# Perspratation Is acio It Can RUIN Your Precious Stockings! 

... Washing Experts Warn

READ HOW NEW IVORY SNOW CARE FIGHTS THIS DANGER...GIVES YOU UP TO $20 \%$ MORE WEAR

- Do your stockings "go" all too quickly? Science now gives a frequently neglected reason for this
The cause of so many stocking troubles has simply been normal perspiration. This perspiration is distinctly acid. Ruining . . . rotting . . . wrecking those precious stockings of yours.

Stocking-perspiration should be removed as many experts advise-daily, with Ivory Snow.

## What if is - How if Works

Ivory Snow is a thrilling new development among fine soaps. It's Ivory-pure . . . made in dainty "snowdrop" form. Gives rich suds in 3 seconds, even in cool water.

With Ivory Snow it's so quick, so easy to swish dangerous acid perspiration and all soil out of filmy stockings! Carelessness about washing is expensive. Tests show that with this daily Ivory Snow care stockings last up to $1 / /$ longer. It's like getting an extra pair free every 2 months-an advantage that's more important today than ever before. Undies, too, stay fresh and new-looking far longer.

Join the thousands who have changed to Ivory Snow 1

THE DANGER OF ACID PERSPIRATION. Every day, In all seasons, the more than $2,000,000$ sweat glands of the human body give off at least a pint of perspiration. Usually you do not see it or feel it. But it is there. And perspiration is normally acid ... quickly starts to weaken fibres of stockings and undies.

ONLY IVORY SNOW COMBINES BOTH THESE ADVANTAGES

1 Pure soap in quick-dissolving tiny "snowdrop" form . . .
2 Bursts into pure, rich suds in 3 sec2 onds . . . even in cool water.
That is why Ivory Snow acts so quickly, so surely, so safcly against dangerous acid perspiration... to help stockings last far longer.

## WANT LOVELIER HANDS IN 12 DAYS?

 ...IF YOUR HANDS ARE RED, ROUGH FROM USING ONE OF THE 5 LEADING PACKAGED SOAPS _ CHANGE NOW TO IVORY SNOW FOR ALL YOUR DISHES! NOT EVEN THE STRONGEST LAUNDRY SOAP CAN GET YOUR DISHES CLEANER ... OR DO IT QUICKER!

## Nothing to do again tonight!

## "double $\bigcirc$

If your "dates" are scarce . . . if you don't get invited out as often as you nsed to . . . better suspert the presence of "Double O." Yon nay have offensive breath and offensive-looking teeth, and they are two hurdles that few women can surmount.
But why risk this double offense which is so often avoidable? Why not take the delightfinl double precaution against "Double O"?
To sweeten your breath-Listerine Antiseptic, of course; it quiekly halts food fermentation in the mouth, a frequent canse of halitosis. Thonsands of popular people insist on it daily.

And to help bring out the natural highlights and brilliance of your teeth, to
make your smile more allıring . . . the new Listerine Tooth Paste. This amazing dentifrice is chauged in formula. changed in action . . . especially created to help bring out the natural flash and brilliance of enamel.
For 8 years our skilled experts worked to combine in exact proportions the delightfully safe cleansing and polishing ngents that now make this lustre-giving dentifriee so outstanding.
If you want to male a hit with others, put your best smile and your best breath forwurd. The new Listerine Tooth Paste for your teeth and fanons Listerine Antiseptic for your breath. It's the wonderful double precaution against "Double O" that can rob you of your charm.

## LETTERS TO THE EDITORS

 Baseball "Curves"Sirs:
More astonishing even than Gjon Mili's pbotographs of baseball pltcher in your Sept. 15 issuo was the conclusion reached by LIFE: "Possibly there is an Infinitely small side movement of the ball in flight. If so, these repetitiveflash pletures, taken at $1 / 30$-of-a-second Intervals, fail to show it."
Wlth only a silghtly elevated eyebrew at the use of "infinitely" instead of "infinitesimally," we protest that the

SCREW BALL
SIDE-ARM
photographs show quite finite sidewiso deviations of the ball in lligbt.
In evidence first, are the pletures taken of the fall filght of the ball from pitcher to plate. Laying a stralght edge between centers of the nearest and furthest visible halls, and measuring the maximum sidewise deviation (based on the diameter of the ball), we find a deviation of 3 in . in 34 ft .

- The slde-arm "curve" shows no deviation in full-fight photograph, although indicating approximately $3 / 6 \mathrm{in}$. incurve in 24 ft . in batter's viow photosraph.

Pittsburgh. Pa .

- Reader Marburg correctly laid his ruler down the centers of the halls (line C at right). Laid down on the edges of the balls (line B at right), the ruler introduces the error of perspective, which makes image at distance smaller than image in foreground.

Photographer Gjon Mili regrets he confused the issue by cocking his camera off center at the flight of Blanton's screw ball. It caught part of the vertical are of the ball in a perspective that gave it an apparent curve (see pieture at left). Correctly pointed perpendicularly to the "side-arm curve," thecamera found no curve as Reader Marburg testifies (see picture at right).-ED. Sirs:

I was very disgusted witb your article on curves in baseball. You sald that they were optical lilusions. If they are optical illusions why is it that they appear the same to the batter, the appear the catchor, the announcer, the fans and the rest of the players? Optical fllusions can be seen the sarne in only one place; you should know that. Also
you ARE STILL

OUT OF LUCK

Only one in four million can own a garment fashioned out of the world's most coveted fabric!

Even having the price won't help . . . if that is all.

The gods must be with you who want Stroock Vicuna!

For it takes FORTY VICUÑAS to make a garment-so that the garment is forty times rarer than the shy and elusive Vicuña itself!

The Stroock Mills couldn't survive if they made nothing but Vicuna!

It is a peak in fabric achievement that has no relationship to profitable production.

It is, however, a yardstick an indication of the incredible lengths to which we go to produce woolens that are the best of their class, no matter what the cost.

At fine men's and women's stores everywhere, clothes in Stroock Fabrics offer you distinction at all price ranges. The smart, quick way to find this distinction . . . look for the
label "STROOCK".

Stroock's "Amanal Kingdom," an amusing 28 -page book on the freces are used in Strooch Weolenn
S. STROOCK \& CO., Inc 404 Fifth Avenue, New York Mills - Newburgh, N. Y.

# When these 4 men say a book is worth reading 

 - you can bet your sweet life it is! - Clifton Fadiman
## A NEW plan by which these four men offer entertaining and beautiful books

 to you ... delivered to your home for onlyCYLIFTON FADIMAN, Sinclair Lewis, Carl Van Daren and Alexadder Woollcott are among the country's most famous literary experts. These men know and love good books; they can recognize a good book when they read one. So-when all four of them recommend a book to you, you can be dead sure that book is eminently worth reading-worth owning.
Now, these men often come across a book which they intensely enjoy and admire -yet which has not come to the attenton of the general public.
This fact bothers them. They want to do something about it. They want to share their pleasures and discoveries with you. And that is the reason why they have organized The Readers Club. This club enobles them to find you; to tell you about good, enjoyable, easy-to-read books which it is not likely you hove ever read before. And they ore going to offer you these books for only si.

## What kind of books?

W$\mathrm{V}^{\text {ELL, }}$ it is a fact, one which you probably know to be true, that the best books sometimes fail to come to your attention when they are first published. Lost Horizon for one example was quietly dozing upon its publishers shelves until Alexander Woollcott spoke about it over the radio. Of Human Bondage was little known for years until Carl Van Daren helped to tell you about it.
There are many reasons why "books are born to blush unread". They may lack good advertising or publicity. Or a book may be published at the time of a catastrophic world event and nobody pays any attention to it. Sometimes, a book is pullished when everybody is completely ocespied with a Cone With The Wind.
It is therefore o fact that The Readers Club will issue some of the best books ever published in this country. The Readers Club promises you a world of new pleasure and new thrills.

## Books YOU can enjoy, for $\$ 1$

THESE BOOKS are not "precious" books or books with a limited or special appeal-they are, first and foremost,

entertaining. They have been read and re-read by their admirers, they have stood the test of time. Where are most of the best sellers of five, ten years ago? Vanished like the snows of yesteryear. But these are books which will endure.

And the most remarkable thing about the whole scheme is the fact that these books cost yon only $\$ 1$, exactly $\$ 1$-deliscred to your door. For this price includes even the postage and wrapping charges.

## Books that are ornaments for your home

CllESE BOOKS are not cheap re1 prints. They arc full-sized books, not pocket coitions. Each is designed by one of America's most famous designers of books. Each book is set up in new type, printed from new plates on good paper, and staunchly bound in fine cloth. Because so large a quantity of books are printed (there are olready more than eighty thousand members!) it is logical that each new edition, at $\$ 1$, will prove a bettermade book than the original edition at $\$ 2.50$ or $\$ 3$. Just one look at one book will convince you of this!

## ret you buy only the books you want!

P Club has no inter that The Readers Club has no intention of selling yon hooks which you don't want. You will get a description of each book before it is distribute. If it does not seem the kind of book which will interest you, you may reject the book in advance. Thus you evercire your own free choice. But more than that, even after you get the book, you may return it if it does not please you.

He is not only the famous inter-
He is not only the famous inter:
loeutor of "Information, Please." he is also Literary Editor of The New Yorker. His new anthology, Reading I've Liked, ls mom to appear.

Prize in Literature, the author of suet great books as Main Street, Babbitt, Elmer Gantry and Arrowamith, he ls now nt work on a new novel.

## ... here's a building idea that's saving Uncle Sam big money!

THREE hundred thousand dollars saved at a clip. That kind of money will train a lot of pilots!
That's how much the government saved recently on one big housing project simply by using a new type of wall system that originated in the Gold Bond laboratories. On another housing job the same system saved space enough for 260 extra rooms. No wonder this exclusive Gold Bond idea is being used on housing projects from New York to California. No wonder it's taking on fast with private owners, architects and builders who know a good thing when they see it!

## First with the new things

Money saving ideas, ideas that make it easier to build better walls and ceilings are no novelty to Gold Bond. Its almost uncanny ability to be first with the new things has won Gold Bond the respect and support of ten thousand of the
country's leading lumber and building material dealers from coast to coast.
The first light-weight high-strength gypsum wallboard. The first system that does away with the principal cause of plaster cracking. A clever idea that permits lovely plaster arches to be built right on the job and at low cost. These are just a few examples of what Gold Bond wall and ceiling research has done for better building.

NATURALLY, with this background of research and product improvement, you build better with Gold Bond. Specify Gold Bond exclusively next time you build or remodel. You'll get a far better job, for Gold Bond products are engineered to go together. And you'll get the added protection of having just one manufacturer responsible for the final result.
For sound building advice, see your neighborhood Gold Bond dealer today. He's kept up-to-date on the newest ideas in wall and ceiling
construction by one of Gold Bond's three hundred local representatives. He's served with the freshest available materials from the nearest of Gold Bond's twenty-one modern plants. See him today for sound advice. National Gypsum Company, Buffalo, New York.

# BACK ON THE AIR! 

 THURSDDAY, OCTOBER 9
# The March of Time 

## SPONSORED BY TIME, THE WEEKLY NEWSMAGAZINE

The news is the greatest story ever told. And this year more than ever it is stranger, more exciting, more unpredictahle than fiction.

> And sa the Editors af rime are naw bringing the March of Time back fa the air, to give you a new and still fuller sense of what a tremendous adventure it is to be alive in this never-tabe-fargotten year.

The March of Time will undertake what no other medium could make possihle and what no other group of editors could attempt-to take you on-stage for some of the greatest moments of history and let you feel the news as an unforgettable experience in your own life.

You read the story of Dunkirk. You know that it was one of the deathless epics of all time, like Thermopylae or Lexington. But no printed word could make you feel you yourself were wading out from the smoking beach towards the yachtsmen of England who had come to rescue you, as vividly, as terribly as could a re-enactment of the scene itself.

You read the story of Hess. You know with your mind that it is one of the greatest mystery dramas ever unfolded. But no written word could make the terror of the fugitive, the wrath of Hitler, or the suspicious exultation of Churchill come alive for you as radio can.

You read the story of the Greer. But words alone could never put you on the bridge, or make you feel the throat-tightening tension of that moment when the German torpedo was streaking straight for you.

It is to scenes and sights like these that the March of Time will take you each Thursday night.

In the two years since the German panzers first struck, the world has changed beyond all our imagining, and our own lives have been turned around again and again by the changing news.

In those two years time's news-gather-
ing and news-verifying arganizatian
has spread acrass the warld to match
the warld-wide sweep of America's
interests and destinies.
TIME now has correspondents in every continent, in Rio and Chicago, Vichy and Hollywood, Manila and San Antonio, at every point on the globe where news that carries weight can happen.

Now these hundreds of brilliant newsmen are collahorating with TIME's editors and an outstanding group of radio producers, directors,
writers, and actors to bring you the greatest dramatic news presentation ever offered

Authentic and revealing, truthful and coherent, the March of Time will nat only help you live the histary af this year as a great persanal experience but will also integrate its most memorable scenes inta a camprehensive pageant af a warld in which we are all marching tagether taward a rendezvaus with destiny.
Be at your radio on Thursday evenings. Each hroadcast will he an experience you will long remember.

Hole-in-the-Ground
Sirs:
What do you mean Mammoth Cave (LIFE, Sept, 15) is "America's No. 1 hole-In-the-ground $?^{* *}$ If Mammoth Cave is so rated, what rating would you give the Cartsbad Caverns in New Mexico?
Carishad's series of caverns, beginning 750 ft . underground and extending to depths of more than $1,300 \mathrm{ft}$. far out-

INSIDE CARLSBAD CAVERNS rank Mammoth on points of depth. Immensity, spectacular beauty and, finally. on popularity. Mammoth's "recordhreaking" 72.000 visitors which you kive for the July-August period of the current year compares poorly with the 89,000 visitors to Carlsbad in a simflar perlod of 1339 , according to latest Na(ional Park service figures availahle to me.

## GEORGE 1. WHITLATCH

Nashville, Teun.

- Kentucky's Maminoth Cave comes by its title through seniority.-ED.

Hering Hunt
Sirs:
We have Invented a hilarious new way to amuse our friends of an evening. It has the advantages of no preparation and no expense.

It goes like this: Take a picture from LIFE, remnove lts title or caption and hang on tho wall. Place a large plle of old newspapers in the center of the table and invite your guests to find a newspaper headline which, in their opinion, would make a good title for the pleture. The headline must he one unit, not a word clipped from one paper and nother from anothe.

We enclose a sample of what we mean (see cut), and maybe you don't think the judges had a hard time deciding on the winners! First prize went to caption: "Peninsula Women Offering Entertalnment For Soldiers," Becond prize; "British Rellef Group Telis Need For Woolens."
We have ciecided to call the game after ourselves, with pardonable pride, Hering Hunt.

## Protected...

## even from

## his father

I㭗 modern hospital, no visitor, not even the father of a new haby, is allowed inside the nursery. Generally the baby is seen in the nursery only through a glass window. That is typical of the precautions which hospitals take to protect infants from those enemies of babyhood-germs.
Largely because of these precautions, more than 75,000 American babies will live this year who would have died at less than one year of age had they been born twenty years ago.
In protecting the baby, one difficult problem for most hospitals is the control of visitors. Relatives and friends do not always realize that restrictions are essential to protect both mother and baby against germs that may be brought in.
In the modern hospital, visitors are permitted only during certain hours, and then are asked to stay away from the mother's bed. The doctor himself seldom enters the nursery; he examines the
baby in an adjacent room. And for baby's further protection, the doctor wears a cap, mask, gown and sterile gloves.
All the baby's clothes and bedelothing are sterileized. When he is brought to the mother for nursing, he is wrapped in a sterile blanket, and a sterile feed-ing-sheet is spread over the mother's bedelothing.
In addition, the baby's skin is protected against germs by a complete oiling at least once a day, from top to toe, with antiseptic oil.
When the baby leaves the hospital, he should receive similar protection. Everything near the baby should be kept as sterile as possible, protected against germs. And, above all, the baby should be examined by the doctor regularly.

The baby oil used in most hospitals is Mennen Antiseptic Oil. That's because it is antiseptic-helps keep the skin safer from germs. These hospitals and
thousands of doctors urge you, Mother, to continue to give your baby a complete oiling with Mennen Antiseptic Oil daily, until he's at least a year old, and to use the oil at every diaper change, too, to help prevent diaper rash and excoriation of buttocks.

And when you use a baby powder, remember that it, too, should be antiseptic. Three out of four doctors expressed that opinion in a nation-wide survey. So, choose Mennen Antiseptic Powder. Made by an improved, exclusive process-hammerizing-it is litorally as smooth as air. Its new, delicate scent makes babies "lovelier than ever." But, most impportant, Mennen Powder is antiseptic.

## SPEAKING OF PICTURES

. . THIS IS OLIVER AIREDALE'S ORDEAL

SCometime between the 20th and 110 th Centuries mankind. worn ont lyy interminable wars, became extinct. The workl then went to the dogs. The dogs were not man's next of kin. but they had been Man's Best Frieuds and no eloser relatives eontested the will. The dogs, however, soon fared a series of problems as perplexing as those which had been the modoing of their former masters, By 11911 the situation was vo out of hand that the Pincher Divisions of an npstart Hund, named Der Pootsch, hud overrum large parts of Dogdom. To Airedales in Caninia, a pleasant country in the Western Hemisphere where canocrasy was practiceel, it seemed as thongh the world was going to the aper.
Oliver Airedale's generation eventually stopperl
the world from going to the apes. What they had to go through to achieve it is described in drawings and words by Domald T. Carlisle who created the famous Belvedere /Iounds series and who happened to be present to chronicle this little-known era of future history. Entitled The Ordeal of Oliver Airedale, Carliske's book is lseing published by Seribner's this week. Is "a satire with teeth in it," it shouk make excellent $\$ 2$ chewing.
Purt of Oliver's ordeal is reprocheced on these pages. He was born of a loug line of Airedales who since colonial days had successfully practiced and preached that "what is worth keeping is worth the fight." In his hour of crisis Oliver found this frontier spirit was the sturdiest tree to lean up against.

Der Pootsch iavaded Spitzhnd. But Oliver wasn't so sure.

7 He captured six maehine-gun nests of Hunds while commanding a detaehment of tall Sinlukis near Bouvier des Flandres.
 "Angleterria will get the gravy." Caninianat right is $\mathrm{I}^{\prime}$ BK.

4 In Civil War Brigadier General Abner Airedale (atanding) counterattacked southern Coon Hounds at Poodleburg.

5 Old family photo shows Oliver Airedale as one of seven pups
$6 \begin{aligned} & \text { He captained foothall at Pointer Academy, graduated from } \\ & \text { Bedlington and fought to "Make World Ninf for }\end{aligned}$ Bedlington and fought to "Make Word L Nafe for Carocrasy." aw firm of Airedale, Airedale, Cairn, Whippet \& Pug.

0 But in defeated Hundia a revolutionary upatart named Der Poetach "agitated for bigger doghouse for the Hundian pack."

14 A tamous Skye Terrier dolefully warned: "There's no use 15 Oliver's own wheips exelaimed over tall drinks and victrola
records: "This is just another old imperialistie dogight."

In "My Dogfight" Der Pootsch preached war. Prosperous Caniniuns thought that his bark was worse than his bite.

16 Caninia's disunity, apathy, smugness and ostrich fears, Oliver realized, were precisely what Der Pootsch wanted.

IN 1918 influenza stretched out its feverish hand over the world. There wasn't much to do about it. Twenty million people died.
Influenza likely is due to strike again, for it seems to run in mysterious 25 -year cycles. Next time, though, fatalities may not be high . . . and humanity can thank a small animal for deliverance.
For twenty years, scientists had been searching for a scrum to fight influenza. They were held back by the fact that the commonly used laboratory animals wouldn't catch influenza. Then, one day, a ferret came down with it. Now the way is open to develop an effective weapon against influenza.
For such achievements, costly equipment and a steady flow of funds are required. Both are always in jeopardy to fire, windstorm and explosion. By destroying the laboratories or the productive property of the contributors, common hazards could permanently halt useful research . . . but for insurance. Because insurance makes good such losses, researchers get new equipment and sponsors go on contributing. Thus, by protecting the continuation
of scientific work, insurance serves human progress. Almost every great forward step is somehow aided by the security provided by dependable insurance. It nails down past gains while new gains are being achieved. It has protected the investments in struggling young industries of this country since President Washington's first term, when Insurance Company of North America introduced to this continent insurance guaranteed by capital furnished by stockholders.
Always a pioneer in developing new forms of sound protection to meet the new conditions and new hazards that come with progress, this oldest American fire and marine insurance company and its affiliates are organized

to provide every insurance need except life. In your community there is a North America Agent, or Broker, who, with the facilities of a nearby Company Service Office, is better equipped to serve your every need.
North America Agents are listed in Classified Telephone Directories under the name and "Eagle" emblem of Insurance Company of North America, Philadelphia. Capital: $\$ 12,000,000$. Losses Paid: Over $\$ 457,000,000 \ldots$ Founded 1792.

Other Companies of the Narth America Growp: Indemnity. Ins. Co. of North America, Alliance Ins. Co. of Phila., Philadelphia Fire \& Marine Ins. Co., National Security Insurance Co., Central Insurance Co. of Baltimore.

## SPEAKING OF PICTURES (continued)

17President of Caninia frighlened Der Pootsch when he growled in a kennel-side chat: "What Caninia needs is a little old-fashioned pack play. I would rather die on my paws than live on my hocks!"

"Tie the can to Der Pootsch" became new rallying cry as Caninia pickell up his scent. And it was a good thing that they did, ol herwise the world at that time might "have gone to the apes."

## NOT HOW MANY... <br> BUT HOW GOOD!

The American way of life needs economic as well as military protection. As the big job of arming the nation strains the resources of its citizens, they must be safeguarded from inflated prices, deflated quality, depreciated value in the things they buy and use. It is up to American Business to hold the home front against all these dangerous trends . . . and our unqualified pledge is that we will maintain regular Florsheim Quality at the lowest possible price!
Twenty-five years ago this country went through another National Emergency. Good materials were scarce . . . yet we paid a premium to maintain Florsheim quality, and we refused to accept materials that failed to meet our exacting specifications. And now, if and when necessary, we'll do the same again. If the time ever comes when we can't get all the good leather we need, then we'll make fewer shoes. In 49 years of fine shoemaking we have never sacrificed quality for quantity . . . we have never traded value for volume . . . and we never will!

an ex.taxi driver

## CHECKS UP ON THE

FAMOUS BURMA ROAD

## by DANIEL ARNSTEIN

When President Roosevelt needed an expert to go to China and find out what was wrong with the Burma Road, Cbina's vital link with the outside world, Harry Hopkins called Dan Arustein for the job. Arnstein, who wrote this week's LIFE Report, is a forthright, cocksure former taxi driver who worked up the bavd way to be bead of the buge New York Terminal cab company. With Harold Davis and Marco Hellman, two other traffic experts, be set owt for Chungking, then traveled from end to end of the fabulous Burma Road. With U. S. Lease-Lend goods piling ap in Rangoon awaiting shipment, the trio found a tangled mess. Refusing to bother with traditional form or "fact," they turned in a blistering, hard-bitting report to Generalissimo Cbiang Kai-shek and to Hopkins. It told a sad tale of inefficiency and disorganization. It spared no incompetent, wound up with a detailed prescription for the cure. Already it is being put in effect and vitally needed supplies are reaching China.
-

M
$y$ first sight of the Burma II Road was at Kunming, the Chinese terminus and the last flat spot before this incredible highway begins. We had arrived by plane from Chungking to find awaiting us several American automobiles, a No. I boy, a cook and five Chinese roadmen. From then on, for two solid weeks, we saw a road, and road conditions, that would make the toughest U. S. truck driver turn green.
There is nothing like this Burma Road anywhere clse in the world. When you see it, you understand the American engineer who exclaimed, ' My God, they scratched these roads out of the mountains with their fingernails." From Kunming, at one end, the road winds perilously for 726 miles through the jagged Burma mountain ranges, over the deep Mekong and Salween canyons and down to the British end in Lashio. A crow with a liking for high altitudes could fly it in 360 miles, but

This Aurtiogram of $\mathrm{M}_{\mathrm{ra}}$. $\mathrm{V}_{\text {thel }}$ Parker's hearing loss, laid over her piano keyboard, graphically ilhustrates the way that neglected deafuess often andermines in person's livelihood. Mrs. Parker, Fort soott Kan., music teacher, knew her hearing was impaired but never
dreamed thot it had silenced half the keys on he: piano. "I wouldn't wear one of those crazy things," she told a Sonotone Consultant until one day she lost a papil because she conldn't hear what the little boy's mother was saying.

## SCIENCE FINDS LOST CHORDS FOR MUSIC TEACHER!

T's a pity that every last one of the $5,000.000$ serionsly hard of hearing people in the United States can't make the same discovery that Mrs. Ethel Parker made!

For years, Mrs. Parker, a music teacher in Fort Scott, Kan., has been aware that her hearing was failing . . . but for years, she has done nothing abont it . . . because as she said, "It's my business and nohody else's."

But along came a spirited misunderstanding with a pupil's mother that started with Mrs. Parker's inability to hear and ended with the mother angrily marching her little boy away. And Mrs. Parker was jarred into the unpleasant discovery that losing your hearing is not a prirate matter at all . . . but one that deeply concerns every other person in your life!'

Next to the xtubborn refusal to admit that one's hearing is impaired, this failure to realize that your hearing loss afferts other people's lives is probably the most prolific canse of
hearing tronbles. For as long as a perwon looks on his hearing loss us a purely personal matter, he puts up with it and puts off taking any protective measures.

And there the trouble starts. For it cannot be emphaxized too strongly that delay is the great danger in deafuess. For it isn't the physical inability to hear that does the harm, but the psychologieal consequenees . . . loss of self-confidence, health, earning eapacity, poise, friends . . . that pile np with neglect.

Such delay, of eourse, is the sheerest folly. The unending scientific research that Sonotone has carried on since the Lieber Bone Conduetion Oscillator has brought many notable improvements in hearing aids. Today nearly $95 \%$ of America's hard of hearing can be helped to better hearing. All that anyone need do to have this seientific help brought to offiee or home is to follow Mrs. Parker's example . . . and telephoue the nearest Sonotone Consultant.

And what a change Sonotone has brought into Mrs. Parker's life! Ill Fort S'cott talks about it. For today, she carries on as if her hearing was normal. Her teuching schedules are completely filled.
She gives monthly recitals, She is educating a talented, is-year-
old son, Steve, already a fine 'cellist, headed for Kansas Lniversity to finixh his musical studies. Atogether a full and worthwhile life $\therefore$ "tuanks," as she snys, "to what a couple of years ago 1 called

"I couldn't get to the 'phone fast enough to call the Sonotone man," said Mrs. Parker. "I knew my hearing was slipping . . . but for the first time I realized that my deafness was a handicap to others.'

Mrs. Parker's Audiogram slawed Sonotone Consultant (ierald Farrar the extent mall mature of her hearing loss so thut he was ahle to individuclizo a sonotove to her specific needs.

Going to Chicago next summer to the famons sherwool Music School to stridy muler some of America's great teachers, she was able to hear well enough to take part in the elosing recital.

For full details look in your telephone book nnder SONOTONE (there are Sonotone offices in 125 SoN(TYONE (there are Sonotone offices in 125
cities). Or write SONOTONE, Elmsford, N. Y. cities). Or write RONOTONE, Elmsord, N. Y.
In (Guadn, addrces 2.9 Yongc St., Torouto. In England, write 14h Wigmore sl., London, W. $\boldsymbol{1}$.

## AN IMPORTANT MESSAGE

## FROM

## DU PONT

$\star$ In the interest of national defense, conserve autifreeze so there will be enough to go around.
$\star$ Don't buy or ase more than yon need.
« Before you put in anti-freeze, hare your car radiator cleaned to remove the rust, scale and dirt that cause poor circulation and orerheating.
$\star$ Hare your dealer tighten up all hose comnections, cylinder bolts, and water pump packing. This will prevent leakage of anti-freese.

* Also see that the fau aud belt are uorking properly to proride full cooling efficiency.
$\star$ Then put in a dependable anti-freve, following the directions on the cun.

## Du Pont tells how to choose the right anti-freeze for your car:

- Du Pont "Zerex" is an outstanding premiun anti-freeze. 82.65 a gallon. It won't boil out . . . it's non-evaporating. One filling lasts all winter long. It's for the man who will pay a little more to get complete freedom from winter worries.
- Du Pont "Zerone" is Americas largest-selling anti-freezc. $\$ 1.00$ a gallon. It's ceonomical ... requires only an occasional check-up. It's the type preferred by the American motorist who wants maximum anti-freeze economy with great efficiency.

Du Pont makes "Better Things for Better Living . . . through Chemistry" and "Zerone" and "Zerex" anti-freeze are chemical campounds.

## LIFE'S REPORTS

## (continued)

after Kunming we never saw as much as one-eighth of a mile of straight road ahead.

The Burma Road is only a few years old, for the Chinese built it after the war began. Yet it was built with the same techniques used 2,000 years ago on the Great Wall of China. Each village and hamlet along the way supplies the workers who are still finishing the road. They bring with them their own food and adzes to chip the rock by hand. Then they haul the earth away by hand in baskets. During the early stages of the work, 200 out of every 250 workers

DANIEL ARNSTEIN
died of malaria. Any laborer in the U. S. would refuse to work under conditions which I saw ro-year-old children quietly enduring. There were landslides, 1,cco-ft. precipices and great bomb holes. The bombs do not bother the Chinese. As an interpreter explained to us cheerfully, "It cost Japanese $\$ 1,000$ gold for bomb to make hole and it cost us $\$ 2$ Mex. (8e) to fill it up."

Courtesy is a matter of life and death. The road is narrow and unpaved. There are no fences or rocks along the side of cliffs. It is almost too easy to skid off in rainy weather and many trucks do. There are air raids, dust, steep grades and swinging, swaying bridges which can hold but one vehicle at a time. I shall never forget one small, single-lane bridge over a gorge which drops a sheer 7,000 ft . into the river below. With more road courtesy than I have ever seen in the U. S., truck drivers anxiously backed up to let the other fellow pass, in the best Alphonse-Gaston manner. Later I learned that this is the most dangerous spot. But it has never seen an accident.
Even at the start of the trip

## Defeat and victory...both grow sweeter with a glass of kindly beer or ale

The blare of bands...The roar of the crowd...The thud of hard young bodies on the autumn turf. It's a great sport!

But, greater than the game itself is the spirit football fosters! For, once the final whistle has blown, friend and foe alike among the spectators, forget the strife and partisanship of battle over their glasses of mellow beer and ale.

To fight to the bitter end and yet be gracious in victory or defeat...that is the very essence of American democracy and unity.

We, the nation's brewers, are proud that beer and ale are so often the favorite beverages at these autumn gatherings of lovers of good sportsmanship.

Yet, it is only natural that beer and ale should be so honored! Brewed from Nature's rich grains and fragrant hops, beer and ale are delightful to the taste, relaxing, wholesome. But above all, they are the "beverages of moderation," which traditionally go hand-in-hand with a wise and tolerant way of life.

## WHAT ABOUT THE "NOSTRILS" IN YOUR CELLAR?

1. Own a warm-air furnace with a blower? Then shake hands with yourself, for you have a very fine type of heating equipment.

2. Ever see these "nostrils"? They're called Air Filters. And your furnace breathes in its air through them.

3. You get plenty of economical heat from it. And what's equally important -clean, healthful heat. But watch your furnace's "nostrils."

4. These filters clean the air your furnace circulstes, take out amazing quantities of dirt, keep it off walls, drapes, upholstery. Cut down housework.
5. But in time your filters get so full of dirt they don't let the air through. Result? Chilly house. Fuel wasted. And you wonder what to do.

6. Telephone him for Dust-Stop filters. Efficient, safe. Made with pure glass fibers, they are standard equipment in the best furnaces.

If you are not already enjoying clean, filtered air from your warm-air furnace, get In touch with your warm-air heating contractor and find how inexpensive an air filtering attachment is!

## LIFE'S REPORTS

(continued)
at Kunming it was pretty plain what was wrong with the flow of Burma Road traffic. The menace was not rain, landslides or bombing, but miles and miles of red tape. The Road is honeycombed with customs houses, and at Kunming, truck drivers had to pass by exactly eight desks before getting permission to proceed to the next station. Sometimes this would take from 8 a. m. until 5 p. m., while the leisurely customs inspectors read True Confessions and scratched their noses rumina-

he missed a turn
tively. Then, promptly at 6 , the customs closed and the war was over until next morning.

From Kunming we started south, often driving by night to make up time. We stopped at the six or seven main, and six or seven subsidiary, stations along the way, looking over shops, trucks and warehouses. To a fellow with 30 years' U.S. trucking experience, the situation was appalling. At Wanting, we found 250 trucks waiting, some of them more than 24 hours, for the necessary customs clearance. Sometimes they have been held up for ten to is days, and the traffic over the road in June was a mere trickle of 6.000 tons. It should be at least 30,000 . The Chinese never heard of grease, and we passed hundreds of burned-out trucks parked in the few flat spaces along the road.

It was so bad that we had to lecture drivers, service men and administrators in the simplest fundamentals of trucking. I did the talking and I talked plain. I told them that unless they used grease, the U. S. could see no point in shipping more trucks. I told them that for an all-day trip you had to start at dawn. The paper work would have to be simplified, I said. I had to explain to them that you

can't load a truck all in front but have to spread the load. They were breaking scores of axles by overstraining them
The control of the Road was a governmental jumble. There were, besides the private companies, no less than 16 Chinese government agencies operating trucks over the Road, everybody from the Salt Gabelle and the Fifth Army to the Bank of China, Everybody had his own checking stations, rest shops and administrators. There were just plain village magistrates along the way collecting their small "squeeze" tax from every passing truck. With private and government trucks both operating, rackets spring up. When a

bridges are single lane
private truck breaks down, a government truck will stop. The private truck driver buys a good part from the government man, puts it in his truck and drives on. Until the government repairman happens along, the truck driver enjoys himself with the local girls.

Living conditions along the Burma Road are strange to a man used to the accommodations on U. S. highways. Davis discovered this one night when we stayed at the home of Sawbo Y. G. Fang, a native civil governor who prided himself on his modern house. Davis had just enjoyed the luxury of a bath in a porcelain tub and pulled the plug when he was surprised to see the water splash across the floor and run down a drain cut through the floor. Sleeping was not always comfortable, in spite of the occasional grandeur of our surroundings. We spent one night in an old deserted temple (the first I have been in since I was a boy), surrounded by great golden idols. My bed was four posts stuck in the ground, with a surface of flat boards. There was no mattress but someone had carefully supplied a sand

KEEP CHILDREN SNUG AND WARM
GOING TO BED is fun when bed-time means Denton-time. Youngsters love the cozy warmth of Dentons. Mothers enjoy a sound night's sleep, knowing the children are protected, even if bed-covers are thrown off.

Denton Fabric is made of $97 \%$ unbleached cotton, which is vory warm (oach fibre being covered with a natural waxy coating that does not absorb moisture), and $3 \%$ soft, virgin wool. The loose spun yarn, knit in an open stitch, together with the wool, carries off perspiration slowly, keeping the wearer dry and warm.

Dentons are economical because durable. Using long-staple cotton makes an unusuall Y strong fabric. Flexible rubber buttons; stout button-holes; atrong flat seams. All Dentons have our patented, tailored, extraheavy romper feet: and extra-full drop seat. Dentons stand repeated washings.

Solt-Znilt Dentons are not made in colors, No Dyes or chemicals are used. There is nothing that can irritate the child's tender skin.

Rogular (Llgbt Gray) Dontons: One-ptece style. sizes 0 to 2 button down back; sizos 3 to 14 button down front. Two-ptece, sizes 0 to $S$, bution entirely around waist; for intonts who need frequent cbanging.

## Inside dope on inside pictures!

1. Take pictures when you go to a party . . . but be sure your camera is loaded with Agfa Superpan Press! Preferred by many news photographers. Superpan Press is one of the most sensitive films made. It'll open a new world of pietnre-taking for you!

2. Try Superpan Press shots of your children. your home, and candid shots of your friends. With this faster film, and flash or flood lamps, it's simple for anyone to get good indoor or night pictures. And remember! Only Agfa guarantees: "Pietures that satisfy or a new roll free!"

3. Start taking Superpan Press pietures in your home tonight. Use Superpan Press Film for the best outdoor pictures, too, when there's little or no sun! Ask for this fine Agfa Film by name: it comes in a size to fit your camera. Look for the orange and blue box. Agfa Ansco, Binghamton, N. Y.

## LIFE'S REPORTS

## (continued)

pillow. It wasn't feathers, I guarantee. Our Chinese cook never really got into action, and the best meal he served us enroute was a can of sardines, a fairly simple operation. At first we were baffled by the chopsticks, but after you get hungry you do pretty well. I used mine as a spear.

My worst night on the Road was spent at a compound with an abundance of rats. I had occasion to rise during the night and go down to the lavatory, such as it was. Just as I arrived I stepped on a large rat. While it screamed I yelled and cursed until a soldier guard came running up, and, without warning, pulled a revolver and shot the rat right under my foot. I was so excited by this time that I returned to bed, completely forgetting my original mission. Davis and Hellman still kid me about it.

When we reached Rangoon at the end of our drive down, we locked ourselves in a room at the Strand Hotel with two Burmese stenographers and went to work on our report, which started out 139 pages long but was cut to 35 by Hellman.

The report was tough. We sent a copy ahead to Chiang. It described all the inefficiency we had seen and then blasted everybody connected with it. It started off by saying "The main reason that practically no shipments are getting through the Burma Road is due to a lack of knowledge of fundamentals." It ourlined a complete but simple plan to get trucks rolling, one every minute if necessary. By the end of the year, we said, about 8,00 trucks should be running on the road at once.

It was like being hit over the head with a baseball bat, and I was not sure how well we would be received by the Generalissimo. Instead we were there five hours. Mme Chiang had read the report, and the Generalissimo had a translation, completely indexed in Chinese. He was pleased as punch, so pleased that before dinner he made us a long speech, which when translated turned out to be a strange offer that only an Oriental will understand. He asked whether Davis, Hellman and I would like to take on the Burma Road as a private concession, at so

## Eloquence... from a tongue-tied man!

$H_{\text {ave you ever tackled the job of writing a bread- }}$ and-butter note-and suddenly found yourself tonguetied?

Have you ever had a "thank you" in your hearttoo big to put into words? A wish to do something specially nice for a hostess who's been specially nice to you?

Of coursc you have. Mayhe right now you want to tell a hostess what a grand time you had. So send her a gift of flowers-and let them say "thank you" for you! 'They'll speak more eloquenee and gracious compliments than if you struggled for wecks with that note!

You see why, don't you? It's because every woman gets a deep-doren thrill out of flowers. h's because flowers tell her, sweetly and sincerely, all the graeious little things a man feels-but seldom can say!

And it's so easy-so incxpensive-to send flowers anywhere. You can wire flowers, you know. Just
phone or drop in to the nearest flower shop displaying the F.T.D. emblem. Give the florist your order, and he takes care of the rest. Whether those flowers are to go a few blocks or a thousand miles, or to Canada or a distant country-they'll be the freshest, loveliest flowers ever grown!

When your heart savs "remember" -nothing takes the place of flowers!
Whenever your heart prompts you to do something thoughtful and nice-"say it with forers!" To express glad wishes to someone who's just become engaged-to eheer up a shut-in-to say "Ilappy Birthday"-there's nothing like flowers.
Just be sure of one thing-order from an F.T.D. shop. F.T.D. means that the florist is an authorized member of the Florists' Telegraph Delivery Association. Only the nation's top.flight florists are admitted to F.T.D. So you're certain of fine flowers
and top-flight service when you huy the F.T.D. way. 7,000 authorized shops in United States and Canada. Florists' Telegraph Dcivery Association.

WIre flowers through authorizeo f. T. O. MEMBER SHOPS

LOOK FOR THIS F.T.D. EMBLEM BEFORE YOU BUY. IT IS YOUR GUARANTEE OF COMPI.FTE SATISFACTION.

## FOR 1942

IN THESE UNUSUAL TIMES we invite you to inspect an unusual new car-new in its beauty, its comfort, its choice of two fine 90 horsepower engines, 6 cylinders or 8 .

See it and you sense at once that here is new style that will stay good for years. On a lower, wider chassis, we have designed new long, low, wide and modern lines.

Interior treatment is entirely fresh, distinctive, pleasing. The modern beauty of this Ford, seen from inside or out, will more than hold its own in any company.

Inside, the car is big in every way-wide across the seats, generous in knee-room, leg-room, elbow-room.

On the road this year you find the "new Ford ride" still further advanced in its softness, quietness, steadiness.

At the wheel, you will find driving easier than ever. Steering, gear-shifting, action of the big and sure hydraulic brakes have all been made smoother and easier.

In quality, the car is sound to the last detail. Defense require-

ments have all been met without a single reduction in the basic and lasting goodness of the Ford mechanically. Some new materials have replaced old ones, usually at greater cost to us, but in every case the new is equal to or better than the old.

If your family needs a new car, go see and drive this Ford. For what it is today and for what it will be through the years ahead, we believe that you will find in it more and better transportation for your money than you have ever found before.

(conlinued)
much percentage a truck. It was as characteristically Chinese an offer as an invitation to tea. We were dumbfounded, but in a moment or so found words to decline with thanks. But the Generalissimo was not ruffled. "Now we eat," he announced briskly in Chinese, and sprang to his feet as though he had been thinking about dinner all the time.

At dinner I sat next to Madame Chiang, who speaks fluent English. Her husband, I thought, spoke none, but soon

REPAIRS WHILE WAITING
I began to learn the words he knew. I remarked, through an interpreter, that compared to the bombing I had seen in the last war, the Japs over Chungking were just indulging in target practice, uninterrupted because China has no pursuit planes or anti-aircraft. Chiang nodded eagerly and barked, "Yeah!"
Later I asked Madame, "What did you like in the report?"
"I liked its simplicity," she said. "A 12-year-old will understand.
As my evening with the Chiangs drew to a close, Madame turned to me and said that sometimes she felt apologetic for the way in which she scolds and squawks at America, but that she would always squawk loudly about China's needs.
"Don't worry, Madame," I told her, "we have a saying in the trucking business that 'The squeaking wheel gets the grease.' You keep on squeaking and you'll get attention from America."

At this, the Generalissimo looked up and demanded a translation of what had been said. As the interpreter spoke a smile broke over his face and he clapped his hands. "Good! Good!" he said.

## A Million Americans Bite the Dust!

- And carrying out dusty ashes is just one of many aggravations that go with hand firing a heating plant.

But relief is here! At ridiculously low cost, thousands of homes are installing Fairbanks-Morse Automatic Coal Burners. They get the comfort of automatically controlled heat. The convenience of freedom from frequent shoveling of coal and ashes. The clean-

Lift your morale with a triple-check and leave these clothes worries at home

Sagging slip - Droopy hose - Unzipped zipper - Zigzag seams - Twisted belt - "Shirt Tail" out - Straggly hair 。 - Foundation frets - Crooked hat .

If you that tho snickers behind your back, have a 3-way mirror put in your lome, the sort you see in dress shops. It will cost less than you think and what a help it is in that last minute checkup on how you look. You see all of you, front, back and sides, tip to toe.

Double the charm of your room with a Libby Owens Ford Polished Plate Glass Mirror. By reflection every decorative effect becomes iwice as lovely. Besides, your room looks larger. Your local L. O-F dealer can install your mirror easily and inexpensively. Over the mantel is a favorite spot.

Guests hate a word for it-"Lorely!" A mirror makes a delightful base for table decorations. Practical, too, because water would ina it and it is easily wiped clean. Your L. O-F dealer will sup. ply one the size you want; in color if you wish.

GET THIS BDEL BOOK! It's brand new and full of charming ideas for making your house lighter, brighter, aud more livable with L.O.F Glass, Designed for Happiness. Send 10c to Libbey-Owens Ford Glass Company, Department L-106, Nicholas Building, 'toledo, Ohio.

## Sec your ${ }^{\text {Wis }}$ Lumber and Glass Dealer

Mirrors are more than looking glasses. You see them in the most livable homes, in living rooms, dining rooms and all over the house. Not just to look into but for the added beauty and interest they reflect.
Architects and interior decorators use mirrors to "push back" walls, make rooms seem more spacious. To brighten dark corners. To double the interest of striking decorative effects. For all that they do, mirrors cost very little.

As to what is reflected, a lot depends on the kind of mirrors you buy. For perfect images, free from distortion, choose mirrors made of Libbey-Owens Ford Polished Plate Glass. You can easily be sure you're getting it by looking for the $\mathrm{L} \cdot \mathrm{O} \cdot \mathrm{F}$ trade-mark on the mirror you buy. Remember! The L•O.F label is your assurance of Quality Glass.

## Try It Yourse/f Tonight

TCODAY, as you've probably read in newspapers and magazines, there's a new idea-of what to do to meet special strain. A scientific idea of how to build up increased vitality-the idea that people under special strain need special food-in addition to the normal diet-to be at their best!
All this may be news to the public, but it is old to Ovaltine. For more than 20 years, Ovaltine has pioneered in preaching the need of special supplementary food, for those who want to be really fit.

## What It Does

For years, thousands who wakened tired and logy-lacked freshness and vitality to carry them through the day-have found they wakened fresh and buoyant-with lasting vigor-when they drank a cup of Ovaltine regularly each night and morning. For Ovaltine is a special food-concentrate designed to do two important things:
First: When taken warm at bedtime, Ovaltine fosters sound sleep, in a safe, natural way, without drugs. It has the power to rclieve that feeling of "nervous tension," thus helping to condition the mind for rest.
Second; Ovaltine supplies a special combination of food factors designed to replenish vitality while you sleep-rebuild wornout muscle, nerve and body cells. It provides significant amounts of the rarer food ele-
ments everyone must have for vigorous health - in a food specially processed for easy digestion-protecting minerals, Vitamins $A, B_{1}, D$ and $G$, all the essential amino acids, pyridoxine, pantothenic acid-elements now known to be deficient in many foods. Thus acts as an insurance against strength-sapping food deficiencies which affect more than $1 / 2$ of all people today.
So, by all means, try this "special food" idea modern science is urging. Turn to new, improved Ovaltine night and morningstarting tonight. See if you don't begin to feel infinitely "fresher" and more alivewith abundant vitality to face these strenuous times. Get a tin of $O$ valtine, now.

WET AND MISERABLE BUT STILL SMILING, DOUGHBOYS OF THE BTTH COHIO) DIVISION SLOG UP TO THE FRONT THROUGH THE MUD OF A TROPICAL LOUISIANA RAINSTORM

# BIG MANEUVERS TEST U. S. ARMY 

## IN SWAMPS AND FORESTS OF LOUISIANA, 350,000 SOLDIERS STAGE GREATEST SHAM BATTLE IN HISTORY

It rained on Monday morning Sept. 15 over all Louisiana. From low, darkening clouds the drops spattered on the State's good highways, on its hundreds of marshy mud roads, on its pine forests, and on its deep swamps full of quicksand.
The rain fell, too, on 350,000 U. S. soldiers and $50,000 \mathrm{U}$. S. Army vehicles as they fought the greatest sham battle in U. S. history. The attack had come before dawn. With two fast-moving, hardhitting armored divisions leading the way, Lieutenant General Ben Lear, commander of the Second (Red) Army, had pushed his troops across the rauddy Red River, was already sending long tentacles down the highways to the south, where Lieutenant General Walter Krucger's Third (Blue) Army lay in wait. Overhead armadas of pursnit planes fought great dogfights, while sleek A-20A attack bombers and Navy dive bomhers strafed the columns of tanks and trucks moving up to the front.
The fight lasted just five days. At the end of that time the Red Army was licked. Its tanks were on the defensive, its flank turned, its hridges destroyed.

Instead of keeping its original tank attack moving. it had stopped, waiting for unavailable motorized infantry to move up from the rear. On a terrain naturally unsuited for tanks, such a hesitation had proved fatal. With superior manpower ( 213,000 to 123,000 ) and superior firepower, plus three provisional anti-tank groups, the Blues lad deftly swung their main forces from the vicinity of Alexandria to a position squarely in front of the armored divisions. There they had placed great masses of meu, artillery and anti-tauk gans. Furthermore, to make their job easier, the Blue air force, under Major General Herbert A. Dargue, had won command of the air, was giving the Red forces behind the lines a terrific pounding. Against all of these obstacles, the Red Army tanks made little progress.
So ended the first phase of the Battle of Louisiana. But for weeks to come Army men will he dehating its lessons. Said Lieutenant General Lesley J. McNair, GHQ Chief of Staff: "The principal weakness was deficiency in small unit training due fundamentally to inadequate leadership." To this weakness, Army
men added another-the laek of enough highly motorized infantry trained to work with the armored forces.
In spite of these weaknesses, however, by week's end the Army was mightily pleased with itself. Its men were in magnificent physical condition. In rain and darkness, hungry and tired, they had fought continuously and well for days at a time. In the swamps and among chiggers of Louisiana, they had achieved a higher morale than ever attained in camp.
The Army was expecially happy becanse its men had taken the maneuvers so seriously. As the pictures on the next ten pages show, they had made it look like real war. Blue parachutists dropped suddenly behind Red lines, dynamited Red bridges and disrupted communications. An ingenious squad of Blues rolled smoke pots into headquarters of the Red Army, One private even went so far as to enter a Red headquarters, draw a bead with his pistol, order everybody to surrender. When a high-ranking officer austerely ordered him to dispense with display, he replied, "Nuts to you, general, this is war."

Reds in possession of Mount Cnrmel guard front of church but remain in lualf-track personnel carriers and bantam car.

Note tin hats which distinguish them from Blues. These are mobile infantrynten, part of Second Armored Division, es-
pecially trained to attack and feel out woft spots for tanksto crash through or to occupy nnd hold arens already overrun.

Blues charge from cemetery adjoining church. They are Oklahomans and give cowboy yells while firing blanks in
rifles. Man with flag is umpire's assistant whose signal indicates Blues have fire superiority, attained through covering
fire from rear, and can advance, forcing Reds to take cover. Artillery came up almost immediately after this charge.

Division. The gun crew weara new fioppy campaign headgear with hrims at varying angles, Soldiers call it duck hat.

Camouflaged house is part of "farm" that conceals fighter field. It is made of fine, red wire mesh, Grumman fighter in the background is one of the Navy planes used in maneuvers.

Dummy plane, made of lath and burlap, is parked a good distance from hidden hangars to decoy bombers, fool enemy observation ships. From the air, this is praetically indistinguislable from a real plane.

From the sky the roar of airplane motors eame almost continuously. High in the air Army and Navy dive bombers, pursuit planes, attaek bombers -850 in all -were staging the greatest aerial fights ever seen on maneuvers. Never were ground troops safe from air attacks. Never could anti-aireraft gunners at bridges, gasoline dumps, or airports afford to relax.
Especially vulnerable to bombing were the airports. With their concrete runways, their administration
buildings huddled elose together, and their planes, as often as not, lined up in rows, they could be spotted miles away. For protection, most of the fields merely counted on pursuit planes to drive the bomhers away. But the 21st Aviation Engineers at the Blues' Elser Field, near Camp Beauregard, thought that good eamouflage would make their field undiscoverable from the air. What they did ean be seen in pictures alove. They built false houses and mock planes, installed machine-

## battle of mi. Carmel <br> blues chase reds in hot crossroads fight

Mount Carmel isn't much. even for western LouisiII ana. A church. a school, a cemetery and a general store sit around a clearing in the woods. The name doesn't appear on standard maps: the only way to identify the place is by a faded sigu put up by the Future Farmers of America. But for four exciting days during the big maueuvers, Mount Carmel, the wallflower, became the belle of the ball. Reds and Dines struggled so violently to grah and hold it that the action at Mt. Carmel whieh changed hands at least once a day was an above-average sample of what was going on np and down the 100 -mile front.

Five roalls lead into the clearing. Three of them are impassable to eivilian automobiles but Mount Carmel was strategically vital because, in a wooded
country, mechanization has to follow the roads. When the sequence shown on these pages started, two battalions of the Red infantry were in possession. The erossroads baked quietly in the sun, the only sound being the faint noiscof a few Red tanks working down the roads toward advancing Blues.
Suddenly the storm of battle broke. The tanks, finding that the Blues were advaneing in foree, wheeled out into the elearing. Three Sigual Corps sound trucks, planted nearby toaccustom troops of both sides to the sound of eombat, started grinding out records of whiniug bullets, diving phanes, booming artillery and tank sirens, The Red infautry leapel into its half-track personnel carriers ready to fight or run.

The battle did not need the aid of a sound track
long. Blue infantry burst out of the woods on three sides yelling and firing rifle blanks. The Reds let fly with machine guns and tommy guns but saw they were outnumbered and raced up the two roads remaining open, firing. A few yards behind the infantry came the Bhe $75{ }^{\prime}$ s. Set up on the run. their gun erews blasted at the tanks covering the Reel infantry retreat.

Four tanks were put out of action and vital Red gasoline was distributed to all-comers. The Blues numbered two regiments of the f5th (Southwest) Division, considered among the hest of National Guand outfits.

Mount Carmel had a breathing spell but not for long. Red planess strafed the clearing to foree the Blues to scatter and give flecing Red infantry opportumity to gather re-inforcements and counterattack.

Red attack bombers zoom upward after hombing Mount Carmol and strafing it with ma-chiue-gun fire. Planes cane over agaia and again to delay and confuse Blues in organizing
newly won positions. Trueks in cleariag should have heen put noder trees immediately and were ruled out of action. With anti-nireraft protection planes might have been shot down, too.

Sunken machine-gun nest, at jumetion of munayss on field, prepares to fire on parachatists or low-flying phanes. Its semi-urmored top slides back after bombing attack, which precedes attemptel landing.

Mock ofchard is painted on runways. Camouflage hike this deceives camera at $15,000 \mathrm{ft}$, visual observation at $10,000 \mathrm{ft}$, below which anti-aircraft fire prohibits reconnaissance.
gum nests as protection against parachutists and even painted fake orehards and wheat fields on the runway. Such camonflage work is one reason why Major General Herbert A. Dargue's Blue airmen, with no more planes than the Reds, achieved air supremacy over Major General Millard F. Harmon Jr.'s fliers. Another reason, more important, was that they flew longer, harder, more daring missions than the Reds. When the Reds wanted to bomb a bridge or an airport, they
frequently sentover only three planes. On a similar job, the Blues woukl sometines send over twelve. One day, between the hours of $11 \mathrm{a}, \mathrm{m}$. and $1 \mathrm{p} . \mathrm{m}$., Bhe warplanes "expended" 380.630 rounds of. $30-\mathrm{cal}$ ammmition, 238.830 rounds of $.50-\mathrm{cal}$, , $93737-\mathrm{mm}$. airplane eannon shells, $834100-\mathrm{lb}$. demolition bombs and 131 $500-\mathrm{lb}$. demolition bombs. During this attack a single B. 25 medium bomber dropped eight $100-\mathrm{lb}$. hombs on a force of 100 tanks southwest of Florien, La.

With the war almost won, the Blue airmen turned from fighting to propaganda. On retreating Red column they showered down leaflets, saying, "Your commanders are withholding from you the terrible fact of your impending defeat . . . Your food stores have been captured. Noone is going to bring up any of the steaks that the men of the Third Army will have tonight. Rout, disaster, hunger, sleepless nights in the forest are ahead of you. Surrender while there is yet time."

# BLITI guns stop advance of the tanks 

In the first flush of Monday morning, astride their blitz weapons of tanks, half-tracks and peeps, the men of the Red Armored Corps sallied forth cocky and hrave. In the twilight of Friday, they drove back to their hivouacs, silent and unhappy. In hetween those days. for the first time in any maneuver, they had been stopped cold.
Reasons were basie. First, the terrain was swampy and full of streams, difficult for tanks. Seconcl, their air foree lost command of the air. Third, they violated the principles of the armored force.
Major General George S. Patton Jr., commander
of the Second Armored Division, has laid down some of those principles. Says he: "Never get in a squirting match with a skunk," and, "Grah 'em hy the nose and kiek 'em in the tail." Under General Lear, the First Armored Corps got into a fight with three of the Army's new anti-tank groups, whieh can shoot more accurately and longer than tanks, Then, instead of holding its front and attacking the enemy on the flank, it made a frontal attack, straight down U. S. Highway 171, into the greatest concentration of anti-tank fire ever gathered in the U.S. in one place. Result: within 84 hours more than $20 \%$ of the

Ind Armored Division's tanks were theoretically destroyed.
But the armored force was not entirely unsuccessful. Twice columns under Colonel Clarence H. Bragg and Brigadier General Willis D. Crittenberger struek far into the Blue Army middle, were halted only by swamps. Soldiers of the 41st Armored Infantry fought behind Blue lines all week. Constantly, too, the armored force was a threat. Once General Krueger even moved his headquarters hecause he was afraid that the First Armored Division had gone around through Texas, and would attack him from the rear.

Seven of 18 Red tanks captured Friday, belonging to the First Armored Division are lined up under the trees near
the little town of Provencal. This is the last day of maneuvers. This year the Army has much more equipment than
list. However, it is still short of medium tanks, $\mathbf{3 7}$ - and $7 \mathbf{7 5}$ mm . guns for tanks, $105-\mathrm{mm}$. howitzers and anti-tank guns.

Dropping their $100-\mathrm{lb}$. bombs in a demonstration over Shreveport's Barksdale Field, A-20A attuek bombers praetiee destroying tank and troop columns. Capable of flying low and fast, these stremmlined planes were the strafing stars of the maneuvers.

Blue parachute troops, after dropping in a cotton field, commandeer Red command ears, fight toward pontoon bridge neross Red River at Clarence. Atter capturing some men of Red Sigual Corps and Engineers, they blew up a bridge at Vobreiaux.

## COME RAIN, MUD OR DUST <br> the army goes through

Though a maneuver may be decided rather artificially by the umpires, there is nothing theoretieal about the varieties of unpleasant weather that Louisiena can dish out. There was controversy about the performanee of eommanders but every observer agreed that the American soldier was the star of the show. His physical condition proved to be superb. He went without sleep, baths and sometimes food. He struggled through rain. dust and heat. At the end he was still rarin' to go. In faet his combative spirit
was so high that authorities were worrying about the increasing number of fist fights between the Reds and Blues. That these pietures are like those which come from the European fronts is no optieal illusion because this part of the mancuver was the real thing.
The elements took their toll of mechanization two. Air activity was severely cut down on two oceasions when approaehing tropical storms forced the removal of all planes to fields away from the coast. All vehicles, ineluding tanks, were stuck frequently.

Dust from passing trueke, dust from marchers who have gone on abead fills nostrils and throats, makes sleepless eyes redder, renders clark circles underneath still darker, is formed
into rivulets of mud from perspiration. These are memhers of the 43 rd (Yankee) Division, far from cool New England, moving ap to the front. Velicele at the right is command car.

Raili, big drops of it driven by the furious winds of a tropical storm, pelts down on the erew of a topless infantry weapons earrier from the 37th (Ohio) Division. The 30-eal. machine gun
is hetter protected than the men who huneh their backs into wind and try to keep water ont of their necks. Note splashes on pavement. After this men had to sleep on wet ground.

Mud, thigh deep, makes boarding assault boats difficult for 37th Division infantrymen about to thrust into the Red River's rain-swollen currents. Twelve boats shuttled 1,200 men across.

Each boat held eleven men, three from the 112th Engineers who paddled the boat back. Third Army plans ehanged so no artillery support was sent over and all 1,200 were captured next day.

on stretchers at lake charles station, casualties from abrd evacuation hospital wait for train to take them to new orleans field hospital

# CASUALTIES 

## some boys really got hurt

The only great faet of war missing in maneuvers is fear of death. Gmusshoot hlanks. Planes bomb trucks with flonr bags. Prisonersareset free unhurt. But there are real casnalties. Boys on stretehers (abore) have honest-to-God eases of strained backs, fractured knees, food poisoning. Below, in an evaeuation hospital, Army surgeous are performing a real operation for appendieitis. On opposite page. Private Le Roy Beyer looks out from
an Army ambulance after the rim of a tire he was changing hit him in the head.
Before fighting started, the Army expected that in two weeks some $\mathbf{4 0 . 0 0 0}$ soldhers would be hospitalized. It also expeeted 136 deaths. When, therefore, at the end of the first week of war 17 soldiers had been killed (seven by motor aecidents, one by snicide, two by drowning, two by disease, five by airplanes), the Army was relieved.

# Germans drive on Crimea; Italy suffers from "defeatists"; Windsors visit Washington 

Russia is a land of sieges. In the Crimean War, Sevastopol stood firm for a year before surrendering. In the Rinsso-Japanese War, Port Arthur held out

timoshenko for six months before giving in.
Win, lose or draw, the people of Odessa and Leningrad had hy last week won the right to add their millions of anonymous names to those of their heroie ancestors. Odessa had already held out for two months. It showed no signs of falling. Leningrad had alrcady held out for a month. The Germans said it was "doomed," hut set nodate. Compared to the desperate resistance before these two cities, the sicgeof Warsaw was a sham hattle.

Although no foreign eorrespondents were allowed in the two hesieged citadels, they were allowed to visit the front lines for the first time last week. These lines-in the central sector just east of Smolenskare where Marshal Timoshenko's men have recently pushed the Gerinaus back. After driving around the 60 -mile salient, Cyrns Sulzherger cabled the New York Tines: "It is one big German grave . . . the first extensive area from whieh the Nazis have been removed after conquest in more than two years of war."

Elsewhere, however, the Nazis were still "eonquesting." Behind Kiev, the German High Command elaimed to have taken 665,000 Reds, 885 tanks and 3,718 guns in "the greatest destruetive battle in workd history." Neutral observers, while not belittling the measure of German suceess, had a hunch that the Germans were numbering captured eivilian irregulars in their tremendons prisoner lists.

Dogged Russian resistanee and autumn frosts in the north by last week turued the Nazis' attention to the still sunny Crimea. With parachute troops and Stukas in support, lines of infantry and tanks moved on the narrow bottleneek of land that hooks the Crimean peninsula onto the Ukraine. After three days of fighting, the Russians claimed to he holding. They
 did not elaim to be driving the Germans haek.

The German attack on the Crimea, which if successful would give them one more stepping stone on their way toward Batum and Cateasian oil, exeited the attention of the British. Above all the British want to keep Hitler away from new sonrees of oil. Prodded finally to some action, the British last week produced a record-breaking number of tanks for dispateh to Russia and the few R. A. F. planes which are fighting alongside the Reds saw their first aetion.

Taking time off from the army he is drilling in India, General Sir Archibald P. Wavell conferred in Teheran with a Russian commander, and the world's cables buzzed with the possibility of a British expedition into the Caucasus to help the Russians protect the oil. Reports filtered through that British supplies were already moving northward in Iran toward the Russian frontier. If true and if followed hy British troops, it would be the first time since the German invasion of Russia began that "aid to the Bolshies" got out of the headline stage and reached the battlefields that count.

Blackjacks in Italy. On June 11, 1940, Italy entered the war to win a quick victory on the cheap. By last week, with all hope of a quiek vietory dashed, the war itself had hecome a fearful expense.
In one seven-day spell Rome censors passed this news: for lack of soap Italian housewives are heing offieially advised to lannder their linens with soaked horse ehestnuts, boiled ivy leaves, potato paste. For
 lack of coal, no homes may be heated before Dec. 1 . Because of a shortage of wheat, hread was rationed for the first time. The newspaper Regime Fascista squawked that defeatism was sweeping Trieste and applauded Fascist hlack shirts who heat up defeatists with hlackjaeks. In the light of these first-hand admissions, sec-ond-hand reports reaching Turkey of hunger and unrest in northern Italy, of courts-martial in Milan and Tricste, of a "sharp decline" in morale throughout Italy, seemed increasingly credible.
Even in eonquered Croatia, Serb and Croat rebels were making Italian occupation so difficult that an entire army corps was "re-occupying" certain arcas. The Duke of Spoleto, designated King of Croatia last May, has still not dared set foot in his kingdom.

Windsors' Visit. The ex-Emperor of the British Empire and his American wife set out from the Bahamas for a six-weeks' vacation. In Miami, the Duke of Windsor said: "I want to ohserve world conditions during my trip," and on the train north he spent two hours in the cab of the Diesel locomotive. With 106 pieces of baggage, the Windsors arrivell in Washington where they were given an official welcome befitting the Governor General of the Bahamas and his wife. They visited the President who had asked them to lunch but had canceled the invitation after the death of his wife's brother. The Duke visited the Secretaries of State and War. As he walked into the big buildings, greeting people with a curious stiff-armed gesture (sce photograph), work virtually stopped.Govcrnment workers swarmed from the female-infested enbicles and were andible in their admiration. Even the admiration-laardened Duke hlanched to overhear one spinstery secretary exclaim: "Look at his cayute dimples."
The Duke visited the Lineoln Memorial and asked a lot of questions ahout John Wilkes Booth. Then they went on to Alberta where the Duke wanted to straighten out matters on his ranch which he hadn't visited for $1+$ ycars.

DUKE OF WINDSOR AT STATE DEPARTMENT

End ol Neutrality. Getting ready to emasculate the famous Neutrality Aet of 1939, Senator Tom Connally, head of the powerful Senate Foreign Relations Committee, said he would

connally support repeal of two allimportant provisions of the act-the provision forhidding U. S. ships to enter belligerent waters and the provision forhidding the arming of U. S. merchant ships. Senator McKellar proposed repealing the whole act. Some repeal was certain to get through Congress quickly. Work was hegun to arm U.S.merchant ships with 4 -in.guns.

Six Percent Prolit. To a Congressional committee which was skittering like a scared horse at the idea of fixing prices to stop an accelerating inflation, Secretary of the Treasury Morgenthau hlandly proposed a pet idea. Why not, said the Secretary, put a $100 \%$ tax on all corporation profits over $6 \%$. "In times like these," he said, "when a corporation earns $6 \%$ on its capital investment it ought to be satisfied." There seemed little chanee that the Secretary's proposal would come soon to any fruit. But, like it or not, Congress was going to have to do some kind of price-fixing.

"Ford Jailed." According to elippings from a Nazicontrolled Dutch newspaper whieh arrived in the U. S. last week, Henry Ford has been put behind the hars on President Roosevelt's order for inspiring the German "V for Viktoria" eampaign by naming his ears "V-8's."
This outright lie was only equaled hy another frandulent tidbit handed out to the Dutch papers hy the German Propaganda Ministry. The second lie claimed that the Nazis had heen "reluctantly forced" to make German Jews wear yellow Stars of David over their hearts in retaliation for an American order eompelling German nationals in the U. S. "to wear swastikas on their coats."

## PICTURE OF THE WEEK

The most extraordinary pieture of the whole basehall season is the one on the opposite page which was taken at the Oakland, Calif. hasehall park and appeared in the San Francisco Chronicle. The poliee dog snatching the hall from a half dozen outstretched hands is Lady Fair, who belongs to Archic Niessen of Oakland. Along with Lady Smudge, whose paws and ears show behind her, Lady Fair regularly attends haseball games. She goes wild during exeiting plays and has the local reputation of knowing what the game is all about.
This wonderful pieture prohahly would not seem so wonderful, however, to haseball lovers 3,000 miles away in Brooklyn. All last week Dodger fans went around in a daze of glory for their scrappy team, which Brooklynites fondly called "Our Bums," won their first National League pennant in 21 years.

## THREE KILLED AS FREIGHT ENGINE

## CRASHES INTO FAST PACIFIC FLYER

A
little after 10 on the night of Sept. 22, the engineer A of Western Pacifie's erack Exposition Flyer looked down a stretch of track near Pleasanton. Calif. and saw the most horrifying sight that eau meet a trainman's eyes. There not many yards away loomed the giant shape of a "deadhead"-an unattached freight locomotive, hurtling toward him down the single strip of track. Both engineers threw on their brakes. Passengers in the Exposition Flyer, an hour out of Oakland, were jarred from their seats. An instant later the two locomotives met headon.
A hurrieane of eseaping steam roared into the cab of the Flyer, suffocated and scalded to denth the
imprisoned engineer and fireman. Both engines left the rails in twisted agonies of hot metal, dragging with them the baggage ear and two passenger cars. The Flyer's baggageman, hurled elear through the front end of his ear into a litter of sheared steel, died in a hospital a few hours later. Only these three trainmen were killed. Twelve other persons, nine of them passengers, were iujured. The eugineer of the freight loeomotive had managed to jump, after applying his brakes, and eseaped along with his firemen. Neither eould explain the accident. Only official comment was made by a division superintendent of the line. "Evidently," he said, "somebody made a serions mistake."
this is what happens when two locomotives collide. at the left is the mangled hulk of freight engine no. bs, at the righti remains of the expdition flyer

Modern war is a battle for materials. To check the life-giving flow of materials, British warships ring the European continent while German bombers and submarines encircle Britain. Beyond comparison, the most vital of materials is food. Unlike steel or copper, aluminum or rubber, food has no substitutes. We have it or we do not have it. With it, all things are possible. Without it, tanks and planes can give no security.

If the defense of America is to be certain, food for $130,000,000$ Americans, and those who stand with us, must come regularly to market.

Today, as always, the production of that food is the task of American farmers. Today, more than ever, American farmers are relying on the farm equipment industry to provide them with the mechanized tools of agriculture. For, while the need for farm products rises, the supply of farm labor constantly dwindles as men are diverted to the Armed Services and the factories.

This Company and the industry of which it is a part have the factories, the trained employes, the engineering skill, and the distributing organizations to get these vital tools to the farmers of America where they need them
and when they need them - subject only to the allocation of materials.

Swords are beaten into plowshares when peace follows war. Today, throughout the world, plowshares are beaten into swords... In America, the greatest food-producing country in the world, it is well to consider that Plowshares Are Swords!

international harvester company chicago

## What happened to the fourth Manhattan?

We recently asked a famous photographer to take a picture that would really do justice to the magnificence of Manhattan Cock tails made with today's Four Roses Whiskey.
He brought us the photograph you see above. We were tremendously pleased
with it. But, knowing that, in the past, his Four Roses photographs have usually shown four cocktails, we asked, "What happened to the fourth Manhattan?"

His answer amused us - and pleased us. So we asked him to re-enact just what did happen to it-for your benefit .

First, with infinite poins (for our friend is a truc connoisseur), he mixed the four Manhattans ... using one-sixth dry Vermouth . . . one-sixth swedt Vermouth . . . a dash of Bitters . . . and for the remaining two-thirds, Four Roses. Stirring well with cracked ice, he poured the ruby-gold libation into the four glasses. So far, so good.

Next, he worked out the composition of the picture, being eareful to give the Manhattans and the Fonr Roses bottle the patrician surroundings they deserve. For this Four Roses, he'd heard, was the very linest whiskey we'd ever made or known in the past 76 years. And that, he knew, meant it was finer than any whiskey anybodly ever made!

In fact, (he confided), this Four Roses made such downright gorgeous-looking Manhattans, with such ambrosial aroma, that ... well, he drank that fourth Mauhattan! And now we wish that you, too, would discover the satin-smooth perfection, the softly exquisite flavor, of today's Four Roses. Just try this matchless whiskey - won't you?

FOUR NORWEGIAN BOYS (A, B, C AND D) TELL "MARCH OF TIME" ABOUT ESCAPE FROM NORWAY

THEY WATCH THE "MARCH OF TIME'S" COMPOSITE STORY, "NORWAY IN REVOLT"

# NORWA FIGHIS OH IN INVISBLE WAR 

 "MARCH OF TIME" SHOWS REVOLT0$f$ all their many eonquests, the German masters of Europe have discovered, the Norwegians are the mont dangerons, proud and rebeltions. The eont innons revolt of Norway is the most gallant and poignant story in Enrope today. Reports of it are few and fragmentary. There are no pictures of it whatever. But all through Norway, the tall grave men look at their new "masters" and cannot admit to themselves that the Germans are the better men.

The March of Time set out to tell the story of Norway's hidden war on the German tyrants. It fonted several score Norwegian youths who had ess caped from Norway after a year of undergromed work against the Nazis. They todt how they mimeographed little newspapers of revolt, radioed military information to the British, flashed blinker signals to the British bombers eoming in at night, tore up railway tracks, ruined German fortifications by mixing too munch sand in the concrete, poured kerosene in the boxes of fish going to Germany (see below ). When France fell too, some of the old people of Norway gave up, but not the yonng. They still skied constantly, bnt now it was in training for renewed war. In the thepths of the forests they set up their shortwave radio apparatus to send to Englaud. When they passed Norwegian traitors whom they knew. perhaps I $\%$ of the whole population, they dit not speak or look at them. They always arrauged to escort girls at night, for the smbbed and lonely German soldiers began attacking Norwegian girls after dark.

The near-sticidal work of the young rebels in Norway was of great valne to the enemies of Hitter, lut finally the young mers gave in to their gnawing dexire to meet the Germaus in open battle. By fours and dozens and seores, they stipped ont of Norway to England. Two of the fonr at top escaped by way of Sweden, Moseow, Gobi Desert, Chungking and the U. S., a third took the ronte sonth out of Russia through Turkey, Irae, Bombay and Capetown. About 100 a month escaped by small boats from the coast of Norway, as shown on the following pages. They left without saying goodby. Some were never seen again. Most made it.

When these loyss saw the March of Time newsreel, Normay in Recolt, they were moved but they said that it was an understatement of what they had seen before their eseape. Many of them acted in the March of Time's re-enactment. And by a lucky chance the same British submarine that had reselued a batch of them put in at Portsmouth. S. H., and re-enated its adventure in the North Sea (sec the following page's).

Siphoning gasoline from a Germun officer's antomodile in Norway, Norwrgan A gets fuel for escape boat. Boat abo had a sail to get to England.

Hiding it in basket, Norwegian A carries gasoline can onto fiswing hoant he and his friends have chosen for escape. All preparation must be secret.

At the zero hour, Norweginn C(left) sels sail for midnight run down fjard past guards, searchlights, Nazi coant-patrol hoats. This is tetwe moment.

Out on North Sea, as many as 30 men may be piled into the tiny cahin, while three men on deck at a time prelend to be on ordinary fixhing trip.

Watching incessantly for Nazi planes, sulmmarines, patrol boats, Norwegian D steers for scotland. Discovery would mean concentration camp or death.

Using schoolbook maps, compass, hoys take up to three days to make Scotland. Onee Nazi planesstrafed them. They got ont nets, pretende! to fish.

Dread sight of a submarine breaking water alongside is climax of March of Time escupe story, If it is German L'-boat, Norwegian hoys are done for.

Horrible suspense is ended when British White Ensign is loroken ont. Submarine is the Truant, which really rescued boathoad of Norwegian boys.

"IF you want to make the family's eyes pop," says Flsie, the Borden Caw. "try making choeolate frosting with Borden's Eagle Brand Cundensed Milk. 1t's brautiful to look at . . . better to taste . . . and only 5 inimutes to utake!"

## Just Follow This "Magic" Recipez

## THEPOT OF GOLD

Niblets Brand whole kernel corn is very young, tender, sweet corn from a special breed of golden corn, cut from the cob when fresh, and sealed in vacuum with minimum added moisture. Rich in vitamins A (as carotene) and C. One can serves four or five. Simply heat with butter and serve.
Look for the Green Giant when you buy. Packed only by Minnesota Valley Canning Company, headquarters, Le Sueur, Minn. Also packers of Green Giant Brand Peas, Niblet-ears Brand Corn and Del Maiz Brand Cream Sylle Corn.

## Precious Loot for Pantry Pirates!

Mother gets a big thrill out of her family's "pantry raids". . . even invites the after-movie looting of her cake-box. That's because she happily has discovered feather-light, golden-brown Jane Parker Donuts-so downright tasty and delicious that more than 2 million are bought daily!

Try them for breakfast, dessert, picnics, parties and school-boxes. You'll agree: these tender nuggets of mouth-watering goodness are so easily digestible you'll simply want to "eat 'em by the dozen."

Made from a prized recipe, they're so soft and tender they fairly melt in your mouth. Yet, you know they are fresh-"dated" for freshness right on the package to assure you of absolute goodness. For your extra protection,

*Many A\&P brands bring you savings up to $25 \%$ compared to prices usually asked for other nationally known products of comparable quality. You'll enjoy the goodness of our 33 Ann Page Foods - A\&P Teas and Coffees-White House Evaporated MilkMarvel White Bread and Jane Parker Cakes, Rolls and Donuts- 26 A\&P Canned Fruits and Vegetables - 12 White Sail Household Products - Yukon Club Beverages . . . and many other fine foods.

SOLD EXCLUSIVELY AT A\&P

Jane Parker Donuts come in cellophane-wrapped, moisture-proof cartons,
Visit the Baked Goods Department in your A\&P. Discover the extra goodness that all Jane Parker Donuts, Cakes and Rolls, and Marvel Bread offer you-thanks to guarded quality from source to sale. You get extra economy, tool That goes for all A\&P brands . . . for A\&P Coffees and Teas, Ann Page Foods and all the rest. This is made possible because A\&P cuts out many unnecessary in-between costs . . . and shares the savings with youl

## JANE PARKEIR "TDATEI" DONUTS

CONSUMER FACTS: Jane Parker Donuts are made from wholesome ingredients. They're "dated" to guarantee absolute freshness. Packed in handy cartons, wrapped in moisture-proof cellophane. Plain or sugared. Priced low to give you top quality at a big saving. More than 2 million bought every day!

THE T-FORMATION STARTS FRDM THIS HUDDLE, WHERE THE PLAY IS PICKED. HERE THE LINEMEN (BACKS TD CAMERA) FACE THE BACKFIELD, ENDS ARE AT EITHER END

## STANFORD SUCCESS BRINGS

## T-FORMATION PLAY BACK

## INTO WIDE FOOTBALL USE

Fer sinee last fall football coaches have been worry$\mathbf{L}$ ing about the T-formation. The result of their worries will be evident on the foothall fields this fall where T-formations will be seen everywhere. The reason for the revival of interest in this foothall deviee is the huge surecess of the T-formation last year. The Chicago Bears used it to win the U. S. professional football title. Stanford used it to win the Rose Bowl game. Starting last year with a new evach Clark Shaughnessy, and an underrated team. Stanford went undefeated. This year Stanford is again a national favorite in the famons Dunkel football forecast, which is printed on page 60.

The T-formation gets its name from the backfield formation shown below. A historic foothall device dating back to the days of the late Walter Camp, it returned to favor because defensive tacties had been greatly improved. Using five-men lines and shifting tacties, foothall defense gained an edge on offense. The T-formation is beautifully suited to disrupt defense by deeeption. It needs no panse for a shift. A tremendous variety of plays can develop ont of itstraight plays, fake plays, faney plass. When wellused, it keeps the defensive constantly on edge, constantly a vital step behind. Here some uses of the 'Tformation are demonstrated by the Stanford team.

## T-Formation (conlinuec)

## MAN IN MOTION GIVES OFFENSE A HEAD START

The T-formation emphasizes the nse of a standard football device. the man in motion. This man is a hack who starts running before the ball is passel from center, moves laterally behind the line. Sometimes he is closely involved in the play as a blocker, pass receiver or kick coverer. Often as not, he is a decoy pulling the defense out of position. His head-start makes the play fluid as well as deceptive.

Elementary T-formation play is this simple plunge between guard and tackle. Here the man in motion (arrorr) is crossing over from right to left as center bolds the ball.

Man in motion (draight arrow) is passing behind his tuckle. Curved arrow indicates center will pass ball to the quarterhuck, who will then turn and hand it to fullhuck.

Play goes through the line as man in motion continues off to left to draw the defense over. But instead of following him, fullback plunges through big hele inside tackle.

# This year- <br> why not enjoy <br> the kind of quality foods you have always wanted? 

 Erocens are ready to help you-America is soing back to work!
Now - for the first time in years - millions of homes can afford the quality they have always wanted. And the variety every family needs.

Why not let Del Monte help you enjoy this better living to the full?

## Just take your plek

No need to tell you how good Del Monte Products are!

American women have known Del Monte Canned Fruits and Vegetables - and preferred them - for more than a quarter of a century.

But do you realize the full extent of their practical service to you every day?

Every time you plan a meal-think of the very real satisfaction and convenience of having more than

100 different, delicious varieties of fine foods to choose from
-all under one reliable brand-all uniformly and dependably right.

And remember-the wide variety of Del Monte Foods makes it especially easy to add, as a regular part of your everyday meals, a better balance of the vitamins and minerals so essential in adequate diets.

It is easy to buy Del Monte, too no matter where you live.

## Your grocer wants to please you

Take your own experience! Aren't Del Monte Products usually carried by grocers you like to trade with progressive, efficient, up-to-date stores?

The very fact that any grocer specializes on Del Monte is good evidence of what a modern merchant he really is-that, first of all, he is look-
ing out for your own quality interests.

## No guesswork-no experiments

By handling a complete Del Monte assortment, he saves your time. You don't have to guess - or experiment with a lot of different brands.

At the same time, it helps his business, too!

He can get along with a smaller investment in goods - cut down his cost of doing business - serve more customers, more easily and quickly.

There's some good Del Monte grocer near you! Why not discover the service he has to offer. Get acquainted with him now - and with the almost endless menu variety Del Monte brings you.

It will make your meal-planning easier - save you time and uncertainty - give you the kind of quality foods you want for your family.
Del Monte Foods

Score Two for All-Bran's Better Way!

"CALL THE FIRE DEPARTMENT!" is, figuratively speaking, the way my family and I used to treat constipation. We'd rush to the medicine cabinet for emergency relief. It never occurred to us to look for the cause, or to try All-bRan's better way.

straight to the marki Then I discovered that Kellogg's all-bran goes straight to the cause of common constipation, the kind that's due to lack of proper "bulk" in the diet-and wholesomely, naturally prevents it.

EXCUSE MY BACK, but I'd rather not illustrate the way those laxative doses used to taste. And to think I never knew what crisp, delicious, toasted aLl-bRAN could do.

mappl darsi And, if your trouble is this common kind of constipation, may you discover the same enjoyable way to "Join the Regulars"! Crunchy, toasted Kellogc's all-bran is not only very effective, it's a lot more pleasant than the "hurry-up" remedies we used to take. Eat it with cream and sugar every morning, drink plenty of water, and get yourself in tune again.

## Join the "Regulars" with Telelogg's All-Bran

T-Formation (continued)

Starting from T-formation, the quarterhack (No. 13) makes as if to hand the ball to the plunging fullhack. Here the camera is pointed right through center at the play.

Quarterhack holds hall out to plunging back. The curved arrow marks quarterhack route, straight arrow plunging back's route. Late-starting defense pushes through.

The defonse is sacked in while quarterback with ball sweeps around end. Man in motion at left of top picture now takes out end at left. Quick start helpa deception,

# "WHAT DO I DO NOW TURN NUDIST?" 

father: That shirt you're giving to Junior is the last decent one $I$ have to my name!
mother: You mean indecent. It won't button even on Junior. And it's all your fault!
father: My fault ?
mother: Sure! You didn't look for a "Sanforized" label . .. the one that says the fabric won't shrink more than $1 \%$, by standard tests. That's so little your shirts won't shrink out of size.
father: Wish you soould pick me up a dozen. мотнER: You can find them all over town, in practically all makes and styles. And all prices. They even have shorts and pajamas now with "Sanforized" labels. Go get 'em yourself!
father: What'll I go in . . a a barrel?
мотнer: Smarty! I'll go. But I'll need extra money.
father: Thought you said shirts with "Sanforised" labels didn't cost extra?
mother: They don't. But I have to shop for Junior, too. He won't get any more hand-medowns if you start wearing shirts with "Sanforized" labels.

$\downarrow$ "what a family!"

mother: I just got through lecturing your father, and now you turn up in a shrunk-up house dress! You'd better do your next shopping with me, young lady!

MOTHER: We won't even try them on if they haven't "Sanforized" labels! salestadyt These all do-and they're so reasonable, too! They come in all styles and materials.

father: Hey, where are our things?
MOTHER: Oh, my stars-I'll have to go back! We found so many cute dresses marked "Sanforized," we forgot all about you men!

INSIST ON a "Sanforized" label when buying other cotton, linen, or spun rayon swashables . . . children's clothes, uniforms, slacks and work clothes, slip-cover and curtain materials. It's the sway to be safe!

MINNESOTA, TEXAS AND STANFORD LEAD IN DICK DUNKEL'S 1941 FOOTBALL FORECAST

Dick Dunkel. LIFE's foothall forecaster. here presents his selections for the lesst U. S. collegiate teams of the 19.4 foothall scason. Listed below are Dunkel's so top teams, with Minnewota. Texas and Stanford leading the pack. All threc of these teams, which finished brilliantly last year. figure to be even better this year on the basis of returuing taleut. Althongh the choiee for first among the three is virtually a toss-up. the deciding factor was the caliher of opposition met and defeated last year. Each will be the strongest team in its conference with tonghest opposition, respectively, from Northwestern, from Rice and Southern Methodist, from Waslington and California. On the next page are predietions by conferences and leagues.

Based on Dunkel's survey, the most improved major teams of the year will be Fordham, California, Texas, Mahama, Mississippi, Navy aurd St. Mary's. Greatest slumps eau be expected from Cornell, Mississippi State, Georgetown and Texas A. \& MI. The Midwest and South should eontinne to prodnce the greatest number of stroug teans daring 19+1, while the Pacific Coast should show marked improvement. The East will have fewer ontstanding teans than last year.
A new headache for foothall forecasters this fall is E. S. Sclective Service, Just before Duukel's 1941 raukings went to press the whole right side of the University of Gcorgia's powerful line was inducted into the Army, causing Georgia to drop from 7 th to 18 th in Dunkel's eareffilly wcighted ratings of 6is teams.
Dick Dunkel's survey is based entirely on mathematics, involving no persoual opinion or guesswork. His $19+1$ analysis for LIFE, as in 1939 und 1950, adjusts two main facts: 1) last year's final ratings and q) the number and value of players returning, or newly eligible, for each squad. Last year Dunkel gave LIFE readers-three mouths in advance-the champions of six out of eight regional conferenees. Of his prescason Top Thirty, -4 teauns inade the grode on the hasis of a verage weekly rating throughont the season. A notable exception was I. C. L. A., hardluek team of $19+0$. picked 19th by Dunkel. actually ending 67 thl. On his radio broadeasts of last yeur Dick Durkel called 0,368 games in advanee, womnd np with $80.6 \%$ correct.

## YOU FOR GOOD

## STRONG FEET?

#### Abstract

Ah, you mother of a child-you want his manners to be nice, you want his brain to be quick, you want his back to be straight, you want his hands to be agile-but don't you want his feet to be sturdy and true, well-shaped and graceful? Or those feet of your daughter?

You mother of a child-twenty years from now his feet will be walking up to get a diploma, or confidently marching in to get a jobmaybe walking up to an old church altar to meet a bride in white. (Or it may be the bride herself.)
Your child may never thank you for good, strong feet. He'll take them as a matter of fact.
But what will he think-if they're not good, strong feet? Sure, he'll still love you-but "why didn't mother make sure I was growing up right?"
It is a responsibility-just one of many a mother takes on when she brings a child into the world.

But it can be made one of your
easiest responsibilities. Buster Brown* Shoes are the best friends of a mother who wants children's feet to grow up right.

Buster Brown features were developed with the cooperation of mothers and on the actual feet of children. For 38 years the makers of Buster Brown have specialized in scientific principles of foot health in growing children.
Buster Brown's 6-Point Fitting Plan provides exactly the right shoe for the individual fit.

Buster Brown will help you say twenty years from now, "I did my part about their feet."

Write for name of nearest Buster Brown retailer $\$ 250$ to $\$ 5 \underline{5}$
Brown Shoe Company-Manufacturers, St. Louis. Also makers of Buster Brown Official Boy and Girl Scout Shoes.

Nine out of every ten children are born with normal feet but at grade school age 70 per cent have developed some foot weaknessalmost entirely due to poorly made, poorly fitted shoes. The Buster Brown 6-Point Fitting Plan eliminates guesswork and helps keep normal feet normal.

PAUL MENUTT, AT HIS FEOERAL SECURTTY AOMINISTRATION OESK IN WASHINGTON, SOBERLY REFLECTS ON HIS LETTER "EACK HOME" TO INOIANA'S OR. WILLAAM ERYAN

# Mclutit asks fon sollo amehlcali fronit 

Poul Vorles McNutt, hondsome Federol Security Administrator, wrote the forceful pleo for Amaricon unity which is printed below to Dr. Williom L. Bryon, President Emeritus of Indiono University. Both these proud ond potriotic Indianons, conscious of their heritoge from Vincennes on, feel grove concern for their country's lack of unity at this time of crisis. McNutl believes that his countrymen hove tolked thamselves out but keep on tolking, thot they hove taken a stond but don't hold firmly to it. Written by one mon to o friend, the McNutt letter stonds as o deor stctement of a need besetting Americo todoy.

## A letter from Paul V. Manutt

Dear Dr. Bryan:
Siuce retarning from my recent visit to Indiana, I bave been shinking about our conversation on the attitude of the American people tonvard national defense.
I share your deep concern over the persistent efforts of a small group to cast discredit ou the Government's
program and the apparent apathy of large numbers of our comntrymen toward the crisis.
The soleratiou of opposition, even in the face of grave danger is, of course, the very essence of democracy. The insistent exercise of the right of opposition at such times, however, is a complete misconception of the duries of democratic cirizenship and one which may lead to tragic consequences.
There was a time wben Ansericans bad the choice of adopting any policy wbich seemed best roward the Nazi revolution. With the swift developments in world affairs, it became necessary to determine that policy as a basis for the many decisions which the Governnueut was called upon to make. When Europe was plunged into war, the time came for as to make "p our minds whether Hitler was a tbreat to our own security. We had to decide whether to take sides in the
struggle or whetber we could afford to remain, so far as passible, strictly uentral.

That was she sime for proper discussion of the merits of the war and the relative risks to us in keeping entirely out of the coutroversy, allowing cvents to shape their

## MCNUTT'S LETTER (continued)

course, or in throwing the weight of our resources into the struggle in an effort to determine its outcome.

## But that question bas now been decided.

The national policy is set; she course fixed. It was determined in the traditional democratic way. It was debated in and out of Congress, discussed in every American bome. It was threshed out in the newspapers, the pulpits, the radio, on the soap boxes and around the cracker barrels. Everyone who had anything to say bad ample opportunity to say it. And no one went to jail for anything be said.

The American people themselves came to the conclusion that the success of Hitler and his Nazi army was incompatible with their security, and they bave pled ged the total resources of the nation to bis total defeat.
It seems to me, Doctor Bryan, that, with she national policy thus unalterably set, the Government now has the right to call upon everyone of its citizens to support that policy, whatever bis personal views.

A free government is a government of discnssion and deliberation rather than a government by edict. But there comes a time when the nation can discnss itself into complete national paralysis. Debate is appropriate before the decision is made to insare the wisest resnlt. Continued debate, after the decision is reached, can only succeed in making that decision ineffective. We should not confound freedom of speech with utter fatility of action. A democratic nation need not necessarily be an impotent one. It would be a tragic caricature of democratic processes if America, baving mude ber choice, should then fall into endless bickering over wbether to stand by that cboice or repudiate is.

For those who took a different view of the proper course for the Government to pursue, their duty seems now unmistakable. They must accept the people's decision. The citizen is not wiser than the nation.

Indiana's proud record in previous wars is flanked by two statues of Civil War soldiers. Each past threar to American unity has been immediately answered by Indiana's sons.

Private judgment, for purposes of national policy, must yield to collective wisdom. No American citizen can afford longer to argue the matter. Whether be endorsed it or not is now beside the question. He must get behind the national enterprise, for upon the success of that enterprise depends the safety and security of as all. Commitments properly made on behalf of the whule people cannot properly be resisted by any part of the people. On matters which vitally affect the common welfare, we are pledged, by the compact of democracy, to abide by the common judgment.

By shis of course I do not mean that we should give up free debate on day-to-day issues. Free speech is not only part of what we are fighting for but also the most efficient means of conducting the fight. But clearly there comes a time when it is no longer permissible to debate whether we are in the fight at all. And on this great issue the only choice that confronts any individual now is whether be chooses to support our effort or to sabotage it.

I recall bow, as a student, I was deeply impressed, Doctor Bryan, with your own rich philosophy of the democratic process and the obligations of those who are fortunate enough to live under it. It is only on the basis of mutual assistance and cooperation that a society such as ours can survive. It is sometimes necessary to sacrifice a small truth for a larger one; to give up the individual sense of rigbt for that which prevails in the community. And, if she faith by which we live is gaod, the opinions and judgments of the people will be right. They are truth, as it is given men to know the trath.

I believe, too, that you are right in thinking that we are all inclined to take for granted the blessings of liberty. We bave always been free and it is difficult for us to consider seriously the possible loss of that freedom. We are consumed with the little things of life-the good little things of a goad life. Men can become so en-

## McNUTT'S LETTER (continuee)

grassed in making a living that they forget the necessity of protecting life itself.

Although we bave seen it bappen before our very eyes, we forget bow bistory can repeat-repeat, sometimes in ironic and wgly patterns. I am told that when the Nazi units rolled down the streets of Paris and took over the city, Frenchmen kept their seats at the sidewalk cafes, ordering anotber battle of wine. Anotber glass of wine and a bizarre joke wbile their country died!' Adolf Hitler must bave felt confirmed in bis judgment on the decadence of democracy as a political vebicle.

Even in all-out America, our efforts to meet the Naxi menace are still oblique. Unconcern has not entively given way to ceaseless and determined effort. Tbere are yet voices which assure us that the danger is fancied, the threat unreal. There are still a few among us who feel that the decision of the overwbelming number of their countrymen is not binding zpon them, who seek to raise again the question of what the national course sbould bave been. Tbere are still men who do not know that indecision is the one excuse which bistory and posterity will not accept.
And while all this is going on, the bands of the clock are moving swiftly. It is growing late-much later than we think. The American people must become at once aroused and sensitive to the rapid movement of time. They must be brougbt to immediate realization of the tragic danger of disunity and indecision. They must realize that, baving decided wisely, they must now act with decision.

I am bopefal, Doctor Bryan, as I know you are, that the indications of apathy and indifference, visible bere and there among owr people, may soon disappear. This nation is the heir of a noble past and the beir apparent of a glorious future. By adbering with rigid determination to the course we bave cbosen, we can realize that destiny. We will not fail. Out of our own bearts will come the surging flood of patriotic devotion that will enable us to formulate the will and determination to keep our country clean and free. We bave decided not to yield to the forces of evil. Come what may, we will not yield.

At Indiana McNutt played ball, won Phi Bete, dominated campus life and politics.

McNutt's bust now adorns a pedestal in the Union Building at Indiana University.

## "No woman ever said what I said to Jim..."

ANN: What was it?

SUE: He was blacked out for about a minute...but I put on his disgusting old hat...like this. He got the point, all right!
ANN: It certainly is a nerve-shattering hat! And my husband is being ruined by one just like it.

SUE: Here's what I said... I said, "Jim, I'm spending too much money on my clothes. From now on, I'm spending less, and you are spending more."

ANN: Was he unconscious long?

ANN: Jim, you look wonderful...very handsome hat you have there. It gives me ideas about my own hero. JIM: Sue has good hunches sometimes. And from now on, no wife of mine is going to be ashamed of my looks, if I have to break every bone in her budget!

## The STETSON Playboy, ${ }^{5} 5$

Low, wide and swagger - with smart functional beauty - the first Packard Clipper was a sensation overnight! Prominent style-mark: Sjeed-lined "Fade-away" fenders, first featured by P'ackard. For 1912, Clipper styling is yours in even the lowest-prieed Paekards!

## your gholee of angelits

## $\begin{array}{lll}15 & 1 \\ 1 & 1 & 1 \\ 0\end{array}$

Choose your horsepower - for 1942 - on the same wheclhase-you ean have either a Clipper Six ( 105 II. P.) or an Eight ( 125 II. P.). Difference in price: only \$55. Both motors are thrifty, fiery, precisionbuilt marvels.

## ELETROMATC DRIVE

 gIMPlifile orivig with Ho Jtak No silp № CriEPSave gas, oil, and engine wear with Packard's sensational Electromatie Drive. Eliminates clutchpedal operation ....banishes wastefu! "slip".... reduces engine speed by $27.8 \%$. An "extra"-but delighted owners say, "It pays for itself!"

## For 1942, new Clipper styling - it

STUNNING NEW CLIPPERS JOIN FLEET - Above is shown the smart, new-styled 1942 Packard Six Club Sedan. Both Clipper Six and Eight are available as either Special or Custom models and in three distinguished body styles.

Beauty that pays off in dollars - The Clipper's super-slipstreamed design results in important gas economy! Precision meters prove the 1942 Clipper tops even last year's gas-thrifty Packard by as much as $18 \%$ more miles per gallon!

Pedometers tell the story of the low-slung Clipper's "eradled" ride. Sensitive shoek-recording meters show that on rough testing-roads the Clipper is at least $29 \%$ smoother-riding than its predecessor, a car famous for its Air-Glide ride.

You may have to keep your new car a long time. Will it see you through? Yes-if it's a Packard. Typieal reason for long life: Clipper uses 44 ball and roller bearings (instead of far less costly bushings) -more than any competitive car.

# even the lowest-prieed Pakkards! 

A FEW SHORT MONTHS AGO, Paekard raised the eurtain on a daring, brand-new kind of car . . . the Clipper . . . and the whole country joined in a roar of applause.

Today Packard brings two new versions of this sensationally-successful Clipper styling to every priee class in the 1942 Packard line. Now, not only the more expensive Packards, but even the lowest-priced Packards, are stunning, super-streamlined Clippers!

## Beauty that works for you!

These magnificent new Clippers, even more than before, recognize that beauty, to be keyed to the times, must be functional-must contribnte to economy, long life, and comfort.

For example, the Clipper's flight-lined styling not only aehieves dazzling new beauty, but euts down air resistance to an almost unbelievable extent. Result: Tests condueted with scientific accuraey prove that these brilliant new 1942 Clippers knife through the air with an aetual improvement in gasoline savings of $12 \%$ to $18 \%$ over even last year's thrift-champion Packards!

## Dozens of dividends!

In addition to fuel savings, Clipper functional design pays welcome dividends in many more ways.

These dividends are yours in the form of $26 \%$ better visibility through the Clipper's wider, deeper, sharply-raked windshicld . . . easier, safer handling-evidenced by $24 \%$ steadier "wind-stecring" ... $20 \%$ more quict inside the car -for Clipper streamlining hushes the wind . . . a $14 \%$ step-up in
acceleration-to give you the security of always having a lightning burst of passing speed on tap.

## More power reserve!

And by cutting wind drag as it docs, Clipper design combines with improved engine efficieney to provide sparkling performance with a gain in power reserve of $32 \%$ ! This means less engine strain on hillssmoother operation at all times.

And for the man who buys a ear today, the Clipper offers something else-even more important . . .

## Built for the "long haul"

When you buy a Packard Clipper you know you have a car that's precision-built for lasting durability . . . with nothing skimped, no "substitutions" that impair quality . . . a car that will give you extra milcs and extra years of service, long after ordinary ears have worn out-in looks and fact !

So drop aronnd today or tomorrow to yonr nearest Packard dealer's. Skipper a Clipper just oneeand you'll want to skipper one for keeps!

## CLIPPER DIGEST FOR '42

Here's a quick review of still other high-spots you'll find in the new 1942 Clippers . . .

- Nearly a foot wider than high
- Full headroom front and rear
- Integral "Fade-away" fenderi
- Even wider doors
- Phenomenal handling ease
- Wide-angle vision

## "THE MORE I LEARN ABOUT NUTRITION, the more Ivalue Mucoa!"

"COOKING WITH NUCOA adds Vita= min A and gives foods that just right taste which only a delieious spread for bread can give," Mrs. Hendley rejoices. "And NUCOA is niee to handle-creams casily for cake mixtures and uneooked frostings . . . doesn't spatter when you fry with it ...seasons vegetables deliciously."

MORE THAN 9,000 VITAMIN A UNITS are puaranteed in every telicious pound of NCCOA. This makes NLCOA a good "protective Vitamin A" food-and it is just one of the ways in which this truly Moderu Margarine (the first to add Vitamin A) differs from old-time oleomargarines. NLCOA is made with pure tegetable oils churned in fresh pasteurized skim milk-botb produets of American farms. No wonder NUCOA is so nutritious . . . so delieiously rieh in flavor and texture . . . so digestible!

We ewsh to thanh Mr. and Mrs. Iferudley for aelcoming us so courtevusly into their home to take these informal "candid camera" pictures. The Best Foods, Inc.
"I often think how fortunate we modern mothers are to have this MODERN MARGARINE which furnishes, at such low cost, so much appetizing flavor and rich food-energy... as well as precious, protective VITAMIN A!"

the radiant vitality of these bandsome young Hendleye is a trihute to their mother's judgment in matters of diet. "Like all growing ehildren, they need lots of energy -replacement foods," she says. And what a comfort it is to ber that delicious NUCOA, which saves so much money on the weekly food bills, furnishes as mueh food-energy as the most expensive spread for bread3300 food-onergy calories in every pound!

## glaucoma

EARLY DIAGNOSIS CAN CURB bigGest enemy of eyesight
flaueoma, biggest euemy of U. S. eyesight, is one $\mathbf{U}_{\text {disease that can be curbed by publicity. From glau- }}$ eoma, 20,000 U. S. eitizens are totally blind; 100,000 more have lost the sight of one eye. In glaneoma, through increased pressure of fluids within the eyeball, the retina is progressively destroyed and the field of vision narrowed until the optic nerve itself blaeks out. This may happen swiftly or slowly. The symptoms in a disastrous number of cases are so bard to deteet that they go unnotieed until it is too late. Eye physieians are sure that glancoma can be enrbed if only doetors and their patients will look for it.
Pressure in the eyehall is measured by the simple,
painless proeedure whieh is shown at elose range above. The instrument, a tonometer, measures pressure by measuring the tension of the coruca. A normal cornea is soft as a fingertip. An acntely glaucomatous eornea is as hard as a fingernail. Elevated pressure is by no means a positive diaguosis, but it is a statistieal certainty that a large number of cases conld be deteeted early if the procedure were made a part of every rontine physieal examination. The treatment of glancoma is similar to that for high blood pressure, avoidanee of nervous and plysical tension and, if neeessary, certain drugs and a surgical operation. But to be most effertive, treatment innst be begun in time.

A normal field of vision is what the young man in the fore ground mee, will his cyee fixated nn the forechend of the man
satated across the table, he is able to sse all but the darkly sharled aren of the room. The unshaded orea he ser. with
both his cyes. The lightly shaded areas at the right and left are in the side vision of tia right and left eyes respectively.

## NARROWING OF FIELD OF VISION

## GOES UNNOTICED AT THE START

The first stage of blindness it ghaneoma goes unnoticed becanse it begins in the onter edgex of the field of vision. The symptoms of glateona-headaches, eye pain. mistiness of vision and seeing colored halos aromud lights-are often mild and trausitory. With no dimming of perception at its center, the field of vision is gradually narrowed until the optie nerve is clestroyed and sight is blotted ont entirely.
The field of normal binocular vision, as shown in the pieture alove and in the diagrams below, extends
through a full $180^{\circ}$ half circle from left to right and is limited above and below only by the facial prominences of brow and cheek. Bnt the eye sees sharply only the small central area of this field that ean register on the tiny region of the retina, called the macula. which lics directly behind the pupil. Last to be affected by glancoma, central vision may remain unafferted to the end.

All objects in the field of vision not scanned by the natenla are pereeived only indistinetly. Thongh indistinct, perception in the onter edges of the fickd of vision is important in establishing a person's orientation in space. Peripheral field destruction may go unnotieed because of the many compensations that can be made for its loss. Even when glaucoma is suspected, precisiou instruments are required for accurate plot-
ting of the fields of vision. In cases on record, glancoma has narrowed vision to a tube enclosing only central vision withont alarm or awareness on its vietims part.
The mechanism, if not the canse, of plaucona is well understoon. The fluids that fill the chambers of the eyehall are secreted from the blendstream and drained ont again into general eirculation through tiny eanals around the iris. In glancoma these canals gradually become shat off, with cousequent elevation of fluid pressure within the eyelsall. This pressure in turn shuts off the circulation of blood in the eapillary system that nourishes the tissues of the retina. First in its outer edges und then concentrically to the macula, the retina atrophics. Frually before blindnens encroaches on this enicial area of central vision, the optic nerve itself atrophies with irretrievalle loss of sight.

Chart of field of vision shows arems seen by each eye In the central bimocular vision area, the fiekls overhup

Top view of field shows bow nose blocks left and right sides of right and left eye fields. Note how nasal margin of right cye crosses lamp us in diagram ahove.

Side view of field shows how it is narrowed by cheeks and lrow. The hump is invisible, as iu diagram above.

## glaucomatous vision

Narrowed by glaucoma, the side vision boundaries of right and left eyes have uoved forward into the room, eutting off only the back wall, exeludes the electrie fan on the sidewall.

Diagnosis of glaucoma includes messurement of side or peripheral vision by the perimeter, as above. Limits of field, plotted on chart in center, give aceurate picture of damage to retina.

Pin poiats of light are switched on one by one around arc of perimeter until one is invinible to patient, thus establishing side limit of field of vision. Patient fixes eyes on light in center.

MOST FAMOUS IS FATHER'S LAST PORTRAIT, "LAOY JEAN" (AT 9)

As the camera sees her, Jean Bellows is a Irank, humorous wornan of 47 with vast nervous energy, a goorl brain and a fine flair for clowning. Here she aets in summer stock theater at Ivoryton, Conn.

## THE PORTRAITS OF GEORGE BELLOWS' DAUGHTER

Jan Bellows, younger daughter of the Jate great Painter George Bellows, is the subject of more first-class portraits than any other living hmman in America. Bellows himself discovered Jean first at the age of one (see belore). She seemed to have the ability to keep her feelings up on the front of her face, even as she grew older. She was always very merry or very wistful or very grave. She was so good that Bellows' great friends, Eugene Speicher and John Carroll, began paintiug her too. Her portraits are shown in color on the following pages.
George Bellows is dead and lis portraits hang on various walls. But his daughter Jean is magnificently alive.

Since she was 4, she has been an actress, first at the King-Coit School in New York, then at the Lenox Achool, where she especially disliked history and science. She is small and trim and talkative. She has appeared in three plays on Broadway and this summer acted $a$ hoydenish servant in The P'urxuit of Happiness in Ivoryton Conn. She has an amazingly mobile face, looking sometimes like Aline MacMahon, sometimes like Wendy Hiller. She is a natural comedienne and a first-rate actress,

Jean refuses to prefer any of her portraits, exeept for the one when she was 8 years old, saying, "If I chose Speicher, Carroll would never speak to me again."

One year-old Ican with Blue Book and Apple was painted by George Bellows in Maine in mid-1916.

Two-year-ald dean with a Doll was paintel by George Bellows in Carmel, Calif. in 1917. Jean does not remember this sitting at all.

Eight-year-old Jean in Pink Dreas is her Tavorite and her property. Her mother was reading her Black Beauty aud she cried.

WJEAN IN BLUE" BY EUGENE SPEICHER SHOWS JEAN AT 25 LAST SUMMER WEARING BMIDESMAID'S DRESS SHE WORE AT THE WEDDING OF HER SISTER, ANNE
"Elinor, Jean and Anna," by Jean's father, George Bellowz, shows Jean between her graudmother, Anna Bellows, and Great Aunt (left). These two laclies were daughters of a sea captain.
"Emma and her Children," by George Bellows, shows dean at 8 before her hair turned dark. She sits on her mother's lap by sister, Anne. Painting is owned by Boston Museum.

"Portrait of Jean Beilows" is second study of Jean thut Speicher painted last summer He did No. \& becanse he especially admired striped party dresk Jean designed herself.

"Jean" waw also painted last summer by John Carroll, an old friend of Jean's father. Posing for Speicher was harder than for Carroll, who worked more from imagination, let her walk around and talk.

UEAN" IN PINK ORGANDY IS ANOTHER CARRQLL PORTRAIT OONE AT SAME TIME AS THE ONE ABOVE. JEAN LIKES THIS OREAMY POSE, SAYSI "IT HAS THE QUALITY OF ME"

New! Revolutionary! This amazing General Electric Double-Purpose iron is the greatest contribution to easier, better ironing since the invention of the eiectric iron itself!

$\mathrm{H}^{\text {FRE'S a Double-Purpose Iron that }}$ $\mathrm{H}_{\text {does all your ordinary ironing to }}$ perfection, and in addition irons all those things you never dared tonch with an iron beforel You can change from dry ironing to steam ironing in one second-and back again just as fast!
For steam ironing, the General Electric Aluron gives you for the first time, controlled steam. Ready in 2 minutes! You can "dial" the steam as well as the fabric! You just tilt the iron hack on the handy heel rest, and steaming stops automati-
cally. And when you want to iron without steam, you just turn the steam off!
For dry ironing, this light, easy-toguide, streamlined beauty brings you the famous G-E "Dial-the-Fabric" and all the other improvements that have made the other improvements that have made the
General Electric, America's Favorite Iron. General Electric, Americas Favorite iron.
Never hefore could you do all your ironing and pressing so fast, so well, so easily. So if you want to save time and workplus money on pressing and cleaning hills-see the G-E Aluron at your dealer's. Two irons in one-yet priced at only $\$ 14.95$ !

Reformatory grounds look more like a college campus. The buildings are called cottages, the inmates are generally referred to as "the girls." Their average sge is 19 and most of them
are classified as wayward rainors, a term that covers a multitude of sins from moral turpitude to shoplifting. Rollerskating around the Hagpole is part of the daily sports program.

Superintendent Henriefta Additon took charge of Westield 18 months ago, has earned the prisoners' affection and respect by her policy of humare treatment, firm but friendly guidance.

Prison grounds are enelosed only by high fence topped with barbed wire. Though escape would be comparatively easy, there has been but one in the last three years. Here prisonens sun themselves.

Prison cafeteria is entirely serviced by inmates. Food is plain but good though women sometimes suffer from fumbling efforts of newcomers who can't yet cook meathalls without burning them.

Reformatory hospital houses babies born in the prison, most of them illegitimate. The 31 babies there now are entirely earel for by their mothers who thus learn to be ehildren's nurses,

Babies who die in prison are buried in cemetery outside the gates. Others are usually kept by mothers who bring them up after they leave prison. A minority are given out for adoption.

Vigilant matron wateles as softball game goes on in baekground. Only male guards are stationed mutside fenee, carry no guns, are not allowed to lay hands on the women.

Visiting team from a neighboring town plays the prison sorthall team (called "Hill") and loses. Games, like Saturday night movies, are privileges forfeited by mishehavior.

STEP 1. Composition is asalined with transparont china ink on whits gesse grownd.

STEP 2. Gesse ground is covered with lightly painted colors in egg tempera.

STEP 3. Oil varnish glazes are painted orer tempera colors, wbile de. tails are also painted.

STEP 4. Final enricbing glazes with fall delaril painting completes the picture.

## HIDDEN IN A BRUEGHEL MASTERPIECE

 - the key to this whiskey's rave flavor!

This treasured canvas, "The Fall of Icatus," was painted over $3^{88}$ years ago! Brueghel's distinctive technique in blending his colors to perfection is recreated for you in the master's own style by Georges Schreiber, well known contemporary artist. Brueghel's superb technique is the key to another masterpiece-Fine Arts Whiskey. For Fine Arts is an original blend of superlative straight whiskicseach 5 years old; cach unsurpassed. Together, they achieve the whiskey blend of perfection!

COFR, 1641, CANADA ORY GINGER ALE, INC,

## FINE ARTS

Women's Prison (ontinued)
 The Gold TNedal Wristrey

In Beauty School, the reformatory girls learn to give shampoos, waves, manicures. Though prison women may not work here, they get weekly beauty treatments, are

Classes in typing and ntenography are held in the prison's libeary. Here also the inmates listen to visiting lecturers on eurrent events, sit together to knit for Britain.

encouraged to keep well-groomed. Here, inmates in chairs wear their printed recreation dresses, student operators wear white coats over regulation plain cotton garb.

Farm Work is an important part of reformatory's program. On 85 -acre farm outside grounds, girls help raise pigs, chickens and vegetables for institution's consumption.

WHERE YOU SEE THE FAMOUS "Kicks"
There you see America's best-dressed men . . . and Portage Shoes - the high score in smartness for stadium, street or business wear. Portage is "first-team" quality. You'll wonder how it's done, at Portage prices. Get into a huddle with the nearby Portage dealer ... or write us for his name. PORTAGE SHOE MFG. CO., Milwaukee, Wisconsin

Church services are held every Sunday for Catholies, Protestants, Christian Scientists and Jews, Many wonen who never went to church turn to religion while in jail.

Segregation is the prison's worst punishment. Intractable cases are isolnted in cell furnished only with a bed, given decent food but nothing to do until they repents

## "MY FIRST COLUMBIA RECORDS -

## 'DAUGHTER OF THE REGIMENT'-HOW LIFELIKE THEY ARE!"'

" ${ }^{\prime}$OW, for the first time, I hear my own voice on Columbia Masterworks. In my new recording I sing 'The Daughter of the Regiment'-and it is like magic. So real, so true to life, so clear!
"When I listen to my good friends of the Metropolitan on Columbia records, I feel as though I am standing by their sides on the stage! Have you heard Salvatore Baccaloni, Lotte Lehmann? Such rich tone-is it not so?
"As it is with my beloved opera, so it is with symphonies and instrumental works. That same dazzling clarity! These Columbia Masterworks are indeed great music. Bravo, Columbia!"

## FULL-DIMENSIONAL TONE IS HEREI

Here's the secret of that rich tone Miss Pons applauds in Columbia records. A new Columbia process eliminates at least $55.3 \%$ of the surface noise. (These measurements were taken by the head of an independent, non-
commercial communications laboratory.) Thus Columbia alone makes it possible to turn up the tone control of your machine and play Columbia Masterworks with con-cert-hall realism . . . bringing you all the lovely, "highfrequency" overtones essential to complete tonal beauty.

No more need to blot out those exquisitely rich overtones in order to blot out objectionable surface noise! No more flat, lifeless "one-dimensional" tone!

## LAMINATION REDUCES SURFACE NOISE $55.3 \%$

This exclusive new Columbia process applies a layer of fine sensitized material on the sound surface . . . material which would be prohibitively expensive in ordinary solidstock records. The result-a brilliance of tone never before achieved . . . at least $55.3 \%$ less surface noise.

Test it! Listen to the new Columbia Masterworks. Then play any regular old-method record at the same tone level. Listen to the difference!

## SINCE THE DAY OF' TA-RA-RA-BOOM-DEAY

## Youn Taste, boo, han changel!

## FIRST NGHI' 90

They liked things heavy way back then. Remember those ponderous jokes?

Heavy performers, too. Didn't they call one of their favorite troupes the "Beef Trust"?

They liked to go to the theatre dressed in heavy broadcloth evening clothes, festooned with heavy gold chains, fobs, and seals.
And then between the acts-and between puffs of heavy black cigars-they toasted the show in bumpers of heavy, heady whiskey. But that heavy potion was the only kind of bottled-in-bond whiskey that could be produced by old-style methods.

Can you imagine yourself sitting through a show of the vintage of '90?
Or wearing clothes like those-except at a masquerade?
Or drinking one of those old-style, heavy, heady potions between the acts? Of course not!

That's why you Signal for Signet! It's as tuned to your tastes as a streamlined revue. As different from Grandad's whiskey as all your tastes are from his.

The first bonded whiskey of its kind. Light-bodied as Scotch. Rich, but light! So...next time say, "Where's Signet?" before you say, "Here's how!"

Copr. 1941

## A whiskey as distinctive as your Siqneture

delightfully light ... because it's aged in aged wood
Signet is distilled for lightness. It is then aged in charred casks that have been pre-mellowed by repeated prior use. Scotch and Canadian whiskies and the rarest French brandies are also aged in casks that have been thus pre-mellowed

Hiram Walker

Bover tells olivia ne mas rut his motnerts weooina ring on her finger

TNE RING stony is a FAKE, BUT OLIVIA, A U. S. schoolmarm, is swept away

## MOVIE OF THE WEEK:

Boyer makes love to a schoolmarm

Hold Bark The Daren is a long, quiet, competent If movie that would pass without a ripple, were it not for one ingredient. That ingredient is cinema's No. 1 love-maker. Charles Boyer, this time making love to a nice American girl. And that ingredient alone will suffice to turn Hold Back The Darrn into top-drawer box-oflice for Paramomt Pictures.
On this page you see Charles Boyer's big seene in whieh, taking Olivia de Havilland in his arms, he whispers love words into her ear. "I have been watching your face," he murmurs, "learuing it like a poem." Other romantic phrases, nttered in a low,
accented voice, are sometimes hard to cateh. But millions of U. S. women will sit forward on the edge of their theater seats as he flashes at Oliviat his wistful Gallic smile and opens wide on her his famous "bedroom cyes."

The setting for this exhibition is a story of European refugees who haddle patiently in a Mexiean border town till, as qnota immigrants, they can pass through wire gates into the laven of America. Somewhat painful and fragmentary when dealing with these unhappy folk, Hold Back The Dawn comes brilliantly to life when Boyer meets De Ilavilland.

soyenz "we ane like two trains halted for a moment at the same station"

WHEN BOYER MAKES CINEMA LOVE, FEW WOMEN CAN RESHS HIS LOVELORN LOOK
 appears on Director Mitchell Leisen's movie set to offer his story for 8500 .

An auto collision gets his story really started. The school bus is driven by a E.S. teacher visiting the Mexican town where Boyer waits for a visa.

A hasty marriage by a Mexicun judge gives Boyer the papers he needs to get
his visa. The school teacher returns to her California home to wait for him

The other woman in Boycr's life leclps him write a letter to the immigration officials. Once in the U. S., Boyer phans quickly to cast his new wife off.

A honeymoon trip brings Boyer and the teacher to a fiesta ina Mexican village. They kneel in the church and are blessed in English by village priest.

Their bridal suite is the school bas under open sky. But Boyer has hegun olove his wifc. He feignsa wrenehed shoukler tosend her home untouched.

The bitter truth of Boycr's scheme to abandon her in the I'. S. is blurted out by the other woman to the wife. Broken-hearted, the teacher paeks.

Cake-Baking Revolutionized You've been making cakes just as your mother made them-and her mother beforeher. And then-suddenly-you discover that cake-baking has been nevolutionized! That's what Presto Cake Flour has done.
It's so speedy you can stir up a cake while getting dinner. It's so sure you can scarcely turn out anything less than a "championship" cake.

Lighter, Higher Cakes
Here are the three reasons why Presto Cake Flour is better for cake-baking than old-style cake flour: (1) A tinely milled flour from special wheat very fine, very soft. (2) The baking powder and salt arealreadyadded-measured in just the right proportions - scientifically. (3) Flour, baking powder and salt are then sifted together again and again-more thoroughly than you could possibly do it yourself.
This scientific sifting isn't done just to save you bother. In actual tests it makes higher, lighter cakes than the very same ingredients, in
the very same proportion, sifted together in your kitchen.
With this flour you simply can't use the wrong kind or wrong amount of baking powder. (Most common causes of baking failure.) You just can't forget baking powder or salt-or mix them insufficiently becatuse Presto already bas bating pouder and sals measured and blended in.
Y'ou'll see the beautiful results in this Chintz Cake-so easy to make .. . and in all such things as muffins, waffles and biscuits. Presto-a premium quality flour at everyday prices. Buy a package today.

Who said waftles are hard to make? Not with Presto -the speedy, fatl-proof cake flour! The tricky measuring, the tedtous sifung ate altendy done for you. Relipe on the Pesto box.

WEAR A HAT INSTEAD OF YOUR HAIR IS THE NEW FALL SLOGAN

In the peremnial battle of hat vs. hair, the hat faction has the advantage as the $1941-42$ season opens. Throughont the spring and summer, hair was more in evidence than hat. Everyone, from youngsters to old women, wore glorified skull caps, mere apologics for hats, with hair all ont-front, side and back. The hairdressers loved it. Hats which expose much hair usually mean frequent grooming sessions at bcauty parlors.

As the fall fashion season opens, hats have done a
complete about-faee. Instead of the high-perched peewee or beanie crowns which had to be anchored with elastics, bobby pins or hat pins, the new hats sit on the head, stay put without benefit of gadgets. They have crowns made to fit the head. Some, like the eloche or beret (see page following) cover only part of the hair. Others with snoods, ruffled petticoat backs or wimple, like the one above, cover all but a wisp. The most spectacular have decp back pouches into which shoul-der-fength hohs ean he tueked, pillowease fashion.

## WESTERNS COLLEGIATE

New type dentifrice with cleansing power proved by amazing Electric Eye cleans teeth, gums, the whole mouth safely, thoroughly, quickly, pleasantly!

Clean teeth are only a start toward whole mouth cleanlincss. Any good dentifrice will clean teeth. But whole mouth hygiene calls for an entirely new type dentifrice-one that's basically different from all others. Such a dentifrice has been developed by the makers of Dr. West's famous Miracle-Tuft Toothbrush. It's Dr. West's Vray! The dentifrice with tooth-cleansing power proved by the infallible Electric Eye.
Vray even tooks different. And it is! Not a liquid, not a paste, not a powder . . . Vray combines, among other refined cleansing and polishing materials, three patented ingredients. One with a remarkable faculty for quick penetration between the teeth and into the mouth crevices. The others for their surging, foaming cleansing action.
Vroy cleans differently, toot The genale action of a toothbrush releases its
vigorous cleansing power. Millions of tiny bubbles surge over, around and between the teeth, the tongue and other mouth tissue. This powerful cleansing force sweeps food particles before it, loosens and floats away surface stains and discolorations, bathes and sweetens the whole mouth.
Your druggist invites you to try Vray, a full-size bottle of it containing 231 brushings, on a satisfaction or money back basis. You've every thing to gainwhole mouth hygiene ... brighter, lovelier teeth . . . a winning smile.

HOW VRAY CLEANS: Vroy's surging, cleonsing action cleons the whole mouth. See booklet pocked with every bottie for this whols amazing story.

Electric Eye Test Proves Vray Makes Teeth Startlingly Brighter After a Single Brushing

- In scientifically-controlled cases, the Electric Eye, a super-sensitive photoeleciric instrument used in measuring the whiteness of paper, has been able to delermine the true cleansing power of this new dentifrice. In case after case tested, teeth neglected or ineffectively cleaned have been made startlingly brighter, after only one brushing with Dr. West's Vray.

SOUTH DAKOTA

ITS BOUNDLESS PLAINS ARE THE HEART OF A CONTINENT

The calm immensity of mid-America is snperbly recorded in the photo1 graph at left, taken by LIFE Photographer Eliot Elisofon from the top of Snake Butte, near Pierre, the capital of South Dakota. Here, more than 1,000 miles from any ocean, the vast land sea of the prairie spreads endlessly in every direetion. On this spot proud South Dakotans have erected a plain stone obelisk (below) to mark the geographieal center of their State and "the approximate eenter of North Aneriea."

It is less than 70 years since the first wagon trains of white settlers erawled aeross these treeless plains. The prairie sun in summer and blinding winter blizzards were greater obstacles than monntains and rivers. So were the Sioux, fiercest of the western Indians. The Dakota Sioux wiped out Custer in Montana in 1876, and fonght the last Indian battle with U.S. troops at Wounded Knee Creek, S. Dak. in 1890. Today a tenth of Sonth Dakota's $50,000,000$ aeres is still Indian land.

During the drought disaster years of 1933-86, the prairie winds blew thousands of tons of soil off South Dakota's plains. Pessimists said the stripped land would never recover. But sinee then healing rains have fallen, and millions of once-barren acres in both the U. S. and Canada are now being reclaimed hy erested wheat grass, developed by South Dakota's great seientist, Niels Ebbesen Hansen of Brookings (see p, 10s). Crested wheat grass is excellent forage, needs little moisture, drives ont Russian thistles within two years. In sueh hardy grasses, and a shift to beef and mutton instead of wheat and corn, lies a great new agrieultural future for the American plains.

Sonth Dakotans know their big, rectangular chunk of the IV. S. map is one and a half times as large as England, that some of their counties are bigger than Rhode Island or Delaware. Tbey boast that the hish bottoms of their Sioux River are "more fertile than the valley of the Nile," that their mineral-studded mountains are "the ricbest hundred square miles in the world," that their Bad Lands look like Heaven and Hell (see pp. 104-105), that their Black Hills were lofty peaks when "the site of the IImalayas was still a marsh." In the banks of their Missonri River, says tbeir governor, is enough manganese "to supply the steel mills of America for the next hundred years." (It is low-grade undeveloped ore.)

But with all these glories, the biggest natural faet about South Dakota is still the windswept prairie. Rarely eomfortable, often eruel, the prairie is never monotonous, In summer it smolders in a dusty haze, roads shrivel against the far horizon, the landscape is banded with smoky brown and gold and green. In winter iron winds swoop down from the heavens. Temperatures on the prairie range from $46^{\circ}$ below to $115^{\circ}$ above. Sometimes grasshoppers darken the sky, sometimes it is dust, or hailstones big as baseballs and hard enough to dent the top of a steel automobile. But such things are easily forgotten on a midsummer evening, just before a thunderstorm, when lightning splits the sky and the air is filled with the breath of the prairie, fresh and strong and clean as the smell of a new broom. Then the prairic and the men who live on it pause and wait, tensely, happily, for the blessing that only the sky ean give tbem-rain.

Fence and barbed wire protects Center Monument from souvenir chippers.

## "BACK EAST:" CITIES AND CORN

South Dakota is big enough to have an East nad a Weat of its own. Most of its cities are "Baek Kast," in the agricultural valleys of the Sioux and Janes rivers, whieh was the
earliest settlesh aren of the Stute. The biggest nad most effete is Sionx Falls ( $\mu$ op, 42.000), whose John Morrell \& Co. packing plant (abore), employing 2,300 , is State's largest.

## "OUT WEST:" MOUNTAINS AND COWS

The West begins at the Missouri River, whieh euts the State in two. West of the river is great cattle country whero thousunds of Texas yearlings come to fatten on brown but
succulent buffalo grass. When the Pierre, Rapid City and North-Western Railway wasopened in 1907, cattlemen nicknamed it the "Plenty of Rough Country and No Water."

This fich field of August corn is in the Big Sionx Valley just north of Sioux Palls-a eountryside much like neighboring Iowa. It will yiek 70 to 80 bishels an acre despite n tate summer dry

The sluggish, yellow Gfand Rivef waters the big cow county of Perkins, on the North Dakota border. Years ago thousauds of buffaloes perished on its banks in an unexplained manner. Their

spell. Sioux Valley farmers pay the best agricultural wages in the West- 83 a day and up. In this end of the State an average stock raiser may inventory 830,060 in eattle and sheep at one time.

The East, to0, is flat, as tlis aerial photograph shows. The State pays a hounty of 85 an acte for farm land planted in trees, but even in the river valleys of the East it takes
much care and cultivation to grow shelter belts like those in the picture ahove. On the prairie it is nlmost impossible. Note, in center, ehaff spurting from a threshing rig.

crumbling, unfossilized boneslie exposed in a $20-\mathrm{ft}$. deposit in the cactus-dotted bluff in foreground. In 1989 tons of the bones were dug out and shipped abroad, reputedly to Nazi chemical plants.

## South Dakota's Black Hills are not hills at nll, hut a pictur-

 esque range of mountains covered with ponderosa pines, They include Ilarney Peak, highest east of the Rockics$(7,244 \mathrm{ft})$, which can be seen in distant background of view above. The bills are among the world's oldest mountains and geologists are not certain they have stopped rising yet.

## SOUTH DAKOTA (maniuses)

GOLD AND TOURISTS MAKE BLACK HILLS AN EXCITING PLACE

To most Easterners the Black Hills are an obscure 1 resort where Calvin Coolidge went in 1927 and said "I do not choose to run." Actnally "the Hills" are one of the tiveliest entertainment areas in the U.S. Long cherished by the Sioux as a hunting ground, they were grabbed by whites after the discovery of gold in 1874. By 1876, 25, 000 people lived up and down Deadwood Gulch; famed characters like Wild Bill Hickok, Calamity Jane and Poker Alice walked the streets. Today most of the gold
mining is done by the giant Homestake Mining Co. in Lead (pronounced Leed).

But South Dakota's biggest gold mine today is its booming tourist trade (around $\$ 35,000,000$ in 1941). Most of its visitors are from the Midwest, one or two days drive from the Hills. They come to gape at Gutzon Borglum's mountain carvings (opposite), clamber through caves, look at buffaloes and gamble in wide-open Deadwood. They come for fun, strange sights and inspiration. In the Hills they get them all.

Cement Triceratops is mounted hy tourists in Dinosaur Park, overlooking Rapid City. Five sueh monsters, costing 825,000 , were huilt hy WPA. Rapid City is Black Hills metropolis.

The Needles are spires of Blaek Hills granite, pushed up from earth's iaterior eons ago. Erosion has worn them to shapes bearing names like Traffic Cop, Needle's Eye, the Mitten.

Wild Bill Hickok was murdered in Deadwood saloon Aug. q, 1876. Tourists lave mutilated his statue in local cemetery.

An lowa visitor rides stuffed horse at Black Hills roadstand. She was never on a live one. Price: $25 \phi$ for two snapshots.

Potato Creek Johnnie, oldtime prospector now living off Deadwood Chamber of Commeree, gets hair-do in local hotel.

Trial and crucifixion of Christ is enacted by Passion Players at Spearfish, in northern Hills. The compaay is directed by Josef Meier, seventh geacration Christus fron luenen, Germany.

Trial and acquittal of Jack McCall, who killed Wild Bill, is re-enacted during the summer by Deadwood citizens. McC'all was freed in 1876 by miners' court, was later hanged by US.

South Dakota's Bad Lands are one of the world's most remarkable sights. "A part of Hell with the fires burned out," (ieneral George A. Custer called thenl. Architect Frank 1, loyd Wright has written of them as "The land of pure line and evanescent color . . . an endless supernatural worht more spiritual than Earth." By day, when buzzards haunt their furrowed peaks (see opperito page), their chalky trabeations are banded in pallid eream, rose, orange and green.
Tuurints rarely venture into them late at night, when the unique photographs on this page were
taken. Then they area nightmare hand of crumbling temples, dead monuments, ghostly shapes and walls. Over then hroxds the unearthly beanty of utter desolation.
Some 800 square miles of the Bad Lands have been set aside as a national monument, 60 miles east of the Black Hills, with which they are sometimes ignorantly confused. Only eleven human beings manke their home in this area, hanling their drinking water from 60 miles away. The rest is given over to rabhits, rattlesuakex, birds of prey, and the wailing wind and coyotes.

Madsen was hofn in tiny "elaim slack" that looks like lean-toabove. The main homestead was added later. Madsen stands fifth from left in pieture of eight Madsen sons.

## THE FARMERS FIERCELY LOVE

Fifty years ago, when homesteaders were still breaking up the prairie sod In east-central South Dakota, Farmer George Madsen was a prairieborn youngster of 5 . Some of his father's neighbors, he recalls, made enough on their first crops to pay for their land, erect a set of buildings and put a nestegg in the lank. In those years the aboriginal soil yielded bumper crops of flax, wheat and barley. Then, in the great drought years of 1894 , 1911 and 1989-86, it blew away. Farner Madsen and his neighbors in lower Clark County, near Huron, have not had a good crop since 1927 . But Madsen is still optimistic. Farly this year he drove through Michigan, Indiana, Illinois and Wisconsin, seeing rich farms on every side. "Thes don't have anything we don't have here," he says, "if we conld only get the rain."

But the sun shines nearly every day in South Dakota. Most of the State's

Farmer Madsett dishes out a pail of oats, barley and water to 70 hungry pigs. Since this picture was taken, a violent windstorm blew down two of his buildings, killed several pigs,

## THEIR SUN-DRENCHED LAND

358,000 farm folk live on land as parched as Madsen's 570 acres. During the long hot summer days the soil pulverizes into a fine gray-blaek grit. Then, when rain does fall, it coagulates in a slippery black gumbo that can mire catthe and autos. This year the dry spell began in early June. In mid-July the grasshoppers arrived and finished off Madsen's corn (abore). They also ate half his oats, his vegetable garden and flowers, a lilac bush, two trees. But Madsen's chickens and pigs ate plenty of hoppers, and the Madsens cat the cbickens and pigs.
With all this Madsen will clear enough food and cash this ycar to keep his family of six and send his two sons to school and college. A big, bullet-headed, solid son of Danish immigrants, Madsen is not the worrying kind. "We don't squawk mueh," he says, "When we have a good year, we save our money; when we have a bad one, we keep quict. It ought to be better next year."

Madsen family sits down to Sunday dinner of fried chicken, potatoes, peas, cake. Lois, who is on this week's cover, is reaching for homemade bread. "We eat well." says Mr. Madsen.

Hoppers gnaw madly at Madsen fence posts and even barbed wire after eating everything green in barnyard. They also cat auto eushions, house curtains, rake handles and each other,

MWost of the Sonth Dakotans who appear on this page are pioneers or the children of pioneers. Many are older than their State (admitted in 1889). They have seen some fat years and many lean ones. Since 1926 they have watched South Dakota slip from third to 17 th place among the 48 States in per capitu wealth. They luve taken Federal aid (\$353,000,000 since 1938) because they had to, but they ure still stubborn individualists. They had their State Socialism fling during and after the last war, under the late Governor-Senator Peter Norbeck-and did not like it. Sonth Dakota is now "the most Repub-
lican State," outdoing even Maine and Vermont in the percentage of its vote for Willkie.

The great South Dakotan and great Westerner on the opposite page, George Edward ("Dad") Lemmon, was born at Bountiful, Utah, in 1857, began punching cows in Wyoming at 13. His right leg was broken eight times in falls but he went on to saddlehandle more cattle than any man who ever lived-up to 900 in a single day. Once he had the largest fenced pasture in the world ( $865,4291 / 2$ acres). In 1907 he staged a sale of prairie lots on North Dakota border and founded town of Lemmon, where he lives today.

Bullwhacker Frank Smith, 77, hauled gold bullion from Deadwood to Pierre inthe 1880's, is now head gardener of the State Capitol.

Publisher Charles Manley Day, 78, has seen his Sioux Falls Argus-Leader grow from 700 a day to $\mathbf{4 3 , 0 0 0}$. Day is a staneh Republican.

State Exterminatof A. M. Jackley is official foe of State's rattlesnakes, last year directed the slaughter of 80,000 . He was bitten once.

Lutheran pastor, Rev. John Vold, tends three churches indrought-hit Clark County. Lutherans outnumber other sects in State.

Poet Laureate Badger Clark writes cowboy ballads in cabin in Custer State Park. Highway sign invites motorists to visit him.

Pfotessof Niels Hansen of State Agricultural College is eallet "Burbank of the Plains" for his work with hardy grasses, grains andfruit.

South Dakota's "Betsy Ross" is Mrx. Ida MeNeil who designed State flag in 1200 , She now operates radio station KGFX.

Plater Miner Bill Smith, 91, was born in New York City, has not been hack since 1865. He has dug Blaek Hills gold since 1875.

Widow of Republican Boss Petef Norheck summers with grandehildren in Custer Park. Norbeck championed State's sceniebeauties.

Secretary of State is Olive Ringsrud, an exschoolteacher who boasts of her 185 lb , and big feet. She may run for governor next year.

Governof Haflan J. Bushfield gets 83,000 a year, lowest for any governor. Indians call him "One Shot" because of lucky buffalo kill.

Lawyef Chambers Kellaf, 74, has been chief counsel of the biggest U.S. gold mine (Homestake) since 1904. He shot bear two years ago.

## RURAL CRED/T <br> OFFICE

Circled by the pages of her aovel, Gypsy Rose Jee knuekles down harefooted in her New York apartment to final revisions. "The Belle of the Bistros," as she calls herself, uses a typewriter with smull type because it's "refined" anal a blue riblom because it's "sexy."

## 

## GYPSY ROSE LEE TURNS MYSTERY AUTHOR

B dier earning 82,000 a week for ing in public, Gypsy Rose Lee has other aceomplishments. She reads Marcel Pronst and Karl Marx, eollects modern art, dabbles in left-wing polities and talks a vivid, salty English in a ladylike voice. But her newest achievement is, slee hopes, her most enduring
 one. It is a book ealled The GString Murders, just published by Simon \& Sehuster at 8\&. As a mystery story, The G-String Murders is only third-rate. But as a pieture of the burlesque business and, specifieally, of the strip-tease profession whieh Gypsy herself has built into a national iustitution, her novel is a rich and lusty job, brimming over with infections vitality and a hilarious jargon of her own. That Gypsy wrote it all by herself, between strip-teases is abundantly proved by her lively letters to her publisher, signed "The Naked Genims" or "The Girl With The Diamond-Stueded Navel,"

The murder weapou in Gypsy's story is a beaded, plusli-lined G-string. A G-string is the last ornnte loin-cloth down to which a teaser strips after performing, if pernitted, a suitable number of "bumps" and "grinds" (burlesque danee movements), Gypsy herself plays a leading role in her own book. So do many of her friends and foes of the burlesque eirenit. A backstage waslroom, equipped by contributions from the east with handsome new fixtures, forms a setting for some of the big seenes in her story. And for LJFE Photographer Eliot Elisofon, Gypsy gathered nbout her a company of geuial eolleaguex to stage, in New York's Eltinge and Republie "girlie show houses," the high spots of her racy, raueous yarn.

A gary slabhing scene in the property room of "The Old Opera Bnrlesque" introdurea Gypsy's cast of characters, Girls who posed this fight for LIFE are all hurlesque stripteasers. 1eft to right they aret Gee Gee Graham (Georgia

Sothern), Dolly Baxter (Gladys Fox), "crilled Dymamie Ditly berauseshe works so hard and fast," Lolita La Verne (Boo Ia Von), professionully billed as "the Gotlen-Voiced Goddess," and Gypsy modestly acting herself. Jealous

Dolly has just stabbed La Verne on the shoulder witha fingermail file in a tussle over the harlespue company's straight man. Balloon-like objects in background are bladders used by comedians for conkiug their stage vietims over the head.

## "WELLESLEY FUDGE CAKE made with BAKER'S CHOCOLATE <br> \section*{is a taste you just never outgrow!"}

 "baker chocolate
(One of Ameriot, heri)
miss E. L., of Lafayette, Indianu, has un easy recipe for a niee confeetion she cally "Chocolate Crisps"... Baker's Semi-Sweet Chopolate with 2 squares Baher's Enswerteraed Cliocolute and pour over 6 eaps Post Trasthre. Drup by teaspoonfuts on waxed paper to conl.

Ask your grocer for BAKER'S SEWT SUEETCHOCOL 4TE. It's nem. . . dehiciours to eut . . . ideal for "Chencolate Chi $\mu$ Conkery". . . very hnmily fur making quich sauces and frostings.
J. E. S.-Y'es, Baker's Germatr's Sweet Cluocolate maken a daudy "emergerney ration" to carry in your purse or conat pochef. It's a slim lirm har-daes not get messy in the furkage?

This famous blend was develoned long ago for Walter Baker by a mun nancel Samuel German. Given energixing nourishment. Ilas an invigorating flavor-not eloyingly sweet.

BHKER'S GERVAN'S SHEFT CHOCOL.ATE is un old-time cooking finorile, too. Yim'll find grand recipes for surlh treats as hot chonvatute and icebor cake right on the puckage.

THERE IS NO SENSATION ON EARTH quite like that when your Nired bady sinks gently Inta a Beautyrast. Yaur aches and weariness seem to fiat away . . . you
became Inslanily, completely, blisffully relaxed. No wander the buayant suppert a Beautyrest gives yau has been called the "supreme thrill of lurury camfart."

Things you probably mever linew abont a matress

## 1. Springs ore joined in the ordinory mattress.

Mattresses mayy look alike-lme there's a vast difference in the comfort they give. That's because comfort depends on the kiud of "insides" it has. And there are two numin types of mattress insides.

This is the "orclinary" type. Is yon see, the spriugs are joined together. When you push one down. others around it must go down, tors. Thus, the mattres mast slope toward the spent where your greatext weight lies-give yon "sag" support.

## 2. But Beautyrest's 837 colls act separately.

Each one of Beantyrest's 887 coils is like a tiny mattress in itself. Set in its own cloth poeket, each coil yields separately and independently to every whim of your body. That's beranse it's not joined to its neighloor.

And that's why Beantyrest gives you buoyant suppant. However you may lic or turn, your hody is cradled-evenly, eompletely, unturally. That's the seeret of Beantyrest's luxury comfor!!

## 3. Sit on o Beautyrest oll you want!

Thanks to a patemted "sats-proof" border, the edges of the Iematyrest ean never break down. Sit on them all you want. Those deep, Ileep sides stay firm and even and resilicut.
Lmmps and hollows just won't form on a Benutyrest, either. No, the whole mattress stays suooth and neat-looking thronghont it $\times$ long. loug life. That's why you have to turu your Benutyrest only 4 or 5 times a year!

4. This 10-year guorantee is conservativel

If any stru-tural defect osears within ten full years, your Beautyrest will be relnilt free of elmrge? Which is a pronise you'll prolnally never need hold ns to. For these are the findings of a famons independent lnboratory:
The United Stutes Testing Company testel the 17 leading popular-priced makes on their Mattress Endurance Machines (Cert. Test No, 11766). No other make lasted one-third ay long as Becalyreat?

## 5. Why Beautyrest stays "fresh" Inside.

Some mattresses will get stale and musty insidein time. Not the Beantyrest. The ventilators aronud its deep sides are not just ornaments. They really reutitate.

Prove this to yourself. Put yonr hand over were of these openings ns you sit down on a Benutyrest. Lou'll feel the air come bronthing ont. As your rise, you'll feel fresh nir being drawn back in, to keep the muttress fresh and clean and sanitary, alwnys.

## Beauturest RIC, Us mat, Ont. BUILT FOR SLEEP price 539 .s SIMMONS COMPANY <br> 

This is the Bienntyrvat tuthet.
comfort known to man! Is that a bargain or isn't it?

## 6. Beautyrest costs only o penny o night!

Different from other mattresses, the Benutyrest is always the same price wherener you go- 839.50 (within the Cinited States).
The Beautyrest is a real bargain at this price. Figure it out for yourself. On our conservative 10-year gaaranter alone, it comes down to onily a penny a night... for the most luxurions sleeping

Besutyrest Mox Spring, for wre with Beautyrest Mattrese, 839.30, or bet me Ace Coll Spring, 310,.35.

"A cop's fieid day" is Gypsy's caption for this raid on the Old Opera Burlespue. Behind Gypsy (front center) is La Verne. Though somebody is trying to close the show, the owner says: "No artist workiug under my thanner rides in the pie wagon." So the company goes to juil in limousines.

Strangled with a G-string, Ia Verne is found in the washroom while the conapany celebrater new plambing fixtures. "The Golden-Voiced Giokless has hit her last high C," writes Gypsy. Bending over her is Biff Brannigan, posed by Burlesque Funnyman Red Marshall, now in Panama Hattie.

# PORTAL britain's chief of air Staff wears an old school tie but as boss Of the r.a.f. he dishes out bombing raids that may destroy hitler by JuLuN BCH IR. 

0ne day last summer a group of men sat in the office of Rear Admiral Lyster, chief of the British Fleet Air!Arm, discussing the amount of refrigerating equipment in Germany. One night, shortly thereafter, British bombers, launched from an aircraft carrier on the Mediterranean, set fire to the great cork forests on the Italian island of Sardinia. Between these two events lay a close and calculated strategy.

The men who had gathered in the Rear Admiral's office were British economic experts. They had discussed refrigerating equipment in Germany because the Nazis, in their efforts to counteract the British blockade, were building cold-storage plants to preserve their available foodstuffs. Cork, said the experts, is an important item in the manufacturing of cold-storage equipment; and Germany imports cork from Sardinia.

The Rear Admiral got in touch with Air Chief Marshal Sir Charles Portal, Chief of the Air Staff of the R. A. F. and Britain's No. 1 man in the air. Portal considered the triangle inextricably linking Sardinian cork and German cold-storage plants with British bombs, and flashed a green light. A few nights later the amount of Sardinian cork henceforth available for German use was reduced by fire and flame.

The pyrotechnics of the Sardinian raid are only a Roman candle in the giant bombing display which the R. A. F. under Portal and the Fleet Air Arm under Lyster hope to put on. With the persistence of a district attorney bent on destroying a gang, Portal is at present engaged in the systematic business of destroying the ability of the Axis to continue the war. He hopes the destruction of Sardinian cork is simply a flicker in the conflagration that will eventually consume the railroads, oil plants, canal locks, hydroelectric works, armament factories, naval bases, shipping, and, if need be, the homes and the farms of the Axis.

In an Empire which last year proved it could take it and which this year shows signs of dishing it out, Air Chief Marshal Portal is the

Before the R. A. F. finished off this sro-ft. cargo liner moored at Rocterdam in a low-flying daylight attack on Aug. 28, it was damaged by two bombs, which are scen bursting astern.
chief disher-outer. By last week his bombers were lighting up fires in western Germany, northern Italy, Africa and Berlin. His fighters and light bombers were commuting across the Channel in the fourth month of their almost daily round of work above the Lowlands and France. A few British planes were fighting in Russia; many more in the Middle East. In Singapore new planes were being uncrated. On a hundred-odd airfields, tucked away in Britain, the Dominions and the U. S., nearly 100,000 young airmen were learning to fly for the R. A.F. Big-bellied Catalinas and Sunderlands were shepherding precious convoys and searching for Axis raiders and submarines on the world's seaways.
As Chief of the Air Staff, or CAS, Portal occupies a high perch in British officialdom. Above him are his immediate and sole superiorsthe Churchill Cabinet and the Committee of Imperial Defence of which Portal himself is a member. Below him are his immediate subordinates -the eight Air Marshals of the eight R. A. F. Commands (Bomber, Fighter, Coastal, Middle Eastern, Balloon, Ferry, Far East and Army Co-operation). Portal's job is to lay down the general policy of the R. A. F. Portal maps the strategy. His subordinates work out the tactics. He decides what types of targets shall be bombed. Air Marshal Sir Richard Peirse, chief of the Bomber Command, then decides when and how to bomb them. Portal decides what types of British targets shall be defended. Air Marshal Sir William Sholto Douglas, chief of the Fighter Command, then decides how to defend them. Portal decides how many planes shall be allocated as between the British Isles, the Middle East, the Far East and now Russia. The chief of the Ferry Command and members of the Air Staff then decide how to get them there. The orders which sent several American-made Catalinas winging over the Atlantic in search of the fleeing Bismarck were given by Air Marshal Sir Frederick ("Ginger") Bowhill, then chief of the Coastal Command. But the general policy which makes Axis sea

After the R. A. F. finished off the liner, it keeled over on its side at the Rotterdam dock. After the two near hits, the British plane circled back and sank the ship with a direct bomb hit

## Crosby Square AIRFILM SHOES

A layer of sealed air cells protects you from the chilling, icy streets of Winter or the scorching pavements of Summer ! The dramatic demonstration shows how this amazing material, extending from heel to toe, actually shuts out much of the discomfort of extreme temperatures. It also resists moisture.

## You Walk on Air

Here is truly a comfort thrill! Airfilm material is $61 \%$ air - supports your entire body weight-a cushion against shocks ... In appearance, too, Airfilm Shoes are leaders. They have all the fashion authenticity for which Crosby Square is famous.

raiders a "must" on the R. A. F.'s target list is Portal's. During the epic chase Portal stuck close to his London desk. As he does when a "big show is up," he slept underneath his Air Ministry office in a small room set aside for this use. Each morning, however, he briefly returned to his nearby hotel. "Come what may," says his valet, "Sir Charles insists on a freshly pressed pair of trousers each day."

## He takes up "the sport of kings"

Charles Frederick Algernon Portal, more commonly known as Peter, is an exception to the rule that military leaders must be handsome like Pershing, grandfatherly like Pétain, mustachioed like Budenny, diminutive like Napoleon or gargantuan like Göring. Portal is none of these. He is a traveling salesman's $; \mathrm{ft}$. II in. tall, big-boned but slight, with a beakish nose and balding black hair. Two British army officers, seeing him for the first time when he arrived at Buckingham Palace last New Year's Day to be knighted, gasped in one breath: "Good God, he's fantastically ugly!" The swarthiness of his complexion is possibly a throwback to his sturdy French Huguenot ancestors who, after weathering ten years of religious persecution in France after the revocation of the Edict of Nantes, finally fled. They arrived in England in 1695 with a shipment of wine. When one of the empty wine casks was opened, Portal's French forebears stepped out.
Portal himself was born of a well-to-do family in Hungerford, Berkshire, 48 years ago. As a boy he played cricker with his two brothers and father at the local Hungerford club. It was during one of these matches that news reached the elder Portal that a fourth son had been born. "Hurrah," he shouted with a cricketer's zeal, 'we'll soon have enough for a Portal 'eleven' $\Gamma$ ' The Portal team spirit flagged, however, and today, aged 86, the elder Portal presides as Justice of the Peace Court of Pangbourne and is still the father of only four sons. Recently Churchill offered the Air Chief Marshal a fine cigar for his father. "It's much too good for father," Portal jokingly replied, "I'll smoke it myself." The Prime Minister then offered Portal a second cigar. Next day Portal's father strode into court, puffing away at Churchill's Havana.

After a schooling in Surrey, Peter Portal was dispatched to the great English public school of Winchester, where Matthew Arnold, A. P. Herbert, Air Chief Marshal "Stuffy" Dowding, General Sir Archibald Wavell and a host of other British leaders outgrew their britches. He became an excellent left-handed bowler and set the school cricket record at the age of $\mathrm{I}_{3}$. The most charitable tribute his headmaster could offer Peter as a scholar, however, was that he

As a pilot with 60 Squadron in World War, Portal smoked a pipe.

As a falconer Portal posed for this photograph in 2923 with one of the hawks which he bred.

Rich with the facts and the ort of our exeiting oge, FORTUNE is o history of todoy ond a book to save for tomorrow.

With Lady Portal, the boss of the R. A. F. relaxes briefly in their hotel room, He is so busy that Lady Portal recently said: "Once in a while he gets home-for breakfast."
"thinks more of his hawk than his work." The headmaster's comment alluded to the fact that Peter was a follower of the 4,000 -yearold sport of falconry. As a child, reading medieval tales, he became fascinated with the ancient "sport of kings" and upon encountering a hawking club out with their birds, he determined to master the art. He was soon breeding hawks and, when 16 and at Winchester, he wrote scholarly articles on the subject for The Field magazine. One of his articles observes with the precociousness of an overgrown Quiz Kid: "When flying at partridges with Tiercel or male Peregrine, the modus operandi is as follows-if the birds stop well out in the open, we walk around them so as to get to windward, unhood the hawk and throw him off. . . ." Lady Portal still treasures the manuscript.

Of the world's few remaining austringans, as falconers are called in their archaic jive, the two most illustrious are Portal of the R. A.F. and Göring of the Luftwaffe. What strange psychological nuance should thus unite the world's two bitterest rivals for mastery of the European sky may be left to a psychologist's study, but it may be noted that like aerial warfare, falconry is a deadly art. Portal himself has remarked that a well-trained hawk, power-diving with unerring aim on a quarry of unsuspecting partridge or quail at $200 \mathrm{~m} . \mathrm{p} . \mathrm{h}$., is "the dive bomber of nature." Portal, however, has no intention of playing partridge to Göring's hawk.

## He races off to war on a motorcycle

Besides hawking, young Peter indulged in the dangerous and then novel sport of motorcycle racing. Poultry and pedestrians scrambled for shelter when Peter came swerving down Hungerford's streets. When he left Winchester and entered Christ Church, Oxford, in 1912, Portal left his hawks at home but took his motorcycle with him. In 1914 he won first place inthe unlimitedclass ofthe Inter-University HillClimb.
The assassination of the Archduke Franz Ferdinand a few weeks later found Portal "reading my law and eating my dinners" in London's Inner Temple where he was studying to become a barrister. On the day that England declared war, the future flying leader of the Empire was racing his motorcycle in a country meet. At the end of the race he continued riding until he reached Oxford where he tried to enlist in his brother's regiment. He was told that he would need at least six months' training before being sent to France, but that if he voluntecred as a motorcycle dispatch rider, he might reach the front more rapidly. Portal thereupon remounted his motorcycle and sped on to Chatham. There he enlisted as a corporal in a motorcycle unit, received a kit and eight days later landed in France.
The early days of the first World War were an unbroken succession of Allied nighemares. As there was no wireless at the front and as

## PORTAL (continued)

telegraph lines were down, British communications depended largely upon the ability of a small band of young motorcyclists, including Portal and Anthony Wilding (the Australian tennis champion), to get through the Flanders mud. Portal performed his share of the task so well that, as Corporal 28082, he was mentioned in General Sir John French's first dispatch. During the week of the famous retreat from Mons, Portal scraped together four consecutive hours sleep. On the seventh night he fell asleep over the handlebars, crashing into the automobile ahead. The car that Portal had rammed was carrying General Sir Douglas Haig. Haig stepped out and the general who was to become the commander in chicf of the British Army picked the corporal who was to become the future CAS up out of a roadside ditch. After Portal mumbled that he felt all right, Haig drove on. Portal still carries a scar over one eye and, although he is too tactful to mention it, he implies that Haig might have offered him a lift.
On another occasion a bursting shell killed five fellow dispatch riders and blew Portal through a doorway. Pulling himself togerher, he was administering first aid to the wounded by the time the ambulance arrived.

In the second summer of the war Portal joined the Royal Flying Corps, as the infant R. A. F. was then called. Fighting on the Western Front had mired down and dispatch riding had become correspondingly routine. To his new job, Portal brought enthusiasm and little else. In 1912 he had taken his first flight when he flew 20 miles as a passenger in an early Avro machine from Larkhill to Hungerford for tea. The pilor, then a young R. F. C. lieurenant, was Robert Brooke-Popham. Today Brooke-Popham is the Air Chief Marshal in command of all British forces in the Far East. The planes he receives come with the approval of his former passenger.

Portal's first brush in aerial war was as an observer, seated in the rear cockpit of a small, wobbly Morane "Parasol." Men had never before fought in the air and to those men belonged the thrill of pioncering. Except for a Lewis gun which fired only in the direction in which it was attached, the observer was expected to improvise his own means of defense. In Portal's case, this was nearly a matter of life or death, as the 21 -year-old observer discovered that the cockpit was too small to hold both the Lewis gun and his own gangling legs. When a fellow flier graciously offered to sell him a Winchester automatic rifle with which to replace his Lewis gun, Portal accepted and paid \$jo out of his pocket. Several months later, while home on leave, Portal was fingering through a gunsmith's catalog. His Winchester was listed for $\$ 22$.
The first flight of the R. A. F.'s future CAS had the spontaneity of a poorly rehearsed vaudeville act. With Portal in the observer's seat, the pilot flew over the German lines and then lost his way. Portal navigated home. With commendable understatement he later remarked: "I took a very poor view of flying in those days."

## Portal almost hags Immelmann

As an observer Portal came up with one of the cagiest tricks of the war. The victim of Portal's craftiness was Max Immelmann, originator of the famous "turn" and the first aggressive German flying ace. For months he had been hawking the R. F. C.'s planes by patroling at ceiling height and then swooping down on their unpro-

Sir Richard Peirse, 49, is Air Marshal at head of the Bomber Command. His father was an admiral. Peirse works out the tactics for Portal's bombing strategy.

Sir Frederick Bowhill, 6r, is peppery Air Marshal at head of the Ferry Command. He formerly headed Coastal Command and bis planes nabbed the Bismanck.
tected tails. Portal's squadron decided to immunize Immelmann by sending up three machines in sandwich formation. The first cruised at $10,000 \mathrm{ft}$., the second at $6,000 \mathrm{ft}$. and the third at $2,000 \mathrm{ft}$. Portal sat in the observer's seat of the second plane. Instead of a forwardfiring Lewis gun, he held his Winchester which he could fire in any direction at will. To bait the trap to perfection, he then installed himself in the cockpit so that he sat backwards but, by reversing the helmet on his head, appeared to be facing forward. When Immelmann sighted the sandwich, he roared down from $14,000 \mathrm{ft}$. to pick off Portal's plane. Portal coolly held fire until the German closed in for the kill. Then he threw off his helmet and fired. Immelmann escaped but thereafter changed his tactics.

After serving as an observer, Portal somewhat reluctantly signed up for a pilot's training course. Upon its completion four months later, he was stationed in France as one of the original pilots of 60 Squadron. This squadron was one of the truly great flying circuses. Like so many punch-drunk koala bears, its pilots thought nothing of going on dawn patrol with a greatcoat slung over pajamas. As a personal gesture, Billy Bishop machine-gunned a German airdrome, shot down three enemy planes and returned to his own base for breakfast. Lionel Rees attacked 14 German bombers singlehanded, had one leg sliced to shreds, ran out of ammunition, landed for more, went up again to continue the attack and won the V. C. Like Portal and Göring, he too was a falconer.

## Dowaing three Germans in 10 minutes

While there is no record that Portal ever went off on a raid in pajamas or shot down three enemy planes before brushing his teeth, he eventually carried out four bombing raids in one night and five more two nights later. In 1917 as a major in command of 16 Squadron he took five Germans on at once and within ten minutes proceeded to shoot down three. He also machine-gunned troop trains and searchlight batteries, and by the end of the war was reputed to be the most fearless and accurate artillery spotter in the business. In one 33 -month stretch, he flew 870 hours and spotted for 248 artillery "shoots." Having started the war as a corporal of 20 , he ended it as a colonel of 25 . Today under the R. A. F. wings on his left breast, he wears two rows of frayed ribbons as reminders that in the last war he won the D. S. O. and bar, the purple and white Military Cross, the 1914-1915 Cross and Mons Star, the World War General Service ribbon, the Chevalier of the Legion d'Honneur and the Victory Medal with leaf. "No commander," wrote Douglas Reed, the jour-nalist-author of Insanity Fair, who flew under Portal in 16 Squadron, "more completely held the imagination of his officers." When Reed lay mummified in bandages following a crash, Portal brought him a long cigaret holder so that Reed could smoke.

It was shortly before the Armistice, while in command of an aviation group in Lincolnshire, that Portal met Joan Margaret Welby, a baronet's daughter. On his first leave in 1919 they married. According to one report the Colonel took Miss Welby aloft in his plane, proposed and refused to land until she said yes. Lady Portal denies the story, which is probably apocryphal, but she rather enjoys it.

Following their marriage they bred hawks and spent their spare time on the Lincolnshire Fens, flighting peregrines for partridges and merlins for skylarks. Like many another war ace, Portal was undecided whether to make flying a career or resume pre-war law, but in 1920 he accepted the post of chief flying instructor at Cranwell, the

## PORTAL (continued)

"West Point" of the R. A. F. Two years later he was invited to attend the first course given at the newly created R. A. F. Staff College. The instructor, Sir Wilfrid Freeman, with whom he had flown in 60 Squadron, considered him the most brilliant pupil in the class. Today Sir Wilfrid is Portal's first assistant.
At the end of the course Portal was posted to the Directorate of Operations and Intelligence at the Air Ministry. The year was 1923 and it was "about this time," says Lady Portal with the finality of a time clock, "that Peter began to work." His ability was so readily apparent that by 1933 Captain Harold Balfour, another 60 Squadron oldtimer and the present Undersecretary of State for Air, prophesied that "Portal is a certainty for the position of future CAS.'
One incident that deeply impressed Portal's colleagues and superiors occurred in 1927, when Portal was given command of a bomber squadron at Worthy Down. Six weeks after his arrival he proved to be the best bombardier in the R. A. F. With Portal at the bombsights, his plane won the coveted Laurence Minot trophy for accurate bombing in 1927. He won the trophy again in 1928. After that he did not compete.

## He delivers a model scoiding

Another stretch at the Air Ministry followed his stint at Worthy Down, and in 1934, at the age of 41, he was the youngest man ever entrusted with the Aden Command, which controls the entrance to the Red Sea. Aside from the heat, the chief difficulty of the Aden Command lies in controlling the Arab tribesmen who live in the hills. In Mesopotamia after the war the British had devised an ingenious and remarkably humane weapon, known as the "inverted blockade," to crush tribal revolts with minimum bloodshed, and Portal perfected the method at Aden. As he explains it, the system is to offer a law-breaking tribe the choice between paying a fine and surrendering the culprits, or evacuating their villages and fields. Instead of being blocked in, they are blocked out. One ultimatum addressed to the tribesmen by Portal might well serve as a model scolding, softened by some sound fatherly advice: "If you don't produce the fine and the men, you must leave all your villages and fields, taking all your property and animals with you and keep away until the Government gives you permission to come back. The Government will do this as soon as you have complied with the terms. Until you have complied, your villages and fields may be bombed or fired on at any time, and you are particularly warned not to touch any bombs that don't go off, as, if you do, you will probably get killed.
Besides learning a great deal about Arab psychology and colonial

British hombiag problem is diffitult because $23 \%$ of total weight is taken up by foc and only $8 \%$ by bombs. Fuel bulks so large because cight hours must be allowed for 1,500-mile round trip between base in England and Berlio. The eight hours also include one hour for remaining over Berlin, extra half hour for solving navigational problerns.
rule, Portal learned how to sail and take photographs at Aden. In return he introduced tana and swordiish fishing to the garrisont Portal developed his interest in sailing and photography with the same characteristic thoroughness with which he had previously learned to breed hawks, race motorcycles and wage war. He sailed before dawn every day and read every available book on the subject. Later he sent to England for a specially built boat, and after it arrived he copped most of the races. As an amateur photographer, he specialized in microphotographs of shells and plant life. Today he owns enough photographic equipment to open shop as a professional tomorrow.

In 1935 Portal left Aden, served briefly in India, and returned to London to teach "air strategy" at the Imperial Defence College. At the same time he served as the highly important Director of Organization at the Air Ministry and in 1937 was promoted to the rank of Air Vice Marshal. What Portal taught and what plans he hatched are military secrets, but Portal's touch is apparent in the all-around excellence of the training which British air crews receive and in the persistence with which the R. A. F. specializes in accurate bombing against specific targets. As a World War airman who made his greatest reputation as a spotter for artillery, Portal plugs away on the theory that bombers should bomb with the accuracy of ground guns.
The start of this war found Portal a full Air Marshal in charge of R. A. F. Personnel. This important administrative post gave him a seat on the supreme Air Council, but little say in the actual conduct of the war. Although Poland was mercilessly bombed, the war in the air remained in its chrysalis stage and British "bomphlet" raids on Germany were scarcely calculated to excite a hard-hitting slugger like Portal. It was against this background of strategic inertia that ${ }^{\circ}$ Portal was suddenly made chief of the Bomber Command in April 1940 by Air Mars hal Sir Cyril Newall, the CAS whom six months later Portal replaced.
Shortly thereafter the bombing of Germany, Britain and France began in earnest. When France collapsed, Portal pretended that Britain's chances had rarely been brighter. Concealing his own fears, he would enter the officers' mess at the Bomber Command, cheerfully rub his hands, order his sherry and sit down to chat. Several months later when the worst of the peril had passed, Portal called his officers together to thank them for the courage they had shown during those days. "I can tell you now," he confided, "that there were days when I came into this mess almost believing that all was up."
Last October Portal was just as suddenly hoisted out of the Bomber Command and made CAS by the Churchill Cabinet. His first words on hearing the news are said to have been: "Good, now I'll bomb hell out of them." The raid on Munich which followed was Portal's personal inspiration. He felt that a raid on the city, while
continued on next page

German hombing problem is simple because only $12 \%$ of total weight is taken up by fuel and 22\% by bombs Although Nazi bonbers based behind Ostend have only 135 miles to fly to reach London, they carry enough fuel for 1,000 miles on chance that adverse weather conditions may force them to land as far away as Bordeaux or Breslau.

# "Not Malt, Not Rum, Not Wine, Not Nuts, 

So Help Me, It's Tobacco!"
6137 No. Meridian St., Indianapolis, Ind. June 27, 1941
Larus \& Bro., Richmond, Va. Gentlemen;

I'm still a young fellow, or like to think so, and as long as I've smoked, I've smoked a pipe. Life for me has TVe smoked a pipe. Life for me has
been a continual round of trying different tobacco.
I've paid as high as six dollars a pound for the stuff. I've had mixtures made to order.
I've smoked tobacco that tasted like honey, that tasted like rum, that tasted like wine, that tasted like maple sugar, that tasted like nuts, that tasted like burning hickory, that tasted like sweet grass. I once smoked a British blend that tasted like somebody's old tweed suit, so help me.
But Edgeworth - I can't possibly explain it, but Edgeworth tastes an awful lot like tobacco! Possibly it is tobacco and not malt, not apples, not rum, not wine, not something to disguise the taste of a product the nanufacturer is ashamed of.
I shouldn't take up your time like this, really. But I long ago promised the first time I found a tobaceo I could smoke for a month or nore steadily without tongue-bite, throat irritation, dizziness, and at the same time enjoy the flavor every time I lighted the pipe -when I found that kind of tobaceo, I was going to write the manufacturer and tell him about it. Thanks for Edgeworth, gentlemen!

come relief within an hour. Pluto acts swiftly ... gently. ... pleasantly. So, when you need to rely on a laxative. use Pluto Water, Get it at any drug store. Only 10 e for new two-dose size bottle; also larger eeonomy sizes. Freuch Liek Springs Hotel Co., French Lick, Indiana.

\section*{PORTAL (continued)}

Hitler was there celebrating the anniversary of the Beer Hall Putsch, would dampen German morale, if only momentarily. Like his opponents, he is interested in the psychological effects of bombardments, and the British may yet teach the Germans a trick or two when it comes to screaming bombs and screamers on planes. Portal himself immensely enjoys hearing stories indicating the exaggerated fear that German civilians have of incendiary and time bombs, and one of his most pleasant chores is examining the diaries and documents of captured German airmen. It is the R. A. F.'s boast that it not only knows the precise whereabouts of almost every Luftwaffe squadron at a given moment, but that it even knows the color of the squadron leader's mustache.
Like Nelson at Trafalgar, Portal was 47 when he was made CAS. In six years he had risen from Command of the Aden outpost to the highest position in the R. A. F. He was the first real airman the R. A. F. has ever had for a CAS, and the youngest. He is also one of the coolest cucumbers in the R. A. F.'s patch. Typically, on the night of the great German "fire raid" on the city district of London, Portal could not be found. Finally one of his Air Marshals discovered him on the roof of the Air Ministry, grimly watching the Nazis trying to burn London down. "Well," said Portal with the awe of a tourist who has just seen an unforgettable spectacle and with the determination of a CAS who expects to drive the Luftwaffe from the sky, "that was an amazing sight that will never be seen again."

Except for Erhard Milch, Portal has never met any of the top Luftwaffe men and has never visited Germany. Although British pilots tend to call their opponents "Jerry," in the Air Ministry, where memories extend back to World War days, the Germans are called Boche or Huns. Portal calls Hitler "Adolf' or "That Man." While there is no position quite comparable to Portal's in the Luftwaffe, Göring is Portal's closest counterpart except that the Field Marshal also plays a massive political role in the Reich. Other than a mutual interest in planes and hawking, their personalities could scarcely be less alike. Portal is a Caspar Milquetoast compared to Göring's Falstaff. Whereas the No. 2 Nazi owne a Palace, a castle, a hunting lodge, a countryside "snuggery" and a large part of the wealth of Europe, Britain's No. 1 airman owns no home and sleeps in a hotel bedroom. Whereas Göring may wear any one of an estimated 90 different uniforms, Portal's uniform has not changed since his junior officer days except for a few stripes and a piece of gold braid on the cap. Göring habitually bellows out orders with a pair of Wagnerian lungs and whacks subordinates enthusiastically across the back; Portal invariably prefaces his instructions with an almost apologetic "Do you think you could do this for me?" and employs no gesture more violent than prodding a subordinate in the ribs with the stem of his pipe.

While Göring stuffs himself on whipped cream and entire cakes, downs vast krugels of beer and munches cold cuts and drumsticks between meals, Portal eats with the parsimony of a sparrow and the regularity of a metronome. Most of his meals, sent down from the cafeteria of the Air Ministry, are eaten at his desk from a tray. He has an Englishman's taste for roast beef and lamb and usually tops off his meals with an apple. He chose apples with the same careful consideration that might lead him to bomb Italian spaghetti factories instead of German oil plants. After comparing the relative merits of several fruits, he selected apples because: 1) they are the most readily obtainable; 2) they require the least trouble to prepare; 3) they can be eaten while reading reports.

All Dortal's boyhood chums were killed in the last war and he has no intimate friends. But he probably sees more of Sir Wilfrid Freeman, his vice chief of staff, and Captain Harold Balfour than anyone else. His oldest daughter, Rosemary, 17, is taking a secretarial course in London. Another daughter, Mavis, 14, is away ar school. His brother Reginald was captain of the cruiser York which was sunk with small loss of life at Crete. With Lady Portal, who busies herself with welfare work, Portal lives in a London hotel bedroom with bath. The room contains twin beds and two dressing tables. Suitcases are piled in one corner. Several yachting manuals and a heavily thumbed copy of The Orford Book of English Verse rest on a bedside shelf. In the corridor leading to the bath hang a raincoat, an extra R. A. F. uniform and a cap. Except for a colored print of The Eagle, an early experimental airship, the room is as devoid of decoration as the wardroom of a battleship dressed down for action. Although the greatest aerial war in human history has necessarily conflicted with his reading, he has recently finished C. S. Forester's Brown on Resolution and Richard Llewellyn's How Green Was My Valley. Lady Portal bought him For Whom the Bell Tolls. "When he

A NECESSITY IN EVERY HOME
Genuine Rimac Flexstone purs
smooth, sharp edze on dullest knife quickly and easily.

saw the length of it," according to Lady Portal, "he about fainted."
The R. A. F.'s friendly grouse is that duty keeps Portal strapped to a desk. As a result, he has probably seen no more of the action of this war than a London or Dover civilian. His "day" begins at 9 a. m. and ends at any time within the next 24 hours. Much of it is taken up with confidential reports, with interviewing British pilots home from a particularly interesting raid, with phone calls or visits from the Air Marshals of the eight R. A. F. Commands. Portal is in frequent conference with Archibald Sinclair, the Secretary of State for Air, who has an office down the hall. While Sinclair is nominally Portal's boss, there is a great deal of give-and-take between the two men. Portal passes on Sinclair's ideas from a technical view and Sinclair passes on Portal's from a political. Portal attends the almost daily meetings of the War Cabinet and confers privately several times a week with his two opposite numbers in the senior servicesAdmiral Sir Dudley Pound, the First Sea Lord, and General Sir John Dill, chief of the Imperial General Staff. Some measure of how strenuously Portal works may be gathered from the fact that although Portal by rights should have joined Pound and Dill at the recent Roosevelt-Churchill meeting, the pressure of work kept him at his desk and he sent Sir Wilfrid Freeman instead.

\section*{Portal outquotes Churehill in Latin}

The CAS sees Churchill one or two evenings a week at the Prime Minister's famous dinners at No. 10 Downing Street and probably weekends more often with Churchill at Chequers than any other man in the services. Churchill smokes his cigars, Portal puffs on the "Summer Flowers' robacco in his pipe. One of their running discussions concerns the desirability of teaching Latin in English schools. Portal favors its use, if restricted to honor students, and the Air Chief's Marshal's ability to outquote the Prime Minister in Latin is a minor point in favor of Winchester over Harrow.

Portal's men have the same confidence in him that Norre Dame teams had in Rockne. Like Portal, most are convinced that, given enough heavy bombers raiding Germany and Italy day and night, Hitler and Mussolini can be made to eat humble pie. Although some R. A. F. officers call Portal "a bomber boy," implying that he is overly concerned with bombers and offensive war, Portal's answer is justified by the last two years: "We won't win the war with fighters and we're in this war to win it."

There was at one time, however, a dark intrigue afoot against Portal. In the corridors and offices of the Air Ministry, members of his staff conspired last winter to make him take an occasional badly needed rest. He finally compromised and promised to take one day off a month. On the morning that he returned from his first day off, the conspirators asked how he had enjoyed fishing for trout on the Itchen or Test or flying the model airplanes that he builds. "Why," reported Portal, "My wife and I had a fine time. First we went to the movies in London." "Then," he continued, coming to the climax of his day, "I went to the dentist."

His' eldest daughter, Rosemary, now 17, enjoyed riding on her father's back wheo she was 7 (abore). The house in the background is Sulham Hall, Portal family estate.

It's good for you to get Dog-tired outdoors in Jockey Longs
How long is it since you spent a grand day, outdoors in the crisp air with a dog at your heels and a good companion at your side? Occasions like that and the physical well-being they bring are yours to take ... if you dress for them. And that means, starting with Jockey Longs! For Jockey Longs form the foundation of all active men's winter wardrobes. Made by Coopers, they're buttonless, smooth, warm and snug but not bulky. Give complete freedom of action and incorporate Jockey's famous inverted *Y-front which makes for a perfect fit, mild support and a non-gap masculine opening. In all weights, Jockey Longs are styled for looks as well as comfort and action. At dealers everywhere who identify themselves by displaying the Jockey statue in their stores. Cost 85 c and up. Contoured shirts to match, same prices. Also children's sizes down to four years. * \({ }^{*}\) - of support.

new york chicago los angeles san francisco seattle Made ated distriburad In Canads in Moodias, Mamilton, Ont; In Australla by Mackes

At rehearsal, church is dimly lit, undecorated. Aetual ting on ring, pronouncement of couple as man and wife ecremony is reenarted except repeating of vows, put- as minister puts stole over clasped hands, and blensing.
 and attends the formal church ceremony,

If newspaper readers in the United States in this troublons year of \(19+1\) turn to the pages of soeial doings in any community, they will find that despite the European hell and high U. S. taxes, the young people of this comutry are involved in a great wedding boom.
In peaceful times young adults deliberate, weigh, ponder and postpone marriage. In acutely disturbed times they plunge. In \(19: 50\) marriages in the \(\mathbf{U} . S\). reached an all-time high of 1,5060 .000. Daring the first nine months of \(19+1\) they seem to be going at the same brisk pace.
Athough Jistices of the Peace and town-hall clerks have all been eashing in on the marriage rush. the most popular type of wedling still is the one in which the eommunity. represented by family and friends, partieipates. In all ages there have been rebels who have sneaked off and done their "hitching" in relative privacy. They have assmmed that their union was a private matter. It ixn't. Marriage, as an institution, is the uniting of one man and one woman for the contimity of the race. It is a contract, the most important any man or woman ean make, for the production and maintenance of children. Religions ceremonies. proclamations. festivals and invocations to supernatural powers are all deliberate social attempts to impress Iim and IIer with the importance of their aet.
In modern Western eivilization the chureh wedding is the generally accepted form of solemnization of a union between man and woman. In the \(\mathbb{I}\). S., ehureh weddings are more numerons than any other kind. They may cost nothing or many

Ushers corne down aisle in pairs, four pews apart, start werlding procession. Nin one in sented after the prosexsion starls.

Bride and groom follow minister up chancel steps. Matron of honor and best man are told to wait intil couple reach nuil.

Besl man and groom (right) come from minister's study as procession starts, stand at foot of ehancel, face aisle, await bride.

Bride hands houquet (pocketlook at rehearsal) to matron, thus freeing her left hand for the ring eeremony. Best man has ring.

Bridesmaids follow usherx. Matron of honor (with a hassork as louquet) walks alone. Last comes bride with father.

Bride's right hand is teld in groom's right hand. In netual ceremony, minister then pronounces them man and wife.

\section*{Medding TReheousat} the reception and festivities afterward
thonsands of dollars. Cost depends on such trimmings as flowers, canopy, music, chureb fees. Whether large or small, most church weddings follow a set pattern. Each move, each participant has a definitc function and meaning. As an example of how a formal church wedding shonld be conducted, LIFE bere presents a rebearsal and an actual wedding, followed by a wedding reception. All were conducted mder the supervision of Madeleine Torrens, professional wedding consnltant.

The wedding photographed is that of Helen Janet Jobnson of Pelham, N. Y. to Edward George Johnson of North Hills, Long Island. They were married last month in the Church of the Heavenly Rest in Manhattan. The rector, the Rev. Dr. Henry Darlington, offieiated. Dr. Darlington gave his approval to the taking of the pictures in the hope that even greater numbers might be influeneed to be married in church. He has witnessed the sobering effects whieb a talk witb him before the ceremony, and the public prononncements of the marriage vows, have had on even the most slap-happy youngsters.

At the Johnson wedding, as at all weddings, the yommer friends heard for the first time the solemn promises, the binding pledges wbich arc eschanged. Older married folk were reminded of their own marital vows. As Helen Janet and Edward George stood before the altar and publicly pledged their troth, all those assembled four times heard and four times were impressed by the everlasting promise "to have and to hold from this day forward, for better for worse, for richer for poorer, in sickness and in health, to love and to cherish, till death us do part."

At wedding, ehureh is ablaze with lights. The altar, chancel and pew entrances are deeked with flowers.

The bridal party is all dressed up. Bride's friends are seated at left, groom's at right, families in front pews.

Groom meets bride to eseort her to minister. Miss Torrens leads father to sidd from where he gives his daughter away.

With outstretched hand, minister has pronounced final benediction. Couple turn, kiss each other, prepare for exit.

Dr. Darlington instructs party on procedure. At this point minister charges couple to speak up if marriage shouldn't proceed.

Bride's train in front of her at this point is pieked up by the matron of honor and flipped behind the bride for exit march.

"Who givelh lhis woman . . .l" Father then steps forward to give his daughter's hand to minist ir, who gives hand to groom.

With smiles of relief, couple go down aisle. Father (upper left), bored with rehearsal, is out of plaee, should be in pew.

\section*{RAIN-MASTER}

\section*{Windshield Wiper Blades}

You're in a tough spot - each time the tires of a passing car slap a puddle of smeary road-muck against your windslield... and your old wiper blades are too dull to clear it. The definite purpose of LIFE is to inform its reoders of what is going on in the world todoy-to biing them the news which can best be told in pictures.

Life Goes lo a Tedding (cminumen)

Final bachelor moments are spent by bridegroom (right) with best man in minister's study. Here best man usually gives minister envelope containing fee for wedding. Amount is optional. Best man's and usher's boutonnieres, ties, spats, gloves are usually provided by groom. He also buys bride's bouquet and corsages for both mothers.

In church vestibule, bride, on father's left arm, prepares to enter church at end of wedding procession. (Bride sometimes takes father's right arm.) Matron of honor, here awaiting her cue to step forward, follows bridesmaids, walks about twelve feet in front of bride. Veil over hride's face is usually raised at conelusion of ceremony.
