Memoranda pertaining to Clothing for Officers and Enlisted men not included in the foregoing:

UNIFORM FOR RETIRED OFFICERS.

Upon the question submitted as to what uniform may be worn under Section 1226 of the Revised Statutes, by an officer on the retired list, who, when retired, was a First Lieutenant of Cavalry, and who had held the volunteer rank of Colonel of Infantry, it was decided that on "occasions of ceremony" he could wear the uniform of his corps and rank in the volunteer service, or that of his rank and arm of service in the Regular Army except that the number of the regiment should not be worn on the cap, shoulder-knot, or shoulder-straps.—[*Cir.* 4, *A. G. O.*, 1884.]

SUMMER HELMETS.

"The summer helmet is permitted to be worn only on exceptional occasions, as a relief from the burning effects of the sun during periods of great heat—just as a straw hat has, at some places, been tolerated. I do not understand that it is to be regarded as a part of the permanent dress uniform anywhere, or at any time, but only as a relief in cases of emergency, adopted in order to secure as much uniformity of dress as is possible when a deviation from the fixed uniform seems to be necessary. To put the spike of the dress helmet or any other attachment on the summer helmet, must detract from its lightness and coolness, for which alone it is permitted to be worn, and as no spike is issued to the mounted troops, they could not appear with a spike when paraded in summer helmet along with foot soldiers. It is my opinion that it should not be worn on the summer helmet, and that it was not intended that it should be.

"A question similar to that regarding the wearing of the spike has come up as to the proper time and manner of wearing the chin-strap attached to the summer helmet. The chin-strap or chain is believed to be absolutely required whenever men are mounted, and frequently necessary for foot soldiers; it is therefore issued with the helmet. It should be worn down under the chin, unless, upon certain occasions, the commanding officer may authorize it to be worn otherwise; and this is a latitude of judgment which should not be permitted in any company commander or other officer except the post commander.

"As I understand the requirement of regulations, no officer or soldier at a military post may wear any article of uniform unless every officer or soldier at that post is required to wear the same, of course conforming to the arm of the service to which he belongs at that time; and there can be no mixture of full dress and fatigue dress, or partially military dress pieced out with citizen's clothes, tolerated at a well-commanded post. The proper dress for the day or the occasion is to be determined by the commanding officer, in conformity with Army Regulations, and no officer or man should be permitted to deviate from it. When, for good and sufficient reasons, an officer or soldier is permitted to wear citizen's dress, it should not be accompanied by a single button or other mark of the individual's military garb; it should be citizen's dress, simply and purely. When in uniform, he should conform rigidly to the requirement for the day.

"Much laxity in this regard is apparent at the present time, arising largely, no doubt, from many experimental articles of dress having been sent out for trial, with a view to the general improvement of the uniform; but this has led to a more general looseness regarding appearances and prescribed usages, which, at some important posts, has invited unfavorable criticism on the discipline of the Army."—[*Cir.* 11, *A. G. O.*, 1884.]

2072. All estimates or requisitions for clothing, whether special or annual, must conform strictly to the regulations prescribing the allowance and the sizes. Exclusive issues of larger sizes than are worn by the men cannot be made. The following table shows the proper proportion of sizes to the 100:

2073. Should any of the sizes of overcoats, uniform dress coats, blouses, and trousers, specified in the foregoing paragraph prove inadequate, measurements will be sent with the estimate for those garments when required for men who cannot be fitted with the regular sizes.—[G. O. 67, 1885.]

2074. Unmade, cut-out uniform coats, blouses, and trousers, may be issued to the enlisted men at cost of the materials. They will be obtained from the Quartermaster's Department, in the same manner as other articles of clothing.

The materials for each coat, blouse, or pair of trousers, with the buttons, thread, needles, and all necessary trimmings, shall be rolled up in a bundle, securely fastened, and marked with the size of the garment.

Cloth, flannel, and kersey of finer texture can be obtained upon requisition from the Quartermaster's Department, for issue to non-commissioned officers of the Army, out of which to make their uniform clothing, and officers of the Army may purchase of these materials such as they may need for their personal use.—[G. O., 99, 1884.]

2090 $\frac{1}{2}$. There will be issued to troops stationed in extremely cold regions, when the necessity for such issue is certified by the department commander, an overcoat made of fur or other suitable warm material. Said issue will, however, be confined to the men on guard duty, special scouts and expeditions involving such exposure to freezing as to jeopardize the life or limbs of those engaged in them.

The coat should be borne upon the returns of clothing and equipage as "camp and garrison equipage," and charged to the enlisted men only in case of loss or damage other than from ordinary wear and tear.

The fur overcoats on hand at the various posts will, when no longer needed by reason of the approach of warm weather, be turned over for protection to the respective post quartermasters, who will observe the following directions:

1. The coats should be exposed to the sun and then beaten with a light twig or rattan. The most important point being to make sure that all moth eggs, should any have been deposited, are destroyed before putting them away, the sunning and switching for this purpose should therefore be thorough—the latter, however, not severe enough to injure the fur or pelt.

* The figures on this line indicate the trade sizes of helmets, hats, and caps, corresponding to the sizes of the Quartermaster's Department.

2. Any coat requiring it should be repaired—using for this purpose, as far as practicable, such articles of a corresponding character as cannot be again rendered serviceable—and packed in boxes well lined with petroleum and wrapping paper (the latter being next the goods), care being taken that no holes or other openings are left in the wrappers for moths to enter; the boxes to be secured, nailed, and paper pasted over all joints. This will, it is thought, be sufficient to preserve the articles from damage.

3. The original packages of clothing opened for issue will usually supply sufficient petroleum paper to cover the fur articles in the spring. Should it be dry from age or use, it can be freshened up by rubbing into the surface a little of the ordinary illuminating coal-oil, taking care not to rub enough to penetrate the manila wrapping-paper.

Commanding officers will see that these instructions are strictly complied with.

One fur cap and one pair of fur gauntlets will also be issued annually to all enlisted men in the Departments of the Platte, Dakota, and the Columbia, and in other departments, when specially authorized by the division commander, at the prices established for such articles in the annual price list. Their money value is to be charged on the clothing accounts of the men to whom they may be issued, but is not to be computed in their clothing allowances.

These articles are to be borne on the returns of officers as clothing.

Civilian employés of the Government stationed at posts where it is found necessary to issue fur clothing may be permitted to purchase these goods when in the opinion of the post commander their duties are such that they actually need them.—[*G. O. 62, 1883.*]

CANVAS FATIGUE CLOTHING.

I. The Quartermaster's Department is authorized to furnish to each enlisted man of the Army who may be required to work on extra, daily, or fatigue duty one canvas suit in each year, as a part of his equipment.

For troops serving in the Departments of Dakota, the Platte, and the Columbia, the suit will consist of one blouse, one pair of trousers, and one hood and one pair of mittens for winter wear. For all other troops the suit will consist of one blouse and one pair of trousers.

Nothing in the foregoing is intended to increase the money allowance of clothing to the soldier. The articles herein authorized to be furnished will be issued under the direction of the post commander, whose duty it shall be to see that the articles are not lost or sold. They are to be kept and applied by the soldier to their proper use as a working dress, and intended to save the regular uniform, and to be worn on fatigue duty and at labor when these articles are more suitable than the woollen dress.

The articles may be dropped from the returns of the officers to whom they shall have been transferred when they are furnished to the soldier, upon the certificate of the officer to that effect; but such articles shall continue to be held as public property until worn out or destroyed. In case it becomes necessary to furnish to any enlisted man more than one of the articles named above in any one year, the articles so furnished shall be charged against the soldier's pay; provided, however, that in case of the loss or destruction of any of said articles without fault or neglect on the part of the soldier to whom they have been entrusted, and the immediate commanding officer shall so certify in the matter of the loss, then the article or articles so lost or destroyed may be replaced without charge to the soldier.

This order shall take effect from and after the 1st day of July, 1884.—[*G. O. 32, 1884.*]

None of the canvas clothing is to be charged to the enlisted men, and consequently if charged the men should be credited on their clothing accounts with the money value of the same. General Orders, No. 32, current series, from this office, is quite plain. It provides for the issue of this kind of clothing to each enlisted man who may be required to work on extra, daily, or fatigue duty. It may be supposed that non-commissioned officers are to be with the other enlisted men and exposed to all sorts of weather and dirt, and should, under the discretion of the post commander, be permitted to draw and wear the canvas clothing.—[*Cir. 8, A. G. O., 1884.*]

The issue of the brown canvas fatigue clothing to mounted men for stable duty is not approved.—[*Cir. 7, A. G. O., 1885.*]

BEDDING.

Mattresses, mattress-covers, pillows, pillow-cases, and bed-sheets are considered as part of the permanent equipment of a company, and should be moved with the other equipage upon change of station.—[*Cir. 7, A. G. O., 1885.*]
