Resume:

Arnold reported, "The earth turns around the sun at the rate of 1100 miles a minute."

Ralph added, "The sun is only a small star. It looks big because it is the nearest star, just 93,000,000 miles away."

We are sure few far stars are from

us by light years.

Philip found out that the first

wheel was used in 4,000 B.C.

Lucy told us about candles. It took 10 candles to burn 24 hours, therefore 10 candles were used.
