# WHY DIAMOND FAST COLOR

Nothing so cheapens a shoe as a brassy eyelet. In most instances it is more conspicuous than a break in the leather and even more difficult to remedy. But there is a sure way to protect your patrons from any annoyance in this connection. Diamond Fast Color Eyelets cannot wear brassy, they always look new and help to preserve the appearance of shoes throughout the longest wear. There is also a positive way to tell whether the shoes you purchase are fitted with them. Just look for the little diamond  trade mark raised on the surface of each. It is inconspicuous but very important. Your customers realize it. It is your guarantee that the eyelets are genuine Fast Color, for only the genuine Fast Color have the  trade mark.

Do you know the reason why  
Weston's Shoes are "Best to Buy?"  
Quality and Style are there,  
Weston's Shoes are "Best to Wear."

---

"You tell me," said the Poet a few days ago, "that the demand for WESTON'S SHOES is growing by leaps and bounds—sales simply booming—that it is imperative that quantity of output be considerably augmented, that the—in short," he continued in the language of the famous Mr. Micawber, "we are about to make a tremendous SPRING."

"It is quite true," we remarked briefly. "We have all the business we can possibly handle till May 1st next."

"Then pray tell me," said he, "in this time of stress and (to a certain extent) depression, how do you account for this?"

"There are several reasons," we replied. "The people have found out that WESTON'S SHOES wear well—solid insoles and counters, full length vamps and all that sort of thing—that they are easy and comfortable and that they give the foot a neat and stylish appearance. You know the old saying, 'A satisfied customer is the best advertisement.'"

The Poet's usually mild eye was by this time glaring wildly. "It is as I feared," he thundered, "your mind grasps only the material things while the finer efforts of our nature leave you untouched. Are you not aware that my muse is celebrated from Vancouver Island to Cape Canso? My justly celebrated epic commencing

' 'Tis an adage known of old  
Goods well purchased are half sold,'

is recited from end to end of our Fair Dominion. Has this had no effect? Are our Canadian people deaf and blind? Do you think—"

But we could not think. We had been pounded into unconsciousness and all was blank.

\* \* \* \* \*

When we revived the Poet had gone, but his words still rang in our ears—

"Do—you—know—the—reason—why?" etc.

# Lace Shoe Logic

You can't make any mistake in purchasing lace shoes at this time.

They have always been the most reliable staple and now they are the style, too, so they have everything to commend them.

Lace shoes mean quick fit, quick sales — no come-back for free repairs.

This is now more than ever a factor, for high cut boots never did look well when buttoned and every additional button is a problem in fitting. High cut laced shoes, on the contrary, are easy to fit; they look well. Laces form an adjustable fastening; they automatically meet and satisfy the many conditions in fitting which, in the case of buttons, require time, expert attention and repeated expense.

Lace shoes are not shelf warmers. They are in demand now; they will be even more so next season.

You know your trade, but if you have any doubts as to what to buy, lean towards lace shoes; it is the logical thing to do.

# ONCE AGAIN Tetrault Blazes the Trail

**Tetrault Military Waterproof**

**Tetrault Military Dress Boot**

**Y**OU can depend on the Tetrault Factory to correctly forecast the demand in shoe styles.

The introduction by Tetrault of the Heavy Military Ankle Boot with viscolized sole, as shown above, has been justified by the enormous sale this last has enjoyed.

The double sole and winter calf upper makes it the ideal boot for winter wear without rubbers.

Live retailers everywhere are selling them daily at a good profit.

Tetrault can deliver requirements immediately. Get in on this good thing at once.

**A**BSOLUTELY the latest thing in men's footwear is the Military Dress Boot, here shown, introduced by Tetrault, as usual. It is a boot to be worn after hard work, having a light but strong sole, and being lined with heavy brown duck which makes it stand up well.

The heel is nailed right through. Its color is a beautiful shade between tan and mahogany, and the fact that it is made on a military last gives it a dash and snappiness few models possess.

Be advised that this is a big seller in the next few months and wisely order an assortment of sizes from Tetrault for immediate delivery.

## STEADILY FORGING AHEAD

**The Business Situation Improves Each Month—Buying  
in All Lines Shows a Steady Increase—Last Year  
Showed Wonderful Recuperation Over 1914**

**I**T is not a matter of whistling to keep up courage. From every reliable source of information comes word of improved business conditions. Some wholesale houses report that they did more business during the last three months of 1915 than in all the previous months put together.

Manufacturers in all lines report a greatly enhanced demand, especially for staple lines in which stocks have become abnormally low. Retailers for over a year have been following a course of the utmost parsimony in buying with the result that they have only had enough goods on hand to keep things moving.

With the Christmas rush these limited facilities for supplying the needs of customers have been seriously impaired and for two or three weeks past manufacturers and jobbers have been importuned for sorting goods that they have not been able at all times to supply.

In clothing, footwear and apparel generally there has been a marked movement within the past three weeks and the year opens with every indication of better things all around. There is room for improvement still, although as spring business opens up there will be no doubt a further impetus given to trade.

Retailers have their part to do and they should do it. If a little more "ginger" were put into pushing sales, a little more "pepper" into the advertising and business thus put upon an aggressive war footing there would be a change recorded even for the two dullest months in the year. The people seem to have the money, as Christmas trade has already proven to some extent, and a little coaxing ought to bring some of it out.

"Faint heart never won fat turkey." Get up and hustle. Don't save ammunition or your enemy may turn your flank. There is a tide in the affairs of men which, taken at its height, leads to victory in business as well as in battle. **PUSH NOW.**

## SCORING SUCCESS IN SHOES IN SMALL TOWN

**Problems to Be Solved are Different From Those of City Merchant, but Local Conditions in Buying, Displaying, Advertising, Selling and Stock Keeping Can All be Made to Contribute to Larger Trade—What Mouth to Mouth Favorable Comment May Accomplish**

The small town retailer who pays close attention to the buying end of his business usually gets his share of the shoe trade in his community.

In one town of some 500 inhabitants a new merchant arrived. He bought his store from an established merchant, who had specialized in groceries, and prepared to sell shoes.

He had never lived in a small town; he had heard somewhere that the class of citizens from which his trade would be recruited were strong for bargains. He judged that late styles would not be in demand. He decided that high-grade shoes would be beyond the purse of the majority of the citizens. With these ideas in mind he stocked up with odds and ends, which he bought cheaply and could retail at moderate prices and still make a good profit. He desired to give his customers good bargains, but his shoes didn't sell.

Youths from the country looked over his stock, smiled behind their hands, and fled out of the door. When the dealer mentioned reduced prices they traveled all the faster. The only sales the dealer made were to customers who didn't care particularly what they bought, just so it was cheap.

### The Barber Gave Him a Pointer

"This won't do," explained the dealer to another business man who had become chummy with him. "I am doing the poorest business I ever heard of. I'll have to move out and go where shoes are in demand."

"The right kind of shoes are in demand here," replied the young barber. He extended his neatly shod feet. "See these shoes," said he. "They're the new English style," replied the dealer. "Shoes of that grade do not retail for less than five dollars."

"I could have sold twenty pairs like these if I had been supplied, during the past two days," explained the barber. "All the boys like this style. Why don't you stock up with up-to-date quality shoes. The styles you are selling, or trying to sell, were in fashion five years ago."

The dealer asked his young business friend to assist him in selecting a new stock. He gladly complied.

"Now," said the dealer, "when those shoes arrive I want you to inform each of your interested friends that I have the new styles on hand, and will guarantee satisfaction. If the boys want style, they'll get it; there is no need for them to go to the larger towns. Fire away."

### Passing the Good Word Along

His young business friend began to recommend the shoe dealer's stock. Customers arrived and the dealer began to make sales. His late model shoes sold on sight; salesmanship was not required. The dealer began to realize that mouth to mouth advertising was a trade pulling proposition in a small town. Where so many citizens were intimately acquainted, mouth to mouth advertising progressed automatically. If the dealer carried the proper stock he would do a good business with a minimum amount of effort. If he sold up-to-date goods, the news would quickly spread, and his store would be avoided by shoe customers.

The above facts relate to the sale of dress shoes, but work shoes, or shoes for the laboring man, are "best sellers" in the town where farmers trade. The farmer, no matter if he is worth \$500,000, is apt to wear work shoes five or six days in the week.

There is one dealer in a town somewhat larger than the first mentioned, who does a larger business than any of

his competitors. He occupies a modest store and is not very favorably located. But he sells shoes! A friend who was interested in the matter asked the dealer why he had such good success.

"I specialize on the sale of popular shoes," replied the dealer. "I do not attempt to carry a wide variety of styles. I have two styles of work shoes; one style is lighter than the other and sells for less money. Both styles are manufactured by the same firm."

### Specializing in Work Shoes

"I have built up a large business through the advertising which these two styles of work shoes have given me. I sell the majority of the laboring men in this vicinity. Carpenters, masons, farmers, etc., have found that these shoes are exceptionally serviceable. By selling large quantities of these two styles I can make attractive prices."

When retailing shoes in the smaller towns dealers have many problems of advertising to face. Frequently an advertising campaign gives disappointing results. There is only one successful method of advertising shoes. The shoes should be allowed to advertise the store. There are several methods of accomplishing the desired result; but each method bears directly upon the main object. If quality shoes are well advertised, the dealer will be well advertised also.

Newspaper advertising, moving picture advertising, and outdoor advertising are all time tried and successful methods of attracting customers to the dealer's place of business. Newspaper advertising is perhaps the peer of any other method, although in some instances other methods might give better results. The dealer who requires the assistance of a well-directed advertising campaign will find that the three methods, used in conjunction, will be most helpful.

### Using the Movies and Posters

Moving picture advertising has given satisfactory results for the majority of small town shoe retailers who have given the method a fair trial. In the small town the moving picture show is appreciated. Everything thrown upon the screen receives marked attention. The best class of citizens can be found among the audience. In the average small town the moving picture show is the sole place of high class amusement. The retailer who wishes to increase his sales usually does so after throwing advertisements upon the screen.

One dealer who has sold shoes in a small town for more than thirty years believes outdoor advertising is the best method of giving publicity to a stock of shoes. He generally uses posters put out by the manufacturers, and distributes them thoroughly over the country. When a dealer draws considerable of his trade from the rural districts outdoor advertising is especially advisable.

"I didn't appreciate or understand the advantages of window display until I tried it," remarked another small town dealer. "I moved into a store which had two large windows. A salesman advised me to let the show windows assist me in drawing trade. He gave me some advice regarding how to display shoes and I decided to get busy. I wanted to get the trade of the young men and boys; for this purpose I had stocked some nobby styles. I displayed samples of the stock and watched for results. My show window was well lighted; at night the shoes showed up well from the street. While a display such as the one I made would be classed as ordinary in any city, it was superior to anything of the kind which had ever been done in my town."

# ASCERTAINING PROFITS AND VALUE OF STOCK

**The Correct Method of Preparing Annual Fiscal Statement—What Should be Included in Your Assets and the Items that Should be Computed as Liabilities—All Items Should be put at Their Present Cash Value—Different Bases of Appraising Fixtures**

You have completed your business record for 1915. Now the month of January will be devoted to stock taking and probably to conducting your semi-annual clearing sale of odds and ends.

How do you take stock—on what basis? How do you arrive at values and in what way do you compile your financial statement so that it will show you at a glance just where you stand and how much money, if any, you made during "the war year"?

Here is a sample financial statement showing how this important record should be made out.

RESOURCES	
Amount of stock.....	\$2,470
Accounts on books.....	1,235
Fixtures and equipment.....	675
Cash in bank.....	585
Cash on hand.....	90
Bills receivable.....	370
	\$5,425
LIABILITIES	
Amount due on stock.....	\$1,365
Drafts and cheques signed.....	345
Other obligations.....	90
Resources over liabilities.....	3,625
	\$5,425
Resources over liabilities—this year.....	\$3,625
Resources over liabilities—year ago.....	2,400
	\$1,225
Net profit for year.....	\$1,225

In the foregoing case the total stock was found to amount to \$2,470, and with other assets, including book debts, equipment, cash and notes, made total resources of \$5,425. On the other hand, the liabilities of the business, including amount due on stock, drafts signed, and other obligations totaled \$1,800, leaving a balance of \$3,625. Last year, when this dealer took stock, he had a balance of \$2,400, so that his net profit for the year amounted to \$1,225.

If any money has been added to or taken from the business during the year the amount should be added to or deducted from the balance to arrive at the real net profit for the year.

Stocktaking in itself is only the first step towards the making out of an annual financial statement that will show you the exact standing of your business and allow you to judge with a degree of accuracy just what progress you have been making in the matter of profit. A correct yearly statement is of immense value to you, and every care should be exercised in compiling it to make it accurate.

## What to Include in the Summary

The financial statement is a summary of the assets and liabilities of the business. Assets include amount of stock, accounts on books, fixtures and equipment, cash in bank, cash on hand, and bills receivable. Liabilities include amount due on stock, drafts signed and not due, and all other outstanding obligations of the business.

By balancing liabilities against assets, the net worth of the business is secured, and by comparing this with the standing when the financial statement was made out previously, the net profit for the year will be ascertained. You

are then in a position to judge whether profits for the year have been satisfactory.

It will at once be apparent to you that all items should be put in at their present cash value so that the annual statement will be a true reflection of the actual cash value of the business. Book accounts should be put in at their actual collectable value.

Different methods are used in listing figures. Some dealers deduct a certain percentage each year for fixtures. The percentage of reduction is based on the life of the fixture. For instance, if the life of a fixture is estimated at seven years, 14 per cent. plus would be deducted off the cost yearly. Say, if a fixture cost \$100, then the dealer, operating on this plan, would reduce the value of it in his inventory \$14.30 each year.

## Valuing the Fixtures and Store

All dealers do not favor this plan, some arguing that a fixture may be worth as much to-day as it was a year ago, and that, therefore, you should use your own judgment in setting the value of his fixtures. They, at least, should not

OUT YESTERDAY—OUT OF DATE TODAY

be listed at the cost price, because a used article cannot be sold for its cost, even though it may be practically as good as new.

In case you own the building you occupy and wish to include it in the statement, if there has been any advance in the value of the building the amount of advance should be deducted from the net profits of the year to show the exact amount of money made by the business itself. The advance in the value of the building should have nothing whatever to do with the profits of the business. If, however, any improvements have been made in the building during the year, and the cost has been borne by the business, it is then only right that the advance in value should be allowed in the net profits.

Every retailer should size up the condition of his business at the end of the year to find out how he has done in the matter of sales and profits. No one should go on from year to year without knowing exactly what progress he is making in regard to sales, and if he is making sufficient net profit from his business.

# ATTAINING EFFICIENCY IN THE SHOE BUSINESS

**Don't Allow More than Five Per Cent. for Rent, Two and a Half for Advertising, Five for Selling, Five for Administration, One for Light and Heat, and One and a Half for General Expenses—Gross Profits Should be 20 Per Cent. and Net 10**

"Efficiency has become the national watchword in its application to business methods.

"Literally interpreted it means placing one's business on a scientific basis, eliminating lost motion, haphazard, catch-as-catch-can methods, in other words, getting a maximum result with a minimum energy. And it's a profound and beautiful study. We'll never attain perfection. We'll never be as efficient as the generation that follows, even as the past one was not so efficient as is this generation. This is a world of progress, and new and more efficient methods will always be found to supersede the old.

I have been in one store in Cincinnati for thirty-seven years. I mention this because, standing, as it were, upon the same platform and reviewing the procession from one point, I am probably in a better position to note the changes in mercantile methods than is the man who changed his location with more or less frequency and whose observations were made from his experiences, and who was perforce compelled to assimilate the changes more rapidly.

"My first duty when I entered business was to wash the lamps, fill them with coal oil and trim the wicks. I can well remember what a great stride forward we thought we had made when gas was introduced, and we didn't know what a Welsbach burner was. When electric lights came, you all remember the original bulbs and the feeble lights they diffused, we thought when we turned them on that we were giving the public an electrically illuminated display.

"These are a few of the outward manifestations of changes in progress. The evolution in business methods, while not so observant to the eye, is nevertheless equally pronounced and marked.

## The Old Methods Discarded

"When I first became old enough to assume any responsibility we simply bought goods and sold them. We ran our store the best we could, took account of stock the first of the year and had to wait until the books were closed and the balance was struck to know whether or not Dame Fortune had smiled or frowned upon us. We used to wait with fear and trepidation, as we felt that any hope we had for advancement in our positions rested on the result. Later I acquired an interest in the business and participated more actively in the management, and the conviction came to me slowly, but none the less surely, that there must be a better way.

"And so, gentlemen, working along I became obsessed with the idea that we should prepare a yearly budget, that we should analyze our business based upon the previous year's record, and that's always a safe method of making deductions, because we know what we did and we are safe in assuming that we will do as well or a little better. Therefore, our estimates could be made with reasonable accuracy, so we evolved the budget system.

"First, as to buying. We took our sales, deducted percentage for profit, getting down to the actual cost of the goods disposed of, and those figures give us our purchases for next year. We know to a reasonable certainty that if the same ratio of business is maintained for the ensuing year that we can't be overstocked.

"How well this system worked can be attested by the fact that in the past five years our stock at invoice time has increased only to the extent that our sales have increased.

"The buyers know that they cannot buy more than the

figures given them, and that makes them more careful and economical of their purchases. They conserve their buying and economize wherever possible in order that they may safely pass through the season and not be in the position of wanting certain goods and being unable to get them because they have bought too much of something which they shouldn't have, and find themselves stocked up to the limit.

"So, gentlemen, that makes for efficiency. Next we analyze the expense of the past year, and we assume, say, that we should make a net 10 per cent.

"Now, taking round figures, we will say that we did a business of \$100,000 on which we made a gross profit of 30 per cent. We hope to clear \$10,000, which is 10 per cent. leaving us 20 per cent. with which to operate. I use these figures simply as a basis for comparison.

## Can you Maintain These Figures?

"We have fixed expenses, such as rentals, on which there can be no economy practiced. Then comes administration expense, which is salaries of all our non-producing employees. This means everyone excepting the sales clerks. Then there is advertising, light and heat, selling and general expenses. Now, we'll say that 5 per cent. goes for rent, it shouldn't be any more and ought to be less, 2½ per cent. for advertising, 5 per cent. for selling, 5 per cent. for administration, 1 per cent. for light and heat, 1½ per cent. for general expenses, which includes, of course, new fixtures, painting, decorating, replacements, etc., That's 20 per cent. Now there's your budget. Can you maintain those figures? If you can and do, it is as certain as the sunrise you'll make your 10 per cent. clear, and you don't have to wait until the end of the year to find out.

You can figure it out at the end of each month, each week, or each day. You know unless you meet with some unforeseen calamity, such as fire, death or misfortunes on which no calculations can be based, that you'll obtain your desires and that your business will earn for you the amount set down in your calculations. And you should watch it unceasingly. Just as eternal vigilance is the price of liberty, so is it the price of successful business. And that's efficiency.

"If your administration is costing too much, reduce it. If your sales are not being made within your estimate, the sales force is inefficient. It should be changed or reduced. If you are spending more than you set aside for advertising, cut it out. If you like to paint up and put in new fixtures and your figures show that you can't afford it, don't do it. If your light is running higher, cut it short. Impress upon everyone in your employ the necessity of economy. And all that makes for efficiency.

"Your office help will become more efficient. Your sales force will know the price of a job is delivering the goods. Watch your advertising more carefully. You will be surprised yourself what you can save here and there, and how as good or better results can be obtained on less expenditure of money.

"All these things will make you a better merchant. And they'll bring you and your people into closer harmony. They'll know what you know—that it means the advancement of their own interests because no latter day merchant will refuse to divide as generously with his employees as his prosperity will permit.—J. P. Orr, of Cincinnati, in a recent address before Business Men's Association.

# GETTING IN THE MONEY THAT PEOPLE OWE YOU

**How to Word Appeals That Will Have the Desired Effect—Point Out to Slow Payer the Value of Good Credit Standing and Lead Him to Believe that You Have Confidence in His Ability and Willingness to Pay—Rarely Ever Necessary to Resort to Legal Means if Discretion, Firmness and Business-like Methods are Employed**

At the beginning of the year it is advisable to collect all your outstanding accounts and no more favorable time presents itself. In fact the month of January should be the great settling up period.

Have you any system of bringing hard-shelled, slow-pay patrons to time without giving offence or creating trouble? You want the money that is owing you on the books and you desire the continued patronage and goodwill of the customer. You can generally secure all these by giving a little thought and study to each particular case. Do not rush off to a collection agency or a solicitor. You know—as they do not—to a very large degree the characteristics, habits, standing, scale of living and personal peculiarities of each patron who is on your ledger. If you do not then you should not have extended any credit. Now you are competent to deal with your accounts individually and can, except in instances of exceedingly "tough propositions," induce them to pay you much more quickly and graciously than they will yield to the solicitations of an outsider.

If every dealer would make it an invariable rule to "play safe," giving himself the benefit of the doubt at all times, the number of bad accounts on his books would be much smaller. However, there is no chance to get away from them entirely, unless operating on a strictly cash basis. When a man applies for credit, his past record is practically the only thing the merchant has to go by. And it frequently happens that a man whose credit has always been above reproach, for some reason falls into the "slow pay" class, which is the first step toward making him a doubtful risk.

## Give Attention to Collection Letters

Comparatively few retailers have gone into the collection problem deep enough to discover the most effective means of getting the money. Ordinarily they send out statements once or twice, and to those who fail to respond they then make perfunctory appeals through letters.

It is a wanton waste of time and labor to send out collection letters that are gotten up in a haphazard, loose-jointed manner. Simply calling the matter to the debtor's attention is not sufficient when it has reached the point where a letter is necessary. Considerable thought must be given to construction. The whole thing must be worked out the same as an effective advertisement, or selling talk. The viewpoint of the debtor must be considered—the possible reasons why he doesn't pay anticipated, and argument produced that will offset all opposition.

A surprisingly large number of almost any dealer's bad accounts can be collected without even antagonizing the debtor if the proper method of approach is used. The average slow-payer is not entirely devoid of honor, and it has been proved that many who are absolutely bluff-proof and execution-proof will come across with the money when appealed to in the right manner.

That a man's credit standing is of inestimable value to him is a well established fact. The slow-payer either doesn't fully realize that in permitting accounts to run long overdue he is jeopardizing his credit, or else he doesn't thoroughly appreciate the real worth of having a good standing with the business men of his community. Bringing the debtor to understand that withholding payment of his obligations

really works a serious injury to himself is a potent factor in making collections.

## Letter Used by a Western Dealer

The following is from one of a chain of letters used by a Western dealer:

"Your past record does not indicate that you are the sort of man who would wilfully sidestep a just obligation, and we don't believe you are. However, your action in permitting this account to run so long is creating a decidedly unfavorable impression—an impression that is seriously injuring your standing with this firm."

The letter containing this paragraph has been very effective in collecting long standing accounts. The dealer says it has brought settlement in some of the most hopeless cases. Debtors who successfully withstood the attacks of other merchants, assisted by collection agencies and attorneys, have responded to this appeal. There is no question but that it strikes the spot in the majority of cases. It leads the debtor to believe that the creditor still has confidence in his ability and willingness to pay, but warning him that this confidence is being shaken by his delay in settling.

## Another Good Collection Letter

Here's a paragraph from another good collection letter:

"The margin on which we do business demands a strict credit policy. Were we to allow you unlimited time in which to pay this account, we would be obliged to grant others the same courtesy; and though you would not abuse the privilege, there are some who would. For this reason, we must ask that you settle at once."

The dealer in this letter presents a very logical reason why he must insist on immediate payment, at the same time flattering the debtor by causing him to believe that he is considered absolutely good. Either of the two appeals mentioned are specially designed to get the money without giving offence; and this is always the better plan to pursue wherever possible.

## Appealing to Honor of the Debtor

The following is taken from a letter written to a debtor who ignored the first request for settlement:

"Had we not considered you thoroughly honest, we certainly would not have granted you this extension of credit. Your failure to pay at the time agreed, together with your ignoring of our first letter, is a surprise and disappointment to us. However, it has not shaken our faith in your integrity. We still think you'll pay this account and not force us to sue for settlement."

## The Final Appeal Before Suit

The following is from a final appeal before suit:

"We assure you we have no desire to in any way injure your credit standing in this community. We much prefer to protect it, and keep you on our list of 'desirable customers.' A first-class credit is

a most valuable asset to you—its real worth cannot be measured in dollars and cents. Therefore, we ask you, in all sincerity, to think twice before compelling us to take legal action in forcing payment of this account, thereby making public a matter that will seriously impair your standing with all business men of this town. We are going to give you ten days more in which to pay this account and save your credit. Suit will be brought immediately if settlement is not made by the end of this period."

Of course, no dealer can well afford to become extensively involved in lawsuits, nor should this be necessary. However, it is advisable to occasionally make examples of certain hard-shelled debtors for the effect it will have on others. Once you win a reputation for doing as you say you will, money should come in with little difficulty; for delinquents will know what to expect if they don't pay.

#### MR. DAGG RE-ENTERS SHOE GAME

E. A. Dagg, who for a long time was manager of the Calgary branch of Ames-Holden-McCready, Limited, but retired nearly two years ago to enter upon his duties as one of the official assignees for the province of Alberta, opening an office at 328 Eighth avenue west, Calgary, has decided to re-enter the shoe business. For the present he is associated with H. S. Reynolds, who has traveled extensively for the old James McCready Co., Williams Shoe, Limited, and the Canadian Consolidated Rubber Co. They will represent Berlin felts and slippers, a line of rubbers for the Canadian Consolidated Rubber Co., and Craig-Cowan Manufacturing Co. (mitts and gloves), for the province of Alberta and Eastern British Columbia. A number of leather shoe firms will also be represented by them. Mr. Dagg is a public-spirited citizen of Calgary and has always taken a deep interest in the Board of Trade (of which he is a former president) hospitals and other institutions. He traveled for many years throughout the West and is familiar with every foot of the territory. He was employed by Ames-Holden Co., Montreal, eleven years

E. A. DAGG, CALGARY, ALTA.

previous to the amalgamation with the James McCready Co. some five years ago, and took charge of the Calgary warehouse when it was opened. A host of friends will welcome him back in the shoe ranks.

#### SUDDEN DEATH OF MR LINDSAY

With startling suddenness, death came to John Knox Lindsay, of Toronto, financial manager of the Ontario Division of the Canadian Consolidated Rubber Co., at the

THE LATE J. K. LINDSAY, TORONTO

family residence, 104 Albany avenue, Toronto, on December 26th. He had suffered a temporary attack of heart disease, but had recovered sufficiently to resume his duties. A few days later he complained of feeling unwell and returned to his home. He was sixty-two years of age and was born in county Down, Ireland. Educated in the Old Country, he served as a banker for some years and then, yielding to a spirit of restlessness, decided to travel, which he did extensively, sailing both the Pacific and Atlantic oceans. He then came to Canada and followed banking, being in the service of the Canadian Bank of Commerce. He was next connected with the Fogarty Shoe Co., of Montreal, as financial manager. Leaving that city he settled in Toronto, assuming the duties of secretary-treasurer of the J. D. King Shoe Co., then the largest manufacturing firm in the footwear line in the Dominion. In 1889 he resigned in order to become a member of the Robinson & Lindsay Rubber Co., which was conducted for a number of years. In 1910 he entered the service of the Canadian Consolidated Rubber Co. as financial manager for the Ontario Division. His funeral was largely attended, many beautiful floral emblems being sent by the local staff of the Canadian Consolidated Rubber Co., T. H. Rieder, vice-president and general manager; R. E. Jamieson, general sales manager; Walter Binnmore, treasurer, Montreal, and others. R. W. Ashcroft, of Montreal, publicity manager of the company, represented the head office at the last sad rites, the remains being interred in Mount Pleasant Cemetery. Mr. Lindsay is survived by his wife, two sons and two daughters. His passing makes another break in the ranks of the veteran shoe and leather men of the Dominion for, by his quiet manner and courteous disposition, he endeared himself to a wide circle of friends. Mr. Lindsay was one of the most capable accountants and financial men in the profession, with a comprehensive grasp of affairs, his early banking training qualifying him thoroughly for the responsible posts that he filled with credit to himself and satisfaction to those whom he served.

# SHOEMAN SEES HOW OTHER STORES DO THINGS

**He Goes Out to Get Fitted With Certain Kind of Shoe and Has Some Interesting Experiences—Was Told in One Shop That He Was Wearing the Wrong Style and Then He Became So Disgusted With the Treatment That He Walked Out**

Editor, SHOE AND LEATHER JOURNAL:

Sir,—May I have space in your Journal to recount my experiences of the past week in a Montreal shoe store. Before I proceed, I would like to say I worked as a salesman for 15 years in some of the best shoe stores in Canada and United States. Last Monday morning I decided my shoes were pretty well through their journey, so I strolled down street to purchase a new pair.

Now I always wear a straight last vici kid bal, price from \$7.00 to \$9.00. The first shop I went into was fitted up with expensive fixtures. The clerks looked very immaculate, and, in fact, the surroundings were such as to give a customer a good impression. But I was doomed to be disappointed. On entering the store I noticed two salesladies and one salesman standing about half way down the aisle, holding what seemed to be a very interesting conversation. I sat down on the nearest seat and waited for one of these clerks to come over to me. Presently he strolled along and inquired if I wished a pair of shoes. I asked him to show me the nearest style he had to the ones that I was wearing. He did not consider it necessary to sit down on the fitting stool and take my shoe off. Instead, he asked what size I wore.

Now, I generally wear 8½ B or 9 A. As soon as I told him he informed me they did not have my size. Remember, I had not looked at a shoe in that store. I then went down to the next store, and, oh, such a change. A salesman was waiting at the front of the shop and as soon as I got inside he stepped up and inquired what he could do for me. On being told what I wanted, he asked me to be seated. Then before asking any more questions he took off my shoe, measured my foot, and in fact, showed that he was a real, live salesman who understood his business. He brought a vici kid blucher on a fairly straight last and asked if I cared for that style. I explained that I wanted a bal, so he brought me a velour calf straight last bal. As I said before, vici kid is all I ever wear, consequently his styles did not suit.

When he saw I was not satisfied with his shoes he put on my shoe, laced it up and took great pains in explaining that his firm had been unable to get that particular style. However, he offered to have a special order sent in and have my shoes for me just as soon as possible and not charge me more than the regular price. Need I say this salesman appealed to me? He was willing to do his level best to satisfy me, even though he lost a good sale. I told him I wanted my shoes at once and would try down street. When I left him I had a feeling that his firm appreciated me going into their store.

## **This Salesman Knew It All**

The next store I struck was a smaller one which tries to cater to a high class trade. They had just the shoe I wanted, but the nearest size they had was 8½ C. The salesman, who by the way, was decidedly polite, wanted to put an insole in the shoe in order to make it fit better. When he thought he was losing the sale he called the head salesman, who came down as though he would bite my ear off, and enquired what my trouble was. It did not take very long to tell him what I wanted, but imagine my feelings when I heard him say I was wearing the wrong style shoe

and should have a swing last. I haven't worn a swing last shoe in 15 years. Again I explained what I wanted, but with no more success. I finally became disgusted and walked out, after lacing my own shoe.

My next stop was a store which prides itself on being able to "fit the feet." A bright young salesman came forward and asked me to have a seat, then he asked the style shoe I would like and immediately brought it out. After trying on two shoes I had what I believe is a good fit. I paid for them and came out, well satisfied with my treatment. I hope that some young salesman may get a pointer from my remarks. My experience always has been, that if a man knows how to address customers he will have little difficulty in pleasing them—and efficient service and effective salesmanship are what tally today on the road to success in the shoe game.

Yours, etc.,

ST. CRISPIN.

## **HE WILL GO BACK TO THE FRONT**

Norman Sutherland, who is a son of C. S. Sutherland, manager of the Amherst Boot and Shoe Co., Limited, Amherst, N.S., was wounded by a Hun bullet in France early in November, being shot in the arm and thigh, the wound in the arm cracking the bone. Mr. Sutherland, who is a member of the 6th Field Co., Canadian Engineers, is now in the Duchess of Connaught's Red Cross Hospital at

Cliveden, England, and expects to leave soon again for the front. A number of the employees of the Amherst Boot and Shoe Co. have enlisted for overseas. Among the first to join the colors after the outbreak of war was Roland Hill Chapman, of the bookkeeping staff, who was killed at the battle of Langemarck, and Horace Garrison, formerly employed in the cutting room who met death at Ypres. They were both fine types of young men, in the prime of manhood.

### ORGANIZING BATTALION FOR THE FRONT

Lt.-Col. W. H. Floyd, who has been in the shoe, men's furnishing and clothing line, in Cobourg, Ont., for the past twenty-nine years, is disposing of his business. He is now engaged in organizing the 139th Battalion, C.E.F., as he has always been an enthusiastic military man. His father, the late Major Floyd, was town clerk of Cobourg for many

years, and the subject of this reference was born in that centre, being educated at the public school and collegiate institute. Lt.-Col. Floyd has held many important positions in the gift of the citizens, being a member of the municipal council four years, a public school trustee for nine and mayor of his native town in 1903. Lt.-Col. Floyd served over 40 years in the 40th Regiment, commencing as mess boy and retiring from the command of the regiment on May 20, 1909. He was appointed Brigade Major of the 9th Infantry, March, 1914, and commanded the 9th Infantry Brigade in Annual Training in 1913. This military merchant as he has been called, served under the late Col. Cubitt, O.C., 45th Regiment, and also commanded a company under the late Colonel Bog in the 16th Regiment. He had command of a Company of the 46th Regiment under Colonel Ward, at the Duke's Review in 1911, and completed his military education at the Royal Military College with a staff course. He is now, as already stated, engaged in organizing the 139th Battalion, C.E.F.

### FIGURE PROFITS ON SELLING PRICE

Because the remuneration of salesmen, for instance, is figured on a percentage of the selling price, and is not figured on the cost price. Therefore, the selling price plan works in harmony with that.

Because the percentage of expense of doing business is based on the selling price.

Because the sales totals are always given in books of records. Cost totals are seldom, if ever, given.

Because a profit must be provided for two items of capital. On the capital invested in merchandise and on the capital necessary for operating expenses and other expenses not properly chargeable to merchandise account. This is only possible by figuring a profit on the selling price.

Because it indicates correctly the amount of gross or net profit when the amount of sales is stated. If you are

figuring your percentage of profits, through the selling price, a statement of gross sales for the day, or month, or year, would be a pretty accurate indication of what you should expect in the way of profit. The percentage of profit on sales is indicative of result of a year's business—percentage of profit on cost is not.

Because no profit is made until the sale is actually effected.

Because, by harmonizing your entire plan of figuring your percentages relative to profits in business, etc., with the entire plan of which your merchandising is harmoniously developing, you will not consider your selling price, percentage of profit and expense, etc., entirely different from anything else.

### MR. LENNOX RE-ELECTED VICE-PRESIDENT

John Lennox, of John Lennox & Co., wholesale shoes and traveling goods, Hamilton, Ont., has just been returned by acclamation as third vice-president of the Ontario Commercial Travelers' Association, in the interest of which body he has always taken a warm interest. Although a busy man he has found time to give assistance and encouragement to many institutions outside of his own large business. He is a director of several local organizations, and among other positions filled by him have been Commodore of the Royal Yacht Club, president of the Hamilton Liberal Association, president of the Hamilton Rowing Club, president of the Hamilton Operatic Association, chairman of the Committee in charge the Centennial celebration of Hamilton in 1913, while for many months he has been active in recruiting, taking a deep concern in military matters, for his loyalty and enthusiasm have been manifested in connection with the Patriotic, Red Cross and other funds. Mr. Lennox is a native of Wellington county and, shortly after the death of his father, who was a merchant, he located in Toronto in the sixties, but later removed to Hamilton where he has ever since resided. For a number of years he was on the office staff and traveling force of T. C. Kerr & Co., and later entered into partnership with William Griffith (now deceased)

in the wholesale shoe business. In 1890 he went into the wholesale line on his own behalf and some years later bought the building in which he was employed as a boy, and on the spot erected his present large and commodious warehouse.

# DIFFERENT TYPES OF SHOE CLERKS I HAVE MET

The Fellow Who is Indifferent and Impolite, the One Whom the Boss Will Not Let Alone, the Quick, Quiet, Pleasant Chap Who Knows His Business is One Who Tallies—Never be Satisfied That You Cannot Reach Much Higher Plane of Service

By "ONE WHO KNOWS"

The last few months have been rather trying on the nerves of a great many shoe dealers throughout Canada. As an old time shoeman I would like to offer a few suggestions, hoping that I may be able to help some one who is struggling along and always in fear of seeing a bank messenger coming to present a draft for more money than the retailer owns.

Does the small retailer ever stop to consider why the department stores and large shoe firms get lots of business while he (the small retailer) has his store empty so far as customers are concerned?

There are a great many good arguments to put forth on this subject but I believe a little plain talk would do considerable good just now. The Christmas trade is now over, and all stores will feel a slump in their cash receipts.

Let's take a store in a small city, for instance, say a city of from 15,000 to 50,000 population. We'll go into the best store in town to buy a pair of patent leather recede toe bals. Now, our first thought is about our shoes; our next thought is who is going to sell them. A young man steps up to us and enquires our business in this manner—"Is there something you want?"

That looks rather crude on paper but, believe me, it's a common expression among a large number of shoe salesmen.

Well, we tell him we want to see a patent leather bal with a recede toe. (We are still standing at the front of the store.) After taking a couple more chews of his gum he asks, "What size do you wear?" By this time we have a bad taste in our mouth. The store does not appear as nice as when we first came in. We say "Oh, about 8½ B or 9 A."

We feel rather small when he looks first at our face and then our feet and says, "We haven't that size." He never offered to show us what he did have in stock.

That's a fine reception for a prospective customer. However, we go to Mr. Blank's store, hoping our luck will be better. Now Mr. Blank has very attractive windows, always nicely trimmed, the clerks are immaculately dressed, and, in fact, the general surroundings are such as would give a stranger a good impression.

## The Officiousness of the Boss

Mr. Blank is sitting at his desk in the centre of the store with a very stern expression on his face. "Business cannot be as good as it should be" is our opinion. He growls to a clerk to come forward. The young man would be a good salesman if he wasn't scared to death. But Mr. Blank believes in making his staff obey him. He has the idea that if a clerk is not afraid of him he (the clerk) is too independent, and immediately undertakes to break his spirit.

Now everything in this emporium is spotlessly clean. No dust on anything. The clerks want to do their best to please us but are nervous because they can feel old Blank's eyes on them.

However, this young fellow comes forward and asks if we wish a pair of shoes. He is very polite and invites us to be seated. He takes off one shoe and looks at the size, then gets his measuring stick, puts our foot on it and looks wise—all very nice. Old Blank has trained him well. We explain the style shoe we want and he goes away to find it. He knows the stock all right and no doubt could get what he is after, only old Blank comes down out of his office and

stands right alongside of us. After waiting about five seconds he goes over to the clerk and enquires what is wanted. The clerk obediently explains. Old B. is evidently afraid of losing a sale so starts in to hunt himself. They finally bring down a patent leather bal, size 8½ B, but on a swing last.

## Lost Good Fat Sale After All

Now, if the clerk had a half chance to talk he, no doubt, could have put up a convincing argument as to why this swing last was better for our foot than the straight last. But, no. Old B. was getting shaky. He couldn't possibly afford to let \$7.00 in real good money leave his store so easily. He undertook to make the sale. I often wonder how these old—I was going to say "duffers"—would feel if some other store treated them that way. We didn't like the shoe and we loathed the service. Of course, we went out and down to the next store.

It was a nice place that advertised its own brand of shoes. Inside the proprietor was standing talking to a couple of his clerks. He had a pleasant face—one a customer liked the first time he saw it. Before we had closed the door after us a bright young fellow was standing before us saying, "Good morning, gentlemen, just step over here." We felt at home right away. The proprietor came over, gave us a smile and walked away. He evidently had confidence in his clerks. The young man brought us a few shoes, none of them exactly what we wanted, but before we had a chance to demur he had one on our foot. The fit was good and when we took another look at the style we were favorably impressed with it.

The clerk was a quiet, pleasant fellow who was evidently willing for us to pass judgment on the shoe without fear of interruption. We explained that this was not the shoe we wanted, but if he would just lay it aside we would look at it after trying the next nearest style. He fitted three more shoes.

## Both Enthusiastic and Confident

Every shoe had its own particular merits, which were carefully explained to us. But one point we noticed was this—none of his shoes had weak points. They were all good. This man had confidence in the goods he was selling. He was enthusiastic about his work. You could tell to look at him that he took a genuine interest in the store and its stock. Could we resist such a salesman as this? We bought the first shoe he showed us and left his store well satisfied with our purchase.

Now, I know it is very easy to preach to clerks about what they should or should not do. We are all getting a little tired of this; but if any young man who is depending upon his abilities as a shoe salesman will keep his wits about him and always be ready and willing to learn something more, I honestly believe he will not be satisfied with himself. It's the self-satisfied man who is a failure. Look around you and see if this is not true.

Don't hesitate to let the public know that you are in business. The best of us need waking up at times and even a band must make a noise once in a while or its friends will forget its existence.

### LIVE WIRE IN RUBBER SHOE BUSINESS

O. J. Killam, who has charge of the new branch of the Kaufman Rubber Co., at 93½ Germain street, St. John, N.B., and is also manager of the branch at Truro, N.S.,

O. J. KILLAM, TRURO, N.S.

has been identified with the Kaufman Rubber Co. for many years and has established a wide and intimate connection with the trade in the Maritime Provinces. Mr. Killam was born in Yarmouth, N.S., in 1879, and entered the shoe game in 1893 as a clerk in the retail store of W. H. Dane, of Yarmouth. Six years later he took a position with the St. John branch of Ames-Holden-McCready, Limited, remaining with them five years. In 1904 he became manager of the Maritime Provinces branch at Halifax, of the Robinson & Lindsay Rubber Co. When the Kaufman Rubber Co. started operations he was offered the management of the Maritime Provinces, which position he has filled faithfully and successfully. Mr. Killam is not only a good shoeman but an expert rifle shot, and has taken part in various meetings in different parts of the Dominion, capturing several prizes. He also takes delight in motoring and has always evinced much interest in clean, healthy sport of every character, as well as in fox ranching in Prince Edward Island. A diligent worker, he has made many warm friends in all parts of the lower provinces by his aggressive business methods and giving his customers splendid service.

### AGAINST TRADING STAMP ACT

The "popular voting" contest put on by Business Boosters, Limited, in West Toronto recently, has been judged illegal by Judge Winchester. After listening to the arguments pro and con, his Honor found the promoters guilty of doing business in contravention of the Trading Stamp Act of 1905.

Voting contests have been held in various places in Canada during recent years, and the Retail Merchants' Association were frequently asked to test their legality. On account of the cost that would have attended their efforts if they fought the point away from home, the matter was deferred. However, when Business Boosters opened for

business in Toronto, the home of the head office, the opportunity was seized. Secretary E. M. Trowern, of the R.M.A., states that had the case gone against them, the association would have gone to the Government for amendments covering the deficiencies of the Act.

While the promoter of the contest was found guilty, the judge on request granted right to appeal, and, after the matter has been dealt with by the Court of Appeal, sentence will be imposed if the judgment is upheld.

### MR. WRIGHT GOING TO DO HIS BIT

A. V. Wright, who for some years past has been manager of the shoe department of Joyner's Department Store, Moose Jaw, has resigned his position to enlist for foreign service. He has been taking a course of instruction for a sergeant, and will join the 128th Battalion, C.E.F., in that capacity. Mr. Wright began his connection with the shoe trade some 11 years ago, starting as a driver on a delivery wagon and progressing until he became manager and buyer. He secured his first position with the McRobbie Shoe Co., of St. John, N.B., and was afterwards with Percy J. Steele, of that city, who is closing out his stock preparatory to joining the colors. Desiring to see the West, Mr. Wright went to Winnipeg five years ago, and was for some time on the staff of the Regal Shoe Store. He was born in Cheltenham, England, and came to Canada 14 years ago. It is interesting to note that his retirement from the staff of Joyner's Department Store to go to the front makes no less than ten employees of that establishment who are doing their bit. Among these is Lieut. Strachan, of the shoe department, who is now on active service. Of the number one has been killed, three wounded and the remainder are on the firing line or under training, so that the Joyner store has certainly done its share in contributing to the cause of King and Empire. Two of Mr. Joyner's sons are at the front and rumor says that, were the proprietor a little younger, he too

A. V. WRIGHT, MOOSE JAW, SASK.

would be right in the firing line. Mr. Wright's many friends in the shoe trade, while regretting his departure, certainly admire his self-sacrificing spirit, his loyalty and his enthusiastic patriotism.

# ARE YOU AND YOUR STORE RUNNING IN A RUT?

Shake Yourself and Take a Fresh Hold—Be Foremost and Show What Stuff You Are Made of—Clearing Sale is the Safety Valve of the Retail Line and After That Have a Business Vacation—Don't Take a Back Seat for Anyone in Your Town

By A. E. EDGAR

"When I was a little fellow I was inclined to wait to be coaxed," said a successful business man a few days ago.

"I expected sympathy, but got an impatient shake boys were building a dam. They were wading, carrying stones, splashing the mud and shouting orders, but none of them paid any attention to me. I began to feel abused and lonesome, and was blubbering over my neglected condition when Aunt Sally came down the road."

"What's the matter, sonny? Why ain't you playin' with the rest of the boys?"

"They don't want me," I said, digging my fists into my eyes. "They never asked me to play with them."

"I expected sympathy, but she gave me an impatient shake and a push."

"Is that all, you little ninny? Nobody wants folks that'll sit around on a bank and wait to be asked to play," she cried. "Run along with the rest and make yourself wanted."

"That shake and push did the work. Before I had time to recover from my indignant surprise I was in the middle of the stream, and soon was as busy as the others. But for that shake and shove I might be neglected and waiting to this day. It's the people who help push instead of waiting around to be pushed that succeed."

That is just what is the matter with a lot of merchants these days. They are sitting around, waiting to be pushed. Some are moaning away to themselves about the bad business conditions. Others are telling their friends about the vast inroads the mail order houses are making into their trade. Still others are complaining about the weather, the condition of their particular line and of a thousand other

things. They are waiting to be pushed and they need a good shaking up, too.

## Don't Lay Down on the Job

Don't be satisfied with a poor business.

Don't be satisfied with a mere competence.

Don't take a back seat for anyone in your town.

Be a leader.

Be a success.

Where has your ambition gone? You once had lots of it. Recall it and dream those old dreams over again. Then put your brains to work and your hands will not have to work so hard.

Don't let a competitor take the place you once coveted in the commercial circles of your locality. At one time you intended to be a leader. Why have you laid down on the job?

"As a man thinketh, so he is."

Shake yourself! Take a fresh hold. Show yourself and your beloved ones, as well as the outsider, what stuff you are made of.

Be first and foremost in your line of business. You can. But you must not wait to be pushed into first place. A racer has to strive and strain to "get there," you will have to do the same. "The race is to the swift." Get into your stride.

Don't dilly-dally and say, "I would like to," "say, I WILL."

What more does a man require to make a success of life than determination? Nothing more is necessary. If he

92nd Highlanders. Enlisted in Toronto in August, 1915. Getting ready there. One of three brothers in the service. Son of J. P. Donald of Pictou, N.S.

says, "I WILL," and sticks to it, he will begin to climb at once.

If a merchant has sufficient capital to make a living out of his business he has enough to make a fortune.

### Keep Moving and Arouse the Natives

He should make his business carve for himself and his family a place among the foremost in the town where he resides. If it gets too small, he should move to larger fields. Keep moving.

Arouse, ye sleeper,—and arouse the natives.

We are addressing the merchant who has been at it for a few years. He started out well, almost too well, in fact, for his first efforts appear to have exhausted his stamina. He fell down by the wayside.

It is said that not five per cent. of all the men in the world succeed. What is success? It does not necessarily mean the accumulation of a lot of money, although that is the usually accepted sense in which the word is used. It really means having a satisfactory aim in life which is eventually achieved.

A merchant in a town of five hundred cannot expect to make as much money as one in a city of twenty thousand. The chances are not even, but he in the smaller place often does surpass the other in the accumulation of wealth. But if he only succeeds in making himself felt in the community, if he becomes a power commercially and takes his place among the first socially, he has done more than the other who only achieves wealth.

### Take Stock and Weed Out Undesirables

But don't let us moralize too much. We want to do a little pushing, just as Aunt Sally did.

Let's begin over again, brother. Take stock. Things are not so bad as they might be, by a long shot—but they are bad enough. It's up to you to make them better. Here's how to do it.

Start at the front door and go through the store carefully. Look at the stock on hand, the real merchandise, we mean now, and see if it isn't—

Dusty—

Neglected—

F. L. WAGNER, AYLMEER, ONT.

Who is manager of the Aylmer Shoe Co. and has retired from civic life after being mayor of the town for the past two years.

Poorly assorted—

And partly out of date.

Never mind, most stocks are that way—that's why only five per cent. succeed.

Now make a fresh start. Divide the sheep from the goats, the saleable stock from that which should be sold—for what it will bring.

Then have a clearance sale and sell it. Make the prices so low that the stock will be sold. Every cent you get for the old stuff will be just so much more capital with which to buy goods that are in demand—goods that will pay you a profit.

All the old stuff the merchant holds on to will never pay him a profit in the world. All it is doing for him is harmful. It is turning public opinion against the store. It is giving the merchant and his clerks commercial dyspepsia. It is absorbing capital that ought to be working and making a profit.

The clearing sale is the safety valve of the retail business. It is a means of getting rid of surplus stock and of keeping stocks down to a safe and sane level. Now is the time to get after the old lines and clean up.

### Getting New Stock and Fresh Start

Tell your customers that you are cleaning up shop for a fresh start. Tell them that you have decided to get a new stock—if they will do their share and help you get rid of the old. But make it so tempting that they will not think of refusing. Make the prices so enticing that they will not only buy the old stuff, but thank you for the chance.

After your sale is over take a vacation. Did you ever take a "business vacation?" Don't know what it is, do you?

A business vacation is one spent visiting business places. The wholesale houses will be some of the points of interest in the tour you will take. Retail firms in the same business will be others.

### Purpose of Business Vacation

A vacation of the ordinary kind is usually undertaken for one, or both of two reasons: to have a good time; to recuperate and restore lost physical and mental powers. The business vacation is to be taken for two reasons—and goodness knows the merchant usually needs it—to have a good time finding out how others get over the rough places, how they make good, and in comparing their failures with his own successes, and in getting recuperation in the knowledge of new business principles, new lines of goods, new styles, new ideas for the betterment of his own business.

Having sold an old stock the merchant will straightway purchase a new one. That is right. But he will not think of putting it on the same old shelves and in the same old cases. Not on your life.

### Giving Goods fitting Surroundings

He will think more of the new stock than he did of the old and will want to give it suitable surroundings.

There you are. He is getting out his catalogues and is going after new equipment. Good boy!

Hurrah! There goes the paint brush, too. Why before he knows it the people will think a new merchant has come to town. They will be sure of it when he has a grand opening.

Let us hope that they are right and that the new merchant will not fall into his old tricks again.

Do you feel that it is in you? Then get after it. Let your new motto be: FORWARD—

# HONOR AND DIGNITY OF THE SHOE TRADE

**There Should be No Antagonism Between the Dealer and the Manufacturer—  
They Should Co-operate and Look Forward to Mutual Advantage—Guide to Many  
Vexatious Problems—How to Settle Various Matters that May Arise—Both Ends  
of the Business Should Work in Harmony and in Scientific Co-operative Effort**

"Some Ethics of the Shoe Trade" is a neat, compact booklet which was issued a few weeks ago by the conference committees of the National Shoe Retailers', the National Boot and Shoe Manufacturers' and National Shoe Wholesalers' Associations. It deals with many live subjects of interest to the retailer, under a variety of headings and, at the request of several Canadian dealers who have not been able to secure a copy, owing to the limited supply, the following is reproduced.

## Complaints and Their Proper Adjustment

It is generally conceded that the consumer has been served with too free a hand in regard to complaints of shoes; that they have been led to expect too much from an industry that has to work with uncertain conditions, and that perfection cannot be demanded any more from the shoe industry than from any other industry.

It is strongly recommended that the retailers do not guarantee shoes to the consumer in any manner whatsoever, and to treat each complaint on its merits with justice to the manufacturer, the consumer and the retailer.

It is advised that when a consumer returns a worn shoe with a complaint, the case be adjusted on the basis of the consumer paying for the service and value received out of the shoe; that the manufacturer be treated with fair consideration and wherever possible shoes be repaired; and when the complaint is settled with the customer, the manufacturer should stand no more than his proper share, based upon preventable imperfection in workmanship and leather.

We strongly caution the dealer against guaranteeing such materials as patent, enamel and Russia leather as well as fabrics of every sort and as much as possible prevent the

use of the word "Guarantee." It is too broad a term to be used in connection with an industry that under the most favorable conditions is bound to have its complaints; and it should be remembered that in the end the dealer must pay in increased cost the complaints that are made good.

The manufacturer on his part should not take advantage of the fact that shoes made of these materials are not guaranteed but should use the best of his several kinds consistent with the grade of the shoes he aims to manufacture, avoiding experiments except after mutual understanding.

Patent leather should not be sold without calling attention to the fact that it is likely to crack or check.

Wherever patent leather publicity is given, the unreliability of this leather from the standpoint of service should be constantly referred to.

In your dealings with the manufacturer on patent leather the very best judgment and common sense should prevail in deciding complaints; the assumption being that a manufacturer realizing the treachery of this leather uses the best patent stock possible for the grade.

The following caution card placed in the shoe or the carton is recommended to the dealers of the United States in the sale of patent enamel shoes:

"This pair of shoes is made from patent or enamel leather, and its wearing qualities cannot be determined until put to actual test by the wearer of the shoes.

"The enamel being a veneer and not a part of the skin cannot be guaranteed to wear. It is liable to break, chip, check, or peel.

"In justice to the purchaser and wearer, he should be fully informed and made to understand

**E. J. KELLY, BROCKVILLE, ONT.**  
Who is again a member of the town council of that progressive centre

**R. W. G. BLOOR, INGERSOLL, ONT.**  
Who was returned by acclamation as an alderman, making his second term

**C. E. CLEMENTS, CATHAM, ONT.**  
Who once more headed the aldermanic poll in the Maple City

## SHOE MERCHANTS WHO MAKE LIVE ALDERMEN

that there will be no redress on these shoes from the dealer, from whom they are bought, after once worn.

"If after wearing the enamel checks, or loses its lustre, wash with lukewarm water—dry with a woolen rag and put on a little vaseline—and rub with a woolen rag until it is absorbed. If treated in this manner, the shoes will look clean, will keep bright and have a better appearance."

Question: Are we not expecting, and do we not lead our customers to expect too much of patent or enameled leather, when we realize that the thing which troubles is the enamel rather than the skin itself?

### STANDARD CARTONS

At its convention, January 14th, 1914, the National Boot and Shoe Manufacturers' Association adopted standard measurements for cartons as follows:

	Length	Width	Depth
Men's.....	12 $\frac{3}{4}$	6 $\frac{1}{2}$	4 $\frac{1}{8}$
Boys'.....	11 $\frac{1}{4}$	6	3 $\frac{3}{4}$
Youths'.....	10 $\frac{1}{2}$	5 $\frac{1}{4}$	3 $\frac{1}{2}$
Women's.....	11 $\frac{1}{2}$	5 $\frac{1}{4}$	3 $\frac{1}{2}$
Misses'.....	10 $\frac{1}{2}$	4 $\frac{3}{4}$	3 $\frac{1}{8}$
Children's.....	8 $\frac{3}{4}$	4 $\frac{1}{2}$	2 $\frac{3}{4}$

### Outside Measurements

In order to eventually standardize the cartons, it is recommended that whenever new fixtures are built, the retailer write to the secretary of his local Association or the National Boot and Shoe Manufacturers' Association, either of whom will be pleased to furnish the measurements for the standard cartons as adopted in conference between manufacturers and retailers.

### Special Carton Papers

The conference committee recommend first of all that retailers give more thought to the question of cost and to the difficulty of obtaining perfectly matched carton papers as required by a great many retailers.

It was brought out at the conference that these papers oftentimes, in fact nearly always, have to be bought in fair sized quantities to get the exact shades and qualities required, while the order for shoes does not consume even a small part of the paper bought, which leaves the manufacturer with a lot of paper on hand.

This is an unfair and unjust tax on the overhead cost of shoes, and the committee advises all retailers to co-operate with manufacturers along lines tending to decrease this waste.

It is suggested that retailers who do use special paper have a quantity bought by one of their manufacturers, and that other manufacturers be instructed to draw from the first named manufacturer for the necessary amount of paper required for smaller orders.

### Size Codes

The conference committee three years ago recommended that size codes be simplified to the end that we would use only two systems, plain American size marking or the simple French system.

This year the conference committee unanimously adopted, after intelligent discussion, the recommendation that shoe retailers be advised to have all shoes marked in plain American sizes, and that French systems be abolished on the basis that they are intended to deceive the customer, and they place temptation in the way of incompetent clerks to misfit.

It is worth while pointing out that the leading stores all over the country in the last year or two, have adopted this suggestion, because it is based on common honesty and

square dealing, and enforces the rule that all good shoe retailers are anxious to enforce, that of proper fitting of feet.

### Cancellations and Deliveries

To save the waste and expense in the trade that result from cancellations, we earnestly recommend the shoe dealers of the United States to be extremely careful in placing orders; to making a purchase in the true spirit of a regular contract;

(Continued on page 51)

### A THOROUGH RUBBER MAN

(See Front Cover)

Mr. Chas. N. Candee "arrived" a good while before the fact became noised abroad. He is that sort of a man. He is a worker and inclined to keep behind the gun. He has an abhorrence of the spot-light. For many years he was the late H. D. Warren's able lieutenant, and, aided in the founding of the great business which is now known as the Gutta Percha and Rubber, Limited, and of which he is today vice-president and managing director.

He was born in Rochester, N.Y., a little over fifty-five years ago, and commenced his business career in 1879 as a clerk in the wholesale and retail rubber establishment of O. W. Clary, of Syracuse, remaining with them for seven years. In 1886 he removed to Toronto to take the assistant manager-ship of the Gutta Percha and Rubber Manufacturing Company, then shortly organized. He was appointed secretary of the company in 1889, and when the business was re-organized January 1, 1913, he became vice-president and managing director.

Mr. Candee can hardly remember the time when he did not think rubber. It runs in the family. The first license to manufacture rubber goods was issued by Chas. Goodyear to Leverette Candee, and from that time rubber seems to have been as much a part of the Candee family record as its name. He was born, by the way, on March 2nd, at the regular opening of the rubber season. He has had in the rubber industry of Canada a history of which he may justly feel proud.

Mr. Candee is a man amongst men. He is a great lover of manly sports and his greatest diversion, probably is, to get away to the wilds for a hunt or a fish with a few well chosen friends. He is an ardent devotee of golf, but takes this pleasure in moderation and never lets it interfere with his business or his church, for Mr. Candee is an active figure in St. Paul's Anglican Church, the largest in Toronto. He is also a lover of "the wet sheet and a flowing sea," and in summer, as a member of the Royal Canadian Yacht Club, takes occasional enjoyment out of our inland waters.

When Mr. Candee removed to Toronto he took out naturalization papers and became a Canadian citizen, and has ever since taken a wide and deep interest in the development of his adopted country. He is not only an active member of the Board of Trade, but is connected with the principal clubs, and is a governor of the Toronto Conservatory of Music and a member of the board of management of the Toronto Hospital for Incurables. He has taken a great interest in Patriotic and Red Cross work during the past few months and has been made hon. secretary of the Canadian Red Cross Society, Toronto Branch.

Apart from all his affiliations, C. N. Candee is a man well worth while, and those who know him best appreciate his worth most. A gentleman to "the manor born" he challenges the respect and confidence of all who are brought into business contact with him, while his absolute freedom from "side," makes him alike persona grata to both business acquaintances and employees. When you mention his name it invariably invites friendly, favorable comment.

# HOME OF THE ROBSON LEATHER CO.

The Thriving Town Often Called the Manchester of Canada, Where the Busy Wheels of Industry Move on Various Operations from the Manufacture of Automobiles and Pianos to the Production of Shoe Upper Leathers

**O**SHAWA, which is situated about thirty-five miles from Toronto, on the shores of Lake Ontario, is now connected by three trunk lines of railway with the rest of Canada and the world at large and is one of the brightest of those on our southern frontier.

A BUSINESS SECTION, OSHAWA

It was first settled in 1816 and in the space of a single decade had attained some importance, although but a struggling village.

Owing to the splendid agricultural country surrounding it and its lake communication with Toronto, Kingston and Montreal, its development was assured and soon it became a regular port of call in those days when no such thing as a railway was known in Ontario. When the railroad was built it retarded some of this growth but the town soon made up for it in other ways.

Oshawa was incorporated as a town in 1879 and from that time, through its policy of encouraging manufacturing enterprises to settle within its borders, it has made rapid strides, not only with regard to population but the character and extent of its products.

It has to-day a population, including that of Cedardale, of about nine thousand and the

inhabitants are looking forward to the day when they may claim the proud position of being a fully qualified city. It is a town of comfortable homes as well as of busy industry and the many handsome residences, churches, schools and other public buildings proclaim its people as having not only a great deal of business enterprise but taste, culture and progress.

Oshawa has in addition to an abundant supply of electric energy, and which promises in the near future to be largely increased, a fine

MAIN THOROUGHFARE, OSHAWA

waterworks system, a street railway and all the facilities and incentives to development and growth that an ambitious town needs these days.

The principal industries are those representing the manufacture of motor cars, malleable iron, white wear, pianos, etc., but the most important as well as the oldest enterprise of the town is that of the ROBSON LEATHER COMPANY, known for over half a century as the Cedardale Tannery. This industry as much as any has not only helped to make the town but brought it fame throughout Canada and abroad, for ROBSON LEATHERS are known practically all over the world.

The Robson Leather Co. Limited  
Oshawa, Ont.

CHAS. ROBSON, PRESIDENT

The Robson Leather Co. Limited  
Oshawa, Ont.

FRANK W. ROBSON, SEC.-TREAS.

# EVOLUTION OF A LEATHER INDUSTRY

**I**T is a far cry from the unpretentious little tannery that nestled by the Cedardale Creek and that was started by the late James Robson in 1865 to the spacious modern premises and plant and the elaborate up-to-date equipment that produce

## ROBSON LEATHERS

to-day. The day of the horse-power bark mill, outside vats and laborious hand methods have

five acres and two hundred and fifty men to complete the output of 1,800 sides a day.

## GOOD SIDE UPPER LEATHER

From a small line of ordinary black bark-tanned upper leathers, the range of goods has developed so as to embrace a general line of side upper leather in the most approved finishes, including a patent leather that is known for its quality not only in Canada but abroad.

given place to the skill of the chemist, the rumble of "drums," and the busy whirr of machinery. Where the industry once called for the limited area of a small wooden building employing a few hands, it now requires a premises of nearly

## QUALITY FIRST

Nevertheless the foundations of the present large and prosperous enterprise were faithfully laid in the little old tannery, where **QUALITY** was made the prime consideration in turning

THE ROBSON LEATHER COMPANY'S PLANT

out stock. In the old days, as much as to-day, ROBSON LEATHERS were a standard article with the shoe trade of Canada and the shoemaker as well as the manufacturer used the name as a talisman for quality in upper stock.

size, shape and quality and the use to which it is to be put.

### BUSY NIGHT AND DAY

For over a year past the Robson plant has

### BEGINS WITH THE HIDE

The foundation of leather success lies undoubtedly in the hide. Without a carefully selected, well balanced hide all the brains and

been working day and night, principally on army leather and also in order to keep pace with the domestic and foreign demand for ROBSON LEATHERS. They are turning out, all told, 1,800 sides per day, a thousand of army shoe

skill of the manufacturer are to some extent lost. ROBSON'S have always made a point of personally selecting the hides adapted to the manufacture of their leather specialties. Every hide has to stand a most rigid test as to

upper leather, five hundred of patent, and three hundred for domestic use such as velours, gun-metal and other lines. This means that the plant with all its equipment is kept humming for twenty-four hours a day and every man is

keyed up to the highest point of efficiency by the necessity for keeping pace with the demand upon the establishment to keep up with its orders. Nevertheless there is no fuss, haste or lack of the consummate care and skill that

absence even in the beamhouse of the accumulation of filth, smell and moisture that even to-day will be found in the best tanneries. One can walk through the whole establishment without rubbers with the very finest shoes,

ensures the product being kept up to the ROBSON STANDARD.

#### ABSOLUTE CLEANLINESS

It has been shown that tanning is one of

without either getting his feet wet or his clothing soiled. Cement floors are used throughout and these are kept scraped and washed down so that one does not run the danger of a toboggan slide or a sudden immersion in a

the most healthful occupations known, and that notwithstanding the odors and mess that are often the accompaniments of the business. In the ROBSON PLANT, however, one of the first things that strikes the observer is the

yawning tan vat. How they manage to keep the place so clean is one of the secrets of the successful management of this establishment.

#### PURE WATER SUPPLY

One of the great requisites of successful tan-

ning is an abundant supply of good water. It must be pure and free from deleterious elements so as to be effective in washing the raw stock and properly diluting the various agents used in the process. The ROBSON PLANT is

h.p. Corliss engine supplies the principal motive power and it does its work as quietly and efficiently as a well regulated clock. In addition to the steam equipment they have a water wheel that generates 150 h.p. additional, and all this

fortunate in having a practically inexhaustible supply of pure water that answers fully all the purposes of leather manufacture, right at their very doors. As shown in the picture it makes a very picturesque addition to the landscape.

is being used to keep the efficiency up to its standard. Separate pumping engines supply the various departments with the immense amount of water necessary in the various operations from the stream which runs through the

#### POWER EQUIPMENT

Two immense boilers of the Goldie-McCulloch type furnish the steam for motive power and heating, being in use alternately so as to avoid shut-down in case of accident to either. A 500

establishment. They also generate their own electricity for lighting and it is expected that the whole system will shortly be operated by electric power. They have their own machine shop on the premises and do all their own repairing.

## THE BEAM HOUSE

In the making of leather the first operation is the soaking and cleansing of the hide from foreign substances. It is then subjected to the action of lime in solution to swell the hair

except what chemistry may have done for bates and "paddlers" have accomplished as an improvement on manipulating by hand. The ROBSON PLANT has all the newest appliances and methods for handling the raw stock as shown in

follicles and allow the hair to be easily removed. The hides are then put into "bates" or "pures" for the removal of the lime, which if left in the skin would interfere with the tanning and impair the quality of the leathers. The department

the illustration. When the hides are removed from the bates and are thoroughly cleansed from lime and all impurities they are usually split and prepared for the further processes. On carefulness in cleansing depends the QUALITY.

in which the hair is removed, the surplus fat and flesh removed and the hides prepared for tanning is called the "Beam House." There has been little change in the operations in this department from the time of our grandfathers, ex-

## TANNING PROCESS

Until about thirty years ago almost all tanning was accomplished with vegetable substances such as oak or hemlock bark, gambier, sumach, etc., but about the year 1885 a process

of "mineral" tannage was introduced by which salts of chromium were employed. This gave a leather that water did not seem to affect as it did vegetable tanned, and although the process was applied at first to lighter leathers

leather success. Thorough knowledge of the hide and the action of tanning materials upon it is requisite to get the highest RESULTS. ROBSONS have experts in every department of the work and leave absolutely nothing to

only, it is now used with good results in the heavier lines. The ROBSON PLANT uses both vegetable and chrome tannages and has the most up-to-date methods and appliances as shown in the illustrations. It also uses a

chance. Long personal, practical experience of the members of the firm qualify them to give the process in every branch the most careful personal supervision. None but capable, skilled operatives are employed from start to finish.

mixed tannage for some lines of both vegetable and chrome, according to the results desired.

#### SCIENTIFIC TANNAGE

Guesswork in tanning is to-day fatal to

Some of them have spent a lifetime in the work. This with the very latest appliances in tools and machinery give certainty and thoroughness to the whole product and THOROUGHNESS is the earmark of the ROBSON LEATHERS.

## THE CURRYING SHOP

When the skins are thoroughly tanned and otherwise prepared for finishing they are sent to the currying shop where they are treated with various ingredients and operations which

## THAT SILKY FINISH

That pleases the eye and is grateful to the touch can only be the result of extensive experiment and most careful practice. Those who use ROBSON LEATHERS claim they

thoroughly soften and preserve the fibre and are colored and finished in the desired manner. They are by the curriers put through the various operations of shaving, setting out, coloring and otherwise preparing for the finishing pro-

cesses that are distinctive in respect to finish. They have that smooth, velvety feeling, which, added to strength of texture and ampleness of body, make up the desideratum of good side leather. Their gun-metal and velours sides are the very

cesses that are to follow. After that they are "ironed," when a soft gloss is required or glazed on the staking machines to give them the necessary gloss. They are usually passed through the jacks several times to get the right finish.

acme of appearance and "touch."

## A GRADUAL GROWTH

The development of ROBSON LEATHERS has been a matter of from year to year adding to

the results of careful study and planning. There was a time when Canadian shoe manufacturers claimed they had to go abroad for their best leathers. The ROBSONS set themselves the task of producing goods in their line

to produce a leather for army purposes that has not been excelled anywhere and the only difficulty they have experienced in the recent months is in keeping pace with the demand upon their production. In all this they have

that would leave absolutely no occasion for importing outside leathers and that they have succeeded beyond a peradventure is amply attested by the immense strides made by their business. Besides taking care of the domestic trade in

never lost sight of the thing that has made their business what it is—ABSOLUTE QUALITY.

PATENT LEATHER SHOP

The ROBSON PLANT has probably the

high-grade side leathers they have opened an export trade in the last year with Great Britain and France that amounts to many times the requirements of the home market. They have demonstrated amongst other things their ability

finest patent leather shop in the country. Built of concrete and brick it is modeled after the best establishments in the United States. In making patent leather the sides are specially selected after they leave the Beam House

so as to ensure the fullest and most perfect skins as well as those that from smoothness and tensile strength are calculated to produce the evenness and durability so necessary in this class of stock. When the skins are picked

them their high value for manufacturing purposes. They are then removed from the frames and sorted according to size, the measuring being done by a measuring machine shown amongst the illustrations. As the leather is

out they are given extra care in tanning and currying so as to fit them to receive the subsequent treatment that is to give them their permanent finish. Patent leather has to be manufactured under the most exacting conditions.

passed through the machine the exact size is denoted to the smallest fraction of a foot so that absolute security as to the quantity in each side is assured, the measurement being marked on each.

After the sides receive their various coatings they are tacked on frames and partially dried in the drying rooms or ovens and placed outside in the sunlight, which ensures them that beautiful transparency and gloss that gives

#### THE MANAGEMENT

When the late James Robson died some nine years ago he left the business in good hands. For some years previously his two sons had taken an active interest in the upbuilding of

the business, the firm being known as James Robson & Sons. These two young men got their "university education" after leaving school in the tannery and gave up their whole thoughts to the development and success of the growing business.

and Secretary-Treasurer, devolves the financial and office management, although he also is familiar with all the intricacies of this modern plant, its methods and products. To his knack of business organization and his aggressive

Upon Mr. Charles Robson, the eldest son and President of the ROBSON LEATHER CO., has fallen the mantle of the father in a large degree and he may be fairly said to be a "chip off the old block." He has been familiar with the prac-

spirit is due a good deal of the forcefulness of the concern's business ideals.

The two together make a great team and have managed to illustrate how much new blood can do for an organization the foundation of

tical end of the business from the time when he was a mere lad and carried a considerable share of the burden of the enterprise long before the removal of the senior member of the firm.

On Mr. Frank W. Robson, Vice-President

which has been laid in that true conservatism which makes sure of being right and then goes ahead. They have realized that the principles of the founder combined with modern enterprise and progressiveness should yield divid-

ends of permanent and satisfying success. Their ideals have won out.

As exemplified by the story told by the pictures in this number that success is written large not only upon their product itself but the

tious efforts of its founder and his successors to place on the market a product that is through and through the best that skill and painstaking effort can produce. They look back upon the record of FIFTY YEARS with the absolute

patronage that has come to them, not only from users of ROBSON LEATHERS in Canada but in the world at large.

### HALF CENTURY MARK

The establishment has just completed its

consciousness that they have by absolute faithfulness to ideals and persevering persistence earned the proud pre-eminence their product has given them.

They attribute, as much as to their own

half century of service in the production of ROBSON LEATHERS and celebrates this year the close of its "Golden" Jubilee. The success it has fairly won in one of the Staple Industries of the Dominion is a tribute to the conscientious

efforts, the honest appreciation of the Canadian shoe trade of thoroughness and reliability in upper stock. Their large plant and ever increasing output is due largely to the fact that makers of shoes in Canada so fully realize that

good leather lies at the very foundation of good shoemaking.

## HONOR AND DIGNITY OF THE SHOE TRADE

(Continued from page 34)

to be serious, strong and business-like enough to enter upon this contract with the desire to carry it through.

Also that the manufacturer use all diligence and care to see that the goods are manufactured and delivered as near the date specified for delivery as it is physically possible so to do; and that the delivery date so specified be accepted in good faith by both parties; due consideration on the part of the retailer being given to the inability of the manufacturer at times to obtain the necessary materials for the manufacture of the order as quickly as agreed upon, in which case the retailer should be fully advised of the delay. This will avoid misunderstandings as to the reason for delayed shipments, the causes of many cancellations and returns, and of great loss to the trade, as well as diminishing the amount of floor goods sold to the detriment of both the manufacturer and retailer.

In order to help manufacturers distribute more evenly, and to do away with the feast and famine system of orders at the factory, shipments should be split by the dealer so that the manufacturer may have a continuous run of shoes and may distribute them over a season with better success. This should be done with due regard to the seasonableness of the shoes and the size of the order.

This rule would also do much to help the dealer make a greater stock-turnover, and keep his merchandise new and fresh.

In returning shoes to the manufacturer, the invoice should always precede shipment, and the cheapest way should be considered, whether freight, parcel post, or express.

### Clearance Sales

In order that the profits of the dealers be better conserved, it is recommended that the time of so-called "Clearance Sales" be curtailed and the profitable selling season be lengthened. In the northern district, no winter shoes should be cut before February 1st, and no summer shoes until August 1st.

In this connection we beg to call the general dealer's attention to the fact that many successful shoe merchants never run cut sales. They find that the closer they buy their goods to the requirements of their trade, the less cause they have for such sales.

The disposition of floor goods by manufacturers to illegitimate dealers is a menace to the legitimate and first-class merchant. We, therefore, recommend that wherever possible the manufacturer should endeavor to dispose of these goods to regular customers at the prices they are usually disposed of to the so-called job lot dealers.

The conference committee recommends that whenever the name of a dealer appears on the shoe as the regular purchaser, that the manufacturer eliminate the name of the purchasing retailer, or, if not possible, to indicate in some definite manner that the shoes are defective or rejected merchandise.

### Job Lot Clearing Houses

The conference committee spent some time discussing the question of sample shoe stores, fake bargain stores, and various other so-called illegitimate retail shoe houses that are springing up all over the country and sell shoes at cut prices, and more often at regular prices and claiming them to be underpriced, and which are diverting trade from legitimate stores.

Among the remedies discussed were clearing houses, in brief, stores in tenement districts removed from retail shoe districts where factory damaged shoes, returned shoes and shoes from retail stocks could be sent to be disposed of on a commission basis.

It was recommended that a special committee be appointed, composed of three members from each of the asso-

ciations—The National Boot and Shoe Manufacturers' Association, National Shoe Retailers' Association and the National Shoe Wholesalers' Association, to take up this problem and report its recommendations.

### Sizes of Samples

In order to make samples more salable and to eliminate the waste that results from making samples of one size, an acceptable size system is recommended to the manufacturer. This will add greatly to the value of the samples, making them more salable for legitimate dealers, who can then dispose of them and thus counteract to a great extent the fake "Sample Shoe" stores.

The practice of stamping fictitious values and names on shoes is vicious and should be condemned by all legitimate retailers and manufacturers. We urge a strong co-operative interest in our trade to do away with this pernicious practice to eliminate as much as possible fake stores that are prominent in many centres, and to further any legislation to accomplish same.

### Science of Retailing vs. Fixed Shoe Prices

Fixed shoe prices are unscientific and are chains which shackle the trade. They prevent the shoe business from being elastic and flexible and from adapting itself to the changed markets, varying conditions of the trade in different communities and the differing services of stores.

Every shoe business has its own particular atmosphere and its own particular talent and service, which will stand or fall as the consumer desires it.

In order that the right prices prevail in your business, it is necessary for a dealer to know his entire overhead expense which may be ascertained by the Harvard System of Accounting. Then his legitimate profit should be added to this. Whatever figure results from this method should be the price of the shoe to the consumer. This is scientific and accurate, also fair to the consumer.

This system will help the retailer and the shoe trade generally out of the rut of the fixed price system, will make it easier to adjust prices in accordance with the rising and falling market of the future; will do away with the unscientific, bungling plan of retailing all kinds of shoes and leathers, regardless of their cost, at one price.

Your courage to put this system in effect will change your empty till to one with a legitimate profit, and it will soon be proven that the customer is just as ready to pay \$4.25, \$5.30 or \$6.40, as he is any other price, so long as it is fair and just.

### Standardizing Retail Shoe Accounting

The Harvard System of Accounting is undoubtedly the best system of accounting a shoe retailer can employ. It so plainly sets forth a method of determining a retailer's expenses and profits that he may see his business in a clear, understandable way. Besides this, it will standardize the accounting in the retail shoe trade so that accurate business comparisons may be secured between different dealers, if desired.

This will lead to systematic and scientific store-keeping so highly desirable. This system may be had for the asking, by addressing the Harvard School of Business Research, Cambridge, Mass.

The sincere effort that has been made in compiling this booklet by the committee commends and entitles it to the most careful consideration of the shoe trade. It has been done at great expense in time and money, and we earnestly ask the reader to treat it with a serious meaning; first, for your own good; second, for the good of your neighbor, third, for the good of the trade as a whole.

Should it interest you, see that it interests your fellow-tradesman, for it is only by educational means that we can lift the craft to the standards for which its leaders are striving.

### CANADIAN FACTORIES IMPROVING EQUIPMENT

An American salesman representing a firm dealing in shoe factory equipment recently returned from a trip through Canada. This man reports the greatest amount of sales in his experience, and goes on to say that every factory in Canada has plenty of business and many of them are contemplating changes in their equipment to take care of all the orders. To the Shoe and Leather Reporter he said:—

"There are Canadian factories that compare favorably with any in the United States, but some are in a rut and because they could market their output have not installed new processes. The average shoe manufacturer in Canada is a firm believer in the block last, and argument to introduce hinge lasts has been futile. We quote an answer of a Scotch superintendent to a salesman who was preaching the gospel of hinge lasts. This canny Scot said: 'We have made shoes and money by using block lasts. We could do no more with hinge lasts, and we might do less.' This old style conservatism has disappeared to a great extent within the last few years, for the largest producers of shoes in Canada are equipped with modern lasts, patterns and machinery from the leading style producers in the States. Many factories are superintended by men who made a name for themselves in the best factories in New England. I use the term New England advisedly, as I maintain that the production of perfect shoes wherever located will hark back to Brockton for men's, Haverhill for slippers, and Lynn for ladies' fine shoes. This may start an argument, but if you look up the names of the successful superintendents in Newark, Brooklyn and Rochester, it may surprise you. Canada has the same opportunity to profit by precept or example and localize or specialize her shoe producing sections.

"One drawback to the present success of manufacturers in Canada is the attempt to make every style, kind and grade of shoe in one plant. This sort of work is bound to produce sameness of results. The personal peculiarities of the superintendent will be shown in the product so that an experienced judge would know which kind of shoes the superintendent was best qualified to produce. Men's shoes will carry a womanish looking heel, or vice versa, women's shoes will look pluggy and mannish if made by a superintendent who is an expert on men's shoes. A superintendent would be a world wonder if he were equally good on all kinds of shoes. The great success of the manufacturers in the United States has been made by specializing the product of a factory and only producing such shoes in a given factory as can be produced right.

"Part of Canada's awakening is due directly to the attitude of the special military commission toward army shoe contracts. When manufacturers had to consider every detail, and contract to produce the best army shoe in the world, lasts had to be made to exact measurement, patterns had to conform to specifications, haphazard methods were discouraged and equipment was installed to enable the makers to produce shoes that would measure up to the exacting sentiments of the Canadian commission who were suffering under the bitter criticisms of the Canadian press, because some shoes had been made without regard to fit or service and sold to the Government for the Canadian contingent.

"The perfecting of factory conditions, the installing of up-to-date equipment and the hiring of New England super-

intendents gives Canada the opportunity to bid for her share of war contracts on shoes. The fact that there are more boot makers and heavy shoe workers in that north country enables them to make heavy shoes with ability that has become theirs by years of experience."

### UP GOES BRONZE POLISH AND LACES

There has been an advance of from 30 to 40 per cent. in bronze dressings, which are used to a large extent by the ladies at the present time, owing to bronze kid being both popular and fashionable. Manufacturers report that they are unable to get the necessary chemicals, for which extortionate prices are now asked. This is one of the results of the war. On top of advances that have averaged 100 per cent. since the outbreak of the conflict in Europe, mohair laces have just gone up thirty to fifty per cent. All prices are now subject to change without notice. The cause of the sharp increase in quotations is an embargo placed on logwood dyes, making it impossible for the manufacturers to secure proper coloring materials. Of course, the consumer will shortly have to pay nearly double the price for his mohair shoe laces than he has been doing, and the only way to avoid it is to wear button boots.

### DOING GOOD BUSINESS WITH SHOE FACTORIES

L. S. Odell is one of the most widely known members of the shoe trade. He has been identified with leather and findings for nearly half a century, practically all of that time in Montreal and Quebec. He recently opened offices

L. S. ODELL, SR., MONTREAL

and warehouse at 137 McGill street, Montreal, putting his own name on the door exclusively for the first time in his business career. He is handling upper leathers, shoe cottons, shoe felts, shoe cements, top facings, box toe goods, buckrams and other like supplies for shoe manufacturers.

MONTREAL

Mr. Odell is carrying quite a large stock and his close connection with manufacturers of these lines and his intimate knowledge of the requirements of shoe manufacturers en-

L. S. ODELL, JR., MONTREAL

able him to supply the wants of the trade satisfactorily to buyers and profitably to himself.

Associated with him is his son, L. S. Odell, Jr., who is covering the Montreal city trade for his father. Mr. Odell, Sr., returned to Montreal in September of last year after four and a half years residence in Toronto. Previous to that time he was in Quebec for 29 years on St. Valier street, and no man is better or more favorably known to the Quebec shoe trade. Mr. Odell was vice-president of Fisk Limited until he went into business for himself, having been identified with that concern for 43 years.

#### EFFICIENCY EXPERTS IN SHOE FACTORY

Efficiency experts have become a fixture in the shoe industry during the past five years. Shoe manufacturers were slow in adopting the idea of employing efficiency men, as at first it seemed to be something that would increase their overhead expense. But as the thinking men began to learn of what was being accomplished in other lines of industry, they reasoned that perhaps it might be applied to the manufacture of shoes. The first firm to go into this study to any extent was the T. G. Plant Co., at the time they moved their business to Roxbury, Mass. The rapid growth of this firm would go to prove this. There have been many other instances of more recent date, but in every case the success may be laid to advanced ideas of efficiency. Many foremen who have openly sneered when system and efficiency have been mentioned, have been jolted quite badly when entering the employ of these firms, but as yet many of them do not see the light.—Exchange.

#### TO PREVENT STICKING OF LASTS

Errors and mistakes are common occurrences in all lines of business and shoe factories are no exceptions. Many of those mistakes are as old as the trade itself.

For instance, there is much difficulty in pulling lasts that remain in the shoes over night. In the drying of the box toe gum shellac, the moisture of ether, penetrates most any fabric or paper and makes the shoe adhere to the last, causing the shoe to stick, and when pulled breaks up the shape of the shoe. There are several good remedies that will overcome

this, such as chalk, grease or vaseline put on the last when the shoes are assembled.

One of the best and surest ways to overcome this difficulty permanently is to use a mixture of paraffin melted with one-third portion of kerosene oil heated until the paraffin becomes a fluid. Then by dipping the lasts in it, the kerosene penetrates the wood of the last, carrying with it a portion of the paraffin. A small quantity of gasoline may be added, but not actually necessary. The heating process may be done by gas fire, but steam is preferable. This dipping need not be done oftener than once in two weeks. It is hardly perceptible on the last and is a saver for shoes, as there is no grease to soil the lining, and it leaves the toe perfectly smooth.—American Shoemaking.

#### REINFORCING WELT SHOES

Welt shoes should be reinforced at bottom part of the toe-end. I have seen welt shoes protected that way in a shoe factory, and as the plates were inserted within the line of outsole stitching the edge was finished without trouble, and the bottom did not look bad at all. A welt shoe will wear out quickly at the toe-end on account of its flexibility, which allows the foot to bear quite hard on the toe-end as the foot is lifted from the ground.

With that fact in mind, the turn shoe would call for the same reinforcement at the toe. When the shoe is constructed with a high heel, the tendency to rub the toe part against the pavement is thereby enhanced. I believe that there is a field for some new machine for inserting such reinforcements, whether circlelets or special plates. Plates will protect better than circlelets and are quickly applied. The shoes in the factory above referred to had plates sunken into the sole and offered a real improvement as far as making the shoes more durable. Such a scheme is better adapted to a repair shop than to a shoe factory, as a repairer can apply those by hand in a better manner than anyone else.

When the awl is to be filed take it out of the machine, as there is nothing gained by filing in the machine. The awl must be filed square, as a corner lower than the opposite corner will make the machine run hard, in much the same manner as when the awl is dull, although it may be very sharp. Moreover, the stitches will not set rightly on the welt, and the machine will not feed correctly. At the middle of the table the awl and needle should meet, and the awl is worn out when they both meet there, but the awl is too short to go through the sole easily.

#### THE PROFITS OF SHOE MANUFACTURERS

Shoe retailers are interested in the question of shoe manufacturers' profits because of the bearing the question has upon the sale of shoes to the consumer. Probably no other great staple is made and sold on such slender and insufficient margins, says the Shoe Retailer.

During many years shoe manufacturers have attempted to keep up their gross profits by increasing the volume of output. Small factory units have given way to larger establishments conducted upon high pressure methods of efficiency and economy. All sorts of expedients have been resorted to in the effort to avoid the alternative of advancing prices. But the pressure from without in the form of higher cost of materials and labor prevents manufacturers from realizing adequate profits.

During the long depression in general business shoe manufacturers made a great effort to revive the trade by introducing novelties. New and attractive styles were evolved and the wholesale and retail prices put on them made the profits on staples appear small by comparison. The novelty shoes introduced for last winter's trade were a great success until the bottom fell out of the tub and thousands of pairs of expensive shoes were sacrificed at ruinous

prices. The novelty business is measurably under control, however, and the enormous losses will not be repeated.

The retail trade is affected by the increasing cost of doing business, and there is no disposition anywhere to holster manufacturers' profits at the expense of the retailer. There never was a time when the ratio of expense to volume of business was as great in retail merchandising as it is to-day. The rents demanded for stores in good locations would have been considered impossible a few years ago. But that is another story apart from the question we are now considering.

The causes that brought about the present condition of small profits in shoe manufacturing are somewhat complex. It is not alone the stress of the competition of one manufacturer with another. That is perhaps neither better nor worse in the shoe trade than in other lines of industry. Furthermore the higher wages demanded by labor are not confined to the production of shoes.

The steadily increasing cost of leather would appear to be the special and peculiar factor in the shoe situation. It is true that raw materials in other lines of manufacturing have advanced in price, but there are circumstances connected with the production of leather which differ from other articles of commerce. Under the ordinary operation of the law of supply and demand high prices stimulate production and larger supplies cause prices to decline to the former level.

It happens to be a fact peculiar to leather that increases in the demand and price do not cause greater quantities of it to be made. Hides and skins are by-products of the beef and dairy industries. The introduction of the refrigerator car, cold storage and prepared cereals have revolutionized the food supply. The stocking of rivers, lakes and streams by the Fishery Commission, the scientific development of the egg and poultry business together with refrigeration in store and in transit, have lessened the per capita demand for beef, veal and mutton. Meanwhile the consumption of leather per person has increased.

This condition caused leather of all kinds to advance in value before the outbreak of the war. Military activity has always stimulated the demand for leather. War is the biggest bull factor in the leather markets. The influence of the present tremendous conflict is only beginning to be felt. If the war continues two years more the heavy leather supply of the world will be so severely depleted that the most sensational situation will exist.

It should be kept in mind that war not only greatly increases the consumption of leather, but actually decreases the number of hides and skins taken off. At the present time the condition is made still more serious by the numerous embargos placed upon hides and skins and tanning and coloring agents. The actual supply of raw materials is less and the situation is aggravated by the difficulties of buying materials and transporting them from the points of origin to the tanneries.

It is unfortunate that many shoe manufacturers are not as well informed as they should be regarding the basic conditions underlying the leather markets. The shoe manufacturing industry was built up under a system of super-abundant supplies of leather. Leather buyers for years held the whip hand. They were enabled to dictate terms to tanners who were expected to take care of their customers under pain of losing them. Contracts were made for six months' supply of leather. If prices declined during the pendency of the contract the buyer demanded and obtained the concession, but if the market strengthened every pound or foot of stock had to be delivered at the contract price.

This one sided situation resulted from the well-known fact that more leather was made in the normal course of events than was required. In recent years this economic condition has changed, but old customs die hard. Shoe manufacturers were slow to realize that leather never again will be as cheap and plentiful as it was years ago. They hope against

hope that somehow or other the high cost of leather will be only temporary and that they will be able to buy again at former quotations and avoid the dreaded alternative of raising shoe prices to a parity with the rates demanded.

The time has come when the shoe trade should push forward and cease repining about dear leather. Natural conditions above and beyond either tanners or shoe manufacturers have conspired to make all sorts of leather scarcer and dearer. Nothing can be gained by one set of men in the industry misunderstanding the position of the other set. Sooner or later the prices of all staple shoes will have to be materially advanced, by the manufacturer to the retailer and by the retailer to the consumer. The sooner the change is made the safer will the manufacture and sale of shoes become.

#### NEW MACHINES ADDED TO PLANTS

Shoe factories continue to put in additional equipment, which is an evidence of activity and bright prospects. United Shoe Machinery Co., Toronto, have made several installations during the past few days, and among them are.—J. W. Hewetson & Co., Brampton, Regent bottom stamping machine, Model "C"; The Blachford Shoe Mfg. Co., Toronto, an ensign lacing machine; Western Shoe Co., Berlin, loose nailing machine, and edge trimming machine; Scott-Chamberlain, Limited, London, steam generating machine; the T. Sisman Shoe Co., Aurora, heel breast scouring machine; Regal Shoe Co., Toronto, Goodyear heel seat rounding machine, and American lightning nailing machine; King Shoe Co., Toronto, Goodyear outsole rapid lock stitching machine; C. N. W. Shoe Co., London, Goodyear welt indenting and burnishing machine; Weston Shoe Co., Campbellford, pattern binding machine and pattern corner cutting machine; Solid Leather Shoe Co., Preston, Planet sole rounding machine; Kaufman Rubber Co., Berlin, Lufkin folding machine; John McPherson Co., Hamilton, an improved gearless sole cutting machine; Hurlbut Co., Preston, Miller twin treeing machine; W. B. Hamilton Shoe Co., Toronto, edge trimming machine; Snedcor & Hathaway Co., Tillsonburg, ideal clicking machine; Adams Shoe Co., Toronto, rapid hand method folding machine; Getty & Scott, Ltd., Galt, a stitch down staple lasting machine; Regal Shoe Co., Toronto, Vulcan foot power punch and Goodyear outsole rapid lock stitch machine; Renfrew Tannery, Renfrew, Ont., Puritan old New England Alligator machine and a Vulcan foot power punch.

#### CORDOVAN PROMINENT IN SALES

Among the orders for immediate as well as future deliveries which are being received at Brockton factories, the cordovan leather is being very frequently designated by merchants. Several manufacturers in cities are planning to make more cordovan shoes than ever before. Cordovan or horsehide, owing to its close fibre, has exceptional wearing qualities. It has always been a staple stock in men's shoes, but owing to its cost can be used only in the better grades of footwear. In years past black cordovan was practically the only color obtainable. Of late, however, the improvements which have been made in tanning have brought the production of colored cordovan to a high state of perfection. It is this stock which is having a call at present, with red, mahogany and brown selling in about the order named. The merchant who sells his customer a cordovan shoe with a good substantial sole and heel fastened to the upper stock will seldom, if ever, hear of any dissatisfaction on account of wear. In fact, as one manufacturer said to a retailer recently: "It is almost impossible to wear out the upper of a cordovan shoe. It is always smooth, doesn't crack or chip, takes a high polish, and is emphatically a gentleman's article of footwear."

# THE DYE SITUATION CAUSES WIDE ANXIETY

**The Color Outlook Still Continues to be Chief Topic of Discussion Among Tanners and the Situation is Really Alarming—Will there be Some Relief Afforded by the Removal of the Existing Embargoes**

"Speaking in a general way, the logwood situation was difficult previous to the embargo placed on it by the British Government within the last few days. The situation was that the wood was largely brought from Jamaica and put through factories in the United States and there turned into the various classes of products from logwood used in connection with tanners' dyestuffs. Even before this embargo was placed on logwood the two or three firms in the States, who have control of the manufacture of this wood, were practically refusing to sell as they seemed apparently to think they should supply United States customers before Canadian and in any case they had not nearly enough stuff to supply the requirements of the tanning and textile interests. The embargo, if persisted in by the British Government, will of course prevent them getting any more wood for the use of their factories in making these products.

"The whole situation, both as to logwood, dyes and chemicals of all kinds used for tanning purposes, is most serious and if the war continues another year it is difficult to say how serious the result may be. Everyone is having difficulty now and these difficulties will increase as time goes on," declares one leading firm.

## Restrictions May be Modified

The Robson Leather Co., of Oshawa, remark:—"We are unable to obtain either logwood or anilines, except in very small quantities at exorbitant prices. We are inclined to think the embargo by Great Britain will soon be lifted and that the United States will be able to obtain logs from Jamaica and other sources as usual. Strong protest by the textile and tanning trades of Canada and the United States has been made to Great Britain through our Government at Ottawa, and the British Embassy at Washington, with the probable result that some modification of Britain's recent ruling in connection with the exportation of logwood will be made. It makes but little difference whether we are able to get fancy aniline colors, but blacks seem to be an absolute necessity."

## Only Three Months' Supply

Daoust, Lalonde & Co., Montreal, say that it is impossible to secure any logwood or aniline dyes at any price. "We have some to keep us going for three months, but we are at a loss to know what to do after we are exhausted of what we have. We would certainly be favorable to the removal of the embargo on all German dyes," they conclude.

Sole leather tanners do not, of course, use dyes and are not disturbed by the present conditions.

## Will Leather Be Five Cents Higher

"The embargo on logwood dyes will eventually, it appears, necessitate tanners closing down unless the government can relieve the situation at once. There is no stock to be had," asserts another manufacturer of high-grade shoe leathers. "On account of the advance in price in aniline dyes every month for the last six months many people would not stock heavily, thinking they could buy logwood dyes at any time. We can see nothing but higher prices for all kinds of dyes which means stiffer prices for leather, and look forward to leather being five cents a foot higher in February than at the present time, as the demand for leather will be even greater in the next three or four months than ever. The scarcity of dye materials and raw calfskins and the requisitions for leather more numerous; the answer is higher prices

for the finished product, and it would appear as if there is no relief in sight for the next eighteen months. We might say that export business is increasing every day and any shoe concern in Canada who to-day is in need of business can, with a little energy, procure all the business it requires for twelve months in advance. Such are the conditions as we find them to-day."

## Looking to England for Relief

"The dye situation is very difficult just now and it is no easy matter to get supplies," observe Duclos & Payan, of St. Hyacinthe, Que. "All our orders in the New York market have been cancelled for both dyes and logwood products and unless the embargo is lifted we will have to try and get some relief from the English market. The trouble has not affected our output as yet, but there is no chance of replenishing supplies at present. It is only a question of time when it will be a very serious matter to all. We do not see any chance of relief unless supplies can be got through the English market and we hope that the embargo may be lifted or some means devised for obtaining supplies soon."

## Hope for Speedy Relief

"The shortage of aniline and logwood dyes is a very serious proposition with us to-day," declare A. R. Clarke & Co., Toronto. "The logs are imported into the States and produced in the crystal form and we have been buying from the American Dyewood Co. for some time. They advise us that they are not able to furnish us with any more at present and do not know when they will be able to. We are now attempting to have some shipped direct and handled in this country, but we have not yet completed arrangements. We hope relief will come in the color and logwood situation very soon as prices are terrific."

In reference to the color situation, the Barrie Tanning Co., of Barrie, Ont., say: "We are having a great deal of trouble, and, in fact, we are finding it impossible to secure suitable aniline colors to do the class of work that we formerly did, as anything offered or available on to-day's market is very much adulterated and inferior in every way, due to a large extent to New York speculators. However, this is a matter that has to adjust itself, and will have no serious effect if the public cannot get any colors and has to adopt natural colors. Of course, we have no doubt, with laboratories now at work both in England and New York, they will work out the problem and in the course of a year or two, we will have dyes equal to anything we have ever had heretofore. In the meantime, until the public start to realize the position of affairs, everyone is put to trouble and expense as well as inconvenience to try and please his customers. We can only guarantee a customer a particular shade of color from such dyes as we have in stock, and a good black is difficult to get as blacks from England. We have put in a vast equipment since the war broke out to cope with the tremendous increase of trade, and we are therefore in a position to handle an enormous export trade besides supplying the needs of our Canadian market in all our lines."

## Some Assistance in Sight

A recent despatch from Washington contains the following hopeful news:—"In notifying the State Department that Great Britain would permit the immediate shipment of 4,700 tons of logwood for dyestuffs from Jamaica to the

United States, the British Embassy has indicated that the shortage of the extract of logwood in Canada must be relieved as a condition of the embargo's modification. In addition it appears there is contemplated a much larger movement of this important dye base.

"It is hoped that the shortage of dyestuffs in Great Britain will shortly be met when the issue of licenses in Jamaica will be resumed, provided that reasonable margin

is left in the island for any emergencies that may arise," reads a note from Sir Edward Grey, transmitted lately to the State Department.

The French trade press states that the situation in the chemical product market in France is anything but favorable. Certain chemicals have advanced in price, while of others, there is a decided shortage. They have reached a height now beyond the wildest guess.

## TWO MILLION PAIRS OF BOOTS EACH MONTH

**What Allied Armies Are Using—Mr. Angus is Back in Montreal After Extended Absence in Europe—British Army Adopts New Standard Screw Boot for Trench Use—English and French Tanneries Supplying All Leather Required—Prospects for Civilian Trade Abroad for Canada very Promising.**

Two million pairs of shoes a month are being used by the allied armies in the present war according to the estimate of Alex. Angus, who has just returned from his second trip to Great Britain and Europe in the interests of Ames-Holden-McCready, Ltd., Montreal.

Mr. Angus has been closely in touch with army footwear matters, particularly as they concerned Great Britain, France and Italy, as he spent over a year on the other side of the Atlantic representing a group of Canadian manufacturers interested in army orders from the other side.

Mr. Angus states that the British Army has adopted a new Standard screw,  $\frac{3}{4}$  leg heavy boot with bellows tongue, especially adapted for trench use. The British War Office has been buying Standard screw footwear right along and this is

A. R. ANGUS, MONTREAL

a further evidence of the favor with which they regard such boots as against the welts being used by the other Allied armies.

Another point of interest to Canadians, particularly the leather men, is the fact that English tanners and those in France also are now capable of supplying practically all requirements of the English and French factories. The British are going strong on chrome tanned leather once more, after having used the vegetable tannage for quite a period. Both tannages are being used for that matter in shoes for the various services.

"It may surprise you," said Mr. Angus, "to know that the English and French shoe factories are not only capable of turning out all of the shoes required for their own armies, but also are engaged in catching up on civilian business which had been dropping behind with them during the first year of the war owing to their concentration on army work. In the last couple of months they have become extremely busy again because of their participation in Italian orders and in orders for footwear for some of the smaller Allied powers. They continue to make some French army boots as well.

Canadian manufacturers very nearly secured an order for close on to a million pairs of French army boots. At the time that the matter was ready for final closing a disturbance in the political situation in France resulted in this order being held for French factories. No order has been placed directly by the French Government for boots in the last eight months. It is unlikely that any business will be placed outside of either France or England in the very near future should conditions as they exist at present continue.

Both Governments through their war purchasing department have specialists to advise them on shoe purchases, and these men in turn have working under them experts who spend their entire time travelling the country organizing and maintaining the organization of plants engaged in shoe manufacture. The result is maximum output, prompt deliveries and reasonable prices.

### Canadian Factories Capable of Competing

Prices are practically the same for the boots of the various allied powers although the specifications vary. Russia is an exception as her soldiers use a long legged boot which costs over \$5.00 per pair. Canadian manufacturers are capable of turning out the boots now being manufactured at almost identically the same figures as English and French factories.

Italy occupies the centre of the stage in army shoe circles in London just now. She has either placed or is ready to place orders aggregating three million pairs. The order on which Canadian firms quoted has not yet been finally placed and it is quite possible some of these shoes will be made in Canada.

"Russian shoes are being made in Russia and United States. Some Canadian quotations have been given but no business has yet come to Canada. Prospects for civilian trade for Canada are very promising, also further allied orders will come," concluded Mr. Angus.

Mr. Angus was in London during four of the Zeppelin raids and witnessed the flight of the air-ship. He says that he was quite as near to it as he desired to get.

# Busy Centres in Eastern Ontario

## Kingston the Limestone City

The history of Kingston, if fully told, would make one of the most interesting pages in Canadian history. The present city was formerly Fort Frontenac, called after the French Count of that name. The Fort proper was built upon the site of the present Tete de Pont barracks for protection against attacks of the Indians, particularly the Iroquois. In 1763, the County in which Kingston is located was ceded to Great Britain, the town being settled by Loyalist families whose names are still familiar to Kingstonians.

Kingston is known as an educational centre, possessing as it does, Queen's College and the Royal Military College, as well as other institutions of learning. It is a beautiful residential city, being situated on the St. Lawrence half way between Toronto and Montreal and near to the Thousand Islands, while there are innumerable lakes within easy reach of the city. As an industrial centre it has made marked progress in the past few years. It has numerous factories and a growing number of wholesale establishments. The

THE HISTORIC CITY BUILDINGS OF KINGSTON

Canadian Locomotive Works is probably the biggest corporation, but not less important to the development of the town are such industries as that of the Davis Leather Co., the Kingston Hosiery Co. and the Midland Shoe Co., which particularly interest readers of this paper. More detailed particulars about these three companies are given hereunder.

### A. Davis & Son, Limited

One of Canada's busiest tanneries is that of A. Davis & Son, Limited, at Kingston. Hon. E. J. Davis, is president; Elmer Davis, vice-president, and Harold W. Davis, secretary-treasurer of the firm, which specializes in side upper leathers in bark tan, chrome, and chrome re-tan. The original firm of A. Davis & Son was formed in 1867, by Andrew Davis and his son, E. J. Davis, who operated a small tannery at King. In 1884 the late Andrew Davis retired, his son continuing the business by himself until 1893, when, in turn, his two sons, Elmer and Aubrey, were taken into partnership. In March, 1903, the King tannery was burned, and in April, Hon. Mr. Davis purchased the business at Kingston which had been conducted by J. J. Carrington since 1884, and in the following year he purchased the ground at Newmarket on which the five factories of the

Davis Leather Co. now stand. It was at this time that it was decided to separate the business—the Newmarket plant was utilized for making calf, and at Kingston side upper

ELMER DAVIS,  
Vice-Pres. of A. Davis  
& Son, Limited, of  
Kingston, Ont.

leather was made. Aubrey Davis went to Newmarket then, and in 1909 H. W. Davis entered the firm, which had been incorporated A. Davis & Son, Limited, in 1903. There is

HAROLD W. DAVIS,  
Sec'y-Treas. of A. Davis  
& Son, Limited, of  
Kingston, Ont.

no connection between the two Davis enterprises beyond the fact that Hon. E. J. Davis is president of both concerns.

Few tanneries are housed in more modern quarters. The entire group of buildings is in concrete, the last vestige of the old frame buildings of the Carrington tannery having been destroyed by fire in August, 1914. There has been an increase in volume of manufacturing of 700% over the output of the early '80's. Some of the finest leather ever made in the plant is that destined for use in army shoes. The firm takes pride in making this "better than their best."

**Midland Shoe Company**

F. G. Lockett, who established this business in 1901, is one of the oldest retailers in Ontario in point of experience. As the old-timers will recall, he was partner with J. J. Haines, of Belleville—Haines & Lockett—until he decided that prospects were better in Kingston, and journeyed thither, taking over the branch of their business which was already established there. When Mr. Lockett started the jobbing business he had been 36 years a retailer. He still conducts a fine retail trade on Princess street and has been

F. G. LOCKETT, KINGSTON, ONT.

fortunate in having two sons who followed in his footsteps. One of these, Capt. L. C. Lockett (80th Battalion C.E.F. at present in training) has been manager of the store, W. H. Mack, Jr., taking his place in his absence, and Garnett H. Lockett is managing the Midland Shoe Co., which does business between Cornwall and Oshawa and in the northern territory between these points, including Ottawa Valley. Three or four salesmen are employed on the road. G. H. Lockett is at present taking up a course in the Ontario Training Corps and hopes to get a good commission in the spring.

**Kingston Hosiery Company.**

Remarkable progress has been made in the 34 years of its existence by the Kingston Hosiery Co., which does a

J. E. MORTIMER,  
Manager of Kingston Hosiery Co.

large business with rubber manufacturers in rubber netting and with the shoe jobbers who distribute their lumbermen's sox and stockings. H. W. Richardson is president of the company, of which J. E. Mortimer is the energetic manager.

Mr. Mortimer is a practical man, who gained his knowledge in the Yorkshire mills, before coming to Canada to take charge of the Glen Woollen Mills at Georgetown, where he remained until four years ago. The secret of the success of the business lies in his study of the markets, which enables him to produce the goods for which there is a demand. It is one of the industries of which Kingston is very proud.

**Brockville the Beautiful**

Brockville is one of the oldest settlements in what was formerly known as Upper Canada. The town was incorporated in 1837. It has a population today of 10,000 people with a big agricultural community behind it. The district has a world-wide reputation in dairy industries. The amount

COURT HOUSE AVENUE, BROCKVILLE

of cheese alone sold by the Dairymen's Board of Trade, exceeds three million dollars annually. It possesses numerous factories employing from 200 to 400 hands each and a large number of wholesale houses. Not the least interesting feature of the town is the number of its public buildings, which add so much to its attractiveness. Being the county town of Leeds and Grenville counties, it is the home

KING ST., BROCKVILLE, LOOKING WEST FROM  
COURT HOUSE AVENUE

of the county officials and has an imposing courthouse and spacious county buildings. These, with its half dozen banks and the splendid residences of its business and professional men, are in keeping with the beautiful location of the town on the River St. Lawrence at the eastern gateway to the Thousand Islands. It is 125 miles from Montreal, 208 miles

from Toronto, 74 miles from Ottawa, 362 miles from New York, being the nearest town of size to the last named city. The town owns its water, light and power plants. The J. A. Johnston Co. are the only wholesale shoe house in Brockville but they have made a big success of their business, which will be seen in the account of its development given below in this issue.

**J. A. Johnston Co., Brockville**

To have increased their warehouse accommodation four times in eight years is something for any firm to be proud of having as a record. This is what the J. A. Johnston Co., of Brockville, have done since entering the wholesale field in that town in 1907. They are covering the greater part of the Province of Ontario, including the North Country and also a part of Quebec. J. Halpenny, North Bay, represents the firm in the newer parts of Ontario; S. Craig works east of Kingston, J. A. Johnston, west of Kingston and in Ottawa. Mr. Johnston has been 42 years in wholesale and retail shoe business, being one of the most widely known men of the craft. He is a practical shoeman, and his knowledge and aggressiveness have enabled him to build up one of the finest jobbing businesses in Ontario. For the past five years, G. Elmer Johnston, manager of the company, has been associated with his father, being in charge of the office and warehouse. His energy and up-to-date methods have had a big influence in the development of the company's trade. The firm carry a complete line of leather, felt and rubber boots and shoes, and gloves, hosiery, lumbermen's sox, moccasins, shoe packs and findings. They are sole distributors of "Little Bo Peep" shoes, Dr. Johnston's Hygienic Cushion sole shoes and Brovillo shoes.

**Perth the Stone Town**

Perth, the County Town of Lanark, was established in 1815, so that it is today just over 100 years old. It is one of the substantial towns in Ontario and its progress has not

SOME SCENES AND BUILDINGS IN PERTH

been of the boom kind, but rather of the steady variety. Its population is in the neighborhood of 4,000. It possesses a fair number of manufacturing establishments which give employment to a large section of the population; no company being more highly thought of than the Perth Shoe Co., of which more extended mention is made elsewhere. Being in an excellent agricultural district the farmers contribute largely to the prosperity of the town. Transportation is furnished by the C.P.R. The "Stone Town" is situated on the Tay Canal which connects with the Rideau system.

**Perth Shoe Company, Limited**

G. H. ANSLEY

One of the finest shoe factories in the country is that of the Perth Shoe Co., at Perth. This business was re-organized from the Winn Shoe Co. three years ago, by F. W. Hall, M.P.P., who is president. The company specialize on manufacture of ladies' Goodyear welts to retail at \$4.00 and up. In the past two years particularly the prosperity of the business has been marked. The firm constantly improve their line and give the trade good service. The man chiefly responsible for this progress is G. H. Ansley, general manager and secretary as well as a director of the company. Mr. Ansley deserves great credit for the manner in which he has developed the business. Three months ago M. J. Sheehy was appointed superintendent, coming from such factories in the United States as Selz-Schwab Co., Chicago, where he was superintendent, and the Sorosis factory at Lynn. He has been devoting considerable time along with a pattern expert from United States to securing

F. W. HALL, M.P.P.,  
President of Perth Shoe Co., Perth, Ont.

for the company the latest designs for the coming season. The factory is a modern brick structure 220 x 40 feet, and is well laid out. Colin J. Sewell is treasurer of the company.

The Perth Shoe Company have just decided upon an important change of policy, and will henceforth go direct to the retail trade with their own staff of traveling salesmen. Retailers in all parts of the Dominion will be visited. The company announce that they have laid in a complete stock of snappy new lasts and up-to-date patterns, which must be seen to be appreciated. The capacity of the plant has been greatly increased and the product consists exclusively of women's Goodyear welts, the firm maintaining that they have the largest factory in Canada devoting its energies entirely to this particular line. The branded name of their shoes is "Virginia," which has become familiar to Miladi fair in various parts of Canada.

The Perth Shoe Co. enjoy the unique distinction of being the only shoe factory between Toronto and Montreal, with the exception of one. Naturally the residents of Perth take a pride in the institution which has meant so much for the prosperity of the town and the employment of its citizens.

# Important Announcement

*“Virginia,” the Favorite line  
of Women’s Goodyear Welts,  
Now Sold Direct to the Trade*

Retail Shoe Merchants will be interested to hear that we are now going direct to them with our line. Starting with this month our own staff of travelling salesmen will visit the retail shoe trade in all parts of Canada with an offering of the most profitable line of Women’s Goodyear Welts, retailing \$4.00 and upwards.

The range will consist of entirely new lasts and patterns, expressing the most favored fashions in women’s high-class footwear, and each number in the range will be characterized by the highest qualities of workmanship, fit and finish.

We have the largest plant in Canada making Women’s Goodyear Welts exclusively, a fact that goes far to explain the outstanding success of the “Virginia” Shoe

PERTH SHOE CO., Limited

Perth - Ontario

## FINE HOLIDAY TRADE DONE IN THE SHOE LINE

**People Had More Money, Were More Optimistic and Bought More Freely than Last Year—Hockey Boots, Moccasins, Overgaiters and Slippers of All Kinds Had Generous Call—Merchants Emphasized the Advisability of Useful and Servicable Gifts**

Santa Claus was very good to the shoe and leather men throughout every part of the Dominion. Reports received by the *SHOE AND LEATHER JOURNAL* from each of the nine provinces, indicate that, with few exceptions, largely accounted for by local conditions, the volume of trade during the Yuletide season was much greater than last year. The people had more money, spent it generously, and were much more optimistic.

It is perhaps the practice of certain merchants to declare that each year's Christmas trade is "the best ever" and this may apply in a number of instances, but the Christmas business in 1915 did not equal in volume that of 1912 and 1913, which were the banner years with most shoe houses. The reason is that a quarter million Canadians are either fighting at the front, or in training camps. These young men, who were liberal spenders on masculine footwear and novelty goods, are wearing army shoes furnished by the Militia Department, instead of those supplied by retailers.

However, the men's trade was particularly good in all the country towns and villages, while in the cities, the showing for December was fairly satisfactory.

What has been lost in catering to the men's pedal requirements has in a large measure been made up by the added purchases of *Miladi Fair*. So many artistic creations of a conservative character, and so many different colored kid shoes in varying heights, are presented, that most ladies now purchase two or four pairs, whereas formerly one or two served the purpose.

### Lines Which Took Admirably

Gypsy shoes, both button and lace, have sold very well, but the demand for velvets has been decidedly limited. Very high cut models in glazed and colored kid are now being called for in the larger centres. They are certainly both

chic and smart. The trade in all lines of slippers—leather, felt, plush, plaid, velvet, suede, satin, etc.—was brisk; while hockey boots, moccasins, white, blue and grey colored overgaiters, felt footwear in various fancy patterns, also came in for a large measure of appreciation. Retailers report that the practice of giving sane, useful and serviceable gifts, appears to be finding an increasing degree of favor with the public. After all, buying is largely a matter of education, and never before did so many artistic and well worded advertisements appear in the daily and weekly press as during the past month. The appeals made by several bright retailers, who have adopted suggestions presented from time to time in the *SHOE AND LEATHER JOURNAL*, resulted in an increasing volume of business. Helpful hints were offered in the matter of suitable gifts for father, for mother, for brother, for sister, and for the kiddies, for everybody from grandma to the baby boy. One enterprising eastern retailer caught the popular endorsement of the housewives of his town, by significantly adding at the end of his advertisement: "Once a man gets off his day shoes and slips his feet into a pair of our house shoes or 'Soft-Consoling' slippers, it is a guarantee that he will remain indoors for the rest of the evening."

### How Live Retailers Pushed Trade

Here is what a man who does business in a town of about 3,000 says to the *SHOE AND LEATHER JOURNAL*, respecting his Christmas trade:

"We certainly had the greatest Christmas trade ever. This is accounted for by the fact that the new factories in our town are running to capacity and there are practically no employable people out of positions. December 24th we took in more money than any day since we began business

THE SPLENDIDLY EQUIPPED FACTORY OF THE PERTH SHOE CO., PERTH, ONT.

fifteen years ago. So you see that we are holding our own during alterations to the map of Europe.

"Yes, I sent out a folder, personally mailed to every one on my reliable list, which I revise twice a year, because a list that is not correct and up-to-date is practically of no value. I inserted ads. in both the town papers, using the same material in the press as I did in my four-page folder, as I thought there might be some who would be missed by mail, as you cannot reach every prospect through the post. I certainly can trace a lot of direct business to both the newspaper and the folder. I obtained a neat and artistic border of a Christmas character for my own use. I happened to be in Toronto and went into a type shop, and told them I wanted something out of the ordinary—something that was not carried in stock by the average newspaper. Well sir, I bought several inches of that border for a small sum, and it now belongs to me. I have already reaped enough return from the individual character of my announcements to repay me for this outlay many times over.

#### Had Distributed Two Kinds

"I had two kinds of folders printed, both containing the same matter—one was on a thin paper, which was used as dodgers. I had them distributed around the town each afternoon, at the door of every house, and in all the hotel yards, church sheds, etc. These interesting leaflets were placed in cutters, sleighs, baby carriages and everywhere so that a possible buyer could not fail to see them. The other kind, which I used for mailing, was printed on a stiffer paper, which was very suitable for sending by post. I had a little clip to hold the pages together at one end, and at the bottom of the first page space for the name and address. These went out for one cent.

"I got the idea of a Christmas folder from your excellent paper, and amended the suggestion to suit my own particular needs. I gave a range of prices of the various lines, which, it was intimated, would be acceptable as Christmas gifts, and also featured my stock of skating boots, which I handle in considerable variety. I used good cuts and a light green ink, which served to set off the engravings to decided advantage. I told my clientele that I had men's

hockey boots from \$2.50 to \$4.00, women's hockey boots from \$2.00 to \$3.00, boys' from \$1.50 to \$3.00, and girls' hockeys from \$1.50 to \$2.00.

#### Made Hit With Toy Trunks

"I also handle traveling goods. I have found this department a profitable one. I emphasized the fact that both shoes and traveling goods were thoughtful and serviceable as Yuletide remembrances—telling the people that it was surprising the number of useful and seasonable things to be found in a shoe store. Then I informed them about my club bags ranging in price from \$2.00 to \$13.50, and my suit cases, varying from a matting case at 95c., up to a solid leather one at \$8.00. What do you suppose made a great hit with the kiddies? Why, toy trunks. I had the cutest line ever, strongly made, lock and key, suitable for grown ups, also, which were disposed of at \$1.75. They proved to be a decided hit and on our regular trunks we told the people that we could supply their wants at from \$3.25 to \$9.00.

"As a grand finale, we invited all the people to step in and see how gaily the store was decorated. We laid emphasis on the fact that we guaranteed them value for their money, sincerely appreciated their patronage and were ready with the best stock backed by an efficient staff to handle great crowds promptly.

"But there, I have written you at interminable length, but have done so in the hope that some other retailer may see some rays of light in what I have penned, and be able to profit thereby.

"I trust that you may have a very prosperous New Year, and that we will all pull together for bigger, better and broader business in 1916."

It isn't necessary for you to be a jeweler, or have a watch in every pocket, in order to be up to the minute. Watch your surroundings, keep studying your business, be guided by trade conditions. ## MANY SNAPPY OFFERINGS SEEN IN FELT SHOES

**Selling Season is Now On and Range of Samples was Never More Complete—How the Industry has Developed of Late Years—Big Demand and Splendid Holiday Sale—An Increasingly Important Factor in the Footwear Arena of the Dominion**

The special season for selling felt footwear of all kinds, which began with the New Year and will continue until March 1st next, has opened auspiciously. Travelers representing the various wholesale firms, who handle this class of warm foot toggery, are now on the road with a complete line of samples, in which many new designs are noticed, while the ranges of colors, lasts and combination effects are more varied and attractive than ever. There is some increase in prices, owing to the high quotations for materials. The felt industry is growing rapidly in Canada and there are now nine factories making this class of goods exclusively, two having been established within the last year or two.

In the West the growing popularity of felts is being evidenced more and more, while owing to the many dainty creations presented, felt slippers of all kinds have had a wider holiday sale.

During the Yuletide season felt Juliets and Romeos are enjoying a steadily larger call as suitable presents, while in

built of leather and felt, that is as trim and smart as an all leather creation—for in no branch of shoemaking has higher efficiency or more expert workmanship been revealed than in the manufacture of felt productions in Canada, which have become an important factor in our national development. The industry has certainly assumed large proportions—proportions which are being increased from time to time. Felt of the finer kind is used for making hats and many other purposes. That used for the making of shoes is produced from the high priced wools that come from the Cape of Good Hope, Persia, Africa and South America—Canadian wool not having the proper “fulling” properties for thickening and making the product firm and compact.

There are now some eight or nine thousand felt shoes of various kinds turned out daily in Canada, which shows the relative strength of the industry, and most of the factories will be kept running to capacity all the year. Deliveries will start in May or June next and be kept up until fall, and will continue for sorting purposes until a later date.

SOME ARTISTIC AND INVITING OFFERINGS IN 1916 FELT FOOTWEAR

the line of children's high cut felt goods, some very artistic creations are presented.

Of late years the progress in making felt footwear has been really remarkable and shoes are now turned out that have a smart, clean, light appearance, whereas in times gone by, too many samples were regarded as cumbersome and heavy. Red, green, brown, grey, claret, tan, blue and other shades are now seen in house shoes and slippers, and some really fetching creations are displayed. All orders taken now are for fall delivery and the prospects are bright.

The great centre of felt manufacture in Canada is in Waterloo county, but there are factories also in Perth county and in Northumberland. The sale of felts, so far as the retail trade is concerned, is governed to a certain extent, like the sale of rubber footwear, by weather conditions. In the West there is naturally a constant, unvarying demand for this class of footwear, and in lumber camps, mining centres, etc., there is always a heavy call. In the East, if the winter is cold and dry, felts sell particularly well, more especially so, since the factory designers and superintendents have evolved so many clever and captivating patterns and combinations with leather.

It is now possible to buy a felt lined shoe, or a shoe

Canadians are an open air loving people and like to engage in snow shoeing, sleighing, skating, tobogganing and other outdoor recreations. For these, there is nothing more acceptable than felt footwear. As already stated, these goods are now trim and neat, with an absence of any ponderous or uncouth appearance. There is the felt shoe, foxed with leather, the felt lined blucher, the shoe with an elk sole and rubber heel and felt top, the Goodyear welt with felt and elk sole, felt lined and of fine calf skin or vici kid, and many others, from the cheap felt slipper as low as 25 cents per pair, to the five dollar leather and felt bal.

There has been some difficulty in getting felt goods from England, owing to the war and the fact that so many employees of Old Country firms have gone to the front.

The manufacture of felt footwear was started in Canada about 1860 and has expanded marvellously. As is well known, felt is a material formed by uniting and compressing fibres of wool or fur into a compact body by what is called the felting process.

In the advertising pages of the SHOE AND LEATHER JOURNAL will be found the announcements of several leading felt footwear companies, with splendid illustrations of the various styles and lasts that are being presented.

# AMONG THE SHOE MEN.

C. C. James, tanner and harness dealer, of Priceville, Ont., passed away a few days ago.

R. W. Ashcroft, of the Canadian Consolidated Rubber Co., Montreal, was in Berlin and Toronto last week on business.

N. F. X. Dufresne, vice-president Kingsbury Footwear Co., Montreal, has gone south for the winter.

W. M. Angus, assistant general salesmanager of Ames-Holden-McCready, Limited, Montreal, spent a few days in Toronto last week on business.

M. A. Aziz has entered the retail shoe business at 1383 Queen street east, Toronto.

R. M. Beal, of the R. M. Beal Leather Co., who for the past four years has been mayor of Lindsay, was defeated in the recent elections.

Mineau & Bellemarre, shoe dealers, of Three Rivers, Que., recently made an assignment.

W. J. Armstrong, a well known dealer in shoes and dry goods, has again been elected mayor of Campbellford, Ont.

F. L. Wagner, manager of the Aylmer Shoe Co., Aylmer, who has been mayor of that progressive centre, retired at the recent municipal election after two years faithful services.

S. G. Vance, who has been for some years in the shoe business in Tillsonburg, Ont., has been elected a councillor in that town, standing second at the polls. Mr. Vance's numerous friends in the trade will extend their felicitations.

R. W. G. Bloor, shoeman, of Ingersoll, has been returned to the town council by acclamation. Mr. Bloor is an aggressive and wide awake civic representative and this makes his second term in office.

R. J. Drysdale, shoe retailer, of Hensall, Ont., has retired from the shoe business, having sold out to T. C. Joyn, of Hensall, who has taken possession.

The Parrot Shoe Co. are conducting a "Going-Out-of-Business" sale, in Moose Jaw, and are retiring from that city.

C. E. Hurlbut, of the Hurlbut Co., shoe manufacturers, Preston, Ont., who recently completed a new factory, is again mayor of that progressive town. Mr. Hurlbut was returned by acclamation.

Fred R. Foley, of Bowmanville, Ont., who has been an alderman for two years, this year aspired for the position of reeve, but was defeated by 121 majority. However, he has come up smiling, and says that he will now have all the more time to devote to his boot shop on "The Sunny Side of the Street."

Philip Pocock, of the London Shoe Co., London, Ont., who has been a member and chairman of the Public Utilities Commission in that city for some years, was re-elected at the recent municipal contest in London, for another term. Congratulations.

John Hessenauer, of John Hessenauer & Son, shoe dealers, Berlin, who has been a member of the city council for the past three years, was again a victor at the recent election, showing the confidence placed in him as a solid, progressive representative.

Geo. H. Ferguson, of Vancouver, B. C., who covers British Columbia for the Hartt Boot and Shoe Co., and is

a member of the firm of Murrays Limited, Calgary, spent a few days in Toronto recently with R. L. Savage, while on his way to Fredericton, N.B.

John McEntyre, of John McEntyre, Limited, Montreal, was in Toronto recently on business.

Thos. Reid, an employee of the Regal Shoe Co., Toronto, died recently from pneumonia. He was a former resident of Whitman, Mass., and previous to coming to Toronto resided for a while at Pefferlaw, Ont.

The Canadian Repairing Co. Shoe Hospital, Montreal, has been registered.

The many friends of A. W. Ault, Ottawa, will be glad to know that he is recuperating after his recent operation. He proposes to take a holiday of two months, during which time his son, Lloyd Ault, and J. E. Laflamme will look after the management of the firm.

Strang Bros., manufacturers of shoe polish, Winnipeg, have started in business.

D. Lee, shoemaker, has opened a store in Maple Creek, Sask.

The Western Canada Distributors are starting in the shoe business on a commission basis in Calgary.

Rue & Ulrich, general store, Champion, Alta., have dissolved partnership. Hans Rue continues the boot and shoe business and Daniel Ulrich the implement portion.

P. J. Harney Shoe Co. has resumed manufacturing in Lynn, Mass. It is making 1,000 pairs a day of women's welt shoes.

Paul Awad has opened his new shoe store at 56 Ouellette avenue, Windsor, Ont.

C. S. Corson, sales manager for the Regal Shoe Co., Toronto, who was home over the holidays, left again this week for the West, in order to complete the balance of his trip and call upon several customers in Manitoba, Saskatchewan and Alberta. Mr. Corson finds business exceptionally good in the prairie provinces.

George D. Taylor, who was an employee of the Amherst Boot and Shoe Co., Amherst, N.S., died suddenly a few days ago.

J. S. Ashworth, of Toronto, Canadian manager for Sir H. W. Trickett, Limited, is able to be around again after being in the hospital for a few days for a nasal operation.

David Turpel, of the Selz Shoe Co., Chicago, has been appointed superintendent for Valentine & Martin, shoe manufacturers, Waterloo, Ont. He is a man of very wide experience and thorough practical insight into all the branches of shoemaking, and should be very successful in his new position.

Fire broke out recently in the shoe store of Max Schwartz, 352 Yonge street, Toronto, due to defective electric wiring. The damage done was about one thousand dollars.

Chatham, Ont., is negotiating for a shoe factory which may occupy the Wolverine Brass Works building in that city.

A leading firm of kid leather manufacturers recently sent out the following notice to their customers: "We are obliged to withdraw our present prices as applied to new business and for the reason that goatskins are rapidly advancing in price, and all materials we use in the manufacture of glazed kid are costing us much more than formerly. We

shall be glad to continue supplying your requirements at the very lowest prices possible."

A. C. Flumerfelt, of Vancouver, who is widely known to the shoe trade and is a substantial business man, is the Minister of Finance and Agriculture in the new Bowser ministry of British Columbia.

The Regal Shoe Company, Toronto, has been expanding recently to a remarkable degree, in order to meet the demands of growing business. They have completed all the changes in their factory and have resumed their usual schedule of deliveries. The plant is now fully equipped to make 750 pairs per day and the company expect the business to reach that volume during the coming year.

Frank Griffith, Harry Filkins and H. Sisman, who are all employed as foremen in the T. Sisman Shoe Co., Aurora, Ont., have returned from an extended visit to a number of the larger American factories, where they gained much information and valuable pointers regarding the output of staple goods in Standard screw, peg and McKay. This holiday was given them by the firm, who feel that it will be of great benefit in their various departments.

A new branch of the Miner Rubber Co. has been opened at the corner of Fourth avenue and Athabaska street, Edmonton, Alta., where a full stock will be carried. This branch will be of great convenience to the territory tributary to Edmonton. The Miner Rubber Company are also putting in a stock at Charlottetown, P.E.I., which will be under the charge of C. Leonard Grant, of that city. The stock is now being shipped and the company are preparing to handle sorting trade for the Island.

The Breithaupt Leather Co., of Berlin, have just closed a very large year's business, notwithstanding the high values of everything entering into the leather trade at present, not only the extremely high cost of hides but all tanning materials, and also the war tax of 7½%, which the leather manufacturers are obliged to pay thereon even though they are able to get only a small portion of this back from the leather buyer. The tanneries of the company are in better shape than ever to produce large quantities of leather. John McEntyre, Limited, of Montreal, is now the representative of the Breithaupt Leather Co., to the Montreal shoe manufacturers, while R. M. Fraser, of that city, represents the firm with the leather jobbing trade and also with the manufacturing interests in St. Hyacinthe, and some other points in the province. Both these salesmen are practically entering upon their engagements with the New Year.

Mrs. Pinsonnault, wife of A. J. Pinsonnault, the widely known shoe traveler and proprietress of M. E. Robitaille, Reg., shoe store in Quebec, passed away recently.

A recent illustrated edition of the daily Whig, Kingston, contains an excellent portrait of Captain James T. Sutherland, quartermaster of the 146th Overseas Battalion, who is also president of the Ontario Hockey Association and of the Canadian Amateur Hockey Association. In the reference to this widely-known and popular shoe traveler, he is styled Kingston's "Sunny Jim."

A number of shoe manufacturers, particularly of staple lines, have withdrawn all quotations, owing to the increasing cost of materials, the uncertainty of supplies and the orders on hand. Other firms making for the jobbing trade have advanced their prices from 5 to 10c. a pair.

The factory of the Rock Shoe Manufacturing Co., Limited, located at 168 St. Helene street, Quebec, was destroyed by fire this week. The blaze started in the boiler room and had gained considerable headway before it was discovered. The loss on the building, plant and stock is estimated at \$75,000, while the insurance amounts to only \$35,000. The Rock Shoe Co. has been in business for many years and

make a general line of McKays and men's and boys' Standard screw, the output being about 1,200 pairs a day.

The stock of E. Topp, general merchant and shoe dealer, Collingwood, Ont., who made an assignment some time ago to Chas. Bonnick, Toronto, was sold recently by auction to E. A. Martin & Co., Sudbury, at 67c. on the dollar. The stock in the shoe store amounted to \$12,700, while the general stock amounted to \$15,800 and included in this was about \$2,600 worth of footwear. It is understood that Martin & Co. will have an extensive sale of the goods.

#### BRIGHTER BUSINESS ALL ROUND IN WEST

"Speculators and the riff-raff have all been weeded out, the real estate boom is no longer talked about—not even mentioned—and things are now on a solid conservative basis," declared Mr. C. A. Davies, president of Blachford, Davies Co., Limited, Toronto, who has returned from a three months' business trip throughout the western provinces, going as far as the Coast, and from there visiting Seattle, Spokane, Portland, and traveling south to San Francisco, Los Angeles and other cities. It is three years since Mr.

C. A. DAVIES, TORONTO

Davies took a journey across Western Canada and he met a large number of old friends in Winnipeg, Brandon, Regina, Edmonton, Moose Jaw, Calgary, Lethbridge, Medicine Hat, Vancouver and Victoria.

"Yes," he continued, "times are improving steadily. The general sentiment is favorable and the outlook good. Conditions are much better in every line than they were, buying is undertaken with greater confidence and on a more liberal scale. The abundant harvest has had the effect of stimulating trade in all channels."

Mr. Davies added that this was true, particularly of British Columbia, where many saw mills, which were shut down, are again operating and some will even run all winter, owing to the heavy demand for lumber. Mining operations are also being resumed on a large scale and there is no doubt, that as soon as the war is over the Pacific Coast province will enter upon an era of unprecedented prosperity. Mr. Davies and his sales manager, Mr. F. A. Meservy, immediately after Christmas, spent several days among the shoe factories in Montreal and Quebec on a buying expedition.

The shoe store of C. Dixon, 3510 Commercial street, Vancouver, B.C., was visited by fire recently and damage done to the extent of several hundred dollars.

Reg. Johnston, of the firm of Johnston & Murray, dealers in footwear, St. Thomas, Ont., accumulated a splendid luminescent thumb as a result of a fall sustained on Dundas avenue, London, a few weeks ago. Mr. Johnston was proceeding to his home over the crossing of the traction line when he stumbled and fell. The injury was a painful one and stunned him. He lay prone on the tracks for some time and recovered but a few minutes before an out-bound car passed.

Robert Masson, shoe retailer, of Ottawa, reports that December business was exceptionally satisfactory and was much better than last year.

The Snedcor-Hathaway Co., Limited, of Tillsonburg, Ont., have changed their name to that of "The Tillsonburg Shoe Co., Limited." They will continue to operate under the same management as before. The firm have gained prominence owing to the excellent class of shoes they are turning out. The president and manager is W. C. Coloff, and L. G. Van Geel, is secretary and sales manager.

Mrs. J. A. Love died at her home in Toronto, a few days ago, from an attack of pleurisy. She was the mother of William Love, who, for the past twelve years has been connected with Johnston's Big Shoe House, Vancouver.

The Tetrault Shoe Mfg. Co., Montreal, are extending their floor space, which will enable them to increase their daily capacity. They will have at least 7,000 more square feet at their disposal, and will make 400 pairs more per day of men's Goodyear welts. The past year has been a banner one in the history of the firm, who expect to do as well in 1916.

With the close of the present year the Rannard Shoe, Limited, Winnipeg, completed 12 years of successful business. It was on January 1, 1904, that the first Rannard store was opened at the corner of Main and James. Six years later store No. 2 at the corner of Portage and Hargrave, was set in motion and two years ago the store in the Hample building, opposite Henry Birks, known as No. 3, was opened.

Miss A. Cherry, daughter of Thomas Cherry, shoe retailer, 221 Danforth avenue, Toronto, was married recently to James Balkwill, Ph.B., of Toronto, son of John Balkwill, of Mitchell, Ont.

The annual convention of the National Shoe Retailers' Association, which will be attended by some Canadians for the first time, will be held at Hotel Astor, New York, on January 10, 11 and 12th. The first day will be given over to a conference of the manufacturers and wholesalers with a committee limited to eleven members from each of the organizations. Business sessions of the second and third days will extend from 10 in the morning to 5 or 6 in the afternoon, and a well balanced program is laid out. The annual banquet will be held Tuesday night, January 11th, at Hotel Astor.

A. M. Jarvis, who for several years has been on the travelling staff of the Murray Shoe Co., and is a brother of W. F. D. Jarvis, of C. S. Hyman & Co., London, has been appointed manager of the Murray Shoe Co., London. He is well known to the trade from Fort William to the Coast, which territory he has represented for several firms. He is progressive and energetic and should make good in his new position.

Mr. and Mrs. Wm. Garside, of Lowther avenue, Toronto have gone to Santa Barbara, California, where they will remain for the winter.

It is said that the supply of bronze pumps for party wear and bronze kid boots will soon be exhausted, as the

supply of menthyl violet, the dyestuff used for the bronze color, has given out.

S. R. Wickett, of the firm of Wickett & Craig, leather manufacturers, Toronto, and A. J. Tipping, who has for many years been on the travelling staff of D. D. Hawthorne & Co., wholesale shoes, Toronto, have been re-elected directors of the Commercial Travellers' Mutual Benefit Society of Toronto. Both Mr. Wickett and Mr. Tipping have been directors of the organization for some years, which is a tribute to their worth and work.

The Ontario representatives of the Kaufman Rubber Co. held a very successful convention in Berlin during the week between Christmas and New Year. Many topics of interest were discussed and conditions for the past year (which has been a highly successful one) reviewed and the bright outlook for 1916 considered. Among those in attendance were: Wm. S. Woods, St. Catharines; L. B. Hutchison, E. A. Chalk, J. S. Lovell and Jas. C. Bryant, of Toronto; S. G. Amero of London, and J. S. Townsend, Hamilton.

The largest single order ever taken in Canada for sand paper, eyelets and steel shanks was booked last week by Geo. F. Hennessey, of the Berlin office, United Shoe Machinery Co. This would indicate that trade is looking forward with confidence toward active business conditions during the coming year.

The plant of the Martin Corrugated Paper Box Co., Pape avenue, Toronto, which was visited by fire on Christmas eve, resulted in a loss of \$100,000. This firm manufacture corrugated fibre board shipping cases, and have worked up a large trade with a number of leading Canadian shoe manufacturers and wholesalers. Temporary premises have been leased by the concern and all orders are being filled as usual. There has been practically no interruption to business, owing to facilities which have been placed at the disposal of the company. In the meantime, plans have been drawn up and work will soon start on a larger factory, with the very latest installations.

Geo. C. Locke, shoe retailer, of Calgary, was in Montreal, Toronto and other centres this week on business.

Among those who have sent out beautiful calendars to the trade for the coming season, are, C. A. Ahrens, Limited, Berlin, Ont., and the Anglo-Canadian Leather Co., Toronto.

Howard C. Blachford, president of the Toronto Shoe Retailers' Association, has returned from an extended business trip to Boston, New York, Haverhill, Lynn, and other New England shoe centres, where he was picking up many pointers and all the latest ideas on style presentations for the coming season.

Fred R. Foley, shoe retailer, of Bowmanville, Ont., has been elected vice-president of the Bowmanville branch of the Durham county recruiting league. He recently presided at a big recruiting rally at the Royal Theatre in that town, which has sent many of its best and brightest young men to the front.

F. A. Guinivan, one of the executive members of the Toronto Shoe Retailers' Association, will attend the annual convention of the National Shoe Retailers' Association in New York, on January 10, 11 and 12. Mr. Guinivan has been delegated to invite some speaker of note to come to Toronto at an early date and address a large gathering of the trade, to which representatives of all wholesale houses will be invited. The annual meeting of the Toronto Shoe Retailers' Association will be held on Thursday, January 20th, at which officers for the coming year will be elected. It is expected that there will be a full attendance.

It is understood that the Kingsbury Footwear Co., of Montreal, who have for many years specialized on women's McKays, intend to make women's high grade Goodyear welts

A. M. Jarvis, who was recently appointed manager of the Murray Shoe Co., Limited, London.

A. W. Ault, wholesale shoeman, Ottawa, who is taking a two months' holiday after a recent operation.

John Hessnauer, who is a retail shoeman in Berlin and was elected as alderman for fourth time.

Philip Peacock, wholesale shoeman, London, re-elected as member of the Utilities Commission.

W. E. Wilson, promoter of Owen Sound Shoe Co. who will erect a large factory in that town.

in the near future. C. H. Holmes, late of Galt, is the new superintendent of the company and enters upon his duties this week. The Kingsbury Footwear Co. expect to attain as high a standing and reach as great efficiency in their Goodyear welt department as they have in women's McKays. It will, however, be several months before the Goodyear welts are offered to the Canadian trade, but when they are presented, they will embrace the last word in lasts, style, finish, fit and workmanship.

The annual conference of the travelers and executive staff of the W. B. Hamilton Shoe Co., Toronto, was held on December 28th. Matters affecting the welfare and prosperity of the organization (the past year having been a very gratifying one) were discussed, and in the evening the usual social gathering took place. The travelers, heads of departments and members of the company, were entertained at a banquet at the National Club. W. A. Hamilton, president of the company, presided in a genial manner, and, under his direction a splendid program was carried out. Songs were given by W. D. Griffiths, of Barrie; J. E. Firth, Peterboro; Geo. Nicholson and John Huxley, Toronto; Wm. Coulson, foreman of the cutting room, gave a recitation; while piano solos were contributed by Jos. Davis and Ed. Firth. Speeches were delivered by a number of the guests and R. T. Hornibrook, of the accounting staff, who recently joined the ranks of the benedicts, was tendered an ovation. Among those present from outside Toronto were J. E. and Edward Firth, Peterboro; W. C. Foster, Bracebridge; W. A. Griffiths and W. D. Griffiths, Barrie; G. B. Campton, Brockville, and L. S. McKindsey, Hamilton.

The by-law to grant a company a free site, exemption from taxes for ten years, except school taxes and local improvement, and a loan of \$12,000 for a term of 14 years, at 6% interest, was carried by the ratepayers of Listowel, Ont., by a majority of 210. The new company (which is composed of H. B. Morphy, F. W. Hay, A. H. Hawkins, J. W. Bernie and J. S. Gee, all of whom are widely known local business men) will employ at the end of the first year 40 hands, and, thereafter 60 hands, and will erect a building 50 by 80 feet, two storeys in height, with basement.

J. A. Connor, of Toronto, manager of the Ontario Division of the Canadian Consolidated Rubber Co., spent the holidays at his old home in London, Ont.

The by-law voted upon by the ratepayers of Owen Sound, to grant a loan of \$12,000 to a new shoe company, which has been promoted by W. E. Wilson of London, was carried by 972 majority. The enterprise is also granted exemption from taxes for a period of ten years, except school and local improvement levies, and will be given free water. The company will erect a plant and building to cost not less than \$20,000. The new concern will be known as the Owen Sound Shoe Manufacturing Co., and will have an authorized capital of \$50,000. The factory will have an initial output of not less than 200 pairs a day, with the necessary room and building capacity for 800 pairs

a day when required. The loan of \$12,000 is to be repaid in 15 consecutive annual installments.

Fred Jackson, shoe retailer, of Clinton, Ont., who for the past two years has been mayor of that town, retired at the end of 1915, amid many expressions of regret. Mr. Jackson made an able chief magistrate and did much for the best interests of the community.

Mineau & Bellemarre, shoe dealers, Three Rivers, Que., recently assigned.

C. E. Clements, shoe retailer, of Chatham, Ont., who last year made his bow in municipal life, and headed the polls in the aldermanic race, is once more a member of the council of the Maple City. He again had the distinction of securing the largest number of votes, which is a tribute to the confidence in which he is held.

E. J. Kelly, shoe merchant, who was an alderman for one year in Brockville in 1913, has been returned as one of the representatives of the east ward in that town. His re-entrance in civic life is welcomed by the citizens.

W. E. Young, city traveler for P. Jacobi, shoe store supplies, Toronto, has the sympathy of many friends in the trade in the death of his five months' old daughter on Christmas day.

Among the firms who have sent attractive calendars for the coming year to their friends and customers, are Aird & Son, Montreal; Legace & Lepinay, Quebec; The Hurlbut Co., Preston, Ont.; La Duchesse Shoe Co., Montreal; Gale Bros., Quebec; Robin Bros., Montreal; Beardmore & Co., Toronto; L. S. Odell, Montreal, and others.

W. L. Nado, Canadian representative, of the Peerless Machinery Co., of Boston, was called home recently owing to the death of his mother, which occurred on December 13th.

During the month of October, 245 dozen pairs of boots (of leather) were imported into the United Kingdom from Canada, the declared value being £477. In rubber footwear, 1,209 dozen pairs were imported from Canada, the value being £2,573.

The Goodyear Tire and Rubber Company, which has its headquarters in Akron, Ohio, and one of its allied industries are going to establish branches in the Dominion. These will be located in New Toronto, a suburb of Toronto, if the property owners on January 8th next vote favorably upon a proposal to grant a fixed assessment of \$1,000 an acre on the twenty-seven acres to be used for the plant. The Goodyear people have agreed to spend a million dollars on its plant and employ 1,500 hands, with an increase to 3,000 hands if the allied industry also decides to go to New Toronto.

Jas. McI. Dunn, shoe dealer, Ottawa, recently made an assignment to V. Lemaire, of Montreal.

A factory has just been completed and is in operation at Everett, Wash., manufacturing red cedar shoes from timber logged on the upper tributaries of the Snohomish River. The wooden shoes are now being used quite extensively by workmen in breweries, tanneries and firemen and coal

stokers on ocean liners. Where the feet must come in close contact with hot grates, doors near strong acids, the cedar wood has been found to be the best non-conductor known.

H. L. Geene, of Ottawa, and Chas. McFarlane, eastern Ontario representatives of the White Shoe Co., spent a few days in Toronto last week.

Adam Sippel, shoe retailer, Berlin, who has been confined to his home for a few days with bronchitis, is much better.

The Department of Naval Service, Ottawa, is advertising for tenders for five thousand pairs of seamen's boots, which will be received up to January 18th.

The new factory of the Lady Belle Shoe Co., Berlin, is nearing completion and will be in operation early next month. The company, which is composed of Alex. Inrig and A. A. Armbrust, will make women's fine McKay shoes.

The members of the staff of the White Shoe Co., Toronto, presented Hugh White, head of the house, with a fine fishing outfit during the holidays, as a token of appreciation and esteem. R. B. Gravlin and Thomas Scott, who have been connected with the house for many years, were remembered by the firm with diamond stick pins.

Commencing January 1st, Mr. R. F. Renne will have charge of the factory of the C.N.W. Shoe Co., Limited, London, Ont. Mr. Renne has had charge of Thacher & Co.'s factory in Richmond, Va. He will become financially interested in the C.N.W. Company, and will materially assist Mr. E. S. Hunt, president, in his ambition to turn out women's shoes second to none in Canada.

C. W. McGuire, of London, was elected president of the Ontario Commercial Travellers' Association by acclamation at the annual meeting of that body.

The Northwestern Leather Co., Sault Ste. Marie, Ont., is a firm believer in useful Christmas gifts as is evinced by the presents which its numerous employees received for Christmas this year. The company are planning to take out for each of their employees a life insurance policy upon which they shall pay the premiums, while the man is in their employ. The policies of the married men with wives in this country will be for \$1,000, while those for the unmarried men and those who have wives in the Old Country will be for \$500.

F. E. Woodward & Sons, manufacturers of shoe cement, top facings, shoe canvas, cork filler, etc., as well as canvas and leather insoles have bought from the liquidators of the estate of Fisk Limited, Montreal, all the assets included in the cement department of the estate. The business is now carried on under the firm name of F. E. Woodward & Sons. The company are carrying the necessary stock to fill all orders, and are installing the latest machinery. They intend to keep their rubber cements up to the high standard they have held in the past and make a specialty of backing of cloth.

J. I. R. Gorman, shoe retailer, of Belleville, joined the ranks of the benedicts on New Year's day, being married to Miss Mabel Agnes Lattimer, at the residence of her brother, W. H. Lattimer. The ceremony was performed by Rev. Jos. H. Locke, of Toronto. The bridegroom is a son of the late S. R. Gorman, who, before entering the retail business, was a shoe traveler for 30 years. Mr. Gorman and bride spent a few days in Toronto and points west, on their honeymoon, and received the congratulations of a large number of friends.

J. A. & M. Cote Co., St. Hyacinthe, Que., intend putting some new lines on the market for the fall season of 1916, and are already making preparations to that end. Their plant is running to full capacity and during the past few weeks, has had to run over-time, in order to meet the de-

mands of the trade. The outlook for the coming year is exceptionally bright.

P. I. Hersey, manufacturing director and vice-president of the Regal Shoe Co., Boston, was in Toronto last week on a business trip.

W. Ross Cameron, who was head of the warehouse staff of Blachford, Davies & Co., Toronto, enlisted, having obtained a commission as a Lieutenant. On Christmas Eve he was presented with a silver wrist watch. C. A. Davies made the presentation, and Lieut. Cameron replied in an appreciative manner.

The employees of Clark Bros., Limited, St. Stephen, N.B., gave a New Year's concert and dance for the benefit of the Patriotic fund. It was a highly successful event. The first floor of the factory, a nice, large, clean room, was cleared, and about 300 couples were present. Music was furnished by a first class orchestra and cake and ice cream served. A considerable sum was raised. The affair was handled entirely by the employees of the company and they certainly scored a great success.

A scarcity of hockey boots developed in the jobbing trade of Toronto and other cities during the recent holiday rush. The demand for "hockeys" of all kinds was larger than ever and many establishments were put at their wits' end to answer the unexpected calls. Stocks have now been replenished.

#### GOOD OUTLOOK FOR COMING YEAR

E. M. Grove, manager of Narrow Fabric Weaving and Dyeing, Limited, Galt, Ont., reports that business for the coming year is exceptionally bright, and that the number of orders already in hand is highly encouraging. Mr. Grove is an old Galt boy, who is widely and favorably known in that progressive Scotch centre. The firm, of which he is manager, were established in 1912 and they manufacture

E. M. GROVE, GALT, ONT.

silk and cotton woven labels, shoe webbing and facing, galloons, shoe pulls, etc. Adam Bradle, who has had 30 years' practical experience in the business, was recently appointed superintendent of the plant, and many new designs have been originated for the coming year, while the patterns are made right on the premises. The firm do all their own dyeing.

The shoe factory of E. T. Wright Co., St. Thomas, Ont., is running to capacity and the year 1915 was a very gratifying one. During the past eight months over three hundred and fifty new accounts were opened up, while a stock department has been inaugurated in Regina for the western trade of the company.

H. E. Moles, of J. & T. Bell, Limited, Montreal, spent a few days recently in New York and other cities.

Factories making larrigans and shoepacks have been very busy for some time on large army orders and heavy shipments are going forward to the Canadian soldiers at the front. Larrigans are well adapted to the wet condition of the trenches, being both warm and waterproof. It is announced that some delay was occasioned in the case of one shipment which was sent a few weeks ago. They were discovered sidetracked on a freight car in the Maritime Provinces.

The marriage took place on December 24th at Buenos Aires, South America, of Gordon Torrance, second son of Alfred O. Beardmore, of Beardmore & Co., Toronto, to Miss Lillian Dorothy, eldest daughter of Mr. and Mrs. E. J. Silcock, Barkstone Lodge, Roundhay, Leeds, England. The bridegroom is on the hide buying staff of the Beardmore Co., in South America, where he has been for several months.

The many friends of D. R. Hawley, of Toronto, will sympathize with him in the death of his wife, which occurred on Christmas morning. Mrs. Hawley, who was in her fifty-fifth year, was formerly Miss Amalia de Angelis. She was born at Corfu in Greece, and had resided in Toronto for the past thirty-four years. Besides her husband, who is one of the most widely known shoe travelers in Canada, having for many years been on the staff of Getty & Scott, Limited, of Galt, she leaves four daughters, Mrs. Wallace and Mrs. Ryan of London, England; Mrs. Percy Jermyn and Miss Vera Hawley of Toronto.

W. J. Connor, manager of the London, Ont., branch of the Canadian Consolidated Rubber Co., who was laid up several days with an attack of lumbago, is able to be around again.

W. J. Duncan, of the W. J. Duncan Legging Co., Seaford, Ont., was in Toronto last week on business.

J. T. Lawson, shoe retailer, of Regina, Sask., spent a few days in Toronto recently and is now at Orangeville, Ont., on a visit to his mother. He reports having done a highly satisfactory holiday trade. Since going to the West several years ago, Mr. Lawson has met with a large measure of success in the shoe business.

O. H. Vogt, managing director of the Great West Felt Co., Elmira, Ont., left this week on an extended trip to Florida and other southern states, where he will enjoy a well-earned holiday.

C. A. Brown, purchasing agent of the Regal Shoe Co., Boston, was in Toronto this week on business.

R. H. Partridge, city traveler for Ames-Holden-McCreedy, Limited, Toronto, has returned after spending the past two weeks on a visit to Kingston.

A. Labelle & Co., shoe dealers, Montreal, have assigned.

W. H. Grosch, of the Grosch Felt Shoe Co., Milverton, Ont., was in Toronto this week on business.

Clark Bros., Limited, St. Stephen, N.B., owing to an increase in business, have found it necessary to move their making and lasting departments into the basement of their factory, which is a first-class work room, although they have not needed to use it until the present time. The company have many more orders on hand than they are in a position to take care of at their present capacity, and are laying out

their machinery to double their output and in order to meet increased business may have to install extra equipment.

J. P. Donald, manager of the Logan Tanneries, Pictou, N.S., has three sons who have joined the colors. They are Lieut. D. Bruce Donald, Trooper W. Leslie Donald, and Lieut. Alexander G. Donald. Mr. Donald, who is a former resident of Lindsay, Ont., has been residing in Pictou, N.S., for a number of years, and has always been a loyal and patriotic citizen. One of his sons, Lieut. Alexander G. Donald, belongs to the 92nd Highlanders, and enlisted in Toronto in August last, where he is now in training. Another son, Trooper W. Leslie Donald, enlisted in Alberta, with "B" Squadron, Strathcona Horse, at the beginning of the war, and is now serving in Belgium. Another son, Lieut. D. Bruce Donald, enlisted with the 17th Battalion in Pictou at the beginning of the war, and is now in active service.

Jos. King, of King Bros., Limited, Whitby, Ont., has been making a tour of the eastern states during the past two weeks, visiting the leather markets of Boston and New York.

A. J. Seal, foreman in the packing and finishing department of Getty & Scott, Limited, Galt, Ont., was presented recently with a handsome club bag by the employees of that department.

Drummond Shoe, Limited, Drummondville, Que., have installed a sprinkler system in connection with their factory. It is now in running order. The plant is also operating full blast on spring orders and has a lot of work ahead.

Miss Walters, who has for some years been stitching room forelady of the Weston Shoe Co., Campbellford, Ont., was married a short time ago, and was presented with a handsome marble clock by the employees of the stitching room, and with an easy chair by the members of the firm.

The French Government, in order to satisfy the needs of the army, has decided on a general requisitioning of crude leather, beginning January 5th.

The coming of cold weather always opens up a new source of revenue to the enterprising shoe repair man. He not only should specialize on rubber soles and rubber heels, but emphasize the fact that he can do such a good job that it is not necessary for his customers to wear rubbers, in order to keep from slipping on the icy pavement, or to avoid damp feet in slushy weather. Then the alert repair man will seek to make his shop a centre of activity for the young people by attaching skates and sharpening the blades. He should have a sign prominently displayed, stating that such work is done neatly and expeditiously, and that when skates are sharpened at his place, the popular winter pastime is rendered doubly delightful. Many shoe repairers just now are putting in skate sharpening machines, in connection with their repair outfit. They are operated by the same power, and a machine along with pulley costs only \$20. It is easily set up, and there is no reason why an energetic repairer should not be able to make enough money the first season to repay him for this small outlay. He generally gets ten cents for sharpening skates or using a more euphonious expression, concaving them; for attaching skates to shoes the usual charge is 10 cents when the customer furnishes the screws. When no screws are supplied the charge is 15 cents, and from 25 to 50 cents is the figure when the skates are rivetted on. The United Shoe Machinery Co., of Toronto, have lately sold a large number of skate sharpening machines, Model N, and those who have purchased them are well pleased with the investment. Among the most recent concerns to put in the machines are:—United Shoe Repair Co., 667 Queen St. W., Toronto; John Sutherland, 163 Simcoe St., Peterboro; Amos Cooper, 620 Talbot St., St. Thomas; F. R. Clarke, 260 King St. West, Hamilton; J. F. Griffin, 385 Front St., Belleville; Alf. Dainty, 24 St. Paul St. W., St. Catharines; C. Wright, King St., Ingersoll.

**LEATHER CONDITIONS ACTIVE DURING 1916**

Writing on the leather and hide situation in the Toronto Globe's "Annual Financial Survey," Alfred O. Beardmore, of Beardmore & Co., Toronto, says: Owing to the war the leather trade, excepting in those lines that were not suitable for war purposes, has been very good. For the first months of 1915 fairly large orders for infantry, cavalry and artillery equipment were placed in Canada, which kept the tanners busy turning out leather for these contracts. War orders slackened off during the summer months, but new orders for equipment having been recently placed, the tanners are again busy.

The sole leather and upper leather trade has been steadily good all the year. This also is owing to the demand for boots and shoes for war purposes.

The main handicap in the tanning industry has been the high cost and scarcity of tanning materials, plus the duty, which has made itself felt this autumn. The phenomenally high price of hides had a marked tendency to curtail business in the first half of the year and kept leather buyers out of the market except for immediate wants, purchasers hoping that hides would decline in price. Such, however, has not been the case to any great extent, and consequently buyers have now come into the market to make up their stocks. Even should hides slightly decline in price it would be more than offset by the extremely high cost of tanning materials. Calf leather tanners have had a very troublesome year. Their largest source of supply of raw materials having been cut off, prices in the course of the year have varied considerably. At present the demand is increased.

The weak spot in our domestic leather trade has been harness leather. This is due largely to the great falling off in demand from the northwest, where business depression was so keenly felt. Recently there has been a revival and by the spring good business is looked for. Belting business has been very good, but this is owing largely to so many factories working on munitions of war and incidentally the installation of new machinery for this purpose. Owing to the changed conditions that the war has brought about, a demand for different substances in leather from those usually asked for has arisen, and it is this phase of the business that makes it difficult for the tanner.

To-day even if the tanner is able to get asking prices

**Army Shoe Lasts For Sale**

WE HAVE ABOUT 500 PAIRS OF THE STANDARD SIZE ARMY WELT LAST, NUMBER 469, ABOUT ONE-THIRD E'S AND TWO-THIRDS F'S. THEY ARE ALL IN GOOD CONDITION, AND WE OFFER THESE FOR 50c. PER PAIR. FOR FURTHER INFORMATION, APPLY TO BOX 14, SHOE AND LEATHER JOURNAL, TORONTO.

**CONDENSED ADVERTISEMENTS**

Two cents a word. Minimum charge for an advertisement 50 cents  
Cash must accompany all orders.

WANTED—By experienced traveller, with Ontario connections—a good line of shoes—salary or commission. Shortly disengaged. Apply Box 12, SHOE AND LEATHER JOURNAL.

WANTED—For Province of Quebec, a shoe salesman, one with good connection preferred, to carry a small line of Rubber goods, chiefly boots, lumbermen's and felts of first quality. Apply Box 16, SHOE AND LEATHER JOURNAL, Toronto.

WANTED—For Ontario, Quebec or Western Canada, salesman to carry small line of Children's and Misses' shoes on commission—a good side line. Address, Box 6, SHOE AND LEATHER JOURNAL, Toronto.

for leather it leaves him a very small margin of profit, owing, as already stated, to the high price of hides and raw material, which is increased in Canada by a duty of 7½ per cent. The price of packer steer hides is 24½c.; this is 1½c. more than they were a year ago. The price of packer cow hides is 20c. to 21c., which is two to three cents less than a year ago. This is explained by the fact that a year ago cow hides were phenomenally high, being on a par with steer hides. In normal times cow hides are usually worth 10 per cent. less than steer hides, and they are now down to their normal relative value to steer hides. Twenty years ago these hides were sold at 5c. per pound for steers and 4c. per pound for cows, so that the cost of packer hides has increased five times the value they were in 1895-6.

# ELMIRA FELTS

## In War Time

In brilliant contrast with the business conditions controlling the buying policy of shoe dealers at the beginning of our last selling season, every indication seems now pointing toward one of the most prosperous and active years that Canadian shoe dealers have ever known.

In War Time—and the manufacturer's purchasing agent has surely found it real war to locate and get deliveries of the high-grade raw materials necessary for the manufacture of "Elmira" Felt Shoes and Slippers—early orders are vital to successful buying of staple raw materials as wools, leather, dyes, etc., and vital to deliveries of Felt Footwear on dates called for. We are sure you will realize the community of interest that exists between you and us at this time, and will help us to serve you to best advantage by placing your orders for Elmiras early.

We have added a complete range of dainty and attractive Elmira Kozys, also many lines of All Felt Shoes, Fleece-lined Goodyears, and Leather Foxed and Leather Soled lines, all made in the usual high standard of quality and workmanship that has distinguished Elmira Felts from all others.

In the meantime we have issued a complete list of 1916 lines and prices, but since we cannot forecast the doubtless advancing price trend of raw materials throughout 1916, we are forced to announce that prices are subject to change without notice, and would urge our Elmira retail friends to get their orders for Elmiras placed with the Elmira jobber as soon as possible. Ninety per cent. of the Canadian Shoe Jobbers sell Elmiras. The above trade mark is the guarantee of the genuine Elmiras.

The handsomest Felt Footwear Catalogue ever published, illustrating Elmiras, is being mailed. Should you not receive one, send a card, it will be worth while.

# Survival Value

What is it? Survival Value is the lasting prestige added to all footwear by the affixing of the **Union Stamp**—it is the surviving standard because:

- 1st It is a guarantee of honest footwear, made under the best conditions.**
- 2nd It is a pledge of expert workmanship.**
- 3rd It is the pass-word which opens the sales doors to Union Men everywhere.**
- 4th After the other inducements have all been recited, the conclusive and finishing argument is the UNION STAMP.**

Every shoe bearing the **Union Stamp** retains a sales value of long duration, for no shoe bears the stamp unless it has been produced under the proper conditions and represents honest value.

For mutual profits, better and bigger business, insist upon the official stamp of the **Boot and Shoe Workers' Union**—the only guarantee of Union Footwear.

## THE BUSINESS SITUATION

**Improvement is in the Air—Everybody is Talking About Better Business—  
January Much Better Than Last Year Retailers Say—Labor Getting Scarce**

**T**HE general outlook continues good and reports from all quarters indicate a steady improvement all along the line. Manufacturers are feeling the effects of the inclination of retailers to respond a little better and report increased orders and a greater tendency to anticipate the coming season's wants. Retail stocks have been low and the holiday selling revealed the bones that were left in the cupboard; the result is a tendency to clean out and fill up.

The leather business is booming in some lines and quiet in others. Those with army orders are working night and day in some instances, while most of the other large producers of standard lines of upper and sole are busy. Some large sales have been made in the United States of light stock and sole leather, notwithstanding the fact that there is a good deal of stagnation over there and they have still a good deal of leather made with cheap hides. Some Canadian tanners have bought harness over there to fill orders abroad.

In shoes there is a steady movement. Retail stocks are well cleaned up and the January sales are doing the rest. Manufacturers and jobbers report a disposition not only to sort but to add to spring orders already given. Dealers seem to be anticipating a good spring trade and are looking forward hopefully to Easter which will this year come the latest in over thirty years. Payments so far, it is claimed, are satisfactory.

Shoe manufacturers report business considerably better than this time last year and that apart from the military work that is affording quite an outlet for the industry. The change from calf to side leather was none too soon and has proven a good thing for Canada as well as the Army.

Rubber shoes are the next excitement to come. The season so far has been a fairly good one as far as the retailer is concerned, although the cold weather came a little late. Dealers bought sparingly and, therefore, stocks are cleaned up and in a satisfactory condition. Rubber shoe manufacturers have been preparing for the new season. Notwithstanding the advance in raw rubber and the scarcity and high price of other materials there has been no advance in prices in the United States by the big combine. Some think that this course is owing to a desire to make it interesting for the smaller concerns. Manufacturers in Canada have been talking an advance but nothing definite has been announced as yet.

Taking things all around the situation in both wholesale and retail trade is most interesting. With the abnormal conditions that prevail through the scarcity of dyes and other materials there is not the least doubt that prices in many manufactured products must go up. With the pronounced scarcity of labor that now exists and which will become more acute as the larger number of men are withdrawn from industrial employment to make up the war contingents, wages will advance very materially. This will mean enhanced prices so that the dealer who has the money and facilities for carrying stock will make a good investment in covering liberally his needs in merchandise.

## PICKING OUT SUITABLE BUSINESS SITE

Location Often Makes or Breaks a Store—Trade, Like a Stream, Follows Line of Least Resistance—Stand is Always Most Important Consideration With Any Kind of Retail Business—Some Pertinent Advice on Selecting Site in the Right Place

BY A STAFF WRITER

**T**HE man who continues to do business "at the old stand" often commits commercial suicide. Because your father leaves you a store in a backnumber part of the town, or on a dead crossroad, this is no reason why you should continue to run the business into the junk heap. "In the same stand for forty years" is not regarded today as a recommendation for the highest business sanity. If your father had the gumption to know and develop a good stand, and the footsteps of the people continue to lead to the front door, that is another story, but as a rule a decade or so will so completely change the character of a business location in most cities or towns that it is not a safe policy to stay by the old landmarks.

A business requires customers more than it needs goods, and if the former fail it matters not how good or saleable the wares or how well they have been bought, they will be a millstone about their owner's neck. So location is first, last and always an important consideration with any sort of a retail business. There are some stores that if they could be transferred around the corner or taken up the street a block, might easily double their business, but the owners plug away "at the old stand" and waste their years, their efforts and their money in a hopeless uphill fight.

It is interesting to notice how trade like a stream follows the line of least resistance. People will not go out of their way to buy goods if the latter are procurable elsewhere, or unless there is some strong attraction to woo them from the regular beaten track. That is why every town has a regular busy district. Have you ever sat down

and thought out the reason why all the best business is on a certain street, upon a certain side of that street and within a certain distance on that side. Have you ever asked why in most cities and towns the west or north sides seem to have the preference, although by the way, there is sometimes a variation in the same town. In Toronto, for instance, the west side of Yonge street, except for three or four blocks, is recognized as the better one for business. The north side of Queen street for a distance of nine miles holds the pre-eminence, while on King street the south side has the best stores. In Montreal the north side of St. Catherine street seems to be the most popular, while the east side of Bleury and the same side of St. Lawrence Main is the best for business. In most smaller cities and towns the north and west sides have the call, although now and then the south and east sides show up well. In London it is the east side of Richmond street and the south side of Dundas street that are the busiest thoroughfares, and in some cities, like Berlin, the big stores run for a while on one side and then skip over to the other.

If any general reason may be advanced it would seem that the shady side claims the most consideration, notwithstanding the fact that the north side of the street running east and west is usually hot for a good part of the day. Nevertheless, this does not seem to militate against it even for the sale of perishable goods. Some advance the theory that where store growth is on the west side, it is an indication of the development of the town in that direction, and, people coming west from the older parts naturally after facing the sun, like to cross over to the shady side when shopping. But this argument will not meet the fact that most towns, especially those upon the lake front, develop towards the north and this does not cause the people to cross to the shady south side when they do their shopping.

The real reason for the north or west side being chosen in the first place by store keepers, is that they are the coolest in the hot part of the day, and, when once the start is made, other merchants follow the lead and soon there is a regular settlement of stores. All the talk about preferences on the part of the buying public for certain sides, is neither here nor there as far as the origin is concerned, although there can be no doubt that people prefer the shady side.

The great principle to bear in mind is that the individual follows the crowd. We are like a flock of sheep and are caught irresistibly in the movement of those about us. The fact that more people are seen on the other side of the street is almost certain to draw us over the first clean crossing we reach. Thus, in successful merchandizing it is a safe principle to follow the crowd, to go where the people are. In this respect competition is the life of trade. It is, as a rule, better to have a rival next door than be on the other side and have the block to yourself. There may be some businesses, however, that may do fairly well around the corner or across the street, but in most lines it pays to be where the people are passing to and fro and where there is the easiest opportunity afforded to buyers, not only to look at your windows but turn in at your door.

Sometimes, however, the crowd is transient and does not pay. There is a drug store near an Eaton corner in Toronto where the cars stop, that claims most of the people

BUSIEST CORNER  
IN TORONTO

*THE Corner of Queen and Yonge Streets, the great retail centre between the Eaton and Simpson stores, worth about \$30.00 a square foot.*

COLLEGE AND YONGE STREETS

*THE retail district that is to be. Business is gradually moving up street. A large unknown corporation has bought the block opposite, presumably for a departmental store.*

get off and go on to the big store. Their trade is largely with its competitor's employees.

Some of the large stores, and particularly the chain stores, reduce this matter of location to a science and, as far as may be, really make a certainty out of an uncertainty. Taking for instance a large departmental store, it calculates carefully the location of its business from the standpoint of the stores about, the people who pass, and the transportation facilities the people have for getting from a distance to its premises. No one today would think of establishing a departmental store south of King street on Yonge or north of College on the same street. For the same reason no sane merchant would think of starting a large shoe store, a specialty dry goods establishment, or an up-to-date men's furnishing store two blocks below, say, Charlotte street on George street in Peterboro.

One of the cigar concerns that has some hundreds of stores all over Canada has in vogue a definite system of locating its establishments. They study the locality, prepare data as to the number of men passing a given point in a day and in a period, calculate the distance from other cigar stores, and such things as the nearness to transfer points on the street railway. In a business like this it is the passing trade that counts, and this company leaves no stone unturned to ascertain in advance the possibilities of a stand.

They claim that one out of every one hundred and twenty-five men passing drops in and buys cigars or tobacco.

To a certain extent this system ought to apply to any line of trade, especially specialties. A woman's store ought essentially to be in the very heart of the shopping centre. It ought to be located so as to catch, of course, women patrons rather than men, so that a position near a dry goods, millinery or furrier's establishment would seem to be desirable. This kind of trade is not of as transient a character as small wares and need not, therefore, be on an expensive corner nor should it be at a transfer point where people are mostly getting on and off cars. The test should be made upon a basis of actual business possibilities.

In the case of men's specialties or even with a general

line such as footwear, it is desirable that locations should be chosen so that not only is there as full a number as possible of prospective customers, but that the latter should have as much leisure and tendency as possible to examine the goods in the windows or in the store. But even with the latter lines there may be a variation in relative location, as neckwear does not require the same time in selecting, as a rule, as footwear.

The general principle, however, obtains that a location should be chosen first with regard to the number of customers passing and repassing, then as to the character or objects of the people passing, and thirdly, as to the opportunities for enlisting the interest of these prospective patrons. Of course there is the class of business done to be considered. On this account it may possibly pay a merchant sometimes to be on the side of the street where the rents are not so high. For instance, a furniture store may do fairly well outside the high class district or on the other side of the street, especially if its merchandise is such that requires the support of high class buyers, and it may even thrive on its merits when it handles the very best goods and is content to look across at its customers. It may also be that a shoe store, a clothing store, or a similar establishment that relies mainly on its prices to bring trade may be able to make a good showing in spite of apparent disadvantages of poor location, but these are but exceptions that prove the rule. The man who prospers is the one who knows he is in the right place and getting what he should out of his stand.

All your customers want the best goods they can afford to buy. See that you don't make the mistake of encouraging them to buy cheap trash because it is easier for you.

KING AND YONGE STREETS

*THE original centre of retail business in Toronto. Dead for awhile, now a valuable retail spot. Values gone up tremendously in ten years. Most valuable retail property in Toronto lies between here and Queen Street.*

## TOO HEAVY STOCKS—TOO MANY STYLES

**“Order Now” Department of Shoe Factories Helps Some to Relieve the Strain—Retailers Blame Manufacturers for Multiplication of Freaks and for Difficulty in Sizing Up on New Lasts—Get Rid of the Stickers and Keep Live Selling Ranges**

Shoe merchants generally think they carry too heavy a stock, but how to remedy matters is a problem that confronts them and calls for serious consideration.

The in-stock department, established by some Canadian manufacturers, has helped materially to reduce odds and ends in live selling lines, and is made use of by a large number of retailers. While the order-now adjunct has gone a long way toward solving too heavy accumulation of goods, it has not, by any means, adequately met the situation.

The majority of men in the footwear business also consider that there are too many styles, and that they change too rapidly. Various suggestions, to remedy the multiplication of modes, have been presented, but it is not likely that anything definite will be accomplished, until some concerted action is taken. The retailer blames the manufacturer, the manufacturer blames the last and pattern makers, and the latter blame the women, while women blame the tendency of the times, and there you are.

There is no doubt also, that the average shoeman has too much dead stock on his hands. It is not alive. Some contend that 90% of their stock is a vital factor in every day transactions, while others place the average at 60% or 80%, and some are candid enough to admit that only 50% is of actual necessity and paramount interest to the success and development of their trade. The rest is dead weight, and it is the capital locked up in the immovable lines—the stickers—as they are stigmatized—that decreases profits and eats up earnings, which otherwise might be working and making money for the man behind the enterprise.

Many remedies, theoretical and practical, have been proposed, and while no general rule can be laid down, certain principles may be propounded. The average shoeman can appropriate what he thinks would be helpful in his business, and lay the rest aside.

Some retailers get rid of their left-overs and shelf warmers by special sales—others by bargain tables, others by the p.m. system, and several by using baskets, racks, boxes and other receptacles at the door.

It is always interesting to learn the views of others, and if in the multitude there is wisdom, perhaps the average reader can gain some good ideas from the opinions of a few representative firms, large and small.

### **We May Have Variety But—**

“Yes,” remarked J. G. Steele, of Carleton Place, Ont., “buying boots and shoes to-day is quite a problem. Last fall I bought two lines of pumps for spring, and sold one pair of one line, and the others—I have them all yet. Why? Too many lines to choose from. Who is to blame? You say we must have variety—yet people were just as happy thirty or forty years ago, when there were no such sudden and numerous style changes. Any man knows the rapid alterations of styles in shoes has a tendency to drive some merchants out of business.” Mr. Steele considers that he carries too heavy a stock, and intends to make use of the in-stock departments installed by manufacturers, to reduce odds and ends in certain lines. He thinks that if manufacturers put their heads together, agree on a certain number of styles, and stand by them, it would be a great benefit to the trade. They would save money for themselves and also for the retailers, by buying fewer lasts and patterns. He blames the manufacturers for the multiplicity of styles, and is of the opinion that as long as there are so many models,

there will always be odd sizes, and while odd sizes can be obtained under present conditions, delivery is not quick enough.

H. B. Myers, of Barrie, Ont., considers that an in-stock department helps to reduce odds and ends, increase profits, and he makes use of the present “order-now” branches which Canadian firms have. Mr. Myers thinks that there are too many styles, and he has some difficulty in securing proper sizes at the time when desired. He believes that the in-stock department facilities might be greatly extended.

### **Extend the In-stock Facilities**

J. J. Walsh, of Lindsay, thinks that 90% of his stock consists of good vital sellers and he gets rid of shelf warmers by the bargain table route. Mr. Walsh makes use of the in-stock departments, but believes there are too many styles at the present day, and that they change too rapidly. He considers his stock too heavy. When a new last is introduced, and say, thirty pairs ordered therefrom, difficulty is experienced in sizing up correctly, from the fact that the majority of manufacturers do not carry an in-stock department on any of their decidedly new creations. It is only on the more staple lines that the service is furnished, and Mr. Walsh thinks the facilities might be greatly extended.

### **How to Check Style Changes**

J. W. Lowes, of Saskatoon, says:—“I have no difficulty in getting rid of shelf warmers. I mark them down and keep them separate—for there are always a number of customers who demand a cheaper shoe, and a salesman, who has the interests of his stock at heart, can always work them off with satisfaction to all, and make use of present in-stock departments, and thereby seek to have only good, live selling lines. At the same time,” he adds, “I consider my stock too heavy, although about 90% of it is good, live, saleable stuff. I have also considerable difficulty on sizing up correctly on a new line, and wish the in-stock departments were extended to include all latest offerings. If manufacturers were compelled to keep an in-stock department for every novelty they placed on the market, they would soon discover that such a game was a losing one, and I think this would, in a measure, check a large number of frequent changes in styles.”

“We not only believe, but we know, that we carry far too heavy stock for the amount of our turnover,” was the emphatic response of a member of the firm of W. H. Bartlett & Sons, Brampton, to the inquiry of the *SHOE AND LEATHER JOURNAL*. “But,” he continued, “under present conditions and circumstances, it seems impossible to keep stocks down, on account of so many new styles coming out.” Mr. Bartlett believes the style problem and its attendant complications, could be more deftly and quickly handled (or muzzled, as he puts it) by the manufacturer than by the retailer. “Many shoe dealers,” he says, “in their desire to outstrip their competitors, demand styles ahead of time, and in view of such rivalry, the manufacturer lays considerable of the blame on the shoemen. If the manufacturer went ahead, looked to profits and kept the prices of shoes down, he would not show so many new styles or freaks.”

“Do you think an in-stock department installed by manufacturers would help to reduce your odds and ends in live selling lines?” inquired the *SHOE AND LEATHER JOURNAL*.

# MAKE ALL TANNING MATERIALS AT HOME

**Chairman Marlatt Suggests Government Should Lend Assistance so that Canadian Leather Manufacturers Will not be Dependent on any Foreign Power for Supplies—Outlook for Business is Encouraging—Death of Four Members Since Last Annual Gathering—Charles Robson Elected Chairman and Griffith B. Clarke Vice-Chairman**

"The result of the war has proved that every country should produce within its boundaries, at least, a large portion of what is necessary for its own use; then in case of any great emergency business would continue in a fairly normal condition and not be upset by inability to procure raw materials required to successfully manufacture standard lines of goods.

"The outlook for business is encouraging, due to the great quantities of munitions of war which are being manufactured here and more especially due to the magnificent crop which was safely garnered last year, has been selling and is still being sold at prices satisfactory to the producer," declared C. G. Marlatt, of Oakville, Ont., the retiring chairman of the Tanners' Section of the Toronto Board of Trade at the annual gathering which was held on January 14.

The members were entertained at luncheon at the National Club on Bay Street by Mr. Marlatt, and after the enjoyment of the splendid repast, business matters were taken up, reports received and the election of officers and committees for the ensuing year proceeded with.

Charles Robson, of the Robson Leather Co., Oshawa, was elected chairman for 1916, while the new vice chairman is Griffith B. Clarke, of A. R. Clarke & Co., Toronto.

## Review of the Trade Conditions

Mr. Marlatt, in his annual report carefully reviewed the events of the past year and made some valuable suggestions. He said:—"I regret that since our last annual meeting, four prominent members of the Section have been called to their long rest. Each during his life time took a great interest in the Tanners' Section of the Board of Trade, and each had been chairman of this Section.

"Mr. Walter Beardmore, universally liked by all who knew him, died a comparatively young man. Then Mr. Morley Wickett, who was chairman a year ago, died very suddenly when a brilliant career was opening for him. A direct result of the war was the death of Mr. A. R. Clarke, he being one of the victims of the Lusitania disaster. Mr. Clarke was a general favorite with all who knew him and his death brought the war very near to us. The fourth death was that of Mr. Chas. King, the oldest and one of the most respected members of the Section.

"A year, in fact more than a year, of war is something that the present generation of Canadian tanners knew nothing of until confronted with existing conditions, and these conditions may continue during the year 1916.

## What British Citizenship Means

"War in itself is the most horrible disaster that can overtake people. We prize human life more than any possession we have and have felt the stress of war chiefly through the loss of loved ones. As Canadians we have freely given our sons to protect the sanctity of our homes, our property, and in fact all the liberties which we as Canadians enjoy. Under the British flag we have a freedom second to none in the world, and the honor of being a British subject is the greatest the world can offer to any man. Wherever the British flag flies, justice rules and protection for life and property is found. For this reason it is easily understood why the young men of Canada, our best educated and worthiest, have enlisted for service abroad. May the men from Canada at the front return to be honored by their fellow citizens for what they have done. To those who have lost their lives we should not only be grateful but care for the ones who were dependent upon them to the best of our

ability; all they had they have given freely that we who have remained at home might enjoy peaceful and contented lives. May our enemies soon be crushed and peace again prevail.

"Now, in regard to business conditions in the tanning trade during the year. One of the first acts of our Government after war was declared, as a matter of protection to the Empire, was to consider whether an embargo should be placed upon hides and leather, retaining for the use of our armies the production of this country. By invitation, a large number of tanners met Sir George Foster and other ministers of the crown in Ottawa, and while freely offering to do whatever the Government wished, we explained that an embargo would seriously affect the manufacture of many plants and would destroy the export trade. As a result of the representations made, the embargo was not placed, and the tanners have manufactured for export as well as supplying large quantities of leather, for use in the manufacture of shoes and other army equipment, promptly as required.

## Excessive Cost of Tanning Materials

"The profit in tanning during the past year was reduced by the War Tax which the Government found it necessary to collect on hides and other imported materials. In addition to this, all tanning materials have vastly increased in price. To such an extent has this taken place, especially in extracts made from wood brought from a distance, that to obtain what is required for Canadian use it might be well for joint action to be taken to establish plants in Canada for making extracts, and only a reasonable selling price charged for same. In some cases tanning materials now cost four and five times what they did a couple of years ago.

"To those manufacturing colored leathers, the difficulty in obtaining dyestuffs has proved a great hardship to the trade. Somewhere in the British Empire dyestuffs in quantities should be made even if the Government should find it necessary to subsidize factories—the product to be sold within the Empire. The British Government placed an embargo on the shipment of logwood from Jamaica, which caused a cancellation of Canadian orders by American manufacturers of crystals. This, to some extent, has been overcome as the embargo has been partially, and now possibly, wholly, lifted, but the present price charged for logwood crystals is excessive, and possibly Canadian tanners should manufacture all the different tanning and finishing materials used by tanners, and if this cannot be done at a profit, should ask the Government for such assistance as may be necessary, either by subsidy or bonus, to enable us to manufacture at home and not be dependent on any foreign power for our supply of raw materials."

## New Officers and Committees

The election of officers for the coming year resulted as follows:—Chairman, Chas. Robson, Oshawa; vice-chairman, Griffith B. Clarke, Toronto; secretary-treasurer, F. G. Morley, Toronto.

Executive committee:—G. P. Beal, A. O. Beardmore, J. C. Breithaupt, F. G. Clarke, Hon. E. J. Davis, W. J. Heaven, H. B. Johnston, G. C. H. Lang, C. G. Marlatt, J. Sinclair.

Legislation committee:—G. P. Beal, R. M. Beal, A. O. Beardmore, C. E. Clarke, Hon. E. J. Davis, H. B. Johnston, Theo. King, C. G. Marlatt, S. R. Wickett.

Transportation committee:—R. M. Beal, A. O. Beardmore, L. J. Breithaupt, W. J. Heaven, Theo. King, G. H. C. Lang, J. Sinclair, S. R. Wickett.

## THE LEADING STYLES, LEATHERS AND LASTS FOR FALL OF PRESENT YEAR

As Drafted by the Styles Committee Representing the National Association of Retailers, Manufacturers, Wholesalers and Last Makers Who Met Recently in New York City

### MEN'S SHOES—MATERIALS

Forecast on materials in Men's shoes for fall, with recommendation that retailers, manufacturers and wholesalers use it as a guide in merchandising lines.

Black Dull Leather.....	50 per cent.
Tan.....	30 "
Kid.....	15 "
Patent Leather.....	5 "

### LASTS

"English" and moderately conservative style lasts will predominate. The long or so-called "French-English" model, will be the young men's style shoe. There will also be shown a moderately conservative swing last particularly adapted to young men's trade with straight lines carrying an inch heel.

### PATTERNS

The Bal, or straight last shoe will be the leading pattern. It will have in evidence a strong tendency for perforations or buttons, with circular vamp and foxing, carrying a wing tip.

Bluchers will be shown in the heavier effects.

### INCREASED PRICES

The Committee recommends that retailers and manufacturers frankly meet the question of the increased cost of materials, because it will mean the raising of the retail and wholesale price of shoes to give the public the standard of quality as maintained in the past. However, we also state that present established fixed prices will be maintained and that intelligent consideration be given by manufacturers and retailers to get as a result the best ultimate wear by bending every energy to the wear in the bottom of the shoe and in the vamp, and that substitutes or economies be distributed in other parts of the shoe.

### WOMEN'S SHOES—MATERIALS

We see no reason why the distribution of materials will be radically different than this past season; that is, that black shoes will run 70 per cent. in sales, distributed in the following proportions:

Kid.....	25 per cent.
Dull Leathers.....	25 "
Patent Leathers.....	20 "

Fancy novelty boots will run 30 per cent. of the total, distributed between fancy materials and fancy patterns. We recommend that manufacturers in making their sample lines make free use of black and colored cloth for topping, because of the scarcity and high price of all leathers. We believe that tan lace boots will be a factor.

### LASTS

We can see no material change in the women's last situation from the present, except in free selling styles. A new, long forepart last will be shown in some high-grade lines. We do not recommend the purchase of this new extreme last in popular and intermediate grades of shoes.

There is an increase in the demand for women's sport shoes on lasts with a narrow toe, carrying 6-8 heel, for outdoor and athletic wear.

### PATTERNS

We recommend the adoption of the 7-inch pattern as a standard height for staple and semi-staple shoes. Vamp leathers will run from  $3\frac{1}{4}$  inches on staples, up to  $3\frac{3}{4}$  inches in the higher grades and novelties. Broadly speaking, the patterns will be distributed 50 per cent. lace and 50 per cent. button.

### THE GROWING GIRL PROPOSITION

We believe that manufacturers and retailers can open up a field for increased business by paying considerable attention to styles of shoes specially designed for growing girls or girls in the younger set, carrying snappy high-grade fancy foreparts with a moderate arch, and a 10-8 to 12-8 heel.

# THE VALUE OF APPEARANCE IN THE STORE

The Shop that is Bright and Pleasant and Gives the Customer the Feeling of "At Homeness" is the One That Gets the Trade—Is Your Store Properly Lighted?—Are Your Clerks Well Dressed and Healthy—Little Sign-Posts That Point the Way

By A. E. EDGAR

One has only to search himself to find that he likes orderliness, beauty and goodness in both animate and inanimate things.

Everyone respects a clean-cut, manly man.

Everyone admires a pretty woman.

A beautiful sunset and a pretty picture attract alike the poor and the learned.

There is something in the nature of man that compels admiration for physical perfection. There seems to be within us a native instinct that gives us pleasure when we view the beautiful in nature and art.

Our nature craves beauty. We rush into pleasures because the natural instincts are aroused at the sight of pretty things, or orderly arrangement. We do not usually try to overcome this instinct, but rather, foster its continuance.

On the other hand, the ugly thing causes a sense of disgust and abhorrence to rise within us, and even overpowers our sense of pity and sympathy when the ugly object happens to be a human being.

Personal appearance is a large factor in the success or failure of a man or woman behind the counter, or in any walk of life.

A man with a pleasing countenance will win friends who will force business upon him. A handsome woman always has a crowd of admirers about her.

The man or woman who is physically well developed has the undersized mortal handicapped to a finish, and yet—

The young giant, physically perfect, but without taste, has no chance in the race of life with the pigmy who knows how to dress well.

Physical development is only the starting point. A large man will command attention anywhere; so will a large building. A small man, neatly dressed, cleanly and wholesome in appearance, will not only command attention but create admiration. The dapper, neat, spruce appearing man is always singled out from the crowd, as much as the physical giant. Far from being at a disadvantage, he can meet his competitors on equal terms.

Physical perfection is to be desired, and to be striven for, by all men and women. All cannot be physically perfect, nor need those who cannot appear insignificant. Careful training will develop the body of the weakling to a degree of strength sufficient to offset any appearance of inferiority.

Far too few men and women in this fast age give the development of their bodies sufficient attention. We are so busy in the mad scramble for dollars that we neglect the body and give the matter of appearance secondary consideration, when as a matter of business precaution, we should make that of primary importance.

Physical appearance counts in making business and physical endurance is necessary to carry out the business the former brings.

Physical adornment may be carried to extremes and is by the weak-minded and vain. Vanity causes many to carry things to extremes. They pay so much attention to personal adornment that they are hampered for time and inclination for other things, among them success in life and business.

We advise no man or woman to become a "fop" or a "fright" by dressing beyond the limits of good taste, but we do urge that proper attention be given to personal appearance and to the matter of dress. "The apparel oft proclaims the man." Show your good taste in dress and you say to the world, "I have good taste in all things."

The clerk, the merchant, the parcel boy even have constant examples of good taste in dress and in manners before them. They can pick out the man who is doing business and the one who is not. Let these for a few days analyze the traveling salesmen who call. There will be all kinds and conditions of men among them. Those who are "good to look upon" it will be found are doing the business. The slovenly in dress will likely be so in other matters. The uncleanly in dress will be so in all things.

Not only does a good personal appearance appeal to others, but it has the effect of giving the one conscious of

Desperation is often a mental condition just before Xmas, due generally to a desire to give and inability to find a gift that suits

This list should prove its worth to those wishing to give moderately and sensibly as there is not one article listed that does not combine pleasure and usefulness.

such possession an unbounded confidence in himself. If he knows himself to be faultlessly dressed, absolutely clean and wholesome, he has no fear when standing among the greatest of earth. He is conscious of the fact that he may do so without shame or humiliation.

The man who is conscious of any defect in his appearance, speech or manners is always dreading exposure that will be humiliating to himself, and perhaps to others. He is too busy safeguarding himself from the expected exposure to be at his best as a salesman, or business man.

If a good personal appearance was not largely a matter of cultivation it would be unseemly, if not cruel, to enlarge upon this matter. But in the very fact every man or woman has his or her appearance in his or her own hands. The human being can make himself pleasing, despite the fearful handicap some of them have thrust upon them at birth.

It is said that the reason why actresses, as a class, are more beautiful than any other group of women is because they cultivate and develop beauty above all things. They study their deficiencies and how to overcome and hide them. They search out their pleasing points and develop them. They look well after their health, their habits, their diversions. They give much time to physical culture and bodily development. Above all they contemplate the effects of colors and styles and avoid all those unbecoming to them. In some such manner must the young man in business regard his appearance if he wills to succeed.

#### **Walking Discreetly all the Time**

Not only in the matter of dress should the ambitious man be careful, but he should look after his health which to a large extent is as important to his appearance as his dress. He cannot expect to keep looking well and pleasing if he dissipates or indulges far too much in any form of pleasure. These tell upon the face long before the excesses caused by work. A sallow complexion, a blotched face, a reddened nose, bleary eyes and a tainted breath will proclaim the weakling anywhere.

Given health any young man ought to be able to make himself presentable. His clothes may not be expensive, but if he knows how to wear them he gives them a dignity far beyond that of the most costly tailored raiment upon the slovenly inclined. Clothes that are well brushed and pressed, linen that is faultlessly clean will "proclaim the man."

A successful physician in speaking to the writer of his college days said: "When I was finishing my last year at college I was rather hard pressed for funds. I needed a new suit of clothes very badly, but had not the funds to purchase it with. My coat sleeves began to fray at the wrist, my trousers at the bottom. I pulled down my cuffs, and kept them spotlessly clean, so that they were the centre of attention. As the sleeves became more and more frayed, I pulled my cuff down farther. The public never looked above those cuffs. It was the same with my feet. I kept my shoes like mirrors and no one ever noticed the fringes around the bottom of my trousers."

#### **Importance of Store's Appearance**

One's personal appearance, no matter how expensively adorned, can never be pleasing if there is a "three days' growth of beard" on the face. The face should be clean shaven if it has to be shaved every day, the hair should be properly trimmed, the nails kept clean and not too highly polished.

If we have shown that the personal appearance of the man or woman in the store is of importance, of how much importance is the appearance of the store itself.

Read over the first few paragraphs again and apply all

these to the store as well as to self. Take a good walk around and ask the question, "Is this as pleasing as I can afford to make it?"

"Are the windows as attractive as they can be made with the means at hand? Do I begrudge a little time and money for display fixtures and accessories in the window? Do I turn off the lights before I should? Would a fresh coat of paint make the store front more attractive?" Go around asking questions like this, and answer them truthfully, whether you have to convict yourself of shortsightedness or not.

#### **How the Front Brings Business**

The front and windows of the store have more to do with attracting trade than its interior, or any other force which brings business to the store. A neglect in this matter is of more serious consequence than neglect in other matters.

The interior of the store should be pleasant. The store that gives the customer a feeling of "at homeness" as soon as one enters gets her business. It must be conveniently arranged so that time is conserved and efficiency manifest. It must be properly lighted so that there are no dark corners to cause the customer to make mistakes. And finally the clerks must be pleasant and pleasing in personal appearance.

Appearance counts for much, but there must be real worth behind it. Fakes and fakirs seem to succeed, but they do not really do so, for eventually there is a day of reckoning.

To the clerk we could say: be clean! dress well! live wholesome lives! take healthful recreation! study some. PUSH! No one will be able to keep you down.

To the merchant: Be and do all of the above; keep the store attractive, pleasant, clean and well lighted, and you will advance in your chosen field.

#### **NEED ENTHUSIASM IN ORDER TO MAKE GOOD**

Enthusiasm. What is it? It is belief, and sincerity, and desire welded into one, the same that water is made up of two atoms of hydrogen and one atom of oxygen. Bring these three gaseous atoms together, and they unite and form water. By the same token when a man believes in some cause, and is sincere in his desire to see that cause win, the belief, sincerity and desire combine to make the man enthusiastic. Now, enthusiasm is necessary to success. The belief in our work, a desire to see it meet with success, and sincerity in our efforts are necessary to success. I care not if the person be a clerk in a store, a stenographer in an office, or the promoter of a railroad; if they build a lasting, worthy success they must have enthusiasm. They must believe the work they are doing is worth doing the best it can be done. It must be done. It must be done that way to be successful. If one is sincere in his belief that the best is none too much to put into his work, and anything short of the best is not enough, then he will do his best. He will desire to do his best in everything, and thus he becomes enthusiastic. And did you ever see a man really sincere in his enthusiasm that did not do more toward making matters go than a dozen men would do in a half-hearted, disinterested fashion?

Such are the thoughts that came to my mind in reading a short dissertation on the value of enthusiasm. The thoughts of the author of the article did me good. It impressed me with the value of enthusiasm. It recalled to my mind a number of enthusiastic workers that I have known, and in thinking of their success, I saw that the reason they succeeded was belief in themselves and in their work, and a sincere desire to make good.

# The Shoe Repair Man

## RESOLING RUBBER SOLE SHOES

Rubber sole shoes are sometimes brought into the repair shop with the request that the new sole to be applied shall be of leather, which is entirely practical, even if it is a half sole. But, how to best fasten the leather half sole to the rubber sole at the shank part is the question. The rubber part will tend to spring up, the leather sole and the nails will not hold it down solidly unless the heads are extra large. In combination with large headed tacks it is advisable to have the tap or half sole extend further down in the shank than the ordinary leather half sole—as the further down it is the less strain on the nails in the act of walking.

The whole sole is best, but customers will generally demand the half sole, as the rubber sole part in the shank is not worn down to any appreciable extent and still serves to protect the foot, although not in holding it up.

There is, however, one interesting feature about the rubber sole shoe in the repair shop, and that is the cushion effect at the heel, once the new heel is applied. It may be an excellent idea of applying a layer of rubber underneath all heels, whether or not they have a rubber forepart or shank, since this layer of rubber gives resiliency to the heel.

Some rubber soles are McKay stitched to hold an extension sole, to later serve as a narrow welt strip, on to which the rubber sole is to be outsole stitched. Such a shoe is a problem to the repairer, as the shoe may be resoled with nails.

## BE CAREFUL REGARDING SOLES

Shoe manufacturers, salesmen and retailers, all agree that people are now buying shoes that look well, this being the first requisite, instead of the wearing qualities formerly considered. This is particularly true of women's footwear and the manufacturers and retailers govern their actions accordingly, to their profit. Good stock is still used and adds to the selling qualities and value of the shoe, but a woman wants her shoe to look well, to be stylish and attractive. So what warrant has the shoe repairer in putting a heavy sole on a woman's shoe, making it clumsy and heavy-looking? If the repairer is not aware of this change in women's footwear he is certainly not up-to-date, and if he knows and does not take advantage of this knowledge to give his women customers what they want he is at fault and can blame himself for his poor business. A man appreciates it if you return his shoes to him with a nice polish on them, but the woman must have this finished look to her shoes at all times. She not only appreciates finish, but demands it. The demand for light-appearing and stylish shoes is a good thing for the repairer if he does good work, for the shoes must go to the repairer's oftener to be kept in fine appearance.—The Shoe Repairer.

## HIGH PRICE OF SOLE LEATHER

Some shoe manufacturers, in talking about the high and strong prices of sole leathers, have expressed surprise that they should have resulted from war orders for only a few million pairs of American shoes, says "Hide and Leather," who by way of explanation say that it is not the demand in America for sole leather for war shoes that has forced prices up, but because our exports of sole leather for the seven months ending July, 1915, were 46,703,820 pounds, as compared with only 16,899,822 pounds for the same period in

1914, and 19,791,547 pounds in 1913. The high cost of sole leather is undoubtedly a serious matter for our shoe manufacturers and repairers, but the export demand explains the situation, coupled with the fact that the American sole leather tanners have governed their manufacturing operations with unusual conservatism and competitive co-operation during the past few years.

## SETTING EDGES ON OLD SHOES

An observer tells of a process of setting edges on old shoes, which can be done by machine as quickly as getting a shine, or can be done by hand even, and the profits in the course of time will amount to quite a sum. A repairer in a large city could find this a paying adjunct. With a machine and with a charge of only ten cents, it would be surprising how many customers would avail themselves of the opportunity to have the edges of their shoes reset. A good suggestion is offered, just here, that right after setting would be a good time to tree the shoes instead of the ordinary shine. Treering makes a wonderful difference in the appearance of a shoe.

## BE COURTEOUS TO THE PUBLIC

"I think it would be a good thing for the shoe repairers not to be so rude, I guess that is what you call it. I have been in a lot of shops and it is the same in every one. A child comes in and the repairer says: 'What do you want?' Boneheads—anybody could see what they wanted.

"'Why—why, I would like to have my shoes fixed.'

"'All right' (takes the shoes and puts them on shelf or throws them on a heap).

"'When can I (half-afraid to talk) get them?'

"'Oh, about Wednesday,'—and this on Monday.

"Next in comes a man or woman: 'Why, good morning, and what can I do for you?'

"'I would like to get these shoes repaired as soon as I can. When can you do them?'

"'I will do them right now.'

"'Just as busy, but that's the way they do.'

"Now, I don't believe in that way. I treat poor and rich alike, man and child alike; they get their turn. A child is treated as if it were my brother or sister, and a man or woman as if my parents. Also we don't sit on the front steps during working hours because we don't have to. I don't say all shops do this, but there are too many that do. I know this to be true.

"I think the shoe repairer should bear in mind that he is working for an employer and that he must listen to what the employer says. The public is that employer and pays him not only wages, but what he asks. Why doesn't the laborer in the ditch chew back at the boss? He must take what pay the company or employer gives him and do what they give him to do, not what he likes to do, as the shoe repair man.

"Well, good-bye, and I hope that some of my pointers will be taken to heart."

A noted speaker has said, "Books are better than gold." Take the hint and read your trade paper. The subscription price is a bagatelle compared with the benefits you will accrue from it.

### SPECIAL REPRESENTATIVES FOR CANADA

The growth of their business in Canada has made it necessary for Kenworthy Bros. Co., of Boston, to appoint J. A. Scott, Montreal and Quebec, selling agents for Quebec province and International Supply Co., Berlin, Ont., selling agents for Ontario and the West. This company, manufacturing felt of all kinds, is known widely in Canada and the present arrangement has been made by them with the idea of giving a still better service to the manufacturers of the Dominion. The firms, which will represent them in Canada, will be in closer touch with the trade and will call upon them more regularly than it was possible for the Boston house to arrange.

### THE OPERATIONS OF GREAT CONCERN

The second annual meeting of the shareholders of Sir H. W. Trickett, Limited, slipper manufacturers, Waterfoot, England, proved harmonious and satisfactory, says a local paper. Mr. Oliver Eatough, the optimistic, commercially-minded head of the directors, presented a statement which will be pleasant reading for all, whether directly or indirectly concerned. Trade relations are particularly cordial, and, generally speaking, there will be cause for mutual admiration from the undoubted perspicacity and business instincts of the directors on the one hand and the undoubted confidence of shareholders and workpeople on the other. We venture to believe the outside public will likewise feel satisfaction at the marked stability of the whole concern. If the enormous volume of trade executed at "Trickett's" is any criterion of the state of the slipper industry generally—and we believe it is—then the inhabitants of the Rosendale Valley have reason to be proud of it, and ever indebted to past pioneers and present manufacturers. What the extensive slipper trade means to Bacup, Waterfoot, and Rawtenstall cannot be fully estimated, nor the local effect in auxiliary trades be completely measured. Certainly the commercial fortunes of the valley would be considerably impoverished without it. It has risen and risen until the trade is an inherent part of our industrial and daily life. With the stimulus behind them of such records as was presented on Wednesday, we are confident that all interested in the slipper industry will ever do what they can to keep it so.

### NEW INDUSTRY OFF TO GOOD START

Canada's newest industry is the Canadian Counter Company, now operating at 346-348 Delorimer avenue, Montreal. This concern is the Canadian branch of the Columbia Counter Co., of Boston, of which the executive officers are Edwin C. Hood and Charles D. Malaguti, and the opening of a Canadian factory is the direct result of the good work accomplished by G. J. Trudeau, who has been their sales representative during the past two years. Mr. Trudeau is the Canadian manager. It is the intention of the company to make shanks of leather board, two grades of fibre counters and leather box toes. They state that their leather board shanks are the first to be made in Canada. Machinery has been installed and the factory is now running, the superintendent being E. W. Carreabe, who was two years with the Spaulding people, and whose father is also in the same line in the United States. The factory at present

has a capacity of fifteen thousand counters a day and thirty thousand shanks. It will be increased as the business grows.

The Columbia Counter Co., of Boston, is one of the large shoe manufacturing supply houses of New England.

EDWIN C. HOOD, President

It supplies shoe manufacturers not only in the United States, but in every civilized country, having special representatives in all countries where shoes are manufactured. It is their

G. J. TRUDEAU (on the left), Manager, and CHARLES D. MALAGUTI, Vice-President of the Canadian Columbia Counter Co., Montreal

intention to handle all export business to England, Australia and South Africa through the Canadian factory and as this business has grown very much in the past five years this

manufactured in Montreal by me, at prices which are interesting. Samples submitted on demand.

5¼c. to 7¾c. per pair.

## Columbia Fiber Counters

Every pair is guaranteed. These counters are made in every shape and mould by the Canadian Columbia Counter Company, Montreal, for which concern I am exclusive selling agent.

## Gowdy Felt Box Toes

They never leak, and are always clean. They can be used in colored shoes without staining.

## Metal Shoe Hooks

In all shapes and sizes. Can save you about 25 per cent. on this article.

## Shoe Buttons

In all shapes and sizes; in all colors carried in stock ready to ship.

# G. J. TRUDEAU

365 Ontario St. East, MONTREAL

# Guaranteed Fibre Counters

**MADE IN CANADA**

A new factory has started in Canada making guaranteed fiber counters, leatherboard counters, leatherboard shanks and leather counters. **Columbia Counters** are known to all Shoe Manufacturers in America and some of the leading Canadian factories have been using these counters for over a year without one pair of shoes coming back on account of our counters being defective. (Names given on request.)

Our factory is equipped to fit any lasts. Our prices are lower than any imported fibre counters.

Quotations on demand and samples submitted.

We buy empty counter barrels at the market price.

**CANADIAN COLUMBIA COUNTER CO.**

348 DeLorimier Avenue

MONTREAL, Que.

Agent - G. J. TRUDEAU

365 Ontario St. East, MONTREAL, Que.

work itself will take a large share of the new factory's output. Mr. Trudeau, who has been doing an increasingly large business, counts upon greatly enhanced sales in Canada as a result of the better prices at which he will be able to sell through manufacturing in the Dominion and because of the prompt deliveries he will be able to make while efficiently serving the manufacturers in the matter of giving them just what they want.

C. D. Malaguti, vice-president and treasurer of the company, is a practical shoeman and it is his intention to place his services at the disposal of Canadian shoe manufacturers who may desire to avail themselves of the advice of an expert on counters. He began his life in the shoe field with Kenard Counter Co., of Boston, later going to the Boston Counter Co., with whom he was connected for nine years, when he joined the staff of Young & Sampson. Subsequently he became connected with the Columbia Counter Co. and has always superintended the manufacturing end of their busi-

ness. As an illustration of a modern way of doing things Mr. Malaguti states that a growing number of shoe manufacturers are standardizing the backs of their lasts in order to use a uniform counter on all the shoes in a range for men, women, boys, youths or misses, as the case may be. In this way they find it necessary to carry only one-third of the quantity of counters they must carry under the old conditions.

G. J. Trudeau, who is the manager of the factory, is widely known in Canadian shoe circles. It is five years since he began business for himself but during that time he has made rapid progress as he now covers all of Canada, having five salesmen carrying his lines. He is interested with Oscar Dufresne in the Dufresne Shoe Supply Co., manufacturers of shoe hooks, which are sold by Mr. Trudeau's organization. He is also manufacturing bows by machinery and carries a line of shoe buttons, felt box toes and elastic webbing.

#### IRONING OUTFIT IS TAKING WELL

The Boston Last Co., of Richmond, Que., are making a specialty of their ironing and cleaning outfit, which has met with large success since being placed on the market. This outfit is designed for present day methods of cleaning and ironing. The form fills the entire shoe at the top, is turned out wholly from wood and allows any shoe to be ironed in the complete lines as designed by the last maker and pattern maker. The form is the easiest one in which to put a shoe

without any straining, and to take one off without any breaking of the lines of the finished product. The legs are very simple in construction and never get out of repair—fitting into any twin or single table now used in the shoe factory. One style of leg takes any style of form, from the smallest child's to the heaviest men's. The ironing forms are made direct from the last and a pair of forms may be ordered at the same time as sample lasts are ordered, so that the complete shoes can be produced in perfect shape.

#### A COUNTER THAT STANDS THE TEST

Guay's Waterproof Fibre Counter is the name of the newest counter made by Eugene Guay, Montreal, for over 36 years specialists in this line. This counter is made by the very latest methods, one big improvement being the employment of an attachment to the machinery which makes counters to fit all lasts and another which eliminates spreading of the counter when it is taken from the machine. Messrs. Adelard Guay and his brother, Eutrope Guay, have been conducting the firm's business since the decease of the founder, Eugene Guay, three years ago. Both are practical men, having been brought up in the business and knowing every department of it, besides being in close touch with the whole shoe manufacturing trade. O. Franche, superintendent of the factory, who has been with the company since it started, and is, therefore, a most practical man, ably seconds the efforts of Messrs. Guay in turning out none but high-grade counters, of which at present 200,000 pairs are made weekly. R. M. Fraser, 152 Notre Dame St. W., is special sales agent for the company in Montreal territory, while Mr. Hurtubise also carries the line.

#### PLATES COMING INTO POPULARITY

Heel plates and toe plates are coming into popularity again. Some have been seen on new shoes, especially boys' shoes. Plates have been forced in flush with the leather and can be done when the leather is wet.

Some repairers who are using heel plates, toe plates or circlets claim that such plates or circlets do not hold solidly enough during wear. But they never stop to think that when these do not hold it is due to the cheap spongy stock on which applied. With an old sole these plates cannot be guaranteed to hold unless rivetted on and that can be done at the toe. The time to apply the plates is immediately after resoling or when a new top lift is applied, as new sole leather will positively hold any plate, although circlets and nails will not hold so positively as plates. The time to apply such protectors is when the leather is new. Many feel that it is an additional talking point in favor of the wearing qualities of the shoe.

#### WATCHFUL OF ALL FOREIGN ORDERS

"I was in the office of the sales manager of a prominent leather firm," remarked a shoeman the other day, "when the telephone rang and the call was answered by the official. The inquiry was for some sole leather to be shipped to Switzerland.

"No, we cannot let you have any, either now or in the future," remarked the sales manager, in answer to further requests. His tone was clear and firm. After the conversation had closed, the shoe retailer turned to the leather chap and said:—"Why cannot you supply sole leather to be shipped to Switzerland?"

"Well, it is just this way," he remarked, "we will not fill a single order for one pound of leather for either Holland or Switzerland, because we believe that such orders are blinds. If the sole leather does not get into Germany from these countries, it will, at least, be used in shoes, and thus find its way in one form or other into the Hungarian Empire,

and we are not doing anything at the present time, either directly or indirectly, to help the enemy in this war. This is the stand we have taken and we intend to adhere to it loyally and enthusiastically.”

#### ENTERPRISING FIRM ENLARGES PLANT

Considerable improvements have been made in the plant of Robin Bros., Montreal, who expect to have a capacity of 700 pairs of lasts a day when all additions to the factory are completed. Their present building with the additions made to it is 73 x 75 feet, two storeys and basement, while a new wing, 22 x 50 is in course of erection. New kilns have been put up so as to increase their capacity to 70,000 blocks a month. Seven lathes are now operated and two more are to be installed. The company's offices have been considerably enlarged and a spacious sample room provided.

#### SHOES WITHOUT AN INSOLE

Men's shoes with out an insole were made similar to the regular sewed down shoe. The former were minus an insole, whereas the sewed down shoe always has an insole. A piece of leather, which in an ordinary shoe would do for filling for the forepart, was first tacked to the last and so too was the shank-piece. These were stationary on the last, but the heel-piece was also added to last before the upper was pulled over. The heel-piece was of the same shape as a slip spring for a woman's shoe. When the last was thus prepared the upper was pulled over on the toe only and fastened with one tack. The upper was cut on both sides at the heel-seat and the sole laid, after which it was sewed around forepart and shank, like a sewed-down shoe, while on the last.

The sewing it seems pulls the upper down to the wood, and the filling it is said gives shape and a smooth bottom to

the shoe. The shoe is levelled on the last and the upper must be large enough to allow of sewing while on the last. The heel-seat is lasted-in as in all shoes, and that makes the heel-piece necessary. The shoe is very pliable, as it naturally would be when made with one sole.

Possibly it is because a flexible shoe is demanded that these shoes are made this way, and the difference between this shoe and the sewed-down is in the absence of the insole and in saving one row of stitching. An insole is used in a sewed-down. In that shoe any insole will do, for there is no fastening to it when the shoe is made. The outsole, insole and upper are sewed through and through in the regular sewed-down shoe.

### A MAN WITH HIGH IDEALS

(See Front Cover)

To the Hartt Boot & Shoe Co. in the person of Mr. J. D. Palmer, the president, belongs the credit of bringing the Maritime Provinces into "first grade" in the school of shoe manufacturing. A few years ago the people down by the sea were content to follow in the race a good second or even a third in the production of modern footwear. To-day the Hartt product is known from coast to coast as the equal of anything on the Canadian market in men's fine shoes. Their latest venture in putting out a shoe to retail at eight dollars is an evidence of their grit and go.

J. D. Palmer is one of those men who think more than they talk. While others worry their necks over competition he goes ahead and gets out something that will put his business out of the struggle with the "madding crowd." He is not a believer in the new for the sake of the new but is an enthusiast about shoes who believes that there is a paying amount of appreciation lying around for an effort to give the people a genuinely good thing.

Mr. Palmer is absorbed by his business to an extent that keeps him from meddling with politics or other distractions that are apt to take a man's mind off the race, but he is unselfish enough to give sufficient of his brains brawn and energy to enterprises that have for their end the uplift and benefit of his fellow citizens, especially those of his immediate neighborhood. He has taken a great interest

in the Fredericton Board of Trade, of which he is president, and its efforts to build up and extend the trade of the city and New Brunswick generally, and he has done much quiet work in this respect that is only known to his friends.

He has also taken hold of the Technical School question, on which he is an authority, having investigated some of the best institutions of this kind in this country and abroad. He has been a prime mover in seeking to have established in New Brunswick such an institution as will put the young men and women of the province in a position to begin the battle of industrial and commercial life fully equipped.

J. D. Palmer is a whole souled, genial man who gives his entire attention to the thing in hand and has no patience with circumlocution or see-saw methods. He knows what he wants and takes the most direct course to get there.

Familiar as he is both with the manufacturing and selling ends, he is able to keep his establishment in perfect touch with Canadian shoe requirements. Mr. Palmer is fortunate in having associated with him Mr. John A. Reid, admittedly one of the best shoe men in America, and together they make a great team.

### LIGHTER WEIGHT LEATHERS FOR TOPS

Now that garments for ladies and misses are being made from kid skins, and also light calfskins, it becomes harder for the shoe manufacturer to get hold of the better grades, as they have to be used in skirts and jackets for the female demand, and this leaves the lighter weights, and those with slight imperfections to be cut into shoes.

The demand on the cutter becomes greater every season, and the number of really first-class skins that find their way to the shoe cutter are small, indeed. However the relief is at hand, and if properly applied and looked after, it will not only give the cutter a better proposition, and relieve his brain strain, but it will enable the manufacturer that adopts it to have his shoes cut closer, as the term goes, thereby saving the waste that would otherwise be necessary. Even if only a pair of quarters were saved out of each skin the amount would be considerable in a season where five or six cutters are employed, and the factories where four

### SOME LEADING MEMBERS OF THE LEATHER INDUSTRY

CHAS. ROBSON, OSHAWA  
Elected Chairman of the Tanners' Section  
of the Toronto Board of Trade.

GRIFFITH B. CLARKE, TORONTO

or more work would show a handsome gain over previous years.

The only proper backing to be used is one that will blend itself into the leather in such a manner as to almost become part of it, and that will never cause a wrinkle to form that will show through, or make the foot or ankle feel uncomfortable. Any kind of rubber cement is too heating, and destroys the porous effect of the natural hide, causing the flesh to feel drawn, and making an unnatural heat, which causes discomfort to the wearer. A cloth prepared with a gutta percha adhesion, and ironed to the leather with a moderately heated flatiron, will do the work, and make a smooth, finished job that will never be detected after the shoe is put together.

Light tops treated in this manner are far more comfortable to the wearer than heavier ones without the backing, and conform to the shape of the foot without making the unsightly wrinkles so often seen in high shoes. That this method is fast becoming popular with the factories making up-to-date footwear is evident, and the intelligent wearer will ask for shoes treated in this manner, for they are always anxious to get the neat effect produced by this method. Now that short skirts and high shoes are the rage, everyone that wants a neat-appearing foot knows it cannot be brought about with heavy leathers.

Not only should the tops be treated in this manner, but the vamps ought to have the same backing to help keep the shape of the last, as the lighter leathers are bound to give some in wear, and get unsightly, but if backed and ironed smooth, they will hold their shape, and make the foot look neat, and feel comfortable. It is one of the innovations of modern shoemaking and will become more popular as wearers begin to understand the advantages of the system, and as for shoes that are treated in this manner. For the benefit of the public a systematic campaign should be started along educational lines to instruct them in the benefits of this method, so they will insist on having only the best, and the

best is only the article that is properly backed.—Shoe Topics.

#### NEW SUPERINTENDENT ENTERS ON DUTY

Mr. Harry Watkins has been appointed superintendent of the factory of W. E. Woelfle Shoe Co., Berlin. He has had a quarter of a century's experience in all branches of the trade and brings to bear on his new position splendid executive ability, sound judgment and a thorough knowledge

HARRY WATKINS, BERLIN, ONT.

of everything connected with the making end. He is an earnest, capable shoeman, who gets the very best results from those under him, and cordially co-operates with his staff. Mr. Watkins was formerly with the Sherwood Shoe Co., of Rochester, and later, with Utz & Dunn Co. and the Menihan Co., of the same city, in all of which positions he made good. He specializes on women's fine shoes.

#### SOME NATTY OFFERINGS IN FASHIONABLE FOOTWEAR

On the left is a button boot with black calf vamp, grey buckskin top and black flat buttons. In the centre is a high cut combination button and lace boot with curved

patent vamp and foxing and white calf top, and on the right is an all black glaze kid boot, fairly wide receding toe, with invisible eyelets.

### ANOTHER SHOE REPRESENTATIVE WEDS

Stewart C. Mitchell, who is sales manager in the Maritime Provinces for Ames-Holden-McCready, Limited, St. John, N.B., was recently married to Miss Edith M. Harris, and has been receiving the congratulations of his many

S. C. MITCHELL, ST. JOHN, N.B.

friends in the trade. Mr. Mitchell has been identified with the warehouse of St. John for some 17 years, and for the greater portion of that time has represented the firm on the road in different parts of the eastern territory. He is well known and well liked, having established a strong connection with his customers.

### SHOES WILL BE DEARER NEXT SEASON

From unmistakable indications in the leather market and rising values generally, on all raw materials, it is believed that when travelers start out with fall samples, early in March, prices on every line of shoes will be from 10c. to 20c. higher per pair. It would appear that each season prices take an advance and conditions are such that there seems no other way out of it except for the retailer to get a proportionate increase from his customers. It is better to have a well made, quality shoe than one of a shoddy character, that gives satisfaction to no one and in the end, destroys more trade than is ever gained by handling cheap and unreliable goods.

### MISSING PARTNER IS LOCATED

Malcolm P. Johnson, a senior member of the shoe firm of Johnson & McCormick, St. Thomas, Ont., who disappeared April 13, 1914, has been located in Sand Springs, Oklahoma, according to a telegram received by his partner, J. N. McCormick, from Mr. Johnson's brother, F. S. Johnson, of Manlius, Ohio. The telegram reads: "Letter from Malcolm received from Sand Springs, Oklahoma. Will leave today and wire you later." The disappearance of M. P. Johnson from St. Thomas was one of the most profound mysteries ever encountered by the local and provincial police. Some time before he went away Mr. Johnson had a severe fall as a result of which it was feared that his mind had been affected. One day he was missing, and although search was made for him from one end of the continent to the

other, not the slightest trace of the absent man was ever found.

### HOW ONE SHOEMAN BEAT A RIVAL

Misstatements in advertising are always a weak link, especially if intentional. A shoe dealer who occupied several connecting "fronts" was annoyed by the misstatements of a competitor who opened a store in a small adjoining room in order to obtain part of the trade drawn to the locality by the bigger store.

This new dealer, after a time, offered a patent leather shoe under a guarantee that it would not crack. He asked six dollars for it. A guarantee of patent leather was an offer the old dealer had never dared make. He did not believe the new store could find a shoe that would not crack, eventually.

He made inquiries and discovered that the guaranteed brand was one with which he was familiar. He knew he was selling as good a shoe for less money. But he allowed the younger dealer to go into the newspapers with advertisements of the guarantee and otherwise to commit himself to the proposition that his patent leathers would not crack—and if they did, that another pair would be given free.

The surprise the older dealer had up his sleeve was a window display of the "patents" that were supposed never to crack. On the day the younger dealer's advertisements appeared, the adjoining window in the older store contained a display of patent leather shoes. Above the shoes was this sign:—

"If these patent leathers—at \$6.00 a pair—ever crack, we will GIVE AN ADDITIONAL PAIR WITHOUT FURTHER COST TO YOU. But they WILL crack. So do they ALL. So, at your option, you may carry home the extra pair NOW. The price is high enough to COVER two pairs."

Naturally, his window and his accompanying newspaper announcements attracted attention because of his high standing in the community. He punched a decided hole in the newer man's patent leather guarantee, which had admittedly been the "best thing" the new store had found.

The older dealer later obtained the lease on the adjoining room and added it to his store. The newer dealer sought other and greener pastures, for his store had been lastingly discredited.

These, then are a few instances that show how the weak link in a business may become a competitor's best weapon. It may often be wise to give policies a careful scrutiny—to take every now and then the outsider's viewpoint towards them. A little time spent that way may turn to your use what otherwise might at any moment unexpectedly become a powerful weapon in some rival's hands.

### WILL HAVE ARTISTIC NEW STORE

The Walk-Over Boot Shop, 521 St. Catherine St. West, Montreal, of which F. A. Guinivan is the proprietor, will move early next month to 505 St. Catherine St. W., next to the corner of Peel St., in the handsome new Drummond block. The store is now being fitted up in splendid style and will be finished in mahogany. The front will be of the most inviting character, being installed by the H. J. St. Clair Co., Toronto. Mr. Guinivan states that the new Walk-Over Boot Shop of Montreal will even surpass his splendid establishment in Toronto in attractiveness and general lay out.

### HAS BUILT UP LIVE DEPARTMENT

C. F. Walker, who is the manager of the shoe department of Browns' Limited, Portage la Prairie, Man., has been with that widely known firm for nearly six years and has been in charge of their footwear branch over three years. The firm are doing a splendid shoe trade owing to the foresight and good judgment of the man at its head and carry a

C. F. WALKER, PORTAGE LA PRAIRIE, MAN.

stock of about thirteen thousand dollars. Two regular sales are held each year—one in January and the other in July—and by this means the stock is kept pretty clean. One feature of the department is that all shoes handled are recommended to customers and the firm have found that manufacturers are O. K. in backing them up in the matter of proper adjustments which, by the way, are very few. The manager states that only Canadian lines are sold and they give real good satisfaction in every particular.

### NEWSY JOTTINGS FROM OLD QUEBEC

J. A. Woods and E. W. Milzener, of Cotton Threads, Ltd., Montreal; J. George Robertson, and O. Gagnon, Montreal; J. H. Hamilton, Sherbrooke; Ed. Gaumond, manager of La Cie des Cuirs et Chaussures, Plessisville; and E. Fournier of the same firm, were recent visitors in Quebec.

Thos. Voyer, formerly a shoe dealer in this city, died on December 25. P. Beaulé, shoe repairer, passed away on Jan. 12, and on the same day, O. Beaugard, shoe retailer, joined the silent majority.

The shoe retailers of Quebec report that they are well satisfied with the holiday trade this season. With some the business done was half as much again as at the same period last year.

George Maheux, of Quebec, has purchased a new Progressive shoe repair outfit operated by electric power.

Saillant & Lessard are now installing machines in their new factory at Limoilou. They expect to start running early in March.

It is reported that Alfred Renaud will open a new shoe factory and will make McKay and Standard screw for boys and youths.

Jos. Moiseau, whose shoe shop is located on Aqueduct Street, is working on some new samples of sandal shoes.

T. Duchaine, a former shoe manufacturer of Quebec, has recently made extensive repairs to the building formerly occupied by the Economique.

Louis Beaubien, wholesale shoes, has removed to his new premises formerly occupied by C. E. McKeen. He has now a splendid business home, with thoroughly up-to-date fixtures. The warehouse recently vacated by Mr. Beaubien will be occupied by J. H. Begin, Reg., wholesale shoes, while the Canadian Consolidated Rubber Co. will take possession of the late headquarters of the latter firm.

Manufacturers in all branches are very busy at the present time in Quebec City, and some concerns are running both day and night. Fall samples will be ready a little earlier than usual this season and it is expected a large number of jobbers will visit the city during February.

### MAKING GOOD IN THE SHOE GAME

Rodd & Deacon, the enterprising shoemen of Cobalt, Ont., have recently enlarged their store, which is now 48 feet deep by 30 feet wide, with shelving on either side and across the back. The premises are adorned by fine plate glass windows at the front—the large plates being 6 by 6, with side lights 4 by 6. The entrance is by means of a double door, set with plate glass. The interior is well lighted naturally from the front, and artificially the windows are illuminated by a row of 24 electric lamps around each window, making an attractive view from the street, and also giving a good light for display purposes. Inside the store is equipped with eight large electric lamps in shaded globes, four being placed on each side. The woodwork and furnishings are in dark colors, and the ceiling a light shade, which gives a decidedly pleasing contrast. Four large tables are placed down the centre of the store, which are used at times for display of regular lines of goods, and on other occasions as bargain counters. At the rear are located the office and workroom, both being well lighted.

Rodd & Deacon have been in business in Cobalt for nearly eight years. They began with a small stock and added to it, as trade increased. Neither partner had any previous insight into the shoe game, but starting in a small way, each gradually mastered the details. As the business grew, they

S. R. WICKETT, TORONTO

Who was recently re-elected a director of the Commercial Travelers' Mutual Benefit Society.

grew with it, and the result is that they have to-day one of the most select stocks, brightest stores and steady paying patronages of any establishment in the province. They have proceeded along sane, conservative lines, and have observed moderation in all things. Thus they have profited in knowledge and experience, an evidence of which is the recent renovation of their attractive business home.

## TOO HEAVY STOCKS—TOO MANY STYLES

(Continued from page 20)

"That is the idea," responded Mr. Bartlett, "so far as the retailer is concerned. It would mean fewer styles would make their appearance on the market. The styles stocked would cost less than those at present prices, as there would be fewer "freak" fashions created. This would be a great saving to the manufacturer in lasts, patterns, etc., and a big saving to the retailer also, as in such a case, odds and ends would not accumulate as at present."

In reply to the question, whether he made use of any in-stock department, Mr. Bartlett replied:—"We certainly do—and we thoroughly appreciate any move along such a line. We believe it would pay the retailer if he could draw on in-stock—supposing he were obliged to pay a little more for shoes. For he could then rest assured that styles would not change every week—as they have been doing in the past. He could also carry considerably less stock, and at the same time do just as much buying. At the end of the year his profits would be greater, as there would be fewer left-overs. How do we get rid of left-overs? Why, when we find lines hanging fire, we begin cutting the prices, to clear them out. If the first slash does not have any perceptible effect, we make a still deeper cut, even to the point (this is not intended for a pun) of forgetting at times, the original cost. We find that the longer we keep an article, the more we have to cut the price in order to clear it out."

### Mixing Better Lines with Cheaper

"Yes, an in-stock installed by manufacturers would help to reduce your odds and ends in live selling lines, certainly," remarked D. Sutherland of Harriston, Ont., "but it is not in the live sellers that the odds and ends accumulate. It is in the slow sellers, which is quite another matter. I make use of an in-stock department to a limited extent, namely in staples and low priced goods. Oh yes," he acknowledged, "I carry too heavy a stock, but it is hard to say how to limit the number of styles, as the people want changes, and insist upon having them. But I have found that a neat, well-fitting shoe will sell, nine times out of ten, ahead of any style. In regard to ordering on a new last, it altogether depends on how the new last sells. If it goes rapidly, there is no trouble in getting sorted up. On the other hand, if it is a slow seller, you don't want any more, and the manufacturer shuts it out, too." Mr. Sutherland says that he finds about two-thirds of his present stock consists of good quick sellers—the other third is composed either of slow moving lines or stickers. In getting rid of them he places any odd pairs of the better lines in with the next lower priced goods, and finds they then move very easily. With the lower priced lines he marks them at figures which will convince any customer, that in purchasing them he is securing a bargain. Mr. Sutherland thinks the only way out of the difficulty, with respect to the too numerous styles, is for the manufacturer to discontinue turning out the new lines, and seek to improve the stock, more especially the finish of his output.

### Staple Lines Give No Trouble

"My best sellers," said N. Leach, shoe dealer, of Smith's Falls, Ont., "are the more staple lines. I do not experience any difficulty in sizing up correctly, as I refuse to purchase from any house that does not carry the sizes in stock. I can, therefore, size up at any time, for that season." Mr. Leach declares that the changes in styles have been beyond all reason, for he says no merchant can keep tab on them. He feels no alarm when he sees his shelves stocked with left-overs, as, by a careful study of his customers, he is generally able to sell at cost, and sometimes gets even a little more out of these so-called stickers. "I think an in-stock installed by manufacturers would

help to reduce odds and ends to a very great extent," concluded Mr. Leach, "and I make use of an in-stock department at the present time."

### Style Should Be Kept Two Seasons

"Do you believe you carry too heavy a stock, when you take the amount of your turnover into consideration," was asked of J. T. Allen, shoe retailer, of Mount Forest, Ont., and the emphatic reply was, "I do." Mr. Allen considers his best selling lines are ladies' fine shoes and staples. He finds that men's fine shoes are not selling as well as they did last year. An in-stock department, he believes, would help to reduce odds and ends in live selling lines, and he takes advantage of all such departments now conducted by manufacturers. Mr. Allen thinks there is no necessity for so many styles as are seen at the present day, and believes that the same style should be kept for at least two seasons, for he declares that with fewer modes, a much smaller stock could be carried. Mr. Allen, at the end of each season, namely in February and August, holds a sale, as he finds this is the only way of getting rid of shelf-warmers.

### Displays All Stickers on Racks

H. Peel, shoe dealer, of Owen Sound, like many of his fellow shoemen, lays the blame for the numerous styles in footwear, and the rapid style changes, on the manufacturers. As a remedy he suggested all "faddy" and extreme styles should be cut out, which would considerably lessen the number of lines, especially at this time, when so many of both button and lace shoes are worn. He thinks a move in this direction should be made by the manufacturers, both for their own benefit and that of the retailer. Mr. Peel also acknowledges that he carries too large a stock in proportion to his turnover, and believes in the in-stock department and makes use of the same. He finds that about from 60% to 70% of his stock are good sellers. As for shelf-warmers, Mr. Peel removes all such lines from the cartons and displays them on racks, etc., in a prominent part of his store, making some reduction in the price. He says he has found this method very satisfactory, as his customers see these on entering the shop, and are able to readily make a choice if they so desire.

### Divide Shoes into Four Classes

S. Davis, of High River, Alta., believes that an in-stock installed by manufacturers would be a boon to a dealer who carried a large stock, as it would not then be necessary to carry so many sizes. Mr. Davis is at present carrying only a small stock, as he is just starting business, but is buying from an in-stock department each week as his goods are sold. He is of the opinion that there should be a limit to the number of styles made. He believes the accumulation of odd sizes is partly due to the half sizes, which render it necessary to stock too many in one line. Mr. Davis states in regard to disposing of shelf-warmers, that he has not found they have accumulated as yet, and therefore has not been inconvenienced by this phase of the selling end. He, however, suggests a plan for dealing with them, namely, that they be divided into four classes, 1st, the latest style shoes; 2nd, first-class goods; 3rd, medium and strong shoes; 4th, all cheap lines.

Mr. Davis says:—"It is impossible for all retailers to be right up to date, as this would place too many new styles on the market, and the consequence would be that the supply would greatly exceed the demand. Each dealer should make himself popular with the public in some special line. I consider it more profitable to lose a sale, than to be obliged to carry a dozen pairs to gain that sale."

### A View From the West

"There are decidedly too many styles in footwear to-day," remarked G. D. Chidley, who conducts a shoe store

in Indian Head, Sask. "I do not see any way to get over this difficulty," he continued, "as different tastes have to be catered to, and it takes all classes to make up a good trade. In regard to odd sizes, the only way to prevent their accumulation, is a continual watching of stock, and ceaseless effort to clear them out. The proportion of my stock which I consider good vital sellers, is about 75%, but the stock I carry is altogether too heavy—when I take my turnover into consideration. I should say it is too heavy by fully 50%. An in-stock department installed by manufacturers would make it much easier to keep the volume at a more reasonable amount, and I make use of in-stock branches in my business. To clear out left-overs and shelf-warmers, I hold semi-annual clearing sales."

#### Retailer Has Not Time to Breathe

"The boot business of to-day is a gamble." Such is the opinion of Fred J. Argall, Three Rivers, Que. "You would think the manufacturers had all conspired to render it as difficult as possible for the retailer and the jobber, changing the styles in footwear so frequently, and generally, from one extreme to the other. Yes," he continued, "I carry too heavy a stock, and I think the in-stock department is useful in helping me to reduce odds and ends. But I think if the manufacturers were obliged to carry the surplus stock, they would not spring these rapid and frequent style changes on the dealers, as the loss would be theirs. As things are at present, they load up the retailer with a new style, and before he has time to draw his breath, another style is ushered in by them, and the same conditions keep recurring. They have received their payment for each line as it leaves their factories, and they have, therefore, nothing to lose by creating a fresh style." Mr. Argall finds there is always trouble filling out an order on sizes, as it is difficult to judge in advance what sizes will be required. His most vital sellers form a proportion of about 85% of his present stock, and he gets rid of left-overs by special sales, and always having a department for odds and ends marked "Jobs."

#### Evil Will Work Out Own Cure

Respecting the number and too-frequently changing nature of the styles in footwear, Rowland Hill, London, Ont., (who always has some original ideas to advance in connection with the business) says that he believes the rapid introduction of one freak after another will work out its own remedy, and women will finally turn away from them, no longer craving such far-fetched novelties. Mr. Hill does not try to keep them in stock—confining himself to a line or two once in a while, just to let the people know he is alive. Generally speaking, he thinks he carries too large a

stock, in comparison with the turnover, but finds it a difficult matter to keep it down to an ideal amount. He makes use as far as possible of the in-stock departments now conducted by Canadian shoe manufacturers, and thinks, in regard to an in-stock installed by manufacturers, that it should have the effect of reducing the number of lines manufactured, for out of the multitude of samples made, only a few are real "Sellers." Mr. Hill says it is only with smaller sizes in shoes, or extreme sizes that he gets stuck, and that only a few of their lines run from 2 to 7, a few 2½ to 6 and some 3½ to 7, according to style, and they always specify how many of each size. Mr. Hill considers about 75% of his stocks would be classed as good sellers and good sizes, as his firm go slow on fads. In getting rid of left-overs, his plan is, as soon as a line begins to look slow, to put "PM's" on them. Naturally, clerks show the easiest sellers, but when inducements of from 10 to 25% are given, the case looks different. This keeps up interest and, with proper restrictions, does the customer no harm. Mr. Hill says they only have "Clearing Sales" twice a year. The few lines that are not selling are picked out and a big cut is made in the price sufficiently large, to clear them out quickly. The firm never buy goods for sales or have strangers in to run a sale for them.

#### Do Not Order Too Far Ahead

Richard Newman, shoe retailer, of Dunnville, stated it as his opinion that almost all retailers carry stocks too large for the amount of their turnover, and that, while the frequent changes in styles are a great loss to most dealers, shoemen in the smaller towns are the biggest sufferers in this respect. "It would be a great benefit to the retail trade," he affirmed, "for the manufacturer to carry stock, for oftentimes the retailer orders from drummers four or five months in advance, and when the goods arrive, they are not what the dealer requires, as in the interim, the color is out of style, the last in this line is not then called for, but has been supplanted by a different one, and in this way the retailer is kept in a constant state of tension. It is almost impossible for him to know, under such conditions, what he should order." Taking all this into consideration, Mr. Newman has come to the conclusion not to order too early, especially as in most cases he can at the present have goods made up in three or four weeks' time. He finds the best lines to carry for rural trade are the medium and staple goods, and that such merchandise affords him a fair margin of profit.

#### Would Legislate Them Into Line

"I consider there are far too many styles," declared F. J. Boyd, shoe merchant, of Merrickville, "I may not be

### The New Havana Brown Boot Wonderfully Smart Model in Fine Kid

ONE OF THE MOST CHARMING boots which has come across the border this season is the brown kid model illustrated here. The very last word in modish cut and color, it is yet of such absolutely quiet, good style as to make its appeal as much to her of strictly conservative taste as to the woman of ultra-fashionable dress.

Made of fine kid in the modish dark Havana brown, it is in high-top style laced through blind eyelets, the stitching being in white. The heels

are of the Louis variety and the soles welted, constituting a boot which may be worn equally well with morning or afternoon costume. Price, \$9.00

### A High-topped Skating Boot May be Had in Brown or Black Box Calf

NO NEED for a lady to wear a crude, ill-cut boot for skating, when this model offers its services.

In modish high-topped style, it laces in Blucher effect, with toe cap, heavy welted sole and low heel—a boot which at the end of the season may be utilized as a smart walking boot for wear with a plain tailored suit.

As stated in the subhead, this new skating model is developed in box calf and may be had in sizes 2½ to 7. Price, in black, \$5.00, in tan, \$5.50

—Special Photo. Queen St.

in a position to offer an opinion, for I do not handle extreme freaks at all, but I would recommend a stiff legislation, and now is the time for it. Let this be added to some of our reforms which must come. Without a doubt, I consider that an in-stock branch installed by manufacturers would help to reduce odds and ends, but we must jack up the manufacturers to be more discreet, and not say at placing time that if the retailers sell sufficient of this line they will stock it. They should decide at the time either yes or no. I make use of three in-stock departments as well as doing business with jobbers. I believe I carry too heavy a stock, but am relieving this pressure every year. It is almost impossible to size 30 pair lots correctly, but quite frequently the absence of an in-stock department causes an accumulation of odd sizes on a new last. My stock consists largely of staples, and my business is small compared to a city store, but four out of every five are good sellers. As I am very careful in buying, I have no accumulation of sizes, and if I notice a line going slowly, I work it off gradually, and if a few pairs are left, I put them on a bargain table at prices which I consider cheap advertising.

"I think the manufacturer makes too many cheap goods," continued Mr. Boyd, "he uses too much leather, and if less lines were made, the standard of our shoes could easily be raised. I would like to see something happen to the leather trade, or at least to the supposed leather business, and other lines as well. I believe legislation is the only way. It will cripple a few concerns, but let the government recompense them. We pay too much for shoes, and our customers pay too much also, and why? Simply because the designer thinks up some new freak, and this happens altogether too often. The older lasts are thrown out—the workman does not acquire speed on this last until it is cast aside, and all this adds to the expense. The shoes come out, and are sold all through the country. Mr. Shoeman gets long profits, and in two or three months, they are found on sale at a low figure. The stylish woman is stung again—the merchant is stung, too. A few weeks after, something else turns up, and 'history repeats itself.' There are people who can stand this sort of thing, but the masses cannot. We can talk our heads off about a remedy, but the only way is, as I said before, through legislation. Canada is now entering into a new age, which is just dawning. She is thinking seriously of past follies, and now is the time to lay the foundation of a much needed reform. People are beginning to see that they have to pay for a vast amount of foolishness, and they are justified in kicking." Mr. Boyd concludes, "Let the manufacturer make fewer lines, but make them better—cut out all the shoddy stuff. If the people have to pay more for good lines, they will do it, for the simple reason that they will be getting value for their money."

#### Hard to Size Correctly on New Last

"I certainly think this style craze is a great drawback to the retailer," said C. L. Casselman, who does business in Winchester, Ont. "It makes it necessary for me to put in new stocks of rubbers to fit the new boots, thus causing my present stock of both boots and rubbers to become a supply depot for the clearance sale at a considerable loss." Mr. Casselman believes in and makes use of in-stock departments, and considers them of great assistance in reducing odds and ends. He thinks he carries too heavy a stock, when taking the amount of his turnover into consideration, and clears out his left-overs by means of a sale. He often finds difficulty in sizing up correctly when ordering on a new last. It is the opinion of Mr. Casselman that manufacturers should adopt a more conservative attitude in the adoption of new styles, of which he believes there are far too many. He thinks the remedy is up to the manufacturers entirely.

"The boot and shoe business to-day," said J. W. Thompson, of Buckingham, Que., is a problem. There are cer-

tainly too many styles, which change with alarming frequency, but if the manufacturer would eliminate the high cost of manufacturing "freaks" and lower the cost of Goodyear staples—if he would improve the quality of medium price lines, it would keep both the manufacturer and the retailer in a healthier condition. Let the manufacturer limit the number of styles, and by this means the retailer will be protected." Mr. Thompson declares that 90% of his present stock consists of good vital sellers. He disposes of all shelf warmers by keeping them constantly before the public, marking them at a reduction, and placing them on display in baskets or on tables.

#### More Catalogues—Fewer Salesmen

H. Barringer, shoe retailer, who does business in Port Rowan, Ont., never purchases anything except staples—and the consequence is, that the good vital sellers in his stock measure up about eighty per cent. and he does not seem to be troubled by any left-overs or shelf-warmers. He has no difficulty in sizing up correctly when ordering on a new last, and makes use of the in-stock department of all Canadian manufacturers. He believes an in-stock installed by manufacturers is of assistance in reducing odds and ends. Mr. Barringer also finds he carries too heavy a stock when the amount of his turnover is considered. He thinks there should be fewer traveling salesmen, and more illustrated catalogues. "When a traveler calls," he says, "we are more apt to buy, even when we do not really require the goods, and in this way we accumulate a surplus stock." He also adds,—"Some big department stores have no representatives, yet they sell more goods in this locality than the shoe stores."

#### THEIR TWELFTH BUSINESS BIRTHDAY

Recently the Rannard Shoe, Limited, celebrated the completion of their twelfth year of business in Winnipeg. It was in 1903 that C. F. Rannard withdrew from the Canadian Pacific Railway company's telegraph department, with which he had been connected for many years, to engage in the boot and shoe business in association with H. C. Chapman. Mr. Chapman withdrew from the business at the end of four years. The business was later organized into a joint stock company under the title of the Rannard Shoe, Limited, with a capital stock of \$150,000, C. F. Rannard being its first president, which position he has continued to occupy.

The business has grown and developed until the company is now operating three large retail boot and shoe establishments, one located at 536 Main street, another at 330 Portage avenue, and the third at 273 Portage avenue.

Mr. Rannard, when asked with regard to business conditions, declared that his company had enjoyed a most prosperous and satisfactory year. "To hard work and reliability," said Mr. Rannard, "I ascribe largely the success of our store operation. I have a capacity for work, and hard work, and my associates and employees are endowed with the same quality which, after all, is the main essential to success."

Every year Rannard's Shoe, Limited, gives a dinner to the employees. The happy occasion was celebrated this year very quietly.

The following are the names of the officers and salesmen who have been responsible in keeping the Rannard Shoe, Limited, to the front in Winnipeg: President, C. F. Rannard; vice-president, A. B. Rannard; sec.-treasurer, R. F. Eadie; directors, J. Waddington and M. A. Cafferky; salesmen, Messrs. J. H. McGee, A. R. Davidson, F. Band, C. P. Nichols, A. McKim, J. C. Thompson, T. J. Davis, F. Bent, W. Wight, C. Curle, J. Webster, H. A. Arbuckle and T. Lipsett.

### GOOD SHOEMAN AND GOOD BANDSMAN

Arthur W. Darrow is a musical shoeman. He can sell shoes "to beat the band," and if necessary, he can get the band to attract the surging crowd, for he is the leader of the Independent Order of Odd Fellows Concert Band in

A. W. DARROW, HAMILTON, ONT.

Hamilton. Outside of working hours, which are spent in the shoe department of the G. W. Robinson Co. Ltd., Hamilton, where he is buyer and manager, Mr. Darrow can generally be found in musical circles. He is a cornetist of local prominence, and his services have always been gladly placed at the disposal of his fellow citizens. Shoecially speaking, the subject of this reference has been with the Robinson Co. for the past 14 years, and previous to that, was for a while with the late John Patton, of Toronto. He also spent three years with the Bailey Shoe Co., of Chicago, so that he has a well-rounded experience. The department over which he presides, specializes in women's and children's shoes, at popular prices, and the results have been very gratifying.

### THE HIGH CUT BAL HAS CALL

The 8 and 9 inch bal in colored kid seems to be having the call in all the large centres of population. The principal colors are bronze, African brown, various shades of grey and white. Of course other colors are also featured, such as blue, champagne, claret and combination effects. Some of the high bals have dome cut tops, with collars and anklets of contrasting shades. The Cuban heel appears to be returning to popularity, while the commonsense heel on a number of walking models, is also having a fair share of consideration. It is understood that some manufacturers will shortly show large buckle Colonials in white calf and white kid. The general impression of many recent visitors to the style centres is that the coming season will be an exceptionally strong one in white footwear of all kinds. Gypsies still have a good demand in certain towns, but their popularity seems to be on the wane. Although an attempt was made to introduce velvet high cuts the public did not receive these offerings with any eclat or enthusiasm,

and, to use a Hibernian expression, "velvets died before they lived." The high cut lace shoe of 8 to 9 inches in colored kid with a medium vamp and plain toe, carrying Cuban-Louis or peg heels, is certain to have a good sale for the Easter trade, and remember that Good Friday this year comes on April 21st, while the festival of Easter will be observed on April 23rd.

### DASHING MODELS IN COLORED KID

R. L. Savage, Toronto, who represents Clark Bros., Limited, St. Stephen, N.B., has received several lines of new samples which are the last word in snap and grace. These come in bronze, blue, African brown, grey, matt and glazed kid, and are eight to ten inches high. Most of the models carry Cuban-Louis and peg heels, with medium length vamp and plain toe, some with straight and others with fancy cut top. They come in all widths from A to E, and are attractive, smart and right up-to-the-minute in all pleasing features. There is no doubt that the high cut bal for spring will have much vogue. Colored and white kid will enjoy a large call, and live retailers are making preparations to cash in on a big Easter trade in this particular line. Clark Bros., Limited, are still showing a number of Gypsy shoes, both in low and high cuts, several of which have the Gypsy front, but no seam over the toe. These new offerings are decidedly fetching.

### MAKING GOOD IN RUBBER GAME

T. F. Davies, manager of the Halifax branch of the Canadian Consolidated Rubber Co., is a Maritime Province man, who is making good in the shoe game. He was born in St. John, N.B., in 1882, and started on his business career in 1901 with the old-established retail shoe house of Francis & Vaughan, who are still in business. There he remained about six years, when he left for New York city to take a position with the Regal Shoe Co. After spending three years in the American metropolis, he was, owing to ill health, forced to return to his native province and took a position

T. F. DAVIES, HALIFAX, N.S.

in the St. John branch, under district manager Lieut.-Col. A. E. Massie. Some time after Mr. Davies went into business for a short time in Sussex, N.B., but about five years ago linked up with the Dominion Rubber system, with which concern he has advanced to his present responsible position.

### NEW POSITION FOR MR. FERGUSON

George H. Ferguson, of Vancouver, who is now covering the western provinces from Port Arthur to the Coast, for Clark Bros., Ltd., St. Stephen, N.B., is one of the most aggressive and genial traveling shoemen of the prairie provinces. He recently resigned his position with the Hartt Boot & Shoe Co., of Fredericton, N.B., being on the road or that firm for the past fifteen years. Previous to that he

GEO. H. FERGUSON, VANCOUVER

spent a couple of years in the factory. During this long period, Mr. Ferguson did not represent any other house. He started in the province of New Brunswick, making about two trips, and then went west. His territory, when he began, was from Port Arthur to Victoria, but some eight years ago, this area was divided up, and he took the part from Regina West. Mr. Ferguson moved to Vancouver just six years ago, where his home is at the present time. Two years ago last August, in company with M. L. Savage (who represents Tetrault Shoe Mfg. Co., and J. A. and M. Cote, St. Hyacinthe, he purchased a retail business in Calgary, which is conducted under the name of Murrays, Limited, and when not on the road, Messrs. Savage and Ferguson devote their energies to the retail branch. A new front is being installed in the store, and other improvements carried out. Business has been very good with the firm and is improving every month. Mr. Ferguson is now making his initial trip for Clark Bros. Ltd., with a fine new line of samples, embracing all the latest models in high cut bals, in fancy kid of various colors. He sees for this progressive firm a wonderful future, and expects to greatly extend their already large connection in the west. An evidence of the regard in which Mr. Ferguson was held by the Hartt Boot & Shoe Co. was furnished in the presentation of a beautiful gold and platinum watch chain from the firm, and a gold cigar cutter, suitably engraved, which was the personal gift of Mr. J. D. Palmer, president of the company.

### GOOD STUNT FOR ALERT SHOEMAN

Money displayed in a store window usually attracts attention. A retailer in a western city who realized this fact made capital of it recently in designing a successful shoe display. The main display window was attractively used to exhibit shoes of a well-known make. On the inside of the window were pasted two brand new one-dollar bills, and

above the bills appeared a neatly lettered card with the inscription, "Which one is genuine?"

A crowd was attracted to the window and everyone passing stopped at least to see what the others were gazing at. Opinion varied greatly as to which of the bills was genuine, and in one case two men got into quite an argument.

The dealer says that a number of people entered the store to verify their decisions about the bills. No prize was offered, but it was a satisfaction "just to know." All who did come in to find out were greeted by a pleasant clerk, who stated that both of the bills in the window were the best that the country could make, and if they fully appreciated genuine shoe comfort they would be interested in a little booklet which the clerk had for distribution. This told about a certain large company's line of shoes, for which that store had just become the city representative. The "stunt," the dealer says, centred more interest on his windows than any other plan he ever tried.

### POPULAR SALESMAN JOINS NEW FIRM

J. G. McDiarmid, who for eleven or twelve years has covered the West for the Cook-Fitzgerald Co., of London (and latterly for Scott-Chamberlain, Limited), is assuming a new position on February 1st, when he becomes western representative of the Murray Shoe Co., of London, Ont., taking the route of A. M. Jarvis, who is the new manager of the company. Mr. McDiarmid knows the West like a book and counts his friends by the score. He has always maintained the best interests of his firm and at the same time established warm personal relations with his customers. He gained his first acquaintance with shoes in the "Big 88" on Queen street west, Toronto, where his father was for a number of years in partnership with Warren T. Fegan. Here "Jake," as he is familiarly known, rustled parcels and

J. G. McDIARMID, TORONTO

learned the art of salesmanship, getting valuable insight and experience in the retail end. His first job on the road was with the J. D. King Co., with whom he remained seven years, and later he was with the James McCready Co., Limited, of Montreal, but since 1904 has been with the Cook-Fitzgerald Co. He has made two selling trips to the West for several years, and is thoroughly acquainted with every foot of the ground. Mr. McDiarmid lives in Toronto, but usually spends his summers at Christie's Lake in Lanark county, where he is fond of fishing and motor boating.

# Some Live Shoe Towns in Quebec

## The City of St. Hyacinthe

Rue Cascades,  
the leading thoroughfare

ST. HYACINTHE was founded by Pierre Francis Rigaud, Governor of what was then New France. The present city of over 10,000 population is located on a section of a Seigniorial Concession granted to this eminent French pioneer in 1748. Perhaps the credit of actually founding the city should be given to Jacques Hyacinthe Simon de Lorme who in 1753 bought the concession from Rigaud for 4,000 francs (\$800). The purchaser was at that time a resident of Quebec and engaged in the business of making and delivering to the representatives of the King of France platforms and artillery carriages. The first church and seigniorial residence was erected in 1763 and before long a thriving village existed in what had been before dense forest. Situated on the banks of the Yamaska River 36 miles from Montreal, it is one of the finest cities in Quebec and industrially had made great progress. It is also an educational centre and a pretty residential city. The river engirdles the town in a semi-circle and adds beauty to the location by furnishing a series of cascades which also supply power for the factories. The first section of the Atlantic and St. Lawrence Railway, now known as the Grand Trunk, was built in 1847 between St. Hyacinthe and Montreal, and with the Intercolonial Railway, the Canadian Pacific Railway and the Montreal, Quebec Southern Railway, give the city excellent transportation facilities. Among its industries are two shoe factories, a tannery, wholesale shoe house, woollen mills, distillery, two furniture factories, and two organ factories.

St.-Hyacinthe fut fondée par Pierre François Rigaud, un gouverneur de la Nouvelle-France. La ville actuelle, de plus de 10,000 âmes est située sur une partie de la concession seigneuriale concédée à ce grand pionnier français en 1748. La gloire de la fondation même de la ville devrait peut-être revenir à Jacques Hyacinthe Simon de Lorme qui, en 1753, acheta la concession de Rigaud pour 4,000 francs (\$800). L'acheteur demeurait alors à Québec et fabriquait pour les agents du roi de France des plate-formes et affûts de canons. La première église et la demeure seigneuriale furent construites en 1763 et un village prospère remplaça bientôt la forêt vierge. Assise sur les rives de la rivière Yamaska à 36 milles de Montréal, elle est une des plus jolies villes du Québec, après avoir subi un grand progrès industriel. C'est aussi un centre d'éducation et une coquette ville d'habitation. La rivière contourne la ville en demi-cercle et en embellit le site par une série de cascades qui fournissent de l'énergie aux usines. La première partie du chemin de fer Atlantique et S.-Laurent, aujourd'hui le Grand-Tronc, fut construite en 1847 entre S.-Hyacinthe et Montréal, et, de concert avec l'Intercolonial, le Pacifique Canadien et le Montreal et Québec-Sud, donne de grandes facilités de transport. Parmi les industries locales on compte deux fabriques de chaussures, une tannerie, un commerce de chaussures en gros, des usines de lainages, une distillerie, deux fabriques de meubles et deux d'orgues.

P. F. Payan, of Duclou & Payan, leather manufacturers, St. Hyacinthe, who devotes his time to the production end.

W. V. Mathews, manager of manufacturing, for Ames-Holden-McCready, who have a factory in St. Hyacinthe. It turns out staple lines.

W. Grouard, the active manager of the Eastern Townships Shoe Co., St. Hyacinthe, who do a large wholesale business.

## The Home of "Yamaska" Brand Popular Lines of Footwear

It has been our aim always to give to the Trade those shoes which might be called "bread and butter" lines, as we have held to the belief that staple styles, comfortable fitting shoes, well made, always sell.

Our salesmen are always pleased to show samples—and we deliver the shoes according to sample.

LA COMPAGNIE J. A. & M. COTE  
St. Hyacinthe Quebec

## J. A. &amp; M. COTE

THIS year the oldest shoe industry in St. Hyacinthe celebrates its Golden Jubilee, the Cotes, of 50 years in the shoe manufacturing business in St. Hyacinthe last spring. The business was commenced in 1865 by the late Louis Cote, who died in February of last year. He was one of the old guard and a man of unusual ability in his present field. Associated with him were his brothers George and his cousin, V. L. Cote, the firm name being Cote, Cote & Cote. The business prospered until the great fire of 1876, which wiped them out as it did so many other factories. In 1877 the business was reorganized under the name of Louis Cote & Frère, the principals being Louis Cote and George Cote. They made a line of pegged, Standard screw and McKay

## J. A. &amp; M. COTE

La plus ancienne industrie de chaussures de S.-Hyacinthe, celle des Côté, célèbre cette année son jubilé d'or. Elle a été établie il y eut 50 ans le printemps dernier, par feu Louis Côté, décédé en février dernier. Il était de la vieille garde et singulièrement doué pour cette industrie. Il avait comme associés son frère Georges et son cousin, V. L. Côté, formant la maison Côté, Côté et Côté. Tout alla bien jusqu'au grand incendie de 1876 qui détruisit leur fabrique avec tant d'autres. En 1877 la maison fut réorganisée comme "Louis Côté et Frère," les chefs étant Louis Côté et Georges Côté. Ils fabriquaient des chaussures à chevilles et McKay. La maison garda le même nom jusqu'en 1893, mais dans l'intervalle, en 1890, Joseph et Magloire Côté, de plus jeunes frères,

Factory of J. A. &amp; M. Cote, St. Hyacinthe

shoes. The firm continued under this name until 1893, but in the meantime in 1890 Joseph Cote and Magloire Cote, younger brothers, and in the old factory as foremen, started a business of their own and concentrated on McKays. In 1895, Louis Cote sold his interest to a new firm which was known as J. A. & M. Cote, of which firm A. A. Cote became a partner. This business was conducted until the second big fire in St. Hyacinthe in May, 1903. At that time the present concern La Cie J. A. & M. Cote was organized, and it has conducted the business ever since. The officers are J. A. Cote, president; Magloire, vice-president, and A. A. Cote, secretary-treasurer. The president is a shoeman all the way through and his brother Magloire is an expert cutter, while the secretary-treasurer of the company, A. A. Cote, is looking after the financial and office end of the factory, and completes a trio of unusual strength conducting a business which is known from coast to coast as one of the finest Canadian shoe manufacturing concerns making staple footwear which has become almost a standard as well as of a fine line of McKays.

Being for such a long period identified with the progress of the municipality along industrial lines, it is not surprising to find these brothers taking a keen interest in all movement for the betterment of the city—economically, politically or morally. Between them they have held various offices within the gift of the people and they have been associated with various organizations for the promotion of the well-being of their native city. They have a wide circle of friends in the shoe manufacturing trade and they have the pleasure of knowing that there is no name in Canadian shoedom which is more respected and honored than that which adorns their stationery.

## DUCLOS &amp; PAYAN

ONE of Canada's old time tanneries was founded in St. Hyacinthe in 1873 by S. T. Duclos and P. F. Payan, who commenced in a small structure which has been built over and around to such an extent that the original building is completely swallowed up by the large modern plant now operated. In the old days they made buff leather and splits and in turning out 200 sides a week were doing a nice

employés comme contremaîtres dans l'ancienne fabrique entreprirent la fabrication de chaussures McKay. En 1895 Louis Côté vendit sa part à une nouvelle compagnie, J. A. & M. Côté, dont A. A. Côté devint associé. Cette raison sociale continua jusqu'au second grand incendie de S.-Hyacinthe, en mai, 1903. Alors fut organisée la maison actuelle, La Cie J. A. et M. Côté qui existe depuis. Les officiers en sont: J. A. Côté, président; Magloire, vice-président; et A. A. Côté, secrétaire-trésorier. Le président; sait son métier parfaitement et son frère Magloire est un coupeur expert, tandis que le secrétaire-trésorier de la compagnie, A. A. Côté, s'occupe du côté financier et administratif de l'entreprise et complète un trio de haute qualité dont les produits sont connus d'un océan à l'autre comme provenant d'une des meilleures fabriques de chaussures canadiennes. Ces chaussures sont devenues presque des modèles du genre régulier ainsi que du genre McKay.

Ces frères s'étant si longtemps liés au progrès industriel de la municipalité, rien d'étonnant donc s'ils prennent un grand intérêt à tous les mouvements d'avancement économique, politique ou moral de la ville. Ils ont rempli plusieurs charges publiques et font partie de plusieurs associations pour promouvoir les intérêts de leur ville. Ils ont une foule d'amis dans l'industrie de la chaussure et goûtent le plaisir de savoir qu'il n'y a aucun nom dans ce domaine manufacturier qui soit plus respecté et honoré que le leur.

## DUCLOS ET PAYAN

S.-Hyacinthe a vu se fonder en 1873 la tannerie de S. T. Duclos et P. F. Payan, qui débuta dans un petit édifice auquel on a tant ajouté qu'il est complètement absorbé par la grande installation moderne actuelle. On faisait anciennement le cuir couleur chamois et fendu, et l'on considérait comme bonne une production de 200 flanes par semaine. L'on produit actuellement 3,000 flanes de cuir pour hausses, tannés au chrome ou à l'écorce, noirs ou colorés. La fabrication de renforts en fibre est en outre devenue une partie importante de cette entreprise qui fait de bonnes affaires en ce genre, vu la garantie que le renfort durera plus que le

business. To-day their output is in the neighborhood of 3,000 sides a week of upper leathers, chrome and vegetable tannages in black and colors. Another product which has become a most important department in the business is fibre counters. The firm does a large business in this line as they guarantee the counter to outwear the shoe. They also make union and leather counters and pasted insoling.

In 1908 the present partnership was formed. The two original partners continue to take an active interest in the business, Mr. S. T. Duclos devoting his attention to sales, and Mr. P. F. Payan to production, being assisted by two of his sons, L. F. and E. as well as F. W. Moseley. L. E. Heribel, another partner, is at St. Hyacinthe looking after the financial and cost end of the business. J. R. Ryan is in charge of the Montreal office and warehouse which looks after the sales, being assisted by C. A. Duclos. The opening of the Montreal office and warehouse 15 years ago was an important step which has been more than justified by the growth of the firm's business which it brought about. Besides handling the output of their own tannery, this office sells the entire production of an oak leather tannery, as well as Spanish sole leathers made elsewhere. The jobbing end of the enterprise is becoming increasingly important. The business has been always considered one of St. Hyacinthe's leading industries and its principals always have taken a keen interest in the affairs of the town.

#### E. T. SHOE COMPANY

ST. HYACINTHE'S only jobbing business is one of the largest in the province. The E. T. Shoe Co. was first organized in 1902, but was reorganized in 1913 by one of the oldest retailers in the province, L. A. Guertin, who conducts a successful business in St. Hyacinthe, and who has been identified with this company since 1907, and W. Girouard, connected with the business since 1909, taking over the company. Mr. Girouard as the active manager of this wholesale house has been most energetic in extending its connections and with four travelers, covers all of Quebec and Eastern Ontario, and is still expanding the territory covered. They carry a complete range from soft sole infants' shoes to farmers' standard screws, including men's and women's fine welts, McKays and turns. They specialize on a number of imported lines, including white goods, fancy slippers and cushioned shoes. They are agents for Gutta Percha & Rubber Limited for the district and carry a stock of Maltese Cross rubbers at all times as well as a heavy stock of all shoe lines, including felt shoes. Mr. Girouard is in close personal contact with all of the firm's customers to insure them the best of service and his attention to the business in conjunction with Mr. Guertin's practical knowledge of the shoes and his long life in the shoe trade and sound business judgment, insures the continued success of this enterprising firm. A fact which contributes much to the company's success is the location of their business in a town served by four of Canada's largest railroads. This enables them to make prompt deliveries and to give an exceptional sorting service.

#### ST. HYACINTHE SOFT SOLE SHOE CO. LIMITED

THE newest shoe industry at St. Hyacinthe is that of St. Hyacinthe Soft Sole Shoe Co. Ltd., which in 1913 occupied small premises on Cascade St., where infants' soft sole shoes were made. The business developed rapidly and in April, 1915, the plant was moved to the present factory, where considerable new machinery was installed and where a line of standard screw shoes were made for boys, youths and little gents, as well as a line of child's and barefoot sandals. The capacity of the factory has steadily grown and the business bids fair to become one of Quebec's leading shoe factories. L. Bissonette is president of the company and H. A. Cote, treasurer. Both gentlemen are practical shoemen and their knowledge of shoes and their sizing up of

soulier. On fabrique aussi des renforts en cuir et des renforts composés ainsi qu'une fausse semelle collée.

La raison sociale actuelle fut formée en 1908. Les deux premiers associés prennent encore un intérêt actif aux affaires, M. S. T. Duclos s'occupant des ventes, et M. P. F. Payan, de la production, aidé de ses deux fils L. F. et E., ainsi que de F. W. Moseley. L. E. Heribel, un autre associé s'occupe à S.-Hyacinthe du côté financier et administratif de l'entreprise. J. R. Ryan a la direction du bureau de Montréal et de l'entrepôt de ventes, avec l'aide de C. A. Duclos. L'établissement du bureau et de l'entrepôt de Montréal, il y a 15 ans, a été une importante démarche, amplement justifiée depuis par le chiffre croissant d'affaires. En outre de la production de leur propre tannerie, ce bureau vend tout le produit d'une tannerie à écorce de chêne, ainsi que des cuirs espagnols pour semelles, de fabrication étrangère. La compagnie s'occupe de plus en plus de la vente de cuirs pour d'autres tanneries. Cette maison a toujours été considérée comme l'une des principales industries de S.-Hyacinthe et ses directeurs ont toujours pris un grand intérêt dans les affaires publiques de la municipalité.

#### E. T. SHOE COMPANY

Le seul commerce de chaussures en gros de S.-Hyacinthe est l'un des plus considérables de la Province. La Cie E. T. Shoe a été d'abord fondée en 1902, puis réorganisée en 1913 par M. L. A. Guertin, l'un des plus vieux détailliers de la Province, qui gère un bon commerce à S.-Hyacinthe et qui fait partie de la compagnie depuis 1907, et par M. W. Girouard, intéressé dans la compagnie depuis 1909. M. Girouard, l'actif gérant de cette maison de gros, en a énergiquement étendu le champ d'opération à l'aide de quatre voyageurs qui parcourent tout le Québec et l'Est de l'Ontario, et l'étend encore. La compagnie a un assortiment complet, des souliers à semelles molles pour enfants jusqu'aux chaussures lourdes "standard screws" pour cultivateurs, y compris les trépointes fines pour messieurs et dames, les bottines McKay et tournées. Comme spécialité elle vend plusieurs genres importés, en blanc, souliers de fantaisie et chaussures à semelles bourrées. Elle est l'agent de la Gutta Percha & Rubber Limited pour la région et tient un fonds de caoutchoucs "Maltese Cross" continuellement, ainsi que toutes sortes de chaussures, même en feutre. M. Girouard se tient en relations constantes avec tous les clients de la maison afin de leur procurer le meilleur service, et l'attention qu'il porte au commerce, jointe à la connaissance pratique des chaussures que possède M. Guertin et sa longue expérience dans ce commerce, ainsi que son habileté commerçante, assurent un succès continu à cette entreprenante maison. Un détail qui aide beaucoup aussi à son succès est la situation de la compagnie dans une ville desservie par quatre des plus grands chemins de fer du Canada, ce qui permet d'assurer une livraison prompte et un service exceptionnel d'assortiment.

#### S.-HYACINTHE SOFT SOLE SHOE CO., LIMITED

La plus récente fabrique de chaussures à S.-Hyacinthe est la St. Hyacinthe Soft Sole Shoe Co., Limited, qui occupait en 1913 un petit local, rue Cascade, où l'on fabriquait des bottines à semelles molles pour enfants. L'entreprise se développa rapidement et, en avril 1915, la fabrique était transportée dans le local actuel, où l'on installa beaucoup de machines nouvelles pour fabriquer des bottines "standard screw" pour garçons, jeunes gens et enfants, ainsi que des sandales ajourées pour enfants. La production de l'usine augmenta constamment et elle est en marche de devenir l'une des plus grandes fabriques de chaussures du Québec. M. L. Bissonette est président de la compagnie et M. H. A.

# Ames - Holden - McCready

St. Hyacinthe

Limited  
Quebec

Where are made the justly famous lines of Ames, Holden and McCready Shoes for the popular priced trade, as well as the more staple lines for heavy use.

the wants of the trade have been responsible for the success of the business.

#### AMES-HOLDEN-McCREADY CO.

THIRTEEN years ago the Ames-Holden Company took over the factory which had been for years operated by the old time firm Sequin, Lalime & Co., but which at that time was lying idle, and in the hands of the city authorities. Staple heavy goods to the amount of 700 or 800 pairs a day was made at first, but to-day the factory has a capacity of 5,000 pairs a day, and the quality of the footwear manufactured is steadily improving, the line predominating in the factory at this time being a popular priced one to appeal to the country trade. Since Ames-Holden-McCready Co. took over the business a new wing and a new storey have been added. Wm. Matthews, manager of manufacturing for this company, supervises the work of this branch, and has brought about great improvements. Thos. H. Lane is superintendent.

Côté, trésorier. Tous deux sont des fabricants expérimentés et leur science ainsi que leur prévoyance des besoins du commerce leur ont valu le succès dans leurs affaires.

#### LA AMES-HOLDEN-McCREADY CIE.

Il y a treize ans, la compagnie Ames-Holden prit possession de la fabrique si longtemps dirigée par la vieille maison Sequin, Lalime et Cie., mais qui était inoccupée alors et à la charge des autorités municipales. On fabriquait d'abord des chaussures lourdes à raison de 700 à 800 paires par jour, mais on y fabrique aujourd'hui 5,000 paires par jour, et la qualité de la marchandise s'améliore continuellement. On fabrique surtout maintenant une chaussure à prix populaire pour la clientèle de campagne. Depuis que la Cie. Ames-Holden-McCready a pris la direction des affaires on a ajouté à l'édifice une nouvelle aile et un autre étage. M. Wm. Matthews, le gérant de cette fabrique y a fait faire de grandes améliorations. Le surintendant en est M. Thos. H. Lane.

## The Town of Richmond

A view of the main thoroughfare

OUTSIDE of Montreal 76 miles away and Quebec 96 miles in the other direction, Richmond is probably the most important railway centre in Quebec. As such its population consists largely of railway men who contribute much to the prosperity of the town. It is also the centre of a splendid agricultural district. Being situated on the picturesque St. Francis River, it is naturally a fine residential town. It is fortunate in possessing the factory of the Boston Last Co., whose business is referred to below.

#### BOSTON LAST COMPANY

WHEN, several years ago, the Boston Last Co. of Boston decided that their Canadian business could be better served by the establishment of a branch in Canada, they located in

Située à 76 milles de Montréal et à 96 milles de Québec, la ville de Richmond est peut-être le centre le plus important de voies ferrées du Québec. Sa population se compose en grande partie d'employés du Québec. Sa population se compose en grande partie d'employés de chemin de fer qui contribuent beaucoup à la prospérité de la municipalité. C'est aussi le centre d'une belle région agricole. Sa situation sur la rivière S.-François en fait un charmant endroit d'habitation. Elle est heureuse de posséder chez elle l'établissement de la Cie. Boston Last.

#### LA CIE BOSTON LAST

Il y a plusieurs années la Cie Boston Last, de Boston, décida qu'elle desservirait mieux sa clientèle canadienne en

The plant of Boston Last Co.

Richmond, Que.

Richmond, Quebec, and in doing so conferred a great boon upon the shoe manufacturers of Canada in enabling them to secure at first hand the pick of American lasts made in Canada, at a price meaning the saving of duty and securing of delivery in such a way as to save much valuable time. Within the past few years their facilities for serving the trade have been constantly improved and it is now the practice of a number of manufacturers to make a special visit to the

fondant une succursale canadienne et choisit à cette fin Richmond. Elle rendit ainsi un grand service aux fabricants canadiens de chaussures en leur permettant d'obtenir à bref délai les meilleures formes américaines fabriquées au Canada à un prix qui épargnerait tous frais de douane, avec livraison rapide. Depuis quelques années la compagnie a grandement amélioré le service de la clientèle et bon nombre de fabricants viennent à l'usine avec leurs surintendants deux

# THE BOSTON IRONING

RICHMOND  
QUEBEC

SHOWING OUTFIT COMPLETE, WITH WOMAN'S BOOT ON FORM

The regular Treeing Outfits used in Shoe Factories at the present time were never designed for present day methods of Cleaning and Ironing.

The legs being of metal, thick and clumsy, tree feet and backs not following lines of lasts where connecting with the legs, the stretching off of the back part tends to pull the shoe into the shape of the treeing design, spoiling the fine lines of lasts and patterns. It is impossible to iron a shoe evenly when the forms are composed partly of wood and partly of metal, especially where the connections are covered with thin pieces of flat brass or other metal.

**The Boston Last Company** have designed a modern Treeing and Ironing Outfit and applied for patents on the same (some of which have already been granted) which absolutely follows all the fine lines of the lasts and patterns and is an individual and exhibition fit for every shoe. The form, as the printed cut shows, fills the entire shoe to the top, is turned wholly from wood, allows

any shoe to be ironed in the complete lines as designed by the last maker and pattern maker, and is the easiest form on which to put a shoe without any straining and to take one off without any breaking of the lines of the finished product.

**The Legs** are very simple in construction and never get out of repair, fitting into any twin or single table now used in the shoe factories. The cost is very small, as they are furnished at **\$5.00 each**, or an even exchange for Miller or Copeland legs.

# AND CLEANING OUTFIT

RICHMOND,  
QUEBEC

SHOWING MEN'S FORM AND LEG SEPARATE

This one style of leg takes every form from the Smallest Child's to the Heaviest Men's.

The Ironing Forms are sold at \$3.00 per pair and made direct from the lasts, and a pair of forms can be ordered at the same time that the sample lasts are ordered, so that the sample shoes are produced in perfect form without any vexatious delays.

plant two or three times a year with their superintendents for the purpose of selecting next season's shoes. A recent innovation in Canadian last making methods introduced by this firm is equipment of the latest style 3 inch Cutter Head Turning Lathes. This new equipment enables them to insure an accurate turning between sizes on the most radical models. The firm has a battery of 13 turning lathes operating perhaps the largest exclusive last plant on the continent. They also make followers, fillers, trees, and are manufacturers of electric heating and ironing outfits for shoe factories. Chas. Campbell is the manager of the factory and no man is more welcome in the shoe factories than he is. He gets around to see most of the firm's customers, although he has an excellent sales staff. E. L. Emerson, president of the company, while of necessity devoting most of his time to the company's immense business in Boston, nevertheless finds it possible to visit Canada regularly and he, too, is personally acquainted with most of the Canadian shoe makers and takes just as keen an interest in the development of the Canadian plant as he does in the progress of the American factory. It is Richmond's largest industry, and gives employment to a great number of hands in that district.

ou trois fois l'an dans le but de choisir les formes pour la prochaine saison. Cette compagnie vient d'inaugurer au Canada les tours "Cutter Head" de trois pouces, dernier modèle, ce qui permet de tourner avec précision les formes les plus diverses, entre les pointures. L'installation se compose d'une série de 13 tours constituant peut-être la plus grande fabrique de formes sur le continent. On y fabrique aussi des formes-squelettes, des embauchoirs et des appareils électriques de réchauffage et de repassage pour fabriques de chaussures. M. Chas. Campbell est gérant de l'usine et il n'y a pas d'homme mieux reçu dans les fabriques de chaussures. Il visite lui-même les clients de l'établissement, bien qu'il ait un excellent état-major de vendeurs. M. E. L. Emerson, président de la compagnie, bien que nécessairement occupé la plupart du temps à diriger les affaires considérables de la compagnie à Boston, visite cependant le Canada régulièrement et connaît personnellement la plupart des fabricants de chaussures. Il s'intéresse autant au développement de l'usine canadienne qu'au progrès de l'industrie américaine. C'est la plus grande manufacture de Richmond et elle emploie un grand nombre de gens de la région.

## The City of Sherbrooke

A gala day  
in this thriving city

SHERBROOKE is one of the most thriving manufacturing places in Canada. As a city with over 15,000 population, it is the heart of that fertile district in Quebec known as the Eastern townships. It possesses some 40 manufacturing establishments including those making cotton, wool, silk, jewellery, clothing, cigars, biscuits, and candy lines. One reason why so many factories are attracted to Sherbrooke is the fact that right in the heart of the city the waters of the Magog River are harnessed for electric power, enabling the municipality to supply nearly 10,000 horse power at a price of  $\frac{3}{4}$ c per kilowatt, or about \$16.70 per horse power per annum. The city also owns and operates its own water system. Sherbrooke is located on the main lines of the C.P.R., Grand Trunk and Quebec Central, the headquarters of the latter railroad as well as of the Boston & Maine. Sherbrooke boasts of two industries which are of special interest to the shoe trade, the factories of J. H. Hamilton Shoe Co. and the Panther Rubber Co.

### J. H. HAMILTON SHOE CO.

SHERBROOKE is proud to be selected as the site for the Hamilton factory which was organized Feb. 1st of last year. The company is headed by J. H. Hamilton, who as president brings to it the experience of years since 1881, which he has passed in the shoe business. He was with C. H. Fargo, of Chicago, for five years and on coming to Canada was identified with the old J. D. King Co., subsequently taking over all of their Quebec business when they

Sherbrooke est l'une des plus florissantes villes manufacturières du Canada. C'est une ville de plus de 15,000 âmes dans le coeur de cette fertile région du Québec connue sous le nom de Cantons de l'Est. Elle possède environ 40 usines où l'on fait des cotonnades, des lainages, de la soie, des bijoux, des vêtements, des cigares, des biscuits et des bon-bons. Ceci s'explique par le fait qu'en plein milieu de la ville les eaux de la rivière Magog sont endiguées en vue de la production d'énergie électrique, ce qui permet à la municipalité de fournir près de 10,000 chevaux-vapeur au prix de  $\frac{3}{4}$  de sou par kilowatt, ou environ \$16.70 par c.v par an. La ville est aussi propriétaire de son système d'aqueduc. Sherbrooke est située sur les voies principales du Pacifique Canadien, du Grand Tronc, et du Québec Central, dont la tête de ligne, comme celle du Boston & Maine, s'y trouve. Sherbrooke possède deux industries d'intérêt spécial pour le commerce des chaussures: les fabriques de la J. H. Hamilton Shoe Co. et la Panther Rubber Co.

### LA CIE J. H. HAMILTON SHOE

Sherbrooke est fière d'avoir été choisie pour l'établissement de la fabrique Hamilton, organisée le 1er février, l'année dernière. Le président de la compagnie est M. J. H. Hamilton qui apporte l'expérience acquise depuis 1881 dans le commerce des chaussures. Durant cinq ans il fut lié à la Cie C. H. Fargo, de Chicago, et à son arrivée au Canada il entra chez la vieille Cie J. D. King, acquérant tout leur commerce Québécois à leur retraite. La maison

C. A. Joslin, manager of the Panther Rubber Company's plant at Sherbrooke. He has had 25 years practical experience in rubber trade.

retired from the field. The firm is making a popular priced line of men's, boys and youths' welts, McKays and Standard Screw and Women's McKays and turns. It occupies one of the finest factories in Sherbrooke, a four storey brick building of mill construction, 30 x 125. Adélard Lebrun, superintendent of the factory, has had many years' experience, too, having been identified with such concerns as Ames-Holden-McCready and Daoust, Lalonde. He is turning out some nice footwear. Mr. Hamilton's son, W. P. Hamilton, is secretary-treasurer of the company. Another son, R. I. Hamilton, is at present at the front with the Army Veterinary Corps.

#### PANTHER RUBBER CO.

THIS company has been operating in Sherbrooke since May, 1914, being the Canadian branch of the Panther Rubber Co., of Stoughton, Mass. They are making a line of rubber heels and rubber soles for men and women and constitute one of Sherbrooke's rapidly developing industries. They are now at work on a new tri-plug friction heel covered by special patents which they hope to present to the trade within the next couple of months. C. A. Joslin is the manager of this company and is a practical rubber man, having been engaged in the business for 25 years. He has been with the Panther Rubber Co. since 1911. He has charge of a well equipped factory capable of turning out the best class of goods. Frank Bernstein, president of the Panther Rubber Co., gets up to Sherbrooke from Boston once in a while, as does M. M. Marcus, secretary of the company, and William Bernstein, treasurer, all taking a keen interest in the development of Canadian business.

Hamilton fabrique un assortiment de chaussures trépointes pour hommes, jeunes gens et garçons, de chaussures McKay et "Standard Screw" et des bottines McKay et tournées à de bas plus pour dames. Elle occupe l'une des plus belles fabriques de Sherbrooke, un édifice en briques de quatre étages, 30 x 125. M. Adélard Lebrun, surintendant de la fabrique, a eu plusieurs années d'expérience dans des fabriques comme Ames-Holden-McCready et Daoust Lalonde et il produit de belles chaussures. M. W. P. Hamilton, fils du président, est secrétaire-trésorier de la compagnie. Un autre fils, R. I. Hamilton, est actuellement au front avec le corps Vétérinaire.

#### LA CIE PANTHER RUBBER

Cette compagnie est établie à Sherbrooke depuis mai, 1914, étant la succursale canadienne de la Panther Rubber Co., de Stoughton, Mass. Elle fabrique des talons et semelles en caoutchouc pour hommes et femmes et fait de rapides progrès à Sherbrooke. On y fabrique actuellement un nouveau talon à trois tampons de frottement protégé par des brevets et qu'on espère lancer sur le marché dans une couple de mois. M. C. A. Joslin est le gérant de cette compagnie et il a beaucoup d'expérience dans cette industrie y ayant travaillé durant 25 ans. Il est chez la Cie Panther depuis 1911. Il a la direction d'une fabrique très bien outillée pour la production d'excellentes marchandises. M. Frank Bernstein, président de la Panther Rubber Co. quitte Boston pour Sherbrooke de temps en temps, ainsi que M. M. Marcus, le secrétaire de la compagnie, et M. Wm. Bernstein, le trésorier. Tous s'occupent activement du développement de leur commerce canadien.

# The City of Three Rivers

Shawinigan Falls,  
near the city

THREE RIVERS, the third city in Quebec, is the second oldest in Canada, having been founded in 1634. Its location at the confluence of the St. Lawrence and St. Maurice is most picturesque, on the main line of the C.P.R., and having connections with the Grand Trunk, South Shore, Delaware & Hudson, I.C.R. and C.N.R., besides being a St. Lawrence River port. It is one of the biggest pulp centres in America, having exports to the value of \$2,000,000 per year. The water powers in the vicinity of the city present possibilities for untold quantities of power. It has large cotton, white-wear, pulp, glove, biscuit and paper factories, iron foundries and lumber mills as well as one of Canada's large shoe factories, that of the Tebbutt Shoe & Leather Co., which is described in detail hereunder. A number of these industries operate 24 hours a day.

In 1908 the city suffered from a disastrous fire which resulted in many improvements when the place was rebuilt. The streets were made wider and an underground lighting system was installed and many of the new buildings erected were made fireproof.

Trois-Rivières, la troisième ville du Québec, est la seconde en âge au Canada, ayant été fondée en 1634. Elle occupe un site pittoresque au confluent du S.-Laurent et du S.-Maurice, sur la voie principale du Pacifique Canadien et est raccordée au Grand Tronc, à la Rive Sud, au Delaware & Hudson, à l'Intercolonial et au Canadien-Nord, tout en étant un port de mer. C'est un des plus grands centres de pulpe en Amérique, les exportations s'en chiffrant à \$2,000,000 par an. Les chutes d'eau aux environs de la ville peuvent produire une énergie incalculable. Elle possède de grandes fabriques de coton, de lingerie, de pulpe, de gants, de biscuits et de papier, des fonderies et des scieries ainsi que l'une des plus grandes fabriques de chaussures au Canada, celle de la Tebbutt Shoe & Leather Co., dont il est fait mention ci-dessous. Certaines de ces usines fonctionnent jour et nuit.

En 1908 la ville fut ravagée par une conflagration qui donna lieu à de grandes améliorations lors de la reconstruction. On élargit les rues, en enfouissant les fils électriques sous terre, et l'on construisit les principaux édifices à l'épreuve du feu.

John T. Tebbutt, head of the Tebbutt Shoe & Leather Co., whose trade-marked shoes are known all over Canada. Mr. Tebbutt is an inventor and originator of many copyrights.

Jas. S. Tebbutt, vice-president of the company, who is a practical shoe man as well as an enthusiastic military man. He has been with the firm twenty-two years.

## TEBBUTT SHOE &amp; LEATHER CO. LIMITED

ONE of the largest factories in Canada making men's fine shoes is that of the Tebbutt Shoe & Leather Co. Ltd. at Three Rivers. John T. Tebbutt, president of the company, is a practical shoeman in the sense that few other men are. He possesses in his own name seven Canadian patents relating to shoes and tools for shoes, and is the originator of many copyrights and trade designs. Mr. Tebbutt was born in Northampton, Eng., and after an education at the grammar school was apprenticed to learn to make shoes by hand. He went through the various departments which acquainted him with the proper manner of cutting, fitting and bottoming shoes by hand, and sub-

## TEBBUTT SHOE &amp; LEATHER CO. LIMITED

L'établissement Tebbutt Shoe & Leather Co., Limited, aux Trois-Rivières est une des plus grandes fabriques de chaussures de fantaisie pour hommes qu'il y ait au Canada. M. John T. Tebbutt, président de la compagnie, est un fabricant expérimenté comme il y en a peu. Il détient personnellement sept brevets canadiens se rapportant à la fabrication des chaussures et est l'auteur de plusieurs modèles et dessins brevetés. Il est né à Northampton, Ang., et au sortir de l'école il devint apprenti cordonnier. Il fit un stage dans les diverses salles de fabrication des chaussures et vint à Montréal où il obtint facilement de

Champlain  
Park

Three Rivers,  
Que.

sequently came to Montreal where he had no trouble in securing a position with the old Ames-Holden Co. Later he took charge of the factory of the late Richard Smardon, with whom he eventually went to Three Rivers. In 1894 he severed his connection with Mr. Smardon and with his brother, Jas. S. Tebbutt, also a practical shoeman, now vice-president of the firm, started Tebbutt Bros. wholesale shoe house. In February 1900 they bought out the Three Rivers Shoe Co. and began manufacturing, rapidly building up a large business through specializing in men's and boys' lines. Last year their output was over \$600,000. Their factory is one of the best equipped in the country. As an indication of Mr. Tebbutt's original methods, it may be said that he and his company are known from one end of Canada to the other by his patented lines, which include Doctor's Antiseptic waterproofed double soled and double stitched shoe; Professor Gold Cross cushion sole shoe with central soles of asbestos. He also holds the patent on a double laced hockey ball and skating ball; an aluminum steel box toe; hockey ball with ankle support and strangle hold strap, as well as an anti-acid shoe, which is made from a leather in the tanning of which no acid is used. H. Drysdale is secretary of the company.

l'ouvrage à la vieille maison Ames-Holden. Il eut plus tard la direction de la fabrique de feu Richard Smardon. Avec son frère, Jas. S. Tebbutt, lui aussi cordonnier d'expérience, et maintenant vice-président de la compagnie, il fonda la maison Tebbutt Bros., pour la vente en gros des chaussures. Au mois de février, 1900, il acheta la Cie Three Rivers Shoe et entreprit la fabrication des chaussures. Il augmenta considérablement son chiffre d'affaires en spécialisant dans les chaussures pour hommes et garçons. Le chiffre de production atteignit l'an dernier \$600,000. La fabrique est l'une des mieux outillées au pays. M. Tebbutt et son établissement sont connus d'un bout à l'autre du Canada par ses modèles brevetés, parmi lesquels se trouvent la bottine "Doctor's Antiseptic," à double semelle à l'épreuve de l'eau et à double couture; la chaussure "Professor Gold Cross" à semelle bourrée avec fausse semelles en amiante. M. Tebbutt a aussi breveté une chaussure à hockey et à patin à lacement double; un protège-orteil en acier-aluminium; une chaussure à hockey avec renfort à cheville et courroie d'appui ainsi qu'une chaussure "anti-acide" faite de cuir tanné sans acide. Le secrétaire de la compagnie est M. H. Drysdale.

# The Town of Drummondville

Bird's Eye  
View of the Town

On the first day of July, 1915, the town of Drummondville celebrated the hundredth anniversary of its existence, being founded in 1815 by Major General Frederick George Herriot. If asked to state what Drummondville was most noted for, one would be tempted to say its lack of "knockers," as almost everyone in the place is a booster and for Drummondville, too. After spending some time in the town and having learned how well it is situated from both an agricultural and industrial standpoint, one soon becomes convinced that this pride of its residents is justifiable. Situated on the St. Francis River, noted for its water power, makes it an ideal town for manufacturing purposes and having the main line of the Canadian Government railroad (Intercolonial) as well as being situated on the Foster and Drummondville branch of the Canadian Pacific, the railroad facilities of the town are unsurpassed. The growth of Drummondville up until the last few years has been of a slow and steady nature, but lately, owing to capitalists realizing its numerous facilities for manufacturing purposes, it is making rapid strides and has a number of flourishing industries, including the Drummond Shoe Ltd., Drummondville Shirt Co., the Aetna Chemical Co. of Canada. The latter firm is just completing a large plant, and within a short time expects to have over 1,500 hands engaged in the

Le 1er juillet, 1915, le village de Drummondville célébrait le centième anniversaire de son existence, ayant été fondé en 1815 par le Major Général Frédéric Georges Herriot. Si l'on demande ce qui manque à Drummondville, on serait tenté de répondre: "L'absence de pessimistes," car presque tous ses citoyens sont optimistes à l'égard de leur municipalité. Après avoir constaté la belle situation, au point de vue industriel et agricole, dont elle jouit, l'on se convainc que ses citoyens ont bien droit d'en être fiers. Ce village située sur la rivière S.-François, connue par ses pouvoirs d'eau, est un endroit idéal pour l'industrie. Il est sur la voie principale du chemin de fer du Gouvernement (l'Intercolonial) tout en étant desservi par l'embranchement Foster-Drummondville du Pacifique Canadien, les facilités de transport ici sont insurpassables. Jusqu'à ces années dernières le développement de Drummondville a été lent et peu sensible, mais dernièrement les capitalistes ont compris quels avantages ce village offrait à l'industrie et il fait de rapides progrès maintenant avec ses fabriques florissantes, dont la Drummond Shoe Limited, la Drummondville Shirt Co., la Aetna Chemical Co. of Canada. Cette dernière achève de construire une grande usine où, avant long-temps plus de 1,500 personnes seront employées la fabrication d'explosifs.

O. Brouillard, M.P., President of the Drummond Shoe, Limited, who has done much to advance the highest welfare of Drummondville.

George A. Fortin, Vice-President and General Manager of the Company, who is a thoroughly competent and practical shoe manufacturer.

manufacture of explosives. With these facts and many others in mind, the people of Drummondville can truly say they have a population of 4,500, and it is increasing daily.

En vue de ces faits, et de plusieurs autres, les citoyens de Drummondville peuvent bien dire qu'ils ont une population de 4,500 et qui augmente constamment.

#### DRUMMOND SHOE, LIMITED.

DRUMMOND SHOE, LIMITED was reorganized about two years ago, taking over the business of the O. B. Shoe Co. Mr. O. Brouillard, M.P. for Drummondville and Arthabasca, and well known throughout the province for his extensive lumber interests as well as being prominently identified with the progress of Drummondville, is president. Mr. Brouillard, like most successful business men, believes in having a capable man associated with him. This led to Mr. Geo. A. Fortin joining the firm as vice-president and general manager. The latter is a true son of Quebec Province, having been born in the Eastern Townships, removing to Montreal at an early age with the intention of taking up a profession, but after completing his course at Laval University, felt that commercial life was the one most suitable to him, so became engaged in the retail shoe business in Montreal. Afterward, with the idea of entering the manufacturing end of the shoe business,

#### A. L. DRUMMOND SHOE LIMITED

La Drummond Shoe Limited a été réorganisée il y a deux ans environ, acquérant alors le commerce de la O.B. Shoe Co. M. O. Brouillard, député de Drummondville et Arthabasca, et bien connu dans la province par ses grandes propriétés forestières, en est le président. Il a été beaucoup mêlé au progrès de la municipalité. Comme la plupart des hommes d'affaires qui ont réussi, M. Brouillard croit à l'appoint d'un homme capable dans ses entreprises. C'est ce qui a entraîné l'entrée de M. Geo. A. Fortin dans la Compagnie, comme vice-président et gérant-général. Ce dernier est un vrai fils de la Province de Québec, étant né dans les Cantons de l'est, puis étant allé tout jeune à Montreal dans le but d'étudier une profession, mais après avoir terminé son cours à l'Université Laval, il se sentit plutôt porté vers le commerce et s'engagea dans le commerce des chaussures à Montréal. Plus tard, dans le but de s'occuper de la fabrica-

Another Glimpse  
of the Town

Drummondville,  
Quebec

he accepted a position with the Regina Shoe Co., working his way up from a minor position to that of factory superintendent, also becoming a shareholder in the company. Later, severing his connection with this firm, he became one of the principals in the Scout Shoe Co., Montreal, leaving this firm to assume the position of general manager of the Drummond Shoe Ltd. The splendid progress which this firm has made during the past year in spite of adverse trade conditions is due to the progressive policy which Mr. Fortin adopted. Realizing that permanent success lay in giving good value, he decided to specialize in "The Drummond" men's Goodyear welt to sell at \$4.00 and \$5.00. Besides this, the firm makes "The Drummer Boy," a Goodyear welt for boys. The factory proper is a bright commodious building 45 x 100, situated on the bank of the St. Francis. It is a brick building of three storeys with an additional building for an office 35 x 60 feet. The power house situated in the adjoining building covers a space 40 x 60 feet.

tion, il accepta une position chez la Regina Shoe Co., s'élevant d'une position inférieure à celle de surintendant et devenant actionnaire dans la compagnie. S'étant ensuite départi de sa position, il fut un des principaux intéressés dans la Scout Shoe Co., de Montréal, quittant ensuite cette maison pour accepter la position de gérant-général de la Drummond Shoe Limited. Le brillant progrès réalisé par cette compagnie l'année dernière malgré la situation financière contrariante est dû à la politique progressive suivie par M. Fortin. Comprenant que le succès stable ne vient qu'à la suite d'une bonne valeur donnée, il décida de spécialiser dans le modèle "Drummond" trépointe Goodyear pour hommes, se vendant \$4.00 et \$5.00. Outre cette marque la compagnie fabrique "The Drummer Boy," une trépointe Goodyear pour garçons. La fabrique est un édifice bien construit, 45 x 100, situé sur la rive du S.-François. C'est un édifice en briques à trois étages avec une construction séparée pour les bureaux mesurant 35 x 60 pieds. L'usine d'énergie située dans un édifice voisin couvre un espace de 40 x 60 pieds.

### MANY EASTERN SHOEMEN ENLISTING

Boot and shoe dealers in St. John, N.B., "the City of the Loyalists," have good reason to be proud when they consider their valuable contribution to the Empire in the present great crisis. Members of this profession have responded nobly to the call of their country and have in the ranks of the Canadian Contingents a fine representative quota of men. Successful young proprietors, senior and junior clerks and men in other capacities in the "leather district" have joined the colors and gone forth to battle and to conquer the common foe.

A recent issue of the Canada Gazette contains the name of a well known and successful young boot and shoe dealer, Percy Johnson Steel, who has been appointed provisional lieutenant (supernumerary). Mr. Steel donned his suit of khaki recently and left with several other young men for Halifax, where he will commence a course of studies in the Royal Military Training School.

After nine hard years of work building up a good business and winning the confidence of a large number of patrons, this young man heard the call for more men and moved by the spirit of patriotism, decided to sell out and share the perils of the defenders of the grand "Old Union Jack." He is a son of Rev. George Steel, superintendent of Methodist Missions of New Brunswick and Prince Edward Island.

After graduating from St. John High School, Mr. Steel entered the employment of James V. Russell, at that time a successful boot and shoe merchant in the north end—now Commissioner of Harbor and Ferries—and there learned the fundamentals of the leather business. Four years later he accepted a position as head clerk with William Young, and later purchased the business and has since met with marked success. Instead of selling out as intended, he decided to entrust the management of his affairs to his senior clerk, Frank W. Merrill, who will continue at the same stand. Mr. Merrill will be assisted by Miss Josephine Armstrong, who has had several years experience in this line. Mr. Steel's patrons appreciate the patriotism and sacrifice he is making, and with such a genial and competent manager, the business promises to continue as heretofore.

As far as is known St. John will not be represented this winter at the annual mid-winter inspection of styles that took place in Boston. There is a feeling among local salesmen that the trip is not necessary, as representatives visited similar inspections and sales during the fall. There is a feeling of cheerfulness among the merchants owing to an exceptionally good trade during Christmas and New Year's weeks.

### HOW MODERN SHOE IS BUILT

Here are the processes of construction on a shoe from the cutting room to the shipping room. The various items appear on the cost sheet of a representative factory and affords some idea of the complexity of the modern shoe.

#### Fitting Room—Sixty-five Operations

Putting in labels; putting in top bands; trimming linings and top bands; folding linings; making linings; skiving linings; staying back not welted; sewing or pasting back; rubbing or pressing; welting or closing back; lining vamp; stitching tips; pieces on vamps; pasting tips; pinking or binding; perforating; folding; marking zigzag; staying 3-4 foxing; pieces on 3-4 foxing; rubbing 3-4 foxing; closing or lapping sides; inspecting; tacking for laster; buttoning; barring; second trimming; making toe seam; stitch tails; trimming ends; vamping; trim and size for vamps; pasting and stitching linings; tacking buttons; trimming buttons; sewing buttons; marking buttons; pressing buttonholes; finishing buttonholes; working button-

holes; locating buttonholes; trimming; stitching edges; hand pasting; machine pasting; second closing; fly stay lining; braid and strap quarter; paste snipping; stitching foxing; perforating foxing; sewing back of foxing; stitching back stay; fold quarter over; stitching top of Jersey loop; fold quarter; trimming fly lining; staying fly; pasting fly lining; pressing or rubbing; first closing; Calif. welt; pieces on cloth; skiving; closing covers.

#### Lasting Room—Twenty-eight Operations

Laying out work; giving out lasts; tacking on insole; side lasting; pull over machine; ideal machine; trim uppers; stapling; tack pulling; inseaming; knocking out tacks; trimming welt; beating welt; sorter; bottom filler; cement bottoms; sole layer; turning up channels; stitching; shank skiver; shank breaker; seat nailing; randing; cementing; turning down channels; first wheeling; leveling; heeling.

#### Bottoming Room—Twenty-one Operations

Seat rounder; pounding seats; heeling; slugging heels; trimming heels; breasting heels; scouring heels; trimming edges; fudge; scouring breast; inking and setting edges; third wheeling; waxing heels; sandpaper; cuffing; burnishing bottoms; rolling bottoms; burnishing heels; bottom wheeling; seat wheeling; pulling lasts.

#### Finishing Room—Four Operations

Stamping; sock lining; buttoning; cut covers.

### HAMLET AND CREDIT QUESTION

To send, or not to send—that is the question—  
Whether 'tis better to retain the goods  
And so make sure of what is in possession,  
Or let them go and run the risk of payment.  
To send—to part with them—perchance to lose,  
To lose, perchance the lot, ay, there's the rub,  
For once they're gone, what skill can charm them back,  
Or get the cash from slippery debtors?  
What will be done when the account falls due,  
Will cash be paid, or e'en post-dated check,  
Or promise to remit be quickly made, to be as soon forgotten?  
And then reminders—much like Thunar's blows—  
Softly at first, though each with added force,  
Yet no response, not e'en a cent, nor plaintive plea for time.  
Will then "a meeting" end suspense—and hope?  
A meeting packed, forsooth, with kinsmen dear,  
All bent on proving claims for money lent,  
Yet solaced by a shilling in the pound,  
And that lean pittance fast in lawyer's grip,  
Leaving us naught but sad experience.  
Thus memory doth make cowards of us all;  
And thus the growing need of orders  
Is sicklied o'er with the pale cast of thought,  
And business of great pith and moment  
With this regard is sadly turned away,  
Losing, perchance, great profits.

### CLEVER SHOE WINDOW

A western shoe merchant recently displayed a unique shoe combination. Fluttering from a flag pole was a silk flag kept in motion by an electric fan concealed amid autumn foliage. There was a good showing of the latest novelties in women's footwear, and set in the midst was a card with the catchy verse:—

The best flag that floats is the red, white and blue;  
It's a five-dollar value for three and a half.  
It comes in all leathers from kid to plain calf—  
The best make of footwear our lady's new shoe.

**ASSOCIATION RE-ELECTS OLD OFFICERS**

The annual meeting of the Toronto Shoe Retailers' Association was held this week, with a good attendance. Encouraging reports covering the past six months that the association has been formed, were presented by Secretary Ed. Cook and Treasurer J. C. Budreo. The finances are in fine shape and the membership is at present 118, which is a splendid showing. It was the desire of the officers, who have officiated during the past six months, to retire and give way to other men, but the rank and file would not listen to any such proposal, and unanimously decided that the present efficient and energetic occupants should hold sway for another term. The only changes made were in the members of the executive.

Those who will direct affairs during 1916 are:—

President, H. C. Blachford.

Vice-President, Walter Burnill.

Secretary, Edward Cook.

Treasurer, J. C. Budreo (all of the foregoing being re-elected).

Sergeant-at-Arms, J. H. Shinnick.

Executive Members, F. A. Guinivan, C. L. Owens, John McCullough, S. B. McCall and J. W. Jupp.

Further plans were discussed for the big banquet, which will be held on Thursday, February 24th, at the St. Charles Hotel, when it is expected that every retailer will attend, and that representatives from all the wholesale and manufacturing branches of the trade will also be present. There

will be several instructive speeches, and an energetic committee has the arrangements in hand. This will be the first social gathering of this live association and every effort is being put forward to make the event a brilliant success.

**DO NOT ENCLOSE MONEY**

This journal has received frequent complaints during the past few months, of money remittances that were sent to us going astray. It is never safe to enclose money, remittances should be made by registered mail or by postal or express order. The following item from a Toronto paper may explain why some letters enclosing cash alleged to have been sent have not reached us. This postman delivered mail to the Acton Publishing Co.

**FOR THEFT OF LETTERS**

The theft of three letters, two of which contained money, was admitted by Frederick C. White, until recently a letter-carrier at Station C. He was sentenced to three years in the penitentiary yesterday, the Police Magistrate remarking that that was the least penalty he could give under the circumstances.

Don't entertain the idea that you have "learned the business." There is always something new to be learned and many a business man who thinks he knows it all can be taught new tricks of the trade by his clerks.

**THE WIDE-AWAKE STAFF OF AN EASTERN WAREHOUSE**

E. E. CODE, OTTAWA

A. D. KIPPEN, OTTAWA

F. W. BURRILL, OTTAWA

E. E. Code, who is manager of the Ottawa branch of the Kaufman Rubber Co., is widely known to the shoe trade in that district. When the office was opened some eight years ago he took charge and has since directed affairs progressively and satisfactorily. Previous to getting into the rubber game, Mr. Code was for twelve years with A. W. Ault Co., wholesale shoes, Ottawa, and gained a wide connection. He is an energetic and aggressive manager and has the art of making friends. Associated with him are F. W. Burrill and A. D. Kippen. Mr. Burrill was with L. H. Packard & Co., Montreal, for twelve years and was afterwards with the Canadian Consolidated Rubber Co. for four years.

At the beginning of 1916 he joined the Ottawa force of the Kaufman Co. He is a hustler after business and always on the alert. Mr. Kippen has travelled out of Ottawa for five years for the Kaufman Co. and previous to that was with the Sultana people for a couple of years. He is a competent and painstaking roadman who wears well with the trade. W. C. Code, a brother of the manager, is stock keeper and has been with the Ottawa branch for a long time. He was with A. W. Ault Co. for eight years. The Kaufman Rubber Co. carry a large stock at the branch in Ottawa and ably look after not only the Ottawa Valley, but the northern part of Ontario, including Cobalt.

### ENTERPRISING FIRM BRANCHES OUT

McArthur, Irwin & Co., Montreal, have just acquired of the warehouse next to their present location which gives them an extra 22,000 square feet of space. They now occupy all of the numbers from 1 to 31 St. Paul street west.

JOHN IRWIN, MONTREAL

Announcement is made that they have arranged to occupy an entire four stories and basement building of their own at 46 Colborne street, Toronto. The growth of their business in the West has made it necessary to take this step. Remarkable progress has been made by this firm under the management of John Irwin, Vice-President and Managing Director, who is one of the most aggressive executives in the manufacturing and importing field. At an early age he

received the major portion of his business training with Brandran-Henderson & Co., for whom he was assistant manager in Montreal.

### WONDER WHERE MONEY HAS GONE

Winnipeggers who are interested in Wisconsin Rubber Company have arranged for a meeting. This company was organized about 15 years ago and a number of Winnipeg people became interested. Upwards of a million dollars were put into the undertaking and hundreds of thousands of rubber trees were set out on the Mexican plantations. Poor management and the Mexican revolutions interfered with the success of the undertaking and Winnipeg people now want to know where they are at. The return of peace in the country gives room for hope that something may now be done to produce dividends for the investors.

### A CLERK'S TIP ON SHOE FITTING

A clerk recently related the following interesting incident:—"A customer entered the store and going over to the men's department informed me that he wanted a Russia calf bal. boot made over an English last, stating at the same time that he had just given away a pair of English last shoes because they did not fit his feet.

"I found a style such as the man asked for and as I unlaced his shoe I looked at his feet and found that he had been wearing a shoe too short, and also that his foot was not suited for an English last shoe. I asked my customer if he was troubled with his feet and he remarked, 'All the time.'

"'Well,' I observed, 'if you have no objection, I would like to show you a shoe that I think you should wear.'

"He remarked, 'I am always willing to be shown.' I selected a shoe with a medium raised toe, made of glazed kangaroo leather, ooze lining, medium heel and fitted to the customer. As the man walked in the shoe he said: 'You have made a sale.'

"My customer was hardly out of the store an hour before he brought in a friend to purchase a pair of shoes like those which I had sold him.

"The moral of this is—always look at the shape of a person's foot when you go to measure him for a pair of shoes.

# RUBBER SELLING SEASON STARTS FEBRUARY 28th

**Companies Preparing for an Active Season—Cost of Raw Materials is High—Question of Prices Not Yet Settled—Coming Year's Harvest Will Be One of the Biggest Yields on Record—Some Interesting Figures on Production and Quotations**

The rubber shoe selling season, which usually opens on March 1st and continues for that month and April, during which placing orders are given and the trade thoroughly covered from one end of Canada to the other, will open a little earlier this year. By mutual agreement it has been decided that the selling season will start on Monday, February 28th, and it is understood that various rubber footwear organizations are now getting ready in preparation for the selling period.

## Top Notch Figures for Output

It is likely that the world's production of crude rubber during the current year will establish a new high record at 175,000 tons dry weight, worth over \$260,000,000. The value of rubber is a fluctuating quantity, but it does not seem extravagant to estimate the average wholesale price for the current year at 75 cents per pound.

Approximately 131,000 tons of crude rubber were gathered throughout the world last year. Compared with 1914 this is an increase of about 25 per cent. and a gain of about 138 per cent. over the 1910 production. With the incentive to increased production supplied by advancing prices, the 1916 yield ought to be at least one-third larger than 1915, or 175,000 tons, divided as follows: 127,000 tons plantation, 36,000 tons Brazilian, and 12,000 tons of miscellaneous origin.

For the first ten months of 1915, crude rubber prices in New York were comparatively stable. The average price of plantation for the period was about 60 cents a pound and of Brazil rubber 80 cents a pound. Towards the year-end, however, the market began to soar, reflecting fears of submarine depredations upon rubber-laden steamers, and plantation rubber is now up to \$1.06 a pound and Brazil to about \$1. As the big American consumers of rubber buy several months ahead, it is apparent that they are still working on lower priced rubber. Even \$1 a pound, while it represents an advance of 30 per cent. or 40 per cent. for the year, seems low when contrasted with the average prices in 1910 for the two grades, viz., \$2.18 for plantation and \$2.75 for Brazil.

In the table following appears the 1915 and 1914 production in comparison with the 1910 figures:

	1915	1914	1910
World's production ton* . . .	131,000	105,000	55,000
Plantation . . . . .	95,000	68,000	8,000
Brazilian . . . . .	27,000	28,000	32,000
Other kinds . . . . .	9,000	9,000	15,000

\*Dry weight. Brazilian rubbers shrink over 20 per cent.

Plantation is practically dry weight.

Average prices over the past dozen years follow:

	Planation.	Brazil.
1915 (up to November 1) . . . . .	\$.60	\$.80
1914 . . . . .	.58	.90
1913 . . . . .	.75	1.14
1912 . . . . .	1.18	1.50
1911 . . . . .	1.36	1.56
1910 . . . . .	2.18	2.75

## Sorting Business Has Been Good

The sorting business in rubbers has been particularly good so far this winter, owing to the slushy weather and

frequent rains. Whether there will be an advance in prices this season it is impossible to tell. Raw rubber has been scaring to quite a high figure but has been coming down again, making it difficult for manufacturers to know exactly where they are at. There has been no advance in prices recently issued in the United States, and, perhaps there may be no increase in Canada, but this matter will not be decided until some time in February when new price lists will be prepared. For some years now no special discount has been given merchants for early placing, and it is not likely this system will be changed.

## THE SECRET OF PATENT LEATHER SHOES

Patent leather shoes are the logical answer to an insistent demand.

In order to fully realize the position held by patent leather shoes in the shoe merchandising world we have done a little investigating.

We started first with the shoe manufacturers, and the results of our enquiries to them gave us a viewpoint which may well be sized up as follows:

"We do not want to make patent leather shoes, but our salesmen insist that we give them patent leather shoes to enable them to sell shoes made from other leathers, and we find we have better results working with our traveling men than we obtain when we cross them or attempt to educate them."

Having obtained a decided expression from the manufacturers, we naturally took the lead given us and interviewed several salesmen, and as the greater number of them gave the same reason we quote literally from one:

"You ask why I carry patent leather shoe samples. Why, man, why do the six best sellers illustrate their books? These pictures and the printing of them cost a lot of money, but they are necessary to sell the books, and patent leather shoes are necessary to sell any line of women's fine shoes. Who would dream of showing novelty goods without using patent leather for the demonstration? Why, the reason I carry patent leather shoes is that it makes my commission account larger, and makes the business of selling easier."

Next we walked with the shoe buyers, and they said their reason for buying patent leather shoes is that they have to carry them to make their line complete and up-to-date; that customers who cannot be supplied with the newest novelties are liable to place their patronage elsewhere. The window dresser admits that patent leather shoes are necessary to the artistic display of footwear, especially when dressing the window to show up the latest styles and novelties.

For our final inquiry and argument we went to the consumer, and the result of several interviews might well be expressed by the following from Keats: "A thing of beauty is a joy forever." Not one out of ten well dressed women will say anything against patent leather shoes from the point of appearance.

Unfortunately for the perfect solution of the problem, manufacturers have been working along the line of so-called efficiency (or speed at any price), and they have not advanced in craftsmanship as rapidly as the leather producers.—The Shoeman.

# RUN A SUCCESSFUL SALE—MAKE THINGS “HUM”

Several Things Should be Considered—The Way to Arrange and Mark the Stock, Conduct the Advertising and Handle the Salesmen—Good Energetic Plan to Have Something Else Than Mere Bargains to Stimulate the Public Interest

The merchant should have a definite reason for having a sale and he should plan his sale to secure definite results.

It may be advisable to have a sale to keep up the buying interest of the community during a dull period. It may be necessary for the merchant to raise money to pay his bills. It may be a good plan to reduce stocks or to clear up odds and ends of broken lines. There are many legitimate reasons why a sale should be put on.

The ultimate object of the sale will in a measure regulate the manner in which it is advertised and in the way it is handled. If it is a clearance sale, out and out, prices will have to be made the most alluring point of the advertising. If it is not to reduce stock and get rid of old lines some other reason for the sale must be given and the advertising and conduct of the sale regulated accordingly.

In the smaller places the usual cause of a sale is the overloaded condition of the stock. This necessitates a clearance sale. We will, therefore, outline a plan for a clearance sale.

## What Have You Got to Sell

The first thing to be considered is the merchandise to be sold. It is folly for a merchant to put on a clearing sale and then sell his best lines at a reduction and hang on to his poorer goods. Get rid of the odd lines, broken lots, and undesirable merchandise. That's what the sale is for.

Take time to go through the stock and reduce the prices according to the value of the stock to the public. An article that is not wanted very much must be reduced very much, a more desirable article need not be cut so close, and so on. Make the price low enough to sell the goods, but no lower. Get all you can out of the sale.

The goods ready for the sale, it is then necessary to decide when the sale will be started. It is better to start a sale near the end of the week than on Monday. Saturday is the best day of all, Thursday comes next, Friday is no day at all.

In planning the starting date allow enough time to get the advertising done and the goods properly marked and displayed.

The length of time to run a sale is important. It is a good plan to run a sale just as long as there is enough interest in it to make it profitable. The writer remembers a sale in a shoe store where the sale was advertised for a month. The interest in the sale was dead inside of two weeks, but the merchant kept his bargains out on his tables and sat around and wondered why the people did not buy them. The fact was, this merchant had put out his worst stuff, and some of it was pretty bad, and had held his better stuff back. This was not a good plan as a little reasoning will show.

## Make First Few Days Attractive

The first few days of the sale will determine its success or its failure. If it does well and the people are satisfied the merchant is giving them good values the sale will last much longer because of the mouth to mouth advertising it will get. If it is found that only undesirable stuff is being offered, and at unattractive prices at that, the mouth to mouth advertising will kill the sale. Therefore the merchant should make the first few days of the sale the most attractive of the whole.

No sale will be a success unless the merchant tells a large number of possible purchasers that he is having a sale

and cutting prices. To accomplish this he advertises. This is usually by newspapers, circulars sent through the mail and delivered by hand, and from house to house distribution of hand bills.

A good half-page, or full page newspaper advertisement will serve as well for the circulars and handbills thus saving time in writing special copy.

A good name means a great deal to the sale. A number might be mentioned:

Unloading Sale. Cyclone Sale. Clean Sweep Sale. Public Benefit Sale. Rummage Sale. Keep Busy Sale.

It is not necessary to mention more, the trade journals are full of them. The advertising of the sale should follow the name. For instance, an "Unloading Sale" might be advertised by having cuts of a wagon dumping goods into the street, or store. A "Clean Sweep Sale" can be advertised by having the broom in evidence. A "Cyclone Sale" by showing a whirling lot of goods and referring to the whirlwind of cut prices, etc.

The different lots of goods should be separated and divided into classes and advertised in that way. Goods suitable for men, for women, for boys, etc., goods suitable for the furnishing of the home, for the table, etc., should be advertised separately.

All newspapers that will reach a store's possible customers should be used as freely as possible for advertising the sale. Then the circulars and hand-bills should be mailed and delivered to those the newspapers do not reach.

Where advertising matter is to be distributed from house to house, see that it is properly distributed. It does not pay to have half of the lot thrown in under sidewalks, or burned up on the commons. It pays well to give a good price to have them distributed properly from house to house. It pays not at all to have poor distribution.

It is a good plan to have something besides the mere list of "bargains" to bring people who might buy to the store. The following has been worked successfully a great many times.

Offer three or four prizes, merchandise or cash, for the best guessers in the locality. A merchant had a red tag sale. He advertised it by having all the advertising in the form of tags. Upon those he distributed by mail and from house to house, he had the following announcement:

## Guessing Number of Sales Checks

"\$25 in gold free to the persons guessing the nearest to the number of sales checks during the day of the sale. Sign your name to the coupon below, bring it to the store during the first week of the sale and deposit it in a special box we have prepared for it. After the sale is closed these estimates will be taken out and the nearest guessers given the prizes. Nearest guesser will be given \$10, second nearest guesser will receive \$7.50, the next \$5 and the next nearest \$2.50. You have a chance to win one of the prizes. You do not have to buy anything to guess. But one guess to a person."

The coupon read as follows: "My estimate of the number of sales checks at your tag sale is ....."

Name.....

Address.....

These coupons were used in large numbers and brought the people to the store to deposit them in the box. The

object was to get the people into the store. The object was accomplished. Something of this nature is a good feature of a sale. If the people are brought into the store the merchandise and the salesmen are supposed to do the

The merchant should keep up interest in the sale by introducing every day something different, by injecting some feature that will attract attention and attendance at the sale. One of the easiest methods is to have an hour sale, a half-hour sale, or several 5-minute sales in different parts of the store at certain hours. These can be made to help bring out trade in the mornings also.

Unless interest is kept up the sale will gradually die out. There must be a continual hurrah! to keep both the customers and the clerks enthused to a point where sales are consummated.

#### Take Pains to Show the Lines

The appearance of the store has a great deal to do with the success of a sale. If a patron goes into the store and finds there is no extra effort made to show the goods, no sign of a sale, she loses all interest at once. It will pay to jumble things up a bit. Change the entire appearance of the store, get out a lot of bargain tables, show lots of goods, have big price cards, make the public believe in the sale. That means a great deal.

If necessary, extra clerks should be hired. Many can be secured for the opening days. If the interest keeps up, keep up the staff, when it lags drop the extras and make the regular forces work like beavers.

Give some extra special bargains as leaders, both at the start of the sale and at the hour and half-hour sales. These leaders are a wonderful stimulant to a sale.

Unless a merchant is prepared to keep interest up in his sales he had better not advertise a date of closing. Then he can drop the curtain as soon as it is seen that the interest of the public in the sale is dead.

Another word of advice, in conclusion. When the sale is over, clear up the debris. It is a great mistake to allow bargain stuff, shown at the sale, that still remains unsold, to be left around for the customer to maul over. If it did not sell at the sale, the price was not right. It would be allowable to have the worst of these shown at a greater cut in price. But the best plan is to put them away for a time and allow no signs of the sale to remain in sight. These near bargains create a very bad impression, avoid that.

#### MAKING MONEY ON NOVELTY SHOES

"Novelties create a greater desire to buy, so let us stick to them so long as we safely can," remarked W. S. Dick, at a recent meeting of the Rochester Retail Shoe Dealers' Association. "Novelties have made a radical change in the shoe business of to-day. Just a short time ago they were considered a dangerous investment, and we all thought we would have to dispose of them at a much larger percentage of profit than our staple shoes. To-day they appear to be quite a fixture and a safe investment, as they not only allow us a good margin of profit but, in addition, are making a rapid increase in our business due to the frequency with which women are buying them through fashion's demand. The average woman to-day is purchasing two or more pairs of shoes where two years ago she bought but one pair, and this is due to style demand. So for these reasons I believe we ought to encourage a continuation of them in every way, as we can now class them with our so-called bread and butter numbers if bought intelligently and turned as rapidly as they have been turning for some months."

Another shoeman who takes a similar view is E. Johnston, of Racine, Wis., who says that he has done the best trade in 1915 that he ever has in the last ten years and the reason for such a satisfactory showing is novelty shoes, which he declares are a "god-send to the trade."

"It is a fact that shoes are being worn more and more for style and less for durability. That is why style sells the shoe. From this it naturally follows that he who is first with the styles will get the cream of the trade."

#### VETERAN LEATHER MERCHANT EXPIRES

Canada's oldest leather merchant and one of the most esteemed and honored business men in Toronto, passed away this week, in the person of Charles Parsons. Up to a few weeks ago he had enjoyed excellent health and, although in his 87th year, was to be found every day at the warehouse, 79 Front street east, Toronto. Mr. Parsons was engaged in business for over sixty-five years—a most remarkable record.

He was born at Thornhill, Ont., in 1828. The village of Thornhill was named after his mother, whose maiden name was Thorne. The Thorne family, which is probably one of the oldest in the Province, established a milling and tanning business at Thornhill, with branches at Holland Landing and Niagara-on-the-Lake, when those places were much more important commercially than they are to-day.

While in his 'teens, the late Mr. Parsons entered into business with his father, and in 1849, on attaining his majority, he and his brother John established a distributing warehouse for leather in Toronto, under the firm name of J. & C. Parsons. This warehouse was situated at the corner

THE LATE CHARLES PARSONS, TORONTO

of King and George streets. A few years later they removed to the present location of the firm, 79 Front street east. The firm afterwards became Thorne, Parsons & Vennor. On the death of Mr. Vennor another change took place, the style being Thorne & Parsons, Richard Thorne later succeeding his father, William Thorne, as a member of the firm. In 1875 Mr. Thorne retired, and for some years Mr. Chas. Parsons conducted the business alone. Then the present head of the firm, Mr. Wm. G. Parsons, joined his father and since then the business has been conducted under the title of Chas. Parsons & Son, Limited.

The family surviving are as follows: Wm. G. Parsons of Toronto, Chas. S. Parsons of Parsons, Brown & Co., Toronto; Mrs. (Dr.) L. La Fetra of New York City, Mrs. J. M. Davison of Roxborough street east, Mrs. E. Read of Lipton, Sask., Mrs. W. H. Kertland of Toronto, and the Misses Frances and Kate Parsons at home.

# AMONG THE SHOE MEN.

The Winnipeg Moccasin Co., of that city, has discontinued business.

John Snider, harnessmaker, of Brucefield, Ont., has installed a shoe repair outfit.

A. Brandon, the Brandon Shoe Co., Brantford, Ont., was in Toronto last week on business.

Wm. Davis, who represents Jackson & Savage, Limited, Montreal, is spending a few weeks in Winnipeg.

The Rock Shoe Manufacturing Co., Quebec, have gone into liquidation.

James Heffering, Toronto, spent a few days recently in Montreal on business.

Fire broke out recently in the shoe store of Honeyford & Vernon, Ltd., Collingwood, Ont., and before the flames were extinguished, the entire stock, valued at about \$14,000, was practically wiped out. The blaze, which started at one o'clock in the morning, originated in the rear stock room, and had gained considerable headway when noticed. How it started is a mystery. The loss is partly covered by insurance.

T. H. Bigwood, who was formerly in the shoe business at 826 Yonge St., Toronto, is opening up a new store at 492 Bloor St. West, where he has attractive premises and has laid in a neat stock.

George Chambers, manager of the Regal Shoe Store, Toronto, has returned from a business trip to Rochester and Boston, where he picked up all the newest ideas in spring foot toggery.

Adair & Van Vleet have started business as manufacturers of moccasins in Winnipeg.

F. A. Guinivan, proprietor of the Walk-Over Boot Shops, Toronto and Montreal, spent the past week in Buffalo, where he attended a large convention of the Walk-Over representatives from all parts of the United States.

Toronto Shoe Retailers' Association have decided to hold a banquet on Thursday, February 24, at the new St. Charles Hotel, corner Richmond and Bay Streets, Toronto. It is expected that there will be a large and representative attendance, not only from the retail ranks, but also from the manufacturing and wholesale branches as well. This will be the first social gathering that the members of the association have held since their organization was formed last year, and there will be several short, well-timed speeches by a number of leaders in their line. The details will be fully arranged within a few days. In the meantime all members of the trade are requested to keep this date open.

S. Spencer, of Hamilton, formerly manager of the Cash Shoe Store, that city, has opened a new store at 319 King St. East, Hamilton.

J. B. Douglas, shoeman, Calgary, was in Toronto, Montreal, St. Stephen, N.B., and other places recently on a buying trip.

C. L. Owens, manager of the Royal Shoe Co., Toronto, has returned from a business trip to New York and other eastern shoe centres.

Among the buyers who recently paid a visit to the factory of Getty & Scott, Ltd., Galt, Ont., and were entertained by the firm, were H. G. Hodgins, of Chatham; R. J. Kidd, of Robt. Neill, Peterboro; Mr. Fryer, of C. C. Begg, Collingwood; E. C. Scarrow, of Owen Sound, G. C. Locke, of Calgary, and others.

J. J. Bourinot, dealer in shoes and men's furnishings,

Port Hawkesbury, N.S., has enlisted for overseas service and the business is being looked after by his father, J. C. Bourinot.

George A. Fortin, manager of the Drummond Shoe, Limited, Drummondville, Que., was in Toronto recently on a visit.

Cecil A. Culbert, dealer in shoes and men's furnishings, South Porcupine, Ont., has been re-elected a councillor for the third consecutive time for the township of Tisdale.

W. H. Miner, president of the Miner Rubber Co., Granby, Que., R. R. Macaulay, secretary and F. H. Meinzer, sales manager, Montreal, were in Toronto last week on business.

Clarke & Clarke, Ltd., of Toronto, have sent out to the trade an interesting New Year memento, in the shape of their annual diary, entitled, "Lest We Forget." This work which has been issued for years, is exceptionally well gotten up, and is very convenient for many purposes.

The Ryan-Devlin Shoe Co., Winnipeg, who have for many years been located on Main Street, intend moving early next month to Portage Avenue, where they will be doing business in the Paris Building.

R. W. Ashcroft, advertising manager of the Canadian Consolidated Rubber Co., Montreal, has just been appointed publicity manager for United States Rubber Co., New York, one of the choicest advertising positions on the continent. While Mr. Ashcroft goes to New York, he will continue acting in an advisory capacity for Dominion Rubber System.

Lorne L. Miller, who has been engaged in the real estate business in Aylmer, Ont., for some years, recently purchased a shoe business in Royal Oak, Michigan.

Ludger Laliberto, shoemaker, of Montreal, died recently on his way home from work. He had a shop on St. Timothy street.

Hugh McLean, an old resident of Niagara Falls, Ont., died recently in his shoe store, Main street, that city. He was 71 years of age and heart disease was the cause of death. He was born in Scotland, came to Canada when a young man and had always made his home at Niagara Falls. For many years he kept a shoe store in the north end of the city. Besides a wife, he leaves three daughters and four sons.

In a fire which recently visited the Joynt Building, corner Wellington and Sherbrooke streets, Ottawa, the shop of H. Chamberlain, shoemaker, was considerably damaged.

Francis X. Sussey died recently in Fredericton, N.B., aged 78 years. For the greater part of his life he carried on the business of a shoemaker.

The new factory of the Owen Sound Shoe Manufacturing Co. will be located in the Pacific Hotel building, Owen Sound. The work of remodelling the structure has been begun by Mr. W. E. Wilson and will be pushed rapidly to completion. The necessary equipment has been ordered and everything is progressing satisfactorily.

J. T. Lawson, shoe retailer, 1723 Scarth street, Regina, who some months ago bought the fixtures and took over the lease of the Parrott Shoe Co., at 1847 Scarth street, and has been conducting the two stores since May last, recently moved all his stock to 1847 Scarth street. Mr. Lawson has been in business in Regina five years and has worked up a splendid trade in the capital city of Saskatchewan.

The appeal case of J. H. Porter, former shoe merchant of Toronto, but now of Winnipeg, came up for hearing before the Appellate division at Osgoode Hall, Toronto, Jan.

10th. The appeal was against a recent conviction of Judge Winchester, county judge, on a prosecution, under section 417 of the Criminal Code, on the ground of the defendant being a trader involved to an amount exceeding \$1,000, and unable to pay his creditors in full, did not keep books of account according to the usual course of trade or business. Judgment was given quashing conviction of the county judge.

A. E. Crick, who for several years has been traveler for the Washington Shoe Co. out of Seattle, and is a former resident of Calgary, has joined the staff of A. McKillop & Co., wholesale shoe dealers, Calgary. He will cover southern Alberta and south western Saskatchewan.

F. M. Stanley & Co., dealers in boots and shoes, dry goods, groceries, etc., Sidney, Man., have discontinued business and G. F. Goulding has taken over the business.

J. W. Arrowsmith, of the Arrowsmith Manufacturing Co., Morristown, N.J., was in Toronto last week on a visit to the Canadian plant at Niagara Falls, Ont., Elmer Poyer, who has been manager of the Canadian end, is being transferred to the south.

Percy J. Milburn, representative of the Marlatt & Armstrong Co., Limited, tanners and leather merchants, of Montreal, has been on his regular trip through the Maritime Provinces.

Fred. S. Saunders, who represents A. McKillop & Co., Limited, Calgary, in Edmonton and surrounding district, recently joined the ranks of the benedicts, and was presented by the members of the staff with a handsome Limoges dinner set, accompanied by best wishes.

Further payments have been made in the estate of J. H. Porter, former shoe merchant of Toronto, and the amount which the creditors will receive is about 55½ cents on the dollar.

F. P. Stockton, representing C. S. Hyman Co., London, was in Montreal on business recently.

The Miner Rubber Co. have completed arrangements for opening a wholesale warehouse in Edmonton. Congdon, Marsh, Limited, of Winnipeg, are the selling agents for Miner rubbers in Manitoba, Saskatchewan and Alberta. Mr. Congdon returned lately from Edmonton where he secured

premises for the Miner Rubber Company in the McKenney Building, corner of Fourth street and Athabasca avenue. A stock of rubber footwear will be shipped from the factory in Granby at once and the warehouse will be open for business on February 1st next. The Edmonton branch will be in charge of Angus Douglas who will handle the accounts and credits direct from the Edmonton office. Mr. Congdon reports an improvement in business conditions in the Edmonton district and expects it will soon be necessary for his firm to put in a general wholesale stock of leather and other footwear in Edmonton in order to serve their growing interests in Northern Alberta.

The by-law granting the Goodyear Tire & Rubber Company a fixed assessment carried in New Toronto recently by a vote of 189 for and 58 against. A two-thirds majority was required. The vote is about a majority of three-fourths. The new industry will employ as many hands as all the manufacturing in New Toronto put together, and allied industries are expected to follow the Goodyear Company to New Toronto. It is promised that ground will be broken this spring and part of the plant put in operation next fall. From \$500,000 to \$750,000 will be spent.

Here is how one live firm take a personal interest in their customers and send out the following letter:—"We regret that you have found it necessary to complain regarding your recent valued order. We would ask you to kindly wait a few days, and if you do not then receive adjustment, advise us, giving full particulars regarding your complaint, stating definitely amount still due you, when we assure you the matter will receive our immediate attention. If you have occasion to reply, kindly use the reverse side of this sheet, enclosing same in the self-addressed envelope herewith enclosed. Regretting the inconvenience occasioned you and trusting that we may soon have further opportunities of serving you."

James T. Hurley, whose death took place recently in St. John, N.B., was for years an enterprising and successful shoe manufacturer. Born near Cork, Ireland, he came with his parents to America, the family settling in Lynn, Mass. There Mr. Hurley learned the shoe making business, and

#### ATTRACTIVE SHOES THAT CATCH THE EYE OF MY LADY FAIRE

On the left is a button parade boot with self-adjusting white calf top, dull kid vamp, white gore inserts. In the centre is a high cut white calf lace boot with invisible eyelets,

turned sole. On the right is a strap button boot, tan Russia calf vamp and foxing with white kid top. White shoes and combinations of black and white and tan and white are popular.

early in life he became foreman of a big factory. He was quite prominent in politics, and for some time served as alderman. Coming to St. John to take charge of the Francis shoe factory he was the first to introduce the American style of shoe. In time he went into business for himself and did well. One hundred hands or more were employed and the establishment was well managed. Unfortunately fire destroyed his factory, which was not covered by insurance. He lost about \$50,000, never recovered from the effects of the disaster and finally retired from active work.

Thos. W. Learie, who has for some time been Secretary of the Canadian Credit Men's Association, is severing his connection with that association to accept the Secretaryship of Messrs. W. R. Johnston & Company. A. S. Crighton, who has been assistant manager for the past two years, will succeed Mr. Learie in his former position with the Credit Men's Association, Toronto.

The many friends of D. J. M. McGeary, manager of the Royal Shoe Store, Saskatoon, will sympathize with him in the death of his wife, which occurred a few days ago. Mrs. McGeary was a former resident of Midland, being a daughter of Mrs. R. J. Thorpe, of that town, and was married in August, 1912.

C. A. Beechie, of Toronto, has been appointed manager of the Agnew Shoe Store in Berlin, succeeding Mr. Schott, who has taken a position on the road with the Canadian Consolidated Rubber Co.

John Affleck, proprietor of the Yale Shoe Store, Winnipeg, where he has been in business for the last nine years, has returned to the West after spending a few weeks at his old home in Harrow, Essex county, and also visiting the trade in Toronto, Montreal, New York, Boston, Brockton

and other centres. Mr. Affleck called on a large number of friends on his trip east and did a record holiday trade—while the total business during the past year was the largest in the history of the firm.

Miss G. Gmelin, who has for some time been employed in the fitting department of the Getty & Scott shoe factory in Galt, Ont., was presented with an appreciative address and a case of silverware by her associates on the eve of her marriage.

A report from a leading wholesale shoe man in Winnipeg is to the effect that business during the coming year is looming up very well and prospects are brighter than they have been for a long time. The trade in October, November and December was much greater than during the corresponding three months of 1914. Retail shoe stocks throughout the west are small and the demand, after the taking of the inventories, which is now about completed, will be very brisk.

James Foy, youngest son of J. W. Foy, who has been employed in the warehouse of D. D. Hawthorne & Co., Toronto, for some time, has joined the army service transport corps, and left last week for the front. Mr. Foy is one of the finest specimens of physical manhood ever seen in uniform.

Ed. R. Lewis, leather merchant, Toronto, has returned from a business trip to New York, Boston and Montreal. He reports that colored leathers are exceptionally scarce. There has been a recent average increase of 4c. in kid leathers with a possible rise of two cents more within a few days, while on sheep skins there has been an advance averaging from 2c. to 3c. The market is very short of supplies and leathers in certain colors are practically sold at prohibitive prices.

#### SOME RECENT DEVELOPMENTS IN FEMININE FOOTWEAR

On the left is observed an extremely high lace boot, Cuban Louis heel, 12 inch leg, of Havana brown kid. In the centre is a seamless pump of white calf, colored kid

straps with buckle to match, and on the right is a dome top lace boot, patent vamp, fox and cuff with grey cloth top. It is a very smart creation.

Harry Megginson, shoe retailer, of Sault Ste. Marie, Ont., was in Toronto last week on a visit to relatives and friends and called upon a number of members of the trade.

Capt. Harry G. Beemer, who has enlisted with the 169th Battalion, Toronto, is widely known to the shoe trade, having for years represented the J. D. King Co., the Berlin Rubber Co., and latterly H. E. Guptill, of Haverhill, Mass., covering the prairie provinces. He is a twin brother of Fred Beemer of Toronto, the widely known shoe traveler.

Harry Weber, of St. Louis, Mo., has been appointed superintendent for Getty & Scott, Limited, Galt, Ont., and has entered upon his new duties. He comes highly recommended and is exceptionally well qualified for the responsible position. Mr. Weber has been superintendent for some years of the Capitol factory of the Brown Shoe Co., St. Louis, and has had an extended insight in Lynn and other cities.

C. Drolet, son of C. N. Drolet, the superintendent, has been appointed foreman of the making room of the James Muir Co., succeeding Frank Brouillard, who has removed to London, Ont., with his brother, C. A. Brouillard, who is now superintendent of Scott, Chamberlain, Limited.

A charter was recently granted to the Toronto Slipper Manufacturing Co., Limited, with a share capital of \$40,000 and headquarters in Toronto. The company is empowered to manufacture and deal in all kinds of boots and shoes, rubber footwear, etc.

Allan Newman, proprietor of the Famous Shoe Repair Co., 303 Second Avenue South, Saskatoon, Sask., died very suddenly recently in that city while attending a hockey match. He had been in business for some three years and leaves a wife and family of four children. His death, which resulted from heart failure, came as a great shock to his many friends.

George Cannon died recently at his home 71 Roxborough street west, Toronto, at the age of 84 years. He was born in Aberdeen, Scotland, and for several years conducted a shoe business in Toronto. He is survived by one son and one daughter.

Harry Jordan, shoe retailer of Port Hope, Ont., spent a few days in Toronto recently calling upon the trade.

M. W. Crosby, representing the Utz & Dunn Co., Rochester, N.Y., was in Toronto last week on business.

Fire broke out a few days ago in the store of the Singer Fit-Rite Shoe Co., 485 Notre Dame street west, Montreal, and did considerable damage to the stock.

Wilfrid Pocock, of the Winnipeg Shoe Co., Winnipeg, spent a few days recently in London and other Ontario centres.

Ed. Jackson, of Jackson & Savage, Montreal, was in Toronto lately on business.

The assets of F. W. Hill, shoe dealer, Ottawa, are being advertised for sale.

L. E. Jones, shoe retailer, has removed his store from St. Clair avenue to 985 Dovercourt road, Toronto.

J. S. Lovell, the veteran shoe traveler, who represents Corbeil Limited, and underwent a slight operation in the General Hospital, Toronto, is very much improved.

Lemon Bros., shoe retailers, Davisville, Ont., have moved into the store recently occupied by A. Lindsay, shoe retailer, 2507 Yonge street.

Norman Ingram, who was formerly in the shoe business on Gerrard street east, Toronto, is now covering the territory west of London, Ont., for the Berlin Shoe Manufacturing Co.

Gutta Percha and Rubber, Limited, of Toronto, have purchased premises at 143 Granville street, Halifax, and will open a new warehouse there on March 1st, under the management of A. E. Doig, who has been with the company for

the past ten years. A full stock of mechanical rubber goods and tires will be carried at first, and it is expected that rubber footwear will be added at a later date.

J. L. Chisholm, manager of the Invictus Boot Shop, Toronto, spent a few days recently in Montreal.

C. E. Hurlbut, of the Hurlbut Company, Preston, Ont., was in New York and Boston last week on business.

Harry Dallas, Sr., is spending a few days in Montreal on business.

There has recently been an advance of one cent per pound in sole leather, both oak and hemlock, and it is reported that another jump may take place at any time. It is likely in accordance with the strong trend of the market, the figure for top soles will also be increased in a few days.

David Marsh, of the Wm. A. Marsh Co., Quebec, spent a few days in Toronto last week on business.

Chas. Duclos, of the staff of Duclos & Payan, of Montreal, who has been ill for some time, is again able to be around.

D. D. Currie, who was in business in Saskatoon, Sask., but retired a few years ago, recently bought out the shoe, clothing and grocery stock of A. W. Wylie at the corner of Twentieth street and Avenue C in that city, and is doing a fine trade.

Chas. Newton, manager of the shoe department for Robinson & Co., Winnipeg, is spending a few days in Toronto, Montreal and other eastern centres.

A. A. Locke, sales manager of the Slater Shoe Co., Montreal, was in London and Toronto recently on business.

Frank Adams, of Adams Bros., Winnipeg, was in Toronto, Montreal and Boston last week on business.

Major W. G. Pink, shoe retailer, 278 College street, is a member of the 127th Battalion (York Rangers), which is now being recruited for foreign service. Mr. Pink has been an enthusiastic military man for some years and expects to do his bit in the cause of King and Empire.

L. B. Wasserstrom, leather dealer, 16-18 Ferry street, New York, has opened a branch in Toronto at 26 Front street east, which will be in charge of J. Schwartz, who is well known to the Canadian trade, owing to his frequent visits to the Dominion.

E. T. Jacobi, Toronto, is back from an extended visit to New York and Boston. He states that the demand for white kid and white calf shoes of all kinds is very pronounced and that the showing in lace high cuts in either all white creations or in combination of black and white, and in some instances, tan and white, is much in evidence. The demand of white over-gaiters has continued strong all winter, and the trade for spring bids fair to be equally as brisk.

J. A. E. Snider, shoe retailer, Yonge street, North Toronto, who has been in the hospital undergoing an operation, is convalescent.

F. A. Robinson, who conducts three shoe repair establishments in Saskatoon, Sask., spent a few days recently in Toronto and at his former home in Lindsay. He has been since 1906 a resident of Saskatoon, where for some years he was engaged as manager and buyer in large departmental stores in the footwear branch. Two years ago he embarked in the shoe repair line, starting at 257 Second Avenue South. Later he bought out the business at 854 Broadway south, and a few months ago he acquired the stand at 801 Twentieth street west. His business is conducted under the name of the Goodyear Shoe Repairers and he has worked up a large trade, having a 22 foot model "N" outfit, with stitcher, at his main store and finishing shafts and skate grinding machines at all his places of business. He intends

carrying a stock of shoes at two of his establishments in order to meet the demand of his customers.

W. E. Gerrish, universally known in the shoe trade as "Pink," traveling representative for Hoag & Walden, Lynn, Mass., has the distinction of being the father of the captain of the Dartmouth College football team of this year's vintage. Bernard O. Gerrish, the young athletic giant referred to, was a star member of last fall's Dartmouth team. He will be graduated from college in 1917.

Wm. Moore, shoe retailer, of Barrie, was in Montreal on business last week.

The Standard Co., of Middle Sackville, N.B., met with a serious loss in the destruction of its boot and shoe factory and larrigan factory recently. The fire originated in the carelessness of a workman trying to thaw out a frozen water-pipe. Fortunately the total absence of wind prevented the spreading of the flames to other buildings. A large num-

WANTED by Ontario Shoe Manufacturing Company, hustling representative for territory Windsor to Toronto. Would consider application from capable man with retail experience. Confidential. Box 20, SHOE AND LEATHER JOURNAL, Toronto.

SHOE BUSINESS FOR SALE—Old established retail shoe business in Cobourg, Ont. Stock low, but in good condition. Splendid opening for installing shoe repair outfit. Address "Shoes" 720 Traders Bank Building, Toronto.

## Army Shoe Lasts For Sale

WE HAVE ABOUT 500 PAIRS OF THE STANDARD SIZE ARMY WELT LAST, NUMBER 469, ABOUT ONE-THIRD E'S AND TWO-THIRDS F'S. THEY ARE ALL IN GOOD CONDITION, AND WE OFFER THESE FOR 50c. PER PAIR. FOR FURTHER INFORMATION, APPLY TO BOX 14, SHOE AND LEATHER JOURNAL, TORONTO.

ber of larrigans, intended for the British troops on the other side of the water, had been transferred to the lower factory, near the I. C. R. station, for the purpose of being packed and shipped. This factory, it will be remembered, was only a few weeks ago partially destroyed by fire of unknown origin. The most serious loss connected with the recent fire was in the destruction of a large number of expensive machines.

## 22-FOOT GOODYEAR SHOE REPAIRING OUTFIT

MODEL N

**T**HIS Outfit represents the highest development in shoe repairing machinery, and meets every demand of modern shoe repairing. It embraces all the essential processes for making new shoes from old ones, giving the maximum of equipment and efficiency in the minimum space. The Outfit has the Goodyear Stitching Machine with all its improvements, including a new style steam generator which uses gas or gasolene for generating the steam, and operates automatically, thereby insuring a uniform heat for keeping the wax in proper condition and requiring little attention from the operator. The Edge Trimming Machine has the new feature of the two shafts, being operated by a single belt, and the cutter grinder is attached directly to the main shaft. This arrangement gives better results with less power.

The Buffing and Scouring Machine has a shaft 57 inches long and carries the following equipment:

- |  |                                   |
|--|-----------------------------------|
| 2 Split Bottom Buffing Rolls           | 2 Flat X-Ray Heel Scouring Wheels |
| 2 "C" Shape X-Ray Heel Scouring Wheels | 1 Heel Breast Scouring Wheel      |
| 1 Pin Wheel Pad Complete               |                                   |

A powerful Blower System removes the dust resulting from the trimming, buffing and scouring operations, and is designed to overcome certain objectionable features of other blowers.

The Finishing Machine has a 78 inches shaft which has all the necessary equipment for black or russet work:

- |  |  |
|--|--|
| 2 Corrugated Rubber Shank Finishing Wheels | 1 Corrugated Rubber Heel Finishing Wheel |
| 1 Corrugated Rubber Bottom Finishing Roll  | 2 Shank and Bottom Brushes               |
| 2 Heel Brushes                             | 1 Stitch Cleaning Brush                  |
| 1 Levelling Roll                           | 1 Bead and Wheel                         |

At the end of the Outfit is the Oscillating Edge Setting Machine which is fitted with union irons and in its motions duplicates hand workmen with quicker and better results.

Each of the machines is operated independently by a friction drive pulley, so that it is necessary to use only those machines which the operator may require. This feature means a saving of power.

All the machines are firmly mounted on legs and driven by a countershaft with carefully adjusted bearings, so that the Outfit runs with very little vibration, and is in every way most efficient.

## TRICKETT'S SLIPPERS

They are a *Sure Thing* for the Retailer and a *Sure Thing* for the Jobber, as they are always in *demand* and *always suit* the customer. No wonder travellers are pestered with requests for *more Tricketts* everywhere they go. The only trouble these days is to keep up the supply.

## Are We Downhearted? No!

We are doing our best to keep the trade supplied with *Tricketts* in spite of the *scarcity of materials* and the *shortage of labor*. War has hit us hard, but we are not grumbling at our BIT.

We thank our Canadian friends for their patience and hope to show them our appreciation in the most tangible way—the supplying of this year's needs in *Tricketts*.

## MILITARY FEET *for the* CIVILIAN

The Canadian Army Shoe is so popular now we have just put out a line in lighter leathers for civilian wear.

Everything about this shoe makes it suitable for the man who wants the "military" effect, and the pattern and last makes a medium weight, easy-fitting shoe that appeals to so many.

One of the strong features of the line is the absence of the box toe, it being made with a heavy tip and full vamp instead and this feature makes it pliable and comfortable, thereby avoiding the binding of a hard box toe.

This line is made in all Leathers, Black and Tan, with best of Drill Lining, Calf Facings. Every lift in heel is from selected leather and all made on the Ames-Holden last, stamped on Sole like this---

Our travelers now have these samples and your order can be shipped promptly as the stock is well through the factory now.

## Martin CORRUGATED FIBRE BOARD Shipping Cases

We can promise prompt delivery. All over Canada MARTIN SHIPPING CASES are stopping big money leaks in shoe factories.

### These Are the Actual Savings

90% in	50% in	20% in	20% in
Storage Space	Packing Time	Freight Charges	Cost of Wooden Boxes
If, for instance, you value the space occupied in your premises by empty wooden boxes at \$250.00 rental per annum, MARTIN CORRUGATED FIBRE BOARD SHIPPING CASES will save you 90 per cent., or \$225.00.	And, where for instance, one hour would be required to pack a shipment in wooden cases, the same shipment could be packed (and better packed) in half an hour, with MARTIN CORRUGATED FIBRE BOARD SHIPPING CASES.	And, if your freight bill, using wooden cases, has been say \$2,000 a year, MARTIN CORRUGATED FIBRE BOARD SHIPPING CASES will save you at least 20 per cent., or \$400.00 a year.	And then, suppose you've been paying \$2,000 a year for wooden boxes, for the same amount you can get 20 per cent., or \$400.00 more value for your money by using MARTIN CORRUGATED FIBRE BOARD SHIPPING CASES.

MARTIN CASES eliminate waste of labor and material. Save time, money and trouble and remove all chance of goods being tampered with in shipment.

Make up your mind to adopt the modern Martin way and write for quotations.

# Lace Shoe Logic

You can't make any mistake in purchasing lace shoes at this time.

They have always been the most reliable staple and now they are the style, too, so they have everything to commend them.

Lace shoes mean quick fit, quick sales — no come-back for free repairs.

This is now more than ever a factor, for high cut boots never did look well when buttoned and every additional button is a problem in fitting. High cut laced shoes, on the contrary, are easy to fit; they look well. Laces form an adjustable fastening; they automatically meet and satisfy the many conditions in fitting which, in the case of buttons, require time, expert attention and repeated expense.

Lace shoes are not shelf warmers. They are in demand now; they will be even more so next season.

You know your trade, but if you have any doubts as to what to buy, lean towards lace shoes; it is the logical thing to do.

## AN OPPORTUNITY IN SHOES

**Coming Season Promises Interesting Developments—Shoe Manufacturing and Selling—Variety the Spice of the Shoe Trade—It is Time to Get Ready for Spring Movement**

**E**ASTER will be later this year than it has been for over thirty years. That means that the shoeman who waits for the week beginning April 17th to sell his spring footwear will have a lot more shoes to sell than he will dispose of.

Spring weather usually begins with Saint Patrick's Day or thereabouts and the ladies at least will not want to wait patiently till Holy Week to see how their feet will look in the captivating creations that will be placed at their disposal this year. With the millinery openings on March first the feminine heart will be started palpitating and though, in the language of the poet, "head is head and foot is foot and never the twain shall meet," there is a very pronounced tendency for foot adornment to follow "close on the heels" so to speak of head decorations with women at least.

To this end the retailer should be up and doing. Begin a DRESS UP campaign in your town by stirring up thoughts as to the advantages of foot neatness and letting your constituents know what you are going to be able to do for them in the matter of footwear. While February may well be devoted to clearing the shelves of unseasonable lines, it should also afford favorable opportunity for the dealer to get into the local papers little hints as to what may be expected for spring. Information as to shoe styles is perfectly good news and you should have no difficulty, especially if you are carrying advertising space, in convincing the local editor of the advantage of keeping his readers posted as to footwear fashions. Cut out the notes in this issue and feed them in gradually.

Begin to get all your store and window arrangements in shape. Don't leave these things until the warm spring days and then have to carry your plans over. It is time for a CLEAN UP as well as a DRESS UP campaign. If you are to do both right there is no time to be lost.

Business is going to be good this spring. People have more money than they have had for some time and they will be willing to spend it. Give them a chance. Do your part. You will never have a better opportunity to show the qualities of management and salesmanship than right now.

Manufacturers have done their part in preparing the goods that will attract. While the styles are somewhat "flighty" they are the necessary adjunct of wearing apparel and millinery. There will be no halting between two opinions. Most women will want the newest things and there will be plenty of others to take care of your regular stock. Go in for a good all around season's trade.

The men's lines will take care of themselves this year.

# Foot Fashions and Foibles

Freaks and Novelties Run Riot—The Spring and Summer Season to See the Greatest Variety in Women's Footgear Yet Known—White Will Be the Rage

## High Shoes Have It

**F**ASHION has decreed high shoes for women by the shortening of skirts which last year reached to the ankles, but will this spring and summer stop a little more than half way down the calf. It will be par excellence a year for hosiery and shoes, and dealers are preparing to make the most of conditions.

\* \* \*

## Millinery Effects

Another help to variety in shoes will be the conglomerate character of frocks and skirts. There is a going back to flounces and cascades, bouffant effects and a variety on combination that will bring back thoughts of the early Victorian days. This invites, of course, millinery effects on shoes and encourages that sort of phantasmagoria that would be out of the question were the shoes hidden by skirts.

\* \* \*

## Strong on the White

White and combinations of white, patent and colors, will be the rage, but it will be a distinctly white season. Those who do not wear white shoes will wear white spats and these with variegated buttons and trimmings and the abbreviated skirts will give the streets the gay appearance of the presence in our midst of a Highland Brigade. At all events the "twinkling of the feet" whether they peep in and out like mice from under the skirt, as the poet says, or not, will add vivacity to the streets and money to retail coffers.

\* \* \*

## Jewels, Not Bells, on Her Toes

Beaded effects on low shoes and slippers will be more pronounced during the coming season than ever, while buckles and even jewels will adorn the dainty creations that with fancy hose will attract attention from the faces of the fair sex to their feet. White will also predominate in low footgear, a preference being shown for colonial patterns.

\* \* \*

## A Muskoka Idea

"Mosquito Spats" are the latest New York fad. They are made of light material and will be used over low shoes and slippers, made close fitting and graceful, helping to show off the ankles and give the high shoe effect. The material itself will hardly afford protection for mosquitoes, but it is proposed to treat them with some substance to ward off mosquitos while the fair wearer is sitting about on hotel piazzas or watching a golf game.

\* \* \*

## Some Chic Effects

A novelty shoe in black and white is a high cut buttoned with scalloped top. The vamp of patent is whole cut and around the top are oval glints of

patent that give a natty appearance to the shoe. Another odd effect is obtained in a high cut laced of which the quarters are white, the vamp, foxing and facings and backstrap of patent. The edges of the vamp and foxing arc perforated with a fancy pattern. Fancy silk facings are being used inside the tops of many of the shoes.

\* \* \*

## A Bizarre Effect

A jewelled front slipper of patent, low cut, was seen on the other side, with a French heel. A collar or lapel of calf went half way around the throat of the slipper and to this was attached a calf strap in the shape of an X, the top of which extended on each side and fastened to the shoe by buttons. This calf strap was adorned with Rhinestones.

\* \* \*

## White Tempered with Grey

Dealers say it is getting more and more impossible to do business in ordinary lines of women's shoes. The coming season will be one of extreme novelty. White will be tempered with steel grey and what is called oyster grey and light colors will also be worn. Strap effects in medium grades will sell well, and although gypsy cuts are still selling, they will decline as the season progresses. Grey kid still has a good call both in laced and buttoned, although the trend is more towards laced.

\* \* \*

## Kid from Head to Feet

The demand for kid for other purposes than shoes such as outdoor costumes and even hats is cleaning up the supply of light leathers to such an extent that manufacturers are being alarmed and are beginning to encourage the employment of other materials for shoes. So that a number of new lines are on the market in worsteds, and even silks. No doubt the craze for variety will help the use of these materials.

\* \* \*

## Changing Every Hour

As an indication of the faddishness in foot fashions a prominent manufacturer who was traveling from Boston to New York not long ago, claims that he saw a young lady on the car change her shoes three times on the journey. The fair damsel was elegantly dressed in very very short skirt and wore at first a pair of high white calf laced boots. After travelling as far as Providence she retired and changed for a pair of bronze buttoned. A short while after she came forth from the ladies' room attired in a pair of taupe grey circular cut buttoned boots.

# Retail Views and Interviews

What the Best Dealers Are Saying and Doing—Bright Suggestions as to Ways and Means of Shoe Sales Promotion

## Why They Sell

As a well known advertisement puts it, "There is a reason." Many have asked what is the cause of the present faddishness in shoes, especially women's, and is the craze going to last. One of the causes of the white and grey shoe furor is more natural than most people think. The scarcity of dyeing or coloring materials has become a nightmare with leather manufacturers who have had to set about promoting the use of materials as near the natural color as possible. One prominent light leather manufacturer said recently, that the greys, buffs, champagne and various shades of brown will be the most easily obtainable and that some colors are not procurable at all. Blacks of the right kind are also somewhat difficult to get. This has naturally led to the use of the more accessible colors, and this coupled with the fact that the same applies to fabrics involves the combination of such shades in shoes as will harmonize. In addition, the freakiness of women's fashions in dresses, garments and millinery absolutely calls for a balancing of conditions at the other end. Meanwhile, this fad ought to be profitable for the shoe trade, as a fair amount of ordinary lines will sell with the extreme styles.

\* \* \*

## Living Shoe Models

A shoe retailer in a western city attracted a good deal of attention to his store by installing in his window a shoe fitting or selling exhibition. A suitable background was arranged with a backing of cabinets for shoe cartons and the whole arranged to give the appearance of a neat ladies' fitting room. Some special shoes in ladies wear were featured on

## LIVING MODELS

*A window salesroom designed by a bright western shoe man that created great interest.*

suitable stands at each side of the window. For an hour each morning and afternoon a young lady appeared in the window seated on an ordinary chair and a young salesman upon a fitting stool went through the various operations of showing her different lines of shoes and fitting them on. The act had been well rehearsed, for the couple seemed oblivious to the crowds that gathered in front of the store to see the sale of shoes. She was "coy and hard to please" and made the young man try on about every shoe in the place before she decided. The whole operation of having the shoes parcelled and checking in the cash was done in sight of the spectators. The young man showed great skill in showing the shoes to the crowd without any apparent attempt to do it by holding it aside to look at the size or examine the inside for any defect. People are certainly interested in life.

\* \* \*

## Standards of Practice

The Philadelphia Retail Shoe Dealers' Association has issued a large display card to be hung up in the store or office which sets forth the standards of practice for its members in shoe selling. The following are the regulations:—

When shoes are returned within one month from date of purchase on account of manufacturing defects, no charge is to be made for wear.

Shoes worn more than one month from date of sale and returned on account of manufacturing defects, should be charged for according to the amount of wear shown at the rate of \$1.00 per month; this charge being deducted from the amount charged back to the manufacturer or jobber.

In cases where there has been no actual wear, no charge should be made, regardless of the length of time from date of purchase.

Patent leather shoes under no conditions should be accepted back on account of checking or other troubles. Shoes plainly showing general abuse should not be accepted under any condition.

Whenever shoes are replaced or sold under price to settle an unjust complaint, the customer should be clearly informed that it is done to retain the good will of the customer and in order to show the retailer's fairness, and that any future unjust complaint will not be tolerated.

Shoes should be stamped when sold with the date of sale, and the date should also be clearly indicated on the duplicate sales check. Whenever shoes are improperly fitted, on the demand of the customer, the check should be plainly marked for future reference in the event of a complaint.

\* \* \*

## Advertising the "Fit"

A bright retailer who sought to get before the public the importance of the fit of a shoe, took a

novel way of calling attention to his facilities for fitting all feet. We all know that nine people out of ten dread new shoes from the torture that comes from wearing them at first. The temptation is to sell a person shoes that are so large that they buckle or slip on the foot. The dealer in question put up a large card on an easel at the back of his window on which was drawn the figure of a man nursing his sore feet. The question appeared underneath, "Do you suffer the agony of ill-fitting shoes? If so come in and we will give you relief." On the floor of the window on one side were a number of old shoes all twisted and worn out of shape with the legend on them, "Bad fitting is as bad for the shoes as the person." On the other side of the display were a number of comfortable looking shoes, the very appearance of which invited a trial. On them appeared the statement, "Foot Comfort is the Foundation of all Happiness." The whole was tastefully as well as suggestively arranged, and as the shoes displayed were for both men and women, no doubt the foot doctor secured a good many patients.

\* \* \*

#### Caring for the Feet

By the way, one successful shoe salesman in conversation a short time ago stated that he made considerable extra money by posing as a "foot doctor" after hours. He is a very painstaking fellow who does not believe his job begins and ends in making shoe sales. Being brought in contact with a great many real foot troubles, he has made a study of the foot and its needs, and finding the store an awkward place to devote attention to the particular needs of customers for various reasons, he opened a little office in his home and has quite a number visit him for consultation. When he finds a customer with a flat foot or fallen arch he can give her relief or in the case of a bunion, provide a remedy. The store with which he is connected

does not encourage this kind of business, so that he has to meet the customers privately. Nevertheless, the establishment profits from the trade of those who call to see the salesman, and one would think it would pay them to give him a private fitting room and encourage customers to bring their foot ailments to the store. Most people will pay a good price for "foot ease" and their gratitude to anyone who can afford them relief ought to be well worth while. No doubt some of our readers have had experience along this line, and since remedial appliances have become more common, have profited by them. But few have made this kind of thing a good advertising adjunct to their business.

\* \* \*

#### Special Sales

February does not offer many inducements in the way of special sales opportunities beyond the mid-winter clearance schemes that are usual at his season. When the special sale is resorted to it is a good plan to cut out the newspaper announcement and paste it in the centre of the window. It should state the special inducements in the way of prices, as people like to see what is being offered before they step into the store. Be careful in "marking down" not to overdo it in two ways. Don't lie in your advertisements or on your price tickets. If it is a genuine mark down, all right, but don't put on a fictitious price and a selling price to give the idea that you are sacrificing goods. Don't mark goods, especially fine goods, too low or people will be afraid of getting "stung." Everybody likes to feel he is saving money these days, but nobody likes to be caught for a "sucker." It will get back to you.

There are two good days in February for special sales, Valentine Day, February 14th, and Leap Year, Feb. 29th. The live dealer will know how to use each without any suggestions from us.

#### ATTRACTIVE DISPLAY

*Showing the predominance of white shoes and spats. A simple background.*

# The New York Convention

Some of the Good Things said by Prominent American Retailers at the Convention Held in New York Last Month.—They Will Interest the Trade Here

**W**E have only space to give here the "cream" of the proceedings of the National Shoe Retailers' Association, which were brim full of interest to the retail distributors of footwear.

## Frank Melville, Jr., New York, on "Principles of Shoe Retailing"

You must locate where the people are. They must buy your grade of shoes and they must buy at times that it is profitable for you to sell. The item of service includes the two P's—personal and protection. Retailers rise or fall by their attitude to their clientele. In buying and handling shoes, consider style and quality. In the matter of style, a merchant may save himself many sleepless nights by following conservative lines. Following fashion brings upon us chief of our ordering difficulties. To the retailer, no less than to the manufacturer, it is desirable to secure regularity and volume in placing orders. In buying staple lines, it should be possible to place about half the quantity well in advance. The factory desirous of co-operating with its customers can apply itself to no more important task than that of shortening the ordering period. Equitable relations (with manufacturers) can only be secured when the retailer forgets the practice of getting credit on whatever the factory will accept (in returning merchandise) and learns to treat every adjustment as though the shoe were his own. As the retail business is conducted, the maintenance of a fixed selling price is essential.

## A. J. Hart, of Cammeyer's, New York, on "New Era in Shoe Retailing"

We are entering into a new era in retailing; we are retailing something which we have always had, but something for which we have never been paid. We are retailing ideas to-day—ideas built into shoes. We are selling good ideas—tastefully, artistically, and thoroughly conceived and carried out—ideas which the world calls style. Style is creating the new standard of value in shoe merchandising. Add to the selling cost (not the selling price), the style value in your shoes. Retailers design the new styles, not the manufacturers, and they should capitalize their style ideas just as dressmakers and designers of millinery are recompensed by their customers for designing new styles.

## M. G. Harper, Philadelphia, on "The Novelty Shoe Game"

I believe that we will never put the men's business, as a whole, on a proper profit basis until we do with it exactly what we are doing in the women's business—novelties. I think we can have more dressy shoes for men; not shoes for dress, but shoes

for ever day wear. Get the men out of the "one pair" class of human beings. In playing the game of novelties we are becoming artists and we want to do everything we possibly can to cultivate artistic creations in footwear. A designer of men's clothing receives \$35,000 a year for bringing out styles. The clothing trade pays designers. The shoe trade does not. The nearer the shoe trade can come to the clothing trade in designing styles the better it will be for our trade. Do not allow your slow moving novelties to accumulate and try to dispose of them at the end of the season. Have a new price every week. Keep them moving all the time. You must have room at the top to buy when the new things are shown and you must keep the cellar clean.

## H. B. Scates, Boston, Mass., on "An Advertising Policy"

Buy only good merchandise, know that it is good, and if you make a mistake, acknowledge it and sell the merchandise for what it is. Treat your entire clientele just as you would your best individual friend. Tell them the truth. Sell your shoes intelligently and spend time and money educating your salesforce to do the same, because it is for their interest to do so. Sell service first of all. Sell the customer just the best shoe for their needs. When your store, your merchandise and selling force are organized along these lines, then tell your public in your newspaper ads just the kind of a store you are running. Be honest with yourself, be honest with the public, and the future will hold far less of the disagreeable features of our business than it does to-day.

## John Slater, Fifth Ave., New York, on "Art in Shoes"

The first thing we do on examining a shoe is to give it a cursory survey, turning it over and over in our hands and feeling for imperfections in a general way. After this superficial examination, we grasp the top part of the shoe with one hand and the heel with the other and straighten out the upper. This is done in order to see whether there is a perfect alignment between the front and back seam; also, to see if there are present any unnecessary wrinkles, which are sure signs of either poor material or poor lasting.

If we are satisfied, we pass to the vamp, examine the quality of the leather, the shape of the toe, and the way the toe cap sits on the vamp. The shoe is then inverted, a finger moves over the sole and the character of the bottom is noticed. The eye then passes to the shank, then to the heel and the line between the heel and the heel seat is carefully studied. Should the heel be improperly set, we would discover it at once. After this, the finger moves

instinctively around the edge of the sole and a sensitive finger can tell whether the shoemaker has used a well cut iron or not.

Next, the shoe is placed on a flat surface, and we observe where the sole strikes, and whether the heel has the correct pitch. The shoe is now opened and a hand is inserted, the lining, top facing and insole are all examined, and especially the area at the throat.

If the shoe passes these tests successfully, we do not hesitate to proclaim it a product of the first order. The shoemaker who made it knows his business and is a craftsman of rare merit in these days.

#### Julius Goldberg, of Chicago, on "Selling Shoes"

At one time women did spend quite a little money on millinery, but they do not do so to-day. For instance, women used to spend from \$15 to \$30 for a hat, and from \$3 to \$5 for a pair of shoes. Now it is different; they are satisfied with a hat at \$5 or \$10, and if they are accustomed to pay a great deal, perhaps \$20, whereas shoes are sold at \$5, \$10 and as high as \$15 without a murmur from the customer. You can see it is not a question of price, but "what they want at the time they want it" is the important item. I am safe in saying that fancy, dignified and conservative novelties will remain for a long time, and that more better grades of shoes will be sold than ever before, and in larger quantities. Cheaper merchandise will not be in demand for many reasons. One reason in particular is that the trade has been educated to wear a higher class of merchandise in soft materials, and more flexible, and they know the difference between good and poor shoes.

#### Ben Jacobson, of Morse & Rogers, New York, on "Problems of Small Dealer"

From personal observation this is about the way the average store is kept: Goods are bought from the salesman and his advice is taken on styles.

They are sold as cheap, or cheaper, than his competitor asks for the same goods. This money is put in the owner's pocket, or in a drawer without any record taken of the sale. When the dealer has too much money he pays the bills that are on the bottom of the spindle. No record is kept of stock on hand, gross profits, expenses, or net profits. About \$800,000,000 worth of shoes are distributed annually through these unsystematized retailers, many of whom never take inventory. I know a retailer whose sales are over \$100,000 and the gross profits only 16 per cent. Can you see the good work this association could do toward improving the shoe business in general by either establishing a retailers' service bureau, properly conducted, and by encouraging small dealers everywhere to join the association. Few dealers know when they conduct their business the wrong way.

#### Mr. J. S. Ullman, of Boston, on Colored Kid

Bronze kid is a safe gamble at present, and that it will be a good staple. Dyestuffs for bronze leather have risen enormously in price, about 900 per cent, however. The next best bet is white washable glazed kid. It can be washed with castile soap. As to grey and ivory kid he recommended not very light shades. As to white kid, there is a shortage of raw material.

#### A Great Single Sale

Multiplicity of shoes ought at least to be good for the shoe trade. If people can only be induced to purchase three pair of shoes to one they have worn ordinarily there will be something doing with both the retailer and manufacturer. Speaking of selling larger quantities of shoes to an individual. A large shoe store claims that a short time since one of its salesmen managed to sell to one customer at a sitting twelve pairs of shoes at once, for which the bill was \$71.00. Few attempt more than the single pair.

#### SHOE FITTING DE LUXE

*The Ladies Department of a Los Angeles shoe palace, harmonious in appointments and restful in effect.*

## WINTER SPORTS

*Retailers should feature Winter sports such as Skating, Curling, Hockey, Snow Shoeing, Skiing, etc.*

*Advertising in papers and in hockey programmes may be designed with this in view.*

WINTER  
BACKGROUND

*The suggestion herewith is suitable for a window background. The back may be of painted canvas and the figures either dummies or living.*

# Stray Shots from Solomon

The man who says behind a fellow's back what he dare not say to his face is the rottenest kind of a low lived coward. There are some good Christian people who would drop dead in MEAN DOGS their tracks if they caught themselves thinking of cheating or Sabbath breaking, but who go on stealing their neighbor's character six days in the week. You don't need to say that a man is crooked or publish his shortcomings in the local paper to ruin him. All you have to do is to put your tongue in your cheek and look wise when his name is mentioned. Oh those dirty, smooth tongued assassins that make the Sicilian cut-throat look like a respectable member of society! These "whisperers" who turn over scandal like a dog digs into the garbage can over night! "A whisperer separateth chief friends" and pushes many a soul over the brink of the pit.

o o o o o

You are your own best judge as to your duty. Don't let people nag or jostle you into any course that you are not sure is dictated by a sense of your responsibility and the demands of right. There are young men just DO YOUR DUTY now who are being cajoled and frightened into joining the overseas forces whose larger responsibilities ought, perhaps, to keep them at home, just as there are those who should feel the call of their country or this age to personal consecration, who hold back for unworthy reasons. Every man stands or falls by his own conscience. The cowards are not on the side of the laggards. Many a coward is kept on his track by the lash of popular opinion rather than the sense of duty. "In the king's countenance is life." Conscience is an inexorable king. Look him in the face and decide where your life should be placed.

o o o o o

What have you got that someone did not give you? Who are you or your forbears that you turn up your nose at ordinary folk? When you find a man or a woman drawing the line WHO ARE YOU? on his neighbors and taking the other side of the street to escape the "common herd" you get one whose soul is so small that if you put a thousand of them in a peanut shell it would still rattle. "Do you know who I am?" is the question of an ass whose decent progenitors would blush to acknowledge the claims of the theory of the "descent of man." The man who takes this attitude has neither brains nor claims to give him any better title than "fat head." People will find out who you are if you are worth knowing. You will not have to go about strutting like a turkey cock if you are worth enough thought to separate you from "the

common herd." The fellow who is always wanting attention and who is always reminding people of his importance makes men want to kick him where his pants are loose and devils ache to get him where he can properly show off. "Everyone that is proud in heart is an abomination to the Lord."

o o o o o

Learn to smile. It costs nothing and it is a great money maker as well as a great health giver. The man with a grouch loses money by carrying the load and while he is hugging it OPEN YOUR FACE to him, the world loses that much sunshine. Smiling can be cultivated just like "growsing," and one habit will grow on a fellow as easily as another. There are some fellows who would sooner growl than laugh and they usually end up in the business and social boneyard. They are dead ones, so dead that Gabriel's trumpet will not reach them on the last day. "Pleasant words are as a honeycomb, sweet to the soul and health to the bones." Try it and see how much satisfaction you will get out of a day of smiles put side by side with a day of kicks and knocks. You have let yourself get all shrivelled up this last year or so. Shake yourself. Try a joke instead of a blistering criticism, a smile instead of biting sarcasm, a bit of encouragement instead of fault finding. In a month's time you will not know yourself and the family and business associates will think you have "got religion" in its best form.

o o o o o

These seem to be the days when money talks. The question does not seem to be so much what a man is but what he is worth. The world will forgive you almost anything but MIGHT AND RIGHT being poor. Success has got to mean the sudden piling up of dollars. Men are pointed out on the street not for what they have done for their fellows but for what they have got out of them. They are put on charity boards and in positions of prominence and trust not for their character or their ability but because they have the stuff. This age is down on its knees grovelling before the golden calf. "These be thy gods O Israel!" We need in this age a prophet who with tongue of flame and voice of thunder will call us to a sense of this sin of money idolatry that is throttling our civilization. With trumpet tones the warning needs to be sounded, "Better is a little with righteousness than great revenues without right." The Germans are not the only exponents these days of the doctrine that "might is right."

*Solomon*

# THE MID-WINTER SHOE SALE

Clearing Out for Spring Goods—Getting Rid of Odds and Ends—The Faddist's Nightmare

By HARRY HUSTLE

IT would make a sawhorse laugh to read some of the editorial guff in trade papers, usually about this time of the year, concerning the "February-Sale Peril," and listen to the hysterics of writers who have never been behind the counter, much less have had to sit down and figure where the money is to come from to pay winter bills. As regularly as February comes around these ink slingers set their pens going and go off and leave them.

Of course we would all like to see the customers trot in and out our front doors like they do before Christmas or during the Easter week, but the man who sits down and waits these days for trade will not only wear out his pants in the wrong part but will have to ask his creditors to be patient with his love of ease and lack of push.

It would be nice to get through the rush of holiday trade and have no rag ends and be able to go over the stock and say we are ready for the next man who comes in and asks for an odd size or wants some special line. There are some smart Alocs in every trade who claim to be wonders, but the rank and file of us "little fellows" have to confess that now and then, and now particularly, we do run out of "sorts" and have "left-overs" that can't be wished on customers as fast as the latter come in. Retailing goods to-day is somewhat different from the time when you could convince a man by a little argument that some line was as good as another.

These two winter months are a source of anxiety to every retailer. After the holiday season people seem by our consent to suddenly "put the kibosh" on buying of every kind, and it takes a mental crowbar or a stick of dynamite to separate them from a dollar. The winter sale has therefore become an institution, and the bright dealers all over the country—the very best of them—put forth an effort to

boost trade at this time. A few years ago anyone who tried to sell whitewear in January or furniture in February would be called "dippy." To-day there is more furniture sold in February and August than the rest of the year, while whitewear is regarded as the thing to buy in January and July. In fact the factories have had to adjust all their ideas and arrangements to meet the conditions of the new retailing.

The great point, apart from money making, that makes the winter sale a boon to the dealer is its clearing up of the

Invictus Shoes

undesirable "left overs." It is funny to read the effusions of these Napoleons of commerce who can go through a season and so regulate their buying and selling that they have as clean a stock on January first as on December 1st. To anyone who has spent a lifetime at merchandizing, these commercial acrobatic feats that are recounted for the benefit of us "backnumbers" from time to time, are amusing. I defy any man, no matter how good a buyer he may be, and no matter what his system of keeping stock, to run a retail store of any kind without accumulating some "shelf warmers" or "wall flowers." The between-season sales afford not only an opportunity for getting rid of these, but for the sale of lines that can be run off with them at a profit. It is astonishing what people will buy when they get the "bug."

Salesmanship or good management comes on where the getting rid of undesirables leaves off. If sales were held only to get rid of "stickers" there might be some argument on the question of their wisdom; but the live retailer uses them to push regular goods. He is a poor salesman who can't often switch a customer or sell him a regular line as well as the "bargain." In this way the "sale" should be a

Yonge

when the sale is properly handled. Some of the most exclusive stores have found the sale a handy adjunct and claim they haven't frightened any customers that you could notice. The sale can be so run that it need not interfere with the regular departments at all, and as I have said, the customers can often be switched, when they have satisfied the bargain instinct, to something else.

### Sales Are Here to Stay

Some dealers find it a good thing to get in a few advanced styles when they have a sale on and display them prominently so as to catch the eye of the customer when he is in the store. This ought to be well worth trying and even if the customer does not buy he will remember what he sees and come back.

No, this chatter about the "sale" being "passé," or "infra-dig" is all hot air and may do for a few stores in large cities where retailers can pick out the class they want to do business with and run their stores, their advertising and their prices accordingly, but for the average dealer the regular between-season sale is as necessary as a fresh coat of paint in spring or the vigorous advertising push that keeps the store in the front of the procession in its particular line. When you see one of these business college graduates or newspaper hot-air artists gyrating around this fruitful subject put it down that he has run short of ideas and has to aeroplane for some.

### SHOEMAN WHO WOULD NOT "BE SOLD"

A stubborn streak in Willard Borden's nature made him an uncertain proposition to visiting salesmen. Advice he would not take. He bought his own goods for his stocks, and was proud of the fact. A hint that a certain style of shoes was going to prove popular was certain to make him place his order for an entirely different line. In short, he was the type of man who would not "be sold."

Stanley, salesman for Burton-Ellis, knew his man. Calling bright and early one brisk November morning, he undid his cases and spread his samples out on the table behind Borden's desk.

"There, Mr. Borden!" he said enthusiastically, picking up a couple of shoes, "those are the lines that are going to go next spring. Look at them! Aren't they beauties?"

In reply, Borden grunted, unconvinced.

Stanley, continued his eulogy, showing other lines, and pointing out the merits of each. Presently, he came to a pair which he evidently did not care to exhibit. He pulled them awkwardly from the table and put them back into the sample case. As a matter of fact, this was exactly the line Stanley hoped and expected to sell to Borden. And promptly came the merchant's query:

"What is that style you're hiding?"

"That? Oh, just something we made to show Best and Sellers, up here at St. Cloud. It's nothing you would care about."

"Let me look!" the merchant demanded.

So the sample came out of the case again. Without any help from the salesman, Borden noted the shoe's good points and argued himself into a full-stock order.

"Didn't think they'd sell here, eh?" he demanded, caustically. "Well, that shows what you know about what people like. Why, my customers wouldn't have those styles you've been touting!"

Stanley chuckled to himself as he put the last sample back into his case. An adroit presentation of his goods had won him an order that he could not have hoped to secure otherwise in a whole day's arguing.

great advertisement and a profitable one at that. This feature of it was amply illustrated the other day when "Hickey's" furnishings store on Yonge Street, Toronto, announced that they would give away the partly damaged goods after their slight fire. There was almost a riot in front of their store next morning and the police had to interfere. It was a good ad and plenty of people will remember Hickey's for a long time.

Plenty of retailers will admit that some of their best regular customers were introduced through "sales." In spite of everything most people have a craze for "bargains" and while it may be agreed that "exclusive" trade is frightened away by such methods, this is a bugaboo that disappears

# HUMAN NATURE IN THE SHOE SELLING GAME

How to Dispose of Footwear to Old Men, Young Men, Ladies and Children—Different Arguments That Must be Used and Certain Points that Should be Emphasized—Catching the Trade of the Entire Family and Converting Casual Inquiries Into Sales on the Spot

By "ONE WHO KNOWS"

There is no branch of the shoe business, be it men's, women's or children's, that cannot be increased if intelligent effort is put behind it.

The dealer who makes the statement that the maximum volume of sales has been reached in any department of his business is generally making a misstatement and one that is going to be reflected on the sales sheet too, because when a man acknowledges that he has reached the limit in any line of endeavor, it causes him to become listless, and in the shoe business that certainly means lessened sales. In addition, the man who thinks he has secured the maximum sales in any department, is generally mistaken. This is illustrated in the case of the manager of a store in an Ontario town who stated a year or so ago, that he rarely advertised ladies' shoes because he had practically all the trade of the town in that line. That he was fooling himself and badly, is shown by the fact that a new manager has since been put in charge of the store who has been able to boost the sales of ladies' shoes fully 12 per cent.

It having been established that sales in most stores can be increased if gone after in the proper way, let us consider ways and means by which they may be increased. For instance, in the sale of men's shoes, it is important to impress on the men customers that men's shoes comprise an important department of the business and not a mere sideline. It is surprising how many shoe stores by their window displays and advertisements give the impression that the trade of the women is chiefly catered to. In this regard there are many men who want to deal at the store where they believe men's shoes are featured, while others have little inclination to shop at what they think is a "ladies" store. To overcome this difficulty it is a good idea for stores that do a big business in ladies' shoes to run ads. occasionally with a special appeal to the men, and also not allow ladies' shoes to predominate to too great an extent in displays.

## Arguments that Appeal to Men

Rather a different kind of salesmanship has to be employed in selling men's shoes than with other lines. While with women, style is generally the most essential feature, with men it may be either style, comfort or wearing quality, so it is important that the salesman be able to gauge by general appearance what feature is most likely to appeal to each prospective customer and to select a shoe suitable to his wishes and talk up the feature which he deems will appeal to him. A man generally is impressed by a real intelligent explanation of why a certain shoe is desirable and why it is worth the money. In dealing with men—especially business men—you have to deal with them in a real business manner, and the salesman should always maintain that attitude when dealing with them.

With young men, who are concerned especially with style and appearance, a little different line of talk is required than with the average business man, who although he may consider the question of style, is also interested in wearing quality and comfort.

An added reason for making a good strong bid for the

shoe trade of the men is, because if you secure the trade of a man you are in a fair way to get the trade of his family also. When you sell a man a pair of shoes, you should try to interest himself in shoes for his family. For instance, by showing a cute little shoe to a man whom you know has a little girl, you may start a train of thought that will later lead to a sale. Every dealer should get his clerks in the habit of reaching out after business through the men, and when they have served one, ask politely if any other members of their family need shoes, thus impressing on him that the store has varied ranges of footwear for sale.

## The Predominant Element of Style

It is in women's footwear that the style element predominates and needs to be featured to the greatest extent. In late years style has been quite an important factor in juvenile productions and by no means negligible in masculine footwear, but, in neither of these does it play anywhere as prominent a part as in women's shoes. Most women when they enter a store to purchase a pair of shoes are chiefly interested in style, novelty, attractiveness and smartness, and the salesman who expects to effect sales must certainly make a study of these points and be able to talk intelligently on them.

Women are much given to shopping. If they see a pair of shoes in the window, they are quite likely to go in and make enquiries regarding them, where a man would never think of doing so. Frequently women who start away from their home with little or no idea of buying a pair of shoes, will see something that interests them and enter the shop.

## Turning Casual Inquiries into Sales

There are two points to be made here. The first, is the desirability of giving a good deal of window space over to shoes that will appeal to women from the standpoint of style and classiness, and will prove the means of inducing them to enter the shop. The second point, is the need of salesmen making a special study of how to turn these inquiries into sales. Some salesmen are especially adept at this. A woman enters the shop and asks the price of a certain shoe in the window. Before she realizes it, the salesman has her trying on the shoe, and, in the majority of instances, where a woman gets so far as trying on a shoe in which she is interested, a sale results. It requires a knowledge of how to go about it in order to secure such desirable results, and every salesman should make a study of this.

Most women prefer a certain degree of privacy in being fitted and it is good business to provide such for them. They are also impressed by an artistic store and proper and comfortable facilities for trying on shoes. Some of the larger establishments have found such conveniences as a rest room, writing department, toilet, etc., features that play an important part in attracting women to the store.

Outside of the immediate profit, one reason why a big business from the women is desirable is that they give a good deal of publicity to the store. When a woman is admiring a friend's shoes, the usual question is "Where did you get them?" When a woman is pleased with a pair of

shoes she is generally not the least bit backward in giving the shop where she purchased them proper credit.

**Devoting Attention to the Children**

There are a good many dealers who do not do as much business in children's footwear as they should. There is a big and profitable field open to dealers in most centres if they will only make a strong aggressive bid for trade in

out a pair of shoes quicker than a man can wear out a pair of socks. This means that a child has need of purchasing a pair of shoes about six or seven times a year, and, generally father or mother, or both, comes along. For this reason, getting the children's trade gives you a good strong hold on the parent's trade.

Quality is the big thing to be featured in the sale of children's footwear. It is, indeed, surprising how the aver-

juvenile lines. The fact of the matter is that the average dealer does not give this branch of the business the attention that it deserves, so that the dealer who does specialize on foot toggery for the younger generation will find his efforts productive of good results.

There is no denying that the children's trade is well worth going after. For one thing, a youngster can kick

age youngster can put a pair of shoes into the discard, so that if you desire to interest parents, you must dwell on the good wearing qualities of the shoes you have to offer. It does not do to say too much about the wearing quality of shoes for children unless they are worthy of high praise. To highly recommend a line and to have it wear out quickly,

*(Continued on page 38)*

# THE PROPER WAY TO BUY ADVERTISING

The Folly and Waste of the Ordinary Attitude Toward This Department—Applied to Any Other Investment or Expenditure It Would Spell Ruin and Disaster—Start the Year Right—Have Something to Say—Tell Your Story in Simple Pointed Style

By a Staff Writer

**M**ORE money is wasted in so-called "advertising" than in any other department of business expense or investment, whether wholesale or retail. If one could only stop this waste, millions of dollars could be saved not only to advertisers but to the country, and legitimate advertising would be raised to a plane of respectability and usefulness that it does not now enjoy. There is no greater field for the exploitation of folly and stupidity than advertising.

The reason for this is that even sane people do not seem to apply to it the same principles they insist upon when they buy any other commodity, or exercise the same common sense that is devoted to the commonest expenses of the store or factory. In a word, advertising is regarded as a wild speculation rather than an investment, and men take a "jump" at it instead of giving their minds to the handling of it as an ordinary business proposition that involves profit or loss.

We invite any retail merchant reading this article to sit down and carefully itemize and add up the money he has spent during the past year and charged to "advertising," and ask himself if the list and total are a credit to his intelligence. He will find that very much of the amount has been the spasmodic result of appeals to his sympathies, his prejudices, and a good deal of it he will admit has been pure "hold up." Some of it has been mere guess work at best, and as far as results have been concerned, he might have put part of his money into the sewer. The part that could not be charged to charity ought in all fairness to be charged to his

personal account, because of his not being able to say "no" to a rotten proposition. Retail merchants, particularly in the smaller towns and villages, are not only easy marks for church, society and philanthropic parasites, but even the local papers load on them publicity that is not worth half the money they pay for it. So that in nine cases out of ten the money spent represents just so much pure waste.

Because you are living in a certain town and make a living out of selling goods to its people, that is no reason why you should be assessed a special tax to support churches, patriotic societies or one-horse journals that live on the tolerance of the community. There are business men who think they are advertising when they spend two dollars on hand-bills, take space on the town sign boards, or contract for so much "advertising" in the local paper. There is no trick in spending money and calling it "advertising," but it requires quite as much ability to buy and use with a profit advertising space, as it does to buy goods and dispose of them at a margin that gives you a chance to pay rent, interest, salary, and have a little left for a rainy day.

Advertising is as much an investment as merchandise, and no man should put out a dollar without convincing himself that he will get at least as much back, any more than he should buy goods that will not bring customers and a profit that will pay for the risk and expense in handling. If the task of settling what advertising really is were any more difficult than deciding what kind of goods will sell there would be some chance to call advertising a gamble, but a merchant has quite as much opportunity to judge whether he is getting value for his money when he uses advertising space as he has when he buys cloth, shoes, furniture or dress goods. The trouble lies in his attitude or habit of thought with regard to the whole proposition.

In the first place, the whole subject is approached usually in a most unbusinesslike manner, and it is no wonder that serious mistakes are made which involve not only loss of money but dissatisfaction and disgust with the whole business of advertising. The very first thing a merchant should do, and this is the time of year to do it, is to decide upon his policy with regard to advertising. This throwing a little money now and then through the year into the pot and expecting results, is most abject folly. Decide upon the amount of money you ought to spend and set this faithfully aside for the purpose. There are various ways in which you can arrive at an advertising appropriation suitable to your particular business or requirements. Some appropriate a lump sum and others take a percentage on their sales for the previous year, or for six months at a time. In any case, there should be system or method in your approach and handling the subject from the start.

When you have once decided upon the amount you can afford to spend, calculate carefully the best methods in which to spend it profitably. There are various means of publicity that have their special advantages for certain lines of business. Sometimes the bill-board will yield good results, but for some lines they are not only too expensive but ineffective. The newspaper may be regarded as the best means of communication between the retail merchant and the public for

## Brighten Up Campaign

*Footwear dealers might take a leaf from the painters on their "clean up" campaign last year and in the "dress up" campaign inaugurated this year by the clothing people.*

*Cover it in an advertising campaign.*

*Push the idea in your window trims.*

*Write letters to people you know or think might be induced to patronize your establishment.*

*Here is a spring idea footwear dealers should elaborate upon.*

all purposes. But there are newspapers and newspapers. Do not patronize a paper because it is on your side of politics, or because the editor is a "decent fellow" or a member of your lodge or church. When you spend money for advertising, see that every cent goes for the purpose for which it is intended. When you give money to the church or to help along the "cause," take it out of your "personal" pocket and not out of your advertising appropriation. Let the newspaper make a "show down" in circulation so that you may know what you are getting for your money.

Now, circulation is not everything in newspaper advertising, by any means. There may be one paper with a thousand circulation in a town that is worth more to a retail business than another with two thousand. Quality in circulation is as important as in goods and often means much more. Make sure the paper reaches the class of people you desire to read your advertisements, make sure there are enough readers to make it worth while—then go ahead.

Make a contract for adequate space, secure a settled position in the paper, so that people will know every day or every week where to find your announcements, and then devote your energies to getting the most out of the space you contract for. Put it down that intermittent advertising is one of the poorest investments a merchant can make. It is the constant hammering that counts. Do not give people a chance to forget your store or your advertisements. Keeping everlasting at it is the secret of success.

When you have done all this, write or have written for you, real advertisements for your space. Most merchants fall down here. They leave their advertisements until the last moment and then throw copy at the newspaper that is not worth setting up. This is where most of the waste comes in. People will not only pass over your ads. but quit your store when you just chatter. Advertising is worthless when it stops "pulling." It will pay you better to keep up your ad. talks than it will to keep up the decorations of your store interior or your lodge and church duties.

The secret of successful ad. writing is like that of a good speech or sermon, so simple that it is often overlooked. First of all have something to say and then say it. If you have nothing to say you might as well save your time and your advertising space. When one looks at the average newspaper and reads the cheap platitudes and talks that mean nothing, he cannot wonder that advertising is looked upon with suspicion. Have something to talk about.

Then tell what you would have people know about it in the simplest way you can. Tell them the truth for the truth is always more attractive than fiction. Cut out the big talk, the adjectives and the clap trap, and tell buyers why they should buy. Make the telling as attractive as a story, using the shortest words and sentences you can put together to do this, and you will find people will not only read what you have to say but look for more, and that is advertising art.

---

## WHAT GOOD CREDIT MEANS TO YOU

It pays to keep your credit good. You never know when it will serve you as a valuable asset and help you to make more money.

The man who meets his obligations promptly, who does not evade drafts—takes advantage of discounts, and does not seek time extensions on phoney pretexts, is the one who gets the favors and deservedly so, from the manufacturer. The writer was in a large eastern factory the other day, which turns out very high grade women's shoes in a certain line. A leading western retailer entered and was waited upon by a gentleman with whom he was only slightly acquainted. The caller made known his mission, stating he wanted a few dozen pairs of such-and-such a style, in order to fill out the lines which he had been handling for some time, as his stock was getting rather low.

"I am very sorry, Mr. Jones," remarked the man who greeted him, "I do not think we can accommodate you. Of course, we are not refusing your order, but we really could not promise deliveries on any definite date, and you say that you want them within a reasonable time."

"Yes," declared Mr. Jones, "I would like to have them within four weeks."

"Yet," added the salesman, "we have a capacity of only 7,000 pairs and in order to meet our demands we should be producing at least 10,000, so insistent have been the requisitions for our goods."

"Well, I have never been turned down before," remarked Mr. Jones.

"We are not turning you down now," was the reply, "we have told you that we could not promise you deliveries within any reasonable date, and are only frank in the matter."

"Your Mr. T. knows me very well, and I am sorry that he is not in, as I feel sure he would let me have the goods."

"Oh," came the rather interested response, "you have been dealing with us for some time?"

"Yes," quoth the visitor, "I think if you look on your books you will see that I have placed some pretty fair sized business with you." The salesman left and going to the accountant, evidently made a few inquiries, for he came back with a rather different expression and pleased look.

"Well," he said, after some further conversation, "we will do the best we can for you, and get out what you require in your line. It means, of course, that we will have to sidetrack some other fellow whose orders have been placed before yours, but we will give you the goods just the same, within four weeks, and at the price you mention."

What did the foregoing incident indicate? It meant that Jones had paid his accounts promptly and taken advantage of all discounts, that he had not been a complaining, troublesome customer, but one acting on the principle that quick settlements make good friends. The result is that he is getting this special line of shoes at a time when he needs them and before increased cost comes into effect.

"How can the firm do this?" some one may ask. Well they will do it by sidetracking Mr. Grey, Mr. Brown or Mr. Green, with whom, perhaps, they have been doing business, and who have already placed orders, but their payments are none too ready and their credit not any too promising. The slow paying man is the fellow who gets sidetracked when it comes to a climax or a test.

"How do you account for that?" Well, when business is brisk, factories do not care about catering to men whose accounts give them trouble in collection, who are airing a great many grievances, or possibly sending back a large number of shoes on flimsy pretexts. They can secure enough business without this class of trade, and Mr. Slow Pay and Mr. Quibbler and Mr. Constant Kicker may get smooth promises, but certainly not prompt shipments.

## SOME TRAVELLERS I HAVE MET

"O wad some power the giftie gie us  
To see oursels as ithers see us."

—Burns

By PRACTICUS

No doubt the "Retailer" is a great topic with travelling salesmen, and I venture we dealers come in for a good deal of "keel hauling" at times at the hands of those who sell us goods, especially when the "good fellows get together," "with the tein on the table and a good song ringing clear." Well, some of us may deserve the criticism, and others, I am sure, not, and as in everything else, there are two sides to the matter. If a few of us on this side of the subject could only exchange our views about travellers there would, no doubt, be as intensely interesting developments as in the discussion of the man behind the counter. Not with any idea of "starting" anything, but with the sole purpose of holding up the mirror to some of those men who think they are the unfortunate martyrs of circumstances that throws them from Monday until Friday into the company of half baked, sore-headed purveyors of merchandise, I am going to give a few opinions of men I have met carrying sample cases, some of whom will not only be recognized by other dealers but by some of the "boys" themselves. The traveller is a "necessary evil" and we would find it hard now to get along without him, but there are certain things that come with the convenience of having a man calling regularly with samples that often offset the advantage to some extent at least. The character of the man has a lot to do with whether he is helpful to a retailer in every sense or whether he invites the treatment that he often accuses the dealer of handing out to him. Good plain, every day horse-sense will usually save a traveller or anybody else from running up against things that are not pleasant or profitable.

\* \* \*

There is a salesman who comes into our store who arrives like a whirlwind. He is a well-meaning, enthusiastic fellow of large proportions with voice to match, and he bawls out his greetings from the front door, or as soon as he sees me. If I am at the office in the rear, he marches back with the pomp and noise of a cavalry sergeant-major minus the spurs, and opens up on me without looking to see what I am at, or asking whether I have time or am disposed to look at his lines. What saves him is his good nature and earnestness, and this often prevents his getting a trimming. I would buy more, or at least buy more cheerfully, if he were less noisy and more thoughtful. We all appreciate considerations, and that covers a multitude of business sins.

\* \* \*

There is another salesman who is the very reverse of this. He comes into the place apologizing in his very walk and look for having to humble me to look at his samples. He is a well-meaning fellow, but, if he only knew it, he is like a dog with his tail between his legs, inviting a kick. All the world respects a man who respects himself, and has no use for the craven or timid fellow in business. "Blessed are the meek" is all right spiritually, but if you let people walk all over you in business you won't even be a decent door mat presently. The man I speak of has the goods I want, but he actually inspires in me the desire to pick flaws in all he shows me. Besides, it "riles" me to look at him and stirs up the dog in me that wants to worry him.

\* - \*

I have often thought that the Psalmist must have just been visited by a drummer when he wrote, "I said in

my haste all men are liars." In the retail trade the temptation to lie may be bad enough but when a man sums up all he has heard from travellers in a day he wonders why the Ananias Club doesn't open up a special chapter for grip men. Sometimes it is about the markets, sometimes about materials, sometimes about their sales, and often about their competitors. There is a man who comes into my store at least twice a month who is the most accomplished and variegated liar I have ever met. He is one of those fellows who does it so cheerfully and carries it off so well that it makes you wonder what he could do as an apostle of truth if he once got fairly started. I never believe a word he says, but as his goods are right and his prices suit me and I know my business, I let him lie. It reminds me of a story I heard of a boy who asked his father, a deacon in the church, if he knew the difference between a western editor and the man who dies wool on sheep. The deacon gave it up. "The man who colors sheep," said the boy, "is a lamb dyer." "Well," said his dad, "What about the editor?" "I dunno!" said the lad, putting his tongue in his cheek.

\* \* \*

The story magazine traveller is a nuisance. I mean the fellow who points his finger and begins with "that reminds me." I have got to the point now that when these fellows begin their "drummer's yarns" I do some mental arithmetic in regard to stock plans, or figure out the wording of my next day's ad. There are some fellows who can tell stories worth listening to and there are others. By the way, I heard a good one the other day that will interest both travellers and dealers. A man who represents a Montreal house and who is known as one of the best story tellers on the road, says he cut out calling on a man in our town in another line who has placed permanently across the front of his store the sign, "Latest American Ideas." He sold him so little goods and got roasted so much with regard to Canadian lines that he finally gave the concern the "go-by." He was passing the place some time ago, however, and the retailer pulled him up, and after the usual preliminaries about the weather, remarked that he had just been telling his neighbor the furnishings man, that he (the traveller) had the greatest fund of new stories of any man on the road. When appealed to for his latest the traveller demurred, saying he had quit story telling and was selling goods. On being pressed very strongly, however, he agreed to tell them a dream that he had a night or two previously. "I dreamed that I had passed away, and, strange as it may appear to you, I got into the right place. After I got inside the pearly gate, I suddenly pulled up with great consternation. You know how I chew tobacco. Well, I had a great mouthful and didn't see any place to get rid of it. An angel seeing my hesitation and distress, slipped up and asked me what was the trouble. I explained. If that's all, said he, it's easy, and, leading me to a place behind the gate where there was a hole leading down to the 'other place' he said, 'Spit down there.' I reached over joyfully to get rid of the quid and drew back. 'What's the matter?' asked the angel. 'Why I nearly spat on old So-and-so's bald head. You know the old dealer who sold 'American Specialties' in W—. 'Is that all?' asked the shining one in disgust. 'Spit on him! He never bought any goods from you.'"

# TIMELY SHOE TOPICS

## What the Best Dealers are Doing—In and Out Among the Retailers —Hints on Selling Rubbers—Making Money Out of Children's Lines

### Selling Men's Rubbers at Good Profit

"People will pay a good price for a good article. I am thoroughly convinced of this," remarked a leading city shoeman the other day. "For years we have been selling first quality men's rubbers for \$1.00, practically making about 20% gross on each pair. Now this is not enough—for it costs all of this to do business at the present time. The retail merchants took up the matter and thought that men's first quality rubbers should be sold for \$1.25, in order to give the dealers a fair price and considering the fact that this kind of footwear is not an all the year round article the same as leather shoes.

"Well, some of the members of our firm objected to putting rubbers up to \$1.25, and said that we had sold them for \$1.00 in years gone by. They declared many of our patrons would complain and that possibly we would lose their trade. In order to satisfy them, we marked a certain first-quality rubber of a well known make at \$1.00, and another brand, which cost us the same figure, we marked up to \$1.25, just to see how the new schedule would work out. Would you believe it? We have sold a great many more of the \$1.25 rubbers than the \$1.00 kind, which shows that people will pay a good figure for a good article."

"I also had a somewhat similar experience," remarked another shoe dealer. "We also had been selling men's high grade rubbers for \$1.00, but this year we marked the figure up to \$1.25, thinking, of course, that our sales would decrease by 10 or 20%. I was going over the books the other day and found that we had sold just as many rubbers so far this winter at the advanced figure as we did last, and that we had really fewer kicks. Of course, in marking up any line of shoes—it should be remembered that if rubbers were sold at 50c. a pair, there would now and then be an occasional caller who would say the price was too high. Taking all things into consideration, I am thoroughly convinced that getting a profitable figure for a dependable article is the right method of merchandising, not only in the matter of rubber shoes, but leather shoes as well."

### Don't Attempt Familiarity With Customers

It does not pay to be flippant or funny, particularly with strangers. A young lady walked into a certain shoe house in Hamilton the other day, and said she wanted a pair of button shoes with black cloth tops and commonsense heel.

"What size, please?" asked the flirtatious and dashing young clerk, the boss being out at the time.

"Two," was the demure reply.

"Are you sure two is your size?"

"Oh yes," came the subdued answer.

The clerk made a pretence of looking around the shelves, and once more approached the young lady, inquiring if she were sure that she could wear two. In a frigid tone, she gave him an affirmative response. Then the young gallant said:—

"Oh, excuse me—but in shoes I also wear two—one on each foot."

Needless to say the sale was not made, for the young woman thoroughly indignant at the levity and attempted witticism of the salesman (who, of course, was covertly reflecting upon the veracity of her remark regarding the small

size of her foot) promptly left the store. It does not pay to be too "gay."

"I see a great deal in your paper occasionally," remarked a Winnipeg retailer to the SHOE AND LEATHER JOURNAL, "about running a shoe store without a repair shop in connection. I would just as soon think of conducting my establishment without display windows, fixtures, fitting stools or silent salesmen, as do away with my repair branch. It brings custom to my store every day, and we make a good profit on the operations of the department. Many people come in and like a certain style of shoe or a nice fitting last, but want the heel lowered, or raised a trifle, a pair of rubber heels put on, or some other alteration made. If you promise to send out and have the job done, the caller will possibly change his or her mind, and tell you not to bother; but if you are in a position to promise that you can attend to it at once, you are quite sure to seal the sale. Cases like this arise time and time again. Any little defects, such as a damaged eyelet, a slight rip, a torn hook, or possibly a badly stitched button hole—all can be remedied within no time. Think of the bother and annoyance of sending out to have such little odds and ends attended to. There is not only the delay, but many other difficulties to contend with. There may be ideal repair men throughout the country, but I notice that most of them take particular pleasure in completing the jobs of their own customers first, and the shoe store work gets any time that is left. Frequent misunderstandings arise and the retailer is at the mercy of outside service, and in order to be successful he should have a self-contained establishment. I might say a great deal more on this subject, but let me tell you that I would as soon think of doing a shoe business without handling rubbers or findings, as I would without a competent repair branch."

### Making the Children's Branch Pay Well

"I have a specially fitted up children's department in the basement of my store. The stairs are right near the main entrance and the descent is gradual—or you might say, inviting, because this department is attractive and well arranged in every respect," remarked a leading retailer recently, who does business in a western Canadian city. "Last year my turnover in shoes was considerably over \$100,000, and I want to tell you that I did between fifteen and seventeen thousand of this amount in my children's department. I fully expect—with some new wrinkles which I have picked up and some live suggestions that I have adopted—to do \$20,000 worth of business in the children's line during 1916, and I don't think that I will be disappointed. I have two persons, specially qualified, to look after this branch. They take a pleasure and pride in their work, understand human nature and the management of juveniles, and have infinite patience and tact. They can arouse their interest and send them away proud and pleased, and at the same time, the mothers feel that, in the agreeable service rendered and the mutual satisfactory relations, they themselves have not been overlooked."

The children's trade idea is especially worth the consideration of the up-town store, as mothers will invariably prefer taking the youngsters to a convenient shop if she knows she can depend upon getting the goods and fair treatment.

# THE SPIRIT THAT MUST WIN

Letter from One of the "Acton Boys" Showing the Spirit of Indomitable Pluck and Humorous Optimism that Helps the Canadians to Win Out

A LETTER has just been received from Company Quarter Master Sergeant Clarke of the 20th Batt. Canadian Expeditionary Force, who was formerly on the staff of the Art Department of the Acton Publishing Company, and who left with the Second Contingent to fight the fight of freedom "Somewhere in France." It speaks for itself as showing what our Canadian soldiers are made of and no doubt if widely read would prove an incentive to others at home to join the colours. The letter addressed to Mr. Wm. Ralph, of the Art Staff, says:

SEA-VIEW HOTEL,  
25 (I think) Nov., 1915  
DICKEBUSH (NEAR WIPERS).

Dear Billee—Thanks for yours of Oct. 13, received yesterday. It's good to receive news of the things that happen in Toronto, and much more so of my old friends the Actonians.

I am writing hunched up in a corner of my dug-out, sitting on the pillow of my virtuous bug-walk (or is it worm-track), so any irregularities in my writing or "spellin'" you must put down to the fact that I pause occasionally to lash out a rat, or pick a worm or so from the back of my neck-tie, where the gold stud rubs—or grab at some creeping "insek" that is endeavoring to give me the kidney-punch.

By the way, my pillow, I have just discovered, consists of 2½ pairs of sox. These in their virgin purity were a "field-grey." Their color now is a kind of futuristic blend of moss-green and brown. Their odor is the same color, and I believe to-night I will sleep in my smoke helmet (safety first).

Well, anyhow, Billy, I am able to sleep and eat, and work the hardest of work, which proves that I am in the "pink" and still going strong.

Believe me, this is the life—a man's life—and we live the whole of twenty-four hours each day. Cold discomfort, hard work and danger—it's all in the game and not one would desire to avoid one iota of it all, knowing that we have set our hands to the plough and must not turn back.

To tell you of daily doings is scarce interesting. Accounts in letters to the papers must bring before you vividly these things that go to make up a life in some ways settled despite having happenings and daily surprises. But some things cannot be told, can only be felt by us, by association the splendid spirit of comradeship in all ranks, the cheerful optimism through everything and the good human underlying conditions. Our regiment is having its fair share of trench work. From the first week of landing we have been at it, no great display, no charges, and all that, but the hard straining work of "holding the line." Weeks of cold rain have flooded the trenches, and there is constant work under dangerous conditions, repairing, altering and watching.

Recently my work has been, with the other C.Q.M. Srgts. of getting rations and supplies up from a base in rear of lines to our respective companies. We start off about dusk, sometimes with the stuff packed on mules, sometimes on wagons (limbers) and "sneak" in (I think that is the best term). Our journey by devious ways is about 4½ miles and for the greater part exposed to shell and rifle fire.

There is always a strained, intense feeling when going up, especially after we pass a certain point, the feeling of "what's coming next" through it all. After we have "delivered the goods" (that sounds quite Canadian) we manage to meet again.

Then comes relaxation and we lighten the journey back with rat-hunting and at one point on the homeward

route manage to call at an "estaminet" which has a sonorous, almost unpronounceable French name, but which we briefly call "The Pig and Whistle" and there procced to "blow in" the lordly sum of 1 fr. each, which a beneficent government allows us for spending money daily. We squander this filthy lucre on Belgian beer. Now I could write an essay on Belgian beer—suffice to say that so far I have not heard that time-honored ditty, "Beer, beer, glorious beer," sung after a carouse on it. In fact the greatest compliment I have heard paid to its glories was from a Cockney. "Belgian 'stuff' I calls it, never calls it beer. I could make a whole brewery of it wiv the smell of an English bunghole." Now you know the accent—put a great deal of indignation in it and that contemptuous droop of the mouth and you have it.

Again the said "Pig and Whistle" hath in its precincts a fair Parisienne who warbles lustily many ditties of the boulevards. Well, as the psalmist says,

"All work and no play  
Makes Jack the best policy."

Glad to know you have joined up. Guess your manly bosom swells with pride when you turn up on Monday morning, somewhat stiff, and recount to the assembled staff the "doings" of the previous Saturday afternoon, and the envious looks of the "might-comes" when they meet you on the street and you in all your martial glory and a tight belt. Well, Billy, good luck to you. As the Immortal Bard says,

"Breathes there the man with soul so dead  
Who never to himself has said  
This is my own—my regular brand  
—"Black and White please."

There have been quite a few casualties in the battalion—almost a daily drain. No big lists, yet the record shows work continuously done under shell and rifle fire. But the men are sticking it fine. One of the finest suggestions was made by a sergeant of ours, and which of course the present powers will not see fit to adopt. It was that we should withdraw all troops from the first line trenches and send them home on leave, just leaving a janitor and his wife in charge of the said trenches, the man to attend to the furnace and his wife to sweep up and dust around a bit, the troops returning again in the spring. I think it a good suggestion.

Well I must get on, for in the words of George Washington, "Time and tide wait for no Yonge Street car." French humour is a thing indigenous and must be heard in its proper setting.

The other day the Huns had "strafed" Dickebush pretty badly and with that feeling of reverence for things sacred had aimed a few Jack Johnsons at the church. At the back of the church is a soldiers' cemetery (sadly crowded) and a shell had fallen there, blowing two bodies out. In the evening when passing, one of our drivers was heard to remark, sotto voce "Um! a clear case of 'wake up! Your king and country needs you!'" I could tell you of a cook who when a shell had smashed his trench kitchen stood up and shaking his fist at the enemy trenches shouted and cussed at them for spoiling "the finest soup he had ever made."

I must close. Have always a thought of the friends in Acton's. Kind remembrances to them all and a Happy Christmas to them. John, I know, would be in his glory here for there are 'steen thousand windmills on the skyline with plenty of black trees and pink sunsets. Best wishes to all.

Yours,  
H. W. CLARKE.

# LEATHER TRADE JOTTINGS

Items of Interest to Leather Producers and Users—What is Being Talked About in Leather Circles at Home and Abroad.

**T**HE hide situation is interesting just now as illustrated its nature as that of the proverbial flea which is here now and yonder when you go to put your finger on it. A month or so ago the market was on the upward drive and to-day it is more settled. Although the western markets are active and there is good business being done, prices remain quiet with packer, native steers at 23c, cows at 22c; county buffs do not bring more than 18 cents. Sole leather hides are scarce, as are also calfskins.

The dry hide question is growing acute, freights having gone up to three and a half cents on dry and 2 cents on green salted. This is on account of the scarcity of shipping facilities due to the controlling of cargoes by the British Government. It is practically impossible to guarantee shipments.

The French government, which has several times interfered with the exportation of raw calfskins, has put on an embargo that prevents the shipping of skins out of the country altogether. During the past year and a half the supply of light skins from Russia, which formerly supplied half the requirements of this continent, have been practically cut off and the only available skins come now from Norway, Sweden, Denmark and Holland. There is a certain amount coming from India, Egypt and other eastern parts, but these are poor and the quantity insignificant. The calfskin situation is thus becoming more and more serious. The shortage of raw stock and the difficulty of securing proper colors contribute to make the life of the calfskin tanner just now one of considerable anxiety.

## Why Not Fabrics?

The strange thing about the calf situation is that it does not seem to be helped out very materially by fabrics such as was the case several years ago when there was plenty of good calfskin on the market and prices were low. In fact, calfskins were carrying large stocks and sacrificing somewhat to make sales. To-day the demand is so great for fancy colors, and more especially in the delicate shades, that it cannot be supplied. It is a strange irony of fate. Thus it is that certain skins have doubled in price in the last three months. The abnormal situation is causing some tanners to hope for relief in the shape of a cloth revival in shoes such as will even up matters until there is some chance to get the raw material to a point where it will not be a hand to mouth proposition as at present.

## Shortage in Cattle Supply

The recent Census Report of the United States Department of Agriculture throws some light on the hide situation. In ten years the cattle supply has fallen off eleven million head, while the population has increased thirteen millions. In the meantime the export trade in leather and shoes has increased tremendously, the increase of 1915 over 1913 for ten months being about \$65,000,000. This item alone should prove rather a strong argument against the theory that the sea blockade has hurt the trade of the United States. In spite of the increased uses of rubber and of fabrics for which leather was formerly used, there has been a steady increase in the production of all kinds of leather, both upper and sole, and it does not look as though this generation were to see anything like a weakening of the situation. Twenty-five years ago buff hides sold at three cents in Chicago. To-day they are practically worth twenty. O tempora! O mores!

As illustrating the situation in leather across the line, where the shortage in some lines is more pronounced than

over here, it might be mentioned that several extremely large sales of sole leather have recently been made over there by Canadian tanners and the market is also very encouraging in certain lines of upper stock. That the facilities for production are not what are needed seems evidenced by the fact that the International Shoe Co., of St. Louis, with an output of over 60,000 pairs of shoes daily, from its numerous factories, has decided to start building a tannery plant in St. Louis, which can be indefinitely expanded to produce the leathers needed by this big corporation. It is also learned that the Armour Leather Co., of Chicago, had decided to erect at Sylva, N.C., a plant which will be producing, next March, about 150 barrels of chestnut extract daily.

## CONNECTED WITH TANNERIES MANY YEARS

The above is a picture of Frank Robinson taken some fifteen years ago. Mr. Robinson, who has recently been appointed Inspector of Tanneries, started when quite young to learn the business connected with tanneries, being first employed at Elgin Mills, Ont., and has continued in the same calling ever since, although working with different

Frank Robinson, Inspector of Tanneries, Richmond Hill

firms. Mr. Robinson was born at Bradford, Ont., in 1874, but is now living at Richmond Hill. F. A. Robinson, of Saskatoon, is a younger brother of Frank Robinson, and Mrs. S. J. Neilly, of Gilford, Ont., is a sister.

The Eighth International Shoe and Leather Market Fair will be held in Mechanics Building, Boston, during the week of July 12 to 19, 1916. Special efforts will be made to attract from all parts of the world, buyers of shoes, leather and of machinery and materials used in making shoes and leather. The European war has resulted in foreign buyers regarding America as the leading market place and source of supplies.

### SHOE MANAGER WITH WIDE EXPERIENCE

"I consider any measure of success that I have met with in the shoe business as due to economical buying, and turning the stock over frequently. Also gaining the customer's confidence and making every effort to see that they get every courtesy and satisfaction. I also give my personal attention to any complaints that may arise, rectifying same so as to make permanent patrons and a good advertisement for my department," remarked Mr. Grimason, who manages the shoe department of R. H. Williams & Sons, Regina, Sask. His experience has been thorough and varied, for he spent five years as a cutter in Manfield & Sons' factory

S. Grimason, Regina

Northampton, which is one of the busiest shoemaking centres of the old country. He was later with Darnells & Sons, wholesale shoes, and four years with the True Form Shoe Co., being manager of the London and Manchester branches. Coming to Canada some years ago, he was engaged as buyer for the shoe department of the late Philip Jamieson's store, corner Queen and Yonge streets, Toronto. He then spent a year with A. Levy and was for some time with the Boston Last Co. in Toronto and Montreal. In 1911 Mr. Grimason joined the Hudson's Bay Co.'s staff in Winnipeg and was buyer of boots and shoes, trunks and leather goods, for both the retail and mail order departments, and for the past two years he has been with R. H. Williams & Sons as manager and buyer for their footwear and leather branches, in which he has made good.

### HUMAN INTEREST IN THE SHOE SELLING GAME

(Continued from page 31)

will injure your reputation. I think it is well to be candid with parents. I recall a case where a gentleman with a young boy came into the store and asked for a pair that were in the window. The gentleman seemed pleased with them, but after looking at the boy and the condition of the boots he had on, I decided that if I were doing the selecting myself, I would not buy that shoe. I told him so and advised him to take another kind at a higher price. I explained to him that it wasn't because of the higher price that I recommended them because we made no more money on them, but that I was building for the future and so was

advising him candidly. He bought the pair that I recommended and that it pays to be candid is shown by the fact that the gentleman continued to come back for all his pedal needs, although he had never dealt at our store previously.

### Have Special Branch if Possible

If possible, it is preferable to have a separate department for children's shoes, or at least to have stock arranged separately so that it can be readily located by clerks. Speaking of clerks, the person selling shoes needs to possess special qualities. He is in the position of having to please two people—the parent and the child. A liking for children and patience are desirable qualities.

Special care should be taken in fitting children. When fitting shoes on adults, the clerk is guided by the judgment of the purchaser, but such assistance is not always forthcoming in fitting children and must depend to a large extent on his own judgment. The judgment of children is not always properly developed. I have often had them declare a shoe fitted all right when it was really paining them. Too many little ones are sold footwear that does not fit them properly.

### A BUSINESS AND SOCIAL LEADER

For nearly a century the firm of Beardmore & Company has been associated with the leather industry of Canada, and has occupied the very foremost position as to the character of its product as well as the commercial standing of the firm. The name has also been a familiar one outside the leather trade, both in this country and abroad, as representative of all that goes to make worth and prestige.

Mr. George W. Beardmore, the head of the business, has been associated with the firm from boyhood, following his late father, Mr. G. L. Beardmore, in his natural bent towards affairs, and has always devoted himself most assiduously to the development and expansion of the company's immense business.

In other ways, however, than in the administrative duties of the head of large business interests, has Mr. Beardmore won renown. He has the Englishman's innate love of sport developed to a marked degree, and for years has lent his support and co-operation to everything leading in this direction. He is a great lover of horses, and as might be expected, takes a deep interest in both their breeding and prowess. As an active member of the Ontario Jockey Club, and as an ardent patron of the Horse Show, he has been prominent in Canada for years. His special predilection, however, lies in the direction of the "Hunt," that goodly English sport that all true Englishmen regard as the pastime of kings. He has been the very life and soul of the Toronto Hunt Club for a long period, and the club has rarely ridden forth without his presence. He has been Master of the Fox Hounds for many years and regards the honor of the title as one of his proudest possessions. Interested in many charitable and philanthropic efforts in the City of Toronto, as well as in Canada generally, he is, generally speaking, a type of the old country English gentleman.

He takes a great interest in the Beardmore Farm at Acton, where their tanneries are located, and at Christmas presided at the Christmas Tree entertainment given to the employes. In other ways he takes a warm personal interest in the affairs of the employes of this, the largest leather producing establishment in the British Empire.

Outside of story books ladders are climbed one step at a time, and one solid step upward doesn't mean that you have skipped half a dozen rungs.

## A DE LUXE REPAIR DEPARTMENT

**A Boston Store's Effort—White Enameled and Nickeled Machinery Enclosed in Glass—White Duck Suits for the Operators**

**T**O show what a Boston concern thinks of the profit direct and indirect to be realized from a properly run Shoe Repair Department, we append a description of the most unique thing of the kind to be found in the world.

"Filenes" is one of the great stores of Boston and the Manager of the Shoe Department, Mr. H. B. Scates, is one of the most up-to-date and progressive shoe men of the United States. He gave an address at the recent National Association of Retail Shoe Dealers at New York that was one of the features of the convention.

The startling feature of Filene's repair department lies in the fact that all the machinery is painted with white enamel and certain parts of the mechanism that could not be enameled white are nickeled. The walls and ceiling of the department are painted in white enamel, and the operatives wear white duck suits.

### A Great Scheme

Mr. Hollis B. Scates, buyer and general manager, worked on the idea for six months before he had his plans perfected. Then followed many weeks of conferences with the officials of the shoe repair department of the United Shoe Machinery Co. to carry out Mr. Scates' ideas.

The Company found many new problems to solve before it was successful in meeting Mr. Scates' ideas, but it finally conquered all troubles, and the result is a shoe repair department unlike any other anywhere.

One problem that Mr. Scates and the United Company had to overcome was what to the layman would appear very simple. How to paint the machines so that the white enamel would retain the original white lustre of the paint caused a great deal of thought and many experiments. It was found that ordinary white enamel paint soon turned yellow, and as Mr. Scates desired a permanent white lustre, it was necessary to continue experimenting until finally a method was found of securing this result.

The accompanying illustration, taken from the "Shoe Retailer," shows the quarters occupied by the department, the arrangement of the machinery and the general aspect of the department. The department is located at the rear of the second floor and adjoins the enlarged men's shoe department.

The equipment consists of the United Co.'s regular 22-foot shoe repairing outfit, and a channeling machine, a universal slugging machine, edge setter and Goodyear welter.

The machinery is the last word in invention—the most modern ever installed and unique in many particulars. There are no boiling pots of wax, nor smelly, smoky flames—for all the heating is electrical. With this change from old methods, there is no possibility of burned threads that break quickly, scorched leather that wears out first, or overheated wax that burns both leather and thread.

All shoes will be polished before they go out and they will have new laces and buttons if needed.

### Department Enclosed in Glass

The department is enclosed in glass, so that customers and visitors may see every part of the equipment, observe the operatives engaged in repairing shoes and watch every operation of the various machines without interfering with the workmen, all of whom wear white duck suits.

Every night the entire department, including each machine, will be cleaned, so that during every work day the department will be spotlessly clean. As an advertising proposition, this unique department will attract a great deal of attention to the work performed in it, as well as serve to increase the popularity of Filene's shoe service.

The idea could doubtless be adapted to almost any shoe establishment without the expense of the glass enclosure.

A NOVELTY REPAIR SHOP

Any good painter will help out with suggestions as to a good staying enamel that would serve the purpose. White, of course, means a cleanly appearance, but other bright colors could be used.

### Preventing Slipping of Heel

I. Doushness, 307 Mackay street, Montreal, writes the *SHOE AND LEATHER JOURNAL*, as follows: I had the pleasure of reading your *SHOE AND LEATHER JOURNAL*, December 15th edition, and it strikes me the way you are suggesting to avoid slipping of the heel in low shoes, is an expensive one. Not every shoemaker can accomplish it; besides, the process suggested causes the leather to curl and it cuts the feet around the heel. It pushes the foot forward, where it makes the shoe narrower, and helps to create bunions and corns. It is easy to remedy the slipping of the heel when the shoe is constructed, without any extra expense, and that is: to cut the pattern  $\frac{3}{4}$  inch spring in the backquarters. By lasting this over the last, it makes it snug around the top of the shoe. It will keep snug on the foot as long as the shoe lasts, and also prevent the foot from slipping forward.

### LOOKS FORWARD TO ITS COMING

*H. J. McDearmid, a Saskatchewan admirer of the "Journal," writes: "Permit me to compliment you on the great improvement of the Journal during the past year. While I always welcomed its arrival and enjoyed glancing over it for items of interest, I now look forward to its coming and find the contents worthy of careful reading and consideration."*

**W**ITH the opening date a short month away, we want to say that the season of 1916-17 ought to be an outstanding one in Maltese Cross Rubbers.

The standard of quality that has attracted the trade and built up the popularity of this brand will be maintained as rigidly as ever.

Improvements have been made wherever possible, new styles added, all lasts remodelled and brought up to date and methods of construction still further advanced.

Our list of Selling Agents is a representative one. They are good people to deal with.

Nothing has been neglected that will make the "Maltese Cross" a thoroughly satisfactory line to handle.

# Rubber Boot and Shoe Matters

What is What and Who is Who in Rubber Circles—This Month is to see the Opening of the "Rubber Ball"—New Goods, New Conditions and a New Season

**R**UBBER salesmen are going out a little earlier this year. For years the "Ides of March" have been sacred to the revelation of new samples, new prices, and new discounts, and the dreadful secret of "what was to be" has haunted both wholesale and retail trade for a month or more before the cat was let out of the bag, so to speak. This year arrangements have been completed a little earlier than usual, and the dogs of war will be unleashed on February 28th.

\* \* \*

## No Change in U.S. Lists

With the probability of "dollar rubber" in the near future, it was expected that the new lists of the United States Rubber Co., which as a rule are issued Dec. 1st, but which were delayed last year until March 1st, would bear some relation to the increased cost of all kinds of raw material. Nevertheless the announcement of the new lists on January 1st reveals practically no change in prices and an extra discount of five per cent. for early orders. So that the selling will be practically that much cheaper than December prices and both dealers and outside rubber manufacturers are at a loss to understand the move. Evidently the U.S.R. Co. is determined to get its full share of the trade if it can be got.

\* \* \*

## Crude Rubber Market

Crude rubber is practically now on a ninety cent basis as first latex pale crepe is quoted at 92c, with Para up-river fine at 85c. Similar changes may be noted in all other lines. A feature of the raw rubber market for the last year or two has been the steady advancement of values in cultivated rubbers and their gradual forging ahead of the "wild" or uncultivated varieties. Time was when Para set the pace for the world but to-day it takes a second place to the more assured product. As always happens, the dependable product becomes the standard.

The recent drop back in prices can hardly be taken seriously. So much so is this the case that manufacturers are buying six months ahead all they can get at the figures.

\* \* \*

## Canadian Rubber Conditions

It is too early to give any definite assurances as to Canadian conditions. It is safe to say, however, that as has always been more or less the case, the cue has been taken on this side of the line from conditions in the United States. Beyond slight alterations on some of the lines and an adjustment to changing conditions, no appreciable change has been made in the lists. As to the terms, etc., of course no announcement will be made until the salesmen leave for their territories later in the month, when it will be made simultaneously, for while not in active

co-operation, the various companies are in harmonious sympathy with the idea that there should be no war as far as they are concerned. Goods will be sold on net lists.

\* \* \*

## Some Features

"All reds" which were specialized by some concerns last year will be more fully taken up by the various companies, quite a variety being shown. Quite a number of new heels on women's lines are a feature, there being at least a dozen lines where three or four used to be the rule. Tan and white are shown to some extent and high straight military boots are shown for officers' wear in tan. Grey soles are more in use, in heavy goods particularly.

\* \* \*

## A Good Buy

Rubber footwear at present prices is certainly a good buy, and may be regarded in the light of sound investment. The man who lays in a good stock of rubber footwear on a basis of the present market conditions will have no reason to find fault with his business acumen by the first of November next. If the war keeps on and materials keep advancing in cost, and rubber is called more and more as it seems likely to take the place of leather for many purposes, there will have to be something done to let manufacturers out of a hole before the end of the year.

\* \* \*

## Rubber to Compete with Leather

Even though the crude rubber level maintains itself at the present market, says Hides and Leather, it will still be possible to manufacture rubber compositions of sufficient durability, from the standpoint of hard usage, as a soling material for shoes at a cost to the shoe manufacturer which will continue to place him at an advantage in the cost of a complete shoe, as compared with what would be the case were all the manufacturers totally dependent upon the leather market for their supply of both soles and heels.

There is substantial evidence each month that rubber has come to be an increasingly important factor in the shoe industry. No one seems to be able to furnish substantial evidence as to what the future cost of leather is likely to be, but the universal impression seems to be that it will continue to increase, and as a result thereof it is not at all unreasonable to expect that henceforth certain standard rubber compositions will occupy an increasingly important place as a commodity which will be recognized to a larger extent than ever by all shoe manufacturers. Within a short time some rubber companies expect to be obliged to advance the price of rubber soles and heels approximately 10 per cent. to 20 per cent.

Pithy Note and Comment on Shoe Matters—What the Makers  
of Shoes Are Saying and Doing—Shoe Facts and Fancies

**J**UST now the pressing question is how to get enough of the right kind of stock at prices that will make shoe manufacturing pleasant as well as profitable. The high price of stock of all kinds has set shoe producers scouring the country for supplies, with the result that the question of substitutes for leather has come strongly to the front. In fact this was one of the important issues at the recent meeting of the National Association of Shoe Manufacturers held at New York last month. The shortage has extended to sole leather as well as upper stock, and while tanners disclaim any such condition of affairs, shoe manufacturers realize that the time has come for them to explore other sources of supply for shoe materials. With hides going higher and higher and supplies practically cut off in some quarters by embargo and prohibitive freights, it is little wonder that users of leather have become a little "scary."

#### Possibilities in Fabrics

For shoe uppers fabrics have already relieved the situation from time to time as fashion or economy has caused their temporary use, but there is no use denying the fact that cloth and similar substitutes for leather in shoe tops have not given unqualified satisfaction in the past. Of course if the use of these materials becomes a necessity through the failure of leather supplies, consumers as well as manufacturers will have to make the best of the situation. Leather is not possible of expansion as far as supplies are concerned, and the experience of the past few years has shown that its possibilities are diminishing year by year. In sole leather the chief difficulty in regard to substitutes and experimenting has gone on in this line for many years. A concern on the other side of the line claims now to have produced a substance that will give twice the wear of oak sole with a lower cost to the manufacturer and greater adaptability to shoe purposes besides being more waterproof than leather.

#### Higher Costs in Materials

In all lines of shoe materials there have been material advances. In cottons, drills and other materials used for shoe trimmings there is a difference of from twenty to thirty per cent over the prices that prevailed six months ago even. Black duck that sold early last year at two and three quarter cents was quoted the other day at ten cents and the same applies more or less to other colored linings. In dyed goods there has been so much confusion and uncertainty that manufacturers are buying grey or bleached in place of colored cotton fabrics. Shoe webbings have advanced correspondingly, and woolen materials have gone up at least twenty-five per cent. Shoe tacks, threads, laces and practically everything in connection with the shoe has advanced. Shoe laces have gone up over a hundred per cent.

#### Shoe Colors and Styles

Makers of men's shoes are fairly busy and have not the obstacles to contend with that those making women's shoes experience, although the color problem touches men's as well as women's lines. It is difficult to secure colored

leathers and when these are procurable the shades are often unsatisfactory. There is a genuine shortage of champagne, grey, and ivory, and the prices of these materials are getting out of sight. Dealers who have not placed their fall requirements for spring are going to experience difficulty in having their orders filled in certain lines. Champagne seems to be very popular in this year's goods. Colored suede shoes are being shown to some extent. In men's shoes for spring tans seem to rule strong and manufacturers are pretty well put to it to get through their orders. Since the first of the year sorting as well as supplemental spring orders have been coming on well.

#### Situation in England

Conditions in Great Britain are indicated by the following excerpt from the Shoe and Leather Record of London:

A week or two since it was officially announced that the operations in certain departments of the boot industry had been scheduled as reserved occupations, so far as the men engaged therein were employed on war work. This measure, of course, was necessary in order to ensure that contracts for Army boots could be carried out, but, as we pointed out at the time, it was desirable that similar protection should be given to operatives engaged in the production of footwear for civilian use. In fact, it was obvious at that time that in a number of factories any further depletion of the staffs would mean closing down entirely. That view of the matter has now been considered by the Board of Trade, but before taking any action the officials of that department authorised Mr. J. A. Craig, secretary of the Boot and Shoe Manufacturers' Association, to ascertain what number of men would be relieved from the obligation to serve in the Army in the event of the request made by boot manufacturers being granted. Mr. Craig has accordingly communicated with the federated firms in the country, asking them to furnish the particulars required, and we believe that he will be in a position to supply the authorities this week with the figures they require. Whether the particulars thus furnished will impress the Board of Trade of the necessity for reserving a sufficient number of men to enable production to be carried on, we must wait and see. But the shortage of boots and shoes for civilian needs becomes more marked every week, and we trust that the figures to be submitted to the authorities will enable them to realise how serious is the position already reached. If they decided to take steps to ascertain what stocks are in hand in wholesale and retail stores throughout the country, and compare them with the quantities held in normal times, there is little doubt as to what decision would be arrived at.

#### Spoiling Shoes Purposely

Word comes from Lynn of a practice which every decent person would like to think cannot be general. The shoe manufacturer in question states that systematic damage is done to shoes returned by some retailers who claim allowances. He says he inspected some shoes that were sent back to him by a New York retailer, with a claim that they were

damaged in the factory. One shoe had three tacks in the toe, which looked as if they might have been left there by a careless laster. But this particular manufacturer doesn't use tacks for lasting his toes, but has the leather held by a wire until the shoes are stitched. So he went over to New York to demand of the retailer how those tacks got into the shoe. He forced a confession from the retailer. In confessing, the retailer said that he hired a shoe spoiler to spoil the shoes. He paid him a dime a pair. The spoiler guaranteed to spoil the shoes so neatly as to deceive the manufacturer. There are several spoilers, and when business is good with them one of them will spoil as many as 200 pairs of shoes a day, and will earn \$20 for his work.

The spoiling is done in various ways. They may break down the box toes, or force a heel nail up through the heel seat, or tear a button hole, or pull out an eyelet, or cut a little hole in the lining and drop a heel nail between the lining and the quarter, or cut the sole at the breast of the heel, as if the knife of the heel breasting machine had slipped by the guard.

As we have stated, we do not think the practice can be as general as indicated. No responsible retailer would take the risk.

### Condemns Woven Labels

At the recent meeting of the American Shoe Manufacturers' Association one speaker said, "the woven labels and top facings evil was condemned as a needless expenditure and eliminated as a burden to the extent that it has been substantially a reminiscence since 1906. We are now, however, having an echo of it, and the opportunity presents itself of co-operating to prevent its resurrection.

Considering the very high cost of materials compelling increases in the prices of the shoe, it is more than ever a needless expenditure to add to the shoe at this time, something that does not contribute to its quality and wear, and only, as a circular which has been called to my attention puts it, 'harmonizes with the newest colors, etc., and will give the inside of the shoe a finish of unprecedented beauty.'

"Present conditions, in justice to the trade and to the consumer, compel the elimination of everything extraneous to the shoe. To prevent the revival of this needless expenditure that adds nothing to the quality or service of the shoe it must be opposed in the beginning, now. Do not take it on! If your customers want woven labels, let them not only pay for, but furnish them. Furnish them, means that they will pay for them; and it means more than that,—that they will carry them in stock, and when the fad is gone, pocket the loss from the surplus on hand. If the customer furnishes these labels, you will not be obliged to keep a label account, a stock on hand and a clerk to care for the same. It will deprive the unconscionable buyer from the necessity of being tempted by the difference between what he would pay for a larger quantity and the manufacturer for the smaller quantity needed to fill his order.

"Woven labels add nothing to the comfort of the shoe, and as was said by the Convention of Shoe Manufacturers in 1906, 'should only be put in the shoe when furnished by the retailer at his own cost, except that he may be credited with the cost of the facing regularly used by the manufacturer on such goods.'"

### Care of Backing Cloth

One thing should be remembered in the care of backing cloth, and that is that the gutta percha of which the adhesive is chiefly composed is very sensitive to heat or cold; therefore, care should be exercised in the selection of a place to store your backing cloth.

If it is stored in too cool a place the gutta percha is more or less liable to shrink away from the cloth in the outer layers of the bolts, and if it is stored in too warm a place it will stick together. Neither of these conditions

really injures the adhesives, but may cause some inconvenience. If it becomes too cold and shrinks away from the cloth, it can be restored by gently running a warm iron over it, when it will again adhere to the cloth and be as good as ever.

If your backing cloth happens to be stored too near a steam pipe or other warm place, or if the hot weather of summer causes it to stick together, as it may, then the remedy is to place it in a cool place for a few days, when it will come apart as well as ever. This illustrates the desirability of proper care in the storage of all shoe factory supplies. A great many of the supplies used in shoe factories are just as dependent on proper conditions of storage as backing cloth.

For instance, dampness is very detrimental to lasts, as it causes them to swell, which makes trouble for the lasting department with poor fitting uppers, which is apt to be laid to wrong patterns or poor stitching, when the only trouble is that the lasts are damp and swelled so that the upper will not fit them, even if rightly cut and stitched.

Sandpaper is another thing that is sure to give trouble and do poor work if allowed to become damp. This will also give trouble if used too green; that is, too soon after it is made. Cases have been known where sandpaper was returned by the manufacturer as not up to standard, put away and allowed to season for a time and again shipped to the same shoe manufacturer, when it would give perfect satisfaction.

All of this simply goes to show the importance of proper storage conditions for all shoe factory supplies, and the folly of blaming the manufacturer of the supplies every time something goes wrong. It is better and fairer to make sure first that it is properly cared for in your own factory before you return it to the maker as defective.

### Ornaments will Cost More

All that class of women's fancy shoes that carry ornaments of one kind or another will show more beaded work this year than at any time during the past ten years. More bows will also be used than ever and it is all on account of the war which has interfered in this line more than any other known to the writer, in the whole trade.

Most beads come from Austria and France and it is almost impossible to get the fancy combination bead and steel ornaments that have been so popular of late. Beads that used to cost the shoe manufacturer 85 cents a package have gone up in price so that they sell today from \$1.50 to \$2.50 a package. This applies to the jet or black beads and a good many in the trade do not understand the cause of such a great advance.

Austria and France lead the world on jet ornament and beads and it is due to the fact that these countries have long specialized on such goods, as well as the cheaper labor employed, that they are able to produce so much cheaper than can the American manufacturers. In this country more would have to be paid for the actual making than the whole cost of the imported article. Foreign manufacturers can sell a certain line of beaded bows for 15 cents a pair which line would cost as much as that for the labor, if made in the United States.

Many shoes cost 40 cents per pair extra on account of the beading, while others run up as high as 75 to 85 cents extra. All beading of shoe uppers and ornaments here is done by hand as no machine yet made is able to do it. They have been experimenting on machines for several years but, up to the present, they have been unable to get a machine to give satisfaction.

## MANUFACTURERS' NOTES

I. Zumar, shoe merchant, Hull, Que., sustained a fire loss.

R. N. Williams, boots and shoes, Toronto, has assigned to Richard Tew.

Elmer Davis, of Kingston, was in Montreal, January 24th.

Judge Farnsworth, of New York, was a recent visitor to Montreal.

S. Collis, Collis Leather Co., Aurora, was in Montreal this week.

The Miner Rubber Co., Ltd., of Granby, Que., have opened a branch in Edmonton.

Chas. Campbell, Boston Last Co., Richmond, Que., was a visitor in Montreal this week.

A by-law was submitted to the ratepayers to authorize the loan of \$12,000 to a company for the erection of a boot and shoe factory in Listowel, Ont.

The Smardon Shoe Co., have recently received inquiries for their shoes from such widely separated places as Australia, Dutch Indies, Paris, France, and South Africa.

It is expected that a rise of about 8 per cent on immediate and fall deliveries in felts may be expected shortly. The shortage of wool and leather is advanced as the cause.

The Geo. G. Lennox Ltd., Winnipeg, has been recently incorporated to handle all lines of felts and high-class footwear. The president and managing director is Mr. Lennox. Complete stocks are also carried at Edmonton, Saskatoon and Regina for sorting purposes.

President John S. Kent, of the New England Association, gave his annual address in which he reviewed the events of 1915 as affecting the shoe and leather and allied trades, and secretary Thomas F. Anderson will present the annual report of the organization's activities.

Mr. F. W. Huty, sales manager of the well known eastern firm, F. F. Dalley Co. Ltd., Hamilton, Ont., manufacturers of the 2 in 1 shoe polish, accompanied by Mr. P. C. Rogers, arrived in Winnipeg recently for the purpose of establishing Western headquarters in that city.

The Manitoba Gazette contains notice that letters patent of incorporation have been granted to George G. Lennox, Ltd., Winnipeg, wholesale dealers in boots and shoes, with an authorized capital stock of \$150,000. The incorporators are George G. Lennox, F. W. Lonthood, C. S. Brown, Thos. E. Meredith, and J. J. Keelan.

The Kaufman Rubber Co., of Berlin, Ont., have made a generous offer to Mr. J. Leslie Axford, of the Children's Aid Society. They have a large assortment of rubbers for men, women and children, of which they are willing to send him a shipment. These are to be distributed to charitable institutions in the city and county.

A. Brandon, of the Brandon Shoe Co. Ltd., Brantford, Ont., recently left for Boston to look over styles in footwear and go through the leather market to ascertain prices of leather. He will also visit other leading shoe centres of the United States, and on his return, expects to be able to offer the trade the best and newest styles shown.

Cable advices have been received from River Plate stating that steamship companies have advanced their freight rates on green salted hides from \$30 to \$40 per ton on 2,240 lbs. Space for immediate shipment even at this high figure is very hard to get. It is less than three weeks ago that freight rates have advanced over 100 per cent, from \$14 to \$30 per ton.

The Tillsonburg Shoe Company have increased their staff, securing Ralph Roberts as assistant superintendent. Mr. Roberts will not find this task beyond him, as he has had charge of factories employing 500 hands, and looks forward to seeing this factory with an equal number of employes. Mr. Roberts is a practical Goodyear welt man, and should the company make Goodyear welts it will not

be long before they employ that amount of labor. Ed. VanSlambrouck will take charge of the sole leather room.

A special telegram to the Shoe and Leather Reporter from St. Louis on January 5 says the International Shoe Co. has announced plans to establish a tannery at St. Louis for the production of sole and upper leather. The project is to involve the expenditure of \$7,000,000. The acreage site has been secured and work on the big plant is to begin at once. Ralph Griffin, for the past fifteen years St. Louis manager for Wilder & Co., has been appointed general manager and will assume his new duties next week.

The annual meeting of the New England Shoe and Leather Association was held at its headquarters, 166 Essex Street, Boston, Wednesday, Jan. 19, at 12 o'clock noon. An interesting feature of the program was a reception complimentary to the officers of the National Association of Tanners, which this year has been drawn on Boston for both its president and general secretary. President H. Frederick Lesh, General Secretary Harry I. Thayer and Executive Secretary Cudworth Beye were among those who have accepted invitations.

It is declared on good authority that the balance sheet (which will be published with respect to the business of the Ames-Holden-McCreedy Company, for the fiscal year ending the 30th of April), will show a volume of business without precedent in the history of this company. It is too soon to give the exact figures as to the output of manufactures during the year, but it is estimated that they will be over \$5,000,000. The productions of the company are sold in advance for the next three months to come, and the hands are working day and night.

The National Boot and Shoe Manufacturers' Association, which met in New York on 12th of January, 1916, urged the restoration of a duty upon shoes that will cover the wage differential of the American over the foreign workingman and reiterated the sentiment expressed in past conventions favoring the creation of a tariff board or commission invested with the power of investigating industries in the United States and in foreign countries to the end that the Congress may be advised from time to time in the revision or correction of any of the provisions of the tariff law.

W. F. Bilger, who some ten years ago acted as advertising manager for the SHOE AND LEATHER JOURNAL, is now in charge of the advertising at the Montreal end of the Canadian Consolidated Rubber Co., taking the position vacated by R. W. Ashcroft. The latter, who has been appointed publicity manager for United States Rubber Co., New York, will continue acting in an advisory capacity for Dominion Rubber System, and Mr. Bilger will work under his direction. The advertising manager for the Breithaupt Leather Co., Berlin, is a brother of Mr. Bilger. The SHOE AND LEATHER JOURNAL extends hearty congratulations to Mr. Bilger on his new appointment, and wishes him continued success.

The German Government has prohibited exports of leather to all countries, with the desire to keep prices down to the civilian population. There is a scarcity of raw material, which, however, is general all over the world. There are hands enough, they say, to finish all the military leather needed as it does not require as much hand work as high-class fancy leathers which Germany produced in such large quantities before the war. Up to recently, quantities of leather have come through from Germany to the United States via parcel post, but these shipments have now ceased. It is also stated that wages are higher in proportion to the higher cost of living. That workmen are now receiving on an average of \$2.10 per day, prisoners working in tanneries, \$1.50 per day.

The Tillsonburg Shoe Co., of Tillsonburg, Ont., who make men's and boys' standard screw and nail shoes, have

(Continued on page 52)

## ELECTRIC DISPLAY SIGNS FOR SHOE STORES

Some of the Advantages of the Modern Electric Sign for a Retail Store—Is No Longer Classed as a Luxury—Works at Night, when Other Advertising Mediums Are Idle—Need Not Be Expensive if Operated Along Right Lines.

Many of the leading footwear stores throughout Canada have taken very kindly to the electric sign, and well they might, as it is one of the best advertising mediums that is to be found. The electric sign may not be able to close a sale, but it does one thing well, and that is it keeps the firm's name constantly before the public. From this alone, the actual advertising value of a well set up electric display sign can hardly be estimated.

The electric sign is at its best in the evening hours when the people are on the street, and their minds are free from the day's cares and worries. What better time could be had for bringing the firm's name, or some message, effectively to their attention.

It must be admitted that merchants have been slow in many cases to see the advantages in this class of sign and form of advertising. A fear of the initial and operating cost coupled with some doubt as to whether the results would warrant the expenditure, has prevented many dealers from looking into the possibilities.

The writer elicited from a large manufacturer of electric signs recently the statement that the retail shoeman has in his power the choosing of an endless variety of electric

signs from the simple, inexpensive and dignified sign to the large, elaborate and more costly ones. "We sell signs of a high order," he said, "that cost the footwear dealer but a very small sum to operate. By economising on the arrangement of light, we can get the necessary display effect at minimum cost. For real service we recommend to the retail shoe dealer the combination day and night sign. This is an attractive sign in the day time, and is electrically illuminated at night. A live shoe man should not let the fear of the operating cost stand in his way, as in comparison with the other forms of advertising used in the modern store, the cost is comparatively small."

### Types of Signs

There are a number of different types of electric signs on the market, all having some advantages. In general, there are three broad classes:

1. Illuminated signs and billboards. 2. Transparencies. 3. All lamp signs.

The average business street of the modern city affords so many things of an advertising nature that no particular one can hope for much attention unless it is very attractive or unusual.

The chief medium of outdoor advertising is the poster. The very extensive use of the poster makes it a most important factor in the advertising world. It enables the merchant to place his advertisement directly before the people he wants to reach. In general, the value of any particular poster depends largely upon its circulation. A board located in the heart of a city is naturally more desirable than one located in the suburbs. If it were possible in some way to greatly increase the circulation of a poster without adding materially to its expense, this would be the thing to do. This desirable result can be obtained by proper illumination.

In addition to the increased circulation, the poster becomes much more effective, due to the added attractiveness of the electric light. The proposition of illuminating a poster should therefore receive careful consideration.

### All Lamp Signs

The all lamp sign is the one which is in most common use. It is a most desirable type of sign for the customer to use since it gives a maximum amount of advertising for the expenditure. Roughly speaking, there are three types of letters in all lamp signs.

Each of these types of letters has its advantages and disadvantages. For large roof signs the flush type is very satisfactory and has the added advantage of being cheap to construct.

The sunken letter gives a better daylight effect due to the fact that it is impossible to gild the edge of the letter and thus make it more distinct.

There is no doubt that flashing adds a great deal to the effect of the sign. A flasher is driven by a small motor; the speed of the flasher being regulated by a worm gear.

The popularity of slogan lighting is due to the fact that a great many retail dealers have a slogan.

It has been well said that no advertising medium which affords a retail store the maximum amount of publicity for the minimum of expense should be classed as a luxury. The value of an electric sign, especially an attrac-

A type of electric shoe sign well suited to the average sized shoe store.  
Designed by The Denis Advertising Signs Co.  
Limited, Toronto

tive one, is that one does not have to look for it—it forces itself upon the consciousness of the pedestrian. One of the chief advantages of the electric sign is that usually there is but few dominating locations in a town and the advertiser who secures these possesses a certain amount of exclusiveness which can not be obtained in any other way.

Advertising in newspapers and magazines is limited to the amount of space which the advertiser can afford to take, but when an advertiser avails himself of one of the best locations in a city no competitor can dominate him regardless of how much money he desires to spend, for the simple reason that he can not improve upon the location.

The objection is made that an electric sign is only visible at night and therefore yields but 50 per cent efficiency. This reasoning, however, falls flat in view of the fact that no medium delivers 100 per cent. unless it is the street car, and publicity in a street car is offset by the crowding which frequently takes place and obstructs the public view. Many electric signs are just as attractive in the day-time as they are at night, and certainly everybody who is anybody seeks the busy centers. If this is true, all worth while people see one's advertising when such advertising is prominently displayed in the busy centers. The people who do not go out at night are usually those who have no money to spend or no inclination to spend what they have; obviously these people are not of much value as customers.

Of course the electric sign is not capable of delivering a long message. To tell a long story one must either use the newspapers, circular letters or printed matter of some kind. After the story is told and the name of the store is well established in the minds of the buying public, there is no better way to burn in the lasting impression than by the use of electric signs.

Electrical advertising is primarily night advertising. Night is an opportune time for advertising shoes. People during the day are busy, their minds intent upon various duties. At night, with tasks of the day thrown aside, they are receptive to the influence of anything that catches their eye and pleases them. They read attractive advertising and heed its message. A retail merchant who for years has followed the practice of turning out his window lights when he closes his store, was induced to try the experiment of leaving the light burn until 11 o'clock every night for a month. As a result of this experiment the merchant bought a window lighting equipment. Further than this, he employed some moving features, usually electrically operated, in every window trim. He has completely remodeled his interior lighting.

#### Some Good Footwear Signs

Illustrations are shown of several electric signs well adapted to the furniture store.

The sign designed for H. & C. Blachford, Limited, is unique. It is compact and conveys very forcibly the idea of the firm and its business. This is a type of sign that will always be read and is splendidly adapted to the shoe store.

Another sign of a suggestive character is also shown. It suggests a very suitable design for an electrical shoe display and can be worded to suit.

The permanent exterior electrical effect of the Standard Furniture Co.'s nine storey building at Seattle is something unique. The building is outlined by 7,500 4-candle power lamps which flash alternately blue, white and green, while the three enormous roof signs have 2,000 additional lights. These signs have 8-foot letters and are visible from every point of the city and for miles away. A large circular electric sign, a corner electric roof sign, shows the logan of the company, "Your Credit is Good," and has tood as a beacon for several years to the surrounding country. This electric display is reputed to be the most spectacular of any mercantile building in America and has at-

An attractive electric shoe sign of a Toronto Retailer. Shown by courtesy of the Federal Electric Sign Co. Limited, Toronto

tracted wide attention. This store was the first in that city to adopt electrical advertising. They believe in electric signs and electrical advertising all the time as well as for special events, and that electric signs help sell goons.

#### ENJOYING LIFE IN THE SUNNY SOUTH

Here is a picture of James Robinson, of Montreal, and James Young, an old timer in the rubber business in Ontario.

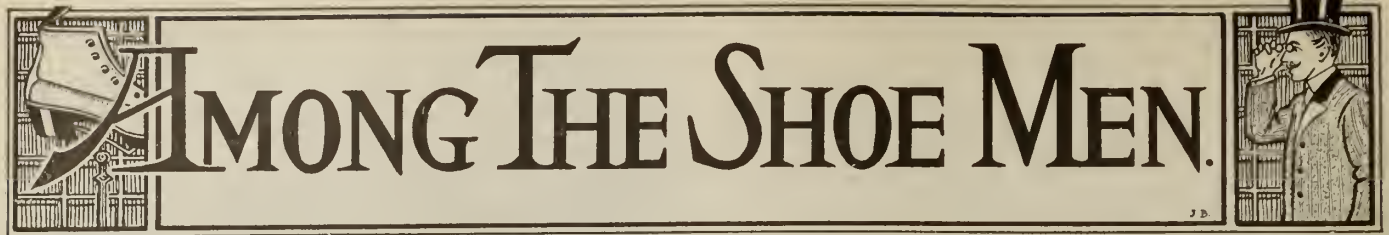

It was taken at Los Angeles, Cal., where they are spending the winter and shows that the two are of such a likeable disposition that a flock of pigeons nestle in their arms.

#### DULL FINISH IN THE TREEING ROOM

It depends a good deal upon how shoes come to the treeing room as to how much work is to be done on them. Take a dull finish shoe, for instance, and while most of them look all right, still it is evident that a few of them could be improved a lot if more work was put in and especially in certain medium lines. A dull finish upper ought to be cleaned twice, once before ironing and again after ironing. It ought to be washed up pretty clean the first time and even then the iron will bring out the dirt. Some foremen have a pretty good wash for this shoe and a wash that will soften anything in leather. They also have a good dressing, especially for gun metal, which gives the stock its original lustre.

# AMONG THE SHOE MEN.

The assets of Jas. McK. Dunn, shoe dealer, Ottawa, were recently sold.

The assets of A. Labelle & Co., Montreal, were recently sold.

W. C. Michaud, Montreal, shoe dealer, recently advertised this shoe stock for sale.

The Sample Shoe Shop was recently incorporated in Montreal.

G. M. Jenner, dealer in boots and shoes, Winnipeg, has sustained a fire loss.

The Merit Shoe Shops, Limited, have organized a great sale for this month.

The stock of Mineau & Bellemarre, shoe dealers, Three Rivers, has been sold.

J. R. Leroux, shoe dealer, of Montreal, has assigned to D. Lamarre.

J. C. Doyle, secretary of the New Brunswick Provincial Retail Merchants' Association was married in St. John, N.B., last month.

James Crotty will start a new shoe store in Bothwell, Ont., about the first of March in the building known as the public library, which he has recently purchased.

The death occurred recently of James Langstaff, a resident of North Augusta, Ont. He was a shoemaker by trade, and carried on a shop in that place for some years. The funeral was held under Masonic auspices.

The widow of Arthur E. Brown is suing the Canadian Rubber Co. under the Workmen's Compensation Act, for \$2,000, for the death of her husband, in February, 1915, in the company's building.

William Ship, who has been in the employ of J. McCullough, dealer in boots and shoes, 866 College St., for the last three years, has enlisted for overseas service. He is in the Queen's Own.

Private James King, one of the returned wounded heroes, has accepted a position as shipping clerk at the Hartt Boot and Shoe Company's factory in Gredericton, N.B., and has started on his duties.

The assets of the estate of F. W. Hill, boots and shoes, Ottawa, Ont., were offered for sale by public auction at the offices of Wm. A. Cole, assignee, recently. The assets consisted of stock-in-trade and fixtures amounting as per inventory to \$2,978.16.

The shoemaking and repairing business heretofore owned by Thomas Sheridan, in Parry Sound, Ont., has been purchased by John Steel, who has been for the past four years in the employment of Wm. Taylor. Mr. Steel is a first-class mechanic and will be able to give his customers satisfaction.

R. J. Walsh, manager of King Street store, and C. H. Smith, manager of Union Street Store, are at present in Boston looking over spring styles with a view to purchase. E. L. Rising leaves in a few days for Quebec, Montreal and Toronto to purchase extensively for the wholesale department.

Robert H. Moulton died recently in Perth, Ont., after an illness of two weeks. He was employed as town electrician of the municipal light plant for some time, but resigned this position about a year ago to learn the shoe trade, and had latterly been working in Lynn, Mass. Deceased was in his twenty-first year.

At the store of Johnston & Murray, St. Thomas, Ont., there was recently a drawing for shoes to the value of \$7.00

under the auspices of the Women's Historical Society. Major Stacey drew the numbers, and the lucky one was held by Mrs. Dodds, Crocker Ave. The proceeds of the drawing will be used to buy socks for the soldiers.

Ernest Reed, who has been connected with the Royal Shoe Store factories in Boston and Toronto for the past twenty years, died recently in Toronto of pneumonia, after only one week's illness. During his residence of three years in Toronto, he made many warm friends, who will all regret his sudden death.

Messrs. Ackert & Rathwell, of Lucknow, Ont., have taken over the Joynt shoe business, Stock-taking has been completed and the store opened up under the new management. The new managers are well known to the people of Lucknow and vicinity, and their names should insure the success of the business.

F. E. Woodward & Sons, Lachine, state that their new building will soon be fully equipped with machinery of their own special design, which will enable them to turn out the most finished products in all kinds of backed goods. They state that business has been particularly active, and indications point to a big year in 1916. They have had inquiries recently from South America and Australia.

Wesley Joynt, shoe dealer of Lucknow, Ont., has sold out his business to S. Rathwell & Co., who get possession early in February. Mr. Joynt has always had a good full stock on hand, and it is expected that under the new management, the store will be kept up to its past high standing. Mr. Joynt is running a clearing sale until the business changes hands, and is advertising this sale in the local papers.

The shoe department of the John Murphy Co. Ltd., of Montreal, has twice outgrown its space during the past year and a half. Eighteen months ago, the firm found 1,500 square feet of floor space sufficient to carry on this branch of the business, but the department has since grown to such an extent, that the 6,000 feet now allotted to it are fully required to accommodate the large stock of well known makes of footwear carried by the firm.

W. H. Stewart, well known in the shoe trade to thousands of Montrealers, has again become associated with the shoe business, having secured an interest in the Merit Shoe Shops, Limited, 510 St. Catherine St. West. Mr. Stewart was for a great many years in business for himself besides having the distinction of being the first to introduce high-class shoes into Montreal. Mr. Stewart has a wide reputation in the shoe trade and is considered one of the best authorities on styles and requirements of the Montreal public.

Malcolm Johnson (of the firm of Johnson & McCormick, shoe dealers, St. Thomas, Ont.) who disappeared from that city in April, 1914, has been located at Sand Springs, Okla. It was thought at the time that Mr. Johnson had suffered a lapse of memory as a result of a fall, but a telegram recently received, states that he is in the best of health, and has gone into the painting business. Further details are expected by his partner, Mr. McCormick, which will no doubt prove of interest to the latter, in clearing up the reasons for his departure.

David B. Vahey, who died in Bridgeburg, Ont., recently at the age of 68 years, was intimately connected with the early business history of that place. His brothers, William and Charles W., formed a partnership in a general store in 1887, which was carried on for seven years. In 1894 Charles

W. Vahey took over the boots and shoes and groceries, while David B. Vahey, his brother, worked with him for several years. Later on deceased purchased a farm in Michigan, where he spent several months each year. Mr. Vahey is survived by his brother Charles W. Vahey and many friends will regret to hear of his passing.

Another member of the shoe and leather district of this city has donned khaki and joined the colors, in the personage of Joseph O'Brien, of Waterbury & Rising's repair department. Mr. O'Brien is a musician of note and will go to the front with the 62nd Band, which has volunteered for service with the 115th Battalion now being formed. Mr. O'Brien's enlistment makes the eighth from the staff of Waterbury & Rising. The other members are as follows: Captain R. F. Rising of the 104th Battalion, Lieut. R. Ingleton, of the 115th Battalion, Sergeant Joseph Patchell, of the 140th Battalion, Private R. Brewer now with the 26th Battalion fighting in France, Privates George Griffith and Percy Howard with the 115th Battalion and Charles Labbe of the 55th Battalion. This firm has every reason to be proud of the splendid patriotic spirit shown by its employes.

Recently the merchants of Guelph held a "Dollar Day" sale, and in spite of the unfavorable weather conditions (the rain continuing without intermission until about three o'clock in the afternoon), the merchants are well satisfied with the results. Before eight o'clock a string of buyers had lined up in front of several of the stores, eager to get in on the many excellent bargains offered. The shoe merchants were agreeably surprised at their day's business. Mr. Cosford, of the Neill Shoe Store, declared that he hoped another year would find all the merchants unanimous in boosting this feature of trading. G. B. Ryan, who carries both boots and shoes and dry goods, said they had done a good trade, and were satisfied in every way with the day's selling. He believed the results fully justified the institution of "Dollar Day" in Guelph, and thought, had the weather been favorable, all previous records would have been eclipsed. Mr. McArthur, who has a thriving shoe business in the city, always counts upon a larger trade with the farmers, and felt that but for the rain his sales would have been much greater. He was well satisfied, however, and says "Dollar Day" is a good feature, and should be made a permanent one.

### PREPAYMENT DISCOUNTS ON RUBBERS

Editor, SHOE AND LEATHER JOURNAL:

Dear Sir,—I don't remember if I have seen the question of retailers availing themselves of 12% prepayment on rubber placing orders discussed in your paper or not. I would like the opinion of your financial expert on the matter, and the question opened up for discussion if you see fit.

Our placing order for winter rubber footwear amounted to \$678.00 on which we took our 5% prepayment and the usual 2% 10 days. Our sorting orders during November and December amounted to \$473.00, which did not include any line not bought in placing. Making due allowance for the fact that in this part of the country the weather conditions were very favorable for good rubber business on the above month, do you consider it wise for a large placing order to be given.

Our year's purchases the last two or three years have given over \$1,200 each year. With us the question of being able to pay in June does not enter the matter at all. The money can be had without any trouble. Does the extra discount secured offset the locking up that amount of capital for nearly six months.

I hope I have put the matter clearly and if the consideration of it in your paper is of any help to the trade I shall feel amply repaid in thus starting it in motion.

Yours very truly,

Jan. 28, 1916.

ONTARIO SHOE RETAILER.

### A WELL-KNOWN RUBBER TRAVELLER

L. Godbolt, the well-known shoe traveler, has been representing J. & T. Bell in the West for twenty-five years, and besides this, he has taken over the agency of the Kauf-

L. GODBOLT

Representative of Kaufman Rubber Co., Berlin, in Manitoba and part of Saskatchewan

man Rubber Co., Berlin, for Manitoba and part of Saskatchewan. He is one of three representatives in the West for the Kaufman Rubber Co., the other two being George Stockand, Edmonton, and Harley Henry, Saskatoon, representatives in Alberta and Saskatchewan, respectively.

### LEVELLING AND TURNING TURN SHOES

Direct levelling of a turn bottom is not the proper thing, for it always gives the sole a "wooden" appearance. The proper levelling machine is the roll leveller, smooth, plain surface roll with the hand hammer all around the edge and at those points where the sole bulges out. After the bottom is levelled with the hammer, it is finished with the machine. Applying the hammer after rolling is better than no hammering, but is far from correct and calls for a longer operation.

Never apply grease to the roll, for the smoothing stick of the hand leveller is passed over a piece of pork rind and this does not affect the sanding operation. But it is not the same thing when applied to the roll of the machine, as it will cause the grain to solidify with the grease or oil, and the sandpaper will only gloss instead of scraping the leather.

A turning machine that does the work right enables sole leather intended for turn shoes to be hammered before cutting, and the result is excellent, as the sole only has to be rolled to stay in permanent shape. As it is to-day no hand turn can perform the task if the soles are hardened by hammering before turning, as the leather would then be too rigid at the forepart of the sole.

As to the heel part of the turn shoe, I believe that turning by hand is the only proper way to avoid damaging a shoe. Opinions may differ on this point, but I never as yet saw the heel of a turn shoe turned right side out correctly when the operation was performed by machinery. As to the forepart, it always has been turned by hand.

## NEWS NOTES OF THE TRADE

J. T. Leishman, shoes and men's furnishings, Bruce Mines, has enlisted, and is closing out business.

Hector La Pointe, dealer in leather goods, Montreal, has assigned.

R. E. Blum, boot and shoe merchant, Preston, Ont., has assigned to H. C. Edgar. A special meeting of creditors was held February 4th.

A Reuter despatch from The Hague says a Royal decree has been issued, prohibiting the export from Holland of rubber and gutta percha, and articles manufactured therefrom.

"The Use of Rubber in the War" was the subject of a recent address by Mr. A. D. Thornton, an officer of the Canada Consolidated Rubber Co., Montreal, before the Railway Club of Canada.

One hundred and twenty-five parcel post packages, containing sheet rubber, weighing an aggregate of 1,375 pounds, consigned to Gothenburg, were taken from the Danish liner, Frederick VIII at Kirkwall recently.

Shoe and leather merchants in this city report that the trade this year is equally as good as last, and in some lines shows a slight increase. The weather has been so changeable during the winter months that there has been a great demand for rubbers and waterproof boots.

It is claimed by one of the largest Canadian rubber companies that its chemists have invented a method of producing synthetically a new substance that should prove of great economic value. This new substance has been given the name of Neolin by its inventors. It is claimed that it will displace leather in some extensive fields. The inventors emphatically state that the new compound is not leather and not rubber. Though the invention of this new substance is only recently announced to the public, the product has been manufactured in a quiet manner, and submitted for criticism to many prominent men dealing in the various lines in which it is likely to take the place of leather.

Winnipeg people interested in the ill-fated Wisconsin Rubber Co. are joining to see whether anything can be done to conserve part of their interests. Upwards of a million dollars were put into the undertaking. Poor management, quite aside from the Mexican revolutions, interfered with the success of the undertaking.

Did it ever strike you how generation succeeds generation? Look at it in any line of business, son and grandson following father and grandfather. This is particularly true in connection with the leather industry of Canada, and a survey of the field for the last 25 years reveals very few new firms coming into business, other than those which have been operating—some of them for well on to three-quarters of a century or through three generations. When a man goes into the leather business and makes a success of it, he generally has associated with him someone of his family, who carries on the work, and in many instances causes it to expand and develop in many directions. "Yes, sir," remarked an old-time leather manufacturer the other day, "go over the outstanding firms and you will find that the son succeeds the father or there have been two or three generations in the game. I might name the Beardmores, Hymens, the Kings, Robsons, Langs, Clarkes, Davises, Parsons, Wicketts, Craigs and many others."

James T. Hurley, who for many years was one of the most successful and enterprising shoe manufacturers in the Maritime Provinces, passed away recently in the St. John Infirmary after an illness extending upwards to two years. The deceased was born near Cork, Ireland, and migrated to America with his parents, who settled in Lynn, Mass. There Mr. Hurley was taught the rudiments of shoe manufacturing and as years passed, his talent along that line became apparent and he rose rapidly, until he eventually became foreman of one of the largest factories in Lynn.

Messrs. Francis & Co., who at that time were conducting a manufacturing factory in St. John, heard of Mr. Hurley and sent him a tempting offer to come and take charge of their plant. He accepted the offer and for a couple of years remained in their employ. He then branched out for himself and gradually his success was marked and the demand for his goods was so great that he erected a large factory. As time passed, his business prospered and his goods being of a stellar quality, received a very large patronage. Mr. Hurley employed nearly one hundred and fifty hands and was highly esteemed by one and all. In the midst of his prosperity Mr. Hurley met with a severe set back. His large and modern plant was burned to the ground and as he had little or no insurance his loss was very heavy. This blow seemed to discourage him and he retired from business. Later his health became impaired and since that time he has been under the doctor's care. He is survived by one sister, Mrs. John McGuire, of Lynn, Mass. His funeral was largely attended and in the cortege were many prominent boot and shoe merchants.

### MANUFACTURERS' NOTES

(Continued from page 47)

recently elected the following officers:—President and treasurer, W. Coloff; vice-president, V. A. Sinclair, M.P.P.; secretary and sales manager, L. C. Van Geel; director, A. F. Belleville and Mrs. Coloff. Several new appointments have recently been made in the matter of foremen, and the staff now stands as follows:—Superintendent and general manager, W. Coloff; assistant superintendent, R. Roberts; cutting room foreman, H. Kitchen; fitting room foreman, C. Annis; forelady of the fitting room, Mrs. Hollibaugh; foreman of the lasting room, W. Peters; foreman of the making room, A. F. Belleville; foreman of the sole leather room, Ed. VanSlambrouck; foreman of the heel room, Geo. Fortier; foreman of the packing and shipping, W. Newell.

At a special meeting of the city council in Chatham recently, a deal was confirmed whereby a well-known shoe factory who have been operating in London, Ont., will take over the plant of the Wolverine Brass Works, of Chatham. An indebtedness of the former owners to the city of Chatham will be assumed by the new concern, which will be known as the Chatham Shoe Co. The members of the council were unanimous in their desire to see a going concern established in this factory, and it is expected that E. S. Hunt, who is at the head of the new enterprise, will shortly move their machinery and other equipment from London. About twelve families will likely come with the plant, which will employ some forty hands at the start, increasing the number until over 100 are given employment.

Boot and shoe jobbers in the north west report business seasonably quiet as far as the placing of new orders is concerned, but they are now fairly busy shipping out spring lines. Salesmen are on the road with samples of felt footwear, etc., for fall, and are sending in gratifying reports. There is a distinct tone of optimism among the wholesalers and manufacturers. Prices form about the only uncertain feature. Frequent advances of a few cents per pair go into effect on leather shoes, and further advances are looked for. A leading wholesale merchant said the other day that he expected prices three months from now would be five to ten per cent higher than present high prices. Conditions generally have been more seasonable in the last few weeks, and merchants appear to be satisfied with the outlook. Money is in better circulation—especially in the rural communities, which have benefitted greatly this season from the excellent grain crop.

#### NEW TRAVELLER FOR THE WEST

Wm. D. Harris, of Regina, has been in the shoe game for the past fifteen years, most of that period being spent in the west. He was for several years with the Hudson's Bay Co., at Portage la Prairie, and Calgary, having charge of the shoe department in both places. He is now travelling in Alberta, covering the whole province, with the William's Shoe, "Just Wright" shoes, "Canadian Lady," and Murray shoes for children and recently completed a splendid trip. Mr. Harris looks for a great revival of business conditions throughout Western Canada. There seems to be a renewal of confidence among those who are left. The guessers and speculators in the mercantile line have been thinned out, thereby establishing a more solid and progressive element in the retail ranks.

#### SEVENTEEN YEARS WITH SHOE TRADE

Harry H. Gibbins, who has been directly connected with the shoe trade for the past seventeen years, started his career as an employe of Sterling Bros., London, Ont. Coming to Toronto he took a position with the St. Leger Shoe Co., as manager of one of their branch stores, 110 Yonge Street. Mr. Gibbins resigned this position to open up a shoe department for Gough Bros., where he remained eight years, leaving when the firm sold their lease to the

T. Eaton Co. Mr. Gibbins later on left for Montreal, where he looked after the shoe department for A. E. Rea & Co., of Montreal and Ottawa, and latterly Goodwin's Ltd. Before coming to Montreal the subject of this sketch acted as western traveller for Getty & Scott for two years. He has been in his present post since August, 1914, and is working with the same energetic and aggressive spirit that characterized his methods in all his former positions.

#### PROMOTION FOR WESTERN SHOE MAN

John McVicar, manager of the shoe department of the Hudson's Bay Co., Lethbridge, spent four years with that company and so thorough was his work that within three years he was promoted to his present responsible post. Mr. McVicar is a close student of styles, a careful buyer, and has the knack of winning the confidence of his customers, which places his department on a satisfactory basis. The stock carried is representative and select in every respect.

As may be gathered from his picture he is comparatively young in years though old at the shoe game, which is as familiar to him as the multiplication table. As a sales promoter he is known as a live wire, and those who have come in contact with him say he is as genial as he is businesslike.

Wm. D. Harris, Regina

Harry H. Gibbins, Montreal

John McVicar, Lethbridge

## CLASSIFIED ADVERTISEMENTS

2 cents a word first insertion—1 cent a word subsequent insertion. No advertisement less than 50 cents per insertion accepted. Please remit cash with order.

**FOR SALE**—Racks for storing and drying heels. Up-to-date and in good condition. Will sell cheap. Three racks with four compartments each—measurements, 10 ft. x 5½ ft. x 3 ft. **THOROUGHLY WESTERN SHOEMAN**—15 years in the prairie provinces, is desirous of taking a range of popular priced samples for western territory. What have you to offer? Box 24, SHOE AND LEATHER JOURNAL, Toronto.

### THE STRENGTH OF YOUR SHOE STORE

Did you ever hear a credit man listen to a perfectly good straight argument for an increase in credit, have him go into every detail—and then hear him say, "You are all right personally—your location is splendid—your proposition is carefully worked out—but how much business can your store handle? Just what is the strength of your store?"

That is what I heard a credit man in St. Louis ask two brothers still in the vigor of life and of some twenty years store experience. I am going to repeat as near as I can recall every word of the rest of what he told them, for he gave a clear picture—what a doctor would call a complete diagnosis—of what the strength of a store is.

He said, "I want you both to know that it is my work here to do the thing you have asked me to—that is, make it possible for you to sell more of our goods. Your store has been in your family for over sixty years. When your great uncle opened it, it was the only store in a hundred miles around. Trade had no where else to go. When your grandfather passed it on to your father, the store had the best reputation in the state. Trade stuck to its reputation for dependable merchandise. Now you have come into it, and where do we stand?"

"Your store to-day is within the call of ten times as many people as in your father's day. You tell me that a competitor with less frontage and less depth has a larger line of credit with us than you have. Both statements are true.

"Now, there are more people whose trade should be held by your store, and there are stores in your city of less floor space handling more trade. Therefore, the question is—can your store handle more trade? Is it equipped so that you can place more variety of merchandise before more people? Are your stock shelves cluttered up and loaded down, or are they built to show and sell goods? Are your counters just a place to pile up and handle a lot of stuff or are they true sales-producers—the modern display cases? Your store is 80 feet front and 150 deep. How much of your

12,000 square feet of floor space is doing its work as sales-room space? How much of it is lost in dead corners or worse still in clumsy, heavy, space-killing lumber? For that is all we can call the counters, cupboards and cumbrous shelves of the store of twenty years ago.

"Your ceiling is 12 feet above your floor. That's fine. But the last time I was down your way, a large solid sign across the front of your store with wide mouldings covered the top of the window space to a depth of three or four feet. People want all they can see and the more they see the more they want. You have electric lights in your store I know, but what about the daylight hours? Is your store full of gloomy corners and is the back of the store in shadow most of the day? I will answer these questions for you by telling you just what you can do to your store to make it possible for us to extend your credit and give you a larger assortment of our goods to sell.

"First, your store front will have to be changed so that all the daylight you can get will be passed into the furthest corner of the store. This can be done with prism glass lights in place of your solid modern sign.

"Second, your shelving will have to be made narrow and all the heavy woodwork removed. Wherever possible, glass fronts shall be placed on drawers, cabinets or bins, with compartments in front behind the glass of suitable size to display the stock contained.

"Third, all counters, ledges and unnecessary supports or ornamental woodwork must be removed and replaced by display cases so constructed that these parts take up the least amount of space for the kind of stock they display. Wrapping counters, cash stations, and other necessary locations of this kind shall be placed to the rear of the display cases so that everything in the range of the customer's eye will be displaying goods and do its work in making sales.

"Fourth, the entire arrangement of location of stock in departments, aisles, passageways, offices, etc., must be planned so that every customer can go everywhere in your store without hindrance on the busiest day.

"Fifth, you now have four wagons and six horses in service and two in reserve. These should be replaced by one motor truck of at least one ton capacity and two light motor delivery cars.

"This means an investment of money, a complete rebuilding of your store's equipment. It is not our business to equip stores, but if it will help you to arrange for a new equipment such as I have outlined, you have my assurance that we will increase your line of credit with us just one hundred per cent. or double what you have now, for you will need and can sell that much more merchandise in your store if it is equipped to show and sell the goods as I have described to you.

"I have found that merchants for the most part more honest, work harder and give more of the best that is in them to their business than any other class of men. But you can't do more work than your tools will let you. In this day and age, the merchant of twenty years ago is a goner. A store is a selling machine and in exactly the same way that a factory that is equipped with the machines that can turn out the most goods will get the most business, just so the store that has the best store equipment will sell the most goods.

"So you see for yourself that the credit man can back you up only when you are strong enough to carry the load you ask for and no matter how strong your personal credit may be, there is only one basis on which I can grant credit and that is measured by how you are equipped to sell goods, for this is the one real test of the strength of your store."

Friends of H. D'Artois, Montreal, are glad to see him around again after his recent illness.

Edwin C. Hood, President Columbia Counter Co., Boston, was in Montreal on February 3rd.

## 22-FOOT GOODYEAR SHOE REPAIRING OUTFIT

MODEL N

**T**HIS Outfit represents the highest development in shoe repairing machinery, and meets every demand of modern shoe repairing. It embraces all the essential processes for making new shoes from old ones, giving the maximum of equipment and efficiency in the minimum space. The Outfit has the Goodyear Stitching Machine with all its improvements, including a new style steam generator which uses gas or gasoline for generating the steam, and operates automatically, thereby insuring a uniform heat for keeping the wax in proper condition and requiring little attention from the operator. The Edge Trimming Machine has the new feature of the two shafts, being operated by a single belt, and the cutter grinder is attached directly to the main shaft. This arrangement gives better results with less power.

The Buffing and Scouring Machine has a shaft 57 inches long and carries the following equipment:

- |  |                                   |
|--|-----------------------------------|
| 2 Split Bottom Buffing Rolls           | 2 Flat X-Ray Heel Scouring Wheels |
| 2 "C" Shape X-Ray Heel Scouring Wheels | 1 Heel Breast Scouring Wheel      |
| 1 Pin Wheel Pad Complete               |                                   |

A powerful Blower System removes the dust resulting from the trimming, buffing and scouring operations, and is designed to overcome certain objectionable features of other blowers.

The Finishing Machine has a 78 inches shaft which has all the necessary equipment for black or russet work:

- |  |  |
|--|--|
| 2 Corrugated Rubber Shank Finishing Wheels | 1 Corrugated Rubber Heel Finishing Wheel |
| 1 Corrugated Rubber Bottom Finishing Roll  | 2 Shank and Bottom Brushes               |
| 2 Heel Brushes                             | 1 Stitch Cleaning Brush                  |
| 1 Levelling Roll                           | 1 Bead and Wheel                         |

At the end of the Outfit is the Oscillating Edge Setting Machine which is fitted with union irons and in its motions duplicates hand workmen with quicker and better results.

Each of the machines is operated independently by a friction drive pulley, so that it is necessary to use only those machines which the operator may require. This feature means a saving of power.

All the machines are firmly mounted on legs and driven by a countershaft with carefully adjusted bearings, so that the Outfit runs with very little vibration, and is in every way most efficient.

# Shoes Like The Soldiers Wear

*In Lighter Leathers  
For The Civilian*

The most suitable shoe made for the men who require a "military" effect—a last and pattern making a medium weight, easy fitting shoe that appeals to a very large trade.

There is no box toe. It is made instead with a heavy tip and full vamp. This avoids the binding of a hard box toe and makes it supremely pliable and comfortable.

Made in all leathers, Black and Tan, with the best of drill lining and calf facings. Every lift in the heel is made from selected leather and all made on the Ames-Holden Canadian Army Last, stamped on the sole as here shown.

*Our Travellers Now Have These Samples*

To avoid disappointment in deliveries order immediately, as these shoes are selling like the proverbial "hot cakes."

## Union Shoes for Union Men

The retailer who meets the demand of every possible buyer in his town handles Union Stamp footwear.

Dealers who do not carry Union Stamp shoes are not soliciting their rightful share of the shoe business of their city.

The Union man will have Union shoes for himself and his family. He demands them and if he cannot obtain them will turn elsewhere.

To you, Mr. Retailer, who advertise Union Stamp shoes the tide of trade is turning.

You cannot afford to neglect the Union trade, and even the man who does not buy Union shoes merely because of Union principles recognizes the high quality of Union Made footwear.

You have nothing to lose and all to gain by carrying these shoes.

Let us send you to-day a list of manufacturers who make shoes bearing the Union Label and add a live selling asset to your business for the coming year.

Remember, no matter what any manufacturer may say, no shoes can be considered Union-Made unless they have the Union-Stamp

# Sell These Shoes

## They Pay Extra Well

Most of the men who are your prospective customers look for comfort first. They want smart appearance, too—but COMFORT is the first consideration. This fact accounts for the marvellous success of "Doctors" and "The Professor."

Both these shoes are made on roomy lasts that have been especially designed to combine comfort with good appearance and each has

### PATENT FEATURES OF CONSTRUCTION

The "Doctors" is a waterproof shoe that can be worn with complete comfort in any kind of weather. It has an *Antiseptic Lining* and a middle sole of *Thermol Asbestos*, which combine to keep the foot at its natural temperature and to dispel all the odors of perspiration. The "Professor" is made of soft, pliable kid that yields readily to every movement of the foot. It has a medicated and cushioned inner sole that adds to the ease and pleasure of walking and contributes very largely to the prevention of foot troubles.

## SHOE AND LEATHER CONDITIONS

### What is Going On in Midwinter in the Shoe and Leather Trades—What is Being Talked of on the Street and in the Shops—Business Improves With Age

THE leather people are all busy although it is not altogether on shoe or domestic orders. Business is picking up with shoe manufacturers who are buying right along at advanced prices, but the things that keep the tanners hustling just now are principally war orders and export business. Meanwhile prices keep mounting and as one manufacturer remarked, the half dollar line of leather has been practically reached.

The question that is agitating both manufacturer and retailer just now, although it does not seem to have troubled the tanner much up to date is the possibilities that lie in other materials and substances as substitutes for good old leather. Leather men do not seem to feel at all alarmed as to staple lines, while admitting that in light upper requirements other materials may for a time at least be brought in to relieve the situation.

We have more than once pointed out to Canadian shoe manufacturers the opportunities for shoe business that have opened up recently in Great Britain, and that are being used by concerns outside the British Empire. The English trade press are pointing out the startling proportions of what they call the "American Invasion" as shown in the tremendous increase in imports of boots and shoes from that quarter.

The Rubber Shoe Trade are spitting on their hands, rubbing down their muscles, and getting ready for a good start on February 28th. It appears almost a certainty that unless something unforeseen happens the makers of rubber goods will have to pay more for their raw materials by the first of July. But as Don Sancho would say, "*Quien Sabe?*" Rubber is somewhat like hides, when it starts to come you wonder where it comes from. Rubbers are a pretty safe gamble at present prices nevertheless.

Both on leather and shoes prices are quietly climbing, and it is safe betting that the fall season will see a complete revision of the shoe prices, especially in the finer grades. The spring season promises to be a good one for both manufacturer and retailer, but whether fall will be able to hold its own in the millinery frenzy that has struck the trade is doubtful. The feeling seems to be that styles will modulate somewhat before the new season is inaugurated. Just now the retail trade is "sawing wood" or rather "clearing rubbish" in anticipation of the dawn of St. Patrick's day and the chirp of the "first robin."

# Serve Yourself Shoe Store

A Shoe Dealer's Story of His Serve-Yourself Shoe Store, Designed Especially to Handle Job Lots of Shoes, in Which He Obtains Eight Turnovers in a Year, With a Cost of Doing Business of Half that of His "Regular" Shoe Store Across the Alley; How He Discovered the Plan Through Accident

By F. L. TURNER

**A** MAN who is confronted by conditions in his line which make his business harder can usually do one of two things. Either he and others in the line can get together and remedy the conditions, or he can find some way to turn

F. L. Turner

the tide in his favor—to make the conditions that stand in his way of service to him. It was the latter turn that I took.

It is needless for me to describe conditions in the shoe trade today. Style changes come like cyclones, sweeping profits before them. There is no style stability at all. And this is a condition that makes it especially hard for a dealer in a smaller community, with a limited output. To keep up with his competitors in larger cities (which he must do in these times when people travel with such ease), he has to stock the new things in such a variety of colors, sizes, etc., that style becomes a tremendous problem.

## Style Changes Provide Goods

It is literally true that the style sometimes changes between the time a dealer orders goods and the goods are shipped to him. All within five or six weeks, sometimes, a shoe merchant orders

a line, receives it and finds that he is stocked with a novelty that has gone out of style!

Such a condition has filled the shoe market with job lots of shoes not quite stylish, but good, and available at much below the original price. Such a store as I have operated for the last year depends upon just such a market for its very life.

## Discovered by Accident

I said I had turned a present disadvantage of the shoe business to my own profit, but I must say this was entirely accidental. If I deserve any credit at all in connection with the invention of the serve-yourself-shoe-store, it is for recognizing a good thing when I saw it, for I stumbled upon the idea by accident.

In December, 1914, my uncle, who had been in the shoe business for forty years, decided to retire, and I took charge. You can imagine what the stock was like in a store under one conservative management for so many years. A great deal of stock had been allowed to accumulate.

## Customers Serve Themselves

The first thing for me to do was to clean the old stock out and bring the store up to date. There were shoes on the shelves that had been there for twenty years, and even more—shoes that had gone out of style and come in and gone out again several times since they arrived in the store.

Naturally, some of the price reductions were extreme, for in addition to being out of style, some of the shoes were so old the leather had lost much of its vitality. So we were selling \$3 and \$4 shoes for nineteen cents, and stunts like that.

We took this old stuff off the shelves and put it into one section of the store, in boxes and barrels, with the prices and sizes marked on the bottom of the shoes, but when we advertised the sale, we were swamped. We simply could not get enough clerks to wait on the trade. The people came in droves.

## The Idea Was Born

In the midst of the sale, when we were hopping around in as lively a way as we could, yet hopping not half fast enough, I noticed that a lot of customers waited on themselves, merely bringing the shoes to the cashier to be wrapped.

That gave me an idea and I began to run big advertisements stating that because of the very low prices, it would not be possible to fit shoes on

people—that they should come in, choose their shoes and try them on themselves. We were there to help them find the desired sizes, if they needed help, and to wrap the shoes and take the money. That was all.

I found that in place of weakening the appeal, this made it stronger. The idea found favor immediately and the crowds came right ahead, and in a few days we had done what would ordinarily have taken several times as long. We had cleaned out the old stuff, at a very small expense for clerk hire, without charge accounts, and, of course, without making deliveries.

#### Expenses Much Smaller

The people had the shoes and I had the money—and I had a good deal more money than if the sale had dragged along and I had been forced to pay for a big force of extra clerks.

So, I argued, why not have a department like that to keep the stock clean all the time?—a department fitted up with bins or shelves where the older stuff and new “job lots” could be displayed?

That is what I have done, with a slight change or two from that original thought. In place of a department of the regular store, it is a separate store, across the alley from the original store, which I still own.

#### Description of Store

In January, 1915, I opened the full-fledged serve-yourself shoe store, and, to be frank, I never dreamed there could be so much money in the shoe business, the investment considered. So far as I know, there never had been such a store in any place. I have had no pattern to follow. So, the perfection of the plan and the arrangements of the store have been matters of evolution.

We occupy a rather long store room with benches down the centre for people to sit on while they try on shoes. On each side of the room from front to back are open shelves in which the shoes of all

kinds (dress shoes, work shoes, outing novelties, rubber boots, arctics and what-not) are arranged according to their sizes, and we have some bins down the centre, between the benches.

Below these four open shelves are four shelves in which we keep surplus shoes in boxes, to take the place of those we sell, and this is some job on a busy Saturday, too. Then, it requires six or seven high school girls and boys to help the customers and keep the stocks up.

The customer finds the section where his size is displayed. If he does not know his size, one of the boys will measure his foot. Then he chooses what he thinks he would like from the section where his size is shown. The price, as well as the size, is on the bottom of each shoe and the range of price is wide enough to suit most anybody.

If he finds a shoe he likes in the size eight shelf, but wears a ten, he may ask one of the boys to see if there is a ten of the same style in the reserve stock. But when the ten is found, he does the rest—tries it on and decides.

#### Sell Themselves Quickly

For the most part, the customers sell themselves quickly. Many times I have tried a dozen pairs of shoes on a customer in the other store and found the customer, at the end of the ordeal, returning to the first pair I put on. But when they wait on themselves it is different. They can see all the shoes. They select what they want before the try-on, and it is seldom they try more than one pair if the first pair fits.

So long have people been compelled to have some one else help them decide what they ought to wear on their feet, that I believe most of them rather relish the opportunity to buy shoes without being bothered with the ideas or opinions of some one else.

At all events, we have learned better than to try to help people who have not asked for help.

### THE FAMILY STORE

*A great scheme to save selling expense on sales of cheap lines. Saving also on stock.*

The minute you do that, the customer wonders if you are not going to make a little more money on what you are trying to sell him, or if maybe the particular shoe you show is not a little worse out of date, or for some other reason harder to sell than the rest. They want to browse around and do as they please. We make ourselves handy—standing ready to help when the customer asks for help. That is as far as it pays to go.

#### Expense Items Saved

The plan saves credit losses, delivery charges, clerk hire and the use of a large capital. The fixtures are cheap, for it is an advantage to have the Family Shoe Store, as we call it, quite plain in appearance.

"Good Heavens, Turner, but you have got some shoes here!" a farmer exclaimed a few days ago, and that expresses the opinion of most of our customers.

That impression comes from the fact the shoes are where the people see them. As a matter of fact, the stock in this store runs from \$3,000 to \$4,000, while the stock in the store across the alley—my shoe store of the usual type—invoices \$15,000 to \$18,000, and no one ever thinks that stock is especially big.

It is a good deal the same with a ten-cent store. You think there are carloads of goods there, but put the articles up in boxes, and arrange them on shelves, after the style of the ordinary store, and you would be surprised to see what a small store room you could get them into.

I should say here, too, that the Family Shoe Store experience has shown me that I need not carry so large a stock in the regular store. It has taught me to buy oftener and to keep a close eye on the stock, to determine what goes slowly and what moves off rapidly and to try the next time to get more of the fast-moving kind.

It has also shown me that a good many of us have overlooked the importance of the prestige which good display gives us. Good display more than helps sell the goods—it makes an impression upon the mind of the customer as to the importance and variety of the whole stock.

In ordinary times I have in the Family Shoe Store a cashier and a stock keeper. I spend a good deal of my own time here because it is interesting and because, from the standpoint of profits, this store is much better than the other, though the other is doing about as other stores like it do. As I said, I use cheap help in the Family in rush times and they are just as good for the purpose, so I have a large saving in this item of help.

I have never had a single experience in which any one tried to get away with a pair of shoes without paying for them, which is one answer to the question many people ask, "Why don't you have your cashier up in front?"

But there is another reason. I have her in the rear of the store because when people come in, they want to see the shoes—want to have the fun

of buying them—without first being reminded they have to pay. If she were up in front, they would be reminded right at first that they must pay, and I don't believe they would buy so freely on the average.

A good many people like to act as if they know all about a thing and do not like to ask questions, so we have found wall signs, telling them just how to buy, etc., of much value. Signs guide them to the particular section where they will find their sizes. Other signs ask that they not cut the shoes apart but keep them in pairs. Another tells them that sizes and prices are on all shoes, and in fact, we have tried to make signs tell all the essentials of the plan.

A good many of our customers are the sort who would try to get the shoes for a little less if they could, so we have large signs stating they must pay the prices marked on the shoes—that they cannot be had for less.

We make the rules of the store apply to all alike. No shoes can be taken out on approval. The president of a local bank, who could have any amount of credit in our other store, wanted to take home a pair of house slippers on approval. I asked him to pay for them, with the assurance that if they were not all right he could have another pair or his money refunded instantly when he returned them. He did not happen to have the change in his pocket. I had him write a check.

That little incident helped me, for there were some other customers in the store at the time. It did not offend the banker. He saw that it was good business, and was a good fellow.

#### It is All New Business

Practically all the business of this serve-yourself store is new business. It is money that I would not get at all in the other store. A great deal of it is money that would go to the mail order people.

During my first year, I have done a little more business in the Family Shoe Store, with a stock of \$3,000 or \$4,000 (seldom, indeed, has it been more than \$4,000) than in the regular store across the alley with a stock running up to a maximum of \$18,000.

The store across the alley—the regular store—is counted a good one. It has the usual shoe store turn-over. But we have made about four times as many turns in the serve-yourself store than in the regular store at less than half the cost of doing business.

The situation in the shoe trade that makes it hard for the other store is the very life of this business, for style changes make job-lots possible, and from these shelves, I clear out the older stocks of the other store, so that, at all times, that stock is worth dollar for dollar. That is a thing few merchants can say of their stocks. Everybody in this community knows that I do this and so they know the stock in my other store is always fresh and new. That has been a tremendous advantage.—Associated Advertising.

## THE ART OF BUYING

**The Foundation of Business Success More Important Even Than Salesmanship—Calls for Caution, Courage, Constancy, Conscience, Coolness and Skill**

**H**AS it ever struck our readers how often the charges are rung in salesmanship and how little is said from time to time on that all important and tremendously difficult proposition of buying. The following quotation from the "Saturday Evening Post" hits the nail on the head. The writer, Mr. Forest Crissey, says:—

"Salesmanship has held the centre of the commercial stage so long and has so completely absorbed the rays from the spotlight of publicity that there is almost a touch of novelty in the obvious statement that behind every sale there must be a buyer.

"Not long since a mechanical engineer of good position made this sharp protest:

"You writing men seem wholly to overlook the fact that there is a class of men whose business it is to buy what the salesman sells, and that buying is just as important a job as selling. Why, there isn't even a single trim and usable word that can serve as a running mate for salesmanship and stand for the art of buying. There are schools of salesmanship, world without end! You can hardly pick up a magazine or a newspaper that does not drip salesmanship, and several of the newer writers of fiction have made their reputations on the romance that surrounds the great game of salesmanship.

"On the stage it's the same story—the salesman ever to the front, a high favorite of the footlights. And if the traveling salesman were out of the moving-picture films there would be the greatest sacrifice of celluloid thus far known to the world of photo-plays.

"Salesmen have powerful state and national associations, and are constantly holding conventions and meetings

that add immensely to the gayety of nations; but when companies of manufacturers or merchants come together the real reason for the emphasis of the salesman is disclosed. The merchant or manufacturer himself has come to think that the salesman is the only figure on the commercial sky line. He pitches the key that the press, the theatre and the whole public play to; he is the man who has hung the laurel on the brow of the salesman until we have all come to consider him as the real works of commerce and about the only bee in the hive that brings home any honey.'

"Isn't it about time to give the buyer an inning—or at least to recognize his existence and inquire whether he is anything more than a mere foil for the salesman, a background for the busy figure of the dashing business getter? Seriously I feel that the time has come to raise the question as to whether we are not overplaying the salesman role a little—looking at the situation from a really judicial viewpoint. As a cold economic proposition, isn't this over-emphasis of salesmanship imposing an unnecessarily heavy burden on industry?

"Or perhaps it will offend less to put the question the other way about: Would it not be a distinct service to industry and commerce to shift the spotlight for a little to the man at the silent end of the bargain—just long enough, for example, to let him feel the warning, encouraging influence of a little kindly attention? Would it not pay to try doing something to increase the buyer's respect for his job and his knowledge of how to handle it in a less negative and perfunctory way? Personally I am convinced that Buying is just as important as Salesmanship—though not

# Foot Fashions and Foibles

Freaks and Novelties Run Riot—The Spring and Summer Season to See the Greatest Variety in Women's Footgear Yet Known—White Will Be the Rage

**T**HERE is a decided trend in favor of pumps for summer wear, especially for less formal occasions. The colonial effect is most sought and some dainty styles, especially in the white are shown. Some chic effects are also seen in patents and combinations.

## Narrower Toes

It would seem that narrower toes are coming in, in both men's and women's lines and although it is thought there will be no return to the extreme fashions of a few years ago, there will be a decided tendency towards narrower shapes. The new last models all give evidence of this disposition.

## Combinations Are Selling

In high shoes a *départure* is being made by large buyers at the more important centres, who are asking for changes in the eternal white, black and gray effects that are shown so profusely. It is thought that the very prevalence of these effects, especially amongst the cheaper lines, will create a demand for a variation in the higher grade stuff. Kid and buck are popular combinations.

## Ornamental Effects

In addition to beading and jewelled effects, women's shoes will more and more show ornamental effects in piping, pinking, cross straps and other ornamentation. Pronounced toe caps and wing tips are even seen again, not only in women's but men's shoes. It was thought that this thing was done to death a few years since, but the hands of the clock are, as ever, around to the old place.

## Hosiery Fashions

Following the vagaries of skirts and shoes, women's hosiery are experiencing the same freakishness. We give in this issue a striking illustration of this in what are called "lamp shade effects." What with fur on her boots and overhanging frills on her stockings, the up-to-date damsel of fashion will certainly attract attention. Stockings with pockets are one of the newest fads with women.

## Height of Tops

One is at a loss to know what is a "safe bet" with regard to the height of women's shoes during the coming season or so. From six or seven inches, tops have crept up until nine and ten have been reached. Whether they may go higher yet fashion doth not yet decree, although some Parisian models would seem to indicate it. Seven and a half inches is a fair estimate of an average demand.

## Sport Shoes

A noticeable feature just now is the remarkable revival on the part of women of interest in

sports. There has been a perfect craze for skating this winter, which is to be followed by active participation in such outdoor sports as golf, tennis, horseback riding, motoring and walking. Shoes of white canvas or leather, or trimmed with colored leather to match the costume, and combinations of white and green. White and gold, white and cadet blue, or white and black are features. For walking high laced boots in black or tan are the vogue. For luncheon purposes high shoes in suede or soft kid, in either buttoned or laced, are worn. Low cut shoes for dinner or evening wear match the dress and the metallic trimmings on evening dresses find their counterpart in the shoes, which are made up often in cloth of gold or silver. Handsome slippers of plain or brocaded metallic cloths are ornamented with rhinestone buckles or dainty rosettes.

## The High Boot

There is some talk in fashion circles of the lengthening of skirts to some extent, but as far as one can judge from present indications, changes will be in the other direction. As far as Canada is concerned there need be no worry, as the fashion of short skirts has really only got a fair start. This means, as stated in our last issue, that high boots will be the vogue for a considerable time. Even in conservative England the tendency in this respect is most marked.

## Buckles and Flaring Tongues

Colonials with high, flaring tongues, and big buckles, are featured as a late style for spring. In a Philadelphia line are colonials with silver buckles three inches wide and  $2\frac{3}{4}$  inches high, with inserts of leather to match the vamp. The colonial of black kid with large tongue and big silver buckle is attractive. The same pattern is shown in white canvas with a gilt buckle.

## Men's Styles

Narrow toe shoes are predicted by manufacturers of men's fine shoes. Last makers are showing narrow toe models and the factories are sampling them. They have pointed, sloping toes, entirely different from the so-called "English" toes. Custom shops and stores catering to the best dressed people report that the trend in men's fine shoes is toward narrow toes. In the men's shoes, tans are the biggest factor in the selling. In spite of what the last makers say about narrow toes, one concern says it is having calls for just the opposite type of toe. The trade, especially the younger set, want broader toes and higher heels, the heels being about an inch and a quarter. Sport shoes, in plain and combination effects, with tan and black are in demand.

# Retail Views and Interviews

What the Best Dealers Are Saying and Doing—Bright Suggestions as to Ways and Means of Shoe Sales Promotion

**O**F course the dealer has bought for spring all but what he will need to sort up with. But a shoe man said the other day, "I have gone very easy on those fad shoes for spring and if what the papers say is true, I will hardly be able to get through the season on what I have. Do you think this high white shoe fad is going to last? Well, it looks as though it were going to be a hot one while it does last, but if the experience of the past teaches anything, it seems to make it plain that extreme fashions in footwear never last longer than a single season or two. Sensible people take hold with reluctance and in apparel, shoes, millinery or anything, the people who rush in are, as a rule, those of uncertain income and especially the flighty giddy class, and they are soon run to death. The white shoe fad will hardly last more than this and part of next season, but it is hard to predict."

## Safe Buying

With women's shoes running up to twelve inches in height, it is hard to know what to do with these extreme styles. Safe, conservative dealers are not going in for the extremes and do not touch anything over eight or nine inches at the most. Every man must judge from his own circumstances. In a factory here, for instance, the young girls "our-herod Herod" in these things and will have not only the highest but the gayest. A select shoe store with a high class trade would not be able to sell some of the creations of the more flashy sort and while undoubtedly there will be a demand for extreme styles in the more expensive lines, they will be limited to the less sensational though pronounced effects. When distinctly noticeable styles are taken up by street-walkers and demi-mondaines it is time to look for a change.

## Are You Interested?

A popular idea these days seems to be that a young fellow with a glib tongue and pleasant address can sell any kind of goods. In conversation with a veteran salesman the other day he was asked to what he attributed his success, he scratched his head thoughtfully. "When I was a young fellow," he said, "there were no schools of salesmanship and very little opportunity to read what was said on the subject in the local papers. Like 'Topsy,' you had to grow into the business. I was always taught that the foundation of selling success was interest. I have seen dozens, I might say hundreds, of bright young fellows with ability, knowledge and presence, who have fallen down because they were more interested in the ball game than the selling game. With me I have never lost the zest for making a sale. I would rather sell a pair of shoes any day to a good keen customer than go to the best hockey match in town, and I am fond of hockey, too. Selling is a game in which a man pits his mind and skill against the other fellow just as much as in trying to take a puck down the ice and a goal means more to a salesman than a good shot by a skilful stick handler."

## Know the Game

Continuing, the retailer said: "I have known lots of fellows who could reel off comments on a hockey game and be able to check up referees on decisions who could not tell a customer anything about the shoes he was selling. He

knows a good shoe only by the price, and if you were to ask him about the leather or the make of the shoe or try to tell you why one shoe sold for \$7.00 while another sold for \$4.50, he would be lost as completely as if you let him loose on the Atlantic in a dory. In my days a shoe man had practically to be a shoemaker because people wanted to know all about the shoes they were buying, but to-day the question mostly asked is whether it is the 'style.' I suppose this has a great deal to do with it, although I often wonder what some of these fellows would do if they had to start and buy shoes for an establishment of their own. It is all lack of interest. A salesman should know the game and the first step is to know the shoe."

## Advertising for February

"What do you do in the way of advertising this month?" was asked of a successful dealer in a town of 5,000 recently. "Well, we have our winter sales to look after, of course," was the reply, "And we have to use the newspapers to some extent for the purpose of pushing these, although I do a good deal of advertising along this line on my store front and through my windows. The weekly newspaper is a little too slow for this kind of advertising. A good window announcement with the goods to appeal to the eye brings the best results. But just now I am doing a good deal of circularizing. I have a good list both of the people of the town and in the rural districts and I am getting in on them with letters not only about our sales, but our new goods, the sale of which will begin in another month. I use these letters for familiar talks and make them as plain and chatty as I can. In fact I try to say to them just what I would like to if they dropped into the store. Do you know, country people especially like to get a letter. They are few and far between, especially at this time of the year, and they are sure to be read from beginning to end, not only by the head of the house, but by the whole family. I have two or three worded differently to send to a neighborhood so that they avoid the appearance of circulars, and each may think his a personal letter. I have had numbers call at the store and say, 'I got your letter.'"

## Windows for the Month

Skating goods can still be pushed and ought to be if the stock is to be cleaned up. Make up your mind to get rid of all the goods you have of this sort by March 1st sure. The big stores all clean up before the end of the season, not after. The time to move winter and especially winter sporting goods is right now. By offering proper inducements, you need not have a pair left over. Skating windows, hockey windows, and anything with winter effects will do to concentrate attention on this line just now. A bright dealer advertised recently a pair of their best skating boots each to the lady and gentleman who had the best costume at the local carnival, and made arrangements with the management that anybody who wore a pair of their shoes should be admitted free for three nights to the rink. This was one way of giving a discount on purchases and made more talk than all the announcements that could be made in the regular way in a paper. He borrowed a couple of figures from the local dry goods and clothing store and dressing them in fancy carnival dress, had them in the win-

dow advertising the carnival, and, of course, his shoes. Piles of skating boots, both ladies and gents, at a mark down price, filled the background.

### Fitting Rubbers

"I find the greatest trouble educating my staff to sell rubbers properly," said a retailer the other day. "Rubbers are, of course, the bugbear of the retailer. We have infinitely more trouble with them than with anything else in the store, and make less money. Because they are a sort of rag end to the business the boys do not take the same care in selling them. To the average buyer rubbers are rubbers and he never thinks of asking if there is any difference in quality or price, and the chances are he will take the first pair that goes on his shoes. For this reason we find a lot of trouble with customers who do not get satisfaction. But it is in fitting that the great difficulty lies and especially with ladies' lines. Time was when there were only two or three shapes, and to-day there are four or five times the number of heels for instance. It requires great care in fitting, for a loose fit is as bad as a close one. I keep constantly before my people the necessity of being careful in fitting rubbers and where I have a pair returned that points directly to carelessness in fitting I make it a point to get back at the salesman, for although the rubber sale is a small thing, a sore customer is a larger proposition."

### Painting the Store

Just about now you are thinking of giving your front a coat of paint and giving the interior a little brush up. What shall I do with my front this year is being asked by retailers just now. It all depends on the character of your store and the kind of trade it does what sort of a front you give it. If you are doing a medium and cheap trade, loud effects such as bright yellow, green, red and white may be adopted to give it distinctiveness, so that you may advertise "The Yellow Front," "The Green Shoe Store," "The Red Shop," or "The White and Gold Shoe Emporium." If you are doing a high class trade, these expedients will not do and the front as well as the setting will have to be sedate and dignified. Where a general or all round trade is done an effort should be made to have the front as distinctive as possible. There

is nothing like making a store stand out from the rest of the shops in the neighborhood. The trouble with most local painters is that they have few ideas beyond putting in the colors. You had better sit down with someone with decided ideas and go into the matter of both inside and outside decoration. Here are a few ideas for the front: Black and gold, black and red; wine and gold; wine and light green; dark green and light green; dark green and light red; white and gold; white and buff; buff and red; buff and light green.

### Writing the Ads

It is a good thing to be able to write good ads, but it is better to educate somebody in the store to do it as well as yourself, for two reasons. You may be down and out with the "grippe" or some other misfortune some week for one thing, and on the other hand the writing of ads is the greatest education and incentive to salesmanship you can give a young salesman. Buy a book or let him take a course on ad-writing, or if you can, do the schooling, give him the ideas yourself. In any case consult your sales people about your ads and develop their ideas. It will give you backing in your announcements and give them interest in their work. A good advertisement is really a good salesman, talking to a number of people at a time, instead of one.

### Watch Your Credit

Said a jobber the other day, holding up a letter that he had just received: "Here is a dealer who is worth money but is so careless about his drafts that we are always having trouble with him. He does not seem to take the pains to see whether the draft is all right and lets it come back. He will probably send us a cheque in a few days but he does not think it worth while writing us a note to tell us why he has not accepted. He does not see that the return of his draft is a slight on us and puts him as well as us in wrong with the bank. That man is worth from fifteen to twenty thousand dollars and is only rated as "fair" in the commercial reports because he is such unsatisfactory pay. Some day he may want the credit he is so careless about just now.

# RUNNING A RETAIL STORE ON \$10,000 CAPITAL

How to Establish and Conduct a Modern Shoe Establishment on a Small Capital—What to Avoid and What to Do—Answer to an Inquiry by a Country Retailer

By E. W. BURT, President Massachusetts Retail Shoe Merchants' Association

**T**HERE are a few basic principles which must be followed by the man who starts in the retail shoe business, with a capital of \$10,000, if he hopes to succeed, and I will discuss the problems in their order.

## 1—Location

The store location depends entirely upon the kind of trade desired by the merchant, men's, women's or both, high class or medium or a general business. Let us take a general business, both men's and women's, medium and high grade, which has the greatest chance of rapid growth under proper management. On \$10,000 capital, a large rent for the first three years is out of the question. Select a store large enough to carry a \$5,000 to \$6,000 stock, which is all you should invest in merchandise to start with. Have two windows if possible, one for men's, the other for women's, fill the rest of the shelves with empty cartons, rent as near the busiest section of the city as you can get, if not on the main shopping street, get a location around the corner one or two doors from the main street, never go "up stairs" at any price. Your rent cannot be over \$1,000 to \$1,200 yearly. You can do it in the largest as well as the smallest city, as I have. Spend \$200 to \$300 for shelves, chairs, rugs, store desk and minor fixtures, including a good oak floor in the window, costing possibly \$50, which will last forever, and no expense after putting in. Pine wood stained green for shelving is attractive and looks well. Chairs cost \$3 to \$4 each, twelve is enough to start with, a cash drawer at \$1.50 will do, \$25 will buy all the window fixtures you need. Wilton carpets or rugs are not expensive and will last two years, curtain off the back of your window. Signs over your store should be of wood, black sand background and gold lettering, gold lettering on windows would be covered by your \$300 investment.

Take a one's year's lease only, with privilege of clause allowing time to fit up your store, when your rent begins, you must be ready for business. I have often fitted up a store and been doing business two weeks before rent started.

## 2—Merchandise

Here is your greatest problem, nine out of ten merchants fail by overbuying and purchasing the wrong kind of shoes, whether the capital is \$10,000 or \$100,000. Overbuying takes all your capital, wrong buying puts your merchandise at a mark-down sale with loss of your profit. Carrying unsalable shoes on your shelves at six per cent. interest on your investment is a loss, which must be considered seriously. Decide what trade you will cater to and buy accordingly. The fewer lines, lasts, and patterns you select on your first investment, the better, add other lines as you go along. One pair on a size on 2½ to 3½ and 7 to 8 on medium widths, two pairs on a size on the middle sizes are sufficient, and do not re-order until after you have sold what you originally bought. Depend all you can upon lines of shoes carried in stock by the manufacturers purchasing your staple lines from the stock department. Seventy-five per cent. of your business can be done on sensible sane shoes which are salable all the seasons of the year, the other 25 per cent. should be on the fancy, fly-by-night styles, upon which you must make a long profit, and

when the sale begins, clean up these fancy shoes as quickly as possible.

Do not invest over \$6,000 to stock your store, and fill the rest of the shelves with empty cartons. You must purchase lines of shoes which give you 35 and 40 per cent. gross profit, and establish your business on medium and high priced shoes. Specialize on one or more brands of widely advertised shoes, on which there is already an established trade through the advertising of the shoe. One man in a large city runs his store entirely upon advertised shoes, using as his trade-name "Store of Famous Shoes," his business has grown rapidly and there are large profits.

Do not attempt to buy all styles of shoes demanded by women, it is unwise for you to invest money in a line of shoes for which you have only a very few calls a week. Let this business go to another retailer, at least for the first year, while you get on a good, safe basis.

Do not give discounts to schools, colleges, or professional men, it is not necessary and you can build up your business without it. Charge your customers for wear on shoes, the customary amount is \$1.00 per month, you cannot afford to give free wear on footwear.

## 3—Salesmanship

Service to your customer is the first requirement for success in the retail shoe business. Educate your clerk to become courteous, attentive and patient with customers. Pay good wages to your clerks, a man at \$18 a week is worth two at \$9.00 a week. A poor salesman would dissatisfy a customer and drive away trade. Remember that if a salesman loses a sale of one pair of shoes a day, you will lose from \$1.50 to \$2.50 gross profit on the pair which he loses. If he is a competent salesman, he should make nearly every sale which he has.

Make the salesman realize that your success depends upon him, and give him a chance for advancement if the business increases. Be very strict with your salesmen to have them fit the shoes properly. Do not allow any shoes to go out of your store misfitted, too short or too narrow. For the first year you can get along with two extra men besides the proprietor, and with extra clerks on Saturdays and before holidays if necessary. The salesman expense should not be more than 5 per cent. of your sales.

## 4—Advertising

In advertising your business, use careful judgment in selecting your method of publicity. Eliminate all programmes and "floating" advertising, select the leading newspapers and give them a fairly good sized advertisement twice a week for the first year. Use attractive cuts, illustrations and clear copies, and have them original. Study how to advertise your particular business and run your advertising yourself. Depend chiefly upon personal solicitation and letters to prospective customers in your location. Send them a printed notice from time to time in a sealed envelope with a 2 cent stamp, describing your goods. Advertising is very broad in its scope and the merchant can throw away a great deal of money unless the lines are carefully laid, and the ones which pay the best are taken out.

Your advertising should be 2 per cent. of your gross sales, whether you do \$25,000 or \$100,000 a year.

Your window is your best advertisement, it is worth the entire rent of your store, keep it neat and attractive and well arranged, changing the shoes weekly, with display cards and attractive arrangements of the shoes. Do not allow any dust to accumulate in the window or tan shoes to fade, if they do so, remove them and put in fresh ones. Have your store arranged well inside, with the cartons always fresh in appearance, not damaged or broken. Keep the paint in the store fresh and everything looking up to date. A customer is always impressed immediately upon entering the store, as to the ability of the merchant to run his business.

### 5—General Expenses

There are a few general expenses in running retail shoe stores which must have your careful attention, among which are insurance, and it is always advisable to take your policies in Mutual Companies, paying 25 per cent. dividends, it will make a considerable saving, and many shoe merchants are following this plan. Of course your store will be fitted with electric lights and it will be advisable to have lights in the windows in the evening, and have them connected with a time clock.

For the first year you can keep books yourself and your stock system sheets, and when you can afford it, have a cashier to look after the cash, correspondence, the paying of expenses, etc. Many merchants do not see the importance of having a small sized burglar-proof safe in the store, costing \$25, but many merchants have lost money from the cash drawer without this protection. Handle your cash yourself, and make the change, taking your deposit to the bank and paying your bills, do not allow your clerks to go to the cash drawer to make change.

### Stock Turn Over

On a capital of \$10,000 with a stock investment of \$6,000, your sales should be at least \$20,000 to \$25,000 yearly at a gross profit of 35 per cent. to 40 per cent. on staple shoes and higher on fancy shoes with the quickest turn over on the latter kind. Clean up twice a year, all odd and end sizes and widths. Draw off composite sheets of all different leathers, tans, patent, etc., regardless of lasts and dispose of all surplus sizes that have accumulated instead of buying new lines on these leathers, the merchant who turns his stock only once a year has over-bought or has the wrong styles, and he will in the end fail.

### Charge Accounts

In opening charge accounts, great care must be given to the credit department, and a rule should be established that no credit on return shoes will be given after eight or ten days. Charge account business is a trade builder, but a money loser, unless watched with great care. One failure is recorded by a shoe merchant in Harvard Sq., Cambridge, who charged 90 per cent. of total business to college students. Another Boston merchant states that 75 per cent. of his entire business is charge accounts, but would rather give 2 per cent. discount for cash on all his goods, if he could eliminate a charge business. Personally I believe in charge accounts even at 5 per cent. loss yearly through failure of collection, but on a \$10,000 capital, a strict cash business must be adhered to for the first year or so.

### P. M. (Post Mortem) Habit

You should not put P. M.'s on your goods except in cases of necessity and never on findings. Salesmen get into a habit of misfitting shoes in order to secure the P. M.

and make many dissatisfied customers by a forced sale, spending unnecessary time to dispose of P. M. goods. Small merchants should not get into this habit. I know a retailer who puts 25 cents P.M. on every pair of \$5.00 and higher priced shoes, because he is afraid to ask \$5.00 for shoes and afraid the clerk can't get it, he can sell the shoes and save the 25 cents. Old lines in sales at the end of the season can be cleaned up, however, on the P. M. system.

### Repairs and Findings

Great profit can be made in the repair business if handled properly. Get your customers to bring back their shoes for repairs and charge enough to give the best class of work with high grade of leather, have it done properly and quickly, 25 per cent. net profit is possible on repair work. Put in a repair outfit in your basement when your sales reach \$25,000, it will pay you, one man for machines and a cobbler can handle the proposition and you can in time, work into custom shoes at tremendous profits. Do not stock heavily on findings, polishes, boot trees, laces, etc., a small amount must be carried. Hosiery can be added in a few lines of black and tan for men and women. A glass show case is necessary for a hosiery department. Fancy buckles are a big money maker, but should not be considered by the \$10,000 shoe man.

### Stock System

Every shoe retailer should keep a stock system in a book, ruled off in squares, putting the styles, sizes and widths of every line in the store, putting down one line for every pair on hand and crossing off each pair when sold, adding new pairs as received, so that every night you can look at the stock system and know exactly what there is in the store. I have worked out a stock system for my own stores and perfected it to such a point, that the stock was short only eight pairs in one year in our Pittsburgh store. The shoes can be crossed off the stock sheet when sold every day, from the day's business taken from the cash or charge sales slips made out by the clerk when the sales are made. These slips should be in duplicate, one can be kept in the store and the other given to the customer. Exchanging sizes or shoes returned can be taken off the stock sheets as if they were sold, adding on the pairs returned, crossing off the pairs given in exchange.

### Lastly

Remember, you are in the shoe business to stay, making satisfied customers is the best advertisement you can find. Do not waste any time worrying about the other fellow getting your business, be original, progressive and fearless, do your business on principle, not habit, honesty must be your strongest card and give all your time strictly to business, never be satisfied with what you have accomplished, but look ahead for larger fields, your business is what you make it, you are the galvanic battery which puts life, activity and success into it.

Join your city, state and National shoe retail association, you cannot succeed without co-operation with other shoe merchants, it is worth hundreds of dollars to you and the time you give to it will come back to you, one hundred fold for a better, bigger and successful merchant.

---

Epictetus and Shakespeare both spoke of us as being actors in a drama—actors whose time upon the stage of life is brief at best. We do not choose the parts we are to take, whether that of a beggar or king, but whatever our guise we may play the part of MEN—than which there is no nobler role.

# PLANNING AN ADVERTISING CAMPAIGN

How to go About Investing Money in Publicity—A Ways and Means Committee on Advertising—Some Pointers on Media and Their Advantages

**I**N a former article we discussed the approach of the advertising question in a matter-of-fact business-like way, and showed how the science of publicity was in disrepute through false ideals and slipshod methods. What is needed to get results and pleasure out of advertising, as well as definite method and fixed purpose.

The first thing to have settled is how much you can spend on publicity. We say "can" spend, because it has to be put in this way with some. It would be senseless for you to spend, for instance, a thousand dollars a year for advertising, if you could not possibly push up your sales to ten thousand dollars. The amount spent for advertising must bear some proportion, not only to the business being done, but to the possibilities of the business in its present stand. If you are only doing a business of ten thousand dollars a year and might easily be doing twenty or thirty, and you have the capital as well as the facilities and capabilities for expansion, there is good reason for you extending your advertising expense with this in view, for in no way can a business be more easily or quickly developed than through publicity rightly directed and carried out in a sane business-like manner.

Supposing you are doing a business, let us say, of \$20,000 a year, how shall we arrive at a proper amount to devote to advertising? If you are already established in business you will know not only what your sales were last year, but what your running expenses were. These, including everything, ought not to run over \$5,000, they ought to be brought to about \$4,500. Now, out of this you have probably paid for general store expenses, including rent, light, heat, interest, depreciation, say \$2,000. For labor in connection with the store, say, including all wages, \$1,500. Allow \$500 for sundries and you have a total of \$4,000. This leaves a balance of \$500 to be devoted to advertising expenses. These proportions are about those fixed upon by successful dealers, as the correct ones for dividing up the expense programme, although some advocate the increasing of this investment in advertising from 2½% to 3% or 4% on the total sales. This could possibly be done on a sales record of \$25,000 or \$30,000, but 2½% is a good starting point and should put the dealer in a position not

only to increase his business, but judge just how far he can go in promoting the growth of his business through advertising.

After deciding how much he is going to spend the dealer should first of all figure on how he is going to spend it. First of all, as to media. There is no doubt that newspapers are the very best means of communication between the retailer and his customers. The best should be selected, not because of circulation only, but of influence. Sometimes, as has already been said, a paper with a smaller circulation has more pulling power for the advertiser. Go thoroughly into the merits of the papers and then decide how much you will spend and how much with each, if there are more than one eligible. Don't put all your eggs in one basket, or fire off all your ammunition in one spot or in one volley. Of the five hundred dollars, suppose you devote one-half, or say \$250, to newspaper advertising. Take one-quarter, or \$125, and devote it to special advertising schemes, such as bill boards, etc., and set aside \$125 for reserve. It is common to hear large concerns say that their advertising appropriation is "exhausted." It is usually only an excuse, but if it be true, they often miss good things by tying themselves up to absolute arrangements. There will undoubtedly turn up during the year several good propositions, and you will not want to have them interfere with your regular advertising schemes. Be sure and have a reserve or emergency advertising fund.

Now as to what you are to do with the \$250, or you can make it \$300, if you wish, that you are devoting to newspaper publicity—you should first sit down and figure how this is to be spent. First decide what months are the best ones to advertise in for your business. Better lay out a sort of calendar, beginning with January and ending with December, and figure out their relative importance in advertising. Mark them in some way so as to give you an idea of what to spend on each. Some people say you should advertise strongly in the dull months when you need business, and that the good months will take care of themselves. If we are to follow the advice and example of successful advertisers, we will not listen to this suggestion. Advertising should be done when the people have the money and

QUIET  
BUT POPULAR

*Lines that have elegance  
and fit combined.*

## A Noted Rubber Man Passes

ONE of the most prominent figures in the rubber business of Canada in the past generation, Mr. J. H. McKechnie, passed away at Montreal on February 8th. He had been ill with a severe cold for a little over a week and pneumonia settled in.

Mr. McKechnie came into prominence in 1887, when the Granby Rubber Co. was formed in 1887 with the late S. H. C. Miner as executive head. He occupied for many years the position of secretary-treasurer of the company and when it was merged in 1907 in the Canadian Consolidated Rubber Co. he became a director and official of the latter concern. Last April he became president of the Consolidated.

Mr. McKechnie was one of the most affable and kindly of men and made many friends by his imperturbable geniality and uniform courtesy. Probably no man in recent years was as familiar with the ins and outs of Canadian rubber trade, which for nearly thirty years was his great hobby and constant concern. He leaves a wife only, having no family, and his many friends throughout the Dominion extend to her their most heartfelt sympathy.

Mr. McKechnie will be missed in rubber circles and more especially by the inner coterie of friends who appreciated his quiet way and sterling worth. He was born in Granby in 1849 and was buried there on Thursday, February 10th.

are willing to spend it. To advertise in a country locality extensively in July or August, except for some special reason, would be largely a waste of money. The people have not the money, as a rule, to buy, and unless you have special bargains to offer you will only waste your money by spending it on advertising specials in the dog days. Nevertheless, it is a question whether it is a wise thing to be quite out of the paper at all, even in the dull periods. These may be used to tell something about goods that are lost in the rush, or to keep people's thoughts on the store and its methods.

In any case, figure out where you want to place the most outlay and divide up the money accordingly. Do not contract for a fixed space from week to week or month to month. Make a contract for so many thousand lines to be used "as ordered." You can easily figure the amount your appropriation will buy. There are fourteen agate lines of advertising to one inch, single column. From this you will be able to figure how much space there is in a column, two columns or three columns, and arrive at what any particular space in any issue would cost you at the line rate. Get the closest rate you can and spend the money with the concern that will best serve your aims.

Your advertising, as well as all your other expenses, should be first of all added to the cost of your goods, so that you may go ahead with your plans knowing that you are covered in your expenditure. On some goods you will have to add more than others which will have to be sold at more

competitive prices, and do not forget the important fact that the percentage added to the net cost of your goods will not represent the percentage of profit on them. Most dealers who find the expense of doing business to be 25% on their turnover, add 30 or 33 $\frac{1}{3}$ % to their net cost to bring them through safely.

Now, you have \$125 set aside for other purposes than newspaper advertising. Study out carefully the advantages of circulars, fences, posters, and out-of-door displays. In your line you ought to find poster advertising a good thing. Get costs and devote a portion of your appropriation to attractive bill board displays. Letters and circulars are a good thing used, say, in the months when you go slow on newspaper and poster advertising. Get up some good original letters and post cards, and you will find they will appeal to some people, and be more useful and profitable for some lines than any other plan. But put brains and effort into the thing or you will waste your postage. Programmes are the bane of the retailer, but do not dismiss them all as sink-holes for your money. Theatre programmes or anything with a sure circulation, where people have a chance to read them, are worth considering. Only don't be led by the nose and pay through the nose for your advertising.

Take your store folk into your confidence in your planning and talk over with them what you propose doing to promote sales. It will increase not only their interest but efficiency in selling and back up your advertising.

# Leather Trade Jottings

Items of Interest to Leather Producers and Users—What is Being Talked About in Leather Circles at Home and Abroad

**B**USINESS has shown some improvement during the past two weeks. Manufacturers have been in the market on account of having put off their purchases for spring trade requirements rather longer than usual. While hide conditions seem somewhat easier, there is no warrant for leather producers letting down the bars to any extent. There is a genuine scarcity of first class tannages in both upper and sole stock and tanners are sitting tight. Selections in some lines are so well cleared up that prices cannot be quoted.

## Leather Substitutes

It was a strange sight to see a tanner at a gathering of shoe manufacturers advising them to look around for leather substitutes, nevertheless, such was the case in New York last month. Tanners realize as much, and perhaps more than anyone else, the growing scarcity of raw materials out of which leather can be produced. There is no use burking the question. Like Banquo's ghost it will not down. The tanner can have no object in closing either his or his customers' eyes to facts that radically affect the relations of both. The man of leather will not be any better off should hides get to fifty cents a pound. He will not sell as much leather. An easement of the demand for leather will, on the other hand, give him his chance on the raw market for supplies.

## Measuring Close

On account of the high prices of leather a good deal more consideration is being given just now to correct measurements. With stock at half a dollar a foot, every little counts, and carelessness, at the end of the month in the billing of goods will mean less of a tidy profit. The custom of being easy on fractional quantities is passing and while it would have been considered small to reckon in a quarter foot a few years ago, this means practically as much as a whole foot at that time.

## Hand to Mouth

Some large orders are still given by leather buyers, but the rule today is to make the tanner carry the stocks. At one time some of the large factories had their cellars stacked with sole and upper leathers, but the large operator has given place to the "purchasing agent," who figures requirements only a few weeks ahead. The condition of the market has a lot to do with it, as well as the fact that the outside demand for certain classes of leather has recently been such as to prevent overstocking. Then, too, business has gradually centred in large concerns. Time was when the

finished leather piled up in small tanneries and then the owners went to Montreal and Quebec and unloaded. Those were the days when the big buyer could make his year's profits out of his leather purchases in a few weeks.

## Prices Must Advance

It seems to be generally agreed among buyers and sellers of hides, leather, and goods made therefrom, says Hide and Leather that prices are likely to advance, despite temporary halting and weak spots here and there. Market conditions are clarifying themselves with the progress of the months. Contracts at cheap figures for leather, shoes and for materials used in making leather and shoes are being completed so that larger and larger numbers of buyers are being forced to pay the prevailing high values, and can only obtain limited supplies at that.

## Native Dyestuffs

In an interesting lecture delivered recently by Wm. Armstrong, of the Armstrong Leather Mart, before the Essex Institute, Salem, the speaker, amongst other things, said: That the use of native dyewoods is being revived. He showed samples of vegetable dyestuffs that recently had been offered in Boston market. He showed an Indian blanket, dyed by the Navajo Indians forty years ago, to prove that vegetable dyes provide permanent colors. He also spoke of a process, used forty years ago, of dyeing leather with wood dyes, and setting the colors with aniline dyes.

Mr. Dow, replying to Mr. Armstrong, said that the institute had in its collections fine fabrics that must have been dyed with native dyewoods a century and more ago. The colors are still good. He also recollected that a Lynn cider mill, after it crushed the apple crop, began to grind barberry root, making it into a powder for dyes.

## Advance in Glazed Kid

In an article that recently appeared in the Public Ledger of Philadelphia. Mr. Ira Vaughn, of Dungan, Hood Co., states: "Glazed kid, for which there is at present a heavy demand, due chiefly to fashion's decree for high-topped shoes in fancy colors for women, has advanced from 15 to 20 per cent. recently, and with every possibility of it going still higher. The war has tied up large quantities of goatskins, causing a serious shortage in the supply. These conditions have forced the American manufacturers into keen competition for Mexican and South American skins, with the result that

(Continued on page 51)

# Shoe Repair Department

What Live Retailers and Others are Doing to Make Money Out of the Repair Shop—The Repair Corner Gives Way to Modern Methods

**T**HE saying that if a thing is worth doing it is worth doing well applies particularly to shoe repairing. Half-hearted, sloppy repairing will not only keep customers away with repairs but with orders for new shoes. Nothing will make a man or woman angrier than to get back a pair of shoes "manhandled," and nothing will please them better and advertise the shoe more than having a surprise handed them in a pair of shoes well and tastefully repaired.

## Don't Overcharge

To charge a quarter for a ten cent job may be your way of getting even with a customer who has brought in a troublesome though insignificant job of repairs, but you will send a customer out of your store with a sense of injustice ranking in his breast. The repair shop is the greatest advertiser a shoe business has and its sword cuts both ways. A good way to satisfy a customer he is not being overcharged is to enumerate on a tag what has been done to the shoes.

## Thoughtfulness a Factor

To confine the repairs to just what the customer has ordered is all right when a large amount is not involved in additional work that the shoeman sees necessary after the customer has gone. It is better to add any little thing found necessary in the repairs and indicate it on the tag. When the shoe laces are completely worn, a pair can often be added and charged, or when the repairs are sufficiently large included in the estimate. The laces will come as a surprise and give additional satisfaction.

## Making Promises

One of the sources of greatest annoyance and most frequent discord is the ready promise to have a certain job ready at a certain time. Most people want their repair jobs done "yesterday" not even to-morrow, and the man who can steer clear of trouble in this matter of having work done promptly at the time promised will add years to his life and dollars to his bank account. Few repair departments have a proper system for telling just how the work will be turned out, and unless there is there is sure to be heart burning between employer and employees and with the customer and salesman. Have some way of telling when work may be expected through.

## Be Obliging

It is a mistake not to go out of your way to do little things for customers. A man went into a repair shop some time ago and asked to have a rip in the shank of his shoe sewn while he waited. The proprietor said he would have to leave it as he couldn't take a man off a job. It was a wet day and the customer needed protection against the weather. He went up the street and got relief, the result being that he will probably get his new shoes as well as his repairs at another place in future.

## Exacting Customers

There are people who would not give a repairer the life of a dog if they had their way. The "cobbler" is not worthy of consideration. He is there to suit their convenience. They have no regard either for other customers. Their work has to be done before that of anyone else. Sometimes it is a person with money whose trade is worth caring for,

and the dealer has to pocket his righteous indignation and saw wood. But people, as a rule, are more unreasonable about repairs than any other thing in the world, and will lose their tempers and their self-respect over a twenty-five cent job when they can be cajoled or reasoned in a five dollar proposition.

## A Successful Repair Shop

Mr. F. E. Ballou, of the F. E. Ballou Co., of Providence, R.I., has the honor of being not only the president of the Rhode Island State Association of Retail Shoe Dealers, but is also a member of the State Legislature. He is a shoe man of standing and experience and one of the earliest believers and workers in shoe repairing as a paying adjunct to a shoe business. His shoe repair business started in 1898, is an institution equipped with \$2,500 worth of modern machinery, and does business of over \$1,000 a month. Its extent may be judged from the fact that the firm sends out every little while circulars to the extent of 100,000 an issue. He claims they make clear 33 1-3 per cent profit and the department is a splendid inducement for regular trade. "Quality" is the watchword, and no point is left unthought of, and no means unpursued for not only giving customers satisfaction, but having them tell their friends. They make a point of time in shoe repairs, and have deliveries made by automobile. They specialize with and advertise sporting repairs, and give special attention to the interesting of women in the department. They employ the best help and pay good wages. They keep their repair department "spick and span."

## What Shoe Repairer Learned on a Visit

"Yes, there are several ways to build up a repair trade," declared a leading shoeman the other day, "the surest way not to upbuild it is to sit around your shop all the time, never visiting another town, going to a competitor's establishment, or exchanging views with any one in the trade. You cannot go around without you learn something.

"I am doing business in a place of nearly 15,000 and I thought I knew it all—at least I had lulled myself into a sense of assurance that there was not a great deal I could learn. But having to go to a large city on some private business, I thought I would spend a day calling on some shoe repair establishments there. I got in contact with three or four, and naturally picked up a number of pointers.

One man said: 'Yes, I believe in advertising. I am of the opinion that the distribution of booklets, folders, circulars and dodgers is a good thing, but too frequently, the fellow who is advertising, is circulating this literature in a too wide latitude from his own establishment, when he is possibly unknown to his next door neighbor, or in his own block. Now, remember that most of the trade naturally gravitates to your shop from the neighborhood most contiguous, and be sure that you are known first at home, so to speak, before you go in the outskirts. See that every man, woman and child within one block or several blocks, knows that you repair shoes, that you give good service, that you do a neat job, and that you have fine facilities. Let these facts be presented day in and day out, until all are thoroughly acquainted with them, then, if you want to enlarge your sphere of activity or widen your business horizon,

it is time enough to go outside. But advertising, like charity, 'begins at home.'"

"Another man told me that he did not now buy rubber heels in dozen pairs lots, each pair done up in a neat carton. 'Why?' 'I get them in bulk,' he exclaimed, 'and I pay 18c. less a dozen. They are just as neat—and look at what I save! Of course, when each pair is done up in a nicely printed package, some one is paying for that container. I am now able to make quite a bit of money by having rubber heels come loose. I am putting on some rubber heels for 25c. a pair. Of course, I know I will be laughed at. But remember that certain department stores sell rubber heels at 15c., and if they can I can. I have here a second quality heel, just as good as these so-called variety stores handle, which costs me about 8c. I make 7c. a pair on it. I sell it for 15c. to those who wants to put on their own heels. But if necessary, I will supply a pair and attach them for 25c. Of course, I do not guarantee that they will wear very long, but there is always a certain cheap trade if you do not cater to it, will go to the other fellow, and just now I am after all the business that I can corral.'"

"Another shoeman said, when I asked him if he sent for and delivered parcels: 'Yes, I do, because I am in a suburban district and I do not have to go very far for the goods—I have to have a boy around the shop anyway, and it takes very little time for him to cover the routes and bring in the jobs. If I were doing business in the down-town section of a large city, I do not think that I would send for and deliver work, because many a girl in a store or office will ask you to come for a pair of shoes in order to have a patch put on, a rip sewed, or a sole nailed, and then request that you return them in an hour or two. The whole job would not be more than 10, 15 or 25 cents, and any profit would be swallowed up in getting the business. If I advertised that I would call for and deliver all parcels, I suppose I would be asked to go three miles in one direction, two in another, or five in a third, on a fifty cent job. The cost of getting it in would be at least 10c. and what would be my margin? No, my rule is to deliver all jobs on which I receive over a dollar. On work less than that I charge 5c. for delivery. This is the only fair means, but like everything else, the delivery system is one which a man has to regulate according to his own territory, the city in which he does business, and the class of trade that he is after. I have simply given you my ideas as I worked them out here.'"

"Oh, there are many things to study in this business. Among them is how to get better prices, for, considering the rapidly rising cost of sole leather, thread and all other materials, shoe repairers have got to ask more today than ever before, if they want to make even a living. And again, help is exceptionally scarce. All the available men have enlisted, or are so mighty independent that you have to get down on your knees to cajole them into working for you.

#### FIND IT OF GREAT HELP

We appreciate the "Shoe and Leather Journal" very much and have found it of great help in our business. Allow us to extend to you the compliments of the season.

RODD & DEACON.

Cobalt, Ont.

"Yes sir, the shoe repairer has his troubles like any other man, but I have said enough on that point just now."

#### From Away Down East

Editor, SHOE AND LEATHER JOURNAL:

Just a few lines of a repair man. I am a bootmaker, having served an apprenticeship of seven years and been on my own account for thirty-two years. I have read a lot of the Repair Man, also on different opinions as to the best way to conduct a repair business. As times, shapes and styles differ, the repairer has to change along with them. And I have come to the conclusion that a repair man must invest in modern machinery and must study the people he has to cater to and for the repair man to make a success of his business, he should also work on a good and friendly understanding with other repairers in his district, if there are any. But this is a trade where tradesmen keep far apart from each other; but by coming to an understanding and working with each other and making a standard price, is in my opinion, the only way to success.

I must say there are very few practical bootmakers and repairers nowadays, as most of the repairers pick up a little knowledge by going into a man's shop and studying its methods, and then setting up as a first class repairer who often sets in to undercut the other men so as to get a start, and thus do quite a great deal of harm to the trade in general. So people class all repair men alike. Where I was serving my time it was in a country village. There was no machine, not even a patching machine, everything done by hand. Making our own pegs, uppers, and even lasts. It is only these last few years that I have installed modern machinery, and I am sorry I did not get them years ago, for if I don't get the extra money I get the ease. Besides I can do the work much quicker than formerly, and as the times have changed from when a customer often had to wait for his boots to be either made or repaired, now he wants them in a few minutes. It is all speeding these days. It is not shoemaking but botching.

Nowadays nearly all factory boots are McKay-sewn or Goodyear welts—and those who buy McKays are wise in having their repairs either McKay-sewn or nailed. But more often than not, those or most of those who buy welted boots, want the soles nailed on instead of sewn. The result is the edges crack open and then the customer gets sore and is not satisfied with the work done, and when you try to explain the difference between nailing and sewing, well all they know is the difference in price.

These days there are a lot of rubber heels used; some wear better than others and in the faulty rubber heel the repair man gets the blame, and the way I put on rubber heels and finish them, etc., fifty cents is not money enough for the work to pay for the heels, time and other necessary expenses, especially if you employ a man to do the work.

I am not a pessimist or grumbler, but try to show what a practical shoemaker has to put up with these days, mostly owing to the under-cutter. I have the facilities for doing and can do the work in a first class workman style. I must say I get a good price for my work, and get anything from \$6.50 to \$10.00 for my new Bespoke work, and that is not enough, according to the price of leather and other material since the war began.

Hoping to hear from other repairers in your valuable Journal. Wishing your paper every success.

I am yours,

Springhill, N.S., Feb. 15, 1916.

BOOTMAKER.

# Leap Year Sales Schemes

February Has Twenty-Nine Days Once in Four Years—How Advantage May Be Taken of This Fact on Sales Promotion

**I**T will not come again until 1920. You might as well take advantage of the interest it makes to focus attention upon your store. It is not as easy to adopt the number 29 to the sale of shoes as some other lines, but there are quite a number of suggestions in order for the use of the occasion for sales promotion in the shoe store.

This is the time of year when in most shoe stocks there is an accumulation of "left-overs." Of course in modern retailing it is considered bad business to have a ragged stock at the end of a season, but in spite of all that may be said on this score, the average shoe store is compelled now and then to clean up its stock by means of special sales. Sometimes nothing will move these shelf warmers but drastic measures, and they have to get the knife deep to get effectual results. Price will move most anything these days. Only mark the goods low enough and somebody will carry them off, whether they can use them or not.

A shoe is pretty well covered with "whiskers" that will not bring more than twenty-nine cents and yet there are around some stores goods that might better be given away than allowed to take up shelf space and grow musty with age. They are only taking the place of good stuff that could be sold at a profit, and it is good business to get rid of them. If you have any odds and ends that you are tired seeing about the place, set out two or three tables of these "stickers" and mark them "Leap Year—29c."

Rubbers that are undesirable or a job lot of seconds will lend themselves just now to a twenty-nine cent scheme. During the month several 29 and 49 cent sales of rubbers have been noticed. It is getting towards the close of the retail rubber season. Hustle off the fringes of your winter stock with some such starter as this or you may have them left on your hands.

Failing undesirable stock there is abundant chance to work in the 29c on regular lines. If the twenty-nine cents alone will not lend itself to the scheme in your case, run it through a series of special shoes from \$1.29 up. Lines can be got together at \$1.29, \$2.29, \$3.29, \$4.29 that can be sold at these figures to represent a reduction of the even prices of goods sold at the half dollar mark.

Then there are various supplies that can be thrown into a sale upon which 29c will yield a profit, while some scheme for presenting "Leap Year Heroines" or "Heroes" for that matter with shoes at a discount or gratis are not altogether incapable of working out to advantage.

## Leap Year Windows

A suitable background for a leap year window might be of lattice work with an open gate on

which the words "Feb. 29th" might be displayed. Above this the legend could be displayed, "A Leap Year Opportunity." The window might be decorated somewhat in bridal style throughout and a display made of ladies' fine shoes making a strong point of the prices as special "proposals" or "opportunities." The prices may be odd as \$2.29, \$4.29.

A good scheme of the humorous sort might be carried out by using a dummy figure of a man, or failing that, a bright catchy cartoon representing the bashful swain being brought to book. The title might be "Toeing the Mark." A window of men's shoes toeing a "mark" made by some decorative material would carry out the idea and fixtures on either side could complete the display of footwear which may or may not be all of one color.

## Leap Year Advertising

There are quite as good opportunities for leap year advertising as for sales or window display, and some of these will doubtless suggest themselves. The newspaper advertisements will, of course, be in line with the displays or sales schemes and should be bright, snappy and humorous. The dealer might advertise for lists of "Eligible Bachelors" in confidence offering some inducement to those who will volunteer same, but, of course, stating that names submitted may be forwarded anonymously. These "Unmarried Derelicts" may have letters sent to them couched in courteous yet somewhat humorous terms advising how to "pop the question" and inviting their special attention to the "Bachelor's Shoe" at \$4.29 in the "Toe the Mark" window. Plenty of young ladies will volunteer names of young men in whom their friends are interested for a lark and the invitation to come and purchase the shoes will have perhaps a double effect—bring them to buy a pair of shoes and then send them off to "pop the question" to some interesting young lady who has too long been kept in anticipation of the joyful moment.

## Suggestion for Ad.

"If you know any Timid Bachelor who is putting off the important matter of 'Speaking His Mind' to some eligible young lady and wish to help him to TOE THE MARK send us his name, and we will forward him our 'Hints to Bachelors' and advise him to call in and see us.

"Sure cure for Cold Feet and Knock Knees. Guarantee to promoted a proper understanding and settled convictions.

"Communications in confidence. No questions asked. Send this ad to him if you think it better."

# With the Shoe Manufacturers

Pithy Note and Comment on Shoe Matters—What the Makers of Shoes Are Saying and Doing—Shoe Facts and Fancies

**T**HERE has been quite a bit of sorting during the past two weeks and supplemental orders for spring, especially of fancy lines, have come in well. Dealers were very shy of such lines as high white shoes and other fantastic styles, and are beginning to realize that they may find themselves short when the spring trade rush commences. Spring stocks are none too ample, and dealers seem more inclined to brush up. Manufacturers are all busy on spring orders, many of which have already been shipped.

## Leather Prices

Tanners are insisting on advances in almost all their lines and manufacturers are holding off as well as they can. There is a dearth of good selections in some lines of light stock, and it is almost impossible to get others. There seems to be a tremendous demand for light tan, and champagne shades are well cleaned up. Makers of women's shoes find it difficult to get adequate supplies of whites and greys, and many of them are introducing fabrics in some of the lines designed for light leathers.

## Lasts and Patterns

Those who have returned from visits to the American markets say that last makers are showing both men's and women's shapes on much narrower toes, and particularly men's. On the other hand many are sticking out for the broad comfortable shapes of the past couple of seasons. There will certainly be a good demand for sensible, roomy shoes for a season or two, notwithstanding any innovations of narrower toes. The tendency in designs is strongly towards ornamentation and perforation will run riot again in tips, vamps, quarters, etc. Saddle straps are a common decoration for walking shoes and sport shoes.

## Export Business

The factories are somewhat busier and are not quite as much interested in outside markets as they were last year. The result is that we are selling very little shoes abroad. A certain amount of war orders have been put through, but beyond this and the army shoes made for the outgoing troops, there is very little being done outside regular trade. It seems a pity that some regular effort is not put forth to get a share of the business that is going to the United States. We are quite as able to serve the market as our American cousins and have advantages they do not enjoy. They seem to be alive to the situation as evidenced by comments in the English trade press.

## Half Dollar Leather

Half dollar leather, says the Reporter, is common in Lynn, and, as some manufacturers view the market, dollar leather will appear before the end of the year. It will come about through the development of millinery styles, as well as through the rise in leather prices. Leading shoe merchants of to-day certainly want shoes that are more beautiful, and to make them shoe men must have leather that is more beautiful. Of course they must be willing to pay for it.

Union sole leather is selling at fifty cents and more. Best grades of white calf leather are selling around fifty cents, and fine colored kid leathers also are in the half-dollar class. Oak sole leather is well above fifty cents.

A run on white goods is now setting in. Leading makers of shoes are fitting up white rooms in their factories. One concern says this will be the biggest year for white goods in the history of the trade. This concern has orders enough on its books to keep running on white shoes to its capacity until Easter. It could accept orders for 1,000 additional cases of white shoes if it felt that it could get the leather with which to make them.

## Red Cedar Shoes

A factory has just been completed and is in operation at Everett, manufacturing red cedar shoes from timber logged on the upper tributaries of the Snohomish River, according to a Seattle dispatch to the New York World.

The wooden shoes are now being used quite extensively by workmen in breweries, tanneries and firemen and coal stokers on ocean liners. Where the feet must come in close contact with hot grates, doors neat strong acids, the cedar wood has been found to be the best non-conductor known.

The shoes are made partly by machinery and finished by hand. They sell in the west for sixty and seventy cents a pair.

## Why They Lose Shape

Shoes that do not hold their shape during wear are giving the manufacturer a bad reputation. Salesmen say that most retailers complain about shoes not holding in shape, says the "Reporter" and some of them would like to know the cause of it. Large manufacturers who are known the world over for the qualities of their shoes are falling in line with the smaller ones in this respect. One of the causes is the change in style of shoes. Take a high heel and a high toe combined and you will have a shoe that will readily crumble down at the shank, which will cause the bottom to turn up at the toe end. Another cause for this loss of shape of shoes on the feet is caused in the lasting process. If you pull the upper at one point more than another you will have shoes that will look like "bats" from the time the lasts are pulled off to the time of treeing. With good work at treeing the shoes will hold up until the time of wearing, when they will again look like "bats" after a short time. Sad to say, but it is a fact, that welt shoes will lose their shape quicker than McKays, and the cause can be traced back to the time of welt sewing, when the lasting tacks are pulled off preparatory to that operation. Why not leave in the lasting tacks? The sides are lasted by hand, and if the lasters are careful to insert each tack at a uniform distance from the next, the welters will pass them through. More needles will be broken, but shoes will hold their shape. The upper stapling machine will allow the pulling off of all the tacks and the upper will be properly held on the last. Which is the cheaper?

## The Popularity of Kid

A prominent producer of kid leather is quoted in the Cincinnati Enquirer as saying that shoe merchants have set up a new standard in footwear, the \$5 shoe of soft, glove-like, colored-kid leather. It takes the place of the standard \$3 shoes of kid leather.

This new standard has been set up with the help of Dame Fashion, and against the most adverse conditions in manufacturing that ever have prevailed. All of which shows

Inquiries Solicited

the great influence of fashion in building up the shoe trade to new standards.

We were selling, five years or so ago, blacked glazed kid leather at 25 cents a foot down, and we had to export most of it, because domestic manufacturers wanted very little of it. The kid shoe at \$3, then the standard price, was not wanted by the people.

We are selling to-day colored kid leather at 25 cents a foot up, and we cannot supply shoe manufacturers with enough of it. They are using it in shoes at \$5 a pair up. The demand for such shoes is great. If we could get enough kid skins and dyestuffs, we could run our shop 24 hours a day, and sell our product among our domestic customers.

Dame Fashion, I believe, is responsible for the new standard of the \$5 shoe of kid leather. She dictated short skirts, and women demand, to wear with short skirts, extra high top boots of soft, glove-like kid leather.

The new standard of \$5 shoes of kid leather is one of the best examples of the great influence which Dame Fashion has upon manufacturing and merchandising.

### The American Invasion

Mr. Parker, an English shoe manufacturer, speaking upon the invasion of that market by American products, said recently: Substantial quantities of American boots had been imported into this country of late, but the curious thing was that the bulk up to the present was women's stuff. No doubt men's goods would also come in. In his experience with the War Office he had often had it demonstrated to him that the authorities there were not concerned because civilians were short of boots. The duty of the officials was to prosecute the war to a successful end, and they could do it only with supplies of men and equipment. He gathered that the War Office would be satisfied if sufficient men remained in the shoe manufacturing industry to supply the need for Army boots, and that if civilians could not get boots they must be content to wear slippers rather than American boots! When the demand for Army boots declined and trade became normal he was confident that the patriotism of British buyers would assert itself. He had even greater confidence that when the time came the industry would rise to the occasion. They always had this fact in their favor—that boots turned out of British factories always bore some resemblance to the original sample. That could

not always be said of American productions. The American invasion would throttle itself simply because the American manufacturer was out for dollars, and having got in the market with a taking line, he would get out promptly by taking as much out of the boots as he could. He had done the same with the Governments of the Allies, and, if he would do that with business connected with the supply of huge quantities—orders not obtained on a competitive basis—they could rely on him doing it in less profitable transactions, when he was up against local competition and knew he had to quote low rates. Mr. Parker, concluding, said he did not fear American competition, for the simple reason that British manufacturers would rise to the occasion and defeat it when the proper time arrived.

### New Channel on Welt Insoles

(Written for the Shoe and Leather Reporter)

In England they are experimenting with a new method of channelling grain leather insoles that fits in with the system of inseaming after the shoe leaves the hand method laster. The only operation between these is that of trimming off the surplus vamp and lining that is lasted over the raising flap of inside channel.

The channel is practically the same as a turn sole channel. Instead of a slit being made in the edge of the insole a piece is cut out of it on the flesh side and this makes a "shoulder" for the vamp to be tacked over. The depth of this shoulder is the same as the depth of the inside channel, and the inseam awl will have a better chance of cutting through the between substance more uniformly. With the old channel it is absolutely essential that the lip is opened before the puller-over gets the shoe, and with the class of labor now employed in preparing the shoes (tacking insoles on the lasts, applying box toe gum, and inserting counters) there are many complaints of insoles being put in without the lip being properly opened. The tacks of the lasting machine are driven through both portions of the split edge and the insole is then held down in such a way that the inseamer cannot sew the shoe. The same trouble is met with when the insole does not touch the last, but stands up from it at certain points. In this case the awl will often "drive under" the insole where it is raised and spoil it.

By dispensing with the split edge there is not much need for special care in preparation of the insole. The tacks are driven at the top of the shoulder, and the pressure

## What is Initiative?

*A Timely  
Thought  
for the  
Salesman  
or Ambitious  
Beginner  
Anywhere.*

THE world bestows its big prizes, both in money and honors, for but one thing. And that is Initiative. What is Initiative? I'll tell you. It is doing the right thing without being told. But next to doing the thing without being told is to do it when you are told once. That is to say, carry the message to Garcia; those who can carry a message get high honors, but their pay is not always in proportion. Next there are those who never do a thing until they are told twice; such get no honors and small pay. Next, there are those who do the right thing only when necessity kicks them from behind, and these get indifference instead of honors, and a pittance for pay. This kind spends most of its time polishing a bench with a hard-luck story. Then, still lower down in the scale than this, we have the fellow who will not do the right thing even when some one goes along to show him how, and stays to see that he does it; he is always out of a job, and receives the contempt he deserves, unless he has a rich pa, in which case Destiny patiently awaits around the corner with a stuffed club. To which class do you belong?—Elbert Hubbard.

of the pulled-in vamp helps to keep the insole down to the last. The width of the leather cut away will vary according to the thickness of the vamp and tip, and also according to the width of finished welt required. With a close shank shoe the maximum width of cut will be in each shank and minimum at the sides of ball, the cut being made wider at the toe to allow for extra thickness of tip and box.

#### English Leather and Shoe Profits

One wonders what the trade here would say if the affairs of the various concerns in the shoe and leather trades were paraded in print as they are in England. Recent issues of the trade press there contain accounts of the operations of the various companies making leather and shoes as set forth in annual meetings, and the figures make interesting reading, even on this side of the water. Certainly there does not seem to be any leanness as far as profits go with either trades. We give a few figures in order to make the teeth of some of our local establishments water, so to speak.

Lennards Limited of Leicester show a year's profit of about \$235,000; Faire Bros., the celebrated findings house of the same place, turns the neat profit of \$315,000; Freeman, Hardy & Willis, the great shoe manufacturing and retail concern, balances profit and loss with about \$510,000; Steed & Simpson, Leicester, \$325,000; Edwin Bostock & Co., shoe manufacturers, \$210,000; Geo. Angus & Co., leather merchants, \$270,000. Some of our larger Canadian concerns will wish they were in Great Britain as far as last year is concerned.

#### Dyes Affect Laces and Other Supplies

Findings and supply houses have received copies of the following notice sent out to makers of laces and similar lines recently by the dyers:

On account of the present unusual conditions, it is impossible to purchase certain dyestuffs at any price, or to secure delivery on contracts placed several months since. In consequence of this abnormal condition we cannot guarantee colors and deliveries, and all orders are taken subject to our ability to secure the dyestuff. We are sparing no effort to get dyestuffs, so that we may make prompt and satisfactory deliveries, but ask you to co-operate with us during the continuance of these unusual conditions by being lenient in your judgment of shades, and in your criticism of deliveries. Not only is the situation in regard to colors most unsatisfactory, but all of the raw materials which enter into the dyeing and bleaching of yarns, are in such demand that delays in processing are almost impossible to prevent, and the transportation facilities are so inadequate that deliveries are seriously embarrassing manufacturing operations.

#### MANUFACTURERS' NOTES

The Durkee shoe factory building in Truro, N.S., has been sold to Howard W. Wentzell, of Halifax, and a tobacco company will carry on business there.

The Goodyear Tire and Rubber Company, of Akron, Ohio, not only produces the largest number of automobile tires, but is also the leader in the motor cycle field. This year's production of motor cycles will be about 60,000.

The Winnipeg Telegram states that the carriage tire department and the fire truck tire department of the Goodyear Tire and Rubber Company have been combined under one head. F. H. Sawyer, who has been manager of the latter department, is in charge.

The annual meeting of the Perth Shoe Company, Perth, Ont., took place last week. Among the items of business indicated in the notice of the shareholders is one asking approval of a bylaw to sell the assets and undertaking of the company to a company with a capital of \$50,000.

A Montreal paper in speaking of R. W. Ashcroft ac-

cepting a position as advertising manager with the United States Rubber Co., of New York, says: "It's another case where American manufacturers show common sense by coming to Canada for thorough advertising men. It may be news to some to learn that many of the top-notchers in the advertising profession are Canadians."

A suit for \$45,000 has been entered in the High Court in the Province of Quebec, by Frank W. Belmar, against the John Ritchie Company, Limited, for the sum of \$45,000 for commission in connection with sale of government footwear. The Ritchie Shoe Co., Limited, deny that they owe the money.

The response of the citizens of Brantford to the appeal of the Patriotic Fund was very generous. The employees of the Brandon Shoe Company responded with a sum equivalent to one day's pay per month for twelve months. When it is remembered that a large percentage of these employees are women and girls, this response is indeed satisfactory.

An official decree has been issued confiscating the entire stock of leather in Austria and Hungary for military purposes. The sudden and unexpected measure, it is expected, will have a serious effect on the manufacture of leather goods, which is one of the most profitable branches of Austrian industry, and also upon the shoe trade. The prices of boots and shoes are said to have already risen greatly.

Amongst the firms that have been hardest hit by the war with respect to its staff and operators, is that of A. R. Clarke Co. The late head of the concern lost his life through the torpedoing of the Lusitania, and of the employes 58 have joined the overseas forces, with twenty offering who on account of physical and other disabilities, were not accepted. About 45 per cent. of their entire establishment have either stood or offered to stand by the colors, and in addition the firm have contributed as individuals to the patriotic and other funds in a most liberal way.

Wholesale boot and shoe merchants, of Winnipeg, are busy shipping to country points. They state that stocks were arriving from the eastern factories in a good way, and the difficulties of traffic were not seriously felt here, but would be more noticeable at points west of Winnipeg, where trains were snowbound and traffic generally congested. Recently, owing to severe weather, first consideration had been given to shipments of fuel and livestock. The winter weather has been strenuous enough to enable country merchants to clean up their stocks of winter footwear in a satisfactory manner, and spring trade would be entered upon under healthy conditions.

Replying to Hon. Frank Oliver, the Minister of Militia stated that the average price paid for canvas shoes ordered for the Canadian expeditionary forces was \$1.70 a pair. Each man ordered overseas had been supplied with a pair, totalling 116,000 pairs, while 50,000 pairs had been issued in Canada.

Canadian manufacturers of boots and shoes should make note of the following paragraph which appeared in the Yorkshire Post of December 30th: "It looks as if in a short time the civilian population of this country will be faced with a boot famine. In the Leeds district all the boot manufacturers are now very busy on heavy orders for the armies of the Allies, and every skilled operative has to be kept to this work. Enlistments among boot trade operatives have been very numerous, with the result that there is scarcely sufficient labor to carry out the urgent military orders. There is an abundance of hides in the country, and the price is not high, but here again the labor problem is becoming acute. Modern methods by which the time occupied in tanning is very much reduced, have relieved the situation up to now, but the demands of the huge armies of the Allies are so enormous that the strain is being felt."

(Continued on page 49)

# There's Nothing Like Leather

There is nothing that will take the place of GOOD HONEST LEATHER in the shoes for the PEOPLE. Flimsy substitutes may answer for light fantastic shapes, but never for the

the store that sells EVERYDAY SHOES. It has the best in leather, make and fit that money and skill can put into it.

## CONSCIENCE AND SALESMANSHIP

THERE is a story told of an Irishman who, standing in a cemetery, read aloud an epitaph which he saw on a tombstone. "Here lies William Thompson, an honest man and a lawyer." Scratching his head Pat was heard to ruminate, "What the dickens did they want to bury two min in one grave for?" There are people who will at once ask what has conscience to do with salesmanship.

There is an Old Book that contains a wonderful fund of business as well as spiritual truth, concerning which one of its writers says that it is "given by inspiration and is profitable for teaching, for reproof, for correction, and for instruction." In a broader sense than that meant by the gifted apostle—its principles, its maxims and its injunctions bear upon the life of to-day, business as well as social. Taking a few words of Paul, the writer referred to, we can apply them with unusual force to successful salesmanship, in the fullest and most permanent meaning of the term.

"Holding faith and a good conscience, which some having put away concerning faith have made shipwreck." The writer of that homely but effectively picturesque statement, had sailed in a small sailing craft in his boyhood across the treacherous Mediterranean, when his home was in the great seaport of Tarsus, and he never forgot, as none of us have, who have seized the sheet in one hand and the tiller in the other, and ventured upon the uncertain deep, that in that sail and tiller we held our lives and the lives of those who were with us.

Faith is the motive power of life. Without faith it is impossible for a man to get anywhere in this world or the next. In business, it is the fundamental of success. The man who has no faith in himself, in others, or in the verities about him might as well give up.

A salesman before he can hope to accomplish anything in his life work, must have faith in the house he is with and the goods he sells. He must have confidence in the honor, as well as the ability of the man whose money he is taking and woe to that man who discovers that his trust has been put in a broken reed. One of the saddest experiences along this line was afforded some time ago by a young man who began to work for a man who had been his Sunday School teacher, whom he discovered was a "short weight" artist. He never got over the shock and finally went to pieces through drink. It is a great thing when a man realizes that he is working for a "straight" house and can assure his customers that they can absolutely depend on its word as on its goods. The house who fails to put this incentive behind its men has lost more than half the race. When a man knows he has to take "dirt" for his employers he loses heart.

He must have faith in the goods he sells. Let his confidence in the line or lines he is handling fail him, and it is with him as with the sailor who lets go the sheet in a heavy sea—he is on his beam ends. It is all very well to say the quality of the goods is the "house's" affair. That is like tying the sail rope to the gunwale, and letting her run before the wind. The first thing you know a squall strikes the sheet and over you go. The man who does not know or does not care what the character of his goods is, will some day run up against someone who will let him know in such unmeasured terms that he will be glad to crawl out the door and go away to think.

But it is particularly with regard to "conscience" that the salesman needs to be on his guard. He may have a good "boat" and have quite the right amount of canvas to carry him along at the proper speed, but unless he keeps his hand on the tiller, as well as his eye on the sheet, he may not see port. A steady hand must guard against jibing.

The salesman has a duty to the customer as well as his employer. The old Latin proverb, "caveat emptor" (let the buyer beware) is good law, but poor business. If your

customers get the idea that they have to watch their deals with you, it will not be long until you have to change your customers or take to some line where you can only sell one man in a life time. To-day, the successful salesman in the accepted sense is not the fellow who can sell the most goods in a given period, but the one who makes the best and most permanent and profitable customers for his house. There is a theory abroad in some quarters to-day that a salesman can know too much about the goods he is selling. This, it suffices to say, is not the attitude of houses that have in view the permanency and strength of the support of the community in which they exist. There are some people who expect too much for their money, and when they buy a wool mattress, complain that it is not hair, or they bring a ten-dollar suit back because it does not last them a life time. A salesman must be on his guard all the time in this use of "conscience," lest, on the one hand, he injures his prospects by too candid pointing out of faults in the goods, and on the other, allowing customers to get away with the idea that they have bought something they have not paid for. A case in point comes up where a shoe salesman had practically sold a pair of what are known as "fair-stitch" shoes to a customer for \$2.00 and then started to impress upon him the fact that they were not Goodyear welts, with the result that he upset the sale, and the customer went down the street to another store, where they were not as scrupulous about informing people on the points in manufacture. The shoe was a good one for the money, and if the salesman had been content to state that it was "machine sewn" and leave it at that, the customer would have been satisfied. As it was, he probably went elsewhere and got cheated, in accordance with a sign we once read over a certain store:—"Call and examine our goods and prices;—don't go ELSEWHERE to be cheated."

This salesman had another course open to him, if he had properly sized up his customer. If he saw that the man wanted a better article and would pay for it, he could have convinced him of the wisdom of this course, provided he was a salesman worthy the name. It is right here that the salesman stands to make a friend, not only for himself, but the house. Most people, and men especially, like to get credit for intelligence and almost instinctively respond to genuine information and the effort to appeal to their appreciation of worth. There is a class of people who want things cheap and who hardly care whether the article they buy will hold together till they get home. Salesmanship and everything approaching scrupulousness is lost on these bargain hunters, who will buy an eighteen collar for a number fifteen neck, or a shoddy mattress for a fifty dollar bed.

But there are men and women who come into a store these days who depend on the salesman or the proprietor to give them not only value for their money, but see that they get goods that will give them the satisfaction of a real, sensible investment. A lady was purchasing dining chairs in a large store the other day. She was economical in her ideas and was looking at a suite that the price ticket placed at \$9.75. The proprietor, who knew the lady, came along and saw that she was about to close for the diners. He apologized for "butting in" but said he did not believe the suite would give her satisfaction. "You have a family of young boys," said he, "and I don't think they would last you two months." He suggested another set at \$14.50, which he said would give her five times the wear of the other, and she took it. The salesman was selling the lady what she wanted, and probably did not like the idea of trying to "jack her up" as salesmen sometimes do, but he forgot that "golden rule of commerce," see that the customer is protected. She would probably in three months' time have become "sore" and gone somewhere else.

# Substitutes For Leather

**A**T both the manufacturers' and retailers' meeting held last month in New York, the question of leather substitutes was rife. One of the features of the convention was the address given by Mr. Blake of the Goodyear Tire & Rubber Co., who claims that even for sole leather a substitute has been produced that would outbid it in every way in shoe manufacturing. It is a broad question, and just now is worth consideration.

Naturally, tanners stoutly maintain the superiority of well tanned leather for all purposes of shoe-making, although makers of light stock admit that for certain purposes fabrics are bound to be used from time to time, especially in fancy shoes and one manufacturer of calf goes so far as to suggest that shoe manufacturers seriously consider the possibilities of other products than leather for light shoes. We have interviewed a number of tanners as well as shoe manufacturers on the subject, and here is what they say. Naturally most of them do not wish their names used.

A sole leather tanner says: Regarding the necessity of substitutes for leather, I may say that we find many of the most successful firms in the country have built up their business by putting out all-leather shoes. While we feel that this is a matter which should be settled by the shoe manufacturers and not by the tanners, yet we know a very large manufacturing firm in the South Western States which guarantees its customers nothing but all-leather shoes, say that a very large increase in their business has been gained by this guarantee.

We naturally feel that "there is nothing like leather" and while there may be an odd substitute such as leather board counters that take the place of leather counters, yet very little substitution can be made without seriously damaging the wearing qualities of the shoe.

BEARDMORE & Co.

A prominent shoe manufacturer says, re substitutes for leather: I think that whatever substitutes are put on the market, most of them are only suitable for the lighter grades of shoes, and no doubt as leather gets still dearer and scarcer many things will be thought of and worked out to try to keep shoes down in cost, but for staple goods we think it will be a long time before anything will be on the market that will be a real substitute for solid sole leather and good cow upper leather for hard wear for the workingman's shoe.

## Another Tanner Says:

The question discussed by the American Shoe Manufacturers' Association and the Retailers' Association, at New York, recently, as to the desirability of looking for a substitute for leather, is certainly a timely one. If the shoe and leather trade can find a satisfactory substitute, it would certainly relieve the situation somewhat, and especially so as the tanners' position is at present a very difficult one.

Hides, extracts, bark and everything entering into the manufacture of leather have advanced continually, and considerably more so than any prices for leather yet obtained would warrant. As prices of leather, we believe, must further advance, the finding of the desired substitute would be a boon to the leather trade as well as to the shoe manufacturers, as if such were found it might stop the continued advances of tanners' raw material. The well known adage, judging by past history, may however in the end be found to still hold good, namely:

"There's nothing like leather,  
If it's well put together."

Certainly the last thing a tanner ought to do is to advocate substitutes for leather. It is true the leather situation in some respects, especially calfskins, is very strenuous, but at the same time it is the business of the shoe manufacturer to size up the situation the same as a tanner has to do when his raw material is difficult to obtain, and do what seems best under the circumstances. The shoe manufacturer is always on the lookout to use something cheaper and even risk the quality of his goods to accomplish that purpose. Take, for instance, the craze for cloth tops, which existed for a year or more. Cloth is not fit for tops for boots and shoes, and, in the long run, is the dearest stuff they can get. It will not keep its place, looks sloppy and nasty after it is worn a little while, and this they found out by experience, but they thought they could save a few cents a pair by using cloth and they did this at a time when calf leather was very cheap.

The fact of the business is that long experience has taught that there is no substitute for leather, that in the long run will give satisfaction and be as economical and as satisfactory as the real thing.

If a shoe manufacturer wants to take the risk of trying and testing out some substitute for leather and get into trouble, as he will in the course of time by doing, let them take the full responsibility.

As a result of war conditions some kinds of leathers have advanced a great deal in price. They may advance more, but everything else is advancing in proportion and it is owing to extraordinary conditions that this situation is caused, and it cannot possibly get any better until the war closes and the markets of the world are again open for business. In the meantime we are all up against it in various ways the tanner, shoe manufacturer, shoe jobber, shoe retailer, and we have simply got to use common sense and judgment and make the best of the conditions. To put in a lot of trash into shoes to tide over this situation and make all your customers who buy shoes, mad a little later on, would seem to me to be utter folly and that will be the result if such a course is followed.

# Lace Shoe Logic

You can't make any mistake in purchasing lace shoes at this time.

They have always been the most reliable staple and now they are the style, too, so they have everything to commend them.

Lace shoes mean quick fit, quick sales — no come-back for free repairs.

This is now more than ever a factor, for high cut boots never did look well when buttoned and every additional button is a problem in fitting. High cut laced shoes, on the contrary, are easy to fit; they look well. Laces form an adjustable fastening; they automatically meet and satisfy the many conditions in fitting which, in the case of buttons, require time, expert attention and repeated expense.

Lace shoes are not shelf warmers. They are in demand now; they will be even more so next season.

You know your trade, but if you have any doubts as to what to buy, lean towards lace shoes; it is the logical thing to do.

**UNITED SHOE MACHINERY COMPANY OF  
CANADA, LIMITED**

122 Adelaide St. W.,  
TORONTO

MONTREAL,  
QUE.

QUEBEC

**MANUFACTURERS' NOTES**

Louis Gauthier, Limited, shoe manufacturer, Quebec, recently had a sale.

J. E. Dupre, of Montreal Box Toe and Heel Co., was in Quebec this week.

Alf. Magnan is now in charge of the lasting department at Tourigny & Marois, Quebec.

Practically all Montreal manufacturers are advancing their prices on footwear.

Jules Payan, of Duclos & Payan, has been elected alderman in Ward 1, St. Hyacinthe.

P. Blouin, formerly of F. Blouin, Quebec, recently arrived in the city from Boston, on a business trip.

All grades of sandpapers will be advanced on March 1st. The average increase in price will be about 18 per cent.

Geo. A. Slater, Chairman of the Boot and Shoe Section of Canadian Manufacturers' Association, was in Quebec this week.

Geo. A. Slater Co., Limited, makers of Invictus shoes, have withdrawn all prices for the first time in the long history of their business.

Shoe manufacturers of Quebec are all busy—work of all kinds in these lines is increasing. Dongola leather is very scarce at present.

W. F. Martin, Kingsbury Footwear Co., Montreal, has returned from a trip to leading leather centres where he has been searching for stock.

Louis Beaubien, wholesale shoe dealer, of Quebec, is recovering from an attack of La Grippe, which has confined him at home for some time.

A number of friends of Edgar Clement, tanners, Quebec, have requested that he be nominated as alderman of Jacques Cartier Ward, and he has accepted.

Pierre Blouin, Reg., is the name of a new concern in

Pierre Blouin, Quebec

Quebec, wholesaling leather and manufacturing a range of manufacturers' shoe findings.

L. C. Galarneau, tanner, Quebec, recently purchased the building formerly occupied by Bedard & Samson, tanners. He has opened an office there for the buying of raw hides and skins.

Buttons continue to advance. Since the first of the year there have been two increases in price, the first being 4c. a great gross and the second 6c. a great gross. The advances are for this amount at the factory, meaning that the

laid down price is even more. Scarcity of fibre and colorings contribute to the advance.

Alex. Angus, who for a number of years has been connected with the sales department of the Ames-Holden-Mc-Cready Company, and who has just returned from a trip to

Alex. Angus

Great Britain and France in that company's interests, has accepted a post with the Miner Rubber Company as sales manager.

J. E. Petrie, representative of the Ames-Holden-Mc-Cready Co., Limited, Montreal, is president of the Maritime Commercial Travellers' Association.

The following were nominated inspectors of the Rock Shoe Manufacturing Co., Quebec, now in liquidation: A. Geo. Russell, J. A. Scott, Jos. Racine, Arthur Richard and Lucien Borne.

**A NOTED FIGURE**

It has been said that there is not a man prominent in leather manufacturing to-day who cannot trace back his connection with the leather trade through at least three generations. Leather seems to get into the blood and can't be gotten out by any natural process.

We had considerable to say about Hon. E. J. Davis in an article entitled, "A Career in Leather," which appeared in the SHOE AND LEATHER JOURNAL of November 15th last. There is probably no more representative leather man in Canada to-day than Mr. Davis, whose father and grandfather had the distinction of making leather within a few miles of where the great Davis plant stands at Newmarket to-day.

We had our say, as we have noted, in the article referred to with regard to his business and personal characteristics, and it is only because we had not at the time commenced our gallery of leather and shoe men, we are now giving him his place as one of the pioneers of the industry on the front cover.

Mr. Davis is as wide awake and quite as much on the job when it comes to the fine points of the leather game and matters affecting the welfare of the industry, as he was twenty-five years ago, if not more so.

He can also pot a running deer at a hundred yards better than he could when he was twenty-five. He can take the measure of a fine buck quite as readily as a good calf.

**WANTED** by a young man going out of the Retail Shoe Business, a position as a travelling salesman, with some Ontario house. Apply Box 30, SHOE AND LEATHER JOURNAL, Toronto.

**TRADE PAPER SUPERIOR FOR CREATING DISTRIBUTION**

Chas. H. Furber, manager of the service department of the Boot and Shoe Recorder, in a talk at the Pilgrim Publicity Association's Eight Bells, on Thursday, January 20th, made the statement that the best way to get merchandise before the public was through trade paper advertising campaigns directed to the retailer. As an instance he cited the case of a new sole for shoes that had been advertised continuously in a trade paper for four months, during which time 260 accounts had been opened each of which was directly traceable to this advertising.

Mr. Furber said further that it was not always possible to trace direct results of trade paper advertising but that the cumulative results invariably proved the efficiency of trade paper advertising.

### THE PIPE OF PEACE

The peace maker and as often the pace maker of the Quebec shoe trade is the genial Jimmie Scott, who is the best known and best liked man in the Ancient Capital, as far as shoedom is concerned. He has kept open house for years in his establishment, and has elegant rooms fitted up, not only for the entertainment of the trade but for the holding of meetings from time to time of shoe manufacturers. He has a rack of "churchwardens" with a pipe for every well

known man in the trade, and these gentlemen as they drop in are able to put what Jimmie says in their own pipes and smoke it. There is no use talking, the enimitable James has kept the trade in good humor with themselves and the world at large for a long time, and deserves the credit often for getting the lion and lamb to lie down peacefully together. Amongst the names found on the bowls of the pipes are the following:—

Luc Routier.	S. P. Dugal.	A. F. Logan.
Jules Marois.	J. A. Duchaine.	W. R. Richard.
A. J. Russell.	P. C. Lachance.	J. A. Munroe.
F. J. Hogan.	H. T. Wright.	A. E. Marois.
N. Gagnon.	John Perkins.	A. J. Richard.
W. Desbiens.	E. Trudel.	W. P. Frances.
L. Tanguay.		

F. H. Meinzer, who has been with the selling department of the Miner Rubber Company for the past three years, has been appointed manager of stocks for the company, with sole charge of the stocks at the factory and all branches and selling agencies.

The Smardon Shoe Co., of Montreal, have issued one of the handsomest show cards of the season. It is the life-like representation of a young lady in fashionable attire seated upon a stone baulstrade with her feet crossed. She wears a handsome pair of combination leather pumps of unique design. The whole figure is thoroughly up-to-date as to style and perfect as to artistic execution. It ought to make an excellent window or store decoration.

Paul Roy, Canadian manager for J. Einstein, Inc., has been to Quebec and Eastern Ontario towns showing cards illustrating fabrics for use in fall footwear and has booked some nice orders. Their cards indicate the popularity of the white corkscrew cloth shoes and also combinations of leather and fabrics such as one with an African brown calf vamp and white corkscrew upper. Full colors predominate,

popular shades being grey, midnight blue and brown. One of the nicest models is white all cloth shoe with a scalloped top of the Napoleon cut. The Gypsy and whole fox patterns are popular.

### THE ART OF BUYING

(Continued from page 23)

half so picturesque—and that it is going to be elevated to the dignity of a real business art in the not-distant future."

The man who buys is responsible in the main for the success of the concern. If you have the goods and people know it and see them, the sales end may keep up somehow, but if you have the best sales people in the world and you have goods that do not appeal to your constituents, or that are too numerous for the scope of your business, you will soon be at the end of your financial rope.

#### Buyer Must Have Good Head

A good buyer has to know the goods he buys through and through. Not only so, he has to know values on these goods. In his ability to buy better than his neighbor lies his first chance to meet competition.

He must have a clear head, an eagle eye, a heart of steel, and the courage as well as the skill of a good fencer.

He must know the needs of his store and the community. It is not sufficient to buy goods cheap. They must be suitable or profits will have to be sacrificed on them. He must know his store and the number of times his stock can be turned over. Three-fourths of the failures come from bad buying, and most of it may be put down as over-buying. The man who is a "good fellow," when it comes to buying, will buy himself out of a job or out of a business.

### LEATHER TRADE JOTTINGS

(Continued from page 32)

prices have gone from 25 to 30 per cent. higher than they have been for several years previous to last July. Tremendous advances have been experienced in tanning materials and labor. Potash, soda and lime have climbed skyward in leaps. Glycerine within the last few months has jumped from 15 and 16 cents to 65 cents a pound because of the demand for making explosives, and arsenic, used with lime in a labor-saving process, is virtually not obtainable at any price. We are compelled to use lime alone, which makes a decidedly more lengthy process, and consequently adds to the increased cost of production along with the 10 to 15 per cent. wage advances that have grown out of war conditions.

"Unusual demand for moroccas, as well as advanced cost of manufacture, is, of course, a big factor in forcing prices to from 15 to 20 per cent. beyond the normal on the finished product. The market is almost entirely domestic, and is due chiefly to the popularity of extreme high-topped ladies' shoes in blacks, whites and colors. I would say that the consumption of glazed kid has increased within the last few months to the extent of more than 500 per cent.

"The average price of staples is today 24 cents per foot, while whites and fancy colors, being in even greater demand, are bringing from 60 to 75 cents per foot."

# Among Retailers

The Eaton Shoe Mart, Montreal, has dissolved.  
 The Schwartz Shoe Co., Toronto, has assigned.  
 Nap. Cloutier, dealer in shoes, Montreal, is dead.  
 H. B. Ohrt, boots and shoes, Toronto, has assigned.  
 R. H. Kenyon, dealer in shoes, Toronto, has assigned.  
 The shoe stock of H. Girard, Montreal, has been sold.  
 The shoe stock of A. Labelle & Co., Montreal, has been sold.

Chas. Robson, Oshawa, was in Montreal, on February 10th.

Geo. Courey, shoe dealer, Cap Magdelaine, Que., has assigned.

H. J. Puce, boot and shoe dealer, Hamilton, Ont., has sold out.

D. A. Knechtel, dealer in rubber goods, Moose Jaw, is selling out.

C. F. Cooper, shoe dealer, Hamilton, suffered a fire loss recently.

G. G. Lennox, Limited, wholesale boots and shoes, have incorporated.

Gold & Cummings, a shoe firm, has recently been registered in Montreal.

The stock of Leonard & Co., shoe dealers, Toronto, will shortly be sold by auction.

Geo. M. Jenner, boots and shoes, Winnipeg, has sold his stock to Harry Cohen.

The stock of the Schwartz Shoe Co., Toronto, will shortly be sold by auction.

The shoe stock of R. N. Williams, Toronto, will be sold by auction on February 16th.

Chas. F. Walker, of Portage la Prairie, is opening a boot and shoe store in that city.

A complete Goodyear shoe repairing outfit has been installed in Almys Limited, Montreal.

A statement of the affairs of the Craft Fashion Shoe Store, Montreal, is being prepared.

Thos. Lissimore, boots and shoes, Wainwright, Alta., is negotiating for the sale of his business.

A statement of the affairs of A. S. Many & Co., shoe dealers, Verdun, Que., is being prepared.

A. E. Peterson, Model Shoe Repair Co., Ottawa, has installed an 18 foot Goodyear shoe repairing outfit.

The shoe firm of Rene & Duplessis, Three Rivers, has dissolved. J. R. Rene will continue under the same style.

Eug. Thivierge, shoe retailer, Quebec, has signed a contract with the United Shoe Machinery Co., for two lasting machines.

The Regal Shoe Co., Limited, has contributed one thousand dollars to the Toronto and York County Patriotic Fund.

R. Cass, formerly with Ames-Holden-McCready factory No. 1, has been appointed superintendent of James Muir Co.

L. F. Falardeau, shoe retailer, Quebec, has sold out his entire stock as well as building to Jos. Plamondon, shoe dealer, this city.

Mr. Carman, of A. F. Clapp & Co., of Boston, was in Toronto recently visiting Ed. R. Lewis, who is their Canadian representative.

A. Ducharme, who represents United Shoe Machinery Co., Quebec City, is installing a set of pulling over and lasting racks for Ames-Holden-McCready factory in St. Hyacinthe.

The Toronto Shoe Retailers' Association are holding their banquet on Thursday evening, February 24th, at the St. Charles Hotel. They are expecting a very good gathering of the clan, and there will be a number of interesting short addresses by prominent men in the wholesale and re-

tail shoe trade: They are looking forward to a very pleasant evening.

A meeting of creditors was held last week in the matter of Abraham Schwartz, Toronto, (trading under the name of the Schwartz Shoe Co.), who assigned to Geo. A. Stevenson. Creditors are requested to file their claims with the assignee, and notice is given that the assets will be distributed thirty days from February 3rd.

Parties representing the new shoe factory that is locating in Listowel, Ont., were visiting that town recently. Plans are being prepared and arrangements are being made to get to work as soon as possible.

J. F. Duff, for six years with the Peerless Store, Ottawa, has commenced business under his own name. In addition to boots and shoes, he will carry dry goods, and the premises he will occupy have been re-fitted to accommodate the new business.

A. J. Beer has acquired the entire stock of the boot and shoe department of the down town store of the Summerland Supply Company, Summerland, B.C. Mr. Beer, who has been running a boot and shoe business in that town, found himself much overstocked in several lines in consequence of this purchase, and recently put on a sale in which many bargains were offered to the residents of the town.

James Jupp, of E. J. Jupp & Son shoe retailers, Queen street east, Toronto, was one of the "Generals" commanding a military district for the \$50,000 Club, in their recent campaign for the Patriotic Fund. Besides organizing a huge territory, Mr. Jupp found time to address mass meetings of employees in all sections of the city. Mr. Jupp is full of energy and his work had much to do with the successful carrying out of the campaign.

Downcast, weary and worn, racked with a mental strain;  
 For photos I sigh and for facts I pine, and I sigh and pine  
 in vain;

My queries ignored completely - 'tis more than I can bear -  
 My letters remain unanswered, though modelled with  
 artful care -

I crave some newsy items - or data expressively told,  
 But oh! for a line from a shoeman - 'tis worth to me  
 more than gold!

Narcisse Gignac, aged 18 years, recently fell down an elevator shaft at the plant of the Eagle Shoe Co., Limited, Montreal, and sustained a fracture of the nose and cuts about the face.

Notwithstanding the encouraging outlook there have been during the past few weeks rather an unexpected number of failures in the retail shoe trade. Although, after the turn of the year, one finds quite a few who are not able to continue their payments, it was thought this year that the improvement in business would lessen rather than increase the tendency. The principal trouble seems to be travelling on too little capital.

An advance in the price of shoes in Canada and the United States is advocated by the officers of the New England Shoe and Leather Association, who say an increase is necessary because of the advancing cost of leather and the demand for higher wages in Brockton, Lynn, and other centres in both countries.

A lecture on the care of feet and boots was given to all officers of units stationed in Toronto and vicinity by Major G. H. Wilson, medical officer, 75th Battalion C.E.F., on Tuesday, the 15th inst., at 5 p.m., in the Dairy Building, Exhibition camp.

The death occurred recently in Kincardine, of John Sellery, who was born in Scotland in 1837. Coming to Canada he started farming with his father near Kincardine. Later on they moved to Kincardine and went into the tan-

ning business. He was also in the boot and shoe business with his brother Robert, now deceased. Mr. Sellery was twice married and leaves a family of three sons and three daughters, most of whom are married and scattered in different parts of the world. He also leaves five brothers and three sisters, whose homes, like those of his sons and daughters, are in as many different cities. Deceased was an officer in the company which served at Goderich during the Fenian Raid many years ago. Mr. Sellery was very highly regarded by his neighbors.

#### 1916 DIRECTORY READY

The 1916 edition of the American Shoemaking Directory of Shoe Manufacturers is now ready for distribution. Besides containing all the features of previous editions, it has a new feature very valuable to salesmen, that is, the days and hours when shoe factory buyers will see salesmen. Other exclusive features of this directory are the daily output of firms in plain figures, percentage of welts made, complete detail of the classes of goods produced, etc.

The book is entirely revised to January 1st. There are something like seventy-five to a hundred new firms and as many more out of business, many changes in addresses, superintendents and buyers, etc. The price of the book is \$2.00 and it is published by the American Shoemaking Pub. Co., 683 Atlantic avenue, Boston, Mass.

## A NEW RUBBER FELT SHOE PLANT

**Cobourg to Have an Up-to-date Plant for the Production of Felts and Felt Shoes—Mr. A. J. Kimmel the Presiding Genius of the New Concern**

Mr. A. J. Kimmel, who put Elmira on the map practically with Kimmel felts, has purchased the premises and equipment of the Cobourg Felt Mills at Cobourg, Ont., and will proceed to model the plant and put it in shape to manufacture felt footwear.

Mr. Kimmel has been a prominent figure in felt shoe circles for the past thirty years. He was with the Berlin Felt Boot Co. for fifteen years in every capacity almost, and ran the Elmira Felt Co. for another ten, putting in his best licks at turning out a product second to none in the country—then he organized the Kimmel Felt Co. at Berlin, they both being taken over by the Consolidated Felt Co. in 1901.

#### Starts on a New Enterprise

Mr. Kimmel knows the felt proposition from the ground up and has many friends from coast to coast who will be glad to know that he has started the new venture.

Mr. Kimmel, who has been president of the Consolidated Felt Co. since its inception, has withdrawn from active interest in the concern and will devote his abilities and knowledge to the building up of the new enterprise.

Associated with Mr. Kimmel in the purchase and conduct of the business at Cobourg are probably three of the most practical and experienced men in their line in Canada. These are: Mr. Armond C. Kimmel, who for the past eight years has been manager of the Elmira Felt Co., Elmira; Mr. John F. Kimmel, for many years superintendent of the felt manufacturing in the Kimmel Felt plant at Berlin; and Mr. Arthur D. Vice, an expert in the planning and building for felt machinery, and, for a long period of years, mechanical superintendent of the Canadian Consolidated Felt Co.

These three gentlemen have already gone to Cobourg to take over the plant and begin active operations.

A change will be made in the name of the concern, and

A. J. Kimmel, Berlin, Ont.

an announcement will be made later. They will make a complete line of felt goods in men's and women's and will do justice to the name that Mr. Kimmel has made for up-to-date styles and thoroughness of manufacture.

# Interesting News Items

The Lyon Shoe Co. has recently been registered in Montreal.

A. Duchaine, of Duchaine & Perkins, was in Montreal last week on a business trip.

W. H. Breithaupt was elected Chairman of the Free Library Board, Berlin, Ont., at the inaugural meeting. At the request of the Board of Trade the board unanimously decided to open the main reading-room to the public on Sunday afternoons from 2 to 5 o'clock. Members of the board have agreed to take their turn in charge of the room.

Higher prices in boots and shoes are expected. This applies to everything that goes into the manufacture of shoes. There is also the possibility of higher duty on leather, and high freights are also a factor, as hides from foreign countries must assume war risks. A visitor from Boston says the leather dealers there are making large profits, while American shoe factories are also in a good position—much better than that of Canadian manufacturers.

The following visitors were in Quebec recently: A. Bill-cliff, of Frank W. Whitcher Co., Boston; J. E. Matheson, of United Awl and Needle Co., West Medway, Mass.; C. R. Marston, with the American Shoe Findings Co., Whitman, Mass.; H. C. Parker, of Parker, Irwin, Limited, Montreal; J. G. A. Pontbriand, of Parker, Irwin, Limited, Montreal; J. G. Dumas, of Matane, Quebec; H. Hurtubise, of the Panther Rubber Manufacturing Co., Sherbrooke, Que.; Alb. Charron, shoe manufacturer, of Contrecoeur, Que.

There has been 100 per cent. gain in the export of leather from Canada. This article has benefited enormously from the export trade, the value for 1915 being \$6,584,295, compared with \$3,170,550 in 1914. The increase was on both British and foreign account, \$2,950,950 being shipped to Britain, and \$3,448,198 to the United States, compared with \$1,819,906 and \$1,177,102 respectively in 1914. War explains the increase to Great Britain and the tariff the increase to the United States, the latter country having put leather on the free list in 1913. Canadian leather is obtaining a high reputation among the boot and shoe manufacturers of the New England States.

Mr. John Knox Lindsay, prominent in the shoe and rubber business of Canada for many years, latterly as financial manager of the Canadian Consolidated Rubber Company, died suddenly on December 26th at his late residence, 104 Albany avenue, Toronto. The late Mr. Lindsay was born in Newry, County Down, Ireland, on October 11th, 1853, and came to Canada when he was quite young. He settled in Montreal, where for many years he was connected with the Fogarty Shoe Company. Leaving that firm, he became treasurer of the J. D. King Company, of Toronto, and after ten years in that position he founded the firm known as the Robinson & Lindsay Rubber Company. Seven years later he became financial manager of the Canadian Consolidated Rubber Company.

It is stated that nothing is definitely settled in relation to the huge contracts for army boots that report said had been placed in England by the Russian Government. England must already be overcrowded with shoe orders, and if she made all her own army shoes, must come to this country for considerable quantities of civilian shoes. It is a question how many civilian shoes must be ordered here by England to make room for increased army business. The remarkable war demands will continue to make our leather markets more and more difficult for buyers.

Some time ago, a group of German speculators bought 80,000 Holland hides from the Amsterdam-Rotterdam But-

chers' Corporations at record prices. The sellers guaranteed the export of the hides to Germany, which meant that they would have to apply to the Dutch Government for an export license. The German buyers having advanced some 600,000 guilders of the purchase price, the sellers found that the export license could not be obtained, because the English Government had notified the authorities that if the hides were shipped to Germany, all supplies to Holland of American hides, leather and tanning materials would be cut off. The Dutch Government thereupon tried to force the Dutch tanners to take over the hides, but they declined to do so on account of the high price, and the fact that they were unsuitable for their purposes. The British Government does not allow the Netherlands Overseas Trust to make deliveries of the hides and tanning materials which have been arriving at Rotterdam lately, and has ordered the greater part of these cargoes to be re-shipped to England. The result of this measure has been that one large tannery has already been obliged to cease operations on account of a lack of tanning materials. It was understood that the Dutch leather industry was only willing to bear the loss on the hides if they received regularly their supplies of foreign hides and tanning materials, and await with interest the decision of the Allies in the matter.

## HAPPY WAR PRISONERS

We are indebted to E. C. Henderson, of New Glasgow, N.S., for the accompanying picture of German prisoners.

German Internees at Amherst, N.S.

The figures seem to indicate a pic-nic rather than a detention camp, and show that Canada is very liberal in her ideas of

German War Prisoners in Nova Scotia

the treatment of alien enemies. Some of the female figures, we understand, are "Huns" in disguise.

## These Brands Have Made Our Reputation— Let Them Make Yours

It is the surplus value in Tebbutt Shoes that make so many extra sales. Naturally men customers will buy where they get best value. During the many years we have been manufacturing, this fact has been foremost in our mind. The man in the street has come to recognise this.

*In the DOCTORS SHOE* he knows he gets comfort and appearance *plus* absolutely waterproof qualities in both sole and upper. He also gets an especially made sole that ensures an even foot temperature at all seasons.

*In the PROFESSOR SHOE* he gets the same comfort and appearance *plus* a patented cushion-  
etted inner sole that makes walking a pure pleasure.

Can you afford to overlook these facts when you are placing your next order?

Spring samples will be ready at an early period.

## THE SHOE AND LEATHER TRADES

**Spring is in Sight and Everybody is Impatient for a Start—Retailers Hopeful of Good Business—Manufacturers Already Feel the Buoyancy—Prices Going Up for Both Leather and Shoes—The Rubber Men Start**

**F**EBRUARY is "down and out" and everybody is glad. The result of the winter sales as far as can be learned, were not overwhelmingly encouraging, although even in the purchase of bargain shoes dealers claim there was a disposition to buy more liberally than usual. Quite a number of the smaller dealers have "turned up their toes" in a business way, with here and there a more important failure. On the whole the results in this respect have been better than expected and certainly more reassuring than they might have been.

Prices of materials still continue to go up and manufacturers see their profits on goods being made for spring trade steadily eaten into by the advances that are asked in all lines of leather and shoe goods. There is hardly an article that enters into the making of a shoe that has not advanced from twenty-five to one hundred per cent. One cannot wonder, therefore, that shoemen are on a "still hunt" for anything that will afford them relief, the result being that they are listening to propositions for the replacing of materials that they would not have considered a few years ago.

Leather producers are facing the same stress with respect to raw skins, tanning substances and dyes. In freights alone the difference in the last twelve months has been most remarkable, and before the war is over there will likely be brought into existence such conditions as will place the leather business in a position where its product will be doled out to those who insist on its use. The steady diminishing of the cattle supply on account of the tremendous demands for army supplies or food products is not being met by a corresponding effort in cattle raising, and if the war keeps up for any length of time, and there is no adequate relief in this direction, the world will not only be compelled to become vegetarian in respect to its food, but forsake its age long adherence to the belief that there is "nothing like leather."

The Rubber Season has opened and travellers are selling rubber shoes for next fall and winter season. In common with other industries the rubber business is experiencing the uncertainty and unsatisfactoriness of an unsettled market. There is no doubt that the next few months will witness marked changes in raw rubber conditions and undoubtedly within the next three months there will have to be a revision of rubber shoe prices. "There is, therefore, no risk to the buyer in closing just now for his requirements for next season. The retail trade are making preparations for a good spring season, and with fairly propitious weather there ought to be a good movement in shoes of all kinds. People are feeling more like spending money on their adornment as well as for their comfort this year, and a little encouragement given by aggressive business methods will bear good fruit. Some of the retailers in different lines are getting together and with the co-operation of the local papers inaugurating a "Dress Up" campaign. This ought to get things moving early.

The new war tax scheme has already been shot full of holes. As introduced it was crude and not only full of anomalies but possibilities for evasion; but the principle is right. Hitherto the willing horse has been ridden to death. It is time the burden was more equally distributed. The weakest point in the whole scheme is that the farmer who represents the greatest wealth of the country, escapes. Many of them are well able to bear their share of the burdens and responsibilities of war, and have so far shirked. The government for political advantage is helping them.

# How to Choose the Goods

As Important as Picking Out a Good Stand is Choosing the Right Goods—Do You Know Your People?

VITAL as is the importance of choosing the right place for the store, the thoroughness with which the question of the kind of goods to be sold and the character of the people forming the clientele is discussed, will determine success even more fully than the location. A merchant may have the very best business corner in town and may be up to the minute in his service, but with the wrong goods and the wrong public it is only a matter of time until he is "up against it."

Do you know the people you are serving or seeking to serve? Have you ever sat down and carefully dissected the possibilities in your line in the location where your store stands? It may be that you are seeking to do a high-class trade. Do you know just how many people there are within a reachable radius around your store who are likely to buy the class of goods you stock up with principally? It will not do to say there are so many people who "might buy them," the question is do they or will they buy them? There is a town not a hundred miles from Toronto that seems prosperous and well to do. It has grown steadily and satisfactorily in the last twenty years and has now a population of considerably over ten thousand. The people apparently have money and comfortable homes and it would seem as though all you had to do was to put good stuff in front of them and they would buy. But it is one of the poorest merchandising towns in Canada for its size. Why? Because the inhabitants are largely retired farmers and others who have never been accustomed to spending more than necessary for bare subsistence and ordinary comfort. They buy from cheap to medium goods and once in a good while the younger generation who are still at home loosen the purse strings and the family goes in for something real good.

There is another town about half the size of the first named that is considerably older in years, though not as prosperous in appearance. The population contains a good proportion of old families of means who have independent incomes and who are more or less identified with outside as well as local interests. There is a sprinkling of farmers and mechanics of the better class and the whole spirit of the place is quite the opposite to the town first referred to. There is quite a bit of society movement and while there is no extravagance people want things "nice." You can see the difference in most of the store windows which are usually, and ought to be, an indication of the character of the trade of the place. By the way the town is located so that in summer it enjoys the benefit of a transient population of a spending character.

There is another town between these two in size that owes its importance to the fact that it is a manufacturing centre. The bulk of the population

is dependent on four or five mills that give employment to a fair number of both men and girls. The rest of the people are either retired farmers, officials of the mills or those who make their living out of the regular requirements of the population. There is a sprinkling of foreigners amongst the operatives, especially the female part, but as a rule the work people are the regular run of employes from Canadian homes earning the average wages. One finds here an entirely different field for merchandising from either of the two previous cases and requiring quite different consideration and treatment.

The man who is to make a success of retail business in any of these places, whether it be in shoes, dry goods, furniture, furnishings or anything else, must sit down and carefully and thoughtfully follow out the indications that the characteristics of the different classes of population give of their requirements in the particular line. For instance, it would seem that to expect a large volume of exclusive or high-class trade from either the first or last of the three would be tempting Providence. There would undoubtedly be in each a certain amount of demand for special stuff, but the cultivation of it and the profit on it would be so problematic that a man would be putting in his time better working on lines that would keep his door latch on the go and his stock turning over. In the second town there is undoubtedly more scope for medium and high-grade goods, and that of course on a moderate scale only, so that a sprinkling of cheap lines would be essential in helping things out.

These illustrations only demonstrate the variety of conditions that may and do exist in apparently similar localities and make plain the absolute necessity for a merchant making himself thoroughly familiar with the ground before opening up a business. It also suggests the advisability of a merchant who has found his business on the wane or who has already made a failure of it sitting down and looking over the ground in an intelligent and painstaking way. There is a cause for commercial diseases as well as physical and if you can get at it the remedy is usually simple and effective.

In the first place do you know your constituency? Are you familiar with the characteristics and possibilities of the population in the midst of which you are situated if you have a good stand? Can you tell how many people, we will say of the wealthy class, are liberal enough to buy high-class goods if the latter are brought to their notice? Do you know the proclivities and tendencies of these and the so-called "fashionable" people of the town and neighborhood?

Have you ever sat down and listed or estimated the number of buyers of medium priced goods that your store can reach in your neighborhood through

the papers or through letters? Do you know how many business people, clerks, mechanics and "retired" of the better and more progressive sort are within reach of the call of your goods? Have you made any definite effort to find this out? Do you know how many average working people or farmers there are who are not great spenders but who will buy good honest goods at moderate prices as they need them or who have enough leeway to anticipate their wants? In other words have you gauged the possibilities of cheap trade in your district so thoroughly that you know its proportion with relation to the rest of the trade in your line.

Lastly, have you carefully studied the tendencies of all these sections of buyers, particularly the medium class, so as to know for your own satisfaction what the possibilities of development are in that particular class of goods? One of the most successful retail merchants claims that he has made a most careful study of what people are actually buying and using in his town and for years has managed to arrive at a fairly accurate estimate of the trend of trade in his line. At all events he has made the biggest success not only in his particular class of goods but of any merchant in the town. He made a failure of his first enterprise through "going it blind," by the way.

The man who has to sell "Rosedale" ideals to a constituency that uses "down town" styles will certainly discover the folly of such a course in due time. It may be that you have regularly gone over the heads of the people in the class of goods your store has been carrying. On the other hand it is possible that you may have driven away custom from the cheap stuff that you have handled, so that people have lost confidence in your store and its goods.

In no department of life are people so indifferent, as a rule, to scientific principles as in retailing. A great many seem to think that all a man has to do is to open a store, fill it with goods, advertise and take in the money. The best even seem to think that the ordinary principles followed in any enterprise, such as making sure of the ground at the start, are ideal but unnecessary. The fact that about ninety out of every one hundred who start in the retail business fail ought to cause one to pause and think. The ten who succeed are those who leave no stone unturned, no detail unconsidered, and by being at it and always at it they get through the gate into the realm of business success beyond.

Get the goods the people want. Get your store in the place where they will see them or can easily call and examine them. Have the prices right. Have the service efficient and you will make the connection between the public pocket and your till that will push you into larger and more profitable activity until you are able to look back with complacency upon efforts that have placed you on "easy street" as far as means are concerned.

It is absolutely useless to spend your time and money on equipment, service and advertising until you can say with some degree of certainty—I have the stand, I have the goods, and I know my people. Then the game can commence in earnest and it is a royal game. To have a store where people flock to buy and go away satisfied to return again and again is an achievement worthy the effort of any man. There is as much brains needed and as much strategy called for to-day in the handling of a retail business as in any military campaign. Victories are only wrung from an unwilling enemy by sheer force of careful campaigning and all that it means.

# FITTING OFTEN DONE IN HAPHAZARD FASHION

**Too Many Persons are Indifferent or Know it All—The Only Satisfactory Method is to Scientifically fit Every Customer—Let Salesmen Refer to Each Line by its Proper Name Which Will Necessitate Fewer Questions and Less Misunderstanding**

By W. R. HENDERSON

I have often thought the "Retail Shoe Trade" is very lax in allowing the general public to go on buying footwear in the haphazard fashion that, to a certain extent, still exists.

The average customer asks for a pair of "shoes" and states the size. In response to the salesman's invitation to "please be seated" and the question (when necessary) as to whether he or she wishes to be fitted, we hear, "Oh, I always 'take' fours; they'll fit alright."

With this stone wall of defence, a salesman has to use every bit of tact and brains that he can muster to convince a customer that the only satisfactory way is to be scientifically fitted. This state of affairs is due chiefly to ignorance on the part of the customer, in that she (or he) has not been fitted often enough and does not realize that it is the only satisfactory method.

## Too Much Mock Modesty

Regarding the "fair sex" there is a certain amount of mock modesty displayed at times and I really believe some would rather continue to wear their old shoes than be fitted in the store. This is a very lamentable temperament for a girl or woman to inherit or acquire, as there is nothing immodest in displaying a few inches of ankle any more than showing a bare throat or arm. I am utterly opposed to "cozy nooks" and "cut outs" for fitting purposes, which only suggest, when there should be no suggestion. A woman, who thinks anything of herself, should prefer being fitted where "people do congregate."

The time to begin to fit your customers is just before they learn to talk, then they won't have a chance to dictate as to the size they "take," etc. From eight to ten months of age is a splendid time to begin the education. Even at that tender age, some of the girl babies are loathe to have a male salesman thrust his knowledge of "foot anatomy" upon them and their stubbornness would suggest that "mother knows best." As a matter of fact, most mothers know very little when it comes to fitting feet.

## Shame on Empty-Headed Mothers

On several occasions I have heard mothers exclaim, "Mercy, child, you surely do not take fives, why I only wear four and half myself, you ought to be ashamed of yourself with such big feet." Sometimes they urge trying size three and a half as they "hate such big looking shoes." Oh,

blissful, innocent, unconscious lads and lassies, give us more of you and would that you were always so. Shame on such empty headed mothers. Ninety-five per cent. wear shoes that are too short and too wide. There are more thin people in the world than fat people, consequently more thin narrow feet. Because of the fact that a thin narrow foot can go inside of a 4E shoe and feel comfortable at first, is a poor reason for buying that shoe if a 5½B is what that foot should have, to fit all over and protect it against shortness and consequent foot ailments, to say nothing of wear and keep-shape.

## A Salesman, but Not a Foot Fitter

You will hear some retailers say to the traveling man, "Send 'em all E width, my customers insist on lots of room." That man may be a salesman but he is not a foot fitter. Of course there are a few people with very short, thick, fat feet, that need the "Aunt Polly" type of out-sizes, but this is very far from the general rule. The sooner people get the idea of longer, narrower shoes, the better it will be for all concerned. Never mind where the end of the great toe comes. Your customer may have short toe joints. Let the ball of the foot (metatarsal) determine the length. This should be just forward of the shank in most cases, at the widest part of the sole. The feet should always be measured and from one and a half to two and a half sizes added for length. This impresses the customer at once.

Did you ever hear of anyone buying a suit of clothes in any kind of an up-to-date store, without first having a tape put around him? Are the feet less important? Then again, could we not give a much better service if the article were named correctly? For instance, a woman asks for a pair of shoes. She may wish an "Oxford," "Bal," "Theo," "Buskin," "Trilby Tie," or something with a mysterious name created since the great war. Let us refer to these as such, charge them by their names, write the name of the article on the cash slip and at every opportunity help your customer familiarize himself with your goods (but keep the size codes to your staff) which will necessitate few questions and misunderstandings in serving your trade.

## Call Them By Their Right Name

Just now, a woman entered with a little girl and asked for a rubber. I ushered them to a seat and took note of the shoe, when the woman said, "Oh, no, I want the kind that rubs out lines!" She had wanted an eraser and merely entered the wrong department, our books and stationery department being next door. Now, if the public was educated in knowing the so-called "rubber" as a "Galosh," and a "rubber" as an "eraser," we could do business expediently. No wonder foreigners say our language is difficult to master.

When a woman wants print, she goes to a dry goods store and asks for it. She does not ask for "that stripped cotton stuff." Then why should a woman go through two minutes facial contortion and finally say, "I mean the slipper with the little piece of elastic in the front," when she wants a simple little thing like a "Buskin?" It is time the retail shoe trade got busy, unless we are willing to admit that tradesmen in other lines are more efficient than we.

### LONG LIFE AND PROSPERITY

Find enclosed post office order for one dollar, in payment of subscription to "Shoe and Leather Journal," which I consider the best paper I get. Long life and prosperity to it. Wishing you the compliments of the season.

Yours truly,

Harriston, Ont.

D. SUTHERLAND.

# Keeping the Stock Well in Hand

**Shoe Merchants Should Confine Their Buying to Fewer Styles and Not Open Too Many Accounts—The Advantage of Good Stock-Keeping and Turning the Goods Over More Frequently**

"The best ever" was the unanimous verdict at a well-attended meeting of the Toronto Shoe Retailers' Association held in the Temple Building on February 17th, at which various matters of importance were taken up. It was the first regular monthly gathering, under the newly re-elected officers, with President H. C. Blachford in the chair.

Everything went off with a swing and enthusiasm that betokens a year of united action and sustained interest. Heretofore the sessions have been largely devoted to organization and constitutional matters. These have now been completed.

The first address that has been given before the members of the trade was by F. A. Guinivan, proprietor of the Walk-Over Boot Shop, on "System in Stock Keeping." Mr. Guinivan's remarks were followed with much interest, and he presented some valuable pointers.

While his talk was largely informal, the information that he sought to convey was that practically very few, if any, shoe retail merchants are making more than a bare living. If this is the case, the conditions are caused, not by lack of reasonable profit, but mostly through carrying such large stocks that they cannot make it turn over enough to warrant a good interest on the investment.

## Know Your Stock Thoroughly

He stated that this is virtually all caused by over buying, and over buying was the direct result of not being in close touch with the stock, what is selling and what should not be re-ordered. The speaker impressed on those present that if they had some sort of stock-keeping it would help them wonderfully in the purchasing of season's shoes, telling them at a glance the lines that did not sell well enough to turn the investment even once, the lines they should not have bought at all, and the lines in which they purchased too heavily.

One of the greatest advantages of stock-keeping no matter what the system may be (and Mr. Guinivan said he knew that there were many systems equally good), was to confine the buying to very few styles and also to few manufacturers. Practically all retailers buy from too many conflicting houses or, in other words, manufacturers that make shoes of an equal grade. No buyer can carry in his head what he has purchased from four or five travelers, and when the goods arrive he finds that he has bought three or four styles very nearly alike, and left unpurchased many lasts he should have bought.

## Cutting Down the Stock

By actual experience, many retailers in small stores find they can get along with fully one-third of the number of styles on their shelves that they usually have. This means cutting the buy volume

in halves, which naturally gives the dealer more money to spend for new shoes, while he has to pay less interest on overdue accounts. The result is a greater percentage of profit on investment. These were a few of the ideas which Mr. Guinivan conveyed to the members of the association in his remarks. In the discussion which followed, there were many interesting exchanges of views. A number of pertinent suggestions were presented, and several questions asked and satisfactorily answered.

Those who took part in the conference were:—George St. Leger, S. B. McCall, Percy Blachford,

F. A. Guinivan, Toronto

Chas. S. Parks, J. Warden Jupp, W. Burnill, Geo. Blake, W. B. Parvin and others. In fact, the interest was so keen that when the closing hour arrived a motion to extend the time was carried unanimously. It is the intention of the association to have at each meeting some representative give a terse talk on a live subject.

The next monthly gathering will be held in the Temple Building at ten o'clock on the morning of Thursday, March 16th, and a record attendance is expected.

The association is a live and aggressive body of men who are doing a good work for the betterment and uplift of conditions in the trade along the lines of co-operation, progress and prosperity.

### NEWSY BRIEFS FROM ST. JOHN

E. L. Rising, president of the firm of Waterbury & Rising, Limited, St. John, N.B., arrived home a few days ago from a trip to Upper Canada, where he visited Toronto, Montreal and Quebec with a view to purchasing various lines. He said he found prices stiff and certain kinds of leather very scarce. The manufacturers he said were all busy and would not give any quotations on fall prices. En route home Mr. Rising visited Ottawa and saw the ruins of the Parliament Buildings.

C. Henry Smyth, manager of Waterbury & Rising's branch store in Union street, St. John, N.B., was receiving congratulations a few days ago on the twenty-sixth anniversary of his wedding. Both he and his wife are in good health.

Shoe and leather merchants of St. John, N.B., are making an early start this year and in a few days will see their advance travelers starting out with their fall samples of rubbers, etc. Competition with Upper Canadian firms has been so keen that they are preparing to get in on the ground floor and book their orders. It is expected that there will be a slight increase in rubber goods although no prices have as yet been quoted. Indications point to a decided increase in certain kinds of leather, due unquestionably to the great demand for the use of the Allies. Military leggings are a scarce article in St. John and although merchants have placed orders they have been unable to have them filled.

Business in St. John, N.B., and in fact throughout the Maritime Provinces this year, compares favorably with last despite the fact that there is no apparent end to the gigantic struggle in Europe. Along the North Shore and in other sections of New Brunswick there has been the usual big demand for shoepacks and other styles of heavy leather footwear for use in the lumber woods. In the cities and towns there has been a decided falling off in the sale of men's footwear, due to the absence of so many Maritime Province boys either at the front, in England or in training at home.

A fire completely devastated the large buildings of W. J. Kent & Co., Limited, in Bathurst, N.B., a few days ago, and as a result the firm entailed a loss of upwards to \$175,000. The establishment was one of the largest on the North Shore and consisted of two large brick buildings occupying two blocks.

### KEEPING WHITE SHOES CLEAN

Buck and other white shoes that are seen in so many shops are easy enough to make, except in one particular. All such shoes must be kept clean, and, to this end, it pays to be fussy with them. The more such shoes are stained and the more dirt that gets on them, the more it costs to clean them, and while the cleaning itself is not done in the making or finishing rooms, the foreman of these departments should keep all this in mind fully as much as the foreman of the treeing and packing department. There is no particular feature of shoemaking to-day where co-operation is needed more, or pays better, than in this.

### NEW SALESMAN FOR PERTH SHOE CO.

The Perth Shoe Co., Limited, of Perth, Ont., who manufacture women's Goodyear welts exclusively and are now selling direct to the retail trade throughout Canada, have recently made several important appointments on the traveling staff. W. S. Pettes, who is a widely-known and well-liked roadman, having had many years of experience, will represent the company direct and exclusively in the city of Ottawa, province of Quebec and the Maritime Provinces and will have charge of the Montreal office of the Perth Shoe Co.

John Glossop will look after the interests of the firm in Eastern Ontario, between Montreal and Toronto and

also in the Sault Ste. Marie section. He is an alert and aggressive traveler.

N. E. Ingram, 788 Gerrard street east, Toronto, will be the direct representative of the firm in the province of Ontario west of Toronto. The sample rooms which the company will open in Toronto will be in charge of a competent representative and definite arrangements are being made.

Robt. Wall, of Montreal, one of the old-time footwear salesmen, will take the territory between Port Arthur and

W. S. PETTES, MONTREAL

the Coast, covering all the western provinces exclusively for the firm. He was one of the mainstays of the old J. D. King Co. in days gone by and has one of the largest circle of friends in the retail trade. He is glad to get back into the

JOHN GLOSSOP, PERTH, ONT.

shoe game again after having been in the contractors' supply business for some time past and the bright, snappy samples of the Perth Shoe Co. look good to him. The Perth Shoe Co. report business as good and their well-equipped factory is running full time.

# Leather Trade Jottings

Items of Interest to Leather Producers and Users—What is Being Talked About in Leather Circles at Home and Abroad

**T**HE leather situation remains practically unchanged. The demand for all classes of stock is such as to keep the market well cleaned up. Prices in certain lines move steadily upward as the demand makes itself felt. It is not so much the cost of raw materials that is affecting the situation as the insistent demands for war purposes, coupled with the development of the craze for light leather specialties. There is quite a boom in the leather business, not only in the United States and to some extent in Canada, but throughout the world.

## Hide Conditions

The untoward character of the hides being offered at this time of the year has no doubt much to do with the sagging, compared with a couple of months ago. All that come in are picked up, however, and there is no doubt but that when prime hides begin to reach the market, the accelerated demand will boost things up again. Notwithstanding reports from some quarters where cattle raising has received a little more attention in the past few years, there has been a general falling off in the supply of cattle all over the world. The tremendous demand for meat for packing purposes is using up so rapidly the available sources of supply, that if it keeps up it will not be long until the price of meat as well as hides will be prohibitive.

## Horsehide Leather

Calfskin has, of course, been in considerable demand for the past few years but it is some years since horsehide was extensively used. About thirty years ago it had a great run and was in great favor for vamps particularly. Some concerns that made a specialty of it made a lot of money in the business. It fell into disuse partly on account of the cost and from the fact that its lack of porosity made it somewhat hard on the feet. It is coming back again, and it would not be surprising to find it become popular, for a time at least. "Cordovan" as it is called, is susceptible to a very fine finish.

## Japanese Leathers

Japan has come forward in the last couple of years in the manufacture of leather. Tanners as well as shoe manufacturers in Japan and Corea are reaping a rich harvest, particularly of Russian trade, which in this line as well as munitions has given the Japanese all they could handle. It is claimed that equipment leather and military footwear are being produced equal to anything on this side of the world. Corea, until Japan took hold of it, was a very backward country. There is one

factory now in Seoul, the Capital, that has recently turned out 40,000 pairs of army shoes and 30,000 cartridge pouches. The work is superintended by Japanese and inspected by Russian officials.

## German Leather Industry

The Government has taken over not only all the tanneries but the hide concerns. The War Leather Company is supreme. It supervises the purchase and handling of all hides and watches over the process of leather making. In a recent article on this subject a German tanning paper claims that there has been a wonderful improvement in the leather produced. By carefulness of methods and the exclusion of everything that causes brittleness or sponginess, they have succeeded in producing better army leather than has hitherto been used. The probability is that by lessening the time of production and tawing, rather than tanning the leather, they are finding the product equal to the work it is intended for, and perhaps more supple and pliant on account of its thorough oiling.

## Calf and Substitutes

In his address to the American Shoe Manufacturers' Association recently, Mr. H. V. Hunt, a calfskin manufacturer, said amongst other things: "One of the peculiar things in regard to the demand for calf leather is that previous to the war when there were large stocks on hand, putting heavy burdens on the tanners, it seemed at one time as if you gentlemen were never going to use any light calf leather again; in fact, a great many buyers talked in that vein, and we were told repeatedly that the day of light calfskin had gone by, and that cloth and other substitutes were going to take its place and were much better; and there were times when we began to think so ourselves. Finally by great efforts, these surplus stocks were reduced, and now that there is an actual shortage, we hear very little or nothing about cloth and other substitutes, but an ever-increasing demand for calf leather, and particularly for fancy and delicate stock, such as white and pearl grained calf. Naturally with this sharp demand for this high grade leather at a time when there is very little raw stock, it makes the situation even worse, for your demand for these materials is such that you are paying ever increasing prices, which enables the manufacturer of these articles through necessity to buy the skins suitable for that work at any price. The result is in some cases certain skins in the last three months have already doubled in price."

# LEATHER ADULTERANTS

The Use and Abuse of Adulterants in the Manufacture of Leathers—  
A Certain Amount Not Hurtful — How Buyer Will Know

By PROF. PROCTER

THE industrial chemist, like the father confessor, gets sidelights on the morals of his clients; and, though the individual cases are strictly under the seal of the confessional, a few general observations are permitted. Successful sole-leather tanners, like the rest of the world, may be roughly classified into the honest and the dishonest, the distinction between them being that while the former weight their leather with tanning extracts only, the latter permit themselves the use in addition of small quantities of glucose, dextrine and mineral salts. There is also an intermediate class who employ ready-prepared "finishing extracts," "asking no questions for conscience sake."

## Of Little Moment

To the buying public, including the War Office, the distinction between the "honest" and the "dishonest" is of little moment. All tanners are in business either to make profits, or from "the force of circumstances beyond their control," and in either case the necessary condition of survival is to make the greatest possible quantity of leather out of the least possible quantity of hides, since this is much the most costly constituent. Modern rapid processes necessitate the use of tanning material in considerable excess of that actually required to convert the hide into leather, so that a certain amount of what from the buyer's standpoint is really "loading" must be accepted as unavoidable, but it should not be excessive, and probably 10, and certainly 25 per cent., would cover all that is actually justifiable, while the larger amounts, which are quite common, are, in the writer's opinion, just as much adulteration as if some entirely foreign substance were employed.

## Not Wholly Useless

The moderate excess of tanning matter which has been suggested is not wholly useless to the buyer. In modern rapid processes the hide is rapidly saturated by the excess of tannin, but its actual diffusion into the fibres themselves is necessarily slow; and it is probable that changes analogous to those which take place in the "aging" of alumed leathers also occur in rapid vegetable tannages, leading not only to the more complete penetration of the fibres, but to a portion of the originally soluble tannins gradually becoming insoluble by oxidation and other changes, and so increasing the solidity and water-resisting properties of the leather. If some form of "adulteration" could be invented which would have the same permanent filling and solidifying effect, without in other ways injuring the quality of the leather, its use, whether "honest" or not, would be wholly advantageous to the public. Such a method is probably not beyond the resources of modern chemistry, and indeed the waterproofing of chrome and vegetable leathers with solid waxes, though really advantageous in use, constitutes a very heavy "loading" with quite cheap materials, and should enable the leather to be sold at a considerable lower price per pound.

## Effect of Loading

The effect of loading, either with extract or other things, is to make the leather apparently both firmer and thicker. The wear of a properly tanned leather is largely proportional to the actual leather fibre which it contains, so that

heavy loading with soluble materials is a double fraud on the purchaser. In this connection it may be worth while to remark that the chrome tannage, while preserving the fibre very completely, is at best an empty one, and even after waxing is far from having the thickness or weight which the same hide would have if vegetable-tanned, though its wear may be decidedly superior. It is therefore a mistake to ask for the same standard of thickness, which can only be obtained by the use of heavier and more expensive hides. The chrome process is actually a cheap one, hide for hide, and the only reason why chrome sole should be dear is because of its comparative thinness and light weight.

As regards remedies for loading, it seems to me that they lie, as always, with the buyer. He has only to demand a guarantee that the solubles should not exceed a fixed reasonable percentage, and to pay such a price as will cover the difference between the cost of dry extract and finished leather, and by most of the trade he will be honestly served. If at the same time he would abate his excessive demands for a useless paleness of color he would obtain a better and more durable leather for his money, since all bleaching processes reduce the water-resisting qualities of the leather, and the present supply of available tanning materials renders it impossible to produce by direct tanning the pale yellowish color formerly in vogue, except by the sacrifice of other and more important qualities.

## How Buyer Will Know

It may be asked how the buyer is to satisfy himself that he is really getting the proportion of actual leather which he is paying for, since a complete leather analysis is necessarily expensive. I would reply that the main point is the percentage of solubles, and that this can be determined with fair accuracy by anyone. The simplest way is to cut two samples of approximately equal weight, of which one serves merely as a standard and check on drying. The other is soaked—for some hours in tepid water—say of 100 deg.—110 deg. Fahrenheit, gently bent and kneaded to facilitate the washing out of the soluble portion, and thoroughly dried alongside the check sample, which should not materially lose in weight, or of which the loss must be deducted from that of the washed portion. Such a process will not merely show the loss of weight on washing, but will give a good idea of how far the apparent firmness is due to the matters washed out. A mere determination of solubles in the laboratory is not an expensive matter, but specially water-attracting matters like salts and glucose should be absolutely prohibited in army contracts, and of course must be tested for individuality.

F. A. Kells, of Ottawa, the progressive Bank street shoe merchant, recently purchased at his own price from a manufacturer, who was hard pressed for ready cash, a large stock of high grade boots and shoes. Mr. Kells has a sign at his business premises, which reads "The Great Public Benefit Disposal," and advises his patrons to come and purchase a year's supply, as he believes the prices are the lowest ever before offered to the public in that city, or likely to be offered again in years to come.

# Retail Views and Interviews

## What the Best Dealers Are Saying and Doing—Bright Suggestions as to Ways and Means of Shoe Sales Promotion

“YES, we have our troubles,” remarked a wholesale shoeman the other day. “All is not gold that glitters, and selling shoes in a large way is as full of vexations and contrariness as the ordinary retailer encounters in coming in contact with contumacious customers. Why here is a sample of it. Here is a little gent’s box kip blucher, Standard screw, two pairs of size twelve. A dealer has just sent down these two pairs which are as staple with him as sugar or tea with the average grocer, and asks if they could be exchanged for two pairs of elevens. Of course we have to do it to oblige, but to-morrow he will possibly send down two pairs of eights and ask if they can be exchanged for two pairs of elevens. We have to oblige him, for if we did not, he would possibly withdraw all his business. Why does he do this, you ask? Can you not see for yourself that he is making the jobber carry the stock or the assorted sizes of which he has only a few, and he is juggling with the wholesaler in order to meet the wants of his customers? The fewer pairs he carries and the more exchanges he can work with the wholesaler, the less money he has to invest. Now, I would not complain if this line of shoe were not in every day requisition, but they are. Thus we have to lose a great deal of time in obliging men who seem to think it no crime to place all sorts of petty exactions upon us.”

### New Tips on Stylish Shoes

White shoes are selling faster than ever now in buck, kid and calf, says a New York authority. Women prefer covered heels on the kid and calf, so for this reason some of the dealers are painting the heels of their shoes white. After this treatment they look covered anyway. Next to white, gray is most in demand, with champagne and Russia calf following. Several of the better class stores are now showing high boots of gray suede. Large retailers are reported unwilling to push colonial pumps on the ground that it will kill off business in overgaiters, which they do not want to happen. Many of last year’s colored-top pumps will soon be offered as “jobs,” it is said, but they will be dyed black. One prominent dealer has invented a thin wire device for the dyeing process which separates the upper from the lining.

### What Canadian Shoemakers are Facing

Writing to the SHOE AND LEATHER JOURNAL a leading Canadian firm, who are by no means alarmists, say:—

“These are trying days for the shoe manufacturer, but they are not to be compared with the days which may be experienced six months from now by those who neglect to exercise to the fullest extent the qualities of introspection and foresight. The unprecedented scarcity of raw materials and accompanying advancing prices bring in their train problems not heretofore encountered. Thinking producers are not permitting each day to be sufficient unto itself, but are gauging their every present move by the probable effect it will have on their business six months from now. He is a rash manufacturer who is preparing a line of samples for next fall without carefully considering his ability to produce at a price the orders he hopes to secure.

“It is next to impossible to fix prices to-day on goods for delivery six months hence. There is but one way it can be done—the maker must have stock in his warehouse, or be protected on his requirements. Some few are partially

protected in the former manner, but it is unlikely that any manufacturer is in the position of having in store all materials required for a complete run of fall footwear. And it is impossible to get materials of many kinds. Take kid, for example. It comes, ordinarily, from such varied markets as half a dozen Balkan countries—Greece, China, the Indies, Mexico, India and South America. There is none coming from any source except South America, and for every skin offered there are at least ten buyers after it. There are supplies in China and the Indies, but no bottoms can be secured to bring them to this continent. The result is an acute scarcity, the withdrawal of innumerable lines, and the inflation of prices on such grades as are available, coupled with an absolute uncertainty as to deliveries. France, where some of the finest colored kid made comes from, recently placed an embargo on the export of all skins, and it is only by special permit that occasional small shipments can be made from that country.

“One of the largest tanners of calfskin made the statement recently that there had been a decrease of 75 per cent. in the available supply of skins. Sole leather makers are faced with a similar difficulty in procuring hides. The unprecedented demand for leather products is straining the world’s available supplies to the utmost. All findings such as laces, buttons and the innumerable small accessories essential to the production of the shoe are advancing in price. Under such circumstances it may be said that it is one thing to show samples and quite another to deliver shoes sold on the strength of the samples, unless the manufacturer has done some deep thinking and careful planning.

“The labor problem is also becoming acute owing to many workers leaving for the front and there is a great scarcity of skilled labor which in some cases has handicapped production.”

### Should Price Shoes Higher

The opportunity for increasing retail profits was never greater than it is now, according to a well-known local shoe man, because of the rising market for all of the raw materials. “Unless the retailer takes advantage of the situation,” he says, “and advances his prices, he will, later on, find himself on the wrong side of the ledger. Every staple or good-looking shoe in his store is worth more to-day than it was last week or last month, and, knowing this to be a fact, is there any real reason why these goods should be sold at old prices? Owing to the scarcity of raw materials, shoes must continue to go up in price. Reliable manufacturers will not take orders unless they already have the leather bought. Tanners do not take orders even at the advanced prices, for they do not know when or at what price they will be able to get hides. Under these conditions it is easy to see that retail prices must advance; so why should they not be moved up on the stock that is owned at old purchase prices?”

A resolution was recently carried by the Retail Merchants’ Association of Manitoba at a meeting held at Winnipeg, endorsing the Manitoba Temperance Act. President C. F. Rannard, of the Rannard Shoe Co., outlined the work of the association, and this was followed by a demonstration of expert salesmanship between customer and salesman by S. T. Bates, of the Regal Shoe Co.

### HOW HE MAKES THINGS PROSPER

"I never was afraid of taking hold of a proposition that looked good to me," remarked C. Henry Dimock, of Windsor, N.S., who has certainly made good in all the ventures that he has undertaken. Previous to entering the shoe game, he was a bookkeeper, and knew nothing about footwear lines. One day a good opening was presented to him. Mr. Dimock made full inquiries and, using his powers of observation and deduction, he bought the stock "just on faith," as he says.

C. HENRY DIMOCK, WINDSOR, N.S.

He does not believe it necessarily follows that a man must have experience in any line before entering upon an enterprise in that direction.

Mr. Dimock commenced the shoe business in December, 1878, and when the town of Windsor was burned up on October 17, 1897, he gave the people an evidence of his enterprise and progressiveness. He started next day to put up a shack and in less than a week was selling shoes, being the first merchant to resume after the disaster. He thoroughly believes in stability and continuity, for he has made very few changes in his life, having been 38 years in the boot trade. He handles the best lines that he can secure

A section of the interior of Mr. Dimock's store

and the products of the majority of the leading manufacturers in Canada are represented on his shelves.

Twenty-three years ago he also became president and manager of the Windsor Plaster Co., Limited, manufacturers of calcined and land plaster. He did not know anything about plaster when he went into the venture with another man, who had just about the same amount of experience as himself, but they have made a decided success of this industry.

Recently Mr. and Mrs. Dimock celebrated their silver wedding and were the recipients of hearty congratulations. Mr. Dimock has always taken a lively interest in the welfare of the community or any good work, and for 32 years has been superintendent of one Sunday School.

"Yes," he observed, "thirty-eight years in the shoe business, twenty-three years in manufacturing plaster and thirty-two years in Sunday School work—well, from these facts you can see that I am not much of a mover."

In referring to the 25th anniversary of the wedding of Mr. and Mrs. Dimock, the Hants Journal pays the esteemed couple the following tribute:—"They and their family have endeared themselves to a large circle and woven ties of companionship and friendship which will never be severed, and their willingness to help in all public needs has won for them the highest esteem."

Mr. Dimock is a lifelong resident of Windsor, where he was born in 1856 and began his signally successful business career at the age of twenty-two.

### THE IDEAL SOLE LEATHER SUBSTITUTE

A sole leather substitute is becoming a necessity, and as necessity is the mother of invention, consequently there are many inventions upon the market, good, bad and indifferent. Of course, each and all will be exploited "as the best," but you will naturally insist upon doing your own thinking. You will ask yourself, "What are the elements requisite to make the 'ideal substitute?'"

The following suggestions may be of assistance whilst you turn the subject over in your mind.

First, quality. You are in business to make customers, but the regular customers, the ones who come back, are the profit makers, and the "Quality Job" makes the regular customer. So you don't want the product with the most talking points, you want the one with the most wearing points.

Second, it must have the flexibility and nature of sole leather. Foot comfort and easy walking are the most important. Practically all substitutes have a mixture of rubber in them, it being peculiarly constituted for producing this effect, but the "ideal substitute" is not necessarily a rubber sole. It is common knowledge gained from experience more or less personal that the exclusive rubber sole has not been a success as a sole leather substitute. Other ingredients and methods of manufacture are necessary to make the satisfactory product; it requires the working in of a fibre to act, as does the leather in taking up the grit of the pavement, to assist in retarding the wear and giving it the non-slipping qualities.

Third, it should be marketed in a practical and methodical way. The cut sole industry has been a great boon to manufacturer and repairer alike, enabling them to procure their materials in an economical form, such as soles, taps, strips, etc., in any desired weight, quality and shape. This convenience should be carried out in the "ideal" substitute, eliminating all waste in the operation.

Fourth, price. We make this the last item for consideration, for while it is a most important one, it must naturally be consistent with what it represents.

Most people are limited more or less in the extent of their financial ability; so in weighing the question of price, we must also figure with the class of customers we wish to reach, and in this instance the greatest number of prospective consumers will be the mass of working and middle classes, those who require the maximum service at the minimum cost.

There is already established a recognized basis on which we can safely operate and meet these demands, so that the "ideal substitute" will be the one coming nearest to the price requirements, not too low at the expense of quality, not too high at the expense of quality.—The Shoe Repairer.

### SEEKING PROTECTION FOR CREDITORS

"We respectfully beg to draw your attention to the fact that in view of a recent decision of the Appellate Division of the Supreme Court there is no protection for creditors against a trader who apparently defrauds his creditors and covers up his transactions by failure to keep books of account," says the Canadian Credit Men's Association Limited (Ontario Division), in a recent letter in which the Porter failure is reviewed as follows:—

"The case to which we particularly desire to draw your attention is that of Rex vs. J. H. Porter. We give you briefly the following facts:

"On June 7th, 1915, James H. Porter made an assignment for the benefit of creditors to a representative of this association. Porter was conducting three large shoe stores in the City of Toronto, having commenced business in August, 1914, with one store. Subsequently he branched out and in January, 1915, issued a statement covering his affairs up to December 31st, 1914, in which he showed a surplus of \$8,900.00. The statement of the assignee prepared at the time of the assignment five months later showed a deficit in the business of \$18,800.00, making a total loss for the five months of \$27,700.00. The trade liabilities amounted to approximately \$75,000.00. No record of receipts and disbursements was to be found and Porter admitted under oath when examined for discovery that no books had been kept. He admitted that it was necessary for any business man to keep books and that it was impossible to tell the progress made unless books were kept, and he was quite unable to explain the very serious discrepancy in his assets. Under the circumstances a warrant was sworn out by Thos. W. Learie, secretary-treasurer of the Canadian Credit Men's Association, Limited, and he was arrested, charged under the provisions of Section 417, sub-section (c) of the Criminal Code, which reads as follows:—

"Every one is guilty of an indictable offence and liable to a fine of eight hundred dollars and to one year's imprisonment who, being a trader and indebted to an amount exceeding one thousand dollars, is unable to pay his creditors in full, and has not for five years next before such inability, kept such books of account as, according to the usual course of any trade or business in which he may have been engaged, are necessary to exhibit or explain his transactions, unless he be able to account for his losses to the satisfaction of the court or judge and to show that the absence of such books was not intended to defraud his creditors."

"The case was tried before Judge Winchester and a conviction registered. Porter's counsel, however, requested an opportunity to appeal, contending that the Statute did not apply to the prisoner, in view of the fact that he had not been in business five years. Judge Winchester granted a stated case. The case was argued in the Appellate Court and the conviction quashed. Chief Justice Meredith in giving judgment said that the language used in the section was very indefinite and whatever may have been the intention of the legislators, the language employed was not sufficiently clear to cover a trader unless he had been in business five years.

"It is the intention of this Association to take the matter up with the Minister of Justice in an endeavor to secure an amendment to the Statute covering this highly important point. In order that we may have all the support possible when presenting the case we will be glad to have a letter from you urging that an amendment be put into effect."

### POPULAR MANAGER BECOMES BENEDICT

Jas. A. Struthers has been head of the shoe department of the Regina Trading Co., Regina, Sask., for the past seven years, and recently joined the ranks of the benedicts. The happy event took place on January 31st, in Saskatoon,

the bride being Miss Mary Ida Worden, daughter of Mr. and Mrs. Wm. W. Worden. Now that Mr. Struthers is traveling in a married man's shoes he will receive the hearty congratulations of his many friends. Like many others who have made a success of the footwear game, he started at the bottom of the ladder and for six months carried parcels at the wage of \$2 per. In the fall of 1895, he became a member of the staff of Wm. Ewen, of Owen Sound, who is one of the leading shoe merchants of Ontario. Mr. Struthers is an Owen Sound boy and he worked steadily along in his

JAMES A. STRUTHERS, REGINA

home town. A number of changes were made and he finally became head salesman for Mr. Ewen, remaining with him until the spring of 1909—almost fourteen years of service. He then made arrangements to go West to assume his present duties with the Regina Trading Co., who carry a general stock, paying attention to all lines in men's, women's and children's footwear. A very even business is enjoyed in all these ranges and close supervision given to the buying end. The idea of keeping the stock on the move and turning it over as often as possible has proved to be a great feature in the success of this branch of the business of the Regina Trading Co.

### GLOVE MEN SENT TO PRISON

A cable despatch from London, February 14th, to the American press, says that for trading with Germany through the New York branch of his firm, William Cardiner Rigden was fined \$2,500 to-day at the Old Bailey, and two of his associates in Fownes Bros. & Co., glove makers, were sent to prison.

William Fownes Rigden was sentenced to twelve months and Stanley Fownes Rigden to four months imprisonment. The men withdrew their pleas of not guilty and admitted the charge, but the judge in sentencing them said that trading with an enemy of Great Britain at this time must be dealt with severely.

The charge made by the prosecution was that the three men obtained goods worth about \$30,000 from Saxony between October, 1915, and January 1st, 1916. The goods reached England through the New York branch. Payment was to be made at the end of the war.

## AMONG THE SHOE MERCHANTS, TRAVELERS AND WHOLESALESALE—WHAT THEY ARE DOING

Messrs. Ansley and Sheehy, manager and superintendent respectively of the Perth Shoe Co., Limited, of Perth, Ont., were in Toronto lately on business.

The packing department of the Maple Leaf Rubber Co., Port Dalhousie, recently presented Wm. Patterson with a soldier's shaving outfit, consisting of two razors, strop, shaving stick, brush, cup, mirror, waist belt and arm strap purse. Mr. Patterson has enlisted to do his bit for King and country.

The Walk-Over Boot Shop, Montreal, will remove into their new store, corner St. Catherine and Peel streets, early in March. The spacious establishment is one of the handsomest and most artistic of any in the Dominion.

John Ritchie, of the John Ritchie Shoe Co., Quebec, was a recent visitor to Montreal.

H. V. Gale, of Gale Bros., Quebec, spent a few days in Montreal recently.

Walter Smardon, of the Smardon Shoe Co., Montreal, was in Toronto lately on his way on a business trip to New York and Boston.

J. A. Munroe and Fred. Wright, of E. T. Wright & Co., Inc., Rockland, Mass., paid a visit recently to the Canadian plant in St. Thomas, Ont.

G. W. McFarland, of Regina, Sask., managing director of the western branch of Williams Shoe, Limited, who has been spending the past few weeks in Toronto, Brampton, St. Thomas and Berlin, has returned home. Mr. McFarland reports business in the West as improving rapidly, and says that the outlook for the coming year is promising. He employs a staff of five experienced travelers. The E. T. Wright Co., of St. Thomas, Gourlay & Fogelburg, of Berlin, the Nursery Shoe Co., of St. Thomas, are also represented by Mr. McFarland, and the lines of these firms as well as those

of the Williams Shoe are carried in stock, giving the best possible distribution facilities throughout the West.

A fund of over \$4,000 was raised recently in Charlottetown, P.E.I., to provide the men of the 105th Regiment with rubber boots at a cost of about \$4.00 per pair.

R. L. Savage, of Toronto, spent a few days recently in Montreal on business.

J. E. Dupre, of the Montreal Box Toe and Heel Co., Montreal, contemplates installing a second log heeling machine, which, like the one already in operation, will make leather lifts out of pieced heeling, sizes two-eighths inches to seven-eighths inches by sixteenths in thickness. These lifts are ready to be put into heels and be pressed, and are becoming quite popular in Canada as they already are in United States, according to Mr. Dupre.

Mr. Mulhall, manager of the Ryan-Devlin Shoe Co., Winnipeg, recently joined the ranks of the Benedicts, and is receiving the congratulations of his friends.

The Chambre de Commerce, of Montreal, have appointed the following members of the trade on the hides and leather committee for the coming year:—A. S. Lavalee, S. D. Joubert, Alf. Lambert, J. B. A. Lanctot and Joseph Daoust.

L. C. Van Geel, of Tillsonburg, and J. T. Tebbutt, Three Rivers, were in Montreal lately calling on the trade.

Considerable new machinery has been installed in the Walpole Rubber Co.'s factory, Granby, by P. G. Dunham.

A. S. Lavalee, shoe retailer, St. Lawrence Boulevard, Montreal, is a candidate for aldermanic honors in St. Louis ward in that city and is receiving strong support in his campaign.

W. J. Thorne has been appointed manager of the shoe department of the J. F. Cairns departmental store, Saskatoon, and entered upon his new duties recently. He was with J. Robinson in Winnipeg for many years and latterly has been with J. B. Kilgour, proprietor of the Regal Shoe Store. Mr. Thorne is a well-qualified shoeman and no doubt will make good in his new position. Many friends in the trade will wish him every success.

John Affleck, of the Yale Shoe Store, Winnipeg, has taken a lease of the old Ryan-Devlin stand on Main street, in that city, and will conduct a popular priced shoe store. Wm. C. Allen, formerly of the Quebec Shoe Store, will be the manager.

G. J. Trudeau, Limited, Montreal, has been incorporated with a capital stock of \$49,000. The company is empowered to manufacture, sell and deal in boots and shoes, rubbers, leather goods, cloth, cotton and duck linings, and shoe findings of every kind.

A. E. Peters, late of Sundridge, Ont., has bought the shoe stock at 826 Yonge street, Toronto, and has now opened up business.

Frank Kilgour, son of J. J. Kilgour, of Kilgour, Rimer & Co., wholesale shoes, Winnipeg, has successfully qualified for a commission and will go overseas.

W. J. Detweiler, shoe merchant, of Sault Ste. Marie, Ont., recently moved into a handsome and attractively fitted up new store, two doors from his former stand. His new home has an inviting front and the fixtures and general lay-out are ideal in every respect. Mr. Detweiler has been in business at the Soo for several years and has built up one of the largest trades of any merchant in any of the smaller cities of Canada.

Among the members of the jobbing trade who were recently in Montreal and Quebec, looking over fall samples and calling upon the trade, were J. J. Kilgour, Winnipeg, S. C. Cronk, Toronto, R. T. Hayes, of J. M. Humphrey

**H**ERE are a happy group who are widely known in the shoe trade. Standing (from left to right) are Fred P. Beemer, Toronto, western representative of the Blachford Shoe Mfg. Co., Toronto; James Lawther, Toronto, representing the Hartt Boot & Shoe Co., Fred-erickton, N.B.; and N. J. Bordeau, Toronto, representing the Galt Shoe Mfg. Co., Galt. In front are John Affleck, proprietor of the Yale Shoe Store, Winnipeg; and George H. Ferguson of Vancouver, who is the Western Canada man for Clark Bros. & Co., of St. Stephen, N.B.

& Co., St. John, N.B., E. L. Rising, of Waterbury & Rising, St. John, N.B., D. D. Hawthorne, J. A. McLaren, C. A. Davies and Hugh White, Toronto, and others.

Alex. Inrig, of the Lady Belle Shoe Co., Berlin, who are now busy turning their new samples, was in Toronto last week calling upon the trade.

Lemon Bros., shoe merchants, have removed their stock from Davisville to Eglinton on North Yonge street, Toronto.

H. W. Pearson, manager of the Toronto warehouse of Ames-Holden-McCready, Limited, spent a few days in Montreal last week.

Mr. Patterson, of Allandale, who has been representing C. B. Dayfoot & Co., of Georgetown, Ont., has taken a position with Ames-Holden-McCready, Limited, Toronto, and will cover the Owen Sound and Midland districts of Ontario.

Among recent visitors to the trade in Toronto were R. T. Hayes and E. L. Rising, of St. John, N.B.

Robert Bussell, who for the past five years has been on the staff of D. D. Hawthorne & Co., Toronto, and also conducted a shoe store at Todmorden, recently enlisted with the signal corps for overseas service. Previous to his departure he was presented by his associates with a wrist watch. Mr. Bussell has three brothers living in the old Country who are now in the firing line doing their bit and, as he is an expert in telegraphy, which he learned in England before coming to Canada, he should prove a competent man in connection with work of the signal corps.

At a recent recruiting rally held in Massey Hall, Toronto, among the speakers was Capt. James T. Sutherland, of Kingston, the widely known shoe traveler, who has enlisted for overseas service. Capt. Sutherland, who is president of the Ontario Hockey Association, said in his address that there were already 700 Ontario Hockey Association players enlisted, and he has secured a great response to the challenge sent throughout Canada for the players to exchange their hockey sticks for a Ross rifle at the close of the playing season.

Ed. R. Lewis, leather dealer, Toronto, spent a few days lately in Montreal and Quebec.

Alex. Angus, of Montreal, general sales manager of the Miner Rubber Co., spent a few days in Toronto last week on business.

I. Zumar, shoe merchant, of Hull, who conducts two stores in that city, suffered the loss of one of them recently by fire. The members of the family upstairs had a close call, escaping in their night robes.

John Bird, who for some years has been employed in the shoe store of Alex. Chisholm, Dundas street, Toronto, has gone to Cobourg, where he has enlisted for overseas service.

C. Dennis, of Brantford, formerly of Galt, has opened a new shoe store in Preston, Ont. He is a former well known hockey player.

Jobbers report that February business in felts and other heavy lines for winter has been very good.

Chas. Leeder, North Battleford, Sask., spent a few days in Toronto recently and met a large number of friends in the trade.

Ernest Kerfoot is opening a new shoe store in Smith's Falls, Ont., in the stand recently vacated by the Haines Shoe House, who have just moved into a new home. Mr. Kerfoot is a Smith's Falls boy, and has associated with him James Gorman, a shoeman of many years experience.

T. E. Vanstone, of Yorkton, Sask., was in Toronto last week on business and called upon a number of members of the trade.

Ritchie Thompson, of Belleville, who has had a wide experience in the retail shoe trade, has joined the traveling

staff of Blachford, Davies & Co., Toronto, and will cover the ground between Toronto and Cornwall.

J. B. Douglas, boot and shoe merchant, Calgary, suffered a fire loss recently.

The provision which is being made for the comforts of Canadian soldiers at the front is highly praised in a letter received by Mr. E. W. Nesbitt, M.P., of North Oxford, from a man from his riding now at the front, and forwarded to the Minister of Militia. The soldier wrote: "Thanks to the generosity of our Government, I am pleased to say that we feel the discomforts of trench warfare much less than the troops of the other countries owing to our ample supply of clothing and equipment. The gum boots are a very popular issue."

A fine example to young men who have not yet enlisted, is that set by Private Harold Dandie, of the 124th Battalion, Toronto. Early in the war Private Dandie made two attempts to join, but was rejected owing to small chest measurement. He promptly set about to correct that, and by proper exercises has made himself fit for the front. He was for fourteen years an employe of Gutta Percha and Rubber, Limited, Toronto, as vulcanizer.

Another alleged plot to smuggle rubber from the United States to Germany was revealed lately when the federal grand jury returned indictments against Heinrich Bachmann, a Swiss, and Mrs. Elsie Schroeder, of Berlin. According to Assistant United States Attorney Content the plan adopted was similar to that attempted in a previous case in which four men and a woman were convicted and fined.

Frank S. Cronk, son of S. C. Cronk, wholesale shoes, 60 Front street west, Toronto, has joined the 169th Battalion, which is being recruited now for overseas service. Lieut. Cronk is a former member of the Queen's Own Rifles, and for some time was connected with the regular cavalry

*JULES PAYAN of the firm of Duclos & Payan, Leather Manufacturers, St. Hyacinthe, Que., who was recently elected an alderman for No. 1 Ward in that city.*

at St. John, N.B. He has spent a number of years in the shoe game, and is only another of the many men from the trade who have joined the colors in order to do their bit for the King and country.

P. I. Hersey, vice-president and managing director of Regal Shoe Co., Boston, was in Toronto last week on business.

J. B. Kerr, shoe retailer, of Sault Ste. Marie, Ont., where he had been engaged in business for the past sixteen years, passed away from pneumonia on February 16th after only a few days illness. He was fifty-eight years of age and is survived by his mother and two daughters. Mr. Kerr was a widely known and highly esteemed business man, and a member of several fraternal organizations. In religion he was a Baptist and in politics a Liberal.

John H. Holz, who for some months has been with the Cobourg Felt Co., has been appointed superintendent of the Berlin Felt Boot Co., Berlin. He was formerly connected with the Kimmel factory.

A new shoe store has been opened at 133 Roncesvalles avenue, Toronto, by Smith & Cunningham.

Capt. R. Percy Myles, who is a member of the Minister, Myles Shoe Co., Limited, Toronto, and served in the South African war, has enlisted for foreign service, and is adjutant of the 170th Battalion, just now being recruited in Toronto for duty at the front.

Percy Christmas, cashier for Ames-Holden-McCready, Limited, Montreal, has joined Fletcher's Battery at Sherbrooke, Que., for overseas service.

C. S. Sutherland, manager of the Amherst Boot and Shoe Co., Amherst, N.B., was in Toronto and Montreal recently on business. He also attended the annual meeting of the Independent Rubber Co., which was held at Merriton, Ont.

The employes of the Galt Shoe Manufacturing Co., Galt, Ont., presented one of their number, Ted Richardson, who has enlisted with the 111th Battalion, with a signet ring and an appreciative address.

Harley Henry, Limited, wholesale and retail shoes,

Saskatoon, who has also been conducting a retail shoe store at North Battleford, has sold out the latter business to T. Henry.

The seventh annual ball of Getty & Scott, Limited, Benefit Society, was held in the city hall, Galt, on February 25th, and was largely attended. The hall was gaily decorated for the happy occasion and the event passed off most successfully. Splendid music was contributed by the Opera House Orchestra, under the able leadership of P. Maule. There was a number of representatives from outside firms in attendance, who thoroughly enjoyed themselves. A dainty lunch was served at midnight and dancing continued till an early hour in the morning. This makes the seventh annual classic ball. The invitations were of a unique character, the cover having a cut-out in the shape of a shoe, and revealing in the opening a splendid perspective of the large factories of the firm. The officers of the Benefit Association are: Hon. Presidents, F. S. Scott, M.P., and Wm. Chamberlain; President, Jas. Wallace; Vice-President, Wm. Kruse; Secretary, Wm. Cudney; Treasurer, Wm. Booty. D. Rongey, H. Slimmon, R. Daniels, H. Thompson, J. Marshall, F. Wickens, R. Scroggins constituted the energetic committee who had the event in hand.

Clarence F. Smith, who was formerly Vice-President and General Manager of Ames-Holden-McCready, Limited, Montreal, was recently elected a director of the Montreal City and District Savings Bank.

J. H. Moore, of Cornwall, Ont., who covers the Maritime Provinces for the Minister, Myles Shoe Co., Toronto has removed to Toronto and taken up his residence at 55 Parkway avenue.

C. F. Veitch, who has been manager of the footwear department of the Toronto warehouse of the Canadian Consolidated Rubber Co. for some years, is now in the Harper Hospital, Detroit, under-going special treatment, and his many friends in the trade hope that he may be eventually restored to health. Mr. Veitch has not been well for several months.

The premises of Dufresne & Galipeau, wholesale shoes, 60 St. Paul street, Montreal, were visited by fire recently and damage done to the amount of \$10,000. The blaze broke out in the basement and is supposed to have started from falling cinders from a furnace. The flames were confined to the basement and ground floor.

The Eureka Shoe Co., on Papineau street, Montreal, suffered considerable loss from a fire recently. The flames had made great headway before the arrival of the firemen, but were checked before they spread to the adjoining buildings.

In the semi-final for the Governor-General's prize in the Ontario Curling Association second competition, two rinks from Lindsay carried off the honors. In one of the quartettes, M. H. Sisson, who is a well-known shoeman of Lindsay, was lead.

J. H. Vignault, manager of the shoe department of Jas. A. Ogilvy & Sons, Montreal, was in Toronto on a purchasing trip.

Jas. F. Griffin, of the Hospital Shoe House, Front street, Belleville, was taken to the General Hospital in that city, recently, suffering from an attack of typhoid fever.

C. E. Perras, glove manufacturer, Montreal, has sold out to the Allan Glove Company.

Anthony O. Flanagan, one of the oldest employes at the Granby rubber factory, died recently. He had been called to Cambridge, Mass., to the funeral of a relative, and while visiting relatives in Malden, contracted pneumonia. He was buried in Granby. Mr. Flanagan, who was one of

*HERE is a button shoe of glazed kid—never mind what length of leg—with diamond perforations and sandal effect front. It was made in 1902 for a popular actress and cost \$25. Will the present craze for high cut footwear continue until such extremes as this are seen?*

the pioneers in the rubber industry, was born in Ireland. He came to Granby in the early eighties, at the opening of the Granby rubber factory, and was continuously engaged in the business up to the time of his death. He is survived by a wife and five daughters, a son Arthur at the St. Jerome factory, and Albert at home.

The Haines Shoe House in Smith's Falls, Ont., of which A. L. Wright is the aggressive manager, has moved into new and attractive premises which have been specially fitted up.

Mr. and Mrs. D. Ruben, of Picton, Ont., recently received a despatch from Ottawa stating that their son Aaron had been killed in action April 23rd. Lance Corporal Ruben was reported missing after the battle of Langemarck, and the authorities have apparently received conclusive proof of his death. Mr. D. Ruben is engaged in the retail shoe business in Picton.

H. A. Beatty, American-British-Canadian Distributors, Toronto, who has been spending several weeks with his wife and family in Cuba, has returned to Toronto. D. A. Leonard, who until recently was in the retail shoe line in Toronto, has joined the traveling staff of the American-British-Canadian Distributors. Mr. Leonard's many friends will wish him every success on the road.

P. Y. Smiley, of Berlin, Ont., has been promoted to the position of general footwear factory manager of the Canadian Consolidated Rubber Co., Limited, and has entered upon his new duties. He has been the efficient manager of the Merchants factory in Berlin, and the Maple Leaf factory in Port Dalhousie, and many friends will congratulate him on his well deserved advancement.

F. P. Beemer, who represents the Blachford Shoe Manufacturing Co. in the Prairie provinces, has been spending a few days in the New England States and expects to leave for the West about March 10th, with a complete set of new samples.

Jas. F. Clark, treasurer of Clark Bros., Limited, St. Stephen, N.B., was in Toronto, Montreal and Ottawa last week on a business trip.

H. R. Scott, shoe retailer, of Seaforth, Ont., spent a few days in Toronto last week calling upon many friends in the trade. Mr. Scott is a live wire in his native town, where he is secretary of the Fire Brigade and a member of that body. He is also past vice-president of the Ontario Volunteer Firemen's Association, and District Deputy and Grand Master for District No. 8. Independent Order of Oddfellows.

Johnston & Murray, shoe retailers, of London and St. Thomas, Ont., have dissolved partnership. Reg. Johnston has retired, and the business will be carried on by Ken. Murray, under the former firm name. It is understood that Hugh Murray, who has been managing the business of the St. Thomas branch, will have supervision of both the London and St. Thomas stores.

L. F. Jackson, Toronto, will cover the Maritime provinces this year for the Blachford Shoe Manufacturing Co., Toronto. Mr. Jackson is a traveler of several years' experience and is well known in the Maritime provinces.

Some shoe dealers are specializing in military supplies and have installed loyal and patriotic windows. The Haines Shoe House, Belleville, Ont., recently made a strong display in this line, showing the wax figure of a Tommy slumbering in a Wolseley sleeping kit, just the same as if on active service. There was also a splendid display of dunnage bags, roll ups, belts and other leather military accoutrements. The window was draped with flags and bunting, the colors being particularly effective and striking.

The Blachford Shoe Manufacturing Co., Toronto, are very busy on new high cut lines, and report that matt kid,

vici kid and patent are predominating. The new high cuts are seen in battleship grey, Havana brown, white and other colors. The popular height is eight inches and the lace shoe is a favorite, carrying a Cuban or half-Louis heel, with plain toe in most cases. There appears to be some tendency toward straight and wing tips, with small perforations. The new samples for spring are exceptionally artistic and embody the last word in grace, art, workmanship and finish.

The Central Leather Company reports a net income of \$8,465,104 for last year, a gain of \$1,749,973 over 1914. The balance for the common stock, after interest and preferred stock dividends, was \$4,295,966, an increase of \$1,759,972. A factor of especial interest in the statement recently was the last quarter's showing, the dividend surplus being practically half the total for the full year. The balance of 1915 earnings was equivalent to 10.82 per cent. on the common shares for the complete year, of which 5.28 per cent. was accounted for by the final three months. It was learned recently that P. A. Valentine had resigned as chairman of the company and also as a director because of ill health. A successor will be elected at the annual meeting on February 23rd, in New York.

### TO THE MANOR BORN

(See Front Cover)

Miner is the name that put Granby on the map. It was first Miner sole leather and then Miner rubbers. When the late S. H. C. Miner launched into the rubber shoe business in 1888 those who had watched his career in leather knew that a new epoch in rubber footwear was due. The general expectation was realized in "Granby Rubbers," and from that time the name of the town was identified with high ideals in this particular line.

S. H. C. Miner had the gift of judging men and gathered about him those that were not only capable of absorbing his enthusiasm but of putting into the business the forcefulness and foresight that distinguished its founder.

One of those whom his uncle realized to be a coming man was W. H. Miner, now the vice-president and general manager of the Miner Rubber Co. He came to the Granby works quite a young man in 1900, when he began at the very bottom of the ladder. Starting with the washing room he was thoroughly trained in the practical end of the business, spending six years in this apprenticeship. In 1906 he reached the office department and when in the following year the amalgamation of the rubber factories was consummated he was given charge by the Consolidated Rubber Co. of the Granby plant.

When the Miner Rubber enterprise was started in 1909 he was given entire charge of the construction and equipment of the new concern and was made manager of the company in 1910. When S. H. C. Miner died in 1911 he was appointed vice-president and general manager, which position he has held ever since.

W. H. Miner in many respects manifests the striking characteristics that distinguished his late uncle as distinctly apart from the ordinary crowd. He has no hobby but his business and puts into it the same thoroughness of aim and go that have been a peculiar trait of the "Miner" disposition. In restless energy and constant planning to keep "Miner" rubbers where they have always been, in the very front of the procession, he takes no second place to his gifted predecessor.

As might be expected he spends most of his time in Granby, although maintaining residences both in the home town and Montreal. He is by no means a recluse or business grubber. He is of most genial personality and is popular not only amongst his business acquaintances and the company's employees but finds time and occasion for many good things that are not quite as much in the public eye as Miner Rubbers.

# Stray Shots from Solomon

The man who makes money out of this war will have a name to hand down to posterity that will vie with Guy Fawkes and Judas Iscariot.

They jailed a man the other day in London for importing alien goods into Great Britain through New York. There are men in this country boasting in clubs of how much they have made in war orders and war stocks while their fellow citizens give their life blood on foreign fields for their country and their widows and children bow their heads and shed tears of sorrow and bitterness at home. What would be thought of the man who exacted money for the use of a bludgeon or gun from another fighting for his life with a wild beast? Yet there are men claiming to have red blood in their veins who not only keep their precious necks out of the fight but exact tribute from those who need weapons to fight this battle of conscience and civilization. They ought to be branded as not only cowards but traitors whose company decent people should shun.

A sanctimonious countenance that would stop an eight-day clock, or curdle a bowl of buttermilk is no guarantee of inward piety. If were to go by appearances, "a new heart and a bad liver" would often be a more appropriate. Scripture apothegm than "a clean heart and a right spirit." It is the same in business. There are some men who imagine business sagacity is best evidenced by what they are pleased to call bluntness, but which other people interpret as ill-nature or bad breeding. There is no excuse for a man being ungentlemanly in business except the possession of a diseased liver, and even then, with the departmental store competition of to-day, calomel is so cheap that very little allowance should be made on this score. If one is to believe the reports of travelers, there is quite as much need throughout the country for liver sanitariums as for inebriate asylums.

You are shortening and spoiling your life and perhaps those of others by the course you are leading. No man can lead the life some lead who read "these presents" and hope to live out the allotted span. "He that keepeth his way preserveth his soul." In other words the man who looks well to his going not only saves his life in the largest sense but prolongs it. You can't eat your cake and have it. You can't spend your substance in riotous living and have an old age of quiet enjoyment. In the commercial sense, or any sense, it pays for a man to "keep his way." A man needs not only to keep away from booze, brawling and brothels but from those things that make for a bad business reputation. There are lots of men who have never been inside a bar or the red light district who need to watch their footsteps. Give a wide berth to

cunning, craft and chicanery in business. Greed will get a man down as quick as whiskey.

Last year was a heartbreak and you feel as though it had taken all the ginger out of you. Buck up. There are better things ahead. Everybody says so. Whether what everybody says is true or not it is no time to sit down and mope. Go to it this year, and make up your mind to win out. "Whatsoever thine hand findeth to do, do it with thy might." There is great comfort and helpfulness in the mere doing. It makes men, this tackling the impossible. If the British Army in France did nothing more this year than hang on, it will be the making of it. But while they are hanging on, they are developing the courage, skill and ability to strike, when the hour comes, for liberty and civilization. They are getting ready for the moment when, as the Iron Duke said at Waterloo, it will be, "Up Guards and at them." If a man has the stuff in him trial only brings it out. It takes the fire to show up the steel.

There is a kind of goodness abroad that is enough to make decent men and women breathe the Pharisee's prayer, "God, I thank thee that I am not as other men are." The kind of goodness that walks about with the placard about its neck, "I am good," and turns up its nose at everything that is not squared to its microscopic standard of holiness, must make devils laugh as well as angels weep. We have known men who were so good that the song of the little birds on Sunday disturbed the sanctity of their Sabbath thoughts, while for a human being to whistle on the Lord's day was an "awfu' desecration." Some of these were men so good that they could not live with their wives nor get along with their children. The goodness that secludes itself and finds expression in ascetic criticism of the world in general, and other Christians in particular, is a kind concerning which we may well pray, "Good Lord, deliver us." It is born of selfishness just as much as "beer guzzling," with the advantage in favor of the latter, as the guzzler usually shares his pleasure. "He that separateth himself seeketh his own desire," saith Solomon. Look out that your goodness is not conceit, prejudice or a bad liver. Goodness and sweetness are inseparable. You can't palm off that wretched counterfeit compound of narrowness, selfishness and egotism as the pure thing. The world does not make many mistakes in its estimates of men. You are valued at your worth. Take off the card, my good friend.

*Solomon*

# THE PRICE-CUTTING EVIL—WHERE WILL IT END?

**Who is at Fault for the Practice?—How Can Certain Establishments Sell Footwear for Less Money to the Public than the Reliable Retailer Can Secure the Goods Wholesale?—Suggested that Associations Consider the Matter for the Good of All**

By "Observer"

Did you ever join in a bargain rush? The stampede furnishes excitement galore. The pell mell, hurly burly congestion is supposed to be limited exclusively to women, who are often termed "proverbial bargain hunters." I had an experience the other day which may be worth narrating.

A certain sage said that, like Abraham Lincoln, he loves the common people, but naively added that he did not like to come in too close association with them, especially on rush occasions. One lady who had joined in the frenzied throng descending the stairs to the basement in search of blouses that were being offered at a snap, jostled by the crowd, fell on the stairs. In the millinery department I saw a woman trying on one of these creations which represent a few strands of straw, a few inches of ribbon, a few flowers and a big bunch of bank bills. These were \$6.00 hats being offered at \$3.95. This particular lady had just removed the hat from her head when another customer who had been eagerly watching her chance, sprang forward with such force to seize the coveted headgear that several hats and hat pins were sent spinning in all directions.

## Whetting the Appetite to Buy

I was in the retail business thirty-one years, seventeen of which were spent in a Western Ontario town and the remainder in a small sized city. I then removed to the outskirts of a larger centre, purchasing five acres of land and seeking to divert myself by the cultivation of fruit and vegetables, for I have always been fond of the soil. I have a boy who assists me in the work, and is a good, faithful chap, seventeen years old. As I was going to the city, he asked me if I would not buy him a pair of shoes at a certain department store. He had seen an advertisement to the effect that at 12.15 noon there would be offered men's boots at \$1.50 per pair, which, it was stated, was little better than the cost of the leather in them. The wording of the ad was particularly attractive. It said the style was popular and such as was used at this season of the year. The material was box kip and the soles of good winter weight. The tops were dull finish and the shoe was a blucher design for comfortable wear. The make was Standard screw, and I understood, was the output of an eastern factory. The ad significantly announced, "We reserve the right to sell not more than two pairs to a customer," and then there was a "hip hip hurrah, come on boys" argument telling of extra help, cashiers and parcellers, so that there would be no waiting and the sizes—six to eleven—would be arranged so as to cause no delay in selecting a pair.

Now, when I reached the store, there were several tables of these special bargain shoes, roped off like a prize fight ring. The shoes were covered with a gauzy netting, as if to protect them from the flies. A crowd was waiting in eager expectation, ready to make a bolt the moment the barriers were lowered. I never saw such a jumble outside of a circus or free show and I do not want to get into a like predicament again. I did not stay until the curtain rose, so to speak, and told a young lady the size I wanted, paid her for the shoes and got out, after giving them a casual survey—as I am not a centre forward player in rugby.

I am not writing this to find fault with the prices, with the service, or with the method of the publicity of the firm. No doubt they made a few cents profit on the shoes, but what was my astonishment the next day to find another bargain ad boot sale, in which it was stated that every pair was

a bargain. There were mentioned 118 pairs of men's mining or working boots in tan and black, oil tan, with 15 inch leg, reinforced with backstay, some having two buckles and a strap, and the sizes were from 8½ to 12. These were regular \$4.50 lines and offered at \$1.99. Then there were 450 pairs of men's boots, McKay sewn soles, military heels, regular \$3.00 and \$3.50 for \$1.99; 2,500 pairs of women's patent button boots, with black cloth top, plain and toe cap vamps, Goodyear welts and McKay sewn and sizes 2½ to 7, regular \$3.00 and \$3.50 for \$1.99. There was also mentioned 1,000 pairs of boys' box kip and gunmetal lace boots for the same figure, and so on, ad infinitum.

## What Ordinary Retailer Encounters

Now this is what the retail shoeman is up against in the larger cities, where there are department stores. The latter have just as much right to be in business as the ordinary footwear merchant, and like the latter, can sell goods at whatever figure they will bring. What struck me most forcibly was the fact that here were large stores advertising shoes of the kind that I have mentioned at a less figure than the ordinary shoe dealer can buy them wholesale, no matter if he takes them in sixty pair lots or upwards. Now who is at fault? I am not blaming the department stores. They are not in business for their health, and certainly are not losing money on any of these goods—in fact, I believe they make a profit on each pair. The crux of the matter is that these almost daily sales, these unsurpassable bargains, these offerings of something away down and below its ordinary value, is undermining the retail shoe business and injuring the smaller merchants who are really the backbone of any street or community—for they pay 100 cents on the dollar, furnish reliable goods and generally provide an efficient service.

## The Propulsive Power of Dollars

Are the manufacturers at fault in yielding to the buyers of the larger stores. They seem to accumulate floor goods and apparently have lines returned to them in order to clear them in wholesale jobs. Heavy purchasers are tyrannical and despotic in their methods. They have so much merchandising power, so generous a command of ready cash, that they go to a manufacturer, telling him they will take so many hundred pairs at such and such a figure and literally they shake the collateral in the face of the purchaser who possibly reasons that while there is no profit in this class of business, still it would tide matters over a dull season, keep things moving, and the hands employed.

I have no special remedy to offer now to overcome this grievance or the intermittent sale evil, but this might be good work for the Retail Shoe Dealers' Associations throughout the country to consider. In concerted buying power and united action they represent more wealth, more influence and more permanency than any one, two or three gigantic establishments. They should be able to arrive at a satisfactory solution of a most perplexing problem, one that is a "thorn in the flesh" of the average dealer.

The reason I have written in this strain is that these conditions did not apply so much when I was in business a few years ago as they do now with the later development of merchandising tendencies. For the good of the trade, its dignity, success and prestige and for the well being and prosperity of those engaged in it, surely something can be done to check pernicious price cutting.

**B**ETWEEN now and April 29th, when prices advance, the shoe dealer can buy to the best advantage the rubbers that best suit his trade.

By the time you read this, the salesmen will be on the road with samples, catalogues and prices.

Give the "Maltese Cross" man a good hearing. Wait for him, if necessary.

The "Maltese Cross" line of rubbers is worth waiting for. No matter how you look at it, it's a thoroughly satisfactory line to handle.

You can't do better.

**GUTTA PERCHA & RUBBER**  
LIMITED

# Rubber Boot and Shoe Matters

**New Lists Out—Travelers All on the Road—Prospects Good for New Selling Season—Stocks Well Cleaned Up—Slight Changes in Prices**

**R**UBBER footwear holds just now the centre of the shoe stage. Travelers went on their territories promptly on February 28th to get a clear week at placing orders for the coming season and are now hard at it ringing in the requirements of the Canadian shoe trade in this particular line for the coming year. It is too early to venture even a guess as to their reception but from a cursory point of view everything is in favor of the rubber men closing out a goodly amount of business during the next few weeks.

## The Price Lists

In our last issue we ventured a prediction which will be found to have been quite close to the mark. Very few changes are made in the lists, and the companies are selling on a net basis as last season. There are some necessary changes in important lines on which pronounced differences occur in the manufacturing conditions but these do not materially affect the situation. A striking feature is the introduction of an increased number of novelties, particularly in the "all red" lines, and which we also predicted in last issue would occur. The strong military turn to affairs in this country is largely responsible for the increased demand for these lines, as also for the military shapes and styles that are found to a considerable extent in the men's lines. The effort to meet the great variety in shoe styles in women's lines that predominate in leather goods is also apparent and what might naturally be expected. We quote herewith the principal lines with changes indicated. We reproduce eastern prices of course, the usual difference being made in western quotations on account of cost in transportation.

## Practically the Same

There are variations naturally in the price lists of the various concerns selling rubber shoes and the figures quoted may not apply to the same lines of all the companies but they are near enough for the purpose of comparison. The rubber companies are all "on their own hook" and are fighting for all they can get in the way of orders, but they realize as the retail trade do the advantages of more or less standard prices as avoiding that species of "Hun" antagonism that has put the rubber business of this country at times in the unenviable position of being unprofitable to everybody but the consumer.

## American Prices

The United States Rubber Company issued its lists on January 1st and made no change except the inauguration of the five per cent. discount for early orders which made rubber shoes ordered after the first of the year that much cheaper than they sold for some months previously. The other large rubber companies are practically on the same

basis with the exception of specialties. Concerning prices the India Rubber World says: "It seems as if these prices must have been determined upon as early as December 1st, when crude rubber was quoted at below the present prices. The increase in cost of plantation and wild rubbers would seem to justify an early revision of the price lists and as all these are subject to change without notice the wholesale trade is placing orders to an extent unprecedented for so early in the year. In fact some factories have enough orders for early delivery to keep their mills extremely busy for two or three months and some anxiety is expressed as to the possibility of securing sufficient crude rubber to cover requirements."

## Raw Rubber Supply Short

Even with the same percentage of increase in the supply this year as for the last two years, it is estimated that there will be a shortage in raw rubber. Last year the total output of raw was 146,000 tons, and with an increase of 20 per cent., which has taken place for the previous two years, the supply will reach 175,000 tons. It is estimated that the increase in the requirements this year for automobile tires alone will bring the amount used for this purpose close to 70,000 tons, leaving only 105,000 tons to supply the mechanical, clothing and shoe trades. This looks as though there would be a shortage of 15,000 to 20,000 tons for these purposes. In the meantime supplies may be cut off by the lack of transportation facilities.

## Hun Warfare Methods

Some few years ago when there was such a "grab" for business that prices, terms and the common amenities of commercial life were thrown to the winds, a man was ashamed of being connected with the rubber trade in any capacity. Retailers were practically giving away rubber shoes with their leather goods and it was a common thing to see them ticketed at figures that could not begin to represent the cost of manufacture. Some dealers got so sore on the business that they refused to handle rubbers at all and turned their attention to selling merchandise that would yield them something for their trouble and risk.

## A New Era of Profit

It is just fifteen years ago that in the interest of the entire trade the SHOE AND LEATHER JOURNAL was prevailed upon to round up a number of the wholesalers to see what could be done to put this end of the shoe business on its feet. It was a case where everybody from the manufacturer down had had such a bad dose of doing business for nothing that they were ready for any reasonable and feasible remedy. The result was that by the exercise of a

little confidence in each other manufacturers and jobbers were enabled to eliminate to a large extent the "frenzy" that had caused the business to stink in the nostrils of everybody concerned. The fact that there was at the time absolutely no bottom to the market and that a retailer never knew when some competitor would give an unfair advantage that would enable him to paralyze business on this line, kept things in a state of unrest and bitterness. As soon as something like a standard of value was established and business put upon a basis where the retailer knew what he was doing and could feel safe in adding a margin of profit to the cost, a new era of prosperity for the business set in.

### Plenty of Business

Thirty years ago there was only one concern in Canada making rubber shoes, the Canadian Rubber Company and their plant at Papineau Square, Montreal, was considered by not only the company but those who thought they knew, sufficient to meet the demands of the country in rubber goods for many years to come. When the Granby Rubber Company started a year or so later the enterprise was greeted with ominous shakes of the head and predictions of dying a natural death. But both firms went on developing and strange to say the increased production and competition created a broader demand than ever for rubber foot coverings.

The Toronto Rubber Company, which became the Maple Leaf Company later, was regarded in the nature of a bluff and it looked a good deal like it for a while, but it managed gradually to get a fair share of the rubber business and all three went ahead and the country took all the rubber shoes they could produce. Then came the Gutta Percha, and it set a fresh pace in style and quality that the others at once felt, and with constant improvements on lasts, make and finish each additional competitive factor seemed to add not only to the production but to the quality of the product. Since 1900 we have had the "Berlin," "Merchants," "Miner," "Independent," and "Kaufman" with one or two smaller concerns all seeking and securing patronage that seems to have been not only profitable to the several concerns themselves but to the trade and consumers at large. In the rubber business it has been again demonstrated that competition, when it means incentive towards improvement of quality, always means more and better business.

### Rubber Shoe Progress

To look at the shoes made even in 1900 and compare them with those that are put in dealers hands to-day one realizes the tremendous advance made in ideals and manufacturing skill. The samples of the current season, with respect to shape, materials, manufacture and finish are as far ahead of those made at the time referred to as to baffle comparison, while if you take the individual lines of to-day and compare them with those of the old Canadian Rubber Company of 1886 they are about as near alike as brogans and a pair of patent leather buttoned. The difference in weight alone, not to speak of the design and finish, marks the wonderful progress that

has been made in rubber shoe manufacturing. At the time referred to all rubber footwear was boxed and shipped in cases, cartons not coming in until some years later, when they were quietly introduced by one rubber concern with which to steal a march on its competitors. To-day changes in everything from design and manufacture to packing and shipment mark the advance from the crude product of three decades ago to the dainty shoes and boxing of the present.

### Rubber Prices

As intimated in our issue of a month ago it is the manufacturer to all present appearances who takes chances in the present selling prices of rubber shoes. Raw rubber is practically on a dollar basis and with conditions as they are and the possibility of complications in shipment arising at any time, the factory that is not well supplied is taking big chances. Of course there has been a wonderful development of rubber planting in the last ten years from which we are just beginning to reap the benefit and the prospects for a large increase of the production of cultivated and wild varieties would ordinarily have held good for this year. But the increased demand for rubber for mechanical purposes as well as for war requirements will largely offset this and it is safe to say that on account of the shortening of shipping facilities through war, considerable supplies will be unremoved this year. Notwithstanding no one credits the wild predictions of those who claim that the market will see two dollars within a twelve month, there does not seem to be any prospect of the market remaining where it is to-day throughout this year.

### Manufacturers Safe

Most of the factories are pretty well provided for and will doubtless be able to cover themselves to the extent of the placing orders taken within the next few weeks. Buyers naturally figure that manufacturers are making a fair profit at the best or they would manifest some indication of a tendency towards an advance. Retailers argue that the former was able to get along on the abnormal prices of rubber that prevailed some time ago, which were so very much higher than at present, they must be fairly well protected at the present selling figures, which have not changed materially. Nevertheless with the cost of raw rubber and other materials as well as labor continually advancing there will be a natural restlessness in the months to come, especially if there should occur any decided movement towards higher prices on manufactured goods on the other side of the line, which seems more or less probable at this writing. By May 1st, or at least July 1st, the whole situation will have developed to a point that will settle things for the current year. Meanwhile dealers are well protected and to the thoughtful observer there would seem to be every reason why they should anticipate to the fullest extent their needs for next winter's rubber shoes. They have nothing to lose and everything to gain by ordering at the present time it would seem.

# The New Rubber Lists

PRICE LISTS FOR THE NEW SEASON—Few Changes Are Made—Slight Reduction in Selling Prices—No Alterations in Discounts or Terms—Travelers Are Now Out

**W**E give to the retail trade the list of prices on the principal lines of rubber shoes. It will be noticed that the changes are few and not vital.

The prices are practically the same as those that prevailed at the close of last season although somewhat higher than at its beginning. We quote only staple lines. There are variations on specials and may be variations on some of the lines as far as some of the companies are concerned.

## CHANGES

The following are the principal changes in this year's list over that of 1915:—

Men's Storm King Gum, reduced.....	10c. pair
Men's Gum Lumb., 2-buckle, advanced....	5c. "
Men's L.T. Lumber, All Duck, reduced....	10c. "
Men's L.T. Lumber, Gum, Moc. T., adv.	15c. "
Men's L.T. Lumber, Gum, B. Top, R. Vamp, advanced.....	25c. "
Men's Arctics and Snow Excluders, red'ed	5c. "
Men's Extra H. Overs, R.E., advanced....	5c. "
Men's Plain Overs, reduced.....	4c. "
Stocking Overs, advanced.....	10c. "
Self-acting Clogs and Overs, reduced .....	4c. "
Strap Sandals, reduced.....	4c. "
Women's Croquets, reduced.....	3c. "
Women's S.A. Rain Slip., reduced.....	2c. "
Women's Fine Croquet, reduced.....	1c. "
Men's Plain and Moc. Overs, 2nds, red'ed	3c. "
Boys' Plain and Moc. Over, 2nds, red'd	1c. "
Women's and Misses' Croquet, reduced..	2c. "
Child's Croquet, reduced.....	1c. "

The selling arrangements are the same as last year, namely:—

Cash Discount.....	2%
Prepayment.....	12% per annum
Bonus for volume.....	1% for \$1,000
	2% for 2,000
	3% for 5,000
	4% for 7,500
	5% for 10,000

Dating on placing orders November 1st—Shipped June, July, August, September or October, at discretion of manufacturer.

Regular dates—12th to 15th following month.  
Interest 8% per annum on past due accounts.

## DIRECTIONS FOR TAKING OFF, CURING AND SHIPPING HIDES AND CALFSKINS

WELL TAKEN OFF.

### CALFSKINS

The directions above for ripping, skinning, cleaning and salting hides apply with the same force to skins, but there are very few butchers who can take off a skin with a knife and leave no knife marks thereon. CALFSKINS should therefore be "DRAWN OR FISTED OFF" instead of being taken off with a knife.

In SALTING CALFSKINS, "fine" or "coarse fine" salt should be used instead of "coarse" as in the case of hides, and even greater care should be taken to rub the salt into legs, flanks, neck, and particularly about the roots of the tail.

**SHIPPING.**—HIDES and SKINS should be shipped fresh. There is a great demand now for fancy colored leathers made from both hides and skins, but particularly from the latter. The tanners who make this class of stock require FRESH CURED hides and skins, in the curing of which great care has been taken, and this class brings an extra price. Those which have lain in salt for some time, and for even a short time in dirty salt, become discolored to the extent of rendering them unfit to receive the delicate dyes which the manufacturer of fancy leather must give them if they are to bring the highest price.

While these remarks apply with special force to calfskins, still where these directions are followed, both hides and skins are much more valuable, and will bring a much higher price.

**GENERAL SUGGESTIONS.**—The object of these instructions is to obtain fresh, well-cured, clean hides and skins of good pattern and free from knife cuts, and if taken off in accordance with these directions, hides and skins will bring much higher prices and amply repay the extra care exercised.

### HIDES

**RIPPING.**—HIDES MUST BE PROPERLY RIPPED. To do this: First, slit from jaw to tail. Second, insert knife in front of forward leg at point where hoof splits, and extend slit over centre of knee to top or centre of brisket bone. Third, insert knife on hind leg between dew-claws and rip from that point over centre of gambrel to point midway between bag and tail. Observe particularly, in slitting from gambrel to butt, that the hair on the butt grows toward the butt. Let the knife follow the line made by the meeting of the hair.

**SKINNING.**—The knife must be very sharp, and the back of the blade held near the hide, the hide meanwhile being tightly drawn with the other hand. It must be absolutely free from scores, and particular care should be taken not to score the hide near the roots of the tail.

**CLEANING.**—The hide must not be allowed to come into contact with the blood or filth, and if it does it should be rinsed off with clean water before being salted.

**SALTING.**—The hide must be thoroughly salted with clean coarse salt and great care should be taken to rub the salt not only into the legs, flank, neck and head, but also around the roots of the tail.

BADLY TAKEN OFF.

Dotted lines show necessary trim. Notice that in a well taken off hide the parts marked *a* in this diagram fill the vacancies marked *b*, adding very much to its value.

*Canada's Best Rubber Footwear*

Made Only at Merritton, Ontario, by

**The Independent  
 Rubber Company, Limited**

# Perfectly Constructed

ALL the heavier lines in the Independent range are made by the Pressure Cure, a process used in the manufacturing of the highest grade automobile tires. As a result, absolutely satisfactory wearing quality is assured. This process gives a strength and toughness to the rubber that can be secured by no other method and enables Independent heavy service rubbers to withstand an almost incredible amount of hard usage. Men who wear heavy rubber footwear never fail to be enthusiastically pleased with the Independent line.

## INDEPENDENT RUBBER CO. LIMITED

Merritton, Ontario

# Faultlessly Finished

QUALITY is the first essential of our policy. The crude rubber we use, imported direct from the growers, is absolutely the best grade procurable. Our methods of refining and manufacture are conducted by a staff of experts, aided by the most perfect of modern mechanical equipment. All the way through, our watchful standard is consistently maintained, resulting in a line of rubber footwear, that is unrivalled for quality, finish, variety and value.

## INDEPENDENT RUBBER CO. LIMITED

Merritton, Ontario

# Kant Krack

OUR new season's range contains some very attractive new lines in all grades, heavy and light. Wherever opportunity offered, improvements in construction have been effected. From this range we are confident you will be enabled to make a selection that will meet every shade of demand with the most complete satisfaction to yourself and to your customers.

Our special lines of "**Dreadnaught**" and "**Veribest**" demand your attention. The increased sales of these lines in the past two years prove their wearing qualities. There are many lines similar in appearance but for **quality** order "**Veribest**" or the **All Red Line "Dreadnaught."**

## INDEPENDENT RUBBER CO. LIMITED

Merritton, Ontario

*Dainty Mode*

**YEAR'S BUSINESS WAS BEST YET**

The annual meeting of the Independent Rubber Co. was held on February 11th at Merritton, Ont., the headquarters of the company. The past year's record was the best and most successful in the history of the industry, which was established five years ago, and the outlook for the coming year is exceedingly promising. The factory is operating to full capacity and the output is constantly being increased. James Robinson, of Montreal, was re-elected president; Phil Pocock, of the London Shoe Co., vice-president; R. F. Foote, managing director; directors, C. S. Sutherland, Amherst Boot and Shoe Co., Amherst, N.S.; J. J. Kilgour, Kilgour-Rimer Co., Winnipeg; Hugh White, of the White Shoe Co., Toronto; J. A. McLaren, of McLaren & Dallas, Toronto, and R. F. Foote, Merritton. W. A. Hunter was re-elected secretary, and R. F. Foote, managing director and treasurer.

**NEW TRAVELERS APPOINTED**

The Toronto branch of the Miner Rubber Co., of which G. C. Yearsley is manager, has recently appointed several new travelers who will represent the firm direct to the trade in certain parts of Ontario. George Lloyd, late of Ames-Holden-McCreedy, Toronto, will look after the territory from Toronto to North Bay. L. J. Iles, late of Blachford, Davies & Co., Limited, will call upon the retailers in Eastern Ontario, while S. G. Best, of Toronto, one of the veterans of the road, will supervise the district around Toronto.

**SEVERAL SALESMEN'S CONFERENCES HELD**

A general conference of the rubber footwear salesman and managers of the Ontario Division of the Canadian Consolidated Rubber Co. was held on Feb. 18th in Berlin. Important matters on selling and trade conditions were discussed and visits were paid to the Merchants Rubber Co.'s plant, the Dominion Tire Co. and the factories of the Canadian Consolidated Rubber Co. At the business session R. E. Jamieson, general sales manager presided, and among those present were—T. H. Rieder, vice-president and general manager; A. D. Dwyer, assistant treasurer; R. W. Ashcroft, of New York, former publicity manager, and his successor, W. F. Bilger. In the evening an enjoyable banquet was held at the Walker House. The event passed off most successfully and a number of happy addresses were delivered, the executive staffs of the Merchants Rubber Co., the Dominion Tire Co. and the Canadian Consolidated Felt Co. being present in addition to the various delegates from outside points. Among the latter were J. A. Connor, Toronto, manager of the Ontario Division; W. J. Connor, London; Frank Bauslaugh, Brantford; H. H. Francis, Hamilton, and T. Smellie, North Bay. Several managers were accompanied by the members of their sales staffs. A similar conference for the Quebec and Maritime Provinces Divisions was held in Montreal on Feb. 21st, and in Winnipeg on the same date for the Manitoba and Middle West Divisions, both of which were pleasant and profitable.

**HE IS ALWAYS ON THE JOB**

F. H. Meinzer, who was for a number of years with the Gutta Percha and Rubber, Limited, and since 1911 has been with the Miner Rubber Co., being identified with the selling department for the past three years, has been appointed manager of stocks for the company. He will have sole charge of all the stocks carried in all branches and selling agencies. Mr. Meinzer is a gentleman of industrious habits, quiet demeanor and splendid executive ability. He has a thorough knowledge of detail and a practical acquaintance with the rubber game, from all standpoints. His in-

sight and grasp of affairs will make him an efficient and wide-awake member of the trade.

**NEWS NOTES IN RUBBER LINE**

A quarterly dividend of two per cent. on the first preferred stock and one and one-half per cent. on second preferred stock of the United States Rubber Co. was paid on June 31st to stockholders of record of January 15th, 1916.

\* \* \*

It is reported that fifty-five bags containing rubber were discovered in the parcels post mail on the Oscar II. amounting to about 4,000 pounds recently. A woman whose baggage was examined was found to have secreted nearly four hundred pounds of crude rubber by the British authorities. It pays to watch the boats.

\* \* \*

The Canadian Consolidated Rubber Co. recently completed in forty-five days an order for 55,100 pairs of hip boots for the British army in Flanders. The boots had extra heavy skirts and wider mouth than the standard style, with heavy straps at the knee and automatic buckles, thus involving considerable extra work. The authorities were so well pleased that a supplementary order has been given.

**NO HIDES FROM INDIA**

A cable message was received the past week by a well known Boston leather merchant regarding the importing of leather from Calcutta. It was to the effect that the English Government declared that no more hides could be shipped from Calcutta, India, to the United States, because that country had received its normal supply. By the normal supply is meant that which is generally sent to the United States in times of peace. The only way that the firms in that country can get hides from Calcutta now is to have a special form issued by the Secretary of the State sent to Calcutta, mentioning the special needs of the hides and an affidavit signed to the effect that the leather will not be used for purposes to supply the enemies of England with articles of leather.

**English Leather Trade**

Business in leather in England is good, and only the great lack of skilled operators makes the handling of the volume of trade difficult. A large amount of fancy leathers, as well as of box and willow calf, formerly came from Germany, and, these as well as other European supplies have been cut off. Tanners in Great Britain are talking of a protective tariff when the war is over, to give them a chance to perfect their organization and nail down the trade they have got.

To enable them greatly to increase their production the British Chrome Tanning Co. have made large additions to their works, and the new buildings have been so arranged that they can easily be extended if necessary in the future. To supply the present shortage of labor many women have been engaged, with very satisfactory results. Another leather firm in Northampton, who have also made remarkable progress in recent years, have enlarged their works to develop the manufacture of chrome box-calf—a much-used class of leather, which was almost wholly imported previous to the war.

Pithy Note and Comment on Shoe Matters—What the Makers of Shoes Are Saying and Doing—Shoe Facts and Fancies

**T**HE forty-ninth annual general meeting of the shareholders of the Amherst Boot and Shoe Co., Limited, of Amherst, N.S., was held recently. This historic and widely known firm, even during a year of general business curtailment, was able to show increased sales and a better statement than for the previous year. The sales for the year amounted to \$945,000; dividends have been paid regularly and a substantial amount was added to surplus account. The directors have adhered to the safe policy adopted years ago, of retaining a considerable portion of the earnings in the business. The company is in an enviable position from a financial, manufacturing and wholesale standpoint.

The plant was kept going continuously during 1915 and the outlook for the future is most promising.

The directors' report referred to the fact that a number of the employees had enlisted for military duties—two of whom have already given up their lives. The report also expressed their gratification that the employees of the factory contributed in weekly amounts over \$1,200 to the Patriotic and other funds.

Next year the company will celebrate the fiftieth year of its existence.

The Board of Directors was re-elected as follows:—Percy C. Black, T. S. Rogers, K.C., E. N. Rhodes, M.P., C. S. Sutherland and T. N. Campbell.

At a subsequent meeting of the directors the following were chosen officers:—Percy C. Black, president; T. N. Campbell, vice-president and secretary-treasurer; C. S. Sutherland, general manager; James L. Read, accountant.

## Use of Substitutes for Leather

With regard to the use of substitutes for leather the Wm. A. Marsh Co., of Quebec, write the *SHOE AND LEATHER JOURNAL* to the effect that in their new samples for spring now being made, they are including a number of lines with sole stock other than leather to show to the wholesale trade. They cannot predict what the demand will be for these goods, but think it fair to assume that if the cost of sole leather continues to advance and the substitutes used prove satisfactory, there is no reason why there should not be a large percentage made with these substitute soles.

Charles A. Ahrens, Limited, of Berlin, Ont., touching on the subject substitutes for leather say:—"We believe the fibre counter has come to stay, and the makers guarantee them to out-wear the shoe. They really are better than the general run of counters, on account of being uniform, which cannot be said of the leather counters.

"No doubt, the canvas shoe will become more popular for summer wear than heretofore. We believe the public do not realize what they will have to pay for good leather shoes, for this coming season. Necessity is the mother of invention, so, no doubt, there will be all kinds of substitutes tried, but likely without success for some time to come. There have been all kinds of ways to cheapen the shoe, in the way of insoles, heels, and even outsoles, filling them in the centre to make them appear heavy. Kid leather is getting very scarce now; in fact the cheaper grades are off the market altogether for some time, being impossible to get the skins. The writer was in Boston some months ago, and was told by kid tanners that thousands upon thousands of goat skins are laying on the docks in Europe, especially in Russia, and rotting. Lots of them are paid for, but it is

impossible to get them transported. We have no doubt but that some sort of substitute will be made for kid, which would be better than sheepskin, of which there is a lot being put into shoes to-day, but will not give the wearer any satisfaction."

## Three Brothers Join the Colors

Three brothers who have been employed in the office of the Kaufman Rubber Co., Berlin, Ont., have enlisted for foreign service. They are George, Alfred and Ross Stewart, the latter two being twins. At the outbreak of hostilities George joined the 18th Battalion, First Canadian Contingent

ROSS

GEORGE

ALFRED

and after seeing service at the front, he was recently invalided back to England. Alfred, who took his place in the office, has now joined the 118th Battalion which is being recruited in Berlin. Ross, who was on the clerical staff of the Kaufman Co., has also become a member of the same corps. The accompanying cut shows the lads in khaki. For three brothers all working for the one firm to join the colors is not an every day occurrence but, like many other ardent Canadians, they believe in doing their part for King and country. They are all sons of George Stewart of the traveling staff of the W. G. & R. Co., Berlin.

## Heating and Sanding the Bottoms

When sanding the bottom be sure that the sole is dry—that is, the surface of the sole, as the grain part only needs be dry since sanding off calls only for the scraping off of the grain. The shoe should be held delicately at this machine and on a light-weight sole especially when a circular motion is also advantageous in doing away with any imperfections on the grain of the leather. I have seen sole leather that showed veins or other irregularities that were done away with simply by a series of circular motions against the sanding roll. The general rule is to buff lengthwise, as in filling, always toward one direction, namely, the toe. When the finish is later applied, the rubbing operations, including brushing, are all lengthwise, toward the toe, and it is obvious that sanding and finishing, both lengthwise, is bound to produce a smoother finish. The circular buffing rule is intended for defective sole leather, as the usual rule from heel to toe, is always to be preferred for satisfactory final bottom finishing results. Reverting again to the principle of sanding off the grain portion only, we must take into consideration the temper of the sole before sanding. If the sole has been wet clear through, the drying of the bottom before sanding should be increased somewhat, but not to the extent of drying the sole clear through, as then the edge will open up

under excessive heat, and closing of same is an impossibility since the leather is hard and bonylike. To heat the sole only to dry the grain is the correct idea. To be exact, I should add that the extreme surface of the grain, and not the underneath part, should be sanded off. This extreme surface is very soft and porous, and stands in the way of proper foundation for the bottom finish.

#### Advantages of the Leather Louis

There are a good many factories now making leather Louis heels, and it is claimed in these shops that such heels stand up and wear better than the wood heels. It is claimed that a leather heel can be repaired, and because of this it is better for the woman who wears the shoes.

A wood heel generally has a good top lift, and there is no reason why this cannot be replaced after it is worn down. With the cover, however, is it different, and when this is gone the heel may be said to be gone. It is the cover that makes the wood heel so difficult in repairing.

If the leather Louis wears better than the wood it is also cheaper in the factory, and it may be said to look about as good. Take a wood Louis heel, and it may cost up to 10 cents a pair just to put it on the shoe. Compared to this, the leather Louis may cost about half, or possibly less, to put it on, so that there is a great saving in the bottoming of the shoe and enough to make the leather heel very popular in all shops where it can be substituted for wood.

#### Loaded Leather is a Menace

If the leather in your shoes is the product of a dishonest manufacturer the chances are that it is full of Epsom salts and sugar and will go all to pieces at the first exposure of wet weather, says an exchange.

Experts have discovered that the adulteration of leather with sugar in the form of glucose and with Epsom salts is a

form of deception in the tanning industry. This is done to add weight to cheap grades of leather and to make them look and feel as firm, heavy and durable as the higher priced qualities.

Approximately 63 per cent. of the leathers examined in a recent investigation were weighted with glucose or Epsom salts or both. This loading varies from 1. to 7.5, with an average of 3 per cent. of Epsom salts, and up to 10.4 with an average of 5.5 per cent. of glucose, amounting to a total maximum loading. When both are present, of 16 per cent. and an average of 8 per cent.

The loading process makes the leather hard, brittle and liable to crack, and when the soluble loading washes out, the leather is more easily penetrated by water. In short, this weighting trick tends to destroy those very essential properties of leather for which it is trusted.

Our boots and shoes, while supple and yielding, should be waterproof. The menace to the health and comfort of the wearer of loaded leather is obvious, and the practice is most reprehensible.

#### Larrigan Factories are Busy

Referring to a recent visit paid to the plants of the John Palmer Co. and the Palmer-McLellan Co., the Maritime Merchant says:—"The past year has been a most abnormal year in the larrigan trade. A new market, namely, the battlefield, has brought a demand which has taxed the manufacturers to the utmost at times, and nowhere have they been more active than at the corner referred to in Fred-ericton. These are very fine factories and it would be hard to find any that would be superior. The process of making larrigans is purely handwork. The sewing cannot be done on a machine, and the men sit along in rows like old-fashioned cobblers. And how their awls and needles fly; always

striking the right spot. One thing noticed was that the temperature of the sewing rooms was quite hot, and when we asked why, we were told that it must be kept high so that the leather will be soft for sewing. However, if the air is warm the smell of it is healthy. It is full of oil, and oil is good for the inside of a man as well as the sole of a larrigan."

#### Colors Do Not Mix

It has been found advisable to make white shoes by themselves, and, so far as they were able, all manufacturers have adopted this system.

The same is true of colored shoes as a colored upper will stain almost as quickly as a white one, and it requires about as much labor, or perhaps more, to get the stain out.

What is said here in regard to the shoe factories will also apply to the leather manufacturing plants. Experience in the latter has proved that the colored leather needs the same protection while in the process of making, as it needs later on, while being worked into the shoe.

This is so well understood now that in all the leather establishments the rule is to run on black, as far as possible, or to give up black wholly and confine operations to the colored stock.

The leather men are doing this to-day, as far as the conditions warrant. They realize that they cannot mix the two and get best results. Naturally they cannot continue on colors all the time, but if they can make all colors they are so much better off in the end, all due to the fact that such a system keeps the stock clean precisely as it does in the shoe factory.

#### Boot Inquiry Cost \$4,500

Volume 3 of the Auditor-General's report, tabled in the House of Commons, Ottawa, recently, gives details of expenses for legislation, militia and defence, and public works. In connection with legislation, one of the interesting items is that the expenses for witness fees and for the employment of counsel, at the military boot inquiry of last session, totalled up to a little over \$4,500, while the Public Accounts Committee, which investigated war contracts, paid out \$2,026 for witness fees alone.

Replying to Hon. Frank Oliver, the Minister of Militia stated that the average price paid for canvas shoes ordered for the Canadian Expeditionary Forces was \$1.70 a pair. Each man ordered overseas had been supplied with a pair, totalling 116,000 pairs, while 50,000 had been issued in Canada.

#### Fifty Workers Have Enlisted

The Boot and Shoe Workers' Union, Toronto, at their last regular meeting, elected the following officers by acclamation: President, Walter Painter; vice-president, Albert Taylor; recording secretary, Albert Headley; treasurer, Sidney Sparks; financial secretary and business agent, Walter Brown. Mr. Brown stated that fifty of their members have enlisted. Every man and woman in the trade is employed and there are a number of jobs vacant.

#### Ratepayers Will Vote on Shoe By-Law

The ratepayers of Chatham, Ont., will vote upon a by-law on March 6th for the promotion of a shoe industry to be incorporated under the name of the Chatham Shoe Company, Limited, at the head of which is E. S. Hunt, of London, Ont., by the granting of a fixed assessment for a term of years. The company will be incorporated with a capital stock of \$100,000, of which not less than \$40,000 will be paid up and will be in operation by April next, employ forty hands and pay not less than \$20,000 annually in wages. Mr. Hunt is now president of the C. N. W. Shoe Co., London, and if the by-law carries the property and buildings lately occupied by the Wolverine Brass Co., of Chatham, will be occupied. An

indebtedness of the former owners of the property will be assumed by the new shoe company which will be granted a fixed assessment of \$10,000 for ten years. Under the by-law the shoe company will assume the city's mortgage of \$15,087 on the property bearing interest at the rate of four per cent. and agrees to pay off the same in twelve annual installments and instal machinery worth \$10,000, which will form part of the said mortgage security now held by the corporation.

#### Linoleum for Boot Soles

"To eke out the supply of shoe leather," says the Amsterdam correspondent of the Morning Post, "the Home Secretary of Saxony has asked the Dresden Chamber of Commerce for a report upon the possibility of utilizing linoleum for soling boots.

"Austrian wholesale houses announce a further rise in the prices of all medicaments from Germany, especially by-products of the dyeing industry. The rise of wholesale prices is 60 per cent."

#### Placing Company on Splendid Basis

A special meeting of the Perth Shoe Co., Limited, was held recently in Perth, Ont. The object was to provide for the reorganization of the company upon a more satisfactory financial basis. The Perth Shoe Co. succeeded the Winn, Limited, and when the latter company moved here from Milton about four years ago, about \$50,000 of local money was subscribed in the stock of the company. Winn, Limited, was undoubtedly in very bad financial conditions when they moved to Perth and during the year they did business it would appear almost certain that all the money put into the business was lost.

When Winn, Limited, went bad, Mr. F. W. Hall and Mr. C. J. Sewell took hold of the business and formed the

F. W. HALL, M.P.P., PERTH, ONT.

Perth Shoe Co., Limited. The old stockholders in the Winn Company were continued as stockholders in the new company for the full amount of their stock. In these trying financial times, the company has found it necessary to reorganize. It was not possible to find new capital and still carry the whole weight of the old stockholders whose money was really lost some years ago. Those putting in new money were naturally anxious to clean up some of the liability of the stockholders. The scheme of reorganization which was adopted by the shareholders, provides for the sale of all the

QUEBEC, QUE.

assets of the company to a new company to be formed and which, we understand, will bear the same name as the old company. This new company will assume all the liabilities of the old company and take over all the assets. The total issued stock in the new company will be about one-half the present stock issue of the old company, and bondholders who have claims to the extent of \$30,000, surrender their bonds and take stock in the new company. The result is that the issued stock of the new company will amount to about \$75,000, as against a stock issue of \$106,000 and a bond issue of \$30,000 of the old company. The par value of the shares in the old company was \$100.00. The par value of the shares in the new company is \$10.00. The shareholders in the old company will get one share in the new company for each share in the old. In view of the reduction in the issued stock, this places them in a much better position than the proportion of one to ten would indicate.

The business was never in better shape and the reorganization of the company and the introduction of new capital will place the company for the first time upon a basis in which it has a first-class chance to succeed. The real interest for Perth is that the work in the factory will be continued with increased vigor and its citizens will benefit in the regular weekly pay roll.

#### Generous Gift of Leather Company

A. Davis & Sons, Limited, Kingston, Ont., have sent a cheque for \$1,000 to Queen's medical faculty for equipping forty beds in Queen's General Hospital at Cairo, Egypt. This firm some time ago gave the hospital a motor ambulance. Queen's Hospital was lately increased to one thousand beds.

#### Canadian Talks to Shoe Club

Canada's unflinching determination to continue in the war and throw her whole available strength on the side of Great Britain for democracy, righteousness, humanity and the freedom of the nations to live, each in its own way, was expressed recently by Sir William Peterson, President of McGill University, Montreal, at the 106th banquet of the Boston Boot and Shoe Club, Boston.

The Vice-President of the Club, Fred. B. Rice, presided. "Canada," he said, in introducing the guest, "has come to be a billion-dollar country in respect to the volume of international trade, and it is significant that fully 37 per cent. of its export business is carried on with the United States, for Canada sells to us nearly \$150,000,000 worth of goods annually, and we in the United States buy from her more than \$400,000,000 worth. Could anything throw a stronger light on the intimacy between these two nations?"

"Our shoe manufacturers find a market in Canada every year for about \$3,000,000 worth of footwear, although they are sadly handicapped just now by the inequitable conditions governing the tariff systems of both countries.

"In other words, the United States gives an absolutely free market to Canadian shoe manufacturers and tanners, while our friends of the Dominion, in pursuance of their long accepted policy of protection, have built up against us, including the recent war tax, a tariff wall of nearly 40 per cent. against our products. This is one of the many examples of how two neighboring and friendly countries ought not to maintain their tariff arrangements.

"I need not remind this audience that several of our leading American shoe manufacturing concerns have established branch factories in Canada, partly as a consequence of the unreciprocal tariff arrangement, and I am glad to say that these appear to have achieved at least a measurable success."

Sir William Peterson reminded his audience that the cause of the Allies was the cause of the United States, as

well as of Great Britain and Canada. He was therefore surprised that none of the American peace societies—and he was a member of all of them—had cared to pronounce any judgment as to the horrors which had attended the conflict, even if they did not wish to pronounce judgment as to the influences which had brought it about.

As to the neutrality which had been so carefully imposed upon Americans from Washington, he pointed out that in spite of it one had only to open an American newspaper to see what latitude was allowed in the United States to the expression of individual opinion. And if American citizens happened to be killed during a Zeppelin raid in England, he ventured to think Americans as a nation would take a less detached interest in some of the atrocious methods that were being practised in the war than they were now taking.

Sir William proceeded to outline the British case and to defend Great Britain from charges made as to her motives in entering the struggle.

#### Fancy Leather Heels

One very interesting detail of the development of modern shoemaking is found in the new fancy heels of leather. They are intended to duplicate the fashionable wood heels, and some idea of their value to the maker of popular price shoes may be gained from the fact that the other day a maker of women's shoes struck fifty cents a pair off his prices because the buyer chose fancy leather heels in place of fashionable wood heels.

The fancy leather heels are made of leatherboard. The lifts are built up two inches high, or more, thanks to improvements in the mechanics of heel building. The shoemaker attaches them to his shoes, and then with the new heel-shaving and heel-breasting machines, he cuts away from the back and the breast of the heels until they are shaped just like Louis heels. Indeed, they are commonly called "leather Louis heels."

Then comes the newest improvement in the making of these heels. They are covered with a celluloid compound, that is tinted to match the color of the uppers of the millinery shoes. The finish is then burnished to a brilliant polish, and the completed heel looks like a celluloid covered wood heel. But the cost of it is only a song, compared with the cost of the real wood heel. Of course, it hasn't the real class of the genuine wood heel. But it serves for shoes that must be made at a price.

#### The Tendency in Fall Styles

Thoughts are now turning toward fall styles. Ideas are very much in the rough at present, but one or two tendencies stand out. One is to make the forepart a trifle narrower to conform to the more tapering toe. The other is that colored kid will be strong, with the darker colors in the lead.

The height of boot tops is under consideration. Many merchants expressed the opinion that seven and a half to eight inch tops are here to stay. Short skirts will not permit of low tops. On the contrary two of the best shoe buyers in New York claim that the bulk of their present trading is on seven inch tops. They feel that the extra high cuts are only a passing fad. Next season they expect to see seven-inch tops sell in even greater quantities than at the present time.

A pair of gold boots were made by Charles E. Wilson, Lynn shoe manufacturer, last week. The uppers were of cloth of gold, eleven inches high. The soles and the heels were enamelled with gold.

A New York dealer says he is doing more business on staple, plain black button boots, than on novelties. He considers it a mistake for dealers to devote all their atten-

tion to novelties. Novelties are one of the best things that ever happened to the shoe trade, but staples should not be neglected.

#### Shoe Materials Up 100 Per Cent.

Materials for shoes have doubled in price in the last two years, according to Ben Jacobson, manager of the Morse & Rogers Retailers' Profit Service. In a bulletin issued yesterday he says in part: "Soon after the outbreak of the war a meeting of trade leaders was held for the purpose of considering the effect war would have on the price of leather and shoes. As a very large proportion of the calfskins tanned in this country were imported in a raw state from the war zone, and in anticipation that the supply would be cut off, the shoe manufacturers were advised to push kid skins. Shoes made of colored kid have since become very fashionable. To-day there is a scarcity of kid leather only surpassed by that of calfskins, because neutral countries have now turned to the United States for their supply. As a result of these shortages higher prices for practically all classes of shoes are said to be inevitable. Many lines have already been advanced at wholesale."

#### Wants Novelty Shoes for Men

Speaking at the recent convention of the National Shoe Retailers' Association in New York, one of the delegates from Philadelphia said that the sale of men's shoes will never be on a satisfactory profit basis until we inject the same novelty into them that has been done in women's shoes, he gave the trade a big thought to digest. While it may not be possible to go to the extreme of style that we have gone in making women's shoes, yet a great deal should be done, and will be done in the interest of better looking men's shoes. Generally speaking to-day, outside of workmanship, men's shoes look very much alike. This cannot be said of women's shoes. The retailers are keen to develop the men's business along the same lines that the women's business has been developed and thereby create an increase of volume in men's shoes.

#### Fire Damage Not Great

Dufresne & Galipeau, shoe manufacturers and wholesalers, suffered a loss by fire in their premises on St. Paul street, Montreal, on February 15th. The fire was confined to the basement of their six storey warehouse, and while

several thousand dollars damage was done, but a small portion of their staple cheaper footwear was damaged, the greater part of the stock not being injured at all. Their business suffered no interruption.

#### Big Russian Shoe Order

Financial circles of New York and Boston are talking of a new Russian army contract for eight million pairs which they say is now in the hands of British bankers. The leather trade have not been informed on this subject to any extent, but there is some theorizing as to what the contract will do to leather values. It is well known that large quantities of American leather were purchased by the English trade at the beginning of the war, and that soon after England made new regulations regarding the tannage of stock to be cut into army shoes. A good part of this leather is still lying in the English warehouses. It could be utilized if the specifications permit the use of vegetable tanned stock. However, 8,000,000 pairs would consume many millions of square feet of upper leather, not to speak of the stock needed for outer and inner soles, counters, linings, etc. Great Britain has prohibited the exportation of untanned kips from India and is shipping them to London at the rate of 4,000 bales per week. These stories all fit in together to back up the report of the big order. This contract is supposed to call for shoes and not boots, and is to be similar in style to those made by one of the large New England manufacturers a few months ago. There is also some talk of using splits in this shoe but as yet the whole matter is mere speculation.

#### Handling New Line This Season

Blachford, Davies & Co., Limited, wholesale shoes, 60 Front street west, Toronto, have been appointed selling agents for Canada (with the exclusive selling rights for Ontario) of the Jacques Cartier rubber, made at the Canadian Rubber Co.'s factory. They will also handle the Dominion, Anchor and Goodyear brands of the Canadian Consolidated Rubber Co., which comprehensive range affords the retail trade a wide selection to meet all the varying requirements of their customers. Blachford, Davies & Co. will also sell the "Fleet Foot" line of tennis goods and sporting shoes.

# CO-OPERATION—BETTER PROFITS—HIGHER IDEALS

**Banquet of Toronto Shoe Retailers' Association Was Signal Success—Large Attendance, Bright Speeches and Splendid Enthusiasm—How the Price of Raw Material is Going Up—What Unity and Good-will Among All Members Can Accomplish—The Aim and Purpose of the Association**

Co-operation and enthusiasm were the outstanding characteristics that marked the annual banquet of the Toronto Shoe Retailers' Association, held on Thursday, February 24, at the Hotel St. Charles. The important event brought together about 150 members of all branches of the trade, as well as a number of outside guests. The proceedings were highly enjoyable and everything passed off pleasantly and profitably. The tables were artistically decorated with carnations and other flowers; the menu was all that could be desired, while the toast list called forth a number of timely speeches, which possessed the merits of brevity, wit, wisdom and philosophy.

Under the direction of Howard C. Blachford, president of the association, and the executive, the arrangements were complete in every respect, and the delightful function reflected the highest credit upon the management and good sense of those who had it in hand.

The object of the assembly around the festive board was to bring together the different branches of the trade in a social way, so that a better understanding might prevail, warmer friendship exist, and more thorough appreciation felt regarding the aims and purpose of the retail men.

After the toast of "The King" had been loyally honored, the chairman gave a short address on "Some objects of our Organization." Mr. Blachford declared that he did not intend to throw any bouquets at the association, which was formed July 7, 1915. He appreciated the honor that had been conferred upon him in placing him in the chair, and was gratified to see so many present. He welcomed the representatives of every branch of the trade, both in and out of the city. The keynote of the association was unity and co-operation. If they did not work together, there could not be any progress. In order to have unanimity and good will prevail throughout all departments of the trade, co-operation must prevail, and the Toronto Association hoped by these means to have as effective a body as that which flourished among the shoemen of New York or Rochester. The speaker had been asked by a retailer "what has the

Association done for me?" To this he had replied, "Well, if all attended the meetings the way you have, there would not be much done." They had 117 members and he urged that their regular sessions should be more largely attended. "Come out," observed the president, "and we will try to get together and do things for the general betterment of the retail trade." The object of the banquet was to bring all the branches together in a social way, and to assure the wholesalers and the manufacturers that if the retailers came to them, it would not be in any antagonistic spirit, but that they should meet and put things in a proper light and reach a reasonable conclusion, without either side getting exactly all it was after. Like married life, they all had to give and take. The retailers wanted the co-operation and the goodwill of the rubber and the shoe manufacturer, the wholesaler, the findings man and the traveller.

Another object of the association was the elevation of the retail trade at large. The shoe business was not on as dignified a plane as it should be, and if placed on a higher standard, it would be accomplished only by education and united effort. At the regular monthly meetings, addresses would be given on subjects of importance to the members, and thoroughly discussed. The last meeting had been a great success and it was hoped to have outsiders as well as local men speak from time to time.

## THE SHOE MANUFACTURERS

Geo. Chambers, manager of the Regal Shoe Store, said that he had resolved to turn over a new leaf, and that was longer profits and bigger discounts. He made humorous references to various phases of the trade, and spoke a good word on behalf of the shoe manufacturers, which toast he was very pleased to propose.

## How Shoe Costs Are Going Up

Mr. G. A. Blachford, president of the Blachford Shoe Mfg. Co., replied, and gave those present much valuable and timely information on the question of ascending costs in the

G. A. BLACHFORD

E. T. JACOBI

R. H. GREENE

SOME SPEAKERS AT THE SHOEMEN'S BANQUET

production of shoes and the great scarcity and high prices of raw materials. He said in part:—"There is no question before the trade to-day which is causing so much serious thought as the question of prices. The retail merchants in this country have not as yet been brought seriously face to face with it. We all know in a general way that higher prices might be expected and I would like to give you some of the conditions that the manufacturer is meeting with every day now. I would first mention the every popular material, patent leather. In this line, we have a very important industry right here in Toronto, and in speaking with Mr. Clarke recently he happened to say that wherein they have obtained their large supply of raw skins mostly from Russia, Norway and Sweden, they have to obtain them to-day from South America and New Zealand. Not only is the price of hides very firm, but all commodities

**HOWARD C. BLACHFORD**

President of Toronto Shoe Retailers' Association who ably presided at the banquet

entering into the tanning and coloring of leather have become exceedingly expensive and scarce. In connection with this leather I will mention only two items: bichromate of potash which has increased in price since the war commenced about 400%. Coloring material which was in the past plentiful at 28c a pound is now hard to get at \$3.00 a pound.

It seems unreasonable to expect anything else but further serious advances in the price of this material. In the matter of calf skins, I am indebted to one of our largest tanners who advises me that previous to the war they obtained practically all of their high grade skins from Russia, Germany, Austria, Belgium, Holland, Italy and France. Since the war made itself felt they have not bought one skin from any of these countries, with the exception of an occasional small shipment from France. Such hides have been obtained at a very high figure and the expense of freight and war insurance has added seriously to their further cost. He writes that from the very latest figures he has been able to obtain, the actual cost in producing the finished leather amounts already to 9c per foot, although from one of the leading experts in New York city he is advised that from their standpoint, the additional cost now amounts to 10c per foot. This is a very serious matter when it comes to the cost of a pair of men's calf boots. From one of our leading sole leather tanners I hear the following:

That the average advance of all materials used by tanners in the making of oak sole leather is around 97%. The scarcity of labor, particularly of late, has added considerably to the cost of production.

That oak sole leather costs now in excess of what it did just previous to the outbreak of the war about 28½%, and this party thinks that the hard pinch is yet to come. When it was realized that many leathers popular with the trade would necessarily become exceedingly scarce, we find that those who were in a position to influence the style tendency, immediately did everything in their power in favor of using kid leather as this seemed to be the only leather of which there was any large supply on hand. In the matter of this material Canada is very dependent upon our good neighbors to the south, and during the past two weeks I have received letters from three of the most prominent producers of fine kid in the state of Pennsylvania where most of the American supply is tanned. In reading these three different letters, one would almost think they had conspired to say the same thing. The effect of style in the use of kid leather had its result and I am informed that the increased demand for this material during the past year has amounted to about 500% with the result that in a very few months all surplus stocks were absolutely depleted. The present condition in the kid market will be realized when one understands that staple lines of kid selling at from 12c to 18c per foot are practically off the market entirely. That serious advance in the cost of production and the selling price of shoes will be necessary, we must realize and expect. Coupled with this is the uncertainty of obtaining our necessary supplies at the proper time and we will undoubtedly meet with a want of uniformity in the finished leather to which we are not accustomed. I know in my own experience I received leather recently that cost me 60c a foot and I would have rejected it two years ago at 25c a foot. I am sure that every manufacturer would urge you as I do to face the conditions that will come to us without fear and trembling; pay the price that is necessary to pay, under all circumstances and uphold the quality of your merchandise.

#### THE RUBBER MANUFACTURERS

G. St. Leger, who was referred to by the chairman as "the dean in the retail shoe trade" in Toronto, in presenting the toast of the Rubber Manufacturers, humorously observed that their position was somewhat different from that of the leather shoe manufacturers, who were up against higher costs for kid skins, dye stuffs, thread and other material. The rubber shoe manufacturer could make what he liked, charge what he liked and deliver when he liked, and if you did not pay you got "cold feet." This was how the rubber man acted. Mr. St. Leger said he had been in the retail business a great many years, and had often met a "brother in distress." There was something wrong with the manufacturers, wholesalers or retailers, and the great trouble seemed to be that an idea prevailed in the shoe business there was a fortune to be made. Too many persons were starting in without sufficient capital. The result was too many dealers and too few producers. Men were leaving their trades to enter the retail ranks when they should have stayed at their original calling. They had no right to start in the shoe game without capital. One of the requisites to success in any business was courage and a part of courage was discretion. It was necessary to have both, and if there was not an equal amount of each, courage was often produced through ignorance. The speaker emphasized that in the old country character was regarded as the main essential, when a man launched out for himself. It was not money. He must have character worthy of credit, but in Canada it appeared that any one could get credit and start in the shoe line if he had only three or four hundred dollars. Mr. St. Leger recalled having attended a meeting of rubber manufacturers at which they were all urged to buy Canadian rubbers. This was, of course, many years ago, and he had taken the opportunity of asking in return that all those manufacturers who had on Canadian shoes to stand up. No one

rose. He wished the association every success and trusted that all the members would stay by the organization.

R. H. Greene, of Gutta Percha and Rubber Ltd., answering on behalf of the members of this branch of the trade, extended thanks for the kindly reception accorded the toast. He complimented the members on the magnificent gathering and said he felt thoroughly at home. He had been associated with the shoe trade practically all his life, going through all its gradations, until he struck rubbers. He loved the rubber game and thought it was a fine business. It was the one thing that he knew, except golf, but he did not allow pleasure to interfere with business—at least not very often. He had worked hard, and believed it was the duty of every man to have a hobby. In his business career of fifty years, he had never lost an hour through sickness, and if he did not play golf, then he played something else.

Mr. Greene then dwelt upon the magnitude and rapid development of the rubber industry. In 1914 the world's production of rubber was 270,000,000 pounds, of which 60% was cultivated and 40% wild. In 1915 production had reached 360,000,000 pounds, and of this 66% was cultivated and 34% wild. The United States was the greatest rubber manufacturing country in the world, and two years ago, took 50% of the entire production, Great Britain 15%, Russia 10%, Germany 9%, and the rest of the world 16%. In 1915, the United States took 60%, Great Britain 12%, Russia 8%, France 7%, and the remainder of the world 13%. In 1900 Brazil had furnished 60,000,000 pounds of wild rubber as against 5,000 pounds of cultivated rubber. At the present time there were 1,500,000 acres under rubber cultivation, producing 250,000,000 pounds annually of plantation rubber, showing the great increase in cultivation. The value of crude rubber alone imported into Canada in 1915 was \$6,000,000.

Mr. Greene stated that the great increase in the use of rubber would never have been made possible and prices would have had to be maintained at an abnormally high level, if it had not been for the splendid progress that had been made by scientific methods in producing this commodity through cultivation. It had been stated that there was a rubber manufacturers association. There was such an organization some years ago, but not to-day. Representatives of the different companies met together the same as

other bodies, to consider methods of improving their goods, and bettering the service in the best interests of the retail trade, for they believed in co-operation. Competition among the rubber manufacturers was on the basis of quality and service.

In conclusion, Mr. Greene, who was saluted by one of the members as the "ever-Greene," said he believed strongly in unity and progress, and he congratulated the retail shoemen on the step they had taken in this direction. By meeting a competitor one became a broader and a better man, and it was generally found that the fellow across the street was a pretty decent chap after all. In a life time's experience, he had come to the conclusion that this world was filled with this class—men who were decent, honorable and upright, in all their relations in business.

#### THE WHOLESALEERS

S. C. Parks, to whom fell the honor of presenting this item on the toast list, said that he had been in the habit of addressing persons in many gatherings as "brothers." Perhaps he could not greet the wholesalers as such, but rather liken them unto a certain man "who went down to Jerusalem from Jericho." Seriously speaking, this was a wrong impression to hold with respect to the wholesalers, for they were a necessary part of the shoe game, and, like the retailers, had a lot of things to contend with. It was only by co-operation with them that they could arrive at a basis that was mutually helpful. There was no reason why the wholesale and retail ends of the business should not work together for the good of all and the welfare of the trade in general.

George E. Boulter emphasized the need of co-operation and better understanding between the jobber and the dealer. The wholesaler, who would not listen to his traveling representatives and give consideration to their views and opinions (for the traveler was the one who came in direct contact with the customer) was as far behind the times as the retailer who never went out of his store or neglected the frequent dressing of his windows. He was proud of the Toronto Shoe Retailers' Association and the way that it had carried on its work, and wished the organization every success. The Association was undertaking an excellent task on behalf of the progress and elevation of the trade in

A FLASHLIGHT VIEW OF THE BANQUETERS MASSED AROUND THE CENTRAL TABLE

general. The wholesaler must give attention to his representatives on the road, and Mr. Boulter instanced a case of a prosperous wholesale firm who had sent a traveler to England to develop business. He had sent in a large order for goods, but it was stipulated that all should be on E width. This would seriously interrupt the production of the factory confining operations to a single width. The wholesaler had through his representative taken the matter up with the old country house and urged that the big order should be given on all widths, stating that if there was any loss on the narrower widths, he would stand for the same. Back had come a cable to go ahead, the result of this mutual conference had been many repeat orders, on the shoes made of all widths. By co-operating with the retailer and working in connection with him, the outcome was of the greatest advantage to both parties. This wholesaler had shown a disposition to point out the way to larger revenue to the Old Country house, and the latter had evidenced its willing-

GEO. E. BOULTER

ness to act on the suggestion of the wholesaler, and show their confidence in his judgment. By working in conjunction with the retail trade, both the jobber and the dealer enlarged the scope of their operations.

### THE TRADE PRESS

Walter Burnill, Vice-President of the Association, in offering this toast, incidentally remarked that it had been said that ninety-five per cent. of all those who went into the retail business failed. When he looked around and saw so many prosperous, intelligent and capable men, he thought this statement regarding business reverses had been exaggerated. It had been proven, however, that it had to be taken at its face value for both the Harvard Bureau of Research and Canadian Securities had, after investigation, endorsed the percentage as being correct. If such was true in ordinary times what about to-day, when there had been a general curtailment of business owing to the war and so many men going to the front. The one way to meet such conditions was to take full advantage of the assistance and suggestions found in the trade press. The journals were full of instruction and timely pointers. Some fellows thought they could manage their own business best, but all could learn something from the other fellow. The trade press was the clearing house for ideas and the medium for the interchange of thought and experience. "Render it all the assistance that you can for we need all the practical help that we can secure," he added. "By reading your trade paper you become a better business man, more enlightened and competent to meet changing conditions such as we have undergone. Adopt modern methods. The trade press is

doing its very best to present them to you. Remember that these journals are what you help to make them. Give your ideas to the publishers then and place whatever information that you think is valuable to the trade at their disposal. Do not forget also to come to our Association meetings. The result will be a better understanding of conditions which we have to face to-day and better profits. You must adopt up-to-date methods if you wish to succeed, and if you do not do this you will have to compete with those who do."

James Acton, in replying on behalf of the *SHOE AND LEATHER JOURNAL*, remarked that he was "a farmer" and that he lived in the county of Peel where they raised and sold horses. It had been suggested that the county was so named that because in all transactions the residents took the skin off you. He added that farming was as great in every way as shoe selling, and told a number of anecdotes of rural life and its associations which were received with merriment. Somehow he could not get the smell of leather out of his nostrils for he was the son of a shoemaker and had been in the retail shoe line himself. Referring to his many years connection with the trade, he recalled several humorous instances of by-gone days. Mr. Acton thanked the proposer of the toast for his words of appreciation of the trade press, from which readers expected the truth and a fair impartial presentation of the different questions which came up for consideration. He expressed his pleasure at being present and spoke appreciatively of the good work which the Association was doing for the unity, co-operation and uplift of its members. He was glad to be back with the members again and also with the trade, and, on behalf of the trade press, wished the Association every success and prosperity in its splendid work to promote the best interests and maintain the highest interests of all branches of the business.

W. R. Carr, editor of "Footwear in Canada," said that Mr. Burnill and Mr. Acton has so thoroughly covered the subject that there was little left for him to add. One of the speakers of the evening had declared that shoe retailing was a science and another had called it a game. Both were right, for it was a scientific game. In the old days it had been a game pure and simple, but science had entered into it, and to succeed to-day under present business conditions one must play the game scientifically. The retailer needed education and scientific study. He realized that he must be instructed and this could be done through three avenues. by forming an excellent Association such as those present had done, by means of the traveling salesmen, and through the trade press. In conclusion, he wished the organization ever increasing usefulness and service.

### SHOE FINDINGS

Warren T. Fegan, in introducing the toast of the Shoe Findings, remarked that this was one part of their business in which the members of the trade had no objections to the profits as from this source they were substantial. He referred briefly to the importance of this department and the place it should occupy in every shoe store.

E. T. Jacobi, who responded, stated that it was a mistake for the trade to sell findings at cut prices. It was a business which belonged distinctly to the shoe trade and not to the druggist, as in New York city, where many such shops sold findings—particularly polished. The findings men were willing to co-operate in every way with the shoemen to keep the trade in its proper channel, which was in the shoe store. "When you cut the price of a tin of polish to seven cents you are doing something to undermine your business and your profits," he added. "Do not sell your

goods for nothing. People are willing to pay 10 and 25 cents for polishes and dressings. There is no more profitable department in the shoe line than findings. See that you keep them up to the mark."

John Harris, manager of the Nugget Polish Co., who also spoke briefly, congratulated the Association on having such a live President as Mr. Blachford, who was the right man in the right place. Mr. Harris touched upon his pleasant relations with the trade in Canada and thanked the gathering for its enthusiastic welcome. Only by co-operation could the trade meet with the largest measure of success in business, and he was pleased to see so much energy and enthusiasm displayed in the Association.

#### OUR TRAVELERS

This was the last, but by no means the least toast on the list, and was proposed by W. B. Parvin.

Previous to its introduction, Lance Corporal William Arthur Ship, of the 166th Regiment (Queen's Own) C.E.F., who has donned the khaki like many other members of the trade, gave a recitation "The Life Boat," in effective manner. He was given a rousing reception.

Mr. Parvin said that one of the brightest sides of his experience in the retail line was meeting with the worthy traveler. He had been in the shoe game over twenty years and had never met a more attentive and obliging lot of salesmen than those in Canada, and more particularly in Toronto. The traveler was as necessary to the retailer as the retailer was to the public, and he bespoke for him a good reception, as his life was not all sunshine. The retailer could do much to smooth the way of the traveler. "Even if you cannot buy," he asserted, "do not criticize his goods and find fault. Give him a word of encouragement. We all can help one another in business life as much as possible and co-operate for the general good of the trade."

W. G. Martin, city traveler for the Canadian Consolidated Rubber Co., Toronto, responded, and remarked that he regarded it as a great honor to have his name coupled with the toast, as there were between 25,000 and 30,000 traveling salesmen in the Dominion of Canada. It had been said that the selling game was the fourth profession, but in reality it was the first. The first sale was recorded in the Bible, where Esau sold his brother for a message of pottage. What an ass he had made of himself. Now, if Esau had disposed of a big bill of rubbers at a good price without

W. G. MARTIN

a break, he would have proved himself a good salesman. Some of the speakers have referred to the triple links of a widely known fraternal society. There were also three links in the selling profession—the manufacturer, the retailer and the traveler. The latter was the connecting link and was necessary to both. The manufacturer might have the best goods in the world but if he locked them up or kept them inside of a sample room and did not send out the traveling salesmen with a set of samples to let the trade know what he had to offer, the effort of the manufacturer would not amount to much. He would never get very far on the road to prosperity.

"The selling game," remarked Mr. Martin, "in spite of its drawbacks, for it has them like other games, is a real pleasure and, when you go home at night after landing an order which you perhaps never expected to get, you feel

that you have accomplished something. I am glad to be a salesman and, on behalf of that body, I congratulate you on the success of your Association. If, at any time, the salesmen can be of assistance to you, I am sure that we will be only too happy to be called upon. If you have any complaints or grievances—any suggestions to make—tell us about them. We want you to take us into your confidence and feel that we are your real friends. We will endeavor at all times to take up any matters that you bring before us with our firms and see if we cannot get you what you want. We are anxious to be of genuine service to you and wish your Association the largest measure of success."

President Blachford, on behalf of the Association, warmly thanked all for their attendance and especially the guests who had delivered such excellent speeches. He also expressed his personal gratitude to the members of the executive for the work that they had done in helping to make the banquet such an outstanding event.

G. St. Leger proposed a hearty vote of thanks to Mr. Blachford for the able manner in which he had presided. This was received with much enthusiasm. The gathering then dispersed after singing the National Anthem, bringing to a close a banquet, which was in every sense one of the best managed and most enjoyable ever held in the history of any trade.

#### GLAZED KID PRICES RISE WITH DEMAND

Glazed kid is going up steadily in price, where the ascendancy will end no one knows.

Philadelphia being the centre of the glazed kid leather industry, the situation in the American trade is well reflected in the following statement made by Ira Vaughan, of Dungan, Hood & Co. Glazed kid, for which there is at present a heavy demand, due chiefly to fashion's decree for high-topped shoes in fancy colors for women, has advanced from 15 to 20 per cent. recently, and with every possibility of it going still higher. Mr. Vaughan says:

"The war has tied up large quantities of goatskins, causing a serious shortage in the supply. There have been no skins coming in from Russia or the Balkan States for some months, and few skins have been received from India or China on account of decreased shipping facilities. England is allowing goatskins to be exported from India only to such American concerns as can satisfactorily guarantee that the finished leather will not get into enemy hands. China skins, used extensively by some manufacturers of finer grade glazed kid leather, are hard to get and at extreme advanced price. These conditions have forced the American manufacturers into keen competition for Mexican and South American skins, with the result that prices have gone from 25 to 30 per cent. higher than they had been for several years previous to last July.

"Tremendous advances have been experienced in tanning materials and labor. Potash, soda and lime have climbed skyward in leaps. Glycerine within the last few months has jumped from 15 and 16 cents to 65 cents a pound because of the demand for making explosives, and arsenic, used with lime in a labor-saving process, is virtually not obtainable at any price. We are compelled to use lime alone, which makes a decidedly more lengthy process, and consequently adds to the increased cost of production along with the 10 to 15 per cent. wage advances that have grown out of war conditions.

#### Domestic Demand for Fine Leathers

"Unusual demand for moroccos, as well as advanced cost of manufacture, is, of course, a big factor in forcing

prices to from 15 to 20 per cent. beyond the normal on the finished product. The market is almost entirely domestic, and is due chiefly to the popularity of extreme high-topped ladies' shoes in blacks, whites and colors. I would say that the consumption of glazed leathers has increased within the last few months to the extent of more than 500 per cent.

are only three such shops. "But," the writer adds, "I do not think any of them are making money. Where I am now situated my location is rather a poor one for business and, of course, it makes a difference. For a long time I had a good shoemaker, but he left me not long ago. His favorite work was in making a strip shoe which is a cross between a boot and a moccasin. We have been making a special feature of this for the miners. He went to an opposition member of the trade in order to make this popular boot. I am making another style for the miner, which is really the better of the two, but these men follow their leader and the boot came a little too late. It will take its place later, the moccasin having a good long start. So far as my future is concerned, I have been considering several propositions. One is to move into the business district, but a change is no light matter, as for a repair shop my stock is extensive. Another is to remain where I am and do some strong and effective advertising. I have kept my name before the public pretty well in the past, and have found that it pays. I always read your paper with a great deal of interest and have gained a number of pointers from it in the matter of repairs, although I do not always agree with what you have to say. Still, there will always be differences of opinion as long as the world lasts."

**MR. LOUSON IN NEW LINE**

W. S. Louson has resigned from Ames-Holden-McCready, Montreal, in order to devote his whole time to Asch Limited, Outdoor Advertising, of which concern he has been President for more than a year and in which capacity he will continue.

**ANNOUNCEMENT OF  
A New High Boot**

**The Price is \$5.00**

There was never a time in the recollection of the "oldest inhabitant" when the importance of being well shod was as great as it is at the present time. Short and still shorter skirts demand the higher cut boot, and the result has been a continuous call for Smart Footwear.

We are showing these Boots in (3) three styles: Patent Colt Vamps with Blue Velvet Tops, Patent Colt Vamps with Black Velvet Tops, and Bronze Calf Vamps with Dark Brown Velvet Tops; plain toes, new short vamps and light flexible soles.

Peterborough

An instructive and well worded advertisement

"The average price of staples is today 24 cents per foot, while whites and fancy colors, being in even greater demand, are bringing from 60 to 75 cents per foot."

**THE IMPORTANCE OF GOOD LOCATION**

"Yes, I was much interested in your recent article on choosing a business site," writes a leading shoe repair man, who is doing business in a certain Canadian town. His experience is interesting, for he says that five years ago there were about twelve or more shops on the street in which he is now and it was quite a busy thoroughfare. To-day there

**FOR SALE**—Goodyear Shoe Repair Outfit; 12-foot bench and stretcher, in first-class working order. Will take \$250 cash. Retiring from repair line. Apply to Geo. W. Warriner, 1243 Bloor street west, Toronto.

**IN TOUCH WITH LEADING FIRMS**

For several years I took a boot and shoe journal while in England, but I must say that the "Shoe and Leather Journal" is far better and more instructive. I have found your publication useful in many ways. It has proved a great help to me, coming to Canada, as I did, a stranger, and through perusing its pages I have been brought in contact with several leading Canadian firms

Sincerely yours,

Mortlach, Sask. R. G. POPE.

**HELPFUL AND INSTRUCTIVE**

I consider the "Shoe and Leather Journal" a most helpful and instructive paper and wish you every success for the year.

H. S. RINGLAND.

71 Spencer Ave., Toronto.

**FINDS IT HELPING HAND**

I have been in the boot and shoe business for 28 years—in the retail, wholesale and traveling game—and I find your Journal a helping hand in my business.

Amherst, N.S. B. B. BLACK.

**LIKES THE JOURNAL VERY MUCH**

Enclosed please find one dollar to renew my subscription to the "Shoe and Leather Journal." I like your paper very much and think it should be in every clerk's hands.

Yours truly,

Windsor, N.S. C. HENRY DIMOCK.

**POPULAR TRAVELER MAKES CHANGE**

A. A. Orendorff, who for the past nine years has been western Ontario representative for the Cook-Fitzgerald Co., of London, and Scott-Chamberlain, Limited, has joined the traveling staff of E. T. Wright & Co., St. Thomas, and will cover his old ground including the city of Toronto. Mr. Orendorff is a London boy, born and bred, in which city he was educated. He has been about nineteen years in the shoe game and his first experience was with Chas. Johnston, who was in the business away back in the late nineties. After spending three years there, he became identified with the J. P. Cook Co., London, and was in their service for seven years, thoroughly learning all departments of the retail business. He then took a position on the road and has made a splendid success. Mr. Orendorff is well liked and well thought of by many members of the trade.

**MEN'S TRADE FEELS THE EFFECT**

The men's trade in all lines has suffered during the past year, as is evidenced by the number of failures in men's wear lines. Ten reverses in furnishing stores in one of the smaller cities recently and a number of embarrassments in the shoe trade are due undoubtedly to the falling off in business in men's apparel. A shoe repair man made the statement the other day that his receipts have been practically cut in two on account of the recruiting movement. The proprietor claims he was doing \$80 a week sometime ago, and is now taking in less than half this sum. He attributes the decrease to so many fellows joining the overseas forces.

**HIGHER PRICES—NO DODGING THEM**

A large number of retailers complain of their inability to get, not only leather laces, but colored laces, in order to match the various shades of high cut kid shoes, which are enjoying such an extensive vogue. New offerings are seen in white, ivory, tan, pearl grey, bronze, bottle green, midnight blue, etc. Of course there are many other names given to particular hues. One dealer recently remarked, as an example of how color nomenclature had gone mad, that there were pearl grey, oyster grey, neutral grey, battleship grey, dove grey and wistaria grey, and perhaps by tomorrow or next week, there may be half a dozen other greys. A demand for white footwear is already setting in very strong and this spring promises to be the best white season known for years. There is a scarcity of white over-gaiters, which are having the call, and among the latest offerings seen in the fashionable shops are white kid over-gaiters. They are enjoying a large sale. Shoe laces of all kinds have recently gone up 25 per cent., and there is an advance in many other lines, not to speak of a growing scarcity of leather, the absence of the cheaper lines of kid, the increase in price of threads, cottons, etc. Yes, prices are going up with a capital U.

"Well I should say they are," remarked a manufacturer of women's shoes this week. "We happen ourselves to be protected in the matter of certain supplies of leather, and when I say protected, I do not mean having a contract with manufacturers to deliver it at such and such a time; I mean having the stock right on hand under the factory roof. We are advancing our prices from 20c. to 50c. a pair, according to the color of the shoe and the stock contained therein. Staples have also taken another decided jump, and men's shoes are being advanced all the way from

25c. to 50c. a pair. Some jobbers report that firms are asking them as high as 60c. more a pair for certain lines in men's fine calf bal, made on English lasts. The question is, where will these ascending prices end up."

G. A. Blachford, of the Blachford Shoe Manufacturing Co., Toronto, who has gone exhaustively into the question of cost, supplies and market conditions, having obtained information from first-hand sources and thoroughly investigating the circumstances, gave valuable data in his speech before Toronto shoe retailers, which will be found on another page. He is not an alarmist—his wish is to make the retailer acquainted with conditions as they actually exist to-day. It is not the desire of shoe manufacturers to advance prices, but when raw materials of every kind keep augmenting in price and getting scarcer all the time, it is necessary to get more for the finished product. The retailer will also have to charge the public more for footwear, and the sooner such a step is made the better. If this is not done, then the difference in cost must be taken out of the stock in the shoe, devitalizing it at the important wearing points. Naturally the majority of people prefer a good article, rather than a cheap, flimsy, trashy one—made to sell at a price.

Much more might be said on this question, but the evidences all around are so plentiful that the retailer must recognize that he cannot any longer sell footwear at the same old prices as he did in the days "befoah de wah," as they say down South.

**NEW FINDINGS FIRM LAUNCHED**

The Canadian Shoe Findings Novelty Co., footwear specialists and dealers in shoe findings, have opened out at No. 2 Trinity Square, Toronto. The manager is Lester Levy, who has been associated with his father, A. Levy, for the past six or seven years, and has managed the findings department as well as being associated with the shoe end. He has secured the Canadian agency for Griffin's dyes and polishes, of New York City, and Carr's English polishes,

LESTER LEVY, TORONTO

of New South Gate, London, as well as other leading agencies. Mr. Levy reports that business has been brisk so far, and everything looks bright for a successful future for the firm.

No. J 384 K  
Women's Welt Boot

**White Delhi Calf, Madison Last**—White Delhi calf, 8-inch full quarter lace, plain toe, regular leather sole, close edge welt, wood covered Cuban heel. AA, 4 to 7; A, 3 to 7; B, 2½ to 7; C, 2½ to 7; D, 2½ to 7.—004.

## 22-FOOT GOODYEAR SHOE REPAIRING OUTFIT

MODEL N

**T**HIS Outfit represents the highest development in shoe repairing machinery, and meets every demand of modern shoe repairing. It embraces all the essential processes for making new shoes from old ones, giving the maximum of equipment and efficiency in the minimum space. The Outfit has the Goodyear Stitching Machine with all its improvements, including a new style steam generator which uses gas or gasolene for generating the steam, and operates automatically, thereby insuring a uniform heat for keeping the wax in proper condition and requiring little attention from the operator. The Edge Trimming Machine has the new feature of the two shafts, being operated by a single belt, and the cutter grinder is attached directly to the main shaft. This arrangement gives better results with less power.

The Buffing and Scouring Machine has a shaft 57 inches long and carries the following equipment:

- |  |                                   |
|--|-----------------------------------|
| 2 Split Bottom Buffing Rolls           | 2 Flat X-Ray Heel Scouring Wheels |
| 2 "C" Shape X-Ray Heel Scouring Wheels | 1 Heel Breast Scouring Wheel      |
| 1 Pin Wheel Pad Complete               |                                   |

A powerful Blower System removes the dust resulting from the trimming, buffing and scouring operations, and is designed to overcome certain objectionable features of other blowers.

The Finishing Machine has a 78-inch shaft which has all the necessary equipment for black or russet work:

- |  |  |
|--|--|
| 2 Corrugated Rubber Shank Finishing Wheels | 1 Corrugated Rubber Heel Finishing Wheel |
| 1 Corrugated Rubber Bottom Finishing Roll  | 2 Shank and Bottom Brushes               |
| 2 Heel Brushes                             | 1 Stitch Cleaning Brush                  |
| 1 Levelling Roll                           | 1 Bead and Wheel                         |

At the end of the Outfit is the Oscillating Edge Setting Machine which is fitted with union irons and in its motions duplicates hand workmen with quicker and better results.

Each of the machines is operated independently by a friction drive pulley, so that it is necessary to use only those machines which the operator may require. This feature means a saving of power.

All the machines are firmly mounted on legs and driven by a countershaft with carefully adjusted bearings, so that the Outfit runs with very little vibration, and is in every way most efficient.

# Survival Value

What is it? Survival Value is the lasting prestige added to all footwear by the affixing of the **Union Stamp**—it is the surviving standard because:

- 1st It is a guarantee of honest footwear, made under the best conditions.**
- 2nd It is a pledge of expert workmanship.**
- 3rd It is the pass-word which opens the sales doors to Union Men everywhere.**
- 4th After the other inducements have all been recited, the conclusive and finishing argument is the UNION STAMP.**

Every shoe bearing the **Union Stamp** retains a sales value of long duration, for no shoe bears the stamp unless it has been produced under the proper conditions and represents honest value.

For mutual profits, better and bigger business, insist upon the official stamp of the **Boot and Shoe Workers' Union**—the only guarantee of Union Footwear.

## Boot and Shoe Workers' Union

## The Military Shoe for Civilian Wear In Lighter Leathers

The most suitable shoe made for the men who require a "military" effect—a last and pattern making a medium

weight, easy fitting shoe that appeals to a very large trade.

There is no box toe. It is made instead with a heavy tip and full vamp. This avoids the binding of a hard box toe and makes it supremely pliable and comfortable.

Made in all leathers, Black and Tan, with the best of drill lining and calf facings. Every lift in the heel is made from selected leather and all made on the Ames-Holden Canadian Army Last, stamped on the sole as here shown.

SUPERIOR  
QUALITY

"LIFE-BUOY"  
RUBBERS

Mr. Retailer:

Fall Placing--If a 'Life-Buoy' salesman has not already called on you showing a full range of samples of our line for Fall Placing, drop a card to our nearest Branch; one of them will be glad to tell you why 'Life-Buoys' are your best purchase for next season. Our styles of lasts show sufficient selection to properly care for all the different shapes of leather shoes without unduly loading your shelves with too many corresponding styles and tying up too much capital unnecessarily.

Spring Sorting--Why not let us send you a sample shipment of 'Life-Buoys' now to test? Get acquainted with our lines, note their superiority in Wearing Quality and Fit, and other brands will, in future, be unable to satisfy your requirements.

Outing Shoes--Have you made ample provision for the first demand you will receive? Your requirements in these lines will undoubtedly be much heavier than usual, owing to their increasing popularity and the ever increasing cost of leather footwear. Let us have your order now so the goods will be on your shelves when you need them.

## A HOPEFUL OUTLOOK FOR SPRING

**February Business Good for the Season—Stocks Well Cleaned Up—  
Looking Forward to Early Spring—Leather Still Climbing—Manufac-  
turers and Fall Samples—Rubber Season Opens Well.**

**F**EBRUARY is the *bête noir* of the retail shoe trade. This year seasonable weather helped out with skating and other outdoor sports, while the snowfall in the latter part of the month cleaned up rubber stocks pretty well. It is the month when the "weary willies" pass in their checks and the quitters get the business "epizootic." It is the month when the live merchant cleans out the rubbish, puts his house in order and gets ready for spring business. And some make good money in the process. Winter sales are reported particularly successful this year and the shelves have thus been prepared for new goods.

The great question is will St. Patrick's Day see the beginning of real spring weather. A start just now will mean a good deal to this season's sales. So far March has partaken more of the nature of the lion rather than the lamb, and it is natural to hope that the old "saw" may be realized in its going out like a lamb. The retail business can use all the sunshine the weather man can wish on it from now until "May Day."

Shoe manufacturers have completed their spring shipments and have their thoughts just now on fall samples. As a rule very few changes are made in fall lines as compared with spring, but with the remarkable condition of the leather market and the prospects of further changes, shoe producers are shifting the burden somewhat as to materials and some decided alterations may be expected, not so much in shapes as in materials. Although there is a tendency towards narrower toes all around, in men's lines comfortable, roomy shapes will prevail. It is too early to speak of spring sorting, but the indications are that this will be brisker than usual owing to the clearing up of stocks in process in the last month or six weeks. Shoe prices have had to be entirely re-modeled in most lines within the past two months.

Leather still maintains its reputation for uncertainty and keeps gradually going up in price from week to week, especially in certain lines of upper stock. Some grades of calf are almost unprocurable and manufacturers are finding it necessary to meet the shortage with other materials. The larger sales of army shoes and leather equipment are clearing up all the available supplies of this class of stock and have made it awkward for manufacturers of certain lines of shoes. In staple goods, however, the supply is equal to the demand, and apart from the regular advance necessitated by the higher cost of raw materials and labour, there is no great pressure.

Rubber manufacturers and jobbers report an active trade in their line. Retailers seem to realize the advantage of ordering their season's requirements under the present market conditions. Already the orders are much larger than they were at this time last year and it is expected that by the end of the month placing orders will be pretty well all in.

The Findings Business has become quite an adjunct to the retail shoe business. We are devoting space in this issue to the encouragement of its development as a source of revenue and trust some who have not hitherto given it any attention may be induced to do so.

# HANDY STOCK-KEEPING SYSTEM FOR RETAILERS

How to Place the Goods on the Shelves and Enter Them on the Stock Book—The Proper Use of Sales Slips—Keeping Tab on Date Each Sale is Made—The Best Method of Handling Cartons and Maintaining the Stock in Ship-Shape Order

By J. T. ARDLEY

I HAVE found by observation that a very large percentage of retail dealers do not have their business systematized. It is a well known fact that system in any business reduces the work and worry one-half. In a few words and as concisely as possible I will explain a system of stock keeping which I adopted some years ago, and year by year I have added new ideas.

First, let us start with marking the shoes. Every shoe which comes into your store should be marked with ink on sole, lining or facing; first the stock number; second, the selling price. If you are marking colored shoes, a mate number on the toe of each boot will prevent your salesman selling mismatched colors in colored shoes. The stock number should appear on each boot to facilitate putting goods on your ledges back into stock after a busy day.

### Stock Cartons on Labels.

Now, then, the shoes are marked and we want to put them on your shelves. I consider stock cartons a very important factor in keeping stock. A uniformity of such cartons adds greatly to the appearance of your store, besides

sizes should be placed at the left in the section, the large sizes to the right. This will avoid any confusion.

### The Stock Book

The use of a stock book in your business is indispensable. It is as valuable in your business as a ledger is to a bank. Turn to its pages and you can tell at a glance how many pairs of any stock number you have in stock, how many you have sold, what sizes are sold out, what sizes to buy, who you bought it from and what it cost you. This information is before you at any minute of the day; its in your stock book, easy to handle, easy of access, in fact, you have all your stock all the time before you. The stock book helps you in buying, because you can turn to its pages and tell how many pairs you sold, consequently you can base your buying on past sales, instead of guessing at it. No matter how good judgment, knowledge of leather and footwear, or memory you may possess, you will make mistakes and occasionally buy lines of goods and sizes which do not sell, and lines of goods and sizes which do not sell is money invested in dead stock. Of course, mistakes will occur, but I claim that the proper and correct use of the stock book will reduce such mistakes to a minimum. It is also a great help in buying sizes, or, as we say, sizing up stock, for if the stock book is correctly kept you do not have to wait to have sizes taken. You can run through your stock book and at a glance can tell what sizes are needed and order accordingly. The stock book should be made to order, in size to suit the volume of your business. I would suggest a stock book of not less than 1,000 pages, to be ruled as shown in illustration No. 1. Next arrange your stock numbers in the following manner:—For men's black boots, number 1 to 149; men's tan boots, 150 to 199; men's oxfords, black, 200 to 249; men's tan oxfords, 250 to 299; men's black slippers, 300 to 349; men's tan slippers, 350 to 399. In like manner lay out your samples for boys', youths' and little gents', women's, misses' and children's. With your stock laid out in this manner, it is very easy for a new clerk to locate your goods, as you can hand him a key to your stock number system on a card and he will soon be at home.

No. 1—A Leaf From the Stock Book

your store always looks well stocked, which leaves a good impression on your customers. If you cannot afford your own stock cartons then have your own labels printed and paste them on carton which shoes originally came in. Print on end of your stock cartons, stock number, size and width, using one-third of space on left hand side of the end of carton, the balance of the space to be used with your name and business address.

### Arrangement of Stock

As far as possible keep the different kinds together; for example, ladies' button boots in McKay, welts and turns in a section by themselves. Arrange your stock on shelves with the lowest priced boot at the bottom and the highest priced nearest the top. In like manner arrange your lines of shoes which you carry in widths, with A at the top, B under A, C under B, D under C, and E under D. In placing twelve pairs of shoes in sizes 2½ to 7 in stock, the small

### How to Enter Your Stock

We have 60 pairs men's box calf lace boots, GW, double sole, to enter. We have decided on say 50 for stock number. We turn to page 50 in stock book and enter the number of pairs in each size in its size column opposite its width. Our next boot to enter is same style in button. All button boots are known in stock by addition of the fraction ½, and other kinds ¼, to any stock number in men's department. Our button boot will be known as 050½. We turn to page 50 in stock book and on lower half of page enter this line, as shown in our illustration No. 1. In like manner we proceed to enter all our stock in the stock book. All whole numbers in ladies' boots, indicate they are lace; button by fraction ½. Misses' and children's in the same way, and with just as much ease.

### Sales Check

We are now ready to make a sale and I would strongly impress upon my hearers the importance of the sales check,

which you cannot do without if you keep a stock book. Your sales check should be ruled for stock number size, width and price. The sale having been made, the salesman enters on his check, stock number, size, width and price sold at. The shoes with check are handed to cashier who retains duplicate check. Every morning the cashier, or bookkeeper, or whoever has this work to do, takes the previous day's sales checks, and checks off all the sizes sold on the stock book, by crossing off the sizes, making the figure 1's an X. See illustration No. 1 for example. If a credit business is done the charge sales are checked off stock book in same manner as cash sales. In case of exchanges we treat the boot and size going out as a new sale, and under this record we write the word "Returned," following with stock number, size and width of boot returned. We then charge stock with pair sold and credit stock with pair returned. Mistakes in keeping of stock book will sometimes occur. Perhaps a mistake will be made by salesman in making out sales check, if so, your parcelling clerk should examine every pair as to stock number, size, and width; this being done, there is very little chance for errors from this source. However, occasionally it is best to take a list of what you have in stock and compare same with stock book.

**Dating Shoes When Sold**

The stamping of your name, address and date on the inside of every pair of shoes as they are sold, is another of the good things which is little used by shoe dealers. Every dealer has had his share of customers who come in and find fault with the wear of his shoes. The customer will probably say: "I bought these shoes here three, four or five weeks ago," as he thinks the case may be, "and now look at them; hadn't they ought to have worn longer than that?" If you are using the dating stamp you look on the inside of shoe and invariably find that instead of four or five weeks it has been so many months that the customer has been wearing the shoes, and in almost every case it is found that the shoes have given a fair amount of wear. If you are not using the dating stamp you have to take the customer's word. If you are using it you have some basis for an argument to convince your customer that you and your shoes are all right and that it is his memory which is playing him the trick. It may save you making an allowance when it is not justified and may save you a good customer. There are many styles of dating stamps in use, the one we use gives all the information at a glance. The face of stamp is about size of a copper, has our name and address on outside rim. The centre has date, month and year. If you prefer a dating system which your customer cannot tell when they were purchased, the following is the simplest. On the face of the stamp have your name, in the center room for three figures. Commence by dating all shoes sold on January 1st by simply the figure 1, all shoes sold on Jan. 2nd by figure 2, and so on for each day of the month for January. Shoes sold on February 1st should be numbered 32; February 2nd, 33; February 3rd, 34; and so on through every day of February and for balance of year. As there are 365 days in a year it is quite easy to calculate what day and month any shoe was sold. For example, a shoe with number 180 was sold on June 29. A small book in the office with each day in the month numbered consecutively from 1 to 365 is all that is necessary. Then, if your customer demurs and claims there must be some mistake somewhere, your book with the same number that is stamped on the lining of the shoe is evidence of the correctness of which any customer must acknowledge.

**How to Handle Your Stock Carton**

The salesman when taking a shoe from the shelves to show a customer should take only one shoe of a pair from the carton, then replace cover on the bottom and put carton

back in its place on the shelves. The stock carton should not be allowed to remain on your ledge even temporarily. It is just as easy to leave carton in its place on the shelf, thereby avoiding the piling up promiscuously of boots, shoes, cartons, lids and tissue paper on your ledges until you can't find mate of shoe sold, or even remove from your first section above ledge another pair of shoes without a grand shove of the debris to the right or left, which usually results in several pairs falling on floor. If the pair of shoes shown is sold then the cover is put on and the carton should be reversed showing the blank end, as shown in figure 1, in illustration No. 2. Give each salesman an equal amount of stock to take care of, whose business it is to replace every pair sold in his section. If the sizes sold cannot be replaced from reserve stock the stock keeper for this section should turn carton upside down with blank end to the front. That

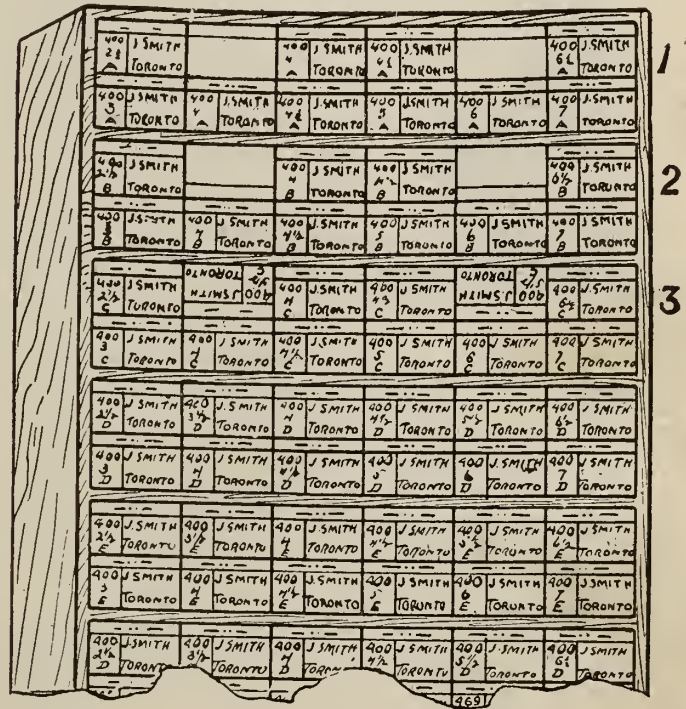

ILLUSTRATION No. 2.

means no sizes in reserve. If stock goods have to be used for window display the carton should remain in stock upside down with label end to the front, as shown in figure 3, in illustration No. 2.

**Keep Merchandise Account**

One more suggestion which comes under the head of "Bookkeeping" rather than "Stock keeping," and I am through. Keep a Merchandise Account in your ledger. Dr. merchandise as received day by day from the firms you do business with, and Cr. this account by the sales at the cost price. This will give you a correct account of stock in store daily and in case of fire you have the proof in black and white of the stock prior to the fire and such evidence no insurance company can dispute.

The man, who scores success in the shoe business today, is the one who watches most closely those two columns which mean his prosperity or his downfall. Those two columns are Profit and Loss. Without an effective and dependable stock keeping system, the average shoe dealer is like a ship without a rudder, liable to drift into any port. While the system which I have outlined, may not be suitable for the business of all men in the trade, still each retailer should have some method of knowing what stock he has on hand, what lines have sold the most freely, etc.

# HOW WHOLESALER PROTECTS RETAILER

**Makes Every One Produce an Order—Those Who Have No Direct Claim for Consideration Are Charged Twenty Per Cent. Extra Which Goes to a Patriotic Fund—The Way Certain Firms in Other Lines Make Money Out of Some Bold Individuals**

**B**ARGAINS? Yes, they think they are getting them, but they certainly are not, and they will find this out some day," remarked a leading eastern wholesale shoeman. "Any persons who come in here having some moral or obligatory claim upon the house and ask for a pair of shoes,

why we charge them 20% over our regular price. We are creating a fund with this margin and intend to hand the proceeds over to the Patriotic organization. We are determined to stop such private persons asking for footwear. The retail shoeman is our legitimate customer, and we do not want any public patronage. It is a nuisance in every way—terrible nuisance.

"Of course, no matter how rigid a rule you may enforce—no matter how strict your instructions may be to your

staff or the classes that you eliminate, there are always a few former travelers, former dealers, ex-employees, relatives, etc., who think they have a perfect right from past associations or patronage to get their shoes wholesale. Well, we tack on 20%, and they will find in time that their footwear is costing them just as much as it would by buying from the retailer. By this statement I mean if such a caller would watch for snaps and buy during the mid-season sales, he would get his footwear cheaper than by coming down here and bothering us.

## Some Exceptions in Every Case

"Now, of course, on reading this, some retailer will flare up and ask what we mean by letting anybody outside the trade, except those with a written order, have shoes at all. Well, let him put himself in our shoes, so to speak, for a few moments, and he will be able to see matters from a different angle. There is the man who has done our carting for seven years. His wife and family naturally think they have a right to get their shoes at wholesale prices. Then there is the fellow who attends to our furnace, the plumber, the electrician, the carpenter, the night watchman and others in different lines, who do work for us throughout the year. They give us good service, and show a willingness to come at any hour to oblige us.

"Now, if the wives and families of these men want shoes from us, we cannot do otherwise than grant this concession. But, as I told you, anybody else who happens to know a traveler, the wife of a traveler, has a nodding acquaintance with one of our sales staff, or has made a bow to our office boy, and thinks by reason of such friendship, be it intimate or remote, he can buy shoes here at wholesale prices, he is grandly mistaken, for we turn him down flat.

## Make Them Pay for Privilege

"Ten years ago things were different. The system was more lax, and the retailers themselves did not seek to protect their own interests as they do to-day. Now, I want to tell you that no others get shoes here, except those having a written order from a retailer. We charge clerks, bookkeepers, and warehousemen from wholesale establishments in the hat line, the clothing line, the neckwear line, the millinery line, the ready-to-wear line, etc., an advance of

twenty per cent. The system of giving an employee an order, and sending him to some other wholesale house for wearing apparel or household effects is a pernicious one.

"Now we do not give any of our employes such an order on any wholesale establishment, no matter in what line these firms deal. Of course, some of our men do not like it, but we do not believe in such a plan, and when employes from other houses come here for shoes, we tack 20% on regular wholesale prices, as I have told you, and then give that to the Patriotic Fund. The only way you can tax some people is indirectly, and the only way they give to the Patriotic Fund is through an extra levy.

## How Some Are Deluded

"You know, Pitt, the Prime Minister of England, once said that you could tax indirectly the shirt off a British workman's back and he would never murmur. But impose a direct taxation, and he would raise strenuous protest. The same is true largely of all classes of people. Yes, I know that certain employes think that they are getting things at a reduction, particularly when they go to a jewelry establishment, a china establishment, an electric supply house, fur company, carpet or curtain house, hat establishment, dress materials firm, etc., but they are often paying more than they would have done if they obtained these through regular retail channels.

"How do I know, you ask. Well it is a well known fact that a certain jewelry house in this city makes a good deal of money by private parties going there to buy articles at wholesale prices, and getting 'stung.' This house, which has become notorious, as it were, for encouraging trade with the public, never refuses anybody. You are politely waited upon and conducted to a neat, well-arranged sample room, and shown what purports to be the cost prices to retailers. Unless you have some inside knowledge of the game, you believe you are the subject of considerable condescension on the part of this establishment, and that they are doing you a particular favor, but remember that all jewelry retailers obtain a substantial discount from this so-called price list. You do not.

## The Retailer is Legitimate Medium

"Why, a friend of mine, who is in another line of business, and happens to know a little about the china trade, took one of his relatives over to a certain establishment a few weeks ago, as a Dresden china dinner set was desired. My friend and his brother-in-law were cordially received, and being escorted to the sample room, picked out a very nice set and asked the price. The girl in attendance said:—'Oh yes, we will give it to you, at our regular list figure,' and she showed the printed sheet. My friend, however, was not to be caught unawares and said:—'Yes, that is your printed list, but the trade gets fifty and five off.' The girl blushed to the roots of her hair, and said: 'Just wait a moment,' and left the room.

"After consulting with the head of the house, she returned in a few moments and said:—'We will give you 50% off.' So you see that people who go there, knowing nothing about trade discounts or practices are really paying more for certain articles than they would to the retailer, for the latter, except in certain lines, does not make 50 or 55% on his goods. In other words, if this visitor had gone alone he would have been obliged to pay more

*(Continued on page 45)*

# SIMPLIFIED CARD-WRITING FOR THE SHOEMAN

Any Person Who is a Fairly Good Penman Can Learn to Produce Small Plain Cards—The Necessary Equipment to Begin—Two Things Essential for Show Cards are Legibility and Neatness—Some Items That are of Pressing Importance

By RALPH WILLIAMS

**T**HE problem of securing novelty show card effects for Easter is easily solved in the store where a show card writer is continuously employed. Any man or woman who has so far progressed in the art of cardwriting as to be capable of holding a position in which the production of show cards is the main thing, can be safely trusted to evolve any novelty effects required. If such a person cannot originate he can adapt and will know where to look for his ideas.

But for the small store where the show cards used are purchased from a free-lance card-writer, or produced on the premises by a clerk with whom such work is a side line, the problem is more acute.

Buying show cards from the sign-writer is apt to prove so expensive that the number of cards to be used is kept down to the absolute minimum.

## The Handy Clerk

On the other hand, in the store where one of the clerks writes an occasional card, the difficulties encountered by the lack of skill and the absence of proper brushes, inks and carbboards, quite often combine to produce a similar result.

The chief difficulties, however, that confront the amateur card-writer, are, like many other difficulties in other matters, largely born of the imagination.

## Good Penman Easily Learns

There is nothing really difficult about the simple forms of cardwriting. Any person who is a fairly good penman can soon learn to produce small, plain cards, ranging from a small price ticket up to as large as half a sheet, 11 by 14 inches. It is not suggested that one can master the whole art of cardwriting in a few days, but that a person who is able to write neatly can quickly learn to print neatly on small size cards and, with more and more practice, to embellish the cards with simple novelty touches.

## Two Requisites Needed

To begin with it should be remembered that the two absolutely essential things for a show card are: legibility and neatness. Any other qualities a show card may possess are subordinate to these and can, if necessary, be dispensed with. You have something to say on the card and that something is of the first importance. Neatness is necessary to keep up the general good appearance of the window. Ornament, coloring, novel airbrush shaded effects, fancy mat boards, etc., are valuable if they can be had conveniently and economically, but fancy cards, or even the larger size plain cards lettered in black on white card can be produced only by a skilled card writer who keeps in practice by working at it every

day. For the amateur cardwriter, who wishes to acquire sufficient skill to turn out small, neat cards and tickets, the equipment needed will be very simple.

## Necessary Equipment Small

Procure a few broad lettering pens (Soennecken) numbers 1½, 3 and 4. Get also a bottle of each of black, red, blue and green show card inks, a five cent camel's hair brush (for filling-in purposes) a straight-edge, ruler, pot of paste and a pair of heavy, well-sharpened scissors capable of cutting toughish card.

With this equipment one is ready to go to work and can produce very creditable cards up to 11 by 14 inches in size and can give his work a touch of novelty by varying the color of the ink used, and by utilizing odd pieces of colored card and lettering them with a good contrasting ink.

## Interest of the Message

It is not to be expected that the efforts of the beginner will possess the snap and finish observable in the work of a skilled professional cardwriter. They do not need to have such a finish. The person who looks in the store window is apt to be more interested in the message conveyed by the card than in its execution. So long as the lettering is legible and neatly spaced, and is free from crude attempts at florid ornament, it will do its work, that is—say what it has to say without marring in the least degree the general tone of the window display.

## The Alphabet

Fig. 1 shows a simple, one-stroke italic alphabet that should be mastered very readily by a fair penman as the letters have a handwriting slant and are very much akin in construction. Copy this alphabet, using a No. 3 pen. Follow the method of construction indicated by small arrows, but do not be too slavish about it.

If you can shape up a letter in a way more natural

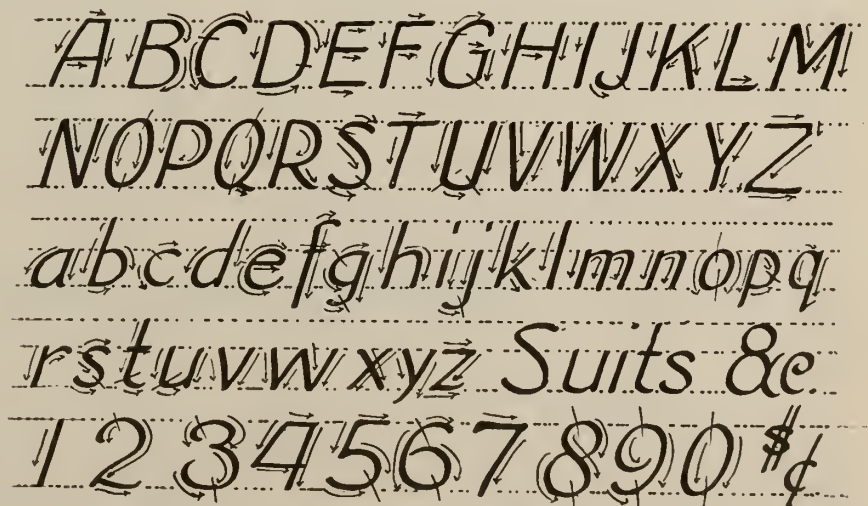

Figure 1

to your hand than by following the method given, do so. The manner is of small importance, as the object is to print letters neatly and quickly. But if your hand shows no natural knack in letter construction, follow the one given,—it has been in practical use for a good many years by the writer.

#### How to Begin Practice

Take a sheet of any paper or card that is not too spongy or soft for ordinary writing, but avoid the highly glazed card used on boxes. Mark off one inch from the top, at both ends of the sheet. Then, commencing from these points, mark off five half inch spaces. Take your straight edge and connect the points marked, making five sets of parallel lines as indicated by the dotted lines on Fig. 1. On the third and fourth lines mark off spaces five-sixteenths of an

FIG. 2

inch from the bottom line to hold the lower case letters, as shown.

Now you are ready to go ahead. Get a soft pencil, nicely pointed, and lightly sketch in the letters. Do not attempt to outline, this is a single-stroke letter. Your pencil work should not be labored, as its only purpose is to get the letters placed right and slanting evenly.

When you have all five lines sketched in, take your black show-card ink and thin down a portion of it into an empty wide-necked bottle until it flows nicely off the pen, at about the same consistency as a good fluid writing ink. To avoid blotting the letters, shake off the surplus ink after each dip by lightly rattling the pen point in the neck of the bottle. This will give you the right amount of ink on the pen to work with.

After practising this alphabet and the numerals about a dozen times, begin to form the letters into words, as a high degree of perfection in the formation of an individual letter is of much less importance than good spacing and arrangement.

Now, suppose the lesson has been well practised, a

dozen copies of the alphabet made and two or three sheets of paper filled up with words. A card for the window may now be attempted.

Let us take the wording shown in Fig. 2. This is done on a card 7 by 10 inches. First cut your card to the required size after squaring it up as well as possible and taking care to have the edges cut clean. Then measure an inch and three-quarters from the top and lay out the parallel guide lines as in the alphabet lesson. When this is done sketch the wording in lightly with a soft pencil, taking particular care to get the margin fairly even all the way around except at the bottom, where it should be a little wider. The card is now ready for inking with a number three Soennecken pen. A goose or turkey quill pen cut to the right size is a good substitute for the Soennecken pen. The price is made heavier by double stroking.

This is a small card, but plenty large enough where several others are displayed in the same window. Larger cards require a large pen and sometimes an outline letter to be filled in with the brush. But for the beginner and the amateur this small letter style will be found exceedingly useful. It is easy to learn, more especially by those who can write a good hand, and a few days' practice with the alphabet and word writing will enable one to turn out a very passable card for everyday purposes.

#### A MAN OF SHOES

(See Front Cover)

**P**HILIP POCOCK, of London, Ontario, has crossed the meridian of life and yet forty of his busy years have been practically spent in the shoe business. He is one of the few men in the trade to-day who first saw the necessity of going to the fountain head for shoe ideas and shoe values and as early as the late seventies made himself familiar with the product of Montreal and Quebec shoe factories in his line.

He graduated from the retail into the wholesale business some fifteen years later, and since that time the whole of western Ontario and later the far west has been his parish. He knows shoes from A to Z, and can shut his eyes practically and tell what one is worth. That he is a jobber and not a manufacturer is his pride. He is willing to let the other fellow do the worrying about details of manufacture and is content to bring to bear upon the results his long experience as to what the people want and what they will pay for it.

He has made a humping success of the shoe business, but has not let shoes or even dollars so becloud his vision as to lose sight of his duty to his day and generation. "Phil" is a "big noise" in his native city and is identified with other commercial interests besides the London Shoe Co. and the Independent Rubber Co., both of which benefit so largely by his business acumen.

But his great hobby is municipal enterprise. He was for years on the Board of Aldermen for the city of London and chairman of several of the council's most important committees. As Water Commissioner he has done the city excellent service as well as in his position as one of the Railway Commissioners.

He is also identified with many of London's philanthropic and patriotic enterprises and has been mentioned as London's coming chief magistrate. He is a genial, wholesouled, energetic business man who does not look the several years over the half century mark that have dealt so kindly with him.

# 1916 RUBBERS 1917

We stock the well-known makes of the Independent Rubber Co., Limited—a house whose product has established a firm reputation for quality and value. The brands are

“Kant Krack” “Dainty Mode”  
“Royal” “Bull Dog”  
“Veribest” “Dreadnaught”

Our travelers are now on the road with samples, and a complete sample range can be seen at our warehouse.

When placing rubber footwear orders, see the London Shoe salesmen for values that are second to none.

Hamilton, Canada

# STRAY SHOTS FROM SOLOMON

Blaming the Devil is as old as Eden. There are people who run into his arms and expect sympathy when they get caught. This walking into evil and making excuses to the Almighty and one's fellows is a common game with those who haven't sense or sand enough to keep in a straight track. "Remove thy foot from evil." You don't have to sort with blacklegs or walk in the way of crooked men. There are men who pray every day "lead us not into temptation" and walk into the first puddle they come across. There is an idea abroad that the Almighty takes people by the collar and pulls them out of saloons and other places where they oughtn't to go. "Remove thy foot from evil." Take the other side of the street. Go the other way. Quit the thing you know keeps you from being a man and you will get all the help you need when Satan or anyone else comes along and tries to pull you the other way.

Keep your tongue off your neighbor. Do this for your own good as well as his. No man who talks uncharitably about his fellow is ever as good himself after he has set his tongue loose. There is something about back-biting that demeans a man, and every one of us has had the feeling of wanting to crawl into a hole after we have caught ourselves talking about someone whose ways or words we did not approve. "He that uttereth a slander is a fool." Why should you meddle with other people's affairs? Are you so good yourself, that you can cast a stone at some fellow who has made a slip or who even walks brazenly in the "path of the wicked?" Nine times out of ten the tendency to talk about others comes from a consciousness that a man's own inside or outside is not as clean as it might be. When you hear a man bemoaning the frailties of his fellows you can put it down that he is sprung in the knees morally himself.

The war has brought home to us all some very homely and humiliating truths. There is an awful waste in modern life and war conditions have brought to notice the unnecessary and wicked extravagance of even the best regulated lives. The first great waste to have the spotlight thrown upon it is the liquor habit. The war has done what years of argument seemed powerless to accomplish—shown that liquor drinking is one of the greatest foes not only to the social progress but to sound, national prosperity. Then it has also been shown that the waste in food and clothing is more than sufficient not only to maintain immense armies in the field but support the myriads here at home who have not enough to keep them from starving or freezing to death. If nothing else came of the war and national economy in these respects was the results, the scourge would not have been in vain. "The drunkard and glutton shall come to poverty" and the nations that waste their resources shall come to similar disaster.

You have forged the chains that hold you fast. What is the use of whining about temptations and wanting to do the clean thing? You have done the dirty thing so long thinking you could quit when you wanted to and now you find out that you are not your own boss. "The wicked shall be holden with the cords of his sins." You can remember when you would have cut off your right hand before you would lie but now it is as natural for you to be crooked mouthed as it was once to be truthful. There was a time when you wouldn't do a sharp or shady trick and when you said to yourself you would rather be poor as Job's turkey than make a dollar that was not clean. You would hate to tell now how much of your bank account represents what you once despised and abhorred. You never expected to see the day when you would joke about things you once thought were as essential as life. You have tied yourself up so with habits of thought and life that you don't know yourself.

Money is all right in its place, but when it gets out of it it plays the devil with men. It is no wonder that Paul said "the love of money is the root of all evil." It has damned more men for time and eternity than any other one thing on earth. When it gets a good grip on a fellow he is pretty well done for. It will make a thief out of an honest man, a churl out of the kindest neighbor, and a blood-thirsty villain out of a good natured comrade. It has been at the bottom of every crime in the category. There are men we know who have sold their souls and sent their families to ruin because they could not shake off the spell of the dollar. "He that is greedy of gain troubleth his own house." Once the "grab germ" gets hold of a man he has about as much chance of becoming a good father or a useful citizen as a mud turtle has of becoming an eagle. And the worst of it is that some men make the excuse that their worship of the "golden image" is in the interest of their families.

A man's sin may not find him out as far as its being actually brought home to him, but no man can go on living an evil life and not be found out. Crookedness is like the smallpox; it is bound to come out. There are fellows who think they have managed to hide their shady ways pretty well from those around them and as far as putting a finger on any definite act no one would dare to accuse them of wrong doing. But people shrug their shoulders and say, "He may be all right but I have no confidence in him." There is such a thing as a man's character speaking from under his skin. There is a process going on within us all which makes us unconsciously but surely the product of our thoughts and acts, and whether we open our lips or not we are usually known for what we are. "He that perverteth his ways shall be known."

## PLEASURE AND PROFITS IN SELLING FINDINGS

The Outlay is Small, the Turnover Frequent and the Returns Satisfactory—Well Equipped Findings Department Requires But Little Room, Attracts People to the Store and Means No Extra Overhead Expenditure—Co-operation of Sales Staff

“YES, there is both pleasure and profit in selling findings. If you do not believe it, ask the shoe man who has a good findings department. He will tell you that the profits from these small articles go a long way toward meeting the many overhead expenses connected with his business. They help pay such overhead costs as help, heat, light, insurance, delivery, taxes, rent, etc. In fact, more than one enterprising dealer avers that he makes enough out of the shoe findings end to pay his rent.”

When the term “findings” is used, it practically means everything outside of shoes and hosiery that is sold in the store.

“Yes,” said one footwear merchant to the *SHOE AND LEATHER JOURNAL*, “I never had my eyes opened to the possibilities of findings, as I always had looked upon such things as a kind of a nuisance or annoyance.

Of course, I kept shoe laces, polishes, brushes and insoles at the back end of the shop. Some of them were on a shelf, and the rest deposited in a big drawer. People would come in and ask me if I had such and such an article, I would fuss around and perhaps I had it, but more frequently I had not. There was nothing in the shop to suggest that I was after this line of trade.

### Had His Eyes Opened at Last

“One day, however, a traveller for a findings house, who knew me pretty well, came in and told me that he was going to place an order for a general line of findings in my town, that there was good money in the department, and if I wanted to get in on the game, he would give me the first chance. He mentioned the names of two or three other

fellows in neighboring places—not as large as our burg—who were doing handsomely on \$100 or \$200 investments, without any extra overhead outlay. Here was a chance to make some more money, turn the goods over several times, and all at a small expenditure. The traveller told me quite frankly that notwithstanding the advance in prices, the average profit in the findings department was much ahead of that on the average line of shoes. He said that of course on novelty footwear, many dealers made from 50 to 100% at the outset, but that when staples, dead stock, special sales and everything were taken into consideration, the average margin of a shoeman was not more than from 20 to 25%. In fact many dealers did not make that much. In the findings, though, things were different. Nothing went out of style, except shoe buckles and laces. Finally I grew so interested that I asked him several questions in regard to the profits and cost. This is what he told me—the figures mean a fair average profit and may be greater with some shoemen and less with others.

“The whole range of dealers being taken into consideration, from the large metropolitan bootery to the village shop, the average margin is:—

Polishes.....	33½%
Dressings.....	50%
Laces.....	25 to 33%
Arch Supports.....	100 to 125%
Shoe Trees.....	75 to 100%
Buckles.....	50 to 75%
Brushes.....	50%
Polishing Outfits.....	33 to 50%
Insoles.....	33%
Rubber Heels.....	25 to 33%
Heel Pads.....	50%
Bunion Protectors.....	35 to 50%
Over Gaiters.....	33 to 50%
Soft Soles.....	33 to 50%
Boudoir Slippers.....	30 to 40%
Skate Straps.....	50%
Ankle Supports.....	40 to 60%

“Perhaps some one may ask why prices are not quoted in all the articles mentioned. This, of course, it would be

### MANUFACTURERS

90 Richmond Street West, Toronto, Ont.

impossible to furnish as various firms have had to change their figures of late, owing to the scarcity of leather, dyes, supplies, etc. Then, different houses quote special prices on both gross and great gross lots, and, by the way, these change often and new brands are being constantly introduced, which are offered at the outset at a less figure than the old-established, widely-advertised, nationally-known productions."

#### Carry Something in All Lines

The enterprising retailer should carry practically everything in findings, not a large stock of any one article, but half a dozen or a dozen articles of every kind, so that he can catch the nimble 5, 10, 25 and 50 cent pieces, the same as the variety or notion stores. There is little danger of a findings stock, if it is carefully watched, growing shop worn, or getting out of style. In fact, to have real pleasure in selling findings, the retailer should put in a silent salesman showcase. If you can only afford one in your store, place it directly across the entrance of your establishment, a few feet back of the doorway. If you can afford two show cases, it is well to set them diagonally—one on each side of the entrance, and if your stock cannot be contained in these display containers, glassed-in shelves are very helpful in the matter of surplus goods.

Now one or two showcases do not take up very much room, but when you get a showcase, do not purchase a cheap, second-hand affair, or one that did duty a quarter of a century ago. For thirty to forty dollars, you can secure a handsomely fitted show case, quarter-cut oak, from six to ten feet in length, complete with glass sides and shelves, mirrored doors and plated adjustable brackets. This will attract instant attention if the contents are tastefully arranged. Often when persons are waiting for a friend to be fitted or to be served themselves, they will wander leisurely around the store and their attention is naturally attracted toward the goods displayed in the showcase. This will induce them to buy and increase gross sales and also net profits.

#### Specialize in Your Findings Branch

Many of the leading shoe stores in the down town section of large cities, have separate findings departments, which are generally in charge of a lady, who possibly has the sale of the hosiery, garters and other accessories in connection therewith. This department pays, and pays well, but in the ordinary small city or town shoe store, the volume of business to be done in findings may not prove sufficient to warrant the placing of a special clerk in full charge of the department, and it is for the average shoeman that these pointers are presented, and timely suggestions offered.

It is better, however, as already said, to keep the department separate, and let one or two clerks have supervision over this section. A careful record should be kept of all findings, so that in the matter of stock, there is no running short on certain lines.

"Yes," remarked a leading Montreal shoeman, "we have our findings display in two cases, one on either side as you enter the store, and back of them we have wall cases, with sliding panels. You will notice that we have a good selection of soft soles, over-gaiters, and leggings, boudoir slippers and a few lines of fancy evening footwear, judiciously intermingled with our findings display, in order to give it variety and picturesqueness. Until the war broke out, we had a young lady in charge of the findings department, all the time. She was a bright, cheerful person, and being in front of the store, many got to know her and became very much interested in the department. Often people when coming out, would see something in the cases that would catch their eye, and they made a purchase. Of course, now that the volume of trade has fallen off somewhat, owing to so many young men leaving for the front (for they were

among our very best customers), it requires only part time of one of our assistants, but we are well pleased with the results. We find that it is a trade worth getting after, especially as most of the articles are easily handled and sales quickly made. There is no fitting, no argument over widths and sizes and no long discussion on styles, lasts, shapes, height of heels, thickness of soles, etc., which often enter into the sale of a shoe, and consume a lot of time. We find that findings are the easiest articles to sell, but you must give the department some sort of decent treatment."

#### Draw People to Your Store

Not only in financial returns are findings worth while, but they are one of the greatest feeders that a shoe store can have. They induce people to come to your establishment, and when once persons get the habit of dropping in on you for small things—as dressings—for every kind of colored leather that is now on the market has a special preparation—polishes, rubber heels, shoe trees, insoles, heel treads, over gaiters, leggings, arch supports, brushes, laces, fancy button hooks, ice creepers, heel plates, fancy buttons, insoles, ankle supports, skate straps, bunion protectors, corn plasters, etc., they are going to come for their shoes as well, for we all are largely creatures of habit.

The shoeman or any enterprising salesman does not lack opportunity to exercise his talents with such materials to work on. Naturally the sale of findings can be developed by initiative, and executive ability, and several employers judge the selling talent of a clerk by the amount of business he works up for the findings department. Findings are largely an index of the initiative and foresight of any salesman, who are often rewarded according to their showing in this department.

#### Good Arrangement for Small Store

Another shoeman doing business in a western Ontario city has solved the problem of findings in an economical and at the same time, effective manner. As one enters the store, there is a large semi-circular showcase at the right. In this are displayed the various articles, such as are usually found in the well-equipped smallwares department, for this would seem to be an appropriate name. A young lady is in charge and she also takes all orders for shoe repairs, and has supervision over the sales slips, the cash register and the out-going parcels, although she does not do the parcelling, this being attended to by either the porter or the messenger.

The main thing is to keep the profits in findings up and see that trade is directed in its proper channels. At the recent banquet of the Toronto Shoe Retailers' Association, in replying to the toast of Findings, one of the principal speakers stated that in New York and other large cities across the border the druggists were starting to handle polishes, dressings, pastes, shoe horns, shoe buckles, fancy button hooks, etc. He deprecated such a tendency, and thought the drug store (which seemed to want to sell anything and everything on earth) should restrict its merchandising to lines that people always associated with footwear establishment. Speaking on behalf of the findings firms of Canada, he expressed the opinion that they would do all in their power to keep the findings business in the hands of the shoe dealer. It certainly belonged to him, and there was no reason why prices should be cut. Every time that the figure was cut to 7½c for a paste, and 17c for a dressing, the shoeman was really clipping off all his legitimate profit and undermining the business, which, as yet, had not been interfered with to any extent by bargain sales, snaps, cut rate men or other slaughterers of legitimate prices.

#### Splendid Profits and Quick Turnover

"Keep up the findings end of your business," he added, "the profits are satisfactory, the turnover is frequent, the

# HOW TO BOOST YOUR BUSINESS IN FINDINGS

**New Customers May Be Brought In Every Day—Stimulating the Clerks in Making Small Goods Sales—The Power of Suggestion and Initiative—One Dealer Gives Findings Premiums With Purchases—The Value of Attractive Displays**

**T**HERE is little use in having a findings department if it is not boosted. No matter how attractive it is or how well assorted the stock, the turn-over will never reach its maximum possibilities unless some incentive is given the sales force, or the public some suggestions regarding

what you have in the way of shoe and pedal accessories. Of course, a certain amount of trade will be done, but it will never attain its potentialities unless modern methods and progressive schemes are adopted.

Goods that are well bought sell themselves, to a certain extent, but the majority of things in this world are disposed of through the presentation of strong

“—one new customer—”

selling arguments, convincing reasons and forceful appeals. If it were not for live, aggressive methods, how many pianos, gramophones, motor boats, motorcycles, life and casualty insurance policies, vacuum cleaners, electric stoves, automobiles, works of classical authors, encyclopaedias, unabridged dictionaries, and many other things, would be sold? It is the same with findings. There must be push, energy and system behind this department. All bright shoemen recognize this, and their motto is “Keep the sale of findings up,” for on these lines the profits are comfortable, being all the way from 33 up to 100 per cent. and over, in spite of recent advances which have taken place, due to the scarcity of wools, cottons, dyes, leather and other raw materials.

## Make the Grouping Effective

Do you ever display findings in your window? Do you ever make a special exhibit of laces, dressings, polishing outfits, rubber heels, shoe trees, brushes, buckles, arch supports, insoles, tap soles, and many other things. By this is not meant a miscellaneous collection, but an artistic and effective grouping of such articles in a quantity and variety that will arouse the attention of the passer-by and convert interest into desire, translate desire into action, or, in other words, a purchase.

Now, there is not a shoe findings house or a manufacturer of rubber heels, arch supports, shoe trees, pastes, polishes, or any other kindred lines, who will not co-operate with the retailer, whole-heartedly, in putting forth a special effort to assist him in the expansion of his trade. It is not necessary to obtain a great big extra stock for display purposes, as in many lines, especially those that are cartoned, “dummies” will answer.

The tobacconist, when he makes a huge display of a nationally-known brand of cigarettes, does not fill his window with several hundred genuine packages of the kind advertised. He obtains dummy packages from the manufacturer. These answer the purpose just as well, and the public does not know but what the large exhibit is a bona fide production of the real thing.

Enterprising shoe retailers should display laces, shoe trees or polishing outfits in a window devoted particularly to men's shoes, or if the space is taken up with the presentation of pumps, evening slippers and other low-cuts, valuable selling aid may be given the findings department by a neat showing of shoe buckles or ornaments in gold, silver, steel, oxydized, jet, bone, ivory, fibre, enamel, brilliants, etc. There are many occasions when, in showing certain lines of

white or colored footwear, dressings, laces, cleaning outfits, etc., may be profitably employed. In fact, to sell findings, in large variety and volume, they must be closely linked up and associated with the sale of shoes.

## Do Not Despise Little Things

It does not pay to despise the small five, ten, fifteen and twenty-five cent sales. It must be remembered that the nickle and the dime founded the greatest system of variety stores in America and built the tallest structure on the continent—the Woolworth building in New York. Little leaks around the store reduce the amount of your profits and have to be watched and checked, so it is often the small coins which bulk large in the day's or week's receipts. The news agent, the cigar dispenser, the stationery dealer and the candyman will all tell you that “many nickles make a muckle.”

In advertising, the retailer should also keep his findings branch before the public, by either mentioning it incidentally or now and then devoting a space exclusively to this branch of the business. If there is any novelty or new convenience placed on the market it is well for the dealer to let the public know about it, either through the medium of the press or in his booklets, folders or dodgers. Publicity attracts and announcements carefully supervised and systematically undertaken pay the shoeman in the findings department correspondingly as well as in telling the public of his new styles in spring or fall foot toggery.

## Getting Your Staff Interested

Many other plans might be suggested for boosting the findings end, such as offering a prize each month among the members of the sales force, to the one having the largest amount credited on his sales slip in the matter of findings. Some stores allow a p. m. of ten to twenty per cent. in the sale of these goods, and still others see that one clerk on the staff devotes special attention to this section for a stated period. Thus they will take turns and become thoroughly acquainted with the merit, comfort and use of the many articles.

There are many ways in which, by the power of suggestion, observation and timely mention, clerks can introduce the selling of findings to a customer. A woman will ask how she can keep white shoes clean, or where she can obtain an extra pair of laces to match the many colors that are now in vogue in shoes, or she likes a certain style of pump or slipper, but the ornament does not appeal to her, or how she can keep her shoes in good shape, or walk comfortably on the granolithic pavement, or overcome tired, aching feet. It is at such times that the clerk can introduce rubber heels, heel treads, shoe trees, ornaments, buckles, bows, polishes, etc. In fact, it has been stated that one out of every three customer's is eligible for something in the shoe findings line, and in these intimations there have not been included foot ailments, such as corns, bunions, callouses, flat foot, fallen arch, chilblains. What about the development of business in foot powder, foot rests, arch supports, ankle supports, heel treads, bunion protectors, foot salves and other orthopedic lines?

One leading dealer offers on a certain day of the month to present every purchaser of a pair of shoes with a bottle of dressing, a tin of polish, a shoe brush, or rubber heels, just to attract attention to his findings department, located at the front of the store. It works out splendidly.

# A Dressing for Every Shoe

# Every Kind of Shoe Dressing

**Gold Leaf Shoe Dressing**

Especially adapted for Ladies' and Children's shoes, produces the blackest and most brilliant shine of any self-shining dressing made. Contains nothing injurious and is the only dressing of its kind that contains oil to soften and preserve the leather. Makes old shoes look like new, used largely in shoe factories for finishing new work.

**Nu-Shine Shoe Polish**

A very black water-proof polish, produces a brilliant shine. Will not freeze, can ship any time.

**Kroblak Shoe Dressing**

A self-shining liquid same quality as Gold Leaf, put up in our special patented bottle, holding 4½ ounces, handsomely labelled, fitted with fancy cork top. Makes an ideal 15c. line. Packed three dozen in wooden case.

**Sunbeam Oil Dressing**

Our Sunbeam Oil Dressing is recognized wherever sold as being the best quality for a ten cent line. Put up in bottles with wood cork top, nicely cartoned. Packed in one dozen, three dozen and gross cases.

**Staon White No. 25**

A blue white liquid dressing for canvas shoes, military belts, etc. Easily applied. Dries quickly. Will not turn yellow or rub off. Put up in 6 ounce bottles with swab, nicely labelled, enclosed in a handsome carton.

**Arctic Dubbin**

A waterproof paste specially prepared from rubber and oils. Leaves the leather soft and pliable and keeps the shoe more waterproof than any other make. Put up in Tan, two sizes. Packed three dozen to case.

**Daddy Combination -- All Colors's**

We were the originators of the combination package in Canada, and although our competitors have fallen into line, yet there is really only one combination and that is the "Daddy of 'em all."

The liquid removes all dirt and restores the leather to its original color. The paste is made from a special wax so blended with oils as to leave a lasting shine that is waterproof.

## Domestic Specialty Co., Limited, Hamilton, Ont.

FOUNDED A.D. 1865

— Half a —  
Century  
In Findings

A Record of  
Service and  
Usefulness

## Canada's Oldest Findings House

IT is over fifty years since the Jacobi business was established in Toronto. The founder of the concern, the late Philip Jacobi, was in the retail shoe business for six or seven years previous to 1861, when he bought out the Muldoon findings business, then situated in a store on the east side of Yonge street, two doors south of Adelaide street, opposite to where the old Jesse Ketchum premises once stood.

The American war had just begun and the peculiar financial and trade conditions that prevailed made it possible to buy goods in New York, which was then the shoe and leather emporium of the continent, to considerable advantage. Owing to the depreciation of American currency, one could buy with English or Canadian money fully half as much again as in ordinary times for the same outlay.

The business prospered from the start and found itself growing steadily in the confidence and patronage of the shoe trade, which at that time was largely "custom," there being comparatively few shoe fac-

ories within the borders of Canada. Three years later, or in 1864, the business was removed to No. 90 Yonge street, on the opposite side and next to the old Woodbine Hotel. Here it was located for ten years, during which time it began to take on that pro-

gressiveness that has since kept Jacobi's in the front rank of the findings business. The proprietor made a thorough study of the needs of the shoe trade and visited not only the American, but English and foreign markets to procure at lowest cost the goods that were in most popular demand.

It was during this time that the establishment began to develop its wholesale trade. Buying as it did, direct from the manufacturers and paying spot cash for all its requirements, it was able to place before its customers goods of such quality and in such quantity as

to afford its customers compelling inducements. In many cases the buying was so thorough that shoe manufacturers could purchase more cheaply from Jacobi's than they could import direct.

After ten years of marked development

THE LATE PHILIP JACOBI

and growth, the premises on Yonge street were found inadequate and the concern removed to the wholesale district. A building was purchased at 5 Wellington street east, in 1874, and the business established in new and more commodious quarters.

From that day forward the history of the business has been a record of continued achievement. Here the effort was commenced to extend the business beyond the confines of the city of Toronto which, even at that time, afforded ample scope for the enterprise, with both the retail and wholesale shoe trade. Quite a number of prosperous shoe factories had been established and these, as well as the growing retail trade, made the expansion of the Jacobi business safe, as well as rapid. No doubt Philip Jacobi struck the shoe trade of Canada in his line at the right psychological moment.

In the meantime there had been a marvelous development in the retail shoe business. The shoe shops of the early sixties had given place to the more pretentious retail stores of the seventies and eighties. The wonderful development of the factory-made shoe was being severely felt by those who had made hand-sewn shoes, but volume made up for the deficiency and two pairs of shoes were sold for one formerly.

With the development of the retail shoe business came a demand for a great many accessories and store supplies, which awakened in Mr. Jacobi and those about him a realization of the possibilities in these lines. What was lost in the sale of staple lines of shoemakers' needs had to be made up with the requirements of the modern store, and the demand for small goods that naturally go with ready-made shoes.

In this branch of the business the same ascendancy was soon established as in ordinary findings, and the country and city trade soon developed to an extent that increased facilities had to be found both inside and outside its demands. The extent of this

development is illustrated by the fact that to-day Jacobi goods are known and handled from the Atlantic to the Pacific.

After forty years of business activity, the founder, Philip Jacobi, passed away in February, 1901, and left the establishment in the hands of his two sons, E. T. and F. W. Jacobi, who had some time previously been initiated into the mysteries of the findings business. These young men have taken hold and in the past fifteen years have demonstrated their ability, not only to maintain the pace set by the father, and to fully keep up with the progress and growth of the shoe trade of Canada, but to establish even higher standards. In addition to importing a great many exclusive lines and carrying a full range of factory and store requirements, they are manufacturing specialties that give them a peculiar hold upon the retail trade of the country.

Mr. Alfred Lewis, who came to the establishment as a boy, has for over forty-four years had charge of the warehouse.

Edwin A. Scott has been with the Jacobi's for over twenty-five years as accountant and as financial head of the concern and there are six others in Jacobi's that have been over twenty-five years with the establishment. This loyalty of the employes to the concern is a striking testimonial to the sterling character of the management, and to its business methods which they have systematically backed up for the best part of a life-time.

The great distinguishing feature of the Jacobi business is enterprise and push which have kept it for over half a century in the very van of the shoe findings business. The two partners, who have been born and brought up in the business, have all the advantage of experience, energy and the spirit of progressiveness that with comparative youth, for both are under forty, at their back, will undoubtedly mean another half century of achievement for the name of Jacobi in the particular line in which they have won such marked success.

# RETAILERS FEATURE FINDINGS TO ADVANTAGE

**Regard a Well Equipped Department as Necessary and Profitable Adjunct to the Store—Profits Much Larger Than in any Other—Keeping the Small Articles Well to the Front Interests Customers and Creates Sales—Experiences that Count**

IT is always interesting to learn how others do things and the selling and display of findings is recognized as a decidedly profitable and important branch of the shoe trade by a number of leading retailers. They report that the sale is growing rapidly and, with the number of colored kid shoes which are now being bought so largely by the fair sex the opportunity of extending the trade in dressings, polishes, laces and other articles is greater than ever.

## Indispensable to the Store

W. H. Willis & Co., of Wingham, Ont., say: "We find that findings are a profitable side line, in fact indispensable as far as we are concerned. As a rule we give them very prominent display in our show case directly inside the door of our store, so that customers see the different articles as soon as they enter. We have never had a window display of shoe findings, but as a rule place shoe polish, shoe laces, etc., in our windows amongst the shoes. The lines that sell the best with us are: shoe polishes, shoe laces (of which we always keep lines of good quality and never give cheap shoe laces with shoes), and polishing outfits."

"We believe that findings are a necessary adjunct to every shoe store," declared C. E. Browne, of Dillon & Moore, whose establishment in St. Catharines is called "The Home of Better Shoes." "We are of the opinion that this department is one that may easily, and without a great deal of extra time and trouble, be made into one of the heaviest paying departments of the store." The writer declares that these goods should be shown PROMINENTLY—that is, as near the entrance as possible, and just where ninety-nine out of every one hundred patrons entering must necessarily pass toward the fitting chairs. "This line," Mr. Browne goes on to say, "should also be well supplied and attractively dressed, and should, as nearly as possible, show practically all the various articles from laces to arches." This enthusiastic upholder of findings advises that these goods be kept in a healthy condition, and be referred to by all members of the sales staff as a good line—that means large profit on everything it contains, and it can readily be noted that it pays and pays well, at that. The firm of Dillon & Moore advertise periodically that they have each and everything necessary in connection with shoe findings, while the reverse side of each sales slip that goes out, on its five by four space, bears a regular "ad," calling attention to the feature articles

that are to be found in the findings case. This St. Catharines establishment does not give premiums to the staff for these "extra" sales, although they think such a plan probably creates an incentive, which may or may not be overdone, upon occasion. Mr. Browne says that there is hardly a weekly window display that is not brightened by two or more articles, of a half dozen singles or pairs of the style of findings, which does more than anything else to keep the findings idea before the public eye, so that, when that or this particular article is required, it is instantly associated with this firm.

The J. J. Haines Shoe Houses, with stores at Belleville, Napanee, Trenton and Smith's Falls, keep a large and well assorted stock of shoe findings, but have no special department for this branch of their business. They are displayed to good advantage in showcases, and the firm find them a very profitable line, selling a large amount during the year.

The Adams Shoc Co., Limited, Brandon, Man., carry a very heavy stock in findings, and ship a large quantity out through the smaller towns. The manager of the store frequently dresses one of the show cases with findings, as this is one part of the business he looks after. The firm also display findings in the window in connection with their boots and shoes.

## Turns Stock Many Times

One of the best shoe findings departments to be found in any footwear establishment is that of Alex. Chisholm, 1687 Dundas St., Toronto. Located just inside the entrance of the store it is separated from the shoe division by a neat hardwood fence which, with the angle that the store interior takes, forms a sort of vestibuled entrance. On either side is a silent salesman show case of the most modern design with adjustable glass shelves and mirrored back, while just behind each show case is a glass wall case, suitably shelved, with sliding panels. A large and representative stock is carried and tastefully displayed. The customer cannot fail to have his or her attention attracted to the varied lines shown and many persons, while waiting on a busy day, or others who may accompany callers, find much to interest them in the excellent arrangement. On this page an illustration is given of the findings department and, although it is a rather imperfect view, owing to the closeness of the

## DISPLAY FINDINGS TO GET GOOD RESULTS

Use Every Art and Device That You Can in Your Premises to Call Attention to the Smaller Goods That You Have to Offer—Special Windows, Artistic Grouping, Neat Show Cases, Nicely Mounted Cards and Swinging Shelves Are of Great Help

“YES, sir,” remarked an old shoeman, “you may have the best stock in the world, give the greatest value for the money, have the latest ideas and the widest selections, but if you are going to keep these in the background, or not tell anyone about the merits and superiority of your goods, you will never get far on the road to profit or success. You will be like the man in the parable with the ten talents who left them unused.

“In the first place attention should be given to the window, and this is one of the best means of advertising any line of goods. But remember that a fine window display cannot be made without the proper accessories, in the way of pedestals, either wood, glass or metal stands, swinging shelves, brass, nickel and oxydized window fixtures, etc. There is an almost endless variety manufactured and they can be obtained at figures well within the reach of all from shoe store supply houses. The increased business one will get from the proper use of such accessories will more than repay the average man for his outlay.

### A Nice Color Combination

“Does it ever strike you how unique and compelling a showing may be made of polishes in their bright and varied colored boxes? Did you ever turn your window into a polish exhibit, displaying all kinds, from the finest dressings for colored kids to the lumberman’s dubbin? It is business you are after, and this is one of the many ways that can be adopted to attract attention to your store.

“Another method of revealing your ingenuity and initiative is by making a window display of laces in the various

colors which are now popular—white, pearl, ivory, cream, grey, brown, bronze, black, tan, etc. Think of the infinite variety that may be obtained from all these variegated productions. What a range there is in laces, from the finest silk to the heaviest porpoise. Your laces, your polishes, etc., must ever be made a means to an end. The caller who drops in to get a pair of laces may become (if properly greeted and diplomatically handled) a purchaser of shoes, either for himself or some member of his family.

“Another pointer on the display of findings is that all articles shown in this department should be seasonable and timely. As one humorously inclined clerk put it—‘It does not pay to show ice creepers or skate-straps in August, or cricket and golf spikes around Christmas time.’ There are enough all-the-year-round staples to fill a window at any season. Occasionally, for the sake of variety, by dressing a window with one article alone a good eye-catcher is provided and sales stimulated thereby. With laces, dressings, polishes, overgaiters, arch supports, insoles, leggings, shoe lifts, bows, hooks and buckles, the resourceful window artist does not lack material for contrast and can arrange his display in telling combinations and these remarks apply to inside showcases as well.

“Yes,” declared a leading Montreal shoeman, “I not only make special displays of findings in my windows, but I also mention this department in my advertising space. I endeavour to let the people know that my lines are complete and that I am in earnest to give them the best obtainable. I find that by booming this department in the proper way I never have to cut prices. Some persons sell fancy shoe lifts

### THE ADVANCE IN EQUIPMENT AND SERVICE

*The chiropodic department of the Walk-Over Boot Shop, Toronto, is fitted up with all the latest appliances. The interior is finished entirely in white enamel. Dr. J. L. Conquergood is in charge. The orthopedic branch of the store has proved most successful.*

# Oil Tanned Officers' Trench Boot

ABSOLUTELY HAND SEWN

GUARANTEED

NEVER TO BREAK DOWN

This is our No. 309 Special which a great many of the officers of the Overseas Contingents, now on the firing line, have been using for the last fifteen months, and has proven so successful that the entire complement of officers of many of the Battalions and Batteries now in training have adopted same for their use.

*Special Oil-Tanned Stock  
No. 1 Maple Leaf  
Selected Sole Leather*

This magnificent boot, built for absolute reliability, in service and comfort, has a 16 inch oil grain leg with a full bellows tongue, oil tanned bottom drawstring type. It is made with our patent heel and cannot run over to the side. It is entirely free from any artificial stiffener. There are no rough or bulky inside seams. No added counters to become crumpled up. The shaped foot is made on a boot last with double full soles, hob-nailed. Extra Rawhide Laces, Felt and Leather Combination Insoles.

*No Nails—All Hand Sewn, and  
Guaranteed Absolutely Waterproof*

This is the boot in which QUALITY DOMINATES every other consideration—the boot to fill the demand for an absolutely high-grade boot for men who are willing to pay a fair price for exceptional service.

*Price, \$12.00 Net*

## Beal Bros., Limited

52 Wellington St. East

Toronto, Canada

and ornate button hooks. I have never gone into these, because I find that I can use such articles to better advantage for advertising purposes.

"Fibre horns can be obtained for advertising purposes in gross lots for about \$4.00, and a striking advertisement may be printed upon these. A combination shoe horn and button hook can be purchased as low as \$1.85 a dozen. The retailer can also obtain metal shoe lifts that cost from about \$2.00 to \$3.00 per gross, stamped, and good button hooks that involve an outlay of 75 cents to \$1.50 per gross, stamped. Some dealers give shoe lifts away with every pair of oxfords or pumps sold, and to each purchaser of button shoes a button hook as a little souvenir. They find that such advertising pays."

"Occasionally at Christmas time or during the Easter season, I present customers who have traded with me for years, with a nail file or some other interesting memento," declared another shoeman.

As stated, it is well if you are showing findings, to have a show case—one that is right up to the minute in style, adjustment and display facilities. Do not use any cheap, second-hand, old style affair on top of your counter. It never pays. Better take a section of your shelving for handling the findings line than to employ a dilapidated showcase.

There are many other ways in which findings may be shown to advantage. A spider's web can be made for your show window, where you are presenting the latest footwear fashions on colored mats, woven from the various shades of laces. These mats may be made very pretty and attractive by interlacing the different colors. Another method of displaying laces is fastening them on a card and having such card mounted in a prominent place on your showcase. Some manufacturers, when a certain number of articles of a specific kind are purchased, donate a small display fixture to go on top of a showcase. In fact it is quite practicable to have any articles that can be properly mounted or shown in an upright position places so as to catch the eye and arouse the interest of the passerby. In all window displays it is good idea to show a particular dressing that would match the color of shoes shown and a pair of laces to correspond.

"Now," writes a Winnipeg shoeman, "I might tell you a great deal on the facilities of showing findings. Never let your showcases or wall cases get littered or badly mussed. The top of the showcase may be devoted to good use, as various handsome receptacles are frequently given by the findings houses to their good customers. Every facility that can be used to advantage in exhibiting findings should be adopted."

It may be pointed out that retailing consists of three important elements—sales, expenses and profits—and it is well known that extra sales make extra profits and findings are an augmented source of revenue. One enterprising retailer suggests that a neat price card or price button be attached to findings articles when displayed in the window the same as is done in showing most lines of shoes. Such an announcement arouses the interest of the public and conveys just the information that many want.

#### Your Foot Service Comforts

Oh, there are many ways in which the public may be taught to appreciate the comfort and convenience of findings which should prove a big profit element in your store. Shoe and foot requisites should ever be kept to the front, as the handling of these is the means of developing little opportunities that mean much in the aggregate. There is no earthly reason why people should go to a drug store when seeking relief for foot ailments such as corns, bunions, chilblains, burning or sweating feet. The average findings house can supply suitable remedies and, once a shoe merchant has given a remedy or an article to a patron that affords relief, then the recipient becomes a fast friend of the store, and recommends it to others."

In these times every lever that the retailer can bring to bear upon his business should be grasped. Every facility, convenience or contrivance that will tend to display findings to better advantage may well claim the serious attention and consideration of the shoeman. There is always something new being offered, and when the traveler for a findings house comes along, listen to what he has to say. Accord him a respectful hearing, for he is often the bearer of good news in the way of ideas on how to increase your findings sales, how to display your goods, and how to open up new avenues of business.

#### Turned His Stock Eight Times

One western dealer who realizes the profit possibilities of the findings department, stated that he had turned over his stock eight times last year.

"We gave to salesmen who disposed of findings and handled them to best advantage liberal cash prizes. Naturally the boys got on the alert to earn a little extra money for their summer holidays. They did not, however, carry any suggestions to extremes or become too insistent, which might result in driving away the customer. They offered real service by mere mention, pointers or inference, but did not make themselves disagreeable to a customer. In this way I maintain that my clerks rendered good service, both to the customer and to the firm and learned a good deal in selling initiative, originality and efficient salesmanship."

#### PLEASURE AND PROFIT IN SELLING FINDINGS

*(Continued from page 33)*

investment is small, the stock is largely staple, and you have here a field for operation and extension, from which, proportionate to outlay, and without any additional overhead expenses, you can reap a rich reward. We will do everything in our power to give you good service and splendid treatment, and see that our supplies are sold to you, the members of the trade, and to you alone. By working in harmony and co-operating closely, we can do very much for our mutual benefit."

#### HOW WHOLESALE PROTECTS RETAILER

*(Continued from page 24)*

than the retailer would ask for the china, and would have gone away, perhaps with a pleasant delusion that he had secured the dinner set at the wholesale figure.

"Do you want to know why such tactics are resorted to in some establishments. Well, there are certain places that have no fixed, definite policy. They lack courage and decision. They cannot say 'No' to any one who has the temerity or nerve to seek favors, and resort to the subterfuge of an alleged cost price, in order not to offend these individuals. But with us, in this establishment, we say 'No,' except in the cases I have mentioned. These are persons bearing written orders from shoe retailers or those whose father or brother works for us in some capacity. Otherwise, we turn down all and those that come from wholesale houses with orders we charge 20% extra.

"Oh yes, we could do a mighty big business in the retail line if we liked, but we do not want to be pestered with these petty, picayune transactions. We have no facilities here for fitting—we do not want the sale of single pair lots—we have no desire whatever to cater to individuals who are not customers and very often the size and style wanted is away on the top floor, and much valuable time is lost. If any have a mania for buying things wholesale, they are not a-going to have that mania fostered or supported in this establishment. We protect those who protect us. We derive our living from the retail shoemen doing business with us, and so long as our relations with the trade throughout the country are as pleasant and profitable as they have been, we intend to stand by and co-operate with them in every way, shape and form."

Miss Edith Wixson, Toronto

department to the front windows, a portion of the wall Wixson has specialized in the findings branch in which she takes much interest, and has had full charge for some years. Infants' soft soles, all kinds of foot appliances, buckles, and other accessories are featured.

"Yes," said Mr. Morley Chisholm, "we have always believed in keeping a well assorted stock of findings. We turn the stock over many times during the year and the margin of profit is satisfactory in every respect. Persons passing in and out will often think of or see something that they require when going by the cases and make small purchases which, in the aggregate, amount to a nice sum each week. In our cash register located convenient to this department we have a separate drawer to keep tab on all the receipts in this branch, and we have no complaints to make. We regard the possibilities of such a department as practically unlimited and the display proves a fine attraction in which numerous persons often discover that there is something which they perhaps had not thought of buying when they came in. It helps bring people to the store and takes up very little room. We frequently display findings in our windows."

**Give Them a Good Place**

A. J. Stephens & Son, dealers in fine shoes, Ottawa, consider that findings, properly handled, is one of the best paying branches of the retail shoe trade. They look upon them as one of the most important sections of the business, and accord these goods a prominent place in their store. The firm make a practice of instructing their clerks when making a sale, to bring findings to the attention of every customer, and in this way, they find the sales are largely increased. Special window displays, and also special displays in show cases, are made from time to time by this firm.

Although Robt. Neill of Peterboro carries in his stock quite an extensive line of findings, yet the store has never made a special feature of this particular range. They consider it more as a side line, and do not deal with it as a particular part of their business, having some one special person

in charge of the goods. On account of not taking an undivided interest in these lines, the firm do not feel that they can supply any helpful suggestions or speak with any authority in regard to the sale of this line. They are aware that in many stores the staff becomes quite enthusiastic over the sale of findings, but with them their experience has not been of so thorough or complete a nature as to warrant them giving suggestions, or pointers that might be of assistance to other members in the shoe trade.

George G. Gales & Co., St. Catharine St. W., Montreal, feature findings very strongly, and have a person specially in charge of that department. They state that the turnover in findings is very frequent, and their profits in this branch much larger than any other in the house. They have a special findings case at the entrance of the store, and occasionally devote a special window to this line, with good results.

The Burns Shoe Co., Oshawa, say they have not featured findings to any great extent. They have found profits are very satisfactory and believe that it is a splendid line to handle, in conjunction with the sale of shoes. W. J. Burns humorously contends that shoe stores should sell everything for the feet except soap and water, and with this object in view, he has been handling skates, skating straps, etc., for some years, and has found these lines a good money maker just now.

**Makes Them Move Rapidly**

Speaking of their policy of handling and selling findings, the management of Tuttle's Shoe Stores, Halifax, state they have display cases for these lines in each department, one case in front of either entrance, and one in their children's department upstairs. The charge of findings is under the supervision of one member of the staff, but the sale is not restricted to one individual—all taking a share in disposing of these goods. A careful record is kept of the amount of findings each employee sells, and the results of each person's efforts are posted with the weekly bulletin. The firm has not been devoting any one window to the exclusive display of findings, nor have exclusive announcements been accorded them in the advertisements of the company in the daily papers, but they receive a good share of both these means of publicity. The firm has not, so far, given commissions on the sale of findings, although this plan has been found effective in getting certain results desired in selling shoes. The firm, who has the agency of the Walkover shoes, and has a branch at Dartmouth, N.S., states its appreciation of any publicity which would make for effectiveness in hand-

A catchy window display made by A. J. Cook, 2042 Queen Street East, Toronto

ing findings, and believes that the shoe trade should largely profit by any ideas and suggestions published.

Fred R. Foley, Bowmanville, Ont., reports that his turnover in findings each year is very good and this depart-

ment pays him well. He intends going more extensively into this branch of the business, believing all footwear accessories should be sold by the shoe retailer and not by the repair man, the notion store, or the departmental establishment. Mr. Foley makes use of findings for advertising purposes and, on all pairs of good shoes sold, throws in an extra pair of laces and on dress boots, if the customer suggests it, a box of polish. He has found that being generous in this respect pays well and the small expenditure can be classed under the heading of advertising. "A good deal of the success of the findings end lies in the attention that you give it," adds Mr. Foley, "and in the way that you display the goods. It is one branch of the store equipment that can stand pushing and will yield splendid returns. The field is extending all the time and shoemen should take advantage of its possibilities."

#### Treatment of the Feet

H. and C. Blachford, Limited, Yonge Street, Toronto, who have been in the retail shoe business for fifty-two years, have always devoted much attention to the findings end of the trade and some months ago established an orthopedic department, which is splendidly fitted up and well equipped. It is in charge of R. J. Orr, and all appliances such as foot easers, arch supports, bunion protectors, foot balms—in fact everything that goes inside of a shoe—are contained in this department, which has been a gratifying success. Mr. Orr devotes his entire time to this branch of the business, in which he has specialized, and reports that the results have been in every way satisfactory.

Other shoe stores in Toronto, which maintain orthopedic or chiropodic departments, are the Walk-Over Boot shop, which has an invitingly fitted up department at the rear of the establishment, finished in white enamel. Dr. J. L. Conquergood is in charge and he is a widely known specialist in his line. The Owl Shoe Store, Yonge street, has for some years maintained a chiropodic department, equipped with all modern appointments, which is under the direction of J. M. Haslam. The new Walk-Over Boot Shop in Montreal also has just installed a chiropodic parlor for the correction of all pedal deformities and troubles. In fact, the orthopedic section will soon become a fixed institution in all shoe shops in the larger centres.

#### Early Days of the Trade

Sole leather, number one grade, at 15c lb. in Montreal, was considered as selling at a very fair price in the days when A. F. X. Beaudry was a young man in the leather and findings district of that city. Seventy-six summers have gone by Mr. Beaudry without leaving too many traces of the varying struggles he made to attain the success which enabled him to retire three years ago, leaving the business in the hands of his son, Joseph H. Beaudry, who has been connected with the firm for ten years and continues it under the firm name of A. F. X. Beaudry & Fils. The old name continues to be associated with the leather trade, being on the sign on St. Paul Street East, nearby where Beaudry, Senior, started. Only three times since 1863, when the doors were first opened by Mr. Beaudry, has the firm changed quarters, but always they have been in the same district.

Mr. Beaudry, in a reminiscent mood, recalled many old names, most of which are forgotten by the shoe trade of to-day, with the exception of the veterans. A. & D. Amos and Hua & Richardson were big leather factors for many years prior to the time he bought out the business of Raphael Carnmerent, another old timer in whose employ Mr. Beaudry was, along with his brother-in-law, Mr. Lorrain. The new firm, Beaudry & Lorrain had as neighbors such other firms as Stimson & Richardson, John Leclair and Bryson, while here were several Delormes, Pierre, Simeon, Ovila and

Maxim, an old name still represented in the business by Wilfrid Delorme, also on St. Paul Street. Lemire, Eloi, Perrault, and John Dougall were other firms who represented the big interests of the trade.

Quebec and the Eastern Townships supplied much of the leather that was used in the Montreal district, though considerable was "imported" from Upper Canada. Lewis, in Quebec, was an old leather manufacturer that Mr. Beaudry recalled many pleasant dealings with. French calf, kip and satin kip were imported from France by the bigger houses who wholesaled to the smaller concerns.

Wire nails were brought into the country from England, being packed in 14 lb. cloth bags. Incidentally, Mr. Beaudry remarked, there was not so much fuss about buying nails and tacks then. No one specified size 1 or 1½ or 2, naming a different price for each size. They simply asked for a pound of tacks and took assorted sizes. And they paid 25c a pound for tacks which cost the wholesaler 4c. "Them were the days."

There were other troubles, though, for silver was not as valuable as it is to-day, and was discounted at 5%. But terms were long, sometimes as long as fourteen months, and

A. F. X. Beaudry, Montreal

rarely less than six. Bills of goods were sold net six months or less a discount of one per cent per month in advance of that time. In other words if a man paid his account in full within three months he would earn a discount of three per cent, or if he paid cash with order he would get six per cent.

Traveling salesmen were unheard of in the earlier days. Tuesdays and Fridays the boats came to Montreal, bringing the merchants from all parts of the country to the city for the two market days, when came also dozens who drove miles out of the north, which was not served by railways. Moccasin sole leather was a big seller at that time and many a load was taken away by the merchants in their little sleighs or carts.

On a par with the present taxation was the custom of the Government to charge two cents on each side of leather for inspecting it.

Mr. Beaudry recalled perfectly the great fire of July 8, 1852, which started in the St. Laurent district, and rapidly spread, another fire breaking out the same night in "Quebec Suburbs," now St. Mary's and St. James' wards. He also referred to the old "gates" to Montreal, although the gates themselves were removed before his time.

# With the Shoe Manufacturers

Pithy Note and Comment on Shoe Matters—What the Makers of Shoes Are Saying and Doing—Shoe Facts and Fancies

**T**HE Benefit Society of Getty & Scott, Limited, shoe manufacturers, Galt, Ont., which held such a successful social assembly in the city hall recently, have been organized seven years and have done good work among its members promoting mutual assistance, relief and unity. To become a member it is only necessary for the employe to pay the sum of 25 cents. There is no medical examination and the benefits start after a month's membership. The medical officer of the society attends free all members taken sick, after being a member for one month. The patient also receives free medicine and free operations, except in cases requiring a specialist, such as eye or heart trouble. The society pay a weekly benefit of \$4.00 for twelve weeks, which is generally enough to cover any average illness. The assessments are paid fortnightly, being ten cents weekly. The society hold a large ball every spring, which is always most successful and enjoyable. They also conduct an excursion yearly, generally to Toronto or Niagara Falls, which has been well patronized every year. The funds secured from these events are turned into the general fund, and at the end of the year, after paying the salaries of treasurer and secretary and the doctor, Getty & Scott Benefit Society retain \$75 as a reserve fund, and strike a dividend with the remainder. Every year this dividend has grown larger and in 1915 made an acceptable Christmas gift. Two years ago the society gave a splendid minstrel show. W. Cudney, the secretary, who has had several years' experience in the minstrel line, was selected to manage the production. "The boys" had 75 people in the first part of the entertainment, all properly trained and in costume, and in the second part a first-class vaudeville performance was enjoyed, the artists being widely known professionals. The society are at present co-operating with the management of the Temple Theatre for the sale of tickets among members and their friends on which they receive fifty per cent. on all tickets sold. This plan has also proved a source of considerable revenue.

The heads of the company have always taken a deep interest in the welfare of the organization and have been liberal in both contributions and advice in any enterprise that they have undertaken. The officers of the society are elected yearly and consist of an honorary president, honorary vice-president, president, vice-president, secretary, treasurer and an executive committee, composed of a member from each department of the factory, his duties being to make the collections of dues, handle theatre tickets and assist the officers in any manner. The present officary is—Honorary president, F. S. Scott, M.P., honorary vice-president, Wm. Chamberlain; president, James Wallace; vice-president, W. Kruse; treasurer, W. Booty; secretary, W. Cudney; executive—H. Slein, H. Thompson, F. Wickens, R. Daniels, D. Rongey, J. Marshall and R. Scroggins.

## Shoe Workers Have Good Time

Under the auspices of the Boot and Shoe Workers' Union the employes of the Brandon Shoe Co. and their friends, Brantford, Ont., held their annual at home in the Liberal club rooms recently. Among the guests of honor were Charlie Thompson, secretary-treasurer of the company, who is very popular with the employes, and the shoe workers' general organizer, Eddie O'Dell, of Hamilton. Mr. Brandon was unable to be present on account of business relating to army contracts. Euchre was indulged in first,

great interest being displayed. Mr. Brandon donated two valuable prizes, being a pair each of men's and ladies' shoes. Miss Dinsmore was the winner of the ladies' and Mr. Fred Warning the gentlemen's. The euchre party was followed by an enjoyable supper and dance.

## Rapid Promotion for Mr. Feltes

N. R. Feltes, vice-president, treasurer and general manager of Ames-Holden-McCready, Limited, Montreal, has been vice-president of that organization since last June. He has occupied the position of treasurer since May, 1915, and has been acting manager for the last three or four months, during the illness of D. Lorne McGibbon, who continues as president of the Company. Mr. Feltes is a genial, earnest and progressive business man, who has been twenty-one years in the rubber business, and was one of the original four in the famous Morgan & Wright Tire Co., Detroit, in which he was treasurer until 1911. Then it was con-

N. R. Feltes, Montreal

solidated along with other tire companies with the United States Tire Co., New York (a subsidiary of the United States Rubber Co.). Mr. Feltes continued as treasurer of the Morgan & Wright Co.—each consolidated company maintaining its own identity—and was also treasurer of the United States Tire Co. at the same time, until he came to Montreal. Mr. Feltes, who succeeds Mr. McGibbon as general manager, the latter retaining the office of president, as already stated, says orders and reviving conditions assure the working of the company's plants at capacity for some months to come.

## Reducing Cost on Patent Leather Repairs

The superintendent of a well-known factory making women's McKay shoes recently told us that the average cost of repairing patent leather shoes going through his factory used to average 2½ cents a pair on the entire production

of the plant. This estimate was based on accurate figures kept for a year, so as to cover all seasons in busy and dull times, says the Electric Bulletin which is issued by the Boston Last Co.

Some time ago they decided that this item of expense was too much and sought for ways and means to lower it. After considerable experimenting they finally decided to install a number of our electrically heated No. 120 Turners' Irons, owing to the good reports received from other factories, and more particularly because of results achieved through actual trial in their own plant. To-day they state, after a very thorough try-out and months of actual use of the irons' that the cost of repairing patent leather shoes has been reduced to 1½ cents per pair.

This factory makes on an average one thousand pairs of patent leather shoes per day the year through. Based on this production their saving since installing this iron amounts to 1¾ cents per pair, or the neat sum of \$13.75 per day.

#### More Big Orders for Army Shoes

Another large order for army footwear has been placed by the Department of Militia and Defence, Ottawa. Among those, who it is understood received large contracts, are: Dufresne & Locke, Montreal, 100,000 pairs of ankle boots and 100,000 pairs of rest shoes; Ames-Holden-McCready, Limited, Montreal, 200,000 pairs of ankle boots and 80,000 pairs of rest shoes; John Ritchie Co., Quebec, 50,000 pairs of rest shoes; the J. Leckie Co., Vancouver, 30,000 pairs ankle boots; Plessisville Shoe and Leather Co., Plessisville Que., 20,000 ankle boots and 20,000 rest shoes; Scott-Chamberlain, Limited, London, Ont., 30,000 pairs of ankle boots.

Other firms, who have received contracts, are Aylmer Shoe Co., Aylmer, Ont., 10,000 pairs ankle boots; John McPherson Co., Hamilton, 15,000 pairs ankle boots; King

Shoe Co., Toronto, 40,000 pairs ankle boots; Regal Shoe Co., Toronto, 15,000 pairs ankle boots.

The new specification calls for tar felt filling between the soles instead of ground cork and cement. It is understood that the price, which is being paid for the last consignment of army shoes, is a few cents higher than on the previous large order and is about \$4 per pair.

#### Generous Gifts to Queen's Hospital

The Medical Faculty of Queen's University has received a cheque for \$1,000 from Messrs. A. Davis & Son, Limited, Kingston, leather manufacturers, for the equipment of a block of 40 beds in Queen's Hospital at Cairo, says the Kingston Standard. The beds will be known as the "Davis Beds" and numbered from one to forty. This is the second time the hospital has benefitted by the generosity of the A. Davis & Son, which firm is composed of Hon. E. J. Davis, president; Elmer Davis, vice-president, and Harold W. Davis, secretary-treasurer. The Motor Ambulance donated by them has been in service constantly since the hospital has been in Egypt and has proved invaluable.

As the hospital is now increased to 1,000 beds the Faculty is asking for contributions for special equipment of the beds. \$25 purchases this for one bed and the donor has the privilege of naming the bed, this name to be retained so long as the hospital is in existence. About 300 beds have been named in this way. The generosity of Messrs. A. Davis & Son is greatly appreciated by the Faculty.

Dr. J. C. Connell, Dean of the Medical Faculty of Queen's University, in a letter to the firm says, "On behalf of the Medical Faculty and staff of Queen's Hospital, I desire to thank you again for your generosity to the Hospital. The motor ambulance, which you donated some

time ago, has been of great service and in constant use. The late Col. Duff wrote that he did not know how they could have managed without it. It must be a satisfaction to you to know that it brings comfort and ease to many injured and sick soldiers. Your further contribution of one thousand dollars for special equipment of forty beds is much appreciated. Here again you may be sure that the expenditure of this money will mean relief and very practical help for soldiers sadly in need of it. The beds will be named the "Davis Beds," numbered from one to forty, and will have a card at the head of the bed giving the full name of the donor.

#### English Styles Are Very Ornate

An English contemporary in commenting upon the trend of styles which, in spite of the war, run into expensive and ornate specialties, says:—

Manufacturers have practically ceased to make the cheaper grades of boots and shoes, and since the commencement of the war prices in this and many of the better classes of goods have risen from 25 to 30 per cent., and are likely to be still considerably higher. Suede boots are expensive, but we do not think the price will prove prohibitive, as they are the embodiment of smartness, and between them and anything else there is simply no comparison. The very smartest styles now lace up the sides with silk laces, a particularly charming design being in black suede. They are worn ten inches high in the leg, and fur-bound at the top; but, whilst these are excellent for walking and motoring they are initially expensive, and can scarcely be indulged in by those who have only trams to rely on as habitual modes of conveyance. As we have previously remarked in these columns, skirts are still growing shorter and the boots longer, and now we notice that there is a marked tendency for the skirt, in addition to being shorter, to become wider; so that with the advent of spring and summer we may probably see an appearance in our streets of something akin to the "ballet skirt," and the briefest skirts ever worn by fashionable ladies in our own or any other generation. The forecast seems an entirely reasonable one on present evidence, but the fashionable length of the skirt is now at a point to give pause for the most courageous.

#### Leather Neckwear is Seen

Leather neckwear for women, in all popular shades, is now being displayed in collar and cuff sets, to be worn on coats, suits and costumes as a trimming. Early orders placed by the buyers from leading department stores indicate that this new Paris creation will be in big demand. Leather strips in all widths and colors are rapidly replacing the former ribbon trimming fashion.

#### Are Cloth Tops Coming Back

Fall samples will undoubtedly witness a return to cloth tops, not only on account of the scarcity and high price of light leathers, but the created demand for novelty. Both men's and women's lines will appear in combinations of cloth and leather. Already there is a wide range of samples of vesting and other materials being shown by wholesale houses.

# SPECIALIZATION AND GREATER CONFIDENCE

How an American Visitor Views the Shoemaking Industry in Montreal and Quebec—Pays Tribute to the Kindness, Courtesy and Ability of the Men in Charge and Offers Advice

It is always interesting and sometimes instructive to hear what the other fellow, the outsider or the visitor, has to say about you and your goods. How does he size you up, what opinions has he to offer, what suggestions to present—providing that he is frank, sincere and straightforward in his comment or criticism. Of course, the causal caller cannot understand the conditions or appreciate the difficulties encountered the same as if he were a permanent resident or engaged in the business himself in the cities visited, but this does not preclude him from offering helpful hints.

Recently a representative of American Shoemaking made a tour of the plants in Montreal and Quebec and his observations are worth reading, to say the least, and written in no antagonistic spirit. However, the *SHOE AND LEATHER JOURNAL* does not endorse all that he says or agree in all his conclusions. He sees much from the American viewpoint and does not realize as do local manufacturers the limitations of output, supplies, population, centralization, labor difficulties, etc., the same as if he had to face them squarely. We will have more to say on these points in another issue and in the meantime will let the visiting representative have his, and here it is:—

“The writer has just recently made a tour of the shoe factories of Montreal and Quebec. He comes back feeling more deeply than ever before, that Canadian shoe manufacturers are thorough gentlemen, kindly and courteous, able business men, and live factory managers.

“Every trip through the factories of these cities has deepened this impression of kindness received and has proved the value of co-operation, to both parties co-operating.

“I cannot honestly say that the business men there have a kindly feeling towards the United States Government. There seems to be much dislike in their hearts for us as a nation. But personally, between man and man, they strive to show in an open and wholehearted way that they are indeed brothers by descent, brothers in language, in thought, in aspirations, great big, kindly brothers.

## In a Spirit of Helpfulness

“This is my feeling upon my return, and because of this feeling, it becomes doubly hard to offer any word of criticism for fear of hurting those who have treated me so nicely. But, oftentimes, it becomes necessary for us to do our whole duty and to tell the whole truth in order to repay the kindnesses of others in the way in which they should be repaid. So, in summing up my impression of Canadian factories and manufacturers, I shall write in the spirit of helpfulness, rather than of captious criticism.

“First of all, I wish to state that there are quite a few concerns in Montreal and Quebec that have organized their factories and their businesses on the same lines as those adopted by the best and most successful manufacturers in the States. On the other hand I shall admit that there are still some concerns engaged in the shoe manufacturing industry right here in Massachusetts whose factories are so badly disorganized and who are still making nearly as great a variety of lines as can be found in the factories there.

“On the whole, however, the shoe factories of these two towns are in about the same relative place and are making shoes under about the same conditions, regarding multiplicity of lines, as were our shoe manufacturers twenty years ago.

“There are three lines along which the shoe factory student might safely and wisely advise an advance, and these

principles apply to a large number of manufacturers in the States as well as to those of Quebec, viz.:—narrowing and specializing the line, greater confidence among manufacturers, and more factories designed for manufacturing economies.

## Some Model Factories

“Regarding the subject of factory construction, the writer would state that it would be difficult to find, anywhere in the world, shoe factories more scientifically designed to effect factory economies than those operated by James Muir, Ames-Holden-McCready, and a few others. On the other hand the owners of a majority of the factories visited would find it good business to dispose, at an actual loss, of their dark, over-wide and wasteful stretches of floor space, and build new, light, narrow factories of concrete, wherein every foot of floor space may be productive of shoes and of profit.

“What is the use of a rent cost and an insurance cost and a repair cost on floor space which produces no shoes, or, because of bad conditions, which produces less than a maximum quantity of shoes? It must all be reckoned into the cost of the shoes, actually made and sold.

“I predict that many shoe manufacturers in Montreal and Quebec will build modern factories during the next ten years and will find that the saving in the cost of production thus effected will, in itself, total up yearly to a handsome profit.

“Probably the most prominent fact to the shoe factory observer who comes from the States to visit Montreal and Quebec manufacturers would be, and is, the multiplicity of samples made, and the wide range of lines carried by most of the manufacturers.

“It needs no argument to prove that where everything from men’s pegged to infants’ soft-soled shoes, and from men’s to boys’ welts, to women’s turns are made in the same factory by the same operatives, it costs far more per pair to produce, than where a single line is made, and also that the quality of workmanship must fall off.

“No shoemaker, no matter how artistic a workman he may be, can trim two cases of pegged shoes and then follow by trimming the edges of a case of women’s turns, and get the results on either that a workman can get who works all the time on turns or on pegged. In fact, even men’s and women’s fine shoes cannot be made together in the same factory without the women’s shoes looking heavy and mannish and the men’s shoes looking too fine and light. This has become so well understood this side of the line that none of the large factories are any more operated in that way except where exceptional conditions make such a procedure necessary.

“And, as said before, not only does the quality of workmanship fall off, but the cost of production is reduced by confining a plant to a specialty line. This arises from a variety of reasons but more especially from two—first, that where many kinds of shoes are made, the number of machines idle and the square feet of idle floor space necessarily increases; and second, that in order to earn the same amount of money per week, workmen have to be paid a higher piece price than they would if they were working on a single line.

## Getting the Best Results

“For an edge trimmer who trims first a few cases of women’s turns and then a few cases of men’s top boots, can

neither trim as many top boots per hour as a man who trims nothing but top boots, nor can he trim as many women's turns per hour, as can an operator who trims nothing but women's turns week in and week out. In fact, the per machine output and the per square foot output falls off materially as lines are added.

"Then let us suppose that a factory making a wide line of shoes has installed a pegging machine, a Standard Screw wire machine, three McKay sewing machines and a welt line.

"We cannot suppose for a moment that orders will be received by that firm, season after season, in right proportions to keep an operator busy on all these machines all the time. Some of the machines mentioned will be lying idle much of the time and the floor-space will be producing nothing. Again, much of the time, a McKay sewer will have to serve as operator on the Standard Screw machine or on the pegger. He cannot do as much work per hour on either machine as could an operator who did nothing else but run a Standard Screw machine or a pegger ten hours each day. So again, the piece price must be higher to give the operative the same wage.

"Of course, Canadian manufacturers will reply, when approached upon this subject, that conditions in Canada will not allow the making of narrow lines, because they have a small population and a limited market—whereas we in the States have a tremendously large population to shoe and there is demand enough for shoes to admit of manufacturers choosing whatever line they wish to make.

"In other words, the fallacy seems to exist across the line that competition among manufacturers is less keen on this side than with them. Whereas the very opposite is manifestly true; for without the keenest of competition American manufacturers would never have reduced the price of production to the point which enables them to sell shoes in Canada against Canadian manufacturers fortified by a 30 per cent. duty and a 7 per cent. war tax.

"Examination of actual conditions will show no reason why Canadian manufacturers are not as well able to specialize in production as were our own at any time within the past fifteen years.

"Supposing one house in Montreal decided to make nothing but boys', youths' and gents' McKay shoes in three styles and on two lasts, supposing that that house aimed to produce a given quantity per day and started its business in a narrow modern factory designed for that output (with and space to build as the business grew) and designed to keep every foot of floor space and every machine and every man busy ten hours for every working day in the year; is it not plain to see that economies might be effected in such a mill which would enable the concern to sell boys' shoes under any manufacturer making a wide line, and under any manufacturer in the States hampered by the high tariff wall?

"When this state of affairs comes to pass, manufacturers making a wide line will find it more difficult than ever to sell boys' shoes and will gradually cut out the boys' McKay shoes from their lines altogether. Later on, when other manufacturers specialize on men's heavy, the men's heavy shoes will be gradually taken out of the lines of those who manufacture 'everything.'

"Along these lines the industry must naturally be changed and when changed, the writer has no doubt that the cost of production will be sufficiently lowered and the quality be sufficiently raised to exclude all American made shoes from Canada.

"What is there to prevent shoes being made as economically and as artistically in Canada as in the States?

"Surely few concerns in America make better women's shoes than Smardon or J. & T. Bell, and they specialize. Surely few concerns in America make better shoes for men than the Regal's Toronto factory turns out, or Wright's

St. Thomas factory, or than some of the London, Ont., factories produce, and they specialize.

### CHATHAM SHOE CO. STARTS OFF WELL

The Chatham Shoe Company, Limited, will shortly be established in Chatham, Ont., as a result of the approval by the ratepayers of a by-law submitted on March 6th extending certain concessions. The measure was carried by 535 to 26. The company have arranged to take over the property formerly occupied by the Canadian Wolverine Company, Limited, manufacturers of brass goods. The property includes a large, three-storey factory situated on St. Clair street, together with warehouses and loading sheds. Under the terms of the agreement between the Chatham Shoe Company and the city, the loan of \$15,000 formerly extended the Canadian Wolverine Company is transferred to the new enterprise, which is also granted a fixed assessment of \$10,000 for ten years.

E. S. Hunt, who spent a few days in Toronto last week, states that the Chatham Shoe Co., Limited, who are taking

E. S. Hunt, Chatham, Ont.

over the business of the C.N.W. Shoe Company, London, and removing the same to Chatham, is installing much new equipment of the latest type. A splendid range of misses' and women's shoes will be made in both McKays and welts and four snappy new lasts have been added for the coming season. A picture of the main building is presented on another page but there are two other buildings not shown, one at the side and the other at the rear. The main structure has a power plant costing eight thousand dollars to install, a hundred horse power generator and a two ton elevator. Blowers are built in the walls and the edifice is fully plumbed and heated by natural gas. The windows are numerous and large, affording plenty of light on every floor and there is a covered loading platform at the rear. In every way, the structure is well adapted for shoe making under ideal conditions for the staff of workers.

Mr. Hunt is president of the new Chatham Shoe Co., Mr. Harry Dulmage is secretary-treasurer, and Mr. F. B. Hutchings, factory manager. The company will be represented on the road for the coming season by Mr. Tanner in the Maritime Provinces, Mr. Belanger in Eastern Ontario and Quebec, Mr. Saunders and Mr. Jeffries in Western Ontario and Mr. Trotter in the Western Provinces.

# Leather Trade Jottings

Items of Interest to Leather Producers and Users—What is Being Talked About in Leather Circles at Home and Abroad

“**W**HAT do you think of that?” said a wholesale leather man as he turned from the telephone after asking a quotation from a tanner over the long-distance lines; “Twenty-six cents a foot for number two side leather and he does not want to hold the quotation!”

Said a prominent light leather tanner the other day: “I was asked to make a contract for ten thousand skins at current prices for delivery in three months and I turned it down.” These instances are but samples of what is occurring from day to day in the leather market. In most light lines there is a scarcity and tanners get finicky when they are asked for quotations on large lots or for future delivery. In fact, it is practically impossible to get quotations ahead in either sole or upper. Those who sold staple stock ahead towards the close of the year are now kicking themselves.

## The Hide Market

Within the past couple of weeks there has been a little more activity and the market is showing a tendency to harden. With packer heavy steer hides at twenty-three cents and country buffs at seventeen and a half in Chicago at this time of the year, one understands what may be expected as soon as the spring take-off begins to come in. Meanwhile South American conditions are being anxiously watched as having a more and more important bearing upon the situation as the war progresses and the difficulties of transportation increase. When one thinks that twenty-five years ago green buff hides were selling at three cents a pound and today they are practically eighteen, one does not wonder that the leather has gone to where it is, but how it can be sold at a profit at present prices. It is only the modern methods of production that has saved leather and shoes from being prohibitive in cost.

## American Leather Conditions

Reports from American centres indicate a shortage in the supply of all kinds of upper leather. Tanners have a great many unfilled orders and are not anxious to make more stock than will meet the immediate demands of their trade. The supply practically meets the immediate requirements, a great deal of stock coming in from outside sources. A feature of the trade across the line is the demand for Canadian leathers. Time was when a manufacturer of shoes would look askance at stuff from Canada in the spirit of “Can any good come out Nazareth?” but this is all changed and some today would buy more than they can get.

The calfskin situation is particularly acute, the supply of raw skins being very precarious. As a result some calfskin manufacturers are giving

attention to the production of side leather and some very acceptable substitutes for calf are finding a ready market. Patent colt and kid is in good demand and the supply is so short that kid is being used in many cases when it can be procured. The cheaper lines of the latter are all sold up and buyers have to be content with the more expensive selections.

## Glazed Kid Booming

For some years past glazed kid has been more or less side-tracked and is rapidly coming back to its own. At a recent meeting of the Morocco Manufacturers Association the fees were raised from ten dollars to two hundred dollars a year and an expert secretary appointed to push the interests of this class of stock along lines similar to the campaign inaugurated some time ago by one large kid concern.

The average selling price of glazed kid before the war, and its consequent embargoes on goatskins and large advances in other raw materials, was, it was stated, about 20 cents a foot. So far, the manufacturers have advanced the price of the finished product only from 4½ to 5 cents a foot, while the advance in raw materials and freights has been from 25 to 35 cents above the normal. By obtaining accurate data on the various elements entering into increased cost of production, the association expects to place its members in better position to meet a constantly increasing domestic and export demand for their product. A further advance of 5 cents is said to be impending.

## British Leather Conditions

The situation in England is illustrated by an incident recorded in a recent issue of one of the shoe trade papers which represents a shoe manufacturer as visiting thirty leather factories in order to secure fifteen dozen glazed kid skins. There is a shortage in almost all kinds of upper stock, the prices of which have gone up tremendously. The demand for army shoes has cleared up the market in heavy calf and prime tannings of sole leather. A recent order for a million and a half English army shoes has been supplemented with an Italian order for 600,000 pairs and a Russian order for 4,000,000 pairs of high army boots which will keep the English trade shipping boots for some time to come. The British Government specifies all English chrome and East India waxed kips and manufacturers are wondering where the stock is to come from, as the goods have to be delivered within a short period. American and Canadian sole leather is being used to some extent in other lines to set free the home manufactured article, but the freight and insurance now amount to three cents a pound and this militates to some extent against sole stock made on this side of the water.

### SHOE CLERKS WANT SHORTER HOURS

Editor, SHOE AND LEATHER JOURNAL:

Sir,—The recent banquet held by the Toronto Shoe Retailers' Association will probably go down as one of the most enjoyable and important events in the history of the trade. It augurs well for the future. But apart from its usefulness from the employer's standpoint, many in humbler positions like myself, must have been keenly disappointed at the total omission of any reference to the question of long hours. I do not wish to be accused of indulging in a little cheap satire, but considering the fact that this important assemblage comprised some of the most influential members of the shoe industry in this city, not a word, not even a little squeak, is heard on one of the greatest abuses in the retail trade.

Though time did not permit my attendance, I gathered from one more fortunate a gleanings of the proceedings. The story of the bouncing man in rubber boots has caused me much mental perplexity. I have been trying to find out his identity. One answer to my query was that he must have been a shoe clerk on account of his wonderful aptitude for re-bouncing from his bedroom to the store, having no time for anything else. Another scouted this theory, claiming that he must have been a proprietor of a shoe store somewhere in Toronto, on account of his "bouncing" and "bumping" any attempt in the direction of early closing. I have not given up all hope as the Humane Society have promised to send me particulars when they hear of the case. In the meantime they are looking up another more important.

But seriously speaking, the haphazard methods of store closing in Toronto need the early attention of the Association if it does not want to assume the nature of a farce. Improvement in all business life appears impossible without the general uplifting and better conditions for all concerned. Humanitarian methods must be the basis of all business life, before we can boast of success in the full sense of the word. Many employers are not over considerate in regard to their help, depriving young people of all chance for recreation, or opportunities for self-improvement. Long hours bar the married men from the enjoyment of home life. Happily these charges cannot be laid at the doors of all. Some employers know the value of efficient help and this only comes from reasonable hours of labor. Overwork is detrimental to health, strength and mental development, and can only result in that tired look and half-hearted attention to duty.

Well, let us hope a voice in the wilderness will soon be heard on this evil. In the meantime I am writing the Mayor of this city, and also sending letters to the press.

I should also like to hear from some other clerks interested. A good idea would be to organize a meeting, or go one better and have a banquet. We could go in for a

#### A TONIC FOR THE TRADE

Enclosed please find cheque for \$1.00, my year's subscription to the "Shoe and Leather Journal." Your valued publication is a tonic for the store, and twice a month it brightens up my ideas and keeps me in touch with what is going on in the trade all over Canada. The Journal is a first-class book to have. Wishing you every success in your good work.

Gananoque, Ont.

M. D. WALSH.

special sale of tickets, at say, a dollar ninety-eight, have music and speeches—not necessarily on "longer profits"—what's the matter with "shorter hours?"•

Sincerely yours,  
227 Gilmour avenue, Toronto.

GEORGE BIRCH.

### HAS WALKED A YEAR ADVERTISING SHOES

Kilgour, Rimer Co., Limited, of Winnipeg, had a call from C. J. Bingay, of Vancouver, B.C., who, it is safe to say, has walked more miles than any other man in North America, and perhaps in the world. Walking is his living, and he has been at it for ten years.

He makes an arrangement with some shoe firm, who advertise his route and that no shoes but their own make are used by Mr. Bingay on his tramp.

His present little jaunt was started on the 31st of March, 1915. Leaving Vancouver with a nickel in his pocket he "hoofed" it to New York, returning to Vancouver via Halifax, Quebec, Montreal, Toronto, Fort William, Winnipeg and thence due West. He is due in Vancouver on the 31st of March but hoped to return about the 25th, that is D.V. and W.P.

He states that, due to his continual walking, his physical condition is perfect. He has not been ill one day for over ten years. He dearly loves his pipe but is an excellent example for the temperance cause, as he claims that a man cannot keep in good physical condition and flirt with "John Barleycorn."

He had the experience of spending a couple of days in jail as a vagrant, for part of the contract is that he earns his living as he goes along. However, when he established his identity as being the "walking wonder of the world" the magistrate who sentenced him and his jailer made haste to liberate him, so that he could continue his walk.

He told some great stories as to his experiences on the road, but space and time will not permit the recording of same. He certainly regaled his audiences with some very exciting stories and the SHOE AND LEATHER JOURNAL along with the Kilgour, Rimer Co., Limited, hope that he arrives on time at the Western Gate of Canada.

### WINNIPEG FIRM IN NEW BUSINESS HOME

The Ryan-Devlin Shoe Co., who for many years did business on Main street, Winnipeg, have removed to the Paris Block on Portage avenue, in that city, where they have a splendidly fitted up store. In an inaugural announcement in connection with their new business home, the firm make some timely observation on western style tendencies which will be read with interest. The latest season's novelties in an excellent selection of smart models for the spring, greeted one immediately upon entering the store. The new styles are in keeping with the fuller skirts of girlish lengths and will set off the spring costumes to advantage. The newest and most exclusive of the many shoes are of a very high cut, 11 inches from the ground up, and softly and closely hug the ankle curves. This particular model comes in dove grey, Persian ivory, Sylphine white and purple. Another model is of soft black kid, buttoned, with a Louis heel. Patent leather seems to have taken second place with vici kid. An immensely smart and effective shade of brown known as "Tete de Negre" will usurp the place of glistening bronze which has for so long held first place. The advent of warm weather will welcome in the pumps and low shoes suitable for that season. The plainest models characterize this season's collection and are all more or less on the colonial lines. A smart and dressy shoe on view combined patent leather and vici kid.

The hosiery acclaims the period of 1830. While black and colored models which match the shoes in tone are very noticeable, in many cases they show artistic embroidery in self or contrasting shades about the ankles.

# Styles in Autumn Men's Shoes

Long Forepart with Broad Tread Seen in Best Lines—Medium Narrow and Somewhat High Round Toes Prevail—Tendency is Toward Plainer Patterns Although Some Extremes Are Seen—Dull Shades of Leather Are Favored

As to shapes, the English last will be the vogue as for several seasons past, although there may still be had the broader and fuller styles. The tendency is strongly toward the custom or "bespoke" effect all through and in both black and tan this ideal is carefully sought. For this reason the long forepart with a broad tread are seen in the best lines. Laced shoes or balmorals will largely supersede blucher cuts.

## As to Leathers

A large percentage of men's shoes will be made in vici, followed closely by gun metal. Patent leather naturally loses its strong position for fall wear and comes third. It is marvellous the amount of vici that has been sold during the past season, on account of the scarcity of calf. One manufacturer states that he expects to make fully half his men's goods in this class of stock next season. Gun metal lends itself naturally to neatness and worth in men's shoes. The dull shades of leather are favoured throughout for fall wear, during which period less shiny leather will be in evidence.

## Where Tans Come in

There is a good sprinkling of tans in calf and grain and the tendency is helped by the prevalence of the army shoe. Military effects are sought on this line such as plain vamps, blucher cut, low heels and broad shapes. In the regulation English shape of course the usual characteristics are followed.

## Toes, Heels, Shanks

The medium narrow and a somewhat high round toe prevail, and the foot is elongated from a size to two sizes to give the breadth. Very little ornamentation or perforation is found. The edges are trimmed close and straight and heels are from seven-eighths to one and one-eighth as a rule. Shanks are fairly wide except where higher heels are used, when they are made somewhat narrower.

## Combination Soles Used

On account of the scarcity and high price of sole leather some manufacturers are introducing substitutes in soles both of fibre and rubber. Some

of the latter have been in use on the other side of the line for a considerable period and are giving good satisfaction. A prominent Canadian shoe manufacturer who was in the SHOE AND LEATHER JOURNAL office the other day was wearing a pair of compo soles to satisfy himself just what they will stand in the way of wear. Rubber heels are also going to be largely used.

## Plain Styles the Vogue

While there is some tendency to ornamentation in extreme styles such as shown on this page, the tendency is towards plain patterns. Occasionally one finds a pair of high class shoes with a little perforation or fancy stitching, but strictly speaking, the best shoes will be decidedly plain. In fancy lines, however, the wing tip will be found as the strap effect in the ultra women's styles.

## Men's Summer Goods

With the summer goods for men, particularly Oxfords, there is a tendency towards the ornate. Sporting shoes all exhibit the disposition towards tips, straps and profuse ornamentation, that causes them to vie with women's shoes in "millinery" effects. Some of the tan shoes as well as combinations of white and tan would make one think that the eccentricities of feminine footgear had awakened a corresponding fit of hysterics amongst the male set as to foot coverings.

## The Swing Last

Notwithstanding varying opinions and the consistent efforts of last makers, the swing last has not been materially shaken from the strong position in men's lines by the stampede for narrower shapes. Its naturalness makes it a favorite with so many men, and particularly business men, that its position is assured for a considerable period. It fits the majority of feet and fit counts with the retailer as well as the customer.

SOME ECCENTRIC MEN'S STYLES FROM AMERICAN SOURCES

# Rubber Selling is Very Brisk

Placing Order Business So Far is Ahead of Last Year—Companies Showing Many Attractive and Original Designs—Prices of Raw Rubber Continue About the Same—Good Rubber Weather Thus Far

**T**HE past two weeks have been a boon to the retailer as far as rubber footwear is concerned. The absence of snow and cold weather in many localities earlier in the year was having a decidedly discouraging effect upon rubber footwear sales, and on this account not only retailers but manufacturers were a little anxious with regard to the opening of the new rubber season. Within the past fortnight, however, enough snow and slush have been developed to give a final spurt to this line of trade and as a result happiness reigns from Dan to Beersheba in rubberdom.

## How Goes the Battle?

In the last two weeks every hotel in Canada has been inundated with rubber shoe travellers and the air made redolent of rubbers and their accompanying pungent odors. As far as can be learned the results have been satisfactory. There has been a little holding back on the part of those who like to see the last of one season's purchases before contracting for those of another, but as a rule the buying has been prompt and generous. Retailers are not only pretty well cleared up as to stocks, but seem impressed with the tendency in all manufacturing products to advance and the likelihood of rubber more than almost any other raw product to be further enhanced in value by the progress of the war. The fact that a reduction rather than an advance was placed on the new lists helped further to decide the minds of large buyers who really take no risks in purchasing at present figures.

## A Notable Feature

A remarkable feature of the rubber season's showings is the larger number of departures from the ordinary lines seen not only in tan, white and other colors, but in the plain black. The companies seem to be at least vieing with each other in the attractiveness and originality of some of their designs and are to be congratulated upon the advance the whole line shows over the goods on the market five or ten years ago. Notwithstanding the scarcity of materials such as cloths, linings, etc., the finish and appearance of the goods are thoroughly up to the mark and evidence progressiveness that is a comment upon the character of the men at the head of the rubber shoe industry of this country.

## Raw Rubber Conditions

While prices fluctuate slightly from day to day, the situation is about the same as at the first of the month with the tendency towards a higher basis.

Fortunately supplies are coming in fairly well and that is keeping the market steady and manufacturers happy. Nevertheless, stocks of raw materials are being regularly cleaned up as they are offered, and it only needs the loss of a cargo or the sudden interruption of traffic to set prices soaring. Para up river fine is quoted 78c, and latex pale crepe at 98c. So that raw rubber is practically on the dollar basis for the present with the prospects of a change for the other side of the dollar mark at any time.

## How Times Change

It is wonderful how Para or "wild" rubber has given way before the oncoming of the cultivated product. About fifteen years ago it was frequently stated that rubber tree planting was a fad that would soon prove its impracticability. It was pointed out that their cultivation meant the exposure of white men to the malarial and other dangers of a tropical climate, and that even if it were possible to produce rubber successfully there would not be enough in the business to warrant the investment in money and human life. It was confidently predicted that the nature of "Para" and even the crude methods of curing it, would always give it pre-eminence. In the last ten years we have had in raw rubber another evidence of the superiority of modern intelligence and methods over that of nature and savages. Although the supply of "cultivated" rubber has far exceeded all anticipations, and it has now become a prime factor in the rubber situation, the price on account of sheer quality has advanced until the positions of the "wild" and "cultivated" have been quite reversed as far as the market is concerned. While Para was quoted two or three years ago at 75c and latex at 50c, we have the contrast in conditions afforded by the quotations given in the previous paragraph, which, to say the least, is startling.

## Tennis Goods

Already the demand for further supplies in sporting goods is being felt by rubber shoe handlers. It is expected that notwithstanding the war, outdoor sports will begin earlier this year than usual, but there is another feature that has entered into the situation. The adoption of the light and fantastic in leather shoes and the incorporation with these styles of rubber soled lines will create a stronger demand than ever for tennis goods for ordinary purposes and notwithstanding increased prices there will be a good demand for these lines.

## ROUGH SAILING TO THE MATRIMONIAL PORT

**Bride of Popular Shoe Traveler was Wrecked at Sea and Rescued Son of Welland Shoe Merchant—Lost Her Trousseau and Valuable Gifts—On Second Trip the Young Lady Had Thrilling Experience and Hair Breadth Escape—Peace and Quietness in New Home**

**A** BRIDE is not often called upon to go through the many thrilling experiences of Miss Gladys Victoria Ray, late of Bitterne Park, Southampton, England, who, on February 26th, became the wife of Robert D. Ayling, shoe traveler of Toronto.

The ceremony was performed in St. Paul's (Anglican) Church, Toronto, and the happy couple have taken up their residence at 68 Orchard View Boulevard, where Mrs. Ayling will doubtless welcome the quietness and peace of her happy home.

She saved the life of a former shoeman when the ocean liner Hesperian was torpedoed last September by a German submarine, and now has become the life partner of a highly esteemed Toronto traveler. Owing to the disaster which befell the ship at sea, her wedding was delayed several months, for Miss Ray lost her bridal trousseau and several valuable presents. She was taken back to England battered and bruised, and recently came over to America on the New York, fearing that to embark on another British ship might prove fatal. She did not desire a repetition of her former thrilling experience when the Hesperian went down. She, however, fared little better, for while no submarines hove in sight, the wind and waves nearly wrecked the vessel, which came within four degrees of turning turtle, and in that case all on board would have been lost. The New York has been twenty-seven years in commission and the voyage was the worst the liner ever experienced.

Seven life boats were swept away, her twelve-inch steel davits were twisted and bent, the wind attained at times a velocity of ninety miles an hour and the waves rolled seventy feet high. The sea was so rough that the Liverpool pilot could not get off and had to come all the way across.

### Rescued Wounded Canadian Officer

But to go back to last September. Miss Ray (now Mrs. Ayling) was standing at Euston Station, London, ready to leave for Canada where she was to be married. As she was chatting with friends, a Canadian officer, borne on a stretcher, was taken to the train. Now this officer happened to be Captain Reginald Reilly, son of C. H. Reilly, shoe retailer of Welland, Ont., and for some years associated with J. D. Reilly in the shoe line. "There goes a wounded Canadian officer," some one remarked. Miss Ray saw that officer again under vastly changed circumstances. The vessel, on which they embarked, was the Hesperian, and was sunk at sea by a German torpedo. Two of the life boats in which Miss Ray got, capsized, but having a life preserver and being able to swim some, the plucky lady finally got into a third one that was drifting by.

Captain Reilly owes his life to the heroic and thoughtful action of Miss Ray, who rescued him from the water and kept the leaky craft afloat for four long hours, until assistance finally came. It seems that the craft had been lowered without a plug and the water came in so rapidly that it threatened to sink. Miss Ray made a plug out of a cap and half a dozen coffee spoons which helped to keep the boat above water.

On reaching London she found the city bombarded by Zeppelins in an air raid, and the next day she received

word that her brother in the British army had been killed in action at the Dardanelles. On her return to America Miss Ray was destined to go through another hair-raising experience on the New York, as already narrated.

Seldom has the course of love run so roughly as it did in the case of this bride, but after excitement and sensation enough to last the average person a life-time, she is now happily wedded. Among the guests at the wedding in St. Paul's Church, Toronto, was Capt. Reginald Reilly, whose life she saved at sea, by her courage and presence of mind. The captain was the guest of honor, although he had to be taken to the church and back to the hospital at the Ex-

Robt. D. Ayling, Toronto

hibition Camp in an ambulance. He has not yet recovered the use of his wounded leg, but is progressing favorably. Mr. Ayling and bride spent their honeymoon in Welland, as the guests of Mr. and Mrs. C. H. Reilly, the parents of Captain Reilly, who was wounded at Ypres.

### All His Life in Shoe Business

Mr. Ayling has resided for three-years in Toronto and is widely known to the shoe trade, representing Church & Co., shoe manufacturers, of Northampton, England. He has sample rooms in the Canadian Building, Victoria street, and covers Canada from Halifax to Winnipeg for his firm, who make men's high grade welts and specialize in men's turn pumps, golf shoes, Scotch brogue golf shoes, walking and tennis shoes. Other products of this historic firm are high class overgaiters for men and women, in melton and serge, and military leggings in genuine pig skin and tan and black calf, which have taken well with the Canadian trade and retail at from five to ten dollars. Mr. Ayling has been in the shoe business all his life, being born at Beckenham, Kent, England. His father and grandfather were shoemakers and his uncle was engaged in the manufacture of footwear.

## AMONG THE SHOE MERCHANTS, TRAVELERS AND WHOLESALEERS—WHAT THEY ARE DOING

E. B. Paige, of the Regal Shoe Co., Toronto, has returned from a business trip to Boston.

A. L. Johnson, general sales manager of Ames-Holden-McCready, Montreal, spent a few days in Toronto this week. F. M. Morgan, manager of the Winnipeg branch of the firm, was also in Toronto recently on his return to the west after a visit to Montreal.

W. H. Miner and A. M. Angus, of the Miner Rubber Co., Montreal, were in Toronto this week on business.

Peter Gauthier, of Ottawa, was in Toronto this week on his way home from St. Catharines, where he was visiting his daughter. Mr. Gauthier, who has been many years on the road in the shoe selling game, has lived in Ottawa for the last fourteen years and represents Jackson and Savage and the Miner Rubber Co. He was recently appointed manager of the latter company's branch in the Capital.

The Carey Shoe Co., 142 King St. East, Toronto, who recently installed a handsome new front to their store, are now having the interior remodelled and attractive new fixtures placed in position.

Percy J. Steele, of St. John, N.B., has returned from Halifax after completing a course in the Royal Military Training School. At present he is not attached to any battalion as his business requires his personal attention. He is having several alterations made in his Main street store and when they are completed he expects to take a position as Lieutenant in one of the battalions under formation.

Robert Duncan, a well-known tanner, died in Woburn, Mass., February 28th. The deceased was born in St. John, N.B., May 15th, 1855. When a young man he went to the States and learned the tannery business. Later he returned to New Brunswick and took charge of a tannery in Woodstock. Six years later he went to Woburn and opened a tannery under the name of McDonald and Dunne. In 1891 he dissolved partnership and went to Boston where he engaged in business. Two years ago Mr. Duncan's health became impaired and he retired.

Trade throughout St. John, N.B., is beginning to pick up, due to the breaking up of winter. Many rubbers are being sold and in addition a large quantity of leather goods is being disposed of. Owing to the lateness of Easter there is little or no indication of the usual spring rush.

M. Winestock, shoe dealer, Toronto, recently assigned to N. L. Martin.

Ed. Cook, secretary of the Toronto Shoe Retailers' Association, has returned from New York, where he attended the funeral of a relative.

Utz & Dunn, shoe manufacturers, Rochester, N.Y., have twenty-three salesmen on the road for the fall selling season, covering the United States and Canada. Murray W. Crosby will as usual look after the provinces of Ontario and Quebec. He is well known to the trade.

James Long, who has been with J. E. A. Snider, shoe retailer, 1474 Yonge Street, Toronto, has enlisted with the 198th Battalion for overseas service.

In the finals for the Governor-General's prizes in the Montreal-Ottawa Valley district, two rinks from Pembroke carried off the honors, defeating the Thistles of Montreal by twenty-five shots. In one of the quartettes D. K. Grieve, of Grieve Bros., shoe merchants, Pembroke, played third and in the other J. E. Wallace, who is also in the footwear line in Pembroke, played second.

The Independent Rubber Co., Merritton, have just completed delivery of 15,000 trench hip rubber boots for the British War Office and have been highly praised on the

durability and workmanship of the goods, not one pair being rejected. The Independent factory is now completing a large order for the Department of Militia and Defence, Ottawa, for heavy plain-overs in tan.

The shoe store of C. C. Allan, 1422 Queen street west, Toronto, was visited by a serious fire on March 2nd and completely gutted. The damage to the stock was about \$4,500 and to the building \$1,500. Mr. Allan and his wife had a narrow escape from serious injury, reaching safety from an apartment above. The blaze broke out in the rear of the store and when the firemen arrived they found the premises full of smoke.

J. F. Lacombe, shoemaker, of Grand Mere, Que., assigned recently.

The McRobbie Shoe Co. have opened a new Walk-Over boot shop at 786 Granville street, Vancouver. The interior is very inviting and attractive and the front is unique. It has an arched entrance with two very wide windows and also a showcase window several feet back from the sidewalk, with doors at each side of the latter window. The new establishment is among the finest shoe stores in Canada.

Knechtel & Co., of London and Stratford, have opened a new shoe store in Woodstock, Ont., in the premises formerly occupied by the Bank of Nova Scotia at the corner of Dundas and Brock streets.

W. V. Matthews, manager of manufacturing for Ames-Holden-McCready, Limited, Montreal, announces the appointment of J. Marcoux as superintendent of No. 1 factory, and A. L. Johnson, general sales manager, announces the appointment of B. Mullarky as styles service man for the three plants of the company.

E. L. Cass has accepted the position of superintendent of the James Muir Co., shoe manufacturers, Maisonneuve. He is widely known and thoroughly experienced in the shoe-making line.

The majority of the shoe retailers in West Toronto have joined in the Wednesday afternoon closing movement, starting the first of the month. The arrangement for weekly half holiday is working satisfactorily and it is expected that all shoemen will fall in line shortly.

Eaton's Shoe Market, 478 St. Catherine St. W., Montreal, was damaged by fire which broke out a few days ago in Montreal.

J. E. Edwards & Son, Limited, leather goods manufacturers, Toronto, have been incorporated with a capital of \$150,000.

R. E. Dildine, who has been appointed to take charge of the advertising and promotion work for Ames-Holden-McCready, Limited, Montreal, is well qualified to fill the position with success, as for four years he conducted the shoe section of the Dry Goods Economist, New York, and has handled the advertising of several large American footwear manufacturers. Latterly he has been identified with Printer's Ink, of New York, in an editorial capacity.

William Villeneuve, who was for 16 years manager of the footwear department in one of the leading business houses of Quebec, has now taken charge of the shoe department of Messrs. Mareau & Co., in that city.

The clerical staff of Waterbury & Rising, Limited, St. John, entertained two of their former associates at a banquet held in the Manor House, Glen Falls; recently. The guests of honor were Sergeant Joseph B. Patchell and Private Joseph P. O'Brien, two former members of the staff who donned khaki a short time ago and are now attached to the 140th Battalion. The former was manager of the Main street branch store and the latter was in the repairing department. About

fifty were present at the banquet. After the many good things had been disposed of C. Henry Smith addressed the gathering. He paid a glowing tribute to the patriotism of the clerical staff who had given up remunerative positions to join the colors and had gone forward to combat the common foe. Richard J. Walsh was the next speaker and after adding a few complimentary remarks to that of his predecessor presented to Private O'Brien a handsome wrist watch suitably engraved. Sergeant Patchell was the recipient of a similar token of esteem a few weeks ago. Harold W. Rising then arose and on behalf of the board of directors gave each of the young soldiers a substantial check. Both were surprised and suitably replied.

Neil McDonald, assistant manager of Beardmore & Co. sole leather tannery, Acton, Ont., was called to Ethel recently, owing to the death of his aged father.

The Haines Shoe House recently moved into attractive and admirably fitted up new quarters in Smith's Falls. The new home is one of the brightest business places in that progressive town. A. L. Wright is the aggressive manager of the Smith's Falls branch of the firm and the way the alterations have been carried out and the improvements effected reflect great credit upon him. The front of the new store is a work of art, and the interior is quite in keeping with the imposing exterior appearance. The indirect system of lighting has been installed, and a ladies' department has been nicely fitted up with mirrors.

A provincial charter has been granted to the Overland Tire Rubber Co. The capital stock is \$50,000, with headquarters at Montreal. The company is empowered to carry on the business of manufacturing and selling in rubber of all kinds or merchandise composed in whole or in part of rubber, etc.

Hon. E. J. Davis, of the Davis Leather Co., Newmarket, has returned from a business trip to Boston and other eastern centres.

John Coutts has opened a shoe repair shop in Wallaceburg, Ont.

D. J. M. McGeary, manager of the Royal Shoe Store, Saskatoon, Sask., was in Toronto, Montreal and other points east on a business trip recently.

R. H. Greene, manager of the footwear department of Gutta Percha and Rubber, Limited, Toronto, is spending a holiday at Pinehurst, South Carolina.

J. A. Ingraham, Sydney, is now representing Jas. Rob-

inson, Montreal, in Nova Scotia, succeeding the late D. C. MacDonald, who for over a quarter of a century covered that territory. Mr. Ingraham is the son of the well known Sydney shoeman and did the buying for the firm for fifteen years.

E. T. Jacobi, Toronto, has returned from a recent business trip to Boston and other eastern shoe centres.

R. J. Wiswall, representing Herman Behr & Co., New York, visited Montreal manufacturers in company with Bert Parker, of Parker, Irwin, Limited, Canadian representatives of the firm, this week. Mr. Wiswall is quite an enthusiast on Carbi-con, both moulded and flat, and enjoyed his experience in Montreal, particularly as he happened to strike the big snow storms.

O. H. Vogt, managing director of the Great West Felt Co., Elmira, Ont., was in Toronto last week calling upon the trade.

W. A. Donald, manager for A. F. Clapp & Co., sheep skin tanners, Boston, Mass., was in Toronto recently on business.

Aubrey Davis, vice-president of the Davis Leather Co., Newmarket, has taken out a commission as captain, and will likely be attached to the 220th, filling the office of quartermaster. The Davis Leather Co., of which Hon. E. J. Davis is the head, have given some \$2,700 in equipment to the York Canada Overseas Battalion, as well as some of the best workmen of the firm. Liberal contributions have also been made by the firm to the Patriotic and Red Cross funds.

A meeting of the traveling salesmen of the Perth Shoe Co. was held in Perth last week. Many matters of importance were considered, among them samples, styles, etc., for fall selling. The factory is very busy at present, running to full capacity on high cuts in white, grey, brown and black, for which there is a large demand.

The Montreal shoe manufacturers propose to get together in order that they may know one another better, and that in the interests of the whole shoe trade in their vicinity and their customers throughout the country they may study the unprecedented conditions which confront them. A preliminary meeting has been held for the purpose of discussing how the whole situation can be handled most advantageously for the whole of the trade, but nothing was done pending a further study of the matter. Geo. A. Slater,

Attractive new high cut models in battleship grey, Havana brown and white—By the Blachford Shoe Manufacturing Co., Toronto

## Style Distinction

is always noticeable in

# *Classic Shoes For Women and Children*

Get the line whose reputation is firmly established from coast to coast—the line that has placed “Made in Canada” Footwear on a par with the very classiest imported lines.

High cut Bal. in all the leading shades of kid or calf leather.

### “In Stock”

A complete range of timely styles—106 all told—featuring the smartest novelties in last and pattern, made up to the CLASSIC standard of quality and finish.

## Getty & Scott, Limited

Galt :: Ontario

Chairman of the Manufacturers' Section of the Canadian Press Association, presided.

The employes of the Independent Rubber Co., Merriton, Ont., gathered in the shoe room recently and presented Alfred Clark, who is leaving for overseas service with the 49th Battery, with a gold ring and an appreciative address beautifully illuminated.

Major W. G. Pink, of the 220th York Rangers Overseas Battalion, who has been in the retail shoe business at 278 College street, Toronto, for some years, has sent out notices to his customers that, until the Empire has concluded a victorious peace, he will give himself entirely to his duties in the service of our King and Country. He has made arrangements with Wm. Howarth, Toronto, who has had considerable experience in both the wholesale and retail shoe line, to take charge of his business during his absence.

The girl employes in the fitting department of the Weston Shoe Co., Campbellford, have forwarded a check of \$25 for the purpose of supplying a cot in Queen's Base Hospital at Cairo, Egypt.

H. S. Campbell, shoe retailer, Queen street, Fredericton, N.B., will remove shortly to the premises occupied by Parent, Bird & Co., in that city.

T. C. Forman, of Port Perry, Ont., who has been in the hospital for two months suffering from cancer, is making good progress.

C. P. Brown, son of Thomas Brown, Colborne, Ont., has enlisted and is now in training for service at the front.

The Parrott Shoe Co., Saskatoon, Sask., recently made an assignment to the National Trust Co., and a meeting of creditors was held on March 10th.

Elmer Turner, late on the staff warehouse of McLaren & Dallas, Toronto, has gone to Port Hope, where he has enlisted for overseas service.

W. L. Francis, who has been appointed sales manager for Gales Bros., Quebec, was in Toronto last week on business. He is a son of W. P. Francis, superintendent of the John Ritchie Co.

H. D. Wing, of the United Shoe Dealers, Parry Sound, Ont., spent a few days in Toronto last week on business. Among other representatives of the United Shoe Dealers, who were also in the city, were Wm. McDowell, North Bay; B. D. Menzies, Sudbury, and M. H. Sisson, Lindsay.

The Craft Fashion Shoe Stores of Montreal have assigned.

James I. Foy, formerly of the staff of D. D. Hawthorne & Co., Toronto, who left on January 12th for England, to join the Imperial Army Service Corps, mechanical transport, in a recent letter received by his father, J. W. Foy, states that he passed the required examination with flying colors, nine days after his arrival, and has been appointed driver of a convoy. He is now at Grove Park, Lee, S. E.

W. A. Hamilton, of the W. B. Hamilton Shoe Co., Toronto, has returned from a business trip to Montreal and Quebec.

A. S. Many & Co., shoe dealers, Montreal, have assigned.

Harley Henry has sold out his retail shoe store in Saskatoon, Sask., to J. C. Laurant, of Chesley, Ont., and the new firm name is Laurants, Limited. Mr. Henry will devote his entire time to the wholesale shoe business, in which he is widely known.

The Fifth Avenue Shoe Co. has leased the premises at 119 Yonge street, Toronto, formerly occupied by the Brockton Shoe Co.

Waterbury & Rising, of St. John, N.B., advertised some time ago for a name to be applied to their new line of women's shoes and received a couple of thousand replies. From that number they selected the name "Winnie Walker." They are now placing this line of footwear on the market and the various styles are being exhibited in their windows. They are also exhibiting the "Romper" shoes for women and children.

In a fire which broke out recently in Revelstoke, B.C., the McRae Mercantile Co., dealers in shoes and men's furnishings, were burned out, the stock being a total loss.

The Knechtel Shoe Store, which was recently opened in Woodstock, Ont., gave five per cent. of their total receipts on March 1st to the Woodstock Red Cross Society.

A leading findings firm has sent out a notice to the effect that their terms of sale on all goods is now two per cent. 30 days or net 60 days. On standard lines where existing lists are subject to a cash discount of 5 per cent., their prices are reduced to conform with the terms. Owing to the sudden and repeated advances in so many lines, they have taken the above reduction in discount into consideration, and have only advanced prices accordingly.

Gutta Percha and Rubber, Limited, Toronto, have been granted a permit to erect a one-storey storage shed on West Lodge avenue, Toronto, at a cost of \$4,000.

The members of the firm of Waterbury & Rising, of St. John, N.B., assembled recently, when the genial manager, E. L. Rising, after an appreciative reference, presented J. C. Featherston with a gold watch and chain in recognition of services rendered to the firm during a quarter of a century. The watch bore the recipients monogram and was suitably engraved. Five members of the firm have been remembered in a like manner for long and faithful service.

#### HAVE CLOSED GOOD YEAR'S BUSINESS

There are perhaps no more widely known salesmen calling on the shoe trade of Canada than the four gentlemen seen in the accompanying group. They have just closed a splendid year's business in the interest of their firm, Philip Jacobi, the old established shoe store supply house of Toronto, which has been in existence for over fifty years. On

the left is E. W. McTear, who covers Western Ontario and the Maritime Provinces and has been with the firm twenty-nine years. Next, is W. D. Fox, who looks after Northern and Eastern Ontario and Quebec Province. George J. Scott is the third gentleman, whose ground is from Winnipeg to the Coast, and then comes W. E. Young, who calls on the trade in Hamilton and Toronto.

Most any style or material in all-white top or all-white shoes is selling just as freely now as if it were mid-summer. To carry the vogue for white as far as possible, a special prepared white stain for the edges and heels of white shoes has been put on the market. White "ivory" soles are now being used successfully in turn work, especially in infants' shoes. Gray kid vamps, with gray ooze quarters to match, are selling well now in women's high-cut lace boots. The same effect is favored in patent leather vamps and white calf quarters. The call for tan shoes for men, women, and children is said to be getting stronger every day.

The Listowel Shoe Co., Limited, of Listowel, Ont., will manufacture a line of boys', youths', misses' and girls' McKay and loose nailed shoes. F. Nolinisky, of the Ideal Shoe Company, Elmira, is the managing director, and W. W. Metz, sales manager. The company is capitalized at \$40,000 and it is expected the new factory will be completed and the plant installed early in June.

L. M. Stock, who represents Walker, Parker & Co., Toronto, throughout western Canada, left a few days ago on his semi-annual trip.

W. E. Wilson, of London, who was the promoter of the Owen Sound Shoe Co., Owen Sound, and was arrested on the charge of bigamy, was committed for trial by Police Magistrate Judd. His case will be heard at the Spring Assizes, which open in London on March 20th.

Beardmore & Co. and Acton Tanning Co., Acton, Ont., have advanced the wages of their workmen who work by the day, by 10 per cent. This increase does not include piece-workers and foremen. The advance means a considerable aggregate to the three or four hundred men effected.

Ed. Dunbrook has opened a new shoe store, 30 King street west, Berlin, Ont., and has fitted it up in good style. A repair plant has also been installed.

T. R. Henry, Saskatoon, has taken over the boot and shoe business in North Battleford, formerly owned by his brother, Harley Henry, of Saskatoon, and managed by J. A. Little during the past twelve months.

G. J. Scott, Western Canada representative of P. Jacobi, shoe store supplies, Toronto, left last week on an extended trip throughout the Prairie provinces.

#### OPENS NEW SAMPLE ROOMS

Henry Martineau is now handling Eagle shoes in Montreal on St. Lawrence street west. Mr. Martineau, who is one of the most favorably known travelers in Eastern Canada, was for many years identified with Ames-Holden-McCreedy, and is a thorough shoeman who can get the business. He has opened sample rooms for the Eagle Shoe Co.

Henry Martineau

E. A. Marchildon

in the La Patrie building, on St. Catherine street, where he hopes to have the pleasure of frequently meeting his many friends in the trade. He will also cover Quebec City.

E. A. Marchildon continues to handle the Eagle line in the Eastern section of Montreal and in Quebec Province outside of the city of Quebec. Mr. Marchildon has been in the business for so many years that he knows most of the trade by their first names.

Chas. A. Blachford, of the Blachford Shoe Manufacturing Co., Toronto, is spending a few days in Montreal and Ottawa on business. F. P. Beemer, Western Canada representative of the company, leaves next week on an extended business trip through the West.

H. R. Emery, of Blachford, Davies & Co., Toronto, spent a few days in Montreal last week on business.

A. L. Dupont, of Dupont & Frere, Maisonneuve, called upon the trade in Toronto during the past week.

A. J. Beer, boots and shoes and harness, Summerland, B.C., is taking over the shoe stock of the Summerland Supply Co., Limited.

The revised price list for sole leather which went into effect on March 1st, is—Spanish sides, No. 1, 42½c. in ten sides or more, 43½c. in less than ten sides; trimmed backs, 33 1-3% trimmed, No. 1, 54½c. and 55½c.; trimmed bends, 50% trimmed, No. 1, 60c. and 61c.; oak sides (Canadian), No. 1, 45½c. and 46½c.; oak backs, No. 1, 59c. and 60c.; oak bends, No. 1, 64c. and 65c.; hemlock roundings, 29c.

A leather merchant is selling a new line of sheep leather that looks like kid leather, and that has some of its merits. He found that when he rolled it in lots of one dozen skins, like sheep leather, he could not interest buyers very much in it. But when he rolled it up in lots of two dozen skins, like kid skins, some buyers showed surprising interest in it.

T. L. Marshall, Toronto, shoe dealer, has removed from 982 Queen street west, to 1026 Bloor street. For the past few weeks Mr. Marshall has been disposing of a surplus stock at the Queen street store at bargain prices, and will continue to do so until his lease expires at the latter address.

The Home Shoe Co., Limited, has been incorporated in Montreal and will carry on business as general wholesalers. Their authorized capital is \$25,000 and J. H. Tetreau will be managing director of the new company and W. L. Laplante, secretary-treasurer. Their establishment will be at 326 Amherst street, where, up to the present, the business of Bouthillier & Tetreau was carried on.

H. E. Wettlaufer, sales manager of Charles A. Ahrens, Limited, Berlin, left last week on a trip to California.

G. A. Blachford, of the Blachford Shoe Manufacturing Co., Toronto, is spending a few days in Philadelphia, New York, Boston and other centres, picking up the latest style pointers for the coming season.

Walter Stevens, of the Murray Shoe Co., London, Ont., spent a few days in Montreal lately.

L. S. Odell, jr., of Montreal, was taken ill recently in Toronto and underwent an operation for appendicitis. He has been covering the Montreal trade for his father, with whom he is associated in business.

Harvey Lintott, who has been connected with the shoe business of F. Sutherland, St. Thomas, for a number of years, has taken a position in the St. Thomas store of Johnson and Murray.

#### THE HAPPENINGS IN OLD QUEBEC

The stock of Alf. Boivin, whose store was burned a few weeks ago, was sold to Demers & Roberge, of St. Joseph de Beauce.

J. A. Langlois and Jos. Plamondon are among those who have returned, after a business trip to New York, Boston and other shoe centres.

Jos. Tanguay, formerly of the Rock Shoe Co., has bought the machinery of this firm for \$400. The factory was burned on January 1st and liquidation came some time afterwards. The building has been sold to Geo. F. Amyot, corset manufacturer.

Among the callers on the trade in Quebec during the past few days, were Geo. G. Parker, of the Boston Last Co., Richmond; A. C. Woods, Cotton Threads, Limited, Montreal; J. F. Lemieux, of Keifer Bros., Montreal; John

122 Adelaide Street W., TORONTO

492 St. Valier Street, QUEBEC

E. Maguire, of the Metal Product Corporation, Providence; E. Boudreau, Dunlop Tire & Rubber Co.

E. Tremblay, shoe manufacturer, was in Montreal recently. Alf. Dupere, of Dupere & Garant, was also in Montreal on a business trip last week.

It is reported in Quebec that three new shoe factories will shortly be established in that city. All the plants are still running full but shoe findings are very dear. It is very difficult to get Dongola kid and sheep skins, while sole leather has advanced considerably of late. Box calf has also taken a jump of 2c. and the price of gunmetal calf has gone up another cent, making it 37c. White cotton has ascended 2c., and black cotton 5c. a yard. Prices are very firm in all other supplies.

The estate of L. Gauthier Co., insolvent, Quebec, was sold February 29th, in the offices of Messrs. Lafavre &

Gagnon. The building was bought by Lagace & Lepinay for \$35,200, and the machinery not attached to the building, went to Chas. E. Roy & Co., at 30c on the dollar. This firm also purchased the leather, threads, welting, etc., at 67c. on the dollar. The shoes, amounting to \$1,185.18, were disposed of to M. Cummings at 63c. on the dollar. Legace & Lepinay, who purchased the building, and manufacture men's, boys' and youths' McKays, also acquired the lasts, patterns and dies, amounting to \$11,514.59, for five and one-eighth cents on the dollar. The factory fixtures also went to this firm for \$3,724.51, as well as the office fixtures for \$737.10. Three safes were sold, the purchasers being James Scott, Legace & Lepinay and Max Clement. A stock of chocolate dongola amounting to \$1,205.47, was sold to James Scott for \$1,065.00. Book debts, \$7,687.47, went to Jos. Gagnon at 2c. on the dollar.

## SNAPPY NEW MODELS FOR FALL, 1916

MODEL No. 123

Buyers interested in Men's Welts, to retail from \$4.50 to \$5.50, are invited to give special attention to these two models for Fall, now being shown by our salesmen.

No. 123—Men's Velours Calf Button, long vamp and toe effect, heavy single sole, 7/8 heel.

No. 133—Men's G.M. Calf Bal., matt top, nature form last, heavy sole, 1 inch flange heel.

While they are but two of our samples, they reflect perfectly the result of the specialization in our factory. We make Men's Welts and nothing else.

The result is shoes that possess individuality, style, snap, all that goes to making a fine shoe that will sell.

Our salesmen are showing for the new season a line of samples superior to anything yet produced by us.

# SHOES

### FOR MEN

Naturally, you want a really reliable high grade shoe to meet the more particular demand.

And in both "Astoria" and "Liberty" you have the right line. Nothing can exceed their smartness of style or the perfection of every detail of workmanship and finish.

## Travellers Now Out

**Scott-Chamberlain**  
Limited

London

Ontario

The samples in the trunk of a Scott-Chamberlain salesman are an absolutely reliable guide to the shoe styles that *will be selling best* this coming Fall. They make your task of selection easier. And after you've made your selection you can *rest easy*. "Astoria" and "Liberty" shoes are shoe-style certainties.

# LIBERTY

## GOODYEAR WELT

# SHOES

### FOR MEN

One thing everyone notices in connection with "Astoria" and "Liberty" shoes is the knack they have of pleasing "on sight." Their lines are so graceful and their "snap" is built right into them. With a dressy man, to see them is to want them, and to BUY them is to be enthusiastically pleased with them.

## The New Fall Styles

Our range of new models for Fall include many brand new lasts that represent the most advanced styles in Men's Footwear. And they are all practical—made to sell and satisfy. We've no ambition to startle the world with freak stunts, and select our models with cool discrimination, giving you novelty styles that are also thoroughly reliable sellers.

# THE "MONARCH" LACE

AS SUPPLIED  
TO THE  
ALLIED TROOPS

BRITISH  
MANUFACTURE

TAN

BLACK

Owing to the great demand for a really strong and durable lace to take the place of the leather lace which to-day is not only unreliable in quality but also very high in price, we have perfected and placed on the Market our New Royal Westminster "**MONARCH**" Lace. Sales to the present unmistakably demonstrate that it is meeting a real need, and is, in fact, a great success. The following nine reasons explain why the "**MONARCH**" Lace has achieved such a rapid and huge success, viz.:

1. The "**MONARCH**" Lace will not snap.
2. The "**MONARCH**" Lace is practically unbreakable.
3. The "**MONARCH**" Lace is cheaper than a leather lace.
4. The "**MONARCH**" Lace will wear longer than a leather lace.
5. The "**MONARCH**" Lace contains no grease or dirty dressing.
6. The "**MONARCH**" Lace is free from brand marks and cuts.
7. The "**MONARCH**" Lace does not soil the fingers.
8. The "**MONARCH**" Lace can be obtained in any length.
9. The "**MONARCH**" Lace is made entirely in England

**NO DIAMOND  
TRADE MARK  
NO FAST COLOR**

**NO DIAMOND  TRADE MARK  
No Fast Color**

Get this fact firmly fixed in your mind. It may be the means of saving you considerable annoyance and inconvenience; for, if you will insist that the diamond trade mark shall appear on the surface of the eyelets in the shoes you order, you will be entirely free from any complaints regarding "Brassy" eyelets. Fast Color Eyelets are the only kind that cannot wear "Brassy." They enhance the good appearance of shoes more than any other accessory used in their manufacture; and, made as they are, with celluloid tops of solid color, they do not grow old but retain their bright, new appearance long after the shoes are worn out.

The diamond trademark is a sure cure for all eyelet troubles. Only the genuine Fast Color Eyelets have it.

# NOW READY! ENTIRELY NEW!

## The Human Foot Anatomy, Deformities and Treatment

By DR. WM. M. SCHOLL, Chicago

This book has been written and published after repeated requests and demands of those in the shoe trade seeking practical information on the human foot in its normal and abnormal conditions. The book is written with a view of meeting the very requirements of the layman, as the dry, technical terminology has been dispensed with.

It is written in clear, plain style that everyone can immediately comprehend. Nearly four hundred pages, over three hundred illustrations and all pertaining to the human foot.

It is a volume that should be in the hands of every shoe dealer, shoe buyer, shoe fitter, shoe salesman, and shoe manufacturer.

### Partial List of Contents

## Smart New Lasts for Fall Selling

**W**HEN something really new evolves in shoe shapes, you can always rely upon seeing it first in the BRANDON range.

Our fall range demonstrates this very clearly, containing, as it does, the very newest effects.

BRANDON styles have forever dispelled the notion that it was necessary to go outside of Canada to get really classy men's lasts.

Right here in our BRANTFORD factory we are turning out shoe styles that can compete on equal terms with any that the whole world produces.

We are putting in a strong line of \$6.00 shoes in all widths B to E's. If the retail merchants would fit their customers with a longer and narrower shoe it would have a neater appearance and would enable Canadian manufactured shoes to look as snappy as American footwear.

See the BRANDON RANGE for certain before placing your fall order.

## Four Brands and the Factory that makes them

There is no finer specialized factory on the continent than that of the James Muir Co., Montreal.

It is modern in construction and equipment, its workmen are efficient and its management progressive.

Small wonder then, that its brands of boys' shoes to sell \$3 to \$4 and men's shoes to sell \$4 to \$6 are so popular with retailer and consumer alike.

## 22-FOOT GOODYEAR SHOE REPAIRING OUTFIT

**MODEL N**

**T**HIS Outfit represents the highest development in shoe repairing machinery, and meets every demand of modern shoe repairing. It embraces all the essential processes for making new shoes from old ones, giving the maximum of equipment and efficiency in the minimum space. The Outfit has the Goodyear Stitching Machine with all its improvements, including a new style steam generator which uses gas or gasoline for generating the steam, and operates automatically, thereby insuring a uniform heat for keeping the wax in proper condition and requiring little attention from the operator. The Edge Trimming Machine has the new feature of the two shafts, being operated by a single belt, and the cutter grinder is attached directly to the main shaft. This arrangement gives better results with less power.

The Buffing and Scouring Machine has a shaft 57 inches long and carries the following equipment:

- |  |                                   |
|--|-----------------------------------|
| 2 Split Bottom Buffing Rolls           | 2 Flat X-Ray Heel Scouring Wheels |
| 2 "C" Shape X-Ray Heel Scouring Wheels | 1 Heel Breast Scouring Wheel      |
| 1 Pin Wheel Pad Complete               |                                   |

A powerful Blower System removes the dust resulting from the trimming, buffing and scouring operations, and is designed to overcome certain objectionable features of other blowers.

The Finishing Machine has a 78-inch shaft which has all the necessary equipment for black or russet work:

- |  |  |
|--|--|
| 2 Corrugated Rubber Shank Finishing Wheels | 1 Corrugated Rubber Heel Finishing Wheel |
| 1 Corrugated Rubber Bottom Finishing Roll  | 2 Shank and Bottom Brushes               |
| 2 Heel Brushes                             | 1 Stitch Cleaning Brush                  |
| 1 Levelling Roll                           | 1 Bead and Wheel                         |

At the end of the Outfit is the Oscillating Edge Setting Machine which is fitted with union irons and in its motions duplicates hand workmen with quicker and better results.

Each of the machines is operated independently by a friction drive pulley, so that it is necessary to use only those machines which the operator may require. This feature means a saving of power.

All the machines are firmly mounted on legs and driven by a countershaft with carefully adjusted bearings, so that the Outfit runs with very little vibration, and is in every way most efficient.

SUPERIOR  
QUALITY

"LIFE-BUOY"  
RUBBERS

Mr. Retailer:

Fall Placing--If a 'Life-Buoy' salesman has not already called on you showing a full range of samples of our line for Fall Placing, drop a card to our nearest Branch; one of them will be glad to tell you why 'Life-Buoys' are your best purchase for next season. Our styles of lasts show sufficient selection to properly care for all the different shapes of leather shoes without unduly loading your shelves with too many corresponding styles and tying up too much capital unnecessarily.

Spring Sorting--Why not let us send you a sample shipment of 'Life-Buoys' now to test? Get acquainted with our lines, note their superiority in Wearing Quality and Fit, and other brands will, in future, be unable to satisfy your requirements.

Outing Shoes--Have you made ample provision for the first demand you will receive? Your requirements in these lines will undoubtedly be much heavier than usual, owing to their increasing popularity and the ever increasing cost of leather footwear. Let us have your order now so the goods will be on your shelves when you need them.

## WAR CONDITIONS IN SHOE AND LEATHER TRADES

**Leather and Shoe Manufacturers at Their Wits' End—Waiting for Things to Turn Up—  
Helpless in the Face of Conditions that Have Not Been Paralleled in the History of the Trade**

**I**N the leather business it may truthfully be said that one knows not what a day may bring forth. Conditions such as exist to-day have never been known amongst leather manufacturers. Nobody is looking for business and they hardly know what to say when it stares them in the face. "The strange thing is," said a tanner the other day, "that in spite of the fact that leather, especially light stock, is becoming so scarce that prices are going sky high, people are insisting on high cut shoes, using up from a third to a half more material than in normal times; and few manufacturers seem to encourage relief in alternatives such as cloth and other fabrics. It is this crowding of the situation that is making it so impossible."

A shoe manufacturer reviewing the situation said to the *SHOE AND LEATHER JOURNAL* quite recently: "Not only are a great many of the articles costing more but the high cost of labour and the scarcity of it have a great deal to do with the situation as it is to-day. We also have to contend with a scarcity of supplies and findings and the various small items that enter into a shoe. The supply on these articles is extremely bad and orders will take from six to seven weeks before they are filled and in some cases the manufacturers of these supplies have so much other business on hand pertaining to the war that they will not pay any attention to articles that they formerly made for the shoe trade. The prices on steel shanks alone have trebled and they are not procurable even at this price. Manufacturers who took orders for a new allotment of Army shoes find it impossible to procure steel shanks for these shoes, and the situation has grown so serious that the Government has had to take this up and it looks as though these would have to be made without steel shanks. The cotton situation, the wool situation, the thread situation, and materials of all description have advanced to ridiculous prices. The inks and stains that we used to pay 60c for are now \$1.25. This is due to the scarcity in dyes. We have seen within the last 30 days kid stock advance from 29c to 35c. This means that a woman's high topped shoe such as they use to-day, you might say an 8½ inch top, there is an increase of 21c. The situation in sole leather is just about the same and it simply means that the manufacturer has to advance his stuff from week to week in order to keep up to the advancement in raw materials and labour. Shoe factories, through enlisting, have been crippled on their output to a great extent, as the shoemakers are all good fighting men. This has crippled the Canadian factories in some instances as much as 50%, and retailers should realize that these conditions exist and not be too severe about delay in shipments. Even if the war were over to-morrow the price of leather would still advance as the high prices existing to-day are but a precedent for years to come.

"I just received a wire from a large kid tanner on the other side who is in the habit of carrying on the floor about 50,000 dozen kid skins in the various grades and weights and prices and he said that this morning all the kid they have in their establishment was four dozen and his information was that kid was going up whether the war continued or abated. Here are a few comparisons that demonstrate the difference between conditions to-day and those of a year ago. Russia calf for high grade shoes from 31c to 42c a foot; dull calf, 30c to 37c; white calf, 28c to 50c; heavy glazed kid, 17c to 23c; light glazed kid, 13c to 19c; grain side, 26c to 31c; patent sides, 29c to 35c; black sheep, 9c to 11c; colored sheep, 10c to 12c; white grain sheep, 10c to 14c; light oak sole, 48c to 59c; duck linings, 12c to 16c; twill, 10½c to 14c; men's and women's laces, 50c to \$1.25 gross; buttons, 37c to 50c gross. And these are but a few of the upward turns of the wheel against the manufacturers."

With these facts before them little argument should be needed to persuade the dealer that unnecessary delay in purchasing adequate stocks will be costly. There can be no doubt whatever that the next six months will witness even greater changes than the past year.

**Colors on Front Cover are Standard for Women's Summer Shoes**

## MANY SMART MODELS IN NEW AUTUMN STYLES

**Military and Conservative Lines Seen in Canadian Men's Models—Some Fancy Effects Presented—Colored Kid Holds Sway in Feminine Foot Toggery—Curved Heel, Long Vamp and Plain Pointed Toe Have the Call—Many Pretty Offerings in White—High Cuts for Miladi and Bals for Milord**

**"STYLE!** Style! Style! Style all the while." Thus runs an old refrain, and one is convinced of the veracity of the saying, by taking a look at the beautiful models now being offered in autumn foot toggery for Miladi Fair. With men's, there are presented to the Canadian trade, fewer pronounced variations in lasts, patterns and leathers than probably any year during the last decade, and for this there is a reason.

It is well known by the shoe manufacturers of the Dominion that the snappy, trappy, eccentric lines are purchased principally by the young men. The banker, the lawyer, the doctor, the physician, and the business man of conservative tastes and quiet tendencies—in fact, nearly all men of middle age, who settle down to the routine of mercantile or professional life, and are engaged in the task of home building and raising families, are moderate in their demands and sedate in their ideas. They do not follow the extremes of fashion, and if one could examine the wardrobe of these men, it would be found that hats, clothing and shoes, differ very little from year to year, in pattern, texture or design.

It is the young man, the chap who believes that he earns his money easily, who has no great responsibilities or family ties, spends freely as he goes, and demands something new each season—who takes up quickly any new type of a toe or heel, colored top, fancy combinations, elaborate stitching and ornamental effects, in the shape of perforations, tips, pinking, and generally, what is termed "gingerbread." Of the 300,000 men who have already enlisted in Canada for overseas service, more than half of these are bright, young, energetic fellows, who were not afraid to invest in the most striking styles. They bought, not one or two, but several pairs of shoes annually. Now that these scions are being shod and clothed by the government, naturally the demand for fancy patterns and ornate types of footwear has received a decided jolt—in fact, the men's trade, particularly that of the younger generation, has fallen off con-

siderably in all Canadian cities and towns. There is no denying this condition of affairs or attempting to conceal it. It is well known, and shoe manufacturers have taken cognizance of the trend of events and wisely restricted the number of fresh creations for fall.

### Military Dress Shoes Liberally Shown

The war has brought about with it many changes, not only in the thoughts and expenditure of the people, but in the matter of their dress as well. This is seen particularly in the military "swack," which is imparted to the footgear for men. There is the military dress boot, which is worn by Tommy Atkins for social and evening functions, and by the civilian. Many men to-day have adopted for ordinary street wear, the military dress boot, which is comfortable and durable and built on a fairly broad sensible last. Such a shoe, with its roomy toe, broad shank, low heel, flat tread, and in most instances the absence of a box toe, permits one to walk with the utmost ease. In fact, there has been a remarkably large sale in all leading retail stores of the military dress boot in mahogany, tan and black leathers. Many manufacturers for present trade as well as in their fall samples, are showing these boots, with single, slip, and viscolized soles, on military lasts, boots that have the dash and snappiness which appeal to all males.

It may be mentioned that for the wet weather and for those engaged in outdoor occupations, a number of firms are showing military ankle boots, with waterproof bottoms and storm calf uppers. Military footwear and effects are being featured in men's lines as never before.

Outside of the tendency to make more military shoes, several Canadian makers catering to the men's trade have been busy filling shoe contracts for the Dominion Government and are not devoting any large amount of time or expenditure of money in producing extreme creations. Loud, pretentious effects have been largely eliminated, and there have been few changes in lasts or patterns. The

*TWO new autumn models built on dignified conservative lines illustrative of "Gold Medal" range of Hartt Boot and Shoe Co.*

moderately conservative style will still predominate, and dull shades of leather will be favored. There is a tendency to lengthen the forepart in all the highest priced lines, on what may be called city lasts.

### The Bal Leads in Better Grades

As has been the case for the past two or three seasons, the straight lace—or bal, as it is commonly called, will hold sway, while in the cheaper or medium priced lines, the Blucher, principally with whole quarters, will have the call. There

*DULL calf bal, recede toe, low heel. By Brandon Shoe Co.*

is a fair sprinkling of tans, particularly in the darker shades, and it is prophesied by manufacturers that tan will be in increasing vogue. In fact, its ascendancy has been particularly rapid of late, and the nut brown, tobacco brown, and mahogany shades are seen in many gentlemen's shoes. In lasts, the English will still be the favorite, but there is a slight tendency toward narrowing the toes, and where any variations exist, the toe is also a little higher and rounder, while to give the necessary appearance of breadth, the forepart is elongated a size or two. The recede toe on some lasts starts more from the ball than formerly, making more of a wedge shape to the forepart of the foot. Room for the foot is provided on top and in the spread of the forepart.

For the young man, the so-called French-English model is seen. This possesses a moderately conservative swing, with straight lines. One interesting feature of note is that heels will be about the same as last season, from seven-eighths to one and one-eighth in height, while shanks are fairly wide, except where military heels are employed, and then, of course, there is a narrowing of the arch.

### Kid and Colored Leathers

With respect to leathers, the gunmetal is the prime favorite, although vici kid will give the dull leather a good run. About 25% of the samples so far seen, are in dark tan and from five to ten per cent in patent leather. The latter shoes, of course, are for dress occasions, or evening or reception wear.

Few men think of sporting a pair of shiny leather shoes for ordinary street or business purposes. In the more imposing lines, the wing tip is seen, with fancy perforations and buttons, while circular vamp and foxing combine to carry out the ornate effect. There is still a fair proportion of button boots—the five and six button being the favorites. Some of these are seen with cloth tops, principally in ivory and grey, although a few plaid effects, and black and dark brown cloths, are shown.

### New Sole Materials Used

In men's shoes a number are being shown with rubber soles and heels and many of the fall samples of leading Canadian firms have fibre soles and soles made of other composi-

tions which are widely advertised and so far seem to have given the greatest satisfaction in flexibility, wear and worth. Sole leather is so difficult to obtain and prices have ascended so rapidly that substitutes of all kinds are being offered manufacturers. Leather is a product that cannot be increased at will the same as crops and metals and, while the population has increased twenty per cent. in the last decade the cattle population has decreased twenty per cent., and it would not be surprising that if slowly but silently fibre soles would take the place of leather to a certain extent on men's footwear.

The best models are decidedly plain, built on simple, effective lines, which evidence good shoemaking, fine finish and splendid workmanship. The last with a slight swing still holds a strong position, owing to its normal shape. It is decidedly comfortable, and comfort goes a long way in establishing the style of shoe to be worn. Men's samples, on the whole, this year, while perhaps not as varied or extensive as in seasons gone by, for the reasons already spoken of and the fact that a large number of the youth are in military service, either at home or abroad, still show that the Canadian manufacturer is well to the front in keeping up the high standard which has marked this branch of the business in the Dominion. The offerings speak well for the enterprise, facilities, and ability of the makers of men's footwear. This year the autumn samples reveal a splendid revelation of what the makers are capable of producing.

A few manufacturers are showing for fall men's shoes with colored kid tops. They are made with narrow toes, one-inch heels, and narrower shanks than the models popular at the present time.

### The Vogue in Women's Footwear

In women's foot toggery, the high-cut bal is likely to prevail, as long as short skirts remain in fashion. Skirts are not only short, but there is more of a flare effect to be seen. This serves to emphasize the foot and make fine footwear almost a necessity. It has been stated that even if longer skirts do come into vogue fancy boots will hold

*TWO smart offerings in attractive high cuts. By the Sardon Shoe Co.*

sway, for there is no use denying that artistic combinations and ornate effects are rapidly making the production of women's shoes a "millinery business."

A few months ago, an important conference was held across the border, and it was stated that all freaks in women's shoes would be eliminated, and that quiet, conservative lines would be adopted. The retail trade breathed easier and supposed that such a covenant would be adhered to, for some time, at least. But it was not very long before novelties began to appear, and were given such names as dressy boots, pretty boots, stylish boots, boots of conservative character, etc., terms like "freaks" and "millinery" being carefully eschewed.

While colored cloth tops were running riot a year ago,

to-day it is colored kid that reigns supreme. The seven, eight and nine-inch boot has come to stay, and fully 60 per cent. of the offerings in high cuts for fall are lace, for the simple reason that a high lace creation hugs the ankle and limb more neatly and snugly. The eight-inch leg would appear to be the most favored, according to predictions.

#### White is Reigning Favorite

Of course, white footwear will hold its own, so far as summer wear is concerned. There is nothing prettier than

*P*ATENT leather,  
plain toe, cloth top.  
By Regal Shoe Co.

a clean, white shoe, in cloth, kid, calf, nu-buck, canvas, sea island cotton, etc. Dressings have been prepared so that these goods may be kept fresh and bright. There is also the washable white kid, which is supposed to overcome any serious objections raised regarding the perishable nature of the ordinary white footwear.

The high cut creations for fall, with their dome, wave, slanting, crescent and hussar tops, furnish individuality and distinction. Kid leather is exceptionally popular, and fall models are shown in many colors, but the most popular are white, grey dawn, ivory and grey in several shades, principally in pearl and oyster. There are other greys, such as neutral, battleship, wistaria, dove, misty and taupe.

Other colors shown are fawn, champagne, bronze, African, Havana, nigger and tobacco browns, straw, bottle green, purple, blue, etc., but it is not thought that these will meet with a big measure of appreciation, being too much of a speculation and gamble for the average retailer.

One leading manufacturer of feminine footwear remarked that he was not showing any colored kid shoes in his high-cut samples, all being glazed kid in sombre hues. "I am taking no chances on the whims of fashion, or the freaks in human nature," he declared, "as possibly by the time my salesmen have concluded a portion of their fall selling, a breath from some unexpected quarter may alter the whole color scheme."

There are also seen various combinations of contrasting colors in tops and vamps as well as black and white effects, brown and white, grey and white, fawn and ivory, etc. Patent leather, of course, is used for standard styles, with cloth and dull leather toppings, and it is also figuring in a large number of the black and white combinations.

It is expected that novelty shoes will run about thirty to forty per cent. in the average of fall samples, distributed between fancy patterns and colored materials. There also seems to be an evidence in some quarters to push tan and mahogany shades, but how well these will sell for next fall is only problematical.

Heels remain very much of the same height as last year. The Louis and Cuban-Louis, the peg and opera

pedestals being the favorites. A number of high-class models carry a smart Cuban heel. For the most part, toes are plain and medium pointed, although some models carry stitched tips of quiet character. The patterns on numerous models are ornate and bewitching. There is a tendency to lengthen all vamps, which run from three to three and three-quarter inches.

Because of the scarcity of colored kid manufacturers of novelty shoes for women may turn their attention to buckskin. Made up in combination colors, or with other stock, it is said to produce some very natty shoes. Among the new models shown, one of the prettiest has a black kid vamp and heel foxing and a white calf top. It is of the high-cut, laced type, the eyelets and laces being black. A similar effect is shown with a tan calf vamp and foxing, tan eyelets and tan laces.

#### Colonials With Large Tongues

In the family of low-cuts there is a disposition to the old-fashioned colonial, with very large tongues and huge buckles. Some colonials are displayed with small tongues and tiny ornaments.

In the colonials that are now being shown the black ones have the tongues sticking straight up, while in colored pumps the tongues lie flat on the instep. Quite a few pumps with small tongues are presented, but the vogue for colonials is questionable at the moment.

In the quarters of pumps there are a number of novelty patterns and combinations, the same as in the high-cuts. Strap styles should also be good movers in the medium class lines.

In all the creations of feminine footwear there are seen lightness, daintiness and a slender effect that imparts much to the stylish, airy character of the splendid lines presented for the consideration of the average retailer, who knows that for the coming season, at any rate, his profit will be

*M*MILITARY dress  
boot in tan storm  
calf. By Tetrault Shoe  
Mfg. Co.

made principally on women's shoes, owing to the fact that this business has kept up remarkably well, in spite of the war and other disturbing factors.

#### Quiet, Effective Showings for Men

The Hartt Boot & Shoe Co., of Fredericton, N.B., who are the makers of the highest priced lines in men's shoes in Canada, and have achieved a splendid position in the footwear world, believe that the trend of fashions this year will continue along conservative lines, the same as they have been doing for the past year or two. Quiet, simple styles

# FACING MUCH HIGHER PRICES FOR SHOES

**Everything Contributes to the Added Outlay—There is Not Much Hope Held Out for Relief—Representative Firms Give Concrete Facts Regarding Shortage in Supplies, Transportation Difficulties and General Disturbance Created by War—Labor Problem**

**H**IGHER and still higher goes the leather market so far as prices are concerned, and just now much will be added to the cost of shoes this season it is impossible to tell.

Everything that enters into the make-up of a boot is soaring and many manufacturers do not know where they are and what figure to put on their lines owing to the shortage of supplies in both sole and upper stock. Practically all firms in the business have withdrawn prices.

Shoes, on which the figure was raised in February, have undergone another advance and makers report that quotations are a matter of day to day arrangement. Some houses who have never before withdrawn prices have been compelled to do so from the fact they do not know what is ahead of them. All orders taken are subject to confirmation at the head office of the different concerns before acceptance. In the case of advance deliveries prices are also subject to change without notice.

Why has all this been brought about and why is the situation so uncertain and unsteady. Well, there are any number of circumstances, any one of which would upset all calculations.

In order that the retail shoe trade may thoroughly understand the situation here is what several tanners have to say in regard to it. The men who speak are not alarmists, but take a calm, dispassionate view of the whole situation.

## **Few Importations of Calf Skins**

A leading calf skin firm states "Previous to the war our purchases, almost entirely, were made in Russia, Germany, Austria, Belgium, Holland, Italy and France, as it is from these countries that the bulk of the high-class skins of the world are taken off. With the exception of getting a few occasionally from France, we have not been able to get one skin from any of the other countries above mentioned, and, when you do get a small shipment, owing to the congested state of merchant vessels, it is very difficult to obtain shipment for any lot and then the freight is four or five times as much as it was before the war and the war risk in addition, all of which adds to the cost of the goods. The writer spent a week recently in New York and Boston trying to size up the situation as to whether there was any possible relief in sight for raw material and dyes, and the conclusion reached by the best experts in the United States agrees with our own views in that matter, that until the war closes conditions will become worse instead of better.

"Now as to the question of increased cost since the war was declared, I went into that fully in Boston with one of the best expert tanners in the United States, a personal friend of mine. I figured out that the increased cost on raw skins alone would mean 6 cents per foot on the finished leather. He did not agree with me. He stated it would mean at least 7 cents per foot on the finished leather. Then as to the additional cost added on to that for the price of dyes, chemicals, etc., I figured 2 cents per foot and he said it would be nearer 3 cents. Now, if you take my view of the figures it would mean that, since war was declared, the cost of finished calfskins on to-day's basis of prices for raw material, dyes, chemicals, etc., would be 8 cents per foot. If you take the United States tanner's view it would be 10 cents per foot, but so far as Canadian business is concerned, we have an additional tax, as you know, of 7½%, a special war tax. This, on the high price of raw goods imported to-day, will mean from 1½ to 2 cents per foot additional

cost for that alone and added on to the 8 cents per foot would make 9½ to 10 cents per foot more cost to the tanner to produce calfskins to-day than when war was declared.

"As to whether there are any skins accumulating in any of the countries above mentioned where we made our main purchases before the war, we have made as accurate and full inquiry as it is possible to make. The result is that we are satisfied there is no country where there are any accumulations of calfskins excepting some light skins in Russia, where there may be some accumulation of dry light skins."

## **The Advances in Bottom Stock**

Here is what one sole leather firm says: "Up to the present, hides have been fairly plentiful, and though the market advanced materially during the summer months, it eased off again in the fall months, and the average cost of hides has not been very much in excess. The average advance on all tanning materials used by tanners making oak sole leather, is around 97%. Labor has been very scarce the last four months, and it is now costing tanners considerably more. Oak sole leather costs now in excess of what it did just previous to the outbreak of the war, about 30%."

"We think the hard pinch is yet to come owing to the extreme scarcity of ocean carriage. Freights are not only advancing abnormally, but it is very hard to book space. This is now beginning to have its effect on our domestic hide market. The kill will be light in America for the next five months. This, coupled with an increased demand for leather, and the difficulty in getting in foreign hides, we think is going to have an effect on the hide market. Tanners are not taking advantage of the situation. As far as we know, they are not, as yet, getting enough advance on leather to cover the increased cost. Leather prices to-day average lower in Canada than they do in the United States, while the cost of production in Canada owing to the war duty, is fully 5½% above American costs.

## **The Scarcity of Kid Leathers**

One of the biggest producers of glazed and dull kid, remarks: "The world's supply of skins comes from Russia, India, Arabia, South America and China. There are many other countries which produce smaller quantities, but these are the countries from which we get the main supply. Since the war Russia has not exported any goat, sheep or cabrettas, calf or colt skins and that country was depended upon for a very large percentage of the skins that go into the manufacture of kid. The shipping facilities have crippled the supplies from both India and Arabia, both of which countries supply a large proportion of the skins used in America for kid. At the National Shoe Manufacturers' Convention, held at the Astor Hotel in January, there was a carefully prepared paper read regarding the extra cost of kid leather since the war began. It was estimated, after a very careful investigation, that the cost had increased from three to five cents a foot. This only refers, however, to black leather. Fancy colors have been increased much more, according to the color. The dye stuff situation is responsible for part of this increase, but does not bear any greater proportion than any other material that goes into the making of leather, as all materials have advanced materially. To-day we think it can be safely said that it would amount to a fraction over a cent a foot. This refers only to blacks. On fancy colors there is no price, and certain colors can be disposed of at fabulous prices. The outlook to-day is very discouraging."

# Getting the People to the Store

The Great Problem of Selling—The Making of Constant and Paying Customers—Confidence and Service the Foundation of Successful Merchandising

WITH a good stand and the right goods one might think the battle of successful retailing was pretty well decided. Yet merchants with both these excellent advantages have made a failure of business while some less fortunately circumstanced in position and means have gone steadily forward. The location of a store is of prime importance and demands the most careful thought and planning, but if position were all, some stores that are on busy corners ought to make a better record than some of them seem to do.

A merchant may also study his constituency and succeed in bringing to his store the class of people to which he is catering and he may have the advantage in goods and prices over his competitors, but this does not always mean the building up of a successful retail trade, for as soon as a competitor comes along all these advantages may be counteracted and disappear.

Even in large centres there is an element that enters into merchandising that is too often overlooked, if not forgotten. Personality is the big factor in the store as well as in practically all other spheres of life. Other things being equal, the man or store with outstanding personality will distance its competitors. When the people have confidence in the man and his methods it will take something more than prices to draw away patronage from the establishment. When originality and business aggressiveness are added to honor and courtesy the store that has the stand and the goods is practically on the highway to success.

Yet there is another qualification in retailing that if lacking may practically spoil all that goes before. There are stores well located with well selected stocks and with able and esteemed proprietors that seem to get nowhere because of the poorness of the store service. The writer went into a shoe store some time ago and the three clerks began an argument as to whose turn it was to wait on the customer. The latter finally took his money elsewhere. Service is the keystone to the arch of selling. You may spend money on your store advertising, equipment, and have the right kind of goods, but if when customers come they are insulted or treated indifferently, you might as well close the doors and put your money into something where you do not have to cater to the requirements of an uncertain and exacting public. For this reason it pays a merchant to make a thorough study of those he employs as salespeople. A short-grained, overbearing or indifferent clerk may cost a good deal more in a week than his or her wages. Better pay for a higher class of help than run your business into the ground with lazy, careless or incompetent salesmen.

Personality is as important in a clerk as in a proprietor. It is quite common to hear the expression "I never go into So-and-So's store, the clerks are so snippy." The merchant is often responsible himself for the attitude of his clerks towards the public. Encourage your clerks to recognize customers as they come into the store. There are few people who are not susceptible to the flattery of being considered important enough to be remembered by name. Moreover it betokens an interest that helps to make the reputation of a store. A very successful retailer who has a system of following up trade prospects by circular and letter says that as soon as one of his prospects makes a purchase in the store he is put on the list of regular customers and his name given as such to the clerks who are expected to know the customer by sight and be able to call him by name when he enters the store. One of his salesmen, in fact his chief of staff, is given the important work of calling personally on prospects that cannot be landed by letter and dozens of customers are won in this way for the establishment. The young man entrusted with this important work is a very bright, capable fellow, who is a thorough salesman and is really a retail commercial traveller. This illustrates an extreme of the personal element in retail business and affords an idea of its importance as a factor in business-building, as well as a suggestion as to the encouragement of clerks to cultivate the good will of customers.

Some merchants wait for competition to spur them to push the battle to its limits and do not seem to realize how much further they might be ahead if they put the same energy into their affairs from the outset. A retailer who had enjoyed for some years the liberal patronage of the district in which his store was located had a new establishment in the same line open three doors down the street. The newcomer put up a very handsome front and went to a large expense in fitting up his store with the most elaborate equipment and put in a large, up-to-date stock of goods. The opening was staged with flowers, orchestra and all the paraphernalia of a swell business and people and carriages thronged the street all day. Then things settled down to the steady wear of competition. The old store suffered for a while undoubtedly, for the sales showed a decided dropping off. But the proprietor was a thorough master of the retail game and sat down to regain his lost ground. He switched some of his lines from the ultra stylish to the more moderate-priced goods. He began a thorough canvass of the district by circulars and followed these by letters. He made some changes in the store, spruced up the appointments and brightened the front. He watched his advertising carefully and kept the

public well informed as to the store and its goods.

Towards the end of the first year he had got back practically all that he had lost in weekly sales and a little better. About this time the hard times came and the retail business began to feel the pinch. Fortunately he owned his own store but that did not help to keep up sales. He redoubled his energies and changed his tactics. He cut out a lot of his more expensive lines and announced a sale of medium and cheap goods. He bought "jobs" at inside prices and almost filled his store with this class of goods. Some of his friends told him he was ruining his trade and some of his high-strung customers actually left him. He followed the law of self-preservation, however, and scandalized his friends and neighbors by making a similar break in his advertising methods to that adopted with regard to his goods. He dropped his newspaper advertising to some extent and put the money into sandwich men and twice a week sent out a band-wagon announcing his sale. He wasn't particular what people thought so that he turned out goods and made a fair profit. At the end of three months in spite of the hard times he says he made as much money as he had in the previous six and had demonstrated the fact that the people had the money to spend in spite of the hard times if you only put the right kind of goods in the right way before them. His competitor had to get an extension at the end of the year.

"Speaking of hard times," said the gentleman referred to in this sketch, who has now graduated, by the way, from the retail to the wholesale trade, "I think some men make times hard for themselves. It depends upon a fellow himself how he comes through these crises that recur periodically to trade. Some men go down as soon as the cyclone strikes and others hang on with toes and teeth to the last piece of timber they can anchor to and they usually pull through. It reminds me of a story an old friend of mine used to tell about a milkman who was in the habit of bringing cream to the city daily. One morning he passed as usual a little creek just outside the limits to water his horses and suddenly the temptation came to him to add surreptitiously to the bulk of his product by dumping in a little aqua pura. It was hardly daylight and he did not notice that in scooping up the half bucket of water he brought with it a couple of livley frogs. In they went, however, and were at once in cream if not in clover. One of them was the kind that when it finds itself in a strange environment quits. He went to the bottom and gave up the ghost. The other was the kind that fights as long as there is anything to fight for and he remained at the top paddling away for dear life. When the milkman took off the lid of the can to pour out the cream he found a little froggie sitting contentedly on a little pat of golden yellow butter that he had churned all by himself." And there you are.

## AUTUMN SLIPPER FASHIONS

**A** REPORT from Haverhill, the centre of slipper production, says: The tendency, as in shoes, is in the direction of longer vamps and narrower toes. Two seasons ago this style of last was classified as "extreme" but it is now chosen as a probable leader in sales for the coming season.

The new samples, however, are not confined to this one toe shape. There is variety.

Black kid will be used largely in the fall and winter lines, while colored kid, particularly gray and drab, will be used solid and in combinations. Satins are given their usual prominence. Black and white will be the best selling colors because of the scarcity of colored dyes. White kid and calf are both used to considerable extent. Fabrics of various kinds are largely used, including gold and silver cloth for evening footwear. Bronze, too, is popular.

Beaded ornamentations, both on the straps and vamps, are conspicuous, but the designs are smaller than in past seasons, but much more attractive. Pumps with collar effects are shown liberally, as are tongue pumps, or modified colonials. High or large tongue colonials are not listed as good sellers.

Some combinations of spangles and beaded work show up attractively in the higher-grade lines, and gold and bronze kid is shown in a variety of patterns. Heels are more varied than usual, with full Louis 16-8 predominating in evening slippers.

## THE VERY NEWEST THING

**T**HE very newest in leather effects is a black and white check or black and white polka dot.

# CASHING IN ON THE SHOE STYLE CHANGES

How the Serve Yourself Shoe Store Gets Back at the Mail Order Business—"Money Back" Proposition a Good Advertisement—Exchanging Shoes from Other Stores in His Family Store—All Things to All Men to Gain Trade—Shoe Business a Gold Mine

By F. L. TURNER

**I**N our February 15th issue we gave an account by F. L. Turner of his "Serve Yourself Shoe Store." So much interest was created amongst the retail trade that we reproduce herewith a further dissertation on his methods from "Associated Advertising" in its last issue.

I feel that a merchant situated as I am, in a small city where he can give his customers more or less personal attention and can, therefore, inject his personality into his business, has some large advantages over the mail order house. He can show the people the goods—not a mere picture of the goods—and they can try the shoes on. I have always imagined that the shoe department of a mail order house certainly must have its troubles.

## Offers to Trade Shoes

One of the best things that I have done here at the Family Shoe Store is based upon the difficulties that arise through mail buying.

In addition to offering money back on shoes we sell, we offer to trade shoes with anybody, no matter where bought. That has helped us get business which has been going to the mail order houses. We often get mail order house shoes in here. They tell us that an aunt in Evansville or an uncle in Peoria—or nearly any place except Chicago—sent the shoes and they do not fit. Of course the lot number shows the shoes came from a mail order house, but we gladly trade them.

We look a shoe over and decide what we can get for it. In the man's presence, we mark it and put it on the shelf. Then he can have whatever shoe he likes in our stock and we will give him credit for the amount we mark on the shoe he brings in.

I would be foolish in such cases not to get all the advertising out of a trade that I can and I am especially happy when the price I can fairly allow is less than the customer has paid the mail order house—nor does he care, so long as I give him as good a shoe as he gives me. Every such trade calls attention to my values in a most effective way.

Quite often, a man who brings a pair of shoes in to exchange will leave here with half a dozen pairs, and from that time on he is our regular customer, for the fact is, I can beat the mail order house in price, quality considered, and the customer has the actual shoe from which to select instead of pictures.

## Bucking Mail Order Houses

I have advertised, sometimes, that people shall send me pictures of shoes from catalogues with twenty-five cents less than the mail order price, and I will send them shoes as good—and all on a money-back guarantee.

I have obtained considerable business this way and have made a lot of good friends and boosters.

When a man who has paid ninety-eight cents brings his shoes back and wants his money, the cashier hands him a dollar, and it is the same by mail. That pays for the stamp the farmer used in writing the first time.

Some time ago one of the men at the local postoffice said if he were in my place he would not give a certain farmer \$3 back when he had sent me only \$2.98, but the next Saturday that farmer came in, bought three pairs of arctics and two pairs of shoes and told me, as he left, that he liked

to do business with a man like me. So that two cents proved good advertising. The custom of returning even change has resulted in getting the store talked about in a favorable way and there is no better advertising than that.

## His Advertising Plans

Buying job lots, usually cheap because of style changes, and occasionally getting good bankrupt stock goods, I naturally appeal most especially on the basis of price in my Family Store advertising. Price is my strong talking point. For the other store, I talk quality and style—announce the new goods as they arrive, etc. But for the serve yourself, the price appeal is the thing. I have nothing here for more than \$2.98, and it is not unusual to sell shoes for half the price they were originally made to bring. I use the two daily papers (which go out to the rural routes, too) and a country weekly newspaper, as well as hand bills and moving picture slides. I have liked the slides especially well, because it is possible to use pictures on them that could not otherwise be used in a small city.

## How Broken Windows Helped

When we issue a hand bill, we send it out in the country, too. The men have clothespins in which to stuff the bills, so they can throw them up to the farm house without stopping. Some of them must try to break windows, but I really don't care. When a farmer comes in to complain that my man has broken his window, I pay what he asks for it so quickly and so cheerfully that it makes a hit with him, and a lot of them who came in expecting me to argue the matter have been so pleasantly surprised they have turned around and bought shoes.

My advertising appropriation for both the stores is less than two per cent. of the total business I do. I have believed I should spend more for advertising, for the fact is that while my turn-over in the Family Store is much more rapid and my cost of doing business is much less, the average mark-up is about the same in the two stores, and I could easily spare more for advertising. I must confess, however, that it is a little hard to increase advertising appropriations materially when I am already busy and making money—doing better than I supposed a man could in the shoe business in a small city.

## Does Not Compare Prices

We do not show, in marking or advertising our shoes, the price they were originally intended to bring. We believe that when people come here they will soon discover the goods are well worth what we ask, and the money-back guarantee is an additional fortification against loss to them.

I believe that if I tried to mark what the price or the "value" had been, this would hurt rather than help. A good many people would search through the stocks for unusual bargains rather than to find what appeals to them. They would be influenced by the former price to such a degree, sometimes, that they would not do so well.

On the other hand, there might often be a difference of opinion as to the former "value" and there would certainly be a temptation to put the so-called "values" as high as possible. I have found that what my customers want is

# Fall Styles

Getty & Scott Limited

Blachford Shoe Mfg. Co. Limited

The Eagle Shoe Co., Limited

# Fall Styles

Perth Shoe Co., Limited

Clark Bros., Limited

Smardon Shoe Co., Limited

good value. Most of them are more interested in what the goods are like at the price, than to know what the price once was, or once might have been.

### Some Pricing Considerations

On the other hand it is necessary to keep stocked with some leaders which make little or no profit, and to make up for this, goods which have been bought at an unusually low price are often marked with a little wider margin than the average. As goods come in, we mark them at what we believe them to be worth, so the margin varies considerably, just as in all shoe stores. For example, it is hard to get a good rubber boot to sell for \$2.98, our highest price, and in the case of soft-soled shoes for babies, we buy them for twenty and sell them for nineteen cents. There are certain colors, especially reds and browns, that do not sell well. I order a variety of colors. The popular colors go to the regular store, to be sold at fifty cents. The less popular colors go into the bin of the serve yourself at nineteen cents.

There are other cases in which the mark-up cannot be as long as the average, and it takes some marking above the average to make the whole stock yield the profit that it should.

### Store Name Has Helped

I am sure the name Family Shoe Store has been of great value. I have a family myself, and I have advertised this fact, sometimes, for I believe the more a merchant can get his own intimate personality into his advertising, the better. The man with a family realizes that I know something about what it costs to keep a bunch of boys in shoes, and he knows that I know how to sympathize with him.

I want my advertising to be as much like I am as possible. I want it to tell my story in a simple, direct way, and to show the other fellow that I want to help him.

One man comes in here who has eleven children, and I had him bring the family to town in a big wagon and had a picture taken, giving them pictures for their trouble, and this was good for advertising purposes. I get as much of the family idea into my advertising as I can, and I often tell my help that if a child is too ragged for them to "make over," they shall call me. I don't mind. I like the little codgers. It isn't their fault that they are ragged and their parents are poor.

### Display is All Important

The manner in which I display the goods is all-important. Most people can't get out of a ten-cent store without buying something, even when they go in "just to look."

Often when a man and his wife come in here for a pair of shoes, they will carry away half a dozen pairs—for the whole family—and I sold thirteen pairs of shoes, slippers and arctics to one farmer who lives some distance from town and cannot get in often. He stocked up for the whole family for the winter.

I have found that low-priced goods, such as house slippers and shoes for small children, do better in bins down the centre of the room. Women like to go through the bins.

### Costs Are About Half

Our cost of doing business in the regular store is twenty-one per cent., and we have a little more than cut it in two in the Family Store.

Sometimes, my friends have asked me why, with a lower cost of doing business here, I don't have a proportionately lower mark-up. Why should I? I have been a pioneer. I have taken some risk. I have been doing a good deal of thinking and hard work. In the meantime, I have been giving the people of the community better shoes for the money than they have ever been able to get before.

I have sometimes told my friends that when I took the store over from my uncle, I sold shoes at an enormous sacrifice, and that I am entitled to get some of it back, and

particularly when I am giving the public such a service as I have been able to give.

In the ordinary shoe store it is utterly impossible to make the whole stock move with uniform rapidity. Even if the people would buy the shoes, the clerks will not show them. Clerks get into the thought that nobody will want this or that shoe and so they do not show it. The first thing the store owner knows, the shoe in question is old. If the clerk showed it, it would sell, very likely.

Here in the Family Shoe Store, it is not left to the taste of the clerk. The customer looks for himself and all the

*F*ASHIONABLE Paris says the shoe retailer is not wholly depressed by the calamity of war. Her designers are still active and their creations are still watched in other countries. A military flavor is evident in this design. This is of a height rather impracticable for a button pattern but for the inconspicuous auxiliary lacing at the back. The cut of the top line and the heel are "Cavalier."

patterns move. I have suggested to some shoe dealers who have heard of this store and have come here to get information before starting a similar one, that if they have a regular store, (as most of them have) it is best not to have exactly the same shoe in both stores. If I decide to bring some of the sizes of a certain shoe across the alley from my regular store, I bring all I have of that pattern. Otherwise people would find that they would pay more in the other store than here for exactly the same shoe, and that would be disastrous for the other store. But, in the way I have handled it, the Family Store does not compete with my other store in any hurtful way.

### Applicable to Other Lines

I believe this is a plan of doing business which will before long be applied to the shoe business in a great many communities, and that the same plan can be applied to other lines.

Eventually, of course, when the system has been worked out carefully along lines of experience, it will be possible for a merchant to take a shorter mark-up. Less advertising will be required to make people take advantage of the plan. The people will be accustomed to the idea.

In the meantime, it all seems like a dream to me. The shoe business has been so hard in the past, and this has been so easy, comparatively, and so much more profitable and so much fun, that I hope nobody will wake me up rudely. I believe it will continue to be a good plan just as long as shoe styles change with lightning-like rapidity and job lots are plentiful as a result.

# BRIGHT DECORATIONS FOR EASTER WINDOWS

Some Unique and Seasonable Ideas That Will Help to Bring More Business Your Way—Attractive and Inexpensive Trims which Will Arrest Attention—Pointers that Should Be of Assistance to Retailers and Clerks Who Want To Do Something

GET your Easter windows in early and bestow some thought and attention on them. With the wealth of variety and the galaxy of hues offered in women's colored kid high leg shoes, not to speak of the pure white productions seen on all sides, you have every opportunity of making a picture as alluring and impressive as any artist can paint.

Owing to the lateness of Easter this year the festival falling on April 23rd, the enterprising, shrewd retailer will seek to combine with his window decoration the breath and atmosphere of new spring goods; while you reflect the spirit of the Easter trade in your window trims, do not overlook mild, ethereal spring. Do not crowd your space with too many shoes and see that those on display do not look as if they were thrown in or placed there in a sort of cold storage. There is an art even in the way the lines are exhibited, not to speak of the taste, harmony and balance of the display—accessories, materials and background

Here are presented some timely suggestions with explicit instructions on how to carry them out. The designs are particularly apropos and well worth trying, as there is no more powerful factor or trade bringing feature than window trims that are out of the ordinary and show some originality, thought, taste, and preparation. Pleasingly arranged windows pull all the time in the interest of bigger and better business in foot toggery.

The Easter cross in the centre of the window, as shown in the accompanying illustration, is made of half-inch lumber, covered with dried moss, fastened on with fine green thread. Lilies with long stems are put through it quite thickly, making a very pretty effect.

To build the frame cut the round pieces of lumber exactly the size that you want the cross, nailing the strips,

as seen in the picture. The cost of the wood for making the frame would be nothing, as everything can be made from shoe cases.

Moss costs about fifteen cents a package, and it will take about ten packages. Lilies can be had in crepe paper at about 60 to 75 cents per dozen, and if one feels like spending more, lilies made of muslin can be procured from \$2 a dozen and upwards.

The doves at the top cost about one dollar each. Should you find this too expensive, just cut out the letters and hang with invisible white thread. If doves are used, suspend the doves and letters in a straight line.

Put a large lily in each corner in a jardiniere; natural lilies can be had from a florist at a very reasonable cost.

Make the shoe stands of one-inch lumber, with tops the shape of an egg, either of lumber covered with white or purple felt, or cardboard, but lumber will make the stand look more balanced. If the base is covered with white, cover the egg shape top with purple, or vice versa.

A nice purple and white card would look very well. Take a piece of white cardboard about 11 x 14 inches, cut from purple cardboard a large egg, which will fit on this 11 x 14 card, and paste the egg on the white. White plain letters would look attractive.

If your window has a cross bar about half way up, cut eight eggs out of one-half inch lumber, cover with felt, and pad with cotton wool to give oval effect. Fasten these on to the frame of the window by nailing a small strip of wood on the back of the egg, and nail to the frame. Use Easter lilies amongst the eggs.

About three dozen lilies would be required for the trim, but if the retailer can afford four dozen, it would be much more effective.

EASTER  
WINDOW  
BACK-GROUND

The cross of green moss with Easter lilies makes an exceptionally pretty spectacle.

Use plain white or purple felt on the bottom of the window, or if this cannot be had, or the trimmer feels that it will cost too much, use white cheesecloth, puffed.

Make sure that you do not try to put as many shoes in the window as it will hold. Crowded windows never amount to anything. Give your shoes plenty of room, so that people looking at them will have a chance to see the shape properly, and become impressed with their distinctive features.

#### Bunny Sitting on the Stump

Herewith is submitted an idea for another Easter window display. To make the tree trunk as shown in the sketch, nail bark on a good-sized pail. If possible, however, secure a section of a real tree trunk. This can be readily arranged by the average shoeman, especially those in towns or villages.

The eggs at the top are cut out of half-inch lumber, which is then covered with white felt and padded with cotton wool to give an oval effect. The size of these eggs can be judged from the proportions of the drawing. The letters on the eggs spelling the word "Easter," should be cut out of purple felt, which makes a tasteful contrast with the white felt covering.

Artificial Easter lilies can be had from different firms selling such decorations. This applies also to the white doves and the rabbit in the sitting position on the stump. The doves are suspended from the ceiling by the finest white thread to be had, making the connection practically invisible. The eggs on the ground may be of porcelain or glass, and are very inexpensive. They are for sale by all dealers in Easter novelties.

In displaying the shoes, great care should be taken not to crowd the window, otherwise the whole effect of the excellent idea will be destroyed. The bottom of the window should be covered with purple felt trimmed with white. Circumstances will decide the best way to fasten the large eggs in the upper left hand corner, but suspension would doubtless be best.

EASTER  
CROSS

If this idea is followed carefully and the details worked out in a painstaking manner, the shoeman will have a window that will be a splendid ad for his business, and a trade-bringer during the whole period of the display. And little expense need be incurred as the materials composing it are simple and procurable in almost every town.

Needless to say, however, considerable thought should be taken regarding the arrangement of the shoes in the window. It will be essentially a floor display, or practically so.

# WHY NOT SELL AT QUARTER DOLLAR PRICES

The Retailer Should Get Away from Some Conventional Customs if He Does Not Want to Lose Money—Should be Fair to Himself and Just to His Customer at Same Time—Increasing Costs Create New Order of Things and Selling Figures

“YES, sir,” said a leading authority who has studied the situation closely, “retail shoe merchants do not know where they are at just now owing to rapid style changes and constantly soaring prices, and the time is coming when they will have to adopt a sliding schedule of quotations, so far as the consumer is concerned. The day of \$3.00, \$4.00, \$5.00, \$6.00 and \$7.00 is passing and I know what I am talking about. Of course a few dealers get in between the dollar mark and sell shoes at \$3.50 and \$4.50, but rarely at \$5.50 or \$6.50. Why they do not do so I cannot tell. All shoes are going up, anywhere from fifteen to fifty cents, and may advance still more. The retailer has got to face the situation squarely, and unless he wants inferior footwear, or decreased profits, he must raise the figure for his goods.

“Now it seems to me there is no good reason why he should not sell shoes at \$4.25, \$4.50, \$4.75, \$5.00, \$5.25, \$5.50, \$5.75, \$6.00, or whatever the case may be. Let him get his regular profit and by adopting the sliding schedule in selling, at what might be termed the old percentage on cost, he will always be sure of protecting himself in the matter of profit.

“Of course,” continued the speaker, “there are some shoemen who will hold up their hands in holy horror at this idea. Many fellows, when cartons were introduced, refused to recognize the innovation. When cash registers, carrier systems, counter check books, fitting stools, findings cases, window fixtures and display pedestals came to the front to facilitate the showing, fitting and selling of footwear, they did not take kindly to the idea. Others do not take up with any mark of progress, but adhere to the old style fixtures, seating arrangements, ancient fronts, dilapidated interior and general disorder.

## Work of Art and Beauty

“The aggressive man is the one who looks into every new suggestion or pertinent pointer that is offered, and sees if he cannot appropriate it to his own use. It would make too lengthy a tale to dwell on the evolution in the selling of shoes. How, in the older days, few persons thought of putting on a pair, but simply grabbed their size from a big drawer or off the ledge, paid their money and walked away, with the footgear, the same as they would with a pound of butter or a dozen of eggs. Then, there was little style to the shoes. They were made more for wear and weight than appearance and art, but with the advances in shoemaking, the changed ideas of the people, and the love of every one for something that is neat and attractive and distinctive, foot toggery to-day possesses many fine points of excellence and dainty embellishment, undreamed of years ago.

“I merely point this out to show the changed attitude of the public now. With the vast majority, style is every thing and style embraces finish, cut, shape, color, combination, fit, pattern, workmanship, etc. While a man may not adopt the 15, 35, 45, 65 and 85 fractions of a dollar to-day in retailing footgear, there is no reason why he should not start out this spring selling shoes at \$4.25, \$4.50, \$4.75, \$5.00, \$5.25, \$5.50 and \$5.75 up.

“Shoe manufacturers have not advanced prices until they have actually been compelled to, by the scarcity of leather, its rapidly ascending values, and the increased cost of all materials entering a shoe. Too often has a retailer when a shoe has gone up 10 or 15 cents, requested the manufacturer to skimp the boot by putting in inferior materials

and keep it down to a certain price, or the retailer himself has absorbed that extra cost and charged the public no more, which has resulted in decreased profits. He possibly will let the increase go on from fifteen cents to twenty cents, and sell at the old price. And then if there is another advance, he will jump the figure by a dollar—going too far in his placing of the price stake.

## Be Fair to Yourself and Customer

“Now, in the first instance, where the cost is absorbed the retailer is not giving himself a fair show, and in the latter case, where he augments the price by one dollar, the consumer is not given a square deal, and to devitalize a shoe by making it to fit a price is mighty poor business. It does not redound to the credit of the producer or the seller and upon such a flimsy foundation no permanent paying patronage can be built. Transitory gains at the expense of quality, worth and solidity in order to save a few cents are apt to act in the nature of a boomerang.

“The only fair, equitable means of selling shoes is by breaking up the dollar mark and placing upon the footwear exactly what is a fair profit. The sooner the retailer comes to this arrangement, the better it will be for him, his business and his purse.”

**Spring Shoe  
Announcement**

The WALK-OVER Boot Shop wish to announce their display of Spring and Summer Footwear.

You are cordially invited to inspect the new models for both ladies and gentlemen.

The exceptional equipment in this Boot Shop, including ladies' rest room, Chiropody Department and the FOOTOGRAPH SYSTEM of shoe-fitting, will make your visit of more than usual interest.

**WALK-OVER  
BOOT SHOP  
290 YONGE STREET**

The Chiropody Department is in charge of an eminent foot specialist. Consultation and advice on all foot troubles are free.

The Mail Order Department is a convenience to out-of-town customers. Enquire about the self-measuring Footograph Charts.

### How Many Shoe Travelers Do You Know?

Here are Several Score of Shoe Travelers from Various Parts of the Dominion, Representing Different Manufacturing and Wholesale Houses

How many of them can you name?

The contest is open only to retailers or members of their staff. Send in your reply, giving the name of each traveler as numbered.

To the one sending in the list most nearly correct, SHOE AND LEATHER JOURNAL will give a prize of FIVE DOLLARS, and to the one next in order, two years' subscription to this paper.

All replies must be mailed by April 12th.

### ARE YOUR CLERKS LOYAL TO YOU?

A SHOE department manager and buyer who had made a good showing was approached recently by the proprietor of another store in the same town and offered a considerable increase in salary to change his position. But the department manager even refused to consider the proposition.

When pressed for his reasons, and assured that he might speak frankly, he said to the merchant:

"Remember old man White who worked for you until two years ago?"

"Yes," replied the merchant. "What about him?"

"You fired him after twenty years of service because he was too old. Our store would not have done that. Old man White could have worked for us as long as he lived.

"Then there is Johnson. I believe he has been with you for fifteen years. What are you doing for him?"

"Wait a minute," the department manager said as the merchant started to reply. "I will answer that for you. You have cut down his salary and he is living in fear that you will send him over the same road as White. Now, if Johnson had been working in our store, he would have been given a share of the profits he helped to make, after he had been with us three years. By this time he would have a nice little nest egg in the form of stock in the store.

"If any of your clerks do not show up for a week, you dock them full time until they return. Do you know what they do in our store?"

"No, what do they do?" the merchant replied.

"We send our Miss Prentice, who has charge of the welfare work, and if the absentee is sick Miss Prentice immediately takes steps to see that the clerk has every care until fully recovered.

"Then there is the question of vacations. In your store you give one week on full pay, but you hold up the pay until the clerk comes back—an evidence that you are fully aware of the fact that there is little or no loyalty among your clerks. You apparently think that if you paid them in advance they would never come back. In our store the clerk gets two weeks on full pay and gets the full pay before he leaves, so that he will have something on which to enjoy himself.

"You see I am working in an entirely different atmosphere from what I would have if I were to go to work for you. I am telling you this plainly, because I believe that you ought to try and do the same for your clerks as our employer is doing for us. Every clerk in our store realizes that our employer takes an interest in us and is in sympathy with everything we do. It makes work there a pleasure. We

are absolutely sure that if any personal difficulty besets us, our employer will do everything he can for us.

"We naturally would feel pretty small to take advantage of him at this time. During the recent business depression it was hard for our store to show a gain in business, but it is a good deal harder for you to do that than it is for us. That, perhaps, is the reason why you are interested in employing me. Right now, I realize more than ever before that my employer needs me and I would not even consider your proposition."

Loyalty of the clerks to the man for whom they work is usually the result of their conviction that he would do as much for them. Ordinarily, loyalty is a thing which does not show on the surface. It requires a crisis of some sort to bring it out, but it is during a crisis that loyalty is most needed.

### SHOEMAKER BY BIRTH AND INSTINCT

SOME are born to greatness and some have greatness thrust upon them. W. F. Smardon was born with the smell of leather all about him and in his half century or more of active life he has never been beyond sound of the hammer and stitching machine.

He was born within twenty-five miles of the city of Toronto in the village of Markham, where his father plied the important and eminently respectable avocation of hand-sewed shoemaker. He tells with pride of the prizes won by his progenitor at the local fairs for the excellent samples of his handicraft.

For many years Walter Smardon was the presiding genius of the "Bell" factory in Montreal, whose shoes for almost a century have been standard for quality. It was during his regime that their goods attained their present wonderful popularity.

The "Smardon Shoe" has justified his genius not only as a shoemaker but as a business man for, strange as it may seem, very few men who have graduated from the shoe bench have made a success of the manufacturing business.

Mr. Smardon is a man of parts and while he has given his very best to the shoe business, which has been his hobby for close on a half century of time, his mind does not run in a groove. He finds time to interest himself in the broad questions that effect his times and his particular environment.

He has the good fortune of having induced his two sons to follow in their father's footsteps as far as the shoe business is concerned and is now in a position to take a breath as it were, and look around him. He is still in the prime of life and expects to see further laurels added to the name of Smardon in shoemaking achievement.

# Fall Styles in Women's Shoes

Manufacturers Somewhat Unsettled as to the Future—Still Struggling to Complete Spring Orders in Some Cases—Hints from Some of the Great Centres on the Other Side—What American Women Will Wear for Autumn

THE "frenzied footwear" of the past two or three months which has put on the market shoes of all styles, shapes and shades, is being put through the simmering process, and manufacturers are asking themselves what will be the game for the more staid and settled periods of autumn and winter. It is felt that while the interest in some of the outré styles will be well maintained until cold weather and untoward conditions set in or as long at least as the short skirt will lend countenance to striking shoe effects, the natural order of things will demand quieter and more seasonable ideals as time passes. There is no doubt that blacks and tans of the more substantial quality and shades will supersede the light and varied fancies of summer shoemaking. Yet, Quien Sabe?

## Autumn Leathers

It is estimated that three-fourths of the fall shoes for women will be in black with the balance in tans and combinations of cloth, black and shiny leathers. For general purposes calf and vici will divide honors with some advantage to vici, which is becoming more and more popular for women's footwear as the lighter grades of calf become scarcer. Combinations of cloth tops, vestings and kid with patent and black vici will be prevalent and two-tone effects in tans, as in men's, with dark mahogany for vamps and foxings and lighter shades for the tops such as grey, ivory or champagne. A new leather showing cross stripes like gros-grained silk is shown, and another of black and white kid in polka dot and checks in limited quantities. The favorite colors in calf and kid seem to be grey, ivory and midnight blue, which has been renamed allnight blue. Fabrics will be popular both plain and fancy.

## Lasts and Patterns

Lasts have been made a little longer to give more point than formerly, and the long forepart is the rule, although vamps run from three to three and three-quarter inches. There are no short vamps in the best shoes, although they may still be found in staple lines. The tendency is towards lower tops, the prevailing heights being seven and eight inches. Nevertheless, some nine inch samples are shown for fall and no doubt time will develop higher styles should the skirts continue short in length, which seems likely, notwithstanding predictions in the other direction. The short skirt has established its claim to consideration as sensible as well as neat and attractive looking, and as wintry

weather draws on it does not seem natural that there should be a reversion to the former long styles. There is some agitation to save leather at the present high prices by shortening the shoes, but the manufacturer who attempts this will be daring.

## Fancy Effects

In both black and tan and colored shoes there is a disposition towards ornamentation by scallops, pinking, perforations and otherwise, but the effects are quiet and graceful. While in the best grades plain toes and occasional imitation tips will rule, in a great many lines, especially tans, tips, wings and fancy vamps and quarters will be found in plenty. Wing and shield tips are found on many lines. Fancy effects in perforations, inlaying, collars, pinked vamps, foxings, and scalloped button flies will prevail.

## Shapes and Styles

Laced shoes will naturally predominate, although a goodly number of buttoned shoes are shown. The laced idea follows the trend of feminine styles just now and lends itself to the dress effects and particularly the short skirt. Some chaste styles are shown in plain effects with invisible eyelets and without the ornateness of pinking and perforation. The tops are either straight curved or decidedly Napoleonic. They are shown all the way from seven to ten inches in height with the medium prevailing. Skating boots are a great feature, as it is expected that the craze that existed last year for skating will be even more pronounced than ever. Some "hockey" effects are noticed and may be seen in some of the illustrations.

## As to Prices

Manufacturers have made up their minds not to work for love. It is going to be a hard season, as prices are so constantly on the move that it is practically impossible to figure costs far in advance. So far, advances have been made of from twenty cents to a dollar a pair on women's shoes and the end is not yet. Some manufacturers are seeking to reduce cost on staple lines by introducing the use of composition soles and fabric tops, but even this will not save the general tendency towards higher prices. A manufacturer, summing up the situation, stated the other day that the retailer who did not buy and buy early would make the mistake of his life.

# Fall Styles in Men's Shoes

What Has Been Gleaned Amongst Foremost Makers  
at the Important Centres Concerning the Trend of  
Styles for the Coming Season—More Changes in Fall  
Lines Than Usual

**I**N our last issue we gave a brief outline of the impending changes in styles for fall. Until within the past couple of weeks manufacturers have been so busy completing the spring season that they had not time to give definite shape to their ideas. Recently, however, a good many have returned from a survey of the situation at the large American centres and are able to report progress.

## Bal Patterns Prevail

While not a few blucher cuts are to be found in staple lines, that is to say regular sellers, and these partake of the innovations of decorations and so forth, the plain laced shoe is most largely in evidence in the samples shown and those of the straight-laced variety, that is without hooks. The eyelets preferred are the invisible with a strong tendency towards "midgets." As the blucher cut prevails for the medium class and even for the better class business wear, so the buttoned shoe for semi-dress purposes retains its popularity in combinations of patent and cloth or kid. Some handsome samples of the latter are shown in patent with a new cross grained leather that gives the appearance of gros grained silk. Some lines are shown with fancy and colored cloth quarters.

## Combination Effects Plentiful

Not only are combinations of tan with patent and black to be observed, but two tones in tan are the vogue being shown with the vamps and foxings in dark mahogany tan with a lighter shade for the quarters. Contrasts are also obtained in vamps and wing tips but it is not thought that the latter will be as popular, as the fashionable color in tans is darker than has prevailed. A new shade has been introduced that is between ox-blood and mahogany. Notwithstanding the prevalence of tan samples, it is thought that the season will be decidedly black as far as men's goods are concerned. Cordovan is being introduced and the scarcity of this material has caused the finishing of cowhide and heavy calf to imitate it in appearance and grain. It is estimated that half the lines will be in black calf or side leather with the other fifty per cent. divided between tan and glazed kid.

## Autumn Shapes

As previously hinted in our advance outlines of men's fall styles in a former number, the preference

is shown for the English and French styles with the long forepart and although later there might be some distinct innovations the present tendency is towards the medium narrow toe, although some samples show the recede drop toes in vogue several seasons ago. What is called the Scotch bal pattern is also shown to some considerable extent with circular vamps and heel foxing.

The swing last is to be found in the higher class shoes for men, notwithstanding the predictions of last men and fashion prestidigitators. It is principally in evidence, however, on the medium grades and especially in combination lines of patent and kid or cloth tops. Quite a few tans are also shown in this shape which for general selling purposes is hard to sidetrack. Of course the long effects sought in lasts is against the "swing," but it will continue for certain classes of trade nevertheless.

## Fancy Ornamentation

There is a disposition to use the ornamental to a considerable extent and bals are made with eyelet stays, vamps and quarters scalloped and perforated. There is not so much of the ginger bread effect, however, as there was a few years ago when "pink-ing" ran riot. Samples are shown with wing tips, with square effects, and some shoes are shown in tan with ball straps also pinked and perforated. Amongst the fancy effects in men's shoes may be mentioned black and patent, laced and buttoned, with colored kid tops, dark grey and dark champagne being the most in favor for the tops.

## Composition Soles

On account of the high price of sole leather there is a general trend towards stout single soles for fall and winter wear and not a few lines are found with composition soles, of which quite a number have recently been placed before shoe manufacturers. As a rule, however, the latter are going slow on the proposition, trying out the sole leather substitutes very gingerly in their new lines. The makers seem to have every confidence in their product and are guaranteeing good service.

The material used is principally rubber, although fibre is added to give the cohesiveness and tensile strength. A shoe manufacturer who has been wearing a pair of these soles for over a month says he has been surprised at the results.

### POPULAR SHOE TRAVELER GOING OVERSEAS

Lieut. Frank S. Cronk, who has enlisted with the 169th Overseas Battalion, is well known to the shoe trade, being a son of S. C. Cronk, who has been associated with the business for some thirty-five years as traveler, eight of which he has been in the wholesale line in Toronto, and from the large number of hockey boots which he handles each year, is often termed "the hockey king."

Lieut. Cronk, who is twenty-four years old, worked in the warehouse and on the road for about five years previ-

LIEUT. FRANK S. CRONK, TORONTO

ous to joining the colors a few weeks ago. He was a sergeant in the Queen's Own for three years and for some time was a member of the Royal Canadian Dragoons at St. John, N.B. Lieut. Cronk has taken an active interest in recruiting and did most effective work in securing members for the 169th Battalion. He is another member of the many in the trade who intends doing "his bit" for King and Country in the present struggle.

### PALATIAL NEW SHOE STORE IN MONTREAL

The Walk-Over Boot Shop has removed from 521 St. Catherine street west, Montreal, to 505 St. Catherine street west, in the new Drummond block. The new home is one of the finest on the continent and has an imposing and attractive front that makes it one of the palatial establishments of the commercial metropolis. The interior fittings and equipment are most impressive and distinctive. Rich mahogany is used throughout and the decorations are in perfect harmony and good taste. Some of the features of the new abode for Walk-Over shoes are a rest room and ladies' private telephone, private shoe shine, and chiropody department. The latter is in charge of a well known specialist. The equipment is the very latest extant for the correction of deformities and ailments of the feet. The proprietor is F. A. Guinivan, who is also the proprietor of the handsome Walk-Over Boot Shop in Toronto. In the opening announcement of the store it is stated that the removal to new and larger premises has been rendered necessary because of greatly increased patronage of the people and the desire of the

store to give wearers of Walk-Over shoes the best service possible and, by service, is meant not only advanced styles and perfect comfort, but to make the purchase of footwear a pleasant duty.

### MAINTAINING UNIFORMITY OF PRICE

W. H. Ingersoll, sales manager for the Ingersoll Watch Co., than who there is no greater authority on price maintenance, said in a talk before the Pilgrim Publicity Association of Boston: "That a manufacturer of an advertised and trade-marked article should have the right of establishing and protecting the consumer price.

"Because, having prepared at his own expense the foundation for his article he has created a condition of market that automatically goes with the article to the retailer, but which the retailer does not purchase.

Because, having prepared at his own expense the foundation upon which depends the successful resale of his article he should have the right to protect the established reputation for quality through the maintenance of a uniform price.

"Because the trade-mark placed on the article is the sole property of the manufacturer and no rights in it or to it are transferred to the retailer by the act of his purchase of articles bearing it for the purpose of resale, and consequently the retailer should not be permitted to sell the article for any price other than the price for which it was manufactured to be sold."

### THREE BROTHERS IN FIGHTING LINE

George Pert, a native of Dundee, Scotland, who has been five years in the employ of the Toronto office of the United Shoe Machinery Co. and latterly on the city selling staff, recently joined the signal corps of the 95th Overseas Battalion and is now in training at the Canadian National Exhibition Grounds. Mr. Pert has two brothers in the service. One, who took part in South African war, is with the British

PTE. GEORGE PERT, TORONTO

Army in France and another is attached to a submarine of the British navy. Mr. Pert made many friends among the trade during his connection with the U. S. M. Co., the staff presenting him with a handsome wrist watch.

# WHAT I HAVE RUN UP AGAINST SELLING SHOES

Clerk Tells How He Has Met Several Situations—Some Exceedingly Ticklish and Others Threatening—Told One Woman to go Home and Bathe Her Feet—Fired for Not Selling Foreigner and Re-instated Through Unusual Turn of Affairs Afterwards

By J. C. H.

“YOUR shoes here are rotten. The last pair that I got was the worst that I ever put on my feet, absolutely no good.”

The speaker was gruff in manner and seemed to be in a nasty mood. I had not been in the store very long and

did not know how to take the man or really what to say in reply to his fault-finding remarks. I have always gone on the principle that it is wise for the salesman to hold himself well in check and not fly off at half cock. I went to the shelves after learning his size and brought forth two styles of the B—brand, quietly observing that we could guarantee the quality of these as they consti-

tuted the best make in men's footgear that we had in the place. He tried on the two pairs and remarked rather curtly that he would take a box calf blucher with slip sole and plain quarters which we sold at six dollars.

“As I was handing him the parcel my caller said, ‘Well, if these shoes wear as well as the pair I have on (the ones which he had so unceremoniously condemned) I will not do any kicking. These have given me two years' service.’ Then he gave a smile and I knew he had been joshing or rather stringing me. If I had fired up at his first salutation I do not think I would have made the sale. You know there are some people who take a malicious delight in condemning your goods just to see how you will act under the onslaught. That is one kind of customer that we meet occasionally in the shoe store.

## The Boy and Mother Knew It All

“Here is another of my experiences. I once had charge of the boys' department in another store. One day a stalwart lad came in with his mother and wanted a pair of boots. I put the measuring stick on the boy's foot and found that it registered five and a half. I noticed the shoe that he had taken off was too small for him, it being five and a half and his toes were jabbed right up to the end. He had been complaining. I told him that he should have size seven to fit him comfortably as his feet were not done growing. Both the lad and his mother scouted the idea of such an enormous size for Willie. We talked the matter over for some time and the wise offspring told me to take the boot off as it was too large and he would never wear it. The mother also insinuated that I evidently did not know my business. Finding argument or reason out of the question and being informed that they would go elsewhere, I politely but firmly said, ‘Well, you have asked me to fit this boy properly and I have told you the size that he requires. If you think you know more about fitting than I do, I am afraid that I cannot give you any satisfaction.’ With this the couple departed and I never expected to see them again. Judge of

my surprise next day when mother and son came in again. The latter asked to see size seven in a box veal, and meekly observed that he would take the shoes. His mother paid for them and they went away well pleased. My only supposition is that they had visited another store and being told that the size which I mentioned was the proper one, they felt somewhat ashamed of their previous action and had come back. I learned afterwards they had been customers of the store for some years.

## Told Woman to Bathe Her Feet

“A prepossessing lady, well dressed and of pleasant manner, came in and told me that she wanted to see something in a patent button with cloth top and Spanish heel. I removed her shoe and tried on one of our regular five dollar lines. On withdrawing the boot I saw that the lining had been discolored. I could not see my way clear to fit on any more pairs for they would all be ruined because this fair caller had not recently bathed her feet and her stockings were filthy from perspiration.

“Here was a ticklish situation but I knew the boss would stand behind me in any attitude that I assumed. I courteously told the woman that she would have to change her stockings and bathe her feet before I could fit her with any more shoes. I showed her the one that she had just tried on, pointing out in a quiet way that the lining had been soiled and that if any more footwear was fitted it would be rendered unsaleable. I informed her kindly that I meant no offence and explained that she could understand our position in the matter.

“Now the majority of females would have got on their dignity at once and walked out of the store in high dudgeon. Not so this lady. She admitted that she had feet which perspired copiously and told me that she would return. I did not expect to see her again but that afternoon she came in with clean feet and fresh hosiery and I sold her.

“Oh, yes, I would rather wait on men than women for they take less time, know what they want, are more easily satisfied and do not ask to see as wide a range of footwear. But when you get a fussy, finicky young fellow or a know-it-all, pernickety old chap, why each is generally a pippin. But you must be pleasant and patient under all circumstances and take the bitter with the sweet. Why a chap came in the other day and it took me over one hour to satisfy him. I showed him just thirteen different styles and he did not know what he wanted, nor could he make up his mind.

“First he thought one pair would do and then he liked another last better, etc. There before him were an English last, a wide round toe, a straight last, a pointed toe, a full toe, a semi-recede and a fairly high toe. Finally he thought he would take a mahogany button with military heel and toe cap with small diamond perforations. I was thankful that he had at last made up his mind when he suddenly changed it and bought a kangaroo bal with a semi-recede toe. He paid me seven dollars and went out. I was pleased beyond measure when he got beyond the door for I fully expected that he would turn back.

## Failed to Turn Him Over

“In another store where I worked we were always instructed if we could not make a sale to turn the customer

over to some other chap on the floor and let him have a try. One Saturday night the head salesman was walking around keeping his eye on everybody and he saw me let a caller go out without closing a deal or handing him over to another. Now, in the first place, the visitor was a foreigner and wanted a shoe of grain leather, Standard screw, for about two dollars. We did not have one in the shop at that figure. I could not get this fact through the chap's head, and he persisted he had got such a kind at our place before. I saw that I was wasting valuable time on him, as the store was filling up with patrons. After telling him at least three times that we could not satisfy his wants at the price, he got up with a shrug of his shoulders, remarking in a rather loud voice that he would go somewhere else where he could get better treatment.

"This was the signal for Bilkins, the head salesman, to swoop down on me. He asked impertinently why I had let the fellow go out. 'Why did you not let Jenkjns wait on him?' he bawled out.

"Now his attitude was so contemptuous and unreasonable that I promptly and plainly told him that if I could not sell the stranger Jenkins or no one else in the shop could. This only tended to increase the rage and chagrin of Bilkins, who declared that a like occurrence would result in my dismissal.

#### He Could Take a Hint

"Well, I grew hot under the collar and asserted that I could take a hint before I was kicked out and I quit that evening.

"But fortune favored me. This foreigner came in again on Tuesday morning and happened to meet Bilkins at the door. The latter thought that it was a fine chance to show his ability in the line of expert salesmanship and so he tackled the job. The stranger went over the same line of talk that he had with me and protested that he must have a shoe for two dollars just like what he wore. As we had nothing in the shop under two and a half and three, in the Standard screw line, the alien ripped out an oath about this 'damned crooked establishment' and its high prices and, in some excitement, proclaimed that it was the second time he had given us a chance to sell him.

#### Apologized for His Rude Conduct

"Well, Bilkins had the starch taken out of him by this tough proposition, for the cranky customer walked out once more. Bilkins was a good fellow at heart and phoned me that afternoon, apologizing for his rude attitude on the previous Saturday, stating that he had been altogether too hasty in coming to conclusions and asking me to come back to work. He did not tell me why he had undergone a change of heart but one of the boys did afterwards. I went back and after that Bilkins and I got along first rate. The incident taught him to have a little more confidence in those under him and their judgment, and to realize that while every well regulated store must have a policy and certain staff regulations these cannot be inflexible in their application. There are exceptions in every case.

#### Chief Requisites of Salesman

"I could relate many more experiences, some humorous, some pathetic, some trying and some thrilling, but these will answer for the present. The chief things for a salesman in the shoe store is to be polite and patient and attentive, know the stock and study human nature. One must exercise good judgment for nearly every customer has to be handled in a different manner. By this I mean some are silent, some talkative, some irritable, some overbearing, some egotistical, some selfish, some bullheaded, some cranky and some sarcastic. It takes all kinds of people to make up the world and the average retail establishment gets a fair proportion among its customers."

#### AN EXPERT SALESMAN STILL WANTED

Years ago the shopkeeper was his own salesman. Customers were content to wait sometimes hours for the advice and assistance of the experienced trader when making important purchases. In market towns the old market days were busy indeed, and shops were crowded. Now trade is spread over a wider area, but there is the same need of tactful salesmanship, and even greater need of entering into the everyday life of customers. Personality in business has again and again been advocated, and it cannot be too strongly emphasized that personality is still a very important matter. Some of the large storekeepers with immense businesses recognize this; and knowing their impotence to deal with all customers personally readily admit that the best man must be employed as salesman. The country shopkeeper, too, will soon find that his returns will increase if he has the right man behind the counter. Psychology in business may seem a high-sounding and possibly a somewhat misunderstood term, yet it is applicable to the retail shop, and daily becoming a necessity. In intelligent trading it is that knowledge of human nature which directs actions, tells at a glance where confidence may be reposed, indicates the man who can be trusted, and points to the customer who should be watched and limited in his credit. Although ready-money business is encouraged nowadays, there is a certain amount of confidence necessary between buyer and seller even there, and the reader of character with a knowledge of human nature is the right man to control it.

#### HAS GOOD RECORD IN SHOE GAME

George Nicholson, city traveler for the W. B. Hamilton Shoe Co., Toronto, has been connected with that firm for over twenty years. Starting in as messenger boy he laid the foundation for a sound knowledge of the trade. When he entered the service of the house there were two other employes with the given name of "George," and he

GEORGE NICHOLSON, TORONTO

was called "Dick" to avoid confusion, and to this day is so styled by the staff. He was later placed in charge of the orders and then was promoted to be sample room salesman, from which position he was transferred to the work of calling upon the trade in Toronto. He has been doing this faithfully for some six years and, with the aid of a run-about, covers the ground thoroughly. Mr. Nicholson is well liked and well thought of by his customers.

**MR. ANGUS RETURNING TO ST. JOHN**

W. M. Angus, who for the past year has been assistant general salesmanager for Ames-Holden-McCready, Ltd., Montreal, is returning to the St. John, N.B., branch, which position he occupied for a number of years, previous to his removal to the metropolis. Mr. Angus began his shoe career in his home city of Montreal, in the office of the Ames-Holden Co., some twenty-two years ago. His ability

W. M. ANGUS, ST. JOHN, N.B.

was soon recognized by those in authority, and he was rapidly advanced until the field in the Maritime Provinces offered him an opportunity to show the energy and aggressiveness which he possesses. On the amalgamation of the Ames-Holden Co., with the James McCready Co., in 1911, Mr. Angus was retained as manager of the combined houses. A couple of years ago, a splendid, new, six storey warehouse was erected at the corner of Duke and Canterbury Sts., St. John, in order to accommodate the rapidly increasing business. The structure embraces the last word in appointments and facilities, and in returning to St. John Mr. Angus will be warmly welcomed by his many old friends in the Maritime Provinces. He is a brother of A. R. Angus, general sales manager of the Miner Rubber Co.

**MISSING SHOE DEALER IS FOUND**

Malcolm P. Johnston, senior member of the shoe firm of Johnston & McCormick, St. Thomas, Ont., who has just returned to that city after an absence of twenty months, tells an interesting story of his experience. A few weeks after recovering from a fractured skull, sustained by a fall down a cellar stairway in the summer of 1914, he remembered walking along the streets of St. Thomas, but recollects nothing between that time and when his memory returned while at work on a cattle ranch 50 miles from Tulsa, Oklahoma. How he got to that far-away State he has not the slightest idea. When his memory returned a month ago he was helping to brand cattle. Mr. Johnston had charge of a fractious young steer, in handling which he received a sharp blow on his forehead. He was stunned by the shock, and his comrade dragged him from the enclosure to prevent the cattle from trampling over him. Upon recovering his senses he also recovered his memory of St. Thomas, his partner, business, and friends there, but his mind was left a

blank as to the events of the past twenty months. Soon after his awakening Mr. Johnston left for his brother's home near Chicago to spend a few days to recuperate before going on to St. Thomas.

**VETERAN RETAILER CELEBRATES 83RD BIRTHDAY**

Robert Wilson, who last month celebrated his 83rd birthday, is Hamilton's oldest shoe retailer, and one of the veteran business men of Canada. He is still enjoying excellent health and his two sons, Charlie and Arthur, look after his successful shoe business at 73 King St. East, in the "Ambitious City." Mr. Wilson has been in the footwear line ever since 1863, and nearly three years ago, observed the 50th anniversary of his wedding. Born in Lisburn, Ireland, and, coming to Canada at an early age, he secured his first job with his brother George, who was a shoe manufacturer in Quebec, and afterwards went into the retail line. It was there that he gained his initial insight into shoes. Working diligently on the bench for two years, over half a century ago he left the Ancient Capital for Hamilton, which was then little more than a hamlet.

Opening up a little repair and custom shop on John Street, he soon put in a small stock of footwear. Custom shoes were then worn to a great extent, and Mr. Wilson had at one time several men engaged. He has occupied four different locations on King St., Hamilton, and moved into his present stand, 73 King St. East, thirteen years ago. Mr. Wilson has always kept well selected lines and given prompt and courteous service. He was for a time a traveller on the road for shoes, and covered the ground from Hamilton

ROBERT WILSON, HAMILTON, ONT.

to Windsor, with a horse and rig, carrying the samples in the back of the conveyance. One day he was kicked by his horse and had his arm broken. This resulted in his giving up the position on the road, and returning to the retail ranks, which he had left for a short while. Mr. Wilson is a pleasant conversationalist, and can recall many interesting incidents of the quaint stock keeping and selling methods of the pioneer period. He believes that conditions have changed for the better, and that retailing shoes is to-day a more pleasant and more dignified calling than in the early days, when the ordinary shoe shop looked something like the headquarters of a pawn broker, with its miscellaneous assortment on the open shelves, walls, ledges, racks and poles. Numerous friends in the trade will wish him many more years of peace and happiness.

## Counters That Outwear the Shoe

Don't risk the reputation of your shop by using anything but the best counters.

# DUCLOS & PAYAN FIBRE COUNTERS

We have been serving shoe manufacturers for 43 years and during that long period we have learned to *know* just exactly what can be expected of our counters. That's why we *absolutely guarantee* that these counters *will* outwear the shoe.

Made in Canada by Canadians from pure Canadian made Fibre.

Pithy Note and Comment on Shoe Matters—What the Makers of Shoes Are Saying and Doing—Shoe Facts and Fancies

**T**HE management of the Shoe and Leather Fair to be held in Boston July 12 to 19 has secured the services of Mr. Arthur B. Butman, former commercial agent of the United States Department of Commerce, under the Bureau of Foreign and Domestic Commerce. Mr. Butman is one of the best posted men in the country in regard to the foreign trade, especially in the shoe and leather field. During his connection with the government he traveled twice through European countries, spent 18 months in South America, and made several trips to Cuba, Porto Rico, Jamaica, Mexico, Panama and other Latin American countries. Special attention was given by Mr. Butman to the shoe and leather industries in the foreign countries which he visited. Exhibitors at the Fair may avail themselves of Mr. Butman's experience and advice and he will be present through the Fair week to answer inquiries and meet foreign guests. Between now and the opening of the Fair Mr. Butman will devote his attention to securing a large foreign attendance by means of invitations sent direct and the co-operation of the American Consular Service. There will be meetings of shoe retailers, shoe buyers, shoe factory superintendents and foremen at the fair and a large attendance of foreign buyers.

## Buttons and Laces Still Soaring

"Six months ago I spoke to the shoe manufacturers through the columns of the SHOE AND LEATHER JOURNAL predicting a big raise in the prices of all shoe laces," said G. J. Trudeau of Montreal. "Since that time prices have advanced at least 60 per cent, and the end is not yet in sight. Conditions to-day are such that no factory will guarantee prices for one day nor will they give any surety as to colors or deliveries. This applies to all textile materials used by shoe manufacturers such as tapes, bindings,

thread, and other articles. Constantly increasing prices have had the effect of developing a demand for shoe buttons which in consequence have commenced to go up in price, particularly in the last two months.

"Shoe buttons purchased f.o.b. U.S.A. at 26c per G.G. at the first of the year were increased to 30c per G.G. in the middle of January and a further increase of 5c took place the 1st of February, these increases applying to black buttons, sizes 3½ to 4, such as are used in large quantities for children's, misses' and women's shoes. Other sizes have advanced in price in proportion, with a correspondingly greater increase in colored buttons.

"The button situation is not at all satisfactory. Deliveries cannot be specified, regardless of price. It seems to me that the only safe course for shoe manufacturers to pursue is to endeavor to protect themselves on laces and buttons by contracting for at least a whole season ahead. If they do not do this it is inevitable that they shall have to pay higher prices.

## The Best Outsole Stitching

In getting the best outsole stitching there is first, of course, the size of the thread, needle and awl to make a tight stitch. These relative sizes must be determined by experts when it is known what sort of stitch is desired; whether it is to be short stitch or long stitch, with coarse, medium or fine thread.

Next there is the question of the temper of the stock so that the stitch may be well made, with conditions that are fair to the machine and to the combination of needle, awl and thread. The temper of the stock includes both the temper of the welt and of the sole. Both should be tem-

*THE main building of the new home of the Chatham Shoe Co., Chatham, Ont., which will begin operations early this month. The structure is splendidly adapted for shoe manufacturing purposes.*

## Not one Columbia Counter (Fibre) failed

They have been used now for well over a year by Canadian Manufacturers, and every single Counter was perfect in service—not one failed. We guarantee them with an iron bound guarantee, and they stand right up to it. You take no chance, you run no risk of dissatisfied customers if you use Columbia Counters.

Our factory is equipped to fit all lasts. Samples and quotations on request.

365-371 Ontario St. E., Montreal

pered by the long tempering process and brought to the outsole stitcher in good condition as to temper.

Then there is the shape of the sole when it reaches the outsole stitcher. I maintain that welt soles should be molded and shaped closely to the last so that when the shoes come to the outsole stitcher the edges should hug down in the shank. This will enable the outside stitcher to make a straight seam in the shank. Right here is a source of much ripping of outsole seams at the shank.

If, when the shoe reaches the outsole stitcher, the sole at the shank lies away from the upper, he must tip the shoe and throw on the seam at the bottom of the sole. In this way the outsole seam at the shank goes through the sole on an angle, uses more thread, and is not as tight.

Then, when the shoe goes to the leveler, he undertakes to beat down in the edges in the shank, in doing which he stretches the sole, makes it thinner and loosens the seam, so that the shoe will rip very shortly after it is worn.

On the other hand, if the sole is in proper shape when it reaches the outsole stitcher; that is if it is molded down in the shank, he can make a straight seam that will be tight and that will be undisturbed by the leveler. A shoe so stitched will not be near as likely to rip in the shank.

If the temper of the welt is very different from that of the sole you are pretty sure to have trouble with checking edges. This undesirable result can be avoided by using the long tempering process on both welt and the sole, and so timing each that they will come together at the sole-laying machine in practically the same condition.

There is little doubt that much of the trouble with outsoles ripping that is laid to improper combinations of needle, awl and thread, is really due to unequal temper of outsole and welt. That is to say, if the sole is in dry mull temper and the welt soaking wet, or if the welt is in dry mull temper and the sole soaking wet, when the sole is sewed, then the shrinking of the one that is too wet will loosen the seam and tend to make it rip easily. You will save yourself a lot of trouble by having the sole and welt in the same dry mull temper when they are fastened together.—Superintendent and Foreman.

#### Death of a Veteran Tanner

Many friends in the leather arena will regret the passing of John J. Lamb, the senior member of the firm owning and operating the Omemee tannery at Omemee, Ont., who died suddenly while at his work in the establishment. Mr. Lamb was an enthusiastic member of the trade and highly respected by all. He was a former chairman of the Tanners Section of the Toronto Board of Trade, and an active member of its committees. The Omemee tannery turns out harness and collar leathers. Mrs. Lamb predeceased her husband a few years. One son, Harry, and one daughter, Sara, survive. The former has been associated with his father for many years and will carry on the business.

#### An Expert in High Class Shoe Making

H. D. Weber, the new superintendent in the Classic Shoe factory at Galt, entered upon his new duties a few weeks ago. The Getty & Scott firm, after considering applications from the best superintendents in the U.S. and Canada, decided from the reputation which Mr. Weber had in his various charges in this capacity that he was the man who could fill the position and make shoes up to the standard of the ideas of the firm. Mr. Weber has held positions with the best firms in the U.S. who are producing the highest grade of women's footwear. He began the shoe business when a boy of fourteen with the Ziegler Bros. of Philadelphia, where he served part of his apprenticeship. From there he went to Wickett & Gardner for six years, under the instruction of the best mechanics in that shop, which is one of the highest type. From there he went with Thos. G. Plant when he moved to Jamaica Plains, and served a term of five years. Next he was with Julian

& Kokenge of Cincinnati, where he was general manager and superintendent of the entire plant. The goods of this company are well known to the Canadian and American trades. In this capacity he served for five years. P. J. Harney Co. of Lynn was his next position, and he also had full charge

H. D. WEBER, GALT, ONT.

of the factory. He did the buying, was superintendent and general manager. Under his regime P. J. Harney Co. enjoyed the most successful term of their existence. Later he went to the Brown Shoe Co., St. Louis, where he developed their high grade line of women's welts, turns and McKays, and from there he came to Getty & Scott as superintendent of the manufacture of Classic shoes. Under his supervision so far the product of the plant has improved very much. The general atmosphere of the product is lighter and more chic and shows the ear marks of the highest type of shoes produced anywhere. Mr. Weber also brought with him an aggregation of the best shoemakers he could find in the various factories where he had been employed. Everything new and attractive in the new fall line will be found in the Classic range of both women's and children's footwear. The new high legs in all the various combinations and a multitude of patterns will attract the attention of the keen, live shoe buyers of Canada, as they reveal beauty, class, and dignity in every curve and line.

#### German Leather in British Shoes

A recent press despatch from London says:—"The English people are beginning to believe that they are wearing shoes made of German leather through the fact that many of their shoes are imported from Switzerland, where the manufacturers are known to use large quantities of German leather. Their suspicions were recently confirmed by the fact that British imports of shoes from Switzerland during February were nearly double those of the corresponding period in 1914. Information was given in the House of Parliament recently that the use of German leather to the extent of 25 per cent. in shoes imported from Switzerland is permissible."

#### Compliment to Canadian Company

Word has just come from New York, which would indicate that a remarkable compliment has been paid to the Dunlop Tire & Rubber Goods Co., Limited.

A large agency, who keep a portfolio of the world's best advertising matter, gathered together from every part of

the map, include in that portfolio the Dunlop "Famous Picture" series, which appeared in Canadian newspapers last September. The "Famous Pictures" were the first ads of the type ever run in America, or any other part of the world, so far as can be traced, and that is probably the reason why the agency in question selected the series for their portfolio, as their big endeavor is to get new treatment on any subject or, in other words, originality all along the line.

#### How Sole Stock Gets Dearer

Sole leather continues to soar, and there have been several advances since the war. Oak is now selling from 8 to 13c higher in sides, crops, backs and bends—than it was in September 1914, while hemlock is up from 6 to 11 cents. As army shoe manufacturers are using ten to twelve iron sole stock, they are taking the prime quarters and the

heaviest and most solid cuts. Dry hides from South America are now quoted at 40c in Boston, but of late dealers in that country have been giving their quotations from South American ports, the consignee being expected to make arrangements for transportation of the hides in the every best way he can. This state of affairs has been brought about by the scarcity of bottoms, owing to the war. There has been a recent increase of 4c a pound on oak soles and 1½ to 2c on hemlock. Tanners are well sold up and do not agree to cover any shoe plant for more than sixty days at the most—then merely according to the stock in hand. Previous to the European conflict it was no unusual occurrence for a sole leather producer to protect a customer's supply for six months or more. Now, orders are being turned down right and left, owing to the uncertainty of deliveries, the difficulty of transportation, scarcity of hides, etc. One leading Canadian sole leather house remarked that they had

refused four large orders from United States firms in two days, simply because they had not the stock, did not know when they could get it, and were anxious to protect their Canadian patrons. Not only is the shoe manufacturer hard hit in the matter of sole leather, which will make a material difference in the case of production, but all kinds of heels have gone up since the strife abroad, from 2½ to 3c, according to the height and width, while counters have taken a jump of about 2c a pair. Thus, in men's ordinary shoes, where there are an inner sole, a slip sole, and an outer sole, from 2 to 2½ pounds of leather are used when the heels and counters are taken into consideration.

It will thus be seen that, with recent increases in sole leather stock, heels and counters, the extra cost to the manufacturer is fully 25c a pair. Not only is the shoe manufacturer up against it in bottom stock, as well as in upper leather (which has gone skywards at a rate never before known), but he is also facing the labor problem, which has become serious. Skilled help of all kinds is very scarce, owing to so many shoe workers going overseas. One firm in Ontario has over 125 men with the colors, some of whom are fighting in France, while others are training at various camps. There is not a factory in Canada which has not lost several employes and this has somewhat disorganized matters, but shoe manufacturers are loyal and enthusiastic and will cheerfully comply with any irksome conditions, in order to win the conflict, which has hit tanners in very much the same way, so far as employment is concerned. Many leather firms are running short handed and owing to the panicky condition of affairs, tanning agencies of all kinds have aeroplaned two to three hundred per cent.

As indicative of the advance in sole leather stock since the war, tap soles have also gone up nearly 25% in the last nineteen months. This means that the average shoemaker will have to secure better prices for his repair work, or use inferior stock. The majority of patrons would prefer to pay a higher sum if assured of a good job and leather that will give satisfactory service.

### The Present Shoe Lace Shortage

A leading firm writes as follows on the acuteness of the situation:—

On October 12th we sent to our trade the attached letter in an endeavor to set before them the shoe lace situation, as it existed at that time. Since then new problems have arisen regarding which the trade in general has but meagre information, and we feel that it is due our customers that we bring these new conditions to their attention. On December 8th the order of the British Government, placing an embargo on the export of logwood dye from Jamaica and British Honduras (the principal source of supply) went into effect. The immediate result of the embargo was an advance in price from the previous war figure of 18c. to 70c. per pound, and now manufacturers are offering \$1.00 per pound for immediate delivery.

Three perfectly natural results followed this embargo and price advance:—

1st—The manufacturers not knowing what provision, if any, could be made for further supplies withdrew part of their lines from sale except where they were covered by contract or special agreement.

2nd—It became necessary also for the many factories to insert a clause in all new orders making same "Subject to the factory's ability to obtain the necessary dye stuffs."

3rd—All the shoe lace factories report restricted production due to inability to get sufficient dye. Our latest information is that the production has been cut down to 60% of normal.

Delivery which is more than ever before of vital importance is now seriously affected, so that while we show

approximate deliveries on our price list, these deliveries will be subject to the dye situation. Supply and demand is always the controlling factor in prices and here the situation already acute is rendered more so by the badly restricted output. There is no let up on the call and in consequence

### HAS THREE SONS SERVING UNDER THE COLORS

The father of six boys, three of whom are serving in defence of King and Country, is something of which any man may well feel proud. The parent of these sons is James P. Donald, the manager of Logan Tanneries, Ltd., Pictou, N.S., which position he entered upon some four years ago. Mr. Donald was born in Whitby, Ont., in 1857, and educated at the Toronto public schools, the Model school and Jarvis St. Collegiate, under Dr. James L. Hughes, Archibald McMurchy, Dr. James Carlyle, and other noted instructors. Entering the leather trade with Daniel McLean, Toronto, he remained with him until 1890, when he became identified with Beal Bros., Toronto, and latterly with the R. M. Beal Leather Co., of Lindsay, where he remained until his acceptance of his present responsible post. Mr. Donald is a thorough, enterprising business man of

J. P. DONALD, PICTOU, N.S.

genial disposition and cheerful spirit and has always taken great interest in the civic, religious and charitable welfare of the community. His eldest son is manager of the Bank of Montreal, at Grand Falls, N.B., his second son is a lieutenant with the 92nd Battalion (now in training in Toronto), his third son is engaged in foreign missionary work in India, and the fourth and fifth boys are in the trenches in France, with the Canadians of the First Contingent, while the sixth is hoping that the war will not be over until he comes of age, so that he may also do "his bit." The Logan Tanneries, Ltd., are manufacturers of sweat and slaughter sole leather and have developed a very large business throughout the eastern portion of the Dominion.

## "Reece Rapid" Leads the World

# The Reece Rapid Button-Hole Machine

For Cutting and Stitching Button Holes in Boots and Shoes

This machine is the result of thirty years' experience in manufacturing button-hole machinery. Its superiority over any other machine is in its ability to turn out the highest quality of work ever produced at the minimum amount of cost, thereby making a saving that has never been equalled, and cannot be surpassed by any button-hole machine that is, or has been placed on the market. A few of the many advantages that we claim over any other button-hole machine are:

### Speed ——— Economy ——— Quality

A perfect barred button hole, not an imitation bar, eliminating a separate barring operation.

A perfect thread saving device, eliminating all waste of thread,

A machine running equally as well with silk, cotton or mercerized threads, and does not require a special thread,

A machine built to eliminate the wearing of parts.  
A machine seldom out of adjustment.

## THOS. C. DOYLE (Reg.)

Sole Distributor for Canada

71-73 St. ALEXANDER STREET, MONTREAL

there has developed an alarming scarcity of goods. All goods are offered subject to previous sale and to the factory's acceptance after receipt of order. We confidently expect to deliver all orders we accept, but owing to the unprecedented condition of the dye market, we reserve the right should the dye situation become worse and the factories are unable to get the necessary dyes, to cancel the order after first notifying the customer. We have stated the facts as we understand them and feel that we have fulfilled our obligations to our trade. We would be pleased to have you investigate our statements, and, if you find that they are correct, you can take such action as in your judgment will best conserve your interests.

#### Mr. Hayes is Candidate for Mayor

Robert T. Hayes, president and manager of J. M. Humphrey & Co., wholesale boot and shoe dealers, St. John, N.B., has consented to run in opposition to Mayor Frink in the coming civic election. Mr. Hayes, who is one of the leading business men in the Maritime Provinces, was elected representative of Victoria ward for several terms, under the old aldermanic system and was also chairman of the board of finances. While occupying these positions he proved himself as efficient in the administration of his duties as he was in business circles and soon won the confidence and esteem of

R. T. HAYES, ST. JOHN, N.B.

the entire electorate. In many circles it is felt that Mr. Hayes will be the people's choice and before many weeks have passed will be occupying the highest position which they can bestow upon a citizen.

Mr. Hayes has been identified with the shoe and leather business for the last thirty-two years. At that time he entered the employ of the late J. M. Humphrey, who conducted a wholesale shoe establishment in King street, and his untiring zeal soon won for him the confidence of his employer. After ten years Mr. Humphrey died and Mr. Hayes became associated with his two sons Percy and the late Frank and continued business under the name of J. M. Humphrey & Co. As time went by their trade increased and under the careful management of Mr. Hayes became one of the largest, if not the largest, boot and shoe establishment in the Maritime Provinces. Six years ago Frank Humphrey passed away and since that time Mr. Hayes and Percy Humphrey have carried on the business. His success

in the business world has been pronounced and while in the common council his administration was equally good. That he would make a good choice for the position of mayor is evident and present indications point to his election.

#### Ten Years to Pay for Goods

Amusing indeed are the slips made by correspondents, either through doing things in a hurry, or by means of an oversight. It is said that we are all stone blind to errors, which another can discern in us in a second's glance. Some time ago a city traveller dropped in to see a leading retailer, who remarked:—"I am not going to give you any more orders."

"Why not?" inquired his caller.

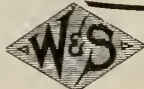

"Because," was the reply, "your terms are not generous enough."

"They are exactly the same as are extended by other houses," rejoined the drummer.

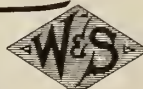

"Oh, excuse me, but I beg to differ with you," came back the words of the shoe dealer. "I have a communication here from an eastern firm, stating that their terms are 2% ten years, net sixty. Now, if I can get a decade instead of ten days to pay for my goods, surely you cannot blame me for taking advantage of such a remarkable concession."

"Yes," remarked a wholesaler, "I certainly discovered a funny break the other day. The stenographer was evidently not well posted on what she was writing, was very careless or had misunderstood the dictation. I had three samples of hockey boots which, after examining, I returned to the firm. This is the answer which I got, "We accuse receipt of the samples, and hope that you will place your order as soon as possible."

"Oh, yes, there are some pleasantries in mercantile life, and now and then one runs across an unusual witticism in business correspondence."

# Leather Trade Jottings

Items of Interest to Leather Producers and Users—What is Being Talked About in Leather Circles at Home and Abroad

**L**EATHER men say that they have never known or anticipated conditions such as exist to-day in their business. Prices have gone skyward and they are in no fair position to benefit in most cases from the enhanced values. Supplies of raw stock are so uncertain and so unsatisfactory that they are not in a position to sell ahead, hence it is not uncommon to find tanners who are turning down offers for stock every day. A representative was in a large leather establishment the other day and a quotation was asked for a large order. The price was given. The leather man was asked if he could hold it for four or five days and replied that he would not hold it twenty-four hours. And there you are.

## Is There a Shortage of Hides

A leather manufacturer ventured the statement recently that the supply of hides was to-day in the same relation to the demand as ten years ago. He claimed that it was manipulation and not shortage of raw stock that lay at the foundation of high hide values. He admitted the falling off in the cattle supply of this continent, but pointed to the tremendous development of the cattle and meat business in South America in recent years. He did not discount the fact that the uses of leather had been very substantially increased, but stated that the former prices of raw hides and skins was altogether below the intrinsic values which were more in relation in the present standing of the market than twenty-five or thirty years ago. The readjustment of hide to meat values had been brought about by the business going into larger hands and there could be no doubt about the fact that hides will never again be anything like as low as they were. The day for ten cent hides had passed for good.

## The Cattle Supply

We have already submitted statements showing the falling off in the beef cattle supply on this continent, due, without doubt, to the fact that areas formerly devoted to cattle grazing have been turned over to agricultural exploitation. There has been a steady diminution of the number of cattle marketed and killed at all the large centres, which would seem to be contradicted by the great development of the meat industry, especially the canning branch. The mixture, however, of other ingredients and the adaptation of the canning business to various side products of the beef trade, as well as the use of other food animals in the canning business, is responsible for much of this. The fact remains that the large beef and canning concerns have opened up branches in South America to keep pace with the demands of this class of merchandise which shows that the south has been

gradually securing control of the business. The war has cut off almost half of the supplies in Europe, and as beef substitutes are rather more possible than leather substitutes, especially in the heavier grades, the shortage in hides has begun to be keenly felt. There can be little doubt but that ordinary butcher hides will soon be up to twenty cents and packers to the quarter basis.

## Hides and Leather

In spite of the poor quality of the hides at this time of year the market continues to harden so that an advance is really recorded in the prices of a couple of months ago. Packer native steers have been quoted 22¼c and buffs at 18c, which is a quarter of a cent advance on last quotations. The leather situation continues the same as when last reported. Tanners are only wetting hides as they think circumstances warrant and are refusing to make quotations in advance. Some lines of stock are practically cleaned out and cannot be had for any price. The great demand is for light stock at present, which is scarce in both calf, side leather and kid. Sole leather is in good demand at advanced prices and good oak sole is scarce. The export demand has fallen off considerably on account of the price and this is leaving the market here a little freer. Manufacturers are constantly sounding tanners and making offers on large lots at present prices, but leather producers are cutting down orders as far as possible to immediate requirements.

## American Conditions

A report of the situation across the line says: The upper leather situation is even more acute than that of sole leather, mainly because of the scarcity and high cost of chemicals and dyes. Many tanners have hitherto been using stocks which they had on hand, but now that these are exhausted, they are facing truly preposterous war prices. It is stated that a barrel of dye of an ante-bellum value of \$60, which was included in an auction sale of unclaimed goods by a railroad company, recently brought over \$1,500. Chromates which formerly cost 4c a pound are scarce at 40c. Other dyes and chemicals show almost unparalleled advances. Then, as regard raw stocks, calfskins which normally range around 18 to 20c in former years are to-day quoted well up to 30c. It is the same with all kinds of hides, foreign as well as domestic. With such conditions, tanners are not only justified in asking to-day's quotations, but no fault could be found with them if they materially extended these advances in full to their customers. Undoubtedly they must do so as soon as their stocks of dyes and chemicals are exhausted.

“HARTTS ARE TRUMPS”

## The Hartt President

John D. Palmer

**M**R. PALMER is a practical shoe manufacturer with first hand knowledge of the requirements of the shoe trade of Canada. He is one of the best known shoe manufacturers and is one of the few who come into personal contact with their customers. His hobby is his business, viz., keeping a watchful and discerning eye over all departments with a view to properly blending Canadian requirements and HARTT methods, and vice versa.

"HARTTS ARE TRUMPS"

## Character

EVERY person whose powers of discernment are normal, and whose instincts of refinement have been developed, knows what is meant by "Character" in shoes.

BUT who can define it?

IT is a matter of the utmost difficulty, if not actually impossible, to do so in words; but you *know* it when you *see* it.

AND you *see it always* in HARTT SHOES.

THE fall range is a revelation of true art in shoemaking. Every last is designed to meet the demand of discerning men, and to make the HARTT line an asset of real importance to the merchant who carries it.

**New Brunswick**

“HARTTS ARE TRUMPS”

## A Hartt To Hartt Talk On Hartt Shoes

**T**HE Hartt Shoe has its “Reason” in the fact that from all time people have been ready to recognize and pay for **Quality**. Given **Quality**, and price is a matter of the asking.

The **Hartt Shoe** has for its beginning, middle and end this one characteristic — **Quality**.

It is not **Like Other Shoes** in its conception. It has its origin, not in the question, how cheap can the shoe be made, but how **good**. For this very reason, the design is **Different**. It avoids the **Outre** and the **Common** at the same time. It has the style that distinguished the **Custom Made Shoe**, when shoe making was an art as much as sculpture. In a

word, the **Hartt Shoe** embodies all the points of the Highest Class Shoemaking of a generation ago, grafted on modern factory methods. The most careful individuality of attention runs through the whole process of designing and constructing the **Hartt Shoe**. Expert art shoemaking in every detail is

the aim of those at the head of the **Hartt Shoe** production, and for this reason only the most skilled, experienced workmen are employed in every operation, from the cutting of the patterns to the last touch of the expert finisher.

But good **workmen** are not sufficient these days of multiplicity of operations, to ensure good **shoemaking**. There must be more than that even—the master mind, the controlling spirit, that is to blend the diverse operations into a harmonious whole. It is much more difficult to make good shoes to-day than in the days of the **Old Shoe Bench**. Yet all **Hartt Shoes** are practically “**bench-made**.” They get the same attention.

Mr. J. A. Reid

The presiding genius of the **Hartt Shoe Shop** is one who knows the business from pattern to packing room. Mr. J. A. Reid has spent a lifetime not merely in a shoe factory, but at shoemaking. He gives to every detail his careful consideration and experience, and the result is **Hartt Shoes**.

“HARTTS ARE TRUMPS”

There are cheaper shoes than **Hartt Shoes** but there are none of **Hartt Value**. The **Hartt Gold Medal Shoe** has demonstrated the fact that the importation of **Foreign Made Shoes** is no longer necessary. As a high-class shoe it has proven the fact that it has no superior, either in Canada, or elsewhere. It has already established the claim that the people of Canada are ready to pay an adequate price for **Adequate Shoe Service**. The **Hartt Shoe** has vindicated not only **Hartt Ideals** but

**Hartt Workmanship**, and has given to the Canadian public that which removes the stigma, that Canadian shoemakers are not the equal of the foreigner in thought or execution.

**Hartt Shoes** for the coming season will evidence the same advancement that has kept them so far in the van, that they are seldom compared with other shoes. In due course they will be in the hands of the **Hartt** representatives, and will be found to do more than justice to the **Hartt Character**.

# WHAT THE SHOE TRADE IS UP AGAINST

**Tanners, Manufacturers and Retailers Must Pay Much Higher Prices and Face Probable Shortage—How Certain Supplies Have Gone Up—Placing Orders Now is Good Business—The Longer Purchasing is Deferred More Difficult it will Be**

“**Y**OU think prices are high now, but wait till you see them next July or August,” remarked a leading shoeman this week. “I am not a prophet of evil, or an alarmist, but I want to tell you that retailers should place their orders now for fall delivery. The man who hesitates is lost, and while I do not know it all, I believe that the diffident buyer will often find it exceedingly difficult to get certain lines of goods a few months from now. The supply of raw materials was never so pronounced as it is at the present time. Tanners, especially of kid skins, which are in the greatest demand, are operating to only about a third or a half of their capacity, and do not know where future supplies of skins and certain dyes are coming from.

“The shortage of colors, the seriousness of the labor situation, the absence of importation of calfskins, kid skins, goat skins, etc., owing to the many embargoes placed upon leather in European countries, and the scarcity of bottoms, is really alarming. Such a situation as exists at present has never occurred before in the world’s history, and just what developments may take place, it is impossible to tell.

## From 20 to 75 Cents Per Pair

“All shoes of the better grade have gone up from 20 to 75 cents a pair, according to the color and scarcity of the leather of which they are made,” he concluded.

Another authority in close touch with the trade remarked that he was not trying to boost the sale of his own goods and added that he certainly would not sell any retailer of doubtful credit this season. “All my customers must be prepared to take advantage of my terms and meet their bills when due, otherwise they will have to do without my goods. Tanners will not sell the shoe manufacturer unless he is able to pay promptly, and in cases where his credit is doubtful, consignments are delivered C.O.D. It is the same in connection with our customers. We cannot afford to take chances or trust to luck. Cash is the great consideration nowadays, owing to the lack of leather supplies, excessive cost of materials, and the various outstanding conditions. If one might tender some advice to the retailers, it would be to use discretion and purchase conservative shoes for the general run of their trade. I think that those ordering blacks, patents and the dark shades in brown and grey for fall will do well to buy now. Other shades may come and go, and any orders placed on them will be subject to us obtaining the stock, etc. I tell you the situation is extremely acute. Manufacturers are chasing the tanners for leather and it is not a case of what can you give us, but what have you got?”

The SHOE AND LEATHER JOURNAL has been told of many manufacturers traveling all over in search of kid leather, and not being able to secure a foot of it. Prices have gone up so high as to become almost fabulous. There is no need of repeating the details of the weary pilgrimages for suitable stock. Other substitutes are spoken of, but so far none have been brought forward to any great extent. There is one thing, however, that manufacturers can only guarantee prices for a short time, and the retailer should buy his staple styles now. There are many reasons why this should be done, and the added cost must be obtained by the footwear dealer from the customer. He has been educated to pay a higher price for every other article that he wears except footwear, and there is no reason why he should not make an adequate outlay for his shoes. Merchants who are well advised and

have progressive ideas have already raised their prices, are making profits that are safe and ensure them doing business on a fair margin.

Shoe dealers must not imagine that they can buy this season a shoe with a top of eight inches for the same figure and of the same quality stock as they can one with seven. They will be making a mistake and only deceiving themselves. “It is necessary for us,” declared one maker, “to charge at least 25 cents more for each additional inch in height, and while this may seem considerable, still it must be remembered that findings, facings, the extra leather, operating expenses, etc., on each pair mount up rapidly. An eight-inch shoe should be sold at \$5.50 if the retailer has previously disposed of his popular women’s lines at \$5.00.

“It is impossible to get our extreme high-cut productions in the \$5.00 class, without a sacrifice of material or workmanship, and anyway colored top kid shoes should be reckoned in the novelty class, and a much longer profit obtained on them than on the ordinary staple lines. Shoes which were formerly bought at \$2.00 are now \$2.25; those that were bought for \$2.50 are now \$2.80; \$3.00 shoes are now \$3.35 and \$3.40, and \$3.25 shoes around \$3.65 and \$3.75, and the advance is proportionate as the grade ascends.”

The average retailer, unless he wants to come out at the small end of the proposition and do business at a loss, must charge his customers the necessary increase. He has to pay these increased prices, because there is no dodging the issue, and the present is no time to cheapen production. The best grades of footwear are the only ones on which a permanent patronage can be secured, and a close, personal touch obtained with customers. Of course, in some quarters there will be kicks, as is always the case, but the situation has to be faced fairly and squarely. The increases have been caused by supply and demand, which always regulate price and such an economic proposition will ever hold sway. The control of affairs rests in the hands of no man and no plant is exempt from prevailing conditions. All are the victims of circumstances, if such a term may be used, and Fortune has not made favorites of any.

## How Prices Have Aeroplaned

Gunmetal calf has increased from six to ten cents a foot, tan calf four to eight, kid from ten to fifteen, patent leather five to seven, sole leather eight to fifteen, and is still going up, while findings have jumped all the way from 15 per cent. to 300 per cent. The shoemaker has to meet these advances and naturally must secure the extra outlay from the finished product.

When it is considered that the average pair of bals such as are now being worn by women require over three feet of upper leather, nearly a pound of sole leather (when heels, counters and box toes are taken into consideration), and from 15 cts. up in findings, this accounts for an augmentation of from 25 cents to 40 cents per pair, according to class of stock used, the ascending prices and availability of supplies. Every possible method has been tried by progressive manufacturers, without actually deteriorating their product, to keep down cost, but the situation is so serious from a labor, economic, operating and supply standpoint, that little hope is held out for any amelioration of present conditions. The raw stock problem has become a world-wide one in every line of industrial endeavor and it must be remembered that leather and shoe findings are no exception.

It's time for a little reminder about rubber-buying.

As everybody knows, the prices of rubber footwear, of all makes, will be advanced May 1st. Needless to say, the difference in price will be worth saving.

Added to that, an early order for rubbers ensures the early making of them—and the prompt delivery of your goods just when and where and how you want them.

Have your order booked this month, then, and get the benefit. Make it for "Maltese Cross" Rubbers and do your rubber-buying to the best possible advantage.

The Maltese Cross Brand is "famous for fit and quality." It's a thoroughly satisfactory line to handle.

**Gutta Percha & Rubber, Limited**

# Rubber Boot and Shoe Matters

**Buying for the Month Has Been Good—The Huge Snow Fall a Material Help—Prices the Main Factor and the Prospects of a Rising Market**

**T**HE weather for the past month has been ideal as far as the rubber shoe trade is concerned. There was not enough snow to keep Arctics and excluders moving and enough thaw to give regular lines a good healthy demand. Retailers report that winter stocks have been pretty well cleared out and wholesalers claim that March was the best sorting month they have had for many seasons. There was some cutting of retail prices on account of anxiety to clear out old stocks, but on the whole sales will average the best of any single month during the past season.

## Placing Orders for Rubbers

Manufacturers and jobbers report very satisfactory results in the placing of the new season's business. There has not been the hanging back and "see-sawing" that usually attend the beginning of the new rubber season. The fact that prices were reduced and the general tendency in all manufactured products to advance had the effect of quickening the interest of retailers who were much more anxious than usual to figure out and anticipate their requirements in this class of goods. The prevailing favorable weather, the conditions under which the new season started and the expectation of higher prices all combined to make the most backward sit up and pay attention this year.

## Characteristics of the Goods

The large number of new features added to the lists has also contributed in some degree to create and maintain interest. Last year some of the companies introduced a few "all red" lines and this year these have been increased by the original companies and their example followed by their competitors so that there is quite an array of these goods to offset the sombre black. The sales last year and this in this line appear to warrant the innovation. Tan lines seem to be taking even better than usual, although the tendency is somewhat away from tans in leather lines. Nevertheless the tan shoe is a permanency and will never be materially affected except by the supply of stock, so that tan rubbers have come to stay. The military shoe has settled that as far as the immediate present is concerned and has also popularized the same color in high boots which will be worn even apart from the war in future. Indications are that tan will be popular for ladies' lines as well as men's.

## Sporting Goods to Front

There has not been much encouragement in the past two or three weeks for the display of sporting shoes in this country, but the day is at

hand. No doubt the next two or three weeks will witness a marked change in the temperature and weather. March has been so wintry that, in the natural order of things, April ought to be dry and sunny. The long, steady winter, has made people somewhat restive and impatient and as soon as they get the excuse they will be out on the links or at other early summer sports. Wholesalers report already interest in this line, many dealers finding they are not fully supplied. The feeling that the war was going to seriously hamper this class of goods kept not only manufacturers but retailers in a state of uncertainty which is at last beginning to be felt. Some of the new "welted" goods are meeting with a good reception.

## Crude Rubber Market

There is very little change reported in the general situation. As has been predicted, the opening up of the automobile season has had the effect of increasing the demand somewhat and although there has been no material alteration in the raw market quotations, it would not take much to create a "jumpy" condition. Reports have been spread of instructions placed upon exports of raw rubber by British and colonial governments, but these, so far, have not materialized and are the inevitable result of the efforts of those who are seeking to boost prices. Supplies seem to be coming in fairly well both of wild and cultivated varieties, which retail about the same position as two weeks ago—77c for up river fine and pale crepe latex 94c. As the demands increase for ships for war purposes and the consequent congestion of freights becomes more pressing, the rates of carriage will doubtless go up and the shipments fall off to some extent. A good deal of quiet buying has been in progress with these possibilities in view.

## Rubber Footwear Production

A report has just been made public by the Census Department of the United States which places the production of 23 concerns making rubber footwear during 1914 at 4,024,486 pairs of boots valued at \$12,647,934, and 57,211,728 pairs of shoes valued at \$37,858,222, making a total production of \$50,506,156 for the year. It is thought that the results for 1916 will be considerably beyond these figures, which do not seem large for a country with a population of a hundred millions. We are doing a little better than that in Canada, which is half a dollar a head to the population.

## MANY SMART MODELS IN NEW AUTUMN STYLES

(Continued from page 38)

are particularly characteristic of the highest grade of shoes, such as the Hartt line. Colored leathers and the darker shades of tan will predominate, although there will be quite a number of medium shades in tan shoes sold. The Hartt Boot & Shoe Co. are of the opinion that black calf leathers will lead by a good strong margin, but kid leathers will also be quite a factor. In smart, distinctive footwear for men the autumn showings of this company for the coming season set a new standard and are the most representative and imposing ever produced by this enterprising organization.

### Wing Tips are Peing Shown

E. T. Wright & Co., of St. Thomas, report that their new samples are completed and their men are on their respective territories with as representative and finished a line as the company have ever turned out. The styles follow closely those made in the American factory at Rockland, Mass. A new street last has been added and a new combination, as well as two or three new recede toes. From present indications the firm believe that there will be a larger call for fancy lines for fall, than has been in the past season or two. Wing tips and fancy punches, shoes with top of contrast color to vamps will receive considerable attention, especially among the young men.

### Putting Out New High Grade Line

The Brandon Shoe Co., of Brantford, have prepared a fine line of samples for fall, and while their range of new and snappy styles retailing at \$5.00 will be continued and kept up to the high standard, which they have attained, the firm are also putting in a strong line of \$6.00 shoes, in all widths, from B to E. Mr. Brandon is of the opinion that if the majority of retail merchants would fit their customers on a longer and narrower last, the shoes would have a neater appearance. There is no doubt that a shoe which is rather long and narrow, imparts to the foot of the average male, a dressiness and distinction, not obtained by a short, stubby effect. Most men are not so particular about half sizes or a size as are women, and when they are fitted in the most acceptable manner, beauty is added to the appearance of the footwear. The prospects for the coming season are splendid and the company have been very busy on spring goods, and also in making army shoes. A contract for 15,000 pairs of ankle boots was recently received, making

the third allotment, which speaks well for the efficiency and facilities of the firm. Alexander Brandon, managing director of the company, was re-elected chairman of the Boot and Shoe Manufacturers' Association of Ontario, at the annual meeting, which was held in Toronto recently. This makes the fourth time that this honor has been unanimously accorded Mr. Brandon.

### New Effects in Many Lines

La Parisienne Shoe Co., of Montreal, are showing some snappy, classy samples for fall in welts, turns and McKays both in high and low cuts. A particularly handsome boot is the white washable kid shoe, with Louis heel, plain toe and eight-inch top. The majority of models, which are of the lace variety, carry nineteen eyelets and come in grey kid, champagne, bronze, white, cream and all the popular shades, including a number of pleasing combinations in black and white, cravenette being a favorite topping. The trimmings are also of white. There are several styles shown in high-cut button boots, in all leathers. One boot that has taken particularly well is a cushion sole, which is built on generous lines and with every degree of wear and comfort. In the range of McKays the usual representative showing is made in kid, calf, patent and other leathers, all of which are carried in stock for immediate delivery. In colonials the latest creations with large tongues and huge metal or celluloid buckles are seen, while in plain pumps a dainty line of models is presented, built on pump lasts, that fit neatly and closely every foot. These come with both leather and wood Cuban, and spool heels. The offerings presented by this firm are particularly inviting and the line is being shown in Toronto and Western Ontario by W. C. Myers, who also represents the Star Shoe Co. and the Rena Footwear Co.

### The Newest Effects for Women

The autumn models of the Blachford Shoe Manufacturing Co., Toronto, reveal a most comprehensive showing in high-grade foot toggery, in brown, battleship grey, ivory, champagne, white and grey dawn, the latest expression in shades. In colonials, with long, pointed vamps and large tongues, with buckles of metal and to match the shoe, some neat designs are seen. Two strong lines are displayed in the Cupid and the Gladys pump, which carry no ornaments. The fall range in high-cuts is right up to the mark in glazed, matt and colored kid and quite in harmony with the most authentic modes presented to the trade. The newest shade

"HEART"

"TIFFANY"

"CUPID"

Smart New Designs by the Blachford Shoe Mfg. Co.

is grey dawn, which has only just come into the market, and looks like a popular seller for early fall wear. The old heights of leg have been discontinued, and seven and eight inch tops are being shown. They are the Regent and Riviera models in both lace and button, and the new Tiffany button boot. The Regent and Riviera are overlap designs, with round and square throat respectively, making them very charming and inviting offerings. The Tiffany button boot is a handsome creation with full vamp and a tongue extending up the front seam about an inch. The curved heel is still popular in Louis, Cuban-Louis and Opera pedestals. The Paris bal and the Belmont button are also pretty designs and most attractive in their whole quarter button and lace effects. A decidedly artistic shoe suitable for summer and early fall is a black reignskin cloth bal. The company believe that this shoe should meet with considerable favor, embodying as it does both comfort and style and eliminating the high cost of leather. In white presentations the Blachford Shoe Manufacturing Co. are right to the front with the snappiest creations in white buck, white kid, calf and cloth effects, on all the latest lasts and prettiest patterns, together with combination contrasts that are both pretentious and pleasing.

#### Newest Types for Autumn

The fall samples of the Minister Myles Shoe Co., Toronto, reveal a splendid range both in men's and women's fine Goodyear welts and turns. In women's footgear some decidedly snappy models are shown, in black, brown, pearl and oyster grey, white, ivory and other colors, carrying Louis and Cuban Louis heels. In low cuts some new colonials with the large tongue and buckle are shown, as well as several other new designs in pumps. In men's shoes the military dress boot has a large place and comes in tobacco brown, dark mahogany and dull calf. A number of new lasts have been added for fall, showing a slightly lengthened vamp and rather narrow recede toe, while other models carry the full round toe, some the medium recede and others the coin shape fore-part. The selection this year is wider and more representative than ever. A number of the new offerings carry Neolin, fibre, viscolized and other sole stock, making the selection most comprehensive.

#### Some Smart Effects for the Young

The new samples of the Star Shoe Co., Montreal, are smarter and more attractive than ever. There is seen a

complete line of extension edge in turns, as well as a range of cushion welts for children. In both boys' and girls' the military aspect is strongly presented in appropriate high cuts and in all regular lines are natty combinations in various leathers. In turns the company has an extended range at popular prices, and in McKays two grades are made, in all leathers. In the white offerings the company report a large call, pleasing presentations being seen in McKays and turns for children, misses and growing girls. In the boys' footwear a fine range of solid leather shoes on orthopedic lasts is shown and also a number in baby gents, the sizes made by this firm being from four in the latter line to 5½ in the boys. The old-fashioned copper toe on box kip, box calf and gunmetal is observed. In the children's and misses' shoes, kid, gunmetal and patent styles with dull and cravenette tops are displayed, and in the various lines are pleasing combinations in black and white. The output of the factory is now about 150 cases a week, and the plant is busy in all departments. P. A. Doig, sales manager of Star Shoe Co., spent a few days in Toronto last week.

#### Particularly Good Showings

Dupont & Frere, Montreal, are showing a particularly nice women's patent and gunmetal high-cut, circular vamp shoe, McKay, with full calf top and spool heel. The same shoe is being shown by them also in a fancy pattern with facing. The range of women's shoes for the popular priced trade is extensive for the fall season and scintillates with new ideas, as do the men's welts, which include some new models, leather lined with rubber sole and heel, in gunmetal calf. There is a good showing in these of lasts with the medium toe as well as one or two leaders with the English recede toe and long vamp.

#### Both Plain and Fancy Patterns

Manager Fortin, of the Drummond Shoe, Limited, Drummondville, Que., is showing the English effect in quite a few patterns in bals, bluchers and buttons for city and large town trade as well as a few fancy patterns, such as the tuxedo fox with quite a lot of perforation. Another number on which he is counting for a heavy business is his Nature Form last which is a broad toe shoe built on sensible lines and calculated to appeal to the average man for wear all the year round. This last is one of the best looking business getters the firm has turned out. For the country trade their

leader is a medium high toe with a fair swing shown in leather lined with double viscolized soles as well as heavy and spring soles. They have a line of heavy goods in oiled leathers, unlined and lined, which will enable them to close a good share of this business for next fall. They have several models on which they are using Nocolin, which is now being shown in Canada for the first time. The fact that they are making men's welts exclusively has enabled them to concentrate on a range that is superior to anything they have shown before this season.

#### Quiet, Dignified Designs

The autumn models of Walker, Parker & Co., Toronto, whose travelers are now out on the road, show a high degree of conservatism and are marked by all the grace and finish which are associated with the Empress line. In high cuts of seven, eight and nine inches there are seen creations in dull and glazed kid, patent and combinations of black and white, with plain toes and curved heels; the lace shoe, with straight and Langtry cut tops, predominating. A few of the offerings have stitched tips. The showing is a very representative one, all being quiet and attractive in design and character. In the McKay range, light, slender lines are observed and, in this as well as in the welts, several new lasts have been added. One new last has a round toe, another a medium recede, while the pointed effects still hold sway. In low cuts the plain pump with the small ornament or button decoration on the forepart is presented. A number of pleasing patterns are noticed in kid, patent and dull calf. The Empress models for fall are marked by dignified and distinctive characteristics, evidencing good taste and superior shoemaking.

#### New Dependable Styles Seen

The Amherst Boot and Shoe Co., Amherst, keep up their record for reliable goods. Patrons are informed that new lasts and styles in keeping with the demand for novelty are features of the opening season. The company will not, however, be swerved from the determination formed in the beginning of their career—nearly fifty years ago—to produce a dependable line of footwear. The high character and reputation of this reliable Nova Scotia company is known from East to West of our Dominion.

J. A. & M. Cote, of St. Hyacinthe, Que., have their usual strong line for the fall season, although few changes have been made in lasts or patterns. The new samples are

a little heavier than those for spring, and are built on neat comfortable lines. The firm report that they have been very busy during the past season, their plant working to capacity, and they have kept their product right up to the mark on the ranges which they have been turning out.

#### Corkscrew Cloths are Popular

J. Einstein & Co., of New York, who are represented in Canada by Paul Roy, of Montreal, believe that 70 per cent. of the cloths sold will be corkscrew and that the remainder will be divided up in black brocade and colored cloths to match various shades of leather. For spring and summer the firm are of the opinion that the craze for white will be the greatest ever known, particularly for soft fabric pieces of goods, which will conform to the foot in a lace shoe. The company are showing a white corkscrew cloth, which is known as Ostend. It is more of a union cloth than some of the other white fabrics, such as poplin, canvas or cotton. Mr. Roy reports that the demand for this material is exceptionally good.

#### A WORTHY SUCCESSOR IN SHOE LINE

(See Page 84)

IT is not often that a father has the good fortune to have a son follow him who cannot only lift the load but carry it a little further than his "dad." When "Jim" Robinson went "down at the ropes" physically three years ago, and his business affairs had to be placed temporarily in other hands, his son George was the "Hobson's choice," and some of the wise heads thought it was putting pretty heavy responsibility on young and somewhat inexperienced shoulders. J. George Robinson has not only vindicated himself but his father's judgment in his handling of the Robinson business. He has shown that leather runs in the family and is as natural a Robinson element as water is for the fish. He has won his spurs as a shoe man under circumstances as trying as might be thrust upon any young man and deserves all that may be said about him. The JOURNAL has pleasure in introducing him as one of the fully accredited "Shoe and Leather Captains" of Canada who has not only held up the heavy end of a big stake but has been able to put that stake on a higher niche than before.

As the largest shoe jobbing business in Canada it does not leave its head that time to develop hobbies that may come as time passes so that it may be truly said that George has at present no hobby outside selling shoes. He is sensible enough, however, not to let business interfere with health and happiness and as a decidedly "family" man does his duty to his home as well as the business.

**NEW CONNECTION FOR MR. LEWIS**

H. D. Lewis, of Pictou, N.S., is now representing Charles A. Ahrens, Limited, shoe manufacturers, of Berlin, Ont., and the Lady Belle Shoe Co., of Berlin, throughout the Maritime Provinces. He has had an extended connection with the trade, and for six years was in charge of the wholesale department of L. Higgins & Co., Yarmouth, N.S., until the manufacturing plant was destroyed by fire in 1910. He then joined the staff of the Amherst Boot & Shoe Co., Amherst, with whom he remained a few months, and for a year he covered western Nova Scotia for a Quebec firm and the Fraserville Shoe Co., of Fraserville, Que. Some five years ago the latter concern appointed repre-

H. D. LEWIS, PICTOU, N.S.

sentatives for the Maritime Provinces and gave Mr. Lewis Nova Scotia and St. John river territory to handle, which he has done, building up a large trade. He also handles the Nursery Shoe, of St. Thomas, Ont.

**WHAT WOULD YOU DO IN THIS CASE?**

How far should the ethics of the shoe trade be upheld by merchants and their sales force? You know there are people sauntering about, trying to find out what they can by applying first to one tradesman and then to another. In the jewellery line busybodies will often buy a gold watch, a diamond ring, a pearl necklace, etc., and evidently lacking confidence in the seller, or placing no reliance in his statement, these parties will go to another man in the same line and have the effrontery to ask him to place a valuation upon the article. It is the same way in the shoe trade. If a man or woman entertains a suspicion that a retailer has fitted him or her a little longer than the size of shoe worn, such a being will go to another shoe store and say—"I bought these shoes at So-and-So's down the street. Will you be kind enough to oblige me by looking at them and letting me know exactly what size and width they are."

Now, should a shoeman or a member of his staff oblige such a party or not? This question was put to a leading Montreal dealer, and he said: "I do not think it is fair to a competitor. We always tell such an inquirer—who is generally a perfect stranger to us—that there are so many varying designations of the French size system or markings, each firm having its own special notation, that we cannot familiarize ourselves with them all, and as we do not handle this particular brand of shoe, we cannot give the information. If we did try to interpret the markings, we tell them, if they

are persistent, that it would only be a guess at any rate, owing to the vagaries of the manufacturers. This is a very reasonable explanation, and most people go away, respecting us for the stand we have taken, and for not doing or saying anything that might injure or undermine the reputation of a competitor."

Another shoeman said that quite frequently people came in, asking the size and width of certain shoes, and he declared:—"Do I tell them? Why, of course I do, even if I do not handle the line. Here I am in the business, and a stranger enters, pleasantly requesting a little information. If I informed any person that I did not know the markings regarding sizes and widths, such a one would go away with a conception that I possessed but small insight into the shoe business or had something to hide. This would at once arouse the suspicions of the stranger, who would perhaps go back to his dealer and deliberately accuse him of misrepresentation."

**SUGGESTS NEW NAME FOR BERLIN**

W. Searle, who for many years has been in the shoe trade in St. John, N.B., has taken a hand in suggesting a new name for Berlin, which city is one of the leading footwear centres of Canada. He thinks that it should be called "Cavell City". In a letter to the SHOE AND LEATHER JOURNAL Mr. Searle says, "This name would be most appropriate and perpetuate the memory in Canada of the brave nurse whose heroism and self sacrifice will ever live in the mind of the British race. She died for her country in Brussels and her name should be honored as long as the world stands. Miss

W. SEARLE, ST. JOHN, N.B.

Cavell was a brave woman who, in the very heart of the enemy's camp, dared to uphold the cause of the Allies and no wonder she is known as the Florence Nightingale of Brussels. I think that a monument should also be erected in Berlin to signalize her work and worth and let it be placed in the most prominent site in that city. I feel sure that, if a vote of all Canadians were taken, the name of the martyred nurse would be bestowed upon Berlin. She did her duty to her God, her country and her fellow beings. Her patriotism and high sense of right will always be an inspiration and a benediction. She showed the valor and devotion of true womanhood in the interest of British, French and Belgians, and the glory and halo that surround her life will linger as long as time shall last."

### MR. WALDEN WITH THE CLASSIC LINE

H. C. Lecky, who has been a popular and successful traveller for Getty & Scott, Ltd., covering part of the provinces of Saskatchewan and Alberta, has resigned his position and entered the automobile arena, having been made sales manager for the Ford Motor Co. at London, Ont. His employers, while regretting his removal, as they considered him one of their most energetic salesmen, wish him every success in his new sphere of activity. Mr. Lecky is succeeded by L. S. Walden, a young man with a thorough shoe training, and a good connection with the trade on this particular territory for the last five years. Mr. Walden is a well informed and aggressive shoeman, and the firm have every confidence that he will be a good successor to his predecessor.

### SHOEMAN IS PRESIDENT OF BOARD

The new president of the Woodstock, Ont., Board of Trade is W. D. Hobson, shoe retailer, of that city. He has always taken a deep interest in affairs of the Board and is among its most enthusiastic members. Mr. Hobson is also a former Mayor of Woodstock, having occupied the civic chair in 1914. Born in Hamilton, Ont., at an early age he removed to Oxford county, going to school part of the time, and getting acquainted with the birds, fields and flowers the rest of the while. He has traveled over a great deal of the North American continent and his one hobby outside of selling shoes is ornithology. He has lectured frequently on the subject before church and lodge organizations, being ever a great lover of bird and plant life. Mr. Hobson has been in the footwear business in Woodstock for twenty years and possessing public spirit and a genial disposition he is well liked by the citizens generally.

### HAS BEEN FIFTY YEARS AT THE BENCH

Wm. J. Finlay, one of the veteran shoemakers of the Province of Ontario, has been doing business in Cookstown for 45 years—a most remarkable record. He learned his trade in Hillsborough, County Down, Ireland, being apprenticed to James Ingram, of that town, for six years. For a long period he devoted his time exclusively to hand-made work and repairs. In those days men's fine long boots were made mostly of French calf, while in the every day variety long cowhide and kip butts were used. Owing to the advanc-

ing cost of leather and the difficulty of the shoe repairer in securing help, a large number of people started in later to buy factory-made shoes. Forty years ago leather was much more plentiful than it is to-day and fully 50 per cent. cheaper. Although he has worked at the bench for fifty years this veteran disciple of St. Crispin is not feeling much older to-day than he did a quarter of a century ago. Many young men who have since made a success either in the retail shoe line or repair business, learned their trade with Mr. Finlay, among them being F. A. Robinson, of Saskatoon, and Geo. Finlay, of Hamilton.

### MANY BUYERS AT THE FACTORY

Among the shoe buyers from different parts of Canada who recently visited the factory of Getty & Scott, Limited, Galt, Ont., the makers of the Classic line of shoes, were visitors from far and near. The number is the largest that has ever registered at the plant and goes to show how short buyers are of stock generally and how anxious they are regarding prices, leather supply, deliveries, etc. Numbered among the visitors were:—J. D. Climie, Hamilton; F. Bauslaugh, John Agnew, Limited, Brantford; H. Taylor, Hudson's Bay Co., Calgary; E. Cosford, R. Neill, Guelph; W. J. Thurston, Stratford; H. B. Hall, Hudson's Bay Co., Edmonton; Jas. Gorman, Kerfoot Shoe House, Smith's Falls; W. J. Detweiler, Sault Ste. Marie; T. C. Joynst. Hensall; L. Adelstein, Montreal; Ken Murray, Murray Shoe Co., London; W. J. Kidd, R. Neill, Peterboro; H. Bachrack, Toronto; Mr. McVittie, E. G. Thompson, Blenheim; Smith & Chapple, Chapleau; N. D. McKinnon, Weyburn; H. Price, Hamilton; J. McConnell, Hamilton; W. S. Duffield, Hamilton; Jas. Leslie, Hamilton; H. Clarke, Dundas; Fred Love, Aylmer; W. J. Nelson, Lethbridge; D. J. M. McGearry, Royal Shoe Store, Saskatoon; C. Coles, Brantford; C. H. Ludlow, Brantford; Mr. Geddes, Hudson's Bay Co., Winnipeg; J. Bauslaugh, J. Agnew, Limited, Woodstock; A. Levy, Toronto; G. W. Cowan, Chatham; H. G. Hodges, Chatham; G. C. Locke, Calgary; J. B. Douglas, Calgary; T. C. Watkins, Hamilton; Mr. Abraham, Abraham & Aboud, Cobalt; Mr. McMurdie, James Ramsey, Limited, Edmonton; E. C. Scarrow, Owen Sound; Mr. Cunningham, Foxwarren; Chas. Newton, Robinson & Co., Winnipeg; Mr. McCann, Goodwin's Limited, Montreal; F. Kibler, Berlin; F. R. Scott, Preston; Jas. Crotty, Bothwell; Wm. Fryer, Collingwood.

### AN EFFECTIVE ORTHOPEDIC DISPLAY

For novelty and originality the plan recently adopted by the shoe department of the Sussex Mercantile Co., Sussex, N.B., stands out distinctly. W. H. Plummer is the energetic manager of the shoe branch. As a demonstration of foot appliances was to be held showing all the lines made by the Scholl Mfg. Co., it was decided to put in a special window. This was installed by Walter S. Hall. The demonstration was in every way a success from an advertising standpoint, which was largely due to Mr. Hall's efforts. The staff of the store is seen at the right of the picture. In the "first rank," are Albert E. Sinnott, W. S. Hall (window-trimmer), T. H. McCready; "rear rank," W. H. Plummer and W. H. Hall. The last mentioned young man was in the employ of the firm until recently, when he severed his connection, to answer the call of "King and Country," and is now training in Sussex with the 104th Battalion.

The whole town was placarded with mysterious "Kimber" cards, and people were curious to know just who and what "Kimber" was.

"We made it clear to them," said Mr. Plummer, "through the press, the movies, and dodgers, that Mr. R. L. Kimber of Toronto, manager of the Canadian branch of the Scholl Mfg. Co., was the man.

There would have been a very large crowd in the store but, on the day of demonstration, a blizzard was blowing, and most people who could, stayed indoors. Mr. Kimber, however, found several young men awaiting him, and fixed up their feet with Metatarsal Supports. This is one which Mr. Plummer reports had a big run, and it was somewhat of a surprise to him, as he expected that the Foot-eazer would be in greatest demand. Considering the very stormy weather, the results were most successful.

### NEW SHOE FIRM SHOWS FIRST SAMPLES

The new samples of the Lady Belle Shoe Co., Berlin, Ont., have been completed, and reveal a smart, snappy range of women's McKays in all the latest lasts and newest patterns in kid, calf and patent leathers. This new firm, which is composed of A. A. Armbrust and Alexander Inrig,

is making splendid progress. An active selling staff of travellers has been appointed. Frank Smith will cover Niagara Falls to Windsor, D. G. Hardie of Toronto will represent the firm in the city of Toronto, J. M. Redmond will traverse the territory east of Toronto, while H. D. Lewis will look after the Maritime Provinces. J. Lauffer will supervise the ground between Fort William and Regina, and C. H. Himburg will show the lines from Regina west. The prospects for the company are exceedingly bright.

### REPAIRERS MUST GET HIGHER PRICES

Writing to the SHOE AND LEATHER JOURNAL, a western Canada shoe repair man who recently visited Ontario and called upon a large number of representative men in his line says, "I picked up a number of pointers and suggestions which well repaid me for my trip. I cannot speak too highly of the courtesy and kindness of the shoe repairers upon whom I called. I did not get the cold shoulder any place. I notice that some members of the trade are carrying a stock of shoes, but some are, to my mind, too heavily loaded up. I called upon one man who must have had a stock of five thousand dollars, consisting principally of men's shoes, and I do not think the business that he was doing warranted him carrying over a thousand dollars' worth. He was obtaining these shoes from a distant point when he could have just as well patronized a local factory and secured what he wanted from its in-stock department. It may sound 'western,' but I really believe that on a stock of a few hundred dollars, I am doing as much business in the men's line as he is. We have one pair of a size and order by express, as required, to fill up the gaps. If a certain style does not take well, we have only a few pairs of it on hand, and can push them out quickly and not lose very much money on slow moving stuff. I think a much smaller stock, sorted up often and selling at a smaller margin of profit is preferable. We dispose of our goods pretty close, it is true, but we turn our lines over quickly.

"In reference to the recent sharp jump in sole leather, and especially in cut stock, this is going to make the smaller repair man rub his eyes a bit and obtain better prices. To my mind it almost puts cut stock out of the question."

*A GOOD display made in foot appliances line by Sussex Mercantile Co. of Sussex, N.B.*

# AMONG THE SHOE MEN.

R. L. Savage, of Toronto, has returned from spending a few days in Montreal and St. Stephen, N.B.

M. L. Diamond has had his shoe store at 125 Bank street, Ottawa, altered and improved to better accommodate the growing business of his trade. Besides the store in Bank street, Mr. Diamond also conducts a gents' furnishing and shoe store at the corner of Somerset and Rochester streets, Ottawa.

Johnston's Big Shoe Store and the Woodward's Department Store, of Vancouver, B.C., will be able to make their award of automobiles, the cases pending against these firms having been adjourned for one week. It is felt that inasmuch as the practice has been a common one in Vancouver for years, although not on such a large scale, it would be harsh treatment to cause the two stores mentioned to break faith with their customers, although it is understood that no repetition of the practice will be countenanced by the authorities.

It is reported that advances in felt goods will go into effect on April 1st as wool is unusually high and this naturally affects the felt situation.

The annual meeting of the Canadian Consolidated Rubber Company will be held in Montreal on April 4th, when the annual report will be presented and a new president elected to succeed the late J. H. McKechnie.

M. W. Murdoff & Son, of Trenton, who are the representatives in Canada of the Thomas G. Plant Shoe Co., of Boston, were in Toronto last week showing a fine range of samples.

J. S. Townsend, who for the past four years, has been conducting a wholesale shoe business in Hamilton, is a gentleman who is widely known in the trade, having been for a long time on the travelling staff of the London Shoe Co. Since embarking in business on his own behalf, he has met with gratifying success. In fact, the growth of his turn-over has necessitated him removing to large new premises, and he is now located at 41-45 King William St., Hamilton. Mr. Townsend, who employs a staff of alert travellers, specializes on "Crispincraft" shoes for men, and "Fairsex" for women, while his slogan is "Smart Footwear of the Better Grade for Men and Women." Mr. Townsend reports the outlook for the coming season is exceptionally bright.

Geo. A. Slater, of Montreal, who has returned from Boston and other American centres, states that there is a tendency to restrict the styles among American shoemen owing to the unusual conditions prevailing. The general idea is that the average taste can be pleased in a good range of staple styles. Prices are going up as might be expected. He says that one firm is not going to sell a shoe less than \$8 hereafter. Whites and greys which were such leaders a comparatively short time ago are now very common, windows being filled with shoes to retail at \$3.00, whereas when they first came out a nice model in white kid retailed at \$12.

United Last Co., Montreal, have installed additional machinery in their upper pattern department which enables them to turn out now from 1,000 to 1,200 pattern pieces a day.

J. E. Dupre, Montreal Box Toe & Heel Co., was in Boston last week.

At the last monthly meeting of Toronto Shoe Retailers' Association, held in the Temple Building, an informal discussion took place on the matter of profits. Some very good points were brought out and the exchange of views was interesting and instructive. At the next regular meeting, which will be held on Thursday, April 20th, an address will be delivered on the proper way to figure profits. Arrangements are being made for talks on timely topics at each session.

D. S. Benvie, of James Robinson's, wholesale shoes, Montreal, was in Toronto this week on a business visit.

Giles McCabe, who has been on the staff of F. J. Weston & Sons, wholesale shoes, Toronto, for the past six years, and latterly as one of the city travelers, has joined the Army Medical Corps attached to the 198th Battalion. Previous to leaving the firm Mr. McCabe was presented by the staff with a handsome wrist watch as a mark of appreciation and esteem.

Of great educational interest was the lecture on "The Gathering and Manufacture of Crude Rubber and its Relation to the War," given recently under the auspices of the Natural History Society, by A. D. Thornton, director of the Canadian Rubber Company, Limited, Montreal. Illustrated with a number of lantern slides picturing scenes in the tropical countries where rubber comes from, the lecturer described

Quebec Division at C.C.R. Co.'s Rubber Footwear Convention, Montreal. From left to right are:—W.F. Bilger, Montreal; J. L. Grant, Montreal; A. Dubuc, Montreal; R. McIver, Montreal; A. Morin, Quebec; J. C. Giroux, Montreal; J. L. Quesnel, Montreal; C. Baby, Montreal; R. W. Ashcroft, New York; R. E. Jamieson, Montreal; W. A. Eden, Montreal; W. Binmore, Montreal; J. M. S. Carroll, Montreal; E. E. Davignon, Quebec; J. H. Cote, Montreal; F. A. Todd, Montreal; J. E. Boivin, Quebec; J. E. Amyot, Quebec; J. Harper, Ottawa; Ed. M. Zavitz, Ottawa; C. A. Roy, Ottawa; A. Dwycr, Montreal; W. C. Langford, Montreal; J. J. Kieswetter, Montreal.

the care of trees, the processes of tapping and the variety of treatments which the crude rubber has to go through before being shipped to the market. The leaves of the rubber plant, said the lecturer, were shed twice a year. After going through the various processes which transformed the rubber sap into a substance, it took seven weeks to dry it preparatory to shipping it to the rubber markets, said Mr. Thornton.

H. L. Tower, of United Last Co., Montreal, was in Boston this week.

Mr. Gahan, formerly with Getty & Scott, is now in charge of fitting room for Ames-Holden-McCready No. 1 factory.

James Lawther, of Toronto, representing the Hartt Boot & Shoe Co., has returned from a business trip to Fredericton, N.B.

James Rae, the widely known shoe retailer, of Vancouver, B.C., where he conducts several progressive footwear establishments, was in Montreal, Toronto and other points east on a buying trip this week.

Knechtel & Co., who have been in the boot and shoe business in Stratford, Ont., for nearly 20 years, have leased the store in the Gordon Block, fronting on Downie street, formerly occupied by F. G. McTavish & Co., and will move from their present store on Ontario street about April 1st. The new shop which extends all the way through from Downie street to Erie, is being completely remodeled and fitted up and equipped with all the requirements of a modern shoe house, including a spacious ladies' department.

The John Ritchie Co., Quebec, have secured another large order for military rest shoes for the Canadian Militia, which will keep the factory busy for some time. The firm has just completed a very large contract for the same line of footwear, which they received on October last. The factory has been rushed on regular lines for some time and it has been found necessary to work night shifts frequently.

W. J. Nelson, shoe retailer, Lethbridge, Alta., has returned to that city after completing a three months' course at Kingston, Ont., for a lieutenancy in the artillery.

Herb. Stenson, of J. T. Stenson & Sons, shoe dealers, Peterboro, was in Toronto last week on business.

Geo. Johnston, of Johnston's Big Shoe House, Vancouver B.C., was in Toronto, Montreal, Quebec and other eastern centres recently, on a business trip.

J. G. McDiarmid, western Canada representative for the Murray Shoe Co., of London, Ont., left this week on an extended business trip throughout the Prairie provinces.

C. S. Corson and P. R. Corson, of the Regal Shoe Co., Toronto, spent a few days in Boston last week, attending a convention of the company's salesmen. There was a large and representative gathering, and the proceedings were both profitable and enjoyable. The new lines of the Regal Shoe Co. for fall set a new standard in style, workmanship and attractiveness.

N. MacFarlane, of the MacFarlane Shoe Co., Montreal, spent a few days in Toronto last week on business.

W. P. Francis, superintendent of the John Ritchie Co., Quebec, was calling upon the trade in Toronto for several days last week.

Mr. Collins, buyer for Christie-Grant, Limited, Winnipeg, was in Toronto, Montreal and other centres last week on a buying trip.

Wm. G. Olton, sample room salesman for D. D. Hawthorne & Co., with which firm he has been for some ten years, was quietly married on March 15th to Miss Edith Tibbs, of Toronto, the ceremony being performed by Rev. T. W. Neal, pastor of Bathurst street Methodist Church. Mr. Olton and bride have taken up their residence at 1080 St. Clarens avenue, Toronto. The employees of D. D. Hawthorne & Co. presented him with a handsome mahogany chiffonier.

W. A. English has joined the selling staff of the Hartt Boot and Shoe Co., of Fredericton, N.B., succeeding George H. Ferguson in the far West. He is an old Ontario boy but

has been living in the Prairie Provinces for the last eleven years. His first experience on the road was with the Thos. Ryan Co., of Winnipeg, and for the last five years he has been with Ames-Holden-McCready Limited, covering Alberta and Saskatchewan. Mr. English who was born in Forest, Ont., is about thirty years of age and has a good record as a salesman, having made a strong connection with the retail trade. Well liked by a large circle of friends, he possesses considerable ability as a lawn bowler.

C. F. Rannard, president and managing director of the Rannard Shoe Co., Winnipeg, is spending a few days in Chicago, Detroit, Rochester, Toronto, Montreal and Quebec, looking into the changes in novelty styles, which he says are worrying retailers a great deal. He also intends getting a line on the manufacturing and leather markets, and picking up as many pointers as possible, in regard to the trend of trade and latest methods in the successful retailing of shoes.

W. J. Detweiler, shoe dealer, Sault Ste. Marie, Ont., who recently moved into a handsome new store, has bought the shoe stock of J. B. Kerr, of that city. Mr. Kerr passed away a few weeks ago.

Reg. Johnston, late of the firm of Johnston & Murray, London and St. Thomas, has taken a position on the selling staff of Scott-Chamberlain, Ltd., of London, Ont.

#### WILL EMBARK IN WHOLESALE LINE

E. J. Fleetwood, who has been manager of the St. John, N.B., branch of Ames-Holden-McCready, Limited, for the past year, has resigned and intends engaging in the wholesale shoe business on his own behalf in St. John. Mr. Fleetwood has had some 17 years' experience with Ames-Holden-McCready and is thoroughly familiar with the footwear line. He began his business career in the office of the Monc-

E. J. FLEETWOOD, ST. JOHN, N.B.

ton Sugar Refining Co. at Moncton, N.B., where he remained for five years, and before removing to St. John went into the service of the Imperial Oil Co. His promotion was rapid, and he soon rose to the position of accountant. In 1899 he became connected with the Ames-Holden Co., Montreal, and has been with them ever since as accountant and credit man, and latterly as manager. His training and personality have well qualified him for making a success of his new venture.

### TWENTY-EIGHTH BUSINESS BIRTHDAY

J. B. Badour, Downie street, Stratford, has entered upon his twenty-eighth year as a resident and business man of that city, having come there in 1888. Mr. Badour is widely known in the shoe and men's furnishing trade and enjoys the respect and confidence of a host of friends. His motto has always been "frequent turnover, buy often and take advantage of all discounts." He keeps both his stock and

J. B. BADOUR, STRATFORD, ONT.

himself on the move. His premises are well laid out and his trade each year has shown a gratifying increase. Mr. Badour has a good word and a cheerful greeting for all and no man receives a warmer welcome than the traveler.

Mr. Badour, in addition to leading makes of shoes, handles trunks and other traveling requisites, as well as gloves, mitts, men's furnishings. Born in Drysdale, Ont., he learned shoemaking in Hensall and after coming to the Classic City in 1888, he followed the art of St. Crispin in connection with one of the leading stores for nearly three years.

The Chatham Shoe Co., Chatham, Ont., has been incorporated, with a capital stock of \$75,000, to manufacture, sell and deal in boots and shoes of all kinds. E. S. Hunt is at the head of the new company, which is establishing its factory in Chatham, Ont.

Chas. McGilvery, shoe merchant, of Simcoe, Ont., who has been very ill, is reported to be improving.

Architects are engaged in preparing plans for a three-storey building, 29 by 74 feet, which will be very attractive. It will be used for a club house for the employees of C. S. Hyman & Co., tanners, London, Ont., of which firm Hon. C. S. Hyman is head. As the promoter of the club house proposition he has given it considerable thought and attention.

A. J. Gahagan, who has been in the shoe business in Woodstock, Ont., for the past ten years, recently commemorated that event by holding a big anniversary sale.

Harry Gruber, shoe dealer, of Montreal, recently assigned.

Legace & Lepinay, shoe manufacturers, St. Valier street, Quebec, have acquired the premises of the Louis Gauthier Co., St. Anselme street, and are now operating in that factory.

V. L. Holmes, Toronto, formerly representing the Western Shoe Co., of Berlin, Ont., has joined the staff of the Star Shoe Co., Montreal, and will cover Eastern Ontario. John Scott, who covers the main line centres in the Prairie Provinces, and J. A. McLean, who supervises the branch line towns, have left for Western Canada in the interests of the Star Shoe Co. W. C. Myers will look after Toronto and Western Ontario, J. G. Riell, Quebec province, and C. A. LeBlanc, the Maritime Provinces.

J. A. Hand, formerly in the shoe department of the Robt. Simpson Co., Toronto, son of Alfred Hand, of the Ames-Holden-McCready Co., Toronto, has gone to Regina, where he has become a member of Royal North-West Mounted Police.

John Courtney, shoe retailer, north Yonge street, Toronto, intends retiring from business at an early date.

C. A. Davies, of the Blachford, Davics Co., Limited, Toronto, has returned from a business trip to Montreal and Quebec.

C. F. Schuszler, who for the past four years has been city representative of the Minister Myles Shoe Co., Toronto, and of the Nursery Shoe Co., St. Thomas, Ont., has joined the staff of the Regal Shoe Co. and entered upon his new duties last week. Mr. Schuszler will look after Western Ontario and the city of Toronto. He is an experienced, energetic traveler, who will no doubt meet with a large measure of success in his new position.

H. W. Pearson, manager of the Toronto branch of Ames-Holden-McCready, and Ralph Clark of the Montreal branch spent a few days in Boston last week on business.

The Acme Tire & Rubber Co., Limited, has been organized with a capital stock of \$400,000 and headquarters in Toronto. The company is empowered to carry on the business of manufacturers of and dealers in tires and rubber goods and rubber substitutes of all kinds, rubber products and by-products and compositions into which rubber can be converted, etc.

G. J. Trudeau, shoe manufacturers' supplies, Montreal, has been obliged to occupy the premises adjoining his present quarters owing to the expansion of his business. It is a four storey building similar to the one he now uses, and it gives him street numbers 365, 67 and 71 Ontario St. E.

Philip Pocock, of the London Shoe Co., London, J. A. McLaren and Hugh White, of Toronto, were in Montreal and Quebec last week on business.

J. A. Cameron, who was formerly with the T. Eaton Co., and latterly on the travelling staff of the Adams Shoe Co., Toronto, has been appointed Western Ontario representative for the Minister Myles Shoe Co., of Toronto.

R. D. Douglas, for many years on the travelling staff of the J. Leckie Co., shoe manufacturers, Vancouver, has purchased the shoe business of W. B. Holden, of Vernon, B.C.

Fire which broke out recently in the shoe store of Alfred Saunders, 487 Bloor street west, Toronto, damaged the stock to the extent of \$4,000, while the loss on the building is estimated at \$1,000.

Bert Packard, of L. H. Packard & Co., Montreal, was in Toronto last week on business.

J. T. Chipman, a well known business man of Amherst, N.S., and proprietor of the Amherst Cash Shoe Store, has enlisted in the 193rd Battalion now under formation. A company will be raised in Amherst and Mr. Chipman has been offered the position of second in command. He was formerly attached to the 93rd Cumberland Battalion and while in that unit won distinction. His experience will stand him in good stead and he is undoubtedly well qualified for the post offered with the new battalion. If he accepts the position he will in future be known as Captain Chipman. Walter B. Calhoun, of Amherst, has purchased Captain Chipman's boot and shoe business. Shoe dealers in the province have every reason to be proud of their profession for it has given liberally to the Empire.

F. O. Woods, of the Regal Shoe Store staff, Winnipeg, was called east recently to Pictou, N.S., owing to the serious illness of his father. He was accompanied by his sister, Miss Harriet Woods.

The death occurred recently in Montreal of T. A. Crossley, in his 68th year. He was a well known accountant and many years ago was book-keeper for the Ames-Holden

Co. and the W. A. Marsh Co. He then went into the shoe business for himself, but for the past nineteen years had been head of the accounting department of the Sun Life Assurance Co., Montreal.

Natural Tread Shoes, Limited, of which V. E. Taplin is manager, has removed from 329 Yonge St. to 156 Bay St., Toronto.

Captain Aubrey Davis, Quartermaster of the 220th York Rangers, was in Montreal and other eastern cities recently. He was introducing to the trade E. J. Davis, jr., who will take his place during the period of his enlistment.

D. D. Hawthorne, wholesale shoes, Toronto, has been spending a few weeks in the Eastern States, going as far south as Washington on a holiday trip.

L. S. McKindsey, Western Canada representative for the W. B. Hamilton Shoe Co., left this week on an extended business trip throughout the Maritime Provinces.

W. J. Duncan, of the Duncan Legging Co., Seaforth, Ont., spent a few days recently in Ottawa, Montreal and Toronto.

The Wilson Shoe Store, 73 King street east, Hamilton, Ont., has been making a special bid for the trade in men's military boots. A neat card was distributed, bearing the following: "This card entitles any man in uniform to a reduction of \$1.00 in the price of the officer's tan calf military shoe at Wilson's Shoe Store, 70 King street east. This is not the heavy regulation shoe as issued, but one of soft, pliable leather on a neat shape, and with a heavy sole." The firm feel that this is one way of doing "their bit." Mr. MacFarlane, who was formerly on the staff of the store, but left to manage the Palace Shoe Store, Barton street east, Hamilton, about three years ago, has rejoined the staff.

J. E. Fawkes, for the past few years Western Ontario representative of the Minister Myles Shoe Co., Toronto, has been appointed sales manager for Northern and Western Ontario for Briscoe automobiles with headquarters in London, and has removed from Paris, Ont., to that city.

F. L. Sexton, of the S. & F. Blacking Co., Boston, visited Montreal recently on a business trip. J. L. Higgins, who represented the S. & F. Blacking Co., Montreal, is returning to their headquarters in Boston and will be succeeded in Montreal by F. A. Sexton, who will look after Canadian business.

A very practical and helpful book has been issued by the Foot Specialist Co. of Chicago, the author being Dr. W. M. Scholl, the well known orthopedic exponent. This book, containing nearly 400 pages, is splendidly illustrated, brightly written, and contains a mine of information on the anatomy of the foot, its normal and abnormal conditions, deformities and their mechanical treatment. Special chapters are devoted to shoe fitting and its allied branches, including the history of footwear. Chapters are also given over to hosiery, the method of making plaster of Paris casts for the foot, etc. The manual will be found very convenient, not only for the student and practitioner but for all shoe dealers and salesmen who desire to do scientific fitting and understand the care, treatment and structure of the human foot.

Fire broke out recently in the factory of the Canadian Rubber Co., East Notre Dame Street, Montreal. Splendid work was done by the fire department in preventing the flames from spreading to the main section of the building, and confining the blaze to the eastern part of the structure in which it originated.

It is learned that in the recent order for army shoes the Department of Militia and Defence, Ottawa, placed allotments for 500,000 pairs of ankle boots and 200,000 canvas rest shoes. It was understood that Valentine & Martin, Waterloo; Regal Shoe Co., Toronto; Brandon Shoe Co., Brantford; and John McPherson Co., Hamilton,

Ont., each got 15,000 pairs of ankle boots; J. Leckie Co., Vancouver, 30,000; Scott-Chamberlain, London, 40,000; King Shoe Co., Toronto, 40,000; Amherst Boot & Shoe Co., Amherst, N.B., and Aylmer Shoe Co., Aylmer, 10,000 pairs; Plessisville Shoe & Leather Co., Plessisville, Que., 10,000 pairs, and Ames-Holden-McCready Ltd., Montreal, 200,000; Dufresne & Locke, Montreal, 100,000. This makes in all 500,000 pairs of ankle boots, and in the matter of canvas rest shoes Plessisville Shoe & Leather Co. were awarded 20,000 pairs, Ames-Holden-McCready, 80,000 pairs, and Dufresne & Locke, 100,000 pairs.

L. C. Van Geel, sales manager of the Tillsonburg Shoe Co., Tillsonburg, Ont., is on an extended western selling trip throughout the prairie provinces.

The S. & T. Blacking Co., of Boston, Mass., have adopted a new method of treating white canvas shoes, which does not shrink the stock. The dressing is guaranteed to contain no acid and is applied after the shoes are lasted. The shoes are allowed to dry, then sent through the factory without covers. Dust and dirt cling to the dressing, instead of the fabric, and when the shoes arrive in the packing room they are applied to the power brush and all dressing, dirt, etc., removed. One large manufacturer recently stated that this method made the canvas look better than when first cut.

John Harness, who was on the Yale Shoe Store staff, Winnipeg, for some years, has taken a responsible position in the office of the Great West Saddlery Co., Winnipeg.

James Ross, western representative of the John McPherson Co., Hamilton, leaves this week on his semi-annual trip through the Prairie Provinces with a fine line of fall samples.

Mr. Bender, first assistant in the men's shoe department of the T. Eaton Co., Winnipeg, and his brother, who was connected with the Ryan-Devlin Shoe Co., have joined the colors and will go overseas.

#### NEW BUSINESS FOR MR. McCRUDDEN

John McCrudden, who is widely known in shoe circles, has become identified with T. Bergeron and Dr. H. Ethier, formerly interested in the Rideau Shoe Co., and has started

J. McCRUDDEN, MONTREAL

the McCrudden Shoe at 1747 Des Erables avenue, taking over the business formerly known under the style of T. Bergeron & Co., a Montreal Infants', misses, and children's McKays will be made as well as a limited line of turns.

## NEWS JOTTINGS FROM OLD QUEBEC

S. Beardsley, of Ottawa, was in Quebec on a buying trip the first of the month.

The tannery of Nazaire Fortier, Quebec, is operating day and night.

Jos. Tanguay, formerly with Rock Shoe, is about to open a new factory on St. Dominique street, where he will manufacture McKays and Standard screws.

JOS. TANQUAY, QUEBEC

J. A. Langlois, the local member for St. Sauveur and for many years with the old Gauthier Co., has joined forces with J. E. Plamondon, who was also for many years identified with Gauthiers, to form the firm of Langlois & Plamondon, who will manufacture turn shoes on Belleau street. The office and sales room of the new concern will be at 491 St. Valier street.

Lucien Borne is very busy making "Quebec kid," which is a line replacing cheaper grades of kid which cannot be made except in limited quantities owing to the present scarcity of skins. The new line has a full goat grain and possesses the fibre and quality of ordinary kid. It comes in bright or dull finish. The firm has had great success with the new brand.

J. H. Begin, Eur., who have been for sometime on Crown street, will move their wholesale establishment to 124 St. Dominique street.

Bertrand & Thibault is the name of still another factory soon to commence in Quebec. The company will have a factory 50 x 40 by two stories in St. Sauveur, Alderman J. Bertrand will be the senior member of the firm.

The John Ritchie Co. reports being extremely busy, as indeed are several of the Quebec factories, such as Gales, Routier, Tourigny & Marois, Samson.

Legace & Lepinay are now pretty well moved into their new premises where they will have a capacity of 15,000 to 18,000 weekly, which is quite an increase over 900 a week, which was their capacity when they started less than two years ago. Two carloads of machinery have been received for the new factory.

J. E. Samson is extending his premises for the purpose of making a first class line of pegged shoes for men and boys. They intend to make some particularly good heavy lines of Standard screws for the working men, and with

that idea in view are installing considerable new machinery. Mr. Samson says that their hockey shoes in which they specialize are in particularly strong demand. When the changes are completed the offices of the company will be on St. Valier street, as the extra space they are taking runs their building right through to that thoroughfare.

The trade will be sorry to learn of the illness of the senior member of the firm of Dupere & Garant, who has been confined to his room for several days past with water on the knee.

W. L. Francis, sales manager of Gale Bros., shoe manufacturers, of Quebec, who has been in Toronto on business for the past few days, has gone to Winnipeg and the West.

J. A. Scott, Quebec, was in Montreal recently on business.

Oscar Clement and Pierre Blouin were in Montreal lately on a business visit.

## HE IS A MAN OF THE TIMES

(See page 81)

**A**UBREY DAVIS, of Davis Leather Co., and now more particularly Captain and Quartermaster of the 220th Overseas Battalion of the "York Rangers," is a practical exponent of the injunction of the wise man, "whatsoever thine hand findeth to do, do it with thy might."

A young man, only in his thirties, he has already won a strong position in business affairs as the executive head of the great Newmarket concern, of which he has been Vice-President for several years. He knows the calfskin business from the ground up and no man stands higher amongst shoe and leather men than he for ability and character.

But he has not solely devoted his superabundant energies to the business to the success of which his ability has so fully contributed. He is a director of the Newmarket Metal Toy Co., and also of the Newmarket Hotel Co., which runs one of the comparatively few successful up-to-date temperance hotels in this country, and he is also a member of the Newmarket School Board.

He has taken a deep interest in military matters, being the Officer Commanding the Newmarket Home Guards, one of the finest organizations of its kind in the province. He is also President of the North York War Auxiliary and a representative on the Civilian Recruiting League for District No. 2, an organization which overshadows in its methods and results everything of the kind in the Dominion. Into these enterprises he has brought the vim and optimism for which he is noted and is credited with a good deal of their success. He is now Captain and Quartermaster of 220th Battalion, York Rangers, and in this capacity has had much to do with equipping and preparing this unit for its overseas work.

In religious and moral issues Capt. Davis has always taken a vigorous interest, being identified particularly with the Methodist Young Men's Association of Ontario, which seeks through athletic, literary and other efforts, to back up the moral and religious training of the Church and Sunday School. He is an active member of the "Committee of One Hundred" that brought about the recent temperance avalanche in Ontario.

Socially, Capt. Davis is popular both in Newmarket and out of it. He is a "society" man, being P. M. of the old Robertson Lodge, A.F. and A.M., and a "Mystic Shriner," so that he moves in select circles in Masonry.

Best of all he is a man among men and, when you mention "Aubrey Davis" in leather circles, it arouses the kindest comment. The trade wishes the popular civilian soldier the utmost success in his determination to give the Country his best.

### BACK TO HIS FIRST LOVE

S. J. Edmondson, who for many years represented John Lennox & Co., Hamilton, in the East, with headquarters in Ottawa, has associated himself again with this old estab-

S. J. EDMONDSON, OTTAWA

lished firm and will represent John Lennox & Co., east of Toronto. His many customers and friends will be glad to learn he is back with the old firm again.

R. E. Jamieson, general sales manager of the Canadian Consolidated Rubber Co., Montreal, has been on an extended trip to the Western branches of the company, going as far as Vancouver and Victoria.

An interesting convention of the sales force heads of Ames-Holden-McCready Ltd., took place in Montreal recently. The sales managers in attendance were A. L. Johnson, general sales manager; A. M. Angus, R. W. Clark, Montreal; S. C. Mitchell, St. John; A. B. Erskine, Vancouver manager; E. P. Hall, Edmonton branch manager; F. M. Morgan, Winnipeg branch manager; H. W. Pearson, Toronto branch manager; N. R. Feltes, general manager, presided at a luncheon, which was held at the Windsor and D. Lorne McGibbon, president of the company, addressed the gathering.

H. D'Artois, who is on the staff of J. A. Scott, Montreal, is now a firm believer in the luck of even numbers. He was the fortunate winner of a diamond ring in a recent raffle.

Thomas Douglas, who formerly resided in Harriston, where he followed the trade of shoemaker, died recently in Toronto at the residence of his daughter, Mrs. Charles King.

The interior of J. Schwartz's shoe repair shop in Tillsonburg, Ont., was gutted by fire recently.

Improvements for the reopening of the factory of the Canadian Consolidated Rubber Co. at Granby, Que., have been going on for some time and now are about completed.

Falce's shoe repair shop, 2319 Granville St., Vancouver, was entered recently. Tap soles and rubber heels to the value of about one hundred dollars were stolen.

Two employes of the James Muir Co., shoe manufacturers, Maisonneuve, sued the company because the latter had deducted from their pay a certain amount for shoes spoiled by the employes while working on them, and at the same time the company tendered the boots to the employes. Justice Purcell, in the Circuit Court, Montreal,

dismissed the employes' action, finding that it was the custom of shoe factories to hold employes responsible for spoiled boots and the custom was recognized by both employer and employe.

C. H. Himbürg, of Edmonton, Alta., will cover all the branch lines in Manitoba, Alberta and Saskatchewan this season for Charles A. Ahrens, Limited, shoe manufacturers, Berlin, Ont. He will also represent the Lady Belle Shoe Co. of Berlin. The large centres on the main line in the west will be looked after as usual by H. E. Wettlaufer, sales manager for Charles A. Ahrens, who will start in at Victoria, B.C., on his way back east, from a trip to Louisiana and California, where he has been enjoying a pleasant holiday.

Samuel P. Colt, president of the United States Rubber Co., in the report for 1915, just made public, banishes the hope of common stockholders that dividends might be resumed shortly on their stock. Mr. Colt says the company is now doing the greatest business in its history, but thinks any further application of profits to dividends under existing conditions would be unwise and against the permanent interests of all stockholders.

A new type of "leatherless shoe" is being widely advertised in the German newspapers. The uppers are made of grey or black waterproof linen sailcloth, while the soles are built of thin layers of wood glued together with waterproof glue.

James Young, of Toronto, who has been spending the past four months in company with James Robinson, of Montreal, touring the State of California in an automobile, has returned home. Mr. Robinson, who was recently joined by Mrs. Robinson, is still in the sunny south visiting Louisiana, Kentucky and other states. He is feeling fine and has regained much of his old time vigor and alertness.

D. A. Leonard, who is with the American-British-Canadian Distributors, Toronto, has gone on a business trip to the Western Provinces.

Barker, Patten & Potter, dealers in shoes and men's furnishings, Medicine Hat, Alta., have assigned to the Canadian Credit Men's Association.

Capt. J. T. Sutherland, of Kingston, Ont., Quartermaster 146th Overseas Battalion and President of the Ontario Hockey Association, who is widely known to the shoe trade through his long connection with it as a traveler, has issued a stirring call to hockey players to offer their services in defence of the Empire.

# Martin CORRUGATED FIBRE BOARD Shipping Cases

## 90% in Storage Space

If, for instance, you value the space occupied in your premises by empty wooden boxes at \$250.00 rental per annum MARTIN CORRUGATED FIBRE BOARD SHIPPING CASES will save you 90 per cent., or \$225.00

## Save Time, Trouble and Money

## Sure Savings For Shoe Shippers

### 50% in Packing Time

And, where for instance, one hour would be required to pack a shipment in wooden cases, the same shipment could be packed (and better packed) in half an hour, with MARTIN CORRUGATED FIBRE BOARD SHIPPING CASES.

### 20% in Freight Charges

And, if your freight bill, using wooden cases, has been say \$2,000 a year, MARTIN CORRUGATED FIBRE BOARD SHIPPING CASES will save you at least 20 per cent., or \$400.00 a year.

## 20% in Cost of Wooden Boxes

And then, suppose you've been paying \$2,000 a year for wooden boxes, for the same amount you can get 20 per cent., or \$400.00 more value for your money by using MARTIN CORRUGATED FIBRE BOARD SHIPPING CASES.

## Prevent Damage and Pilfering

We are again operating our own factory in part of our new building. In a few weeks we will occupy one of the best equipped plants in Canada, and will be able to handle orders with quick despatch.

*This is an All-Canadian Company,  
the profits remaining in Canada.*

All other things being anywhere near equal, it is good business and good patriotism to patronize the industries of your own country. And our goods are equal to those of any concern in Canada.

CIRCULATION  
DEPARTMENT

Dear Sir:-

You have doubtless forgotten and thus overlooked sending remittance for your subscription account.

We are trying to get our books closed by March 31st, and your small remittance, with others, will seem a great deal to us, if sent within the next fifteen days.

We are giving a good service for a very small subscription price and can only continue to do it while everybody "whacks up" promptly.

Please do it now while this memo is before you.

Yours very truly,

THE ACTON PUBLISHING CO. LTD.

## RETAIL SHOEMEN!

*See the PERTH Salesmen*

Our direct-to-the-retailer organization is now complete and practically every part of Canada is now being covered by PERTH SALESMEN with the attractive Perth samples for Fall.

## “VIRGINIA SHOES”

*Women's Goodyear Welts*

**Retailing From \$4.<sup>00</sup> Upwards**

There's a big, unceasing demand for a really well-made Goodyear Welt for women that is also smartly stylish and sells for a moderate price.

And PERTH SHOES enable you to meet this great demand.

We concentrate our whole energies upon Women's Goodyear Welts. That our values are consequently superior can be seen at once from the samples now being shown.

## PERTH SHOE CO. LIMITED

PERTH

ONTARIO

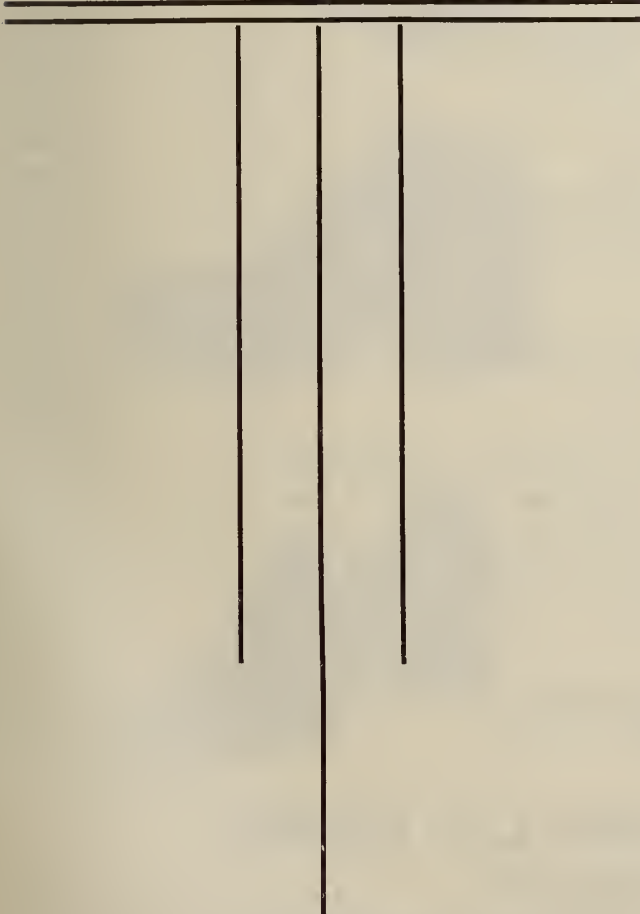

A Pair of  
Ritchie Shoes  
every  
Fifteen Seconds!

---

---

So busy is the Ritchie Factory its output at present averages one pair every fifteen seconds.

This fact is chiefly interesting as an indication of the merit of Ritchie Shoes.

Unless they gave entire satisfaction they never would be sold in such quantity.

The moral is obvious.

THE  
JOHN RITCHIE CO.  
LIMITED  
QUEBEC MONTREAL

“HARTTS ARE TRUMPS”

## Character

EVERY person whose powers of discernment are normal and whose instincts of refinement have been developed, know what is meant by “Character” in shoes.

YET who can define it?

IT is a matter of the utmost difficulty, if not actually impossible to do so in words; but you *know* it when you *see* it.

AND you *see it always* in HARTT SHOES.

THE fall range is a revelation of true art in shoemaking. Every last is designed to meet the demand of discerning men, and to make the HARTT line an asset of real importance to the merchant who carries it.

*See The Fall Range*

## The Pressure Cure—

the same process which is used to put the long life, the tremendous durability into high priced automobile tires, is used in producing our heavier lines. That's why they wear so long and defy abuse that would ruin shoes made in the ordinary way.

The lighter shoes also have a splendid wear-worth and are right up-to-date in style.

## “Dreadnought” and “Veribest”

are two new lines of specially high grade Boots and Lumbermans, and

## “Speed King”

is a new line of Sport Shoes. Be sure you get these for Fall.

## Union Shoes for Union Men

The retailer who meets the demand of every possible buyer in his town handles Union Stamp footwear.

Dealers who do not carry Union Stamp shoes are not soliciting their rightful share of the shoe business of their city.

The Union man will have Union shoes for himself and his family. He demands them and if he cannot obtain them will turn elsewhere.

To you, Mr. Retailer, who advertise Union Stamp shoes the tide of trade is turning.

You cannot afford to neglect the Union trade, and even the man who does not buy Union shoes merely because of Union principles recognizes the high quality of Union Made footwear.

You have nothing to lose and all to gain by carrying these shoes.

Let us send you to-day a list of manufacturers who make shoes bearing the Union Label and add a live selling asset to your business for the coming year.

Remember, no matter what any manufacturer may say, no shoes can be considered Union-Made unless they have the Union-Stamp

# These Two Brands—

## Specify them to your jobber

Not only are the DOCTORS and PROFESSOR Shoes well known, but they also have features which will make many new and steady customers for you. Your customer, once he becomes acquainted with these features, will swear by these two famous brands.

*Doctors*  
ANTI-SEPTIC  
SHOE  
PAT 1908 1909  
NON  
PERSPIRO

In the DOCTORS SHOE he knows he gets comfort and appearance *plus* absolutely waterproof qualities in both sole and upper. He also gets an especially made sole that ensures an even foot temperature at all seasons.

THE  
*Professor*

PAT. NO.  119409  
GOLD CROSS  
SHOE

In the PROFESSOR SHOE he gets the same comfort and appearance *plus* a patented cushioned inner sole that makes walking a pure pleasure.

*Can you afford to overlook these facts  
when you are placing your Fall order?*

**The Tebbutt Shoe & Leather Co., Limited**  
**Three Rivers, Quebec**

# 1916—FALL SEASON—1916

*For Best Values and Greatest Variety  
in*

## *Fall Footwear*

*See Our New Fall Lines*

The wide-awake shoe dealer need hardly be reminded of the uncertainty in the leather market. A word to the wise—ORDER EARLY. This is good advice always, but never more so than this season. You will find in our full range the right lines for good business in every class of your trade.

### **Imperial Shoe**

For men and women. Made in all fine leathers; Goodyear welted and McKay sewn.

### **"Beaver" Brand**

Men's Goodyear welts in smartly stylish shoes—the line that will give satisfaction for the better class men's trade.

### **"Maple Leaf" Brand**

Solid leather working shoes. This is a line that will appeal to your "hard-headed" customer who is looking for good wear before anything. Every pair is guaranteed and you can confidently recommend them, with the absolute assurance that they will give complete satisfaction.

### **"Varsity" Brand**

A medium grade light shoe for men, boys and youths in McKay sewn and standard serew.

### **"Little Canadian"**

A popular line for misses' and children. Very smart in appearance, comfortable, strong and nicely finished.

### **"Sportsman"**

Boot in 10, 12 and 15-inch leg, made in Chocolate, Pearl and Black Calf and Smoked Elk. For Hunters and Prospectors. The "Sportsman" is one of the best boots made.

### **"Witch Elk"**

Is a famous line of hunting and sporting boots for which we are agents in Canada.

**Moose Moccasins, Lumberman's Knit Sox, Oil Tan Larrigans, Independent Brands of Rubber Footwear, Trickett's and Parker's English Felts, Elmira Felts.**

## **Summer Sorting Orders**

We are exceptionally well able to handle your "rush" sorting orders, as our stock is very large and well assorted, including a complete range of **"Speed King" Tennis and Sporting Shoes and Barefoot Sandals.** Letter and 'phone orders receive instant attention. A trial order will convince you of our ability to meet your requirements quickly and well.

## MEN'S WELTS EXCLUSIVELY

### THE FINEST SHOES ARE MADE IN SPECIALIZED FACTORIES

This is an age of specialization, nowhere more marked than in the shoe industry. The continent's leading men's, women's or boys' shoes are made in factories that specialize on one line.

Recognizing the trend of the times the Drummond factory has been made a specialty establishment.

Men's welts exclusively are produced and the range for Fall, now being shown, is a striking illustration of the benefit of this specialization.

Be sure to see these shoes which retail \$4.50 to \$5.50.

No. 123, here shown, is a Men's Velours Calf Button, long vamp and toe effect, heavy single sole, 7/8 heel.

# A Great National Public Utility

## That concerns all merchants and all people

**T**HE original Cash Register rang a bell, indicated and recorded the amount of the purchase. It benefited the merchant only.

In a third of a century this old model has developed into a Cash Register that directly benefits every *man, woman, and child* who spends money in a store.

This new Cash Register equally concerns every *merchant and clerk, every banker and wholesaler* in this land.

*It furnishes every customer* with a receipt or sales-slip.

It prints on this the amount paid or charged.

On this is also printed the date of the sale and who made it.

It forces a duplicate, printed record for the merchant.

It prevents disputes over charges and bills paid.

It saves shoppers' time.

*It gives the merchant* all his profits. It gives him more money for his family.

It promotes more and quicker sales.

*It protects each clerk* against making errors and against the mistakes of others.

It rewards the diligent clerk by telling his employer which one makes the largest number of sales and which one gets the greatest amount of business.

*It assures the banker* additional security for the money he loans the merchant.

*It gives the wholesaler* additional assurance that the merchant will have money to pay his bills.

It furnishes the banker and the wholesaler mechanical evidence that the merchant's statement of his business is correct.

### *It is a business necessity*

### **Merchants!**

We have new 1916 models that give this perfect service.

Write us today or see our agent in your city and learn how you can secure one of these public service machines.

Liberal allowances will be made for old National Cash Registers that were good in their day, but do not so completely protect you or give the valuable service our 1916 models do. Address Dept P8.

## COME OVER AND HELP US

**The Madeconian Cry From Great Britain—A Shortage in the Supply of Footwear in the Old Land—Army Shoes and Recruiting Have Made It Difficult to Secure Regular Lines—American Shoes Flooding England**

**T**HE shoe trade press of Great Britain voices from week to week a condition that is pressing sorely not only upon retailers but the British public. Manufacturers over there have reduced their lines to an absolute minimum to meet the demands made upon their resources for shoes for the fighting forces. To this has been added the depletion of the supply of operatives on account of the heavy drafts of recruits for overseas service. As one manufacturer puts it, "We are down to hard pan. If we lose any more of our men we will have to shut down."

Here is a letter just received by the SHOE AND LEATHER JOURNAL from a British shoe jobbing house. It explains itself:—

"I have been thinking that at the present time this is the opportunity for Canadian shoe manufacturers to secure a portion of British trade, as you will understand we are greatly handicapped at the present moment both in labor and material, and will continue to be in this position I fear even if the war was over in the next few months. If you know any manufacturers making solid goods, and who are interested in the export question, I should be pleased if you would forward me their names, as I know I could do a good turnover if I secured the right lines of shoes in gents', ladies' and children's."

This is but a sample of the letters received on this subject for the last three or four months, during which time the situation has become quite acute. Unfortunately conditions in Canada preclude to some extent our availing ourselves of this opening overseas, as our own factories are suffering to some extent from very similar conditions. Recruiting has hit our western shoe factories more directly than perhaps any other line of production. One shoe manufacturer in Ontario stated the other day that his concern had supplied over a hundred recruits so far, whose places had to be largely filled with "green" help. This is having a serious effect upon the output, a large portion of which is army shoes. The leather situation also makes it more or less difficult to step in and supply the needs of the Motherland in shoes. We are having in Canada about all we can do to look after our own needs in this line. The influx of American shoes, which had practically been turned back by British manufacturers the past several years, has begun once more to take hold in the British Isles.

Regarding the shoe situation here, one of the foremost Montreal manufacturers writes:—"The articles in your April 1st number dealing with the condition of the shoe and leather trade, have, in my opinion, a highly educational value. If the retailer is wise now he will have his needs filled to the limits of his capacity by the manufacturer. The fact of the matter is that it seems almost impossible to overstate the difficulties with which the latter is beset."

# GO AFTER CHILDREN'S SHOE TRADE—IT PAYS

Satisfactory Profits and Quick Turnover in Such Department—How Styles and Fitting Qualities Have Improved—The Way Some Enterprising Retailers Develop Juvenile Business and Thus Secure Strong Connection on the Trade of the Family

**H**AVE you a Children's Department in your shoe store, and do you specialize in footwear for the "kids?" Do you ever look seriously into this branch as a money making proposition? Of course, if you run a family shoe store, you naturally have to keep foot togery for every member of the household. In the larger cities, however, there are certain stores which disdain catering to the pedal wants of juveniles. They may keep misses and growing girls', youths' and boys' sizes, but not infants', child's, lads' little gents', or girls'.

"No, we do not care to bother with this class of trade, confessed one of the leading city merchants, "you see the

and sisters. You would be surprised at the influence which a child, consciously, or unconsciously, exerts on its parents. We may not all be willing to be led around by them, but if the father or mother will sit down and quietly review underlying conditions with an open, unprejudiced mind, such a parent will find that a child has led them in many directions, particularly if there are only one or two youthful members in the family. In running a children's department, there are several things which have to be taken into consideration. One is, that if you have such a department, that it be marked off from the rest of the store by some distinctive decoration or fixture, light partition, screen or trellis work. It is also necessary to have someone in charge who thoroughly understands children and their disposition. It may be a man or a lady clerk. It makes no particular difference, so far as I can see, as long as such an attendant is conversant with the moods, games, wishes, whims, follies and caprices of juveniles and has the art of tactfully and diplomatically making each mother think that her own offspring is distinctly "it."

## Understand the Little Ones

"A great deal of the success of a children's department depends not only upon having a wide selection of styles, for there are many pretty combinations of leather and contrasting colors but, as I have just said, in placing an obliging and good natured person in charge. I would venture the opinion that as much depends upon having

margin is very small—no shoe ever selling for over \$3.50 and most of them from \$1.25 to \$3.00. This does not afford much of a leeway for profit, and you have to wait on too many customers in order to have respectable-sized receipts. Why, on a man's pair of shoes, which we sell at five and six dollars, there is as much profit as there is in selling three average pairs of children's. That is, speaking from the general standpoint, and it does not require as long a time nor as much expenditure of labor to close the transaction. No, the children's department has never appealed to me. I keep shoes for misses, youths, and that is as far back as I care to go in the footwear catering line. I recognize that there are certain districts where it is necessary for a dealer to keep all sizes and styles of shoes, but this is strictly a business district, and most of our trade is with grown-ups, with visitors to the city and passersby, who, attracted by our exceptionally artistic window displays, come in to satisfy their needs."

## Have Proper Person in Charge

"Do I handle children's shoes? Why, certainly I do," remarked another merchant. "We make a special feature of this department. We believe in catching the trade of the little ones, for if we please the tiny tots, we are pretty sure to catch the trade of the mothers and older brothers

a competent, painstaking and agreeable person to supervise this branch of the business, as there is in selecting the right class of goods. The person at the head and those assisting should understand human nature and the management of little ones, and send them and their mothers away pleased and proud, making the latter feel that not only has she received good value and kind attention, but that a real service has been bestowed upon her. Such a person should also know how to fit small feet properly, for a timid or a backward child will often say a shoe is large enough when it may be too short or too tight across the vamp."

Any shoe store depending upon the family trade,—and most of them do, will find that mothers prefer taking the youngsters to the nearest establishment and not down street, to be fitted. It involves expense and anxiety to

take children down town and in the crowded street cars, and on busy thoroughfares, they often require too much attention on the part of a tired or overworked mother. In the suburban store it is different, providing the parent lives only a few blocks away. It is the most natural thing in the world for her to slip in casually any afternoon taking Johnnie or Billy, Mary or Susan along with her for a new pair of "kicks."

**What the Family Trade Means**

"Yes," observed another shoeman, "of course I look after children's wants. Why, one of my customers has six boys. Do you know what his trade means to me per year? and I may tell you that I get all of it. He buys on an average new shoes every fortnight for some member of the family, which total 26 pairs a year, and they run from \$2.00 to \$3.50 a pair. You see that this household trade alone means about \$75.00 to me annually, and then I attend to the footwear requirements of the father and mother

more dazzling creations have been suppressed. Neat combinations of black and white, tan and black, tan and white and other contrasting hues are displayed, while some of the offerings have neat collar or cuff effect."

**The Turn-over is is Quick and Sure**

"A few years ago one or two manufacturing firms alone specialized on children's shoes. To-day there are several such concerns, and to show the possibilities of the children's department, one Winnipeg dealer last year did \$17,000 worth of business in that branch.

In children's shoes the turn-over is both frequent and quick and therefore, in proportion to the money invested, the relatively small portion of dead stock and the volume possibilities, this department is, or should be, a money maker.

"I made a mistake in planning my store," said a retailer doing business in a large shop in northern Ontario, "I put my children's department at the rear, but I intend, as soon

## CHILDREN'S BIRTHDAY RECORD

TO OUR PATRONS:—We have opened a Birthday Record in connection with our Children's Department, and will send a Birthday Souvenir to all children, boys or girls (between the ages of four and twelve years) who fill in the information required and return this sheet to our store :

*"Fill in the names of all children in your family" between 4 and 12 years.*

DATE	NAME	ADDRESS	AGE	BIRTHDAY

When the sheets are returned the names will be entered in a special book, with a page for every day in the year, and the Souvenir mailed so as to reach the child on the correct day.

**DO IT NOW!**

.....  
(DEALER'S NAME)

.....  
(DEALER'S ADDRESS)

SLIP ENCLOSED IN EVERY PARCEL BY WESTERN SHOE RETAILER

besides. I certainly believe in specializing on children's lines. The profit, considering the investment, is good. The goods are staple and regular, and do not bloom every night and then decay, the same as in women's footwear, and you establish a family connection by getting after the youngsters. You can sell children shoes down to the last pair at no sacrifice of profit if you know your trade and buy right."

"Talking about children's styles," asserts a western dealer, "why the presentations now are very attractive and pleasing. I remember a few years ago, when children's shoes looked as if they were thrown together—style, design or graceful lines being the last consideration. Now-a-days, the lasts are known as orthopedic or foot-form. They are wide, roomy and neat, without being cumbersome, heavy or blocky. The foot is allowed to grow according to its normal tendency, and at the same time there is much style about children's footgear, and with high cut legs, extension soles and extension heels, and military tops, there is variety and charm in the samples shown this season. Some of the

as I remodel this place, to have it right at the front—that is the spot it should occupy, by reason of its relative importance and its infinite possibilities. There is nothing like originality and resourcefulness in coming in personal contact with your customers. If they know that you are a family man yourself the tie of human sympathy and association is strong, and the more members of each family you, or your staff, get to know individually and call by their Christian names, the more intimate and mutually advantageous will be your relationship."

**Giving Souvenirs to the Young**

One retailer in an Alberta city attributes his success to the fact that he always caters to the children's trade. He is fond of children himself, having four husky boys and three pretty girls, and he knows that other parents are equally as fond of their offsprings as he is of his growing flock. When he sells a pair of boys' or girls' shoes, a little leaflet is inserted, which reads, "Children's Birthday Record—We have opened

*(Continued on page 59)*

# Where the Jobber Comes In

How the Wholesale Distributor Serves the Retailer and the Public  
—Some "Middleman" Fallacies as Applied to the Shoe Trade

**I**N the heated discussions regarding army shoes that occurred a year or so ago there was considerable vituperation anent "Middleman's Profits," and "righteous" indignation expressed that "rank outsiders" should be allowed to profit at the expense of the government and the people in the war purchases. While a good deal may be said in condemnation of "profiteers" edging in between the manufacturer and the government purchasing department, the fact may be lost sight of that an intermediary is often able to so arrange extensive purchases made of supplies from various quarters as to benefit both purchaser and vendor.

## The Cry Against the Jobber

From time to time in the shoe trade, both across the line and here, the demand has gone forth for the elimination of the jobber and middleman. Periodically the agitation arises and the cry raised "the jobber must go," but he still remains "on the job" more largely and industriously than ever. Where twenty-five years ago there were only half a dozen purely jobbing houses in the shoe trade in Canada, there are today four or five times that number and, almost any one of them, is doing as much business as the original lot. When an institution grows and develops like shoe wholesaling "there's a reason." If the wholesale distributing houses were not useful they would soon go the way of all junk. The cry of reaping unnecessary profits has been raised in vain for these same jobbing establishments not only compete against the manufacturers but against each other, and as far as that goes it is safe to say that at least two-thirds of the stock in the average retail shoe store is supplied from these same wholesale establishments.

## A Convenience to the Retailer

Time was when the dealer had to procure his regular supply of goods from the manufacturer twice a year—spring and fall—and supplement his placing orders with "sorting" requirements between times. While today he buys a fair amount of his season's requirements somewhat as before, he does not feel under the same necessity for looking ahead and depends on filling his staple requirements from time to time as occasion arises. In fact he has come to depend perhaps too much upon the wholesaler to carry his stock for him, and the complaint on the part of the wholesaler that he is too consistently compelled to carry an undue share of the

financial burden, is only too well laid. The dealer finds he can get goods on short notice and today retail conditions are such that he must be able to meet instantly almost any demand upon the shoe-making resources of the country. It would be practically impossible to do business in a large way successfully and eliminate the facilities for quickly replenishing the stock. It used to be urged that the country dealer was the *raison d'être* of the jobber, but one has only to go into the up-to-date city shoe store and take a look over the shelves to realize that the metropolitan merchant uses quite as largely, if not more so, the ample resources of the wholesale shoe house.

## How Can They Do It?

The question is often asked how is it possible for the jobber to buy goods from the manufacturer and meet the competition of regular manufacturers in staple lines. The reason is simple enough. The jobber buys in such quantities that he is able to secure closer prices not merely on account of the size of his order, but from the fact that he orders in case lots. Anyone knows that a manufacturer can economize materially in the production of any article if his "runs" be substantially increased. A man who orders ten or twenty cases of a certain shoe makes it possible for the maker at every operation to save money, so that it is not the "squeezing" tactics of the jobber, so often commented upon, that is responsible for his getting close prices. When a dozen or more jobbers concentrate on a number of staple lines and the manufacturer is able to lay out his season's work with long runs on certain lines of goods, conditions are reached that are more or less ideal for both manufacturer and jobber.

## The Advantages They Possess

The jobber knows what is selling and has the consensus of opinion of both wholesale and retail trade as to what is likely to prove saleable. He goes to the market with more fixed ideas than the average dealer is seized of, because of the fact that he is in contact with a larger number of handlers of shoes. He is capable of striking a good sensible average of requirements. He is buying for the average retailer not the specialist, and is not so apt to be carried away by fads. This may appear to be a weakness now and then, because he is apt to be shy of novelties and under buy rather than not. Like the retailer he realizes that there

is no money in fads and is afraid of burning his fingers. Usually, however, self-preservation leads him to provide a certain amount of specialties to keep him abreast of the times. But caution on his part is a safeguard for himself as well as his customers. His profits are so modest that he has to watch the possibilities of "stickers." The average profit of the jobber is about half that which the retailer expects to realize on his turnover.

### **They Take Risks**

Stocks have to be kept up to a point where orders can be filled and customers promptly satisfied, and sometimes an untoward season will leave the jobber sadly in the lurch. A mild winter will leave him perhaps loaded with skating boots or rubbers, or a slump in the demand for oxfords in spring will find him carrying over a large quantity of this class of goods for a year. There are risks of this kind that have to be taken, and it often happens that dealers who find a rush for a specialty such as the Gipsy cut of last year, or white goods such as there promises to be this spring and summer, will rail at the wholesale man when they had not nerve or foresight enough themselves to order largely from individual manufacturers. The shoe business is a more or less uncertain game, and the jobber has to use even more discretion than the dealer, because he buys on a much more elaborate scale and he has to think practically for the retail merchant from six to nine months ahead.

### **Says Profits Are Better**

A large jobber speaking on the question of profits said the other day: "The dealer makes better money on lines like ours than on specialties he buys from manufacturers direct. I often pick up lines that a retailer has bought from a manufacturer at ten to fifteen per cent. higher cost than ours, and find he is selling the shoes at the same price as ours. Ask any good retailer and he will tell you that he makes from half to two-thirds more profit on goods he buys from the jobber than he does on manufacturers' lines, which he often buys merely because of the name or some so-called 'distinctiveness' that does not make the line intrinsically worth any more. The money in the shoe business is in the every-day sellers and the jobber has perforce to make these embrace fully three-fourths of his range. For that reason you find us jobbers going short on 'frills' and pinning our faith to good selling lines. Of course we have to carry the novelties, but there is no money in them either for us or the dealer. Take it from me."

### **Advance Courier of Retailer**

That is how one jobber puts it. He says: "The retailer has the price 'hammered down' for him in

such a way as he could not do himself. We look over sixty or seventy lots of samples and pick and choose from these what we think will appeal not only to the dealer but the public. We scan the costs down to the backstrap and tip and see that the 'stuff' is put into the shoe. This talk about the jobber 'jeweling' the manufacturer and the latter taking it out of the shoe, is pure rubbish. The shoe jobber is 'on his job' as far as shoe value is concerned, and if he isn't he won't be at it long. He knows he has to meet the criticism of two or three hundred keen-eyed customers, and you may be sure he is not going to pass out his good money for gold bricks. Expert buying is the very foundation of successful wholesaling and that is why this part of the work is done usually by the heads of the establishments themselves, who may often leave the selling to less experienced hands. The dealer has a cinch to what he had when I was in the retail game. Today certain goods are standard. When we tell a man that this shoe is a Marsh, a Ritchie, a Sisman or an Underhill, they know what that means and they have besides our name behind the goods. The jobber has thus accomplished the standardizing of footwear to a very large extent and for this he does not often get credit."

### **There Are Some Faults**

Notwithstanding the fact that the development of the business has brought to bear brains, skill and honor of a very marked type, there are some "flies in the ointment." There is the danger, as in all competition, of listening to the "cheap" tempter. There are some jobbing houses that do not see the injury they do the whole trade as well as themselves, by pandering to the demand for cheap unsubstantial goods that discredit the business in the eyes not only of the retail trade but the public. Fortunately the standard has been materially raised in the last few years, but the "cheap and nasty" still persist to some extent. Then there has been a soreness created by laxness at times on the part of wholesale houses which tolerate the practice of selling to other than the legitimate trade. The largeness and completeness of the stocks leave them open sometimes to the temptation, always we believe from without, to allow their facilities to be used improperly. It comes oftenest through friends of the employes and, while it is never extensive enough to make a material difference in the trade, serves where it occurs to antagonize retailers. Good jobbing houses have become very strict on this point and positively refuse to be compromised in any way. Complaints on this score have thus practically died out.

# MUST RAISE YOUR PRICES TO GET FAIR PROFIT

**This is the Situation Which Retailer Has to Face—Advances in All Lines of Supplies Continue and Shortage is Becoming Critical—No Manufacturer Can Produce Shoes at Big Figure for Materials and Labor and Keep Up Quality Without Asking More**

**A**ND still prices go up. The retail trade is now realizing that there is more than mere talk or prophecy in the discussion which has been heard on all sides in reference to rising costs and scarcity of leather for foot toggery. In the prices asked by manufacturers, dealers find that they are up against a very real firmly fixed situation, and quotations in some instances have been changed within three days.

One retailer from the West happened to come in contact with a representative who covers the city in which he resides. The meeting place was only a couple of hundred miles from his native city, and the shoeman grew interested in what he learned from the traveler on the gravity of the situation and the rather forbidding outlook for supplies of raw material. He was advised to buy several dozen pairs of high cut colored shoes for immediate delivery.

Rather reluctantly he placed the order, being much inclined to wait until the traveler reached the city in which he resided. This was on a Tuesday and, when the retailer and the traveler both landed in the centre where the merchant does business on the following Friday, the former found on going to the sample room to book a few more cases of certain lines that he had already done, that the price had gone up twenty-five cents per pair. He is now congratulating himself that he had the foresight to cover part of requirements when away from home and only wishes that he had been more liberal in his bookings. This instance only illustrates the uncertainty regarding prices.

## The Ethics of Help Problem

The retailer must increase his gross profits and get more for his shoes, not only owing to the excessive cost of leather and everything else which enters into the make up of a boot, but there are other calls which are daily being brought closer home to him. He has to face a serious situation if any of his clerks enlist for overseas service, as a great many retail salesmen have and are joining the colors in defence of King and country. Owing to the dearth of help salaries are going up and there is in many Canadian cities an entire absence of available shoe salesmen. The *SHOE AND LEATHER JOURNAL* has received a number of letters during the past few days from retailers in different parts of the Dominion, asking where they can obtain the services of a good reliable clerk and stating they have advertised and met with no response. There is probably not a shoe clerk in any city, with any selling ability whatever who is out of employment, according to reports received, and one regrettable feature is that certain shoe houses are starting to entice the help of other shoemen in the same towns or cities to come over with them, making flattering inducements in the way of liberal remuneration and shorter hours.

Of course, this practice is carried on in other lines of trade as well, but there are ethics governing the shoe trade which are well voiced by a leading retailer who thus writes the *SHOE AND LEATHER JOURNAL*.

"I pay good wages to my men," he declares, "and endeavor to promote their interests in every way. But I have some regard for the other merchants in the shoe line in my city, knowing that they are up against the very same diffi-

culties at the present time as I am. I have never directly or indirectly made overtures to a salesman employed by another retailer in my city as I do not wish to do him harm, knowing that while I may steal away his best clerk tomorrow he may turn around and do the same with me. Such a practice is one at which two can play. If a salesman has resigned from another store in the city or is discharged, if he comes to me I will, in that case, give him every consideration, but not otherwise.

"I do not believe in the undermining process and only negotiate with those in my own burg who are free to enter my employ. How do I secure sufficient assistance you may ask. Well, I generally advertise in the papers in another city and that has in times past brought me the right kind of a man. I believe in friendship and the golden rule—if a clerk leaves me to enter employment in another place and I think he is not worth retaining or giving an increase—I allow him to depart. A change adds to his experience and insight, and others who have come from outside places here broaden out. Some men taken from country towns have rounded into shape and are now the most efficient fellows I have on the staff."

## Maintain Standards at all Costs

But this is a digression and quite apart from the increased cost of shoes. Now is the time for the retail dealer to realize that he must get more for his goods and accept present conditions as inevitable. It is no pleasure for manufacturers to raise prices from thirty to fifty and even sixty cents per pair they are up against a world-wide state of affairs occasioned largely by the war and over which they have no control.

One large firm has issued the following advice to the retail trade: "The leather market is not standing still, but on the contrary its advances are showing extraordinary activity and replacements are likely to be far in advance of quotations now prevailing. As manufacturers we can only accept conditions, meet the problem squarely and make our customers' interests our own. We believe that the intelligent buying public is acquainted with the situation and that it is not necessary to go into details as to increases in upper leathers, soles, sheepskins and the like. We further believe that the trade is looking for a maintenance of standards, rather than the substitution of shoddy materials or doubtful expedients and is disposed to follow the market rather than fight it. Our customers can rest assured that duplicates or original orders will be figured on the lowest margin of profit consistent with good work and good business, and that we are anxious for their confidence and their patronage."

## Face to Face with Conditions

Another maker, whose name is known in every town and city in the Dominion, reviewing the critical predicament, says in part: "Never in our history have we been faced with a situation such as the present. The controlling causes are so numerous and the problem so complex that any attempt to effect a satisfactory resolution would be practically futile. No manufacturer to-day can produce shoes bought on the market now at nearly the same price as he

did last year. We have fought tooth and nail to keep prices at a low level and you can count upon us continuing that fight. We sacrificed more profit this season than the previous season and, even continuing to do so, we are faced with the alternative of making shoes according to our high standard of quality and charging more for these shoes, or of using so-called substitutes and cheaper materials to lessen the cost of manufacture, permitting us to sell at the same prices as heretofore. It would be an insult to your intelligence to ask you which we shall do."

The following table, which recently appeared in the "Shoeman" shows the gross profit percentage figured on the selling price. All computation of profits, the best authorities agree, should be on the selling price (which is the money actually received) for every ratio of expense is based on the cash in the till. The entire receipts form a basis for gauging percentages in doing business, therefore figure your profits on selling price.

"I believe that shoe profits, because of competition or because of our unwarranted fear of each other, and our

failure to get together, are entirely too small to allow even a safe margin of profit for doing business and making a net profit on the investment. My personal opinion is that the standard of retail profits should be 35 per cent. for staples; 40 per cent. at least for semi-staples or shoes which we have reason to believe will not last any longer than one season—and 50 per cent. on all novelties. In cases of extreme novelties, larger profit should be exacted.

"This, I believe, to be the first step toward new conditions. First of all in the interests of the consumer herself—because I believe that the woman who buys a plain staple boot season after season is entitled to buy that boot at a fairly low margin of profit, and that she should not be burdened by carrying part of the load or loss of profit caused by closing out of semi-staples and novelties, and the profit should be arranged so that the consumers of novelties should themselves stand the depreciation," declares a leading authority.

A retailer from the East writes: "I have read with in-

(Continued on page 34)

**Handy Table Showing GROSS PROFIT PERCENTAGE Figured on SELLING PRICE**

	\$2.00	2.50	3.00	3.25	3.50	4.00	4.50		5.00	5.50	6.00	6.50	7.00	7.50	8.00

2.75						.31	.38	4.35				.33	.38	.42	.46
2.85						.28	.36	4.50					.36	.40	.44
3.00						.25	.33	4.60					.34	.39	.42
3.15							.30	4.85					.31	.35	.39
3.25							.25	5.00						.33	.37

(Clip out the above table and keep it at hand for ready reference)

Explanation.—The two columns of figures marked "\*" running down the left-hand side and also down the centre of the table show wholesale prices. The column running across the top shows retail prices at which the dealer sells to the consumer. All the other figures show

percentage of gross profit figured on retail prices—which is the correct method in shoe retailing.

Thus, if the dealer pays \$2.60 for shoes and sells them for \$4, the table shows that the gross profit is 35 per cent. which is not too large nowadays.

# How the Jobber Has Grown

An Outline of the Rise and Development of the Wholesale Trade in Canada—Less Than Forty Years Since the Business Started

**F**ORTY years ago there were no wholesale dealers in shoes apart from the shoe manufacturers, and precious few of the latter in the country. Every manufacturer sold his own product and few travelers were employed, the retailer coming to the city periodically to buy goods. For that matter, apart from the cities and larger towns there were no regular shoe stores, the country store carrying as they do today in the smaller places, full lines of supplies of all kinds. Shoemakers were busy men in those days and made the bulk of the high class shoes worn at least by men.

In Toronto the jobbing business did not start until about 1880, when some of the manufacturers began carrying a few cheaper lines made in the east. It was about 1882 that the first purely jobbing establishment was opened in Toronto by the late L. J. Beemer, on the north side of Front street between Yonge and Scott streets. Mr. Beemer had been doing a small wholesale and retail business at Brantford, Ont., and seeing the advantages of Toronto as a distributing centre he removed to that city. The firm was succeeded by Garside, McKellar & Dallas. In the meantime Orr, Harvey & Co. had been established in Hamilton, Ont., and shortly after the death of the late John Orr the concern removed to Toronto also, which began about 1890 to develop as a great wholesaling centre. The shoe factories began buying shoes in the east, especially staples which on account of the high labor costs at the time in Ontario could be made more cheaply in Quebec. About 1889 there was a strike in Toronto, which resulted in higher wages for shoemakers and, as a result, a good many manufacturers were compelled to reduce their output and buy in the east. Since 1890 the great development in shoe jobbing has taken place.

In place of one establishment in Toronto in 1885 there are now a dozen, big and large, with another dozen scattered about at Hamilton, London, Belleville, St. Catharines, Kingston and other points. In the meantime manufacturing has grown apace and this has limited to no little extent the field of the jobbers, as a great many factories go direct to the retail trade with their lines. By the way, the tremendous development of the shoe trade is seen from the fact that in Toronto in 1880 there were just fifteen shoe stores, while the directory for 1916 shows one hundred and seventy-three shops. Of the original list only two are still in business—H. & C. Blachford and E. Dack, which is now Dack & Son.

In Montreal and the Province of Quebec the same changes may be noticed, although there has

not been the development in shoe jobbing that there has been in Ontario. Thirty years ago there was practically only one jobbing house, that of James Leggat on McGill street, who jobbed rubbers principally, and was considered the largest in Canada at the time. He became very successful, adding leather lines, and afterwards removing to Craig street. Following some years of prosperity the business dwindled and finally "petered out."

It was in 1889 that James Robinson, who had been representing Bresse of Quebec, on the road, began jobbing in a small way in Montreal on Park avenue. From the very outset the idea took hold and "Jim" Robinson was forced again and again to pull down partitions and enlarge his stock. He finally removed to McGill street near the old stand of Jas. Leggat, whose business seemed to drift to the new and more vigorous concern. From that out Jas. Robinson has had the field pretty much to himself, although there are a few other concerns wholesaling footwear in the Metropolis.

In the Maritimes the development has been about the same. J. M. Humphrey & Co. were the first in the field and they were followed by Waterbury & Rising of St. John, and these with the branches of Quebec houses hold most of the trade today. The convenience of distributing centres in the eastern provinces is obvious.

In the Maritimes the development has been naturally. Shoe manufacturing has not developed to any great extent west of the great lakes and this makes for the utmost usefulness of wholesale distributing facilities. In Winnipeg, Brandon, Calgary, Edmonton, Vancouver and Victoria are some of the most alert and up-to-date shoe jobbing organizations in the country. There may come a time when cities like Winnipeg, Calgary and other large western centres, may develop manufacturing on a scale that will enable them to compete with eastern productions, but in the meantime the retail trade look upon the jobber rather than the manufacturer to keep them supplied with their requirements in footwear of all kinds.

Hamilton, which puts its best foot foremost in this issue, is an example of the development of the wholesaling end of the shoe business in the past quarter of a century. Its situation eminently qualifies it for the purpose, it being practically the hub of the western peninsula. For its size Hamilton far outshines Toronto in this respect in the number and character of its shoe houses as evidenced by its showing in this present number. It has never been without aggressive representation in both the manufacture and distribution of shoes.

# MODEL NEW HOME OF WESTERN SHOE FIRM

Winnipeg House Moves Into Attractive and Inviting Quarters on Portage Avenue  
—All the Latest Conveniences and Display Facilities Adopted—The Best Class of  
Fine Foot Toggery Carried and All Seasonable Novelties—Good Color Scheme

FOR distinctive decoration, attractive fixtures and general display facilities, the new home of the Ryan-Devlin Shoe Co. Ltd., in the Paris Block, 255 Portage Ave., Winnipeg, stands out pre-eminently. In appointments and service it constitutes the last achievement in the history of this widely known shoe firm, which dates its

W. T. Devlin, Winnipeg

birth from 1874, being started by that pioneer, Thos. Ryan, who is now a veteran in the wholesale ranks. Mr. Devlin began his career in the footwear arena in the spring of 1883, entering the employ of A. G. Morgan. He left this firm the next fall to go with Thos. Ryan. Three years later he became identified with the Hudson's Bay Co., and was made buyer in 1895. Fifteen years ago Mr. Devlin bought

out his former employer, A. G. Morgan, and conducted the business until 1898, when he amalgamated with the Geo. Ryan Shoe Co. In the previous year, the latter concern had acquired the shoe business launched by Thos. Ryan, and thus the Ryan-Devlin Shoe Co. Ltd., dealers in high-grade boots and shoes, was established.

Their old store at 494 Main St., which they occupied for eight years, was a neat and inviting one, but the new home of the company expresses the last word in up-to-date metropolitan boot shops. On the one side are the ladies', misses' and children's lines, and on the other side the men's, boys' and youths'. At the rear is a wrapping desk, and cashier's desk, and also the general offices. The fixtures, the chairs, which are placed at either side affording a passage way, and the footstools are all made of birch, with mahogany stain, and trimmed with white, giving them a pleasing touch. There is a mezzanine floor around three sides above which reserve stock is kept. The cartons are made of cream colored paper to fit the fixtures, and on the floor is a green cork linoleum. There are several full length plate glass mirrors in either wall. The lights are all in holophane bowls, making the store as light as day at all times, while the color scheme throughout is artistic and impressive. The firm have always catered to the fine trade in Winnipeg, and now that so much attention is being paid to novelty footwear, particularly by the ladies, they are going into pleasing patterns and charming creations rather extensively. The house, of course, does not overlook the more staple ranges, for the middle class trade, and in their new, splendidly laid out and imposing quarters on Portage Avenue, an illustration of which appears on this page, they have every confidence that their business will reach even larger proportions than it has in the past.

*THE imposing and admirably arranged new quarters of the Ryan-Devlin Shoe Co. on Portage Ave., Winnipeg. The fixtures, lighting and other features are in excellent taste.*

# ONE HUNDRED PER CENT. PROFIT FOR YOU

By Establishing an Orthopedic and Foot Toilet Department—The Advertising Value of Such a Branch and What the Shoe House Can Do for the Customer—The Enterprising Dealer Should Fully Realize the Great Future in this Line

By Dr. C. VERMILYEA

**T**HE orthopedic department of the modern shoe store is as the "apple of his eye" to the live dealer. Here it is that he makes around one hundred per cent. profit. More important even than the profit is the service that corrects foot ailments and thus establishes a "human interest" factor of untold benefit to his business.

In perhaps seventy-five per cent. of the sales made in a shoe store, the customer complains of some foot ailment and warns the salesman to "be careful of that corn" or other sore spot. Right here is where the man who is up to snuff will introduce the subject of foot remedies and appliances for the relief of the particular ailment complained of. Nine times out of ten he will make an easy sale of hundred per cent. profit goods, and at the same time will create a booster for himself and the store. If shoe store managers would cultivate this trade by giving a small commission to their salesmen on these sales and by encouraging them to take an interest in acquiring more knowledge of fitting arch supports and appliances, as well as in fitting shoes, they would be surprised at the increase of revenue and confidence in their store.

It must be remembered that an arch support or other appliance requires just as careful fitting as the shoe. I have known dealers to sell a child's arch support for the use of a man weighing well over two hundred pounds and on the other hand have found a large man's size put in the shoe of a small woman. These are extremes but too much emphasis cannot be laid upon the importance of fitting these appliances carefully. It is a very simple matter to acquire the knowledge of the general formation of the bones of the foot. With this knowledge any clerk may readily become efficient in correcting most troubles that occur in the human foot by simply fitting a device that will put the bone structure back into its normal position.

Educate your customers into making the toilet of the feet each day as carefully as they make the toilet of the face or rest of the body. Of much more real importance is the toilet of the feet, than of any other part of the anatomy. Proper foot soap, foot powders, foot ointments, etc., enter into the making of this toilet of the feet and herein lie great opportunities for the development of sales that may individually be small but they will be regular. When you have succeeded in converting her to this toilet, what woman is there who will not talk of it to her friends and send them to you to purchase supplies. These supplies are needed about six times for every once they need a pair of shoes. Do you not recognize the advertising possibilities of an orthopedic and foot toilet department? The regular calling at your store every week or ten days for these toilet requisites brings to the patron's attention every new line of shoes you have. In many cases to see is to want and to want is to buy. In other words, a department of this kind can be made a lever to bring buyers right into the store every week or ten days and in many cases oftener.

Do not think for a moment that the careful daily toilet of the feet is an extreme. It is not. The sooner you educate your trade to this method the sooner you will be free from the troubles of fitting deformed and abnormal feet. In fact right to-day there are many people who are taking the proper precautions in foot toilet. It is indeed remarkable the interest that is created in the average shoe store by a nicely arranged display of these articles, and more notable yet is the volume of sales that will be made by this

display when in charge of an intelligent salesman who has taken the trouble to post himself upon the various merits of the different articles shown.

The time is not far distant when the better class shoe house in the city will employ a fully qualified Doctor of Orthopedics. In the meantime opportunity stares the live dealer in the face, in the shape of an orthopedic department with a good sharp salesman in charge. With ordinary ability and application the average shoe clerk will easily fit himself (if not already competent) to relieve most cases

## Your Everyday Shoes

Spring work will soon begin on the farm and we are ready to supply the farmers with the best Working Shoes made in Canada. Every pair of working shoes we sell is made of solid leather—no shoddy whatever.

Every pair of Working Shoes we sell is made over full fitting lasts to give you solid comfort. The leathers are Chrome Calf, English Kip, Urus Calf, Canadian Kip, Grain Calf and Elk skin. Having bought our Working Shoes, before the advance our customers get the benefit in lower prices.

We mention a few of our Special values:

Men's solid leather working shoes in cowhide leather with plain vamps and large eyelets for \$2.50 a pair.

Men's solid leather working shoes in cowhide leather with toe caps and waterproof soles for \$2.75 a pair.

Men's Tan Grain working Shoes with toe caps and waterproof soles, like cut, for \$3.00 a pair.

Men's Urus Calf working shoes with plain vamps and large eyelets, a shoe that will keep soft and turn the wet, for \$3.50 a pair.

Men's Urus Calf working shoes with plain vamps and waterproof soles, sewed by the Goodyear Welt process, for \$4.50 a pair.

We invite you to call and see our stock of dependable shoes. You will find our assortment larger than most stores carry and our values the best at all times.

of foot troubles through the medium of properly fitted appliances and remedies now on the market, and easily obtainable by every dealer.

How often do you sell a pair of fifteen or twenty-five cent ankle supports for weak ankles? The great majority of these cases will get much better results from a two dollar pair of arch supports and should also use a good foot ointment, as a massage cream, morning and evening. Why not get the two dollars and a half instead of fifteen cents? In weak ankles the bones of the arch of the foot have crowded down out of place which causes the astragalus and os calcis (ankle and heel bones) to rotate, thus turning the ankle. The arch support will hold the arch of the foot in proper position and thus correct the trouble without the use of a hot ankle support that only causes the muscles to become weaker still and thus aggravate the trouble.

### DON'T GET "LOADED UP" IN BUYING

"Yes, I am doing a pretty fair business, but the past few months have been rather trying on me in a financial way," remarked an eastern shoe dealer the other day. "The reason I have been encountering so many monetary difficulties is that I allowed myself to get loaded up with unsaleable stock, and all through trying to be a good fellow.

### An Announcement— An Appreciation— and your invitation to attend

#### The Announcement—

The formal opening of a most modern Boot Shop—the Vancouver home of those justly famous Walk-Over Shoes. Come tomorrow; there will be souvenirs, and music, and much to interest you. Our good neighbors, Mason & Risch, have arranged an excellent programme of music by famous artists on the very newest Victor Victrola.

#### An Appreciation—

This new—and very modern—shop marks an era in the progress of this business, which has been steadily growing in the favor of thousands the past seven or more years because of the goodness of its merchandise, and the conscientious efforts to serve.

This new store is the appreciation of the liberal response the buying public has given during these years—it will serve in an advanced way in the days to come—as the old store has done—serve more efficiently wherever it is possible.

#### And your Invitation to Attend—

Tomorrow, March second, is the day, and you are most cordially invited. You will be interested, and be entertained, and go away with a better idea of good shoes, good store service—and with an optimistic view of your city's future.

Come to our opening—2:30 to 5:30 in the afternoon and 7 to 9 in the evening.

**WALK-OVER**

**MENS SHOES**

**The Spring Exhibit of Walk-Over Shoes**

Reflects the very latest in bootdom

THIS SHOP SHOWS THE NEW TRINGS simultaneously with all the Walk-Over shops throughout the East.

THE STYLES ARE AUTHORITYTIVELY CORRECT, the shoes are good—good in every way—the makers are conscientious in their efforts to serve you.

THERE ARE SHOES HERE TO MEET PRACTICALLY every requirement of all men and women, and priced to please as well.

THE NAME WALK-OVER HAS COME TO MEAN SHOE SATISFACTION as well as smart style. And this Walk-Over Boot Shop, with its specialized fitting service and generous stocks, will fully meet all your requirements.

AN ARTISTIC AND WELL DISPLAYED ADVERTISEMENT OF WIDELY KNOWN VANCOUVER FIRM ON THE OPENING OF AN ATTRACTIVE NEW HOME.

You know it is a pleasing reputation to have among your friends, being called a decent, obliging chap, but when such qualities are enjoyed at the expense of your pocketbook and your business turnover, then the appellation does not sound quite so alluring.

"It all came about in this way. I have a relative who is sales manager for a large Quebec firm. Of course, I have favored the 'A' line right along and pushed their goods. I got average value and fair service, but the trouble is I was loaded up in many lines and lasts and styles that were not

exactly to my liking or those of my customers, and I had to sacrifice my profit on such goods. Frequently I would be rung up by telephone and the sales manager would say—'Billy, we have four dozen pairs here in women's patent bal, black cloth top, or women's button in midnight blue kid, or a high cut dull calf gypsy, or a women's turn sandal, glazed kid pump, or something else that would be fairly saleable at the time. Now, the terms of this house are two per cent. ten days the month following shipment, or net sixty. Persons ordering 800 pairs a year or upwards receive an extra discount of five per cent, and I was one on the list.

"As I told you, I would be rung up and asked if I could not take these goods off their hands. They had not been shipped for the reason perhaps that a certain retailer had changed his mind, or his credit, upon investigation, did not happen to be up to the mark, or he had cancelled his order after the stock was cut, or for some other cause. The shoes were guaranteed being right up to the mark, without fault of any kind, and I would be quoted a price from 25 to 50 cents a pair less than I paid for my regular shipments on similar goods.

"While the reduction looked big, when one came to figure it out, the discount was not so great after all. A shoe that cost \$2.79 on my special terms I would get for \$2.65 and this overture of \$2.65 would sound big. In reality, considering that they were often a little out of season when they reached me, the few cents extra cut amounted to nothing. I would frequently have to sacrifice my profit, so that instead of getting \$4.00 and \$4.50 out of the line, I could get only \$3.50, and in some cases only \$3.00, thus missing the sale of a real up-to-date pair at a larger profit.

"I could go into this matter very deeply, and I may tell you that no pull or relative or friendship or other consideration will count in my buying problem after this. I am going to buy when I like and where I like, and what I like, and I will not get loaded up either. If you had gone through what I have during the past few weeks, you would sympathize with me. I believe in the motto 'keep your stock and yourself well in hand,' and by the latter I mean your buying propensities."

### RATS AND ——— IN HIS CELLAR

A good story is being told of a western shoeman who likes a "nip" now and then. Outwardly he walks the straight and narrow path, but inwardly, he likes a little spirituous refreshment at times, although it must be admitted that he is very temperate. His wife is bitterly antagonistic to anything in the shape of firewater, and would not allow it under the roof if she knew of its presence. However, the retailer and his wife manage to get on very well together for, on the other hand, she has a weakness, and that is a terror of rats and mice, with which she came in contact a few years ago. In fact, the prohibitionist housewife will not enter the cellar, even in broad daylight. An eastern traveler dropped in to see this gentleman the other day and, after a decidedly friendly chat, the footwear merchant, growing confidential, remarked that he was pretty dry and invited the salesman down cellar to have a "smile."

When in the basement, the dealer whispered to the drummer: "You see, I keep a little downstairs here on the sly. If my wife knew it though, she would throw out every bottle."

After the twain had slaked their thirst and smacked their lips the commercial man remarked to his friend—"What are all those rat-traps around here for? Is your house infested with rats?"

"Hist," breathed the shoeman, "no, there are no rats or mice here now. You see it is just like this—the 'missis' is scared to death of them and as long as the traps are here she thinks there are rodents about. There is no danger of her coming down to see what I have in this corner or to disturb me on my visits to this inspirational spot."

## DO YOUR WINDOWS WARRANT GOOD TIMES

Remember That Effective Displays Require Infinite Care and Forethought and Every Effort on Improving Them Will Pay Twofold—Number of Customers Pulled From the Sidewalk Should Awaken Retailers to the Importance of Striking Trims

“RATHER quiet,”—“Moderate,”—“Could be better,”—“Fair”—and so on. Inter-mixed with these answers to queries as to business conditions, it must be admitted in mitigation that some answered in the negative.

It is often puzzling to many that such a diversion of conditions should exist in the same district. This caused me to wonder if the reason for the gloomy atmosphere created by some reputed live retailers might not be apparent, so in company with a friend I devoted a little time in “weighing up” the different window displays of our contemporaries. My companion, I may add, is considered no “slouch” in the retail line, and manages a “live” store in Toronto. We thought we were not too old to learn and might profit by the experience. We commenced our little excursion in window criticism “somewhere on Yonge St.,” as the censor would say, the recognized business centre of the city and abounding in shoe stores, big and small. Our number one was certainly promising, a smart store with a unique designed double front, shoes well displayed, not too heavy and plainly price ticketed.

“Don’t you think those display stands are too elegant or prominent?” said Tom (we will call him).

“How so?” I must admit I failed to see his point.

“I may be wrong or too anxious to find fault,” said he, “but a less attractive affair would give the goods a better chance. Remember they are selling shoes not window fittings.” Nothing featured—they all look alike. Turning north we came to one of our hard-time friend’s locations. Hard times, little wonder, with a display like that. “That fellow missed his calling,” said my companion. “He should have been a sardine packer.” Every shoe

looked alike, nothing featured, good taste—ugh. It was as if an attempt had been made at barricade building.

Not far away we came across another “warehouse in the window” affair, just as solid as the C.P.R. building. “These fellows are trying to tell the public how many shoes they have, instead of how good, stylish and reasonable their lines are.” Passing several old timers, who rely chiefly on old established reputations and prestige, and whose displays were extremely light and classy, Tom remarked that apparently they were satisfied, although he failed to see what harm a few artistic message cards and price tickets would do.

It is a well seasoned truism that the merchant, who is in business to stay, is the one who values a good display policy. The real successful shoeman’s ideas of good window displays are usually a fitting memorial to his business acumen. The merchant on the one hand who convinces the public with the plain matter of fact nature of his goods, is in pleasing contrast to the mortal that fills his windows any old way and trusts to luck.

### Life and Soul of the Interior

Windows are the sparking plugs of a store, the life and soul of the policy of the interior. Make your displays look like ripe fruit ready for picking, as one merchant put it. Always remember that good displays require infinite care and forethought, and other time besides the morning of window trimming. Every minute spent on improving them will pay you two-fold. Attention to light—clear glass—little messages on novelties or out of the ordinary goods, give your prospective customers a good impression. Many merchants do not realise the fact, but the number of customers pulled from the side walk should awaken them to the importance of good displays. The fault does not always lie with the actual trimmer. Some employers think good

**T**HE Ontario Division Footwear Salesmen of the Canadian Consolidated Rubber Co. met in Berlin recently and this is a picture of the group. Among them may be noticed Vice-President and General Manager T. H. Rieder, General Sales Manager R. E. Jamieson, J. A. Connor, Ontario Manager, R. W. Ashcroft, New York, and A. Dwyer, Montreal.

displays should only require the waving of a magic wand and there you are.

### Every Shoe Looked Its Part

Turning east we came to a store away from the beaten track, making a specialty of repairing. Here we found, to our mutual opinion, one of the best displays encountered during the whole tour. Every shoe looked its part, and had been "got ready" with care. Doubtless the trimmer res-

possible knew his business. Every shoe showed the proper lines of cut and design, just as if the foot intended was in it—a strong convincing display, effective and clean-cut without frills or furbelows either. I believe this store is selling sufficient men's good shoes to make some of our more prominent friends envious.

Time would not allow further reconnoitering, so being hungry, we adjourned to a restaurant, feeling none the worse for our interesting trip connected with the importance of window displays.

## REPAIR DEPARTMENT PROFITS PAY THE RENT

**This Branch, if Given Proper Publicity by the Retailer, Will Bring New Customers to the Store for Small Purchases—The Logical Place to Get Shoes Repaired is in the Shop Where They Were Bought—Extra Profits that the Dealer May Secure**

**I**N spite of the evidence of their eyes and the bookkeeping of successful business houses, many shoe stores persist in saying it does not pay to conduct a repair department. Read the advertisement reproduced below and then try to justify that stand. This classified ad appeared in a Chicago newspaper recently. "Repair Department profits pay rent of store." How is your rent being paid? Doubtless from the profits on regular shoe stock. If so, just put on your thinking cap and consider the matter, says "Shoe Findings."

If a shop in Wellington, Kan., can pay the rent through the profits on its repair department, a shop in your city can do likewise. If not, why not? Usually why not can be answered quickly after an examination of the methods used in the store. If it is an old-fashioned sort of shoe store, clinging to the old lines because they have paid for so many years, a repair department may not be a success because the same old-style ideas would be incorporated in that department. It must be pushed to bring in business and when people are taught that their shoe store will repair old shoes, they will not go elsewhere.

### SHOE BUSINESS—EXCLUSIVE RETAIL—

For Sale—Doing \$35,000 yearly; repair department profits pays rent of store; stock clean and well divided; invoice about \$12,000; wish to retire; grand opportunity to step into well established business; NO TRADES; if you have the cash and want particulars address Box 295, Wellington, Kan.

### Hidden Stocks Seldom Sell

The shoe store is the logical place for repairing. If a man buys a pair of shoes, he should go to the same place when he wants the heels straightened or half-soles put on, but does he? He does not; simply because most shoe stores do not run such a department and many of those that do, put it out of sight and fail to take the public into their confidence. The ostrich is said to believe that when it hides its head it cannot be seen, but the shoe man seems to feel that he can hide his repair department and still have the public know it is there and rush to use it, otherwise—it does not pay.

Progressiveness in any line of endeavor is the only thing that makes the business pay. The methods that were followed twenty years ago with success will have no weight to-day. Everybody remembers the bottles of red, blue and green that always designated the druggists' window, the Indian that showed where cigars might be bought and the striped pole that led men to the barber, but how many such ornaments does one see to-day? Very few, indeed. They have been outgrown.

So with the shoe trade. Just because it has run at a profit with shoes alone is no indication that it would not do equally as well and better if a shoe repair department were installed. The repair department, if given proper publicity would bring new customers to the store for small purchases, who would see shoes and slippers of types that appealed to them, so even if no immediate sale was made, these same people would return when they wanted to buy footwear.

Contrariwise, shoe customers, on learning that they could have old shoes mended, would not bother to go out of their way to the repair shop, but would leave them to be delivered or to be called for on the next visit.

### One Hundred Million Dollars a Year

Last year \$100,000,000 was spent on shoe repairing alone, and this year may find that amount exceeded. The shoe merchant has as good a right to receive some of this money as anybody else. No other branch of the industry has made such rapid strides as repairing and no branch is less understood by the average retailer. The excellent machinery now available makes the actual work a simple matter, and with the brains of a good business man behind the department it should "bring home the bacon."

Repairing is a staple industry, not one of the fly-by-night businesses that are only the fad of a moment. Every man, woman or child at some time must have his shoes mended, or at least have heels straightened and rips sewed up, and the man whom they know is prepared to fulfil their requirements is the man to whom they go. If your shoe store, where you are accustomed to buy shoes which fit and are comfortable, advertises that it will also repair old shoes, the logical thing to do is to bring those old shoes to the place where they find new ones which give satisfaction. The sooner the retailer takes advantage of this fact the sooner he will begin to pay his rent from the profits of the repair department. All the urging in all the trade journals in the world will not avail to bring these extra profits to the store unless the merchant will take the advice and try it out for himself. Stop marking time.

### Bring Your Lines to the Front

If those who have tried repair departments and found they brought in no profits, would look back and earnestly try to find out why, nine times out of ten they would find that the idea was not impressed on customers that old shoes would be mended. "If you would like the heels of your old shoes straightened, leave them with us," would be very easy for the clerk to say when selling new shoes and would impress on the customer that the store was ready to do his repairing. Soon the department would double its business.

# Stray Shots From Solomon

If the world is all askew, and everything is going to the bow-wows at home, in the office or at the store, don't waste time telling your troubles.

Don't take them to the church or even to the Lord, but take a **YOU NEED MEDICINE** grain or so of calomel, and follow it next morning with a seidlitz powder. It is astonishing what a turn family prayers will take, and how a man's religious experiences will brighten when he surprises his liver with a shot like that. What most people need when they are what the boys call "grouchy" or "out of sorts" is not scolding or coddling, not preaching or prayer, but good vigorous allopathic treatment that will get to the spot in a whack. How a man can grow in grace and harbor a bad liver would puzzle an angel. The reason why we have so many cross-grained Christians and blue-goggled business men is that their physical apparatus is out of kilter. After all religion should reach the body as well as the soul, and the law of God written upon the liver should command just as much respect as that written upon the "fleshy tables of the heart." Better than physics is exercise, and we fear that all work and no play, of an invigorating character at least, is at the bottom of many of the commercial as well as physical breakdowns that are so common. Get after that old leathery liver of yours, old top, and your help as well as your church associates will prick up their ears, and think that the spring has brought you something worth while. After all, whether life is worth living depends upon the "liver."

o o o o

The man who must be a big toad in the puddle or he "won't play" is invariably a little pollywog, who is all splash and noise. Much harm is done

many a good cause by the little **SWELLED TADPOLES** fellows, whose exaggerated ideas of their own importance lead them to stir up trouble. The

world is impartial in its judgment, and the man who fills his sphere will find it expand as he occupies it. There is no need for swelling yourself up, and seeking to impress people with your size. They know how much is gas and how much is corpuscle. "Do you see that important looking fellow fussing about the platform," said a gentleman the other day in a meeting. "If you stuck a pin into him he would burst." There are plenty like him, not real bull paddies, but swelled tadpoles. Fill your own place, however humble, and you will have the respect of the world, and best of all your own. When the "books" are made up in the "great day" there will be a story that will transcend all the history or fiction ever written. We shall then know the names of the men or perchance the women who "held the ropes" that night in Damascus, "when Paul of Tarsus was let down in a basket by the wall"

and kept for a needy world. The unsung heroes of earth's mighty conflicts will shine forth with a glory the lustre of which will not be enhanced by human partiality or dimmed by earthly prejudice. Act well your part. "Hold the ropes" if you cannot fill the basket. Push behind it if you cannot pull in front. Work if you cannot plan. Follow if you cannot lead. Take your place with the crowd if you cannot be on the platform.

o o o c

"Out of the abundance of the heart the mouth speaketh," but out of the emptiness of the mind, nine times out of ten the jaw waggeth. A full head

means a closed mouth. Put that **KEEP QUIET** down. It is the shallow brook that babbles most; it is the empty wagon that makes the greatest

clatter. The people who are most anxious to hear their own voices are those who don't know what they are talking about. It is usually the most difficult thing to get men with a comprehensive knowledge of a subject to express their views. Those who have spent a lifetime studying and thinking are very chary of talking. On the other hand, the less some people know the more ready they are to blab. It is easy in a meeting to tell the scatter brain from his readiness to "chip in." The "wise man keepeth it till afterward." A good story is told of the great Scotch preacher, John McNeil. He was delivering a sermon on the taking of Jericho. In his usual graphic style he described the historic tactics of Joshua and the host of Israel as they marched round the walled city day by day in solemn silence. The preacher painted a most thrilling picture of the great army and its daily round and as he closed the account of the first day's peregrinations and led the weary people back to the camp, an enthusiastic member of the congregation expressed his satisfaction by a lusty "Praise the Lord!" Mr. McNeil paused, and in his comical way looked down at the interrupter. He proceeded once more with the description, and at the end of the second day the outburst came again in a "Hallelujah!" that could be heard all over the house. The preacher turned square upon the noisy fellow and stood looking at him for about ten seconds. At the end of the third 'day' came another ejaculation, and McNeil, leaning far over the pulpit, thundered in broadest Scotch: "Mon, dae ye no ken there was to be nae shoutin' till the laist roond!" People who "go off" on the slightest provocation are generally three-quarters gas and one-quarter conceit. "With the lowly is wisdom."

*Solomon*

## MUST RAISE THEIR PRICES TO GET FAIR PROFITS

(Continued from page 25)

terest your articles on rising costs in your splendid autumn styles number. I assure you they had much educational value for me, I did not realize until now that the shoe manufacturer's position was so precarious or that he was up against such trying conditions in shortage of supplies and sharp advances. I desire to extend my thanks for the able manner in which you have so clearly explained conditions. I intend to boost my prices and I appreciate the work you are doing in making public the facts as they really are. I am now fully convinced of the necessity of facing the future squarely and keeping up the quality of my lines, and selling at fair living margin no matter what others here may do."

Much data could be given other than that already published, how prices are still sky-larking in everything that enters into the construction of a shoe. Market quotations and percentages of increases in tabular form make dry reading to the average man. The main thing for the trade is to be awake to price advances. President McGowin of the National Shoe Retailers' Association, says that anybody who cannot make a ten per cent. net profit out of his business, ought to get out of it, and he is surely a good authority. The results are, first twenty-five per cent. for general expenses such as rent, help, lighting, taxes, freight, delivery, heat, repairs, insurance and other items, while five per cent. has to be allowed for mark downs. If ten per cent. net profit comes on top of this, the total will be forty per cent., which if made on the selling price of a shoe, means marking it up sixty-six and two-third per cent. on the cost price.

## WAR CONDITIONS AND LEATHER PRICES

In a recent interview on the scarcity of leather, L. J. Breithaupt, of the Breithaupt Leather Co., Berlin, stated that it was a question of supply and demand. "The price," he added, "has advanced considerably, due to the enormous increase in the cost of raw materials within the past year or more, especially since the imposing of the war duty of 7½ per cent on all hides imported into Canada since February of last year. The extra duty on hides and tanning materials has meant an enormous item in cost of production and manufacture of leather. Also the 7½ per cent duty on tanning materials of all sorts has made a big difference. Our own company has paid out tens of thousands of dollars in war duty alone, to say nothing of the high original costs, hides alone representing about two-thirds or more of the value of finished leather. The tanning industry is thus paying a higher war tax than probably any other line of manufacture in Canada."

Mr. Breithaupt stated that there was a scarcity of prime quality hides, and prices which are higher than ever, had doubled or trebled. Speaking of his company he said actual cost was more than at any time since its establishment in 1857. "There is and has been a great shortage of cattle." Also more leather has been used than before and more has been inevitably wasted through the great war. On the other hand probably less has been produced. This situation is to be found the world over. Enormous prices are being paid for cattle-hides, running as high as \$20 and more per hide, which was formerly the price of a cow or heifer. The prices have advanced from 40 to 50 per cent, due to a considerable extent to the war duty. Of course we get a rebate when we export, but we cannot export much now-a-days owing to the scarcity of ships, etc."

Continuing, he said: "We have to deal with cold facts and not with theories. The situation has become more

## A CITIZEN OF NO MEAN CITY

(See Front Cover)

HAMILTON is headquarters for optimists and enthusiasts. They never do anything by halves there. You never met a Hamilton man yet who did not believe his town was the brightest, fairest, most progressive and enterprising spot on the face of the whole globe. And they have reason to believe in Hamilton. Hamilton is a "sport" amongst cities and its men have proven themselves again and again "sports" not only in the athletic arena but in business.

One of the most typical Hamiltonians is "Jack" Lennox, who carries his enthusiasm clear through from yacht racing to modern footwear and from patriotic endeavor to any and everything that pertains to the welfare of Hamilton in particular and Canada in general.

In spite of business, and holding offices in a dozen or more organizations of a commercial or social character, he has the rare faculty or charm of remaining a boy in heart and in spite of the fact that for a long period he has had to get about with a stick on account of an accident, his eye is as bright and his laugh as hearty as it was twenty years ago. But he is a shoeman before everything else, having spent three-fourths of his life handling footwear. He is practically the oldest wholesale shoe buyer in Canada, visiting Quebec in 1875 in the interests of T. C. Kerr & Co., when you could count the shoe manufacturers of the Ancient Capital on one hand.

John Lennox is a man who has not let leather smother all the better instincts and feelings of a big heart. He is at the present juncture in the very front of Hamilton's creditable efforts in patriotic work and has done more for his country in his tireless efforts to further the interests of recruiting, as well as standing back of those that have gone forth to fight for freedom's cause, than any man in his city, which is saying a good deal.

acute through Government war-orders. The Canadian Government recently let contracts for nearly 600,000 pairs of army shoes of the best quality of leather. The Russian Government also lately placed a \$15,000,000 order for leather in the States. These facts all tend to the one end—still higher values.

"The prices of shoes have, of course, advanced, and they will probably advance more; shoes being, not a luxury, but a necessity of life.

"While the price of leather is high, the product is nevertheless, comparatively speaking, one of the cheapest staples to-day. The present prices will likely be maintained for some time, even after the war. There will be a great demand in Europe where the requirements of the armies are still the first consideration to-day. The civilian population will have to be supplied. While the present prices of hides and leather are abnormal and cannot continue indefinitely there will probably be no slump for many months to come."

W. E. Woelfle, of the Woelfle Shoe Co., Berlin, remarked: "You can't exaggerate the situation. It is becoming more serious. Leather for all lines is scarce." Mr. Woelfle also pointed out that the output of factories was impeded by the lack of help, the answer to the call of King and Country being partly responsible. Asked as to whether there was a possibility of a scarcity of leather boots and shoes he stated that such a thing was possible.

**HAMILTON, CANADA**

# A Great Manufacturing and Distributing Centre

**H**AMILTON, with a population of over ninety thousand people, is situated on Burlington Bay, a magnificent land-locked harbor that is connected with Lake Ontario by the Burlington Canal. It has gained the distinction of being the industrial and creative centre of the Dominion through the enterprise and ability of its citizens, who, taking advantage of its splendid geographical position, have combined shrewd business instinct with civic co-operation, and have thereby won for the city and for its people a reputation for accomplishing big things amongst the communities of Canada.

Hamilton stands for Industrial Supremacy. It stands for more than this, however. Some of the most far-reaching movements that have influenced the national life of the Dominion have had their rise in this city of ideas. The National Policy was promulgated from Hamilton, and Farmers' Institutes had their rise here. The Canadian Club Movement was begun in Hamilton twenty years ago, and Empire Day was initiated some years thereafter.

Hamilton has been set down in the midst of "The Garden of Canada." That "garden" it may be said in passing, produces a million dollars' worth of strawberries, peaches, pears, grapes and other small fruits annually, which are shipped through this city. There is no more interesting sight anywhere than this garden in its glory of spring blossom.

The Dominion Government has taken due account of the importance of Hamilton's shipping interests by inaugurating a Board of Harbor Commissioners to direct the large expenditures to deepen and otherwise improve the harbor. Within the next few years it is likely that a million dollars will be devoted to this purpose. It may surprise some to know that Hamilton's water-going tonnage

was only surpassed by metropolitan Montreal, and that it was no less than three times greater than its nearest competitor. The choice of rail or water transportation to the entrepôts of the Western Provinces, as well as to Montreal and the east, gives Hamilton indubitable advantages over many of her sister cities.

The railways that enter and leave her borders are six in number, and these connect with all points in the Dominion as well as with the towns and cities of the United States. Its system of "feeders"—the electric railways—that radiate in all directions, carry passengers and parcels to all the neighboring places, and make it possible for the people to travel cheaply to and fro.

Some have termed Hamilton "The Birmingham of Canada" because of its industries. It may be called justly "The Pittsburgh of Canada" too, if desired. However, it needs no such titles, possessing as it does four hundred industries, great and small. Hamilton is just the "Hamilton of Canada."

No less than forty American firms have "come to Hamilton," and these represent the invested sum of over twenty millions of dollars. The sequel to this is that every such concern has prospered and has added to its plant since locating in the city.

To see Hamilton aright one must climb the "Mountain." Beneath lies a city of homes set in the midst of a great park of luxuriant trees. Further north lies the bay, then the "Beach" (Hamilton's local summering place), and further out the great blue body of Lake Ontario, over whose waters ride the steamers and freighters that ply between Hamilton and other ports.

Hamilton's streets are wide, well-paved and well-kept. Her parks are spacious and her people proud in their possession. In short, the ideal city for home or plant is this same Hamilton.

KING AND JAMES STREET, HAMILTON

## The Shoe Trade of Hamilton

**H**AMILTON has always been largely identified with the shoe and leather trades of Canada. In the early days it was quite a leather centre on account of its being at the head of the lake and thus a point of communication with the western peninsula. The Beardmore business was begun in Hamilton and afterwards removed to Toronto. Shoe manufacturing began back in the sixties, and from that time on Hamilton has made and sold its share of footwear in the province of Ontario. Associated with its shoe and leather history will at once occur to old timers, names such as John Garrett & Co., T. C. Kerr & Co., Watson, Holmes & Co., Orr, Harvey & Co., Wm. Griffith & Co., and others. In spite of the nearness of Hamilton to Toronto, it has maintained its position as one of the principal shoe centres of the Dominion, and is to-day doing more shoe business than ever it did.

### John McPherson & Co.

This business was brought to Hamilton from London in the seventies by the late John McPherson, who began business in London in the sixties in partnership with the late Ellis W. Hyman. The nucleus of the present factory in Hamilton was built in 1887, and additions have been made to it since that have entirely transformed its character and size. From the very first the John McPherson Co. made a reputation for high-class, well-made goods, which has never left them, and to-day the product of their firm enjoys the greatest popularity it has known in its history. Since the withdrawal of James A. McPherson a few years ago, the management has devolved upon Mr. W. S. Duffield, whose up-to-date business methods are largely responsible for the tremendous increase in the firm's business in the past decade or two. Their factory is one of the most thoroughly modern that can be found in the Dominion of Canada.

### John Lennox & Co.

The business of John Lennox & Co., King street east, Hamilton, was begun in 1890 by John Lennox, who had previously been in partnership with the late William Griffith in the wholesale shoe business. John Lennox began his career as an entry clerk in the wholesale house of T. C. Kerr & Co., who handled both dry goods and boots and shoes. He then took a position on the road as salesman of boots and shoes for the firm. His partnership with the late William Griffith followed shortly afterwards, and in 1890 Mr. Lennox started a business of his own in the same line. From the first he was successful and to-day is one of the most prominent shoe jobbers in Canada. Some years ago he purchased the building in which he was first employed by T. C. Kerr & Co., and on this spot has established his large wholesale shoe house. In addition to his large shoe jobbing business he specializes in trunks and bags, having one of the finest show rooms in Canada in this line.

### R. B. Griffith & Co.

R. B. Griffith & Co., who have for several years been established in wholesale shoes in Hamilton,

have developed a wide connection in their line. The late William Griffith, father of the present head of the firm, established the first jobbing business in the Ambitious City and was one of the best known shoemen in Canada a quarter of a century ago. The late Henry Griffith, of Quebec, an uncle, was one of the leading shoe manufacturers of Quebec when the *SHOE AND LEATHER JOURNAL* started in 1888. Mr. Griffith therefore comes of a family whose associations and connections have been very intimate with the shoe trade. The result is that he is thoroughly acquainted with the needs of his customers, and the best selling styles and the most satisfactory profit-makers. Mr. Griffith's business has shown a gratifying gain each year.

### J. S. Townsend, Hamilton, Ont.

J. S. Townsend, who for four or five years past has been in the wholesale shoe business in Hamilton, is a gentleman who is well known in the trade, having been for a long time on the traveling staff of the London Shoe Co. Since starting in business for himself he has met with gratifying success. In fact, the growth of his turn-over has necessitated his removing to large new premises, and he is now located at 41-45 King William street, Hamilton. Mr. Townsend, who employs a staff of alert travelers, specializes on "Crispincraft" shoes for men, and "Fairsex" for women, while his slogan is "Smart Footwear of the Better Grade for Men and Women."

# You Can Sell a Ralston Polish or Dressing with every pair of shoes

There is a Ralston Polish or Dressing for every type of shoe leather, Suede, Buck or Canvas—Black, Tan or White—for Man, Woman or Child. That is why we say you can sell a Ralston Preparation with every pair of shoes.

An ideal dressing for the sensitive leather used in the manufacture of Ladies' and Children's Shoes. Cleans quickly and imparts a beautiful polish.

Black      Midnight Blue  
Brown      White  
            Tan              Grey

An invaluable preparation for cleaning suede shoes. The increasing popularity of suede shoes for women should greatly facilitate the sale of this dressing. Made in all colors.

For all kinds of black shoes. Preserves and blacks the leather and gives a brilliant polish. Contains no acids and is absolutely non-injurious to the leather.

Ralston's  
Three  
Beauties

For whitening canvas or Buckskin shoes, and also the buck on military and police uniforms. Stock up with Ralston's White Beauty for the coming summer.

Black,  
Tan and  
White

A combination for cleaning and polishing russet or tan boots and shoes. We guarantee this polish to remove all stains from tan shoes. An easy seller.

MADE IN CANADA

Robt. Ralston & Co., HAMILTON, ONTARIO

## Children's Styles for Autumn

AS a rule there are not many changes made in children's lines, particularly in fall, but the tendency towards "frills and foibles" in adult lines this spring and summer, which is apparently passing to some extent into autumn styles, has not been without its effect upon footwear intended for those of more tender years, and more particularly those who are budding into young manhood and womanhood.

The shoes for growing girls manifest a disposition to follow misses' and young ladies' in shape and style. They are not at all faddish, however, like some of the "grown up" lines that one sees, although there is a goodly sprinkling of whites, greys, ivory, champagne, mahogany and bronze. The narrow toe is favored somewhat of the recede type, although it is not so pronounced as in women's lines. Amongst the features are longer vamps and higher heels, the average being about  $1\frac{3}{8}$  inches. Some half French heels are shown and some modified Louis Quinze in wood will be found in a very few samples but they do not seem to be serious ventures.

In materials, of course "vici" predominates in black and there is a goodly array of patent with combinations also of patent and kid or cloth tops. Tops of colored kid and patent or tan in the dark shades may be noticed.

The "sport" last will have a great call for young girls and quite a number of smart effects are seen in it. It is made from 6 to 7 inches in height in

both tan and black. Some striking combinations in colors are shown.

On the other side of the line skating was a craze last winter and it promises to be a frenzy this coming year. As a result manufacturers have excelled themselves in the array shown of skating boots for fall and winter. They are made up in a variety of combinations in both black and tan. Fancy effects are sought in straps, wing tips and so forth, and ornamentation by means of pinking and perforation is more or less common. No doubt there will be a tendency even in Canada to make skating more popular than it always is in this climate and there will be more or less effort to popularize specialties in skating boots during the coming season.

There is considerably more style to be noticed in children's footwear—even in "cacks." The lasts follow the natural foot and are kept wide, even up to young girls' and boys' sizes. In children's lines the laced shoe is most popular, almost double the number of lines being found in this style compared with the buttoned variety. Ornamentation, especially by fancy facings, vamps, foxings and toe-caps is quite a feature and in small shoes particularly combinations of white and colored kid with patent and tan are noticeable. White kid in lace patterns in cacks are quite the rage and saddle straps of contrasting shades are seen on fancy lines.

# Leather Trade Jottings

Items of Interest to Leather Producers and Users—What is Being Talked About in Leather Circles at Home and Abroad

**A** STRANGE condition of affairs obtains amongst leather men. Prices are soaring and leather men are not throwing up their hats. The situation is too serious in its general bearing to create enthusiasm amongst tanners. The trouble is to get selections at all and to keep shoe manufacturers satisfied. The jumping conditions are sending the latter from Dan to Beersheba to cover themselves for current requirements, some finding it difficult to procure enough leather of correct selection to even finish their spring orders. Conditions across the border afford no relief so that in spite of willingness to pay an increased price, with freight and duty added, adequate supplies are unprocurable. Tanners have been putting in so few hides that the production, except in a few lines, does not begin to keep pace with the demand.

## Hide Conditions

The hide market is showing a tendency to further strengthen as the season opens up. Heavy packer steers of April take off sold in Chicago this week for twenty-three cents, which shows that as soon as hide quality improves the natural demand for raw stock will put up prices materially. As predicted in our last issue, within a short time steer hides will be selling at twenty-five, and buff hides at twenty cents on the Chicago market. As the transportation becomes more precarious from South American ports conditions in dry hides are becoming more serious, and should there be further complications or more vessels taken off the route, sole leather makers will have a serious problem to face. It is no wonder that tanners who are flooded with offers to buy leather stocks ahead just now refuse absolutely to sell only on a basis of the immediate requirements of the market.

## American Conditions

The leather situation across the border is as acute almost as it is here, and prices are going up. A report of conditions in Boston says: A strong situation exists in all leathers, the shortage now being felt more than ever. Side leather is in increasing demand, those finishes imitating calf in big call and short supply. Box, gun metal and mat also find ready sale and no surplus leather can be found in dealers' hands. Calfskins are scarce to the point that prices would break all records if desirable weights and colors could be delivered as needed. No raw materials coming from abroad and tanners are still short of raw stock. Patent colt is sold as fast as japped, and tanners have orders enough for weeks ahead. Patent sides are selling well, and the trade is calling for prompt delivery. Nothing new appears in the glazed kid situation. There are no signs of an increase in

supply and the prices are firm with an upward trend. There is no let up in the demand for sheep leather from all the trades. The fancy leather trade is demanding large quantities of sheep leather and paying prices prohibitive to the shoe trade. Supplies are limited.

Calf leathers are to-day so scarce that holders can command almost any price. Those who have none on hand are quoting lower prices than such as have real leather to sell. Colored stock is strong at 43, 41 and 39c. Black chrome finishes, 39, 37 and 35c. White calf sells at 50c a foot, and fancy colors range from 45 to 50c. Side leathers have risen proportionately, as shoe manufacturers have turned to this stock in the scarcity of calf. Colored side leathers bring 37, 35 and 33c, and blacks in imitation of calf range from 35c downward. Wax splits are in better request, especially in light and medium weights. Flexibles well sold up.

## English Conditions

Taken all round, says the Boot and Shoe Trades Journal of London, the leather trade shows some improvement compared with last week, and is only restricted in certain directions owing to the lack of adequate supplies. The most important news of the week is that the Government has apparently decided to take stock of existing supplies and probable production of both leather and boots, for they have issued official forms to tanners and boot manufacturers requesting them to provide details of this stock, capacity of production, working costs, and other items which will doubtless afford some clue as to the extent of profits made. There is much speculation in the trade as to the objects of the Government inquiry, but it may be solely due to the desire to ensure sufficient quantities for military purposes. They are, apparently determined, however, to prevent any exploitation of prices for military goods, and further restrictions may be made as regards contracts for finished articles.

By the way, the Government have been extremely slow in issuing contracts during the last few months, and contractors have been seriously hampered in their arrangements by inexplicable delays in the placing of official orders. In Walsall and Birmingham trade is actually slow, and workers are not nearly employed to their full capacity. This at a time like the present, when everyone should be working at full pressure, is a severe economic loss to the country. Again, the new Italian order for Army boots was said to be extremely urgent, but weeks have elapsed without definite contracts having been placed. Boot manufacturers could have half completed the order by now.

# BUTTONS

Carried in stock in large quantity, all colors, all sizes. Hand finish and regular finish. The quality of these buttons is superior and the finish is always uniform. Your inquiry is solicited.

# SANDPAPER

You can do 20% more work with our Trimate paper than with the ordinary kind and the price is not more than what you are paying at present. Therefore, consider the saving, the greater amount of work done, which our abrasive represents.

# With the Shoe Manufacturers

Pithy Note and Comment on Shoe Matters—What the Makers of Shoes Are Saying and Doing—Shoe Facts and Fancies

**W.** H. ROBINSON, of Granby, Que., is the new president of the Canadian Consolidated Rubber Co., succeeding the late J. H. McKechnie and T. H. Rieder is the new president of the Canadian Consolidated Felt Co., succeeding A. J. Kimmel, who resigned a few weeks ago.

At the annual meeting of the Canadian Consolidated Rubber Co. gratifying reports were presented. The sales for 1915 amounted to \$7,522,147, being an increase of \$1,276,329 over the preceding year. This is a gain of over 20 per cent. Their net profit available for dividends was \$534,978, an increase of \$94,665 or over 21 per cent. After payment of dividends on the preferred stock, there remained a net surplus of \$342,854, equal to earnings at the rate of 12.2 per cent on the common stock, against 10.8 in 1914. As dividends on the common were discontinued in the last quarter of 1914, the surplus, after preferred dividends, was all carried forward, bringing the total surplus of the company up to \$2,690,298.

The balance sheet revealed a radical change in general position of the company. In addition to the \$1,020,000 preferred stock which was sold last spring, the company last November also disposed of \$2,500,000 three year 5 per cent debentures. With this new money a general liquidation of the rather extended position of a year was carried out. Current assets foot up \$4,994,417, against current liabilities of \$1,331,784, leaving a working capital surplus of \$3,662,633. A year ago the report showed a deficiency in working capital of \$182,913, current assets of \$4,107,200, comparing with current liabilities of \$4,290,113. The improvement in the year has, therefore, been something like \$3,845,000. As the amount of new money brought into the business was only \$3,520,000, the difference of \$325,000 represents an improvement effected from within the company itself.

## Report of Vice-President

Mr. T. H. Rieder, vice-president and general manager, in the directors' report to shareholders, stated that "the year has started with good prospects, and your directors have found it necessary to reopen the Grandy footwear factory, which had been non-operative for two years, as the requirements of our new export department promise to overtax our mills now operating." Elsewhere in the report Mr. Rieder says in part:

"The volume of business done in 1915 was 20.43 per cent greater than in 1914. While the selling values of some of our classes of manufacture were advanced, others were reduced, so that the whole difference is very small. This increased volume was attained by the sale of automobile tires throughout the year, and by our other lines, especially during the last four months of the year.

"The stocks of raw materials show quite an increase, due to increased cost and somewhat larger supplies kept on hand. Manufactured goods show practically no change as a whole, although we were better prepared with tire stocks than the year before.

"We have now completed a five year period of our present sales plan and the position of your company in the rubber trade of Canada, as well as the profits, have progressively demonstrated the stability of this policy. Losses by bad debts spread over 15,000 active retail accounts have not been abnormal at any time during this period, and due to the policy pursued of making provision for pos-

sible bad debts, in proportion to sales, the unused reserve for bad debts is always ample.

"Your directors sold November 1st, 1915, five per cent short date debentures to the amount of \$2,500,000. The proceeds were used to reduce existing bank loans and resulted in a slight saving of interest.

"All your properties have been maintained in first-class operating condition. Any expenditures for repairs and replacements have been charged to cost of operating."

W. H. Robinson was, as already stated, elected president.

Other additions to the Rubber board were R. C. Colt, assistant secretary and purchasing agent, and W. A. Eden,

W. H. Robinson, Granby, Que.

secretary, A. J. Kimmel, of Berlin, retiring. The Rubber executive, as now constituted is: president, W. H. Robinson; vice-president and general manager, T. H. Rieder; secretary, W. A. Eden; assistant secretary, R. C. Colt; treasurer, W. Binmore; assistant treasurer, A. Dwyer and J. B. D. Daigneau.

The Rubber board is composed as follows: W. H. Robinson, T. H. Rieder, Montreal; E. W. Nesbitt, Woodstock, Ont.; Victor Mitchell, Walter Binmore and R. E. Jamieson, Montreal; S. P. Colt, H. E. Sawyer, E. S. Williams, R. B. Price, W. G. Parsons, New York; R. C. Colt and W. A. Eden, Montreal.

## Consolidated Felt Company

Operations of the Canadian Consolidated Felt Co. for the year 1915 proved unsatisfactory, a net loss of \$48,965 being reported for the period.

The vice-president, T. H. Rieder, pointed out its his

# GAMBIER

MONTREAL.

remarks to the shareholders that the margin on footwear sold was practically nil, as the cost of goods produced was excessive.

Further depreciations were found to be necessary to adjust values of certain equipment, and these more than offset the economies made in selling and general expenses.

T. H. Rieder, Montreal

To further economise cost of production, the Elmira factory has been completely shut down and most of the equipment either shipped to Berlin or Kimmel Felt Mills. Should a favorable opportunity offer, Elmira buildings and

power plant will be disposed of for some other line of industry.

Under the sinking fund provision of your bond issue there are being bought and cancelled a quantity of your bonds each year, when offered at an attractive price. These will eventually discharge this liability, which at this date is \$426,500. Up to date all bond purchases have been made at less than par value. The difference between purchase price and par has been added to your surplus.

The present indications are that the volume of sales for 1916 will be considerably greater than those of 1915. Prices have been advanced as much as possible, so that the extra volume of business with the more economic cost of manufacture should produce a more satisfactory statement for the year 1916.

Net sales for the year were \$503,654, and the cost of goods sold \$480,164, leaving a margin of only \$23,494; selling expenses took \$71,162. Reducing the operating profit to \$16,332, other income brought the gross up to \$19,011, and as bond interest amounted to \$57,977 there was a net loss for the period of \$48,965, which reduced the surplus to \$131,544.

The balance-sheet shows total assets of \$3,048,507, of which \$2,212,000 is put down as investments, including goodwill. Cash on hand is represented by only \$975.

Gross sales last year were \$598,642 and the profits before bond interest were \$43,305, a falling off of 57 per cent from 1913. After bond interest total deductions \$74,310 against profits of \$43,306. To meet the loss for that year, \$31,004 was taken from surplus.

The officers and directors of the company are, T. H. Rieder succeeds A. J. Kimmel as president; vice-president and general manager, A. D. Weber; assistant manager, G. W. Charles; secretary, W. A. Eden; treasurer, W. Binmore; assistant secretary, A. W. Gunther; assistant treasurer, N. M. Davidson; directors, W. Binmore, Hugo

Wellein, V. E. Mitchell, A. D. Weber, R. E. Jamieson, A. D. Thornton, T. H. Rieder, L. M. Wood, W. A. Eden.

### Shoe Costs Will Go Still Higher

In a recent interview, A. Brandon, of the Brandon Shoe Co., Brantford, in speaking of the constantly increasing cost of shoes, said that the real reason was the war. In six months' time, he believed, it would be a serious question as to where calf skins, which were largely secured from Europe and had already advanced 50 per cent during the last six months, could be procured in sufficient quantity to meet the demand. Owing to the supply of flax from the old land, which previous to the war was secured mainly from Ireland and Belgium, being cut off, thread for making shoes had also increased over 50 per cent. As an instance of how thread had jumped, Mr. Brandon stated that for thread that had, previous to the war, cost him \$1.10 a pound, he now had to pay \$2.22 per pound, and notification of another 20 cent increase had been received. The embargo placed by England and the effect of the present tariff on materials of this kind coming from the United States was also felt to be responsible to a certain extent for the increase. Prospects for further advances by September at the least were so great that Mr. Brandon's advice to purchasers would be to lay in a supply at once.

The following figures give a fair estimate of the increase in the cost of materials. Calf leather, 20 per cent; kid leather 25 per cent; union and sole leather, 20 per cent; linings, 25 per cent; facings, 25 per cent; laces, 100 to 200 per cent. It is predicted that shoes that now cost the purchaser \$4 a pair will by next September cost the purchaser as high as \$5.50 and \$6 a pair.

### Who Shipped the Four Dozen Pairs

Only four dozen pairs of Canadian boots were imported into Great Britain in January, 1916, as compared with 15,781 dozen pairs from United States and 6,164 dozen pairs from Switzerland, says J. Forsyth Smith, one of the Canadian trade commissioners in Great Britain, in a recent report to the department of Trade and Commerce, Ottawa. Mr. Smith also says leather trade papers comment on the existing shortage in glaze kid. Imports have increased (the figures of value were £147,839 in January, 1916, as against £111,423 in January, 1915), but the demand is abnormally strong, owing to the fact that women in the lower and middle classes, who have been earning such good wages during the war, are demanding better boots, and mainly those made of glaze or enamelled leathers.

British boot manufacturers have been so largely engaged in carrying out military contracts that production for civilian purposes has suffered considerably. Receipts of imported boots during the next few months will be heavy, the main sources of supply being the United States and Switzerland. In January, 1916, £21,195 and £78,680 worth of boots were imported from Switzerland and the United States respectively, as against £11,959 and £23,869 in 1914.

### The Steady Climb of Prices

A leading eastern firm, which has always been noted for its conservative policy and the fairness with which it has dealt with the trade, being in no sense alarmists or price boosters, has sent out a notice to its customers which presents a careful review of the situation which the manufacturer of footwear has to face to-day. The notice reads: "Owing to the peculiar conditions existing in the leather market and the continued increase in the cost of findings and all other materials, we have been compelled to revise all quotations. If you will kindly send us a list of any lines of ours that you are handling, we will be glad to submit by return mail the lowest prices on same. Conditions confronting the manufacturer at the present time are serious as no leather can be purchased on contract as formerly,

so that we are only able to figure on stock which we have on hand and as this is sold out it is necessary to again revise all quotations. We strongly advise all our friends to keep well covered on all lines they are selling for future delivery because, if the present conditions continue, it will be impossible to repurchase at anything like present quotations.

### Invents New Hinging Machine

L. E. Robin, of Robin Bros., last makers, Montreal, has invented a new hinging machine which automatically prepares men's, women's and misses' lasts for metal hinges.

L. E. Robin, Montreal

It is the only machine of its kind in Canada, and Mr. Robin depends upon it doing a great deal to lower the cost of their hinged last. Although the firm recently occupied the new section of their factory, they are running to capacity.

### Colored Vamps and White Tops

A recent despatch from New York city says that during the past few days more tan shoes for men than blacks have been sold, and in the best grades there were quite a few calls for wing tips. Patent leathers received little attention, but some button shoes with grey buck tops were disposed of. For children staple styles sold well, with tan and white button shoes prominent. Ankle-strap pumps also sold. The formula for successful women's shoes requires that they be not less than eight inches high and that they have thin soles and long, narrow toes. The popular colorings are grey, ivory, mocha, white, tan, and black. In lace shoes colored vamps with white tops are good. Neat, plain effects in pumps having small tongues are also doing well. Some of the specialty shops, however, are pushing Colonials with very large tongues and buckles.

### New Quebec Company Formed

The Comfort Shoe Co. of Canada, is being incorporated with headquarters in Quebec. J. A. Langlois, M.P.P., is President of the new organization, Charles E. Slater is Vice-President, and J. E. Plamondon, Secretary-Treasurer. Messrs. Langlois and Plamondon were for many years actively connected with the Louis Gauthier Co. of Quebec. The new company will make exclusively women's cushion sole, rubber heel, turn shoes for nurses and home wear generally and will concentrate on these special lines. It is

the intention to make a good quality boot that will retail at three dollars, instead of three-fifty and four dollars as heretofore. The factory is now being fitted up and will be in operation in a few weeks. Charles E. Slater, Vice-President, was calling upon the trade in Toronto, Hamilton and London during the past week in connection with the lines of the company which will be handled by the jobbers.

#### Trade Asked to be Considered

Notices have been sent out to the Canadian trade through Philip Jacobi, Toronto, wholesale distributors of the Hurlbut welt cushion sole shoes that, due to the heavy

O. Franche, Montreal  
Superintendent for Eugene Guay, Montreal, who  
has been with that firm over thirty years

advances in the cost of all materials used in making the lines there has been an increase in prices. Owing to the scarcity of labor at the factory through enlistments for overseas service, the plant is several weeks behind in shipments but, as the situation is beyond the control of the firm, customers are asked to be indulgent, being assured that every effort is being put forth to take care of the many orders for spring and summer delivery.

#### Shoe Polishes Likely to Advance

The scarcity and high cost of all raw materials have not only hit the shoe manufacturers hard but the producers of shoe polish are in no better position than the manufacturers in other lines. The chemical situation has become acute owing to the war, and tin boxes, which are made of metal, are also developing unusual advances. The bottle and glassware situation is also another source of anxiety, and it is not a matter of price so much, but how to obtain a sufficient supply that is just now the greatest trouble of the manufacturer. The paper stock from which cardboard boxes and cartons are made, has also increased in cost to such an extent that the effect will be felt. It is not unlikely that, owing to the circumstances, shoe polishes may be augmented in price in the near future.

#### New Device for Button Shoes

A device has been patented to prevent buttonholes in shoes from wearing out, by Mrs. Gilbert Mendelson, of Merrill, Wisconsin. It consists of a piece of copper wire

encased by a strip of tape an eighth of an inch wide. The tape is then stitched to the button-fly between the holes and the edge. In this manner it becomes impossible to tear out the holes, while at the same time the fly is held up in shape. This invention should prove a blessing to all retailers especially.

#### Death of Esteemed Leather Man

Howard W. Shaw, who was well known in the leather business in Canada, died recently in New York city from a sudden attack of heart failure. He was born in Montreal and operated a large tannery at Hawkshaw, N.B., for seventeen years and later organized the Anglo-Canadian Leather Co., with his father Brackley Shaw, who is the president of the organization. The company have tanneries at Bracebridge and Huntsville and warehouses in Montreal, Quebec and Toronto, being the largest tanners of sole leather in the British Empire. The late Mr. Shaw was 58 years old and leaves a wife, one son, Ralph B. Shaw, who is now at the front, and one daughter. Mr. Shaw and his family were in Germany when the war broke out and had great difficulty in getting out of that country. They had gone there to spend a year or so while their children were completing their education, and they only returned to New York four months ago from England. Before they left Germany their automobile and personal effects were confiscated, but later returned to them through the intervention of some German friends.

#### Long Skirts Alarm Shoe Men

A recent despatch from Boston says "visible feet," the greatest asset of the makers of footwear, are going out of style as longer skirts come into fashion.

T. Hurtubise, Montreal  
Representing Eugene Guay, manufacturer of counters, Montreal,  
and for many years identified with the shoe trade

The men of New England's great shoe industry are rushing to the colors.

"Keep 'em short," is their slogan.

Not merely from an artistic viewpoint do they desire that milady's feet and ankles be exposed. Once the curtain is dropped over the dainty underpinnings of the fair sex, fancy shoes cease to be a necessity. The best little advertisement shoe men have for their wares is a slender, shapely ankle, snugly shod.

"To keep feet prominently displayed is the one big

thing for the trade to do. Skirts are coming down, and something must be done to stop the descent." is the warning note sounded by a trade paper.

### New Sales Manager Appointed

W. L. Francis, who has been appointed special representative and salesmanager of Gales Bros. Limited, shoe manufacturers, Quebec, has a thorough grasp of both the making and selling ends of the shoe game. At an early age, he entered the factory of the Geo. H. Snow Co., Brockton, Mass., where, after spending nearly three years at the

W. L. Francis, Quebec

practical end of the business, he became assistant superintendent, under his father. He later spent two years on the road for this firm, meeting with splendid success in the salesmanship line. He next joined the traveling staff of the Emerson Shoe Co., Rockland Mass., with which widely known concern he was for nearly six years, covering New England, the Southern States and the larger cities of the Middle West. Since entering upon his new duties with Gale Bros., Mr. Francis (who is a son of W. P. Francis, of the John Ritchie Co., Quebec) reports a record business. In styles, insight, and in shoemaking ability he is "a chip off the old block." Mr. Francis, Jr., is associated with J. V. Hatch, superintendent of Gale Bros., in the selection of lasts and patterns. Recently he spent a few days in Montreal, Toronto and other centres, on business.

### Some Smart Showing for Autumn

The autumn samples of the Regal Shoe Co., Toronto, show several new lasts and pleasing patterns including several models with the new wing tip and fancy perforations. The bal predominates in the showings, but there are a number of blucher cuts with plain quarters. One classy creation is a gunmetal recede toe with buck top, and another is a tan with a buck top, while other offerings with up to the minute features are a corda calf, bal, which closely resembles genuine cordovan in color, texture and grain, and a genuine wax calf bal. One neat sample is a smooth king leather with black cloth top, and one with mahogany vamp and light willow calf cloth top, the contrasting colors being very attractive. Some carry Neolin soles. There is a splendid range of dress and military shoes on the most approved lasts and evidencing the highest class shoemaking. There are some twenty four lines in women's

more conservative styles which are made at the Toronto plant in button and lace, with a few colored models. In eight inch high cuts a snappy range is shown in white washable kid, grey kid, pearl grey kid, ivory, Havana and nigger brown, black and bronze. A pretentious range of pumps without tongue is seen, one pleasing pattern having a midnight blue vamp with white kid quarters, while others are observed in black and white and in combination with other colors. It is possible that in the near future the company may extend their range of women's shoes to include the making of all novelties and seasonable presentations, duplicating in every respect the high class offerings produced in their women's factories across the line, and reaching as high a stage of perfection and detail as the Canadian plant has done in men's first grade shoes and in the staple range for women.

### HOW LEATHER PRICES HAVE JUMPED

"Yes," remarked a leading member of the tanning trade, "whereas we used to obtain 60 to 65 per cent. of our calfskins from Austria, France and England, we are not getting any now, and naturally, with the decreased supply and the increased demand, prices are going up steadily. You ask me for the figures of our various grades and colors at the present time, as compared with those of a year ago, and I have much pleasure in giving them to you. There are, of course, four grades, but we will take "B" as an average example.

#### Gun Metal and Box Calf

	One Year Ago	To-day
H. M.....	27	43
M.....	26	42
L. M.....	25	41
L.....	24	40

"A" grade is two cents higher than the foregoing figures.

"C" grade one cent lower, and "D" grade one cent below "C."

#### Russia and Willow Calf

	One Year Ago	To-day
H. M. ....	28	44
M.....	27	43
L.M.....	26	42
L.....	25	40

This is "B" grade.

#### Matt Calf

	One Year Ago	To-day
"B".....	24	38
"C".....	22	36

Men's and Women's weight.

These figures tell a story of increasing cost of production in the item of upper stock alone that shows what the shoe trade is up against in the matter of upper stock.

### Some Fine Models for Men

The new autumn samples of Scott-Chamberlain, Limited, London, are not only comprehensive in character, but handsome and attractive. There is seen the Temple Bal, with facing and vamp all cut in the one piece, in patent and gunmetal, with brown and grey tops in both cloth and buck leather. A number of button boots are also seen, with colored tops and buttons to match, with outside button and front leather facings. A number of the bals have heart-shaped throats. Several models carry fibre soles, and there is a liberal showing in African, mahogany and nut brown, in both bal and blucher patterns. There are several winter

calf shoes made on more dressy lasts than formerly, giving them a decidedly attractive appearance. Among other lines are kangaroo bals and bals with whole foxing and side seam foxing. A new offering this year is the flexible cushion sole shoe for men, with herring bone edge. There is also a liberal representation in military dress boots. All the popular selling lasts of the company have been retained, while several new ones have been added. The medium full semi-recede toe seems to be a leader, although there are the straight, round, full recede, and almost every other type of toe. The new wing tip is shown and there are a number of other pleasing offerings which will appeal to the young man. The line is being shown in Toronto by Reg. J. Johnston, of London, late head of the Johnston-Murray shoe firm, who recently sold out his interests in that concern.

**Decidedly Smart Models for Fall**

The last word in color, cut and pattern is presented in the new autumn offerings of Getty & Scott, Limited, who have made the Classic line this year more novel and striking than ever. All shades are represented, and among the outstanding selections are an African brown bal with old ivory quarters and dome top. There are splendid showings in grey dawn, champagne, Havana brown, white washable kid and oyster grey. A dull kid bal with patent slashed collar, a white buck bal with saddle strap and foxing on the sport last, carrying ivory sole and heel, and a seven-inch walking bal of storm calf, with viscolized sole, are pleasing presentations. Among other creations of interest is a shoe with a patent forepart and foxing, with white calf top and black spat buttons and inlay effect between vamp and foxing. This is known as the stag pattern. Then there is a patent bal with white kid top, black facing and black and white collar, and a bronze bal with Belgian silk top. A showy shoe is one with a red kid vamp, white top and blue slashed collar, giving the red, white and blue effect. A number of classy selections are observed in reingskin cloth in all colors, with ivory sole and heel, and a chocolate bal with light tan upper is a very pleasing novelty. There are other combinations in two-tone effects, which will appeal to all. The models carry the half Louis, Louis and opera heel, both in leather and wood. A midnight blue model with light grey upper, blue buttons

and slashed blue collar is certainly catchy. For growing girls there is a representative selection in high cut bals, in all leathers, some with Cossack and others with Hussar cut tops. A patent button with white buck top is a choice offering. Another shoe is a woman's low heel English last, patent button, dull top and white facings. There is a splendid showing in mock turns and flexible welts for women and also in flexible welts for children. Colonials in all leathers with huge tongues and large buckles also form a prominent part

J. B. Marcoux, superintendent of Ames-Holden-McCready, Limited, No. 1 Factory, Montreal, where men's fine welts are made

of this year's range. The military air is seen in numerous offerings for children and a new line in stitch-downs in lads', little gents' and youths' is observed. The new white washable kid appears in models for women, misses and children and the combination effects of black and white, tan and white, and other colors, make the Classic line which is being shown in Toronto by S. J. Anderson the best ever.

**"GUESSING THE TRAVELERS"—LADIES WIN**

Great interest was aroused over the contest in "naming the shoe travelers" whose pictures appeared in the Autumn Styles Edition of the SHOE AND LEATHER JOURNAL. Prizes were offered to the merchant or any member of his staff sending in the list of names most nearly correct. Replies were received from all parts of the Dominion, showing that several representatives of the various firms are nationally known. Deciding who were the winners was no small task, in view of the closeness of the competition. Many of the participants recognized nearly every member in the good-looking company of commercial men.

The honor of capturing first prize goes to Miss Mary Wood, who is saleslady with W. R. Baird, 433 Colborne St., Brantford, Ont. Her tabulation shows only two "cases of mistaken identity."

The second prize is awarded to Miss Nina Reynolds, sales lady in the store of her father, George E. Reynolds, Stirling, Ont. She was a keen competitor.

The successful ladies must have good friends among some of those handsome bachelor travelers, who doubtless gallantly came to their assistance in identifying the married members of the selling fraternity.

Honorable mention is made of R. Brake, with Thos. Brake, 562 Yonge St., Toronto; Elmo Schmurr, Mildmay, Ont.; Geo. MacVicar, Goderich, Ont.; William G. Tapp, Nipissing Stores, Port Arthur; H. A. Murphy, Alliston, Ont.

Replies were received from retailers and clerks in Winnipeg, Hull, Belleville, Berlin, Parkhill, Amherstburg, Montreal, Peterboro, Orillia, Renfrew, Owen Sound, Toronto, Brantford, Ottawa, Calgary, Edmonton, Regina, Port Arthur, Vancouver, Goderich, Stirling, Mildmay, Stratford, Hamilton, Medicine Hat, Victoria, Sherbrooke, St. John, Amherst, Pictou, Sydney, Halifax, North Bay, Kingston, Three Rivers, Valleyfield, Fredericton, London, St. Thomas, Smith's Falls, Woodstock, N.B., Sydney, Lethbridge, Nelson, and Sudbury.

The following are the correct names of the shoe travelers whose portraits appeared in the April 1st number of the SHOE AND LEATHER JOURNAL:—

- 1—C. S. Corson, Regal Shoe Co.
- 2—E. E. McIntyre, Brandon Shoe Co.
- 3—W. C. Myers, Star Shoe Co.
- 4—Fred P. Beemer, Blachford Shoe Mfg. Co.
- 5—Ken Murray, Murray Shoe Co.
- 6—H. E. Graham, Hartt Boot & Shoe Co.
- 7—L. M. Stock, Walker, Parker & Co.
- 8—L. D. Farewell, Hartt Boot & Shoe Co.
- 9—N. J. Bordeau, Galt Shoe Mfg. Co.
- 10—J. G. McDiarmid, Murray Shoe Co.
- 11—F. M. Downs, McLaren & Dallas.
- 12—F. W. Laskey, Tetrault Shoe Mfg. Co.
- 13—J. G. Riel, Star Shoe.
- 14—J. G. Settle, Murray Shoe Co.
- 15—W. J. Gard, Eagle Shoe Co.
- 16—H. E. Landon, London Shoe Co.
- 17—J. A. Smith, D. D. Hawthorne & Co.
- 18—C. A. Le Blanc, Star Shoe Co.
- 19—W. E. Armstrong, McLaren & Dallas.
- 20—W. E. Short, Kingsbury Footwear Co.
- 21—A. A. Orendorff, E. T. Wright & Co.
- 22—W. S. Pettis, Perth Shoe Co.
- 23—W. G. Berscht, McLaren & Dallas.
- 24—G. H. Taylor, Kingsbury Footwear Co.
- 25—A. M. Jarvis, Murray Shoe Co.
- 26—F. J. Sharpe, J. A. & M. Cote.
- 27—H. L. Geene, White Shoe Co.
- 28—Alf Winn, Eagle Shoe Co.
- 29—John Scott, Eagle Shoe Co.
- 30—J. T. Sutherland, Kingston.
- 31—R. B. Chalue, Drummond Shoe Co.
- 32—Gideon Knechtel, Williams Shoe, Limited.
- 33—H. E. Wettlaufer, Chas. A. Ahrens, Limited
- 34—J. S. Lovell, Corbeil, Limited.
- 35—J. D. Campbell, Kingsbury Footwear Co.
- 36—L. B. Hutchison, Kaufman Rubber Co.
- 37—H. R. List, Luc Routier.

- 38—F. B. Hull, Eagle Shoe Co.
- 39—R. G. Percival, Kingsbury Footwear Co.
- 40—J. A. McLean, Eagle Shoe Co.
- 41—Jos. Gravel, Thompson Shoe Co.
- 42—H. B. McGee, Minister-Myles Shoe Co.
- 43—A. A. Armbrust, Lady Belle Shoe Co.
- 44—Harry Adams, Slater Shoe Co.
- 45—J. A. Morin, James Robinson.
- 46—E. A. Marchildon, Eagle Shoe Co.
- 47—J. A. Malboeuf, Kingsbury Footwear Co.
- 48—J. Farewell, D. D. Hawthorne & Co.
- 49—A. R. Trudeau, G. J. Trudeau, Limited.
- 50—T. R. Trudeau, Corbeil Limited.
- 51—J. J. Connor, McLaren & Dallas.
- 52—H. Martineau, Eagle Shoe Co.
- 53—J. S. Ashworth, Sir H. W. Trickett, Limited
- 54—J. E. Firth, W. B. Hamilton Shoe Co.
- 55—Harry Thompson, Thompson Shoe Co.
- 56—J. P. Maher, Reliance Shoe Co.
- 57—Aug. Martineau, Eagle Shoe Co.
- 58—G. H. Ansley, Perth Shoe Co.
- 59—J. W. Foy, D. D. Hawthorne & Co.
- 60—J. J. Tilt, Brandon Shoe Co.
- 61—R. M. McGowan, Winnipeg.
- 62—W. H. Budreo, Drummond Shoe Co.
- 63—Ed. Lynch, Minister-Myles Shoe Co.
- 64—W. G. Martin, Canadian Consolidated Rubber Co.
- 65—C. H. Firth, Sterling Bros. & Co.
- 66—S. G. Amero, Kaufman Rubber Co.
- 67—F. Chalmers, John McPherson Co.
- 68—C. H. Himburg, Chas. A. Ahrens.
- 69—W. G. Downing, Regina.
- 70—A. J. Pinsonnault, Montreal.
- 71—Frank E. Rousseau, Gourlay & Fogelberg.
- 72—Frank Power, MacFarlane Shoe Co.
- 73—J. S. Townsend, Hamilton.
- 74—Jos. Harper, Canadian Consolidated Rubber Co.

**MUSICAL FOOTWEAR THING OF PAST**

While conducting a research for information on the origin of certain fashions of the past I discovered the reason for the existence of the squeak in shoes. The squeak was once deemed fashionable, and men of great importance in the affairs of the country demanded it in their footwear, and cobblers were paid two shillings extra for putting it in. The squeaky boot denoted the approach of some one of importance, and the way was made clear at once in the

**The New Washable Kid Boot  
That is Called the White Hussar**

**T**HIS SMART NEW BIT of high-topped footwear fills most charmingly Fashion's latest demand for white boots.

Moreover, the white kid of which it is fashioned possesses the immense advantage of being washable. Rub it with a wet sponge and it is fresh and clean as when new.

Lacing up high in Hussar style, according to current mode, the sole and Louis heel are of ivory white leather—constituting a fashionable, wearable boot for general use. Sizes run from 2½ to 7, the price being \$8.00.

The same model may be had in white calf with toecap. Price, \$8.00.

How leading Toronto firm features white footwear

same manner as a bicyclist's shrill whistle warns you to look to your interests. During the squeaky period men found it difficult to sneak into the house after 12 midnight without being discovered and disgraced. Removing the shoes before entering the home is an invention which followed the squeaky shoe era, and while the former is now almost obsolete, the latter is still in vogue and as popular as ever with married men!—Zim in Cartoons Magazine.

J 394 J

Peters' White Egyptian Reinskinn, 8" full quarter lace boot, Touraine last, Vaughan's White Ivory sole and welting, close edge welt, 2 1/8" wood covered half Louis heel. AA, 4 to 7; A, 3 to 7; B, C and D, 2 1/2 to 7.

## GO AFTER THE CHILDREN'S SHOE TRADE—IT PAYS

*(Continued from page 21)*

a birthday record in connection with our children's department, and will send a birthday souvenir to all children—boys or girls—between the ages of four and twelve years—who fill in the information required and return the sheet to us." Then appears some dotted lines divided into columns, the first for the date, the second for the full name of the child, the third for the address, the fourth for the age, and the fifth for the birthday. The leaflet closes with these words:—"When this sheet is returned, the name will be entered in our special book, a page for every day in the year, and the souvenir will be mailed, so as to reach the child on the correct date."

Most parents take the trouble to fill in the dotted blank lines and return the slip to the store. The entries are then transferred to a large diary, under the proper dates. This book is gone over by the proprietor at an early hour every morning, and on the day previous to a child's birthday, a hand-

some and artistic postcard is mailed. The missive bears the name and street address of the youthful recipient, and the message, "Wishing you many happy returns of your birthday." This is personally attended to by the shoeman, who, on some days, sends out as many as fifteen cards, and rarely ever less than two or three. The result is that the card, which is nicely illustrated, generally showing a scene of some children at play or presenting other associations of childhood, reaches the one intended on the very morning that it should, namely, the birthday of the kiddy. The cards cost the shoeman about a cent a-piece, and previous to the war, the postage was one cent. Now it costs two cents, but even yet he considers that such a memento yields big returns.

Every juvenile, who buys shoes at his shop receives either a good hardwood ruler, lead pencil or scribbling book, each of which costs the retailer from two or three cents. Naturally the premium is much prized by the adolescent possessor and as a result big business is developed in the children's department. Prices of shoes are not mentioned on the printed matter of the scribbler, the pencil or the ruler, but there are a few words regarding the worth and workmanship of the shoes. Some of the catchy phrases are:—"Every home that contains a boy or a girl has to handle the school shoe proposition. We have settled it." Here is another. "Our school shoes fill every requirement, fit, shape, looks and wear," and "Ours is the store that serves you best."

On the front page of the scribbler is the following:—"Ever tried our school shoes? If not we believe you are missing the best school shoes in the city, and we are making a special feature of ——— in this establishment. They embrace the best leather, the best workmanship and shoe-making, and the best shapes. We think if we do not know the school children's requirements and of boys and girls, who does? Experience has taught us exactly what is needed and we have got them."

These are only two or three of the ingenious publicity and patronage winning methods adopted by this retailer, who keeps close tab on his customers' wants. He believes that families are rarely ever divided, particularly when growing up, and the shoeman, who emphasizes and presents his facilities for fitting every one in the household, naturally captures the greatest amount of business in his community. Do not despise the children's department. It is big in its possibilities and strong in its attachments. Such a department may be made just exactly what you want it to be. The more energy, thought, time and attention you devote to it the more you will get out of it. It is like everything else in life. It will return rewards, according to the care, judgment and thought bestowed upon it.

**The Prices Which You Buy**

A Montreal shoe merchant writes: "I obtain proportionately as great a profit on children's shoes as I do on those of adults. There is no reason why we should sell at a less proportion. Now for my infants' line (I am not speaking of soft soles which run from 2 to 5, and carry a sewn seat), I pay from 85c to \$1.25, and get them in dongola, patent and calf. All these shoes are turns. For children's lines 4 to 7½, with nailed seat, I pay for McKays \$1.20 to \$1.50 and for turns, \$1.10 to \$1.40. Then for girls and little gents sizes 8 to 10½. I pay from \$1.55 to \$1.85, with dongolas, slightly cheaper, and for misses and youths, 11 to 2, the figure is \$1.85 to \$2.40. Practically all these goods are McKays. When I quote these figures, I do not say that they are what we will be asked this season. I am merely giving you some items from last years' purchases. I understand that quotations have very materially increased, and that there are some surprises in store for us. Well, I intend to advance my prices accordingly. There is no reason why a shoe merchant should be a public benefactor. Unless we obtain a fair, legitimate profit, we cannot do business to-day, as it costs more in every way to conduct a retail business. I will not say that rents are higher, but this I will say, that clerks are demanding more money, owing to the scarcity of help, and every man who has a spark of patriotism in his make-up or who wishes to do his bit at home has to give, and give liberally, to the Patriotic, Red Cross and like objects, while the tax rate and other levies have increased. These are things that must be taken into consideration.

"I may tell you in conclusion that I devote as much attention to buying in the children's department as I do in any other section of my business. It pays to give it time and attention. I have always regarded the children's department as one of the most profitable and important."

**New Staff Now on the Road**

The following now constitute the traveling staff of Scott-Chamberlain, Limited, of London, for this season:—John Dunbar, general sales manager; Ira T. Owen, late manager for Johnston & Murray, London, is covering the Maritime Provinces, while Reg. J. Johnston, of London, is looking after Toronto and the western part of Ontario, north of the main line as far as the "Soo." Wm. Fryer, late with C. C. Begg, Collingwood, is attending to the southern portion of Ontario, W. Venton, late of H. Ashplant & Son, London, is supervising eastern Ontario, while the Prairie Provinces are being looked after by the Messrs. Clark, Quebec province by Mr. Leonard, and Montreal city by Mr. Clouthier.

FAMILY SHOE SHOP—STREET FLOOR

How leading Montreal firm features “Classic Shoes”

# AMONG THE SHOE MEN.

The stock of Harry Gruber, shoe dealer, Montreal, has been sold.

Paul Turcotte, shoe dealer, Quebec, recently suffered a three thousand dollar loss by fire.

John Bishop, nephew of Walter Bishop, shoe retailer, Queen Street West, Toronto, has enlisted for overseas service.

J. J. Connor, western representative for McLaren & Dallas, wholesale shoes, Toronto, left this week on an extended business trip throughout the Prairie provinces.

E. E. Code, manager of the Ottawa branch of the Kaufman Rubber Co., spent a few days in Toronto and Berlin last week.

H. B. Ohrt, who was formerly in the shoe business on Queen St. West, Toronto, has taken a position as manager of the retail store of J. A. E. Snyder, 1474 Yonge St., Toronto.

William Maedel, one of the best known men in Huron county, was found dead of heart disease in his tannery at Saltford, adjoining Goderich.

L. R. Newbegin, Montreal, has returned from a trip to Boston.

C. N. Candee, vice-president of Gutta Percha and Rubber, Limited, Toronto, has won the McGaw Cup for the season in the Balmy Beach Gun Club.

James Valentine, of Valentine & Martin, Waterloo, Ont., was in Toronto last week, calling upon the trade.

R. J. Drysdale, of Kingston, eastern Ontario representative of the Ames-Holden-McCreedy Ltd., spent a few days in Toronto last week on business.

C. C. Allan, shoe retailer, who suffered a severe loss by fire a few weeks ago, is moving into his new store 1424 Queen St. West, which has been attractively fitted up.

The Quebec branch of the Canadian Consolidated Rubber Co. has removed from Dalhousie Street to the Begin Building on Crown Street. J. E. Beauvais, the manager, recently lost his three year old son, and many friends will sympathise with him in his bereavement.

During the month of February, 126,977 pairs were turned out of the Dominion Rubber factory at St. Jerome, Quebec, this being the largest output for any one month the plant has ever known.

Wm. Edwards, who for many years was with Chas. Tilley & Son, and later with McLaren & Dallas, Toronto, has been appointed representative in Toronto for the Nursery Shoe Co., of St. Thomas, Ont.

Russell C. Foy, who represents R. B. Griffith & Co., wholesale shoes, of Hamilton, and has a sample room at 146 Wellington St. West, Toronto, will also cover Toronto city for the Minister Myles Shoe Co., succeeding C. F. Schuszler, who has gone with the Regal Shoe Co.

Wm. Fox, superintendent of Sterling Bros. Ltd., London, Ont., was calling upon the trade in Toronto during the past few days.

F. W. Knowlton, of Montreal, manager of United Shoe Machinery Co. of Canada, spent several days in Toronto last week on business.

Wm. Cathcart, shoe dealer, Victoria, spent a few days on a buying trip recently in Seattle.

The J. H. Hamilton Shoe Co., shoe manufacturers, Sherbrooke, Que., have gone into liquidation.

V. L. Holmes, who represents the Berlin Shoe Mfg. Co., with which firm he has been connected for five years, is also

carrying the lines of the Star Shoe Co., in eastern Ontario. Mr. Holmes has not severed his connection with the Berlin Shoe Mfg. Co., as intimated in the last issue, and will still continue to look after their interests as aggressively as ever.

J. W. Carey, shoe dealer, Peterboro, has moved into new premises at 448 George St., next door south of his former stand. Mr. Carey, who is a practical shoemaker, states that he will make shoes and pay particular attention to fitting feet that are deformed or otherwise difficult to fit.

Knechtel & Co., who have been in the shoe business for some twenty years in Stratford, Ont., have established themselves in larger premises on Downie St. The new store is well located and has been refitted and equipped with a special ladies' department. There are spacious show windows at the front and the interior is attractive and well lighted.

W. A. Funk, who has been in the employ of J. Agnew, Limited, for the past five years, has been appointed manager of the store in Berlin, Ont., succeeding C. A. Bechie, who has been transferred to Brantford.

The employees of the Breithaupt Leather Co., Berlin, recently presented Anthony Hopf, foreman of the beam house, with an appreciative address and a wrist watch. The many good qualities of Mr. Hopf, who has enlisted on behalf of King and Country for overseas service, were referred to, and he was commended for his patriotic spirit, in leaving his home and family to participate in the great struggle for freedom and honor.

Mr. Mutrie, of Mutrie & Son, shoe dealers, Victoria, who was unfortunate in breaking his leg a short time ago, when at the Y.M.C.A., is getting along nicely.

The American Shoe Store, which for fourteen years has occupied the same premises on Jasper Ave. East, Edmonton, is moving west into a new store on Jasper Ave. between Third and Fourth Streets, which is being specially fitted up for the purpose.

The shareholders of the Amherst Boot & Shoe Co., Amherst, N.S., have received their fifty-third consecutive dividend. The business of the company is reported exceptionally good, the sales for January and February being over fifty thousand in advance of the same months last year, while the showing for March was the biggest in the history of the company.

Geo. E. Williams, who for the past ten years has held a responsible position with D. D. Hawthorne & Co., Toronto, has resigned in order to engage in farming near Ailsa Craig, Ont. Mr. Williams, who is widely known to the shoe trade, was for some years with the old J. D. King Co. and was presented by the staff of D. D. Hawthorne with a substantial purse on the eve of his departure.

Chas. K. Hutchinson has been appointed superintendent of the Granby plant of the Canadian Consolidated Rubber Co. Mr. Hutchinson has had a wide experience in the rubber game, and since March 1915, has been superintendent of labor and efficiency in the Canadian Rubber factory, Montreal, and with the re-opening of the Granby plant, he has been placed in charge. It is expected the factory, which has been generally overhauled, will be in running order by the middle of the month. A. J. Todd, of the transportation department of the Canadian Consolidated, has succeeded Mr. Hutchinson as superintendent of labor and efficiency at the Canadian factory, Montreal.

## CLASSIFIED ADVERTISEMENTS

2 cents a word first insertion—1 cent a word subsequent insertion. No advertisement less than 50 cents per insertion accepted. Please remit cash with order.

WANTED—Purchaser for Red Mangrove Bark, in any quantities, from fifty to 5,000 tons. Please communicate with W. L. M. Garsia, 3 Duke street, Kingston, Jamaica, B.W.I.

WANTED—Traveler on commission east of Toronto, to carry full line of Quebec manufacturer's samples in machine sewn and nailed goods. Prices right—application confidential. Apply to Box 102, SHOE AND LEATHER JOURNAL, Toronto.

SHOE FACTORY FOR SALE—Making Women's, Misses' and Children's Shoes. Capacity three to four hundred pairs a day—thoroughly modern equipment and building, located in one of the best shoe centres of Canada. Business in flourishing condition, and ill health sole reason for selling. Apply to Box 103, SHOE AND LEATHER JOURNAL, Toronto.

Harley Henry, Limited, boots and shoes, North Battleford, Sask., has sold his local retail store to T. R. Henry.

A. Bender, assistant manager of the men's department of the T. Eaton Co., Winnipeg, has enlisted in the 203rd Battalion. Pte. Bender is a Canadian by birth from Zurich, Huron county, and has been a resident of Winnipeg for four years. He follows his brother, Alfred, into the ranks of the 203rd.

Mr. and Mrs. James Robinson, of Montreal, are now at Ashville, North Carolina, where they are enjoying the fine spring weather.

The factory of the Williams Shoe, Limited, Brampton, Ont., had a narrow escape from a serious fire a few days ago, when a gasoline tank in connection with one of the machines took fire. An explosion followed, but before the flames gained headway one of the employes threw the tank out of a window. Although severely burned his prompt action prevented a serious loss.

A. E. Wild, of Melfort, Sask., dealer in shoes and men's furnishings, was in Toronto last week on business. Mr. Wild is a former resident of Huron county who has met with success in the West.

Fire broke out recently in the premises of the Ritz Shoe Co., 66 St. Paul street, Montreal. The damage done was slight.

Fred C. Taylor, shoe retailer, of Ottawa, has removed from the corner of Bank and Slater streets to larger premises at 111 Bank street, and is now located in his new home. The store is modern in every respect and has splendid display windows. Mr. Taylor is now carrying a much larger and finer stock and reports that business so far has been exceptionally encouraging. He is to be congratulated on his recent progressive move.

Wm. Hockin, shoe retailer, of Wallaceburg, Ont., has installed new lights in his store and made several other improvements to his premises.

The Garber Rubber Co. are starting business in Winnipeg.

A. F. Climie & Sons, dealers in shoes and groceries, Lanigan, Sask., are selling out and removing to Jansen.

# Eclipse Shoes

Set a standard of quality that totally eclipses anything else at the price.

## Boys', Youths', Misses', Children's

We make these lines only, in Turns and McKays, and our specialized effort produces a shoe of specially high grade style and wear-resisting qualities, that has no superior. See the new lines for Fall.

**Galt Shoe Mfg. Co., Limited, Galt, Ont.**

G. H. Ansley, managing director of the Perth Shoe Co., Perth, spent a few days in Toronto last week on business. The company have recently doubled their capacity and are now turning out 600 pairs a day in women's welts exclusively, having orders on hand to keep them busy for several weeks. A. N. Jones, late with the American Lady factory, St. Louis, Mo., has joined the staff of the Perth Shoe Co., as quality man and has entered upon his new duties.

J. M. S. Carroll, Division Manager, Canadian Consolidated Rubber Co. Limited, who has been re-elected a director of the Canadian Rubber Co. of Montreal, Limited, and has been in the service of the company twelve years.

Sol. Bachrack, formerly senior partner with Bachrack Bros., shoe retailers, 234 Yonge street, Toronto, is now identified with the Bachrack Co., Limited, dry goods, 56 Bay street. The members of the shoe firm are Harry Bachrack and his brother Louis.

J. A. Wade, factory manager, was elected a director at the annual meeting of the Canadian Rubber Co., of Montreal, Limited, held at Montreal on April 4th last.

L. R. Newbegin & Co., handling Markem, Puritan and other shoe machinery in Montreal, are taking larger quarters May 1st.

Extensive alterations are being made to the Haines Shoe House in Belleville, Ont. A new front of the latest type is being installed, while the seating, lighting and heating arrangements will also be changed. When the work is completed the store will be practically new throughout.

Captain W. H. McLaren of the 19th Battalion, who is now doing service in France and is a son of J. A. McLaren, wholesale shoes, Toronto, was married recently at Christ Church, Folkestone, England, to Miss Beatrice Eleanor Brown, daughter of A. W. Brown of Hamilton. Miss Brown had been awaiting Captain McLaren's return from the trenches on leave since December.

J. N. Gibson is now covering Toronto for Blachford, Davies & Co., Limited, taking the place of A. Echold, who has been transferred to Mr. Gibson's former ground in Northern Ontario. T. H. Ross, who is well known to the shoe trade, is now representing Blachford, Davies & Co. in Hamilton and in the Lake Shore and Niagara district throughout Western Ontario.

Shoe leather has become so scarce in Austria that the shoemakers demand \$2 for soling an old pair of shoes. Hundreds of children are unable to go to school because

they have no shoes, which cost anywhere from \$2 to \$5 a pair. Shoes with wooden soles from Germany cost from \$1.20 to \$2 a pair.

John Huycke, shoe dealer of Cobourg, Ont., has sold out to J. Dobensky & Co. of that town.

E. R. Lewis, leather dealer, Toronto, has returned from a business trip to Montreal and Quebec.

W. J. Burns, of the Burns Co., Oshawa, who has been unwell for several weeks was in Toronto recently calling upon the shoe trade. He is feeling much better than he has for some time.

Fred R. Foley, shoe merchant, of Bowmanville, Ont., last month celebrated his fifteenth anniversary in business in that town by holding a successful sale.

Murray W. Crosby, representing Utz & Dunn Co., of Rochester, N.Y., was in Toronto last week showing a fine representative range of autumn models.

George E. Chambers, manager of the Regal shoe store, Toronto, has returned from a business trip to Boston.

E. E. Shaw, for the past three years in charge of the cut sole factory of Ames-Holden-McCready, Limited, Montreal, has resigned, and is succeeded by H. D. Gross, formerly in charge of the stock fitting department at their No. 1 factory.

L. S. McKindsey, representing the W. B. Hamilton Shoe Co., Toronto, is now on an extended business trip throughout the western provinces.

Extensive alterations are being made to the office quarters and sample room of P. Jacobi, shoe store supplies, 5 Wellington street east, Toronto. The office has been greatly enlarged and rearranged, while the commodious new sample room which is located just back of it has all the latest display facilities.

Roy R. Wilson, son of T. A. Wilson, shoe retailer, Bloor street west, Toronto, who enlisted some time ago, is now sergeant-major in the 130 Battalion, Perth, Ont., where he resided for a number of years. He has always

Women's Welt, all Kid, Lace Bal, Plain Toe, small perforations, half Louis Heel. By Ames-Holden-McCready.

taken a deep interest in matters military, and was a member of the 42nd regiment in Perth. T. A. Wilson has also another son, Dr. A. A. Wilson, late of Vancouver, attached to a British regiment now in Salonika, Greece.

Silas Shane has sold out his shoe repairing business in Almonte and removed to Ottawa.

**Blachford-Davies Co., Limited**  
60 Front Street West  
Toronto

G. D. Christie, shoe dealer, Victoria, B.C., has moved into his new store 1231 Government Street, that city.

Eastern travellers who are now in British Columbia report that conditions there are improving a lot. Trade has been very quiet during the past winter, owing to the extraordinary amount of snow which fell, the most for a number of years. The turnover in rubbers was a large one, but in leather footwear things did not move as freely as they would have under milder weather conditions. The cars were blocked for several days, something never known before, but recently the weather has been very fine, which has helped matters considerably.

J. J. Shier, one of the best known business men of Cannington, Ont., passed away last month after an illness of some weeks. He was in his 48th year and after receiving his education in his native village of Cannington, he learned his father's trade, that of shoemaking, and worked at it for a time in the United States and Toronto, returning to his native home, where he and his father entered into partnership and opened a shoe store in the early eighties. They continued to conduct a successful business until his father through illness retired. About ten years ago the late Mr. Shier and Mr. W. A. Mullen formed a partnership. This firm conducted one of the largest and most successful shoe and grocery businesses in Central Ontario, until November, 1915, when Mr. Mullen retired, selling his interests to the deceased. The late Mr. Shier was for many years a member of Cannington council and the Board of Education and was a leading Oddfellow and Orangeman.

H. J. de Villers Sales Co., 239 St. Catherine St., Maisonneuve, dealers in men's shoes and furnishings, having outgrown the space of their present premises, are having new fixtures installed at 253 St. Catherine, Maisonneuve. They will have 1,260 square feet of floor space and at the rear of the store, but separated from same, they will have a repair shop of 72 square feet in charge of an expert shoe repairer. H. J. de Villers Sales Co. supply the best class of workingmen's footwear and furnishings. They are asking why the manufacturers who are catering to the working class do not advertise their lines in the trade papers. It now seems, they state, as if the manufacturers are only making fancy shoes and furnishings. Mr. de Villers says he will shortly after the war be catering to 14,000 steel and iron workers. As a great many of these men work night and

day and often on Sundays, they have no use for a dress shirt, but are paying \$3.00 for a pair of working mitts, or \$5.00 for solid workmen's boots.

The very latest idea is the introduction of red-brown leather boots with all sorts and conditions of frocks. These boots are very high and are, of course, laced. The heels are made of brown leather on the Cuban model, and if the right shade of red-brown is chosen such boots may be worn with success in conjunction with white, dark blue or black dresses.

G. W. Charles, late of the Cobourg Felt Co., Cobourg, Ont., has been appointed assistant manager of the Canadian Consolidated Felt Co., Berlin.

A. D. Weber, general manager of the Canadian Consolidated Felt Co., Berlin, who has been confined to the house for the past few weeks with illness, is very much improved.

Roston's Shoes, Limited, Montreal, have been incorporated.

Callum & LeSeuer, who have been in the retail shoe business for some years, at 187 Front St., Sarnia, Ont., have dissolved partnership. R. E. LeSeuer will continue the business. A ten days' special dissolution sale was recently held.

J. S. Townsend, wholesale shoes, Hamilton, carries a line of specialties, and considers that fully 65% of the business done by the house is on these special ranges which it has in stock. The men's and women's lines retail from \$2.50 to \$5.00, and have both push and style to them. Mr. Townsend is devoting considerable attention to novelties worth having, and reports gratifying sales in these lines.

E. S. Hunt, president of the Chatham Shoe Co., Chatham, Ont., was in Toronto last week on business. He expects to start manufacturing in his new plant in a few days.

E. Y. Jones, manager of the Regina branch of the Canadian Consolidated Rubber Co., has been granted leave of absence for overseas service. He will take a lieutenant's course with the artillery.

J. M. S. Carroll, division manager, Montreal, was re-elected a director at the last annual meeting of the Canadian Rubber Co., of Montreal, Limited.

The Woelfle Shoe Co., Berlin, are running at nights in order to get out the work. Some twenty-five of the company's employes have enlisted for overseas service, but every effort is being made to fill all orders as promptly as possible.

Walter E. Yates, Toronto

C. F. Schuszler, Toronto

George J. Cowling, Toronto

### LOOKING AFTER THE CITY TRADE

Walter E. Yates, widely known to the shoe trade, has been appointed city traveler for McLaren & Dallas, wholesale shoes, Toronto, with which firm he has been identified in responsible positions for a number of years. Mr. Yates has a connection of over 25 years with the business. He was born in Hamilton, Ont., and his first position was with John Eastwood & Co. in the stationery line. Then he joined the wholesale footwear establishment of R. H. Greene & Co., in the Ambitious City, in 1891. The firm afterwards became Greene, McLaren & Co., and the business was removed to Toronto. Mr. Yates was with J. A. McLaren & Co., and for several years warehouse manager for McLaren & Dallas. His genial manner and kindly disposition have won him many friends.

### WELL LIKED BY THE SHOE TRADE

C. F. Schuszler, who recently joined the selling staff of the Regal Shoe Co., Toronto, and will cover western and north western Ontario, as well as the city, is an experienced salesman, well liked and well spoken of. He has a practical knowledge of the trade, having entered the factory of the Minister, Myles Shoe Co. several years ago, working for a considerable time in the lasting room. He was then appointed business agent for the Boot and Shoe Workers' Union, which position he filled acceptably. Mr. Schuszler's next appointment was as city traveler for the Minister, Myles Shoe Co., and he also handled the lines of the Nursery Shoe Co., of St. Thomas, having sample rooms in the Toronto Arcade. His many friends are confident that he will make good in his new position.

### WILL COVER EASTERN ONTARIO

Geo. J. Cowling, who for some time past has represented Gourlay & Fogelberg, Ltd., Berlin, in Toronto city, will this season cover Eastern Ontario and Montreal in the interests of his firm. He has also been appointed representative for the same territory for the Galt Shoe Mfg. Co., Galt, Ont. Mr. Cowling began his career in the employ

of the Relindo Shoe Co., Toronto, with whom he remained five years, starting in the shipping room and later becoming city traveler, doing parts of Ontario, as well as Western Canada. He was with the Blachford Shoe Mfg. Co. previous to joining the staff of Gourlay & Fogelberg. Mr. Cowling likes the selling game, and has established a good connection with the retail trade.

### REACHING OUT FOR MORE BUSINESS

Hundreds of small shoe dealers and repairers, working in dingy shops, doing business on limited capital, seem not to realize that they may lift themselves out of the rut and put their business on a profitable basis by exercising the same push and energy as their big brothers. Publicity is the essential thing for any business, large or small, and the little man as well as the big one must advertise, says the "Shoe Repairer."

"That's all very well to say," breaks in the man at the bench, "but where is the money to come from with which to start this advertising campaign?" In response I might say that one of the greatest advertising mediums of every merchant is one that costs him practically nothing—his show window; and yet in nine cases out of ten practically no attention is paid to this silent salesman. Not only is there no attempt made to use it for advertising purposes, but it is not even kept clean and neat, and its contents are frequently only faded lithographs and dead flies. No reasonable person expects the interior of a repair shop to be kept as immaculate as that of a jewelry store, but there is absolutely no reason why the window of a shoeman should not shine with soap and water. Not only will it give him better light for his work, but a store that is bright and clean will attract much more patronage, particularly among the feminine portion of the trade.

But the progressive merchant should aim to make his window pay larger dividends than that—the window should tell the passing people just what he can do and what he has to sell. He should be original, and dress up his window in a way that has never before been attempted in his neighborhood. He should make people observe it as they pass, and tell their friends about it—incidentally spreading abroad his name and business.

## SOME THINGS TRAVELERS ARE UP AGAINST

**The Difficulties of Securing Business and Adjusting Complaints—Snags That are Struck in the Retail Ranks and in Relations With the Factory—A Few Defects That Not Even a Saint Could Patch Up and One of Them is Ill-fitting Qualities—Overcoming Prejudices and Learning How to Manage Men is Splendid Characteristic**

“OH, it's all part of the game. If a man gave me an order too easily, especially if he was a stranger, and not in the habit of buying from me, I would think there was something wrong with him—that he did not intend to pay for the goods, was financially irresponsible, or mentally reckless. Why, to think that any merchant would give a shoe traveler business without being urged or compelled to do so, would make him think the millenium was at hand. In fact, I got an order one time from a man in a northern town, right off the reel, and I was so suspicious of the transaction that I got a special mercantile report on him before sending in the booking to the office.

“You know it takes all kinds of people to make a world, and the shoe traveler meets as many interesting specimens of mankind as a salesman for any other line of goods. I am not going to give you a long rehearsal of the idiosyncrasies of my customers or those with whom some of my friends have come in contact, but there is one man in R—who is all the time trying to stall you off. He tells you to go around and see the other fellows first, and come back to him at the last. This largely increases the amount of work, making you go over a certain portion of it twice. Then, ten to one when you call at the last moment, this ‘stalling’ friend will ask that you wait over longer than you intended to, or will say, ‘Well, I guess you have got enough from the other fellows. You can pass me up this time, but I will do something handsome on your next visit.’

“This is one kind of chap we hate to come in contact with. He lacks decision—he cannot get himself into a mental frame of mind to buy and buy when an opportunity presents itself. He certainly wastes not only much of his own time, thought and energy, but ours as well. I like to meet the man who knows what he wants, when he wants it, and where he wants it. Such a customer is a jewel all too rare.

### The Different Types You Meet

“Oh yes, I have had many funny experiences in the salesmanship game and could relate incidents by the hour. There is the retailer who is always going to give you an order the next time sure, but somehow, like to-morrow, the next time never comes around. Then, there is the retailer who declares that you are a fine fellow, and have all the qualities that go to make a gentleman and a salesman, but that your goods are not exactly right, or something is wrong with the policy of your house, and, therefore, he cannot buy. Another specimen is the dealer who praises the house and declares that he likes to deal with them direct, and not through any traveler, as travelers change, but the house never. Among other notable kinds of prospects that one encounters is the chap who tells you to call around later and then takes good care to leave word that he has gone out of town. And then there is the fellow who makes appointments with travelers and never thinks for one moment of keeping an engagement, or sending word when he cannot come. There is the mean cuss who gives you an order, and before you are out of town, possibly, sends in a cancellation to the factory. There is also the crafty, conceited individual who is always asking you to give him a special discount, or some concession, in the way of longer datings, or extra ‘tiffics’ on the shoe. I even came across one fellow who had the impudence to propose that I divide my commission with him

on the order. I promptly told this nery creature where he got off at, and I do not think he will make such a proposition again.

### Case of Grabbing Too Much

“Then a traveler often has difficulty with his house. I remember my firm started to put out a cheaper line than we were in the habit of selling. They thought they were going to catch all kinds of trade by this method. We had been coralling the five dollar business to a gratifying extent, and our house looked like the coming one in its line. Never mind what the line was—but it was a good line just the same. Well, these shoes were made at a loss, and seriously undermined the better class trade that we had worked up. We were competing against ourselves, so to speak. Then one day the superintendent and the manager got their heads together and concluded that they could improve upon standard patterns, and cut some of those we had down to fit a certain style of last. One western customer gave me an order of several thousand dollars on that selling trip. Naturally, I was delighted with the amount of his business, but when the shoes were shipped him, it was found that none of them would fit. They were too tight across the instep, the ball, or the forepart, while the button boots, instead of fastening at the side, buttoned almost over the middle of the instep. In other words, our firm had been trying to economise and the superintendent, who thought he knew it all, cut down the patterns to fit. When taken to task about it later he said that he thought those in hand were too large, and he and the foreman of the cutting room had come to an arrangement, whereby they would reduce them a size or two. I do not know whether this action was due to an alleged superior knowledge on their part or to a distorted sense of money saving, but this interference cost us several thousand dollars drop in business, not to speak of the prestige of our product.

### Where Economy Meant Dead Loss

“Another of our travelers went down to an eastern city and took an order for two thousand pairs of shoes on a certain last. The firm did not have the standard patterns for this particular last and sought to make some that were in stock to fit. It would have cost about eighteen or twenty dollars to obtain the necessary number of patterns, but they could not see it that way. The result was that the whole order for two thousand pairs of shoes was cancelled the same as a large number of my western orders had been, simply because the footwear would not fit. In the case of the eastern business the goods no more resembled the sample shown than chalk looks like cheese.

“I was talking to another friend of mine, and he had a similar experience with his house. There is a large retailer in a western Ontario city who had got in a case of shoes that were poor fitters. The factory changed superintendents and the new man started to produce better and neater goods. They were built on right lines, proper patterns and shapely lasts. My friend sought to convince the customer who got the former ill-fitting footgear that a big improvement had been made, as he naturally wanted to get his business, but it was no go. He called several times, but on each

occasion the dealer would point to some fifteen pairs high up in one part of the shop and remark: 'See those up there? Well, they are some of yours. No more for me.'

"Finally the traveler got angry and said: 'I know that the shoes that we make now will fit. I know that I can sell them to you for a more reasonable price than you pay for goods of equal style and quality. You are losing money, and so am I, by our not doing business together. In order to convince you that I am right, I want you to do me a favor.'

"What is that?" inquired the merchant.

"Well, you let me have those fifteen pairs which you have on your hands at the invoice price. I would not ask our firm to take them back, as they have been here for some two years, but I will give you my personal cheque right now for the goods.'

"But I do not want you to do anything like that," responded the retailer, 'that would be an imposition upon you.'

"No imposition at all," declared the roadman, 'it is straight business. Send those shoes to my sample room in Toronto, and here is the cheque for them.'

"The retailer took the cheque, the shoes were sent back and farmed out to a bargain house, which was told to sell

them at whatever they would bring. The traveler lost some twenty dollars on the transaction, but he secured a good order from his friend, who would not listen to him so long as those ill-fitting shoes remained in his shop. The new goods were found admirable in every respect, and the dealer, who had so strongly objected to placing an order, is now glad that the traveller adopted such a ruse in order to introduce him to a line on which he makes a long profit and which moves quickly.

"Desperate cases require desperate remedies and the only remedy in the instance mentioned was to get the former ill-fitting footwear out of the shop.

"Yes," declared the speaker, 'if there is some single defect in your goods in the way of stock, finish or workmanship, the dealer can often get rid of them at a loss, and in time will forget about shortcomings. But once dump on him a bunch of ill-fitters, which he cannot unload at any price, and he never seems to get over the grievance. It sticks closer than a bad reputation. The only way is to get the goods out of his shop, even if it costs you money. In shoe selling one of the most important considerations is good fitting qualities, and, after the experience that I and others have gone through, we know exactly what we are talking about.'

## Confidence the Basis of Trade

¶ We simply want to tell you that we feel our customers and the trade in general HAVE CONFIDENCE IN US.

¶ We cannot CONTROL the leather market, but will PROTECT our customers to the LIMIT of our BUYING POWER.

¶ Our warehouse is FILLED TO THE CEILING with Seasonable Goods BOUGHT RIGHT. Send in your orders, we have the GOODS and the SERVICE.

**D. D. HAWTHORNE & CO.**  
27-29 Wellington Street West, Toronto

### YOUR SHOE HEELS INDICATE CHARACTER

Keep the heels of your shoes in good condition. Don't go about with them run down. It doesn't look well, and besides it may have a bad effect on your character, says H. Addington Bruce.

You smile incredulously at this last statement?. Very well. Smile if you please. But I can assure you there is good warrant for my making it.

In New York City there used to be—perhaps there still is—a certain exceedingly practical mission for the redemption of drunkards, tramps and vagabonds of all descriptions.

This mission was connected with a church and great reliance was naturally placed in the redeeming influence of religious teaching. But the people who conducted the mission were also alert to the importance of reckoning with material influences in the reshaping of character.

In many ways they provided for the material well-being of the derelicts who came to them. One way in which they provided for them was by keeping a cobbler busy putting new heels on their shoes.

They did this on the sound theory that a man whose heels are worn away will almost inevitably slouch more or less; that the physical slouchiness will contribute to moral slouchiness; and that by making it easier for a man to stand physically erect, he will find it easier to stand morally erect.

Experience vindicated this policy—as, in fact, it has always vindicated the larger theory of which, after all, this repairing of heels is only a particular application.

The larger theory, to put it briefly, is that mind and body are so intimately related that everything which favorably influences the one is bound to influence the other favorably, and that everything which affects the one unfavorably will also have an unfavorable effect on the other.

So conclusively has this theory been borne out by every-day observation and scientific experiment that to-day the importance of good bodily nourishment as an aid in mental growth is everywhere recognized. The institution of the "school lunch" is a concrete and praiseworthy example

of increasing public appreciation of the interaction between mind and body.

So is the spread of the playground movement, which has as one of its basic principles the theory that muscular strength and physical vigor make for mental and moral sturdiness. In fact, it has been found that juvenile crime decreases in neighborhoods where playgrounds are established.

Hence the suggestion as to the psychic influence of heels is by no means so fantastic as it might seem.

For, obviously, it is easier to walk well and to stand well when the shoe-heels are in good condition than when they are worn away on the back or at the side.

Try this experiment on yourself if you have been negligent in the matter of heels. Make it a point hereafter to keep your shoe-heels in good repair, and note whether or not things seem to go better with you.

### FIVE MILLION DOLLAR RUBBER CARGO

The Blue Funnel liner *Talthybius* arrived in Victoria, B.C., recently from the Orient and included in her cargo was 5,000 tons of rubber from Singapore, valued at \$5,000,000, the greatest shipment ever sent across the Pacific. The rubber is destined for the automobile and tire factories in the United States.

While other shipments have come from the Orient from time to time none of them has ever compared with that carried by the *Talthybius*. They began in the early part of the winter, consignments valued at \$400,000 arriving during December. The shipments increased in value until they reached about \$800,000. This was the largest and most valuable until the *Talthybius* loaded her \$5,000,000 cargo.

Heretofore Brazil has been the course to which manufacturers look for the bulk of their supplies, but it now appears that that country cannot fully meet the demands and that the Malay Peninsula will be drawn upon to a greater extent than ever before for this commodity. Another contributing factor in the diversion of shipments to the Pacific route is the high rate of insurance on the Atlantic as a result of the war. Formerly consignments from Singapore were sent via the Suez Canal and the Mediterranean and thence across the Atlantic, but under present conditions, including the scarcity of tonnage and high freight and war insurance rates, shippers are now taking advantage of the opportunity to send cargoes by the Pacific route. There has been a remarkable growth in the demands for rubber in recent years, and New York got the bulk of shipments until war premiums began to assume large proportions. Then the importers at once looked for some safer and cheaper route and it has thus resulted in the diversion of these consignments to Oriental liners.

### IT FILLS THE BILL WELL

In renewing my subscription I beg to say I get many good pointers from perusing its pages. No shoe man, who considers himself up-to-date, should be without the "Shoe and Leather Journal."  
Seaforth, Ont.                      WALTER G. WILLIS.

### THE BEST AND THE BRIGHTEST

Enclosed please find one dollar renewal subscription to the "Shoe and Leather Journal." Your paper is worth the price many times and is the brightest trade journal in the Dominion.

Yours truly,  
Belleville, Ont.                      W. H. ADAMS.

### A GOOD HABIT TO CONTRACT

Enclosed you will find postal note for 1916. I have got the habit of renewing for the "Shoe and Leather Journal" now and, therefore, find it hard to break myself off it.

There are quite a lot of useful hints in the Journal about the best way to conduct the shoe business, if we would only follow them, but sorry to say we get into a rut and it is hard to break away from it.

Yours truly,  
Trenton, N.S.                      Hugh MacKay.

### WANT HOTEL EFFICIENCY KEPT UP

A strong deputation from the Canadian Commercial Travelers' Association recently asked the Ontario Government for assurances that prohibition would not be allowed to impair the hotel accommodation in the province. President J. A. Cane, of the Canadian Association, W. J. Moody, of Berlin, J. H. Laughton, president of the Ontario Association, and E. A. Zimmerman, all thought that the Government should provide in its prohibition bill for accommodation for the traveling public. There were 20,000 travelers in the province, and the deputation thought that it would be a good idea to saddle the prohibitionists with the responsibility for good hotels. Mr. Moody said that there were grave fears that the drastic temperance legislation would ruin hotel accommodation in the province. The Hon. Mr. Hearst assured the deputation that hotel accommodation would have to be maintained, and the Hon. W. J. Hanna, in answering a suggestion that temperance hotels should also be licensed by the Government, said that the Government intended bringing in a bill having that as its object, with a small fee charged for licenses.

## 22-FOOT GOODYEAR SHOE REPAIRING OUTFIT

**MODEL N**

**T**HIS Outfit represents the highest development in shoe repairing machinery, and meets every demand of modern shoe repairing. It embraces all the essential processes for making new shoes from old ones, giving the maximum of equipment and efficiency in the minimum space. The Outfit has the Goodyear Stitching Machine with all its improvements, including a new style steam generator which uses gas or gasolene for generating the steam, and operates automatically, thereby insuring a uniform heat for keeping the wax in proper condition and requiring little attention from the operator. The Edge Trimming Machine has the new feature of the two shafts, being operated by a single belt, and the cutter grinder is attached directly to the main shaft. This arrangement gives better results with less power.

The Buffing and Scouring Machine has a shaft 57 inches long and carries the following equipment:

- |  |                                   |
|--|-----------------------------------|
| 2 Split Bottom Buffing Rolls           | 2 Flat X-Ray Heel Scouring Wheels |
| 2 "C" Shape X-Ray Heel Scouring Wheels | 1 Heel Breast Scouring Wheel      |
| 1 Pin Wheel Pad Complete               |                                   |

A powerful Blower System removes the dust resulting from the trimming, buffing and scouring operations, and is designed to overcome certain objectionable features of other blowers.

The Finishing Machine has a 78-inch shaft which has all the necessary equipment for black or russet work:

- |  |  |
|--|--|
| 2 Corrugated Rubber Shank Finishing Wheels | 1 Corrugated Rubber Heel Finishing Wheel |
| 1 Corrugated Rubber Bottom Finishing Roll  | 2 Shank and Bottom Brushes               |
| 2 Heel Brushes                             | 1 Stitch Cleaning Brush                  |
| 1 Levelling Roll                           | 1 Bead and Wheel                         |

At the end of the Outfit is the Oscillating Edge Setting Machine which is fitted with union irons and in its motions duplicates hand workmen with quicker and better results.

Each of the machines is operated independently by a friction drive pulley, so that it is necessary to use only those machines which the operator may require. This feature means a saving of power.

All the machines are firmly mounted on legs and driven by a countershaft with carefully adjusted bearings, so that the Outfit runs with very little vibration, and is in every way most efficient.

## WILL LACK OF LEATHER STOP THE WAR

Footwear the Problem Now Rather Than Munitions—Leather Being Used Up so Rapidly that Substitutes are Suggested—Army Shoe Specifications Already Undergoing Marked Changes—Those at Home Will Suffer With Those at War

THE present "Great War" is epoch making in many respects, besides the number and variety of nations and men involved, the weapons and methods employed and the strange economic effects that are already resulting. World markets for some time past have been seriously affected, not only by the withdrawal of this stupendous force of industrial workers, but the demand created for the products they are using with such rapidity has become such that sources of supply bid fair to become soon exhausted. The clothing and footwear trades have experienced so far the most serious results of conditions which promise to become more acute as time passes.

In leather, for instance, the consumption has been such in the past year that tanners have been forced to consider the possibility of the supply of hides becoming so precarious as to make necessary the use of other substances for footwear, both for war use and at home. When one realizes that somewhere in the neighborhood of fifty millions of men at the front and under arms, either in preparation for war or in readiness for its possibility, are wearing out shoe leather at a rate that makes necessary over a quarter of a billion of pairs of shoes a year, he begins to understand the situation. It is stated that for drill purposes alone a pair of good shoes will only last about eight weeks, while trench work uses them up in half that time. The army equipment estimate for "preparedness" alone is four pairs of shoes per man.

A million pairs of shoes, allowing four feet of stock to a pair, would mean four million feet of upper stock or about 100,000 hides. It would take for the soles for these shoes about 60,000 sides, or another 30,000 hides more. Thus 130,000 hides are required for every million pairs of shoes ordered for war purposes, or 6,500,000 hides to supply the men under arms in Europe to-day with a single pair of shoes each. Multiply this by four, the usual number of pairs of shoes allowed per man in equipment estimates, and you have 26,000,000 hides required to keep up the standard equipment. Adding wastage of war, etc., 30,000,000 beef hides would be required for war purposes alone. Where are they to come from with a steadily diminishing supply of cattle both in Europe and abroad. All this fails to take into account, of course, the tremendous requirements called for, for equipment other than footwear, such as belts, saddlery, harness, and the other uses to which leather is put.

European powers are beginning to realize what they are up against in this respect as shown by the recent variations of specifications. Calfskin and even kips have had to be largely abandoned for side leather in British requirements and for oak sole, union and hemlock tannages are already being permitted.

Word comes that the Austrians are already experimenting with wooden soles as well as are some of the Allies for trench work, where in many cases these ought to prove even more suitable than leather. The Italians have completely revised their specifications and Russia is considering for winter wear at least the substitution of felt tops for leather. In a contract pending in the United States for seven million pairs of Russian army boots this question has been raised, upper leather manufacturers there finding it difficult to supply the 49,000,000 feet of upper stock needed to fill the order.

It looks as though in the near future the footwear problem would be as pressing as that even of munitions and that the great European armies might yet be brought practically to a standstill for lack of adequate foot covering. One of the latest indications along this line is a recent British regulation that compels army footwear contractors to buy direct from the tanner.

# MAKING MONEY IN SELLING SPORTING SHOES

The Demand for Rubber Sole Canvas Footwear is Growing By Leaps and Bounds—Good Profits Made, Small Risk Run and Not Much Space Required for Such a Department—How to Feature Tennis Goods and Attract Young People to Your Store

**T**ENNIS, golf, fishing, yachting, cricket, canoeing, athletics, bowling, boating, baseball, camping—in fact this weather brings to mind all the delightful associations and pleasant pursuits of the “good old summer time.” The sport influence in footwear is being seen more and more each year, and now, some of the creations presented for the consideration of the trade are almost as stylish and neat in pattern and design as the more pretentious offerings in colored kid for miladi fair.

Sporting shoes, to use a comprehensive term, are being sold more and more, not only for outing and athletic purposes, but for summer wear under all conditions. They are light, cool, attractive and very reasonable in price. Progressive dealers in the larger cities and towns always carry a large supply of tennis lines, but the average man in the smaller centres requires wakening up. He does not realize the splendid possibilities of stocking shoes which sell particularly well for over six months in the year, and in which there are no changes of last, height of heel, width of toe, etc., to cause them to go out of atyle. It is true the colors may change somewhat, but the general features or outlines of such goods are well preserved. Every day, from Victoria Day right on to Thanksgiving Day, hundreds of dollars will be taken in through the sale of sporting shoes, and the live merchant is the one who will waken to the possibilities of such a department.

## The Specialist Makes the Money

Shoemen have come to realize more and more, in recent years, the necessity of profitable side lines in order to increase the volume of their business, add to their profits and draw people to their stores. All of these side lines can be carried without any extra overhead expenses. Amongst the many different lines come lacrosse, baseball, tennis, cricket, golf and running shoes, and in the winter time hockey and heavy hunting boots. The alert retailer has a splendid opportunity to cash in on all these, if he will only break away from the beaten path. The factories well know that sporting shoes are being bought on a very much larger scale every year, as the record of production shows.

Then, again, it is becoming the universal habit to take a holiday—as people like a few days' enjoyment during the hot season. The very first thing done is to decide on a certain outfit, and one of the most important adjuncts is a pair of comfortable and neat-looking tennis or running shoes. The heavier boots worn in the city seem as much out of place at a holiday resort as does a winter overcoat in sultry July, and give about the same degree of comfort. Rubber footwear holds sway with the soft collar and the breezy flapper blouse. The live dealer is the one who gets in early on the sporting shoe pro-

position—who makes known fact to the residents in his locality or town, and features his stock in appropriate window displays, in which pictures of current athletic events and games of various kinds can be appealingly employed.

## Small Outlay Only Required

Many will argue that too much capital is required to purchase a stock with which to make a first-class showing, which they are anxious to do. Others say that they can make better use of their room and have no intention of devoting any of their valuable space to an experiment. Still other shoemen are playing a game of watch and wait. They prefer to let their fellow shoemen do the missionary work on these new departments about which they hear so much, rather than take a chance themselves. They would rather wait until the sporting goods department becomes a regular institution in the Canadian shoe store. These and many other arguments are put up. This is only natural. Did you ever start anything that you weren't taking some chance? Why, when you first enter the shoe business, you are running the risk of failure through inexperience, lack of capital, hard times to come and so on.

As regards capital, it is a reasonable outlay. A little study will convince you of this fact, as athletic and summer outing shoes cost you only about one-fifth the price or less, of the standard lines of heavier shoes, and people can be persuaded to purchase several pairs of the lighter goods very often, when they are in the store buying a pair of \$5.00 shoes, especially in the summer time. Now, as to the space taken up by the sporting goods department, this cannot be called a real excuse, as a man who puts up an argument of this kind to you, is away behind the times. You are in business to make money, and if you are unable to give yourself proper scope, then you are pretty sure of failure, or if

not that, you will never go any higher than you are now. A man giving an excuse of this sort is pretty much like the man who decides to cut down his window space, or use it as a storeroom for goods. In these days, every wide awake retailer is perfectly well aware of the necessity of proper window facilities. He knows that to cut down his present display space would be committing suicide as far as the welfare of his business is concerned. This same principle applies to the “lack of space” holler.

## Why Are You in Business?

If you have no room for a line of goods that has a steady and growing demand, a line that allows you a good profit, and a line that your competitor is handling to great advantage, then, what is the use of being in business at all. Sporting goods are of much lighter quality and

SHOE

# RETAILERS HEAR HOW LASTS ARE PRODUCED

Interesting Address Delivered Before the Shoemen of Toronto—The Development of an Industry Which Appears to be as Old as Shoemaking Itself—How the Trade Can Win Added Patronage by Pushing Shoe Trees—Closer Co-Operation Urged

**A**LL shoemen know that shoes are made over a last but just how that last is turned out, the various processes it undergoes from the rough block to the finished article and the history and development of the industry are not so widely understood.

Much instructive and timely information on the subject was presented to the Toronto Shoe Retailers' Association at their regular monthly meeting held in Temple Building on April 27th, the speaker being Charles M. Iredale, sales manager of the Canada Last Co., Limited, Toronto, whose grandfather started in the last business in the Queen City over fifty-five years ago. The gathering was deeply interested in the address and President Howard C. Blachford, presided.

Mr. Iredale illustrated his remarks by showing the different kinds of lasts employed in shoemaking, pictures of the machines used and presented the subject matter in a clear and entertaining manner, for which he was accorded a hearty vote of thanks. At the next meeting of the Association it is likely that early closing, for the summer months at any rate, will be taken up and concerted action taken. It is felt by the members that the hours of the shoe merchants and their staffs are altogether too long.

Mr. Iredale congratulated the Association on the successful dinner held recently and on the effort being made to gain, first hand, as much knowledge as possible and to understand all conditions in reference to their business. At the outset he defined the difference between a last and a shoe tree. A last is a form the desired shape and size, over which each boot must be moulded. A tree is a form to place in a boot for the purpose of removing the wrinkles and other evidences of wear, increasing thereby the comfort and wear.

## History of the Last

"When lasts were first used I have been unable to find out, but we do know that the first lasts were made by hand, when a man would take a block and, with an axe, bench knife and shave would whittle until he produced what he wanted. I have seen one man who could make lasts by hand with surprising speed and accuracy. About sixty years ago a machine was invented by a man named Blanchard which changed all this, and made it possible to reproduce as many lasts as required from one model. Through all these years the principle upon which this machine was based has never been improved upon. The machines have been improved to the extent that they will now turn rights or lefts, automatic speed changes, and other minor details which add to the output, but the principle of grading the sizes so that the correct measurements are produced in the right proportion has not been altered, for the reason that it works perfectly and is as simple as possible.

"Canadian last making history would hardly be complete without mentioning the fact that my grandfather started in the last business in Toronto 55 years ago last November, and the business has been conducted continuously since then; a record of which we feel justly proud.

## The Rough Block Forms

"The method of getting the blocks forms the most picturesque part of last making. The lumberjack cuts in the winter the fine stately maple and sleds it to the mill. Here the logs are cut in lengths, then sectioned from heart to bark, in the same manner as you would cut a pie. This is done, not only to save timber, but to make the grain the strongest to withstand use, and in this way the bark side

is always towards the sole. These blocks are then turned to shapes on machines similar to the one that I shall explain later, though not as sensitive, but heavier and stronger. After being turned they are placed in sheds and thoroughly dried before shipping to the last maker. The handling of these blocks by the manufacturer also requires tact. They will absorb moisture if not properly kept and, to insure absolute dryness when being turned, we have been forced to enlarge our kilns during the past few months and are now finishing as fine a kiln system as any last factory in America.

## The Turner and Lathe Machines

"These blocks are first taken to the turner, who trims off the extra wood on a saw. They are now placed in the lathe.

C. M. IREDALE, TORONTO

This machine, which I spoke of before, has a model in one end of the swinging frame, the block being placed in the other. The model revolving slowly against the guide wheel makes the swing move in and out from it to conform with the model. The rough block being in the other end of this swing runs against the cutter head, which is the same diameter as the guide wheel. The cutter head starts its work at the toe of the last, runs to the heel and automatically stops. It will also turn five sizes larger or smaller than the model grading without fail just as it should.

"You will notice now that there is a stub of wood on the end of the last. The one on the toe being underneath and thereby leaving the whole toe turned in the machine, so that each toe is turned exactly to the model. The lasts are then taken to the heeler and toe saw, which cuts the heels as shown. This machine also grades the sizes, making all heels the desired shape and also the proper distance from the toe. You can see that it is but an easy matter to remove the stub from the toe.

"The last is now in its correct shape, and there remains only the trimming for the different classes of work and either

# HOW MUCH NET PROFIT DO YOU MAKE IN SHOES?

**There is Only One Way to Stop the Price Cutting Habit and that is by Showing the Retailer His Cost of Selling—In Order to Build Up Net Profits for a Healthy Business the Merchant Must Have Records to Go By—Success in Footwear Game**

**I** THOUGHT that I made money last year, but on taking stock, I find that I broke just about even."

If every shoe retailer was open minded and did not lull himself into the illusive belief that he was getting such and such a profit, whereas he should know definitely, he would not have to make a confession like the foregoing at the close of the year.

The eye of the retailer must ever be kept upon the amount of stock in hand, a sufficient price mark-up, the expense of doing business, careful, discriminating buying, and the elimination of slow moving lines. He cannot sell shoes at any old figure and make money. He must systematize his business and know where he is at, otherwise he is like a ship at sea without a chart or compass.

The business man of to-day must remember that all profits should be figured on the sale of an article and not on the cost price, because the expense of operating an establishment is always figured on the cash received, which means the sales. If no satisfactory sales are effected there are no profits. Many important points on the subject of net profits were brought home in a recent address delivered before the Philadelphia Shoe Retailers' Association by Ben Jacobson, who stated that every banker, credit manager and sales manager is interested in the welfare of the retailer. Every time a shoe dealer fails he not only hurts himself but the house that he buys from and his competitor.

"It is therefore the duty of all," continued the speaker, "to see that your business neighbor conducts his store in a profitable way. The only one who profits by failures is the tricky auctioneer and he in turn hurts the legitimate merchant. The problem of how to make all retailers successful has been given a great deal of attention by the government and individuals.

## Money Lost in Shoe Business

"The average retailer has had little chance to learn the art of scientific merchandising, and business to-day is a science. Most anybody can buy and sell shoes, but not everybody can create 'net profit.' Mr. McGowin explained at the annual convention that the average net profit on shoes in the State of Pennsylvania was only one per cent. This alone shows how many must have lost their money in the shoe business. This annual loss can be avoided by extending commercial education to every dealer and with the ever changing business methods we all need all the education we can get.

"A good part of commercial education consists of reading all the business news one can get hold of, and not only read them and pass them along as one would some murder case, but think over the items you have read, digest them and compare the business item with your own business.

## Not Built on Price Cutting

"Modern business is not built on price-cutting, still that is the only method used by the uneducated merchant to sell his goods and when you talk to one of these price-cutting merchants he will quote some one else who does the same thing. There is only one way to stop the price-cutting habit and that is by showing the dealer his cost of selling. I asked a storekeeper one day how much net profit he made on a pair of shoes selling at \$4.00 that cost him \$3.00—he thought it was about 50 cents. I asked him if he would be surprised

I showed him that his clerk made more money on the sale

than he did. This dealer was like most other dealers who guess at figures—rather inclined to secrecy.

"I finally persuaded him to allow the clerk to be present—after we figured all his expenses we found it cost this dealer 22 per cent. to do business—he, therefore, made a net profit of 12 cents on this sale. This dealer had some imaginary figures that it cost him 20 per cent. to do business and being that he made \$1.00 on a \$3.00 investment, he figures that as 33 per cent.; deducting the 20 per cent. from the 33 left him 13 per cent. and he therefore figures four times 13 per cent. or 52 cents. I finally convinced him that his profit was really only 25 per cent. and the expenses being 22 per cent. his net profit is only 3 per cent. or 12 cents, not allowing for depreciations on bad stocks. The selling expense of his clerk who gets \$18.00 a week and sells about \$300.00 a week, is 6 per cent.—the clerk then was getting 24 cents on the \$4.00 sale, or twice as much as the owner. This same dealer now averages 28 per cent. on his sales, and let me tell you that the dealer who makes the best profit does a better business because he usually spends part of the extra profit for store service.

## Should Plan for the Future

"A leading magazine printed an article on the 'business death rate' showing that the average life of a retail store is less than fifteen years. This condition is not at all surprising when you see how many stores are opened without any planning for the future. I know two stores that were opened about the same time last year. One doubled its capital the first six months in business—the other lost a third of its capital. One had the advice of a specialist and actual figures to be guided by, while the other had the advice of salesmen who were anxious to sell the opening bill and no figures whatever to work on.

There is a certain false pride among some men who will not admit that they are in any way puzzled about their business affairs. Just as soon as we can get these men to seek light and commercial education, business in general will be improved.

## What Reliable Records Will Do

"As to the value of statistics I will guarantee any merchant a better net profit by keeping complete records of his stock, sales, expenses, gross and net profits—all this can be done by spending less than half an hour a day. The man who has these records is not only a better merchant but a better man to do business with. In order to build net profits for a healthy business, the dealer must have records to go by. I defy anyone in this room to show me a truly successful merchant who has not the necessary business records to be guided by.

"By all means, gentlemen, whether you now keep records or not, remember that profits are to be figured on the sale of the article and not the cost, because all expenses of conducting a retail store are always figured on the amount of money taken in, which means the sale.

Don't practice class distinction in the pursuit of your business. The man with the dust and dirt-covered shoes and the spattered overalls merits the same courteous attention you give to your dressed-up customer. And many times he proves to be your best patron.

## WHEN LEG BOOT AND "STOGIES" WERE WORN

In the Early Days Every Man Was His Own Cobbler and Strips Were Cut Off a Roll of Sole Leather and Sold Customers by the Pound for Repairing—Pebble Goat Ties Were the First Oxfords—Boots Were Sold by Number—The Question "Is This the Latest Style?" was Never Heard—Any Heavy, Clumsy Shoe Found Ready Buyer

**I**N these days of overnight changes in footwear creations and rapidly ascending figures for shoes, it is interesting to recall the time when three dollars was a top notch price and the styles were known a year in advance. Retailers then had no terror of what the morrow might bring forth. They were not alarmed over how many pairs were likely to be left on their hands and have to be sacrificed owing to the sudden whim of my lady fair or the decree of fashion. Every type of boot could, like a shovel, hammer or saw, be sold out to the very last one. In a recent edition of the Boot and Shoe Recorder the story is told in an entertaining way by an old timer who after speaking of the mid-season and even mid-mid-season models of nowadays, says:

We knew it would be boots for winter and low shoes for summer. By boots we mean standing leg boots with wooden pegged bottoms for men, and brogans of the same type for summer. The women had a choice between calfskin pegged bottom "stogies" and pebble goat ties.

### What's A Standing Leg Boot?

How many are there who know what a standing leg boot was and is, because there are lots of them worn yet. How many know what a brogan is? How many know what a pegged bottom was? And how many can go back in their mind's eye to a pebble goat tie? And, what for the love of Mike is a "stogie" unless it is something a Pittsburger smokes?

Standing leg boots were cut from heavy calf, stiff tops

some twelve to sixteen inches high, bottoms, one full sole and tap, put on with wooden pegs.

Brogans were of the same material and bottomed the same way. The top just cleared the ankle and was laced with three eyelets or fastened with a buckle. Some had side goring. They were called "Creoles," "Creedmores" or "Plow Shoes," according to the cut or pattern.

Pebble goat ties were our first oxfords and were cut from heavy kid or calf with a grain similar to the so-called seal or walrus.

"Stogies" were made for women who worked out of doors or who could not afford the more expensive kinds made of serge, or fine hand-sewn kid shoes.

Long before we knew welts or McKays, in the mountain country of the Southwest, every merchant considered these shoes his staple articles of footwear. We sold thousands of cases of them to the pioneers who blazed the trails and opened that wonderful country to the march of progress.

In the little country store, where I as a boy had my first training in the commercial school, we handled boots and brogans almost entirely. The better shoes were ordered special and were very few and far between.

### The Peg Float in Use

Looking through a findings catalogue recently I saw an advertisement of a peg cutter and a peg float. To a lot of young shoe men these articles would be an unknown quantity. But I have used both. The manufacturers of peg bottomed shoes did not always ship a finished product.

**A** SIMPLE, neat and effective showing of Easter models made by the Haines Shoe House in their attractive new premises at Smith's Falls, Ont. The impressive display was arranged by the manager, A.L. Wright.

They seemed to think that when they pegged the bottom their work was done. We clerks in the old days had a lot of extra work put on us because of that very careless manner of the manufacturer.

Let's go back and see how a sale was made in a small country store in the hills twenty-five years ago. A tall mountaineer enters and says: "I reckon I'll get me a pair of boots."

"What number?" asks the clerk. Be it known that sizes were "numbers" in those days when sizes and widths were unknown. Boots were made on the same width and the size was stamped on the sole in plain figures.

"About a nine, I reckon," answers the customer.

Clerk goes down the store and drags out from under the counter or table a long, coffin-shaped box, takes the lid off and looks at the bottoms of the boots. Finding the nine he pulls out the pair and runs his hand down into the boot, feeling for pegs. Yes, they are there all right. Long, sharp wooden pegs that would puncture the foot of a man no matter how tough his sole.

#### **Pulls Boot Over Peg Cutter**

Clerk goes to the peg cutter and pulls the boot on over it. The cutter was fastened to the table on an iron standard something like the present day repair jack of the cobbler. Back and forth the boot was drawn until the pegs were cut out of the inside. Then the peg float was brought into use and the pegs cut out of the front part which the cutter did not reach.

The customer was then given a clean, brand new pair of cotton socks and he removed his home knit ones and tried on the boot over the store socks. Some of the big fellows had feet that required much pulling and stamping to get the boot on. A favorite method of procedure was to kick the toes of the boot against the wall or door frame.

The price was always under three dollars. And perhaps you doubt the ability of the mountaineer to judge leather. They were experts. Most of them could tell you more about calfskins and tannage than some of the experts of to-day.

I never heard one of them ask, "Is this the latest style?" either. They knew it was "plumb in fashion" all the time. And his summer shoes were known to him a year ahead of the season as brogans, or a shorter and lighter edition of the boot.

The women wore shoes very similar to the men's. Some of them even wore the heavy brogan and a few I have seen with standing leg boots on their feet. This was the exception to the rule, however, and applied to women who worked in the fields or timber with their husbands or fathers.

The women's shoes we sold mostly, were heavy, clumsy affairs of split calf, with bottoms fastened with pegs or nails. We sold a lot of shoes with heavy nailed bottoms called "Hungarian Nailed."

#### **The Poor Children Suffered**

Children's shoes were simply atrocities in the shape of footwear. I have wondered how the average hill-born child ever reached manhood without having his feet permanently crippled. Heavy, peg bottomed, copper tipped, straight last with no comfort nor flexibility for young feet, the poor children had but little enjoyment of their shoes. That many of them went barefooted in warm weather accounts for the fact that most all escaped being disabled by the frightful things they wore in the cold season.

A great many people went barefooted in summer time. Men, women, boys and girls, all of the poorer classes, discarded their shoes at the first sign of spring and did not put them on again until the frost of the autumn. The average boy of sixteen years could run all day over the sharpest flint rocks with no sign of a puncture. Can you imagine

it? Think how the sand and pebbles hurt your feet when you go in bathing at the seashore! Those hill boys had soles as tough as a horse's hoof.

I have seen a group of women on their way to church each carrying her shoes in her hands, to save wear, and a few yards from the door of the meeting house they all sat down and put on their shoes before entering. They figured that their feet would wear longer than their shoes.

The more wealthy people, land owners, saw mill proprietors, planters, etc., who could afford better shoes, came in and ordered special pairs, paying a high price without murmuring. The men ordered hand made boots. Their women ordered hand-sewn shoes. The children were content with the better grades of boots provided they had copper toes and red tops.

#### **Real Boots for Riders**

We had a class of trade that insisted on a special boot made for cattle men or riders. These boots were made with high heels of the Cuban type and high tops of fancy design. The younger men of the cattle-raising class were very proud of their boots and paid up to ten dollars a pair.

When the recent spasm of side lace boots for women came along, I recalled some old side lace serge shoes that laid on the shelves of that store for years. They must have been twenty years old when I saw them first. We had one pair of hand-made boots that had been ordered for a rich old planter who died before he ever put them on. His widow brought them back and traded them in for some other articles. We had that pair for a long time. One day I traded them to a negro for some green hides. But I was careful not to tell him they were a dead man's boots. He would never in the world have put them on.

In those days every man was his own cobbler and we sold a lot of sole leather for half soling or tapping. I can see that old roll of sole leather in the warehouse this minute. We had to cut off strips and sell it by the pound and that meant hard work to a boy clerk. It meant sharpening up a knife, a lot of tough cutting and carving and "elbow grease." But, as our boss used to say, it was all in the making of a merchant.

A pleasant break in the monotony of country store life was the coming of the "Drummers," as traveling salesmen were called. What a jolly lot of big, hearty, fat men they were. It seems to me that all shoe drummers in those days were fat. The life they led, outdoors, driving in all kinds of weather, over the roughest roads in the world gave them appetites and they were just the most lively and lovable lot of men I ever knew. Some of them traveled six months to cover their territories and never rode on a railway train for one single mile.

#### **THEY WEAR AMPLE SIZE SHOES**

A veteran shoe store clerk was recently quoted as saying that 40 years ago the prevailing sizes of women's shoes were from No. 1 to No. 4½, while now they are from 4½ to No. 7. He attributes the change to woman's more athletic pursuits.

But, while our mothers did not play lawn tennis and dance so much, yet they worked twelve hours a day on housework, which should equally develop the feet. No doubt the feeling that it is foolish to wear too small shoes has caused some change. Whatever the cause, many observers will agree that women are growing taller and larger and the feet grow with the rest of the body.

Small feet used to be considered a sign of beauty. Some critics, notably Chicago to St. Louis, used to jolly each other interminably about the size of the feet of their respective girls. This old idea sounds rather like the Chinese, who to produce small feet resorted to foot binding. In this working age, the business girl is quite as likely to do her work comfortably on a No. 6 shoe as a No. 2.

# GIVING FOOT COMFORT TO YOUR CUSTOMERS

**A Knowledge of the Formation and Bones of the Foot is a Great Help in Properly Fitting Shoes and in Fitting Appliances for the Correction of Ailments—How It Is Necessary to Supplement Nature with Artificial Functionaries—The Causes of Several Pedal Troubles and How They Can Be Remedied in Satisfactory Way.**

By DR. C. VERMILYEA

**I**N the human foot there are twenty-six bones. It will be readily understood that Nature must provide a very fine set of mechanism to control the action of these bones and keep them in their proper relations one with the other. Modern civilization has invented fashions and customs in wearing shoes that destroy, to a great extent, Nature's functions in the feet. It, therefore, becomes necessary to supplement nature with artificial functionaries.

## The Bones of Human Foot

Beginning at the heel, the bones of the foot are as follows: the os calcis, or heel bone, astragalus, or ankle bone, scaphoid, cuboid, three cuneiform, five metatarsals, fourteen phalanges.

In cases of flat foot the scaphoid bone will be found protruding at the inside of the arch. These small bones, scaphoid, cuboid and cuneiform, form the mechanism of the plantar, or instep arch. Forward from these bones are the five metatarsals, which are the connecting shafts between the phalanges, or toe bones, and the plantar arch. It is in these shafts that we find the transverse or metatarsal arch of the foot. This arch extends inside the flesh across the bottom of the foot from just back of the small toe to a similar position back of the great toe joint. Here we find often the cause of the greatest of pains in the foot.

## Ball of the Foot Spreads

The first indication of breaking down of this arch is the spreading of the shoes, as when this arch goes down the bone structure of the ball of the foot spreads. When the transverse arch goes down there is also a tendency for the toes to curl under, and this condition aggravates and sometimes causes bunions. You can easily demonstrate the effect of this arch going down. Take a foot that has the toes curled under and, with your thumb, press firmly upwards at the centre of the ball of the foot and you will see an immediate straightening action on the toes. This will be more pronounced if at the same time you press firmly with the thumb and forefinger at each side of the foot just back of the toes. The condition that exists in these cases is that the transverse arch in going down has created a pulling of the ligaments which ultimately cramps the toes under.

The great majority of cases of callouses on the balls of the feet, are caused directly by the falling of the transverse arch which allows the joints of the metatarsal bones to place undue pressure upon the tissues thus causing the formation of the callosities. Morton's toe is also a direct result of weakness in this arch. Dr. Morton first discovered the cause of this condition, therefore the name, "Morton's Toe." This generally occurs between or back of the small toe and its adjoining neighbor, and the pain is most severe. As a matter of fact two bones are pressing upon a nerve and it requires very little imagination to appreciate the amount of pain this means to the sufferer.

The plantar, or instep arch, is better understood than the metatarsal. Here, however, we find that there is

always something to be learned by experience. It is not necessary for this arch to be flat for it to cause considerable trouble. Place the tips of your thumb and fingers upon the table and press your weight upon them and you will see that the arch thus formed in the hand will be forced downwards and that the fingers will extend about an inch further than with no weight.

## Forcing Down of Instep Arch

This is exactly what occurs in the feet of 99% of the human race to-day when they stand upon them. When the plantar arch of the foot is forced down in this manner there is a pulling of muscles and ligaments that may be felt anywhere from the calf of the leg to the small of the back. Sometimes this pulling creates only a weariness and at other times it creates severe pain which is frequently treated as

rheumatism, sciatica, etc. The plantar arch of the normal foot is much lower at the outside than at the inside of the foot. Therefore, when this arch is crowded down by the weight of the body, there is a tendency, in fact a certainty, of the ankle bone rotating, thus causing what is commonly called weak ankles. When this ankle bone turns over in this manner, it throws the leg bones out of position and thus creates a tendency to bow legs and other deformities.

Take your child's building blocks, pile them into a pyramid and remove one of the bottom blocks and you bring down the whole structure. You do a very similar thing with your limbs when you allow one little bone to get out of place in the foot. Nature provides muscles and ligaments to hold these bones in position, but you have abused Nature, by wearing heels on your shoes, by covering your feet up with leather, by wearing ill-fitting boots, by neglecting the toilet of the feet and in many other ways.

## Knowledge is Help in Fitting

For a very small sum any surgical instrument house will supply you with the skeleton of the foot. I believe the price is in the neighborhood of \$2.50. With this skeleton in front of you it will be a simple matter to establish in your mind the general mechanical formation of the bone structure of the foot and a knowledge of this formation is a mighty help in properly fitting shoes and in fitting appliances for the correction of ailments. In subsequent articles I will take up the matter of fitting appliances for correction and prevention of foot ailments.

The second annual convention of the Retail Merchants' Association of New Brunswick was held in Fredericton recently. Among the most interesting events of the session was the visit to several factories, including those of the Hartt Boot & Shoe Co., the John Palmer Co., and the Palmer-McLellan Shoe Pack Co. The delegates were entertained at a banquet by the Fredericton Association, and among the principal speakers were E. M. Trowern, of Toronto, Dominion secretary, who pointed out that the Retail Merchants' Association had been formed to eliminate all evil practices.

# SAYS MANUFACTURERS DO NOT KEEP PROMISES

**Retailer Declares They Should Not Mislead the Trade in the Matter of Promised Deliveries—Leading Producer Retorts that No Industry Can Guarantee Anything Now Owing to Labor Problem and Rising Costs—Pledges Made in Good Faith Not Fulfilled Owing to Unforeseen Circumstances—The Virtue of Mutual Patience**

“**Y**ES, sir, I think that you should draw attention in your JOURNAL to the fact that shoe manufacturers should keep their promises to retailers particularly in the matter of delivery of perishable, seasonable goods, which, if they do not reach us in time, are likely to result in a serious loss. One can never tell how long the demand for such and such a model, color or combination will last now-a-days.

“Why, the other day I went to a manufacturer in an adjoining city, who runs an in-stock department, and, after buying a liberal consignment and inquiring about the delivery, the salesman said: ‘Mr. T., you can go home feeling perfectly safe about the receipt of these lines. They will reach your city almost as soon as you do, and you have my definite word!’

## Goods Are Still on the Way

“Well, sir, that was three weeks ago, and these goods have not come to hand yet, although I have written, telegraphed, telephoned, and used every other means to secure them. Needless to say, this is the last order that firm will ever get out of me. Perhaps I am a Jonah, but I took dinner with another salesman the other day, and bought some white buck and white kid shoes of him—five cases. He said I could have them in sixteen days without a doubt. I reminded him that he had made illusive promises before, but this time he assured me that his pledge was as binding as his bond.

“That was thirty days ago, and the shoes have not come to hand yet, and I can get no satisfaction from the firm. The trouble with too many salesmen and travelers is that they make all sorts of promises and then go away and speedily forget them. It is a shame for manufacturers and wholesalers to play fast and loose with the retailer, particularly in the delivery of women’s shoes, when the styles are liable to change in a breath and certain colors die almost before they are born.”

## Sudden Rush to the Colors

This is the one side of the case. The salesman of a leading maker of women’s shoes, mentioned as being one of the offenders, when asked if his firm ever made promises to retailers, which were not kept, said:—“Yes, but remember we have not intentionally lied or misrepresented things. We have calculated on a certain output each day. We have not been able to get that production, for the simple reason that we are unable to secure the help owing to so many of our people enlisting. When I made that promise to Mr. T., we had enough employees in our factory to turn out the goods in the regular course of each day’s production, but now-a-days, when an edge setter, an edge trimmer, a lasting or pulling over operator, the man on an in-seamer, a bottom finisher, a heel breaster, or some other machine leaves, we cannot replace such a one in a day. The result is that shoes in process of making are held up by the absence of a skilled operator.

“We do our utmost to get in other men to take the place of those who have joined the colors, and perhaps it is ten days, or even two weeks, before we are successful. Then it takes the new ones some little time to get accustomed to the surroundings. I tell you our men are enlisting on all sides. The officers of the local regiment have gone through our factory three times soliciting recruits. We have lost

over one hundred employees since the war began, but are not complaining. We do not seek to prevent any man from going and are anxious to do our little bit. We realize that we must put up with some inconvenience and discomfort, delay and loss. Why, no less than five of our employees the other day, left at noon, merely remarking to the superintendent that they would not be back, and at four o’clock, we saw them on the streets in khaki.

## Be Patient and Considerate

“So you see that we have not willingly misrepresented the delivery of goods. We are up against unforeseen circumstances, the same as everybody else, and the retailer must be patient and considerate. If two or three of his best clerks suddenly left him on a busy Saturday afternoon or night when the store was full of people, he would be in very much the same predicament that we find ourselves,—in a rush season, when some of our best operators suddenly quit to go to the front. I can furnish the shoe merchant with no better illustration of what we have to contend with in our line than the one I have just given in regard to his business. We must all learn to bear and forbear, for these are unusual times and the situation every now and then is decidedly critical. I have referred only to the labor problem, but remember there is the scarcity of leather and its tremendously increasing costs as well as the growing expense for everything used in the production of shoes.”

## DO NOT SEND MONEY LOOSELY

In making remittance for subscription to the JOURNAL, it is always advisable for the subscriber to send money, either by registered letter, postal note, or express order. To enclose a bank bill loosely in an envelope often results in the remittance not reaching its destination. A merchant who is willing to pay twice for a paper in the one year certainly appreciates it. It is a strong testimonial to the worth and excellence of the publication. Earl Stewart, proprietor of the Real Shoe Store, Owen Sound, Ont., in a recent letter, says:—

“You will find enclosed, money order for the SHOE AND LEATHER JOURNAL. This is the second time that I have had to remit. I should not have sent the first remittance in the way I did, but at that time, the post-office was closed, and I took a chance. I felt pretty sore about the letter with the enclosed subscription never reaching you, but, of course, you are not to blame. I have always been satisfied with your progressive paper, and think it well worth the money. That is the reason I am remitting once more by money order. I wish you every success and encouragement in your good work.”

## THE ARTICLES ARE INSTRUCTIVE

“Enclosed find money order for one year’s subscription to your valuable paper. We appreciate very much the instructive and helpful articles which appear in the Shoe and Leather Journal from time to time.”

R. Neill,  
Guelph, Ont. Per H. E. Cosford, Manager.

# QUALITY SHOES RETAILED AT FAIR CASH PRICE

**The Market To-day Makes it Imperative that Every Shoeman Buy the Way That He Can Get the Most for His Money—Selling Figure Should be Considered After the Quality is Established—Cash Business is the Most Desirable and Satisfactory**

**I**N connection with the starting of a shoe store, the merchandise is the medium on which the anticipated profit must be made and merchandise is one of the first considerations, says the Boot and Shoe Recorder.

The kind of merchandise would be determined by the location of the store and the class of trade that will patronize it on account of its location or that could be drawn there by advertising.

The aim should be the right merchandise at the right price for the right customer. Many errors have been made in having the wrong goods and prices for the class of people that frequented the neighborhood of the store. There are some exceptions where an old and established trade will go to a store in an out of the way location. The new store should seek the kind of shoes to fit the location and the pocket books found there.

If the shoes are made to your order, have your name stamped in the shank where it will not wear off quickly, and a silk woven lining label and pull straps with your name on same in men's boots, are desirable assets to you.

You will then work up a reputation with your own name attached. There are cases, as with well-known and advertised lines, when it pays to co-operate by adding your name with the known brand. Unless the shoes are well-known use your own name only.

Strive to put your own name and brand before the public at every opportunity. Put your name on shoe laces, dressing packages, inner soles, in fact everything you sell. It is more important than many realize.

The market to-day makes imperative that each shoeman buy the way he can get the most for his money, that will result in the greatest present and future profit to his store.

The quality of your shoes should stand for Known Quality or should mean that after being put upon the market. The quality will long be remembered after the price is forgotten. Quality should be the watch word even in cheap goods; it can be done by adding a few cents to the cost of the shoe and have it made right and good for the price. Even if the profit is a little less on the price it will be more than offset by mutual satisfaction to the buyer and seller. How many times you have seen otherwise good shoes ruined for the want of a few cents added to the stock or workmanship? It is too late to remedy this after the complaining customer returns, except at considerable cost; do it while the shoes are being made. If the shoes are sold right, the public will appreciate quality merchandise. It is much better to pay a few cents more for an article and get something that will give reasonable satisfaction than to buy at less price and soon have trouble that will cost you a great deal in time and annoyance. Just stop and think that you are one of the public and there are thousands feeling just the same and only waiting for the man who will sell them quality shoes at the right price.

The price should be considered after the Quality is established and it should be based upon the known cost of doing business, with a net profit added to it. These two amounts plus the invoice cost will determine the retail price. The new store must at first estimate the cost to do business assisted by statistics that are available from certain sources and this estimate should be promptly corrected by actual experience in your own store.

The price is not the dominant factor to present to the customer unless it is a very low one as on the cheaper lines.

The price should always follow Quality. Do not be afraid to ask a good price for good shoes and good service.

A cash business is the most desirable and satisfactory to all parties. The dealer knows where he stands when he looks at his cash sales, but if he is looking at a large volume of charges, he does not know definitely where he stands. It takes more capital to do a charge business than if on a cash basis and you must ask higher prices in order to cover yourself, and this may prevent meeting competition. It is easier to do the volume of business on the credit system, but what does this count when you consider the losses that are sure to go with the credit business.

Some large organizations with a special credit department force to watch charge accounts, have made a success of this, but for the small store to attempt this is wrong with very few exceptions, particularly in larger cities.

We might conclude by saying "Quality Merchandise" retailed at a fair cash price is pretty near the ideal way to run a successful shoe store.

## A VETERAN IN COMMERCIAL RANKS

P. R. Corson, who covers Eastern Ontario, Quebec and the Maritime Provinces for the Regal Shoe Co., Toronto, is one of the veteran commercial travelers of Canada, and is widely known all over the Dominion. Born in Port Perry, Ont., he came to Toronto at an early age and was for a time a clerk in the historic firm of John Catto & Son, 59 King

P. R. CORSON, TORONTO

street east, who have been in business over half a century. Later, Mr. Corson spent some time in the mammoth departmental store of John Wanamaker, Philadelphia. He has occupied a number of important positions on the road for leading firms and two years ago joined the staff of the Regal Shoe Co., of which his son, C. H. Corson, is the aggressive general sales manager. Mr. Corson left this week on an extended trip throughout the Eastern Provinces with a fine range of new autumn samples.

*INTERIOR of the Ingledeu Shoe Store, Vancouver. It is one of the brightest and most inviting footwear homes in the West as a glance at the well arranged stock and splendid fitting facilities will reveal.*

### OUTSTANDING STREAK OF MEANNESS

It does not require a great expenditure of brains or energy to be polite and obliging, but some persons appear to rejoice in any streak of meanness or selfishness. "I ran across a sample of this the other week," remarked a Western traveler. "I was anxious to get the range of a company manufacturing women's shoes across the border to carry with my Canadian lines. I asked the firm where I could see some of their latest models. They replied that S— in a city not far from my home had bought their goods and that he would no doubt be pleased to let me have a look at some of the stock which he carried. Armed with a letter of introduction I made my way to the dealer mentioned. I told him who I was and spoke of the probability of my taking out the range for the coming season. He did not have the welcome sign hung out and manifested but little interest in what I had to say, even after he had read the letter. I then ventured the query if I might have a glance at some of the women's wels that he had lately got in from the firm. 'No' he responded with freezing accent. 'I have never made a d— cent out of that company and I do not intend to take down any cartons to let you look over their stuff. If the firm want you so badly, let them send you a few samples. I have no time to bother.' That fellow certainly takes the premium for discourtesy and brusqueness. I bade him a polite good-day and departed but I was not sore as you might imagine for there are so many decent, considerate and obliging chaps in the trade that you soon forget the crabs and lobsters."

### IT PAYS SOME MEN TO BE OBLIGING

In an eastern city there is one shoe dealer who does not care to pull with his associates. A firm down the street had their button machine give out the other day and sent a boy up to B—'s place with a request that he let him have the use of his machine to shift the fastenings on a pair of boots for a customer who was waiting in the shop. Mr. B— said all right, and the youth, after accomplishing the task, was starting for the door when he was hailed by the proprietor, who said that twenty cents was coming to him. The lad was taken by surprise, but paid the money,

which is twice the amount that any dealer asks even a private person who is not a customer for the work of shifting buttons. On his return the messenger told his manager what had happened. The latter replied, "Well, never mind. It is a long lane that has no turning."

A couple of weeks after, a clerk from the store of B— walked in with a pair of shoes and asked to use the button machine. "You are from B—'s are you not?" inquired the manager. "Yes," declared the clerk. "Well, you get out of here as quickly as you entered. Your boss charged us twenty cents the other day for the use of his outfit when any other man in the business would have been only too glad to oblige us. While there is no one in the trade that we would not accommodate under such circumstances, we draw the line with you. Now get and tell your employer just what I have said." The fellow got in double quick time.

### BRINGING THE CUSTOMER TO DECISION

"Yes, we run across some peculiar and cranky people in the store," declared a Winnipeg dealer the other day. "You see that fellow who has just gone out. He lacks the quality or faculty of making up his mind. He had tried on at least a dozen pairs and thought at last he fancied one. Well, a salesman must help such parties to a decision, or they would never end the transaction. The way I generally do is to remark pleasantly, 'You will like those shoes all right and they fit you well. I feel sure they will give you good service and that you will have no cause to regret your choice. Shall I send your old ones up or do you wish to wear them home?' This generally aids the slow moving, deliberate individual in arriving at the end of his shoe hunting journey, otherwise he might go on for another half hour."

The ratepayers of Simcoe, Ont., will vote upon a by-law in the near future to grant a loan of twenty thousand dollars to a shoe company and exemption from taxes for a term of years. The loan is repayable in twenty annual instalments at the rate of five and one-half per cent. It is expected that the measure will carry and the new plant be in operation early in the autumn.

# Leather Trade Jottings

War Conditions Continue Unabated—Practically No Price for Leather—Tanners Working Cautiously—Some Lines of Stock Not Available—Conditions Similar All Over World—Where and When Will it End ?

“UPPER leather,” said a prominent leather man the other day, “will yet reach a dollar basis. Calfskin is already well on the way and it is only a matter of a very short while when it will be over the line.” The upper leather situation is becoming more and more acute. The best grades of heavy stuff are being cleaned up to supply war contractors and light grades in the best tannages for fine shoes are shooting off in the direction of Mars. Veritably in the leather business you do not know what a day will bring forth. This about expresses the situation in leather to-day. There is a fair supply in some grades where the demand is practically undisturbed and for this reason there is little disturbance of values in heavy staples of the cheap class. But when you touch anything that is affected by the war, directly or indirectly, you start things jumping. Tanners seem to be playing a waiting game and are selling their product from day to day, refusing tempting offers for futures.

## War Orders

There is naturally considerable interest in the requirements of the belligerents in Europe. Italy is placing an order for 3,000,000 pairs of shoes on this side and Russia is negotiating one of 7,000,000 pairs with American manufacturers. The tremendous amount of leather required for these shoes is causing some anxiety. It is estimated that 49,000,000 feet of upper stock, or 2,400,000 sides will be required and 400,000 sides of sole leather. The sole leather has been arranged for but trouble is being experienced in procuring the required amount of upper. The order is being held back to see if felt cannot be used for the tops. England has ordered another 6,000,000 pairs of shoes to be ready for June 1st, which shows that she expects that something will be doing between now and July 1st. France is buying shoes in United States, Canada and other outside countries, but seems to be making a good deal of her own requirements in this line. Report comes that wooden soles are being used for trench warfare. Some of these are from Holland and some from the far East. As a sample of what is making leather so excitable a product just now, Italy purchased from United States about \$9,000,000 worth of shoes in the last six months. She bought \$500,000 last year.

## German Sole Leather

According to “Das Berliner Tageblatt” the German Government will not grant an export license for the large quantity of sole leather purchased some time ago in Germany for the Austrian military authorities. The total amount of the purchased leather is about eight million crowns; German leather manufacturers have convinced the German authorities that the export of a similar quantity of sole leather would have serious consequences for the German leather and shoe industry, as no doubt prices of sole leather must rise in Germany then, notwithstanding the maximum prices fixed by the authorities. In the meantime the sole leather market in Austria-Hungary is in a precarious condition. The shortage is growing rapidly notwithstanding the fact that the Austrian Government has commandeered all stocks of sole leather for military purposes.

## American Leather Conditions

Tanners, especially of light-weight upper leather, such as calf, goat and sheep, are facing a scarcity of raw stock,

with higher prices asked every week. This, says Hide and Leather, with labor troubles and soaring chemicals, keeps them puzzled as to what price to place upon their leather. So long as the European war lasts values may be expected to continue at top figures, for all surplus material is absorbed in export goods. The result is a pinching of the supply for domestic use and as the home demand increases every year, this shortage of the supply is causing higher values. Side upper leather is having a big call. Chrome sides in all finishes well sold up and prices are hardening. Calfskins are so scarce and the prices so high that many buyers take the best imitations in side leathers as a substitute. Split leather in wax and flexible finish in better demand the past week, but prices not satisfactory to the tanner. Sheep leather scarce and dealers cannot supply their trade. Prices being advanced to keep pace with raw stock. Glazed kid in big demand both for foreign and domestic use. Prices move upward every day but this does not check demand.

## English War Orders

It is understood that the Russian Government has placed an order in England for at least 4,000,000 pairs of boots and shoes for the army, and the quantity may eventually be still larger. The Italian government is expected to also contract for a large lot of army shoes. The British trade papers figure that all the leather in Great Britain will be wanted for these war orders, and maybe further shipments of Canadian and American leather.

It is reported that the boot to be turned out on the first contracts is of blucher pattern, a little higher in the leg than the British boot. They will be screwed and stitched aloft, with a billed sole, so there need not be much changing of plant. The boot is intended for summer campaigning, and has a sole of rather lighter substance than is usual. It is said that only black leathers have been mentioned for the uppers, but efforts are being made to get a slightly wider choice in that respect.

These ankle boots, as they are called, are wanted by the end of June if the war is still in progress. While the war lasts the Russian requirements in boots from Great Britain will be 1,000,000 pairs per month.

Chrome, wax kip and vegetable sides are to be used, it is understood, and on account of early delivery the British trade papers state that American sides may be accepted. The bottom stock will probably be all English.

## New Factory for Simcoe

A recent despatch from Simcoe says: J. W. Phillips, manager of the Unique Shoe Company of Toronto, was in town on Monday and Tuesday and met the town council on both evenings in special session. As the result of prolonged discussions an agreement was finally ratified by the council and accepted by Mr. Phillips for his company, under the terms of which the town agrees to lend the company \$20,000 for twenty years at 5½ per cent. interest per annum, repayable in twenty equal annual instalments, the loan to be secured by mortgage and notes of the company. The company agrees to purchase a suitable site, erect thereon a building to cost at least \$10,000, equip it with machinery and employ a minimum of 45 skilled operatives. The company is a fast growing and very prosperous concern. It is away behind with its orders and its capacity output is sold for the balance of the year.

## A BRIGHT BUBBER LIGHT

See Front Cover

A. R. Kaufman, general manager of the Kaufman Rubber Co., Berlin, has been associated with the rubber footwear industry ever since his father established the Merchants Rubber Co., which was organized in 1903. On the formation of the Kaufman Rubber Co., in 1908, A. R. Kaufman held the office of secretary-treasurer for a couple of years and was then made general manager of the organization, a position which he has filled with much energy and aggressiveness. He is a young man in the early thirties, who has a thorough acquaintance with the practical end of the business. Having spent some years in the factory he knows intimately the working of every detail of production. He was educated in the public school and collegiate institute of Berlin and at Toronto University. Mr. Kaufman devotes his attention and ability unreservedly to the development of the Kaufman Rubber Co., whose business has shown such a marvellous growth. A. R. Kaufman has always been an enthusiast in advancing the welfare and prosperity of Berlin. He is an active member of the Board of Trade and also of the Canadian Club, and has taken great interest in recruiting. The firm is holding the positions open for the many members of the office and mechanical staff who have joined the overseas forces on their return from the front. Mr. Kaufman's absorption in business, however, has not deterred him from being an enthusiastic supporter of hockey, while in the summer he is fond of motoring, and has driven a car through many portions of the United States and Canada. He is also a loyal disciple of Izaak Walton, but of late years has not been able to indulge in the pastime of fishing as much as he would like, owing to the large claims made upon his time by the business, to which he is so whole-heartedly devoted, and, to use a colloquial expression, is "on the job morning, noon and night."

He is one of the finest examples the shoe trade of Canada affords of the way the younger generation is supplying the right kind of men to put her industries in the foreground of the world's commercial enterprises.

## NEWSY HAPPENINGS IN SHORT SHAPE

Shoe and leather merchants throughout St. John, N.B., are optimistic regarding business conditions. During the last month the sales began to pick up and steadily increased and now are better than at any time since the war began. The opening of navigation on the St. John and Kennebecasis rivers is always welcomed by merchants as residents secure a new supply of goods to last them for the summer.

J. & T. Bell, of Montreal, report that white shoes, especially kid, are in strong demand for immediate delivery, the Paris foxed and Diamond foxed models being leading sellers. The demand in women's shoes is all for 8-inch lines, in gunmetals and in combination colors as well as all white and colors. Battleship grey and Java brown are very popular. Of course the gunmetal and cloth models are steady sellers too. They are showing a smart new last in a college boot or a walking boot laced with low heel and recede toe. It is made in brown calf and gunmetal. Colonials are going very strong in popular shades with the Ritz pump a close second for favor. Men's styles for fall are plain, being more conservative than usual, with a tendency to the bal effect on English lasts.

From all parts of the Dominion come gratifying reports of the volume of Easter business done in the footwear line. Owing to the festival being observed rather late this season and the fact that there were several warm days preceding the holiday, the purchasers of fine foot toggery were numerous and evidenced that there is plenty of money in circulation. There was a big demand for all high cuts in colored kid for adies and liberal prices were paid. The country was searched or supplies in white and colored goods, and had shoemen in the larger cities and towns been able to secure as many pairs

as they desired, the amount of business done by them would have been far greater. Jobbers report that sorting trade is brisk and travelers now out with new samples declare that so far buying has been very satisfactory in spite of the increased prices, which average from ten to fifteen per cent. on all lines, particularly on kid shoes. There is a steady marked increase in the number of combinations shown and worn. On white uppers, vamps are seen in brown, tan, grey, ivory, champagne and black. Two-tone effects are also moving very nicely in the larger cities.

Toronto Shoe Retailers' Association have had large badges printed with the name of the association thereon and also that of the person wearing the decoration. Each name appears in large letters and at the bottom are the words—"Glad to know you; who are you?" This enables all the members to become acquainted easily. The badge is worn on the coat by every retailer at the meetings and at the close is collected by Secretary Edward Cook and given out again at the next sitting so that they will do service all the time. The idea is a good one and brings the shoemen more closely in touch with one another.

Ed. Lynch, who represents the Minister-Myles Shoe Co., Toronto, in Western Canada, left this week on an extended trip through the Prairie Provinces.

L. S. Odell, Montreal, who has been ill in the hospital in Toronto, for some time, is now much better and expects to return to Montreal at an early date.

The shoe retailers in Toronto, east of the Don, have entered into an arrangement whereby they will close their stores every Wednesday during the next five months—May, June, July, August and September. Such an agreement has worked out very satisfactorily in the past.

A very serious accident occurred recently in Bowmanville when Jack Gilbert was riding to work on his bicycle. The walks were very slippery and when he was opposite Fred Foley's shoe store the wheel either caught in a rut or skidded and he went headlong into one of the side plate, glass windows, smashing the glass into many small pieces and sustaining severe injury to his head, which was cut badly.

Owing to the high cost of leather, thread, rubber cement and other supplies the shoe repairers of Ottawa have raised their prices 15 per cent.

Wm. Chamberlain, of Getty & Scott, Limited, Galt, Ont., in discussing trade conditions recently said the travelers of the firm had been instructed that the prices which they had with them when starting out would be the set prices for the entire trip, and the last customers called upon by them could buy goods at the same figure as those first visited. The firm make this definite statement to relieve any uncertainty that may exist in the minds of retailers and to encourage them to wait for the salesman. The Classic samples are larger and more attractive this season than ever, and the colors and combinations, together with the neat appearance and exclusive styles, have met with a very encouraging reception. The firm report, so favorably have the models been received, that up to the present, the increase in orders has been the largest in the history of the company. Recently one large concern placed with them an order for over \$50,000 in women's wels alone.

D. Lorne McGibbon, of Montreal, was bereaved again last week when Captain Gilbert McGibbon, one of the Princess Pats, was reported as having succumbed to wounds received in battle. Capt. McGibbon was the second nephew of Mr. McGibbon who has been killed at the front. The other was Lance-Corporal Fred Fisher, V.C., for whom a memorial tablet erected at McGill University was unveiled last week. Dr. Roy McGibbon, who was wounded early in the war, is back in the battle zone again. D. Lorne McGibbon himself is honorary colonel of the 21st Battery, and says he would be overseas if his physician only permitted him to depart.

# Stray Shots from Solomon

"Through idleness of the hands the house drop-peth through." There is many a business that is being slowly swamped by small leaks. There is

too little regard amongst em-  
WATCH THE ployees for the flying minutes,  
LEAKS the proper use of which means

much in a year to the establish-  
ment. Ten minutes wasted by a half dozen hands in a store means a whole hour a day, three working days in a month, and thirty-nine days in a year. But this amount of time and more is frequently squandered in the most wanton manner, not only by employees but often by employers themselves. People who would faint at the thought of stealing money seem to have little compunction about pilfering time. The man who gives light weight or short measure, is pilloried as a scoundrel, but the fellow who holds back his time may teach a Sunday School class, or be president of an Endeavor Society, and think the two things compatible. The "Greater than Solomon" said "Render unto Caesar the things that are Caesar's." A man owes it to himself, as well as the firm who pays his salary, to give full measure in time and attention to the business in hand; anything short of that is fraud. The business man who idles away opportunities for making money or improving his prospects, is on no higher plane than the clerk who does not earn his salary. Down in the West Indies the shiftless negroes are accustomed to piously attribute all their troubles from the failure of the banana crop to a dripping roof to "Gor-a-Mighty." There are lots of lazy, slovenly business men who blame everybody but themselves for misfortune that is as certain to follow neglect as colic is green apples.

o o o o

In this city recently a very effective advertisement was exploited by a local concern. The citizens awoke one morning to find upon the sidewalk the stencilled outlines of a pair of  
HOW DO feet of unusual proportions that  
THEY POINT? gave the impression that the  
city had been visited during the  
night by a legion of giants. The steps all led towards the centre of the city and converged at a certain establishment. The words of Solomon, "Remove thy foot from evil," suggest the question at the commencement of this paragraph. When you find a man's foot turned in the direction of evil it needs not the foresight of a seer to say that he will wind up on the street or in the penitentiary. There is no such thing as chance. Everything depends upon the direction in which a man's shoes point as to the goal he attains. If he sits down and twists his legs about the rungs of an arm chair his goal will be a corner in the almshouse. If his toes

point in the direction of the saloon and gambling hell his fortune will be that of the seedy individual looking for odd jobs, the blear-eyed, red-nosed soak or the close-cropped toiler who labors under the disability of a ball and chain. Young man, have your feet just begun to point in the direction of that vestibule of hell where sits the scarlet woman? Are you herding with the giddy fools who follow the calliope of the devil's circus? You have spent in the last two or three months much more than you have earned, and your feet are already in the mire of debt. You have had thoughts lately that have fairly staggered your conscience. Do you expect to stand this siege of the "principalities and powers of darkness"? Fool! "Remove thy foot." If you have to leave your boots, pull out! If you have to cut off the right foot and the left, too, and crawl out, delay not! "Remove thy foot."

o o o o

"Envy not the man of violence." Leave low, cunning, unscrupulous assassins like Nero to their thrones; give ambitious, blood-thirsty adventurers like Napoleon their fame; covet

DANGEROUS not the influence and emoluments  
MODELS of political cut-throats like Walpole. The world worships success

and half the time is not over particular as to how it is attained. When you are looking for a hero eschew these pot-metal heroes that embody the lowest instincts of those whom God originally made in his own image. There is a man who has made what people call a success of life. He is comparatively young and has managed to accumulate a couple of hundred thousand dollars. The making of money has become such a passion that he is as soulless as a graven image. He has lost every vestige of honor and faithfully lives up to the motto, "Make money honestly if you can, but make it anyway." Not an employee respects him. He grinds his help, lies so uniformly and cheerfully that no one about him believes his word, and those who do business with him are careful to have their transactions in black and white. He will gloat more over chiseling a concern out of a few dollars discount or allowance than an ordinary business man will rejoice over a profitable legitimate deal. The outside world sees his "success," but if you want to know whether this creature is worthy your emulation draw a little closer to the pedestal and behold how hollow and rotten the idol is. Young man, be careful of your  
ideals. Before you  
make your cast get a  
man for your subject  
or you may perpetuate  
the features of a thing  
or a devil.

*Solomon*

## RETAILERS HEAR HOW LASTS ARE PRODUCED

(Continued from page 22)

hinging or block sawing. When all the work is finished they are scoured to remove all turning marks and other roughness, which is done on coated soft wheels so as not to make any holes. They are then polished on a buffing machine and are then ready to ship.

### Dealers Should Push Shoe Trees

"Trees are, of course, made by the same process. A word here along the line of shoe trees would not, I think, be amiss. The shoe retailer who is not pushing this line is missing an opportunity not only to increase his present profit, but to

LATEST IMPROVED SMALL CUTTER HEAD LAST LATHE

build trade for the future. Human beings, on the average, are bound to return to where they believe that they have received the best value. Taking this as a basis you should endeavor to sell each customer a pair of trees with the next pair of shoes, the use of which will keep the shoes looking better, make them feel better, wear better and leave the impression that the shoes were good value.

"Let me make a plea for closer co-operation among the allied shoe industries of Canada to raise the standard style of Canadian shoes to the highest possible point. Much has been done along this line in the last few years, but there yet remains a great deal to be accomplished.

## MAKING BIG MONEY SELLING SPORTING LINES

(Continued from page 23)

cheaper material than the ordinary, everyday footgear, and as a result sell cheaper; a good profit is allowed, in many cases much more than on some of your regular lines. A good deal less

space is taken up in this department than one would imagine. If you open up on a modest scale, one or two sections will give you plenty of room with some to spare. If you go into the matter on a more elaborate scale, you could set aside a certain part of the store, part or whole of the back section, for instance. The above spaces will allow for stocking of full supplies of the different lines of goods. By going slowly at first, every dealer can judge for himself just about how to distribute his different varieties of sporting shoes, and what space they require, as some of them naturally have a larger demand than others. Then, there are a lot of accessories for this department that can be stocked in with your findings department. Therefore, summing up, after a little thought, the strength of some of the principal eries against installing a department of this kind in your establishment, are you not convinced that it would pay you to go ahead and take a chance with the odds hardly as much, and certainly no more, against you than they are in the different branches which you now conduct?

### Drawing Card for the Young

Another reason which should influence you in favor of a sporting goods department, is the very much added drawing power which your store would possess in the way of attracting the younger trade of the town. This is no light advantage for any dealer to have. If he has what the young folks are after, they will patronize his place every time, where they would otherwise be as liable as not to purchase at some other shoe store, or at the athletic outfitters. Dress a window every little while, frequently in the more appropriate seasons, and see the young folk and for that matter, the older heads too, stop and examine them closely. These days, everyone is thinking of hot weather comforts, and a bright, well dressed display of outing goods will strike the chord in them, which you are trying to reach, just the same as luscious appearing pie on a window sill appeals to a passing tramp. They will not only sell themselves, but will aid as feeders to regular sales.

Dress seasonable windows of this nature: When the holiday season is beginning, think out a scheme for a display of holiday footwear. Showcards will enable you to explain the merits of the showing. Talk along the lines of desirability of comfort during hot weather, seasonable footwear, fresh appearance which a pair of white canvas shoes lend on a summer day, and other such readers which, backed up by a good display, cannot help but sell your stock.

### Make Snappy, Seasonable Displays

Advertise, not only through your window display space, but also through every other means in your power. Use the interior of the store as a source of advertising. Most shoe stores nowadays have a couple of silent salesmen showcases placed near the entrance, and these will be found invaluable in advertising any lines which a proprietor may desire to feature. They are very often one of his main assets when any new line is being given special attention. In one store a whole showcase is given over to the display of sporting shoes alone. This makes a very fine exhibit, and attracts the eye instantly on entering. If one of these cases is not convenient, exhibits can be made at other points throughout the store. Be sure, however, that you make your display seasonable. A showing of skating boots and skates is not conducive to more profits, when made in June. Neither is a display of canvas outing shoes likely to increase your turnover, when made in December. When the warm weather prevails, make warm weather displays, and when the frost king arrives, do your best to make an attractive showing of winter goods.

*The Just Wright*  
MADE IN MASS. SHOE

### Club No. 206

Gun Metal Bal. New City Pattern. Custom Toe.  
¾ Newark Heel. Sizes C 5 to 10½, D 5 to 10½.

# AN ANNOUNCEMENT

## PREPARE FOR PROSPERITY.

The Regal plan of SHOES PLUS SERVICE presents unusual possibilities and genuine opportunity for Profit and Prestige in selling Regal Shoes.

It provides for actually making some live merchant in every good town who believes in the advantages of co-operation—a partner in Regal progress.

It throws open to him the lessons learned in 25 years of successful retailing—the complete experience of the world's greatest chain of retail shoe stores—the experience of an organization that has grown from a \$1,500 capital to a \$5,000,000 corporation—by adherence to an ideal and an idea.

It links up the local merchant with Regal Prestige based on past performance, and the accumulative effect of years of national advertising and service.

It points out the way to reap the benefits of a great national campaign in newspapers and magazines, which will start with this announcement.

Write for the list of national publications, and actual proofs of the advertisements to be inserted in magazines and the metropolitan dailies—this Spring—next Fall.

It places our advertising department at your disposal, to help solve your particular problems. **Try it.**

It submits a co-operative window display service that has caused comment even on blase Broadway. **Ask us to explain it.**

It reveals merchandising secrets which are the outgrowth of Regal experience.

Ask us to submit one or two illustrations to show how they can be adopted and adapted to advantage in your particular business.

It offers the service of the Regal Architectural Department to give you the benefit of our experience in the installation of store fronts and interior arrangements, which cover a series of experiments in more than a hundred stores from Boston to San Francisco.

Give us an opportunity to demonstrate its advantages to you.

It embodies every form of co-operative selling helps—catalogues, announcement cards, insert slips, moving picture slides, posters, etc., etc. **Ask us to show you.**

# THE REGAL SHOE COMPANY

102 Atlantic Avenue, Toronto

Executive Offices, Regal Bldg., Boston, Mass.

# MERCHANT with VISION.

## PROFIT and PRESTIGE in REGAL SHOES.

The Regal Plan of shoes plus service provides for a system of zone distribution that is the most advanced step ever taken by any shoe manufacturer to bring his product and policy nearer to the merchant.

It carries the privilege of conference and sales council with Regal Zone Managers. Consider this your invitation to ask any Zone Manager to demonstrate the benefits of this service.

It gives in practical, common sense form, a course in salesmanship for retail shoe salesmen and women, that will give impetus to any store, and tells how Regal salesmen have been trained. **Ask to see a synopsis and a chapter of this book.**

It anticipates sending our trained salesmen to your store, when you need them—and training your salesmen in our store if you wish to avail yourself of this service.

It contemplates an opportunity to have your window trimmer occasionally work with the New York Window Trimming Department—if you so desire—and having one of our window trimming staff, upon request, visit your store.

It gives the local merchant the benefit of a scientific method of retail shoe accounting, combining our experience with an investigation of the Harvard Research Bureau, and studying the methods adopted by more than a thousand representative shoe retailers in this country.

**Ask to see some of the practical forms we have had worked out by some of the most expert efficiency engineers—to show investment and turn-over in comparative form each month. Ask to see a suggestion of a budget as a “bogie”—a comparative analysis of sales by grades, indicating revenue in each class of merchandise sold—daily cash reports—expense analysis—profit and loss statements, etc.**

This is what we mean by **“SHOES PLUS SERVICE”** and it is going to give the word “co-operation” new life and new meaning—and take it out of the realm of fiction and make it a real fact.

The Regal Plan in its scope—in its interpretation and anticipation of the merchants requirements, and the possibilities it offers for profit and prestige—in the value it places on the retailer's position in his town—this plan sets a new standard in American manufacturing and retailing history.

No merchant should stop short of the fullest investigation because the **REGAL PLAN** is behind the **REGAL PRODUCT** and the **SHOES** back up the **PLAN**.

# THE REGAL SHOE COMPANY

102 Atlantic Avenue, Toronto

Executive Offices, Regal Bldg., Boston, Mass.

**P**EOPLE tell us we are making the best rubber heel on the market.

We believe that it's true. We make three grades, the "Maltese Cross," the "Lion" and the "Victor," and the "Maltese Cross," as now made, is certainly the most satisfactory heel that we have ever seen.

There are two things to consider in buying heels—the springiness or resiliency that gives ease and comfort, and the durability or resistance to wear.

Maltese Cross heels have both of these qualities to the highest degree. Get a sample lot and test or compare them.

They are heels that you'll be glad to recommend.

## Gutta Percha & Rubber, Limited

Regina, Saskatoon, Calgary, Edmonton, Vancouver.

# Rubber Boot and Shoe Matters

Fall Buying Completed—Rubber Manufacturers Appear Well Satisfied—Retail Stocks Well Cleaned Up—Tennis and Sporting Goods Have Had Good Start—No Apparent Prospect of Change in Prices

**T**HE selling season is practically over, although some of the more distant points have not been fully covered.

The absence of any special inducement for early ordering has made some a little dilatory, but the strong market conditions and the absolute impossibility of shading prices later has seemed to satisfy most dealers that there was nothing to be gained by holding off. The attractiveness of this year's samples, which contain an unusual number of novelties or at least variations from ordinary lines, has also had a good deal to do with making the sales volume considerably larger than last year at this time. The month of April has been favorable to the clearing up of stocks and really from the retail standpoint the rubber business has not often been in as favorable a situation.

## Sporting and Tennis Goods

There has already been a good movement in sporting goods, notwithstanding the fact that the season has been so backward. Golfing usually begins with the disappearance of the snow and by May 1st there has been as a rule a fair movement in this line. Business was a little slower starting this year but it has already almost reached the mark for last season. It is too early to say much for other lines, although the attractiveness of the new season's showing has had the effect of increasing interest. During the present month no doubt there will be a general movement, although some dealers say that the war will undoubtedly have a considerable effect upon all classes of sporting goods.

## Summer Footwear

Most dealers anticipate a good season in lighter rubber footwear on account of the prevalence of delicate shades in women's summer footwear. There is no doubt that whether light leathers are "washable" or not, most women will seek protection against inclement weather on account of the shoes rather than themselves. For this reason many retailers are keeping well stocked up with light-weight rubbers and for the reason that so many colored and covered heels are in use the full-sized rubber shoe will be found largely in demand. Already some dealers report an accelerated demand for fancy light-colored rubbers to match shoes and it will undoubtedly happen that there will be a shortage in these lines before the summer is fairly under way. The expensiveness of summer footwear alone will necessitate its protection so that a larger summer season in women's rubbers may safely be anticipated.

## Crude Rubber Conditions

The crude rubber market remains about the same, although the largely accelerated demand for rubber for tires and mechanical purposes has had the effect of solidifying the market somewhat. The steady influx of the cultivated product, which so far has not been much interrupted, and the fact that the more general use of the vacuum process for drying obviates the necessity for carrying large raw stocks are both helping to keep the market from getting "jumpy." Manufacturers are buying mostly for immediate requirements, notwithstanding the report that there has been some steady large buying going on quietly. Latex pale crepe is quoted at 87c. and up, island fine para at 74c. Shipments are being carefully watched and the fact that little raw rubber is now going to the central powers or even to neutral countries adjacent is probably responsible for the keeping of the market in its present easy state. In Ger-

many the situation has become so acute that they are using all kinds of substitutes and the complaint is general that the government seizes all the best available stuff in raw and reclaimed and nothing but offal is left for regular purposes. Synthetic rubber does not seem to loom large, notwithstanding the promises by German experts of wonderful developments along this line.

## Enlarging Range of Rubber Products

Crude rubber is a commodity about which one hears much less these days. The demand for it is increasing steadily and rapidly. New uses are being found for it constantly. Never before has the number of manufactured articles been so numerous and varied as to-day. In the United States alone the consumption of crude rubber in 1915 was in the neighborhood of 90,000 tons, while the production of all grades of manufactured rubber merchandise is estimated at 140,000 tons.

Colonel S. P. Colt, president of the United States Rubber Co., in discussing the wonderful development of both the crude and manufactured rubber industries, says:

"Probably very few people outside of the trade even to-day know to whom and what we are indebted for the great number and variety of rubber articles that we are enjoying. I refer to Charles Goodyear and to his discovery of the vulcanization of rubber about 1844. Prior to that time rubber goods could not be manufactured successfully. For instance, if you had bought a hot water bottle (and I doubt if they were made then) the rubber would have run soon after you had filled it. If you had bought a rubber coat and worn it in a sleet storm it would have cracked from the cold. Charles Goodyear discovered a process for treating rubber with sulphur at a temperature of 230 degrees, which brought about a chemical change in the commodity, so that it was no longer affected by an ordinary degree of either cold or heat.

"This process was patented by Mr. Goodyear in 1844. There are still four companies in existence, all important subsidiaries of the United States Rubber Company, which were the first to secure licenses from Mr. Goodyear to use the process. This occurred about seventy years ago, long before any other companies now using the Goodyear name came into existence. So you will see that we are by far the oldest as well as the largest manufacturers of rubber in the world under the Goodyear patent."

## Big Rubber Plant to be Erected

The Goodyear Tire and Rubber Company will erect one of the largest and most up-to-date plants for the manufacture of tires in Canada at the corner of Ninth street and Lake Shore road, New Toronto. The factory will be a fire-proof structure and will be constructed of brick and steel. The site was purchased from F. O. Murchison recently, and large gangs of men have been engaged to prepare the land for active construction work. Arrangements have been made with the Grand Trunk Railway to build a siding into the new site to facilitate the shipping of the company's products. When the plant is in full operation it is estimated that over 300 men will be employed. The Goodyear Tire and Rubber Company have at present one of the largest rubber plants in Canada at Bowmanville, Ont. It is stated, however, that it is the intention of the company to use this factory solely for the manufacture of rubber heels and soles and that the proposed plant at New Toronto will be engaged in the making of automobile tires.

# AMONG THE SHOE MEN.

C. Switzer has opened a shoe repair shop in Sunderland, Ont.

Geo. W. Sisson died recently at Bethany, Ont., in his 66th year. M. H. Sisson of the United Shoe Dealers, Lindsay, is a brother.

John Hughes, shoe repairer of Lindsay, has enlisted with the 109th Battalion, for overseas service. His business will be under the management of Robt. Cornforth, during his absence.

C. P. Brown, dealer in dry goods, shoes and men's furnishings, Colborne, Ont., recently assigned to Charles Bonnick, Toronto. The stock and fixtures are valued at \$20,970.

The German military authorities, who have just banned the wide skirt, now announce that waste of leather in high boots for women must also cease.

Clark Bros., Limited, of St. Stephen, N.B., in their new models are showing a fine range of colonials with large tongue and buckles in metal and leather to match the various shades of kid. The offerings come in white, ivory, pearl grey, blue, bronze, Havana brown, black and other colors and are meeting with a splendid reception. This firm are also showing covered Louis wood heels on all their leading high cuts and pumps.

E. R. Gavin, of Fort William, Ont., was in Toronto and Montreal recently calling upon the trade.

Frank Bauslaugh, of John Agnew, Limited, Brantford, Ont., was in Boston, New York and other centres recently on a purchasing trip.

More than a hundred women of Windsor and vicinity who "forgot" to pay duty on fashionable footwear purchased in Detroit were stopped by sharp-eyed customs officials at Windsor ferry dock on Good Friday.

"We have advanced our prices considerably," writes a leading member of the trade, "and we believe that they will be increased again before a great while owing to the extreme scarcity of and in many cases, the impossibility of obtaining supplies of all leathers that are required, particularly in the higher grades. The manufacturer to-day is put to his wits end in order to secure stock and the end of the trouble does not appear to be in sight."

Howard C. Blachford, who is president of the Toronto Shoe Retailers' Association, and has always taken a deep

interest in matters military, has passed the qualifying examination and is now a lieutenant in the 12th York Rangers.

R. C. Colt, of Montreal, who was recently elected a director of the Canadian Consolidated Rubber Co., and is purchasing agent for that organization, was in Toronto and Berlin lately on a business trip.

John Sinclair, of the Barrie Tanning Co., Barrie, was in Montreal and Toronto recently calling upon the trade.

Another large firm doing business in Quebec have sent out notices to their customers stating that they cannot accept any more orders until October 1st and that owing to the scarcity and constantly advancing quotations for leather, they have been compelled to withdraw prices. Practically all concerns doing business with the jobbing trade have withdrawn their prices and cannot take any more orders for a considerable time, except on certain lines.

Frank Hickey has been appointed manager of W. F. Cassidy's shoe store, Amherst, N.S., and has entered upon his new duties.

H. J. McMahon has opened a new shoe and men's furnishing store in Chesterville, Ont.

A. W. Saunders, shoe dealer, Bloor St. West, Toronto, has discontinued.

Some manufacturers of rubber heels have recently increased their prices by twenty-five cents a dozen.

The town of Oshawa, which recently appointed an industrial commissioner, is conducting negotiations for a shoe factory.

D. Ruben, shoe retailer, of Picton, Ont., has opened a second store in that town, which is under the personal supervision of Miss Ruben. Mr. Ruben will conduct business in both the old and the new stands.

H. Wood, late with Robt. Wilson, shoe retailer, 73 King street east, Hamilton, Ont., has been appointed manager of the Palace Shoe Store, Barton street, that city.

Master Kenneth Anderson, son of S. J. Anderson, shoe traveler, Kingston, spent a few days in Toronto with his father last week.

C. H. Parry, of C. H. Parry & Co., Copper Cliff, Ont., was in Toronto on Saturday on a buying expedition.

Koch & Hass, shoe dealers, Berlin, Ont., have sold out to S. R. Ernst.

The shoe stock of James Elmhurst, Port McNicoll, Ont., suffered considerable damage recently from smoke and water, owing to a fire breaking out in P. H. Beattie's drug store, next door. Mr. Elmhurst moved nearly all his goods out on to the street, having no insurance on them.

The employees of the Muskoka Leather Co., Bracebridge, Ont., have recently received a 10 per cent. increase in wages.

W. E. Wilson, of London, who recently promoted the Owen Sound Shoe Mfg. Co., and whose real name, it appears, is Paul E. Guay, pleaded guilty lately to a charge of bigamy and was sentenced to two years in the penitentiary at Kingston. Guay was born in the province of Quebec and was married ten years ago in Lynn, Mass. Later, while working in a factory in Galt, he married a daughter of an honored resident of that city.

M. L. Savage, of Calgary, who represents the Tetrault Shoe Manufacturing Co., and J. A. and M. Cote, in the Western provinces, spent a few days in Montreal and other points east.

MAHOGANY TAN BAL, WING TIP, FANCY PERFORATIONS ON TIP, FOXING AND EYE-LET ROW. ONE OF THE LATEST, SNAPPY OFFERINGS, BY THE REGAL SHOE CO., TORONTO.

Samuel Levinson has sold his shoe repair shop, King St. East, Brockville, to Max Levinson.

The Eighth National Shoe and Leather Market-Fair, which is the most extensive exposition of shoes, leather, machinery, supplies, etc., will be held at the Mechanics' Building, Boston, Mass., during the week of July 12th to July 19th. Those interested can obtain particulars by addressing Arthur B. Butman, in charge Foreign Trade Department, Merchants' Building, Boston, Mass.

Damer, Lumsden & Co., wholesale shoe dealers, Vancouver, have moved into their new and commodious warehouse on Pender St. in that city.

A representative of a Boston shoe concern who has returned from abroad, after visiting France, Roumania and Belgium, in connection with army contracts, declares that there are further large army shoe contracts to be had if American manufacturers care to take them, but the latter have refused orders because domestic business is so good. There are only two big shoe factories in all Russia, the largest of which does a gross business of about 15,000,000 rubles or \$7,500,000 a year.

George Helson, Western Canada representative for C. Parsons & Son, Toronto, has returned from an extended business trip to the Coast. He reports conditions as greatly improving and says that the outlook for the coming year in the West is promising in every way.

Recently the Osborne Shoe Store, 1439 Commercial Drive, Vancouver, was broken into and several pairs of shoes stolen.

O. B. Holden & Co., shoe dealers, Vernon, B.C., have sold out to the Vernon Shoe Co.

E. Trabrum, formerly manager for James Rae, has bought the Empress Boot Shop, on Granville St., Vancouver.

James Rae, who recently returned to Vancouver from an extended trip to Montreal, Toronto, Quebec and other cities, has bought out Baxter's American Boot Shop, 541 Granville St., Vancouver.

Wooden clogs are in such demand among women working in farmyards that several Lancashire manufacturers have more than doubled their normal output during the past three months.

With the re-opening of the Granby factory, Walter R. Legge has returned to resume his duties as treasurer. For some time he had been assisting the chief accountant at head office in Montreal.

Manager J. H. McKenzie, of the Victoria branch recently spent two weeks at Montreal. He has been appointed representative of the Dominion Rubber System for Australia and will leave for his new field at an early date.

The Peerless Weaving & Belting Co., recently incorporated with an authorized capital of \$150,000, has leased a factory and will immediately equip a plant for the manufacture of cotton and leather belt, automobile accessories and the rebuilding of old leather belts, in Hamilton, Ont. The company will take over the Canadian rights of the Peerless Belting Co., Gardenville, N.Y.

William Wood, shoe retailer, has opened up a boot shop in the stand formerly occupied by McRobbie Shoe Co., on Hastings St., Vancouver.

Edmour Brosseau, who has been for the past two years representing Canadian Arrowsmith Mfg. Co., Limited, of Niagara Falls, Ont., in Quebec and the Maritime Provinces, and latterly in Ontario, from Montreal to the "Soo," has joined staff of Corbeil, Limited, shoe manufacturers, Montreal. Mr. Brosseau is now looking after the city of Ottawa and the province of Quebec from Three Rivers to Sherbrooke. He began his career in the footwear realm some twenty-one years ago, and has never departed from his first choice. For several years he was engaged with a number of leading firms, among them being Henry Morgan, Geo. G. Gales & Co., the Walk-Over Boot Shop and the Slater Boot Shop

in Montreal and Toronto. Mr. Brosseau is a good salesman, a warm friend and thoroughly understands the wants of his customers.

C. C. Allan has moved into his new store, 1424 Queen street west, Toronto, next to his former stand, which was badly gutted by fire. His new home has an imposing exterior with recessed entrance, while the fittings, chairs and other conveniences are right up to date. Mr. Allan is instituting a universal label system, with uniform cartons. This will add much to the attractiveness of his establishment, which is one of the brightest in the city. His front establishes a new type in store architecture and is nicely fitted up with mirrors and other facilities, which tend to show the footwear to the best possible advantage.

F. E. Woodward & Sons, Lachine, are renovating a large building which has been purchased and to which they will shortly move their office and factory. Mr. Woodward, senior, who has the knack of building machinery to do more than is usually expected, is supervising the installation of a considerable quantity of new machinery. The company will be able to give better service than usual in their backing department and with more room at their disposal, will be able to manufacture their cork filler and other specialties to better advantage.

The firm of Waterbury & Rising, Limited, St. John, N.B., are getting favorable results from the new repairing machines they recently installed. They are doing a large repair business and the work is satisfactory to their many patrons.

T. H. Rieder, vice-president and general manager of the Canadian Consolidated Rubber Co., Montreal, and R. E. Jamieson, general sales manager, spent a few days in Toronto last week on business.

R. M. Corner, shoe retailer, St. Clair avenue, Toronto, has discontinued business.

White sheepskins are in great demand but stocks are small. A prominent sheep leather tanner and dealer recently sent one of his men to Salem and Peabody, with instructions to buy all the white sheepskins that he could find, and it was reported that he was not able to pick up a single skin. Everything that the tanners were making was on order and stocks that they had a few weeks ago had been cleaned out.

Wholesale houses in St. John, N.B., are getting their travelers ready for the road. They are taking their fall leather goods samples and anticipate good sales. They will in all probability start out at the first of the month.

## POPULAR SHOE MAN RESUMES

J. J. Davis, a former progressive shoe dealer of 454 Queen street west, Toronto, is again starting business in his old stand. During the past two years Mr. Davis has been living retired, and has been enjoying life in the open, being

an enthusiastic automobilist. An interesting incident in connection with his career is that he was in business thirteen years, sold out on the 13th of April two years ago, and expects to open up on May 13th, so that the number thirteen has no terrors for him.

Jas. Robinson has returned to Montreal from California and the Carolinas, where he has been spending the winter. He looks fine and feels the same. Rumour has it that he is not quite a golf champion but he may be before the summer is over as a result of his practice during the past few months.

J. Heffering, Toronto, was in Montreal for a few days last week.

W. F. Martin, Kingsbury Footwear Co., has been to Boston and other American centres in the interests of the firm.

A. E. Hector and T. A. Godbout are now partners of N. Labrecque in the Montreal Last Co., which concern has increased its plant with the idea of doubling capacity. Shortly another floor will be added to the present building on La-Salle avenue.

A. W. Bradfield, who for the past ten years has been on the staff of F. J. Weston & Sons, wholesale shoes, Toronto, and covers Eastern Ontario, was married on April 20th to Miss Elizabeth S. Johnston, the ceremony being performed by Rev. Dr. Harper Gray, pastor of Old St. Andrew's Church. Many friends will wish them every success and happiness.

George F. Auger, shoe retailer, Trenton, Ont., will have the sympathy of many friends in the trade in the loss of his father, George Auger, who passed away on April 19th. He had been engaged in the grocery business in Trenton for the past thirty-eight years.

John Melrose, who has been covering part of Toronto for the wholesale shoe firm of F. J. Weston & Sons, Toronto, is now looking after the entire city trade.

Rumors are again in circulation in Montreal in regard to the amalgamation of certain American firms with the Ames-Holden-McCready company. Some time ago credence was given to a rumor of this kind, but the arrangements were not completed; now, however, it is said there is a favorable prospect of success in the matter. Such an amalgamation,

### CAPTAIN REILLY MAKING GOOD PROGRESS

Captain Reginald Reilly, son of C. H. Reilly, shoe merchant, of Welland, Ont., who was wounded at the battle of Ypres, and was invalided home some months ago, recently underwent another operation at Wellesley Hospital, Toronto, for the removal of a bullet in his right knee. He is now

CAPTAIN REG. REILLY, WELLAND, ONT.

doing nicely at the new Convalescent Home for officers. It will be remembered that Captain Reilly was returning to Canada on the *Hesperian*, in September last, which was sunk at sea by a German torpedo. While floating on the water he was picked up by Miss Gladys Victoria Ray, now wife of Robt. D. Ayling, shoe traveler, Toronto. Captain Reilly owes his life to the heroic action of Mrs. Ayling. Captain Reilly has been connected with the militia for the last seven or eight years, and at the outbreak of the war was Captain of the Welland Company of the 44th Lincoln and Welland Regiment. In the Fourth Overseas Battalion, to which he was attached, he served as Lieutenant, under Major Kelly, acting Captain of the 37th Regiment, Dunnville, Ont. Major Kelly was killed in the fight at Ypres, in which engagement Captain Reilly was wounded. The latter was associated with his uncle, Joliffe D. Reilly, of the footwear firm of Reilly & Reilly, Welland, previous to going to the front. His father, C. H. Reilly, has been in the shoe game in that progressive town for over thirty years.

### GASPED WHEN HE LEARNED THE PRICE

A Peterboro paper says that only the ultra rich will throw old boots at this year's crop of June brides, owing to the high cost of leather and footwear in general, and publishes an interview with Col. J. W. Miller, a veteran shoemaker and retailer in that city. The paper says that Col. Miller, in a reminiscent mood, told of a man who used to come down from one of the upper townships in the county every spring and leave an order with him for two pairs of long boots made of French kid that had always cost the purchaser five dollars a pair, custom made. The man appeared the other day with his annual order.

"You may not want them when you hear what they will cost you," Col. Miller said. These, by the way, were specially made for the customer.

"Oh, you know I never haggled over a quarter, one way or the other," replied the man.

"Well, you can have them made for you at \$28," said the Colonel, "\$14.00 a pair." They were long boots that were in general use in the north country.

When the caller recovered, and got his bearing in the swollen sea of increased prices, he was willing to pay \$10 a pair.

"You won't take \$10 a pair?" he queried.

"No," was the answer. "I can't do it. To begin with I am not sure that there is any French kid in the country. There have been no skins coming in since the French and British Governments declared their embargoes, and whatever remain in stock in this country are few and very dear."

So the man had to turn to something else for this year. That may be an exceptional case, it is true, but it illustrates the increased cost of leather.

### POPULAR SHOEMEN WIN GOLD WATCHES

J. A. Connor, of Toronto, formerly of London, who is the manager of the Ontario Division of the Canadian Consolidated Rubber Co., and W. J. Ashplant, of H. Ashplant & Sons, shoe retailers, Toronto, won the international pairs championship in the Canadian Whist Congress at the King Edward Hotel, Toronto, last week. Each was presented with a handsome, full-jewelled gold watch bearing the emblem of the league, which is a small black spade surmounted with a white diamond and in gold letters are "C.W.L., '16." There were some eighteen representatives from the United States and sixty from Canada. Mr. Connor is the honorary president of the Canadian Whist League and on the closing day of the tournament entertained the American players and the members of the executive. Mr. Ashplant is a member of the executive. These gentlemen won the international pairs championship by a plus score of 101 tricks, while their

J. A. CONNOR, TORONTO

nearest competitors had tallied 76. Last year they carried off the Hay trophy, emblematic of the pairs championship and they have captured the Goodall trophy four times in six years, but this is the first occasion that these expert players have secured the international pairs championship. Their many friends are extending congratulations.

## Not One Columbia Counter (Fibre) Failed

They have been used now for well over a year by Canadian Manufacturers, and every single Counter was perfect in service—not one failed. We guarantee them with an iron bound guarantee, and they stand right up to it. You take no chance, you run no risk of dissatisfied customers if you use Columbia Counters.

Our factory is equipped to fit all lasts.  
Samples and quotations on request.

# With the Shoe Manufacturers

Pithy Note and Comment on Shoe Matters—What the Makers of Shoes Are Saying and Doing—Shoe Facts and Fancies

SHOE manufacturers are rapidly learning that it pays to stamp their shoes with their own trade mark, or the name of the dealer instead of sending the work out to be done. The Electric Embossing Machine for hot die stamping is such a simple invention and takes up so little room that this method of doing the work is fast superseding the old way of sending out all such work to be done by contract. By means of this machine it is contended that at least one-third the cost of stamping the shoes can be saved. The machine is small, efficient and can easily be installed. Since the war in Europe and the impossibility of getting embossing leaf from abroad American ingenuity has been at work. We now make embossing leaf equal to or better than those we used to get from Europe, that needs no sizing, comes in every color including gold and silver, and will not change color or tarnish. Retailers are insisting more and more on having their shoes stamped with their names, and many firms are building up permanent business by putting their own trade names in their output.—The Electric Bulletin.

## Banker, Merchant and Military Man

Mr. W. H. Robinson, the new president of the Canadian Consolidated Rubber Co., who succeeds the late J. H. McKechnie, is a native of the town of Waterloo, Que., where he spent his early years. He received his education at the Shefford Academy in Waterloo, and at Bishop's College, Lennoxville, Que. His business training commenced in the "Old Stone Store," an historic landmark of Waterloo, which is still standing. This business was started by his grandfather, and for eighty-three years carried the name of Robinson as one of the partners of the several firms during that period. After a few years' service in the store, Mr. Robinson, in 1870, purchased the business, and with his brother, the late A. F. Robinson, and the late Gardner Stevens, conducted it under the firm name of "Robinson Bros. & Stevens." In 1874, he withdrew from the firm on account of ill-health, and a few years later entered the service of the Eastern Townships Bank. In that institution he held, for over thirty years, the position of manager. In August, 1877, he went to Granby to open their Granby branch. In 1887, he was transferred to Huntingdon, Que., to open that branch, but returned to Granby in 1896. In 1900 he went to British Columbia to open a branch of the Bank at Grand Forks, B.C. After spending three months in Grand Forks and Phoenix, B.C., he returned to Granby, where he remained manager of the bank until his retirement in September, 1908.

Since his retirement, he has devoted his time chiefly to the interests of the Granby Consolidated Mining, Smelting & Power Co. Limited, of which he is vice-president; to the Crow's Nest Pass Coal Co. and the Granby Printing & Publishing Co. Limited, in which companies he has been a director. He was a director of the Granby Rubber Co. Limited, up to the time of its amalgamation with the Canadian Consolidated Rubber Co. Limited.

Mr. Robinson is a Fenian Raid veteran, having seen active service in 1866. He has always taken an active part in Canadian military matters. On the formation of the 79th Batt. Shefford Highlanders, he was appointed captain and paymaster, and later received his commission as major. His military spirit is reflected in his two sons, Reginald Robinson, who recently left for overseas as lieutenant in

the 73rd Royal Highlanders, and Wynne Robinson, a captain in the C.O.T.C.

Mr. Robinson has been the recipient of a very large number of congratulatory letters from all parts of Canada, and his many friends in Granby feel especially pleased upon his election as president of the Canadian Consolidated Rubber Co. Limited.—The Dominion.

## Electric Heat Means Uniform Shoes

Uniformity should be the watchword in every shoe factory. There are many apparently small defects of shoe-making that will spoil the looks of an otherwise well made shoe. Many of the small defects are almost impossible to avoid under the old hit-or-miss methods employed in those factories which use gas or other similar methods of heating their irons and other heaters. The introduction of electric heat into shoe factories has enabled shoemaking to become an exact science. In every part of the factory where heat is applied to the shoe, the operator who has electric heat can go about his work with the absolute assurance that he cannot spoil or injure the leather, no matter what he does. This assurance not only makes for speedy and reliable work, but for absolute uniformity of output. This is an essential in view of the greater competition and lessening of profits every manufacturer is up against. Electric heat stands for uniformity of output, to say nothing of its other good features.

## Aggressive Shoe Concern Coming Strong

The Perth Shoe Co., Perth Ont., which was recently re-organized, is rushed to the limit with orders and is now turning out 600 pairs a day, the capacity having been doubled

G. H. ANSLEY, PERTH SHOE CO.

within the past year. Their factory is now the largest one in Canada producing women's Goodyear welts exclusively. G. H. Ansley, the aggressive general manager, is secretary of the company and M. J. Sheehy is the efficient superintendent. Speaking of these men, the Perth Courier, in a recent edition

## Marden, Orth & Hastings Co.

ESTABLISHED 1837

Oils, Greases, Tannins and Tanning Extracts

NEW YORK Office, 82 Wall St. 225 Purchase St., BOSTON, U.S.A  
SAN FRANCISCO, Office and Warerooms, 340 CLAY ST.  
CHICAGO, Branch Store, 1030 NO. BRANCH STREET

says:—"Mr. Ansley has been engaged for twenty-three years in the various branches of the shoe business, and knows the work from the beginning to the end. His experience and managerial ability have been telling forces and he deserves great credit for the manner in which he has developed the business and brought it to the front. In November of last year, M. J. Sheehy of Boston was appointed superintendent, coming from such factories in the United States as Selz-Schwab, where he was quality man. He was also prominently connected with the Sorosis factory in Lynn.

M. J. SHEEHY, PERTH SHOE CO.

Having a broad experience in all lines of shoe manufacture, he accordingly brought it to good use in the Perth Shoe factory. The Perth Shoe Co. have lately made an important change in their selling arrangements. Instead of going to the wholesalers the firm are going direct to the retail trade with their own staff of traveling salesmen, of whom there are five. The Virginia line is certainly meeting with a wide measure of appreciation from coast to coast, and the salesmen are most enthusiastic over what has already been accomplished and the future prospects."

#### Honored on Joining the Colors

An interesting event took place on April 15 in the warehouse of the Breithaupt Leather Co., Limited, Berlin, when army wrist watches were presented to A. W. Puncher and Oscar Copeland, on the occasion of their enlisting with the 118th Battalion, C. E. F. This makes the second gathering held recently when the company and staff have expressed their pleasure in a similar manner at the loyalty of their employees. Mr. Puncher has been head sole leather sorter and shipper as well as one of the shoe factory salesmen, and is widely known among the trade. Mr. Copeland has been a worker in the shipping department. In the presence of the management and employees appreciative addresses were read and handed to each recipient accompanied by the wrist watches. The addresses were signed by R. J. Eagar on behalf of the employees and by L. O. Breithaupt on behalf of the company. Mr. Eagar who read the departing words to the boys has himself been through several campaigns having served in the Imperial Army for forty-two years. He bears wounds sustained in engagements in Afghanistan and has four sons engaged in the Canadian Expeditionary Forces, which is certainly a proud record. Messrs. Puncher and Copeland made grateful and appropriate replies and

were given hearty cheers and wished God-speed in whatever position or locality they may be placed as soldiers of the King "in fighting for the liberty of the world and the suppression of the accursed militarism and Kaiserism."

#### Adopting Substitutes for Leather

With the great increase in the cost of leather of all kinds used in the manufacture of shoes, the time has come when the shoe manufacturer must seriously consider the use of substitutes wherever these can be employed without affecting the strength or wearing qualities of the shoe, says "The Finder." As often happens in such crises, grim necessity may prove in some particulars a blessing in disguise, as some of the materials which will be used will doubtless be found better than the leather for which they are substituted.

There can be little doubt that the comparatively plentiful supply of leather of a number of years ago was responsible for its use in many places where other materials would have answered the purpose fully as well. With conditions now entirely reversed, it is imperative that the use of leather be dispensed with in every place where lower cost materials can be successfully employed. Dealers and the public generally should be brought to realize that the substitution of a material of proved worth does not mean that the quality of the shoe is being cheapened, but that a common sense policy has been adopted of keeping costs as low as possible by putting in leather only where the best interests of the shoe wearer demand the use of this now high-cost product.

Another element which has an important bearing upon the question is the use of cloth and canvas. Although these materials are not, in a strict sense, substitutes for leather, having come to be recognized as forming distinct types of footwear, a large increase in the output of this class of shoes will do much to relieve the situation. Cloth top shoes for many purposes are more comfortable and more stylish than leather, while the superiority of canvas for summer wear has been conclusively demonstrated. The supply of leather can be conserved to a great extent, and its cost for use in lines where it is absolutely required kept within reasonable bounds by the largely increased use of these fabrics.

#### Rock Shoe Co. Effects Sold

The sale of the stock of the Rock Shoe Manufacturing Co., Limited, Quebec, which took place at the office of Messrs. LaRue, Trudel & Picher on April 19 resulted as follows:—Regular shoes, \$2,723.16 at 78½ cents on the dollar; assorted shoes (damaged), 3,768 pairs at 71½ cents a pair; unassorted shoes (damaged), 1,575 pairs at 5 cents a pair; 13,493 pounds of steel and copper wire at 2½ cents a pound; lot of furnishings, etc., \$400.00; automobile, 1909 model, \$132.00; 699 samples, one foot only, at 5 cents each; two travelers' trunks, \$12.00.

#### Some Distinctive Lines for Men

The Hartt Boot and Shoe Co.'s autumn samples include many exceptionally high-class shoes for men. A gunmetal shoe, with tobacco brown top, circular vamp and low foxing on an English last is a neat offering. Another has a grey kid top, while a patent bal with white piping and low recede toe is much admired. Two tone effects are seen in tan on English lasts with brass eyelets. A dark brown shoe with wing tip and perforations around the foxing and vamp is a snappy creation. This also comes in gunmetal. Recede toes and straight lasts are taking exceptionally well with the better trade. There is also a fine showing in open throat bluchers with blind eyelets, while the firm make a specialty of a cushion sole shoe which has cork and rubber fillers. Their nature arch last is winning a large measure of support. In extreme high cuts there are tan and white elk, with viscolised soles, outside counter pocket, wing tips and full bellows

## F. E. Woodward & Sons

Lachine, Province of Quebec

tongue. A fifteen-inch Strathcona and a high tan military boot are also seen. The Hartt line evidences the highest grade of shoemaking and all the expensive shoes have not only the best stock obtainable, but folded facings, backed tongues and other touches that impart beauty and impressiveness to the models, which are being shown in Toronto by James Lawther.

#### Operating as Aggressively as Ever

Jas. Cleland, Regd., is the name of the die cutting concern which is now operating the business which for nearly 30 years was conducted in Montreal under the name of Jas. Cleland. R. Bromby, who has been connected with the enterprise for 28 years, the past 10 as manager, will continue his active interest in the business and is fortunate in having for a partner from now on S. Levine, another practical man who spent a dozen years in some of England's best shops previous to coming to Canada, since when he has been identified with the Dominion Die Co., until present partnership was formed. The company will make all kinds of reliable dies for cutting leather, paper, cloth and rubber.

#### Unbreakable Buttons in Many Colors

A particularly nice line of shoe buttons to replace the agate and glass buttons which formerly came from Germany and Austria is being shown by the Continental Shoe Button Co., Inc., Newark. These buttons have the added advantage of being unbreakable. The imported lines gave a great deal of trouble on account of this defect. Another feature of the Continental Shoe Button Co.'s line which is called New Ivorine is the range of colors in which the buttons are obtainable. Practically any color of button can be had enabling the manufacturer to match his fabrics. The United States line is also cheaper by \$1.50 a great gross than the imported buttons.

The same company is showing a strong line of fine quality shoe buttons and ornaments. Their output is between 15,000 and 20,000 gross a week. Plans now under way will enable them to turn out shortly 50,000 gross a week, which, considering the character of the line manufactured, is quiet a turnover. The company is doing a large business with Canadian manufacturers who are pleased to find the German and Austrian lines replaced by superior goods at better prices.

#### Smart Lasts for Summer Dressers

The new samples of E. T. Wright & Co. show a number of new lasts, including the Hoofit, which has a round toe slightly raised, the Belmont, a rather straight last with a semi-recede toe, and the Welcome, another straight last, with a slim instep. The company are showing for the first time in Canada the Dr. Brown arch preserver shoe, with raised shank, broad arch and wide toe. Some decidedly smart creations with wave, wing and other fancy tips are displayed. There are rather more perforations than usual on these models. Bals, with recede toes are, however, having the largest call. The Tony red is a new leather that is striking and in the tan family several two tone effects are shown. Several samples have Neolin soles. Some of the facings are very pretty, being white kid with rose and tan linings. The firm carry an extensive in-stock department and report an exceptionally good business so far this season. A. A. Orendorff now represents the company in Toronto and other large cities in Ontario.

#### Dignified and Distinctive Models

The autumn samples of the Smardon Shoe Co., Montreal, are both dignified and distinctive, maintaining the well-known traditions of this widely known shoemaking firm. A number of pleasing presentations are observed, among

them being an all African brown bal, with Miller tuxedo pattern and half-Louis heel, while the same shoe is also seen with imitation tip and white kid top. A two-tone grey bal, Regent pattern, and several white, washable kid bals are very attractive creations. Whole quarter, black kid bals, with Cuban heels, are seen in 7½, 8½ and 9½ inch leg. The most popular height is, however, 7½ inches. Duplicates are seen in button, in tuxedo, as well as in the Elizabethan pattern. A very pleasing shoe is a patent bal, with genuine buck top. Colonials, with high tongues and big trimmings, are seen in practically all leathers, while the plain, unadorned, snug fitting pump is also a marked favorite. In ornaments, on low cuts there are seen cut steel, steel beaded, jet beaded, nickle and other materials. The firm are showing the very

J. A. LANGLOIS, M.L.A., WHO IS THE PRESIDENT OF THE COMFORT SHOE CO., LIMITED, QUEBEC, AND WILL SOON START MANUFACTURING WOMEN'S CUSHION SOLE RUBBER HEEL TURN SHOES

latest novelty, which is a 5½ inch boot with five buttons, and in marked contrast to the extreme high cuts now prevailing. Whether the new offering will take or not remains to be seen. The Smardon shoes are this season characterized by the same high quality, graceful lines, beautiful finish and artistic touch that have made them leaders in their line. J. P. Buchanan, eastern Ontario representative, who has been with the firm for many years, was calling upon the trade in Toronto last week.

#### Prices Higher, Material Scarcer

A recent issue of the Winnipeg Free Press contains an interesting interview with C. F. Rannard, President of the Rannard Shoe, Limited, Winnipeg, who has returned home after his semi-annual business trip to the eastern cities in Canada and the United States. Mr. Rannard said: "Altogether I find there is a better feeling of optimism in the trade generally than there has been at any time since the beginning of the war. Work in the factories of the United States is booming and the freight lines between Chicago, Boston and New York are completely blocked by shipments of goods destined for the allies, and the great Canadian factories are doing the same as far as a staff depleted by recruiting and the scarcity of material permit.

"Skins come principally from Europe, from where the supply is practically cut off, and what comes from India is in great danger of being lost through ships being torpedoed on the way over, so South America is where everyone's eyes are fixed." Altogether the market is closer, prices higher, material scarcer, demand greater, and men fewer than ever before, and this is the time when the great concerns are looking up and proving their solidity, but Mr. Rannard

says the spring has brought a new dose of optimism which has spread all through the trade. Americans are buying some kinds of leather from Canada, particularly sole stock.

Asked just how the supply of shoe materials was going to pan out Mr. Rannard said nobody knew. Some thought they would keep on the rise, others that they could not get any higher.

#### Hats Off to Mayor Hayes of St. John

Robert T. Hayes, head of the wholesale firm of J. M. Humphrey & Co., St. John, N.B., one of the best known and

R. T. HAYES, ST. JOHN, N.B.

most popular representatives in the shoe and leather arena in the Dominion, was elected Mayor of St. John, N.B., on April 24th, after one of the hardest and most bitterly contested elections held in years. He defeated his opponent, Mayor Frink, by a majority of 1,003 votes, the final count being—Hayes, 4,440; Frink, 3,437.

The result of the election was not a surprise as Mr. Hayes was a good choice, being well qualified to fill the position, having served for a term of three years as alderman of Victoria ward and also as chairman of the finance committee. The majority secured by Mr. Hayes left no doubt as to the choice of the electorate. The new mayor made a remarkable showing in his first contest for this office, despite the fact that he had a most creditable record as a member of the old aldermanic common council. His career as a business man and a public spirited citizen proved a strong factor in the campaign.

Seven thousand eight hundred and seventy-seven votes was the greatest number ever polled in a mayoralty contest in St. John. Records show that there were 10,000 eligible to vote and this would indicate that nearly seventy-nine per cent. of that number exercised their franchise.

In conversation with a correspondent of the SHOE AND LEATHER JOURNAL Mr. Hayes said: "I heartily appreciate the confidence of the people. They gave me a handsome majority. This is really all I can say, I am so greatly pleased."

Under the new regime Mayor-elect Hayes will become commissioner of finance as required in the city charter. He will take up his new duties May 1st.

If you act as if you feel above the other fellows in the store, you will very likely live to see the day when they will in reality be above you.

CHATHAM SHOE COMPANY Limited

CHATHAM, ONT.

**NEWSY HAPPENINGS IN QUEBEC**

The stock of the Imperial Shoe Store, to the amount of \$3,547.30, has been sold to M. G. E. Roy, of Saint Malo, at 26 1/4c.

Brown & Rochette, shoe jobbers, are making repairs to their building and adding two flats. When completed, they will have one of the finest jobbing houses in the city.

J. H. Begin, Reg., have removed to their new quarters on St. Dominique street, formerly occupied by L. Beaubien.

The Canadian Consolidated Rubber Co. are moving into the premises formerly occupied by J. H. Begin, Reg.

The shoe trade is very active in the city at the present time, and collections are reported to be good.

The new building to be occupied by the recently formed firm of Thibault & Bertrand is completed, and they are now at work getting their machines in place.

Langlois & Plamondon are installing their machines, which will be in running order in less than a week's time. The firm will make a specialty of high-grade turn shoes.

J. B. Laliberte, fur manufacturer, of this city, has erected a plant for the manufacture of gloves on Colomb street, opposite the premises of J. B. Drolet, Limited.

The remainder of the shoe findings stock of the Rock Shoe Co. was sold to J. E. Samson, Reg. The remainder of

main store and office for Quebec and Ottawa, had a very large business during 1915, and anticipate that 1916 will show a heavy increase in sales over the previous year.

Cote & Jean, harness manufacturers, of Levis, have removed to their new building on Commercial street.

Alphonse Jacques, of J. H. Jacques, Limited, has purchased an 80 h.p. automobile which is conceded to be one

ENJOYING A PADDLE AT RIVIERE A PIERRE, LAKE ST JOHN DISTRICT, QUE. D. E. BERTRAND, SUPPLIES, IN THE BOW AND J. B. BLOUIN, SHERIFF OF QUEBEC, FORMERLY SHOE MANUFACTURER, IN THE STERN

STARTING OUT ON A FISHING JAUNT AT RIVIERE A PIERRE, LAKE ST. JOHN DISTRICT. LUCIEN BORNE, LEATHER MANUFACTURER, P. OUELLETTE, SHOE FINDINGS, AND TWO GUIDES.

the shoes not matched have been purchased by Jos. Tanguay at five cents a pair. An automobile belonging to the company was bought by T. Blouin.

Tremblay & Gosselin, shoe manufacturers, have added two flats to their factory, and are very busy at present rushing out their orders.

Saillant & Lessard (Limoilou), boots and shoes, have now started to operate their plant and have some samples ready for the trade.

Lamontagne, Limited, of Montreal, have opened a branch in Quebec on Crown street, in the same building in which the Canadian Consolidated Rubber Co. is located.

Jos. Despatie, formerly with the Rock Shoe Co., has been appointed manager of the E. Thivierge factory, and has entered upon his new duties.

Alfred Magnan is now in charge of the lasting department of Tourigny & Marois. M. G. Russell, who was formerly over this section, is now looking after the treeing department of Ames-Holden-McCready, Montreal.

The Colonial Hide Co., H. C. Carter, manager, started several years ago at 274-290 Wellington street, Montreal, has developed very considerably since that time. On January 1st, 1916, they opened a Quebec branch store at 633 St. Valier street, Quebec City, where they have had a large business dating from the week the store opened. They report that the business of the Montreal branch, which is the

of the finest in the city. In addition to the motor, Mr. Jacques also keeps a fine riding horse.

Shoe manufacturers are now running their plants to full capacity and several firms have orders ahead for the entire summer. Prices are continually ascending. Dongola and also heavy leathers are difficult to obtain and the supply of dyes for tanning purposes is very limited.

E. P. Mullarkey, who for many years has been superintendent and buyer for the Wm. A. Marsh Co., has resigned.

**NOVEL JOURNEY TO SELL SHOES**

The accompanying illustration shows the method that is employed by a hotel in Thessalon, Ont., for conveying travelers' trunks from the station. In the picture, which was taken in March last, the gentleman in the fur coat is Wm. C. Foster, of Bracebridge, who represents the W. B. Hamilton Shoe Co., Toronto, in Northern Ontario. He and a fellow traveler have several samples in suit cases and are

just leaving for a trip ten miles out in the country to interview a customer. The dog team is easily guided and steady as a span of horses and selling goods by means of this method of transportation is certainly novel in Ontario.

## And Specify These Two Brands Particularly Because—

Your jobber may show you some other shoe that looks fairly good, but which has not got the reputation built up by the "PROFESSOR" and the "DOCTOR'S" brands.

Here's the reason—you'll find very few men's feet that either the "DOCTOR'S" or the "PROFESSOR" shoe can't fit. They are made on lasts that conform perfectly to the contour of the foot. Their patent health features make them particularly acceptable to your "cranky" customers.

Moreover, your men customers will appreciate having shoes that so nearly approach their ideals in comfort, style and wearing qualities.

**The Tebbutt Shoe & Leather Co., Limited**  
Three Rivers - Quebec

# Survival Value

What is it? Survival Value is the lasting prestige added to all footwear by the affixing of the **Union Stamp**—it is the surviving standard because:

- 1st It is a guarantee of honest footwear, made under the best conditions.**
- 2nd It is a pledge of expert workmanship.**
- 3rd It is the pass-word which opens the sales doors to Union Men everywhere.**
- 4th After the other inducements have all been recited, the conclusive and finishing argument is the UNION STAMP.**

Every shoe bearing the **Union Stamp** retains a sales value of long duration, for no shoe bears the stamp unless it has been produced under the proper conditions and represents honest value.

For mutual profits, better and bigger business, insist upon the official stamp of the **Boot and Shoe Workers' Union**—the only guarantee of Union Footwear.

## THE CONSERVATION OF LEATHER

**With a Leather Famine in Sight Steps Should Be Taken to Prevent Waste—Prosperous Times Encouraging Extravagance in Footwear and Leather Goods.**

**A**LREADY the pinch is beginning to make itself felt not only in the high prices for leather that prevails, but the alarm that is being expressed by those intimately acquainted with and interested in leather and its products as to the immediate future.

"We are counseling customers to be very conservative in their purchases for fall and winter," said one shoe manufacturer recently. "We are pointing out to all the fact that within the next six months leather will not only reach an unprecedented point as to prices, but will become so scarce that it will be a question of getting goods of certain classes at any price. For this reason we are reducing to a reasonable minimum our number of lines, and while encouraging buyers to keep fully covered with saleable goods, urging them to cut out very largely the frills and fads."

The attitude of the British Government in practically commandeering all leather supplies is a fair indication of the seriousness of the situation in their estimation. A conference was called recently of leather "factors" or wholesalers by the authorities and the former were notified that they must not exact more than two per cent profit upon sales of leather or the government would take the entire control in its own hands. Every trade paper from across the Atlantic emphasizes the fact that supplies of leather for regular trade are already so inadequate that manufacturers cannot keep their customers supplied with regular goods. The recent orders for Russian and Italian army shoes seems to have been the last straw on the camel's back and promise to clean up all the stock that British boot manufacturers can scrape together both at home and abroad. The British government, which has taken charge of these orders, insists that in the meantime manufacturers shall only contract for sufficient to represent their present stocks of leather.

As an evidence of what the war has so far done to the English shoe trade the imports of American footwear into Great Britain more than doubled last year. The figures for 1914 were \$16,712,150, while for 1915 the customs returns show \$38,585,562. It is estimated that for this year the amount of shoes sent from United States to the United Kingdom will not fall far short of \$50,000,000. To meet the further demands caused by the failure of the British shoe trade to fully look after its export business there has been also a large increase of the foreign shoe business of the United States outside the United Kingdom, so that it is little wonder they feel the pinch of leather shortage across the line.

It is difficult at a time like this when people seem to have the money to spend to get them to listen to counsels of conservatism and restraint. Nevertheless, if the war keeps up its present pace for another twelve months or even less, the tremendous consumption of footwear and leather involved is going to mean that ten dollar shoes are going to be as common as those at half the price have been during the past two or three seasons.

A regular system of economy not only in methods of manufacturing but to prevent needless waste and extravagance in footwear should be inaugurated if the latter is to be kept within reach of the ordinary consumer in the months that are to come. In other trades the call to economy and frugality has gone forth not only in the interests of the individual but the nation at large, and in none of them more than in leather is the caution needed to-day. Already action has been taken in the United States by the Retail Shoe Association which has called a conference of leather and shoe producers to discuss with them methods of conservation and control of leather products.

# MAKING BUSINESS AN INTERESTING GAME

**If Your Plans for Purchases are Properly Studied as Well as Your Plans for Selling, Working Your Staff, Stock, Expenses, etc., Business Will be Enjoyable and Not a Worrying, Nerve-Racking Experience—Treat Your Troubles as Part of the Game**

**B**USINESS is one of the most interesting games ever invented, providing a man will not treat it as drudgery. Business is interesting for many and various reasons, perhaps the chief one being that it is profitable if properly conducted, and the very act of making a business profitable brings about many interesting methods, which form part of the game.

The man who worries will never make his business or anything else interesting; worry means drudgery in another form. Drudgery kills more people than is generally supposed. Drudgery saps the nature, kills initiative and brings about that dreadful inaction of brain which means only half an existence while it lasts.

The cultivating and practising of the many sides of the business game is what makes life interesting, stimulating and worth living. The business successes are generally men who enjoy business, and failures are generally those who just muddle along and are always at their wits' end what next to do. Ask the latter if he enjoys business, and you will most likely get a long tale of many worries and troubles. With him business is always bad or something is always wrong. But ask the even moderately successful business man what he thinks of business and you will get a different tale.

## Turning the Knocks to Account

The best of pleasures will become worries and drudgery if not properly handled. The worst "knocks" in life can be turned to account if only a man will tackle the game in the proper spirit and not allow himself to be cast down.

Take a young man starting in business, say with \$500. He is full of hopes and ambitions—dreams of amassing wealth and fortune in a few years. He has to lay his \$500 out so as to bring an accumulation, or interest sufficient to enable him to pay his expenses and still have some in hand. This is the beginning of the great business game and the cause of so many failures. Far too many men think they have simply to spend their money and sell the purchases they have made with it, not stopping to lay out definite plans and continually adjusting and scheming to provide for the proper maturing of them.

To become an expert at baseball or billiards a man must study, practise and adjust his plans to meet the various moves of his opponents, and the better he can do so the more successful he becomes. So it is in the business game—the very spending of the \$500 requires study in order to get the best value and the best results. Then it requires more planning and scheming to get the best results from those purchases. If a man makes up his mind that he will have difficulties to surmount and will tackle them cheerfully, just as he would his baseball game, then he will begin to find where the interest lays.

## How Buying Becomes Absorbing

The two sides of the game mentioned above, viz.—buying and selling—automatically bring in many other interesting sections of business. The buying becomes interesting if the man will study the seller's arguments, note his methods of bargaining, put his own brains against the seller's, and aim to get the best for the money and to suit his requirements. To know what is best for the money means study and interesting facts brought to light as to methods and the qualities of various goods.

The selling side means various kinds of interesting studies, covering scheming to get the best sales, the best displays, the proper window dressings, advertising, etc.

All these various things require continual planning and trying. Your competitor goes one better than you, then you must plan to get people to do business with you. This means scheming to beat them and get them to see eye to eye with you and your goods. When I say "beat" them I mean diplomatically bringing them around to you, even though you may have to apparently go under to them; that is part of the game. You want the business, and the very process of getting it makes your game full of pleasure and interest if you only will tackle it in the proper spirit.

## Study to Get Best Methods

The car company plan to get your business, and so scheme to have their service and cars to suit your convenience. They play their brains against yours. You fall into their net as you ride to and from your business. They get your nickel because they have diplomatically planned to get it. If you could travel on their route for two cents, instead of five, for the same distance, with their consent, so much the better for you. This is the kind of thing which makes your business interesting.

And so, if your plans for purchases are properly studied, as well as your plans of selling, your plans for working your stock, staff, expenses and all the other incidentals, you make your business a pleasureable past-time and not a worrying, nerve-racking experience.

If you are the young man with the \$500 and want to make it more you must study to get the best methods. This means continual study and trying. If you treat your studies and trials as drudgery you will not get anything like the same interest or satisfaction out of it, but if you treat it as you would a good sport and behave like a good sport you will find continual pleasure.

## Planning and Watching Results

When I speak of studies I do not mean the usual methods of study—sitting down with books and papers—they need enter only as accessories, but the wider kinds of study which are more in the nature of experiments. Experiments are always interesting because you wait to see the effect of different procedure. You make a move and wait to see its effects, then you try another and another, planning and watching results.

You buy certain goods and experiment, you make plans for selling (which covers other experiments), you watch the results in each case and accordingly arrange your further plans and experiments. Your goods may not sell as quickly as you thought they would; find out why and try some other method.

You aim to get certain returns. This means experiments. If you get what you aim for you try for something big and plan and watch accordingly, and so on continually.

I hope I have said enough to show how and why business is made an interesting and stimulating game. Just as clean, healthy sport will benefit the body, so will clean and sportsmanlike business "playing the game of business" result in benefits to yourself and all you come in contact with. Treat your troubles, whatever they may be, as just a part of the game, beat them if you can, but, if you are knocked down, simply get up and try again. Persist and you will win.

# MODEL NEW STORE IN EQUIPMENT AND SERVICE

Splendid Features of the New Walk-Over Boot Shop in Montreal—Handsome Wall Cases, Mahogany Fixtures, Special Children's Department, Mezzanine Floor and Complete Orthopedic Parlor—Front Section of the Interior Devoted to Findings.

**T**HE last word in equipment, arrangement and appointments is presented in the handsome and artistic new Walk-Over Boot Shop, Montreal, of which F. A. Guinivan is the proprietor and S. E. Wygant, manager. Five years ago an attractive establishment was opened at 521 St. Catherine street and recently a removal was made to more spacious and elaborate quarters in the Drummond block at the corner of St. Catherine and Peel streets, just a few doors east. The new Walk-Over Boot Shop possesses every modern detail, combining the maximum of display with the minimum of service.

The display front is the usual Walk-Over type with deep, shallow windows and an arched ceiling between and a display show case in the usual position of the store doors, which are on each side of the centre case. The front was installed by the H. J. St. Clair Co., of Toronto.

## Special Display Arrangements

The front section of the store is used for the display and storage of specialties, fancy footwear and hosiery. The right hand side is equipped with handsome wall cases with slant front bases, that form silent salesmen cases, all doors being the Jones frameless style, sliding on multiple rollers, and in the centre of this fixture is a very convenient telephone arrangement with table and chairs for customers' use.

The left hand side has a special design of wall fixture for displaying and storing hosiery, each end being an attractive octagon shape display case and the centre being filled

with glass-fronted drawers that display the stock as well as store it.

Immediately in the rear is the men's section, with regulation wall shelving and handsome leather covered settees, some of which are turned to double use by being combined with low centre shelving, and at the rear is a men's shoe shine department.

## Women's and Children's Section

The store is enlarged considerably by an extension to the left and in this space is the ladies' section in two recesses with stock shelving on all sides and the same handsome settees. In the rear again is a large recess given over entirely to children's shoes and also a ladies' shoe shine department.

The extreme rear end is taken up with a mezzanine floor on which the business offices are located and underneath which are a complete orthopedic treatment parlor and a repair and alteration room.

The woodwork is mahogany with copper base plate and panels of mahogany cover every part of the store not used for stock or display, even the columns in the centre of the building being screened with mahogany.

The design of the fixtures is decidedly attractive and the many new and up-to-date features reflect credit on the designers and manufacturers, Jones Bros. & Co., Limited, of Toronto and Montreal. The management state the removal to new and larger premises was rendered necessary

*A VIEW of the interior affording some idea of the attractive and well arranged fixtures, seating facilities, etc., of the new Walk-Over Boot Shop, Montreal.*

*THE front portion of the interior of the new Walk-Over Boot Shop, Montreal, showing handsome wall cases, telephone desk, etc.*

owing to greatly increased patronage and the desire of the store to give wearers of Walk-Over shoes the best service possible, and service is interpreted as meaning not only advanced styles and perfect comfort but to make the purchase of pedal requirements a pleasant and cheerful duty.

#### INFLUENCE OF NEW LEATHER PRICES ON SHOES

There are a few skeptical persons in the trade who cannot be induced to believe that shoe prices have advanced as much as is generally claimed. They characterize everything printed or said as bull arguments devised to influence buyers. In this connection we quote herewith an elaborate letter of instructions recently sent out to its salesmen by a large western manufacturing concern, says the Shoe Retailer.

"While the shoe business is one of the greatest industries, it is, strictly speaking, a subsidiary industry, because the hides from which the leather is made are a by-product. We depend absolutely on the demand for meat to supply us with hides, as no one ever kills a cow just to sell the hide. The usages of leather have outstripped the demand for beef, and we exported in 1915 350 per cent. more leather than we did in 1913. In addition to this the cattle shipped to the warring nations has not produced hides to be tanned into leather suitable for shoes. The result is that we are bankrupt so far as certain leathers are concerned. They are not to be had in any appreciable quantities at any price. Consequently all shoes will not only be much higher, but will be hard to get this summer and this fall.

"Return your sample of ——. We will not have any more of this number. We would especially call attention to this number and request that he return his sample at once. We will not be able to deliver all the goods that we have sold of this number on account of the factory not being able to get the leather. Also return your sample ——. We cannot get any more of this leather to make this shoe at any price. We are entirely sold up on this shoe and will not be able to fill any more orders. We have a few more of — which you can continue to sell at \$3.25. After these are sold we will not be able to get the leather to make this shoe at any price.

"We note our salesmen continue to sell — and ——. These shoes were called in three weeks ago and our salesmen are simply disappointing their customers, as we will not be able to fill any of these orders on the ——. Return samples of — and —.

"It is especially important that our salesmen take notice that from this time on the tan shoes under lot numbers —, — and — will not be made of calfskin, but will be made of tan side leather. Please explain to your customers whenever you sell these shoes that they will not come like sample, but they will come from this time on made of side leather.

"We have enough shoes on the floor to fill the orders that you sold up to the present time from the shoes just like the samples, but in future explain that these shoes will all be made of a different leather as stated above.

"We cannot get any more calfskins out of which to make these shoes at this price. Sell the better grades of tan calfskins at \$3.50 and \$4.00. Just as soon as we get the new samples we will send them to you under lot numbers —, — and —. If you sell any more of —, — or — to come like the samples you now have you will disappoint your customers, as we are going to fill these orders out of the side leather shoe, which is not equal in value by any means to the shoe of which you now have samples.

"The prices may seem a little strong to some of our salesmen, but if you could be in touch for a minute with the leather people you would realize that we are not anywhere near on the basis of the present leather market. Good plump calfskins now must bring the tanners from 40c. to 45c. per foot where formerly they brought 20c. per foot less than this, which means that any shoe made from calfskins, even in the misses', on the present basis of the leather market, would have to bring 50c. per pair advance over the old basis. There is undoubtedly a scarcity of material and a tremendous demand and we see no relief from the present conditions until after the European war has been settled."

# HUMAN NATURE IN THE SHOE SELLING GAME

Leaving the Boss on Friendly Footing—How Some City Retailers May Be Bothered but Others Will Not Stand for Frequent Calls — Sincerity and Straightforwardness Yield Handsome Returns—Holding Out Illusive Propositions to Help Does Not Pay

A SHOE clerk who had been employed as manager in the women's department of an eastern store, was at "sixes and sevens" with the boss, with whom he had formerly been on terms of personal friendship. Latterly, however, things got out of joint, and he decided to resign, having something better in view. For several days the attitude of each toward the other had been that of studied politeness and frigid reserve. However, when the day of parting came, and Mr. K., being of warm Hibernian extraction, was bidding good bye to the boss, the latter said:—"Now, Mr. K., we are very sorry indeed to lose you. Personally, I cannot express how I regret the step you have taken. We have always been warm friends, and I wish you the very best of success in your new relations. If, at any time, you are in need of employment, why, come around and I hope to be able to do something for you. Again, let me say that I am extremely depressed at your departure."

Then Mr. K. turned around and also told of his regard for the boss—how their daily connection had been of the pleasantest character and to this he added his grief at leaving the firm; in fact, it is said, he almost shed tears at the thought of severance.

As Mr. K. had been both berating and "knocking" the boss for some days previous, when he came out and told of what had happened and the mutual admiration and esteem which each had expressed, one of his associates spoke up: "Why did you do all that?"

Then with a fine, withering scorn, the leave-taker remarked:—"Do you suppose, sir, that any true Irish gentleman is going to allow another to out-do him in hypocrisy?"

## Let the Other Fellow Have His Views

"Yes, salesmanship is a great art. You have got to study human nature," said a widely known traveler, "there are some men whom you can bore, that is by persistency of effort and frequency of calls you can get both placing and sorting orders out of them. There are other men who will not stand for insistent visits and want you to come around at stated periods or at an appointed time. If you drop in on them oftener than that your presence would be regarded in the nature of an intrusion. You see, the salesman has a good opportunity to study human nature, and the best man is the one who has the most intimate appreciation of the qualities, likes and dislikes of his customer.

"Now our firm never makes any alterations from the sample shoe that we show. We hold a conference and decide what pattern, last, leathers or combination of color will suit the greatest number of our patrons. Once a decision is reached the house does not allow us to make alterations to please anyone. Very frequently some sapient retailer will tell us that if such a shoe had a longer vamp, a patent tip, a Spanish heel, a different kind of foxing or cut of top, it would improve it greatly, and be a very much better seller. Now, it is the part of the salesman to be pleasant and to give credit to each man for his opinion, even if he does not agree with his observations. It makes the one offering suggestions think that he is a little wiser than the house itself. If you coincide with his views, there is no doubt that ere many minutes pass he will buy the shoe as it is, if he really needs something of that style and the price appeals to him. Some people like to raise imaginary points and if they are given the credit of being right, why, half the battle is won in the matter of a sale. There are any number of

men who like to think their views are carrying weight, and the tactful traveler is the one who agrees with the retailer in any desired changes that he may moot, but, at the same time, takes blamed good care to see that the shoes are sold exactly according to sample."

## Playing the Game Squarely at Any Costs

"Yes, sir, there are tricks in all trades," declared another salesman. "Some years ago I was busy selling a certain line in which the manufacturers agreed to adhere strictly to prices. In fact, they took an affidavit to the effect that the agreement would not be violated under any consideration. Now, I believe in playing square with the customer, but of course, there are some men you cannot hold down. Even manacled or shackled, they will break loose.

"A customer I had been calling upon in a western city always gave me a placing order of about \$3,000 worth of goods. Another traveler got wise to it, and calling on Mr. J. one day, found that his business ran up during the year to several thousand dollars. He intimated that he would be glad to give him some consideration, in order to get that business, and would place a telephone in each of his two stores and also one in his residence for a whole year, out of gratitude. When I next called on Mr. J. he told me of the proposal that had been made, and I said:—"Well, of course, that is a very nice offer, but I know that this man, and his house are under the same obligation as I am, to adhere strictly to prices. If he is making this overture to you, he or his firm will take it out of you later, either in the quality of the goods, the service rendered, or some other means. He is clearly violating a pledge.

"Now, Mr. J. was of a religious turn of mind. I informed him frankly how matters stood, and that under no circumstances would our house break faith. I quoted a little Scripture to the effect that a man's sins would find him out, and that sooner or later the 'special-concession' chap would get his deserts. 'Yes,' replied my customer, 'I believe you are right. I like a man who sticks to his agreement, and you are going to have my order. I will be a party to no side issue or secret understanding.'"

"Well, next year a representative for a firm that was not in the covenant, came in and offered Mr. J. 10% off the list prices. Here I was up against it. There was no use beating about the bush, for I could not bring the same arguments to play that I had regarding the specious offer of the previous chap.

"'Yes,' I remarked to Mr. J., 'you are in business to make money, and I do not blame you for obtaining your goods as cheaply as you can, providing you get as good a quality as we are offering, which I think you will. Now, this man's firm is not bound by any bonds or documents. He has a perfect right to cut prices if he likes, and I also think his goods are up to the mark. 10% on an order of \$3,000 is \$300 a year—a snug sum and one that is worth saving.

"'Well,' commented my retail friend, you are certainly very manly in the stand that you have taken, and eminently fair to a competitor. It is not often that I hear a traveler talk in this strain. I certainly respect you for your sound observations, which are disinterested. But, of course, having been offered 10% discount, and it being perfectly legitimate on the part of the firm who made it to do so, and

although the saving would be \$300 to me on this season's business, I tell you what I am going to do. I will meet you half way. I know that you cannot and will not cut prices, but I am going to give you \$1,500 worth of business, and the other firm will get the balance. I like a man who not only stands up for his house, but has a good word for the other fellow and the other fellow's goods if he can conscientiously speak on their behalf. It shows he has an honest, open disposition."

#### The Promised Promotion Never Came

"B' gorra, that man is the wiliest, smoothest, most plausible boss that I ever met. Why, I worked for him five years, without practically any promotion or any reasonable increase in salary. I was going to leave him on two or three occasions and even had accepted another and better job. On one of these occasions Mr. T.— told me that he had always appreciated my services, and that in an organization like his, there were openings constantly presenting themselves, and it was his policy to advance men in the service as rapidly as possible. He then intimated that he had a particularly attractive position for me, which would be open in a very short time—one that would be to my liking, both in the matter of salary and work. Well, sir, he got away with this kind of talk with me and several others, until the boys began to get wise to it, and realised that he was only 'jolly' them along, so that they would not leave him. We never got that promised post higher up and as far as paying liberal salaries was concerned, that was only a figment of his imagination. It took the staff a long time to size him up, but now, all the clerks are in the know, and when they get a chance of bettering their lot they are not slow in accepting it. They prefer performance to hot air."

A rather good joke was played on the residents of a

western town on April Fool day. A packing case was left on the sidewalk in front of the store of a shoeman. It had slats on the side over which was a curtain of sacking. On the box was pasted a shipping bill of an express company and the case looked as if it had just been delivered at the door by an expressman. In bold lettering on the top were the words "Irish Bats." The practical joker had arranged everything to induce passing pedestrians to take a squint at the contents by lifting the sacking. People wondered what kind of animal was on the inside and many were curious to the point of investigation. After prying away the hay and straw at the front they discovered a few red brick bats. Of course, each one who had been "victimized" would ask his neighbor if he had seen the real live Irish Bats in front of Mr. R— shoe store. The latter, it may be explained, was taken into the confidence of the practical joker, and for several hours it was rather interesting to watch the expressions of amazement, chagrin, merriment or disgust on the countenances of the many who did not realize until it was too late that it was the first day of April.

The Ottawa Shoemakers' Association, which is composed of practically all shoe repairers in the capital city, have advanced their prices 15 per cent. The shoemakers state the increase is due to the fact of the advance in cost of leather, which has gone up practically 30% since the outbreak of the war, while the price of thread, rubber cement, nails, and other supplies is exceptionally heavy. The only things that have not advanced in value are rubber heels. It is likely that shoemakers in other cities will also have to follow suit, as present prices cannot be maintained, in view of the way the figure for all supplies has risen. They feel it is far better for them to use good leather than it is to employ inferior materials and probably in the end, lose a steady customer.

#### A SIMPLE AND INEXPENSIVE SHOW WINDOW BACKGROUND

For the dealer who wants to change his window background quickly and at small cost portieres can be used with good effect.

Secure a sufficient number of pairs of the same portieres (not necessarily expensive ones) to hang around the back and two sides of the window. In choosing them it is best to select those in solid colors with a border or pattern applied on the same.

The border is preferably made about eighteen inches deep on which almost any design can be used so long as it conforms with the design on the portieres.

Make this border of framework of light lumber, cover it with muslin and paint it a plain color to match the predominating color in the portieres, or if possible, use the same kind of cloth for the border as is used in the portieres. The same design can be employed.

If difficulty arises in getting a suitable design

for this border it can be left plain and narrower, say from six to twelve inches wide.

This particular arrangement is taken from show window backgrounds and is especially adaptable in displaying shoes, housefurnishings, men's furnishings, draperies and hangings and similar lines.

# WHAT TO EXPECT AND WHAT NOT TO EXPECT

**An Interesting and Timely Booklet on "What to Expect and What Not to Expect in Footwear" Has Been Issued by the Massachusetts Retail Shoe Merchants' Association—Here are Twelve Rules Which Tell Much to Both Retailer and Wearer.**

**P**URCHASE best grades of footwear. It is economy to obtain high-grade leather and skilled workmanship, which will prove more comfortable and give better service. Save money, time and trouble by buying two or three pairs, then alternate in wearing and your boots will hold their shape better, wear longer and be more satisfactory in every way. When shoes prove lacking in service, it is obviously unjust to ask your dealer to replace same with a new pair, as it is only fair for you to pay for the wear obtained.

## Leathers

Glazed kid is the most comfortable and wears. Gun-metal or mat calf is heavier, not as easy, but adapted for rough usage. Most kinds of tan leathers lose their good looks if wet, and should be worn only in dry weather. The surface is often burned by acid polishes and friction from the cloth in the hands of the boot polisher—in fact, all leathers are damaged from these causes. Patent leathers are for dress wear. This leather is not guaranteed against cracking or peeling. The dry tanned leathers are not guaranteed.

## Footwear

Heavy for rough wear, medium weight for the street, business or office. Ladies' thin turns are for dress wear and not intended for wet weather or constant outdoor use. Cutting or defacing of uppers by wearing shoes in rough places is abuse on your part and your merchant should not be held responsible for damages of this nature.

## Fitting

Please remember that a size mark in a shoe does not indicate uniformity of size or width and you may observe a variance in the fittings, but should you insist on a fitting "too short or two narrow"—such fact ought to be plainly stamped on the linings, and you cannot in fairness claim any redress thereafter. Shoes worn out of doors or soiled on the bottoms are valueless to the dealer, and cannot be exchanged for a new pair or full credit given, as they are unsalable. Hence the necessity of exercising great care in selection and in fitting.

## Buttonholes and Eyelets

When buttonholes rip out, uppers tear, or eyelets pull away from the leathers, on account of unusual strain, or when backstays wear out from friction of the skirts of women or trousers of men it is only fair for your dealer to repair these items at a reasonable charge, and—important—your shoes should be repaired by the store at which they were purchased, as every dealer realizes that it is necessary to repair shoes properly, as "cobblers" are liable to damage the stitching of shoes.

## Upper Cracks and Sole Rips

Uppers will harden and crack from perspiration and your shoe merchant cannot be held responsible for this fault. Rips in soles or uppers can easily be repaired at small expense. Their occurrence is unavoidable. You should allow your dealer to repair same.

## Counters

To prevent counters from running over, or losing their shape, have heels repaired as soon as the first lift is worn

down. Wood heels have leather top lifts and should never be allowed to wear below the leather.

## Inner Soles and Linings

The heat from your feet, or wearing boots in wet weather will cause inner soles to become depressed in spots under the ball joints or toes, causing lumps. In such cases, your shoeman can remove these lumpy places as often as required: as the shoes are not at fault, you should not make claims for allowance owing to this condition. Linings will stretch, causing wrinkles, which can be removed by shrinking, but after the shoes are worn you should not expect new shoes on this account. The linings on the inside at the counters will wear out from perspiration and friction. Retailers are glad to repair same at moderate charges.

## Burnt Leather or Soles

When damp or wet all leathers burn from contact with the slightest heat. Don't expect your dealer to resole "burned shoes" without charge. When shoes are wet put them on shoe trees to dry, and thus preserve their shape.

When soles are defective, it is only fair adjustment for you to pay your dealer for service received.

## Fancy or Novelty Boots

All shoes made from delicate colored leather or fabrics in tops or vamps are luxuries, only intended for dress wear and not for service. You should not ask your dealer for any guarantee on these "millinery shoes," realizing that wear is a secondary consideration.

## Semi-Annual Clearance Sales

These sales are made to dispose of odd sizes and discontinued lines, and customers are requested to regard all sales as final.

---

## HAD TO PAY DUTY ON FOOTWEAR

More than a hundred women of Windsor, Ont., and vicinity, who "forgot" to pay duty on fashionable footwear purchased in Detroit were stopped by sharp-eyed customs officials at Windsor ferry dock on Good Friday and compelled to contribute 37½ cents on every dollar of costs of their shoes.

As some of the footwear of the "champagne" variety costs from \$6 to \$12, the amount of duty paid by violators of customs laws ran close to several hundred dollars.

Canadian customs authorities recently issued a warning that many women of border cities were wearing shoes on which no duty had been paid, and advised a voluntary visit to the customs office. This warning, apparently, had no effect, and a second order was given to the Windsor officers. While the substance of this second order was not made public, its effects were very noticeable when each fair wearer of the fancy but costly footgear were accosted and peremptorily notified to pay duty. The admission that the wearer of the shoes lived in Canada was sufficient evidence for the officials. Those who made objection were taxed the full cost of the shoes as well as paying the tariff of 37½ per cent. In some cases ladies were without money and were allowed to go after promising to return with the cash.

### SOME SUGGESTIONS FOR CLERKS

Be loyal to your store.

Be courteous to your customer.

Don't forget your customer is King. He pays you.

If you are grouchy, forget it. The customer might judge the store by your frown.

The customer entering the store is ready to buy. What he buys will depend upon how well you size up his needs and his wishes.

You can't buy good business. It comes from good treatment and the best of service. You can't pay a customer to trade with you.

The customer is not interested in your troubles nor the troubles of the store. He is interested in what you can do to give him a satisfactory fit.

Be careful in your speech. Remember that the store is held responsible for what you say.

Be quick to greet the customer. A quick welcome bespeaks the store hospitality and may influence him to bring in the entire family.

Remember that your value to the store is based on your resourcefulness. Keep your eyes open and don't hesitate to make suggestions for betterment.

At all times try to keep the store to which you belong of a standard worthy of membership in the Indiana Retail Shoe Association.—From the Manual issued by the Association.

### SOME SUGGESTIONS FOR PROPRIETORS

Read the trade papers from cover to cover—they are chuck full of good ideas that you can adopt.

Be patriotic when it comes to your own home town—help everything that tends to help that town.

Set the example of politeness and courtesy in your store. A broad smile does not cost a cent and pays big returns.

Make your clerks a part of your business plan. They will not work up much enthusiasm unless you do.

Fall in love with your business. Court it enthusiastically and it means success.

Don't pay \$2.25 for \$3 shoes. It's a sure sign you haven't been away from home for some time.

Help organize your local shoe association. It's much easier to do business when all competitors are on friendly terms.

Urge your salesmen to talk good shoes in your store. It pays both you and your customer.

Keep your engagement when you promise to meet a traveling salesman at a certain time. His time is money as well as yours.

Get that word "guarantee" out of your selling vocabulary. It covers too much territory for the never satisfied customer.

Do not hesitate to spend \$5 a year to belong to the Indiana Retail Shoe Association. Boost it for the work it is doing and it will boost you.—From the Manual issued by the Association.

### AN ORIGINAL WINDOW DISPLAY

An unique and impressive production in the line of window decoration was recently made by Roy E. Wilson, manager for Johnston & McCormick, shoe dealers, St. Thomas, Ont. The illustration on the opposite page affords an idea of the attractiveness and character of the display. Mr. Wilson says that the idea was not entirely original, coming as it did before "tulip week" of the St. Thomas Horticultural Society, and he used this as a basis for the decoration. The color scheme was purple, white and gold. There was a whole white covering for the floor, and across the ends of the window extending from the front glass to the white uprights or pillars he had a piece of old steel fencing gilted. On top of the two pillars he arranged lights, and in the centre of the window built from beaver board a bed of tulips surrounded with earth which made the flowers look very real. Overhanging this and from the sides a lattice work was arranged with spring blooms dropping down. The shoes were arranged as simply as possible with bunches of violets scattered here and there. The footwear displayed comprised all the newest creations in high and low cuts and slippers in every fashionable color. Mr. Wilson considers that this window display sold more good merchandise than any he had ever arranged and the local papers made appreciative mention of his efforts. The whole cost of the window was \$3.90.

### AN EFFECTIVE DISPLAY OF MEN'S SHOES

An interesting and impressive window display by J. L. Chisholm, manager of the Invictus Boot Shop, Yonge street, Toronto, is revealed in the illustration opposite. Mr. Chisholm has shown himself a leader in this line of work, and his most recent effort affords a good conception of what he can accomplish. The artistic background and sides are made of fibreboard, covered with cotton batting and heliotrope sateen, ornamented with silk cord and bunches of violets. The covering for the flooring is also sateen, and interspersed among the fourteen styles of men's shoes shown in each window were violets. The background was not only particularly inviting and striking, but several tan shoes were displayed resting on violet velvet cushions. The cushions were trimmed with silk cord. The contrast between the tan and the violet was decided and brought out all the beauty and attractiveness of the nut brown tones, in both high and low cuts. The tout ensemble resulted in greatly increased business, while numerous passers-by stopped to admire the pleasing arrangement.

### DEATH OF VETERAN HARNESS MAKER

William Alexander Kirkpatrick passed away on May 6th at his home, 181 King street east, Toronto, aged seventy-seven. A few weeks ago, while attempting to avoid an automobile on King street, Mr. Kirkpatrick was knocked down and never regained consciousness. He came to Canada from Donegal county, Ireland, in 1858 and, with his brother, located in Thornhill, Ont., in the saddlery and harness business, and about thirty years ago settled in Toronto, following the same line. He is survived by four sons and two daughters.

### ARE ENLARGING THEIR PLANT

The Parker Shoe Company, of Preston, Ont., have let the contract to R. Gatehouse for an addition to their present premises. The new part will be of red brick, 55 x 35 feet and three storeys high. It will be in the form of a wing, extending out 55 feet toward King Street and flush with the present building. S. H. Parker, manager of the company, expects that the extension will be completed early in June. The company are now employing over one hundred hands.

*A "TULIP" window with pretty blossoms suggestive of the glad spring time installed in Johnston & McCormick's Shoe Store, St. Thomas, Ont.*

*AN effective back ground of heliotrope sateen adorned with silk cord and violets, designed by J. L. Chisholm, Invictus Boot Shop, Toronto. Tan shoes are strikingly shown resting on violet velvet cushions.*

### SEATING SHOE BUYERS IN COMFORT

Do you remember the time not many years ago when you bought your shoes and rubbers and stepped into a store and was offered a seat on a straight backed hard wood bench? says the Dry Good Reporter.

There has been a decided improvement in recent years over this old style bench equipment. First of all, the shoe dealer realized that the customers did not like to be crowded

AN ATTRACTIVE SHOE STORE FITTED WITH COMFORTABLE ADJUSTABLE CHAIRS

on a bench with several other people and that oftentimes in coming into the store the customer would be apt to walk out if they saw that all the benches were occupied, even though there might be only one person on a bench.

To overcome this it was found advantageous to use single chairs. It was further realized that the more comfortable these chairs were made, the more pleasure would there be to the customers trading in that particular store.

A type of specialized shoe seating was developed, making it possible to fasten these seats in a continuous row on the store floor and having folding seats which made it possible to more quickly sweep the floors, and through their construction effected economy in floor space, and at the same time gave each customer a generous, roomy and comfortable seat.

This type of seating is illustrated in the store interior shown on this page and a study of the illustration will make one realize at a glance that this is the type of shoe department that will appeal to the customer and will hold the customer's trade.

These seats come in a variety of different finishes and designs, some having very luxurious appointments. All footwear and general stores having shoe departments will be vitally interested in seating of this kind in an effort to keep the high class character of their equipment uniform throughout the store. Seating of this kind has a superior decorative effect and harmonizes perfectly with the up-to-date appointments.

### ANOTHER HEROIC SHOEMAN AT FRONT

The thrilling stories of individual soldiers' bravery in front of St. Eloi during the period of April 11-18 have aroused the enthusiasm of the friends of the soldiers mentioned. In the list published by the Canadian General Representative the name of a former Berlin shoemaker, Lance-Corp. Bishop, was mentioned. He carried food and water to the garrison of the crater through an intense artillery fire. Prior to enlisting with the 19th Battalion in Toronto, Sidney Bishop had no military experience. Joining as a private, he received his promotion after the battalion left Toronto. Bishop is

25 years old and was formerly employed at the Western Shoe Company, in Berlin, Ontario.

### JIMMIE SCOTT THE PEACE MAKER

(See Front Cover)

For twenty years there has been no name or face better known in the city of Quebec than that of James A. Scott, known as the "peacemaker" of the shoe and leather trades.

In this capacity he has exercised an influence that has been incalculable. In private as well as trade differences he has been the urbane but persistent advocate of the **get together** policy that has meant much to Quebec shoe prestige as well as to the pockets and feelings of individuals.

He is the one man whom both the French and English elements regard as *au fait*. His word goes when the air is rife with mistrust and suspicion. He has the happy faculty of being "all things to all men," and one language or nationality is as good as another when he starts in.

He is sometimes called, as the late Harry Griffith would say, the "pace maker," for when he gets going it takes some ability and agility to keep up with him. He can do the little hand on the shoulder act backed with the right brand of cigars or something else in the inner sanctuary that Quebec shoe men and others know so well, or he can do "highland honors" at a banquet with one foot on the table as occasion arises. He is certainly the most popular as well as one of the most useful men in the Eastern trade and has to his credit many things of which even the inner circle knows but little.

He is withal a very successful and prosperous business man and has at his fingers ends the requirements of the shoe trade both in Quebec and Montreal. He is not tied down to the "treadmill of business," out of which, by the way, he extracts more than the usual amount of fun as well as profit. He is interested in society and patriotic matters and is the heart and soul of every movement in which a glad hand or a good push means success.

As they put it in Quebec, "Jimmie Scott—santé—three cheers and a tiger!"

### PLEASING PRESENTATION OF SPRING MODELS

Two of the most attractive and nicest shoe windows in spring foot toggery ever seen in any of the smaller centres of population were recently installed by Fred. R. Foley, of the Parlor Boot Shop, Bowmanville, Ont. The design was neat and impressive and the paneled background lent interest and charm to the display. The lattice work was trailed over with flowers and foliage and the arrangement of the new spring models combined to make the showing

A BEAUTIFUL SPRING FOOTWEAR DISPLAY

striking and inviting. Mr. Foley has always specialized in bright, seasonable window decorations and in installing original backgrounds shows good taste and judgment.

# Stray Shots From Solomon

Speaking of small men the dwarfs are not all found in museums. There are not a few in business. Some of these intellectual Tom Thumbs are so exceedingly diminutive that if ten thousand of them were put in a peanut shell it would still rattle.

SMALL  
POTATOES

A good story comes from up north somewhere which illustrates that kind of closeness that is sometimes compared to the paper on the wall. A merchant doing a general store business advertised that for a certain length of time he would give a free drink with every purchase. A few days later a granger appeared in the store enquiring if that was the place where they gave free drinks with every sale. On being assured that he was in the right place and that produce would be accepted as payment, he fished out a good sized egg and asked for the worth of it in darning needles. The trade was satisfactorily arranged, and notwithstanding its proportions the proprietor invited his customer to the rear of the store to partake of liquid refreshment. On being asked his particular failing in respect to drinks the horny-fisted son of toil expressed a preference for egg-nogg, and the merchant somewhat amused broke the one egg that represented his customer's purchase money into the glass. As the soft golden mass fell to the bottom it was discovered that the egg was double-yolked. "Hold on, Mister," said the farmer, "you owe me a couple more needles. That 'ere egg hez two yokes." A traveler had by dint of much haggling secured a fairly large sized order from a customer. The price in every line was fought to a finish. Then came the question of terms, which the merchant claimed to be four months, but which the traveler, on the prices made, figured at sixty days. After a sharp battle it was settled at five off sixty days. Then the question of freight was raised by the retailer who was scandalized at the idea of his having to pay it. The order was finally marked "freight paid." After one or two more concessions had been granted the deal was considered completed. Taking his order blank and totalling up the columns the traveler said to the customer: "See here, I think we can simplify the whole thing. You pay us simply the discounts and freight on this bill and we will ship you the goods." There are some people who the more you give them the more they will squeeze.

You would hardly think to see the number of people who are on the dead run for the dollar, that the gold and silver question is a dead issue on the other side of the grave. They work for the dollar, worry for it, starve for it, steal for it, kill for it, sell themselves body and soul to possess it, and all to see it slip from their clutches as the grim reaper sweeps them from the fields of time into the garner of eternity. How riches elude us even here! Stand at the busy mart, note the throngs as they

pass, and mark the "deceitfulness of riches." Count the men who once were called successful, who drove fine turnouts and lived in "brown stone" mansions, but now wear seedy clothes and last year's hats. Fortune is a fickle goddess. A man is rich to-day and to-morrow he may be living on the community. This thought should teach us humility and increase our sympathy for the unfortunate. It should also lead us to be more careful how we gather riches. When all a man leaves behind is a fat wallet he has indeed made a sad fizzle of life. "For riches are not forever." "And as he came forth of his mother's womb, naked shall he return to go as he came, and shall take nothing of his labor which he may carry away in his hand."

o o o o

There was a man a few years ago who got out of a respectable business to open a hotel in a Scott act county, expecting to make a fortune selling liquor in defiance of the law. A friend of his met him just before he begun the undertaking and said to him, "J—, you have been making a comfortable living at the business you have been in so far, haven't you?" "Yes," was the reply, "but I don't propose to go on working and slaving for a bare living. I think in my new venture I can make a tolerably good thing in four or five years, and get out with a little balance in the bank, and at the same time, not have worked half as hard." "J—," said the friend, "you mark my words. It will be a curse to you and your family, and you will lose every dollar you ever owned, and I certainly hope you will." Six years or more passed and neither met. At a certain celebration in an eastern city, the friend relates, he was hurrying along the crowded street, when whom should he meet but J—, rather much the worse for wear. "Hello, J—," said he, stretching out his hand, "how are you getting along, how is the family?" "Oh," said J—, "I haven't got any now. My wife and children are stopping with her folks, and I do not see them often. You see, I met with bad luck up at X—. I was fined twice, and was up the third time and had to skip, and somehow there was no money in the thing. I have just got back from the States, and am waiting for something to turn up." "What about the bank account?" interrupted the friend. "Oh, that's all cleared out long ago," and the bleary eyes revealed where any small remainder went. The friend did not say, "I told you so," but putting his hand on J—'s shoulder, expressed the hope that he would still be a man and get into some honest employment. Every day one sees the words of the wise man verified, "Wealth gotten by vanity shall be diminished."
