From top to bottom – the new material is Koroseal

Even if you have a Koroseal raincoat, shower curtain, garment bag — you haven't seen anything yet!

LWT WHS picture remind you that Excorsed articles *any* youe,... that rainceat for instance could be worn and stuffed away, wet, every day for years, and it still wouldn't stick nor crack. Those pants can be washed any number of innest and still be as new-looking as the day they were bought. Kotoseal is unlike anything you've ever seen because it is an entirely new material developed by B. Goodrich from limestone, coke and salt. It is made only by this company.

Its qualities and uses are almost unlimited. For instance, it is practically scattered to reaching bass

practically scuttproof, so traveling bags and handbags of Koroseal will look like new long after usual materials would be cut and scratched. Koroseal in any color "wears like iron"—the ideal material for uppers and soles of sport shoes, and for upplostery in automobiles, buses, offices, homes. Because it is waterproof, and sun and air seem to have almost no effect on it, Korossel is ideal for awnings, outdoor fumiture, camping caujupment. Because is can be washed as easily as glass, and isn't damaged by acids, alcohol, nor ingerprints, wall coverings, tablecloths, aprons, playsuits of Koroseal can always kok like new.

Koroseal can be used as a thin coating on fabrics or used alone in sheets, tubes or any form, any color. It can be hard like glass or as flexible as rubber—but it contains no rubber, does not harden with age.

There are imitations of Koroseal, as you would expect of any such revolutionary material, but it's casy to tell the genuine article because everything made of Koroseal carries a prominent Koroseal targ. Everything with this label is made of material produced by B.F.Goodrich, and manufacture of the finished article has been under strict B.F.Goodrich standards. *Konseal it a trade-mark of The B.F.Goodrich Co.*, *Atoms, Ohio*.

LIFE

"Take it from me, sis, *Pops is tops!*"

BOBBY knows that Pop never forgets the importance of little things ... like the right present for a young man's birthday. But Bobby doesn't know that once Pop almost forgot a big thing ... a mighty important thing that could have made Bobby very unhappy later on.

An easy spender, Pop had always talked about the future in vague terms. He lived for today, letting tomorrow take care of itself.

Then one day Pop read a magazine article that struck home. It was about Social Security, and it showed that if something happened to him, Bobby's mother would receive hardly enough to cover her minimum living expenses. He also realized that Social Security would never provide the kind of retirement he had always dreamed about.

Throughly concerned, Pop invited a Mutual Life Representative to talk over the whole matter. Through Mutual Life's "Insured Income" Service they worked out a program in which Social Security and modern Life Insurance team up to safeguard the future...to assure Pop and his family the comforts of life in years to come.

Why not let the Mutual Life Representative in your community do as much for your family's happiness?

UNIVERSITY OF WASHINGTON COED SUE ANDERSON WATER-SKIS IN WHITE WOOL SUIT ON LAKE WASHINGTON

Life Takes a Fashion Trip to the Pacific Northwest

Eastern designers fly across U.S. and discover a new vacation land

People of the Pacific Northwest offen talk like travel advertisements. They declaim about the subscapped mountains (14,406 feet high), great stretches of shore line (ver 3.00 mics), is fieldly attacer (lass, trout, salmon), duck-filled marshes (22 varities) and the ineffidie air (a blend of eas, moutain and forset). This year there is a special point to the Northwest is based to agging. Americans are going to be traveling within the U.S. and the Northwest expects to attract them by the thousands.

Since in the minds of American women vacations and others are can dinivisible, Scattle's leading department store, Frederick and Nelson, spent 550, 000 on a flying fashion trip to the Northwest. In a specially chartcred plane 30 leading, New York fashion designers and reporters were hown across the continent to spend a long weekend in Washington state. With them were two moleks, Kit Carson and Joan Petti, who dressed for each occasion in suitable Frederick and Nelson clothers.

The clothes were not startling to the fashion experts but the Northwest was. The basst that almost all outdoor sports flourish there almost all the year round was made good when, on successive days, girls gave exhibitions of snow skiing, a winter sport. The goggle-cycl guess flew home feeling like latter-day Lewises and Carls who had come upon a wonderful new land.

SOCKEYE SALMON from Puget Sound and Chinook from Columbia River are rich and juiey. Girls in simple dress and shorts outfit watch an expert smoke them.

SAILING is a year-round sport in Puget Sound and Lake Washington, near Seattle. Waters are smooth and steady wind blows. Joan wears clamdiggers and plaid box coat.

SKIING in the state of Washington is good usually through mid-July on higher alti-tudes of Mt. Rainier and Mt. Baker. From April to July girls ski in sweaters and shorts,

like those Kit wears. The Summit at Snoqualmie Pass on alopes of the Cascade Moun-tains (abore), which is only about an hour's drive from Seattle, has snow through May.

Northwest CONTINUED

FOR RIDING, Washington not only has many trails through deep woods but stretches of gravelly prairies where the trails are never muddy or swampy, even

GOLF can be played year round except when it rains hard which, in December, is very often. Joan wears plaid skirt with a blue shirt; Kit a gray skirt and jacket.

HUNTERS can find pheasant, grouse, quail in the northeastern uplands and duck in the marshy lowlands. Kit and Joan are decked out in blue jeans and red hats.

BRIGHT IDEAS CATCH ON QUICKLY

YES, more and more folks are discovering what the constant aim of G-E Lamp Research - to make G-E Lamps stay brighter longer - means to their eyes and pocketbooks.

G-E Lamps are crammed with "more light for your money" because G-E Lamp Research packed them with most of the major lamp improvements of the past 50 years. Almost every great step forward in lamp-making, such as inside-frosted lamps, gas-filled lamps, lamps with coiled-coil filaments, and many, many others, came out of G-E Laboratories.

So ask for G-E Lamps by name if you want to enjoy the brightest, most economical light that G-E research and over half a century of lamp-making skill can produce.

Here's how G-E lamp research works for yon . . .

Take the widely used 60-watt G-E lamp, for example. In 1923, it cost 40c. Today, it costs only about one-fourth as much. But, more important, it gives 56% more light. Yes, G-E Lamp research works for you!

LIFE'S PICTURES

LIFE Photographer George Silk rode into the city of Hengyang in China's Human province perched on the side of a truck. There he took pictures of China's great famine shown on pages 29 to 35. The people of Hengyang, who were apathetic to the suffering around them, were fascinated by his camera. A native ONex Zealand, Silk, at 28, has covered both the European and the Far Eastern Fronts for LIFE.

The following list, page by page, shows the source from which each picture in this issue was gathered. Where a single page is indebied to several sources, credit is recorded picture by picture ((pi to right, to pi to bottom) and line by line ((lister separated by darks)) unless otherwise specified.

SOLE FOOD FOR THIS CHINESE FAMILY IS IN BASKET: RICE HUSKS, WEEDS AND ORDINARY CLAY FOR FILLER

CHINA FAMINE MILLIONS ARE STARVING IN THE ONCE-RICH "RICE-BOWL"

Famine, like a three-headed beast, today stalks Ghina. The uginess of drought, starvation and var'a aftermath rears over her richest lands. Her pationt people, long inured to suffering, are starving by the million because there is not enough food. Hunan province, once so rich with green fields or growing rice that it was called "Chins' srice bowl," is now her most devastated area. Hunan's folds are sared dead by drought. All but a few of her railcod bridges are rubble, having been blown up to retard the Japanese. An estimated 10,000,000 of Human's 27,000,000 people rejf or sustenance on a dist (abow) of green weeds, rice husks, grasses and ordinary clay which they call "Coddess of

Mercy." The precinct leader of the small Human village of Chi Ho told LIPE Correspondent William Gray, "The clay adds built to the weeds and rice hasks and makes their meal more heavy." But no matter what the Chinese add to their poor food they do not magically change it into rice. And that is China's grarest trial, for normally rice forms up to 70% of her people's daily diet. "From the Creat Wall to French Indo-China,

From the Great Wall to French Indo-China, wherever Chinese lands were gripped by occupying Japanese, the story is virtually the same as in Chi Ho, which had a population of 140 people two months ago and now has only 80 left. Of the remainder, 30 died from starvation and 30 went to the neighboring city of Hengyang, 12 miles distant, to beg in the streets.

The grim facts of China's famine are like an idio's tail that has suddenly taken on terribe meaning. Because the land is ruined here is not enough rice in China; and because the Japanese killed the water buffalo that pulled the ploys, the famers themselves must nave pull the ploys or turn the land by hand; and because half-starred men cannot do such heavy vork, two thirds of China's rice fields in parts of Hunan are untilled; and because the land is untilled there is not enough rice. What happens to China when there is not enough rice is shown on the following pages.

This issue of LIFE is smaller than normal in number of pages and of copies printed. It was cut from usual size when the Chicago power emergency, caused by coal strike, made it impossible to run LIFE's presses at more than a fraction of capacity. Closing of Chicago subscription offices will delay handling LIFE subscription mail.

DRAGGING PLOW through parched paddies, half-starved farmers must take the place of slaughtered water buffalo. Such work would exhaust even well-fed men. After

going home to riceless suppers night after night, they awake one morning too weak to go to fields. Normally paddies would be about six inches under water at plowing time.

STARVED BOY lies unnoticed in Hengyang gutter with tothes pack, chopsticks and empty rice bowl at side.

PEOPLE STARVE IN THE CITY STREETS

Rice is the food that keeps China alive. In an average year in the period between 1935 and 1940, China produced 41,300,000 short tons of milled rice. In the same period shc consumed an average 41,700,-000 tons. That means in good times she had to import only 400,000 short tons. These she could get easily from nearby Burma, Siam, French Indo-China, Korca and Formosa, all of which were rice exporters. But the devastation war and drought brought to China's great rice bowl also left its bitter mark on other Asiatic lands held by the Japanese. Today only French Indo-China and Siam, of all the lands in Asia, can still be considered to be rice exporters. China's estimated 1945-46 production is now down to 34,000,000 tons and she must import 7,700,000 tons. But there are less than 1,000,000 tons available from Siam and Indo-China. So today China, ordinarily the world's greatest rice producer, must book for her rice to the Western world. In the best times only 4,600,000 tons were produced annually in the rice-producing countries outside the Asiatic mainland. If every person in the U.S. were to stop eating rice for one year, there would still not be enough accumulated to make up China's vast deficit. In the face of these immovable facts the Chinese are learning to cat Western-type foods, which are alien to their appetites. But these, despite good intentions, are coming in dribbles too small to bridge the gap of starvation across China.

DYING TOGETHER in city streets are two miserable children who were unable to get enough food by begging,

WITH EMPTY BOWL a little boy begs for food from passers-by. Most child beggars come to city because of

supposed free rice there. On arriving they learn there is not enough for all and usually they die in the streets.

LYING HALF DEAD in Hengyang street, this child was seen by Photographer Silk riding by in a truck. Child's arm rests on pile of useless inflation dollars.

TAKEN TO A MISSION and given a bath in small round tub, the beggar child, an emaciated girl of 15, is afterward put to bed. She is discovered to have temperature of 100°.

SISTER LINTAS, a Sardinian nun, and two Chinese nurses shave girl's head next day to treat scabies sores on scalp. She still clutches grimy dollars in hand.

SIX DAYS LATER beggar girl, who is an orphan, is now happy and well fed as she sits up in bed alongside Sister. She hopes someday to visit America and work for Photographer Silk.

ONLY THE LUCKY Or Rich Can Eat

Other children in China's cities are not so lucky as the pathetic orphan whose story is told above. The passers-by who had ignored her before as she lay in the street gathered around her when the picturetaking started. Finally a Chinese official, moved by the show of foreign interest in the beggar child, ordered a ricksha to carry her to Hengyang's Catholic Mission Hospital. But the missions and relief stations cannot care for all children who beg for rice, and most of them are left in the streets to die, often within full sight of black-market rice shops (see apposite page) where only the very rich can afford to buy. Only when UNRRA flour or small shipments of legitimate rice arrive do these black-market prices go down.

BEFORE BLACK-MARKET RICE SHOP a rackribbed boy, who has come to llengy ang to beg. sits at curbstone and slowly starves to death. The merchant's wellfed wife, used to sight of starvation, sits smiling before her full rice baskets. Rice in such shops costs more than 600 Chinese dollars (a coolie's day's wage) per pound.

UNRRA SUPPLIES of powdered milk are carried by ricksha across a rice field. UNRRA officials under umbrellas behind rickshas come to watch distribution of milk at Hengyang CNRRA orphanage (see bottom picture). This shipment arrived by plane, was ferried across river and afterward hauled by hand to orphan children.

HER STARVING PEOPLE LOOK TO UNRRA AND MISSIONARIES

The main relief for China's millions comes from UNRRA and its local branch, CNRRA (Chinese National Relief and Rehabilitation Association). Even if enough food could be delivered to China's coast ports, UNRRA would still have a torturous task to carry it inland where China's hunger turns to famine. Years of war have uproted railroad tracks, smashed the bridges and gatted thereads over which these supplies must travel. The main relief food for China, a trickle now, is "forf rice," American flour cocked with water, flavored with sait. Only those who have a food card, distributed on the basis of need by local officials, can eat this tast-less gratel which U.S. schoolchildren have long used as homemale paste. The remaining gratm majority of Chinese stand outside mission gates for a bowlful of flour paste and vegetablec, or else they must wait for detuk, or next years' nice crop or more help from America.

BOWL OF MILK is drunk by orphan boy in courtyard of orphanage. Milk is rare food to China's children.

HE VOMITS even before he finishes bowl because milk is too rich for his stomach and he drank it too fast.

SORROWFUL BOY looks down on rich food gone to waste. UNRRA has to teach children to sipmilk slowly.

DIFED BATHER AT THE MUSSION GATE EEDING TIME TO PLEAD FOR LEFTOVERS

ON THE AIR

HAS RADIO BEEN GIVEN ANOTHER CHANCE TO GIVE THE LISTENER A MUCH-NEEDED BREAK?

The American radio currently presents one of history's most amusing, yet disturbing, instances of mankina's technology getting ahead of its culture. The broadcasting industry stands at the start of a new day of television and frequency modulation and is very proud. In S2 or this end of the same time it has "progressed" from Graham McName to Gabriel Heatter; from Honograph records to phonograph "transcriptions": from Jack Pearl to Milton Berk. Parl from having anything fresh to offer with its new technology, radio is trying to pep rise to the new copportunity. So we have the new theater, plush seats, gold curtain, but where is the show?

A Day on the Radio

Since there are 24 hours in a day, four major networks and more than 900 stations, any generality about American radio is subject to specific denial. It is true that virtually every important symphony orchestra in the country is now on the air, that the opera is broadcast and that anybody having an interest in almost any national or international problem can obtain much useful information by selective use of his dial. Some of the best reporting is done by radio newsmen. Scattered sparsely throughout the country are a few radio stations doing a commendable community job. And it is true that there is a certain money-means-nothing lushness about the way the networks buy showhusiness talent.

But when all this is said on the positive side, just listen to the radio for a single day! One escapes from the workaday world into one of honeyed unreality, in which romance, adventure, gaiety prevall—except that everybody seems to need Oid Doctor -Hoopiesnucker's remedies. It is a painstakingly censored other world, where the most grievous tribulations of men are described by a voice which leaves the implication that all will be well if you but douse your head with Blotz Shampoo. If U.N. faisi, try a luver pill.

Our radio day usually starts with an early riser who plays records interspersed with jocular reminders that time and the boss wait not. This is followed by radio dramas, or "soap operas designed to give the little woman a safe thrill while dusting. In these playlets the solid virtues, with boring regularity, triumph, though not until after the heroine has experienced considerable anguish. Errant husbands, with blithe disregard of the divorce statistics, turn at the crucial moment from the scented temptress to the gal with the apron washed in Sneezo. One difficulty of the drama, of course, is the lack of time. The episode starts with a few grinds of the time. The episode starts with a tew grands of the organ, followed by a long, long plug for the product. Then comes a recapitulation of what happened yesterday. The players have only a few harried moments in which to advance the plot from parlor sofa to bedroom door. Six reels of the chase but never the kill.

Noontime brings a little break in the way of news, Kate Smith or Mary Margaret McBride. But radio is impatient to get back to the "drammers." The Federal Communications Commission recently disclosed that the two biggest networks have almost 40 of these shows between them. At one time 55 of the 59/5 daytime hours of each week were filled with them. Sometimes there are breaks in the afternoon for OPA plugs, a woren's-club talk, a ball game or the like, but day in and day out it is the soap operas that carry radio to the after-chool thrillers. These are rather mean traps for Junior. They can accumulate box tops and thus experience the unuttrable joy of warning "Captain Tom Superman's assukceyer magic ting" or some other admission ticket to the fraternity of kids with frayed nerves.

Follows then the 6 o'clock news. The day's events are dished out, hot and staceato, with an aspirin. Then the same news is repeated with a seltzer. Then it is expounded in shouts, interpreted in whispers, analyzed with long words and set at nought with a laxative spelled backward, a lotion spelled conventionally or a shave cream that the Russians are fond of eating in lieu of batter.

Come now the vital hours, the heavy sugar minutes, the announcers in black ties, the sopranos in long dresses and sponsors sweating it out in air-conditioned glass cages. Come now the 80-piece orchestras and the \$10,000-sweek punchinellos—and the foghorns to herald body odor.

In recent years excuses were made for the comedians because their writers had gone off to the war. Apparently the scribes, at least, all came back alive; we are getting the same jokes we did five years ago. Danny Kaye, by no means worst of the lot, has been making fun of the writers for some weeks with variations of this 'jest':

"My sister is going to marry an Irishman." "Oh really?"

"No, O'Reilly."

Well, so it goes on the radio. It has its ups and downs, but it never wanders far from its own middle C, a note struck with peculiar clarity and brilliance on Sunday afternoon, April 23, If you had then been listening to *Devid Harding, Counterpy* you would have heard a commercial which attempted to induce mass thought transference about a cardy bar. After a three-second silfnee it ended as follows, '... thought yarse about rick, cream fulges of thought, the start of the start of the start hust, chevy caramel, ... tasty, tossied peanuts... and delicious, mild milk checolate?' As the announcer then added, 'There you have it, friends.'' That is radio.

From Hoover to Hill

President G. W. Hill of the American Tobacco Company said recently, "Taking 100% as the total radio value, we give 90% to the commercials... 1 don't have the right to spend the stockholders' money just to entertain the public." A viewpoint hard to quartel with, but it is a far cry from what Herbert Hoover said 20 years ago when it fell to him to define the principles that should apply to broadcasting. "The a public benefit." On this principle the Federal Communications Commission was given the power to revoke licenses for poor programing. This is a tremendous power, and the FCC has wisely feared to abuse it. In fact it has practically never used it at all.

FCCs precedent was followed by the station owner. He, too, has abdicated all real responsibility for program quality, James Rowland Angell, former president of Yale and now cluactional counselor to the National Broadcasting Company, once told a convention of radio executives, "I have met a great many owners and managers of American broadcasting stations in my time and found them fine, upstanding busicern for the public service they were rondering could be mentioned in the same breath with their interest in making money."

Everyone else having abdicated, the responsibility for programming in fact belongs to the advertiser. That being the case, it is perhaps surprising that the programs are no worse, for George HII's prescription is commercially honest and sound. Theadvertisers naturally give the public what it says it wants. It is therefore easy matches the term of public lance. Its says the gan, himself one of radio's more original wins, did in the New York *Times Macasing* recently.

But that is like saying that every nation has the government it deserves. Whether true or not, it is a poor formula for improvement. Improvement comes only through experiment, by trial and error. The trouble with radio today is that but few in it have enough motive to make enough experiments to improve the public taste or even to satisfy its variety.

A Way Out?

There may be a small light at the end of this tunnel. As pointed out in a recent book called *Radio's Second Chance*, by Charles A. Siapmann, frequency modulation (*RW*) will vasily increase the number of channels, and the number of networks can be greatly increased, too. The should make possible (if FCC is on its ownerships, Arready labor unions, universities, cooperatives, community and regional groups are bidding for FM licenses.

So may some of radio's top entertainers, who are temperamentally much more disposed to experiment than the men who pay their salarise now. The stars have the money and also the tax incentive to go into station ownership in a serious way. And nobody has more to gain than they from the rescue of radio. Except, of course, the American public.

PICTURE OF THE WEEK:

Bob Faller, who came to the hig lengues ten years age as an B-yeard buy wonder, this year returned to baseball after form long years in the two states of the states of the states of the states against the Year Year Yankes. His fast ball, which has von him an o-him, no van gune in 1926, haffed even the great Joe DiMaggio's lautiest wrings. In the inith insing, with the soort 1-oh his lawar, bened som on the Yankes powerhouse of DiMaggio and Keller to with in second nohih, no rang gune and Keller to with as second nohih, no rang gune and In Bob Feller's no-hit game the great loe DiMaggie barely manages to foul off one of Feller's fast balls

TRIESTE ISSUE has provoked most intransigent nationalism of any cause. Tito demands dominantly Italian Trieste as well as Venezia Gulia province, which has a large Slavic majority. Going farther even than the support the Russians have indicated they would give, Tito warned that bloodshed might result if any compromise is attempted.

BIG FOUR PEACE CONFERENCE Byrnes, Bevin, Bidault and Molotov Discuss treaties

When the Foreign Ministers of France, Britain, Russia and the U.S. convened in Paris last vector to discuss pace trates with their former enemies, the Russians' willingness to talk about previously motorid issues, such as Italian ability to pay reparitons, caused optimism. That mod vas short-lived, however, when American negotiators began to lefleve that the Russians merely had a new delying technique by ristering assume 'loc committees to study by reperts.' "Adving the theory of the study of the study of the study of the study disrmed. His intention was both to domonstrate American ainterity on participation in European affairs and to test Russian sincerity toward achieving pace by international agreement. The Russian toke the trady under advisement without official comment, but the controlled Russian press greed the approals with howing the domain. The Russian toke of talk the other American densities the study of the completion. Mere a veck of talk the other tradition during the domain. The Russian is toked talk the other tradition during the to discuss (see man) second like narrow completion.

ITALIAN COLONIES are disputed because their disposition may set pattern for colonial control in Pacific. The Russians are demanding trusteeship over Tripolitania but if their demand fails they will be more than satisfied with the Dodecanese Islands which will help give Dardsnelles control. Port in Eritrea may be given to Ethiopia.

PARIS CONFERENCE TABLE was first since the war at which France has appeared as a full participating power. Here the Foreign Ministers are shown seated with their aides in Salle de Victor Huge in Luxembourg Palace when press photographers were allowed to swarm in hriely. Seated far left is russia's former chief prosecutor, Andrei

FRENCH INTEREST centers chiefly in the Ruhr and Rhineland, which bave provided Germany wenyons for invading France in three wars. French determination to dotach these regions from Germany has prevented occupying powers from organizing any central government for Germany. Neither Russia nor U.S. invors partitioning Germany.

Vishinsky, who now is Molotov's brilliant deputy. Next is Molotov, then his interpreter, Pavlov, who served Stalin at Valta, and next Soviet Ambassador Gusev. Beside Gusev sits U.S. Assistant Secretary of State James C. Dunn, who prepared much of the groundwork for the conference, then Senator Tom Connally of Texas, Secretary Byrnes,

BALKAN PROBLEMS center around Greek desires for expansion as a reward for fighting on United Nations' side. But Bulgarians, with Russian backing, want an outlet southward to the Aegoan and Mediterranean at Greek expense. Rumania wants to get Southern Dobruja back from Bulgaria, to whom the Nazis gave it by treaty in 1940.

Charles ("Chip") Bohlen, Byrnes's aide (*head turned*), Senator, Arthur Vandenberg and René Massigli, French Ambassador to London. Head of British Foreign Secretary Ernest Bevin (at table, back to camera) is visible in left foreground. French delegation (*right foreground*) is obscured by photographers pushing close to the conference table.

ANCIENT ISSUE is over control of mountainous Transylvania, which has mixed Hungarian-Rumanian population. Awarded to Rumania at Trianon, it was returned to Hungary by Nazis. Russians' prime interest in this part of Europe seems to be solidifying control of Danube. U.S. oil properties are pure to be part of reparations discussions.

RUBINSTEIN'S OFFICE is at 63 Wall St. in an impressive suite of eight offices and a reception hall. It is dimly lighted, deeply carpeted and plushly furnished. Rubinstein is neat, well-tailored, plump, gray-eyed, brown-haired, loud-voiced. He speaks English, French, Russian, Spanish and German and talks about himself all the time

BURINSTEIN AND HIS YOUNG WIFE LAURETTE SIT IN THEIR LIVING ROOM. SHE IS TALL, SLIM, BLONDE AND COMES FROM FLUSHING IN THE BOROUGH OF QUEENS

RUBINSTEIN FINDS TROUBLE IN THE LAND OF PROMISE

The opulent setting shown above, once the Fifth Avenue home of Jules Bache, art patron and stockbroker, now shelters a recent immigrant named Serge Rubinstein. The change points a moral: that America is still, for the stranger, a land of opportunity. A Russian expatriate, Mr. Rubinstein arrived on these shores to stay eight years ago. Only 29, he was quite without connections, though not without means. In cash alone he had at least \$1,380,000, representing some of the assets of the Chosen Corp., Ltd., a British firm owning gold mines in Korea. These assets he acquired just before coming here, by means which made him the object of unremitting pursuit by the British government. Last fortnight Mr. Rubinstein, now 37, having

meanwhile been indicted as a draft dodger, suddealy achieved new importance in the country of his adoption. His bail was raised to the impressive sum of \$500,000 under conditions that testified to an unusual talent. Rubinstein had acquired a C-54 airplane of occanic range and the government feared he might flee American jurisdiction—an as-sumption which he denied. Only two days before, owing to the notoriety of the draft-evasion business, Rubinstein had resigned as head of the Panhandle Producing and Refining Co., but not before he had taken a nearly \$3,000,000 profit on his stock. Panhandle is one of 17 corporations which Rubinstein, during his short stay, managed to accumulate.

To call Rubinstein, as some do, a Wall Street operator is to do an injustice to a much-abused community. And it would be naive to hail him as a financial wizard. In 1935, for example, Premier Laval, so undiscriminating in other matters, chased him out of France for harassing the French franc; i.e., selling it short. Three years later the Japanese government fined him 3,000,000 yen for violating exchange regulations. A British stockholder described the Chosen operation as "a racket probably without precedent." Rubinstein lives by his wits.

Father Dmitri Rubinstein was a moneylender

to the last czar. When Serge was 10 the family fled before the Bolsheviks, drifted through Europe's capitals and finally settled, in 1926, in Paris. Serge was a bright boy with an electronic memory. At Cambridge, England he was an honor student in economics. But money was his passion-money and people. At 24, a banker in Paris, he knew the changing moods of the politicians' mistresses as minutely as the exchange fluctuations. One thing led to another and ultimately to Chosen Corp., one of those momentarily aimless corporations which attract men of wit. This was the first big killing. The anguished stockholders claimed that in the engorging of assets \$5,900,000 evaporated. Rubinstein also

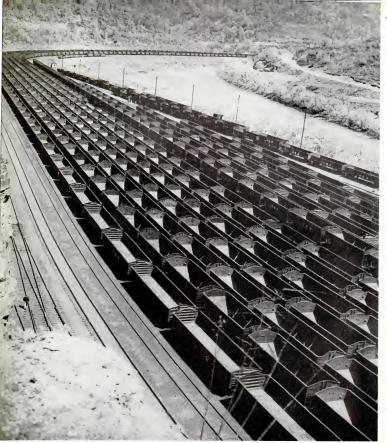

RUBINSTEIN'S HOME (center) is at 814 Fifth Ave. It once housed rich Jules Bache and his art collection,

picked up, at Macao, a Portuguese citizenship.

In Wall Street, Rubinstein set himself up as an investment banker. Mrs. Roosevelt had him for dinner at the White House, Senators Pepper, Wagner, "Happy" Chandler, Ed Flynn, liberals and conservatives-this charming, pushing stranger soon kuew them all. Meanwhile on the American boom the Chosen millions pyramided until Rubinstein was able to pay the stockholders \$2,250,000 to quiet them. There was plenty left for the Bachc mansion, a young American wife, cafe-society friends. It was to support the wife and various other dependents, he told the draft board, that he could not go to war-that, and being a Portuguese neutral. The draft board has since questioned that this brood would have been without means of support had Rubinstein put on a uniform.

Rubinstein's first ambition was to be a grand duke. "As a boy," he says, "I noticed they had the longest, blackest limousines and the blondest women. Both, I find, are disappointing." And America has graveled his philosophy. "In Europe," he ob-serves, "a man who makes money can be happy because it is understood that it takes brains to make money and doors are always open to brains. Here it is the other way around-unless, of course, you inherit money. America is a cold country."

AS SOFT-COAL STRIKE GOES INTO SECOND MONTH, MORE THAN 3,000 COAL CARS STAND EMPTY IN THE NORFOLK & WESTERN YARDS AT WILLIAMSON, W, VA

THE COAL STRIKE John L. Lewis' walkout affects railways, steel, autos, movies

42

John L. Lewis owes his unique power to two facts: he is the absolute dictator of 400,000 soft-coal miners, and soft coal is the lifeblood of the nation's industry. Last week, at his bidding, the arteries were drying up.

the set of the set of

spread to all plants which need steel. Chicago, lacking fuel to make electric power, shut off store and theater lights. Because most locomotives burn coal, Washington prepared the most numbing move of all—a drastic embargo on freight shipments, a 50% cut in passenger service. The only antidote to public despire was the knowledge that Levis, powerful enough to do all this, also had power to end the strike in 15 minutes when he chocs. ç, O

Perfect Reflection

ONE glanee at the reflection will tell you that the whiskey in the drink is Four Roses—the whiskey that makes a matchless highball.

For Four Roses has a superb and distinctive flavor, born of an exclusive combination of specially distilled *straight* whiskies. Four Roses is all straight whiskey, every drop—with a mellow smoothness and fine bouquet that we honestly believe enanot be equaled by any other whiskey. Won't you try Four Roses in your next whiskey-and-soda?

Four Roses is a blend of straight whiskies, 90 proof. Frankfort Distillers Corporation, New York City.

DESIGNER BILL STOUT, LIKE A SMALL BOY WITH A NEW PLAYTHING, SHOWS OFF HIS FIBER-GLASS CAR. COST OF MATERIALS USED IN BODY WAS ONLY \$75

FIBER-GLASS CAR

Bill Stout hopes newest creation will revolutionize auto industry The first really new postwar automobile to be shown in the U.S. has no chassis, carries its engine at the rear and has a body made of fiber-glass plastic. It is the handiwork of William B. Stout, creator of the Ford Tri-motor plane, the Scarab car and many other mechanical wonders. Stout molded his car of fiber glass because it

Stout molded his car of fiber glass because it weighs less than steel and yet is stronger. The floor of the body serves as the chassis and is suspended above the wheels by connecting shafts. Built into each shaft are two small pneumatic tires which absorb all riding shocks. Although a custom-built replica of the car can be ordered for \$10,000, Stout is already at work on a smaller version which he thinks can be made to undersell today's bwy-reiced cars. Like earlier Stout projects which were successful only in principle, such a car may never be mass-produced. But, as in the past, Stout's newest ideas almost certainly will inducence the making of tomorrow's automobiles.

CADILLAC, FORD AND STOUT CARS (left to right) are lined up to show how Stout's rear-engine design allows for more interior space. Driver sits well forward,

gets unobstructed view of road through spacious windshield. Body fabrication was done by Owens-Corning Fiberglas Corp. Plastic itself can be dyed to eliminate painting.

PICTURED IN ROME ARE (LEFT TO RIGHT) CARDINAL STRITCH, THE LATE CARDINAL GLENNON, CARDINAL MOONEY, CARDINAL SPELLMAN

The Consistory

Color photographs show the rich scenes in Rome when four Americans become Cardinals

The unrivated splendor of the Catholic College of Cardinal's consistory, held in Rome Feb. 18–22 to create 32 new cardinals, was a time-hallowed cerenony which on this occasion could be shared by millions of people far beyond the walls of St. Peter's basilica. Cameras and microphones recordol every detail of the public ceremoines with the presents color photographs with the result of the presents color photographs with the result of the bill brilliance of the consistory scenes. Such photographs were made possible by the elaborate flood. light system installed especially for the consistory.

By elevating such a large group at once and by giving non-tlatina a majority for the first time in six centuries, this consistory became a historic one. For the American Church I'vas of special note. With Dennis Cardinal Dougherty of Philadelphia, the four new cardinals absore—John Cardinal Clennon of St. Louis, Samuel Cardinal Stritch of Chicago, Evand Cardinal Stritch of Chicago, Evand Cardinal Stritch and Praneis Cardinal Spellman of New York—it gove the U.S. for the first time five places in the spectre of the first time five places in the College, Sally, however, American representation was quickly cut down when Carlinal Clemono, no his way home from Rome, died of complications following a lung congestion in his native relanda. At 83, Cardinal Clemon was the oldest of the new American carlinals. The above picture was taken outside the apostolic chancellery after the four other elevation. They were warring the magnot robes of archibiology which they will hare replace by the scaret colask of Princes of the Chart

New Cardinals Lie Prostrate at Altar

In the last colorful solemnity of the consistory the new eardinals prostrate themselves in prayer before the Altar of the Chair. Their capes are thrown over their heads as a sign of humility. At the altar, which supposedly encloses the episcopal throne of St. Peter himself. stands Granito Cardinal Pig-natelli di Belmonte (far right), 95, dean of the Sacred College of Cardinals, who is singing the prescribed prayer, Super Elec-tos Cardinales, On either side of the prostrate new cardinals stand the old cardinals with their trainbearers beside them. Behind them are massed other prelates, diplomats and laymen. When the Sistine Choir finished singing a triumphant Te Deum, the new cardinals rose and were embraced by the old ones with the "kiss of peace."

IN A BLAZE OF MEDIEVAL PACEANTRY POPE OPENS PUBLIC CONSISTORY, POPE, WEARING GOLDEN MITER, HAS JUST ASCENDED THRONE

Church of Rome Displays Its Ancient Pomp

Enthroned in St. Peter's, the Pope, both a spiritual and temporal soveriegi, is surrounded by one of the most colorful courts to survive into modern times. His throne, set up temporarily for the public consistory, vas placed before the main altar of St. Peter's, which was covered by upperty and crimon drapes. Grouped around the pontif on the tais are acticials who assisted him. Far let is is the tais are acticials who assisted him. Far let is is black knew hereches. Head of one of Roum's most patrician families, Prince Orsin has the herechtary right to assist at the pontifical throne. Next to him is Mgr. Dante, assistant to the papal master of ceremonies. Closest to the Pope stands the master of eeremonies, Mgr. Carlo Respighi (at right), who is an expert in ecclesiastical ceremonies.

Facing the Pope stand advocates pleading in Latin for the canonization of four new saints, among them Blessed Mother Cabrini of Chicago. Their pleas were heard before the Pope bestowed red hats. In the foreground can be seen a multitude of the colofful costumes which make the papal court advarling pageant. Cardinals in ermine capes roub shoulders with the Vatican's famous Swiss guards, whose glistening steel helmets and orange and back uniforms were designed by Michelangelo. Noble guardsmen wearing stiff white ruffs of the Remissiones stand beside prelates robed in magents, purple, exquisite lace and stiff brocades. (Note site heavy microphunc codr lumning cades. (Note site heavy microphunc codr lumning this consistory into the most splendid typectade that St., Peter's had seen in its 440 year history.

FRANCIE PANTS Frances Ramsden gets some slacks, Preston Sturges a suit for divorce

Preston Sturges, the one-man writer and director of such movie concelles as The Cara McGiny and TheMinacle of Morgan's Creck, is one of the few true gentises: in his field and an eager, trieless experimenter inothers (LIFE, Jan. 7). He is a restaurant owner, amanufacturer, a plavnyight (Srivel) Diokonorbidy, aninversior of such items as a kissproof lipstick, and amora, "a biart." Indicate the manufacture of thestructure of the second structure of the transferone-main structure. The second structure of thestructure of the second structure of the secondstructure, the second structure of the second structure of the second structure of the second structure ofthe second structure of the second structure of theswearing them in the picture at left. She is FrancesRamsken, 24, pretty former model who was discovered by Sturges and starred in his fortheoming comedy, The Sin of Hendel Diddibeds.

Surges' three marriages have been as interesting and hetrogeneous as his carer. His second wife was Eleanor Hutton, whose wealthy family (E. F. Hutton and his wife, new Mrs. Joseph E. Davies), considered Stunges a fortune hunter because he was then carring only about \$2,000 a week. Last week his hind for diverse on grounds of "menial enality," But Hollywood believes that the real cause of the diverse was that Preston Sturges was being seen too much with Francies, who was herself divorced only 6 weeks ago.

STURGES' THIRD WIFE, now suing for divorce, is the mother of Sturges' son. Sturges' mother had five husbands.

FRANCES RAMSDEN demonstrates how an oversize pair of dungarees are folded to form the "Francie Pants" pleats. Slack must now be evenly divided.

SLACK MATERIAL is held in place to make pleat on each side. Pants can be made either from old dungarees or cut from new material as on next page.

COMPLETED "FRANCIES" are supported by a wide belt. The pants are catching on and a manufacturer is interested in making them commercially.

THE LEATHERY VISAGE OF BOB CROSBY IS GRAPHICALLY LIMNED BY ARTIST PETER IN RD, CROSBY'S NEW MEXICO FRIEND AND NEIGHBOR

King of the Cowboys

In quarter century of rough rodeo competition "Wild Horse Bob" Crosby has become the No. 1 cowpoke and broken almost every bone in his body

THE RODEO is the only major American sport that grew out of an industry. In econtrast to baselall and football, which are contrived pastimes, the rodeo evolved from the business of raising cattle on the Western plains. The word itself (prononced roldeo) in the West and roday's in the effect East) derives from the Spanish rodeor meaning 'to round weight and interplate the state of the state of recease in 1883. Today hundreds of rodeos are held in the U.S. annually. Of these at least 90 are big-time affairs.

Like every spectator sport the rodeo has produced a hero, comparable in his realm to such alhetic immortals as Jack Dempsey and Babe Ruth. Like them he is a paunchy, creaking champion well past his prime. But unlike them he still rules his domain. Robert Anderson Crosby remains today, after 26 years of rugged rivalry, King of the Cowboys.

by CLAUDE STANUSH

By comparison with reduce competition, hocing and wristing are gentle diversions and larmore profitable to their practitioners. Cowhoys who range the redoce circuit pays for their own transportation and that of their horses. If the cowhoys are general by any steers or stekked by bucking broncs, the doctors' bills come out of their own pockets. Ever cowpokes manage to stay in top-flight competition for longer than two years. Coroly, at the age of 49, has been in the game a quarter century. In that interval he has failed only three times to win prize money at the Yeandlenn and Cheyenne roless, which are the Yeandlenn and Cheyenne roless, which are the base years only which till 1928 was becaused their and compete. It is holder of the Rosevelt Trophy, roleo's most covered award, which till 1928 was becaused annually to the cowboy who secred the highest point total in all events at Pendleton and Cheyenne. By virtue of winning it three times phy, a feat rodeo men had thought impossible.

Credey, in addition to being redeo's greatest practitione; is also its most spectradult rehowman. His nickname, "Wild Horse Boh," derives from the recklessness and occasional savagery that distinguish his performances. The price Crossly has paid for the \$150,000 in prize money he has stuffed in his faded Levis could best be toted up on X-ray film. Virtually every hone in his body, with the exception of his spine and left leg, has been fir fractured at one time, every ril at least once, both arms, both handing could best be toth arms, both handing could be the toth arms, both handing could be the toth arms in the startest south stuff at least once, both arms, both and y Cossly erght leg is little more than an atrophiled shank which he keeps encased in a specially fastened boot.

Although Crosby is a prosperous man, even

, muy alto

High, very high above the blue Caribbean they distill this "Mountain Rum"

famous

Up goes your enjoyment of rum - when the rum is Ron Merito. For this delectable "mountain rum" reaches the heights of smooth, rich, mellow flavor. Distilled in Puerto Rican uplands, where water, soil and tropic sun help man achieve delicious taste perfection. The better the rum, the better the drink. Better use Ron Merito!

AVAILABLE IN BOTH GOLO AND WHITE LABEL. SE PROOF. WRITE NATIONAL DISTILLERS Products corporation, dept. L38, P. O. Box 12, Wall Street Station, New York S, N. Y.

KING OF THE COWBOYS CONTINUED

by metropolitan standards, his competitive instincts will not let him retire. His wife and daughter would like him to devote his remaining years to his 50,000 acre Cross-B Ranch at Rowell, N. Mex. But even when he is at home Crossby spends little time under the roof of his handsome colonial house. He prefers to live with his 3,000 head of cattle under the sky.

Dinner with Wild Horse Bob

HE was out on the range a few weeks ago when LIFE's reporter arrived in Roswell to interview him. "Yuh a dude?" (Crosby asked unsmillingly, ignoring the reporter's outstretched hand. "Well, not exactly, Mr. Crosby," I replied. "I'm from Texas." He stared skeptically at my Stetson, blue jeans and scuffed hoots. "Waal, yore note says yore from California," he retorted. "When yuh cross that border from Arizona into California yore in furrin country. Ah don't like dudes and Ah don't like furriners. Do yuh like freehole beans?" "I was raised on 'em," I said. "Waal, that's like freehole beans? 'I was raised on cut, I said. waas, une o all we got," he said, 'and yuh can bunk with me if yuh don't mind eatin' freeholes. Ah cook 'em with a hunk of salt pork and a hunk of beef tallow and Ah throw in a shoulder bone if Ah can find one around." "That's just the way I like 'em," I said, "just as long as it isn't my shoulder bone." At this he insisted on unfastening his boot and showing me his leg, and when I told him it was the worstlooking leg I had ever seen he warmed up a bit.

As soon as we arrived at his camp site Crosby tossed a big batch of red Mexican Frijol beans into a ten-gallon lard can and set them boiling over a fire. At dinner he downed four bowls of beans before I could finish one. When I reached for a second helping he grabbed the bowl from my hand. "I'd like a few more of those beans," I said. He said, "Anybody can be slow," and proceeded to wash out my bowl.

Through Crosby's gristly body runs a strain of humor akin to that of his mentor, the late Will Rogers. That night as we sat on the ground beside our fire Crosby mingled autobiography with a succession of narrative flights which he refers to as "windles." When asked, for example, how he came to be a cowboy, Crosby is likely to respond, "Waal, one day muh ma was lopin' along the Texas plains on a paint pony, an' the Injuns were after her. All of a sudden a pain struck her in the stummick. She got off the pony and Ah was born. While Ah was bein' born, the hoss dropped a colt. The Injuns shore was plenty close by then. Muh ma got scairt an' jumped on her paint pony an' loped off. Waal, Ah jus' jumped on that colt and loped off, too."

The true story of Crosby's origin is scarcely less interesting. Grandfather Charlie Crosby was an early Texas judge who dispensed cow-country justice with an effectiveness still recalled today in Crosbyton, seat of Crosby County. Uncle Steve Crosby killed a "nester" (homesteader) in an argument over a water hole and spent his declining years in prison. Crosby's father Dick, who served as a Texas Ranger before he became a rancher, won Crosby's mother in a draw-poker game. Enamored of a pretty schoolmarm of Austin, he was annoyed to learn that another cowpoke was competing for her affections and promptly challenged his rival to a round of draw poker for the privilege of proposing to the lady at Stake. Crosby won, being as handy with cards as with a six-shooter, Wild Horse Bob emitted his "first beller" on Feb. 27, 1897 at

Midland, Texas. When Bob was 2, Pa Crosby bought a 50,000-acre range near Fort Stockton, in the western part of the state. Here Bob smelled leather for the first time. At the age of 3 he was tossed into a saddle and told to "stay put or fall off." At 7 he and his elder brother Harold received three-strand Manila ropes for Christmas, Although ranchers deprecate promiscuous roping of livestock, Pa Crosby never complained about the number of steers that suffered broken legs or snapped necks. Instead he would ask his sons, "How many didja rope?" On one occasion when a state tick inspector paid a visit, the Crosby boys roped and held 200 steers for him in a single day. The amazed inspector spread the tale and the Crosby legend began.

Crosby entered his first rodeo at the age of 13. Pitted against 11 adults, he won first prize in steer roping. After that he competed regularly, no on summer Will Rogers spent a week's vacation at the Crosby ranch and, on seeing young Bob perform, urged him to try his luck at Pendleton and Cheyenne. His entry into the big time was postponed, however, when his family suddenly moved to New Mexico. There was much work to be done on the new ranch, and in the course of it Crosby spent many lonely days on the open range. To relieve monotony he lassoed young antelope, which he found he could run down with a fast horse.

Crosby's rodeo debut was further delayed by an incident that

CROSBY COMES OUT OF THE CHUTE after a steer. The aim in steer roping is to rope and trip steer, tie up three legs. It is outlawed in 44 states.

occurred during a piente at Billy The Kid Springs. "Ah was chawin on a piece of barbecus." In relates, "when a compose with Mis Thema Jones. She's a ranzhack from Arkinsar-, Miss Thelma was shore a purty brown-haired filly. Ah went for her like a sick cat for a hot brick. Ah always said if ever Ah found a lady Ah couldn't kiss, Ah was gonna marry ber, and four months later Ah did. That's when Ah quit berib sos' on you titt. When a married man tells yuh he's bass, yuh better watch him. He's liable to lie to yuh 'but somethin' else."

À double dose of had luck ultimately launched Crosby on his rodeo career. In 1920 a drought burned up the range and by the end of the year the Crosby ranch was \$100,000 in debt. One day the banker who held the Crosby to nortage auggested to Boh that he might win big prize money at the annual rodeo in New York. City and offered to advance him \$250 for the trip. Crosby agreed to take the chance. "When Ah got out of the train in New York." It is a system and looked. Ah figgered it was the deepset cargun Ah'd ever seen. A policeman told me how to git to the Yankee Stadium on a subway and that's what Ah did. When Ah got there the rodeo fieller looked me over pretty disgusted-like, seeni' as Ah lad on low-card. The one of them fitting esta-thanker downhard Thered up and and Ah was oky. Ah' he man ob heas?" When the rodee was over Crosby collected \$1,250 top money in calf roging and with-hore traing.

Thirty days after his Yankee Stadium debut Croby was back in New York, this time at Mailson Square Garden, where he won \$1,000 for roping calves. Thereafter his path of glory crisscrossed the continent from Las Anglees to Boston and from Canada to Neu 1920 hereafter and the state of the state of the state Neu 1920 hereafter and the state of the state of the state of the Robert State of the state of the state of the state Chevenne robots and thereby acquired permanent possession of the Robert Inter on Const ywas recengized as Cowboy Xing.

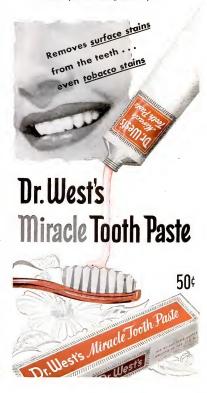

As the world's No. 1 rodeo hand, Groshy is a curious compound of contradictions. In his prime how as as handbome and dashing a figure as ver charged out of a chute. A conscious grandstander, he appeared a veritable Adonis of the range when he stood in the stirrups, his black Stetson held high before a cheering rodeo audience. Yet them, as now, his own and his hore's trappings were plain. Unlike many cowboys, Grosby is an abstemious person. He has never cheved tobacco, snoked, drunk had liquor, shot crapp or cussed. His favorite expletive is "Foot," uttered in a protracted draw. He even attends church from time to time, and on one occasion a clergyman held him up to his congregation as "a Christian cowboy."

For all his asceticism afoot, Crosby is a holy terror on horseback, hatel by many a cowhoy for his ronguness with stock—and with men. In his early rodeo days he would sometimes windbreak a horse by tearing it furiously around the areas before the show and the merashing it for the torque with a load plop. Coolly defends his rough handling of horses by pointing to the perfect manness and subservience of his mounts. 'A hous is like a woman,' he says. "They'll mind yun a little for love hut a low more for fear. Of

course it's a heap easier to get a hoss afeard of yuh than a woman." Despite their dislike of Crosby's playful brutality, his fellow coupokes confess vast respect for his courage and physical toughness. Crosby's hardihood, which amounts almost to indestructibiity, was best demonstrated during a series of violent mishaps that A BRAND NEW DENTIFRICE DISCOVERY

BY THE MAKERS OF DR. WEST'S MIRACLE-TUFT TOOTHBRUSH

 It's an entirely new idea—a product that lives up to its "Miracle" name. It offers, in a new-formula paste base, two polishing ingredients and an amazing liquid cleanser just made available—a cleanser with remarkable powers. Pleasing flavor. Try it!

"Son, I wish I'd had your chance at 17"

- "After I finished high school I floundered around in odd jobs for several years before I found myself.
- "I think you're made the right decision. I know that I would have been away ahead If I been able to jump right in and get the top training for a trade that's open to you now in the new peacetime Regular Army. A lot of men will use the opportunity to become specialists of the highest caliber.
- "Another thing. When you get back, under the GI Bill of Rights you can get a full college education-more than \$5000 worth—at Government expense! I could never afford it for myself, or for you.
- "It's your big chance, now-and your cauntry's, too. For you'll be helping to guard the Victory that cost so much to win.
- "I'm mighty glad you feel the same way about it. We'll drive down to the Recruiting Station tomorrow."

A GOOD JOB FOR YOU U.S.Army CHOOSE THIS FINE PROFESSION NOW! CHECK these opportunities for men enlisting in the new Regular Army. Army pay compares favorably with the net income in a civilian job-you don't have to spend money for food, rent, clothes or medical care. Overseas, you get 20 per cent extra pay.

You enlist for 1½, 2 or 3 years ...with a 30-day paid furlough each year. If you make the Army a career, you can retire on half pay after 20 years - three-quarters pay after 30 years. (For a Master Sergeant, that's up to \$155.25 a month.)

Best of all, if you enlist for 3 years before October 6, 1946, under the GI Bill of Rights you may have 48 months of education in your favorite college or trade or business school after you are discharged, provided you can meet ils entrance requirements. The Covernment will pay your ments. The Covernment will pay your stoop per ordinary school year, and will provide 850 a month for men with dependents.

Get all the facts at the local U.S. Army Recruiting Station today.

KING OF THE COWBOYS CONTINUED

beset him in the first six months of 1930. They began at the Phoenix rodeo in January when a horse fell with him, tearing his knee from its socket. Next month, with his injuried leg taped up, Grosby entered the rodeo at Tueson where an ornery steer ran a horn through his high. Limping out of the arean with hood spuring from his Levis, Crosby vent to his camp wagon where, plugging his thumb into one aperture of his wound, he pourced coal off from a lantern into the other. Next day he returned to the competition and won first more,

a lanter into uncovered and the second secon

roping. Three weeks later Crosby was flanking (throwing) steers on a ranch near Phoenix when one kicked him in the eye. He covered his face with his hands and a covhoy asked if he were hurt. "Believe Ah am, John," he dravled. The covhoy took one look at Crosby's face and fainted. Another covpoke came running up. "Ah cain't see much," Coobys said, "Dut Ah feel somethin" danghin. Jehieve it's much yee." "Shore is," the other covboy agreed. At a Phoenix hoopital a doctor put 11 sittlens in Crosby's spellor

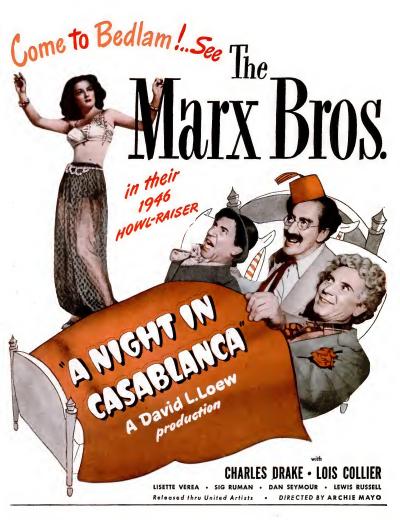

At a Pheenix hospital a doctor put 17 sitiches in Crosby's cyclid and four in the cyclal. A week later Crosby's uninjured cyc went sympathetically blind and it was two months before his vision retured a normal. Four days after regaining his sight Crosby-entered a rodeo at Prescott, where his right leg was broken for the fifth time. An overlight test caused gangerene to set in, and Crosby was shipped off to the Mayo Clinic. There specialists advised him that amputation would be necessary. The disconsolate covbay was being wheeled into the operating room when he suddenly reared up on the table. "A hapotta go home," he announced with mourrial resolution. "Mh'm mighty homesick and Ah'm a-goin' home."

When Grashy Timped back to Roswell be told his bruther, "Harold, Ah want yuh to git me the sorriest doctor yuh know." Harold said, "Ah know just the man, He ain't had a case in two years." The chosen sawhones, yoh was so sorry he had no office, used Groshy's kitchen as an operating room. He ripped the bad leg from knee to anke, "an' it openel like a Bible." Then, using a pockethnife dipped in alcohol, Groshy helped him scrape the hone. When the job was done he asked the doctor how much he owed. "Think I done a nice job thers," the doctor said with professional price. "Two dollars." Gangrees appeared in the big ice a week later, so the doctor snipped off the end of the tee with a pair of seving scissors. Cooly dispensed with snrgdal services when the life intervention of the packet full of fore mannee, a warrahle coolway panaeca. After two days of pondicing," the red contippeds plumh disappeared." Groshy was back in competition a few months later. Wakking on crutches and with his leg in a cast, he entered and won the steer-centuing contest at Winslow, Ariz, His prize money for that year, despite lib is eavailate, studied 82,700.

Croshy gave up brone riding and bulklogging after his fifth heg freature because his insurance company added a clanae invitduing his policy if he were killed in either of those activities. Since then he has concentrated on a terr roping, which is every hit as dangerous. Grosh's cronics cannot understand why the insurance company overhooded steer roping in rewriting his policy, "coputant it'd till do Bob to quit roping steers, and they'd lose either way." At the moment Groshy is entered in its forthcoming steerroping contests. His big match of the year, however, will take place June 9, when Croshy tangles with his ancient triat Carl Arnold at Clovis, N. Mex. for a \$10,000 purse. "I'd rather rope him," he says, "than how J,000 steers at Ge a pound."

Across the range with Wild Horse Bob

CROSBY likes to reminisce. Sitting before the fire in the open pature, be talked to LIFE's reporter until late at night. Then, abruptly, he broke off, and said, "Time to hit the hay." He spread out an old canvas blanket redolent of horse sweat and cow manuer, folded it once and began to undress. It was a frosty night, so

Exercise helps keep her Regular...

What about You?

Does lack of healthful exercise leave you constipated? Get pleasant relief with Saraka . . . the modern laxative.

If you're like most people, chances are you don't get enough exercise. Your trouble with constipation may be just that simple.

If so . . . stop worrying. Get Saraka. And enjoy pleasant, easy relief from constipation.

Saraka provides mild, but thorough laxation with its *bappy combination* of two pure vegetable ingredients. They work smoothly together to help you achieve greater regularity.

Helps Intestinal Action

One vegetable ingredient provides the kind of soft, smooth BULK your system needs, and often lacks.

This Bulk gives your intestinal muscles something to take hold of. It helps the "kneading action," so necessary to healthful elimination.

Gives You Bulk Plus Motility

Another vegetable product encourages your intestinal muscles to keep waste products in motion.

So you see, Saraka gives you BULK plus MOTILITY. The ideal laxative combination!

Mild and Thorough-No Purging

With Saraka, results are so nearly natural that most people have no sensation of ever having taken a laxative.

There's no purging action, or violent irritation to whip intestinal muscles into action ..., no weakening after-effect.

di

1/

Ask Your Doctor

We're confident your doctor will say you may take Saraka whenever needed. And it's pleasant to take . . , pleasant after taking. As you know, you should never take a laxative when appendicitis is indicated, for that reason, we assy: Caution, use only as directed.

reason, we say: cautoon, use only as directed. If you lack time for healthful exercise, and find you're constipated ... you owe it to yourself to try Saraka. Get a package today, at any drug counter. Or, if first you'd like a sample, mail the coupon.

KING OF THE COWBOYS CONTINUED

I cravled in quickly. "Wait a minnit three, man," Crouby said angrily, "Take of them clothery yore not goin' to dirty up much blanket." My shirt and jenns vere a good deal cleaner than the blanket, but I took them off and dow in nuck, hough the tenperature was almost freezing. At 4 a.m., while the stars were still shiring, I avoke sudeely and found myself on the bare ground. Crouby had jerked the blanket out from nucler me. "We gotta git up," he announced. "People die in bed."

¹⁰ One automatical access the second se

Just before sundown on the last day of my visit 12 wild Mexican steers and two horses were loaded into a big truck-tailer which took them 120 miles to Fort Summer, scene of Croaby's next steer-roping match. He then thiched a short trailer to an Army reconnsistance car and loaded in three more horses. Instead of following the big truck along the highway, Croaby struck out a cross open pasture land. "Ahm goin" as the crow files," he explained. "I's only 90 miles that way."

Riding inside that truck was like riding the hurricane deck of a brone. We bounced and jounced arrow guilties and ravines, traveling more than half the time at a 45° angle. Now and then Grobby would jump out, squint at the North Star and mutter, "Yep, we're on the right track now." We passed through at least 100 barbed-vire gaps. I always got out to open the gaps, and Grobby never gave me time to return to my seat. After every gap I had to dash for the car, graps the side of the cab as Grobby speel along in high gear and swing myself aloard like a rodeo trick rider. Eventually I suggested that he might at least allow me to get one foot inside. He only grunted, "Anybody can be slow," and that was that.

With the sid of Providence we reached Fort Summer a bit after midinght. It was bining cold, so I proposed we sleep in a tourist cabin or something with a roof overhead. Crosby looked at me disdinfully. "Man, yub mosta been smokin" marrivanna," he said. "Thought yuh was a I cean." We slept back of the grandstand on the rodeo grounds.

"Inologin yuli was a team. "It even to step tack of the generation of the rode of prounds. It is unlikely that Crosby will ever die in bed. "Ah was born on a hoss," he has often said, "and Ah want to die on a hoss." For the King of the Cowboys that would be a glorious death.

CROSBY'S RIGHT LEG has been broken five times. On last occasion doctors wanted to amputate, but Crosby treated infection with cow-manure poultice.

OFF TO A GOOD START

... nourish of him with GAINES!

How important it is to that little fellow's life—his health, his growth, his vitality, his happiness—to start him off right, by nourishing EVERY INCH of him, from the very first day you feed him.

But to nourish every inch of him, a food must supply so xucar...so many things that meat alone can't supply. In CANNES there's every type of nourishment that dogs are known to need. There is nothing wiser or kinder that you could do for your dog than to nourish him with CANNES.

And hospily, you will find CANTS more conomical to feed than any other type of dog food just mit CANTS MEAL with water. Or, if your dog goes for CANTS more agerly when it is mixed with mills gravy, soup, or meat—by all means please your dog. But no matter how you mix it, CANTS should be your dog's basic food, to make sure that you nourisk every just of him.

GAINES is a Meal dogs love. A stand-by of veterinarians for over 16 years. Today's leading brand among breeders. Largestselling dog food in America!

All this nourishment IN EVERY POUND OF GAINES!

As much body and strengthbuilding proteins as in 1½ lbs. beef

As much energy-making carbohydrates as in 2 qts. cooked oatmeal

For sleek appearance and glossy coat-the *fats* that would be provided by 1 oz. butter For strong bones and teeth-the minerals that would be provided by 1% lbs. cheese

For red-blooded vitality-as much iron as in % lb, beef liver

VITAMINS: As much vitamin A as in 5 eggs; thiamine (B.) in 1 the whole-wheat bread; ribofavin (B.) in 1 qt. mills; niacin in ½ lb. fresh mackerel . . . and all other members of B-complex that normally accompany thiamine, riboflavin, niacin.

For variety, try Gaines Krunchon, which is Gaines Meal compressed into crunchy peliets.

BATTLEFIELDS **OF EUROPE**

A "LIFE" ARTIST PAINTS THE WAR'S MEMORABLE PLACES

Little more than a year ago today the last battle flag of World War II was furled in Europe. After the battles had passed by the devastated land, a profound silence covered the battlefields; the dust of disuse settled over them. Already the austere glaze of history has touched the once ordinary places where the great battles were fought. The hills and the hedgerows and the ruined houses have now become a part of the American memory. Shortly after the fight-ing had stopped LIFE sent Artist Ogden Pleissner to Europe to paint the places where Americans had fought before time and the patient work of men had removed all the harsh reminders of battle and before memory had made monuments of the battlcfields.

Artist Pleissner, whose paintings of war in the Aleutians and France have already appeared in LIFE (May 22, 1944 and Jan. 8, 1945), traveled through France, Belgium, Germany and Italy. During his trip he saw some places that looked like Kansas, other places that looked like Wyoming and other places that looked like nothing else on earth. Near the eity of St. Lô in Normandy there were only crows that flew around slowly and endlessly in the sky over-head and disdained to touch the ruined land. Because the battles followed strange, uncertain paths, there were smiling farmlands and untouched towns, which had been by-passed by the armies, that sat timelessly alongside the ugly battlefields. "In some of these places," Pleissner said, "it would have been much easier for the people to move somewhere else and start to build all over again." But, as always before when war had scarred their land, the people of Europe soon eame back to their homes after the battles and began the long, dreary work of rebuilding. The armies themselves often took the lead in reelaiming the devastated

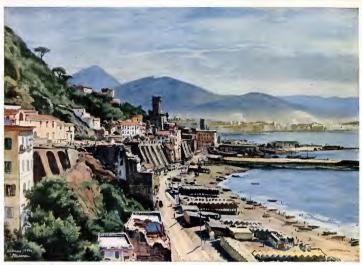

land and repairing the buildings. Along the invasion beaches they uprooted and detonated live mines, sometimes using German prisoners of war for the work. There even today broken old freighters and smashed landing craft still clutter the shores and at low tide children play in the boats at imaginary games of war. But little by little the insistent waves batter away at the wreckage until it gives up the uneven battle and, piece after piece, disappears into the sea.

On the farms of Europe rusting armor and sightless guns bar the way of farmers' plows. But all around the wreckage the work of planting goes on, In too many places-among the hedgerows of Normandy, the concrete blocks of the Siegfried Line and the well-blooded soil of Belgium-are the rich, red poppies that seem to grow so well where men have died. Dotting all the foreign countryside are the familiar road signs Americans put up wherever they went. Anzio still has its Americanized streets like O'Brien Alley, Anzio Road and Liberty Street. Outside the once fashionable villas and ponderous palaces, which were division and battalion command posts during the battles, people have left the American insignia. Everywhere there are cemeteries crowning the fields of battle. There are 40 American cemeteries in Europe, but none on German soil. These are tended with great care by nameless friends of the American dead. At Epinal in France an aging French veteran looks after the graves, growing flowers with which to decorate them in little homemade hothouses. In Luxembourg children who remember their earefree GI friends have "adopted" the graves of American soldiers. And in Holland neat Dutch housewives are writing to people in America to tell them they are caring for the graves of their dead sons.

THE DEAD On the battlefield of St. Lô, after the fighting, Artist Pleis-sper sketched a GI checking dog tags of dead Americans

at Isigny Army cemetery. He is fastening one dog tag to stick which will serve as temporary cross, Cemeteries were often established on battlefields where men fell.

SALERNO First Michandings in Europe case Sept. 9, 1913, 33 miles from Naple at Materia (Jober) where back humes and cahanks lined the May Tyrrhenian Son. ON THE TEST STAND THE MOTOR FIRES A HARD JET OF FLAND FROM EACH OF ITS FOUR CYLINDERS. PIPE IS FROSTED BY CARRYING LIQUID OXYGEN AT -- 360 F.

ROCKET MOTOR Navy tests power plant which may

push airplanes faster than sound

Near the end of the war in Europe, U.S. heavy bombers were sometimes surprised by German rockst fighters which hurtled through their formationsatspeeds greater than 600 mph. Last month the Navy revealed that the U.S. has developed a rocket motor for airplanes which is even more powerful than these used by the Germans. Its purpose: to propel an unspecified Navy plane faster than the speed of sound or more than 700 mph. Developed for the Navy by Rescion Motors, Inc. of Pompton Plains, N. J., the new motor converts the heat energy of its propellants into energy of motion with a minimum of machinery. Like V.2, it burns alcohol and liquid oxygen, derives its power from the fercen flame of their combustion. Weighing 210 pounds, the new motor can generate 8,000 horsepower at 400 mph, roughly the equivalent of the five tons of engines in a 8.29.

Rocket Motor CONTINUED

REGENERATIVE MOTOR is cooled by passing fuel between its combustion chamber and outer jacket. The concentrated combustion of such rockets is produced by feeding oxygen directly to the fuel in various ways. The Navy-Reaction Motors rocket's alcohol and pure oxygen is only one of many combinations of fuel and oxidizer.

REGENERATIVE MOTOR IS A BASIC ROCKET PRINCIPLE

Because the flame of a liquid-fuel rocket is hot enough to melt steel, cooling the walls of combustion chambers is a fundamental problem of rocket design. The principle which solves this problem is the regenerative motor, illustrated above. In regenerative motors the rocket fuel is circulated around the combustion chamber before it is burned, cooling the walls of the chamber just as water cools the cylinder walls of an automobile engine. At the same time the motor "regenerates," *i.e.*, heats the incoming fuel so it will burn more easily when it enters the combustion chamber.

FIRING INTO TEST PIT, the rocket motor is fed by big tanks of alcohol and oxygen. The long tank in the center contains alcohol. At right is oxygen tank. Behind

them are bottles of nitrogen which keep both tanks under pressure. Fitted to an airplane, the rocket would lift only enough fuel for a few minutes of powered flight.

uturally fresher ... NATURALLY BETTER !

Ballet in Moscow has not changed since the czars

ON THE HUGE STAGE OF MOSCOW'S BOLSHOI THEATER A TYPICAL PERFORMANCE

Russia's revolution has brought about many changes. But one thing it has failed to budge even so much as (in width of a twinking and/e is the Russian attitude toward Russia's favorite art form, the ballet. Today, in Moscow's magnificently ornate Dohhol Theater, muchlis, commissars and Hei Army generals yell themselves house with testatic approval at the filmy, romantic ballet spectades especially designed for the aristocratic tastes of the court of the lac Carx Nicholas. In the 1920S carrents Bolshevic chercographers attempted

ALEXEL YERMOLAYEV AND GALINA ULANOVA, BOTH "PEOPLE'S ARTISTS," ARE EXTRAORDINARY TECHNICIANS

OF "SWAN LAKE" REQUIRES MORE THAN A HUNDRED TOP-FLIGHT BALLET DANCERS

for a time to modernize Russian taste with ballets depicting workers with red flags and upraised fists. They got nowhere. Russians like their ballerinas in mags and uprased mist, a new got nownere. Aussians ince their national maternas in tights and *laws*, sensibly prefer to see them dance graceful, athletic fairy tales with sentimental 10th Century music by Peter Ilyeh Tchaikovsky. Russia's perennial ballet hit is Tchaikovsky's classic *Sven Lake*, a fairy-tale ballet whose steps were standardized in 1894 by the great master of the Im-

perial Ballet, Marius Petipa. The pictures on these pages give Americans their

BLONDE AND FRAGILE LOPOUKHINA IS THE BOLSHOI'S FAVORITE GLAMOUR GIRL

first ponderable glimpse of Swan Lake at the Bolshoi Theater. With an ele-gance of costume and scenery unmatched anywhere else in the world, Swan Lake lasts three hours, employs 32 beautifully trained "swans" and a cast of principals any one of whom is said to outdance the finest ballerinas of Europe and America. The Bolshoi troupe, many of whose members bear the official Soviet titles, Honored Artist and People's Artist, is chosen from the cream of the Soviet ballet schools whose curricula demand years of specialized training.

Bolshoi Ballet CONTINUED

"TARAS BULBA," based on a story by the great Russian author, Nikolai Gogol, is a comparatively modern ballet. But Muscovites rate it far below Scan Lake. Costumed with Cossack exuberance, it offers Dancer Farmanyants (abore) an opportunity for display of his almost incredible athletic provess.

BOXES AT THE BOLSHOI, which is to Moscow what the Metropolitan Opera House is to New York, are lavishly festooned with old-fashioned gilt and plush ornament. The house was built in 1825, seats 3,000. Seats are distributed in blocks to trade unions. Choice seats are reserved for Red Army officers.

Compare!

One costs \$57 a pair. The other costs just \$6.60 CAN YOU TELL THEM APART? Sure it's hard to believe—but true. One of these shoes was custom-designed by Gustav J. Peterson, New York's famous bootmaker. He hand-made it in finest Brazilian White Buckskin—the most expensive of cool summer leathers—and tawny brown Callskin. It's worth its high 857 price.

The other shoe is Regal's Reproductionmade in the same fine leathers-with every detail of Peterson's great styling carefully copied. But Regal craftsmen make the reproductions in volume on precision machinesand that's why Regal's price is just 86.60? Can you tell them apart? Then see the two in actuality—now displayed in Regal Store windows. Compare them and you'll understand more about Regal's great quality.

Compare the styles of other world-known bootmakers, too-who are giving Regal such unheatable fashions in town, country and sport shoes,

Fussy about fit? Wise man! Get Regal's exclusive "Prescription Fitting," which measures and fits both feet in standing and walking positions. It's been a sure help to foot comfort for over a quarter-century.

ENJOY a taste of Paris

DUBONNET - famous drink of many uses-is now made here

"LA BOTONDE—PARIS" — painted by Stanton MacDonald-Wright

Americans who visited the old Paris will always remember with keen pleasure the day they discovered Dubonnet. Perhaps it was in a Smart French home—or in a gay little sidewalk cafe but the first taste of tangy-sweet Dubonnet was an experience never to be forcotten.

Dubonnet has a zestful flavor all its own because it is made by a formula that has been kept a closely guarded secret for 100 years. No other drink pleases so many palates or has so 'many uses.

Today's the day to enjoy Dubonnet! Always serve well chilled.

It's smart to say-I'll take

HOW TO ENJOY DUBONNET*

OUBONNET (STRAIGHT) Always serve chilled. Add twist of lemon peel, if you like. Grand before, after or between meals.

DUBONNET MANHATTAN One-half Dubonnet. One-half rye or bourbon. One dash hitters. Stir with ice, Strain, Add a cherry.

DUBONNET COCKTAIL One-half Dubonnet, One-half gin, tir thoroughly with cracked ice, train, and add twist of lemon peel,

MERRY WIDOW One-half Dubonnet. One-half dry vermouth. Stir with ice. Strain and add a twist of lemon pool.

FOR MANY INTERESTING USES, SEND FOR "THE DUBONNET DRINK GUIDE" WRITE DUBONNET, DEPT. L25 3110 JEFFERSON STREET PHILADELPHIA 21, PA.

Dubonnet Aperitif Wine, Product of U.S.A., Copr. 1946, Dubonnet Corp., Philadelphia, Pa.

THE TWO SISTERS FROM BOSTON ARE MARTHA CHANDLER (JUNE ALLYSON), A PROPER LADY, AND ABIGAIL CHANDLER (KATHRYN GRAYSON), A SALOON SINGER

MOVIE OF THE WEEK:

Two Sisters from Boston

Low comedy is mingled with opera in a gay musical of the Gay '90s It sounds hard to conjure up a movie meshing the idents of two girls as pretty as Kathryn. Crayson and June Allyson and two men as unromantic as Lauritz Melchior and Jimmy Durante. But Metro-Goldwyn-Mayre has done so graefedily and with a minimum of fuss in a pleasantly silly little musical called *Two Sitsers from Boston*.

In the title roles are Soprano Grayson and Ingenue Allyson, who is now trying to forget that the Harvard Lampoon churlishly labeled her showing in *Het Highness and the Belloby* the worst female performance of 1945. The former plays the daughter of a proud Boston family who becomes a barroom singer in New York while trying to erash the Metropolitan Opera. Miss Allyson, the one girl in Hollywood who is really euter than a bug's ear, is the prim younger sister who becomes an actress, too.

Comedy is provided by the cucumber-nosed Durante, with Melchior as a capably oafish straight man. Together, the clowns maneuver Grayson into the Met and Allyson into the embraces of a young man of wealth (Peter Lawford).

Even its Gay '00s setting cannot save the story of Two Sitzer from Botan Grom seeming clumay and drawn-out. The film stands up because of a lot of bufformery by the principals and halfdozen comedy songs sung in musichall style by Grayson and Durante. Best number: [17] our F Ever Done by the Occan (Wont '10 and Please Drop In?).

AMERICAN PENCIL COMPANY

"Two Sisters from Boston" CONTINUED

ABIGAIL TELLS MARTHA that she has been earning a living by singing in a Bowery tavern. They try to figure out how Abby can get a job at the Met.

ABBY DANCES with Spike (Jimmy Durante). He wangles her a chorus job at the Met where she becomes the leading lady to the company's star tenor.

MARTHA DANCES in Abby's place to deceive the opera about Abby's former career. This endangers Martha's romance but she finally gets her man.

The 4-passenger comfort built into the Stinson Voyager 150 will win your heart for keeps! You don't have to duck under the wing in order to step into the spacious cabin. No stooping, no crawling. The doors are wide-meavy to get into and out of.

Easy does it

when you fly the new Stinson Voyager 150

When you settle back into the richly upholstered, adjustable seat you'll say, "Here's real luxury and comfort" What's more, the cabin has controlled ventilation and Fiberglas soundproofing. Low noise level permits use of cabin-dome loudspeaker-makes radio carphones unnecessary.

It's fun to fly a plane that's so easy to handle, so responsive to the controls, even at low flying speeds! The Voyager 130 has the weight, power, and inherent stability that give it a "solid" feeling usually not found in personal planes.

> Manufoctured under Civil Aeronautics Administration Type Certificate Number 767

EASY TO BUY ... EASY TO FLY

You'll arrive refreshed, ready for work or play, when you fly there in the Voyager 150. You won't need paved runways at your journey's end, either. Almost any small field or pasture will do to land or take off in this "fly-anywhere" plane.

PERFORMANCE MAKES THE VOYAGER 150 A "FLY-ANYWHERE" PLANE

Powered by a 6-cylinder, 150-horsepower engine, the Voyager 150 earries pilot and 3 passengers, has a gross weight of \$150 pounds. Here's what it will do fully loaded:

Meximum 1						
Cruising spe	ted (75%	power	et 60	00 ft.)	125	m.p.h.
Maximum r	enge					miles
Rate of clim						
Service celli	ng				14,0	100 ft.
Take-off at	sea level				550	ft.
Lending rur					230	44

See the Voyager 130 at your local Stinson dealer's. Or write for a free illustrated brochure, to Stinson Division, Consolidated Valtee Aircraft Corporation, Wagne, Michigan.

Why miss out on comfort-in-action?

GINNY:

l can't walk another step. Glory, what 1'd give forreal comfort on days like these!

MOLLIE:

Why Ginny haven't you discovered <u>Modess</u>? There's nothing softer for my money! And its so safe and dainty, too!

When you discover the soft-as-a-doud comfort of Modess—you'll see why more and more up-and-doing gals say, "There's nothing like Modess for me!"

That special, gentle softness! That real comfort-in-action! They're why Modess makes such a world of difference!

Modess' famous safety features really lull away your worries, too. That triple, full-length safety shield is your safeguard against accidents!

And so dainty ! Modess has a fine triple-proved deodorant-scaled in every downy-soft napkin. A grand new confidence aid that you'll welcome!

Costs no more ! So, enjoy all the extraa that makes Modess America's luxurious sanitary napkin.

"Two Sisters from Boston" CONTINUED MELCHIOR MAKES OLD-TIME RECORDING

The turn-of-the-century setting of *Two Sisten from Boson* permits the inclusion of a funny scene in which Lauritz Melchior illustrates the difficulties enduced by such early recording artists as Caruso and Terazzini in the primitive stages of the phonograph. To project varying degrees of sound and emotion Melchior dashes toward or backs away from the recording horn. When the resulting record is played the movie then inaccurately suggests how at famous trademark came into being a strained to the strained strained to the strained strained to the strained and the strained strained to the strained strained then inaccurately suggests how at famous trademark came into being the strained strained strained strained strained to the strained strained strained strained to the strained strained

LAURITZ MELCHIOR sings under the guidance of nervous sound expert. Equipment is so weak that musicians must run up close for crescendo effects.

MELCHIOR'S DOG lies patiently by his master while he waits to hear the record. When it is played the dog is mystified and searches for hidden voice.

DOG SITS beside phonograph. One of the workmen remarks, "His master's voice," thus suggesting trademark and slogan of Victor Talking Machine Co.

rene" is Queen.

Food is "wrapped" in a blanket of zero cold in the Deepfreeze. No food is farther than nine inches from the allsurrounding source of cold. Opens at the top ... cold can't spill out and isn't it a clean, white beauty!

If he wants fish, if he wants meat, if he wants biscuits, pie, soup, orange juice, cake, strawberries, ice cream, or asparaguswhy, just reach in the Deepfreeze and suit his (or your) fancy.

More food—more kinds of food—better food—in your home at all times, at lower cost.

Shop only when you feel like it. Buy in quantity when prices are right, and eat when you please.

Big enough for a large family, yet good business for even a family of two (more than 9 cubic feet-and every inch for food; holding more than 320 pounds). Costs no more to run than an ordinary electric refrigerator.

Yes-Deepfreeze is the leader in this modern age of home freezing. More units already in use (the proved home freezer). Most talked-about for what it will do.

For the small home and where space is limited, the economy-size Deepfreeze with more than 125 pounds capacity.

If you don't know the name of nearest Deepfreeze dealer, write us direct.

KEISER DRIVES at the 367-yard second hole, the ball landing 230 yards out in the rough between the

traps (upper right). In order to get ball back into position for a clean, straight shot at the green he was forced to waste a stroke. Par for the hole is 4: Keiser scored 5. Picture shows end of his orthodox, full-length swing.

HERMAN KEISER

Winner of the Masters Golf Tournament tries his skill on the toughest course in the world

When they learned that Herman Keiser had you the stiff Matters Golf Tournament, U.S. golf lovers batted their eyes in a stonishment. They had never even heard of Keiser. A lov-ranking, unspectacular player throughout the taiff winter circuit, Keiser had stepedu up and defated Ben Bogan, Byron Nelson and Sam Snead in the last tournament of the winter season. Some said that the vin was a fluke. Others, who checked the records, found that Keiser, ex-Navy petty officer and professional at the Frietone Country Uuda th Akron, Ohio, had a steady game which had won him the lowa State Open in 1928 and the Miami Four Ball in 1922. After years of hand, careful work he was due to win.

Last formight the Pine Valley Golf Gub invited the new Masters champion to New Jersey to measure his skill on the most difficult course in the world. A crary quilt of sand traps, Scotch pine, water holes, tull tress and dog-legs, Pine Valley has no parallel fairways and no out-of-bounds. It was completed in 1918 and in its first 21 years outy one man equaled par 70. Since then para has been broken a few times. The official course record is now 68. On their first visits to the course Bobb Jones and Walter Hagnes record 7.6 Jpron Nelson scored 75 and Harold McSpadden, 74. The pictures on these pages show Keiser's performance on his first visit. Going out, he secord 41 for mine holes, 6 over par. On the second mine he steadied and, though it rained during the last fire holes, scored 50, one over part, for a total d 77.

HERMAN KEISER chews on a tee while waiting his turn to drive. A tall, taciturn Missourian, his slow, calculating disposition keeps him from going to pieces under pressure.

ARK & TILFORD IMPORT CORP., NEW YORK, N. Y. + BLENDED SCOTCH WHISKY + 86 PROOF.

Herman Keiser continued

OFF THE FAIRWAY on the ninth hole, Keiser uses a No. 4 iron to get back in position. His ball was carried to a bad lie on this mound by a strong cross wind which blew his 250-yard drive to the right. Before selecting the

AT WATER HOLE Keiser's tee shot puts his ball on the green (background) in one shot. Two putts then gave him par for 169-yard hole. The water lies around three sides of the green and once, when dredged, yielded 15,000 halls.

PITCH SHOT is made from the edge of a trap on the 18th hole. The ball went cleanly (note blurred line), landed 100 yards away on the green. The bent-forward position of Keiser's body indicates the terrific power of shot.

SUN-GLARE MAKES YOU SOUINTI

NEW POLAROID VISOR MAKES DAY-DRIVING EASY ON YOUR EYES

This new scientific visor really stops reflected sun glare. It's the new POLAROID® Day-Driving VISOR. Not just another colored shield. It controls and selects light ..., blocks the glare ... lets the useful light pass through!

The POLAROID Day-Driving VISOR removes the eyestrain and discomfort of driving on tunny days. You can install it yourself on the visor of your car in a few seconds without tools. A flick of your finger folds it up out of the way for night or cloudy-day driving.

Only \$4.95, you'll find the POLAROID Day-Driving VISOR the best auto accessory investment you've ever made. See it demonstrated at your local auto supply dealer or garage.

If your dealer can't supply you, write direct to Zinn and McNab, 29 Brookline Ave., Boston 15, Mass., or W. C. Hitt Co., 1147 So. Broadway, Los Angeles 15, California.

Herman Keiser continued

KEISER FISHES in the water for ball which dropped in after badly aimed iron shot on the 16th hole. Here he took a 1-shot penalty, then sank an 80-foot chip shot for par 4. Lake lies along edge of the green on this 436-yard hole.

TYPICAL TERRAIN of the Pine Valley course is this area between tee and fairway on 6th hole. All courses have roughs, but Pine Valley also has large areas of sand, Scotch brush and pine which heavily penalize any topped drive.

KEISER SQUATS to study his putting line on the 12th hole, where he got his only below-par of the day-3 on a par-4 hole. The ball in foreground belongs to Club President John A. Brown, who played the course with Keiser.

CAMPER WAITING TO GO TO CLASS

JUNIOR COLLEGE LOS ANGELES TWO-YEAR SCHOOL IS BIGGEST IN THE U.S.

The junior college has always been the runt of the U.S. educational litter. Lying in the educational hierarchy between the high school and the senior college, it provides in its two-year course higher education for students who do not want to take the regular four-year college course. Until now it has been overshadowed by the more well-known and respected senior colleges and neglected by students and educators. Today, however, an overwhelming demand for more education has made the junior college the fastest-growing part of the American educational structure. This demand has also subjected the junior college to its first big test. Never before has the junior college handled so many students or had so important a job to do.

Among U.S. junior colleges the biggest and best equipped is the municipally owned Los Ange-les City College (above). To its coed campus come 4,500 students who pay no tuition, live in Los Angeles and travel to and from school every day. One third of the Los Angeles City College graduates go on to the last two years of senior college, The rest go on to marriage and the business world. Before World War I there were 100 junior colleges in the U.S. They taught only 5,000 stu-dents. By 1941 the number of such schools had increased to 600, their enrollment to 300,000. The war and the loss of manpower forced more than 100 to shut down. But the end-of-war boom in education has thrust the junior colleges into a new and respected position. They are giving a two-year college education to thousands of veterans who

cannot get into overcrowded four-year colleges.

JUNIOR COLLEGE CONTINUED

POLICE class trains students for Los Angeles force. Los Angeles police cooperate with and teach students, who take target practice twice weekly at Police Department range.

AIRLINE HOSTESSES are trained in serving food. Other aviation subjects, taught with the help of airlines, include grooming, airline traffic procedure and geography.

CURRICULUM IS MADE UP MOSTLY OF VOCATIONAL SUBJECTS

LA.C.C., like most of the Western junior colleges, concentrates on vocational courses. It wants to graduate its students as trained, semiprofessional men and vomers. Offers a vider selection of vocational courses than any other two-year college in the U.S. Although is students are allowed to take a few academic courses, like English, a foreign language and history, emphasis in placed on courses which will help them in some future trade or profession.

The college keeps its curriculum keyed to job opportunities. It canvasses the city, finds out what jobs are open, then, with the help of the Los Angeles businessmen, proceeds to establish courses which will train students to take those jobs. Businessmen are frequently invited to teach these courses. Students whose programs are planned by commercial associations are usually guaranteed job swhen they graduate. The college watches the job markets very closely. If, for instance, experienced tellers were needed in the Los Angeles banks, a course for training tellers would be in the curriculum the very next semester.

The two years of study are divided into four semesters, called *alpha*, *beta*, *gamma* and *delta* to differentiate from the four-year colleges' yearly divisions. When a student registers at LA.C.C. he picks bis professional course and sticks to it for the full two years. He then takes courses related only to his subject, gets little chance to study any others.

Students at LA.C.C., unlike those at other municipal junior colleges, live and work in a completely collegiate atmosphere. Their campus overs about 26 acres in the center of Los Angeles their 17 ivy-covered buildings are architecturally and functionally ago do as not stenior colleges. The athletic teams perform in a modern, well-built athletic field, compete with many senior colleges, have excellent records. The school works closely with the University of California, which helps arrange LA.C.C. curriculum to give college-bound pupils a head start when they go to the university.

ELECTRICAL ENGINEERING class works on devices for electrical motors. Course turns out technicians who will work for electric companies or start own repair shops.

RADIO class for fourth-semester students teaches students radio production, news writing and programing. Students here have made most of their own radio equipment.

DENTAL ASSISTANTS look at X-ray negatives of fellow students' teeth. The twoyear course is restricted to 50 girls, all of whom are virtually assured of dental jobs which average \$49 a week. Students take courses in chemistry, physics, dietetics, dental etiquette, learn to be laboratory technicians, nurses, dental secretaries, receptionists.

JUNIOR COLLEGE CONTINUED

ARCHEBY class is part of course in recreational leadership, designed to produce pub-lic and private-school athletic teachers, camp counselors and city playground directors.

NURSING STUDENTS learn the art of bathing an infant by watching teacher use doll as model. Hospitals give these students preference when selecting student nurses.

THEY ARE YOUNG AND CAN MEET **NEW CONDITIONS**

Western junior colleges follow the course laid down by L.A.C.C.: a municipally supported school em-phasizing practical and useful subjects. Eastern two-ycar colleges are usually private female finishing schools concentrating on cultural subjects. This di-vision over practical vs. cultural education is a con-tinuation of the more general controversy raging over the function of the U.S. high school (LIFE, April 22). The decision reached in the high-school

debate will shape and form the junior college. New to the field, the junior college has few of the traditions which have graced the older senior col-lege. To the junior college, in a time of educational transition, this lack of tradition is an advantage. With no ties to the past it is the most adaptable element in the entire American school structure.

DRAMA class girls make-up before giving The Man Who Came to Dinner. Hollywood scouts attend performances.

PHOTOGRAPHY class poses student Barbara O'Neill. They learn picture taking, lighting, lab work, enlarging.

BUSINESS ADMINISTRATION class, one of most popular in the schools, learns to use business machines.

Model poses for first-year art class whose students want to become commercial illustrators

America's Germany

Amid ruins the occupation army struggles to bring order out of the chaos the Nazis left behind by JULIAN BACH JR.

These excerpts are from *America*'s *Germany*, (Random House, St), the first book by an American on the progress of the U.S. occupation and on the lives that Americans are leading in Germany. It was written by Julian Bach Jr., an associate editor of LFE who, as an Army livettemant, spent six months in Germany after V-E Day. Of his book Secretary of War Patterson says, "It is the best account of what has happend since the surrender."

THROUGHOUT EUROPE, today the state of any nation can most quickly be assessed by determining the availability and sericeability horses and cars, the best method of transport for which most Europeans can hope is a bicycle. With a bike a man can pedal to work; he can visit friends. In a very real sense he is no longer croted to the immediate neighborhood but is free once more to enjoy all that life offers, if only within pedaling distance.

In France where bicycles have a value, not only for getting around, but also as a prop on which pretry grints i and show of their legs, bikes are at a premium. On the black market they cost as much as \$220, but at least here is a price. In Holland, Demark and Belgium the price is about the same. But it is an interesting and indicative fact about Germany that bicycles are priceless. There is an poince. Except for stolen once, they cannot explose a priceless. There is an poince. Except for stolen once, they cannot as a strain the store of the poince. Except for stolen once, they cannot as a strain the Bayede Age would be an entertaining act in the Human Germany in the Bayede Age would be an entertaining act in the Human

Germany in the Bicycle Age would be an entertaining act in the Human Comdy if the setting was not so oftab and the characters not so dangerous. It is the embodiment of justice that Ribbentrop's foreign, ministry should lie in ruins. It is equily that a German woman now bends over in the gutted Wilhelmstrasse, where for generations world domination was plotted in herbahafi, and tics together bits of branches and sites. But the entertainment value is lost when you suddenly realize that to a certain extent the future security of the world depends upon what happens to this woman.

In the suburbs of Aachen you watch a youngster, perhaps aged 6, goosestepping back and forth by the road every time an Allied truck passes. He thinks he is being cute. You think so, too, until you remember that unless he is taught to stop goose-stepping, your son may be doing close-order drill.

At the Armed Forces Network Station in Berlin, six Germans with Ph.D. degrees and there othere with master's degrees now work as technicians for 10y an hour, Oliviously they are not working for the money—80g a day but to earn a ration of potatese and bread, Yet for a twist of faite it might lave been they who perfected radar first or helped invent a German atom bomb.

There is a difference, however, between feeling sympathy and facing the facts. The facts of life in Germany are grim. It is our responsibility now to understand them. In essence they make life in Germany look like this:

FOOD-Near Hamburg, in a marshy plot of land, an elderly German in a business suit takes his cane and clubs a duck to death.

FUEL—Near Wiesbaden a German in dungarees is trying to retrieve a lump of coal that has fallen off a passing truck. Every time he steps out onto the main highway a jeep or truck comes along and forces him back. Finally, on the fourth attempt, he grabs the lump of coal and pockets it.

BY CHIPPED BRANDENBURGER GATE IN BATTERED BERLIN, BLACK

TRANSPORT—On the autobahn south of Kassel one afternoon there was an incongruous sight. Standing on the grassy midstrip was a tall, elderly German in a cutuava, pats and a sikt top bat. As he was not dressed quite in keeping with the Bicycle Age 1 pulled up and asked him about the purpose of his rigging. He explained that he was on his way to a town miles away. "My son is getting married there tonight and I am trying to get a thit."

Cramps in the German belly

MARKETEERS OFFER CIGARETS AND BINOCULARS FOR A BICYCLE, THE BEST MEANS OF TRANSPORTATION GERMANS CAN GET TODAY

result of German scorehed-earth policies and monthes of devastating fighting. Besides, the Russians have their own food shortages at home, occasioned by the German invasions and occupations of both Poland and the U.S.S.R., and the Red Army forages of the land. Thus there has been no substantial movement of food from the normally surplus east to the alwayslacking west.

In times of peace, with excellent transport and plenty of coal to manufacture artificial fertiliter and new fam implements, the Germans living in the U.S. zone might come closer to feeding themselves on a reduced but healthy ration. But this is not peace. It is the aftermath of a dissertous war. Transportation and coal are lacking, and there are 400,0000 extra people living in the zone. Thus at just the moment when there is less food and transportation than ever, there are more mouths to feed.

There are many people who would resolve the choice between importing food from outside Germany and staration by letting the Germans starte. The position these people take is something like this. The only good German is a dead German. Survation will kill off Germans. Therefore let the Germans starce. This view has perhaps never been more incisively expressed than in a letter which appeared in the Paris edition of the New York *Headli Tribune*. The hast paragraph said:

"It is funny that this same 'pitying of the Germans' which resulted in another war has not taught Americans a lesson. What does it matter if 20.000.000 Germans starve, whether their dangerous Hitler youth is exterminated and replaced by other European youth? As Clemenceau said: "There are 20,000,000 Germans too many." Let us say now: "There are 40,000,000 Germans too many' to prevent another war."

But anyone who sentences 30,000,000 propile to death in not likely to bring peace to the world. It was decided on V: EDay, when the Germans surrendered without conditions, that the indiscriminate killing of Germans had ceased. Once it is decided that Germans by the million will no longer be killed, the assumption is that they will be permitted to live. As l see it, this is the most obvious fact about America's Germany, Perhaps, because it is so obvious, it is also the hardest for many people to accept suddenly. But the first the million will be an experimental the first section of the section of the section of the length the Germany which the Big Three leaders decided upon at Potsdam.

For it was at Potsdam that it was decided, not only that the Germann should live, but how they should live and for what purpose. The "how" is that they shall live under a military occupation unil such a future time as they represent no threat to pace and are themselves capable of pursuing a democratic and peaceful way of life. The "purpose" is to make like is no longer profinable to devise new ways of liting them. This is especially true if they are to live today so that a some future tomorrow never German generations can regain their mord status and rejoin the "fam-

AMERICA'S GERMANY CONTINUED

ily of nations." Starvation, no matter how slow, is one of the least likely methods of achieving this end. Hungry people rarely make good democrats.

[•] Thus, if the Germans are not to be faced each winter with starvation, food will have to be imported. We must brace ourselves psychologically to accept the hard fact that, unless we wish to become Germans, "says an American officer," and at the same time read good many thousands of percons pulled through years in concentration camps on a diet of thin sour," To look at these German, "says an American officer," and at the same time read good many thousands of percons pulled through years in concenration camps on a diet of thin sour," of correct they did. But unless we are prepared, as Americans, to reduce ourselves to the moral level of the Germans and their concentration camps, here is no alternative but to accept the fact that in governing Germany we are not running a concentration camp. We hold each German individually guilty for having allowed concentration camps to exist the individual for each performed by him or in his mane is the basis upon which western civilization is built. This same responsibility governs us—and that part of Germany which we nor run.

Berlin butt biz buzzes

SINCE a pack of American cigarets is worth \$10 on the Berlin black market, it is not surprising that discarded butts also have a value in Germany. The collecting, processing and reselling of these butts is, in fact, a preoccupation of serious importance to Germans.

Each evening at the station of the Armed Forces Network which is called "Frankfurt" but is at Hofenst, the barcher, who speaks "French" but is German, used to go on a seavenging expedition when he was finished trimming hair. As a seavenger Frits est a new standard in politeness that was a source of constant amsement to Pritz in much the same way than to other people beau with an overly politic child to whom they feed candy but whom they would really like to spank.

After Fritz had swept sway the hair on the floor and replaced his sessors and cound in the little black handlag that he carried, he moved catlike into the captain's office. As Captain Darzig, like everyone else in radio, was always on the plone calling distances never under 500 miles, Fritz tiptoed up to his desk and purred policity. "Remetter:" This succeedent mored of Trench had become the American knew precisely to what the German was referring. He therefore responded with a "au" and Fritz proceeded to scoop up every cigaret but in sight. After he had empired the ash trays, the trashbackt and with a fam" inverzit, "tiptoed out. A moment day with placed the buts in the little tin how, which he carried for this purpose, and, with a fam" *inverzit, "stard and the placed to floor* down the hall as he purred, "*Permetter*."

A cigaret butt in German is a *stummel*. Stummel-ing is for many Germans a major business. I am not, when I say this, trying to be facetions. Collecting stummels in the Bicycle Age in Germany is a very serious way of making a living—if you happen to be German. Each but has a definite value, depending naturally upon its size. A discarded cigaret that has not been burned is worth 8 inarks (809). If half-burned its value is reduced but considerable: 1 mark or 10,8 the smallest stummel is worth 30 oftenings or 3;

In Berlin particularly the business of collecting and processing these but is organized. As Varivey might put it: BERLIN BUTT BIZ BUZZES. Schoolchildren, working after class, collect butts for their parents of for the combine for which they work. Children will sometimes follow a soldier smoking a cigaret for blocks in the hope that they can be in on the diseard. The most favored collectors, however, are not children or even subway employes who sweep the tracks and platforms for butts, but the waiters in cafes frequented by Allied troops. A study, sciously made at several cafes on the Kurfürstendam, revealed that no ash tray contaiing a but remained on a table for more than 45 seconds before the waiter scooped tup. Sometimes the operators, for whom the waiters work, resell the tobacco by the can. A single small can costs up to 120 marks (212). One Berlin summethana, sherweder than the rest, pot even higher prices for a time by pasting labels on the cans. The labels read, "Imported American Tobacco."

Night descends on Germany

THE MOOD of Germany in defeat is reflected in the nocturnal habits of our subjects. In the summer monts help sat stillesty, rarely conversing, in twos and threes on the benches in the parks. In winter they sat listesty at home. A spirit of resignation is reflected in the great increase in fortuncelling. "More and more people," says a burgomater, "are putting their fait in the hands of fortunc-tellers. In Erding a dairy hand set himself up as a fortunc-teller, had 70 customers the first evening." The troops of all four occupying powers have been struck by the "docility" of the population - in keeping with the German tendency to scrape in defeat and hally in victory. Householders ordered out of their homes on 3 to 48 hours' noice outlike to the scratchel by fuel. Those Germans working as scrauts to the occupiers can't de enough, American troops are supposed to carry arms in public. After V-E Day and for several weeks, everyone ddi. Then, when the docility of the natives beame apparent, pistols and carhines were put on the shelf.

Now pistols and earbines are being taken down again. Our subjects, resites and resentful, are beginning to sitr. In Berlin, in particular, there have been occasional shots at night (not all by Germann). A few cafes, movie houses and the Scala vauleville open in the late afternoon and close by 9 or 10. There are two mightclubs, the Femina and the neon-lighted bonne Carlo. The cover charge is only a few cemts but a bothe of cogme at the Monte much, because the Germans and Americana and other Allival oddiers who spend that sum can recoup it in black-market dealings the next day.

At the Fernina there is a quiet floor show and a good juzz band. Mostly there are American and British officers and men alone, or with nurses, Wacs or fraulein dates. A few of the girls have upswept hair and silver foxes strangling their necks, but to imagine that the Fernina is a newer Babylon is to miss the point. Eight MPs keep law and order in the place, and the Fernina shuts down at 9:30 p.m.

Seven girls sit on high stools behind the bar, "pouring" out drinks that have to be rediscovered with a microscope. A few sips of "Mocha Brandy" costs \$3.90. "Strawberry Wine" cocktail costs \$1.70. It is the least expensive refreshment in the house.

Sometimes after closing time there is a little unscheduled activity in the pitch-black streets around the Femina. I know, because the last time I left there a German, hiding in a darkened ruin, threw a rock through the right front window of the car.

New schools for very sour "Krauts"

THERE IS REASON to believe that many living Germans are "beyond hope." There is no doubt also that among the 2,000,000 children of school age in America's Germany there are some very sour "Krauts."

The kids are in a muddle. They find themselves holding on to a multitude of Nazi beliefs which were drummed into them, and now the activities for which they felt they were trained—soldiering,

AMERICA'S GERMANY CONTINUED

Hitler Youth leadership, Nazi politics — no longer exist. Oliviously within the space of a few school months three has not been time for Military Government, working through selected German teachers and books, to convert the kils to a new series of ideals and anbitions more in keeping with the realities of German Hie in the Bicycle Age. The start made by the Education Division of Military Government has, however, been solid. The first earth has been turned by way of preparing German schoolchilthen for an acceptance of democratic beliefs. No matter how pessimiatic one may feel concerning the chances of Vieron as schoolchilthen for an acceptance of democratic beliefs. No matter how pessimiatic one may feel concerning the chances of Vieron agers accepting this new ordenition, it is more desirable to have them back in school studying non-Nazi, though imperfect, texts under non-Nazi teachers whose worst fault at present is their indifference, than to have these children lotering diagerously on the streets.

The goal, of course, is to rebuild the German educational system from the boiler room up so that as quickly as possible democratically minded German teachers will be educating students to the value of a more cooperative way of life. As Germany has been the lesst cooperative of all nations, the task is sizable. To achieve it is one of the prime purposes of the occupation. If it is successful, German thinking will be revolutionized to the extent that for the first time in 80 years Germans may become a people fit to live at peace with the rest of the world.

Three milestones have already been passed along this long, uncharted road. The first mile was a hard push: to find suitable non-Nazi texts (but in the German language) quickly. The second mile was another hard push: to reopen the schools by fall, although American educators had only the summer months in which to work—and often hostility with which to contend. The third mile was no breather either: to throw out the Nazi teachers and still have enough policitally reliable teachers on hand to instruct the classes due to begin. To have accomplished most of this between V-E Day and OL: I is a record of which. Americans should be proud.

The "new" German texts in use in the schools are far from perfect. German educators are therefore being encouraged to write new and up-to-date texts with a suitable democratic orientation, and when such manuscripts become available, Military Government plans to have the local German authorities produce and distribute them.

Finding suitable teachers to serve in this same period of transition has been another problem. Few non-Nazi teachers existed in Germany after twelve years. The de-Nazifying of the German schools had by November resulted in the dropping of 70% of all the former teachers in America's Germany.

Meanwhile, on the bookshelves of German homes and stores, "something new has been added"—and much more has been taken away. *Mein Kampf* and every other Nazi book and pamphlet are referent. Householders may possess them (we are are aeriching homes for firerams but not books), but bookstores may no longer sell colored nearly every field of thought, almost every book, pamphler, magazine, play, film, newspaper and tract printed in Germany during a period of 12 years has has had to be banned.

As a result bookstores are half empty and booksellers have been ransacking attics for classics, truly scientific treatises, atlases, almanacs and even cookbooks. The authors formerly banned are

AMERICA'S GERMANY CONTINUED

now best-sellers: Thomas Mann, Jack Landon, Theodore Dreiser, All told, the works of 2,200 authors, not all necessarily Nazis, have been harred. Similarly in the field of music all German marching songs, the Nazi *Hors W resel Lied* and *The W atch on the Rhine are* hanned, and compositions by composers previously taboo, like Mendelssohn, Tchaikovsky, Offenbach and Shostakovitch are now in vogue.

Eventually book publishing will undergo the same transition as the press with the conditional licensing of enough German publishers to give Germans new reading matter. Several church prougs have been licenset to publish Bubles and catechisms, and the first conditional license to publish Bubles and tactechisms, and the first endelberg publisher whose a mit-Nazi background is beyond dispute. His first titles are translations of Emerson's cesars, Franklin's Aurobiography and Dove's The Gold-Bug.

Justice to a hair

THE FRAULEINS are called "furlines" or "fraternazis" by Amerirean troops. Alman going out tells his roommates, "I'm goin, his construction of the second second second second second his construction of the genesical. We one estimate, haved on six months of tarvel around Germany, would be that 60% of the men in some units. 10% of the men in other units fraternize.

and the transformed of the girls have picked up extra food, eigners, a few illegithmate children and an increasing amount of alang. A girl with whom Americans associate is likely to look at the snowy weather and say, "It's regged." If kidded, she may come back with the familiar "Straighten up there, pilot, and fly her right."

Fraterization, far from having become a dead issue, is today more complicated than ever. This is due to the appearance on the scene of the German male. Last summer young German men were mostly locked up as IWs. But now they are returning to civillan life and they do not like to see their girls consorting with their conquerors. Their anger is taken out chiefly against the girls, some of whom have been beaten up by their countrymen or have received threats or have had their heads haved. A tryoigia antifratemization poster, addressed to "GERMAN WOMEN!" and put up in one night by byoa syoung as 12, soid:

> What German women and girls do, Makes a man weep, not laugh. One bar of chocolate only or one piece of gum Gives her the name German whore....

When such a woman should desire a German husband, She should go to hell. The devil does not want such creatures and will Throw them on the dung, thinking. "Dirt belongs to dirt."

There is more at stake here than the mere question of how Germans react to the sight of Americans with German girks. The significance was apply expressed by a girl whose name appeared on a poster and who told me later, "The fellow who make up this poster must have been a great Naxi, perhaps a jited man or married gay. In any case he hasn't realized that times have changed." That is the point. The extent to which German men accept "frating" is the thermometer which registers the degree to which they accept defeat, contain their national pride and look forward to a new and more congenial way of life. Obviously the sight of a German woman with an American computor enrages an "unreconstructed" German more than a German who is anvisuo to cooperate with us.

There is also a democratic right of some significance at stake. However sortid love over a chocolate bar and hox of sait-water taffy may be, it does represent the right of two human beings freely to pick their own associates. This initialenable democratic freedom has perluga never been more precisely expressed than by a former Heindleberg. It was before Captain Rutherford that the first tail of a young German boy, accused of clipping the bair of a fraternizing "furtine," was held in America's Germany.

The accused was 20; he had just been discharged from a prisoner cage and he was standing in the railroad station at Heideberg watching a fraulein and her sister talking to a Cl. As he watched, his resentment mounted. When the American left he rashed over to the fraulein, sized her and, with a pair of nall scisors, began to cut off her hair. Her sister, terrified, ran out of the station to call the American MFs. Meanwhile, embarrassed possibly by the

screams of his struggling victim, the young ex-soldier stopped cutting the girl's hair in so public a place and gave her instead ten minutes in which to go and cut it off herself. Before she could either succumb to or further defy his threat her sister returned with the MPs and the German was arrested.

Captain Rutherford heard this evidence. Then he turned to the accused standing before him and in a quiet voice passed judgment on the first case of its kind to be tried in America's Germany.

"We Americans," he said, "believe that every individual has the right to pick his own associates. In seizing this girl and then cutting off some of her hair and ordering her to cut off the rest you were trying to take away this freedom from her.

"Tranky, in deciding now how to panish you, I have no precedent to guide me. But I lake the view that had your plan succeeded, this girl would tooly be hairless. I have therefore asked several of your fellow-German women how long it would take them to grow back their hair if their heads were shaved. The answers they gave average out to nine months. I am therefore sentencing you to jail for nine months."

GIs look at Germans

THE REACTION of our troops to Germany is clear and definite. The majority do not like krauts. But they prefor them to many Europeans they have met. A preference assumes that isome other people are detrimentally involved. These people are unfortunately and chiefly the French. Thus the GI reaction to Germany can be put this way: The like Germany because he does not like France.

To understand this, it is necessary to remember that the GI believes what he sees. He is not an "intellectual." He is not an "analyst." If he feels uncomfortable and finds that he gets this feeling while he is in France, he takes if out on the French. He does not adk why or whether his reaction is "fair." When he is comformany, he childs does up for the Krauts. The does not tak whether the conflots of Germany have anything to do with the discomforts of France.

Most Americans who have been stationed in Germany during this past year first fough through or were stationed in Belgium and France. Aside from Paris and the rest centers of the Riviera, most Gls did not like France at all. Especially in castern France, where the wars, because of the Germans, are fought, most villages compare unfavorably with 70acco Road. This way sure. But to the average Gl this was also "France." The "40 and 8" was French. The mud vas "French." The rain was "French." All he believed was what he saw, all that he saw was undeniably "French" and he did not like it.

When the GI, therefore, hit Germany what did he see and how did he reax? He as a country which, in comparison with his view of France, was "spick-and-span." He found people living in ruins but trying hard to appear clean. He himself moved into the very best houses and apartments. He was out of the mud which he had associated with France and in a clean bed which he immediately associated with Germany. He smelled less manure in the countryside and found more sidewalks in the cities. As the highest praise

that most Americans feel like bestowing on anything foreign is, "It's clean!" he was surprised and pleased with Germany's physical plant.

As he sat over his coffee (and complained about the British sitting over their tea), an American in Germany could ponder also about the "industriousness" of the natives. That the Germans like to work even more than we is a phenomenon that has struck everyone. Mop in hand, Brünhilde is content. Shovel in hand, Siegfried, if not contenti, is at least no longer forlarm. Americans, who like hard work, have a tendency to respect the even harder-working Germans.

Finally, there is a "reserve" about the Teuton that appeals to many Americans because it parallels their own. Unlike the French, Germans are not excitable (except when they blow up the cirilized world). Neither do they shout or shriek (except when a Hilder tells them to). Also soldiers with "furthics" sometimes get a sharp "no." "That," says some men, "makes us respect the frauleins more than the "madam-moysek.""

It is possible as new and green replacements arrive direct from the States that they will like Cernany less. Normally the vorry is that these troops, having never "scen the war," will be even more sociable with the Germans. But since these troops will be arriving direct from the clean bathrooms of America, the parkways and the neon-lighted hamburger joins, I supsect that they will not like Germany or the Germans at all. For the comparison in their minds will not be between Germany and France but between Germany and the U.S. And in that comparison there need never be a fear.

The forest from the trees

THE AMERICANS occupying Germany have all the weaknesses of Americans everywhere—but also all the strengths. They are the same people, and in the upper brackets many of the same faces, who won their share of the war and do not propose to lose their share of the peace. Within one year, working from scratch, in a sea of ruins, in an enemy country, with a strange language, and with only the failure of 1918-1933 to guide them, these Americans have prevented mass starvation, epidemics and serious unrest. They have reopened the schools and brought some slight order, when possible, to industrial chaos. They have de-Nazified America's Germany, helped by a strong wind of criticism, to a tremenca's cermany, nepeo by a strong wina of criticism, to a tremen-dous extent; given German agriculture a sound basis for future crops; guarded, sorted and begun to return the largest mix-up of art and treasure in history; supervised the commencement of local, county and provincial self-government; reintroduced a better standard of justice and a freer press than the Germans have known for a long time; and despite criticism (sometimes justified) returned 5,451,000 displaced persons to their own frontiers. This number, representing five-sixths of the total DPs, were returned within five months after V-E Day. This was six months ahead of the most optimistic schedule. Much remains to be done. But it is always a sound point to remember that after 1919 it took Hitler 14 years to plant the tree of Nazism in Germany, that after 1939 it took six years for the Allied world to chop it down, and that it will now take an even longer time to dig out the roots.

TWO FRENCH POLICE AGENTS STAND, WITH PISTOLS POISED, IN THE HALLWAY OF A HOUSE AND TENSELY LOOK FOR GOMER BLACKBURN, WHO HAS FLED UPSTAIRS

PARIS GUNPLAY Three GI jailbreakers are caught after wild chase in the streets One morning recently Privates Lee, Blackburn and Jones of the U.S. Army verse strolling down the Rux Reaumur in Paris, Two weeks before, they had escaped from prison to which they had been confined for a murder and two robberies. Then they avore "it okil levery goldamm MP who sitisk his nose out on the stretes of Paris," Now Lee himself vas a milsby disguised in the white belt and helmet of an MP. Jones was swinging a mandolin. Suddenly they recognized a French detective. blasted at him with their pistols in a crowded street. Immediately real MPs, CID and French plain-clothesmen, who had been tipped off and were hiding nearby, opened up. The trio fled.

Blackburn was caught on the top floor of a house after emptying his pistol at the police. Jones was trapped three blocks away, Lee was finally overpowered in a yard. Although a pedestrian was killed, Parisians raced along with the police, gaily nickamed their city "Chicago sur Seine,"

GOMER BLACKBURN, in manacles, is taken away by agents after he had tried to fight it out with a pistol. He had originally been imprisoned for armed robbery.

MP WAITS TO FIRE from a doorway at "Eddy" Jones, who has fled down the street. Civilians enjoyed the excitement, later called it "a real scene from Scarface."

"Emergency Case!"

While the city sleeps, lights blaze in a hospital ward --they mean "Doctors at Work!"

H LI DOESN'T want bouquets. In generation in making speeches and taking bows on the magnificent job he does. He's just interested in doing that job with all the skill and selfless devotion he possesses.

His work is never done. His battle knows no lulls. But he asks no quarter. All this he knew – and accepted – when those proud letters "M. D." were first affixed to his name.

According to a recent Nationwide survey:

More Doctors smoke camels than any other cigarette!

• "WHAT CIGARETTE DO YOU SMOKE, DOCTOR?"

Three nationally known independent research organizations recently put that question to 113,597 doctors. Family physicians, nose and throat specialists ... doctors in every branch of medicine were asked. More doe-

O tors named Camel as their smoke than any other eigarctte.

Like the rest of us, doctors smoke for pleasure too. Camel's full, rich flavor appeals to their taste... Camel's cool mildness registers with their throats...just as with millions of other Camel smokers' the world over.

The "T-Zone"—T for tast and Tfor threat—is the final aproving ground for any cigarette. For only your taste and your throat can decide which cigarette raster best to you...how it alfects your throat. From the experience of many, many millions of smakers, we believe Camela will suit your "T-Zone" to a "T."
