and the percentage of profit (figured on the cost price) for the day's business.

The firm keep a book containing the amount of stock at stock taking (in February), and as invoices of shoes come in, the different departments are charged with their goods, and

a young lady in attendance. The firm make out a check for every sale made, giving the salesman's number, the department, the cost price in cipher, and the selling price. For example:—

Salesman No. 2		
Department	Cost	Selling
No. 3	A N	.85

Every morning the office girl hands the proprietor a sheet, showing the sales in each department, with the cost

Mr. Hodges left the shoe game was when he spent a year and a half in the west, from 1912 to October, 1913.

Various members of Mr. Hodges family have been in the same line, extending over a period of 26 years, his father, John Hodges, and his uncle, Frank Turrill, having started business in Aylmer in 1890, removing to Chatham in October, 1892. During the present proprietor's absence, the business was carried on by his aunt, Mrs. Turrill, his uncle having died some eight years ago.

# NEAT BACKGROUND FOR THE SHOE STORE

Simpler Arrangements are Most in Demand—A Utility General Purpose Back and How Constructed—Details of the Framework

THE ingenuity of the window trimmer is always called into requisition. It is demanded that he shall be a designer, a carpenter, a painter, and an artist, a display man and finally a trimmer. To give such a man more assistance by way of suggestion is the object of this article.

Experience has proven that the simpler arrangements of backgrounds are most in demand, take less time and money to construct them. So the one that is easiest to construct is the one that is the most popular.

In the illustration is shown what may be termed a utility or general purpose back. It is made of beaver board tacked on to framework. The size of the framework will be determined by the dimensions of your window. The frame material should be about 3 inches by 7/8 inch dressed stuff. Beaver board is made in the following sizes, 32, 36 and 48 inches wide, and 5, 6, 7, 8, 9 and 10 feet long, any of the lengths may be had in any of the widths. This is a splendid material to use for trimming for it is light and works well and may be cut with saw, chisel or knife, and will take nails or tacks without splitting. There are no knots or uneven surfaces, and it can be painted over and over again and if glue sized and starch paste is used it can also be papered. Starch paste is made exactly the same as starch made for laundry work, but should be thicker.

The background shown is a panel arrangement, and may be made in all one piece or in sections or separate panels. Of the latter then the narrow pieces to cover the joints must be nailed on the same side of each panel. These joint covers should be painted a dark green and the panels cream. Of course, this ground can be used as a general purpose ground but the suggestion as shown is for Christmas. The two boxes are ordinary packing cases of uniform size and can be covered with white material. As the printing on these boxes is usually stamped into the wood a little, they do not paint well, for these pressed-in letters show.

The trees are small evergreens that may be cut in the woods and ordinary pails are used to set them in. These pails should be filled with sand or stones to weight them down and support the trees.

Ribbon bows and festoons may be used at the discretion of the trimmer and, of course, for Christmas the introduc-

tion of snow effects will add to the effect of the decorations.

The easiest way will possibly be the quickest way to make the various joints in your framework. Nos. 1 and 2 are a corner joint with a wood "strap" on it. The two pieces of frame are not cut or checked in any way. No. 3 is a "half check" joint on edge of frame material, while No. 4 is a "half check" in the edge, but requires too much work to be practical. Nos. 2 and 5 are side joints. No. 2 cross piece is just butted against the side piece, and the strap

holds it securely. No. 5 is the same, but the cross piece is half checked into side rail. Nos. 6 and 8 show a splice joint to be used in lengthening a piece. Nos. 7 and 9 show how to use corner braces to strengthen corner joints, also to hold the frame square. The dotted lines show how to drive the nails. Note the "dove tail" position of them.

SUGGESTION for general purpose window background

## NEW METHOD OF DISPLAYING SPRING STYLES

Clark Bros. the First Firm in Canada to Show Samples Artistically Mounted on Mat Board—The Leathers, Colors, Patterns and Combinations Presented in Convenient Form—Only Few Sample Lasts Carried, While the Great Range is Extensive

**B**Y means of the Sample Savings System the special line of new spring models of Clark Bros., Limited, St. Stephen, N.B., are being presented to the trade. Only a dozen sample shoes are exhibited in the interesting and representative range of spring productions, but scores of others are displayed, mounted on mat board. The mountings are in the same leather of which the shoe is made and the stock used for soles, heels, trimmings, etc., is also shown in this novel method of selling. The cards are set up in the sample room with a collapsible support at the back. When packed away the cards are filed in a receptacle on the same principle as important documents in a filing cabinet and occupy but little room.

For many years all lines of furniture have been sold by travelers by means of photographs. The new system of presenting footwear samples is superior to this method, as

sentative and distinctive ever turned out by this progressive firm. Among the new effects is the cavalier bal, which comes in brown and gun metal calf, plum, ivory, brown and green

R. L. SAVAGE, TORONTO, EASTERN REPRESENTATIVE

kid, white and grey buck, white reignskin and canvas with covered wood Louis heels. Many models carry white ivory soles. The new sport last of the company is particularly

GEO. H. FERGUSON, VANCOUVER, WESTERN REPRESENTATIVE

PLUM KID CAVALIER BAL MOUNTED ON MAT BOARD

the shoe is shown in real leather with patterns, colors, perforations and trimmings all complete. The Sample Savings System is located in Haverhill, Mass. The shoe manufacturer using this economical and convenient arrangement furnishes the company with the specifications and patterns of the styles that he desires and supplies the leather. The cards are mounted in an artistic and realistic manner. It is no longer necessary for the traveler to haul hundreds of sample shoes around the country, which means much expense, labor and delay. The only shoes carried by him are a few typical of the different lasts, all the patterns, colors and combinations being strikingly depicted on the cards.

R. L. Savage, of Toronto, is showing the new Clark models in this way in Ontario and Quebec, while the Western Provinces are being covered by George H. Ferguson.

The spring offerings of Clark Bros. are the most repre-

fetching and having a higher heel than usually seen on lasts of this character, possesses both style and comfort.

The sport last carries both plain and wing tips and comes

in all leathers and all widths. There is observed an abundance of perforations, while the pointed recede toe predominates.

In pumps there is an absence of buckles and other ornaments. Straight and wave collars are characteristic of the range and some have small tongues. The low-cuts carry covered wood Louis heels. They come in white and grey buck, plum, ivory, black and other colors in kid and also in white fabrics. The showing of white in both high and low cuts is extremely strong for the coming season. A novelty feature is the art rose embroidered top, in various colors, on the white shoes. High-cut bals are still in the lead, although there is a very fair assortment in buttons. The novel method of presenting the exclusive models of the firm is warmly commended by scores of retailers who are congratulating Clark Bros. on their enterprise and progressiveness.

#### HAS HAD SUCCESSFUL SEASON

The sales force of the Rena Footwear Co., Montreal, has been considerably strengthened by the addition of Mr. Auguste Martineau, who joined their selling staff some months ago. Mr. Martineau, shortly after coming to the firm, selected and introduced a complete change of lasts. The Rena Co. are now showing the latest American designs. Mr. Martineau says that their new lasts have taken exceptionally well in spring selling which has just closed. Mr. Martineau

AUGUSTE MARTINEAU, MONTREAL

needs no introduction as he is well known and popular among the shoe men of the Province of Quebec. He has a fine sample room at 502 St. Catherine street east, where he is always pleased to meet his customers and friends.

#### RUBBERS WILL COST MORE

Along with many other materials and commodities, the cost of production in the rubber boot and overshoe field has increased to such an extent that higher prices will be asked for these goods after January 1st by at least one big manufacturer, the United States Rubber Company. While announcement to this effect has been made by the company, inquiry

#### WHAT SHOE SALESPEOPLE OUGHT TO KNOW

The following excellent summary is printed by the Dry Goods Economist.

How to ascertain the customer's wants by a brief introductory conversation.

Know the different types of feet and the type of shoe that each requires.

Ability to discover quickly the condition of the customer's foot on removing the shoe—detect weakness, corns, bunions, etc.—is a great help in giving satisfaction.

Knowledge of shoe accessories, arch supporters, bunion protectors, foot-powders, etc., will aid you in the above direction and in advising their purchase. For example, a foot with a falling arch will gradually press down the arch in the shoe and the foot will lengthen, so that soon the shoe will become too short, although apparently correctly fitted at the start.

Keep posted as to style and novelty tendencies in men's as well as women's footwear. Such knowledge will often enable you to sell more shoes.

Women's footwear styles depend on the styles in women's dress. Study, therefore, the fashions of the day, with particular reference to the length and width of the skirt and the dominating colors in women's suits, dresses and coats.

Know the different kinds of leathers and their wearing qualities under various conditions, so as to be able to instruct the customer as to the care of the shoe which is purchased.

Be familiar with the various substitutes for leather.

Keep informed as to the conditions which cause price changes.

Letting the customer handle a shoe which is under consideration while you are seeking another pair gives the customer a better chance to decide.

Advise each customer to own at least one pair of trees, as tending to preserve the shape of the shoe, give it greater durability and make it more comfortable to the wearer.

disclosed that it was not yet known just how great the increase would have to be in order to cope with the increased cost of manufacture. It was said, however, that the advance in the finished goods would be substantial and that actual figures would be given out in a statement that probably would be issued this week.

According to the initial announcement, the materials entering the manufacture of rubber footwear show an average increase of 20 per cent. over the corresponding prices in 1915. These materials include rubber, zinc, lamp-black, wool and cotton. In addition, labor costs have increased. European war demands and the difficulty in obtaining freight space in ocean-going steamers are among the reasons cited for the rise in certain materials.

The opinion was expressed in jobbing circles recently that, while current stocks of rubber footwear are lower generally than they have been for many years, if not ever, the advances in prospect probably will not reach the consumer until next year. The jobbers' salesmen, it was said, leave about February 1st with lines of leather and rubber footwear on which they take orders for fall delivery, so until these goods are shipped, their added cost will not be felt by the retail trade.

## GIVING BACK PURCHASE MONEY NOT ADVISABLE

Retailer Who Follows This Plan Opens Wide the Door for All Manner of Trouble and Misrepresentation—Many Persons Abuse the Privilege and This Results in Losses of Sales and Time Spent in Fitting—Merchant Who Has Tried It Speaks

“I WAS an easy mark when I first started in the shoe business. I had worked for some years in a department store, and naturally thought I should follow the same practices that I had been used to when acting as a salesman on the floor,” declared a leading Toronto footwear retailer the other day.

“For about a year I advertised, or rather made it known, that I would refund the money on all purchases and do it cheerfully, and without any questions asked. I soon found that I was being imposed upon, and one day it came to my ears that I was regarded by certain women as a ‘softy.’ Then my ire was aroused—I began to take stock of myself, and find out whether it paid to hand the money back. I have had women call on whom I would spend nearly an hour fitting and serving, and then they would come back next day and say:—“I do not think I want these shoes.” I would say, ‘Well, is there anything wrong with them?’ and the answer would be an evasive one, followed by the question—‘You give the money back, don’t you?’

“‘Oh yes,’ I would reply, ‘I give the money back, but you know that I spent a long time trying to satisfy you, and you were apparently pleased when you went out. What has caused you to change your opinion?’

“‘Oh, never mind that,’ would be the sweet and evasive response. ‘Do you not give the money back?’ Then I would throw up my hands and give in.

### Time Means Money to Retailer

“I never objected so much to handing the money back as I did to the practice of being imposed upon, and to the loss of time in fitting and satisfying a customer. Having gone all through this, one suffers a dead loss on all returned shoes, for time is money, or should be, to the busy shoe retailer.

“Now I refund the money only on one condition, and that is in case the sales slip has printed on it ‘on approval.’

Sometimes people buy for others, or do not care to try on the shoes in the shop, and want to take them home. They pay for them in any event, but in order to give them a measure of freedom, and see that they are not ‘stuck,’ on request we stamp ‘on approval.’ If these words are not on the slip, there is no such a thing as refunding with us nowadays. We will make any exchange desirable, provided we have not moved the buttons or stretched the shoes, or they have not been worn. If they come back to us in as good shape as they left the shop, there is no difficulty in the matter of arranging an exchange.

### The Tales that They Tell

“But I have had people come in with the button holes torn, the lining soiled or the soles marked, and say they were in that condition when they got them. They innocently proclaim that they did not wear the footgear at all. Of course, such parties are fabricators, pure and simple, but you cannot exactly call them by this name to their faces. You simply have to swallow the falsehood, and get out of such transactions as best you can.

“If people want their money back for shoes now after they have bought them, and if there is no approval mark on the slip, I always tell them I will give them their cash less 25 per cent.

“‘What!’ they gasp.

“I inform them again that I will be glad to hand back the sum paid less 25 per cent.

“‘What! You charge me 25 per cent. and you get the shoes back too?’

“‘Oh no, that is not the way to look at it. I am really giving you 25 per cent. to keep the shoes.’

“When they hear my proposition distinctly they generally realize that they can go no further with me, and arrange to take some other pair, or keep the original shoes.

*THE commodious new warehouse of the Canadian Consolidated Rubber Co. which has just been completed in Regina, Sask.*

"If a shoe dealer starts in to give money back, without asking questions, he will be subject to all sorts of annoyances, deceptions and impositions. He never knows when goods are really sold, and in the case of a refund he is out all the time spent on that customer. Possibly when waiting upon such a one at a rush period, he has lost the sale of other shoes, owing to the inability of himself or his staff to attend to the wants of all callers. This is particularly true on a Saturday, or the night before a holiday. We endeavor to fit every one perfectly, and never urge people to buy. We give them every attention and bestow every courtesy. There is no reason why we should refund the money any more than a street car conductor should hand a passenger back a ticket after

it has been dropped in the box, or a moving picture showman rebate the entrance fee if one went inside the door and then suddenly turned around and walked out. Or a person buy a check for a pineapple sundae at the cash desk in a department store and afterwards regret the purchase and request that the dime be refunded. These are only a few examples to show the absurdity of this money back plea which is untenable and unreasonable in the shoe business. It may apply to some kinds of merchandise, but these lines do not require as much time and attention, special care and expert knowledge in serving, fitting and selling as do shoes."

#### SERVICE STATION FOR BUTTON MACHINES

The Independent Button Fastener Machine Co., of Boston, are now in a position to make prompt shipments of their Isbam foot-power button attaching machines. They have opened up a Canadian office at 5 Wellington street east, Toronto, where an experienced machinist is in charge of their service station. This is a feature which will be of great benefit to the shoe retailer, as it does away with the trouble and expense of sending machines back to the United States to be repaired. Prompt service is rendered in the Toronto office of the company.

The Isbam machine will be kept in order free of charge for one year. Machines sent in to be repaired will be attended to and sent back the same day as received, which is a most important feature.

The Isbam button machine is sold outright with 100 coils of wire (100,000 operators) and will be shipped on 30 days' trial. It does perfect work and resets or adjusts quickly the buttons of any kind of shoe.

#### GRATIFYING GROWTH OF KINGSTON FIRM

The Midland Shoe Co., Kingston, Ont., recently removed to a large three-storey building on King street in that city owing to increase in business. They have now over ten thousand square feet of floor space. The commodious

warehouse possesses every facility for quick service and handling of the representative stock carried. On the ground floor are located the offices and sample rooms and there are two fine display windows. The company have been in business since 1906 and their record has been one of steady expansion under F. G. Lockett and his son, G. H. Lockett. Mr. Lockett, Sr., has been in the shoe line for nearly forty years and is in close touch with all branches of the trade. The company carry every range of leather and rubber footwear and have an efficient warehouse and traveling staff. Their branded lines, "Midland Maid" for women and "Midco" for men, are well and favorably known throughout the entire Midland district.

#### AN INTERESTING VISIT TO ALASKA

Mr. Austin A. Briggs, the advertising manager of the Dunlop Tire & Rubber Goods Co., Toronto, recently returned from a very delightful business trip through Canada, including a visit to Alaska. Speaking of his trip to a representative of the SHOE AND LEATHER JOURNAL, Mr. Briggs said that next to the kindness of the Western Canadians, the most outstanding impression upon his mind was the antiquated immigration regulations kept in force by the United States and applied to that territory. The same regulations that existed at the time of the gold rush of 1898 seemed to still prevail. For instance, here are some of the questions that even tourists to Alaska have to answer:—

"Are you an anarchist?"

"Are you a polygamist?"

"Who paid your fare up here?"

"Were you ever an inmate of an almshouse or a house for the insane?"

"Have you \$50?"

"Are you crippled or infirm?"

Mr. Briggs said the people going to Alaska were examined almost like cattle, in the presence of the United States medical inspectors and immigration authorities.

The majority of the people going to Alaska, Mr. Briggs said, are Americans and Western Canadians, the majority of them tourists. Canadians from the East did not seem to have the time, even when they were West, to go to Alaska, though it was well worth while. The best time for a tourist to go to Alaska was in the month of June.

On the visit he renewed his acquaintanceship with the West by touring Vancouver Island by motor car, climbed Pike's Peak, making the journey 15,000 feet above the sea by motor car, visited Soapy Smith's tomb at Skagway, where he added his name to the list of visitors, and imbibed all that western vision enables one to mix talk of automobile tires with icebergs, fish, gold mines and wheat, and make you feel that Canada is a great country of great possibilities and opportunities.

Mr. Briggs paid a tribute to the services of the C.P.R. and the G.T.R., who operate modern boats and obtain the largest part of the traffic. As a Canadian passing through the country, Mr. Briggs had a feeling of regret that the coast line should be American territory and no longer Canadian.

Along the coast line valuable fishing industries were being operated, the majority of the fishermen being Japanese. There did not appear to be much trade possibilities outside fishing and mining. The copper mines in Alaska were fast being developed. The scenery was magnificent, though in some places wild and monotonous.

Mr. Briggs visited the western branches of his company at Victoria, Vancouver, Calgary, Edmonton, Saskatoon, Regina and Winnipeg, and toured the country in the vicinity of the branches to get a grasp of the opportunities for business in their particular lines. As a result of his visit he was quite enthusiastic about their Western Canada organization and the prospects for still bigger business.

## How Shoe Dealer Built National Business

Story of the Coward Shoe as told by "Printers' Ink"—The Way a Down Town "Buck-Eye" Became a Continental Shoe House—Employs Two Hundred and Forty Salesmen, and Disposes of over Ninety Thousand Pairs of Shoes a Month—The Pulling Power of his First Catalogue—An Idea Which Saved the Business Many Years Ago

**M**AIL-ORDER advertising has many successes to its credit, but few are more illuminating than that which has been attained by James S. Coward, one of the largest shoe dealers of New York. Fifty-one years ago he opened a small retail store in which he sold what he called "good sense" shoes that were manufactured by workmen on the premises. His principal customers were the market-men and merchants doing business in the lower end of Manhattan. In time he built up a very fair volume of trade, but later on other shoe stores were opened in the vicinity, the big wholesale Washington Market was moved uptown, the character of the neighborhood changed, and the demand for Coward shoes fell off to a disquieting degree.

It was at this point that Mr. Coward's son, John, a young man with an alert mind and considerable business foresight, happened to run across a catalogue issued by a Western shoe manufacturer for the purpose of selling his product by mail. The catalogue idea immediately appealed to him. Why wouldn't it be a good scheme to get out a similar catalogue to advertise Coward shoes and sell more of them? Young Coward spoke to his father about it. The latter did not believe that publishing a catalogue would help the business, but because of his son's enthusiasm he reluctantly gave his consent. A few thousand copies were printed and distributed in Greater New York, and in the suburban cities. When the printers' bill came in the elder Mr. Coward had to go to the savings bank for the money with which to pay it. "You have nearly broken your father," he said to John, reprovingly, and the latter felt so hurt that that night when he went to his room he cried.

The result of the catalogue advertising is best told by John himself:

### Met Them While Going to Dinner

"The second day after they were mailed, father and I were going to lunch, together as usual, leaving a clerk to 'tend store.' Within a block I spotted a woman coming toward us reading our little red-covered booklet. She stopped us and asked if we could direct her to Number 270. I showed her the way. Then a man asked us the same question, though he was not reading the booklet. Before we reached our eating-place, another woman wanted to be 'shown,' and thereupon I told father to go and have his dinner—that I was going back to the store.

"When I arrived, I found the place crowded, every chair filled, and several were standing around waiting. I called the men from the benches upstairs—aprons and all—stripped off my coat, and we all got busy. That showed us what advertising

would do—and it was the beginning of the growth of this business."

This was the first experience the Cowards had had with real advertising, and it was so satisfactory that they saw in it a means for extending the business and making it a great success. The trade brought to the store by the first catalogue increased from week to week. More clerks were hired, and more shoemakers were put to work at the benches upstairs over the store.

Mr. Coward's first newspaper advertising appeared in the Staats-Zeitung, and this was how it happened: The Ridder family, of which Herman, who afterward became editor of that newspaper, was a member, lived "hard by" the store and bought shoes there for many years. When Herman asked him to advertise in his paper Mr. Coward did so more out of friendship than anything else. But the results were so good that other foreign-language papers were taken on to catch the polyglot population of the district adjacent to the store, and which included Greeks, Italians, Turks, Armenians, Chinese, Syrians, Arabs and Jews. After those the English newspapers, both morning and evening, were employed.

### Seemed to Large to Undertake

The local and suburban advertising met with such a gratifying response that the desirability of entering the national field became apparent. A large shoe factory had been erected in Brooklyn with sufficient capacity to take care of a much greater volume of business than the store was then handling. Mr. Coward had no desire to sell shoes at wholesale, preferring to confine his activities to the retail and mail-order trade. The national advertising field seemed so large and intangible that for a long time he hesitated, but at length took the plunge in 1896 with a fifty-line ad, single column, in the Ladies' Home Journal. Simultaneously, he added to his catalogue directions for ordering shoes by mail. All charges were to be borne by the customer, even to the return charges when goods were to be exchanged.

Concerning the effect of national advertising on his mail-order business, James Coward said:

"We had developed a kind of system for filling mail orders before we started national advertising, by assigning that work to a few of our older salesmen. They filled the mail orders in the leisure intervals between waiting on trade. But when the Ladies' Home Journal ad bit—as it did right suddenly—we were completely at sea for a time. Orders piled up unfilled and got mixed so that some

were badly delayed, and we were utterly unable to cope with the rush of business.

"Very promptly, therefore, we had to organize a mail-order department, devoting special employees to it. For a time, we did not segregate the stock, but sold right off the shelves. But soon we found that impracticable, because our shelves require constant replenishing for store trade alone. So we set up a duplicate store, fully stocked, on the second floor; and mail orders are filled there.

"We insure correctness by fixing responsibility, fining the careless, and passing the amount of the fine to the careful as a reward. The wrapping clerks naturally have an intimate knowledge of the stock. Errors are graded and draw various penalties. The heaviest is 25 cents, for sending out mismatched shoes; the lightest is 5 cents, for an error in directing a package. The fine is paid over to the one who discovers the mistake.

"One of the most important of the employees in the mail-order department is the young woman who handles the postage stamps. We use as high as \$500 worth a day—sometimes more. All our stamps are cancelled by the Post-Office before being delivered to us. The girls puts the proper amount on each package and as she does so checks the address.

#### Girl Who Cannot be Replaced

"Long practice has enabled her to develop an almost uncanny knowledge of names and addresses and post-offices over the entire country. She knows unerringly an incredible number of our customers and where they live. Besides that, she is able to check hundreds of parcels wrongly addressed to new people by her knowledge of post-offices. She has a guide on her lap all the time, and refers to it constantly, but many packages are caught simply because the addresses do not look good to her.

"In every department of the business we have understudies ready to take the job 'higher up' on any vacancy; but I am frank to say that were this girl to leave or get married, we'd be up against it for a while. It would require not less than three fairly competent people to fill her job at the start-off.

"We carefully enter in our card-index every name, address, style of shoe, etc., so that we can duplicate orders or send the right sizes of new styles desired, without trouble. We have hundreds of special individual lasts which are tabulated in the same way. Our mailing package is substantial, but plain, and costs 4½ cents."

One effect of the national advertising was to compel the Coward store to carry many more lines and styles of shoes than formerly. The common-sense shoes, with which the business was started, are still manufactured and sold in large numbers, but they are only one out of hundreds of styles that are popular with the firm's customers. During the Spanish war a government official in Washington who picked up one of the Coward catalogues was so impressed by the description of the common-sense shoe that he purchased every pair in stock, \$10,000 worth, for the use of soldiers.

Mr. Coward employs 240 salesmen in his

Greenwich street store, where he carries a stock of 600,000 pairs of shoes. The sales in the mail-order department alone will average 1,000 pairs a day. When asked whether he was not liable to be caught long on some lines that suddenly lose their popularity and go out of fashion, Mr. Coward replied:

"We are mostly immune from style disturbance. We manufacture all our stock, can keep supplies close to requirements, can put through a hundred, or a thousand, or ten thousand shoes of any kind or assortment on an order. We keep close-hauled on fad shoes, and generally have no trouble in sensing the decadence of a fad shape within a month of its death. And, with sales of 91,000 pairs of shoes a month, thirty days notice is about all we require. We control our mail-order demands by our advertising. For a large percentage of our ads feature one style, last, or character of shoe. The orders we receive run mostly to that kind of a shoe."

The mail-order department was still young when customers began asking Coward to send them a box of stockings with a pair of shoes. This suggested the advisability of expanding the stock into "everything for the feet," which is the present idea. The primary step was to arrange for specially woven hose for men, women and children, which should be distinctive of the store. So the hose was made "foot-form", broad of toe, on the "orthopedic" order. The sales-argument is that stockings are as important as shoes for foot-comfort.

It was obvious immediately that every additional item Coward could sell to the same customers would add to the net profits from the mail-orders, so he has extended his lines until now they include his own make of insoles, foot powder, shoe oil, leather dressings, corn cure, shoe forms, and many other specialties. It is interesting to note what war conditions have done to some ingredient costs—salicylic acid for example, which costs 25 cents in normal times, but just now is worth around \$9 the pound.

#### Did Not Want Chain of Stores

As the business has grown from year to year Mr. Coward has been asked many times why he did not establish a chain of retail stores throughout the country. His reply is interesting.

"For two reasons. We believe in the unit system; and we make our shoes entirely for the consumer—there is no room for an additional profit in them. We know that retailers everywhere want the Coward agency, for we get requests for it constantly. Hundreds of retailers have used our name—sometimes innocent of wrongful intention, but not always. A few have imprinted our name on their lasts, and we have had to go after them. That is why we have all these signs about the store and print warnings in our catalogue ringing changes on the theme that 'Coward Has No Agents' and 'Sells Only in This One Store.'

The first advertising appropriation made by Mr. Coward was \$300, and was given to W. H. H. Hull & Co., advertising agents, who have handled the firm's advertising ever since. The amount invested annually for several years has been about \$80,000.

# With the Shoe Manufacturers

Pithy Note and Comment on Shoe Matters—What the Makers of Shoes are Saying and Doing—Shoe Facts and Fancies

**R**EGORANIZATION of the Perth Shoe Co. is now completed and the plant is exceptionally busy turning out daily 600 pairs of women's high class Goodyear welts. The factory is 45 x 220 feet, well lighted, admirably appointed and splendidly located. The new president of the reorganized company is J. A. Stewart. W. E. Danner is vice-president, T. J. Maher, secretary and H. A. O'Donnell, treasurer. G. H. Ansley is the general manager and M. J. Sheehy is the superintendent. The superior lines now turned out by the company are meeting with instant favor in all the leading shoe centres of the Dominion. For the first two months of the present selling season the volume of business booked was as large as during the whole of the last year. This fact sets forth convincingly the prestige and popularity of the company's distinctive and attractive offerings in women's welts in which the Perth Shoe Co. specializes exclusively.

## THE QUALITY OF THE LINING

A writer in one of the shoe trade papers claims to have seen boys' welt shoes with double linings to hold the foot in shape. He also claims that upper leather that is backed will not stretch much, and in that case the lining could be of cheaper quality, or no lining at all may then be practical. These are somewhat peculiar ideas.

Now, if you back the shoe, which means the attaching of adhesive backing cloth, which would be the best method, and don't put any lining into it, the backing cloth shows on the inside of the shoe. It does not come clear to the edges of the shoe usually, and makes a funny looking shoe inside.

Furthermore, this backing cloth is light weight usually, and one would soon wear through it into the gutta percha. It is not the intention of backing cloth to remove the necessity for linings, but merely to strengthen the weak or stretchy portions of the leather so they will correspond with the best portions of the leather.

If one puts a weak lining into a shoe because it is backed, he has a lining that will soon wear out, and everybody knows what a mean thing a worn-out lining is in a shoe. The better the quality of the linings the better the shoes. Put in a good drill or duck sufficient to help hold the shoes in shape, and give the wearer a run for his money.

## MEN'S FACTORIES TURNING TO CUT SOLES

There are more sole leather rooms using cut soles today than at any time in the history of the trade. This means men's as well as women's rooms. The women's shops have been using cut soles for a long time and slowly, but surely, the men's are following suit.

This is noticed now in many shops and it is becoming the rule in factories where all shoes are in high priced welts as well as in shops where both welts and McKays are made and in several different grades at that.

In one big shop on men's they were cutting sole leather all the time down to some two years or so ago, when they began to buy a cut sole and they have continued to use such a sole ever since. The output in this plant is some 2,400 pairs of men's welt shoes per day, ranging in price, at retail, from \$5 to \$7 per pair.

With all of the experience behind them they have found that it is best to buy and use cut soles. These soles cost a lot of money and the chances are that they will cost still more in the future, but this will make no difference as the relative cost will be the same and the same reason that forces them to buy soles instead of leather will continue.

It is a curious fact that all of the sole leather foremen are not agreed that it is best for the factory to use a cut sole and this is often the case right in the shops where all cut soles are used. In fact there is just as much difference of opinion among foremen, in this matter, as there is between the manufacturers themselves.

## VARIANCE IN LIMBS AND IN SHOES

The left leg is a trifle longer than the right leg and for that reason the body is bound to imperceptibly move toward the right. As a matter of fact, it is nearly impossible for a person to walk in a straight line for a long distance, as invariably the tendency will be to move toward the right. That is the reason why most everybody will choose between two roads the one at the right side. But what has this fact to do with shoemaking?

At the setting of the tip seam on the last, lasters will swing the tip beam on the left last toward the inside, while on the right last the tip seam will be swung and set toward the outside. The writer has been a laster for several years and, although he has never believed in so doing, he has seen it done so often by first-class lasters that he is forced to believe that the difference in the length of the legs may have something to do with the theory that the left foot tends to turn the tip seam toward the outside, while the contrary happens with the right foot, and that it may be well to set the tip seam as above explained in view of counteracting this tendency.

Let us consider still further the difference in shoemaking, whether or not it relates to the difference in the length of the legs between the operations on the left and right shoe. Take the welt sewing machine and it is a fact that the left shoe will be lasted in tighter by the welt guide than the right shoe, simply because the long shank is sewed in first on the left shoe, and a tack should be left in the middle of the outside shank on the left shoe to withstand the strain from the opposite side when the welt guide strikes the shoe and forces the entire upper to move toward the inside.

This variance in tightening the upper of a welt shoe on the last may account for the theory that the left foot is larger than the right foot—due to the fact that the left shoe is always smaller and tighter on the foot. The right shoe, in all makes is generally made better in all the details than the left shoe and it is difficult to explain the reason for this difference in shoemaking results. It is thought by some shoemakers that if the right shoes were all made by one operator and all the left by another better final results could be obtained. That system at lasting has been tried and it was found that the left shoes were not as well made as the right shoes. It is because we are partial to the use of the right hand and of the right foot.

A notable example of this is found at wiping toes—the toes of the right shoes are always wiped in better and easier perhaps than the toes of the left shoes. In testing this theory

Montreal

Toronto

do not tell the operator beforehand, as he will put in extra work on the left shoes. The idea is to have shoemakers pay special attention to left shoes and see to it that they favorably compare with the right shoes.

It is impossible to have exact uniformity in all shoes and even in a single pair of shoes. In making a boat the sides can never be shaped exactly alike and it is important that both sides be alike. In shoemaking uniformity in the same pair of shoes is of prime importance but very difficult to have. Machines do not operate equally well on right and left shoes and, as before stated, workmen for some unaccountable reason do not get the same results on left shoes that they do get on right shoes.

Uniformity is specially desirable at the toe and the toe part is the most difficult part to construct in any and all kinds of shoes—but more so in welts than in any other kind.—American Shoemaking.

#### BLACKINGS ARE VERY EXPENSIVE

Manufacturers of shoe blackings and stains have their troubles today with the high cost of raw materials, as well as other people. One blacking man recently said they had orders on their books for 300 barrels of blacking, but could not fill the orders because they didn't have the raw stuff. He said it was hard to get color from the dye houses; that recently he received 100 pounds of color, enough for about four barrels of blacking, a mere drop in the bucket.

Nigrosine, one of the most important materials in making blackings, like other coal tar products, is very high and scarce. It sold for 25 cents a pound before the war but now users have to pay \$1.50 a pound. Blacking manufacturers who have long time contracts with the dye houses, secure colors for 90 cents or \$1.00 that sell for \$1.50 in the

open market. Another advance of 25 per cent. is probable about January 1st. Shoe manufacturers are paying 50 cents more per gallon for blacking for heels and edges of soles than before the war.

There are many rumors in circulation at present about a trust controlling all dyes in the United States after the war. It is said that 90 per cent. of the aniline salts and oils are so controlled.

#### COMPARING THE PRICE OF SHOES

It is often laughable to hear manufacturers rave when they are comparing prices with other factories. It is said that "figures do not lie." Perhaps they do not, but if all conditions are taken into consideration there may be enough difference to make one think that figures alone do not tell the story, or that figures alone may be very misleading. When comparing wages of workmen, the conditions of living must also be considered.

For instance, it is a well-known fact that workmen in similar lines of trade in Europe get much less than men in this country. But if commodity prices are also considered it will be found that difference between income and outgo is not as big as comparison of wages. Of course, men in this country live much better, while over there, although a man may get much less, he can live like his fellow-workmen for much less also.

For instance, the question of rent is different. Many workmen in this country pay \$18 or more per month and with the wages they get they can well afford to do so. What workman in the old countries would ever think of paying that much rent.

Sometime ago I read where an American manufacturer was decrying the fact that American manufacturers pay

twice as much as they do in England. No doubt this was true, but it costs twice as much to live in this country as it does over there.

I can well remember one time a shoe manufacturer complaining about his having to pay  $4\frac{1}{2}$  cents a pair for cutting certain shoes when in a nearby town they were only paying four cents for the same thing. It was suggested to him that before taking it up with his cutters he get all the facts. He did this and found that he paid four and a half cents for cutting the entire shoe while in the other town they paid four cents for the upper, one half cent for tips and one half cent for backstays. Therefore, considering all, he had his cutting done as cheap or cheaper than in the other town.

#### NOW OPERATING FOUR TANNERIES

The Breithaupt Leather Co., Limited, of Kitchener, Ont., have taken over the plant of the Hamilton Oak Tanning Co., at Woodstock, Ont., and have commenced operations in that city. With this addition the Breithaupt Co. are now operating four sole leather plants—Penetang, where the "Penetang" hemlock sole leather is made; Hastings, where "Trent Valley" oak is produced; Kitchener, where "Eagle," "Kitchener" and "Lion Oak" are turned out and Woodstock, with "Royal Oak." The new acquisition to the properties of the company is a large brick building admirably suited for the business. The number of employees in Woodstock will be increased and the finest quality oak sole leather will be tanned. The Breithaupt Leather Co. manufacture a complete line of sole leather and, with their added facilities, are able to supply shoe manufacturers, jobbers and retailers with anything required in bottom stock. The company report that they are very busy.

#### WILL ELIMINATE THE SQUEAK

The application of a good coat of chalk to the inner and outsoles is said to eliminate the squeak from McKay shoes. The squeaking is caused by the friction between the outer and inner soles and the thinner and poorer the filler the louder will be the squeak. From experiment it is found that a thin layer of felt will accomplish the same result, but it is more costly.

#### THE RECEPTION MANAGER

Just the other day I had occasion to visit the main office in Boston of a large shoe manufacturing concern which operates several factories.

I went there in search of a man in authority, with whom I had business to transact.

As I went into the outer waiting room I was confronted not by a girl chewing gum and checking numbers, who wanted to know "what I wanted to see him about," but by a fine looking gray haired man who came over to me with a smile on his face asking me how he could serve me.

When I gave him the name of the party I wished to see, he opened the door of the inner waiting room for me, saying: "Come in and I will help you find him."

Then when I was seated he went and found the man for me and brought him to the office.

More and more as I go about I find the Reception Manager taking the place of the office boy and of the girl at the window, especially in other lines of business.

This new official of big business is an encyclopaedia of the business, a diplomat, an artist.

The standard on which The Reception Manager works is that no person shall be met in such a manner that he will go away feeling resentment against the house.

I believe that this modern departure means real money and real success for the firms making the innovation.

Many a high-class salesman or well paid executive finds it necessary to visit shoe factory offices and the reception which they sometimes meet there is an insult to able men.

Such men cannot help but feel antagonistic to the house even though they may disguise their real feelings.

But it pays to have every man pulling for you. It never pays to stimulate hatred.—American Shoemaking.

## NOTHING TOO GOOD FOR CANADIANS

**Commodore C. G. Marlatt who has Returned from England, Speaks of Confidence Everywhere in Evidence of Final Success of the Allies—The Leather Outlook**

MR. C. G. Marlatt, of Oakville, Ont., has just returned from a visit to the Old Land. His principal object was to meet his son, Capt. Kenneth Marlatt, of the Mounted Rifles, who was on a two weeks' furlough to London. Capt. Marlatt has gone through his fourteen months of service on the firing line without a scratch, and with the exception of the general sobering influence of the strenuous conditions at the front, he remains as bright and unchanged as ever. "He is emphatic," said Mr. Marlatt, "in his statement that the British absolutely dominate the air."

Mr. Marlatt, of course, spent most of his time in the old land with his son, and his visit was very largely personal. Nevertheless, he had abundant opportunity for observing conditions generally while there. He says that two things stand out pre-eminently, first of all the absolute confidence animating everyone that we are going to win this war. No one, he says, has the slightest shadow of a doubt or the least wavering of purpose in regard to this.

The other thing that strikes everyone is the fact that nothing is too good for Canada. Again and again Mr. Marlatt and his son had that demonstrated to them in the most practical way, for everybody in the Motherland appreciates Canada's effort to stand by the Empire in her hour of peril.

Mr. Marlatt talked most interestingly of conditions in London where, he says, that an absence of the former evidence of poverty and discontent is absolutely wanting. London is a strange city as compared with three or four years ago, both during the day and in the night, but especially at night sessions, when it is practically in Egyptian darkness. The Oakville manufacturer tells of an incident while he was stopping some distance outside the city proper. Someone came around when he was retiring and called his attention to the fact that there was a light showing his curtains and explained that there was a fine of £50 sterling should the police happen along.

Leather conditions are thoroughly mixed. The Government has practically commandeered everything necessary for the production of footwear and this has left shoe manufacturers in a most awkward predicament with regard to supplying the needs of the ordinary consumer. Mr. Marlatt was struck, however, with the wonderful system that was evident in this and in all other matters in which there is Government control. To his mind England is learning a lesson of exactness and precision from this war that was perhaps needed. He had an opportunity of investigating one of the large munition plants and was struck with the tremendous production and care with which orders of the Government are being carried out. Mr. Marlatt, who is commodore of the Royal Canadian Yacht Club, Toronto, was interviewed by a New York Herald reporter regarding the Canadian attitude in connection with the war. The Herald, in large headlines, communicated his opinion, which is that Canada is with England in this war to the finish. Mr. Marlatt brought home a considerable number of war trophies from the battlefield.

## LEATHER STOCKS VERY LOW

As a result of the foreign and domestic demand for leather there are no stocks of any size on hand anywhere in this country, says a despatch from Boston. Leather is being used up as fast as it comes through the tanneries. Domestic business, with the active conditions in the shoe industry, is overshadowing foreign business.

There are rumors of a purchase of leather in Boston by representatives of the Allies, aggregating about \$600,000. For the most part, however, no large quantities of leather are available for sale in any such quantity as the big Russian transaction, aggregating 750,000 sides, valued at about \$8,500,000 some weeks ago. Tanners and dealers are unwilling to contract far ahead, in view of the present hide market and the possibility that leather may advance further in price.

The United States continues to ship leather in large volume abroad, particularly to England and Russia, and purchases are going on all the time.

## WHY SHOES AND LEATHER ARE SO DEAR

F. C. Sherriff, 1122 Cook street, Victoria, B.C., writing to the press in that city says, "For several years before war was declared leather was getting scarcer, and prices going higher. The reason was the demand had outgrown the supply. When war was declared leather became a serious question; in fact, it became nothing less than munitions of war, as boots and equipment were just as necessary as rifles. In normal times we did not feel the strain on leather, but, owing to the enormous amount wanted for war, all stocks have gone. Then again, cost of labor in the tan yard has gone up from \$2 to \$9 per week. Tanning materials have also more than doubled in cost. Freight and insurance have gone up to unheard of rates, making leather scarcer and prices higher than ever known in history. But it is not the

present price of leather, boots, etc., oak sole leather being near the one dollar per pound mark. The question is how many dollars per pound we will have to pay if the present struggle lasts. Although if the war ended at once we cannot hope for any release in price, as it will take from ten to fifteen years to get back to normal conditions. We have only just begun to feel the pressure here in Canada and United States of America. And all the stocks are now depleted when now we require the largest amount. The British Government require 64,000,000 hides per year, also 200,000,000 pairs of army boots are needed per annum.

"As regards the general public, they cannot expect cheap boots or leather for a long time to come. In Canada the bootmakers and repairers have formed associations to help them fight the high price of leather, as they must have an increase for their material and labor, or go out of business. Shoe repairers all over the country are waking up to the fact that at present prices for leather and supplies it is impossible for them to do repairing at the old prices, and are consequently raising their rates. This is usually best accomplished by intelligent co-operation with other repair men, and many associations have been formed in Canada during the past few months."

## WHEN MR. PRICE AND MISS STYLE MEET

When Mr. Price and Miss Style meet nowadays, there's nothing to it, as they say over on the Bowery. It's all Mr. Price, says H. N. Lape, in the "Shoe Retailer." He dominates the situation like some of our professional office-holders, and you simply cannot overlook him or underestimate his importance. Price is "It," and with a capital letter, if you please. All else seems to be playing second fiddle in the orchestra of shoedom.

Prices have been going up like a Fokker aeroplane. They are still going—and I want to say that it does not re-

quire the seventh son of a seventh son to venture the prediction that they are going to continue to go up, up, up. This will probably continue until people who may be kicking to-day about "high prices," will look back to the fall of 1916 and sigh for the inexpensive footwear they got in those "dear old days."

There's no question in my mind that shoes will undergo another advance of 50 cents a pair by the first of the year—and that's not so very far away, either. You know there are a lot of angles to this rising cost question, some of which do not seem to be very well understood by the public. They've been told a good many things about the shortage of leather and its high price, but not many appear to reckon with the important factor of shortage of labor and mighty high prices for what labor the manufacturer can get.

The fact is that the various munitions factories have taken over a large supply of the tanners' employes, leaving them very much in the "soup." Why? Because the tanner cannot even think of meeting the exorbitant wages being paid by the munitions manufacturer.

And so the tanners must suffer—the shoe manufacturers in turn—the retailers in their turn and last, but by no means least, the much maligned consumer. But we shouldn't worry about what we are forced to do to the con-

sumer. Remember what manufacturers in other lines are doing to us—for you know that you and I are consumers for the things that we do not make or handle.

The fact remains that the munitions men are paying \$50 per week to the same employes who used to get \$15 from the tanners. As a result some tanners refuse positively to take any more orders, because they cannot procure the labor. A big advance came last week in kid and also sole leather. The only conclusion I can reach is to make the best of things and be as happy as the law allows. Forget yesterday and yesterday's conditions; live to-day, but as a gentle hint, keep a weather eye peeled for to-morrow.

**ALL TENNIS LINES ADVANCED**

A new price list has gone into effect on all lines of outing shoes. There is an average increase of ten cents a pair on men's, boys' and women's tennis shoes and five cents a pair on youths', misses' and children's. On an ordinary bill of goods it is figured that the advance will average about eight per cent. Since the placing season opened on September 1st, there has been a remarkably large business done, far ahead of other years. The coming summer will, according to all indications, witness the greatest trade ever in sporting footwear.

# Early Ontario Leather History

## The Province Always Pre-Eminent as a Leather Producing Centre—Sketch of One of the Oldest Tanneries in the Dominion—A Celebrated Character

ONTARIO has always maintained its position as a leather centre. Its almost inexhaustible supply of tan bark and its abundance of good water made the tanning of leather a matter of course, even before the facilities provided by machinery and steam lent their aid to make it the banner leather province of the Dominion.

Towards the end of the eighteenth century and early in the nineteenth, there were scattered here and there throughout the wilds of what was then called Upper Canada small establishments that in a crude way supplied the needs of the inhabitants in the matter of foot coverings. When that which the immigrants brought with them from older lands was worn out a great many of them had to be content with home made tannages of leather that while answering the purpose, did not have the appearance or suppleness of stock made later, or at the large centres.

It was not until after the first quarter of the nineteenth century that real tanneries appeared on the principal settlements such as York, Kingston, London, Hamilton and smaller places. Naturally two or three sprang up about York, (now Toronto), both in the town and on Yonge street, as that highway was opened up into the northern wilds.

### Tanning One Hundred Years Ago

The earliest mention of Toronto dates as far back as the year 1686, and is found in a communication from the French Governor of that time, de Denonville, to his Sovereign, the King of France. The name Toronto was for many years, it is supposed, given to the whole district stretching as far back as what is now known as Lake Simcoe, then called Toronto Lake. Years later the French built a fort called Rouillé, near where our Ex-

hibition grounds now stand, and this point formed for a long time a link in the long chain of forts reaching from the mouth of the St. Lawrence to the

Mississippi. In the year 1793, some years after Canada had come into the possession of the English, the name was changed to York in honor of the son of George III., Frederic of York. It was again altered to Toronto by Act of Parliament of Upper Canada in the year 1834, when the town was finally incorporated.

Toronto was early associated with the manufacture of leather. About the close of the eighteenth century the wants of the inhabitants of this section of Canada, in regard to foot covering, were being but indifferently met by two small tanneries, one about eight miles up Yonge street at Hog's Hollow, and another recently built upon what was then a short road running off Yonge street, called Newgate, (now Adelaide street). The tannery at Hog's Hollow was run by Seneca Ketchum, who emigrated here from New York State. About the year 1800, his brother Jesse, also crossed the border and engaged with him in the tanning industry. Upon the death of Seneca, Jesse Ketchum succeeded to the ownership of the tannery. About the year 1812, at the outbreak of the American war, he moved into the town, purchasing the tannery on Newgate street, then in a dilapidated condition. This, with the surrounding premises, reaching half way to King street from Newgate street on Yonge, and along Newgate street for a considerable distance, gave

JESSE KETCHUM TANNERY AND HOME, TORONTO, 1834

him an excellent position for a business which he commenced at once to establish.

He purchased for a nominal sum other large tracts of land in the town of York, some of the owners being aliens and fearing the result of the war just begun with the United States. It was thus that we find him the owner of the whole block of land bounded by what are now respectively Yonge, Queen, Bay and Adelaide streets, besides large blocks on what is now Victoria street, Yorkville, and Yonge street south of King street.

Upon the north-west corner of Yonge and Newgate (Adelaide) streets he erected a fine residence, considered so at least in those days, built as shown in the illustration, somewhat after the American

shop, where busy hands were blacking and polishing the tanned leather of various sorts. The further end of the main building and immediately next to the currying shop were the beam house and vats, the the entrance to the tan yard. At this end of tannery was small addition at the farther end being the lime house, where the hides were unhaired.

The building was a long, storey-and-a-half frame one, the upper portion being used for the purpose of drying hair and leather. For some time this modest establishment amply met the requirements of the limited trade in leather, all grades of sole, upper, harness, sheep, hogskins and bridle leather being made. It was soon found that an extension was necessary, and outside vats were

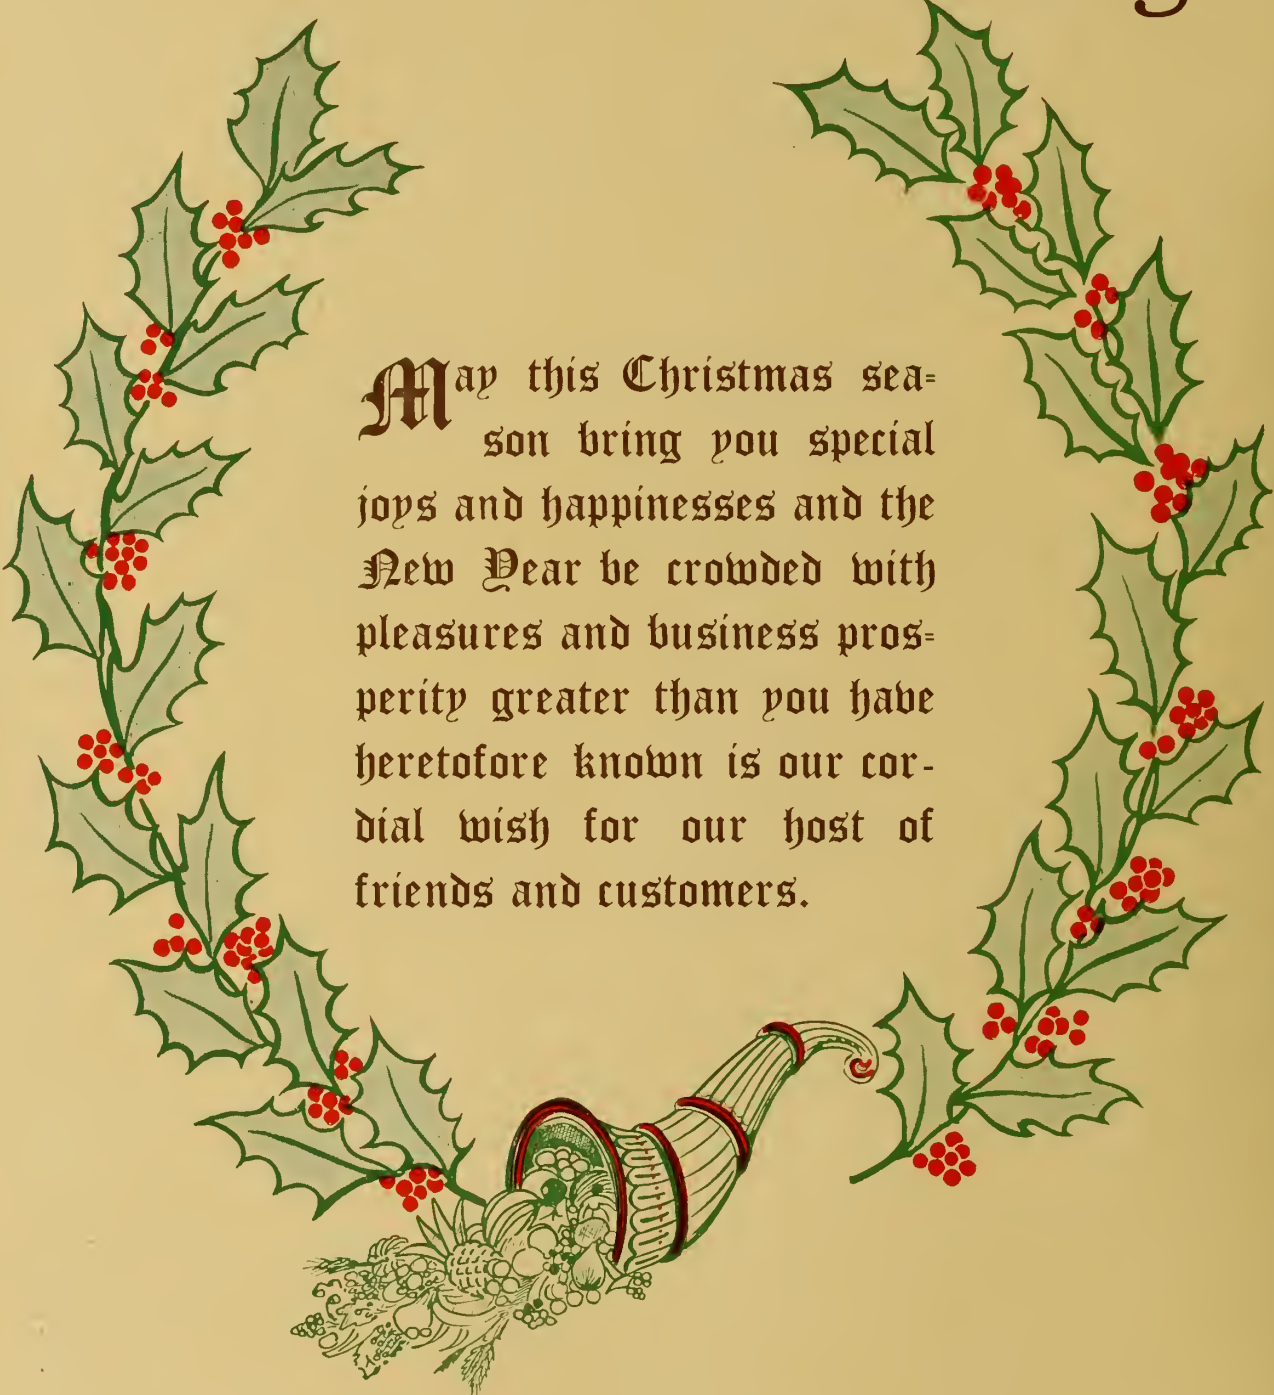

VIEW OF TORONTO, 1889

style, with large windows and turret roof. Flush with Yonge street, it stood back a few feet from Newgate street, a neat picket fence enclosing the steps and front. Immediately west of the residence on Newgate street, was the tannery office and leather store combined, a long, low, brick building, where the finished product was wholesaled and retailed, and where most of the business of the concern was transacted. Back from Yonge street, close to where Temperance street now runs, was the large barn, latterly used as a hide house, with the wash house to the left towards Newgate street and slightly in the rear. Another frame barn stood farther back, almost in a line with the front one.

The tannery stood on the opposite side of Newgate street, commencing a short distance from Yonge street and running about a hundred feet or more west. The building was somewhat neglected when it came into Mr. Ketchum's possession in 1812, but he succeeded in putting it into good repair in a short time, and soon did a good trade. Upon the south-west corner of Yonge and Newgate streets stood the huge piles of tan-bark, rising above the high board fence and extending half way to King street. Between the tan-bark and the end of the tannery stood a wide gate, through which was the bark mill, a square compartment, where the bark was prepared for the tan pits. Through the small window the youth of the thriving town of York used to watch the four horses go their weary round cutting up the bark, while the cheery voice of the little Welshman Owen stirred their lagging pace. Next to the bark mill was the currying and finishing

built immediately in the rear of the tannery proper. These were used in summer, and late in the fall up to Christmas they were stocked with sole hides placed in alternate layers of bark and hides, securely covered and protected, and left till spring to be opened. St. Patrick's Day was usually the time set apart for the breaking of the vats and resurrection of the sole leather, which usually came forth in prime condition. The sole leather of Jesse Ketchum's tannery earned a great reputation in the early days of York. Notwithstanding the sobriquet of "wet leather" that used to be commonly given to Jesse Ketchum, his stock was always regarded as prime and of good value. Some amusing instances are related of the extraordinary demand there was for his leather, especially later in the history of the tannery, and more particularly during the years of the Rebellion (1837-8). At that time much of the shoemaking was of a "house-to-house" nature. The Knight of St. Crispin made arrangements with farmers and others to spend a few days with them for the purpose of doing their making and mending. On one occasion, it is related, an anxious farmer secured a side of Jesse's best sole and took it away in his ox cart. As the shoemaker was about two weeks longer in reaching him than was originally promised, he had the leather hung up in his kitchen. A remark as to the weight of the side brought from the man of shoes the assertion that it did not weigh so much as the farmer said. On weighing it was found to be six or seven pounds short. When the farmer on his next visit to the capital complained, Jesse, with a twinkle in

# Christmas Greetings

Minister Myles Shoe Company  
Toronto Limited

his eye, remarked that he ought to have left it with him two weeks longer and saved shrinkage. In course of time the increase of business made it necessary to extend the premises still further, and additional outside vats were added to rear of the

E. J. DAVIS, M.P.P., KING HORN, 1889

last building. Further accommodation for the carriers was also sought in buildings facing Yonge street at the rear of the property for a while.

The tannery when in full running order gave employment to an average of twenty men, which was considered no small complement a hundred years ago.

#### Early Days of the Trade

About the year 1850 the late Louis Breithaupt, who was then a young man living in Buffalo, made a visit to Berlin, now Kitchener. He fell in love with the then village and one of its most attractive maidens. In 1857 he built a tannery in Kitchener and started to make various kinds of leather. Louis J. and J. C. Breithaupt, present heads of the Breithaupt Leather Company, are sons of the founder, Louis Breithaupt, who had first launched a retail leather store. American sole leather was the principal product sold by him, there being free trade at the time, and out of this retail establishment grew the tannery. Louis Breithaupt made leather in the good old-fashioned way and the demand for his product grew steadily. It was not long before better buildings had to be provided and more yard room. From this humble beginning the present extensive plant and premises of the Breithaupt Leather Company developed. Some years later when they realized that their Berlin plant was being taxed to its utmost and the question of bark supply had become urgent they purchased a property at Penetanguishene, where 800 sides of sole leather are turned out a day. Later a plant was secured at Hastings and very recently another at Penetang.

#### Tanneries on Yonge Street

It was about 1856 that John Davis, grandfather of Hon. E. J. Davis, president of the Davis Leather

Co., Newmarket, and A. Davis & Son, Kingston, had a small tannery on Yonge street, opposite the old time Finche's Hotel. His grandfather on his mother's side, Elihu Pease, also had a tannery a little further south on Yonge street, opposite what was known as the Golden Lion Hotel. Naturally, these establishments were small and crude, and some years later Elihu Pease, in his travels through the country, found the township of King had excellent forests for hemlock bark. He conceived the idea of building a tannery out in the woods on a branch of the Humber, at a place called King Horn. This name was given to it after the tannery was erected. In this tannery, which was small, as were all manufacturing places at that time, water power was used. Elihu's son, Edward Pease, was placed in charge of this tannery. He sold it to Andrew Davis, father of E. J. Davis, and the latter became a partner in the small business when he attained his majority. Later on, when Andrew Davis retired, E. J. Davis became sole proprietor. Additions were made from time to time, until in 1903 it was destroyed by fire and a plant at Kingston was purchased as a going concern, having been run up to that time by a Mr. Carrington. From this purchase, A. Davis & Sons' plant has developed to its present proportions. In 1904 the tannery at Newmarket was erected for tanning calfskins alone. Forty-six acres of land were acquired by the company and in the course of the past eleven years a modern plant in concrete has been erected, which is a credit not only to Newmarket but to the tanning industry of Can-

THE LATE S. D. MARLATT, OAKVILLE, ONT.

ada. Two hundred men are employed and the tannery has been in operation full staff right along. The Newmarket concern is a separate business from that in Kingston, having a charter of its own. Hon. E. J. Davis is president; Aubrey Davis, vice-president; Andrew J. Davis, general manager; E. J. Davis, jr., superintendent of the works.

# A Word of Thanks

In the past year of strenuous shoemaking the poet's wild query, "Do you know the reason why?" has given place to "Can you tell us when?"

This is the burden of every mail, and the shorter the supply of leather and men the more insistent the cry becomes.

We desire to thank the many handlers and sellers of WESTON SHOES for their kind forbearance, and to assure them that we have left no stone unturned in order to meet this most extraordinary condition. All that the utmost of method and equipment can do to meet the unprecedented demand for WESTON SHOES is being done, and will be done.

In the meantime, we desire to extend to our many friends and customers our

Heartiest  
Holiday  
Greetings

with the hope that the New Year may bring brightness and prosperity in the fullest measure.

**Weston Shoe Co., Limited**

# Toronto as a Shoe Centre

Early Shoe History—Has Gradually Become a Distributing Point  
Rather than a Manufacturing Centre—How the Smaller Cities  
and Towns Have Taken to Shoe Manufacturing

WHEN Toronto was incorporated in 1834 its population was less than ten thousand and its factories of all kinds could be counted on one's fingers. It was not until a decade or more later that shoe manufacturing took root in the city and it was fully a generation before it might be properly designated an industry. In the fifties the first real shoe manufacturing was begun, but it was not until the sixties that the volume became such as to mark Toronto a shoe centre.

It was between 1870 and 1885 that the greatest development took place, when concerns like W. B. Hamilton, John Holmes & Co., Cooper & Smith, John Turner, Damer, King & Brown and others laid the foundation for a business that soon became one of the staple industries of the growing city. When the SHOE AND LEATHER JOURNAL came on the scene in 1888, Toronto was reckoned second to no city in Canada for its volume in shoe production, and the shoe factories outside the city in Ontario could practically be counted on one hand. Toronto was at the zenith of its shoe manufacturing prosperity in 1889, when the strike of shoe operators took place which drove shoe manufacturing to Quebec to purchase a large portion of their requirements.

With comparatively low wages in the province of Quebec the start thus obtained told seriously upon the western factories and soon the latter were not only reduced in numbers but those that remained cut their production down to a minimum. At this time the jobbing business got its start and establishments sprang up in Toronto, Hamilton, London and other smaller points with the result that soon Ontario became a little more than a distributing point for shoes.

As wages began to go up in Quebec, however, until they finally reached a parity with the scale established in Ontario, trade began to drift back again with the result that new enterprises were established and manufacturing began to take on a swing. Instead of centring in Toronto, however, they sprang up in the smaller places outside until all over the province are to be found today manufacturing of footwear of all kinds, so that the Queen City has never since regained her supremacy as a shoe manufacturing centre.

There are now being made in Ontario all kinds and grades of footwear, from the finest men's or women's shoe, to the more substantial lines that once were conceded as the special sphere of eastern establishments. In the past twenty-five years the ground has thus been more than redeemed and in the redemption have followed better methods, better styles, better quality and better working conditions.

There are now in Ontario about fifty leather and felt shoe factories with an output of about seventeen thousand pairs a day. Nearly one-third of these are located in Waterloo county, where, in order to meet the growing demands of the plants and to supply machinery parts and efficient service, the United Shoe Machinery Co. opened an office in Kitchener a couple of years ago. Up to that time the only office of the company in Ontario was located in Toronto.

There are some twenty wholesale shoe houses in the province, half of which are located in Toronto, which city has eight shoe factories. Hamilton and London are also well supplied with wholesale foot-

CITY HALL, TORONTO

wear firms, while Ottawa, Kingston, Belleville, Brockville, Brantford and other places have shoe jobbing establishments.

There are half a dozen felt footwear factories in Ontario which are doing a flourishing business, the larger number of them being situated within the borders of Waterloo county. In the line of tanneries there are some forty-two in the province turning out nearly every kind of leather, and four large rubber footwear plants afford employment to hundreds of men and women. Over four thousand pairs of felt shoes and about twenty-five thousand pairs of rubber shoes are produced daily in the banner province of the Dominion, where business is brisk and the outlook for the coming year most encouraging.

# DUNLOP

SEAL OF  
QUALITY

## RUBBER HEELS

Live  
Rubber

Wear  
Longer

### THE "PEERLESS" WAY

The growth of dealer interest in the "Peerless" line has been no less phenomenal than the sales growth of Dunlop "Peerless" Heels. We receive hundreds of requests every month for the empty box rebates.

If you have never sent in the empty "Peerless" cartons, to receive for each the one-and-a-half cents in cash by return mail, ask one of your cobbler friends to show you what his earnings from these returned boxes represent.

All this double-earning capacity of "Peerless" Heels is possible because the Dunlop Line sells readily through being a Quality product, backed up with a sufficiency of advertising.

Your jobber will ship you the necessary supply of "Peerless" Heels. Be sure to mention the name "Dunlop" to him.

Made in all sizes—and in colors Grey, Black and Tan.

### DUNLOP SOLES ALWAYS LEAD

Rubber Soles are more and more coming into popular favor. Some people wouldn't be without them winter or summer.

Once a customer of yours knows from experience that Dunlop Rubber Soles are just as efficient, just as surpassingly good as Dunlop "Peerless" Heels you will find he will have no other make of rubber sole.

Freedom from cracking, most generous wear-well record, never a sign of drying out—these Dunlop features are bound to impress the user.

Manufacturers in great numbers use the Dunlop Rubber Sole in making up their stocks—another good sign of quality and consistent behavior reaping their just recognition.

Made in all sizes and in colors Grey, Black, White and Tan.

# IS THE JANUARY SHOE SALE BEING OVERDONE?

Some Retailers Hold Clearance Campaigns on Slight Pretext—Consider Well Before Getting Rid of Good Selling Lines as Replacement Values Are Very High—Don't Announce Shoes at Bargain Prices and Then Fail to Make Good

**H**AS the January sale business in the shoe line been overdone? While this may have been the case in the past it is doubtful if so many sales will be held by the trade next month as has been the custom in years gone by. The reason is that retailers are not inclined to put on so many clearances because they have to renew their stocks at very much higher figures. Every time the merchant enters the market to replace a certain line of footwear, which has moved exceptionally well he discovers that it has gone up in some cases to a point above what he has been selling them at.

The confidence of your customers is a valuable asset. Before deciding on holding a sale consider whether you are prepared to give actual reductions from the original price, and remember all shoes in your establishment are worth from one dollar to three more per pair than they were a year ago. Before six months are over they will be still more valuable. If you intend to clear out certain lines which you do not want to replace, or have a few odds and ends which are worth more if turned into money even at a loss than they are lying about your shelves, by all means clear them out. In your advertising, however, do not seek to convey the impression that you are holding a clearance of all your stock.

## Be Candid With Customers

Be honest, frank and specific in the matter. It does not pay to mislead or misinform the public, for in the end you will be found out. It is advisable to give reasons for your sale as the public like to have information on such matters. If you think it wise or expedient to hold a sale after taking stock, you may state that starting the new year you find that you have a considerable number of broken lines in such and such sizes and leathers and that you do not want to continue them. This may apply to certain colored kid shoes, or others which you have found unprofitable to handle. On good selling lines it will not pay the dealer to reduce prices and enter the market for more at the exceptionally high quotations today.

You naturally ask why should you hold a sale at all? Should you confine the sale to odds and ends, broken and slow selling lines, or should this sale cover everything that is in stock? Every shoe store has a number of goods that may be termed "stickers." Nobody seems to want them. In such cases you are fairly safe in making a liberal reduction, even though you find it necessary to cut the price in half.

## Avoid the Long Drawn Out Sale

A long drawn out footwear sale is a big mistake. It is much more profitable to put all the "ginger" possible into a sale of a few days, preferably about a fortnight, than to let it drag along for several weeks. Many dealers have found that a sale advertised to last a month loses much of its effectiveness before the first week is over. People who read the advertisements notice that the sale will last for some time and they do not make any special effort to purchase their requirements early. In fact, many of them are under the impression that they are likely to get the best value by holding off until the last days. Better have a short sale and let your customers know it, and keep things "on the hum"

Whether you are relying on your permanent sales staff or are employing additional help during the course of the special sale, you will find it worth while to get your sales force together often, let them know just what your plans are and how you would like them carried out. Some dealers

have found it profitable to have a meeting of the sales force each night at the close of the day's sales and openly discuss what has transpired during the day and why certain shoes are still on hand. If your salesmen know what a loss it is to the store to have a large accumulation of odd lines they will take pride in cleaning up as many of these as possible.

Dealers plan their pricing in different ways. Some use a special reduction price tag of a color that is most noticeable, either red or green. For the average sized dealer it is probably best to gather the shoes together and group them in one section of the store, or on tables by themselves. This not only makes the showing much more imposing, but it facilitates quick sales as well.

## Mark Both Prices

In marking these price tags see that the former price and the marked down price are both given, otherwise customers may become suspicious, and avoid the slightest opportunity for suspicion. This makes it easy for a prospective customer to get information, and many dislike to ask salesmen too many questions if they are not sure of buying. Then again, if the salesman are all busy, the prospective customer can secure the information he wants from the cards since everything is marked in plain figures. This system of marking has other advantages—a stranger to the store will feel that he is being accorded the same treatment as everyone else or old customers.

Before preparing your advertising for a sale of this kind, you should have full particulars before you, as to the lines you are going to sell, the original price and complete description, of the footwear. This not only makes it much easier to prepare your advertisement, but you are safe in making your statements. If at all possible, illustrate your advertisements liberally and use prominent figures when quoting prices. If you are located in a town or city where there are daily papers, from three days to a week should be given up to advertising in it. In case you have only weekly papers to depend upon it is necessary that you use at least two issues, in which case you should use liberal space.

## Catch Eye of the Public

Newspaper advertising, of course, should be supplemented with circulars and window card announcement. Three or four days preceding the sale get out some attractive descriptive circulars announcing the date of the sale, showing the real values you are giving and the opportunity for saving money.

Do not fail to make all the use possible of the telephone. It is good policy to call up as many as possible of your customers preceding the sale. With the rural telephone serving such a splendid purpose, a great many of the well-to-do farmers in your community could be acquainted with the sale.

It is advisable too to give reasons for holding your sale. The public look for it. State that the sale will close positively on such a date, and to get the best values buyers should come early.

Do not fail to back up your advertising by live window displays. The public will look for your windows to keep them posted as to what is transpiring each day of the sale. They will look for some of the specials in your windows. Use bold placards in connection with your windows and change your windows every day of the sale.

# The Shoe Repair Man

## CHATHAM REPAIRERS INCREASE PRICES

Since the last repair prices were made in 1912, the figure for leather has increased 100 per cent., making it necessary to raise the price on all repair work in Chatham, Ont., to the following rates:—

Men's sewed soles and heels.....	\$1.50
Men's sewed soles.....	1.25
Men's sewed soles, whole to heel and heels....	2.00
Men's nailed soles and heels.....	1.25
Men's nailed soles.....	1.00
Men's heels.....	.35
Ladies' and gent's rubber heels.....	.50
Ladies' sewed soles and heels.....	1.25
Ladies' sewed soles.....	1.00
Ladies' heels.....	.25
Ladies' nailed soles and heels.....	.85
Ladies' nailed soles.....	.60
Boys' soles and heels, 1-2.....	.75
Boys' soles and heels, 3-5.....	.90
Boys' heels.....	.30
Girls' soles.....	.50
Girls' heels.....	.25
Child's soles.....	.40
Toe caps.....	.30
New heels.....	.75
Patches.....	.15c. up

All other work in proportionate rate. The new schedule of prices is signed by J. J. Side, Geo. W. Cowan, Grey Hodges, J. Clements, A. Hall, C. W. Huson, J. L. Campbell, Chas. Bast, J. Clantler, A. Hind, E. Deksty, Chas. Clements, A. Sidex.

## ANOTHER ADVANCE IN OTTAWA

A ten-cent increase all round on shoe repairs has gone into effect in Ottawa. Sewn sole and heel repairs are now \$1.50 instead of \$1.40 and with rubber heels \$1.75. Sewn soles only have gone from \$1.15 to \$1.25. "We can't help it," said an experienced repairman. "Leather has gone up very many times during the last six months. Sole leather is now nearly \$1.00 a pound, and it used to be 40 cents. Tap soles were \$3.65 a dozen pairs and are now \$7.00. Even thread for sewing is up from 75 cents to \$2.50 a pound. We must live." According to some of the shoe repairers, leather for boots and shoes will soon be a luxury.

## USE OF OLD ARMY BOOTS

The difficulty of obtaining adequate supplies of men's stout working boots at reasonable prices has necessitated recourse by retailers to all sorts of expedients to meet the demand in other than the usual manner. Probably the best method is to collect from the army authorities the disused footwear from the "front," and by cleaning and repairing, fit them up in suitable condition for working man's wear in civil employment. This expedient has been developed by Peacock and Sons, London, Eng. Many thousands of pairs of disused army boots have been repaired and disposed of to retailers and repairers for sale in all parts of the country. We have seen these boots received direct from France in their original dirty condition, and at first sight it would almost seem that they were past being useful, but after

they have been thoroughly cleansed and resoled, heeled and polished, the result is an article likely to yield many months of hard wear under the hardest of conditions. Messrs. Peacock and Sons quote these at 4s. 6d. a pair and they could be retailed at about 5s. 6d. or more. Those not repaired but with sound tops and well suited for repairing are quoted at 2s. a pair.

There are, of course, large quantities of boots not good enough for repairing, and these are very suitable for clogging, and are quoted very cheap by the ton. We would recommend traders wanting men's cheap footwear to look into this army returned footwear proposition, feeling assured that they provide the working man a better purchase than the cheap concoction made of leather board inner and middle soles and compo heels, with a cheap semi-chrome printed belly upper.

The firm mentioned, Messrs. Peacock and Sons, of 369 Hackney Road, London, E.C., will be pleased to supply further particulars upon application.—Hide & Leather News.

## STUDY THE QUESTION OF PROFITS

A steady stream of customers pouring in and out of your shop all day long does not mean you are prospering, if you are not getting fair prices for your work, says "The Shoe Repair Shop." In fact, the more work you do, the more money or opportunity you are losing. A repair shop opened up on a busy thoroughfare in a city with a big bluster about "good work at low prices." The man at the helm had the mistaken idea that if he got a lot of work it would compensate him for the very low prices he charged. He had several helpers, and all were first-class men. They did good work. Soon the shop had a very large trade. It was one of the "shoes repaired while you wait" establishments, and there was always a bunch of people waiting. They were amazed to find that they could get really high-class work at such ridiculously low prices, and naturally were not averse to taking advantage of it. They brought in all the old shoes they could find, and told all their friends about the place. The shop looked like a bee hive. It was one constant hum of industry; and Mr. Proprietor rubbed his hands with glee. BUT—at the end of the month, after paying his men, his rent and other overhead expenses, after paying all his bills for materials and supplies, he found that he had been doing business at a loss. He had been paying high prices for his materials, high wages to his men, and instead of getting the high prices which his work deserved he had devoted no attention whatever to the study of his profits and the financial management of his business; and when he vainly tried to make things balance he realized what a mistake he had been making. He has learnt his lesson and now conducts his business on a systematic basis. When he has to pay more for his material he knows that he has to charge more for his work. He knows that the bankruptcy court is the inevitable end for any man who cheats himself by failing to charge legitimate prices for his work.

And so the story goes. There are others who are beguiled into the low price mistake by competition. If a man comes into their shop and asks prices on a job, and then starts out with the comment that a nearby competitor will do the job much cheaper, they allow themselves to be bluffed into lowering their price. This is the wrong idea altogether. Do not be so weakminded and greedy for busi-

ness, which your better judgment should tell you is not worth having. Let such customers go to the other fellow. You know what it will cost you to do the job, and how much profit you have to make to exist. You know that you are not trying to hold up the customer, but on the other hand are refusing to be held up. So stand your ground. Name your price and let the customer take it or leave it.

To the timid who are afraid to add a reasonable profit, we would say that they must keep in mind not only what the job will cost them, but the actual value of the work to the customer. When you stop to think of the present exorbitant prices for new shoes, and consider that a repaired pair will look just as well and wear just as long, you are justified in adding a liberal profit for yourself. Should a customer express the opinion that the charge is too much ask him how much he paid for the shoes when new, and then compare that price with the price you are making for repairs. Ask him if he would not consider it a big saving to give the shoes another lease on life for even half of what he paid for them when new. He will see the point and admit its justness. There is no reason why the shoe repairer should live a hand-to-mouth existence. Charge what your work is worth and make the business a profitable one.

**HAVE THREE QUALITIES OF WORK**

Owing to the constantly increasing cost of sole leather, cut soles and all materials used in the repairing of shoes the shoemen of Clinton, Ont., have been compelled to advance their prices. The following prices for all kinds of work are subject to change at any time. The tendency of the leather markets is toward still higher prices:—

	1st Quality	2nd Quality	3rd Quality
Men's Nailed Soles.....	\$1.50	\$1.25	\$1.00
Men's Nailed Soles and Heels.....	2.00	1.75	1.50
Men's Sewed Soles.....	1.75	1.50	1.25
Men's Sewed Soles and Heels.....	2.25	2.00	1.75
Men's Heels.....	.50	Levelling	Extra

Writing to the SHOE AND LEATHER JOURNAL a Clinton correspondent says:—"We start with first quality men's, using No. 10 cut soles at \$7.55 and so on down the line. We are using a grade lower than anything that we have ever used to take in our third quality. We have also added a pretty fair price for nailing because of the difference between 25 cents in the average town, whereas a man can put on three pairs nailed in the time it takes to sew one pair."

**OAK BENDS NOW DOLLAR THE POUND**

Sole leather continues to soar in quotations and during the past week there was another advance of four cents per pound. Increases in price are coming faster and more furious than ever experienced in the history of the trade and there is no relief in sight.

Dollar a pound sole leather before Christmas, which was freely prophesied, is here, when No. 1 oak binds are taken into consideration.

The following price list to the retail trade went into effect in Toronto on December 11th:—

	10 Sides or More One Shipment	Less than 10 Sides

**AN EVIDENCE OF APPRECIATION**

Here is a copy of a neat card which a Toronto shoe repairer sends out with each job done.

The favor you have extended to me is appreciated. To be of service is a real pleasure, and it is my earnest desire to serve, that when again in need of shoe repairing, you'll be sure to return. There is no chance to lose when you trade here. I am behind everything that leaves this store, and its broad guarantee affords absolute protection. If boots repaired by me fail to make good, bring them back, and satisfactory adjustment will be made. Your interests are my interests —always. Our prices are just as low as the high quality of merchandise permits.

Come again.

**GREASE YOUR SHOES AS OF-YORE**

Writing to the SHOE AND LEATHER JOURNAL a leading maker of McKays and Standard screws says, "We consider you would do a good work for the country if you would advocate that the people grease their men's, boys' and youths' shoe uppers like they did 25 to 40 years ago. We consider the uppers would last 30 to 40 per cent. longer on shoes that get rough wear. At the present price of leather, we think the people would be likely to take to the idea, and merchants would advocate it among customers. This, we believe, would be a great benefit to the country under present leather conditions."

# AMONG THE SHOE MEN.

N. Macfarlane, of the Macfarlane Shoe Co., Montreal, who recently returned from a trip to Boston, has been confined to his home with an attack of la grippe.

J. E. Warrington, of the John Ritchie Co., Quebec, has returned from a trip to Winnipeg and reports business as the very best.

R. E. Dildine, general sales manager of Ames-Holden-McCreedy Co., Montreal, spent a few days at the Toronto branch last week.

P. A. Doig, sales manager of the Star Shoe Co., Limited, Montreal, spent a few days in Toronto last week.

L. S. McKindsey, western representative of the W. B. Hamilton Shoe Co., Toronto, has returned after a successful selling trip throughout the Prairie Provinces.

F. W. Love, shoe retailer, Aylmer, Ont., was in Toronto lately calling upon the trade.

W. F. Locke, manager of the shoe department of the T. Eaton Co., Winnipeg, was in Toronto last week.

R. Murray McGowan, of the Kaufman Rubber Co., Winnipeg, was in Montreal, Quebec and Toronto lately on business.

H. W. Rising, of the firm of Waterbury & Rising, wholesale shoes, St. John, N.B., was in Montreal recently.

Bob Scroggins, of Getty & Scott's office, Galt, Ont., was recently presented with a wrist watch and military mirror by the members of the staff. Mr. Scroggins has joined the Divisional Signallers for overseas service.

S. A. Poirier, who has for several years conducted a general business in Campbellton, N.B., has decided to go into the shoe line exclusively and has put in a large and representative stock of footwear.

A serious fire badly damaged the tannery of C. Falardeau, corner of Caron and St. Helen streets, Quebec, recently. The fire was caused by an explosion in the varnishes and acids in the upper storey of the factory.

John Clucas, shoe dealer, Medicine Hat, Alta., has sold out.

Walter Dow, shoe dealer, Edmonton, has discontinued business.

W. J. Detweiler, shoe merchant, of Sault Ste. Marie, Ont., was in Toronto last week on business.

The stock of J. O. Leduc, dealer in shoes and dry goods, Beauharnois, Que., has been sold.

B. Leonard, of Leonard Bros., shoe merchants, Quebec, was in Montreal recently calling on the trade.

George Lennox, wholesale shoes, Winnipeg, was in Montreal recently on a business trip.

N. L. Wiggett, of J. A. Wiggett & Co., Sherbrooke, Que., was in Montreal last week calling upon the trade.

The stock of Mendelson Bros., St. John's, Que., consisting of shoes and dry goods, has been sold.

Jas. T. Clark, of Clark Bros., shoe manufacturers, St. Stephen, N.B., was in Winnipeg recently on business.

J. A. Connor of Toronto, and W. J. Ashplant of London attended the recent Ohio Whist Congress in Cleveland.

A. M. Jarvis, manager of the Murray Shoe Co., London, and J. G. McDiarmid, of Toronto, western representative of the company, have returned from an extended business trip to New York, Boston and other shoe centres, in search of the latest pointers and ideas on styles and lasts for the coming season. They state that the darker shades of brown and grey are in strong demand and indications are that the

coming spring and summer will be the greatest white season ever known. In not a few instances they found indications that patent leather was returning to favor.

President W. H. Robinson, Vice-president T. H. Rieder and Director A. D. Thornton, of the Canadian Consolidated Rubber Co., addressed the employees of four factories of the company in Kitchener, recently, in the Grand Theatre. The object of the meeting was to establish a thrift plan among the employees and to interest them in a movement to obtain better city government. Mr. Rieder said that manufacturers should be compelled to make truthful declarations of their assessable incomes and thus share the burden of taxation with the working men. He openly charged prominent manufacturers with falsifying their declarations.

A tentative arrangement has been arrived at in the trouble between the Leckie shoe factory of Vancouver and their employees, which culminated lately in a strike of the latter, and they are now back at work. It is understood to be binding on both parties till the first of January next. J. D. McNiven of the Department of Labor helped to bring about this settlement, one part of which made provision for a stated sum to be given by the company to its employees as a sort of bonus. The employees of the Leckie factory have recently organized themselves into a local of the Boot and Shoe Workers' International Union.

W. Alfred Moore, sales manager for Beardmore & Co., Toronto, who some time ago underwent an operation for appendicitis, is spending a few days recuperating in Atlantic City. He expects to resume his duties at the commencement of the new year.

J. T. Lawson, shoe retailer, of Regina, Sask., is spending a few weeks in Toronto and at his old home in Orangeville, on a visit. His many friends are always glad to welcome him on his annual trip to the East.

Fire broke out in the Pacific building, Scott street, Toronto, recently, and did considerable damage. The leather stock of Ed. R. Lewis had a close call from the flames, as his premises were filled with smoke, but the good work of the firemen prevented any serious loss.

F. L. Wagner, of the Aylmer Shoe Co., Aylmer, Ont., was in Toronto last week calling upon the trade.

S. Snierson, general manager of the Independent Button Fastener Machine Co., Boston, Mass., whose Canadian offices are at 5 Wellington street east, Toronto, spent a few days in Toronto lately and reports business with the firm as most encouraging.

There has been a large demand for overgaiters this season, the prevailing colors being light and dark grey, white, chamois and fawn. The eight-button overgaiter is proving to be very popular and manufacturers are utterly unable to keep up with orders.

Jobbers report a great scarcity in all lines of felt goods for which the demand is very brisk. Stocks were never so low as at the present time.

The new Cut Rate American Boot Shop is commencing business in Lethbridge, Alta.

A letter has been presented to the City Council of Vancouver from the Health Committee stating that Saturday being the only day that many mothers are able to get their children's shoes repaired, the police department be requested not to enforce the early closing act with regard to shoe repairs.

Dupont Freres, Maisonneuve, have added a new line of lasts for the manufacture of their range in growing girls' shoes. The firm state that the new lasts have met with a wide appreciation by the trade.

The Macfarlane Shoe, Limited, Montreal, has been federally incorporated with a capital stock of \$400,000 divided into four thousand shares of \$100 each. The company is empowered to make and deal in all kinds of shoes, etc.

J. Einstein, Limited, Montreal, has been federally incorporated with a capital stock of \$25,000 to take over as a going house the business being carried on in Canada and elsewhere of J. Einstein, Inc. The company is empowered to manufacture, buy and sell cloths of all kinds, leather, silks, fabrics, etc., for use in the manufacture of shoes, shoe supplies and findings.

Plans have been completed whereby the Ajax Rubber Company will take over the Racine Rubber Company of Racine, Wis. It is understood that the capital of the Ajax Company will be increased from \$5,000,000 to \$10,000,000.

The large brick building in Elmira, Ont., vacated some time ago by the Elmira Felt Co., on its removal to Kitchener, Ont., is being fitted up by the Canadian Consolidated Rubber Company for the manufacture of tennis shoes. It is expected the new Elmira industry will be in full operation by the middle of January, and that about 4,500 pairs of outing shoes will be produced daily within a few weeks. The Canadian Consolidated Rubber Company have for some years specialized in tennis footwear at the Dominion Rubber Co. plant in St. Jerome, Que., where the capacity is 8,000 pairs a day. Business in this line has developed to such an extent that it has been found necessary to equip a second plant in Elmira for the production of athletic shoes.

W. G. Fowler, who for several years has been manager of the Calgary, Alta., branch of Gutta Percha and Rubber, Limited, has been made manager of the company's Pacific Coast Division, with headquarters in Vancouver. He succeeds A. G. McKenney, who has been in the employ of the company for over a quarter of a century and for the last fourteen years as manager of Pacific Coast Division of the company. Mr. Fowler will shortly take up his abode in Vancouver. He has been succeeded in Calgary by W. R. Weyman, who has been on the staff of Gutta Percha and Rubber, Limited, for some years.

Alfred Marois, Jr., who has been attached to the staff of D. D. Hawthorne & Co., wholesale shoes, Toronto, for several months past, has returned to his home in Quebec. He is a son of A. E. Marois, the widely known shoe manufacturer, of the Ancient Capital.

C. F. Tugman and N. A. Smythe, of the Royal Shoe Co., Toronto, were recent callers at the La Parisienne Shoe Co., Quebec. They were accompanied by W. C. Myers, of Toronto, Ontario representative of the firm.

W. L. Francis, sales manager for Gale Bros., Limited, Quebec, was married recently in Boston. Many friends will extend congratulations and wish him and his bride every happiness and prosperity. Mr. Francis is the son of W. P. Francis, vice-president of the John Ritchie Co., and is well and worthily known to the shoe trade in the Dominion.

Narcisse Gagnon, shoe manufacturer, Montreal, and his son Emile, have returned from a couple of weeks' hunting trip in the Laurentians. They went on their expedition loaded for the biggest kind of game, but report having secured only forty-four rabbits.

With the employees of the Leckie Shoe Co., Limited, as a basis, there will shortly be in existence in Vancouver a local of the International Boot and Shoe Workers' Union. The organization will take in not only the employees of the Leckie factory, but also all journeymen working in the many shoe repairing shops of the district. It is expected that the new local will start with fully one hundred members.

After sixteen years in the retail shoe line, in which he has built up one of the largest and best trades in Toronto,

Alex. Chisholm, who has one of the finest and most attractive stores in the province, is retiring from business, and will spend a lot of his time in travel. His business is being taken over by his brothers, M. S. Chisholm, who has been associated with him for some years, and John L. Chisholm, who for the past year and a half has been manager of the Invictus Boot Shop, Yonge street. M. S. and J. L. Chisholm will assume control the latter part of January, and as both are exceptionally well qualified they should make a success of their undertaking. About the first of March, they will remove to the premises now occupied by May Bros., hardware merchants, 1680 Dundas street, which will be splendidly fitted up, while May Brothers will take possession of the present Chisholm store. Many friends will wish Messrs. Morley and John Chisholm every prosperity, and on the retirement of Mr. Alex. Chisholm from the trade, trust that he may enjoy many years of health and happiness.

What is sure to prove a most agreeable surprise to the citizens of Quebec in general is the new Walk-Over Boot Shop at 10 St. John street, the building formerly occupied by F. T. Thomas & Co. The building has been transformed from an ordinary business stand into one of the most attractive and modern stores of any description in the ancient capital. Mr. F. A. Guinivan, of Toronto, proprietor of the Walk-Over Shops who was in Quebec in connection with the grand opening of the Quebec branch, stated that the Quebec shop is modelled after the Walk-Over stores in the larger cities of the United States and Canada. Quebec has in the Walk-Over boot Shop an up-to-date establishment where, the management states, the latest style creations will be shown simultaneously with other large cities. Mr. R. J. G. Gore, of Quebec, has been appointed manager of the Quebec branch.

Among the new products which have been recently placed on the market, as an effective substitute for sole leather, is "Tenax," manufactured by the Gutta Percha and Rubber, Limited, Toronto. This new soling is now being handled by leading jobbers, who report the sale as very encouraging. "Tenax" is a highly fibrous compound, developed and perfected in the laboratories of the company, after months of research and practical test as a substitute for leather. It is guaranteed to wear longer than either leather or rubber, is non-squeaking, waterproof, flexible and practically as light as leather. The manufacturers say that it is also better and cheaper than leather. It comes in sheets of any desired thickness for soling, both in black and tan. "Tenax," 3/16 of an inch thick, weighs twelve pounds to the square yard, and 1/4 inch thick sixteen pounds to the square yard. "Tenax" is sold at fifty cents a pound, and it is estimated that 17 1/2 pairs of soles can be cut from a square yard of this new leather substitute.

#### QUEBEC NEWS AND HAPPENINGS

The following visitors were in Quebec recently: H. Hurlbise, representing the Panther Rubber Mfg. Co., Sherbrooke; H. H. Thompson, representing Geo. E. Hunter, Toronto; R. E. Woodward, of F. E. Woodward & Sons, Montreal; Louis St. Arnaud, of Independent Silk Co., Limited, Montreal, and F. J. Peregó, of the Steel Company of Canada, Montreal.

The death took place recently of Alex. Leueille, foreman of the cutting room of La Compagnie des Cuirs et Chaussures, of Plessisville, Que., at his residence in Levis. The funeral services were held at Notre Dame de Levis, and the interment was at Mont Marie Cemetery. A large number of friends were present to pay their last respects. Edmond Gaumond, superintendent, represented the company at the funeral.

La Compagnie des Cuirs et Chaussures, Plessisville, Que., have installed a new No. 4 Heel Compressor, a rapid Standard Screw and a Headaway stitch separator. The firm

are working to capacity and are now increasing their plant to keep pace with their growing business.

A serious fire took place at 7.30 a.m. on the morning of the 11th inst. in the premises of Cyr Falardeau. The loss was \$12,000, but is covered by insurance. The fire broke out in the patent leather department.

Fire broke out recently in the new wing of the factory of Max Clement & Fils. A portion of the building was burnt, but the loss is fully covered by insurance.

Messrs. Lucien Borne, Pierre Ouellet, W. Richard, J. E. Samson and Luc Routhier spent several days around Lac Edouard on a hunting expedition recently.

The sample room and general offices of J. M. Stobo have been recently enlarged. When all improvements are completed the firm will have one of the finest sample rooms in Quebec for the display of their new models, on which they are at present working. The firm are exceptionally busy at the present time.

Tremblay & Gosselin, shoe manufacturers, have installed a new fitting room department in order to increase the capacity of their plant.

J. Benoit Goulet, son of O. Goulet, shoe manufacturer, of this city, was in Montreal some days ago on a business trip.

#### NEWSY BRIEFS FROM ST. JOHN

The firm of C. B. Pidgeon, St. John, N.B., is going to retire from business. The business was founded forty-five years ago by the late C. B. Pidgeon, and on his death, twenty years ago, was continued by his son, David B. Pidgeon. It now comprises tailoring, men's clothing, furnishings and boot and shoe departments and is one of the most important establishments in its line in the city. The stores still occupy the same site on which the business was founded almost half a century ago. The reason for retiring from business is found in the continuance of the war. The proprietor, Captain D. B. Pidgeon, went overseas early in the conflict and is now home on a short furlough. As the end of the war is not in sight he has decided to close out his business so as to leave him quite free of other interests when he returns to the front.

Lieut. Daryl Peters, son of Fred. A. Peters, of the firm of C. H. Peters Sons, Limited, city tannery, arrived in St. John, December 4th, on the steamer Missanabie to take a command in the 236th Kilty Battalion. On his breast was a red and white ribbon indicating that he had been awarded the Military Medal for gallantry in action. Like all brave men he was reticent in speaking of his own experiences, merely say, "It was nothing." It was on June 31st, of this year, that Lieut. Peters, then a corporal, won his decoration and incidentally his commission. A raid was planned by Lieut. F. B. Winter, and Lieut. Peters was one of the men picked for the hazardous work. Officers of the "fighting 26th," who are now home recuperating from injuries, say that young Peters went out with the party under cover of darkness and remained out in "No Man's Land" under a perfect hell of shell fire and established communications with the battery behind the lines and there directed their fire. They claim that it was a miracle that he was not killed.

H. M. Garson, who for the past two years conducted a boot and shoe store in Main street, St. John, N.B., is selling out and has opened up at 103 Union street, in West St. John.

Private William O'Connor, of the 236 Kilty Battalion, who was formerly junior clerk for the firm of Waterbury & Rising, Limited, arrived home a few days ago from Fredericton where his unit is stationed. While in the city he received a letter from his brother Frank, who is in England convalescent from injuries sustained in France. In his letter he told of being offered a commission in the Imperial forces.

Waterbury & Rising, Limited, have placed on the market a new composition to replace leather soling. It is called Tenax, and is becoming quite popular.

Harold W. Rising, secretary-treasurer of the firm of Waterbury & Rising, Limited, is in Montreal on a business trip.

#### GUESS THE AMOUNT OF SHOE SALES

The guessing contest inaugurated by Tetrault Shoe Manufacturing Co., Montreal, in connection with the total sales of this progressive organization for the past year is arousing much interest. By reference to another page it will be seen what the sales have been for each month of the eleven months of the year, and also for the first half of December. Shrewd merchants or their clerks should not have much difficulty in arriving at a pretty correct estimate regarding what the sales will be during the last two weeks of 1916. By adding this to the total for the eleven and a half months, any one will stand a splendid chance of capturing one of the valuable cash prizes offered. There are no conditions attached with the exception that when sending in a guess the party must give the correct register number upon the lining of any one of the Tetrault range of shoes. The competition is open to every one handling Tetrault shoes, and \$125.00 is given in prizes. To the party guessing the correct amount, or coming nearest thereto, \$75.00 will be given. The contest closes on January 5th.

#### SAFETY FIRST IN EVERY CASE

Here are some "don't's" that are particularly apropos at this time of year, when the danger from fires through the use of inflammable materials in window dressing is rife.

Don't use tinsel or other metallic decorations in the immediate vicinity of lamps, as they are likely to work their way into the sockets and cause fire from short circuiting.

Don't use wire supports if they are attached to lighting fixtures from which the current may leak.

Don't put temporary wiring in the vicinity of the display unless it be kept secure and out of reach of the careless or inquisitive shopper.

Don't use electrically operated specialties in show windows or display rooms, unless the inspection authorities have been consulted as to their safety.

Don't use wires and supports unless they are mechanically secure and not liable to electrical derangement.

#### A THRIVING CANADIAN CONCERN

Milverton, Ont., is the home of one of the most progressive and up-to-date felt shoe manufactories in this part of the province. The business was started about eleven years ago by J. G. Grosch and his sons, W. H. Grosch and S. J. Grosch, and has been going steadily ahead ever since. They Grosch boys are well known in the town as progressive and energetic and have grown up in the place and with the business. The senior member of the firm, Mr. J. G. Grosch, has been in the shoe business on Milverton for almost fifty years and there is no detail of the shoe trade with which he and his sons are not familiar. Like many other Canadian concerns at present they have been handicapped through a large number of their hands having enlisted and while they are justly proud of this fact, and to some extent have been able to train new help, they regret that it has held them back a little with delivery of goods. But they say their customers have been exceedingly patient, and they appreciate this fact. They make a high-grade range of felt footwear and have had a most prosperous year during 1916.

Mr. W. H. Grosch is well known all over the country as

## CONDENSED ADVERTISEMENTS

Two cents a word. Minimum charge for an advertisement 50 cents.  
Cash must accompany all orders.

FOR SALE—A shoe store doing a thriving business—established in Western Ontario city. Reason for selling—belong to army. Stock, \$50,000. Can secure good lease, or buy building. No curiosity seekers, but real buyers wanted. Apply, Box 20, SHOE AND LEATHER JOURNAL, Queen street west, Toronto.

TWO EXPERIENCED SHOE TRAVELERS WANTED—One residing in Ottawa, just for Ottawa and Hull cities; one residing in Winnipeg, just for Winnipeg and St. Boniface. Box 22, SHOE AND LEATHER JOURNAL, 1229 Queen street west, Toronto.

one of the best authorities on horses in Canada and owns three celebrated Grand Circuit campaigners—Gilbert Patch (2.06¾), Widower Peter (2.14¾), and Tramp Quick (2.10).

The members of the firm have been liberal contributors to patriotic funds for the district and in money and men have one their bit as true Canadians. In addition to other contributions they handed to Sir Adam Beck for Red Cross work a standard registered mare that sold for \$617.00 and have sent hundreds of pairs of shoes for the Belgian Rleief

### CONDITIONS NOW BEYOND CONTROL

A leading sole leather firm has sent out the following notice to its customers, which shows the gravity of the situation:—

“As the cost of hides and tanning materials has advanced far beyond levels anticipated, we are compelled to make all prices subject to change without notice. We cannot hold open any offers under present conditions.

“We are desirous of making all advances as light as possible, and we will do our utmost to take care of our customers, but we wish our friends in the trade to fully realize the seriousness of the situation, and would suggest that they govern themselves accordingly in disposing of their own product.

“These steps are necessary because conditions have reached a point where they are absolutely beyond our control.”

### PASSING THE BLAME ALONG

The following from a Montreal paper will be read with much interest as applying to the present situation in shoes:

Boots and shoes are away up—and some say they are going higher. Mr. Montreal learned that to-day when he went to buy a new pair.

He knew his ice bill was higher than ever before but he had not thought about the boot and shoe situation until the prices of the boots were told him.

“What?” he exclaimed, as the clerk told him what he would have to pay for the pair he liked.

“Why, I used to get just as good ones for about half that sum. Why?”

The clerk did not explain; he simply repeated the price of the goods and let it go at that.

Possibly he was tired explaining—or rather trying to explain—why shoes cost almost twice as much now as they did a couple of years ago.

Mr. Montreal sought the proprietor after he had ordered the boots sent out to his home that afternoon.

“Why do I have to pay such exorbitant prices for foot-gear?” he asked that gentleman. “I remember when I used——”

“Yes, yes, yes, I remember the same thing you do,” interrupted the merchant. “I recall days when just as good

shoes as I have in stock now—possibly even better—were sold in this same shop at prices away lower. But I cannot do it any more.”

“Why?”

“I blame the war.

“The first cause of the present condition is the shortage in raw materials.

“So many of the countries which used to supply the greater part of the hides for the tanners are at war or their trade is severely demoralized by the war.

“Then, there is an utterly unprecedented demand for leather for military equipment or the footwear of the contending armies.

“Sole leather, it is claimed, is now twice as costly as in the ante-bellum days, while upper leather shows even a greater increase in prices.”

So it goes. The retailer blames the wholesaler; the wholesaler the manufacturer; the manufacturer the tanner; the tanner—war!

But it makes no difference who is to blame for the soaring prices; the wearer pays the bill.

### A HISTORIC CONCERN

(Continued from page 85)

shoes is to be credited to this firm, the result being serious riots in which the premises of the firm suffered severely.

About 1846 a branch establishment was opened in Toronto under the name of Childs & Brown, the names being reversed. In 1848 the late W. B. Hamilton, a brother-in-law of Mr. Brown, took the latter's place in the Toronto organization, the firm name being changed to Childs & Hamilton. This concern was really the pioneer shoe manufacturing house of Toronto and its goods were standard for years throughout Ontario. When Mr. Childs died some years later, the business was continued by the late W. B. Hamilton, who later took his son into partnership with Mr. Arthur Blachford and the late Jas. Buik. The firm then became and was known for years as W. B. Hamilton, Son & Co. Later, the W. B. Hamilton Shoe Co., Limited, was formed. The present directors are W. A. Hamilton, C. B. Hamilton, W. T. Purvis, W. A. Griffiths, L. S. McKindsey, G. A. Secombe.

The firm have throughout these changes and during all these years maintained their prestige and effectiveness as amongst the most reliable and progressive of Canadian shoe concerns. They have continued intact the policy of the founders in giving the Canadian people and Canadian dealers shoes that are in every-day request, avoiding the extremes of faddishness and maintaining their reputation for goods that, while up-to-date, have those qualities in them and behind them that meet the requirements of the great staple majority of the purchasing public.

### SOME JANUARY TRADE BOOSTING SUGGESTIONS

(Continued from page 22)

Two of the cards shown are suggestions for a sale as mentioned above, and two are for regular lines. The “half yearly clean up” card may be done in black, blue or red and the small lettering in black. The January Sale card is an air brush design a little more difficult to make than the “clean up” card. The “January Sale” words should be red with a black outline, and the small lettering in black.

The other two cards are for regular spring lines. The one is a simple design, with an oval and plain border. The lettering is in red and shading and decoration in pale green or grey.

The “Advance Showing” is an air brush design with large letters in red and small ones in black. These card are merely suggestions that you may adopt to your own needs.

# ONTARIO TANNERS HOLD ANNUAL MEETING

**Genuine Scarcity of Hides—Mr. Charles Robson in Annual Address Deals With Situation Created by Wartime—Demand for Boots is Brisk—Griffith B. Clarke of Toronto is the New Presiding Officer**

**I**N his annual address before the Tanners' Section of the Toronto Board of Trade recently, Mr. Charles Robson, the chairman, strongly advised the members that on the threshold of the new year it would be well to pause, analyse the conditions which have brought about the existing prosperity, take stock of what has been done, and carefully consider what the future has in store for the tanning industry of Toronto.

Referring to the rapid increase in prices of hides and skins since the outbreak of the war, Mr. Robson said: "In spite of the tremendous slaughter of cattle in Canada and the United States, there remains to-day hardly any stocks unsold in any of the great hide centres. There had never been a time when packers had fewer hides to sell than at the present. They are the masters of the situation, and they know how to handle the situation to their own best advantage. We also know that Great Britain, to safeguard her interests, has prohibited to a more or less degree the importation of hides and leather into the neutral countries of Europe, thereby creating in those countries an unprecedented demand for both hides and leather, a demand which will certainly not be satisfied during the continuance of the war, and probably not for a long time after.

## France a Large Importer

"France, the great cattle producing country, which has not permitted the exportation of hides for the past two years, is now obliged to import about 150,000 hides monthly to fill her tanneries, and is also obliged to continue the importation of leather, because the French tanners cannot produce sufficient to supply the demand for leather.

"Throughout Canada and the United States, where labor is so well employed, and prosperity appears to rule, the demand for good shoes at good prices is continuing, and will continue as long as the present prosperous times in both countries exist. And so long as the war continues so long will the military demand for leather goods continue, and just as long will the purchasing power of labor be above normal. It is difficult to conceive any change in the present situation as long as the abnormal and extraordinary conditions continue.

## May Prohibit Slaughter

"As a consequence of the enormous slaughter for years back, and the decrease in cattle, the European Governments, as well as the Governments of Canada and the United States, may deem it advisable to prohibit the slaughter of female cattle up to three years of age, thereby creating a further scarcity of calfskins, kids and light hides. This experiment

has already been tried in Argentine, with very good results. It may also be well to remember that the Orientals are beginning to wear the European styles of footwear, and it is only a matter of a few years when the hundreds of millions of people in the Far East will be active competitors for all kinds of hides to supply their own domestic requirements.

"Only by conservative operations can we in Canada stem the tide of still higher prices for raw material. For us the lessons of the situation are manifold. It should mean in

CHARLES ROBSON, OSHAWA, RETIRING  
CHAIRMAN OF TANNERS' SECTION

the first place closer and better co-operation of our tanning fraternity, to obtain, if possible, statistics so necessary of the conditions bearing on the hide and leather markets in all parts of the world, also co-operation with our Government in order not alone that we be advised of the many opportunities in which our industry might be extended and preferred, but also that we by individual and combined effort, assist our Government in the execution of the many contracts, and in this way do our little bit to help along in the victory which is sure to be ours for glorious and everlasting peace."

## New Officers Elected

Following are the officers for the ensuing year: Mr. Griffith B. Clarke, chairman; Mr. Theo. King, vice-chairman; Mr. F. G. Morley, secretary-treasurer; Executive Committee, Messrs. G. P. Beal, A. O. Beardmore, J. C. Breithaupt, F. G. Clarke, Hon. E. J. Davis, W. J. Heaven, H. B. Johnston, Theo. King, G. C. H. Lang, C. G. Marlatt, Chas. Robson, J. Sinclair; Legislation Committee, Messrs. G. P. Beal, R. M. Beal, A. O. Beardmore, C. E. Clarke, Hon. E. J. Davis, H. B. Johnston, Theo. King, C. G. Marlatt, Chas. Robson, S. R. Wickett; Transportation Committee, Messrs. R. M. Beal, A. O. Beardmore, L. J. Breithaupt, W. J. Heaven, G. C. H. Lang, Chas. Robson, John Sinclair, S. R. Wickett, Theo. King.

## AN EVER WELCOME CALLER

"Please find enclosed, express order for \$1.00, for a year's subscription to the 'Shoe and Leather Journal.' We thoroughly appreciate this Journal, as it always contains some valuable information regarding the shoe and leather world."

Yours truly,

JOHN T. LAWSON.

## Exclusive Models

# That Bring the Price

We are Specialists in Women's High Grade McKays

Our new creations in plum kid, black kid and patent leather with buck and cloth tops, in the smart Cavalier patterns, are exceptionally attractive for early Spring trade.

Our Cavalier cut Bals. in white kid, buckskin, brown and gun metal calf, reignskin and canvas, with wood heels and white ivory soles, are most inviting for Spring and Summer.

OUR NEW SPORT LAST, owing to its carrying a higher heel than generally shown in this line, has more style to it. It comes in all leathers, with plain or wing tips, and in every width from AA to D.

Our representative range of pumps with featherweight edges and covered wood heels completes a most distinctive and artistic showing for Spring.
